Note 7 - Securities lending

The Company did not carry out any securities lending transactions during the reporting period.

Note 8 - Swing Pricing

Investments in the Sub-Funds are intended for long-term purposes only. The Company takes reasonable steps to seek to prevent short-term trading. Excessive short-term trading into and out of a Sub-Fund can disrupt portfolio investment strategies and may increase expenses, and adversely affect investment returns, for all shareholders, including long-term shareholders.

A Sub-Fund may indeed suffer a reduction in value as a result of the costs incurred in the dealings in the Sub-Funds' investments (caused by subscriptions, redemptions and/or conversions in and out of the Sub-Funds).

In order to mitigate against the above-described excessive trading and dilution, and consequent potential adverse effect on remaining shareholders, the Board of Directors of the Company may apply "swing pricing", i.e. adjust upwards or downwards the Net Asset Value of the Sub-Funds in the manner described below.

If on any Valuation Date the aggregate transactions in shares of all Classes of a Sub-Fund result in a net increase or decrease of shares which exceeds a threshold set by the Board of Directors of the Company from time to time for that Sub-Fund (relating to the cost of market dealing for that Sub-Fund), the Net Asset Value of the Sub-Fund is adjusted by an amount (not exceeding 2.5% of that Net Asset Value) which reflects in particular but not exclusively the estimated fiscal charges and dealing costs that may be incurred by the Sub-Fund and the estimated bid/offer spread of the assets in which the Sub-Fund invests. The adjustment is an addition when the net movement results in an increase of all shares of the Company and a deduction when it results in a decrease.

Furthermore, the Net Asset Value of Classes denominated in a currency other than the Reference Currency of the relevant Sub-Fund are adjusted upwards or downwards according to comparable principles as described above applying at Class level to compensate for foreign exchange costs by an amount of 0.05% of that Net Asset Value. The adjustment is an addition when the net movement results in an increase of all shares of the Company and a deduction when it results in a decrease.

The Net Asset Value per share as disclosed in the statistical information and in the statement of net assets is the published Net Asset Value per share (swing adjustment included, if any), whereas the total net assets disclosed in the statement of net assets is the total net assets excluding any year-end swing adjustment.

A "full swing" on subscriptions and redemptions for all Sub-Funds was applied during the reporting period. This means, that the price is swung on every dealing date on a net deal basis regardless of the size of the net capital activity, except when there is no net flow in a Sub-Fund, in which case the Net Asset Value is not swung.
