General Information

The following information is derived from and should be read in conjunction with the full texts and definitions section of the Prospectus.

Neuberger Berman Investment Funds plc (the “Company”) is an investment company with variable capital incorporated in Ireland on 11 December 2000 under registration number 336425 as a public limited company pursuant to the Companies Act 2014 (as amended). The Company has been authorised by the Central Bank of Ireland (the “Central Bank”) as an Undertaking for Collective Investment in Transferable Securities pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the “UCITS Regulations”). The Company is constituted as an umbrella fund insofar as its share capital is divided into different series of shares with each series of shares representing a separate investment portfolio of assets (“Portfolio”). Shares of any Portfolio may be divided into different classes to accommodate different subscription and/or redemption provisions and/or dividend and/or charges and/or fee arrangements and/or currencies including different total expense ratios.

At 31 December 2020, the Company was comprised of forty-seven separate portfolios of investments (“Portfolios”), each of which is represented by a separate series of Redeemable Participating Shares. These are set out in the table below:

*First day of operations.

¹ Portfolio authorised by the Hong Kong Securities and Futures Commission (the "SFC") and hence may be offered to the public of Hong Kong.

² Portfolio not authorised by the SFC and not available to Hong Kong investors.

The Company has segregated liability between its sub-funds and accordingly any liability incurred on behalf of or attributable to any sub-fund shall be discharged solely out of the assets of that sub-fund.

The majority of share classes are listed on Euronext Dublin. A full list of share classes listed on Euronext Dublin is available on the Euronext Dublin website.

Neuberger Berman Multi-Asset Growth Fund, Neuberger Berman Global Equity Fund, Neuberger Berman Absolute Alpha Fund, Neuberger Berman Global Bond Absolute Return Fund and Neuberger Berman China Equity Opportunities Fund liquidated on 7 May 2020, 15 May 2020, 10 August 2020, 30 November 2020 and 30 November 2020, respectively, and are therefore no longer available for subscription. Neuberger Berman US Large Cap Growth Fund, Neuberger Berman Global Equity Income Fund, Neuberger Berman Global Long Short Equity Fund, Neuberger Berman Long Short Multi Manager Fund, Neuberger Berman Global Credit Long Short Fund, Neuberger Berman Global Dynamic Asset Allocator Fund, Neuberger Berman Asian Opportunities Fund, Neuberger Berman World Equity Fund, Neuberger Berman Multi-Asset Risk Premia Fund and Neuberger Berman China A-Share Opportunities Fund liquidated during the prior reporting years and are pending application to the Central Bank to revoke the Portfolios' registrations.

Please refer to Appendix VII for a full list of Investment Managers, Sub-Investment Managers and Sub-Advisers for each Portfolio.

General Information (Continued)

Neuberger Berman High Yield Bond Fund

The investment objective of Neuberger Berman High Yield Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) from the high yield fixed income market. The Portfolio seeks to achieve this objective by investing primarily in high yield fixed income securities issued by US and foreign corporations, which, respectively, have their head office or exercise an overriding part of their economic activity in the US and high yield fixed income securities issued by governments and agencies in the US that are primarily denominated in US dollars; that are listed, dealt or traded on recognised markets. In addition, although the Portfolio concentrates its investments in the US, the Portfolio may also invest in securities of companies located in and governments of emerging market countries, which may involve additional risk, relative to investment in more developed economies.

The following are the active share classes in the Portfolio at the financial year end (referred to herein as the "year end" or "year ended"):

Neuberger Berman Diversified Currency Fund

The investment objective of Neuberger Berman Diversified Currency Fund (the "Portfolio") was to generate an absolute return over a medium- to long-term investment horizon with a moderate level of volatility. The Portfolio sought to achieve this objective by investing primarily in global liquid currencies (including, without limitation, Australian dollars, Canadian dollars, Swiss franc, euro, sterling, Japanese yen, Norwegian krone, New Zealand dollars, Swedish krona and US dollars) using a fundamentally driven, relative approach. The four-stage investment approach was discretionary in nature and was designed to achieve a diversified, highly liquid Portfolio and might, depending on prevailing market conditions, combine fundamental analysis with a more quantitative approach, designed to consider multiple drivers and trading strategies over different time horizons.

Stage one of the process was the construction of the Portfolio and this included stage two, which was the analysis of fundamental factors that might, on a discretionary basis, include such variables as opportunities for growth, currency stability, yield, monetary policy, capital flows and risk characteristics, over short-, medium- and long-term investment horizons.

Following the analysis and portfolio construction stages, stages three and four of the investment process were trade implementation and risk management, conducted on a pre-trade, post-trade and ongoing basis.

The securities which the Portfolio invested in may be listed on recognised markets globally. The Portfolio might take positions in currencies representing either a long or, using financial derivative instruments ("FDI"), short exposure to the currency with respect to the base currency.

The following were the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
EUR I Accumulating Class	25 February 2009	EUR
USD I Accumulating Class	25 February 2009	USD
USD A Accumulating Class	8 December 2009	USD
EUR M Accumulating Class	18 February 2016	EUR

General Information (Continued)

Neuberger Berman US Multi Cap Opportunities Fund

The investment objective of Neuberger Berman US Multi Cap Opportunities Fund (the "Portfolio") is to achieve capital growth through the selection of investments using systematic, sequential research. The Portfolio seeks to achieve this objective by Neuberger Berman Investment Advisers LLC (the "Sub-Investment Manager") using systematic, sequential research in identifying potential investments. Investment selection is the result of both quantitative and qualitative analysis in an effort to identify companies that are believed to have the potential to increase in value. This potential may be realised in many ways, some of which include: free cash flow generation, product or process enhancements, margin increases and improved capital structure management.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>

Neuberger Berman US Real Estate Securities Fund

The investment objective of Neuberger Berman US Real Estate Securities Fund (the "Portfolio") is to achieve total return through investments in real estate securities, emphasising both capital appreciation and current income. The Portfolio seeks to achieve this objective by investing on a diversified basis mainly in securities (including convertible bonds) issued by US real estate investment trusts ("REITs"). It should be noted that the Portfolio does not acquire any real estate directly.

Neuberger Berman China Equity Fund

The investment objective of Neuberger Berman China Equity Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) from the Greater China equity market. The Portfolio seeks to achieve this objective by investing primarily in equity and equity-linked securities which are listed or traded on recognised markets and issued by companies that:

- are incorporated or organised under the laws of, or that have a principal office in, the People's Republic of China ("PRC"), Hong Kong Special Administrative Region ("SAR"), Macau SAR or Taiwan (the "Greater China Region");
- generally derive a majority of their total revenue or profits from (a) goods that are produced or sold, (b) investments made, or (c) services performed, in the Greater China Region; or
- generally hold a majority of their assets in the Greater China Region (each a "Greater China Company").

The Portfolio may also invest in hybrid securities and equity-related securities, such as convertible debentures, convertible preferred stock, debt instruments with warrants attached, including FDI, which are issued by or give exposure to the performance of Greater China Companies.

For the avoidance of doubt, the Portfolio may invest in securities as described herein and which are issued by or giving exposure to Greater China Companies listed or traded on recognised markets located outside of the Greater China Region, including, without limitation, in the United States, the United Kingdom, Singapore and Japan.

The Portfolio invests primarily in mid and large capitalisation companies.

Green Court Capital Management Limited, the Non-Affiliated Sub-Adviser, employs a research intensive, fundamental-driven and bottom-up approach. Ongoing assessments of macroeconomic and market factors augment the stock-picking discipline. The investment approach is discretionary in nature and is designed to consider multiple drivers and investment strategies over different time horizons.

The Portfolio is primarily constructed by taking under and overweight positions to the market benchmark MSCI China Index. Decisions on whether the Portfolio's positions will be under- or overweight relative to the benchmark are primarily driven by valuation, quality of valuation and macroeconomic factors, including such variables as opportunities for growth, competitive advantages and risk characteristics, over short-, medium- and long-term investment horizons but the requirements of the Central Bank in respect of concentration limits as set out in the "Investment Restrictions" section of the Prospectus will supersede these factors where relevant.

Neuberger Berman Emerging Markets Equity Fund

The investment objective of Neuberger Berman Emerging Markets Equity Fund (the "Portfolio") is to achieve long-term capital growth. The Portfolio seeks to achieve this objective by investing primarily in equity and equity-linked securities which are listed or traded on recognised markets globally and issued by companies that:

- trade principally on a recognised stock exchange in emerging market countries;
- are organised under the laws of and have a principal office in emerging market countries; or
- derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in emerging market countries. The Portfolio may also invest in other collective investment schemes, which provide exposure to such securities, subject to a maximum of 10% of the Portfolio's Net Asset Value.

Neuberger Berman Investment Advisers LLC (the "Sub-Investment Manager") uses a fundamental bottom-up, research-driven securities selection approach focusing on high return businesses while factoring in economic, legislative and business developments to identify countries and economic sectors (such as Energy, Financials, Health Care, Telecommunication Services and Utilities) that it believes may be particularly attractive.

The Sub-Investment Manager seeks to invest in companies that it believes have sustainable free cash flow growth and are trading at attractive valuations.

Neuberger Berman US Small Cap Fund

The investment objective of Neuberger Berman US Small Cap Fund (the "Portfolio") is to achieve capital growth through the selection of investments applying analysis of company key metrics and macro economic factors. The Portfolio seeks to achieve this objective by investing primarily in equity securities issued by small-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on recognised markets.

The Portfolio seeks to identify undervalued companies whose current market share and balance sheet are strong and whose financial strength is largely based on existing business lines rather than on projected growth.

Factors in identifying such companies include:

- above-average returns;
- an established market niche;
- circumstances that may make it difficult for new competitors to enter the market;
- an ability to finance their own growth; and
- sound future business prospects.

Neuberger Berman Short Duration High Yield Bond Fund

The investment objective of Neuberger Berman Short Duration High Yield Bond Fund (the "Portfolio") is to generate high current income by investing in short-duration high yield fixed income securities.

The Portfolio seeks to achieve this objective by investing primarily in short duration high yield bonds issued by:

- US and non-US corporations, which, respectively, have their head office or exercise an overriding part of their economic activity in the US; and
- governments and agencies in the US that are primarily denominated in US dollars that are listed, dealt or traded on recognised markets without any particular focus on any one industrial sector.

In addition, although the Portfolio will concentrate its investments in the US or other Organisation for Economic Co-operation and Development ("OECD") countries, the Portfolio may also invest in securities of companies located in and governments of emerging market countries, which may involve additional risk, relative to investment in more developed economies.

Neuberger Berman Global Bond Fund

The investment objective of Neuberger Berman Global Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) from global fixed income markets.

The Portfolio seeks to achieve this objective by investing primarily in:

- Investment grade debt securities issued by governments and agencies from OECD countries; and
- Investment grade debt securities issued by corporations, which have their head office or exercise an overriding part of their economic activity in OECD countries.

All securities will be listed, dealt or traded on recognised markets without any particular focus on any one industrial sector.

There are four main differentiating factors that set the Portfolio's approach:

- Diversification through the use of multiple uncorrelated alpha sources
- Active FX management
- Integrated Global Macro Overlay
- Proprietary risk management systems

General Information (Continued)

Neuberger Berman Global Bond Fund (continued)

In addition, Neuberger Berman Europe Limited (the "Investment Manager") conducts analysis of data and seeks to exploit opportunities across multiple time horizons. Central to the investment philosophy is the Investment Manager's qualitative judgement, which is exercised at all stages of the investment process. This discretion enables it to take into account information and events that cannot be readily quantified, for example political events, shifts in regulatory regimes or the effects of market positioning and hedging.

Neuberger Berman Emerging Market Debt – Local Currency Fund

The investment objective of Neuberger Berman Emerging Market Debt – Local Currency Fund (the "Portfolio") is to achieve an attractive level of risk adjusted total return (income plus capital appreciation) from local currencies and local interest rates of emerging market countries.

The Portfolio seeks to achieve this objective by investing primarily in debt securities and money market instruments which are issued by governments of, government agencies in or corporate issuers which have their head office or exercise an overriding part of their economic activity in emerging market countries and which are denominated in or are exposed to the local currencies of such countries.

Neuberger Berman Emerging Market Debt – Hard Currency Fund

The investment objective of Neuberger Berman Emerging Market Debt – Hard Currency Fund (the “Portfolio”) is to achieve an attractive level of risk adjusted total return (income plus capital appreciation) from hard currency-denominated debt issued in emerging market countries.

The Portfolio seeks to achieve this objective by investing primarily in debt securities and money market instruments issued by public or private issuers in emerging market countries which are denominated in hard currency. For the purposes of the Portfolio, “Hard Currency” is defined as US dollar, euro, sterling, Japanese yen and Swiss franc and investors should also note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.

Neuberger Berman Strategic Income Fund

The investment objective of Neuberger Berman Strategic Income Fund (the "Portfolio") is to maximise total return from high current income and long-term capital appreciation by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities under varying market environments.

The Portfolio seeks to achieve this objective by investing primarily in debt securities issued by US corporations or by the US government and its agencies. Such securities will be listed, dealt or traded on recognised markets and may be rated investment grade or below investment grade or non-rated by recognised rating agencies.

General Information (Continued)

Neuberger Berman Short Duration Emerging Market Debt Fund

The investment objective of Neuberger Berman Short Duration Emerging Market Debt Fund (the "Portfolio") is to achieve a stable income and return by investing in a diversified selection of Hard Currency-denominated short duration sovereign and corporate debt issued in emerging market countries. For the purposes of the Portfolio, "Hard Currency" is defined as US dollar, euro, sterling, Japanese yen and Swiss franc.

The Portfolio seeks to achieve this objective by investing primarily in short duration debt securities and money market instruments issued by public or corporate issuers which have their head office, or exercise an overriding part of their economic activity, in emerging market countries and which are denominated in Hard Currency. Investors should also note that corporate issuers that are, either directly or indirectly, 100% government-owned are considered to be public issuers. With the exception of permitted investments in transferable securities and money market instruments which are unlisted, all securities invested in by the Portfolio will be listed, dealt or traded on recognised markets globally, without any particular focus on any one industrial sector or region. Investments in securities issued by companies located in, and governments and government agencies of, emerging markets countries may involve additional risk, relative to investments in more developed economies.

Neuberger Berman Absolute Return Multi Strategy Fund

The investment objective of Neuberger Berman Absolute Return Multi Strategy Fund (the "Portfolio") is to seek capital appreciation with an emphasis on absolute returns from a diversified portfolio of investment strategies.

The Portfolio seeks to achieve this objective by allocating its assets to multiple discretionary investment advisers that employ a variety of investment strategies and invest globally without a focus on any particular industrial sector. The Investment Manager and/or Neuberger Berman Investment Advisers LLC (the "Sub-Investment Manager") are responsible for selecting each adviser to which assets will be allocated and for determining the amount of the Portfolio's assets to allocate to each adviser. The Investment Manager and/or Sub-Investment Manager will allocate the Portfolio's assets to advisers whose strategy the Investment Manager and/or Sub-Investment Manager believe, when combined to form a single portfolio, can provide attractive risk-adjusted returns over the long term.

Neuberger Berman US Long Short Equity Fund

The investment objective of Neuberger Berman US Long Short Equity Fund (the "Portfolio") is to seek long term capital appreciation with a secondary objective of principal preservation.

The Portfolio seeks to achieve its objective by taking long and synthetic short positions in equity and equity-linked securities, including Exchange Traded Funds ("ETFs") listed or traded in US equity markets. The Portfolio may also, but to a lesser extent take long and synthetic short positions in equity, equity-linked securities and ETFs which are listed or traded on recognised markets located in the countries comprising the MSCI All Country World Index (which may include emerging market countries). Investments generally include those companies across all industrial sectors with a market capitalisation of at least US\$ 250 million measured at the time of initial investment.

Neuberger Berman Emerging Market Debt Blend Fund

The investment objective of Neuberger Berman Emerging Market Debt Blend Fund (the "Portfolio") is to achieve an attractive level of total return from a blend of Hard Currency-denominated debt issued in emerging market countries, local currencies of emerging market countries and debt issued by corporate issuers in emerging market countries.

The Portfolio seeks to achieve its objective by investing primarily in debt securities and money market instruments which are issued by governments of, government agencies in or corporate issuers which have their head office or exercise an overriding part of their economic activity in emerging market countries and which are either denominated in or are exposed to the local currencies of such emerging market countries or denominated in Hard Currency. For the purposes of the Portfolio, "Hard Currency" is defined as US dollar, euro, sterling, Japanese yen and Swiss franc.

Neuberger Berman European High Yield Bond Fund

The investment objective of Neuberger Berman European High Yield Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) from the European high yield fixed income market.

The Portfolio seeks to achieve its objective by investing primarily in corporate high yield fixed income securities, which are (i) denominated in a European currency or (ii) issued or guaranteed by companies of any industrial sector that are domiciled in, or exercise the main part of their economic activity in a European country that are listed, dealt or traded on recognised markets.

General Information (Continued)

Neuberger Berman Systematic Global Equity Fund

The investment objective of Neuberger Berman Systematic Global Equity Fund (the "Portfolio") is to achieve long term capital growth.

The Portfolio seeks to achieve its objective by investing primarily in equity securities issued by companies that are listed or traded on recognised markets globally (which may include emerging market countries).

Research identifies investment themes (i.e. characteristics of stocks that are believed to be systematically linked to the generation of better than average returns). Investment themes are used to assess the characteristics of security issuers and drive stock selection. Themes include, but are not limited to, the valuation, earnings quality, price dynamics and sentiment of each issue.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
USD I Accumulating Class	18 December 2014	USD
EUR M Accumulating Class	29 January 2016	EUR
USD Z Accumulating Class	24 May 2016	USD
USD A Accumulating Class	14 August 2017	USD

Neuberger Berman Global Real Estate Securities Fund

The investment objective of Neuberger Berman Global Real Estate Securities Fund (the "Portfolio") is to seek total return through investment in securities of real estate companies located globally, emphasising both capital appreciation and current income.

The Portfolio seeks to achieve its investment objective by investing at least 80% of its net assets in US and non-US equity securities issued by real estate investment trusts ("REITs") and common stocks and other securities issued by other real estate companies. A REIT is a company dedicated to owning, and usually operating, income-producing real estate, or to financing real estate. The Portfolio defines a real estate company as one that derives at least 50% of its revenue from, or has at least 50% of its assets in, real estate. The Portfolio will allocate its assets among various regions and countries, including the US, but will at all times invest in a minimum of three different countries. The Portfolio may also invest up to 20% of its Net Asset Value in real estate equity securities issued by companies domiciled in emerging market countries.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>

¹Authorised for public distribution in Hong Kong.

General Information (Continued)

Neuberger Berman US Small Cap Intrinsic Value Fund

The investment objective of Neuberger Berman US Small Cap Intrinsic Value Fund (the "Portfolio") is to achieve long term capital growth.

The Portfolio seeks to achieve its objective by investing primarily in equity securities issued by small-capitalisation companies which have their head office or exercise an overriding part of their economic activity in the US and that are listed or traded on recognised markets in the US. The Portfolio's investment in small capitalisation companies will not be restricted by sector or industry.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
USD I Accumulating Class	30 April 2015	USD
USD A Accumulating Class	4 February 2016	USD

Neuberger Berman Asian Debt – Hard Currency Fund

The investment objective of Neuberger Berman Asian Debt – Hard Currency Fund (the "Portfolio") is to achieve an attractive level of risk adjusted total return (income plus capital appreciation) from hard currency-denominated debt issued in Asian countries.

The Portfolio seeks to achieve its objective by investing primarily in debt securities and money market instruments which are issued by governments of, government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in Asian countries and which are denominated in hard currency. For the purposes of the Portfolio, hard currency is defined as US dollar, euro, sterling, Japanese yen and Swiss franc. Investors should note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
USD A (Monthly) Distributing Class	30 June 2015	USD

Neuberger Berman China Bond Fund

The investment objective of Neuberger Berman China Bond Fund (the "Portfolio") is to achieve an attractive level of risk adjusted total return (income plus capital appreciation) by primarily investing in fixed income instruments issued in the Chinese local currency markets.

The Portfolio seeks to achieve its objective by investing primarily in debt securities and money market instruments which are issued within the PRC by PRC government, PRC government agencies or corporate issuers which have their head office or exercise an overriding part of their economic activity in the PRC and which are denominated in or are exposed to the currency of the PRC via the RQFII (Renminbi Qualified Foreign Institutional Investor) Quota. For the purposes of the Portfolio, investors should note that public issuers include corporate issuers that are, either directly or indirectly, 100% government-owned.

Neuberger Berman Corporate Hybrid Bond Fund

The investment objective of Neuberger Berman Corporate Hybrid Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation).

The Portfolio seeks to achieve its objective by investing primarily in investment grade and sub-investment grade corporate hybrid bonds. The Portfolio seeks to use fundamental bottom-up analysis principles in selecting securities for investment, meaning that the analysis done by Neuberger Berman Europe Limited (the "Investment Manager") and Neuberger Berman Investment Advisers LLC (the "Sub-Investment Manager") will focus on the strengths of individual securities as opposed to the selection of securities by reference to broader themes, such as industries. The analysis of the strength of a security is specific to the individual security itself, as opposed to having regard to broader themes e.g. the credit rating of the security is analysed relative to its proposed yield. The Portfolio focuses on securities which are listed or traded on recognised markets globally, and not limited by industry or sector. The Portfolio may rotate its exposure to geographic regions and countries and between sectors and issuers, based on economic or regional fundamentals, such as the valuation of each security relative to other similar securities. The Portfolio may have medium levels of volatility due to its investments in subordinated debt and/or below investment grade securities.

The following are the active share classes in the Portfolio at year end:

General Information (Continued)

Neuberger Berman Global High Yield Bond Fund

The investment objective of Neuberger Berman Global High Yield Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) from the global high yield fixed income market.

The Portfolio seeks to achieve its objective by investing primarily in:

- US dollar and non-US dollar denominated high yield fixed income securities that are issued or guaranteed by corporate issuers of any industrial sector; and
- short duration, high yield fixed income securities issued by governments and agencies globally that are primarily denominated in US dollars located throughout the world that are listed, dealt or traded on recognised markets.

The Portfolio will invest primarily in securities denominated in the currencies included in the BofA Merrill Lynch Global High Yield Constrained Index (USD Hedged Total Return).

In addition, the Portfolio may also invest in securities of companies located in and governments of emerging market countries, which may involve additional risk, relative to investment in more developed economies.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>

Neuberger Berman Global Opportunistic Bond Fund

The investment objective of Neuberger Berman Global Opportunistic Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) by opportunistically investing in a diversified mix of fixed rate and floating rate debt securities globally under varying market environments.

The Portfolio seeks to achieve its objective by investing primarily in debt securities and money market instruments issued by governments and their agencies and corporations worldwide. Securities will be listed, dealt or traded on recognised markets globally without any particular focus on any one industrial sector. Securities may be rated investment grade or below by a recognised rating agency. On an ancillary basis, the Portfolio may hold preferred stocks issued by public or corporate issuers.

The following are the active share classes in the Portfolio at year end:

General Information (Continued)

Neuberger Berman Multi-Asset Income Fund

The investment objective of Neuberger Berman Multi-Asset Income Fund (the "Portfolio") is to seek to generate income and capital appreciation.

The Portfolio seeks to achieve its objective primarily by allocating the Portfolio's assets amongst multiple asset classes. It will invest in strategies which are intended to generate income for the Portfolio using global equity and debt securities, currencies and UCITS-eligible exposures to commodities. The Portfolio may obtain exposure to these asset classes through direct investment in such securities (other than in the case of commodities), investment in exchange traded notes and certificates or other eligible collective investment schemes ("Underlying Funds"), including exchange traded funds ("ETFs"), which are themselves exposed to such assets, or through the use of financial derivative instruments ("FDI"). Exposure to commodities will be achieved through exposure to commodity indices that have been cleared in advance by the Central Bank for use by UCITS.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
USD I Accumulating Class	28 December 2016	USD

Neuberger Berman US Equity Index PutWrite Fund

The Investment objective of Neuberger Berman US Equity Index PutWrite Fund (the "Portfolio") is to seek long term growth of capital and income generation.

The Portfolio seeks to achieve its goal primarily through a strategy of writing collateralised put options on global equity indices and exchanged traded funds ("ETFs") providing exposure to US equity indices, such as the S&P 500 and Russell 2000. The put options will be traded on recognised markets.

Neuberger Berman Emerging Markets Sustainable Equity Fund

The investment objective of Neuberger Berman Emerging Markets Sustainable Equity Fund (the "Portfolio") is to achieve long-term capital growth by investing primarily in emerging market companies.

The Portfolio seeks to achieve its objective by investing primarily in equity and equity-linked securities which are listed or traded on recognised markets globally and issued by companies that: (1) trade principally on a recognised stock exchange in emerging market countries; (2) are organised under the laws of and have a principal office in emerging market countries; or (3) derive 50% or more of their total revenues from, and/or have 50% or more of their total assets in, goods produced, sales made, profits generated or services performed in emerging market countries. The Portfolio may also invest in other collective investment schemes which provide exposure to such securities, subject to a maximum of 10% of the Portfolio's Net Asset Value. The Portfolio may seek exposure to a country or region within emerging markets through investment in securities traded on stock exchanges or markets located in other jurisdictions through participatory notes.

Neuberger Berman Euro Opportunistic Bond Fund

The investment objective of Neuberger Berman Euro Opportunistic Bond Fund (the "Portfolio") is to achieve an attractive level of total return (income plus capital appreciation) by investing in a diversified mix of Euro-denominated fixed and floating rate debt securities.

The Portfolio seeks to achieve its investment objective through a disciplined investment process investing in Euro-denominated bonds across a variety of sectors and maturities, utilising a combination of top-down and bottom-up strategies to identify multiple sources of value. Top down strategies focus on macroeconomic considerations, country and sector analysis. Bottom up strategies evaluate the characteristics of individual instruments or issuers.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
EUR I Accumulating Class	14 November 2018	EUR
EUR I Distributing Class	14 November 2018	EUR

Neuberger Berman Euro Bond Absolute Return Fund

The investment objective of Neuberger Berman Euro Bond Absolute Return Fund (the "Portfolio") is to generate positive absolute returns over a market cycle (typically 3-5 years), irrespective of market conditions with a moderate level of volatility. It aims to achieve this by implementing an unconstrained strategy combining long and synthetic short positions in a diversified portfolio of predominantly Euro-denominated debt securities.

The Portfolio seeks to achieve its investment objective through a disciplined investment process utilising a combination of top-down and bottom-up strategies to identify multiple sources of value. Top down strategies focus on macroeconomic considerations, country and sector analysis. Bottom up strategies evaluate the characteristics of individual instruments or issuers.

The following are the active share classes in the Portfolio at year end:

Neuberger Berman Multi-Style Premia Fund

The investment objective of Neuberger Berman Multi-Style Premia Fund (the "Portfolio") was to generate a positive risk-adjusted return over a market cycle (typically 3-5 years).

The Portfolio sought to achieve its investment objective by providing exposure to certain investment styles or "factors" ("Factors"). The Factors were based on the Sub-Investment Manager's market views and sought to derive returns from identifying and capitalising upon market risk premiums, inefficiencies, market trends and biases. These Factors were expected to capture returns, or premia, by taking well known risks, such as investing in smaller issuers, higher yielding securities or undervalued securities.

The following were the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
USD I Accumulating Class	1 March 2019	USD

USD Z Accumulating Class	30 October 2019	USD

General Information (Continued)

Neuberger Berman Macro Opportunities FX Fund

The investment objective of Neuberger Berman Macro Opportunities FX Fund (the "Portfolio") is to achieve a target average return of 5-6% over cash before fees over a market cycle (typically 3 years).

The Portfolio seeks to achieve its investment objective:

- firstly, by obtaining long and short exposures to a range of global liquid currencies, predominantly but not limited to the G10 currencies and opportunistically, in the most liquid emerging market country currencies (these are typically the most heavily traded e.g. Brazilian Real, Singapore Dollar and South Korean Won using a range of financial derivative instruments;
- secondly, through investing in global fixed income debt securities and short-dated Euro-denominated bonds to opportunistically seek to enhance cash returns and to provide liquidity and collateral cover for exposures created through the use of financial derivative instruments as outlined above.

The following are the active share classes in the Portfolio at year end:

<i>Share Class Name</i>	<i>Share Class Launch Date</i>	<i>Currency</i>
EUR I Accumulating Class	4 December 2019	EUR

Directors' Report

The Directors present, herewith their annual report and audited financial statements for Neuberger Berman Investment Funds plc (the "Company") for the year ended 31 December 2020 and comparatives for the year ended 31 December 2019.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the financial statements in accordance with applicable Irish Law and Generally Accepted Accounting Practice in Ireland including the Financial Reporting Standards ("FRS") 102: 'The financial reporting standard applicable in the UK and Republic of Ireland' issued by the Financial Reporting Council and published by the Chartered Accountants Ireland.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with Financial Reporting Standard ("FRS") 102: The financial reporting standard applicable in the UK and Republic of Ireland, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "UCITS Regulations"), Irish statute comprising the Companies Act 2014 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and enable those financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the UCITS Regulations, the Directors are required to entrust the assets of the Company to a depositary for safe-keeping. In carrying out this duty, the Company has declared custody of the Company's assets to Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary").

Relevant Audit Information Statement

The Directors in office at the date of this report have each confirmed that:

- as far as he/she is aware, there is no relevant audit information of which the Company's auditor is unaware; and
- he/she has taken all the steps that he/she ought to have taken as a Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditor is aware of that information.

Directors' Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014 (as amended)). As required by Section 225(2) of the Companies Act 2014 (as amended), the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 (as amended) and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

Directors' Report (Continued)

Accounting records

The Directors are responsible for ensuring that adequate accounting records as outlined in Section 281 of the Companies Act 2014 (as amended) are maintained by the Company. To achieve this, the Directors have appointed a service organisation Brown Brothers Harriman Fund Administration Services (Ireland) Limited (the "Administrator"). The Company's accounting records are retained at the Administrator's office at 30 Herbert Street, Dublin 2.

Principal Activities and Review of Business

The Company is an investment company with variable capital incorporated in Ireland on 11 December 2000 as a public limited company. The Company was authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities pursuant to the UCITS Regulations. The objective of the Company is the collective investment in transferable securities and other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

The Company is structured as an umbrella fund with segregated liability between sub-funds in that the Directors may from time to time with the prior approval of the Central Bank, issue different series of shares representing separate Portfolios. The assets of each Portfolio are invested in accordance with the investment objectives applicable to such Portfolio as outlined in the general information section of these Financial Statements. Each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner or liquidator, nor any other person will have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio.

As at 31 December 2020 forty-seven constituent sub-funds were in existence. These are: Neuberger Berman High Yield Bond Fund, Neuberger Berman Diversified Currency Fund, Neuberger Berman US Multi Cap Opportunities Fund, Neuberger Berman US Real Estate Securities Fund, Neuberger Berman China Equity Fund, Neuberger Berman Emerging Markets Equity Fund, Neuberger Berman US Small Cap Fund, Neuberger Berman Short Duration High Yield Bond Fund, Neuberger Berman Global Bond Fund, Neuberger Berman Emerging Market Debt – Local Currency Fund, Neuberger Berman Emerging Market Debt – Hard Currency Fund, Neuberger Berman Emerging Market Corporate Debt Fund, Neuberger Berman Strategic Income Fund, Neuberger Berman Short Duration Emerging Market Debt Fund, Neuberger Berman Absolute Return Multi Strategy Fund, Neuberger Berman US Long Short Equity Fund, Neuberger Berman Emerging Market Debt Blend Fund, Neuberger Berman European High Yield Bond Fund, Neuberger Berman Systematic Global Equity Fund, Neuberger Berman Global Real Estate Securities Fund, Neuberger Berman US Small Cap Intrinsic Value Fund, Neuberger Berman Asian Debt – Hard Currency Fund, Neuberger Berman China Bond Fund, Neuberger Berman Corporate Hybrid Bond Fund, Neuberger Berman US Equity Fund, Neuberger Berman Global High Yield Bond Fund, Neuberger Berman Global Opportunistic Bond Fund, Neuberger Berman Multi-Asset Income Fund, Neuberger Berman US Equity Index PutWrite Fund, Neuberger Berman Global Equity Index PutWrite Fund, Neuberger Berman Uncorrelated Strategies Fund, Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund, Neuberger Berman Emerging Markets Sustainable Equity Fund, Neuberger Berman Global Thematic Equity Fund, Neuberger Berman CLO Income Fund, Neuberger Berman Next Generation Mobility Fund, Neuberger Berman Ultra Short Term Euro Bond Fund, Neuberger Berman Euro Opportunistic Bond Fund, Neuberger Berman Euro Bond Absolute Return Fund, Neuberger Berman Multi-Style Premia Fund and Neuberger Berman Macro Opportunities FX Fund.

Neuberger Berman Global High Yield Sustainable Action Fund, Neuberger Berman 5G Connectivity Fund, Neuberger Berman Japan Equity Engagement Fund, Neuberger Berman Global Flexible Credit Fund, Neuberger Berman Global Diversified Income FMP – 2024 and Neuberger Berman China A-Share Equity Fund commenced operations on 21 January 2020, 8 April 2020, 12 May 2020, 1 June 2020, 22 June 2020 and 28 July 2020, respectively.

Results for the Year and Assets, Liabilities and Financial Position at 31 December 2020

A detailed review of the year and factors which contributed to the performance for the year is included in the Investment Manager's reports. Details of the assets, liabilities and financial position of the Company and results for the year ended 31 December 2020 are set out in the Balance Sheet and Profit and Loss Account for each Portfolio.

None of the Directors, the Company Secretary, or their families holds or held any beneficial interests in the Company at 31 December 2020 or during the year (2019: Nil).

Transactions Involving Directors

There are no contracts or arrangements of any significance in relation to the business of the Company in which the Directors or the Company Secretary had any interest as defined in the Companies Act 2014 (as amended) at any time during the year ended 31 December 2020 other than those disclosed in note 10 of these Financial Statements.

Connected Persons

In accordance with the Central Bank's UCITS Regulation 43(1), any transaction carried out with the Company by the Promoter, the Investment Manager, the Depositary, the Investment Adviser and/or associated or group companies of these entities ("connected persons") must be carried out as if negotiated at arm's length. Such transactions must be in the best interest of the shareholders of the Company.

The Board of Directors of the Company (the "Board") is satisfied that (i) there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out above are applied to all transactions with connected parties; and (ii) transactions with connected parties entered into during the period complied with these obligations.

Political Donations

There were no political donations made during the year ended 31 December 2020 (2019: Nil).

Risk Management Objectives and Policies

Each Portfolio is invested in accordance with the investment objectives and policies applicable to the Portfolio as set out in detail in the Prospectus. Investment in the Company carries with it a degree of risk including, but not limited to, the risks referred to in note 12 of these Financial Statements.

Dividends and Retention

The dividend distributions declared and paid during the year are disclosed in the Profit and Loss Account under Finance Costs.

Future Developments

The Company will continue to pursue its investment objective as set out in the Directors' Report.

Brexit Statement

On 23 June 2016, the United Kingdom held a referendum and voted to leave the European Union. The UK left the EU at 11pm GMT (midnight in Brussels) on 31 January 2021. A Brexit deal has been signed with the EU however the deal does not contain any material detail on the future operations of the financial services sector. By way of further information, the UK is shortly due to begin further discussion with the EU with a view to agreeing a financial services deal albeit this would not materially impact the Company and its management entities. Nevertheless, until any such deal is finalised there may be a higher volatility than usual and disruption in the global financial markets. Such events may, in turn, contribute to worsening economic conditions and reduced liquidity in some segments of the market, not only in the UK but also in Europe or the rest of the world.

Directors' Report (Continued)

COVID-19 Statement

Neuberger Berman Group LLC, the ultimate parent of Neuberger Berman Europe Limited ("NBEL"), continues to monitor the ongoing developments related to COVID-19 with a particular focus on two areas: the safety and health of its employees and clients, and the ability to continue to conduct effectively its investment and business operations, including all critical services. Neuberger Berman has a dedicated Business Continuity Management team staffed with full-time professionals, who partner with over 60 Business Continuity Coordinators covering all business functions across all geographies. Neuberger Berman currently has not experienced a significant impact on its operating model. Neuberger Berman will continue to watch the effectiveness of efforts to contain the spread of the COVID-19 virus and the potential long-term implications on global economies and will continue to monitor and adapt as necessary the firm's operations and processes in the effort to most effectively manage portfolios.

Audit Committee

The Company established an audit committee. Mr. Tom Finlay, Ms. Gráinne Alexander, Ms. Naomi Daly and Mr. Alex Duncan are members of the Board of Directors of the Company and are part of the audit committee.

Significant Events During the Year

Significant events during the year are set out in note 20 of these Financial Statements.

Significant Events Since the Year End

Significant events since the year end are set out in note 21 of these Financial Statements.

Independent Auditors

The Directors appointed the Independent Auditors, Ernst & Young, Chartered Accountants, in 2000 to audit the financial statements for the year ending 31 December 2001 and subsequent financial periods.

The Independent Auditors have indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014 (as amended).

Corporate Governance

The Company is subject to and complies with Irish statute comprising the Companies Act 2014 (as amended) and with the UCITS Regulations and the Listing Rules of Euronext Dublin. The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

Financial Reporting Process - Description of Main Features

The Directors are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors have established processes regarding internal control and risk management systems to ensure its effective oversight of the financial reporting process. These include appointing the Administrator to maintain the accounting records of the Company independently of the Investment Manager and the Depositary. The Administrator is required under the terms of the administration agreement to maintain adequate accounting records on behalf of the Company. To that end the Administrator performs regular reconciliations of its records to those of the Depositary. The Administrator is also contractually obliged to prepare for review and approval by the Directors the annual report including financial statements intended to give a true and fair view and the interim report and unaudited abridged financial statements.

The Directors evaluate and discuss significant accounting and reporting issues as the need arises. From time to time the Directors also examine and evaluate the Administrator's financial accounting and reporting routines and monitor and evaluate the external auditors' performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

Directors' Report (Continued)

Corporate Governance (continued)

Risk Assessment

The Directors are responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The Directors have also put in place processes to identify changes in accounting rules and recommendations and to ensure that these changes are accurately reflected in the Company's financial statements.

The Investment Manager completes in depth reviews of the Financial Statements to ensure that all of the content included is accurate. Should a discrepancy be identified the Investment Manager would report this to the Board of Directors at the next board meeting, or immediately where the discrepancy is deemed material. Changes in accounting rules and standards are monitored by the Investment Manager and the Company's Administrator; all changes are reported to the Board periodically.

The Investment Manager liaises with the Company's Administrator to ensure that all changes in accounting rules and standards are reflected in the financial statements in a timely manner. The Investment Manager also has regular dialogue with the Company's Auditors.

Control Activities

The Administrator maintains control structures to manage the risks over financial reporting. These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report. Examples of control activities exercised by the Administrator include analytical review procedures, reconciliations and automatic controls in IT systems. Prices not available from independent sources are typically valued by the Investment Manager using methods the Directors have approved in the good-faith belief that the resulting valuation will reflect the fair value of the security.

Diversity

With respect to diversity, the Company has no employees and the only individuals engaged directly by it are the Directors and the designated persons. When there is a vacancy on the Board or among the designated persons, the objective is to ensure that the Board is or the designated persons are diversified with an appropriate mix as regards age, gender, race and educational/professional backgrounds, while achieving compliance by all individuals with regulatory requirements and an overall composition with the requisite experience and skills. This was most recently reflected in 2019, in the context of the appointment of Naomi Daly and Alex Duncan as directors.

Information and Communication

The Company's policies and the Directors' instructions with relevance for financial reporting are updated and communicated via appropriate channels, such as e-mail, correspondence, telephone and meetings to ensure that all financial reporting information requirements are met in a complete and accurate manner.

Monitoring

The Directors receive regular presentations and review reports from the Depositary, Investment Manager and Administrator. The Directors also have an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Capital Structure

No person has a significant direct or indirect holding of securities in the Company. No person has any special rights of control over the Company's share capital. There are no restrictions on voting rights. With regard to the appointment and replacement of Directors, the Company is governed by its Articles of Association, Irish statute comprising the Companies Act 2014 (as amended) and with the UCITS Regulations and the Listing Rules of Euronext Dublin as applicable to investment funds. The Articles of Association themselves may be amended by special resolution of the Shareholders.

Powers of the Directors

The Directors are responsible for managing the business affairs of the Company in accordance with the Articles of Association. The Directors may delegate certain functions to the Administrator and other parties, subject to the supervision and direction by the Directors. The Directors have delegated the day to day administration of the Company to the Administrator and the investment management and distribution functions to the Investment Manager. Consequently, none of the Directors is an executive Director. The Articles of Association provide that the Directors may exercise all the powers of the Company to borrow money, to mortgage or charge its undertaking, property or any part thereof and may delegate these powers to the Investment Manager.

Directors' Report (Continued)

Corporate Governance (continued)

Powers of the Directors (continued)

The Directors may at any time, with prior notification to the Depositary, temporarily suspend the calculation of the Net Asset Value of a particular Portfolio and the issue, valuation, sale, purchase, redemption or conversion of shares and/or the payment of redemption proceeds at any time in any of the following instances:

- a) any period when any recognised market on which a substantial portion of the investments for the time being comprised in the relevant Portfolio are quoted, listed or dealt in is closed otherwise than for ordinary holidays, or during which dealings on any such recognised market are restricted or suspended;
- b) any period when, as a result of political, military, economic or monetary events or other circumstances beyond the control, responsibility and power of the Directors, the disposal or valuation of investments for the time being comprised in the relevant Portfolio cannot, in the opinion of the Directors, be effected or completed normally or without prejudicing the interests of Shareholders;
- c) any breakdown in the means of communication normally employed in determining the value of any investments for the time being comprised in the relevant Portfolio or during any period when for any other reason the value of investments for the time being comprised in the relevant Portfolio cannot, in the opinion of the Directors, be promptly or accurately ascertained;
- d) any period when the Company is unable to repatriate funds for the purposes of making redemption payments or during which the realisation of investments for the time being comprised in the relevant Portfolio, or the transfer or payment of funds involved in connection therewith cannot, in the opinion of the Directors, be effected at normal prices or normal rates of exchange;
- e) any period when, as a result of adverse market conditions, the payment of redemption proceeds may, in the opinion of the Directors, have an adverse impact on the relevant Portfolio or the remaining Shareholders in such Portfolio;
- f) any period after a notice convening a meeting of Shareholders for the purpose of dissolving the Company or terminating a Portfolio has been issued, up to and including the date of such meeting of Shareholders;
- g) any period during which dealings in a collective investment scheme in which the Portfolio has invested a significant portion of its assets are suspended;
- h) any period in which the repurchase of the shares would, in the opinion of the Directors, result in a violation of applicable laws; or
- i) any period when the Directors determine that it is in the best interests of the Shareholders to do so.

Notice of any such suspension shall be published by the Company at its registered office and in such newspapers and through such other media as the Directors may from time to time determine, if in the opinion of the Directors, it is likely to exceed thirty days, and shall be transmitted immediately to the Central Bank, Euronext Dublin and the Shareholders. Shareholders who have requested the issue or redemption of shares of any series or class will have their subscription or redemption request dealt with on the first dealing day after the suspension has been lifted unless applications or redemption requests have been withdrawn prior to the lifting of the suspension. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

Registered shares may be transferred to another beneficial owner free of cash in a form that has been approved by the Directors. The instrument of transfer of a share must be signed by or on behalf of the transferor. The transferor shall be deemed to remain the holder of the share until the name of the transferee is entered on to the Register in respect of such share.

The Directors may decline to register a transfer if they are aware or reasonably believe the transfer would result in the beneficial ownership of shares by a person in contravention of any restrictions on ownership imposed by the Directors or might result in legal, regulatory, pecuniary, taxation or material administrative disadvantage to the relevant Portfolio or Shareholders generally.

Shareholder Meetings

The Annual General Meeting of the Company will be held in Ireland, normally during the month of June or such other date as the Directors may determine. Notice convening the Annual General Meeting in each year at which the audited financial statements of the Company will be presented (together with the Directors' and Auditors' Reports of the Company) will be sent to Shareholders at their registered addresses not less than twenty one clear days before the date fixed for the meeting. Other general meetings may be convened from time to time by the Directors in such manner as provided by Irish law.

Each of the shares entitles the holder to attend and vote at meetings of the Company and of the Portfolio represented by those shares. All votes shall be cast by a poll of Shareholders present in person or by proxy at the relevant Shareholder meeting or by unanimous written resolution of the Shareholders. No class of shares confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits of any other share class or any voting rights in relation to matters relating solely to any other share class.

Directors' Report (Continued)

Corporate Governance (continued)

Shareholder Meetings (continued)

Any resolution to alter the class rights of the shares requires the approval of three-fourths of the holders of the shares represented or present and voting at a general meeting of the class. The quorum for any general meeting of the class convened to consider any alteration to the class rights of the shares shall be present in person or by proxy two or more persons holding shares issued in that class. In the event that a quorum is not present at a meeting and the meeting is adjourned, the quorum for the adjourned meeting shall be one Shareholder present in proxy or person.

Each of the shares other than subscriber shares entitle the Shareholder to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) on a pro-rata basis in the profits and net assets of the Portfolio in respect of which the shares have been issued, save in the case of profits declared prior to becoming a Shareholder.

Subscriber shares entitle the Shareholders holding them to attend and vote at all general meetings of the Company but do not entitle the holders to participate in the profits or net assets of the Company except for a return of capital on a winding up.

Composition and Operation of Board and Committees

There are five Directors currently, all of whom are non-executive Directors. Ms. Michelle Green and Mr. Alex Duncan are Directors of the Company and are also Directors and employees of Neuberger Berman Europe Limited, the Investment Manager, Promoter and Distributor of the Company. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014 (as amended). The Board meets at least quarterly. Other than the Audit Committee, there are no permanently authorised sub-committees of the Board.

The Board has satisfied itself that the Directors have sufficient time to fully discharge their duties and disclose in writing to the Board their other commitments, including other CIS directorships and non Fund directorships.

Irish Funds Corporate Governance Code

The Irish Funds ("IF") has published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investment schemes. It should be noted that the IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors' Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

With effect from 1 January 2013, the Board voluntarily adopted the Corporate Governance Code for Irish Domiciled Collective Investment Schemes as published by the IF, as the Company's corporate governance code.

Independent Auditors' Report to the Members of Neuberger Berman Investment Funds Plc

Opinion

We have audited the financial statements of Neuberger Berman Investment Funds plc ('the Company') for the year ended 31 December 2020 which comprise the Aggregate Balance Sheet, the Aggregate Profit and Loss Account, the Aggregate Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Company as at 31 December 2020 and of its aggregate profit for the year then ended;
- have been properly prepared in accordance with Irish Generally Accepted Accounting Practice; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the Directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included:

- In conjunction with our walkthrough of the Company's financial close process, we confirmed our understanding of management's going concern assessment process and also engaged with management early to ensure all key factors were considered in their assessment;
- We obtained management's going concern assessment which covers a year from the date of signing this audit opinion. Management has considered key criteria such as the viability of the fund and key service providers, liquidity of the Company's portfolios, composition of investors, post year end events and the investment manager and board of Director's future plans for the Company;
- We have obtained support for any data and tested assumptions included in management's going concern assessment;
- Reviewing and evaluating the reasonability of the key factors considered by management in making their assessment of going concern including consideration of future capital activity in the Company, the Company's liquidity facility and the availability of liquid assets to meet ongoing operational costs. In assessing these, we obtained independent confirmation from the liquidity facility counterparty to verify the availability of the facility, we obtained and reviewed the liquidity terms which the Company offers to investors and compared them to the liquidity available to the Company from its portfolios, together with reviewing post year end capital activity and corroborated through enquiry of management as to whether there are any subsequent events, including fund performance, that might give rise to conditions which could lead management to discontinue the operations of the Company;
- We reviewed the Company's going concern disclosures included in the annual report in order to assess that the disclosures were appropriate and in conformity with the reporting standards.

Independent Auditors' Report to the Members of Neuberger Berman Investment Funds Plc (Continued)

Conclusion

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the group's ability to continue as a going concern.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Matter	Our response to the Key Audit Matter	Key observations communicated to the Audit Committee
<p>Existence of financial assets and financial liabilities at fair value through profit or loss amounting to \$29,722,637,248, (2019: \$26,129,384,989)</p> <p>We have considered the existence and ownership of financial assets and financial liabilities at fair value through profit or loss to be a key audit matter.</p> <p>This is one of the key areas our audit is concentrated on, because the existence and ownership of financial assets and financial liabilities at fair value through profit or loss is a key driver of the net asset value.</p> <p>Please refer to Financial Assets and Financial Liabilities at Fair Value through Profit or Loss within Note 1 Significant accounting Policies and Note 2 – Financial assets and financial liabilities at fair value through profit or loss in the financial statements.</p>	<p>Financial Instruments are held across different counterparties therefore we focus audit effort and procedures on obtaining independent confirmations from each counterparty.</p> <p>We tested the existence and ownership of financial assets and financial liabilities at fair value through profit or loss directly with the depositary or counterparties by obtaining independent confirmations as at 30 June 2020 or as at 31 December 2020.</p> <p>Where independent confirmation was obtained at 30 June 2020 we performed roll forward procedures as at 31 December 2020.</p>	<p>We obtained sufficient and appropriate audit evidence from our procedures over existence of financial assets and liabilities at fair value through profit and loss and noted no issues.</p>

We concluded that managements disclosures were consistent with the accounting standard and with methodologies applied. No issues were noted from our procedures.</p>

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

The magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the Company to be 0.5% (2019: 0.5%) of Net Asset Value. We believe that Net Asset Value is an appropriate measurement basis since the users of the financial statements may focus more on Net Assets.

Independent Auditors' Report to the Members of Neuberger Berman Investment Funds Plc (Continued)

Performance materiality

The application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

On the basis of our risk assessments, together with our assessment of the Company's overall control environment, our judgement was that performance materiality was 75% (2019: 75%) of our planning materiality. We have set performance materiality at this percentage due to our knowledge of the entity and industry, our past history with the entity, effectiveness of the control environment and our assessment of the risks associated with the engagement.

Reporting threshold

An amount below which identified misstatements are considered as being clearly trivial.

We agreed with the Audit Committee that we would report to them all uncorrected audit differences in excess 5% of planning materiality, as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit report

Tailoring the scope

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the Company. This enables us to form an opinion on the financial statements. We take into account size, risk profile, the organisation of the Company and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed. All audit work was performed directly by the audit engagement team.

Other information

The Directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the Directors' report is consistent with the financial statements; and
- the Directors' report has been prepared in accordance with applicable legal requirements.

We have obtained all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the financial statements are in agreement with the accounting records.

Independent Auditors' Report to the Members of Neuberger Berman Investment Funds Plc (Continued)

Matters on which we are required to report by exception

Based on the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of Directors' remuneration and transactions required by sections 305 to 312 of the Act, which relate to disclosures of Directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of Directors for the financial statements

As explained more fully in the Directors' responsibilities statement set out on page 32, the Directors are responsible for the preparation of the financial statements in accordance with the applicable financial reporting framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The objectives of our audit, in respect to fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are Companies Act 2014 and Undertaking for Collective Investment in Transferable Securities pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "UCITS Regulations").
- We understood how Neuberger Berman Investment Funds plc is complying with those frameworks by updating our understanding of the adequate system of internal control in place. We also considered the existence of independence service providers, proper segregation of duties and the regulated environment in which the Company operates, which may reduce opportunities for fraud to take place.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by management override of controls.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved inquiries to those charged with governance into possible instances of non-compliance with laws and regulations, review of board meeting minutes during the year and obtaining representation from the management.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at:

http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8fa98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

Independent Auditors' Report to the Members of Neuberger Berman Investment Funds Plc (Continued)

Other matters which we are required to address

We were appointed by the Directors in 2000 to audit the financial statements for the year ending 31 December 2001 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 20 years.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the Company and we remain independent of the Company in conducting our audit.

Our audit opinion is consistent with the additional report to the audit committee.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report.

Independent Auditors' Report to the Directors of Neuberger Berman Investment Funds Plc

The Directors
Neuberger Berman Investment Funds plc

We have audited the accompanying financial statements of Neuberger Berman Investment Funds plc (the "Fund"), which comprise the Aggregate Balance Sheet as of 31 December 2020, the Aggregate Profit and Loss Account, the Aggregate Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with Accounting Standards including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (Irish Generally Accepted Accounting Practice); this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Fund's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Neuberger Berman Investment Funds plc at 31 December 2020, and the results of its operations and changes in net assets for the year then ended, in conformity with Accounting Standards including FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland (Irish Generally Accepted Accounting Practice).

Report of the Depository to the Shareholders

We have enquired into the conduct of Neuberger Berman Investment Funds plc (the "Company") for the year ended 31 December 2020, in our capacity as Depository to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company as a body, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, (the 'UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depository

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depository must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depository Opinion

The Depository conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

Neuberger Berman High Yield Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.13%. Over the same period, the ICE BofA US High Yield Constrained Index (USD Total Return) (the "Index") returned 6.07%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The year 2020 - marked by the COVID-19 pandemic - was a tale of two markets with a huge indiscriminate, high velocity drawdown from mandated shutdowns to slow the spread of the virus followed by a significant risk-on rally as a result of massive fiscal and monetary stimulus in April and May. While the second half of the year saw some pockets of volatility, the trillions in global monetary accommodation and fiscal support put in place before mid-year had worked well to remove extreme tail risk. Furthermore, capital markets were wide open in the second half of the year and companies had been aggressive in cutting costs, so many issuers were better positioned and able to bridge the challenging operating environment until the economy was in recovery mode. Then, in the fourth quarter, the market started looking through the pandemic toward the eventual full reopening of the global economy on news in early November of two viable vaccines. US high yield finished the year in positive territory and also saw very strong high yield new issuance and record-setting inflows for the asset class.

For the 12 months ended 31 December 2020, higher quality securities, such as those rated BB and B in the ICE BofA U.S. High Yield Index saw better performance with returns of 8.62% and 3.66%, respectively, whereas CCC-rated securities returned 2.86% for the full year. In the fourth quarter, conversely, higher quality underperformed lower quality issuers as the BB, B, CCC & lower rated categories of the ICE BofA U.S. High Yield Index returned 5.74%, 5.72%, and 12.19%, respectively.

Credit selection, downside mitigation and default avoidance were key factors to performance in US high yield markets in 2020. Throughout the period, issuer fundamentals diverged but generally remained more resilient than many had feared as the ability for high yield issuers to successfully navigate the various stages of the pandemic improved over the period given a 3Q20 earnings season that exceeded expectations, strong cost controls during 2Q20 and open capital markets which allowed issuers to stabilise margins and improve balance sheets. Progress against the virus, combined with pent-up demand, a very high savings rate and strong fiscal and monetary policy support should deliver improving economic growth and issuer fundamentals in 2021. US high yield default rates started the year below the long-term average, spiked as a result of mandated shutdowns and then declined materially toward the end of the year. In December, the par weighted LTM U.S. high yield default rate was 6.17%. The par weighted LTM U.S. high yield default rate excluding Energy was 4.46%. For context, the long-term average default rate is 3.50% (based on annual default rates back to 1980 according to JP Morgan).

During the year, security selection within and an underweight to Energy, an overweight to and security selection within Gas Distribution and security selection within and an underweight to Telecommunications were the most beneficial to performance. In contrast, security selection within and an overweight to Support-Services, an underweight to and security selection within Healthcare and security selection within and an underweight to Gaming were the largest detractors. Within our ratings' positioning, security selection within the Portfolio's CCC and below and BB and an overweight to Non-Rated rated issuers were the most beneficial to performance while security selection within B and an underweight to BB were the largest detractors.

While spreads continued to tighten in the second half of the year from elevated levels, we believe spreads are compensating investors for the moderating and more visible defaults remaining which are likely to come from the same areas such as some parts of the Energy sector, longer-term COVID-19 impaired and industries in secular decline. In our view, the vaccine roll-out is likely to start normalising economic and social activity in 2021. As we continue to closely monitor the developments of the pandemic, the economic recovery and changes in policy as a result of the elections, we are finding ample investment opportunities in high yield across the credit spectrum. Despite the recent resurgence of COVID-19 cases and delays in vaccine delivery, which could result in pockets of short-term volatility, we believe our deep fundamental credit research, focus on relative valuations, seeking to avoid defaults and "best ideas" portfolio construction approach, position us well to tactically take advantage of any volatility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was -0.44%. Over the same period, the benchmark index, the ICE BofA US 3-Month Treasury Bill Index (Total Return, USD) (the "Index"), returned 0.67%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

During the period, the best performing major currencies were the Swedish krona and the Australian dollar. The worst performing major currencies were the US dollar and the Canadian dollar. The Portfolio generated a small negative return for the year. Overweights, relative to the benchmark, in the Mexican peso and Japanese yen were the best performing positions whilst underweight the Australian dollar and overweight the Brazilian real were detractors of performance.

The year began with heightened optimism about the global economy with robust economic data and a large degree of monetary and fiscal accommodation. However, the first quarter was dominated by the COVID-19 pandemic. Originating in China at the start of the year the virus spread globally, with Europe particularly affected. With many countries quarantining large numbers of people and shutting down many businesses, the economic impact was severe, both through the sharp contraction in demand and disruption to supply chains. The impact on global financial markets was a relentless fall in risk-on assets and rally in safe haven assets. The currency market responded in the same way, with the US dollar, Swiss franc and Japanese yen all outperforming high yielding and pro-cyclical currencies. Additionally, the news of Saudi Arabia's intention to increase market share in the oil market led oil to fall more than 30% in a single day and weighed on oil exporting currencies such as the Norwegian krone, Mexican peso and Canadian dollar.

Moving into the second quarter of the year, risk assets enjoyed strong performance as monetary and fiscal stimulus dominated concerns over the economic impact of COVID-19. Currency markets also saw a rebound with most currencies ending the period close to where they started the year.

In Europe, having been the epicentre of the pandemic in the first quarter, the European economy was successful in controlling the virus in the second quarter and the fiscal response was significant and well received by market participants. Negotiations concluded with an agreement on a European recovery fund which will mean debt mutualisation and therefore fiscal transfers. This move was taken by both market participants and commentators to be a move closer to the fiscal union that many believe is necessary for sustainable prosperity in Europe. Consequently, the Euro and those currencies closely tied to the single market such as Swedish krona and Norwegian krone performed well following the announcement.

In the US, the relaxed measures taken by the US administration meant that the US struggled to control the virus. Large fiscal spending and liquidity injections from the Federal Reserve led US equities and fixed income markets to perform well however the US dollar depreciated versus most major currencies as optimism over the global recovery and large dollar liquidity weighed on the currency.

Both the Australian dollar and New Zealand dollar benefited from their relatively low virus infection rate, large fiscal stimulus, pro-cyclical properties and the growth policies implemented in China.

In the second half of the year, the themes from the second quarter continued with risk assets performing well, US real rates falling, precious metals, commodity currencies and European currencies appreciating and the US dollar depreciating. Continued market trends reflected the continued narrative in financial markets which is that the policy stimulus outweighs the economic impact from COVID-19 and that following the sharp fall in activity in Q2, the economic recovery is robust.

Aside from the central theme, there were two idiosyncratic themes during the second half of the year. Firstly the European Central Bank's ("ECB") response to the euro's appreciation since March and secondly ongoing Brexit negotiations between the UK and European Union. In Europe, as the euro approached 1.20 against the US dollar, communication from ECB officials and research published from the central banks research department highlighted the negative consequences of a strengthening currency on the central bank's ability to meet their target. The symbolic 1.20 level was also breached as Eurozone inflation turned negative. Market participants watched closely for whether or not the ECB would just continue to attempt to talk down the single currency or if policy action would be forthcoming. It was the latter.

Towards the end of 2020 many market participants' focus was on the US elections which ended with the Democrats winning the Presidency and the Senate still to be decided in January. Market commentators believe this outcome will lead to further fiscal stimulus but without some of the market-unfriendly policies that had previously been feared.

Neuberger Berman Diversified Currency Fund (Continued)

Investment Manager's Report (Continued)

The COVID pandemic saw a second wave of infections in many countries which led to further lockdowns. Market participants appear to look through the current economic environment with the expectation that governments and central banks will step in to provide any stimulus needed and thus the long term economic impact will be limited.

In the UK, Brexit saw an agreement reached on Christmas eve which will avoid tariffs and quotas on most traded goods but the agreement lacked scope on many traded services which are key for the UK.

Looking ahead into 2021, with the US Presidential Election decided and the Senate to be decided early in the new year the markets' attention will turn to fiscal policy and COVID-19 vaccine distributions. As economies begin to reopen it will be important to monitor how much support governments provide and how any support is financed.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman US Multi Cap Opportunities Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 13.67%. Over the same period, the benchmark index, the S&P 500 (Total Return, Net of tax, USD) (the "Index"), returned 17.75%. (Performance for all share classes is provided in Appendix II). Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Strong stock selection within Communication Services, Financials, and Materials benefited relative performance. Consumer Discretionary and Consumer Staples detracted from relative performance as select companies were impacted by the effects of social distancing due to COVID-19. Portfolio positioning benefited relative performance. An underweight to Energy and Health Care, and zero exposure to Real Estate and Utilities positively contributed to relative performance. Relative performance was impacted by an overweight position to Financials. The majority of the Portfolio's underperformance during the year was realised during the market drawdown that took place from the end of February through the third week of March due to COVID-19. The Portfolio outperformed in the second half of 2020, returning 26.84% and outperforming the 21.86% return of the Index by approximately 500 basis points. The Portfolio finished the year with an overweight in Financials, Industrials and Materials, an underweight in Health Care and Information Technology, and had no exposure to Energy, Real Estate or Utilities.

Portfolio construction is an important component of our investment process, and we continue to find compelling opportunities across our three investment categories—Special Situation, Opportunistic, and Classic investments. This balanced approach is designed to mitigate risk, while generating alpha through stock selection in various market environments. We continue to find compelling opportunities in each category.

The core of our investment process is an unwavering focus on a company's generation of free cash flow and its use by management. We believe free cash flow is a cleaner measure of value creation than income statement earnings, which may be obfuscated by various accounting methods. Our analysis considers the stability and sources of free cash flow generation, as well as the potential uses of this capital. This investment focus enables us to look across sectors, market capitalisations, and risk profiles to find opportunities, particularly during periods of increased market volatility.

Looking forward, we believe the equity environment will favor active managers with a demonstrated ability to deliver value through stock selection. The combination of extraordinary fiscal and monetary stimulus, historically low interest rates, and individual stock price dislocations, provide a favorable environment for the US Multi Cap Opportunities Strategy. The depth of the team's Storehouse of Knowledge remains robust. The team continues to identify attractive investment opportunities as equity market conditions evolve. We believe the opening of the US economy will progress as we advance through 2021, supporting US corporate earnings growth. We believe the portfolio is well positioned to benefit from the continued normalisation of global economic activity and increasing investor focus on company fundamentals.

As we evaluate both potential new positions and current portfolio holdings, we will continue to do so with a long-term investment perspective in mind. As always, our focus is to grow our clients' assets through the disciplined application of our investment philosophy and process.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class was -3.22%. Over the same period, the Portfolio's benchmark index, the FTSE NAREIT All Equity REITs Index (USD Total Return, Net of Tax), returned -6.12%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance, and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The overall U.S. stock market experienced periods of elevated volatility, but ultimately generated strong results in 2020 and ended the year at an all-time high as evidenced by the S&P 500 Index. After reaching a record high in mid-February 2020, the market abruptly reversed course and fell sharply, ending the 11 year bull market. Investor sentiment was initially supported by the completion of the first phase of the trade accord between the US and China and generally solid corporate results. However, the rapidly spreading COVID-19 pandemic and its severe impact on the global economy sent markets sharply lower. The US market then reversed course and rallied over the final three quarters of the year. The market's turnaround was triggered by a number of factors, including unprecedented monetary policy accommodation by the US Federal Reserve (Fed), significant fiscal stimulus and, toward the end of the year, news of highly effective COVID-19 vaccines and resolution of the November presidential election. These factors more than offset the economic impact of a surge in COVID-19 infections and several geopolitical issues. All told, the S&P 500 Index gained 18.40% in 2020. In contrast, the FTSE NAREIT All Equity REITs Index (USD Total Return, Net of Tax), returned -6.12% during the year.

While the Portfolio could not escape the weakness in the overall real estate market, it outperformed the Index during the reporting period. Both sector allocation and stock selection contributed to the Portfolio's relative performance. In terms of sector positioning, underweights to Diversified and Regional Malls contributed the most to results. Conversely, underweights to Industrials and Free Standing were the largest detractors from returns. From a stock selection perspective, the Portfolio's holdings in the Regional Malls, Diversified and Infrastructure sectors contributed the most to performance. In contrast, holdings in the Office, Health Care and Apartment sectors detracted the most from results.

The COVID-19 pandemic and the lasting effects of a US and global recession remain the primary risks to the market. That said, approval of a COVID-19 vaccine, in our view, marked a major turning point in the fight against the global pandemic, which sparked a strong market rally. Although it will take time for these measures to be broadly accepted, distributed, and administered across the population, we believe increased visibility to a post-COVID-19 environment may lead to a sustainable market recovery. Recent sharp increases in the number of infections across the US remind us that elevated uncertainty and market volatility could persist. We understand that this process may take many months, possibly into late 2021. In the meantime, we believe measures including additional monetary and fiscal stimulus should help buoy the economy until potential self-sustaining economic growth opportunities return.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$
75,514	American Tower Corp	18,578,428
109,759	Crown Castle International Corp	17,199,522

Neuberger Berman China Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 20.77%. Over the same period, the benchmark index, the MSCI China Index (Net) (the "Index"), returned 29.49%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

The China equity markets performed strongly in 2020 for both the Index and the domestic China A-shares market. Going into 2020, China equity markets extended gains as the government announced a broad-based 50bps reserve requirement ratio ("RRR") cut and trade tensions eased after China and the US signed the trade deal, but markets took a downturn later in January as investors turned risk-off to assess the impact of the COVID-19 outbreak to global economy. Throughout February, investors were focused on the outbreak and Chinese equities were sold off after resuming trading from the extended New Year holidays, and global markets declined as the outbreak spread and the spike in number of infections heightened concerns over disruptions to global supply chains. In March, China's containment of COVID-19 outside Hubei was largely effective and factory production gradually resumed, but the number of cases accelerated outside China and the eruption of an oil price war between Russia and Saudi Arabia triggered a heavy sell-off in all asset classes. Markets later stabilised as government stimulus and easing measures such as targeted RRR cuts by the People's Bank of China ("PBoC") and two aggressive rate cuts by the US Federal Reserve helped investors gain some risk appetite. In April, Chinese equities traded higher due to March Manufacturing and Non-Manufacturing Purchasing Managers Indices ("PMI") rebounding strongly and additional government stimulus announced. Despite a historic collapse in US WTI crude oil prices which settled negative for the first time, markets ended positive in anticipation of corporate earnings and consumption recovery. The China equity markets corrected in May because of tensions between China and the US resurfacing after President Trump expressed doubts over phase 1 of the trade agreement and the proposal of the Hong Kong national security legislation, and the "Two Sessions" meeting in Beijing fell short of expectations. Markets rallied in June as solid macroeconomic data released for May fuelled optimism of a sustainable global economic recovery, such as Caixin Services PMI, Industrial Production growth, and better than expected Exports and Industrial Profits data.

In July, the market rally continued due to ongoing economic recovery indicated by strong PMI data and rebounding 2Q GDP growth and Industrial Profit growth, positive news of vaccine trials and anticipation of further fiscal stimulus from central banks and governments. Strong market returns extended into August despite concerns over high borrowing cost and a wave of new share listings, primarily because of better than expected corporate interim results, performance of the ChiNext Board after new initial public offering listing and trading rules, and accommodative monetary policy from the Fed supported risk appetite globally. Chinese equities retreated in September as Chinese regulators curbed expectations on the ChiNext Board, geopolitical tensions elevated with US and India and investors de-risked ahead of the China National Holidays. After the Golden Week holidays, China equity markets rallied strongly from positive sentiment as statistics indicated consumption recovery and the State Council announced plans to develop Shenzhen as the "core engine" of reform in the Greater Bay Area. Despite the Fifth Plenum of the 19th Party Congress revealed proposals for the 14th Five-Year Plan in late October, investors remained cautious at month-end because of uncertainties over the upcoming US elections, 3Q earnings results for Chinese companies and Ant Group's blockbuster IPO impacting liquidity. In November, in spite of President Trump signing an executive order prohibiting US investors from holdings shares of companies with suspected Chinese military ties, Chinese equities rallied on the back of positive vaccine developments, China's macroeconomic data suggesting continued economic recovery and the signing of the Regional Comprehensive Economic Partnership ("RCEP") agreement by 15 APAC countries further boosted risk-on sentiment. In December, both MSCI and FTSE announced the removal of blacklisted companies from the US Executive Order from their respective benchmark indices. Both the domestic A-shares market and offshore market ended the year in positive territory after the PBoC unexpectedly injected the most cash within a day via medium-term lending facility operations and China's Central Economic Work Conference provided positive policy plans in 2021.

In 2020, the Portfolio's main contributors to performance included Financials (underweight to the benchmark and stock selection to banks), Materials (stock selection, primarily to construction materials) and Communication Services (stock selection to interactive media & services and entertainment). Main detractors from performance included Consumer Discretionary (underweight and stock selection, primarily to autos & auto parts, household durables and internet & direct marketing retail), Health Care (stock selection to pharmaceuticals and biotechnology) and Information Technology (underweight and stock selection to electronic equipment, instruments & components). The Portfolio's overweight exposure to domestic China A-shares contributed to performance, whereas the Portfolio's overweight exposure to Chinese companies listed in Hong Kong and underweight exposure to US-listed Chinese companies detracted from performance.

Investment Manager's Report (Continued)

As of 31 December 2020, the Portfolio's largest sector underweight was Communication Services, and also held underweight positions in Information Technology and Financials. The Portfolio's largest sector overweight was Materials, and also held overweight positions in Consumer Staples and Consumer Discretionary. The Portfolio's top 10 positions comprised more than 54% of total assets at end of December.

Domestic growth conditions in China steadily regained traction over the quarter as the economy veered back on its pre-COVID trajectory. Median economists' forecasts put 4Q 2020 GDP growth at 6.2% YoY, representing a meaningful increase from the 4.9% registered in the previous quarter. The continued rebound in economic activity was driven by an acceleration of manufacturing capacity growth, which more than offset relatively softer fixed asset investment growth across infrastructure and property. The service sector also showed resilience, particularly as domestic consumption continued to improve. Finally, exports surged significantly due in part to strong overseas consumer goods demand, an upcycle for DRAM and strength in autos/auto parts exports. Given the ongoing economic recovery, policymakers have shifted their focus from stimulating growth through ongoing infrastructure investment to addressing income imbalances and livelihood issues. It has been announced that 2021 government expenditure will be focused on areas such as education, employment, public health and social welfare. This should also result in a narrowing of fiscal deficit from record levels in 2020, leaving policymakers with more room to maneuver and manage any potential risks to the downside. China signed the RCEP in November, followed by the execution of the EU-China Comprehensive Agreement on Investment in late-December. The signing of the two trade and investment agreements are significant as they provide continuity to current linkages between China and various regional and transcontinental trading partners, but also works to insulate its role across supply chains.

On the back of a supportive economic outlook, Chinese equities continued to exhibit strength through to the end of the year. However, equity market returns have been driven by an expansion of multiples, with the Index trading at 18.4 times forward earnings as at end-4Q 2020 and the CSI 300 Index trading at 18.3x. While the markets remain buoyant, the slightly more hawkish stance taken by the PBoC may result in a gradual normalisation of liquidity conditions going forward. As such, the importance of corporate fundamentals in the form of top- and bottom-line growth is expected to come back into vogue as a driver of 2021 returns. In particular, the upcoming FY 2020 earnings reporting season will provide market participants an important first glimpse of individual company performance under normalized economic conditions. This can potentially lead to a re-rating of both outperforming and underperforming names as investors discount earnings into valuations. With this in mind, the Portfolio continues to focus on identifying and owning high quality companies with good earnings visibility and strong long-term growth prospects.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Markets Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 14.15%. Over the same period, the MSCI Emerging Markets Index (Net) (the "Index") returned 18.31%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging Markets ("EM") equities sold off with the rest of global markets in March 2020, as COVID-19 spread outward from Asia. In addition to local shutdowns and lockdowns, investors were concerned about EM economies and businesses reliant on exports. As the year progressed, markets rebounded as it appeared the virus was somewhat contained, as sectors and regions re-opened, on government stimulus programs, and finally, on positive vaccine news. The post-March EM rally accelerated during fourth quarter, with investors continuing to emphasize high momentum growth stocks.

Reflecting this sentiment, Information Technology ("IT") and Health Care led the Index, which closed 2020 on par with the S&P 500 Index and ahead of the MSCI EAFE (developed non-US markets). Real Estate and Energy declined significantly, in a year with a particularly wide spread between sector performance. Individual country market performance also showed a wide range; Korea, Taiwan and China outperformed significantly, while markets including Greece, Egypt and Colombia posted losses.

Sector allocation was advantageous for the portfolio this period, with the portfolio's overweight versus the Index to the top performing IT sector and underweight in Financials and Energy key advantages. From a stock selection perspective, our Materials holdings outperformed. Geographically, holdings in Taiwan and Russia, and an overweight to India were benefits.

The market's focus on growth momentum was a headwind for our fundamentals-focused strategy this year, so stock selection overall detracted from relative results. Our Consumer Discretionary and Health Care holdings lagged most. By country, stock positioning and our underweight to China was a headwind. Mexican and Korean holding also detracted.

Looking past COVID, we anticipate the market will eventually shift back to one driven more by the long-term fundamentals we favor. In the meantime, we are paying close attention to both US-China tensions and heightened Chinese regulatory risk. We believe market volatility will continue in the coming year, driven by abrupt changes in sentiment.

The team believes our diversified portfolio and disciplined strategy positions us to provide strong risk-adjusted relative returns over the long-term, while navigating near-term market volatility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman US Small Cap Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class returned 24.61%. Over the same period, the benchmark index, the Russell 2000 Index (USD Total Return, Net of Tax), returned 19.50%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance, and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The overall US stock market experienced periods of elevated volatility, but ultimately generated strong results in 2020 and ended the year at an all-time high. After reaching a record high in mid-February 2020, the market abruptly reversed course and fell sharply, ending the 11 year bull market. Investor sentiment was initially supported by the completion of the first phase of the trade accord between the US and China and generally solid corporate results. However, the rapidly spreading COVID-19 pandemic and its severe impact on the global economy sent markets sharply lower. The US market then reversed course and rallied over the final three quarters of the year. The market's turnaround was triggered by a number of factors, including unprecedented monetary policy accommodation by the US Federal Reserve (Fed), significant fiscal stimulus and, toward the end of the year, news of highly effective COVID-19 vaccines and resolution of the November Presidential Election. These factors more than offset a surge in COVID-19 infections and several geopolitical issues. All told, the S&P 500 Index gained 18.40% for the reporting period. Small-cap stocks, which are generally more sensitive to the economy, generated even stronger results, as the Russell 2000 Index (the "Index") gained 19.96% during the year. The small-cap market was extremely volatile, as they posted their worst quarter ever in the first quarter of the year, and their best quarter ever in the fourth of 2020. Within the small-cap universe, the Russell 2000 Growth and Russell 2000 Value Indexes returned 34.63% and 4.63%, respectively, for the reporting period.

The Portfolio posted a strong absolute return during the reporting period and outperformed the benchmark index. Both sector allocation and stock selection drove the Portfolio's outperformance. Looking at sector allocation, an overweight to Information Technology, the second-best performing small-cap sector over the year, added the most value. In particular, an overweight to Software was beneficial. Not owning Mortgage or Equity Real Estate Investment Trusts (REITs) was also a strong contributor to relative returns. Conversely, the Portfolio's underweight to Biotechnology subsector was a meaningful detractor from performance. In terms of stock selection, the Portfolio's holdings in the Financials, Consumer Discretionary and Communication Services sectors were the most beneficial. In the Financials sector, our Banks and Capital Markets positions were the added the most value. Within the Consumer Discretionary sector, holdings in the Distributors industry outperformed. In Communication Services, our Media positions were rewarded. This was somewhat offset by weak stock selection in the Health Care, Energy and Consumer Staples sectors. Within Health Care, Life Sciences Tools & Services was the biggest drags on results. In the Energy sector, Oil & Gas Consumable Fuels detracted from returns. Within Consumer Staples, our Food Product holdings were headwinds for performance.

The COVID-19 vaccine breakthrough brought some much needed clarity as to the possible timing of when economic activity could normalise. That said, the near-term outlook remains clouded by the recent spike in infections and renewed restrictions in parts of the U.S and abroad. In the near-term, continued Fed monetary accommodation and the recent \$900 billion stimulus bill could help bridge the gap until the vaccine rollout is sufficient to place the economy on firmer ground. In terms of the political arena, in addition to the Biden presidency, the outcome of the Georgia runoffs has resulted in the Democrats now having majorities in both the Senate and House. This could lead to additional stimulus packages, greater infrastructure spending, larger deficits, and possibly an increase in longer-term interest rates. Against this backdrop, we hold steadfast in our belief that a diversified portfolio of financially strong companies, with sustainable and highly differentiated business models, is a prudent approach for long-term investment success.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Short Duration High Yield Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 3.46%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The year 2020—marked by the COVID-19 pandemic—was a tale of two markets with a huge indiscriminate, high velocity drawdown from mandated shutdowns to slow the spread of the virus followed by a significant risk-on rally as a result of massive fiscal and monetary stimulus in April and May. While the second half of the year saw some pockets of volatility, the trillions in global monetary accommodation and fiscal support put in place before mid-year had worked well to remove extreme tail risk. Furthermore, capital markets were wide open in the second half of the year and companies had been aggressive in cutting costs, so many issuers were better positioned and able to bridge the challenging operating environment until the economy was in recovery mode. Then, in the fourth quarter, the market started looking through the pandemic toward the eventual full reopening of the global economy on news in early November of two viable vaccines. US high yield finished the year in positive territory and also saw very strong high yield new issuance and record-setting inflows for the asset class.

For the 12 months ended 31 December 2020, higher quality securities, such as those rated BB and B in the ICE BofA US High Yield Index saw better performance with returns of 8.62% and 3.66%, respectively, whereas CCC-rated securities returned 2.86% for the full year. In the fourth quarter, conversely, higher quality underperformed lower quality issuers as the BB, B, CCC & lower rated categories of the ICE BofA US High Yield Index returned 5.74%, 5.72%, and 12.19%, respectively.

Credit selection, downside mitigation and default avoidance were key factors to performance in US high yield markets in 2020. Throughout the period, issuer fundamentals diverged but generally remained more resilient than many had feared as the ability for high yield issuers to successfully navigate the various stages of the pandemic improved over the period given a 3Q20 earnings season that exceeded expectations, strong cost controls during 2Q20 and open capital markets which allowed issuers to stabilise margins and improve balance sheets. Progress against the virus, combined with pent-up demand, a very high savings rate and strong fiscal and monetary policy support should deliver improving economic growth and issuer fundamentals in 2021. US high yield default rates started the year below the long-term average, spiked as a result of mandated shutdowns and then declined materially toward the end of the year. In December, the par weighted LTM US high yield default rate was 6.17%. The par weighted LTM US high yield default rate excluding Energy was 4.46%. For context, the long-term average default rate is 3.50% (based on annual default rates back to 1980 according to JP Morgan).

During the year, from a sector perspective, positioning in Gas Distribution, Real Estate & Homebuilders and Automotive & Auto Parts added the most to performance. In contrast, positioning in Support-Services, Super Retail and Gaming were the top three detractors. From a ratings perspective, the Portfolio's positioning in BB and CCC and below issuers added the most to performance while positioning in Non-Rated and BBB and above added the least to performance.

While spreads continued to tighten in the second half of the year from elevated levels, we believe spreads are compensating investors for the moderating and more visible defaults remaining which are likely to come from the same areas such as some parts of the Energy sector, longer-term COVID-19 impaired and industries in secular decline. In our view, the vaccine roll-out is likely to start normalising economic and social activity in 2021. As we continue to closely monitor the developments of the pandemic, the economic recovery and changes in policy as a result of the elections, we are finding ample investment opportunities in high yield across the credit spectrum. Despite the recent resurgence of COVID-19 cases and delays in vaccine delivery, which could result in pockets of short-term volatility, we believe our deep fundamental credit research, focus on relative valuations, seeking to avoid defaults and "best ideas" portfolio construction approach, position us well to tactically take advantage of any volatility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$

Neuberger Berman Global Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 9.89%. Over the same period, the benchmark index, the Bloomberg Barclays Global Aggregate Index (USD Total Return, Unhedged), returned 9.20%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

As the wide-reaching impact of COVID-19 became evident, credit spreads widened out to levels not seen in a decade, and government bond yields rallied. Government restrictions and cautious consumers led to a sharp, sudden drop in economic activity and a spike in unemployment. Responding to this exogenous shock, central banks and policymakers globally moved swiftly with monetary and fiscal policy accommodation as well as measures intended to support orderly functioning of capital markets. Extensive monetary and fiscal policy actions facilitated an initial stabilisation in credit markets while the approval of several vaccines later in the year allowed credit spreads to ultimately recover back to levels similar to before COVID-19. On the other hand, government yields remain at historically low levels – even if somewhat higher to end the year compared to the record lows seen earlier in the year. Despite much volatility, spread sectors – including, investment grade credit, non-investment grade credit, bank loans, emerging market debt and securitised sectors – delivered positive total returns over the trailing one-year period.

Credit exposures were the main driver of outperformance versus the benchmark. The portfolio benefited from security selection within global investment grade credit as well as an increased allocation to the sector following the significant spread widening in the first quarter. Overweight allocations to CMBS and ABS and security selection in US agency MBS were other notable contributions. Security selection in global sovereigns, lack of exposure to Danish covered bonds and security selection in ABS detracted from relative performance. Performance from the portfolio's global rates strategy was mixed. While positioning in Canada, New Zealand and Japan rates contributed to relative performance, positioning in US and UK rates detracted and offset this positive.

Looking to 2021, we anticipate strong, if uneven, recovery across regions as the pandemic plays out. The expected availability of COVID-19 vaccines, the reopening of economies, continued monetary and fiscal policy support, and pent-up demand in pandemic-sensitive sectors of the economy should provide a significant boost to demand. Although our outlook is dependent on a successful and timely distribution of safe, efficient and effective vaccines, we believe that recent approvals and distribution suggest that the end of the pandemic is in sight.

Overall, we see an investment environment of renewed growth and improving fundamental conditions, combined with increased inflationary pressures, but without any significant change in monetary policy as central banks maintain current support in light of ongoing, though potentially fading, pandemic conditions and lockdowns. As such, we are constructive on select credit securities, particularly favouring those that offer carry with minimal duration, and inflation-sensitive assets. While we are looking at opportunities in COVID-19-sensitive industries, research-driven security selection remains critical as ever.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Market Debt - Local Currency Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 1.92%. Over the same period, the JPMorgan GBI Emerging Markets Global Diversified Index (USD Total Return, Unhedged) ("the Index") returned 2.69%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging market ("EM") debt came under considerable stress in the first half of 2020 as the COVID-19 pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for emerging markets was the sharp decline in oil prices caused by Organisation of the Petroleum Exporting Countries ("OPEC+") disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In the commodities space, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US election getting resolved. Oil prices jumped to highest levels since the start of the pandemic while safe haven assets such as the Treasuries, bunds and gold underperformed.

During the reporting period, Romania was the best performing country in the local currency index, followed by the Philippines and Chile. Meanwhile, Brazil, Turkey and Russia were the worst performing countries.

Portfolio performance over the period relative to the Index was negatively impacted by FX positioning, while local rates positioning contributed positively. Our overweight in the Brazilian real was the main detractor on the currency side, followed the overweight in the Russian ruble. Meanwhile, our positioning in the Turkish lira throughout the year was positive, as well as our off-benchmark position in the Egyptian Pound. On the rates side, our overweight duration in the portfolio was positive given the tightening in local interest rates. Duration overweights in Mexico, Brazil, Peru and Russia added value in particular. Meanwhile, the overweight duration and curve flattener position in South Africa detracted.

Following the very significant drop in global GDP growth last year due to the COVID-19 pandemic, economies have been recovering at varying paces, supported by aggressive policy stimulus efforts globally. This broadly supportive fundamental environment, alongside the roll-out of vaccines, should support a return to growth in 2021 with EM recovering lost ground more quickly than developed markets.

Aside from global coronavirus developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding, with the prospect of US-China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favorable to emerging economies along the prospect of a cyclical recovery in sight.

Against this backdrop, we are constructive on the outlook for EM currencies, as they should benefit in our central scenario of EM growth recovery, while improving terms of trade support commodity currencies in particular. Meanwhile, on the local rates side it is time to be more selective going forward considering the more reflationary backdrop and the degree of yield tightening that is behind us. We still see good value in a number of EM local bond markets with relatively high real yields and where monetary policy is anticipated to remain on the dovish side, such as Indonesia and Mexico.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Market Debt - Hard Currency Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.64%. Over the same period, the JPM EMBI Global Diversified Index (Total Return, USD) ("the Index"), returned 5.26%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging market ("EM") debt came under considerable stress in the first half of 2020 as the COVID-19 pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for emerging markets was the sharp decline in oil prices caused by Organisation of the Petroleum Exporting Countries Plus ("OPEC+") disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In commodities, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US Presidential Election getting resolved. Oil prices jumped to highest levels since the start of the pandemic while safe haven assets such as the Treasuries, bunds and gold underperformed.

Index spreads widened from 291 basis points to 351 basis points, hitting a high of 721 in March, while US Treasury yields ended the year at 0.91% from 1.92% at the start of the year and 0.51% at their bottom in April. The Index yield to maturity ended at 4.55% end-2020, from 4.93% end-2019.

The best performer was Uruguay, in line with other low-risk and low yielding markets. Next in line was Tajikistan, an idiosyncratic issuer. The worst performer was Lebanon, which defaulted on its Eurobonds amid a political and economic crisis that was made worse with the pandemic.

The Portfolio outperformed the Index, driven mainly by security selection while country allocation and top down positioning contributed negatively. In security selection, our positioning in Ecuador performed the best. In country selection, our overweight in Sri Lanka, weighed down by financing challenges, detracted the most. The main contributor was our early absence from Lebanon.

Following the very significant drop in global GDP growth last year due to COVID-19, economies have been recovering at varying paces over the recent months, supported by aggressive policy stimulus efforts globally. Our base case for the coming period is for a continuation of this gradual recovery, supported by vaccines roll-out, but with speedbumps along the way as countries still grapple with virus flareups and implement new temporary restrictions.

Aside from global COVID-19 developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding, with the prospect of US-China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favorable to EM economies along the prospect of a cyclical recovery in sight. Given a more likely chance of infrastructure spending, we continue to see support for commodities, especially in the metals and mining space which is likely to be positive for the EM asset class.

We see market technicals as negative due to overweight investor positioning and continued high net issuance ahead, especially in the investment grade universe.

We see the valuation for EM hard currency bonds to be within the fair value range after the recent rebound and attractive relative to the developed markets.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Market Corporate Debt Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.66%. Over the same period, the JPMorgan CEMBI Diversified (Total Return, USD) (the "Index") returned 7.35%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging market ("EM") debt came under considerable stress in the first half of 2020 as the coronavirus pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for EM was the sharp decline in oil prices caused by OPEC+ disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In the commodities space, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US election getting resolved. Oil prices jumped to highest levels since the start of the pandemic while safe haven assets such as the Treasuries, bunds and gold underperformed.

Corporates posted a positive return over the course of the year. The investment grade portion of the market outperformed high yield. Sector performance was largely positive led by commodities sectors. The only negative sector was transport which was impacted by defaults in Latin America.

The Portfolio underperformed the benchmark for the reporting year as its higher beta exposure triggered early losses during the pandemic early in the year. Over the year, the Portfolio recovered some losses via its commodities exposure, primarily in the oil & gas sector, as well as in industrials. Focusing in on the primary drivers, security selection was positive over the year while duration positioning and country allocation detracted from performance. Positioning in Chile, South Africa and Kazakhstan was positive. In Chile, positions in commodities as well as utilities and transports drove performance. In South Africa our position in a global chemical company was positive. Finally, in Kazakhstan the oil & gas exposure was additive. However, positions in Mexico, Brazil and Russia were negative. From a country allocation perspective, the overweights to China and Mexico were positive. The overweight exposure to Argentina detracted as the country restructured its debt, which put pressure on several holdings within the country.

Following the very significant drop in global GDP growth last year due to the coronavirus outbreak, economies have been recovering at varying paces over the recent months, supported by aggressive policy stimulus efforts globally. Our base case for the coming period is for a continuation of this gradual recovery, supported by vaccine roll-outs, but with speedbumps along the way as countries still grapple with virus flareups and implement new temporary restrictions.

As for EM corporates, corporate behavior in recent years has been focused on deleveraging which has enabled EM corporates to build up improved resilience against the adverse macro developments. Default rates remained contained in 2020 with a full year default rate of 3.5% for the high yield rated part of the market, and much lower compared to the 6.8% 2020 default rate in the US high yield market. We anticipate corporate defaults to remain contained going forward with an expected default rate of 2.9% for 2021, which is in line with the 10-year average for the asset class. We believe EBITDA should rebound in 2021 and company leverage metrics to improve.

Aside from global coronavirus developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding, with the prospect of US China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favorable to emerging economies along the prospect of a cyclical recovery in sight. Given a more likely chance of infrastructure spending, we continue to see support for commodities, especially in the metals and mining space which is likely to be positive for the EM asset class. We see valuations for EM hard currency corporates within the fair value range after the recent rebound but still attractive relative to the developed markets.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Strategic Income Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 8.04%. Over the same period, the benchmark index, the Bloomberg Barclays US Aggregate Index (Total Return, USD), returned 7.51%. (Performance for all share classes is provided in Appendix II) Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

As the wide-reaching impact of COVID-19 became evident, credit spreads widened out to levels not seen in a decade, and government bond yields rallied. Government restrictions and cautious consumers led to a sharp, sudden drop in economic activity and a spike in unemployment. Responding to this exogenous shock, central banks and policymakers globally moved swiftly with monetary and fiscal policy accommodation as well as measures intended to support orderly functioning of capital markets. Extensive monetary and fiscal policy actions facilitated an initial stabilisation in credit markets while the approval of several vaccines later in the year allowed credit spreads to ultimately recover back to levels similar to before COVID-19. On the other hand, government yields remain at historically low levels – even if somewhat higher to end the year compared to the record lows seen earlier in the year. Despite much volatility, spread sectors – including, investment grade credit, non-investment grade credit, bank loans, emerging market debt and securitised sectors – delivered positive total returns over the trailing one-year period.

During the reporting period, the Portfolio's credit exposures were the primary driver of relative outperformance. Security selection in investment grade credit was the largest contributor, with allocations to high yield, bank loans and mortgage credit being other notable positives. Security selection in agency MBS and allocation to US TIPS also added value; while inflation expectations collapsed in the first half of the year due to the COVID-19 economic shock, they recovered strongly over the second half to end the period higher overall. The Portfolio's emerging markets debt and municipal bond exposures detracted over the period. Rates positioning also detracted from relative results during the period, primarily due to the Portfolio's duration underweight; yield curve positioning delivered a modest contribution.

Looking to 2021, we anticipate strong, if uneven, recovery across regions as the pandemic plays out. The expected availability of COVID-19 vaccines, the reopening of economies, continued monetary and fiscal policy support, and pent-up demand in pandemic-sensitive sectors of the economy should provide a significant boost to demand. Although our outlook is dependent on a successful and timely distribution of safe, efficient and effective vaccines, we believe that recent approvals and distribution suggest that the end of the pandemic is in sight.

Overall, we see an investment environment of renewed growth and improving fundamental conditions, combined with increased inflationary pressures, but without any significant change in monetary policy as central banks maintain current support in light of ongoing, though potentially fading, pandemic conditions and lockdowns. As such, we are constructive on select credit securities, particularly favouring those that offer carry with minimal duration, and inflation-sensitive assets. While we are looking at opportunities in COVID-19-sensitive industries, research-driven security selection remains critical as ever.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Global Bond Absolute Return Fund*

Investment Manager's Report

For the period beginning 1 January 2020 to the Portfolio's close on 30 November 2020, the total return for the USD I Accumulating Class was 1.65%. Over the same period, the benchmark index, the ICE BofA US 3-Month Treasury Bill Index (Total Return, USD), returned 0.66%. (Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

As the wide-reaching impact of COVID-19 became evident, credit spreads widened out to levels not seen in a decade, and government bond yields rallied. Government restrictions and cautious consumers led to a sharp, sudden drop in economic activity and a spike in unemployment. Responding to this exogenous shock, central banks and policymakers globally moved swiftly with monetary and fiscal policy accommodation as well as measures intended to support orderly functioning of capital markets. Extensive monetary and fiscal policy actions facilitated an initial stabilization in credit markets while the approval of several vaccines later in the year allowed credit spreads to ultimately recover back to levels similar to what they were before COVID-19. On the other hand, government yields remain at historically low levels – even if somewhat higher to end the year compared to the record lows seen earlier in the year. Despite much volatility, spread sectors – including, investment grade credit, non-investment grade credit, bank loans, emerging market debt and securitised sectors – delivered positive total returns over the trailing one-year period.

For the period, the portfolio's credit exposures were additive. Allocation to global high yield was the largest contributor, followed by allocations to global investment grade credit, hybrid securities, CLOs and securitised credit. Performance from our rates positioning was negative during the period, due to short exposures in U.S. and core European rates.

The portfolio's active FX strategy weighed on performance. For the period, underweights in New Zealand dollar and Canadian dollar were the best performing positions. Conversely, the Fund's overweights in Norwegian krone and Australian dollar were the worst performing positions.

* Portfolio liquidated on 30 November 2020.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Short Duration Emerging Market Debt Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 4.10%. Over the same period, the ICE BofA US 3-Month Treasury Bill Index (Total Return) (the "Index") returned 0.67%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging market ("EM") debt came under considerable stress in the first half of 2020 as the coronavirus pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for emerging markets was the sharp decline in oil prices caused by OPEC+ disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In the commodities space, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US election getting resolved. Oil prices jumped to their highest levels since the start of the pandemic while safe-haven assets such as Treasuries, bunds and gold underperformed.

The Portfolio posted a positive total return for the year and outperformed the Index, driven by yield curve positioning and by bottom up positioning across EM countries. Exposures to Turkey, Mexico and China were the largest contributors. Meanwhile, exposure in Sri Lanka, weighed down by financing challenges, was the main performance detractor over the reporting period.

Following the significant drop in global GDP growth last year due to the Coronavirus outbreak, economies have been recovering at varying paces over the recent months, supported by aggressive policy stimulus efforts globally. Our base case for the coming period is for a continuation of this gradual recovery, supported by vaccines roll-out, but with speedbumps along the way as countries still grapple with virus flareups and implement new temporary restrictions.

As for EM corporates, default rates remained contained in 2020 with a full year default rate of 3.5% for the high yield part of the market, and much lower compared to the 6.8% 2020 default rate in the US high yield market. We anticipate corporate defaults to remain contained going forward with an expected default rate of 2.9% for 2021, which is in line with the 10-year average for the asset class. We believe EBITDA should rebound in 2021 and company leverage metrics to improve.

Aside from global Coronavirus developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding, with the prospect of US China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favorable to emerging economies along the prospect of a cyclical recovery in sight. Given a more likely chance of infrastructure spending, we continue to see support for commodities, especially in the metals and mining space which, in our opinion, is likely to be positive for the EM asset class.

We see valuations for EM hard currency sovereign and corporates within the fair value range after the recent rebound but still attractive relative to the developed markets.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Absolute Return Multi Strategy Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.88%. The Portfolio's benchmark (HFRX Global Hedge Fund Index (USD)) returned 6.81% over the same period. Gains from the allocations to long/short equity, global macro/managed futures and merger arbitrage/event driven outpaced losses from credit. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Equity markets were turbulent in 2020, selling off in late Q1 after the initial spread of COVID-19 and rallying subsequently on positive vaccine developments and re-openings, though not without volatility. While US and Asian equities ended the year higher, European equities finished down modestly. Treasury yields declined across the curve with the curve steepening as US Federal Reserve rate cuts weighed on the front end of the curve while risk-on sentiment supported long-term yields. The US dollar remained range-bound for the most part, strengthening slightly versus the Japanese yen and weakening slightly versus the euro and British pound. Energy prices were mixed but mostly positive as crude oil and gold prices moved higher while natural gas prices declined.

The long/short equity allocation was the largest contributor for the period. Gains from longs outpaced losses from shorts and the managers in aggregate generated positive alpha from both longs and shorts. Gains were spread across sectors and led by Consumer Discretionary, Industrials and Communication Services, while the bulk of losses came from equity index hedges.

The global macro/managed futures allocation was the second largest contributor as gains from the managed futures strategy outweighed losses from the systematic currency strategy. Positive performance from the managed futures allocation was split between currencies and interest rate positioning, which outpaced small losses from equities. Losses from the systematic currency strategy were driven primarily by long US dollar positioning versus the Australian dollar and, to a lesser extent, versus the British pound and euro. Small gains came from long positioning in the Japanese yen versus the US dollar as well European rates positioning.

Gains from the allocation to merger arbitrage/event driven strategies were driven primarily by a number of deals that tightened and/or closed during the period.

The allocation to credit strategies was a small detractor with losses driven by the asset-backed securities strategy. Losses were driven primarily by commercial mortgage-backed securities and, to a lesser degree, by residential mortgage-backed securities. Small gains came from CLO debt and auto ABS.

Equity and fixed income markets ended the year strongly on positive developments with regards to COVID-19 vaccine rollout. However, with cases continuing to surge, vaccine rollout slower than anticipated, political discord within the US Federal government, and potentially rising interest rates, we believe risks remain to keep volatility at elevated levels and we have positioned the Portfolio accordingly. The Portfolio's largest strategy allocation is long/short equity. We believe the pandemic will continue to create a high dispersion of winners and losers over the medium to long term for our sub-advisers to identify. Additionally, we believe moderately high volatility has the potential to enable our sub-advisers to trade their books more tactically to exploit what they view as attractive entry/exit points. The Portfolio's second largest allocation is to global macro/managed futures strategies. We believe that the level of market volatility has the potential to remain elevated and that factor has historically been beneficial for these strategies. The Portfolio's third largest allocation is to merger arbitrage/event driven strategies. While spreads tightened throughout the third quarter, they remain at attractive levels relative to the risk-free rate and deal volume has normalised given re-openings and pent up demand from the beginning of the pandemic. The Portfolio's fourth largest allocation is credit. We view this as a defensive allocation given the short duration and seniority of positioning within capital structures.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$

Neuberger Berman US Long Short Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class was 10.62%. Over the same period, the two benchmark indices, the S&P 500 Index (USD Total Return, Net of Tax) and the HFRX Equity Hedge Index (USD Total Return), returned 17.75% and 4.60% respectively. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

The S&P 500 (including dividends) reached new all-time highs during period – the swiftest stock market recovery in recent history following a sharp correction during the first half of 2020. News of higher than expected efficacy for the COVID-19 vaccine - combined with a streamlined approval and distribution process in place - pushed risk assets into record territory. Despite the rise in risk assets, Coronavirus cases continued to surge across the world putting further strain on already weakened company and government finances. Meanwhile the timing of an expected second stimulus package from US lawmakers is expected to be a near-term priority for the new administration. US economic releases were mixed as jobless claims jumped again as more cities and states re-imposed restrictions on businesses and social gatherings.

We categorise the Portfolio's investments on the long side into three buckets: Capital Growth, Total Return and Opportunistic. Capital Growth investments demonstrate attractive industry fundamentals, strong competitive positions, growing revenues, and attractive re-investment opportunities. Total Return investments demonstrate sustainable and/or growing streams of income that are underpinned by asset value and which can result in growing cash returns to shareholders (e.g., increased dividends, share repurchases, return of capital). The Total Return bucket also includes fixed income holdings, which currently consist mainly of high yield securities. Opportunistic investments are those with identifiable catalysts. This bucket may include companies with management changes, company reorganizations, merger and acquisition activity, "hidden assets", or other market dislocations that have the potential to unlock intrinsic value. Short positions may be used to increase returns and/or reduce risks with this mix being partly determined by the environment in which the Portfolio is operating: fundamental shorts (company-specific securities) may be characterised by catalyst-driven ideas, potential earnings misses, changes in the competitive landscape, and/or thematic shorts, as a few examples. "Market" shorts are used in an effort to manage exposure and reduce risks of the broader market.

For the reporting period, equity longs outperformed, primarily driven by security selection in the Financials, Communication Services and Utilities sectors. On the long side, the Capital Growth, Total Return (includes fixed income) and Opportunistic buckets were positive for the period. In contrast, individual security shorts and market shorts to hedge the portfolio detracted from performance, partially driven by the overall rise in the market during the reporting period.

While the longest economic expansion in history ended last year, we believe we are in the nascent stages of an economic recovery. After a period of elevated risks (global trade war, COVID-19 pandemic, US election uncertainty), the outlook for economic growth appears brighter driven by an upswing in the business cycle, less volatility from the executive branch, and a vaccine distribution program underway— all supported by stunning amounts of fiscal and monetary policy support. We now face early cycle dynamics not seen for a decade – above trend GDP and corporate earnings growth, declining unemployment and ultra-low interest rates. Startups are blossoming and the financial sector is on solid footing. An "online" economy has kept America running through its darkest days and is still expanding upon its relevance to both corporations and consumers. However, we remain mindful that the current investing environment is not without challenges as we enter 2021. This environment is flush with a confluence of fiscal policy considerations, monetary policy stimulus, public health concerns, geopolitical uncertainty, commodity price volatility, and sequencing (i.e., restarting the economy) question marks.

Nevertheless, we are very mindful of the complex world in which we live and invest. Given the massive amounts of stimulus around the globe, there is a risk that the underlying assumption around very low inflation may be misguided since at some point, unchecked fiscal spending has consequences. We highlight these risks because the current environment, as always, necessitates a flexible approach in the complex, global world in which we operate. Moreover, we strongly believe the greatest risks to the global economy are still those that are unknown today – be they financial or geopolitical in nature. As always, we must be ready and able to adapt when the facts change.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Market Debt Blend Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 3.22%. Over the same period, the benchmark index, a blend comprising of 50% weighting to JP Morgan GBI Emerging Markets Global Diversified (Total Return, Unhedged, USD), 25% weighting to JP Morgan EMBI Diversified (Total Return, USD), and 25% weighting to JP Morgan CEMBI Global Diversified (Total Return, USD) (the "Index"), returned 4.54%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

In the trailing twelve months, emerging markets (EM) debt experienced a negative shock from COVID-19 but ultimately rebounded to generate positive returns across the asset class. The hard currency sovereign debt index delivered a 5.26% return, the corporate debt index delivered 7.35%, and the local currency index returned 2.69%.

EM debt came under considerable stress in the first half of 2020 as the coronavirus pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for emerging markets was the sharp decline in oil prices caused by OPEC+ disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In the commodities space, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US election getting resolved without the contested scenario that had caused some concern. Oil prices jumped to highest levels since the start of the pandemic while safe-haven assets, such as the Treasuries, Bonds and gold, underperformed.

Performance ended the twelve-month period positive overall, though the Portfolio underperformed the Index. The asset allocation detracted from performance as the Portfolio was overweight hard currency sovereigns versus corporates throughout the year. Meanwhile, the corporate universe outperformed sovereigns. Towards the end of the year, the Tactical Asset Allocation (TAA) detracted due to a drag from the CDX.EM position that we held as partial protection against the higher risk profile of the strategy. Hard currency sovereign and corporates detracted overall as did EM FX, while local currency rates contributed to performance. In hard currency, country allocation detracted from performance due to the overweight exposure to Sri Lanka and underweight to Saudi Arabia. This was somewhat mitigated by the overweight to the Ivory Coast which benefited from the conclusion of presidential elections, where President Ouattara secured a third term despite heightened political tensions. The underweight exposure to Lebanon, which defaulted in April, was also additive. Security selection was positive because of instrument selection in Argentina and Ecuador, which both underwent debt restructuring in 2020. In the corporate space, the top-down positioning detracted as did country allocation. The underweight exposure to Chile and Hong Kong contributed to performance. However, this was offset by the underweights to Israel and Saudi Arabia. Security selection was a bright spot with Chilean metals & mining and positions in Kazakh oil & gas companies contributed to performance. Positions in China detracted on concerns about potential defaults in onshore SOEs (State Owned Enterprises) as well as new targeted US sanctions against Chinese companies. The local currency part of the portfolio outperformed, with local rates positioning contributing positively while EM FX detracted. In local rates, our overweight duration positioning versus the Index across Latin America was the main contributor. However, our position in South Africa was the primary detractor in rates. Our FX positions detracted from performance with negative contributions from the Brazilian real, Argentine peso, and Polish zloty. Positive FX drivers included positions in the Turkish lira and Colombian peso.

Following the significant drop in global GDP growth in 2020 due to the coronavirus outbreak, economies have been recovering at varying paces over the recent months, supported by aggressive policy stimulus efforts globally. Our base case for the coming period is for a continuation of this gradual recovery, supported by vaccine roll-outs, but with anticipated speedbumps along the way as countries still grapple with virus flareups and implement new temporary restrictions.

Aside from global coronavirus developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding; with the prospect of US/China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favorable to emerging economies along with the prospect of a cyclical recovery in sight. Given a more likely chance of infrastructure spending, we continue to see support for commodities, especially in the metals and mining space which we believe is likely to be positive for the EM asset class.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman European High Yield Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was 4.12%. Over the same period, the ICE BofA European Currency Non-Financial High Yield 3% Constrained Index (EUR Total Return) (the "Index") returned 2.85%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The year 2020—marked by the COVID-19 pandemic—was a tale of two markets with a huge indiscriminate, high velocity drawdown from mandated shutdowns to slow the spread of the virus followed by a significant risk-on rally as a result of massive fiscal and monetary stimulus in April and May. While the second half of the year saw some pockets of volatility, the trillions in global monetary accommodation and fiscal support put in place before mid-year had worked well to remove extreme tail risk. Furthermore, capital markets were wide open in the second half of the year and companies had been aggressive in cutting costs, so many issuers were better positioned and able to bridge the challenging operating environment until the economy was in recovery mode. Then, in the fourth quarter, the market started looking through the pandemic toward the eventual full reopening of the global economy on news in early November of two viable vaccines which caused a shift in investor expectations fueling a global risk-on rally in the fourth quarter where lower quality high yield saw better returns. For the full year, however, higher quality issuers provided a greater contribution to total returns than lower quality. For the 12 months ended 31 December 2020, securities rated BB and B in the ICE BofA European Currency Non-Financial High Yield 3% Constrained Index returned 2.58% and -0.28%, respectively, whereas CCC-rated securities returned 7.35%.

Credit selection, downside mitigation and default avoidance were key factors to performance in what ended up being a very tumultuous year in global high yield markets. Throughout the period, issuer fundamentals diverged greatly but generally remained more resilient than many had feared as the ability for high yield issuers to successfully navigate the various stages of the pandemic improved over the period given a 3Q20 earnings season that exceeded expectations, strong cost controls during 2Q20 and open capital markets which allowed issuers to stabilise margins and improve balance sheets. Progress against the virus, combined with pent-up demand, a very high savings rate and strong fiscal and monetary policy support should deliver improving economic growth and issuer fundamentals in 2021. High yield default rates started the year below the long-term average, moved up as a result of mandated shutdowns and then declined toward the end of the year. As of 31 December 2020, the European trailing 12-month high yield default rate, according to JP Morgan, was 3.3%, up 10 basis points from November 2020.

During the year, security selection within and an underweight to Automotive & Auto Parts, security selection within and an overweight to Healthcare and security selection within and an overweight to Super Retail were the most beneficial to performance. In contrast, security selection within Transportation excluding Air/Rail, an underweight to Energy and an underweight to Food, Beverage and Tobacco were the largest detractors. Within our ratings' positioning, security selection within the Portfolio's BB and B rated issuers were the most beneficial to performance and security selection within CCC and below and an overweight to B rated issuers were the largest detractors.

While spreads continued to tighten in the second half of the year from elevated levels, we believe spreads are compensating investors for the moderating and more visible defaults remaining which are likely to come from the same areas such as longer-term COVID-19 impaired and industries in secular decline. In our view, the vaccine roll-out is likely to start normalising economic and social activity in 2021. As we continue to closely monitor the developments of the pandemic, the economic recovery and changes in policy, we are finding ample investment opportunities in high yield across the credit spectrum and regions. Despite the recent resurgence of COVID-19 cases and delays in vaccine delivery, which could result in pockets of short-term volatility, we believe our deep fundamental credit research, focus on relative valuations, seeking to avoid defaults and "best ideas" portfolio construction approach, position us well to tactically take advantage of any volatility.

Neuberger Berman Global Equity Fund*

Investment Manager's Report

For the period beginning 1 January 2020 through the Portfolio's close 15 May 2020, the total return for the USD I Accumulating Class was -14.68%. Over the same period, the MSCI All Country World Index (the "Index"), returned -14.77%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect reinvestment of income dividends and other distributions, if any).

Global equity markets were whipsawed this period as investors reacted to the health and economic impacts of the COVID-19 pandemic. A steep decline in first quarter, as evidence of global spread emerged and shutdowns began, was followed by a rebound—based on early optimism around high frequency economic data, central bank and government policy stimulus, and signs of better containment in several nations.

All Index sectors remained in negative territory through 15 May, however, ranging from top performers Health Care and Information Technology ("IT"), which closed only slightly down, to Energy and Financials, with losses exceeding 30%. From a country perspective, Argentina, which was up, Denmark, flat, and China, down roughly 5%, outperformed. The US, the largest component of the benchmark by weight, declined 10.5%, and Brazil, Colombia, and Greece saw the sharpest drops.

The Portfolio outperformed on both a sector allocation and stock selection basis, benefiting most from our holdings in Financials and Communications Services. By country, stock selection in Canada, and an underweight to France and overweight to Switzerland were most advantageous.

By contrast, our holdings within the IT, Consumer Discretionary, and Consumer Staples sectors underperformed; and by country, holdings based in the Netherlands and Hong Kong and our overweight to the UK market detracted from relative results.

Thank you for your confidence in the team and our investment discipline.

* Portfolio liquidated on 15 May 2020.

Neuberger Berman Systematic Global Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 13.73%. Over the same period, the MSCI All-Country World Index (USD Total Return, net of tax) (the "Index") returned 16.25%. (Performance for all share classes is provided in Appendix II. Performance data quoted represents past performance and does not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Global equity markets ended with strong positive returns after a year of heightened volatility. The COVID-19 pandemic prompted a severe market sell-off and economic turmoil to start the year followed by a strong rally in technology stocks as people across the globe adjusted to extended lockdown orders and remote working arrangements. Towards the end of the year, vaccine optimism drove a rebound in cyclical and distressed industries, despite a surge in virus cases and the discovery of a new strain. US markets reacted positively to the passage of a \$900 billion pandemic relief bill near year-end. Economic data varied throughout 2020, global economic growth fluctuated in the first half of the year with manufacturing *Purchasing Managers' Index* ("PMI") sharply declining and then accelerating off the lows, while the second half of the year saw overall growth with much less variation. US unemployment spiked in March and decreased steadily, until plateauing in November and December. The 10-year US Treasury yield remained below 1% after the first quarter of 2020, indicating sustained defensive market sentiment. With the President-elect Biden officially beginning his Presidency in January 2021, it remains to be seen how this incoming administration will reset relations with China and Iran. Negotiations between the European Union and US in the new year are likely to be complicated by the EU's aggressive plans to regulate the technology sector.

For the 12 months ending 31 December 2020, our underperformance versus the benchmark was mainly driven by security selection in the US and Japan. Energy and Financials sectors did well relative to the Index, while security selection in Communication Services and Information Technology drove the portfolio's underperformance. From a factor perspective, the portfolio lagged relative to the Index due to Value, Income, and Low Risk equity factors while Quality and Momentum outperformed.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class was -3.79%. Over the same period, the benchmark index, the FTSE EPRA/NAREIT Developed Real Estate Index (USD Total Return, Net of Tax) (the "Index"), returned -8.98%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

The global stock market experienced periods of elevated volatility, but ultimately generated strong results in 2020. After reaching a record high in mid-February 2020, the market abruptly reversed course and fell sharply, ending the 11 year bull market. Investor sentiment was initially supported by the completion of the first phase of the trade accord between the US and China and generally solid corporate results. However, the rapidly spreading COVID-19 pandemic and its severe impact on the global economy sent markets sharply lower. The market then reversed course and rallied over the final three quarters of the year. The market's turnaround was triggered by a number of factors, including unprecedented monetary policy accommodation by global central banks, significant fiscal stimulus and, toward the end of the year, news of highly effective COVID-19 vaccines, resolution of the November US presidential election and a Brexit agreement. These factors more than offset the economic impact of a surge in COVID-19 infections and several geopolitical issues. All told, the global stock market, as measured by the MSCI AC World - Total Return (Net), gained 16.25% during the 12 months ended 31 December 2020. In contrast, the FTSE EPRA/NAREIT Developed Real Estate Index (Total Return, Net of Tax, USD), returned -8.98%.

While the Portfolio could not escape the weakness in the overall real estate market, it outperformed the Index during the reporting period. Stock selection, in aggregate, was beneficial for relative results. The Portfolio's holdings in the Industrial & Office, Residential and Specialty sectors added the most value. Conversely, stock selection in Real Estate Holding & Development, Diversified and Retail sectors were the largest detractors from performance. Country positioning, overall, was also additive to the Portfolio's relative returns. In particular, an overweight to Australia and an underweight to France added the most value. In contrast, underweights to Germany and Sweden were the largest headwinds from performance.

The COVID-19 pandemic and the lasting effects of a US and global recession remain the primary risks to the market. That said, approval of COVID-19 vaccines in our view, marked a major turning point in the fight against the global pandemic, which sparked a strong market rally. Although it will take time for these measures to be broadly accepted, distributed, and administered across the population, we believe increased visibility to a post-COVID-19 environment may lead to a sustainable market recovery. Recent sharp increases in the number of infections across the US remind us that elevated uncertainty and market volatility could persist. We understand that this process may take many months, possibly into late 2021. In the meantime, we believe measures including additional monetary and fiscal stimulus should help buoy the economy until potential self-sustaining economic growth opportunities return.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman US Small Cap Intrinsic Value Fund

Investment Manager's Report

For the 12 months ending 31 December 2020, the total return for the USD I Accumulating Class shares was 25.73%. Over the same period the Russell 2000 Value Index (Net) returned 3.99%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and does not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Hallelujah, its over! 2020, a year of extreme swings in sentiment and markets has drawn to a close. The COVID-19 contagion upended and redefined in nearly every way how we work, play and connect with our peers, family and friends. Financial markets, which are reflections of investor expectations and psychology gyrated wildly. From fear and anxiety to hope and inspiration, from disappointment and self-doubt to pride and exuberance, no state of heart or mind was left unexplored and unfelt. And, if COVID-19 was not enough, the US Presidential Election revealed deep and seemingly irreconcilable differences in the general American people's perception of our nation and the appropriate role of our government.

For "value" investors 2020 was another humbling and vexing year. Work-from-home and stay-in-place orders highlighted the ability of technology companies to provide "virtual solutions" for the pandemic-driven lockdowns. Traditional businesses, where many value investors find their opportunities, were hurt badly. Ultra-low interest rates made growth all the more valuable, while the recession took a heavy toll on earnings for value stocks. After four years of growth outperforming value, the gap between styles is now so vast only a significant correction in growth can return the styles back to performance parity.

Relative to other value strategies our portfolio was well-positioned and performed satisfactorily. Finding opportunities in the Information Technology and Health Care sectors while avoiding big bets on financial stocks that are especially vulnerable during recessions and periods of rising unemployment has helped our performance on both an absolute and relative basis. One, three and five-year returns are all in double-digit territory and we are outperforming both the Russell 2000 and its Value cohort.

With more than half our portfolio invested in healthcare and technology stocks there is significantly more exposure to the "future" than investments in businesses experiencing secular disruption or economic downturns. Four of our top five contributors were either technology or healthcare companies.

The COVID-19 pandemic hit the travel industry and the ecosystem around it particularly hard. Airlines, cruise ship operators and hospitality providers saw demand disappear. Not surprisingly, portfolio investments in aerospace manufacturing and car rental companies took it on the chin. Regional banks and restaurants were also hard hit from stay-in-place and work-from-home orders. Unemployment and credit concerns along with a flattening yield curve caused a wholesale markdown of bank stock prices.

Throughout the course of the year our strategy was straightforward; harvest our winners and redeploy capital into portfolio underperformers as well as new ideas. While simple on the surface the hard decision was timing and tempo. When measured from the end of the first quarter till year-end about 25% of the portfolio was repositioned. We made investments in several of the sectors most affected by the pandemic – banks, energy, travel and casino gaming equipment.

Have we moved aggressively enough? It's too early to tell but comparing the actively managed portfolio to a static one from the end of March shows that we added approximately 625 basis points of return. In spite of the repositioning the current discount to intrinsic value remains underwhelming at 23%. Accelerating the transition to deeper value and more economically sensitive investments would help resolve the valuation issue but also increases the risk should the recovery falter.

In thinking about the merits of a faster transition from growth to value much depends on the outlook for the economy, inflation and implicitly interest rates, let alone any setbacks with the virus or the vaccine rollout. The conventional thinking is more fiscal stimulus in the form of government deficit spending will accelerate economic growth, depreciate the US Dollar and drive interest rates higher. Historically this type of loose money regime favors value stocks but at some point, in our view, borders on irresponsible and counterproductive to promoting the general public welfare.

Additionally, there are technology-driven opportunities and macro trends that simply are not present in many of the underperforming value stocks. There is always a certain portion of the portfolio invested in inexpensive, out-of-favor mundane businesses. For example, we own shares in energy companies and basic industrials like steel and iron ore companies. However, since inception our best long-term performers have been out-of-favor companies where we can capture a low cost "growth" option.

Investment Manager's Report (Continued)

No one is sure what 2021 has in store for investors. Markets move at lightning speed. Once you get your head around a certain economic framework the markets are moving towards another scenario. The speed and magnitude of the decline from mid-February to late March was unprecedented then the market had bottomed on March 23rd. In just under 30 days our Portfolio declined 41% and in the next three quarters it rallied 116% off those lows.

Beyond the speed of market moves we've come to expect the "unexpected". We are being continuously tested. As sobering as this sounds, the next crisis may make the previous one seem pale in comparison. Remember the global financial crisis of 2008 and all the handwringing over \$700 billion for TARP? How does that experience and response measure up to \$13 trillion in global stimulus and a global economic shutdown from COVID-19?

Looking forward we will invest with prudence, consistent with our thoughtful contrarian approach but also mindful of the accelerating changes around every aspect of our lives. Not a simple task but one which we humbly believe the team is capable of.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Asian Debt – Hard Currency Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.42%. Over the same period, the JP Morgan Asian Credit Index (JACI) (the "Index") returned 6.33%. The Index spreads widened 42 basis points over the period with overall total return driven by significantly lower US Treasury yields during the period. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Performance during the year was volatile with Asian hard currency bonds initially falling significantly due to the COVID-19 shock to the global economy and asset markets in general. Markets saw a strong recovery after quick and decisive actions by central banks and governments to support the global economy and prevent risks of any global financial crisis resulting from COVID-19. Significant easing in monetary and fiscal policies boosted liquidity. This helped risk assets recover with Asian credits retracing all of the losses from the lows and ended the year on a strong note. Within Asian corporate space, markets in the first-half priced in higher risks of rating downgrades and defaults given the challenging environment for credit fundamentals due to COVID-19. However, the credit rating deterioration was less than expected as corporate issuers adapted well to the shock and the outlook for a recovery improved in the second half. Technicals was supportive as funds flows ended the year positive in a reversal from outflows in the first half.

From a country perspective, the biggest detractors to performance were the Portfolio's positions in Indonesia, Sri Lanka, Thailand, and China. In Indonesia, Thailand and China, the Portfolio's corporate exposures underperformed and detracted from performance. The Portfolio's underweight in the Philippines and Hong Kong, considered to be low beta & defensive countries, detracted from performance as they had outperformed in the widening. In Sri Lanka, bonds underperformed due to concerns on its fiscal and external liquidity challenges which have been further exacerbated by COVID-19. On the other hand, the Portfolio's positions in Macau, India, Malaysia, and Mongolia contributed positively to performance. In Macau, the Portfolio's overweight in the gaming sector contributed significantly to performance. In Malaysia, the Portfolio's participation in the quasi-sovereign primary issuance (Petronas) added to performance with the new issue coming at historically attractive levels. Finally, in Mongolia, the Portfolio added Mongolia during the sell-off at historically attractive levels as the country's fundamentals remained robust. By sector, the biggest detractors of performance were led by Real Estate, Oil & Gas and Consumer. Our positions in Real Estate underperformed due to our underweight in Hong Kong versus overweight in China within the sector, as Hong Kong property valuations were resilient despite fundamental headwinds, while Chinese property valuations were hurt by tighter regulations to cool the market. In Oil & Gas, our positions underperformed as a result of a drop in oil prices due to a supply shock following a dispute between Saudi Arabia and Russia coupled with a drop in demand as a result of COVID-19. We were overweight the consumer sector which was one of the worse affected by COVID-19. Our positions in Metals & Mining, Technology, Media, and Telecom ("TMT") and Industrials added the most to performance. Our overweight in Metals & Mining benefited from a recovery in commodity prices. Our overweight in TMT benefited from the outperformance of the sector as the TMT sector benefited most from consumer behavior following COVID-19. In Industrials, the Portfolio's participating in investment grade issuances at historically attractive yields added to performance.

Going forward, our outlook on Asian hard currency bonds is cautiously optimistic given attractive valuations versus developed markets—and a more supportive external backdrop as global central banks and governments keep the policies accommodative for now. However, COVID-19 will keep uncertainties high with the global economy only slowly opening and normalising as vaccines get rolled out across the world. Our base case is for a recovery later in the second half of the year with the assumption that the vaccine remains effective in containing the virus and country wide lockdowns are not resumed in major economies, supported by aggressive policy stimulus efforts globally. Also, continued geopolitical risks, like escalating US-China tensions and the politics in the US, may cause volatility in markets. The broader trend in Asian sovereign macroeconomic fundamentals should see a recovery later this year as economies normalise. Most of the major Asian economies have managed COVID-19 relatively well; this should help Asian economies outperform other regions. We prefer countries where we see structural reforms providing significant improvements in fundamentals (Indonesia and India), and where the International Monetary Fund (IMF) has stepped in to provide a liquidity backstop and anchor for policy reforms (Mongolia). We also like Sri Lanka, where we view current levels as attractive with market over-pricing the downside risks facing the country. We maintain an underweight on countries where we see higher concerns on near-term fundamental developments (Pakistan). We believe Asian corporate credit fundamentals to improve as economic recovery sets the stage for earnings recovery which is already underway. Ratings pressure has eased especially for Investment Grade which has started to see a better balance of positive to negative ratings actions going into second half of 2020.

Neuberger Berman Asian Debt – Hard Currency Fund (Continued)

Investment Manager's Report (Continued)

We are overweight the Consumer Gaming sector as Gaming corporates issued new bonds to improve their liquidity position terming out their funding and having a high operating leverage to benefit from a recovery. The Chinese Property sector has seen the government adopt a more cautious stance on the sector which remained fairly resilient through 2020. The Chinese government have plans for highly levered property companies to contain their overall debt which is expected to reduce some of the potential growth impact going forward and increase stress on the weaker entities. We are overweight non-bank financials as their asset quality has been resilient to COVID-19 and believe earnings to recover in the sector. We are underweight Utilities as valuations are unattractive and we believe the sector to underperform as the global economies rebound.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the CNY I Distributing Class was 0.05%. Over the same period, the FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index (CNY) (the "Index"), returned 1.99%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Onshore Chinese fixed income assets largely broke even* in CNY terms this year. In the first 4 months of the year, the COVID-19 pandemic shock and accommodative monetary policy pushed yields down aggressively. In March, the pandemic spread to the developed economies and resulted in a liquidity squeeze, affecting our USD Chinese credit alongside other global assets. Global central banks eased aggressively, and markets rebounded strongly. As the Chinese economy began to normalise from April onwards, the central bank began to tighten domestic monetary policy pushing yields back to pre-pandemic levels and bonds gave back earlier capital gains. In November, the unexpected default of a large State Owned Enterprise ("SOE") issuer caused credit spreads to widen, especially for weaker issuers. During the reporting period, the RMB strengthened significantly against the G3 currencies and was the top performer among major Asian currencies.

The Portfolio navigated the volatility in global markets relatively well during the February-April period where USD Chinese credits sold off alongside the liquidity crunch. Onshore bonds were very stable during this period and we added some offshore USD Chinese credit positions at attractive levels. The Portfolio was on track to outperform the reference Index for the period until November when the unexpected defaults impacted the Portfolio both directly and indirectly. Consequently, the Portfolio gave up most of the gains in the year. Allocations to convertible bonds performed well and helped to mitigate Portfolio returns.

The Chinese economy continues to lead in the global economic recovery. Policymakers seem confident about the economy and are likely to focus on reform efforts this year such as to control leverage and regulate certain sectors more closely. The central bank appears to be on a neutral stance, indicating that extraordinary monetary stimulus needs to be exited but only gradually. On the credit front, the market has started to stabilise somewhat but we will continue to focus on standalone fundamentals of issuers. On a longer-term basis, allowing market forces to play out will continue to foster development of a healthier bond market. The RMB has been a strong performer, reflecting the strong fundamentals of the economy and we remain constructive on its fundamentals.

Note:

*as measured by the ChinaBond New Composite Total Return Index, which returned -0.06% in 2020.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost CNY
70,000,000	China Government Bond, 2.94%, 17/10/2024	72,707,910

Neuberger Berman Corporate Hybrid Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was 3.72%. Over the same period, the benchmark index, the ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (Euro Total Return, Hedged) (the "Index") returned 2.39%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The first half of 2020, and in particular March 2020, was an extraordinarily volatile and challenging time for financial markets. The COVID-19 outbreak profoundly affected global markets with equities suffering steep declines and credit spreads widening sharply, as countries went into lockdown to try to contain the spread of the virus. In commodities, oil prices plunged as the spread of Coronavirus weakened the outlook for demand, and at the same time, concerns regarding the breakdown of the OPEC+ agreement between the world's largest oil producers also became a key focus. All sectors saw significant declines. Energy stocks were hit hard, alongside financials and most industrials sectors.

Coming into the second quarter, market sentiment became bullish as central banks and governments around the world provided unprecedented amounts of stimulus whilst economies gradually began to reopen. To give some context on the scale of fiscal support, the Euro Zone budget deficit is now estimated to reach 9.5% in 2020, with Germany at 8.5% from a prior expectation of a balanced budget this year. The order of magnitude for the US is even greater, with an expected deficit of 17% this year. Of course, central bank global policy also continued to directly support credit markets for investment grade ("IG") and high yield issuers as well.

After a strong start to the third quarter over July and August, September saw a decline in risk assets globally. Financial market sentiment was impacted by the upcoming US Presidential election and the US's slow progress on a new fiscal stimulus package. Closer to home, COVID-19 data from Europe continued to raise fears around further potential lockdown measures. The escalating case count in France, Spain and across the UK was a particular concern. From a macro data standpoint, manufacturing sector *Purchasing Managers' Index* ("PMI") remained largely in expansion in September, with France and Spain returning above 50. Service sector PMIs, however, slowed over the month, largely due to the impact of higher COVID-19 cases in France and Spain and governments re-introducing some restrictions.

The final quarter of 2020 was dominated by the month of November which was one of the strongest months for risk-assets that we are likely to experience for some time. December, however, was more muted as the pandemic worsened significantly across Europe, with many governments having to enforce stricter lockdown measures. Still, markets focused on optimism surrounding newly approved vaccines which ultimately protected solid returns for the fourth quarter. As expected from a monetary policy standpoint, the ECB provided more stimulus at their December meeting with a €500 billion increase to the size of the monthly asset purchase amount which is now expected to run until March 2022 with full reinvestment thereafter. We also note that large fiscal spending has yet to enter European economies with the Next Generation EU recovery fund and the Support to mitigate Unemployment Risks in Emergency ("SURE") program, only starting to filter through from this year. A recovery in economic growth is still expected across the Euro area in 2021.

The consistent theme is that bottom-up, security selection was once again the driving factor for 2020 relative performance. The Portfolio benefited from good security selection within Telecommunications and Basics – particularly positions in Vodafone and Bayer. Our security selection across our Energy exposure was also particularly strong. Enterprise Products was another issuer that outperformed alongside Transcanada and Enbridge.

In terms of other high conviction positions, - in addition to Vodafone and Bayer - we have long maintained that issuers such as National Grid and SSE - where we have meaningful positions - are pricing in significantly more Brexit/political risk than is warranted.

We remain committed to having zero exposure to emerging market issuers, as well as only limited exposure to bonds issued by peripheral Eurozone issuers. The portfolio continues to have zero exposure to airlines, hotels, travel or leisure companies. We believe most corporate hybrid issuers we hold are extremely robust, with limited fundamental sensitivity to either the economic outlook or oil prices.

Following the March Coronavirus outbreak, the corporate hybrid primary market closed, which was a direct consequence of the extraordinary broad-based volatility seen. Through this period, in terms of liquidity and corporate hybrid market technicals, we were still able to execute trades by leveraging our relationships with counterparties.

Neuberger Berman Corporate Hybrid Bond Fund (Continued)

Investment Manager's Report (Continued)

After reopening in May, the new issue market continued to flourish throughout June and the strategy participated in five of the six new issues. BP PLC's set of inaugural hybrid bonds (rated A3/BBB/BBB+) was the highlight of June. BP issued a total of 12 billion US dollars equivalent across five tranches in Euros, GBP's and USD's. This was a record amount for a first-time issuer and makes BP a very significant component of the corporate hybrid universe. We also saw further hybrid issuance from the following companies: Deutsche Boerse, EnbW, Repsol, SSE and Volkswagen.

The new issue market was busy in September, after a typically quiet August. There were six deals, across eight tranches for a total of ~€7.5 billion equivalent. There were two debut issuers, Scentre Group and Friesland, the latter of which looked attractive in our view with a yield of 2.85%. We also saw deals from CPI Property, EDF, Enel and Merck. The new issue market delivered two deals in December to end a record year of gross corporate hybrid issuance. We saw a total of €1.2 billion bringing total 2020 supply to ~\$63 billion equivalent. The two deals came from existing issuers, Grand City and Samhallsbyggnadsbolaget. We felt the former came at an attractive level and we participated across the strategy. We are encouraged to see the universe of issuers continuing to expand, and we anticipate this trend to continue into next year. As long as markets remain relatively stable, we believe we are likely to see several more attractively priced new issues over the coming weeks. We believe our continued participation in new issues should assist us in generating further positive returns for the Portfolio. We estimate that market size for corporate hybrids now exceeds \$260 billion equivalent.

Over the first quarter of heightened volatility, the corporate hybrid asset class relative to senior spreads traded at +350 basis points (bps) over senior bonds. Furthermore, despite strong performance in 2020, this spread differential remained elevated at +200bps on average. We still believe that the relative level of senior spreads of high quality, non-financial, European investment grade companies and the persistent low level of government bond yields – particularly in euros – should continue to support corporate hybrid bond spreads and make them look attractive relative to other options in European credit and broader fixed income markets.

The Portfolio remains significantly more diversified than the Index, particularly at the single name level. However, following a long-term value approach, we continue to allocate a considerable portion of the portfolio to the utilities sector, alongside telecoms and high-quality energy issuers. Our decisions, on a bond-by-bond basis, are driven by valuations considered in the context of an overall low business risk, low peak-to-trough Earnings Before Interest Tax Depreciation and Amortization (EBITDA) level and – for utilities – a favourable regulatory backdrop.

The conservative positioning means the portfolio (As at 31 December 2020):

1. only buys IG issuers
2. only has around 17% in below investment grade issues (all BB or BB+ rated and issued by BBB issuers)
3. is always running with at least 3% cash
4. has zero exposure to hotels, leisure, airlines or travel companies
5. has been cautious on real estate companies – which we view as more cyclical than most of the sector

The Portfolio only invests in non-financial corporate hybrid bonds. It does not invest in bank and other financial sector bonds. Being very much a high quality, developed market, European-dominated asset class, where euros are the main currency, corporate hybrids offer global credit investors good diversification away from Financial sector bonds, United States issuers and US dollar credit risk.

In terms of portfolio construction, the Portfolio has looked to purchase a range of issuers that the portfolio managers are comfortable with from a fundamental perspective. We have zero exposure to names from Greece, and the portfolio holds no bonds where the issuer is domiciled in an emerging market country. The portfolio reflects strong fundamentals across both industries and issuers. The investment philosophy remains that of long-term, value-based investing – the focus is on bottom-up fundamental research and rigorous valuation work. We will be patient in waiting for opportunities but will be aggressive where we find them, in order to generate good long-term performance.

We continue to believe that the corporate hybrid market trades significantly wide of fair value. In our view, there are various attractive security selection ideas available from a relative value perspective and the growth of the new issue market provides further diversification and relative value opportunities. We believe that the combination of an elevated initial yield, spread tightening, security selection opportunities and new issuance at attractive prices; should lead, over time, to a positive outcome for investors.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost EUR
67,200,000	Electricite de France SA, 6.00%, 29/12/2049	85,608,949

Neuberger Berman US Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class was 30.54%. Over the same period, the benchmark index, the S&P 500 Index (USD Total Return, Net of Tax) (the "Index"), returned 17.75%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any.)

The S&P 500 (including dividends) reached new all-time highs during period – the swiftest stock market recovery in recent history following a sharp correction during the first half of 2020. News of higher than expected efficacy for the COVID-19 vaccine – combined with a streamlined approval and distribution process in place – pushed risk assets into record territory. Despite the rise in risk assets, Coronavirus cases continued to surge across the world putting further strain on already weakened company and government finances. Meanwhile the timing of an expected second stimulus package from US lawmakers is expected to be a near-term priority for the new administration. US economic releases were mixed as jobless claims jumped again as more cities and states re-imposed restrictions on businesses and social gatherings.

We categorise the Portfolio's investments on the long side into three buckets: Capital Growth, Total Return and Opportunistic. Capital Growth investments demonstrate attractive industry fundamentals, strong competitive positions, growing revenues, and attractive re-investment opportunities. Total Return investments demonstrate sustainable and/or growing streams of income that are underpinned by asset value and which can result in growing cash returns to shareholders (e.g., increased dividends, share repurchases, return of capital). Opportunistic investments are those with identifiable catalysts. This bucket may include companies with management changes, company reorganizations, merger and acquisition activity, "hidden assets", or other market dislocations that have the potential to unlock intrinsic value.

The Portfolio posted a positive absolute return and outperformed its benchmark during the reporting period. Both stock selection and sector allocation contributed to relative results. From a stock selection perspective, holdings in the Financials, Communication Services and Consumer Discretionary sectors were the largest contributors to performance. Conversely, stock selection in the Industrials and Materials sectors detracted the most from returns. In terms of sector allocation, underweights to the Energy sector added the most value. In contrast, the Portfolio's cash position and an overweight to the Industrials sector were the largest detractors from performance.

While the longest economic expansion in history ended last year, we believe we are in the nascent stages of an economic recovery. After a period of elevated risks (global trade war, COVID-19 pandemic, US election uncertainty), the outlook for economic growth appears brighter driven by an upswing in the business cycle, less volatility from the executive branch, and a vaccine distribution program underway – all supported by stunning amounts of fiscal and monetary policy support. We now face early cycle dynamics not seen for a decade – above trend GDP and corporate earnings growth, declining unemployment and ultra-low interest rates. Startups are blossoming and the financial sector is on solid footing. An "online" economy has kept America running through its darkest days and is still expanding upon its relevance to both corporations and consumers. However, we remain mindful that current investing environment is not without challenges as we enter 2021. This environment is flush with a confluence of fiscal policy considerations, monetary policy stimulus, public health concerns, geopolitical uncertainty, commodity price volatility, and sequencing (i.e., restarting the economy) question marks.

Nevertheless, we are very mindful of the complex world in which we live and invest. Given the massive amounts of stimulus around the globe, there is a risk that the underlying assumption around very low inflation may be misguided since at some point, unchecked fiscal spending has consequences. We highlight these risks because the current environment, as always, necessitates a flexible approach in the complex, global world in which we operate. Moreover, we strongly believe the greatest risks to the global economy are still those that are unknown today – be they financial or geopolitical in nature. As always, we must be ready and able to adapt when the facts change.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$
399	Adobe Inc	153,179

Neuberger Berman Global High Yield Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.06%. Over the same period, the ICE BofA Global High Yield Constrained Index (Total Return, Hedged, USD) (the "Index") returned 6.48%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The year 2020—marked by the COVID-19 pandemic—was a tale of two markets with a huge indiscriminate, high velocity drawdown from mandated shutdowns to slow the spread of the virus followed by a significant risk-on rally as a result of massive fiscal and monetary stimulus in April and May. While the second half of the year saw some pockets of volatility, the trillions in global monetary accommodation and fiscal support put in place before mid-year had worked well to remove extreme tail risk. Furthermore, capital markets were wide open in the second half of the year and companies had been aggressive in cutting costs, so many issuers were better positioned and able to bridge the challenging operating environment until the economy was in recovery mode. Then, in the fourth quarter, the market started looking through the pandemic toward the eventual full reopening of the global economy on news in early November of two viable vaccines. Global high yield finished the year in positive territory and also saw very strong high yield new issuance and record-setting inflows for the asset class.

In the U.S., higher quality securities, such as those rated BB and B in the ICE BofA U.S. High Yield Index saw better performance in 2020 with returns of 8.62% and 3.66%, respectively, whereas CCC-rated securities returned 2.86% for the full year. In the fourth quarter, however, higher quality underperformed lower quality issuers as the BB, B, CCC & lower rated categories of the ICE BofA U.S. High Yield Index returned 5.74%, 5.72%, and 12.19%, respectively.

Credit selection, downside mitigation and default avoidance were key factors to performance in what ended up being a very tumultuous year in global high yield markets. Throughout the period, issuer fundamentals diverged greatly but generally remained more resilient than many had feared as the ability for high yield issuers to successfully navigate the various stages of the pandemic improved over the period given a 3Q20 earnings season that exceeded expectations, strong cost controls during 2Q20 and open capital markets which allowed issuers to stabilise margins and improve balance sheets. Progress against the virus, combined with pent-up demand, a very high savings rate and strong fiscal and monetary policy support should deliver improving economic growth and issuer fundamentals in 2021. High yield default rates started the year below the long-term average, spiked as a result of mandated shutdowns and then declined materially toward the end of the year. In December, the par weighted LTM U.S. high yield default rate was 6.17%. For context, the long-term average default rate is 3.50% (based on annual default rates back to 1980 according to JP Morgan).

During the year, security selection within and an underweight to Energy, and overweight to and security selection within Gas Distribution and security selection within Utilities were the most beneficial to performance. In contrast, security selection within and an overweight to Support-Services, and security selection within Transportation excluding Air/Rail and Gaming were the largest detractors. Within our ratings' positioning, security selection within the Portfolio's BB and BBB and above rated issuers were the most beneficial to performance and security selection within CCC and below, an underweight to BB and an overweight to B rated issuers were the largest detractors.

While spreads continued to tighten in the second half of the year from elevated levels, we believe spreads are compensating investors for the moderating and more visible defaults remaining which are likely to come from the same areas such as longer-term COVID-19 impaired and industries in secular decline. In our view, the vaccine roll-out is likely to start normalising economic and social activity in 2021. As we continue to closely monitor the developments of the pandemic, the economic recovery and changes in policy, we are finding ample investment opportunities in high yield across the credit spectrum and regions. Despite the recent resurgence of COVID-19 cases and delays in vaccine delivery, which could result in pockets of short-term volatility, we believe our deep fundamental credit research, focus on relative valuations, seeking to avoid defaults and "best ideas" portfolio construction approach, position us well to tactically take advantage of any volatility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$
579,000	Total Play Telecomunicaciones SA, 7.50%, 12/11/2025	579,800
555,000	KAR Auction Services Inc, 5.13%, 01/06/2025	510,206
400,000	Metropolitan Light Co Ltd, 5.50%, 21/11/2022	413,150

Neuberger Berman Global Opportunistic Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 6.63%. Over the same period, the benchmark index, the Bloomberg Barclays Global Aggregate Index (Total Return, USD Hedged) ("the Index"), returned 5.58%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

As the wide-reaching impact of COVID-19 became evident, credit spreads widened out to levels not seen in a decade, and government bond yields rallied. Government restrictions and cautious consumers led to a sharp, sudden drop in economic activity and a spike in unemployment. Responding to this exogenous shock, central banks and policymakers around the world moved swiftly with monetary and fiscal policy accommodation as well as measures intended to support orderly functioning of capital markets. Extensive monetary and fiscal policy actions facilitated an initial stabilization in credit markets while the approval of several vaccines later in the year allowed credit spreads to ultimately recover back to levels similar to what they were before COVID-19. On the other hand, government yields remained at historically low levels – even if somewhat higher to end the year compared to the record lows seen earlier in the year. Despite much volatility, spread sectors – including, investment grade ("IG") credit¹, non-investment grade credit², bank loans, emerging market debt and securitised sectors – delivered positive total returns over the period.

During the reporting period, the Portfolio's diversified overweight to credit was a primary reason for relative outperformance versus the Index, with allocation to European high yield being the largest contributor, followed by security selection in global IG credit and allocation to mortgage credit. Security selection in US government agency mortgage-backed securities and allocations to collateralised loan obligations were other notable positives. The Portfolio's emerging market debt and municipal bond exposures detracted over the period. Away from credit, an overweight to European periphery government bonds and allocation to global inflation-linked bonds, namely US Treasury Inflation Protected Securities, added value. Rates positioning overall detracted over the period, primarily due to underweights in US and core European rates; positive contributions from yield curve positioning in US and Japanese rates and overweights in Australia and New Zealand partly offset this negative effect. Our active FX strategy detracted for the period; underweights in the Swiss franc and euro were the best performing positions whereas overweights to Japanese yen and Canadian dollar were the best performing positions.

Looking to 2021, we anticipate strong, if uneven, recovery across regions as the pandemic plays out. The expected availability of COVID vaccines, the reopening of economies, continued monetary and fiscal policy support, and pent-up demand in pandemic-sensitive sectors of the economy should provide a significant boost to demand. Although our outlook is dependent on a successful and timely distribution of safe, efficient and effective vaccines, we believe that recent approvals and distribution suggest that the end of the pandemic is in sight.

Overall, we anticipate an investment environment of renewed growth and improving fundamental conditions, combined with increased inflationary pressures, but without any significant change in monetary policy as central banks maintain current support in light of ongoing, though potentially fading, pandemic conditions and lockdowns. As such, we are constructive on select credit securities, particularly favouring those that offer carry with minimal duration, and inflation-sensitive assets. While we are looking at opportunities in COVID-sensitive industries, research-driven security selection remains critical as ever.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.51%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

After a robust finish to 2019, markets were subject to unprecedented volatility in 2020. Global economies were hit by the devastating consequences of the COVID-19 outbreak. The pandemic, which started in China early in the quarter but soon spread globally, claimed thousands of lives and forced governments to take strict social distancing measures, effectively leading the vast majority of developed nations into full lockdown. As the scale and the effects of the pandemic became apparent, markets were hit by the largest growth shock in over 50 years. In response, policymakers unleashed unprecedented monetary and fiscal stimulus, which helped drive a V-shaped rebound in asset prices as well as a recovery in the labor market, manufacturing indicators, and consumer confidence. Markets saw a partial retracement in October as investors prepared for a highly uncertain US election and as virus cases surged after seemingly being contained over the summer. After an election win by Joe Biden though, markets ended the year on a high note with most major asset classes posting positive returns in 2020. Equity markets extended their rallies in November and December, despite a surge in virus cases, on the back of vaccine exuberance and the passage of a \$900 billion pandemic relief bill in the US.

Equity allocations were reduced in the portfolio in the beginning of the year, and combined with the significant long-duration treasury allocation and a position in Chinese bonds helped contain losses in the first quarter. Nevertheless, the violent drawdown in March impacted all risky assets including credit and led to negative performance in March. Subsequently, when the monetary and fiscal packages were announced and markets rallied, the portfolio recovered with high-dividend equities and high-yield credit being the top contributors. Moreover, a tactically introduced allocation to US energy infrastructure stocks in March played a significant role in the recovery, as the sector rallied more than 80% in the second quarter. Overall fixed income allocations contributed positively for the year, with government bonds, investment-grade credit and hybrid securities contributing the most. On the other side, equity allocations had a marginal negative contribution; despite the rally after March, high-dividend stocks continued underperforming compared to broad market indices. The uncorrelated strategies included in the portfolio had a small positive contribution, as the option writing strategy benefited from increased option premia and overshadowed small losses incurred by currency tactical trades. Finally, the equity hedging programme contributed positively in March during the drawdown providing much-needed diversification benefits, but later in the year lagged as markets rallied.

After a historically tumultuous year, we head into 2021 moderately risk-on in our views, recognizing that early-cycle dynamics present a bullish foundation for risk assets while also noting that markets have largely priced in these rosy prospects and may be overlooking short-term downside risks. Investors appear almost universally to be pricing for a mix of low interest rates and ongoing support from both monetary and fiscal policy, combined with the release of pent-up demand from consumers and manufacturers. Over a twelve-month horizon, we agree with the base case that interest rates will trade in a range and the dollar will weaken to an extent that supports equities, benefiting more cyclical and economically-sensitive parts of the market. The most obvious risk to us is the evolving coronavirus situation, which will continue to disrupt economic activity until vaccination programs become better developed. Bottlenecks in vaccine distribution and anti-vaccine skepticism, as well as further mutation of the virus, are all potential obstacles that could arise. In the US, political and geopolitical issues are in focus. It remains to be seen how the incoming administration will re-set relations with China and Iran, as well as handle negotiations with the European Union which are complicated by aggressive plans to regulate the technology sector. We therefore advocate for taking risk judiciously and in a balanced way, gradually reducing interest rate sensitivity in the portfolio and cautiously overweighting non-US high-dividend equity markets. Within credit, we continue to hold positive views on high yield credit and emerging markets debt as these segments are more likely to be supported by low interest rates and conservative balance sheet management.

Finally, we continue to believe that a multi-dimensional approach to yield is prudent, and during 2020 we expanded our income sources and diversification within the portfolio which proved crucial in the first quarter. To that end, we continue to seek specialist income sources that offer an attractive risk/return payoff, and Emerging Market High Income is a component we are looking to add to the diversified income strategies mix we manage today. Our multi-asset class approach avoids concentration of portfolio risk in equity, duration or spread risk and attempts to diversify across asset classes to achieve a high- and sustainable-income level in a risk managed framework.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman US Equity Index Putwrite Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 8.91%. Over the same period, the Blended Benchmark (42.5% CBOE S&P 500 One-Week PutWrite Index / 42.5% CBOE S&P 500 PutWrite Index / 7.5% CBOE Russell 2000 One-Week PutWrite Index / 7.5% CBOE Russell 2000 PutWrite Index) returned -3.97%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

2020 was simply one of the most physically, socially, politically and financially destructive years in a generation. A year from which the collective us will most likely take a long time to recover. Remarkably, equity markets shrugged off the negative prospects and were buoyed by hope for prolonged monetary and fiscal stimulus well into 2021. Given equity markets supposedly look to the future when setting valuations, one must assume, at some point in time, they will be forced to ponder a future without unlimited stimulus. However, until that day arrives, the equity market pendulum will remain tilted towards greed. Equity markets performance on the year is just plain surprising. Social unrest, political regime changes in the US and a global pandemic that crippled all aspects of the global economy are not your run-of-the-mill financial challenges and they most definitely don't usually happen all in the same year. Yet, equity investors ultimately dragged markets from the depths of a first quarter drawdowns to record levels by year end. A truly astonishing nine month rebound. For the year, the S&P 500 Index ("S&P 500") posted a notable 18.40%. Furthermore, the CBOE S&P 500 PutWrite ("PUT") gained a modest 2.13% while the CBOE Russell 2000 PutWrite ("PUTR") declined -0.63%.

2020 brought record levels of both implied volatility and realised volatility. After the severity of the 1st quarter market drawdown, implied volatility levels rapidly adjusted higher. Overall, implied volatility levels continue to oscillate around elevated levels and are expected to remain above long-term averages well into 2021. On the year, the CBOE S&P 500 Volatility Index ("VIX") was up 9.0 pts with an average 30-day implied volatility premium of 0.8. In a like manner, the CBOE Russell 2000 Volatility Index ("RVX") was up 14.5 pts with an average 30-day implied volatility premium of -0.9.

For the 12 months ended 31 December 2020, the CBOE S&P 500 PutWrite Strategy garnered a notable 9.14%, trounced the CBOE PUT return of 2.13% by 701 bps and demonstrated its ability to offset losses posted by the CBOE S&P 500 One-Week PutWrite ("WPUT") return of -7.22%. Over the same time period, the Russell 2000 PutWrite Strategy gained 5.70%, materially outpaced the PUTR return of -0.63% by 633 bps and substantially outperformed the CBOE Russell 2000 One-Week PutWrite ("WPTR") return of -23.91% by 2961 bps.

Extraordinary monetary policy measures have pinned short-term rates near zero for most of the year, which provided a tail wind for collateral portfolio performance. The above average gains in 2020 will likely result in muted collateral gains in the coming quarters as lower yields provide less collateral income. However, expectations for additional fiscal stimulus and US government spending from democratically controlled executive and legislative branches are cause for investors' concerns about untenable debt levels and inflation. Hence, short-term rates will slowly reset higher in a manner controlled by the US Federal Reserve which will allow the Portfolio's laddered, short duration collateral portfolio to reset yields higher in an orderly manner. Year-to-date, the collateral portfolio has posted a reasonable 2.00% and is outpacing the ICE BofA 0-3M US T-Bill Index ("T-Bill Index") return of 0.54% by 146 bps, while 1-Month US T-Bill rates decreased -141 bps and 2-Year US Treasury rates rallied -145 bps.

As we look forward to 2021 and beyond, we want to emphasize our view that option market (implied volatility) premiums are different than more traditional factor premiums that are believed to be cyclical. In the case of option (volatility) markets, we believe using the term 'cycle' is inaccurate. Describing volatility markets as cyclical implies similarity or inheritance of properties from one cycle (phase) to the next, i.e. a degree of predictability. To the contrary, we believe option markets evolve from one regime to another based on a constantly evolving risk landscape.

We believe this subtle market structure difference ensures that implied volatility premiums will persist and avoid the prolonged periods of erosion experienced by traditional risk premiums, e.g. value, size, growth, and momentum.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Total purchases:

Units	Security Description	Cost US\$
54,400,000	United States Treasury Note/Bond, 2.38%, 15/03/2021	55,377,160
36,100,000	United States Treasury Note/Bond, 1.88%, 15/12/2020	36,531,578
29,800,000	United States Treasury Note/Bond, 1.38%, 15/09/2020	29,974,609
26,600,000	United States Treasury Note/Bond, 2.63%, 15/06/2021	27,195,074
16,500,000	United States Treasury Note/Bond, 2.75%, 15/09/2021	16,931,191
13,700,000	United States Treasury Note/Bond, 1.63%, 15/12/2022	13,718,730
13,600,000	United States Treasury Note/Bond, 1.50%, 15/09/2022	13,636,902
4,100,000	United States Treasury Note/Bond, 2.63%, 15/12/2021	4,227,004

Total sales:

Units	Security Description	Proceeds US\$

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 4.08%. Over the same period, the Blended Benchmark (50% CBOE S&P 500 PutWrite / 35% CBOE MSCI EAFE PutWrite / 15% CBOE MSCI Emerging Markets PutWrite) returned -4.26%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

2020 was simply one of the most physically, socially, politically and financially destructive years in a generation. A year from which the collective us will most likely take a long time to recover. Remarkably, equity markets shrugged off the negative prospects and were buoyed by hope for prolonged monetary and fiscal stimulus well into 2021. Given equity markets supposedly look to the future when setting valuations, one must assume, at some point in time, they will be forced to ponder a future without unlimited stimulus. However, until that day arrives, the equity market pendulum will remain tilted towards greed. Equity markets performance on the year is just plain surprising. Social unrest, political regime changes in the US and a global pandemic that crippled all aspects of the global economy are not your run-of-the-mill financial challenges and they most certainly should not all happen the same year. Yet, equity investors ultimately dragged markets from the depths of a first quarter drawdowns to record levels by year end. A truly astonishing 9 month rebound. For the year, the MSCI ACWI Index ("MSCI ACWI") posted a notable 16.82%. The S&P 500 Index ("S&P 500") gained 18.40%, the MSCI EAFE Index ("MSCI EAFE") rose 8.28% and the MSCI EM Index ("MSCI EM") rallied a notable 18.69%.

2020 brought record levels of both implied volatility and realised volatility. After the severity of the 1st quarter market drawdown, implied volatility levels rapidly adjusted higher. Overall, implied volatility levels continue to oscillate around elevated levels and are expected to remain above long-term averages well into 2021. In the year, the CBOE S&P 500 Volatility Index ("VIX") was up 9.0 pts with an average 30-day implied volatility premium of 0.8. Moreover, the CBOE EFA ETF Volatility Index ("VXEFA") was up 8.1 pts and the CBOE EEM ETF Volatility Index ("VXEEM") was up 7.5 pts with average 30-day implied volatility premiums of -1.7 and 0.0, respectively.

For the 12 months ended 31 December 2020, the CBOE S&P 500 PutWrite Strategy gained 7.86%, managed to materially outperform the CBOE PUT return of 2.13% by 573 bps but finished behind the S&P 500 return of 18.40% by -1054 bps. For the year, the Non-US. Developed PutWrite Strategy lost a modest -0.70%, demonstrated its ability to offset losses posted by the CBOE MSCI EAFE Index PutWrite ("PXEA") return of -12.79% by 1209 bps but notably trailed the MSCI EAFE return of 8.28% by -898 bps. Year-to-date, the Emerging Market PutWrite Strategy gained 7.37%, appreciated more than the CBOE MSCI EM Index PutWrite ("PXEF") return of -4.99% by 1237 bps but fell behind the MSCI EM return of 18.69% by -1131 bps.

Extraordinary monetary policy measures have pinned short-term rates near zero for most of the year, which provided a tail wind for collateral portfolio performance. The above average gains in 2020 will likely result in muted collateral gains in the coming quarters as lower yields provide less collateral income. However, expectations for additional fiscal stimulus and US government spending from democratically controlled executive and legislative branches are cause for investors' concerns about untenable debt levels and inflation. Hence, short-term rates will slowly reset higher in a manner controlled by the US Federal Reserve which will allow the Portfolio's laddered, short duration collateral portfolio to reset yields higher in an orderly manner. Year-to-date, the collateral portfolio has managed to return a modest 1.14% and has exceeded the ICE BofA 0-3M US T-Bill Index ("T-Bill Index") return of 0.54% by 59 bps, while 1-Month US T-Bill rates decreased -141 bps and 2-Year US Treasury rates rallied -145 bps.

As we look forward to 2021 and beyond, we want to emphasize our view that option market (implied volatility) premiums are different than more traditional factor premiums that are believed to be cyclical. In the case of option (volatility) markets, we believe using the term 'cycle' is inaccurate. Describing volatility markets as cyclical implies similarity or inheritance of properties from one cycle (phase) to the next, i.e. a degree of predictability. To the contrary, we believe option markets evolve from one regime to another based on a constantly evolving risk landscape.

We believe this subtle market structure difference ensures that implied volatility premiums will persist and avoid the prolonged periods of erosion experienced by traditional risk premiums, e.g. value, size, growth, and momentum.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Total purchases:

Units	Security Description	Cost US\$
6,700,000	United States Treasury Note/Bond, 2.38%, 15/03/2022	6,935,547
6,700,000	United States Treasury Note/Bond, 2.63%, 15/12/2021	6,843,898
6,700,000	United States Treasury Note/Bond, 2.75%, 15/09/2021	6,835,727
2,500,000	United States Treasury Note/Bond, 2.63%, 15/06/2021	2,543,473
2,300,000	United States Treasury Note/Bond, 1.38%, 15/09/2020	2,313,477
1,400,000	United States Treasury Note/Bond, 2.38%, 15/03/2021	1,423,402
1,000,000	United States Treasury Note/Bond, 1.75%, 15/06/2022	1,024,063
700,000	United States Treasury Note/Bond, 1.88%, 15/12/2020	708,203

Total sales:

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 5.10%. The ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD) returned 1.08% over the same period. The benchmark is a cash index and Portfolio performance is not designed to track or to replicate that of the benchmark. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The year was divided into two distinct periods; firstly, the market turmoil experienced in Q1 that was heavily related to the shutting down of economies globally in the face of the COVID-19 pandemic, and the subsequent broad rally in risk assets, starting in Q2 and continuing throughout Q3 and Q4. The Portfolio performed positively in Q1 (USD I Accumulating Class +5.76%) before a small loss over the remainder of the year in the face of what were extremely large directional market moves across asset classes.

The Portfolio allocated to seven core strategies over the period. Six of the strategies contributed positively to return: Short-Term Trading, Trend Following, Equity Market Neutral, Statistical Arbitrage, Volatility Relative Value, and Insurance-Linked Securities. The sole negatively contributing strategy was Global Macro.

The Portfolio traded currencies, fixed income and equity securities throughout the year. By asset class, the majority of positive performance derived from trading in equities, with trading in interest rates/bonds also healthily positive. Trading in currencies was a detractor over the year.

The Portfolio added four new managers during the year. The first addition was to NBAA, the firm's internal Insurance-Linked Securities team, who run a small allocation of capital invested in a conservative and diversified portfolio of catastrophe bonds. The second addition was to a second sub-adviser within the Short-Term Trading strategy allocation. The third sub-adviser addition was to the Equity Market Neutral allocation, and the fourth was to a second allocation within Volatility Relative Value. The additions of these external sub-advisers have been made to increase the quality of the Portfolio, expand breadth of trading opportunities and strategies, expand the amount of risk being taken at the Portfolio level, and to increase the expected risk-adjusted return of the Portfolio.

Portfolio risk remains highly diversified across several important considerations, including by strategy type, the balance between discretionary and systematic approaches, the types of data inputs used, the time horizon of positioning, and the underlying asset classes and contracts traded. Importantly, the Portfolio continues to target a return profile that is uncorrelated to traditional equity and bond markets and provides protection in adverse periods for broad markets.

As we enter 2021, there appears to be a fairly heavy investor consensus that continued monetary stimulus will combine with massive fiscal stimulus initiatives and drive a heady mixture of multiple expansion, earnings growth, credit compression and weakness in the US Dollar. While there are clearly merits to this argument, the world is in an incredibly complex place economically, politically and socially, while monetary experimentation has reached levels never previously seen or experienced and the side effects are completely unknown. Our job is not to replicate the structural exposures which our clients likely already have in their traditional asset allocation portfolios, but to identify a diversified set of active trading strategies which we believe can generate returns in a range of market outcomes, including highly adverse ones such as we saw in the first quarter and which rewarded our Portfolio at the time.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 8.73%. Over the same period, the benchmark index, the weighted average of 2/3 JP Morgan EMBI Global Diversified Investment Grade Index (Total Return, USD) and of 1/3 JPMorgan GBI Emerging Markets Global Diversified Investment Grade 15% Cap Index (Total Return, Unhedged, USD) (the "Index"), returned 7.91%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The Portfolio officially adopted a sustainable approach in the period. The Portfolio focuses on issuers with a strong sustainability profile through an Environmental, Social and Governance ("ESG") best-in-class approach combined with ESG integration, engagement and exclusion policies.

In the trailing 12 months, emerging markets ("EM") debt experienced a negative shock from COVID-19 but ultimately rebounded to generate positive returns across the asset class. The hard currency sovereign investment grade debt index delivered 8.92% and the local currency index investment grade returned 5.74%.

EM debt came under considerable stress in the first half of 2020 as the coronavirus pandemic wreaked havoc on the global economy and financial markets. Accentuating the pressures for EM was the sharp decline in oil prices caused by OPEC+ disagreements as well as the impact of restricted global mobility, and the high fiscal costs to cope with the pandemic and its economic consequences. Risk assets rebounded in the second quarter following extraordinary global monetary and fiscal support and efforts to reopen some economies. In the commodities space, metals performed strongly while crude prices were range bound. Markets lost some ground in September and October, but this gave way to a year-end rally thanks to the positive vaccine news and with the US election getting resolved. Oil prices jumped to highest levels since the start of the pandemic while safe haven assets such as the Treasuries, bunds and gold underperformed.

The Portfolio outperformed the Index over the period driven by top-down positioning and by bottom up selection within each of the sub-asset classes. The overall overweight allocation to hard currency was positive as it outperformed local currency over the period. In addition, a basket of currencies in the overlay sleeve in the second half of the year added to performance. Within hard currency sovereigns, country allocation and security selection were positive. Our off-benchmark positioning in Israel, Hong Kong and Bermuda had the largest positive effects, whilst the underweight in Mexico and overweight in Brazil via investment grade corporate positions detracted from performance. In instrument selection, our positioning in Mexico and Chile was additive. In Mexico specifically, we avoided exposure to a quasi-sovereign oil company based on our sustainable criteria which contributed positively to relative performance. Positioning in local markets also contributed positively, driven by currency allocation. The underweight in the Russian ruble in the early part of the year was the main contributor on the currency side. The contribution from rates positioning was more mixed, with overweights in Mexico, Colombia and Peru adding value, while duration positioning in Russia and Indonesia detracted.

Following the very significant drop in global GDP growth in 2020 due to the coronavirus outbreak, economies have been recovering at varying paces over the recent months, supported by aggressive policy stimulus efforts globally. Our base case for the coming period is for a continuation of this gradual recovery, supported by vaccines roll-out, but with speedbumps along the way as countries still grapple with virus flareups and implement new temporary restrictions.

Aside from global coronavirus developments and their impact on the macro outlook, we believe the risks to the asset class have been subsiding, with the prospect of US China tensions decreasing as well as the uncertainty of the US elections being resolved with an outcome that we believe will be favourable to emerging economies along the prospect of a cyclical recovery in sight. Given a more likely chance of infrastructure spending, we continue to see support for commodities, especially in the metals and mining space which is likely to be positive for the EM asset class.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$
650,000	MTR Corp Ltd, 1.63%, 19/08/2030	641,518

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 16.49%. Over the same period, the MSCI EM Index (USD Total Return, Net of Tax) (the "Index") returned 18.31%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Emerging Markets ("EM") equities sold off with the rest of global markets in March 2020, as COVID-19 spread outward from Asia. In addition to local shutdowns and lockdowns, investors were concerned about EM economies and businesses reliant on exports. As the year progressed, markets rebounded as it appeared the virus was somewhat contained, as sectors and regions re-opened, on government stimulus programs, and finally, on positive vaccine news. The post-March EM rally accelerated during fourth quarter, with investors continuing to emphasize high momentum growth stocks.

Reflecting this sentiment, Information Technology ("IT") and Health Care led the Index, which closed 2020 on par with the US S&P 500 Index and ahead of the MSCI EAFE (developed non-US markets). Real Estate and Energy declined significantly, in a year with a particularly wide spread between sector performance. Individual market performance also showed a wide range. Korea, Taiwan and China outperformed significantly, while markets including Greece, Egypt and Colombia posted losses.

Stock selection in Materials was a key strength for the portfolio this period. Stock selection and an overweight in both Financials and IT was also advantageous. By geography, holdings from Taiwan, Korea and India contributed most. Our Consumer Discretionary and Health Care names lagged the Index, and our underweight to Materials detracted, tempering the positive impact of our stock selection there. By country, stock selection and an underweight to China detracted, as did holdings based in Mexico and the Philippines.

Although the portfolio kept pace, this high momentum market has been a headwind. Looking past COVID, we anticipate the market will eventually shift back to one driven more by the long-term fundamentals we favor.

In the mean time, we are paying close attention to both US/China tensions and heightened Chinese regulatory risk. We believe market volatility will continue in the coming year, driven by abrupt changes in sentiment.

The team believes our diversified portfolio and disciplined strategy positions us to provide strong risk-adjusted relative returns over the long-term, while navigating near-term market volatility.

Neuberger Berman China Equity Opportunities Fund*

Investment Manager's Report

For the period ended 30 November 2020, the total return for the USD I Accumulating Class was 17.45%. Over the same period, the benchmark index, the MSCI China Net Index (Total Return, USD) (the "Index") returned 26.01% (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Even given an unstable trade and diplomatic relationship between China and the US as a backdrop, China equities outperformed emerging markets and developed markets including the US this period, driven primarily by investor sentiment around the nation's decisive approach to managing COVID-19.

After world equity markets corrected in March as it became clear that COVID-19 was spreading globally, investors rewarded China for taking tough measures early in an effort to stop the spread there and reopen the economy. These measures, including lockdowns, worked, and China was open, with Chinese companies meeting local needs and gaining share globally, while the virus spread uncontrolled in competitor nations including the US.

Given the economic damage COVID-19 was causing throughout the world, investors globally emphasized high growth momentum stocks. As such, dispersion between sector returns in the Index was wide, with momentum areas such as Information Technology ("IT") and Health Care, along with Consumer Staples, gaining most, and Energy, Real Estate and Financials declining.

The Portfolio's relative underperformance this period was caused primarily by stock selection within the Health Care, Consumer Staples and Consumer Discretionary sectors. Stock selection within Industrials, Financials and IT was a benefit.

* Portfolio liquidated on 30 November 2020.

Neuberger Berman Multi-Asset Growth Fund*

Investment Manager's Report

For the period beginning 1 January 2020 through the Fund's close on 7 May 2020, the total return for the USD I Accumulating Class was -10.17%. Over the same period, the benchmark index, the ICE BofA US 3-Month Treasury Bill Index ("the Index"), returned 0.58%. (Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

In a reversal of strong performance from 2019, the new year began with extreme market volatility, as the coronavirus outbreak spread globally leading most major economies to complete shutdown. To address the unprecedented crisis, governments globally adopted strict social distancing measures and an uncompromising "whatever it takes" monetary and fiscal response. The expectation of a global recession quickly became consensus amongst market participants as they scrambled to assess the path of economic impact of the pandemic, which in March led to the fastest bear market equity drawdown in history. Later in Q2, the coordinated fiscal and monetary response by policymakers was reflected in financial markets which bounced back rapidly, with some of them reaching new highs before the end of the second quarter.

The portfolio was blending discretionary and systematic processes in order to provide asset growth within a controlled risk framework. Each of the portfolio components performed in line with expectations, despite the unique environment during the first quarter. The portfolio underperformed its benchmark until the 7 May 2020, driven by equity allocations that sold off during the March crisis. Credit exposures in the portfolio also contributed negatively – particularly the European high yield component. Option writing also contributed negatively, as the extreme price swings in the first quarter led to losses in the low-beta put option writing strategy and the market-neutral iron condor strategy. Inflation-linked bond exposures and credit hedging activity via CDX contracts were the main positive contributors to performance but they were not sufficient to offset the losses in other areas of the portfolio. After the end of March when markets rallied, the portfolio captured some of the upside, limiting losses over the entire period.

* Portfolio liquidated on 7 May 2020.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$
700,000	United States Treasury Note/Bond, 2.25%, 15/04/2022	725,266
235,096	United States Treasury Inflation Indexed Bonds, 0.38%, 15/01/2027	246,485
227,864	United States Treasury Inflation Indexed Bonds, 0.13%, 15/04/2021	227,716
162,905	United States Treasury Inflation Indexed Bonds, 0.25%, 15/01/2025	168,683

Neuberger Berman Global Thematic Equity Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 13.83%. Over the same period, the MSCI World Index (USD Total Return, Net of Tax) (the "Index") returned 15.90%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

In the shadows of worldwide calamity, 2020 reinforced the value of our process and tested our resolve. As with past periods of severe crisis and market dislocation, the visibility and predictability that underpins our thematic approach allowed us to maintain focus and confidence even at the point of maximum uncertainty. Periods such as this are character defining, both for organizations themselves as well as for those that run them: our conviction in the uniqueness of our portfolio companies and the caliber of their leadership was reaffirmed. Importantly, even the most directly impacted of our businesses has demonstrated the financial fortitude to weather this period. We are pleased to report a productive year.

A hallmark of 2020 was the broad dispersion of returns experienced across both themes and portfolio holdings. Highly lauded were those themes and businesses deemed direct, near term beneficiaries of an increasingly digitised "at home economy" and enterprises experiencing a sudden pull forward of secular shifts already well underway. These were most prominent in our Smart Systems, Evolving Global Consumer, and Health & Wellbeing themes. Receiving maybe less headline attention but providing among the most meaningful performance contributions were our exposures in Energy Infrastructure and the Humanization of Pets. The greatest detractors were Personalization of Media and Education. Altogether, holdings within these two detracting themes largely explain our performance relative to our benchmark during 2020.

In recent months, the media, markets and fund flows have been hyper-focused on those businesses experiencing an accelerated rate of growth stimulated by the pandemic. We too are impressed and pleased with our portfolio companies that compressed 1.5 to 2-year sales cycles into nine months or achieved 2022 market penetration rates two years early. However, we are increasingly concerned to see analysts extrapolating elevated rates of growth well into the future combined with present day valuations that exceed even generous assumptions three to five years forward. Dogmatic valuation discipline is a critical element of investing through the cycle – we exit this year with our antennas up.

Underappreciated, however, are those businesses directly in the eye of the COVID-19 storm who have used the 2020 business air-pocket to achieve cost structure overhauls otherwise unrealisable in any normal operating environment. As business returns to a more typical pace, these initiatives should enhance the long-term margin and free cash flow profile of these companies, well in excess of our prior projections. As the long-term value of a business is ultimately determined by its free cash flow generation, ironically these businesses likely, in our opinion, have greater value in the future than we originally anticipated. Below are among the starkest examples:

- Scholastic Education (SCHL): Over the past nine months Scholastic has identified and executed \$100 million of business cost savings (primarily process improvements and labor costs), 50% of which they believe will be sustainable when business returns to a more normal operating level. Thus \$50 million of incremental free cash flow on top of the \$70 million we originally estimated should be achievable – a 70% increase.
- Delta Airlines (DAL): At Delta's December 2019 Investor Day, management outlined fleet, headcount, and overhead initiatives that the company estimated would save billions of dollars over a five-year timeframe – all of which has now been pulled forward and achieved in 2020. As business normalises, we believe this will allow them to sustainably achieve 20-25% incremental free cash flow per revenue dollar over the next three to five years.
- Expedia Group (EXPE): Entering 2020, management outlined \$300-\$500 million of fixed cost savings they believed could be achieved while continuing to accelerate growth. In November, they updated that target to \$700-\$750 million, pulling forward our year initiatives and incremental to the roughly \$1 billion of free cash flow they generated in 2019 – implying a 55% increase to the normalised free cash flow on which we underwrote our original investment.

As we turn the page to 2021, there is cause for optimism. First and foremost, with multiple vaccines demonstrating high levels of efficacy, at various stages of distribution, herd immunity is on the way. In the meantime, central banks around the world are unified in their resolve to build a bridge to the other side, even if extensions are required. Balance sheets of corporations, institutions and consumers are largely well fixed with an ability to endure anticipated further weakness. Regime change in Washington will possibly result in less "tweets" and more constructive soundbites both domestically and internationally. To us, this amounts to a solid foundation for continued economic recovery, the pace of which will likely be uneven.

As for markets, despite signs of speculation we remain constructive. Measured by the value embedded in our portfolio today, as well as our ability to find compelling new ideas, we believe the investment environment should continue to be a productive one. While we regularly hear consternation regarding the forward path for inflation and interest rates, it has been our experience that owning unique businesses with pricing power and maintaining valuation discipline provide effective hedges.

Neuberger Berman Global Thematic Equity Fund (Continued)

Investment Manager's Report (Continued)

In closing, we want to recognise and thank those portfolio companies that have made direct, material contributions to addressing and combating COVID-19:

- Perrigo (PRGO) – A leading store brand drug manufacturer of items such as infant formula, cough & cold medicine and smoking cessation products. As the pandemic took hold Perrigo diverted production capacity to produce, at a lower margin, acetaminophen (Tylenol) that was in high demand to treat fevers and discomfort as a result of COVID-19.
- Corning (GLW) – A global manufacturer of high-performance glass used in screens and telecommunications participated during the pandemic by hastening the pace of their Valor Glass roll out. Valor Glass improves the delivery of the vaccine as this innovative glass is able to increase production speed and reduce breakage enabling the production of the astounding quantities required to vaccinate the world.
- Stericycle (SRCL) – The leading provider of medical waste collection services in North America. As the use of PPE and testing equipment rose exponentially during the pandemic, they played an important role in making sure this hazardous waste was properly disposed.
- NICE Ltd (NICE-IL) – A leader in call center management platforms. Their cloud-based software allows enterprises to more efficiently manage calls with a higher degree of customer satisfaction. Their software proved to be highly valuable as companies moved call center operations into the home. Recently, NICE was contracted to help effectively deliver COVID-19 vaccines by running the communication and call center systems that manage the vaccine logistics and inventory.

As always, we appreciate our investors' ongoing trust and commitment and will work to continue to earn it.

Neuberger Berman CLO Income Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was 7.50%. Over the same period, the ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD) (the "Index") returned 1.08%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

After a firm start to the year in early 2020, the CLO market experienced a meaningful drawdown in March and April, as CLOs negatively reacted to COVID-19 and the perceived economic impacts from social distancing and "shelter in place" mandates. From a CLO structural standpoint, investors braced for elevating CCC metrics and higher default rates, which further exacerbated concerns on potential cash flow diversions and credit losses in CLO portfolios. At the depths of the crisis in the spring, CLO BB debt spreads widened from approximately L+700 to L+1,500. On the heels of quick-acting and robust fiscal and monetary stimulus, an improved understanding of the virus, improving COVID-19 case metrics, as well as robust efforts to develop a vaccine began with significant urgency, the CLO market began a rally in mid-April.

The CLO market continued to steadily recover in the summer, with CLO BB debt spreads rallying to L+900 by late August. At this point, investors had a stronger sense of the liquidity profile of the underlying CLO collateral, and the ability to withstand reduced demand across the most negatively impacted sectors (particularly in travel, leisure and entertainment). Further, the aggressive actions of the global stimulus improved access to global credit markets, allowing borrowers to obtain incremental liquidity, which enhanced the creditworthiness of the underlying CLO collateral. In September, the trailing 12M par weighted default rate peaked at 4.17% (which would later decline by 33 bps by year-end to 3.83%).

The rally in CLOs continued into year-end, benefiting from positive outcomes from COVID-19 vaccine trials and a relatively quick resolution of the US presidential election. As other fixed income market yields continued to tighten given improved visibility into economic recovery and historically low interest rates, CLO mezzanine began to attract additional investors in an effort to seek more yield and spread, which has further led to spread tightening across the CLO market, which we expect to continue into 2021.

Over the year, the Portfolio had net outflows of -\$33m USD. As of 31 December 2020, primary CLO BB spreads for higher quality BBs is L+600. Even at these tighter levels, higher quality primary CLOs continued to see robust levels of interest, indicating a persistent deep bid from a broad range of investors.

From a fundamental perspective, we continue to be confident in the significant structural protection provided against credit losses in the underlying loan portfolios. CLO structures in general, and CLO BBs in particular, have shown themselves once again to be very robust in the face of a significant recession. Our focus on investing in the highest quality underlying loan portfolios, we believe, will lead to continued outperformance versus the overall CLO market over the cycle.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return of the USD I Accumulating Class was 39.77%. Over the same period, the benchmark index, the MSCI All-Country World Index (ACWI) (USD Total Return, Net of Tax), (the "Index") returned 16.25%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

While the Index captures the global nature of the Portfolio, its scope is significantly broader than the investable universe of the Portfolio and therefore has limitations for comparative performance purposes.

The Portfolio outperformed the Index by 2,352 basis points over the reporting period. Sector allocation to the Information Technology sector was the largest positive contributor to performance during the period. Conversely, security selection in the Consumer Discretionary sector detracted the most from performance. Unallocated sectors such as Consumer Staples, Energy, Health Care, and Real Estate positively impacted performance during the period.

Equity market performance during the reporting period finished strong despite a difficult start to the year due to the global spread of COVID-19. Economic activity was severely impacted in early 2020 as various economies globally implemented countermeasures to slow the spread of COVID-19. Over time, however, economies began to reopen, and economic activity has since begun to recover. Moreover, fiscal policy became generally more supportive during the reporting period in response to the spread of COVID-19 while monetary policy generally remained accommodative. Additionally, US-China trade relations were less disruptive as compared to previous years. Equity market gains were notable during the fourth quarter of 2020 due to rising prospects for a vaccine to emerge, which is now being deployed and may lend support to the global economic recovery. Despite the equity market gains experienced during the reporting period, we continue to see attractive long-term opportunities across the investable universe.

From a thematic perspective the transportation industry continues to evolve as evidenced during the reporting period by accelerated adoption of electric vehicles, continued growth of EV-related infrastructure, ongoing proliferation of active safety features on the automobile and investments in autonomous vehicle technologies. In response to rapid EV adoption, automakers such as Volkswagen and General Motors have accelerated their investment spending plans as electric vehicles continue to gain popularity across the globe. Additionally, the industry continues to build out the associated EV infrastructure, including charging stations, and explore breakthrough technologies that could meaningfully reduce the cost of electric vehicles. On the autonomous vehicle front, GM's Cruise Automation subsidiary began testing its driverless vehicle fleet on the streets of San Francisco after receiving approval from the local government to remove safety drivers. Waymo expanded its robotaxi service in Phoenix, AZ to more customers, offering rides with no human attendant on board to current members of its Waymo One service before opening the service up to members of the public. Finally, Motional, a joint venture between Aptiv and Hyundai, announced its intent to launch a fully autonomous robotaxi service on the Lyft network in the US starting in 2023. These are just a few examples that highlight the transportation industry's evolution towards Next-Generation Mobility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Ultra Short Term Euro Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was 2.50%. Over the same period, the ICE BofA 0-1 Year AAA Euro Government Index (EUR Total Return) returned -0.62%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The first quarter of 2020 saw another significant fall in Euro government yields, the German 10-year bond decreased by more than 30bps, ending the period at -0.47% after having reached its lowest level ever at -0.86%. The sovereign bond market outperformed due to markets' "flight to quality" in the wake of fears from the COVID-19 pandemic. This new virus caused many fatalities, especially in southern Europe. The unprecedented shutdowns prompted the most severe recession in a century. Eurozone economists revised down their growth forecasts significantly due to a marked fall in production, capex and exports. Thus, the market feared a long period of subdued activity, increasing the risk of companies defaulting. The credit market experienced one of its most severe selloffs ever in March, while over-indebted countries like Greece and Italy underperformed significantly. The Italian government yield jumped from 1% to 2.4% on the 10-year maturity in March.

Such economic and market crises led the central banks to react quickly in March ahead of the government economic rescue plan. The European Central Bank ("ECB") started to extend the duration of its "forward guidance", then launched a €120 billion QE buy program and finally launched a larger and more flexible one, called the Pandemic Emergency Purchase Program ("PEPP"), worth €750 billion. These interventions helped to reduce the disruption of the Euro credit bond market and to recover its liquidity, as the new bond-purchasing program included private debt buys.

During the second quarter of 2020, the AAA-rated Government bond rally paused. COVID-19 forced a full social distance strategy, implying an unprecedented double-digit drop in production, consumption and capital expenditure and consequently a jump in downgrades for companies having to reassess their businesses. Service sectors like transport and restaurants were hit hardest. Such threats to the real economy led European governments to respond through the Euro group council, which announced a credible "emergency" economic deal for a €500 billion package in three axes to support private companies and government funding needs: €240bn for European Sustainability Mechanism credit lines, €200bn for European Investment Bank guarantees and €100bn for the European Commission reinsurance scheme called SURE. Thanks to these interventions, market optimism came back, credit spreads started to tighten, and equities rallied strongly. Also, yields for high-quality Euro government debts rose and peripheral bonds spreads tightened.

The third quarter of the year saw the continuation of this optimistic market trend, reinforced by the jumps in job creation and retail sales, especially in Germany, and the final round of negotiations for the "Euro Recovery Fund", which finally brought a historical agreement among Eurozone members. This Recovery Fund is €750 billion of aid, €390 billion of which will be in "grants"—a key step toward fiscal integration of Eurozone members, as these expenses will be funded by a common debt. This was really a game-changer, especially for the most indebted European countries: the risk premium diminished significantly for the peripheral countries. As for economic growth, Q3 GDP rose by 8.5% quarter-over-quarter (qoq) in Germany, driven by pronounced catch-up effects in private consumption (+10.8% qoq), investment in machinery and equipment (+16.0%) and exports of goods and services (+18.1%). The Q3 GDP rebound was also strong in France at +18.7% qoq.

The last quarter of 2020 also saw a continuation of the bullish trend of the Euro bond market. While the yields for the German 10-year bund finished the quarter slightly lower, close to a return around -0.60%, the periphery yields saw a strong decline. Bond prices were supported by the ECB's proactive monetary policy, showing its commitment to maintain very low yields for an extended period, at least up to March 2022. In reaction to the second virus wave, the ECB recalibrated its very accommodative monetary policy at its mid-December council by extending the PEPP and announcing new targeted longer-term refinancing operations ("TLTRO") programs.

Indeed, the ECB took the COVID-19 resurgence acceleration into account as the number of daily infections reached new highs in December, this time in the UK and northern Europe, but not southern. Germany was clearly significantly impacted by the second wave, but not as much as the UK, where the pandemic seemed to be out of control due to a new more virulent strain of COVID-19. Thus, new restrictions were implemented in most European countries. Nevertheless, good news arrived in December with the discovery of two successful vaccines by Moderna and Pfizer/BioNTech, each with an effectiveness higher than 90%. In addition, the second wave of the pandemic in Europe had less impact on the economic activity as restrictions and shutdowns were lighter than during the first wave. The economic framework has been resilient as shown by the strong manufacturing PMIs.

Even at year-end, economic data proved resilient in industrial activity despite the virus' resurgence: factory orders and manufacturing production surprised on the upside. This good news was offset, however, by low confidence in the service sectors like tourism and hotels, and the risk of an epidemic outbreak due to Christmas and New Year events. The economic boost expected from a new fiscal package in the US finally happened at year-end after politicians reached an agreement. In conclusion, the economic framework supported the risk-on mode in the market, especially for risky assets like credit and equities.

Neuberger Berman Ultra Short Term Euro Bond Fund (Continued)

Investment Manager's Report (Continued)

This year, the portfolio was ranked in the third percentile by Morningstar in the EUR Diversified Short Term category—up from the 30th percentile in 2019—due to active management of both spread and duration in a very volatile year, which offered opportunities thanks to market dislocation among asset classes, sectors, rating and maturities. This achievement shows how the portfolio can behave in volatile markets. Portfolio AUM grew from €378M to €426M.

In 2020 the portfolio was mainly invested in European short-term credit and first-pay ABS, a choice driven by the negative yield environment characterizing the short part of the curve of government bonds. However, the portfolio was heavily rotated to capture opportunities offered by unprecedented market volatility, caused by the COVID-19 pandemic.

Indeed, in the month of March, financial markets went through a brutal selloff, during which credit spreads widened in three weeks as much as they had in the 12 months after Lehman's default triggered the Global Financial Crisis in 2008.

As the portfolio was mainly positioned on credit at the beginning of the year (70% credit, 15% senior ABS, 10% government bonds and agencies, 5% cash), its performance suffered materially in the month of March. Also, spread curve inversion did not help: the short part of the curve widened more than the medium long part, and that helped increase pressure on March performance, as the bulk of the portfolio's holdings were short-term bonds. During the March selloff, bonds' liquidity was awful, and it was not easy to trade. To protect portfolio performance, we traded Credit Default Swaps and bought protection on Itrax Main and Xover. This trade limited the losses as both indexes widened significantly. Itrax Main widened from 64 to 138bps, while Xover widened from 200 to 750, in three weeks' time. By the end of March, it was apparent that central banks and governments were implementing extreme measures to face the economic crisis prompted by the pandemic.

Given the material widening of credit spreads, we decided it was a good time to add risk through credit. First, we started to switch out of longer maturities to buy very short maturity bonds, as the credit spread curve was inverted. Once the spread curve flattened and then normalized in mid-April, we started to rotate the portfolio from defensive sectors into cyclical sectors, like automotive. Defensive sectors performed strongly in April, quickly recovering after the March selloff, whereas cyclical sectors generally lagged the rally: we kept on rotating into those "laggards" until the summer. At the same time, we bought outright risk and thus increased the beta of the portfolio through the "tactical bucket", which was progressively increased from 10% in March to 20% in June. This bucket includes high beta bonds like financial subordinated, corporate hybrid and corporate high yields, and fluctuates between 0 and 20% of the assets of the portfolio.

We did not just buy risk there, we kept on rotating into lagging sectors and single names, taking advantage of market dislocation driven by lack of liquidity and uncertainties over economic growth, which was severely impacted by the pandemic. Meanwhile, the "core bucket", which is made by short-term Investment Grade (IG) bonds, was reduced from 90% to 80% to allow the "tactical bucket" to grow. In July we began to reverse this, decreasing "tactical bucket" to 16% as credit spreads had recovered about 80% of their March widening. We decided to take the foot off the pedal and start repositioning the portfolio in a safer way.

Since a second wave in the fall could not be discounted, we also bought 5% protection on Xover. We started to reverse the risk-on trade on the whole portfolio as well by selling cyclicals and buying defensive sectors. We kept on decreasing the tactical bucket until October, when it was taken down to 14%. Uncertainties over the US presidential election and a potential second wave of pandemic in the fall could have impacted the rally in credit spreads. This strategy proved to be right as we had two periods of weakness in financial markets in the fall: at the end of September and the end of October.

In November and December, after the US presidential election passed and the second wave of the pandemic started to be under control in Europe, we decided to add back risk in the portfolio by increasing the "tactical bucket" to 18.5% as of the end of December. We did not just add risk outright, we did a thorough rotation of this bucket, selling outperformers and buying laggards, thus preparing the portfolio for the next few months, which were expected to be supportive of high-beta credit as economies rebounded. It is worth highlighting maturity extensions trades as well, rotation into cyclical names and preference for corporate hybrids vs. corporate high yield with the same rating.

During the last quarter of the year, we thus decreased the "core" bucket to allow expansion of the "tactical" one. That was mainly achieved by selling deeply negative yielding bonds with very short maturities. This bucket went from 85.5% to 81.5% over the quarter. Generally, we had a preference toward cyclical sectors and senior financials, as those offer a premium versus more defensive sectors.

Neuberger Berman Ultra Short Term Euro Bond Fund (Continued)

Investment Manager's Report (Continued)

We also implemented several maturity extensions trades to increase bonds' roll-down, where curves were steep enough to justify such extensions. Together with spreads, we managed actively the duration through German futures, French OAT, GILT and Italian BTP futures. The portfolio was quite long on Italian risk through futures this year, which represented about 0.5 years of duration contribution at year beginning. This overweight was reduced first in September and then again in December, when BTP-BUND spread reached 110bps, tightest since 2016. To highlight a dynamic management of overall portfolio duration as well, through German rates' futures. We have been actively managing duration in the -30/-60bps yield channel for Bund: we thus increased portfolio duration when the Bund was close to the upper limit of this range, and we decreased portfolio duration when it was close to -60 bps yield, to create alpha on a reversal. Duration management contributed positively to the fund performance by 34bps in the year. Over the next few months, markets should focus on the efficiency of the vaccination strategy and its implementation, together with the risk of the more virulent new COVID-19 strain. The resilience of the economy might be at risk and the market might not be pricing that, as the recent "Brexit" deal and the Democrat majority in the US parliament took off some risks from the table. Of course, governments and central banks are aware of these risks: the US and Europe started to implement strong public expense boosts, higher than 10% of the GDP, to support the recovery in the activity.

In conclusion, we forecast a protracted rebound of growth with a jump in government funding needs this year. We expect a weaker bond market supported by the rebound in the inflation rate. In this context, the IG credit spreads should perform thanks to improving fundamentals, low default rates and the quest for higher returns from investors, and still have excess cash.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Euro Opportunistic Bond Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was 7.05%. Over the same period, the Bloomberg Barclays Euro Aggregate Index (EUR Total Return, Hedged) returned 4.05%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The first quarter saw a significant fall in Euro government yields, by more than 0.30% for the German 10-year bond ending the period with a return of -0.47% after having reached its lowest level ever at -0.86%. The sovereign bond market outperformed due to a new period of "flight to quality" in the wake of the fears from the Coronavirus contagion to all countries. This new virus brought lot of deaths, especially in the south of Europe. The consequence of such a never-before-seen shutdown was the most severe recession experienced for almost a century. The uncertainties relied both on the loss in terms of activity and on the duration of the uncontrolled virus contagion. The economists significantly revised down their growth forecasts this year due to a significant fall in production, capital expenditures and Euro exports. Thus the market feared a long period of subdued activity increasing the risk of companies not being able to bear such an economic disruption and then going bankrupt. Consequently, the credit market experienced one of its largest sell-offs ever in March while over indebted countries like Greece and Italy underperformed significantly: Italian government yields jumped from 1% to 2.4% on a 10-year maturity during March.

Such an economic and market crisis led the Central Banks to react quickly in several steps in March ahead of the government economic rescue plan. The European Central Bank ("ECB") started to extend the duration of its "forward guidance", then launched a €120 billion Quantitative Easing ("QE") buy program. In April, the ECB reinforced its Asset Purchase Program with a larger and more flexible one called the Pandemic Emergency Purchase Program ("PEPP"), for an amount of €750 billion. These decisions helped to reduce the disruption of the Euro credit bond market and to recover its liquidity as the new bond buy program included private debt buys.

The second quarter has known a pause in the AAA Government bond rally, switching to a cautious stance waiting for the end of the halt in the activity due to the lockdown. The fears of the Coronavirus contagion in all countries forced a full social distance strategy implying an unknown fall in production, consumption and capital expenditure by negative monthly double-digit figures. Such a shut down in activity for a two-month period implied a jump of downgrades for companies having to reassess their businesses and service sectors such as transport and restaurants. Therefore, the credit market stayed depressed in April in a wait-and-see mode waiting for checking defaults, after one of its largest sell-offs ever in March.

Such threats led European governments to respond through its euro group council, which announced a credible "emergency" economic deal for a €500 billion package in three axes to support private companies as well as government funding needs: €240 billion for ESM credit lines, €200 billion for EIB guarantees and €100 billion for the European Commission reinsurance scheme called Support to mitigate Unemployment Risks in Emergency ("SURE").

From May up to the third quarter, the market optimism came back leading to erase most of the sell-off seen on equity and credit bonds since February. Thus, the yields for high quality Euro government debts rose while on the opposite side, the peripheral bonds outperformed strongly, the BTP (Italian Government Bonds) spread versus German Bund tightened up to the quarter end by 28 basis points ("bps") on the 10-Year maturity. The Investment Grade bond sector also experienced a strong recovery as their spread went back below 70 bps compared to 140 bps at its crisis top. The High Yield market outperformed significantly, its average spread tightened by almost 110 bps, but far from recovering its entire sell off losses of March.

The third quarter saw the continuation of this optimistic market trend, reinforced by the jumps in job creation and retail sales, especially in Germany, and the final round of negotiations for the "European Recovery Fund" reached a surprisingly historic agreement. This recovery package will represent 750 billion of aid of which 390 will be in "grants". This is a key step toward fiscal integration. These expenses will be funded by a common debt. This is really a game changer for the European countries which are too indebted: the risk premium diminished significantly for the peripheral countries. Their spreads versus German yields fell again, for example by 18 bps for the BTP 10 year.

The last quarter of 2020 also experienced a continuation of the bullish trend of the euro bond market: while the yields for the German 10-year bund finished the quarter slightly lower close to a return around -0.60%, the periphery yields saw a strong decline, for example by 30bps on the 10 year Italian BTP, and the credit spread tightened again by more than 10bps for the Investment grade euro bond universe. Bond prices were supported by the ECB's proactive monetary policy, showing its commitment to maintain very low yields for an extended period, at least up to March 2022. In reaction to the second virus wave, the ECB again recalibrated its very accommodative monetary policy at its mid-December council by an extension of its PEPP and new Targeted longer-term refinancing operations ("TLTRO") programs.

Indeed, the ECB took the virus resurgence acceleration into account as the number of daily infections reached new highs in December this time in the UK and the North of the Europe but not in the South.

Neuberger Berman Euro Opportunistic Bond Fund (Continued)

Investment Manager's Report (Continued)

Germany is clearly significantly impacted by the second wave but not as much as the UK where the pandemic seems to be out of control due to a new more virulent strain of Covid-19. Thus, new restrictions were implemented in most European countries. Nevertheless, there was real good news for the future thanks to the discovery of a very successful new type of vaccine by two companies, Moderna and Pfizer/BioNTech, both are more than 90% effective against the virus. Their vaccination process started very quickly at the end of December in some countries like the UK and the USA.

In addition, the Covid-19 second wave has caused less impact on activity. The economic framework has been resilient as shown by the strong manufacturing *Purchasing Managers' Index* ("PMI") thanks to lighter restrictions than last spring, which impacted mainly the high proximity service sector. Third quarter GDP rose by 8.5% quarter over quarter ("qoq") in Germany, driven by pronounced catch up effects in private consumption (+10.8% qoq), investment in machinery and equipment (+16.0%) and exports of goods and services (+18.1%). The third quarter GDP rebound was also strong in France at +18.7% qoq. Even at the end of the year, the economic data showed this resilience in the industrial activity despite the surge in new virus cases: factory orders and manufacturing production surprised on the upside. But this good news was offset by the poor confidence in service sectors like tourism and hotels, and the risk of an increased outbreak due to Christmas and New Year events. The economic boost expected from a new fiscal package in the USA finally happened at the very end of the year after politicians reached an agreement.

In conclusion, the economic framework supported the risk-on mode in the market, and such a context supported by the public expense spending from Euro governments, led to the strong outperformance of the equity and credit markets this year.

In the portfolio, we managed an overweight duration exposure over the year since the pandemic started in the Eurozone; this change was implemented by buying Bund futures and options. The portfolio also invested in Portuguese and Greek government bonds in March when their yields jumped. We still stick to our strong conviction of the yield convergence between the Eurozone countries due to the very accommodative ECB monetary policy reinforced by its powerful new bond buy program. The portfolio's exposure combined a bearish exposure to core and semi-core countries with a long exposure to peripheral debts.

Due to the pandemic, we managed a sector reallocation, and in addition our issuer selection was adapted to the new context in February and March. We took advantage of the numerous primary market auctions, which had to offer an extra yield premium to be able to issue a new security. We still like the following sectors: banks, technology, IT and Telecom.

After the credit market recovery, we reduced the fund credit risk by one year duration time spread: we took profit on Telecom, Utilities and non-cyclical sectors to buy back cyclical and Financial sectors, which were still distressed like the carmakers and retailers. We added value by bidding on many primary market auctions that offered extra premium to attract new investors.

After the summer, we started to reduce the periphery overexposure in order to take some profits due to their very low nominal yields. In addition, we reduced our strong overweight exposure versus the Index to the low rated issuers in the wake of the strong credit market outperformance. We reinvested the cash in other credit bonds offering less risk due to their membership to a more defensive sector or due to their higher rating. It is important to minimise liquidity in order to avoid the negative money market returns.

During the last quarter, our objective was to take advantage of the market volatility both for our country and our issuer selections. In October, we re-increased the credit overexposure as the month end sell-off offered many opportunities to invest, mainly through the primary market, in high beta credit names: we bought financial names and high yield rated issuers. Then up to year end, we reinforced our high beta names at the expense of high rated bonds which outperformed and then offered too tight spreads. We are overweight versus the Index in most sectors, mainly through the medium-term maturities. We added value by bidding to many primary market auctions that offered extra premium to attract new investors.

Due to the expensive pricing of euro high quality bonds, in December we reduced our portfolio duration to be underweighted two years versus the benchmark. Considering the enlarged ECB QE buy program support, we mainly reduced the long maturities of our portfolio for the core and semi-core countries, which we believed could underperform if the uncertainties should diminish. In addition, we took some profit on our large overweight exposure to the periphery by reducing mainly our Italian overexposure due to the low level reached on their nominal yields.

Tactically throughout the year we successfully managed long exposure to options on the 10-year Bund, both calls and puts, to take advantage of the market high volatility due to the uncertainties.

Over the next months, we believe markets will focus on the efficiency of the vaccination strategy and the risk of the more virulent new Covid-19 strain. The resilience of the economy is at risk what the market consensus didn't discount since the uncertainties diminished with a "Brexit" deal and the Democrat majority in the US Congress.

Neuberger Berman Euro Opportunistic Bond Fund (Continued)

Investment Manager's Report (Continued)

Of course, governments and central banks are aware of these risks: the US and Europe started to implement strong public expense boosts, higher than 10% of the GDP, to support the recovery in the activity.

In conclusion, we believe there will be a protracted rebound of the growth while having a jump in government funding needs this year. We anticipate a weaker bond market supported by the rebound in the inflation rate. In this context, we believe Investment Grade credit spreads should perform due to the decrease in the number of company downgrades and the quest for higher returns from investors having cash in excess.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Euro Bond Absolute Return Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was 2.69%. Over the same period, the benchmark index, the ICE BofA 0-1 Year AAA Euro Government Index (EUR Total Return, Hedged) returned -0.62%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

The 1st quarter saw a significant fall in Euro government yields, by more than 0.30% for the German 10-year bond ending the period with a return of -0.47% after having reached its lowest level ever at -0.86%. The sovereign bond market outperformed due to a new period of "flight to quality" in the wake of fears from the Coronavirus contagion to all countries. This new virus brought lots of deaths, especially in the south of Europe. The consequence of such a never-before-seen shutdown was the most severe recession experienced for almost a century. The uncertainties relied both on the loss in terms of activity and on the duration of the uncontrolled virus contagion. The economists significantly revised down their growth forecasts this year due to a significant fall in production, capital expenditures and Euro exports. Thus, the market feared a too-long period of subdued activity increasing the risk of companies not being able to bear such an economic disruption and then going bankrupt. Consequently, the credit market experienced one of its largest ever sell-offs in March while overindebted countries like Greece and Italy underperformed significantly: Italian government yields jumped from 1% to 2.4% on a 10-year maturity during March.

Such an economic and market crisis led the Central Banks to react quickly in several steps in March ahead of the government economic rescue plan. The European Central Bank ("ECB") started to extend the duration of its "forward guidance", then launched a €120 billion Quantitative Easing buy program. In April, the ECB reinforced its Asset Purchase Program with a larger and more flexible one called the Pandemic Emergency Purchase Program ("PEPP"), for an amount of €750 billion. These decisions helped to reduce the disruption of the Euro credit bond market and to recover its liquidity as the new bond buy program included private debt buys.

The second quarter experienced a pause in the AAA Government bond rally, switching to a cautious stance waiting for the end of the halt in the activity due to the lockdown. The fears of the Coronavirus contagion in all countries forced a full social distance strategy implying an unknown fall in production, consumption and capital expenditure by negative monthly double-digit figures. Such a shut down in activity for a two-month period implied a jump of downgrades for companies having to reassess their businesses and service sectors such as transport and restaurants. Therefore, the credit market stayed depressed in April in a wait-and-see mode waiting and for checking defaults, after one of its largest sell-offs ever in March.

Such threats led European governments to respond through its euro group council, which announced a credible "emergency" economic deal for a €500 billion package in three axes to support private companies as well as government funding needs: €240 billion for ESM credit lines, €200 billion for EIB guarantees and €100 billion for the European Commission reinsurance scheme called Support to mitigate Unemployment Risks in Emergency ("SURE").

From May up to the third quarter, the market optimism came back leading to erase most of the sell-off seen on equity and credit bonds since February. Thus, the yields for high quality Euro government debts rose while on the opposite side, the peripheral bonds outperformed strongly, the BTP (Italian Government Bonds) spread versus German Bund tightened up to the quarter end by 28 basis points ("bps") on the 10- Year maturity. The Investment Grade bond sector also experienced a strong recovery as their spread went back below 70 bps compared to 140 bps at its crisis top. The High Yield market outperformed significantly, its average spread tightened by almost 110 bps, but far from recovering its entire sell off losses of March.

The third quarter saw the continuation of this optimistic market trend, reinforced by the jumps in job creation and retail sales, especially in Germany, and the final round of negotiations for the European Recovery Fund reached a surprisingly historic agreement. This recovery package will represent 750 billion of aid of which 390 will be in "grants". This is a key step toward fiscal integration. These expenses will be funded by a common debt. This is a real game changer for the European countries which are too indebted: the risk premium diminished significantly for the peripheral countries. Their spreads versus German yields fell again, for example by 18 bps for the BTP 10 year.

The last quarter of 2020 also experienced a continuation of the bullish trend of the euro bond market: while the yields for the German 10-year bund finished the quarter slightly lower, close to a return around -0.60%, the periphery yields saw a strong decline, for example by 30bps on the 10 year Italian BTP, and the credit spread tightened again by more than 10bps for the Investment grade euro bond universe. Bond prices were supported by the ECB's proactive monetary policy, showing its commitment to maintaining very low yields for an extended period, at least up to March 2022. In reaction to the second virus wave, the ECB again recalibrated its very accommodative monetary policy at its mid-December council by an extension of its PEPP and new Targeted longer-term refinancing operations ("TLTRO") programs. Indeed, the ECB took the virus resurgence acceleration into account as the number of daily infections reached new highs in December this time in the UK and the North of the Europe but not in the South.

Neuberger Berman Euro Bond Absolute Return Fund (Continued)

Investment Manager's Report (Continued)

Germany is clearly significantly impacted by the second wave but not as much as the UK where the pandemic seems to be out of control due to a new more virulent strain of Covid-19. Thus, new restrictions were implemented in most European countries. Nevertheless, there was real good news for the future thanks to the discovery of a very successful new type of vaccine by two companies, Moderna and Pfizer/BioNTech, both are more than 90% effective against the virus. The vaccination process started very quickly at the end of December in some countries like the UK and the USA.

In addition, the Covid-19 second wave has caused less impact on economic activity. The economic framework has been resilient as shown by the strong manufacturing *Purchasing Managers' Index* ("PMI") thanks to lighter restrictions than last spring, which impacted mainly the high proximity service sector. Third quarter GDP rose by 8.5% quarter over quarter ("qoq") in Germany, driven by pronounced catch up effects in private consumption (+10.8% qoq), investment in machinery and equipment (+16.0%) and exports of goods and services (+18.1%). The third quarter GDP rebound was also strong in France at +18.7% qoq. Even at the end of the year, the economic data showed this resilience in the industrial activity despite the surge in new virus cases: factory orders and manufacturing production surprised on the upside. But this good news was offset by the poor confidence in service sectors like tourism and hotels, and the risk of an increased outbreak due to Christmas and New Year events. The economic boost expected from a new fiscal package in the USA finally happened at the very end of the year after politicians reached an agreement.

In conclusion, the economic framework supported the risk-on mode in the market, and such a context supported by the public expense spending from Euro governments, led to the strong outperformance of the equity and credit markets this year.

In the portfolio, we increased the fund duration exposure by two years beginning in February when the pandemic started in the Eurozone; this change was implemented by buying Bund futures and options. The portfolio also invested in Portuguese and Greek government bonds in March when their yields jumped. We still stick to our strong conviction of the yield convergence between the Eurozone countries due to the very accommodative ECB monetary policy reinforced by its powerful new bond buy program. The portfolio's exposure combined a bearish exposure to core and semi-core countries with a long exposure to peripheral debts.

Due to the pandemic, we managed a sector reallocation, and in addition our issuer selection was adapted to the new context in February and March. The portfolio risk exposure was not reduced as we preferred to focus on our name selection efficiency and their associated liquidity. We took advantage of the numerous primary market auctions, which had to offer an extra yield premium to be able to issue a new security. We still like the following sectors: banks, technology, IT and Telecom because of the new context of coronavirus implying lower energy prices, we have sold step by step the Euro inflation only keeping Italian linkers format "Italia" before increasing our positioning on Inflation linked bonds with breakeven close to zero or in negative territory.

We increased the portfolio's duration to reach three years in April. After selling agencies and supranationals for their relative illiquidity, we focused on targeted countries by PEPP: our buys on the primary market were mainly on medium- term maturities from Ireland, Portugal, Spain and Cyprus. In May, we sold some French OAT bonds and realised a profit on all our put options on Bund futures. Being active on the primary market largely due to the revised funding program of governments, we realised some gains and significantly exposed the portfolio to peripheral countries by selling some Portuguese, Greek and Eastern European bonds on the secondary market. We realised a profit on our put options on BUND futures, after a strong rebound from €130 billion of fiscal stimulus, in early June. We then increased the duration exposure during the month to above three years reducing mainly our short on German futures. In secondary markets, we continued to increase medium term maturities for non-core countries on coming TLTRO take-up expectations.

After the credit market recovery, we managed a sector rotation in order to reduce the portfolio's credit risk by one year duration time spread. We took profit on Telecom, Utilities and non-cyclical sectors to buy back cyclical and Financial sectors, which were still distressed like the carmakers and retailers. We added value by bidding on many primary market auctions that offered extra premium to attract new investors. Tactically, we bought protections on credit in an attempt to mitigate the portfolio's risk.

In the new context of low energy prices, we maintained a light exposure to the Euro Inflation linked bonds before increasing our positioning for breakeven in negative territory.

In July, expecting a good outcome about the European Recovery Fund negotiations and leading indicators pointing to a strong economic recovery, we actively managed our large exposure to non-core countries and to credit markets. On government bonds, we were exposed to Iberia, Cyprus and Italy and to some eastern European countries. The main beneficiaries of the plan are Italy and Spain with €80 billion and €70 billion of grants and eastern countries (Croatia and Romania for instance), debts we were holding.

The credit market was well supported by the strong rebound of confidence data and we took advantage of the attractive bond pricing on the primary market ahead of the summertime.

Neuberger Berman Euro Bond Absolute Return Fund (Continued)

Investment Manager's Report (Continued)

In August, the strong credit market performance led us to reduce our strong exposure to low rated issuers. We reinvested the cash in other credit bonds offering less risk due to their membership to a more defensive sector or due to their higher rating. We cut our Credit Default Swap protection early September. Our tactical pocket of corporate hybrids made some additional contribution to performance.

With rising confidence indicators, fiscal stimulus in developed markets and limited supply from OPEC members and Russia, Brent energy prices were back around \$45 in July. Core inflation data, even if biased by imputed prices such as airlines and package holidays, surprised to the upside and finally, because there was a huge duration extension in French Inflation linked index, we increased our exposure to the Euro inflation bonds in terms of duration preferring the short to medium part of the curve which priced low inflation and even deflation for many years.

In August, after a positive month of performance for Euro Inflation linked bonds with no supply, we decreased our breakeven strategies in euro space because supply was coming in early September and because we expected a lower core inflation published at the end of the month. Actually, the effect of shifted seasonality due to postponed sales and a temporary VAT cut in Germany and end of price imputations should lower the core inflation down from 1.2% year over year. So, we sold some Inflation linked bonds for nominal bonds with the same maturities. In addition, we sold in early September most of the zero-coupon inflation swaps we were holding. Due to the weakness of the US dollar, we preferred to be exposed to US Treasury Inflation Protection Securities (TIPS) in real yields for maturities 5 and 7 years (fund's bucket of 5%) with a good carry for several months.

During the last quarter, the portfolio's duration was decreased between 1.5 to 2 years in October. Tactically, we managed successfully long exposures to options on the Bund 10-year, calls and puts, to take advantage of the market high volatility due to the uncertainties.

On government bonds, being still exposed to Iberia and Italy and to some eastern Europe countries, we lightened our exposure to Cyprus versus Iberia with tighter and tighter spreads. Considering the enlarged ECB QE buy program support, we also reduced our exposure to the long end of the curve for core and semi-core countries. Therefore, we switched our short on German 10 year futures to a short in French 10 year futures as France was significantly impacted by the second wave of the virus.

We were ready to re-increase the credit overexposure in case of market favorable conditions. The month end sell-off offered many opportunities to invest, mainly through the primary market, in high beta credit names. We did it by buying the financial sector and High Yield rated issuers.

Brent energy prices have been lower than \$40 in December with lockdown announcements by France following Ireland and Wales to abruptly stop the outbreak progression. We remained light in euro linkers because end of imputed prices still weighed on an already low core inflation. During the month, we slightly increased our euro breakeven exposure via a zero-coupon 10 year inflation swap with the possibility of a US election "blue wave" synonym of global reflation trade. We have hedged progressively the US TIPS duration to have a US breakeven strategy.

During the last quarter, we lightened our nominal exposure to Spain and Portugal both very tight in both absolute term (close to 0% for the 10 years yield) and relative term (spread lower than 60 bps versus Germany). We switched some Spanish and Portuguese nominal bonds for Spanish linkers with the same maturities.

In November and December, the first issues were launched related to SURE. We participated to all syndications due to the very interesting net issue premium.

Anticipating the large supply to come in January and the reflation trade following Joe Biden's victory, we have reduced the portfolio's duration by one year in December.

In parallel, the strong outperformance of the credit market led us to maintain our exposure. We even reinforced up to year end our high beta names at the expense of high rated bonds which outperformed and then offered too tight spreads. We are exposed in most sectors, mainly through the medium-term maturities.

Brent energy prices rebounded strongly in November and December due to vaccine positive news and due to the good growth in Asia meaning more demand going forward. We increased our holdings in euro linkers (France, Spain and Italy). During the month, we also opened a new long on a zero-coupon 10 year inflation swap which has performed well.

Over the next months, we believe markets will focus on the efficiency of the vaccination strategy and the risk of the more virulent new Covid-19 strain. The resilience of the economy is at risk what the market consensus didn't discount since the uncertainties diminished with a "Brexit" deal and the Democrat majority in the US Congress.

Neuberger Berman Euro Bond Absolute Return Fund (Continued)

Investment Manager's Report (Continued)

Of course, governments and central banks are aware of these risks: the US and Europe started to implement strong public expense boosts, higher than 10% of the GDP, to support the recovery in the activity.

In conclusion, we believe there will be a protracted rebound of the growth while having a jump in government funding needs this year. We anticipate a weaker bond market supported by the rebound in the inflation rate. In this context, we believe Investment Grade credit spreads should perform due to the decrease in the number of company downgrades and the quest for higher returns from investors having cash in excess.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Absolute Alpha Fund*

Investment Manager's Report

For the period from 1 January 2020 to the Portfolio's close on 10 August 2020, the total return for the USD I Accumulating Class was -3.46%. Over the same period, the benchmark S&P 500 Index (USD Total Return, Net of Tax) returned 4.86% and the MSCI World Index (Net) returned 1.16%. (Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

In the first quarter, the market suffered a severe correction because of the global coronavirus pandemic, but the portfolio outperformed all the major indices. In the second quarter, the market staged an impressive rally - not because the pandemic was over, but because central banks flooded the market with liquidity. Free money trumped the virus. However, due to our caution, the portfolio only participated somewhat in that rally and therefore underperformed the market.

Near the end of March and during the height of the market swoon, the US Federal Reserve (the "Fed") announced a resumption of Quantitative Easing. This time, the Fed would buy almost every type of fixed income security, a much broader version of quantitative easing than even during the Great Financial Crisis. This avalanche of buying by the Fed, in our view, crowded out investors from fixed income securities into equities - hence, the second quarter rally.

To be fair, there are certain parts of the economy that have benefited from this crisis. First, the pandemic has accelerated movement towards the internet by several years. Thus, companies like Amazon etc. have seen their revenue growth turbo charged. Second, there is a clear movement of consumers moving out of the cities and back to the suburbs. Homebuilders and anything housing related have seen strong results. With respect to the homebuilders, recent monthly orders have surged in excess of 35% vs. last year.

Yet, the Fed's liquidity infusion created an extremely speculative market. Growth stocks have surged the most and those companies with high revenue growth but negative earnings have gone up the most. One other observation: during this period, factor investing has had more influence than stock picking. Thus, on days where the market fears a pandemic resurgence, growth stocks climb and cyclicals go down. On days where there is positive news about a potential cure or vaccine, the reverse happens.

The breakdown of the performance of the S&P 500 Index by sector when comparing quarter one to quarter two shows that the second quarter saw a massive performance surge. The sector performance statistics, however, do not capture an important point. The best performing stocks were often those with high growth rates and no earnings. Those stocks largely sit within Information Technology, Consumer Discretionary and Communication Services.

During the second quarter, the portfolio underperformed largely because our net exposure was low during much of the quarter. Our longs performed well but our shorts consumed much of that performance.

*Portfolio liquidated on 10 August 2020.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$
24,903	Zillow Group Inc Class C	1,211,710
18,068	Las Vegas Sands Corp	1,154,955
67,412	CenterPoint Energy Inc	1,144,754
3,342	Fair Isaac Corp	1,036,438

Neuberger Berman Multi-Style Premia Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the USD I Accumulating Class was -24.86%. Over the same period, the ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index (Total Return, USD) returned 1.08%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

2020 was an unprecedented year given the COVID-19 pandemic, in which stocks experienced their fastest and steepest bear market decline, followed by a historically quick recovery to new highs. Stocks finished 2020 with strong gains, helping push the S&P 500 Index to a return of more than 18% in a year that contained record-breaking recession and a contentious presidential election.

The first quarter of the year saw a rapid and dramatic shift towards risk aversion which proved challenging to the Portfolio which invests in a diversified basket of risk premiums. After initially grinding higher, markets experienced historically extreme moves at the end of February and into March. In the second and third quarters markets sharply rebounded from the COVID-19 pandemic encouraged by the expectation of additional government stimulus and rising hopes for further coronavirus aid. Markets continued to rally in the fourth quarter amid optimism over the rollout of new coronavirus vaccines and US election results.

While all equity factors struggled through the year, we also observed a rare momentum crash in the middle of Q4. This was caused by Pfizer's announcement about the high efficacy of its COVID-19 vaccine when stay-at-home companies slumped while travel-related names soared. Low quality names also staged a large rally which led to a huge squeeze higher across equity shorts. As a result, the equity strategy finished the year as the largest detractor. Currency returns were negative throughout the year, except the last quarter, where Emerging Market longs offset losses in the developed FX. In the first quarter, both commodities and rates spreads experienced underperformance as well as the global risk aversion linked to a cascade of sector-specific risks, such as Saudi/Russia energy standoff, which impacted our currency positions in commodity producers, and the Italian coronavirus lockdown which impacted our Italian bond positions. In the middle of the year, the rates strategy was positive as safe haven trades unwound in second quarter which benefited long Italy vs short bund positions and the carry factor was up in the third quarter. However, in fourth quarter, rates experienced losses due to short European positions, which resulted in negative performance by the end of the year. Commodities performed well in the second half of the period driven by gains in precious metals, energy and grains, however that was not enough to overcome the negative returns suffered in the first six months of the year. Despite positive performance in second, third and fourth quarters, when short volatility benefited from plunging CBOE Volatility Index (VIX), the volatility returns ended the year in the negative territory due to losses in first quarter driven by equity options selling.

A new variant of the coronavirus and disappointing economic data are likely to coincide with continued pandemic-related restrictions and cause concerns for investors. With issues in distribution of COVID-19 vaccine, our near-term focus remains on managing volatility and beta exposure. We continue to diligently monitor risk levels as we hope to get more clarity on the current global health situation in 2021.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Neuberger Berman Macro Opportunities FX Fund

Investment Manager's Report

For the 12 months ended 31 December 2020, the total return for the EUR I Accumulating Class was -3.10%. Over the same period, the benchmark index, the ICE BofA 0-1 Year AAA Euro Government Index (Total Return, EUR) (the "Index"), returned -0.62%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

During the period, the best performing major currencies were the Swedish krona and the Australian dollar. The worst performing major currencies were the US dollar and the Canadian dollar. Overweights, relative to the benchmark, in the Mexican peso and Japanese yen were the best performing positions whilst underweight the Australian dollar and overweight the Brazilian real were detractors of performance.

The year began with heightened optimism about the global economy with robust economic data and a large degree of monetary and fiscal accommodation. However, the first quarter was dominated by the COVID-19 pandemic. Originating in China at the start of the year the virus spread globally, with Europe particularly affected. With many countries quarantining large numbers of people and shutting down many businesses, the economic impact was severe, both through the sharp contraction in demand and disruption to supply chains. The impact on global financial markets was a relentless fall in risk-on assets and rally in safe haven assets. The currency market responded in the same way, with the US dollar, Swiss franc and Japanese yen all outperforming high yielding and pro-cyclical currencies. Additionally, the news of Saudi Arabia's intention to increase market share in the oil market led oil to fall more than 30% in a single day and weighed on oil exporting currencies such as the Norwegian krone, Mexican peso and Canadian dollar.

Moving into the second quarter of the year, risk assets enjoyed strong performance as monetary and fiscal stimulus dominated concerns over the economic impact of COVID-19. Currency markets also saw a rebound with most currencies ending the period close to where they started the year.

In Europe, having been the epicentre of the pandemic in the first quarter, the European economy was successful in controlling the virus in the second quarter and the fiscal response was significant and well received by market participants. Negotiations concluded with an agreement on a European recovery fund which will mean debt mutualisation and therefore fiscal transfers. This move was taken by both market participants and commentators to be a move closer to the fiscal union that many believe is necessary for sustainable prosperity in Europe. Consequently, the Euro and those currencies closely tied to the single market such as Swedish krona and Norwegian krone performed well following the announcement.

In the US, the relaxed measures taken by the US administration meant that the US struggled to control the virus. Large fiscal spending and liquidity injections from the Federal Reserve led US equities and fixed income markets to perform well however the US dollar depreciated versus most major currencies as optimism over the global recovery and large dollar liquidity weighed on the currency.

Both the Australian dollar and New Zealand dollar benefited from their relatively low virus infection rate, large fiscal stimulus, pro-cyclical properties and the growth policies implemented in China.

In the second half of the year, the themes from the second quarter continued with risk assets performing well, US real rates falling, precious metals, commodity currencies and European currencies appreciating and the US dollar depreciating. Continued market trends reflected the continued narrative in financial markets which is that the policy stimulus outweighs the economic impact from COVID-19 and that following the sharp fall in activity in Q2, the economic recovery is robust.

Aside from the central theme, there were two idiosyncratic themes during the second half of the year. Firstly, the European Central Bank's (ECB) response to the euro's appreciation since March and secondly ongoing Brexit negotiations between the UK and European Union. In Europe, as the euro approached 1.20 against the US dollar, communication from ECB officials and research published from the central banks research department highlighted the negative consequences of a strengthening currency on the central bank's ability to meet their target. The symbolic 1.20 level was also breached as Eurozone inflation turned negative. Market participants watched closely for whether or not the ECB would just continue to attempt to talk down the single currency or if policy action would be forthcoming. It was the latter.

Towards the end of 2020, many market participants' focus was on the US elections which ended with the Democrats winning the Presidency and the Senate still to be decided in January. Market commentators believe this outcome will lead to further fiscal stimulus but without some of the market-unfriendly policies that had previously been feared.

Neuberger Berman Macro Opportunities FX Fund (Continued)

Investment Manager's Report (Continued)

The COVID-19 pandemic saw a second wave of infections in many countries which led to further lockdowns. Market participants appear to look through the current economic environment with the expectation that governments and central banks will step in to provide any stimulus needed and thus the long term economic impact will be limited.

In the UK, Brexit saw an agreement reached on Christmas eve which will avoid tariffs and quotas on most traded goods but the agreement lacked scope on many traded services which are key for the UK.

Looking ahead into 2021, with the US Presidential Election decided and the Senate to be decided early in the new year the markets' attention will turn to fiscal policy and COVID-19 vaccine distribution. As economies begin to reopen it will be important to monitor how much support governments provide and how any support is financed.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost EUR

Neuberger Berman Global High Yield Sustainable Action Fund

Investment Manager's Report

Since inception, 21 January 2020, through the reporting period ended 31 December 2020, the total return of the USD I Accumulating Class was 3.30%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

In the first annual report for this Portfolio, we are pleased to report that performance is in line with expectations, providing both downside protection and upside participation in what was a highly volatile year for global high yield. Importantly, issuer engagements remain a key focus in the management of the Portfolio and engagement efforts are progressing as analysts focus on communicating with key members of senior management teams on aligning products and services with Sustainable Development goals relevant to each industry.

It would be no surprise that Environmental, Social and Governance ("ESG") and Sustainable Development Goals ("SDG") considerations became especially relevant in the midst of the global pandemic. We also understand that the SDG and the overall impact of the Portfolio are important considerations along with investment performance. The data suggest that companies that "do the right thing" also tend to perform well over the long run, demonstrating that company resiliency is also supported by how well leadership integrates ESG and SDG factors into operating their companies.

The year 2020—marked by the COVID-19 pandemic—was a tale of two markets with a huge indiscriminate, high velocity drawdown from mandated shutdowns to slow the spread of the virus followed by a significant risk-on rally as a result of massive fiscal and monetary stimulus in April and May. While the second half of the year saw some pockets of volatility, the trillions in global monetary accommodation and fiscal support put in place before mid-year had worked well to remove extreme tail risk. Furthermore, capital markets were wide open in the second half of the year and companies had been aggressive in cutting costs, so many issuers were better positioned and able to bridge the challenging operating environment until the economy was in recovery mode. Then, in the fourth quarter, the market started looking through the pandemic toward the eventual full reopening of the global economy on news in early November of two viable vaccines. Global high yield finished the year in positive territory and also saw very strong high yield new issuance and record-setting inflows for the asset class.

Credit selection, downside mitigation and default avoidance were key factors to performance in what ended up being a very tumultuous year in global high yield markets. Throughout the period, issuer fundamentals diverged greatly but generally remained more resilient than many had feared as the ability for high yield issuers to successfully navigate the various stages of the pandemic improved over the period given a 3Q20 earnings season that exceeded expectations, strong cost controls during 2Q20 and open capital markets which allowed issuers to stabilise margins and improve balance sheets. Progress against the virus, combined with pent-up demand, a very high savings rate and strong fiscal and monetary policy support should deliver improving economic growth and issuer fundamentals in 2021. High yield default rates started the year below the long-term average, spiked as a result of mandated shutdowns and then declined materially toward the end of the year. In December, the par weighted LTM U.S. high yield default rate was 6.17%. For context, the long-term average default rate is 3.50% (based on annual default rates back to 1980 according to JP Morgan).

During the period (21 January 2020 to 31 December 2020), the Portfolio's positioning within Banking, Healthcare and Chemicals added the most to performance. In contrast, positioning within Airlines, Metals/Mining and Consumer-Products detracted the most from performance.

While global high yield spreads continued to tighten in the second half of the year from elevated levels, we believe spreads are compensating investors for the moderating and more visible defaults remaining which are likely to come from the same areas such as longer-term COVID-19 impaired and industries in secular decline. In our view, the vaccine roll-out is likely to start normalising economic and social activity in 2021. As we continue to closely monitor the developments of COVID-19, the economic recovery and changes in policy, we are finding ample investment opportunities in global high yield across the credit spectrum and regions within the investable universe for this Portfolio. Despite the recent resurgence of COVID-19 cases and delays in vaccine delivery, which could result in pockets of short-term volatility, we believe our deep fundamental credit research, focus on relative valuations, seeking to avoid defaults, focus on engagements with issuers on Sustainable Development Goals and "best ideas" portfolio construction approach, position us well to tactically take advantage of any volatility.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$
305,000	LKQ European Holdings BV, 4.13%, 01/04/2028	377,229

Neuberger Berman 5G Connectivity Fund

Investment Manager's Report

From the inception on 8 April 2020 through 31 December 2020, the total return for the USD I Accumulating Class was 63.20%. Over the same period, the benchmark index, MSCI All-Country World Index returned 41.42%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Global equity markets posted strong gains in 2020 despite the COVID-19 pandemic which led to a global recession. Equities rallied from the low levels in March as global central banks announced extensive stimulus measures to support economic recovery and the rapid development of COVID-19 vaccine gave hopes of a back-to-normal environment in 2021.

The Portfolio outperformed its benchmark over the reporting period thanks to stronger demand for 5G post COVID-19. Given the increasing shifts to remote work, online education and telehealth, the consumption of data has surged and telecom operators globally have increased capex to ramp up on 5G network deployment. We have also seen an acceleration in 5G smartphone launches and adoption, especially after Apple's 5G iPhone release.

The Portfolio invests in the key enablers or beneficiaries of 5G which consists of three distinct categories: 1) Network Infrastructure, 2) Internet of Things ("IoT") Devices and 3) Applications and Services. Over the period, Applications and Services investments performed strongly thanks to strong trends of digital transformation post COVID-19. Network Infrastructure and IoT Devices related investments also performed well over the period given strong demand for 5G post the pandemic. By sector, overweights in the Information Technology and Communication Services sectors were key contributors to performance.

2020 was just the beginning of 5G network deployment and 5G smartphone launches. We believe 5G trends will enter an accelerated growth phase in 2021 driven by strong demand for better connectivity. While the impact from COVID-19 will likely subside as vaccination becomes available, we believe the trends of 5G and digitalization of the economy are structural and irreversible. As we enter 2021, we remain positive about the ramp up in 5G network deployments, 5G smartphone adoption as well as emerging next-generation applications that benefit from 5G proliferation.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Neuberger Berman Japan Equity Engagement Fund

Investment Manager's Report

From the inception on 12 May 2020 through 31 December 2020, the total return for the JPY I Accumulating Class was 48.43%. Over the same period, the benchmark index, the MSCI Japan Small Cap Net Index (Total Return, JPY), returned 18.59%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

The COVID-19 pandemic has led to the global economic slowdown and fiscal/monetary policy responses by governments from all around the world translating to the stock markets closing 2020 at historical high levels. The Nikkei started 2020 at JPY 23,000 levels which then fell to JPY16,550 in late March, and then recovered to JPY27,550 levels by the year end. During the turbulent market change, the change in work/lifestyle post COVID-19 has led to work-from-home becoming widely socially acceptable which has significant implications in Japan where societal pressure plays an important role. As large Japanese corporates adapted to the new work/lifestyle, we initially witnessed the decision-making process taking longer than usual as corporates adapted to the change and employees shied away from roles and responsibilities. However, the necessary changes to adapt to the new business environment has helped weed out the core issues that needed to be resolved to improve efficiency for the longer term. We also saw digitalization accelerate especially in areas such as medical, education and government where change has traditionally been slow due to establishment and politics. *Gai-atsu* or *gaiteki-yoin* (external pressure or external factors) have always played a crucial role in stimulating innovation in Japan as was the case of Japan's modernization after the US Navy opened up Japan to the West in the 1850s. We believe digitalization to further accelerate which should improve efficiency for Japanese corporates which has been an issue in the vastly aging economy.

Even before COVID-19, Japanese companies have been trading at a discount to developed market peers due to its historically low return on investments brought about by their inefficiently run balance sheet and lower profitability. In the last decade, various stakeholders led by shareholders and the government have raised pressure on management to improve capital efficiency. We have begun to see real change taking place on this front. The first phase addressed low hanging fruits with companies improving shareholders' return through higher dividends and share buybacks. We are now in the second phase where management is addressing issues tied to long-standing business traditions such as cross-shareholdings as well as divestiture of non-core assets to improve capital efficiency. These are significant moves from a Japanese business culture perspective as these were long-standing structural issues that were previously considered sacred ground due to legacy management reasons.

We have positioned our portfolio accordingly to benefit from the significant beforementioned changes based on our proprietary point system. The total return for the Neuberger Berman Japan Equity Engagement Fund since launch on 12 May 2020 through 31 December 2020 was 48.43%, outperforming the total return of benchmark MSCI Japan Small Index by 29.84% thanks to our rigorous stock selection and monitoring process.

The outperformance can be attributed to our stock selection. At the sector level, top contributor was Information Technology, Consumer Staples and Health Care.

In Consumer Staples, skincare products maker Shinnihonseiyaku gained amid continued growth in its business. The company already boasts number one market share in the mail-order market, but we see further upside from the switchover to e-commerce sales and addition of value-added products to its franchise that should continue to drive growth in the medium to long-term. In May and June, the company enhanced shareholder returns by buying back 1% worth of outstanding shares from the market. Similarly, AS ONE, a wholesaler of R&D consumable products has been posting stronger than expected results during the period.

Elsewhere, investor relation advisory firm IR Japan Holdings maintained its robust results on the back of greater corporate actions targeted listed companies. We believe the increasing shareholder activism is a structural tailwind for the company. With the Corporate Governance Code revision planned in 2021, it may lead to more discussions among stakeholders around difference in opinion on capital allocation. If so, the company will be a beneficiary of such business environment with competition being non-existent. Investors also continued to favor other structural growth companies such as leading M&A broker, Nihon M&A Center and leading independent elevator maintenance company, Japan Elevator Service Holdings for its strong market position, high entry barrier and growth prospects.

Holdings which detracted from performance included copier maker Ricoh. While the company remains a market leader in copiers, its share price fell on fears of a fall in demand of printing volume amid the work-from-home policies adopted globally by clients. The management is accelerating efforts to restructure the company. We believe the shift of its business model from a copier maker to an officer service provider will bear fruit and stimulate investors to re-evaluate its undervalued valuations. Real Estate developer Tokyu Fudosan Holdings also weighted on performance as investors became increasingly concerned about its commercial real estate business amid the lockdown. Air conditioning system manufacturer Kimura Kohki saw its shares lag peers on the back of lackluster results during the period as COVID-19 hampered the company's sales and marketing activities to core customers in small-sized factories and healthcare facilities.

Neuberger Berman Japan Equity Engagement Fund (Continued)

Investment Manager's Report (Continued)

Although the near-term results may be disappointing, we remain upbeat about the company's growth potential especially as demand for high-quality air ventilation will likely increase going forward.

In portfolio activity, we have initiated 19 names and divested 9 names during the period. The portfolio move come as a result of our proprietary scoring system. Newly initiated names include leading robot parts manufacturer Harmonic Drive Systems, accounting software firm TKC, system integrator Comture, healthcare data provider JMDC and sports goods manufacturer Asics. We have also initiated positions in the following companies through IPOs. Cashless solution provider GMO Financial Gate, fintech solution provider Wealthnavi, No-code app development platform provider Yappli. On the other hand, we divested lactobacillus drink maker Yakult, baby bottle manufacturer Pigeon, logistics company Trancom, and Japan Exchange Group.

Throughout 2020, engagement on financially material issues continued to play a crucial role in the Portfolio's investment process. During the first half, the pandemic forced us to focus our discussions with companies on how they are addressing COVID-19 and its immediate impact on businesses such as workers' safety, supply chain resilience and continuity of management. However, as the year progressed, we returned our focus to long-term and fundamental issues such as balance sheet reforms, boardroom independence, human capital development and gender diversity. And despite the challenges of the pandemic, we came away with a positive impression that many of our investment holdings are making real progress to address these issues to become a truly sustainable business. Two companies that yielded significant "engagement wins" for the strategy are worth highlighting.

The first is an office equipment maker with strong business fundamentals and global brand recognition. We believe the company is in the middle of a radical transformation from a traditional provider of printing solutions to a comprehensive IT services business and is well positioned to ride the global wave of office digitalization. As part of that endeavor, the company has been restructuring its business portfolio and capital management policies as well as mitigating ESG issues that are linked to the above transformation.

As long-term investors, we have been regularly engaging the company over the last several years through face to face and investor group meetings. We have met with both investor relations and senior management speakers including the CFO who have been willing to meet with shareholders like us to gain feedback on how investors are evaluating the speed and quality of their transformation. Despite the challenging business environment this year, the company has made notable progress on many of the issues we raised. To demonstrate our support to the company's efforts to raise capital efficiency and long-term corporate value, we announced our decision to support the reappointment of the CFO (architect of this capital management reforms) at the AGM as part of the advanced proxy voting disclosure program, NB25+.

The second is a Japanese regional telco that holds 50% share of the local market of mobile users. The company enjoys good brand recognition thanks to its 51% controlling parent company that is one of Japan's Big 3 telecommunication companies. This is a stable cash flow generating business with a growing base of average revenue per user as the company continues to add value-add services such as online shopping while keeping customer defections low by bundling mobile plans with utilities like electricity and fixed-line services. The company is a victim of its own success. Despite its strong cash flow generation and relatively limited capex needs, the company continues to accumulate surplus capital on its balance sheet that has weighed on the firm's return on invested capital. Management's official explanation for the cash hoard has been that the company prefers to maintain a strong cash buffer in the event of economic crises. However, the devil lies in the accounting details that show the actual cash being locked up in the form of a low interest-bearing long-term loan to its parent. This parent-subsidiary financing scheme is not only detrimental to capital returns but is also against the best interests of minority shareholders to whom the excess cash should be returned to.

We have continued to engage the company diligently over many years to raise transparency on its capital management policy and to return the surplus capital to shareholders if the cash is not being used for growth. During that time, our active engagement spanned across two Presidents and numerous Directors who have remained open to dialogue with us. However, given the sensitive and long-standing nature of the issue involving not just the company's but also the group's balance sheet, the issue continued to remain unaddressed. Hence, in recent years, we escalated our engagement to sending letters to the Board requesting timely and appropriate action while also communicating prospects of using proxy voting against the reappointment of management as a next step. We also engaged the parent company to exert pressure on their management to rethink the need to source funding from its listed subsidiary when Japanese banks are clamoring to lend to them at near zero interest rates. Finally, in 2020, we began to see some of our efforts bear fruit. Although the group financing program remains in place, the company announced it would address the inefficiencies of its own balance sheet by raising its dividend and to launch its first ever share buyback program. During a follow-up call with the President, he specifically cited our long-term engagement as the catalyst for the decision. In a show of our support to management's decision, we publicly pre-announced our vote in favor of the company's proposal to raise the dividend at this year's AGM.

Finally, we are also witnessing stakeholders and companies working together to address the third and possibly most challenging issues of low profitability and sustainable growth. The government has been aggressively promoting business and workforce digitalization and just announced a long-term 2050 target to achieve carbon neutrality.

Investment Manager's Report (Continued)

The former would help to dramatically increase labor productivity through the adoption of tools like robotic process automation and cloud computing and reduce the bloated operating costs of Japanese businesses. The latter is intended as an economy-wide "green transformation" to help businesses grow sustainably in areas like renewable energy and sustainable manufacturing while shrinking its dependence on brown technologies.

We believe this sea change in the Japanese market, economy and society is creating a wealth of investment opportunities at incredibly attractive valuations. However, we caution investors to exercise prudence and sound judgement as part of their active stock selection to pick the winners from the inevitable losers in this transformation. While we saw vicious factor rotations in 2020, the market in 2021 will continue to be volatile but with more focus on fundamental bottom-up stock selection. At Neuberger Berman, we employ a rigorous screening process focusing on business fundamentals, materiality, governance, engagement potential and valuations to identify what we call "Hidden Gems".

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost JPY

Neuberger Berman Global Flexible Credit Fund

Investment Manager's Report

Since its inception on 1 June 2020, through the reporting period ended 31 December 2020, the total return of the USD I Accumulating Class was 13.40%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Over this period credit spreads tightened from elevated levels, with global investment grade¹ ("IG") and non-investment grade credit² spreads tightening 81 basis points ("bps") and 289 bps, respectively. The move was largely driven by extensive monetary and fiscal support, the approval of several vaccines, and overall increased optimism around the prospects for economic recovery. Developed market government yields were somewhat mixed over the period, with the US 10-year yield up 26 bps, the Japanese 10-year yield up 2 bps, the German 10-year down 12 bps and the U.K. 10-year up 1 bp.

Against this backdrop, the portfolio generated a strong return for the period. Allocations to US IG credit and US high yield were the largest contributors; from a subsector perspective, energy, communications, leisure and automotive exposures were key positives. Allocations to European high yield, emerging markets debt and European IG credit each delivered solidly positive contributions as well.

Looking to 2021, we anticipate strong, if uneven, recovery across regions as the pandemic plays out. The expected availability of COVID-19 vaccines, the reopening of economies, continued monetary and fiscal policy support, and pent-up demand in pandemic-sensitive sectors of the economy should provide a significant boost to demand. Although our outlook is dependent on a successful and timely distribution of safe, efficient and effective vaccines, we believe that recent approvals and distribution suggest that the end of the pandemic is in sight.

Overall, we see an investment environment of renewed growth and improving fundamental conditions, combined with increased inflationary pressures, but without any significant change in monetary policy as central banks maintain current support in light of ongoing, though potentially fading, pandemic conditions and lockdowns. As such, we are constructive on select credit securities, particularly favouring those that offer carry with minimal duration, and inflation-sensitive assets. While we are looking at opportunities in COVID-sensitive industries, research-driven security selection remains as critical as ever.

¹ Investment Grade: Bloomberg Barclays Global Aggregate Corporate Index

² Non-Investment Grade: Bloomberg Barclays Global High Yield Corporate Index

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Top twenty purchases:

Units	Security Description	Cost US\$
15,025,000	United States Treasury Note/Bond, 0.13%, 31/05/2022	15,003,725

Neuberger Berman Global Diversified Income FMP – 2024

Investment Manager's Report

Since its inception on 22 June 2020, through the reporting period ended 31 December 2020, the total return of the USD I Accumulating Class was 5.30%. (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown are net of all fees and expenses and include reinvestment of income dividends and other distributions, if any).

Over this period credit spreads tightened from elevated levels, with global investment grade¹ ("IG") and non-investment grade credit² spreads tightening 53 bps and 216 bps, respectively. The move was largely driven by extensive monetary and fiscal support, the approval of several vaccines, and overall increased optimism around the prospects for economic recovery. Developed market government yields were somewhat mixed over the period, with the US 10-year yield up 20 basis points ("bps"), the Japanese 10-year yield up 1 bp, the German 10-year down 16 bps and the U.K. 10-year down 1 bp.

The portfolio's allocation to U.S. high yield was the largest contributor to performance, followed by U.S. investment grade ("IG") credit and emerging markets ("EM") debt. In terms of subsectors, leisure, automotive and midstream exposures were key contributors in US IG and high yield credit; financials and sovereign exposures were notable positives within EM debt.

We continue to believe IG credit should perform well in an environment of ongoing central bank support, heightened global demand for yield and reduced supply. In non-IG credit, while spreads continued to tighten in the fourth quarter, we believe spread levels are compensating investors for any potential defaults remaining which are likely to come from the same areas such as Energy and the longer-term COVID impaired.

A potential easing of US/China tensions and the end of US election-related uncertainty should prove favourable to emerging economies, along with prospects for a cyclical recovery. This should reduce the risk of further defaults among large sovereign issuers in 2021. In our view, valuations for EM hard currency bonds should remain at reasonably attractive levels, especially in the high yield space.

¹ Investment Grade: Bloomberg Barclays Global Aggregate Corporate Index

² Non-Investment Grade: Bloomberg Barclays Global High Yield Corporate Index

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost US\$

Neuberger Berman China A-Share Equity Fund

Investment Manager's Report

For the period from the Portfolio's inception on 28 July 2020 through 31 December 2020, the total return for the CNY I Accumulating Class was 18.25%. Over the same period, the benchmark index, the MSCI China A Onshore Net Index (CNY Total Return) (the "Index") returned 12.53% (Performance for all share classes is provided in Appendix II. Performance data quoted represent past performance and do not indicate future results. Total returns shown reflect the reinvestment of income dividends and other distributions, if any).

Even given an unstable trade and diplomatic relationship between China and the US as a backdrop, China equities outperformed emerging markets and developed markets including the US this period, driven primarily by investor sentiment around the nation's decisive approach to managing COVID-19.

After world equity markets corrected in March as it became clear that COVID-19 was spreading globally, investors rewarded China for taking tough measures early in an effort to stop the spread there and reopen the economy. These measures, including lockdowns, worked, and China was open, with Chinese companies meeting local needs and gaining share globally, while the virus spread uncontrolled in other nations.

Consumer Discretionary and Consumer Staples were the top two sectors, while Communications fell, and Real Estate declined slightly.

The Portfolio's outperformance resulted primarily from stock selection. Information Technology, Health Care, and Financials were the largest drivers of the Portfolio's relative returns. The Portfolio underperformed within Energy, and an overweight to Real Estate and underweight to the top-performing Consumer Discretionary sector were mild headwinds.

Looking forward we believe China could continue to lead the global economic recovery in 2021 driven by domestic consumption, infrastructure investment and recovery in exports. We note the national government's "Five-Year Plan" focusing on domestic-driven demand and digitalisation could present attractive long-term investment opportunities especially in the domestic consumption and, separately, advanced manufacturing sectors. In any of China's diverse segments, the team favors quality companies with leading market share, sustainable competitive advantages and solid growth potential. We believe this could provide investors with strong risk-adjusted returns going forward.

Statement of Significant Purchases and Sales (Unaudited)

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, a statement of changes in the composition of the Schedule of Investments during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Portfolio. The following statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases or sales, respectively, for the period. At a minimum, the largest twenty purchases and twenty sales are presented, if available.

Aggregate purchases greater than one percent of the total value of purchases:

Units	Security Description	Cost CNY

NOTES TO THE AUDITED FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies adopted by Neuberger Berman Investment Funds plc (the "Company") are as follows:

Basis of Preparation of Financial Statements

The financial statements have been prepared in accordance with accounting standards generally accepted in Ireland, Irish Statute comprising the Companies Act 2014 (as amended), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended, the Central Bank (Supervision and Enforcement) Act 2013 (section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") and the listing rules of Euronext Dublin. The financial statements are prepared in accordance with Financial Reporting Standard ("FRS") 102: 'The financial reporting standard applicable in the UK and Republic of Ireland'. Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Chartered Accountants Ireland and issued by the Financial Reporting Council ("FRC").

The financial statements are prepared on a going concern basis and under the historical cost convention as modified by the revaluation of the financial assets and financial liabilities held at fair value through profit and loss. Valuation time is market close on the relevant dealing day. The dealing day is each business day or such other day as the Directors may determine and notify to the administrator and to the shareholders in advance.

The format and certain wordings of the financial statements have been adapted from those contained in the Companies Act 2014 (as amended) and FRS 102 so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company's business as an investment fund. The Company meets the criteria to avail of the exemption available to certain open-ended investment funds under FRS 102 not to prepare a cash flow statement.

The preparation of financial statements in conformity with FRS 102 requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, such as taxation or going concern assumption are disclosed in the following notes. Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the year ending 31 December 2020 is included in Note 12 and relates to the determination of fair value of financial instruments with significant unobservable inputs.

Financial Assets and Financial Liabilities at Fair Value through Profit or Loss

(i) Classification

The Company has chosen to apply the recognition and measurement provisions of International Financial Reporting Standard 9 "Financial Instruments" ("IFRS 9"), and the disclosure and presentation requirements of FRS 102 to account for all the financial instruments. In accordance with IFRS 9, on initial recognition, the Company classifies financial assets as measured at amortised cost or fair value through profit or loss. A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss: (a) it is held within a business model whose objective is to hold assets to collect contractual cash flows; and (b) its contractual terms give rise on specified dates to cash flows that are SPPI (Solely payments of principal and interest). All other financial assets of the Fund are measured at fair value through profit or loss. The Company has classified its investments as financial assets or financial liabilities at fair value through profit or loss. All derivatives in a receivable position (positive fair value) are included in financial assets at fair value through profit or loss. All derivatives in a payable position (negative fair value) are included in financial liabilities at fair value through profit or loss.

Financial assets that are not at fair value through profit or loss include certain balances due from brokers and accounts receivable which are measured at amortised cost.

Financial liabilities that are not at fair value through profit and loss include certain balances due to brokers and accounts payable which are measured at amortised cost.

(ii) Initial Measurement

Purchases and sales of financial instruments are accounted for at trade date for financial statement purposes. Realised gains and losses on disposals of financial instruments are calculated using the first in first out method. Financial instruments categorised as financial assets at fair value through profit or loss are measured initially at fair value with transaction costs for such instruments being recognised directly in the Profit and Loss Account.

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Financial Assets and Financial Liabilities at Fair Value through Profit or Loss (continued)

(iii) Subsequent Measurement

After initial measurement, the Company measures financial instruments classified as financial assets at fair value through profit or loss, at their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their official quoted market price on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the balance sheet date without any deduction for estimated future selling costs. In accordance with IFRS 9 the Company's securities and other assets are valued at the last traded price as at 31 December 2020 to determine the Net Assets Attributable to Holders of Redeemable Participating Shares ("Net Assets").

However, the Directors may adjust the value of financial assets if it considers such adjustment is required to better reflect the fair value thereof. If a quoted official market price is not available on a recognised stock exchange or from a broker/counterparty, the probable realisation of value shall be calculated with care and in good faith in accordance with the Company's valuation policy. Such probable realisation values may be determined by the Administrator using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions. For more details on valuation policies for all security types please refer to "Fair Value of Investments" section in Note 12. Subsequent changes in the fair value of financial instruments at fair value through the profit or loss are recognised in the Profit and Loss Account.

(iv) Derecognition of Financial Assets and Liabilities

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or when the financial assets are transferred and the transfer qualifies for derecognition in accordance with IFRS 9. The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

Real Estate Investment Trusts

Units or shares in real estate investment trusts will be valued at the latest available Net Asset Value or, if listed or traded on a regulated market, at the last quoted trade price or the mid quotation or, if unavailable or unrepresentative, the latest available Net Asset Value as deemed relevant to the collective investment scheme.

Investment Funds

The fair value of any investment which is a unit of or participation in an investment fund is the latest available unaudited Net Asset Value of such unit or participation. Units or shares in exchange traded funds will be valued at the latest available Net Asset Value, or if listed or traded on a regulated market, at the last quoted trade price.

Term Loans

Certain Portfolios may invest in direct debt instruments which are interests in amounts owed by corporate, governmental, or other borrowers to lenders or lending syndicates. A Portfolio's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties ("Bank Loan"). A Bank Loan is often administered by a bank or other financial institution (the "Lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, a Portfolio has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt by the lender of payments from the borrower. A Portfolio generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Portfolio may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement. When a Portfolio purchases assignments from lenders it acquires direct rights against the borrower of the loan.

FOR THE YEAR ENDED 31 DECEMBER 2020**1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Term Loans (continued)**

The Portfolio may have difficulty trading assignments and participations to third parties. There may be restrictions on transfers and only limited opportunities may exist to sell such securities in secondary markets. As a result, the Portfolio may be unable to sell assignments or participations at the desired time or may be able to sell only at a price less than fair value.

The Portfolio may enter into a loan agreement for a certain committed amount, however the full amount of this commitment may not be drawn down by the borrower. These unfunded commitments represent the remaining obligation of the Portfolio to the borrower. At any point in time, up to the maturity date of issue, the borrower may demand the unfunded portion. The fair value of these unfunded loan commitments and the liability to fund these commitments are not recognised in the Balance Sheet. However, the unrealised gain/(loss) of these commitments are included in Balance Sheet under "Income receivable and other assets."

Participatory Notes

The Portfolios may invest in participatory notes. Participatory notes which are fully paid up and have a zero strike price, exhibit the identical risk and return characteristics as in the case where the Portfolio had acquired the underlying equity directly. Such participatory notes are valued at the last bid price for the underlying equity quoted on the stock exchange or principal market on which it is listed or, if the bid price is unavailable or unrepresentative, the last available mid price on such stock exchange or market.

Asset Backed Securities and Mortgage Backed Securities

Inputs used to value asset backed securities and mortgage backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and other market information, which may include benchmark yields, reported trades, broker-dealer quotes, issuer spreads, benchmark securities, bids, offers, and reference data, such as market research publications, when available.

To Be Announced Securities

The Portfolios may enter into To Be Announced ("TBA") purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Portfolio holds and maintains until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Portfolio may enter into offsetting contracts for the forward sale of other securities that they own. Income on the securities will not be earned until settlement date. Unsettled TBA purchase commitments are valued at the current market price.

The Portfolios may enter into TBA sale commitments to hedge their portfolio positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sales commitments are not received until the contractual settlement date. During the time a TBA sale commitment is outstanding, equivalent deliverable securities or an offsetting TBA purchase commitment deliverable on or before the sale commitment date, are held as "cover" for the transaction. Unsettled TBA sale commitments are valued at current market value, generally according to the procedures described previously in the accounting policies.

Forward Currency Contracts

A forward currency contract is an agreement between two parties to buy and sell a currency at a set price on a future date. The market value of a forward currency contract fluctuates with changes in forward currency exchange rates. Forward currency contracts are marked to market daily and the change in value is recorded by the Portfolio as an unrealised gain or loss. Realised gains or losses equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed are recorded upon delivery or receipt of the currency or, if a forward currency contract is offset by entering into another forward currency contract with the same broker, upon settlement of the net gain or loss.

Futures Contracts

Futures contracts may include certain options on exchange-traded futures contracts. Initial margin deposits are made upon entering into futures contracts and are generally made in cash and cash equivalents. The fair value of futures contracts is based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. Gains or losses on open futures contracts are shown in the Schedule of Investments of each relevant Portfolio and as appropriate, on the Balance Sheet as financial assets/financial liabilities at fair value through profit or loss.

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Swap Contracts

A swap contract is a privately negotiated agreement between a Portfolio and a counterparty to exchange or swap the return generated by one instrument for the return generated by another instrument. Some swap contracts are net settled. When entering into an over-the-counter ("OTC") swap contract and during the term of the transaction, the Portfolio and/or the swap counterparty may post or receive cash or securities as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency. Certain clearinghouses currently offer clearing for limited types of swaps. In a cleared swap transaction, a Portfolio typically enters into the transaction with a financial institution counterparty that is then cleared through a central clearinghouse. Upon acceptance of a swap by a central clearinghouse, the original swap is extinguished and replaced with a swap with the clearinghouse, thereby reducing or eliminating the Portfolio's exposure to the credit risk of the original counterparty. A Portfolio typically will be required to post specified levels of both initial and variation margin with the clearinghouse or at the instruction of the clearinghouse. The daily change in valuation is recorded as a receivable or payable for variation margin and settled in cash with the centrally clearing party.

Interest Rate/Inflation Swaps

A Portfolio may enter into interest rate or inflation swap contracts which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage a Portfolio's exposure to interest rates. Under the terms of both interest rate swaps and inflation swaps, a party agrees to pay the swap counterparty a fixed-rate payment in exchange for the other party paying the Fund a variable-rate payment. Interest rate swap and inflation swap contracts are marked-to-market daily based in some cases on quotations from counterparties and in other cases from pricing services and the change in value, if any is recorded as an unrealised gain or loss. Payments made or received are recorded as part of realised gains and losses. Some interest rate swaps can be considered as forward starting swaps. Accruals on forward starting swaps begin at a future date.

Credit Default Swaps

A credit default swap is a bilateral financial contract under which the protection buyer pays a fee, usually expressed in basis points per annum on the notional amount, in return for a payment by the protection seller contingent on the occurrence of a credit event, such as a bankruptcy, default, or restructuring, with respect to a referenced entity. The credit events and applicable settlement mechanism used to determine the contingent payment are negotiated between the counterparties at the time of trading.

Once the credit event has been declared, the protection buyer has the right to settle the contract. Settlement is usually physical, with the protection buyer having the right to deliver bonds of the reference entity up to the notional amount of the contract. In return, the protection buyer receives the par value of those obligations. Selling protection is the synthetic equivalent of buying a bond or alternative form of debt. Buying protection is the equivalent of synthetically shorting or hedging a bond or other credit exposure. Credit default swap agreements on credit indices involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the reference entities comprising the credit index. A credit index is a list of a basket of credit instruments or exposures designed to be representative of some part of the credit market as a whole. Components of the indices may include, but are not limited to, investment grade securities, high yield securities, asset backed securities, emerging markets, and/or various credit ratings within each sector. Credit indices are traded using credit default swaps with standardised terms including a fixed spread and standard maturity dates. An index credit default swap references all the names in the index, and if there is a default, the credit event is settled based on that name's weight in the index. The composition of the indices change periodically, usually every six months, and for most indices, each name has an equal weight in the index.

The use of credit default swap contracts is restricted to the extent that the benefits to a Portfolio mirror that which could be obtained by direct investment in the underlying instruments and that the swaps do not expose a Portfolio to risks which it would not otherwise assume (other than the exposure to the credit default swap counterparty). The upfront payment received by a Portfolio, as protection seller, is recorded as a liability on the Portfolio's books. An upfront payment made by a Portfolio, as protection buyer, is recorded as an asset on the Portfolio's books. Payments received or paid by a Portfolio are recorded as realised gains or losses. Credit default swaps are valued using a pricing service provider. Where no pricing service provider is available, contracts may be marked-to-market daily based upon quotations received from counterparties or based upon calculations using valuation models and the change, if any, is recorded as an unrealised gain or loss. Payments received or paid as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

Total Return Swaps

A Portfolio may enter into total return and structured swaps in order to trade the return on an index which reflects the general composition of the assets of the Portfolio for a rate of return which will generally be at a fixed rate above or below LIBOR or another index. The rate of return to be paid or received by the Portfolio will be negotiated prior to entering into the swap and will remain fixed throughout the term of the swap.

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Swap Contracts (continued)*Total Return Swaps (continued)*

A Portfolio may enter into total return and structured swaps in order to gain market exposure in circumstances where it is not practical or economical to use direct investments or other forms of derivatives such as futures contracts. Swaps are marked-to-market daily based upon quotations received from counterparties or valued using a pricing service and in other cases based upon calculations using valuation models. The significant assumptions and the formulae behind the calculations used in the valuation models are defined explicitly in the individual term sheets. Generally the total returns are determined by the daily index level or daily price multiplied by a predetermined notional amount and the financing portion is built-in to create an all-in valuation. Changes in valuations, if any, are recorded as unrealised gains or losses. Payments received or made are recorded as realised gains or losses. The Company discloses outstanding total return swap contracts at the year end in the Portfolio of Investments. For the years ended 31 December 2020 and 31 December 2019, the fair value of total return swaps is disclosed in the Schedule of Investments and Balance Sheet as net unrealised gain or loss.

Cross-Currency Swaps

Cross-currency swap agreements involve two parties exchanging two different currencies with an agreement to reverse the exchange at a later date at specified exchange rates. The exchange of currencies at the inception date of the contract takes place at the current spot rate. The re-exchange at maturity may take place at the same exchange rate, a specified rate, or the then current spot rate. Interest payments, if applicable, are made between the parties based on interest rates available in the two currencies at the inception of the contract. The terms of cross currency swap agreements may extend for many years. Cross-currency swaps are usually negotiated with commercial and investment banks. Some cross-currency swaps may not provide for exchanging principal cash flows, but only for exchanging interest cash flows.

Options

Option contracts may include certain options on exchange-traded futures contracts. When a Portfolio writes an option, an amount equal to the premium received by the Portfolio is recorded as a liability and the current fair value of the option written is subsequently adjusted by this amount. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options which expire are treated as realised gains. The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium paid on purchased call options exercised is added to the cost of the securities or foreign currency purchased. Premiums paid for the purchase of options which expire unexercised are treated as realised losses. Exchange traded options are valued at the settlement price determined by the relevant exchange.

Swaptions

When a Portfolio writes a swaption, an amount equal to the premium received by the Portfolio is recorded as a liability and is subsequently adjusted to the current fair value of the swaption written. Premiums received from the written swaptions which expire unexercised are treated by the Portfolio on the expiration dates as realised gains. If a written call swaption is exercised, the premium is added to the proceeds from the sale of the underlying swap in determining the realised gain or loss. If a written put swaption is exercised, the premium reduces the cost basis of the swap purchased. When a Portfolio purchases a swaption, an amount equal to the premium paid by the Portfolio is recorded as an asset and is subsequently adjusted to the current fair value of the swaption purchased. Premiums paid for the purchase of swaptions which expire unexercised are treated on the expiration date as realised losses. If a purchased payer swaption is exercised, the premium is subtracted from the proceeds of the underlying swap in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased receiver swaption is exercised, the premium is added to the cost basis of the floating rate investment that has been swapped. Swaptions are priced either via a pricing vendor or a counterparty pricing source.

Contracts for Differences

Contracts for differences are valued based on the closing market price of the underlying security converted into the base currency of the contract for differences, less any financing charges attributable to each contract which are booked separately. The current market value is shown in the Balance Sheet. On entering a contract for differences, a Portfolio may be required to pledge an amount of cash and/or other assets to the broker which is equal to a certain percentage of the contract amount ('initial margin'). Subsequently, payments known as 'variation margins' are made or received by a Portfolio periodically, depending on the fluctuations in the value of the underlying security. During the period that the contract for differences is open, changes in the value of the contract are recognised as unrealised gains or losses and by marking to market at each valuation date in order to reflect the value of the underlying security. Realised gains or losses at the closure of the contract are equal to the difference between the value of the contract for differences at the time it was opened (including any financial charges) and the value at the time it was closed. Dividends (net of withholding taxes) attributable to open contracts for differences are deemed to be dividends receivable or payable at the end of the year. For the years ended 31 December 2020 and 31 December 2019, the fair value of contracts for differences is disclosed in the Schedule of Investments and Balance Sheet as net unrealised gain or loss.

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously.

Cash and Cash Equivalents

Cash comprises current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held to meet short-term cash commitments rather than for investment or other purposes. Cash and cash equivalent assets are valued at their face value with interest accrued, where applicable, to the valuation point on the relevant dealing day, unless in the opinion of the Directors (in consultation with the Investment Manager and the Administrator) an adjustment should be made to reflect the true value thereof.

Company cash accounts

A number of Company cash accounts are being operated by the Administrator, on behalf of the Company pursuant to the Central Bank of Ireland Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies. These cash accounts, held with Brown Brothers Harriman Trustee Services (Ireland) Limited (the “Depository”) for collection of unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors for the Company are deemed assets of the Company. Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

Due from/to brokers

Margin and collateral cash provided by the Portfolios to a counterparty in relation derivative financial instruments are recorded as Due from brokers in the Balance Sheet. Margin and collateral cash provided by the counterparty to a Portfolio in relation to derivative financial instruments are recorded as Due to brokers in the Balance Sheet. Margin cash is valued at amortised cost plus accrued interest which approximates fair value.

Foreign Currency Translation*Functional and Presentation Currency*

The functional and presentation currency of the Neuberger Berman European High Yield Bond Fund, the Neuberger Berman Corporate Hybrid Bond Fund, the Neuberger Berman Ultra Short Term Euro Bond Fund, the Neuberger Berman Euro Opportunistic Bond Fund, the Neuberger Berman Euro Bond Absolute Return Fund and the Neuberger Berman Macro Opportunities FX Fund is EUR. The functional and presentation currency of the Neuberger Berman China Bond Fund and the Neuberger Berman China A-Share Equity Fund is CNY. The functional and presentation currency of the Neuberger Berman Japan Equity Engagement Fund is JPY. The functional and presentation currency of all other Portfolios is US dollars. The base currency of the majority of net assets in the Company is US dollars and thus US dollars is deemed the most appropriate aggregate currency. For more details please refer to Note 15.

Transactions and Balances

Assets and liabilities, denominated in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the Balance Sheet date. Transactions in currencies other than the functional currency of the Portfolio are translated into the functional currency at the rate of exchange prevailing at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Profit and Loss Account in determining the result for the year.

Proceeds from subscriptions and amounts paid for redemptions of Redeemable Participating Shares in currencies other than the functional currency are translated into the functional currency at the rates prevailing on the dates of the transactions. The Balance Sheet is translated using exchange rates at the year end and the Profit and Loss Account and the Statement of Changes in Net Assets are translated at an average rate over the year.

Income and Expense Recognition

Dividend income is recognised in the Profit and Loss Account on the date upon which the relevant security is listed as “ex-dividend” to the extent that information thereof is reasonably available to the Portfolio. Dividend and interest income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Profit and Loss Account and net of any tax credits. Bank deposit interest is accounted for on a cash basis with other income being accounted for on an accrual basis.

Interest income is recognised in the Profit and Loss Account for all debt instruments classified as financial assets at fair value through profit or loss on an accrual basis.

FOR THE YEAR ENDED 31 DECEMBER 2020**1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Realised Gains and Losses on Investments**

Realised gains and losses on disposals of financial assets at fair value through profit or loss are calculated on a first in first out basis. The associated foreign exchange movement between the date of purchase and the date of sale on the disposal of financial assets at fair value through profit or loss is included in net gain/(loss) on financial assets at fair value through profit or loss. Investment transactions are accounted for on trade date, the date at which the Portfolio commits to purchase or sell the asset.

Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B (1) of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not therefore chargeable to Irish tax on its relevant income or relevant gains. However, Irish tax can arise on the happening of a chargeable event in the Company.

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (i) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company, and
- (ii) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

There were no chargeable events during the year under review.

Capital gains, dividends and interest received (if any, on investments made) by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Finance Act, 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the "equivalent measures". A Company wishing to receive approval must apply in writing to the Revenue Commissioners confirming compliance with the relevant conditions. As at 31 December 2020 the Company had not applied for approval from the Revenue Commission.

The Company has reviewed the tax positions for the open tax years as of 31 December 2020 and has determined that no provision for income tax and/or uncertain tax positions is required in the Company's financial statements.

Uncertainties exist with respect to the interpretation of complex tax regulations and changes in tax laws on foreign withholding tax. Given the wide range of international investments, differences arising between the actual investment income and assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax expense already recorded.

The Company establishes provisions, based on reasonable estimates, for possible consequences of audits by the tax authorities of the respective countries in which it invests. The amounts of such provisions are based on various factors, such as experience of previous tax audits and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective investment's domicile. As the Company assesses the probability for litigation and subsequent cash outflow with respect to taxes as remote, no contingent liability has been recognised.

Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. Any distributions on these shares are recognised in the Profit and Loss Account as Finance Costs. The Redeemable Participating Shares can be put back to the Portfolio on any dealing day for cash equal to a proportionate share of the Portfolio's Net Asset Value. The Redeemable Participating Shares are carried at the redemption amount that is payable at the balance sheet date if the shareholder exercised the right to put the shares back to the Portfolio.

Distribution Policy

The Directors have determined to accumulate all net investment income and net realised capital gains attributable to the Accumulating Classes and therefore do not intend to declare dividends in respect of shares in such classes.

FOR THE YEAR ENDED 31 DECEMBER 2020

1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Distribution Policy (continued)*Source of Distributions*

Pursuant to the Articles, the Directors may declare dividends, in respect of any shares out of net income (including dividend and interest income) and/or the excess of realised and unrealised capital gains over realised and unrealised losses in respect of investments of the Company (collectively "Net Income") and also out of capital. Dividends paid out of capital amount to a return or withdrawal of part of a shareholder's original investment or from any capital gains attributable to that original investment. Such dividends may result in an immediate decrease in the Net Asset Value of the relevant shares.

It is the current intention of the Directors, subject to any de minimis threshold, to declare and pay as a dividend at least 85% of the Net Income attributable to each of the Distributing Classes, other than (i) the (Weekly) Distributing Classes; (ii) the (Monthly) Distributing Classes; (iii) the (CG) Distributing Classes and (iv) such other Distributing Classes in a Portfolio which are specified in the relevant Supplement to pay dividends out of capital and Net Income. However, shareholders should note that the Directors may, in their discretion, decide not to make such declaration and payment in respect of a Distributing Class.

In respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors intend to declare and pay a weekly, monthly or semi-annual dividend, respectively, attributable to the shares of each such class out of a combination of Net Income and capital, so that where Net Income during the relevant period is less than the amount declared, the balance will be paid of the capital represented by the relevant shares, which will enable the classes to distribute regular, set dividends. In the event that the Net Income attributable to the (Weekly) Distributing Classes, the (Monthly) Distributing Classes or the (CG) Distributing Classes exceeds the amount declared during the relevant period, the excess of Net Income over this amount will be retained in a distribution account in respect of the relevant shares and will form part of the dividend payable in respect of the succeeding distribution period. While the foregoing represents the Directors' current intention in respect of the declaration and payment of dividends in respect of the (Weekly) Distributing Classes, the (Monthly) Distributing Classes and the (CG) Distributing Classes, the Directors may in their discretion decide not to make such declaration and payment and there is no guarantee that any such dividends will be paid.

Frequency of Distributions

Under normal circumstances, the Directors intend that dividends in respect of:

- (a) each of the (Weekly) Distributing Classes in all Portfolios shall be declared and paid on or prior to the last business day of each week;
- (b) each of the (Monthly) Distributing Classes in all Portfolios shall be declared on or prior to the last business day of each month and paid within three business days thereafter;
- (c) each of the (CG) Distributing Classes in all Portfolios shall be declared on a semi-annual basis and paid within thirty business days;
- (d) each of the other Distributing Classes of the Neuberger Berman China Equity Fund and the Neuberger Berman China A-Share Equity Fund shall be declared on or prior to the last business day of each month and paid within three business days;
- (e) each of the other Distributing Classes of the Neuberger Berman China Bond Fund, the Neuberger Berman Global Thematic Equity Fund, the Neuberger Berman Ultra Short Term Euro Bond Fund, the Neuberger Berman Euro Opportunistic Bond Fund, the Neuberger Berman Euro Bond Absolute Return Fund shall be declared on a quarterly basis and paid within thirty business days in relation to the Net Income of such Distributing Classes for the previous quarter;
- (f) each of the other Distributing Classes of the Neuberger Berman High Yield Bond Fund, the Neuberger Berman US Real Estate Securities Fund, the Neuberger Berman Short Duration High Yield Bond Fund, the Neuberger Berman Global Bond Fund, the Neuberger Berman Emerging Market Debt - Local Currency Fund, the Neuberger Berman Emerging Market Debt - Hard Currency Fund, the Neuberger Berman Emerging Market Corporate Debt Fund, the Neuberger Berman Short Duration Emerging Market Debt Fund, the Neuberger Berman Emerging Market Debt Blend Fund, the Neuberger Berman European High Yield Bond Fund, the Neuberger Berman Global Real Estate Securities Fund, the Neuberger Berman Corporate Hybrid Bond Fund, the Neuberger Berman Global High Yield Bond Fund, the Neuberger Berman Global Opportunistic Bond Fund, the Neuberger Berman Multi-Asset Income Fund, the Neuberger Berman US Equity Index Putwrite Fund, the Neuberger Berman Global Equity Index Putwrite Fund, the Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund, the Neuberger Berman CLO Income Fund, the Neuberger Berman Global High Yield Sustainable Action Fund, the Neuberger Berman Global Flexible Credit Fund, the Neuberger Berman Global Diversified Income FMP – 2024 and the Neuberger Berman Global Real Estate Securities Fund shall be declared on a quarterly basis and paid within thirty business days;

FOR THE YEAR ENDED 31 DECEMBER 2020**1. SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)****Distribution Policy (continued)***Frequency of Distributions (continued)*

- (g) each of the other Distributing Classes of the Neuberger Berman Strategic Income Fund, the Neuberger Berman Absolute Return Multi Strategy Fund and the Neuberger Berman US Long Short Equity Fund shall be declared on a semi-annual basis and paid within thirty business days;
- (h) each of the other Distributing Classes of the Neuberger Berman US Multi Cap Opportunities Fund, the Neuberger Berman US Small Cap Fund, the Neuberger Berman US Small Cap Intrinsic Value Fund, the Neuberger Berman US Equity Fund, the Neuberger Berman Uncorrelated Strategies Fund shall be declared on an annual basis and paid within thirty business days; and
- (i) each of the other Distributing Classes of all other Portfolios shall be declared on an annual basis and paid within thirty business days in relation to the Net Income of the Distributing Classes for the calendar year ended the previous 31 December.

Subject to income being available for distribution, the Directors may also decide to declare and pay interim dividends in relation to any of the Distributing Classes. All Shares in issue in a Distributing Class on any date on which the Directors determine to declare a dividend in respect of such Distributing Class will be eligible for such dividend.

The Directors reserve the right to change the dividend policy of any class of shares at their discretion on prior notice to shareholders of the relevant class. Any dividend unclaimed after a period of six years from the date of its declaration of such dividend shall be forfeited and shall revert to the relevant Portfolio.

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year.

In line with the Central Bank of Ireland (the "CBI") Guidance paper entitled Umbrella Funds – Cash Accounts Holding Subscription, Redemption and Dividend Monies published in March 2016, one or more Company cash accounts are being operated by the Administrator, on behalf of the Company, in accordance with the requirements of the CBI. Such Company cash accounts are designed to hold unprocessed subscription monies received from investors, redemption monies payable to investors and/or other amounts due to investors. As at 31 December 2020, the amount held in these cash accounts was US\$ 17,253,401 (31 December 2019: US\$ 12,473,598). Any balances held on these cash accounts at the financial year end are reflected on the Aggregate Balance Sheets of the Company.

FOR THE YEAR ENDED 31 DECEMBER 2020**4. BANK OVERDRAFT**

As at 31 December 2020 and 31 December 2019, all bank overdraft balances as disclosed in the Balance Sheet are held with Brown Brothers Harriman & Co.

5. SHARE CAPITAL

The authorised share capital of the Company is 500,000,040,000 shares of no par value divided into 40,000 Subscriber Shares of no par value and 500,000,000,000 Participating Shares of no par value. The Directors are empowered to issue up to 500,000,000,000 shares of no par value in the Company on such terms as they think fit.

The Company is an investment company with variable capital due to its ability to issue and redeem shares on demand. The share capital of the Company is divided into different series of shares with each series of shares representing a separate investment portfolio of assets. The Portfolios manage capital in accordance with the UCITS Regulations and the investment objectives and policies applicable to such Portfolio as specified in the Company's prospectus and the Portfolio's relevant supplement. The Portfolios are not subject to externally imposed capital requirements. While the Portfolios invest in transferable securities and other liquid financial assets, the Investment Manager also employs a risk management framework that features a dedicated risk management team, the Risk Department, which is independent of the Investment Manager's portfolio managers. On a daily basis, the Risk Department monitors liquidity for the Portfolios and incorporates various stress test scenarios, including stress testing to assess each Portfolio's ability to meet shareholder redemptions, and other methods of analysis to oversee expected liquidity levels. The Investment Manager's Investment Risk Committee, the group responsible for risk oversight, also reviews stress test results on at least a quarterly basis. The Investment Manager seeks to ensure that adequate liquidity exists in the Portfolios to provide for shareholder redemptions in normal market conditions and normal levels of redemptions.

There were 2 Subscriber Shares in issue at 31 December 2020 and 31 December 2019. The Subscriber Shares entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate in the profits and assets of the Company.

The Subscriber shareholders are as follows:

Shareholder Name	Nominal Shareholding
Matsack Nominees Limited	1
Neuberger Berman Europe Limited	1

The minimum subscriptions and redemption limits in respect of each Portfolio are contained in the Company's Prospectus.

The capital of the Portfolios is represented by the net assets attributable to holders of redeemable participating shares. The amount of net assets attributable to holders of redeemable participating shares can change significantly on a monthly basis, as the Portfolios are subject to monthly subscriptions and redemptions at the discretion of shareholders.

The Portfolios' objectives for managing capital are:

- To invest the capital in investments meeting the investment objectives, investment policies, risk exposure and expected return indicated in its Prospectus;
- To achieve returns while safeguarding capital by using the investment strategies indicated in its Prospectus;
- To maintain sufficient liquidity to meet the expenses of the Portfolios, and to meet withdrawal requests as they arise; and
- To maintain sufficient size to make the operation of the Portfolios cost-efficient.

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES

In respect to each class of shares, the Investment Manager is entitled to a fee in respect of the investment management services and a fee in respect of the management administration services provided to each Portfolio.

The management administration services fee can charge up to 0.20% per share class, subject to a minimum annual fee of US\$ 75,000 per Portfolio. Currently the management administration services fee being charged for the B, C, C1, C2, T and M share classes is 0.10%. All other share classes are currently being charged at 0.075%. The investment management fee rates for each class are set out below.

The management fees, with the exception of any performance fees, accrues daily and is payable monthly in arrears at the end of each calendar month and the Investment Manager will pay the Sub-Investment Manager and Green Court Capital Management Limited out of its fee and may pay investment advisers appointed in respect of a Portfolio out of its fee. The current management fees payable in respect of each Portfolio are disclosed in the following tables. The Investment Manager is also entitled to recover from the Company all out-of-pocket expenses suffered or incurred by it or its delegates, the distributor or the administrator in the performance of its duties and pays any such expenses recovered to the appropriate service provider.

Where applicable, a discount may be applied to the above fees.

The Investment Manager may waive all or part of its fees in order to cap the Portfolios' Total Expense Ratios ("TERs"). These fee waivers are voluntary and may be discontinued by the Investment Manager at any time without prior notice. Fees voluntarily waived are not subject to recovery by the Investment Manager. A breakdown of the Portfolios' TERs is provided in Appendix I.

The Company pays administration fees to the Administrator based on the value of month-end net assets of Neuberger Berman Uncorrelated Strategies Fund at the following rates:

Assets from US\$ 0 - US\$ 500 million	0.055%
Between US\$ 500 - US\$ 2,000 million	0.05%
Above US\$ 2,000 million	0.04%

The Company pays administration fees to the Administrator based on the value of month-end net assets of each of the remaining Portfolios administered by the Administrator at the following rates:

Assets from US\$ 0 - US\$ 10,000 million	0.010%
Between US\$ 10,000 - US\$ 25,000 million	0.008%
Between US\$ 25,000 - US\$ 50,000 million	0.006%
Above US\$ 50,000 million	0.005%

The above fees are subject to a minimum monthly fee of US\$ 4,000 per Portfolio and inclusive of four share classes per Portfolio. Any Portfolio which has in excess of four share classes will be charged a monthly fee of US\$ 175 per each additional share class.

In addition, the Administrator is entitled to a further fee in respect of transfer agency services provided to the Portfolios.

In respect of the B Shares, C Shares, E Shares, C1 Shares and C2 Shares in each Portfolio the Distributor shall be entitled to a distribution fee at the rate of 1.00% in respect of the distribution services provided to such classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. In respect of all other classes, the Investment Manager may pay the Distributor a fee in respect of its distribution services out of the management fee. In respect of the M Shares in each Portfolio, the Distributor shall be entitled to a distribution fee at an annual rate expressed as a percentage of the Net Asset Value of the relevant Classes in respect of the distribution services provided to such Classes, which shall accrue daily and be payable monthly in arrears at the end of each calendar month. The rate of such distribution fee varies between Portfolios and is disclosed in the Supplement to the Prospectus for each Portfolio.

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Non-Affiliated Sub-Adviser fees

The fees paid to the Non-Affiliated Sub-Advisers appointed by the Investment Manager and/or the Sub-Investment Manager, with the exception of Green Court Capital Management Limited, will be paid out of the assets of the Portfolio. The aggregate fees paid to all advisers were between 0.65% and 1.50% of the Net Asset Value of the Portfolio. The aggregate adviser fee for the year ended 31 December 2020 was US\$ 424,957 (31 December 2019: US\$ 413,284).

Performance Fees

As at the year ended 31 December 2020 a performance fee is being calculated on Neuberger Berman US Long Short Equity Fund, Neuberger Berman Global High Yield Bond Fund and Neuberger Berman Uncorrelated Strategies Fund.

Performance Fee paid to the Investment Manager

The Investment Manager may be entitled to receive a performance fee (the "Performance Fee") payable out of the Portfolio's assets in respect of each PF Class in the relevant Portfolio. The Depositary shall verify the calculation of the Performance Fee. The Directors may, with the consent of the Investment Manager, reduce the Performance Fee payable by any Class of Shares. Performance fees are payable on realised and unrealised capital gains taking into account realised and unrealised losses at the end of the Calculation Period defined below for each applicable Portfolio. Consequently, performance fees may be paid on unrealised gains which may subsequently never be realised.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

If the Investment Management Agreement is terminated before the end of a Calculation Period in any year the performance fee in respect of the then current Calculation Period will be calculated and paid as though the date of termination were the end of the relevant Calculation Period.

The performance fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Investment Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Investment Manager within 30 Business Days of the date of redemption. Crystallised performance fees shall remain in the relevant Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Class.

The methodology used to calculate the Performance Fee for each applicable Portfolio is as follows:

Neuberger Berman US Long Short Equity Fund

The Investment Manager may be entitled to receive a performance fee payable out of the Portfolio's assets in respect of each PF Class in the Portfolio.

Definitions

Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> • in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; • in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>
Crystallisation	<p>The point at which any Performance Fee becomes payable to the Investment Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or exchanges all or part of its Shareholding.</p>
High Water Mark	<p>The greater of: (i) the initial offer price per Share; and (ii) the Net Asset Value per Share at the end of any previous Calculation Period in respect of which a Performance Fee was paid.</p>

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Performance Fee paid to the Investment Manager (continued)

Neuberger Berman US Long Short Equity Fund (continued)

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in the event that the Net Asset Value per Share at the end of the Calculation Period exceeds the High Water Mark for that particular PF Class.

The Performance Fee will be calculated on each Dealing Day and will be equal to 15% of the amount by which the percentage growth in the Net Asset Value per Share over the Calculation Period exceeds that of the High Water Mark. The Performance Fee will be accrued on each Dealing Day and will form part of the Net Asset Value per Share for each PF Class where applicable. Any Performance Fee accrual on a Dealing Day will be superseded by any accrual made on the following Dealing Day up to the last Dealing Day of the Calculation Period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

No Performance Fee will be paid until the Net Asset Value per Share exceeds the High Water Mark and such fee is only payable on the outperformance of the Net Asset Value per Share over the Hurdle Rate as described above.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of the Calculation Period.

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Investment Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued performance fee in respect of those Shares will be payable to the Investment Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

The Directors may, with the consent of the Investment Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

For the year ended 31 December 2020, the Investment Manager earned a performance fee of US\$ 656,302 (31 December 2019: US\$ 468,838).

Neuberger Berman Global High Yield Bond Fund

The Investment Manager may be entitled to receive a performance fee payable out of the Portfolio’s assets in respect of each PF Class in the Portfolio.

Definitions

Benchmark	ICE BofA Global High Yield Constrained Index in relevant class currency (as detailed below)
Calculation Period	<p>The Calculation Period shall normally run from 1 January to 31 December in each year except that:</p> <ul style="list-style-type: none"> in the case of the initial issue of Shares in each PF Class, the first Calculation Period will run from the date of issue to 31 December; in the case of the termination of a PF Class, the Calculation Period will terminate on the date of the termination; and in the case of the termination of the Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination. <p>The first value used in determining the first Performance Fee for a PF Class shall be the Initial Offer Price.</p>

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Performance Fee paid to the Investment Manager (continued)

Neuberger Berman Global High Yield Bond Fund (continued)

Definitions (continued)

Crystallisation	The point at which any performance fee becomes payable to the Investment Manager. Crystallisation will occur either at the end of the Calculation Period or on a Dealing Day on which a Shareholder redeems or converts all or part of its Shareholding.
Outperformance	The excess performance of the Net Asset Value per Share over the performance of the Benchmark during the Calculation Period.

Methodology

For each Calculation Period, a Performance Fee in respect of each PF Class in issue becomes due in respect of any Outperformance, i.e. the excess performance of the Net Asset Value per Share over the performance of the Benchmark applicable to that particular PF Class during the Calculation Period. The Percentage Fee will be calculated on each Dealing Day and will be equal to 20% of the Outperformance applicable to that particular PF Class over the same period.

In all cases the Net Asset Value per Share used in the calculation of the Performance Fee is unswung, i.e. it does not include any adjustment for swing pricing.

In the event that the performance of a PF Class over a Calculation Period is less than that of the Benchmark, no Performance Fee shall be payable in respect of that PF Class until such cumulative underperformance relative to its Benchmark has been recovered.

In the event that the PF Class has achieved Outperformance over a Calculation Period, a Performance Fee shall be payable in respect of that PF Class. Upon payment the Benchmark will be reset, this process ensures the Net Asset Value per Share and the Benchmark start from the same place at the start of the calculation period. Accordingly for the next Calculation Period the commencing Benchmark value will equal the Net Asset Value in respect of the PF Class on which the Performance Fee was paid i.e. if the Net Asset Value were to equal 110 the commencing Benchmark Value would also equal 110.

Benchmark Indices

Classes	Index	Code
USD PF Classes	ICE BofA Global High Yield Constrained Index	HWOC select currency USD
EUR Hedged PF Classes	ICE BofA Global High Yield Constrained Index – EUR Hedged	HWOC select currency EUR
GBP Hedged PF Classes	ICE BofA Global High Yield Constrained Index – GBP Hedged	HWOC select currency GBP

Shareholders should note that, as the Performance Fee is payable on the outperformance over the Benchmark, they may be charged a Performance Fee where the Net Asset Value of their Shares has declined but to a lesser extent than the Benchmark.

Shareholders should note that, as the Performance Fee is calculated at Class level and not at an individual Shareholder level, they may be charged a Performance Fee even where the Net Asset Value of their Shares has remained the same or dropped, for example, where Shareholders purchase or redeem Shares at points other than the start and end of a Calculation Period.

The Performance Fee will be accrued in the Net Asset Value on each Dealing Day and will normally be payable to the Investment Manager in arrears within 30 Business Days of the end of each Calculation Period. However, in the case of Shares redeemed during a Calculation Period, the accrued Performance Fee in respect of those Shares will be payable to the Investment Manager within 30 Business Days of the date of redemption.

Crystallised Performance Fees shall remain in the relevant PF Class (but shall not participate in subsequent gains and losses of the relevant Class) until paid to the Investment Manager and shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant PF Class.

The Depositary shall verify the calculation of the Performance Fee.

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Performance Fee paid to the Investment Manager (continued)

Neuberger Berman Global High Yield Bond Fund (continued)

Benchmark Indices (continued)

The Directors may, with the consent of the Investment Manager, reduce the Performance Fee payable by any PF Class. Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

There were no performance fees paid to the Investment Manager by the Portfolio for the year ended 31 December 2020 and 31 December 2019.

Performance Fee paid to the advisers

Neuberger Berman Uncorrelated Strategies Fund

The advisers appointed by the Investment Manager and/or the Sub-Investment Manager ("Non-Affiliated Sub-Advisers") may be entitled to receive a performance fee (the "Adviser Performance Fee") payable out of the Portfolio's assets and as described more fully below. However, for the avoidance of doubt, no performance fees will be paid to the Investment Manager and the Sub-Investment Manager on any portion of the Portfolio's assets which is managed by the Investment Manager and the Sub-Investment Manager acting in the capacity of an Adviser. All Classes in the Portfolio are PF Classes.

Definitions

Allocated Portion	The part of the Portfolio for which a Non-Affiliated Sub-Adviser is responsible.
Calculation Period	The Calculation Period shall normally run from 1 January to 31 December in each year except that: <ul style="list-style-type: none"> • in the case of the initial appointment of a Non-Affiliated Sub-Adviser, the Calculation Period will run from the date of appointment to 31 December; • in the case of the termination of a Non-Affiliated Sub-Adviser, the Calculation Period will terminate on the date of the termination; and • in the case of the termination of the Investment Management Agreement in any year, the Calculation Period will terminate on the date of the termination.
Crystallisation	The point at which any Adviser Performance Fee becomes payable to the Non-Affiliated Sub-Adviser. Crystallisation in respect of a Non-Affiliated Sub-Adviser will occur either (i) at the end of the Calculation Period; (ii) due to the Investment Manager or the Sub-Investment Manager reducing the capital allocated to the relevant Allocated Portion (iii) termination of the appointment of that Non-Affiliated Sub-Adviser.
High Water Mark	In respect of a Non-Affiliated Sub-Adviser, the greater of: (i) the Net Asset Value of its Allocated Portion at its appointment; and (ii) the value that that Allocated Portion has achieved at the end of any previous Calculation Period in respect of which an Adviser Performance Fee was paid, adjusted for any subscriptions and/or redemptions affecting the Allocated Portion.

Methodology

An Adviser Performance Fee is payable to a Non-Affiliated Sub-Adviser only with respect to the relevant Allocated Portion and only from the time that the Investment Manager or the Sub-Investment Manager appoints that Non-Affiliated Sub-Adviser to manage the Allocated Portion until such time, if ever, that the Non-Affiliated Sub-Adviser ceases to manage the Allocated Portion.

For each Calculation Period in which the net asset value of the Allocated Portion exceeds the High Water Mark, the Adviser Performance Fee payable will be equal to the increase in the Allocated Portion's net asset value above the High Water Mark, multiplied by the relevant Non-Affiliated Sub-Adviser's Adviser Performance Fee rate, as agreed with the Investment Manager and the Sub-Investment Manager, which shall not exceed 20%.

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Performance Fee paid to the advisers (continued)

Neuberger Berman Uncorrelated Strategies Fund (continued)Methodology (continued)

The Adviser Performance Fee will be calculated and accrued daily as at each Valuation Point. The Adviser Performance Fee is calculated on the unswung net asset value of the relevant Allocated Portion, i.e. before any adjustment for swing pricing (for more information on "swing pricing" please see the "Determination of Net Asset Value – Adjustments of Valuations and Swing Pricing" section of the Prospectus).

Portfolio expenses (excluding Management Fees) are allocated pro rata to each Allocated Portion and to the portion of the Portfolio's assets that are not allocated to a Non-Affiliated Sub-Adviser and the Adviser Performance Fee in respect of each Allocated Portion is calculated and paid after the deduction of the portion of such expenses which is attributable to the relevant Allocated Portion.

The Adviser Performance Fee will normally be payable to a Non-Affiliated Sub-Adviser in arrears within 30 Business Days of 31 December each year. However, in the event of the Crystallisation of an Adviser Performance Fee during a Calculation Period, the accrued Adviser Performance Fee in respect of such amounts will be payable within 30 Business Days of the end of the calendar quarter during which the Crystallisation occurred.

Crystallised Adviser Performance Fees shall remain in the Portfolio until paid to the Non-Affiliated Sub-Adviser and shall not participate in subsequent gains and losses of the Allocated Portion. Crystallised Adviser Performance Fees shall not be used or made available to satisfy redemptions or pay any fees and expenses of the relevant Allocated Portion, the Portfolio or the Company (other than Adviser Performance Fees payable to the on-Affiliated Sub-Adviser).

The Depositary shall verify the calculation of any Adviser Performance Fee.

Investors should note that, as the Adviser Performance Fee is calculated and may be payable to a Non-Affiliated Sub-Adviser with respect to the performance of its Allocated Portion and not the performance of the Portfolio as a whole, it is possible that the Portfolio could pay an Adviser Performance Fee to a Non-Affiliated Sub-Adviser in circumstances where the overall performance of the Portfolio as a whole is negative. This could occur where, for example, during a Calculation Period one Non-Affiliated Sub-Adviser's Allocated Portion performs well but the remaining Non-Affiliated Sub-Advisers' Allocated Portions perform negatively and the aggregate total of the negative performance exceeds that of the positive performance of the Non-Affiliated Sub-Adviser receiving the Adviser Performance Fee.

Adviser Performance Fees are payable on realised and unrealised capital gains, which for the avoidance of doubt includes investment income, taking into account realised and unrealised losses at the end of the Calculation Period. Consequently, Adviser Performance Fees may be paid on unrealised gains which may subsequently never be realised.

Non-Affiliated Sub-Advisers may charge research expenses to the Portfolio through the provision of an annual research budget for the Portfolio, as agreed with the Company.

For the year ended 31 December 2020, AllianceBernstein L.P., Alcova Asset Management LLP, Altiq LLP, BH-DG Systematic Trading LLP, P/E Global LLC, Sandbar Asset Management LLP and True Partner Capital USA Holding Inc earned performance fees of US\$ 6,106,001, US\$ 2,398,592, US\$ 4,773,969, US\$ 3,628,165, US\$ 3,902,222, US\$ 4,709,654 and US\$ 2,398,189, respectively.

For the year ended 31 December 2019, Altiq LLP, BH-DG Systematic Trading LLP, P/E Global LLC and Sandbar Asset Management LLP earned performance fees of US\$ 4,061,082, US\$ 1,409,220, US\$ 2,668,945 and US\$ 53,667, respectively.

Depositary Fee

The Company pays the Depositary a fee in respect of trustee services for each Portfolio which shall not exceed 0.02% per annum of the Net Asset Value of the relevant Portfolio and which accrues monthly and is payable monthly in arrears. The Depositary is also entitled to reimbursement by the Company out of the assets of the Portfolio for safekeeping fees, transaction charges and reasonable out-of-pocket expenses ("Custody fees") incurred for the benefit of the Portfolio including the fees (which will not exceed normal commercial rates) and reasonable out-of-pocket expenses of any sub-custodian appointed by the Depositary.

FOR THE YEAR ENDED 31 DECEMBER 2020

6. INVESTMENT MANAGER, ADMINISTRATOR, DISTRIBUTOR AND DEPOSITARY FEES (CONTINUED)

Depositary Fee (continued)

Amounts incurred by the Company during the year relating to management, distribution, administration, depositary and performance are shown below.

	Aggregate 31 December 2020 US\$	Aggregate 31 December 2019 US\$
Management Fee	203,143,467	191,417,062
Distribution Fee	15,149,153	15,868,439
Administration Fee	32,609,707	32,010,320
Custody Fee	4,892,046	5,407,421
Depositary Fee	2,707,595	2,461,123
Performance Fee	28,573,094	8,661,752

The aggregate management fee waiver for the year ended 31 December 2020 was US\$ 7,926,559 (31 December 2019: US\$ 7,929,988). The aggregate advisory fee waiver for the year ended 31 December 2020 was US\$ 246,139 (31 December 2019: US\$ 540,057).

7. DIRECTORS' FEES AND EXPENSES

The Directors are entitled to a fee as remuneration for their services at a rate to be determined from time to time by the Directors provided that the amount of remuneration payable to any Director in any one year in respect of the Company shall not exceed €75,000 (or €85,000, in the case of the chairperson of the Company) or such other amount as the Directors may from time to time determine. The Directors, and any alternate Directors, are also entitled to be paid all travelling, hotel and other expenses properly incurred by them in attending Directors or Shareholders meetings or any other meetings in connection with the business of the Company. All Pay As You Earn ("PAYE") paid on Directors Fees is included within total expenses. None of the Directors entered into a service contract with the Company nor is any such contract proposed and none of the Directors is an executive of the Company.

The aggregate emoluments of the Directors (including expenses) for the year ended 31 December 2020 were US\$ 263,176 in total (31 December 2019: US\$ 213,427) of which US\$ 47,707 was outstanding at the year end (31 December 2019: US\$ 46,499).

As at 31 December 2020, Ms. Michelle Green and Mr. Alex Duncan were employees of the Investment Manager. Ms. Michelle Green and Mr. Alex Duncan voluntarily agreed to waive their entitlement to a fee in relation to their duties as Directors for the year ended 31 December 2020 (31 December 2019: same).

Directors' Fees are reported gross of Income Tax and no Benefit in Kind was earned by the Directors.

8. AUDITORS' REMUNERATION

Ernst & Young, Chartered Accountants remuneration (inclusive of expenses and value added tax ("VAT")) for work carried out for the Company in respect of the financial year is as follows:

		31 December 2020	31 December 2019
Statutory audit fee:	- Ernst & Young (Ireland):	€827,459	€853,251
Other non-audit fees:	- Ernst & Young (Austria):	€150,000	€140,000
	- Ernst & Young (Switzerland):	€141,626	€121,600

FOR THE YEAR ENDED 31 DECEMBER 2020

9. OTHER FEES AND EXPENSES

Transaction costs are the costs incurred in the acquisition, issue or disposal of financial assets and liabilities. Transaction costs include fees and commissions paid to brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs. These costs are accounted for as they are incurred and are recognised as an expense for financial reporting purposes in the Profit and Loss Account.

The Company and the Portfolios also pay certain other costs, charges, fees and expenses incurred in its operation. These may include without limitation; fees and expenses incurred in relation to banking and brokerage in respect of the purchase and sale of Portfolio securities, taxes, insurance, the costs and expenses of maintaining its books of account and of preparing, printing, publishing and distributing (in such languages as may be necessary) prospectuses, supplements, annual and semi-annual reports and other documents or information to current and prospective shareholders (including the costs of electronic transmission techniques to distribute such documents or information), the expense of publishing price and yield information, in relevant media, the costs and expenses of obtaining authorisations or registrations of the Company or of any shares with the regulatory authorities in various jurisdictions, including any levy applied by the Central Bank of Ireland, the cost of listing and maintaining a listing of shares on any stock exchange, marketing and promotional expenses, the cost of convening and holding Directors and Shareholders meetings, the costs of exercising voting rights attached to the Company's investment in the best interest of the Shareholders, professional fees and expenses for legal, auditing and other consulting services, any and all expenses arising in respect of the termination or liquidation of the Company and such other costs and expenses (including non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any Portfolio. In connection with the registration of the Company or the shares for sale in certain jurisdictions, the Company pays the fees and expenses of paying agents, information agents and/or correspondent banks, such payments being made at normal commercial rates.

For financial reporting purposes, organisation expenses are expensed to the Profit and Loss Account as they are incurred. For the purpose of calculating the NAV per share for shareholder dealing, organisation expenses are being amortised over the first two financial years of the lifetime of the Portfolio.

10. RELATED PARTY TRANSACTIONS

Under FRS 102 "Related Party Transactions", parties are related if any one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

12. FINANCIAL INSTRUMENT DISCLOSURES

In pursuing its investment objectives the Company invests in transferable securities with the aim of spreading risk. Investments in equities and fixed income securities expose the Company to varying risks including market, liquidity and credit/counterparty risks. A description of the specific risks and the policies for managing these risks are included below. In addition, consequences of political, social, economic, diplomatic changes, or public health condition may have disruptive effects on market prices or fair valuations of foreign investments. Fair value is determined in accordance with the methodology outlined in the Statement of Significant Accounting Policies. The Schedules of Investments of the Portfolios at the year-end are representative of the type of investments held during the year.

Market Risk

Market risk embodies the potential for both losses and gains and includes price risk, interest rate risk and foreign currency risk.

All security investments present a risk of loss of capital. The Investment Manager moderates this risk through a careful selection of securities and other financial instruments within specified limits. The Company's overall market positions are monitored on a daily basis by the Portfolio's Investment Manager and are reviewed on a quarterly basis by the Board of Directors. The Company's equity and debt securities and trading derivative financial instruments are susceptible to market price risk arising from uncertainties about future prices of the instruments.

(a) Price Risk

Price risk is the risk that the fair values of securities decrease as a result of changes in the levels of the indices and the values of individual securities. The trading price risk exposure arises from the Company's investment portfolios.

The majority of the Company's investments are listed on recognised exchanges or traded on regulated markets as per the Prospectus. As at 31 December 2020 and 31 December 2019, a 10% increase in security prices would have increased the Net Assets and the Changes in Net Assets of each Portfolio as outlined in the table below. An equal change in the opposite direction would have decreased the Net Assets by an equal but opposite amount.

Portfolio	Currency	31 December 2020	% of Net Assets	31 December 2019	% of Net Assets

Other price risk is the risk that the value of the instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual instrument, its issuer or all factors affecting all instruments traded in the market. As the majority of the Company's financial instruments are carried at fair value with fair value changes recognised in the Profit and Loss Account changes in market conditions will directly affect Net Gain/(Loss) on Financial Assets and Liabilities at Fair Value through Profit or Loss.

Price risk is managed by the Investment Manager by investing in a diversified range of securities in different markets.

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(b) Foreign Currency Risk

The Net Asset Value per share of a Portfolio will be computed in the base currency of the relevant Portfolio, whereas the investments held for the account of that Portfolio may be acquired in other currencies. The base currency value of the investments of a Portfolio designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. Positions are monitored on a daily basis and hedging strategies are used to ensure positions are maintained within established limits.

At 31 December 2020 and 31 December 2019, had the base currency of the relevant Portfolio strengthened by 5% in relation to all currencies, with all other variables held constant, Net Assets and the Change in Net Assets per the Profit and Loss Account would have (decreased)/increased as outlined in the table below.

Portfolio	Currency	31 December 2020	% of Net Assets	31 December 2019	% of Net Assets

* Portfolio liquidated during the current or prior reporting year.

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year.

A 5% weakening of the base currency of the relevant Portfolio against the above currencies would have resulted in an equal but opposite effect on the above financial statement amounts to the amounts shown above, on the basis that all other variables remain constant. The foreign currency risk exposure has been calculated on the Net Assets of the Portfolio that are denominated in a currency which is not the base currency of the relevant Portfolio. The Investment Manager deems 5% to be a reasonable rate for foreign currency shift.

FOR THE YEAR ENDED 31 DECEMBER 2020

² Portfolio launched during the current reporting year.

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

(c) Interest Rate Risk

The Portfolios may hold investments in fixed interest bearing securities. Any change to the interest rate for particular securities may result in income either increasing or decreasing. Prices of securities held will be impacted by domestic rates of interest. The Portfolio's performance therefore will depend in part on its ability to anticipate and respond to such fluctuations in market interest rates. The Investment Managers and Sub-Investment Managers manage this risk by way of duration and yield curve analysis to establish and monitor duration positioning and yield curve structure.

The Company has forty-seven Portfolios as at the year ended 31 December 2020. Of the Portfolios, seventeen are Portfolios where the majority of the assets and liabilities of the Portfolio is invested in equity securities and are non-interest bearing. As a result, these Portfolios are not subject to significant amounts of risk due to fluctuations in the prevailing level of market interest rates.

At year end, the Portfolios set out in the table below invested primarily in fixed income instruments and are therefore exposed to the effects of fluctuations in the prevailing level of market interest rates on their respective financial position and cash flows.

Based on the Portfolios' compositions as at 31 December 2020 and 31 December 2019, had interest rates fallen by 0.50% with all other variables held constant, it is estimated that Net Assets and the Change in Net Assets per the Profit and Loss Account would have decreased by approximately the values outlined in the table below. A 0.50% rise in rates would have resulted in an equal but opposite effect.

Portfolio	Currency	31 December 2020	% of Net Assets	31 December 2019	% of Net Assets

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year.

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**(d) Credit/Counterparty Risk**

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Company. It is the Company's policy to enter into financial instruments with a diversity of creditworthy counterparties. Therefore, the Company does not expect to incur material credit losses on its financial instruments. The Investment Manager performs assessments of the credit quality of trading counterparties used by the Company. This assessment includes, at minimum, an initial and annual credit review based on financial and/or third-party ratings data. Counterparties used for forwards and other OTC derivatives are subject to heightened monitoring, which includes in-depth credit reviews considering third-party ratings and/or factors such as capital adequacy, asset quality, management quality, earnings, and liquidity. The Investment Manager also follows news regarding the financial sector to monitor industry trends as well as events that may directly impact specific counterparties.

The Company's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that counterparties fail to perform their obligations as at 31 December 2020 in relation to each class of recognised financial assets, other than derivatives, is the carrying amount of those assets as indicated in the Balance Sheet.

Transactions involving derivative financial instruments are usually with counterparties with whom the Portfolio has signed master netting agreements. Master netting agreements provide for the net settlement of contracts with the same counterparty in the event of default. The credit risk associated with derivative financial assets subject to a master netting arrangement is eliminated only to the extent that financial liabilities due to the same counterparty will be settled after the assets are realised. Risk is also managed by collateral being immediately available to the Company without recourse to counterparty in the event of default of counterparty.

Portfolios participating in Securities Lending Agreements are also open to counterparty risk. To minimise such risk, collateral in form of cash and/or highly-rated government debt is held, that is at least equivalent to 102% of the value of the lent securities. In accordance with the UCITS Regulations, collateral accepted for securities lending transactions must be transferred to the Depository of the Company and must be immediately available to the Portfolios, without recourse to the counterparty, in the event of a default by that entity. While it is intended that the value of the collateral received will be equal to or exceed the value of securities loaned at all times, in the event of a sudden upward market movement, there is a risk that the value of the collateral may fall below the value of the securities transferred. Please refer to Concentration Data in Appendix IV for detailed list of counterparties across securities lending transactions as at 31 December 2020.

Cash held via accounts opened on the books of Brown Brothers Harriman & Co. ("BBH") are obligations of BBH while cash held in accounts opened directly on the books of a third party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. Cash held via agency cash accounts are liabilities of the agent, creating a debtor/creditor relationship directly between the agent and the Company. Accordingly, while BBH is responsible for exercising reasonable care in the administration of such agency cash accounts where it has appointed the agent (i.e., in the case of cash correspondent banks and sub-custodians), it is not liable for their repayment in the event the agent, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment. As at 31 December 2020, all cash and bank balances held on overnight deposit were with third party institutions, as outlined in Note 3. Cash and Cash Equivalents, that have a long term credit rating which is investment grade as issued by Standard & Poor's (31 December 2019: same). BBH has a long term credit rating of A+ (31 December 2019: A+) as issued by Fitch.

The Depository must ensure that there is legal separation of non-cash assets held in custody, that such assets are held on a fiduciary basis, and that appropriate internal control systems are maintained such that records clearly identify the nature and amount of all assets under custody. As Depository, Brown Brothers Harriman Trustee Services (Ireland) Limited ("BBHTS") must ensure the ownership of each asset and the location of documents of title for each asset.

The key risk for the Company remains Credit Risk i.e. that the Investment Manager buys a loan or bond of a particular issuer and it does not perform as expected and either defaults on a payment or experiences a significant drop in the secondary market value.

To mitigate this risk, the Investment Manager carries out independent due diligence on each borrower, and has a focus on stable, performing credits that evidence strong track records through previous economic cycles. Additionally, the size of an issuer is also considered and the Investment Manager continues to favour the larger issuers in the market, defined by having debt issuance greater than \$500m. These issuers tend to have broader syndicates, which can aid liquidity in the secondary market. As well as screening out the smaller issuers the Investment Manager also excludes highly cyclical industries and companies with limited earning visibility from its Investment Process.

Once a particular investment has been made, the Investment Manager monitors it. A range of relevant data is reviewed on an ongoing basis for each investment, including, but not limited to, key financial drivers, commodity prices, stock prices, regulatory developments, financial results, press releases and management commentary to identify any indicators of credit deterioration.

FOR THE YEAR ENDED 31 DECEMBER 2020
12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)
(d) Credit/Counterparty Risk (continued)

To manage this risk further, the Board ensures that the Investment Manager operates in accordance with the investment limits and restrictions policy determined by the Board. The Directors monitor the implementation and results of the investment process with the Investment Manager at each Board meeting and monitor risk factors in respect of each Portfolio.

The securities that BBH holds in custody include equities, fixed income securities, participatory notes, asset backed securities and REITS. All securities that BBH holds in custody (as global sub-custodian for and on behalf of BBHTS for further benefit of its underlying clients) are segregated from BBH's own assets, whether they are held in BBH's vault, in segregated accounts on the books of their sub-custodians, or in an account maintained at a central securities depository. BBH maintains segregated accounts per client on its own books as well as on the books of the sub-custodian in the local market, where this is possible. As Depository, BBHTS must also ensure non-cash assets are held on a fiduciary basis through BBH's network of global sub-custodians.

BBH's sub-custodians are required by contract with BBH and generally by operation of law to segregate the securities of custody clients from the general banking assets of the sub-custodian.

BBH performs both initial and ongoing due diligence reviews on the sub-custodians within its global custody network through its Network Management Group. Such reviews include an assessment of service level standards, management expertise, market information, custody operations, reporting and technology capabilities at the sub-custodian, as well as reviews in relation to their reputation and standing in the market and their ongoing commitment to providing custody services.

Service level agreements are put in place with each sub-custodian, as well as the usual contractual arrangements, and these are reviewed on a regular basis through service review meetings, including on-site due diligence meetings.

Regular financial analysis of all sub-custodians is carried out by BBH's Risk and Credit Group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing.

The Investment Manager monitors the Company's risk in accordance with UCITS guidelines and reports to the Board of Directors on a periodic basis.

The Company invests in debt instruments that may receive a credit rating from a well-known rating agency. The credit ratings in the tables below are calculated as a percentage of fixed income securities, where there is a significant proportion of that Portfolio held as fixed income. A debt instrument is considered Investment Grade by Standard & Poor's and Fitch if its credit rating is BBB- or higher and by Moody's if its credit rating is Baa3 or higher. As at 31 December 2020 and 31 December 2019 the exposures by credit rating for each applicable Portfolio were as follows:

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**(e) Liquidity Risk**

The main liquidity risks of the Company are associated with the need to satisfy Shareholders' requests for redemptions. The Company is exposed to daily cash redemptions of Redeemable Participating Shares. Redeemable Participating Shares are redeemed on demand at the holder's option based on the relevant Portfolio's Net Asset Value per Share at the time of redemption. This risk is mitigated by the Company primarily investing in securities listed or traded on the recognised markets in OECD member states and other countries thus assets comprise principally of realisable securities, which can be readily sold. Additionally, if there are any collateral arrangements in place with a counterparty, this will limit the extent to which liabilities may be extended to the Company. Moreover, as outlined in Note 19, committed liquidity facility is available to the Company.

Financial Liabilities

The maturity grouping is based on the remaining period from the end of the reporting period to the contractual maturity date. When the counterparty has a choice of when the amount is paid, the liability is allocated to the earliest on which the Company can be required to pay.

As at 31 December 2020 and 31 December 2019, the vast majority of liabilities of all Portfolios were payable in one month. Please refer to Schedules for Investments for details of maturity dates of derivative financial liabilities. Liabilities other than derivative financial liabilities are due within one month.

(f) LIBOR Replacement Risk

Many financial instruments use or may use a floating rate based on LIBOR, the offered rate at which major international banks can obtain wholesale, unsecured funding. LIBOR may be a significant factor in determining the Portfolio's payment obligations under a derivative investment, the cost of financing to the Portfolio or an investment's value or return to the Portfolio, and may be used in other ways that affect the Portfolio's investment performance. In July 2017, the United Kingdom's Financial Conduct Authority announced a desire to phase out the use of LIBOR by the end of 2021. Various financial industry groups have begun planning for that transition, but there are obstacles to converting certain securities and transactions to a new benchmark, and neither the effect of the transition process nor its ultimate success can yet be known. The transition process might lead to increased volatility and illiquidity in markets for instruments whose terms currently include LIBOR. It could also lead to a reduction in the value of some LIBOR-based investments and reduce the effectiveness of new hedges placed against existing LIBOR-based investments. Not all LIBOR-based instruments have provisions that contemplate a scenario where LIBOR is no longer available, and there may be significant uncertainty regarding the effectiveness of any such provisions, resulting in prolonged adverse market conditions for the Portfolio. Since the usefulness of LIBOR as a benchmark could deteriorate during the transition period, these effects could occur prior to the end of 2021. There also remains uncertainty and risk regarding the willingness and ability of issuers to include enhanced provisions in new and existing contracts or instruments. All of the aforementioned may adversely affect the Portfolio's performance or net asset value.

Fair Value of Investments

FRS 102 Section 11.27 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The three levels of the fair value hierarchy under FRS 102 are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical unrestricted assets or liabilities;

Level 2 – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices);

Level 3 – Inputs for the asset or liability that are not based on observable market data (unobservable inputs). Pricing inputs are unobservable for the investment and include situations where there is little, if any market activity for the instrument. The inputs into the determination of fair value require significant management judgement, estimation or estimation. As observable prices are not available for these securities, the Portfolios would have used valuation techniques to derive the fair value if applicable.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. For example, if a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measure is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement in considering the factors specific to the asset or liability.

The determination of what constitutes "observable" requires judgement by the Directors in consultation with the Investment Manager.

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)

Fair Value of Investments (continued)

The value of the Portfolios' investments in equity securities, for which market quotations are readily available, is generally determined by obtaining valuations from independent pricing services based on the latest sale price quoted on a principal exchange or market for that security (Level 1 inputs). Securities traded primarily on the NASDAQ Stock Market are normally valued at the NASDAQ Official Closing Price ("NOCP") provided by NASDAQ each business day. The NOCP is the most recently reported price as of 4:00:02 p.m., Eastern Time, unless that price is outside the range of the "inside" bid and asked prices (i.e., the bid and asked prices that dealers quote to each other when trading for their own accounts); in that case, NASDAQ will adjust the price to equal the inside bid or asked price, whichever is closer. Because of delays in reporting trades, the NOCP may not be based on the price of the last trade to occur before the market closes. If there is no sale of a security on a particular day, the independent pricing services may value the security based on market quotations.

The value of participatory notes is determined by obtaining valuations from independent pricing services based on the underlying equity security and applicable exchange rate (Level 1 inputs).

The value of the Portfolios' investments in debt securities is determined primarily by obtaining valuations from independent pricing services based on readily available mid quotations, or if quotations are not available, by methods which include various considerations based on security type (generally Level 2 inputs). If there is more than one quote security available, security is classified as Level 2. In addition to the consideration of yields or prices of securities of comparable quality, coupon, maturity and type, indications as to values from dealers, and general market conditions, the following is a description of other Level 2 inputs and related valuation techniques used by independent pricing services to value certain types of debt securities held by the Portfolios:

Corporate Bonds. Inputs used to value corporate debt securities generally include relative credit information, observed market movements, sector news, US Treasury yield curve or relevant benchmark curve, and other market information, which may include benchmark yield curves, reported trades, broker-dealer quotes, issuer spreads, comparable securities, and reference data, such as market research publications, when available ("Other Market Information").

Convertible Bonds. Inputs used to value convertible bonds generally include underlying stock data, conversion premiums, listed bond and preferred stock prices and Other Market Information, which may include benchmark curves, trade execution data, and sensitivity analysis, when available.

U.S. Treasury Obligations. Inputs used to value U.S. Treasury securities generally include quotes from several inter-dealer brokers and Other Market Information.

U.S. Government Agency Securities. Inputs used to value U.S. Government Agency securities generally include obtaining benchmark quotes and Other Market Information.

Asset-Backed Securities and Mortgage-Backed Securities. Inputs used to value asset-backed securities and mortgage-backed securities generally include models that consider a number of factors, which may include the following: prepayment speeds, cash flows, spread adjustments and Other Market Information.

High Yield Securities. Inputs used to value high yield securities generally include a number of observations of equity and credit default swap curves related to the issuer and Other Market Information.

Emerging Markets Debt and Foreign Government Securities. Inputs used to value emerging markets debt and foreign government securities generally include dealer quotes, bond market activity, discounted cash flow models, and other relevant information such as credit spreads, benchmark curves and Other Market Information.

The value of term loans is determined primarily by obtaining valuations from independent pricing services based on broker quotes (generally Level 2 or Level 3 inputs depending on the number of quotes available).

The value of futures contracts is determined by obtaining valuations from independent pricing services at the settlement price at the market close (Level 1 inputs).

The value of forward foreign currency contracts is determined by obtaining valuations from independent pricing services based on actual traded currency rates on independent pricing services' networks, along with other traded and quoted currency rates provided to the pricing services by leading market participants (Level 2 inputs).

The value of credit default swaps is determined by obtaining valuations from independent pricing services using a model that considers a number of factors, which may include default probabilities, credit curves, recovery rates and cash flows (Level 2 inputs).

The value of inflation swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying inflation rates including forward inflation expectation rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying forward inflation curve and reference rate (Level 2 inputs).

FOR THE YEAR ENDED 31 DECEMBER 2020

12. FINANCIAL INSTRUMENT DISCLOSURES (CONTINUED)**Fair Value of Investments (continued)**

The value of interest rate swaps is determined primarily by obtaining valuations from independent pricing services based on references to the underlying rates including the local overnight index swap rate and the respective interbank offered forward rate to produce the daily price. The present value is calculated based off of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of total return swaps is determined by obtaining valuations from independent pricing services using the underlying asset and stated benchmark interest rate (Level 2 inputs).

The value of cross currency swaps is determined by obtaining valuations from independent pricing services based on present value of expected cash flows based on swap parameters along with reference to the underlying yield curve and reference rate (Level 2 inputs).

The value of contracts for difference ("CFD") is determined primarily by obtaining valuations from independent pricing services, which are based on references to the underlying asset and the stated reference rate (Level 2 inputs).

Option contracts that are traded over-the-counter are generally valued on the basis of quotations provided by broker dealers or prices provided by independent pricing services who use a series of techniques including simulated pricing models and/or curve fitting (bootstrapping), which aids in determining the present value of the contracts. The pricing models use inputs that are observed from actively quoted markets such as issuer details, indices, spreads, interest rates, yield curves, credit curves, volatility surfaces, and exchange rates (Level 2 inputs).

The Investment Manager has developed a process to periodically review information provided by independent pricing services for all types of securities.

Investments in non-exchange traded investment companies are valued using the respective fund's daily calculated net asset value ("NAV") per share (Level 2 inputs).

If a valuation is not available from an independent pricing service, or if the Investment Manager has reason to believe that the valuation received does not represent the amount a Portfolio might reasonably expect to receive on a current sale in an orderly transaction, the Investment Manager seeks to obtain quotations from brokers or dealers (generally considered Level 2 or Level inputs depending on the number of quotes available). If such quotations are not readily available, the security is valued using methods the Board of Directors has approved in the good-faith belief that the resulting valuation will reflect the fair value of the security.

Inputs and assumptions considered in determining the fair value of a security based on Level 2 or Level 3 inputs may include, but are not limited to, the type of the security; the initial cost of the security; the existence of any contractual restrictions on the security's disposition; the price and extent of public trading in similar securities of the issuer or of comparable companies; quotations or evaluated prices from broker-dealers and/or pricing services; information obtained from the issuer and/or analysts; an analysis of the company's or issuer's financial statements; an evaluation of the inputs that influence the issuer and the market(s) in which the security is purchased and sold.

The value of the Portfolios' investments in foreign securities is generally determined using the same valuation methods and inputs as other Portfolio investments, as discussed above. Foreign security prices expressed in local currency values are normally translated from the local currency into US dollars using the exchange rates as of 4:00 p.m., Eastern Time on days the New York Stock Exchange ("NYSE") is open for business. The Board of Directors has approved the use of ICE Data Pricing & Reference Data LLC ("ICE") to assist in determining the fair value of foreign equity securities when changes in the value of a certain index suggest that the closing prices on the foreign exchanges may no longer represent the amount that a Portfolio could expect to receive for those securities or on days when foreign markets are closed and US markets are open. In each of these events, ICE will provide adjusted prices for certain foreign equity securities using a statistical analysis of historical correlations of multiple factors (Level 2 inputs). The Board of Directors has also approved the use of ICE to evaluate the prices of foreign debt securities as of the time as of which a Portfolio's share price is calculated. ICE utilizes benchmark spread and yield curves and evaluates available market activity from the local close to the time as of which a Portfolio's share price is calculated (Level 2 inputs) to assist in determining prices for certain foreign debt securities. In the case of both foreign equity and foreign debt securities, in the absence of precise information about the market values of these foreign securities as of the time as of which a Portfolio's share price is calculated, the Board of Directors has determined on the basis of available data that prices adjusted or evaluated in this way are likely to be closer to the prices a Fund could realize on a current sale than are the prices of those securities established at the close of the foreign markets in which the securities primarily trade.

Fair value prices are necessarily estimates, and there is no assurance that such a price will be at or close to the price at which the security is next quoted or next trades.

Neuberger Berman China A-Share Equity Fund	US\$ 1 = CNY 6.53980	N/A	US\$ 1 = CNY 6.72640	N/A

A notional currency adjustment of US\$ 222,422,169 (31 December 2019: US\$ (16,082,261)) arose from the translation of the opening Net Assets, the Profit and Loss Accounts and the Statements of Changes in Net Assets Attributable to Redeemable Participating Shares. The method of translation has no effect on the value of the net assets attributable to the individual Portfolios.

FOR THE YEAR ENDED 31 DECEMBER 2020**16. SOFT COMMISSIONS ARRANGEMENTS**

The Investment Manager and connected persons have entered into soft commission arrangements with brokers in respect of research products in limited instances, subject to its receiving best execution to support the investment decision process.

The types of research received includes all standard forms of research, including but not limited to current and historical data concerning particular companies, industries and the financial economy as a whole, as well as information and opportunities, risks and trends, and analysis involving special situations. The Investment Manager considers these arrangements are to the benefit of the Portfolios and has satisfied itself that it obtains best execution on behalf of the Portfolios.

17. SEGREGATED LIABILITY

The Company has multiple Portfolios and further Portfolios may be created in the future. With the approval of the Company's Shareholders, by way of a special resolution passed on 3 November 2006, the Company adopted segregated liability between its Portfolios. As at that date, each Portfolio bears its own liabilities and none of the Company, any of the service providers appointed to the Company, the Directors, any receiver, examiner, liquidator nor will any other person have access to the assets of a Portfolio in satisfaction of a liability of any other Portfolio.

18. EFFICIENT PORTFOLIO MANAGEMENT

The Company may employ techniques and instruments relating to transferable securities and/or other financial instruments including financial derivative instruments under the conditions and within the limits laid down by the Central Bank, provided that such instruments are used for efficient portfolio management purposes (i.e. hedging, reducing risks or cost, or increasing capital or income returns) or investment purposes. Techniques and instruments utilised may only be used in accordance with the investment objectives of the relevant Portfolio.

At the discretion of the Investment Manager, each Portfolio may enter into securities lending transactions ("Securities Lending Agreements"), subject to the conditions and limits set out in the Central Bank UCITS Regulations, in respect of each of the types of assets in which the Portfolio may invest, as described in the "Instruments/Asset Classes" section of the relevant Supplement for the Portfolio. Any such securities lending transactions may be used for efficient portfolio management purposes.

Securities Lending Agreements are transactions through which a Portfolio lends its securities to another party, the borrower, which is contractually obliged to return equivalent securities at the end of an agreed period. While securities are on loan, the borrower pays the Portfolio (i) a loan fee and (ii) any income from the securities.

The Company will receive, for each Portfolio that participates in Securities Lending Agreements, collateral that is at least equivalent to 102% of the value of the lent securities. Portfolios may only enter into Securities Lending Agreements under which (i) they are entitled at all times to request the return of the securities lent or to terminate any securities lending transactions and (ii) the transactions do not jeopardise the management of the Portfolio's assets in accordance with its investment policy. Unless otherwise specified in the relevant Supplement, the maximum proportion of a Portfolio's Net Asset Value that can be subject to Securities Lending Agreements is 50% and the expected proportion of a Portfolio's Net Asset Value that will be subject to Securities Lending Agreements is 0-10%.

The Company has appointed Brown Brothers Harriman & Co. (the "Lending Agent") to carry out the Securities Lending Agreements, notably the selection of counterparties, subject to the Company's pre-approval, and the management of the collateral. Portfolios entering into Securities Lending Agreements will receive all revenue generated from the Securities Lending Agreements, net of direct and indirect operational costs, which will represent 90% of the total revenue generated. The remaining 10% will be paid to the Lending Agent in consideration of the direct and indirect operational costs of the provision of its services and the guaranty that it provides. Securities lending income earned by the Portfolios during the period is disclosed separately in the Profit and Loss Account.

FOR THE YEAR ENDED 31 DECEMBER 2020
18. EFFICIENT PORTFOLIO MANAGEMENT (CONTINUED)

As of 31 December 2020, the value of outstanding securities on loan and the value of collateral in the form of securities recorded by the Portfolios were as follows:

Portfolio	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral held
Neuberger Berman High Yield Bond Fund	USD	37,270,102	39,133,625	105%
Neuberger Berman Emerging Markets Equity Fund	USD	163,645	171,827	105%

Neuberger Berman Short Duration Emerging Market Debt Fund	USD	18,208,969	19,119,480	105%
Neuberger Berman US Long Short Equity Fund	USD	650,950	683,499	105%
Neuberger Berman Emerging Market Debt Blend Fund	USD	2,409,370	2,529,851	105%
Neuberger Berman European High Yield Bond Fund	EUR	202,225	212,336	105%
Neuberger Berman Asian Debt - Hard Currency Fund	USD	281,546	295,623	105%
Neuberger Berman China Bond Fund	CNY	10,476,092	10,999,945	105%
Neuberger Berman Global High Yield Bond Fund	USD	345,759	363,047	105%
Neuberger Berman Global Flexible Credit Fund	USD	1,464,506	1,537,750	105%

During the year ended 31 December 2020, the Company did not engage in any repurchase trading.

During the year ended 31 December 2019, the Company did not engage in any securities lending or repurchase trading.

19. LOAN FACILITY

At the board meeting dated 20 June 2016, arrangements have been made with The Bank of Tokyo Mitsubishi UFJ Ltd, together with a syndicate of other banks (collectively the "Lenders") to make available a committed liquidity facility, up to a maximum amount of US\$ 500,000,000 (the "Facility"), to the Company in respect of the Portfolios from the date of the execution of a credit agreement with the Bank and the proceeds of the Facility could only be used for temporary or emergency liquidity needs of the Portfolios. From 4 October 2018, the maximum amount of the committed liquidity facility has been increased from US\$ 500,000,000 to US\$ 600,000,000. On 27 March 2020, the maximum amount of the committed liquidity facility has been increased from US\$ 600,000,000 to US\$ 975,000,000. On 1 October 2020, the maximum amount of the committed liquidity facility has been decreased from US\$ 975,000,000 to US\$ 750,000,000. The cost of the commitment fee has changed accordingly.

There were no loans outstanding under the Facility at 31 December 2020 and 31 December 2019. During the year ended 31 December 2020 and 31 December 2019, none of the Portfolios utilised the loan facility.

The Facility was renewed on 1 October 2020 for the period of 364 days.

Commitments

As of 31 December 2020, the Company had the following unfunded loan commitments:

Portfolio Name	Security Name	Unfunded Commitment USD	Fair Value USD
Neuberger Berman High Yield Bond Fund	Service Logic Acquisition Inc	1,415,761	1,417,531
Neuberger Berman Short Duration High Yield Bond Fund	Service Logic Acquisition Inc	369,836	370,298
Neuberger Berman Strategic Income Fund	Hertz Corp	357,887	367,805
Neuberger Berman Strategic Income Fund	Pro Mach Group Inc	94,123	97,770

FOR THE YEAR ENDED 31 DECEMBER 2020**20. SIGNIFICANT EVENTS DURING THE YEAR**

With effect from 6 January 2020, Academy Investment Management LLC ceased acting as a Non-Affiliated Sub-Adviser of the Company.

Neuberger Berman Global High Yield Sustainable Action Fund launched on 21 January 2020.

A new Prospectus and Supplements to the Prospectus were noted by the Central Bank on 28 February 2020.

A new Supplement to the Prospectus was noted by the Central Bank on 2 March 2020 covering name changes for Neuberger Berman Emerging Market Debt Blend Investment Grade Fund, Neuberger Berman Multi-Asset Class Income Fund and Neuberger Berman Multi-Asset Class Growth Fund to Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund, Neuberger Berman Multi-Asset Income Fund and Neuberger Berman Multi-Asset Growth Fund, respectively.

A new Supplement to the Prospectus was noted by the Central Bank on 9 March 2020 covering the establishment of Neuberger Berman Fixed Maturity Bond I 2024 Fund and Neuberger Berman Global High Income FMB - 2024. The Funds were later renamed as Neuberger Berman Global Flexible Credit Fund and Neuberger Berman Global Diversified Income FMB - 2024, respectively.

The outbreak of the novel coronavirus in many countries, has, among other things, disrupted global travel and supply chains, and has adversely impacted global commercial activity, the transportation industry and commodity prices in the energy sector. The impact of this virus has negatively affected and may continue to affect the economies of many nations, individual companies and the global securities and commodities markets, including liquidity and volatility. The development and fluidity of this situation precludes any prediction as to its ultimate impact, which may have a continued adverse effect on global economic and market conditions. Such conditions (which may be across industries, sectors or geographies) have impacted and may continue to impact the issuers of the securities held by the Portfolios.

The Portfolios entered into a Securities Lending Agreement with Brown Brothers Harriman & Co. on 3 March 2020.

With effect from 4 March 2020, Sound Point Capital Management, L.P. ceased acting as a Non-Affiliated Sub-Adviser of the Company.

A new Supplement to the Prospectus was noted by the Central Bank on 23 March 2020 covering the establishment of Neuberger Berman 5G Connectivity Fund, which launched on 8 April 2020.

On 27 March 2020, the maximum amount of the committed liquidity facility had been increased from US\$ 600,000,000 to US\$ 975,000,000. The cost of the commitment fee had increased accordingly. On 1 October 2020 the maximum amount of the committed liquidity facility was decreased from US\$ 975,000,000 to US\$ 750,000,000. The cost of the commitment fee was changed accordingly.

Neuberger Berman Multi-Asset Growth Fund liquidated on 7 May 2020.

With effect from 12 May 2020, Neuberger Berman Alternatives Advisers LLC was appointed as a Sub-Investment Manager of the Company.

Neuberger Berman Japan Equity Engagement Fund launched on 12 May 2020.

Neuberger Berman Global Equity Fund liquidated on 15 May 2020.

With effect from 18 May 2020, Sabre Fund Management Limited ceased acting as a Non-Affiliated Sub-Adviser of the Company.

With effect from 22 May 2020, Trium Capital LLC was appointed as a Non-Affiliated Sub-Adviser of the Company.

A new Prospectus and Supplements to the Prospectus were noted by the Central Bank on 22 May 2020.

With effect from 28 May 2020, Crabel Capital Management, LLC was appointed as a Non-Affiliated Sub-Adviser of the Company.

Neuberger Berman Global Flexible Credit Fund launched on 1 June 2020.

Neuberger Berman Global Diversified Income FMP – 2024 launched on 22 June 2020.

FOR THE YEAR ENDED 31 DECEMBER 2020

20. SIGNIFICANT EVENTS DURING THE YEAR (CONTINUED)

Neuberger Berman China A-Share Equity Fund launched on 28 July 2020.

Neuberger Berman Absolute Alpha Fund liquidated on 10 August 2020.

A new Prospectus and Supplements to the Prospectus were noted by the Central Bank on 16 September 2020.

With effect from 17 September 2020, AllianceBernstein L.P. was appointed as a Non-Affiliated Sub-Adviser of the Company.

With effect from 10 November 2020, Portman Square Capital was appointed as a Non-Affiliated Sub-Adviser of the Company.

24. DERIVATIVE CONTRACTS

The Investment Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Investment Manager to avail of certain exemptions available to it under the SEC Custody Rule.

The Portfolios may transact in a variety of derivative instruments including swaptions, forward currency contracts, futures contracts, contracts for differences, equity, index and currency options contracts, interest rate, credit default, cross currency, inflation and total return swap contracts.

Typically derivatives serve as components of the Portfolios' investment strategy and are utilised primarily to structure and hedge investments, to enhance performance and reduce risk to the Portfolios (the Company does not designate any derivative as a hedging instrument for hedge accounting purposes).

The Company uses financial derivative instruments to economically hedge its risks associated primarily with interest rate and foreign currency fluctuations. Derivatives may also be used for trading purposes where the Investment Manager believes this would be more effective than investing directly in the underlying financial instruments.

Derivatives often reflect, at their inception only a mutual exchange of promises with little or no transfer of tangible consideration. However, these instruments frequently involve a high degree of leverage and are very volatile. A relatively small movement in the underlying of a derivative contract may have a significant impact on the profit or loss of the Company.

The Investment Manager closely monitors the Portfolios' exposure under derivatives as part of the overall management of the Portfolios.

The Fair Value of these derivative instruments is included in the Balance Sheet with changes in Fair Value included in Net gain/(loss) on Financial Assets and Liabilities at Fair Value through Profit and Loss Account.

The Portfolios hold forward currency contracts some of which are specific to hedged share classes. Currency rate fluctuations that impact these forwards will only affect the net assets in the respective class and not the Portfolio as a whole. Refer to the Schedules of Investments for further information on class level forward currency contracts.

The notionals summarised in the table below are as at 31 December 2020 and are indicative of the volume of derivative activity for the year/period. The notionals are not indicative of market risk or credit risk.

* Portfolio liquidated during the current or prior reporting year.

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year.

The main risk associated with the forward currency contracts is currency risk. The main risk associated with the contracts for differences, total return swap contracts and options contracts is equity risk. The main risk associated with the interest rate swap contracts is interest rate risk. The main risk associated with the credit default swap contracts is credit default risk. The main risk associated with the cross currency swap contracts is currency risk. The main risks associated with the futures contracts are currency risk & interest rate risk.

FOR THE YEAR ENDED 31 DECEMBER 2020**24. DERIVATIVE CONTRACTS (CONTINUED)****Credit-Risk-Related Contingent Features**

The Portfolios' derivative contracts are subject to International Swaps and Derivatives Association ("ISDA") Master Agreements which contain certain covenants and other provisions that may require the Company to post additional collateral on derivatives or terminate these agreements if the Company fails to maintain sufficient asset coverage for its contracts or its Net Assets decline by stated percentages or amounts. The Portfolios entered into credit default swaps as part of its investment strategies, to hedge against unfavourable changes in the value of investments and to protect against adverse movements in interest rates or credit performance with counterparties. The maximum potential amount the Portfolios could be required to pay as a seller of credit protection if a credit event occurs as at 31 December 2020 was US\$ 50,275,076 (31 December 2019: US\$ 22,886,890). The aggregate fair value of all credit default swaps as at 31 December 2020 was US\$ 1,210,775 (31 December 2019: US\$ (19,927,164)). There were no other derivative instruments with credit-risk-related contingent features held by the Company at 31 December 2020 and 31 December 2019.

25. OFFSETTING FINANCIAL INSTRUMENTS

The Investment Manager of the Company is an affiliate of Neuberger Berman Group LLC, who is a registered investment adviser with the SEC in the United States. The information included here represents US GAAP equivalent disclosures that are provided in order to enable the Investment Manager to avail of certain exemptions available to it under the SEC Custody Rule.

Financial assets and liabilities are offset and the net amount reported in the Balance Sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

For financial reporting purposes, the Company does not offset derivative assets and derivative liabilities in the Balance Sheet. The following tables present the Company's OTC derivative and securities lending assets and liabilities by counterparty, net of amounts available for offset under a master netting agreement and net of the related collateral received by the Company for assets and pledged by the Company for liabilities as at 31 December 2020 and 31 December 2019.

^(a) Collateral received (or pledged) is limited to an amount not to exceed 100% of the net amount of assets (or liabilities) in the tables presented above, for each respective counterparty.

^(b) Net Amount represents amounts subject to loss as at 31 December 2020, in the event of a counterparty failure.

^(c) Net Amount represents amounts under-collateralised by the Portfolio to each counterparty as at 31 December 2020.

¹ Portfolio launched during the prior reporting year.

² Portfolio launched during the current reporting year.

FOR THE YEAR ENDED 31 DECEMBER 2020**26. CLOSED FUNDS**

In addition to the funds detailed in this report, there are a number of terminated sub-funds that have not yet been de-authorised. A complete list of these funds is provided below. At the year ended 31 December 2020, one of these sub-funds, Lehman Brothers Commodity Plus Fund, held US\$1.82m (31 December 2019: US\$1.81m) in an account with the Depository pending resolution of a disputed derivative transaction.

- Lehman Brothers Global Value Fund
- Lehman Brothers USA Value Fund
- Lehman Brothers European Value Fund
- Lehman Brothers Global Bond Fund
- Lehman Brothers US Bond Fund
- Lehman Brothers Emerging Markets Local Currency Bond Fund
- Lehman Brothers US Large Cap Value Fund
- Lehman Brothers Socially Responsible Investment Fund
- Lehman Brothers Commodity Plus Fund
- Lehman Brothers Alpha Select 2 Fund
- Lehman Brothers Alpha Select 4 Fund
- Lehman Brothers Global Real Estate Securities Fund

Appendix I

TOTAL EXPENSE RATIOS (UNAUDITED)

For the year ended 31 December 2020, Total Expenses Ratios ("TERs") are based on the trailing 12 months preceding the year end.

31 December 2020

Appendix III

INFORMATION ON GLOBAL EXPOSURE (UNAUDITED)

Measurement of Market Risk and Leverage using the Commitment Approach and VaR

The Portfolios will seek to limit the market risk and leverage created through the use of derivatives by using either the commitment approach or by using a sophisticated risk measurement technique known as value-at-risk ("VaR"). The Neuberger Berman High Yield Bond Fund, Neuberger Berman US Multi Cap Opportunities Fund, Neuberger Berman US Real Estate Securities Fund, Neuberger Berman China Equity Fund, Neuberger Berman Emerging Markets Equity Fund, Neuberger Berman US Small Cap Fund, Neuberger Berman Short Duration High Yield Bond Fund, Neuberger Berman Short Duration Emerging Market Debt Fund, Neuberger Berman European High Yield Bond Fund, Neuberger Berman Systematic Global Equity Fund, Neuberger Berman Global Real Estate Securities Fund, Neuberger Berman US Small Cap Intrinsic Value Fund, Neuberger Berman Corporate Hybrid Bond Fund, Neuberger Berman US Equity Fund, Neuberger Berman Global High Yield Bond Fund, Neuberger Berman Emerging Markets Sustainable Equity Fund, Neuberger Berman Global Thematic Equity Fund, Neuberger Berman CLO Income Fund, Neuberger Berman Next Generation Mobility Fund, Neuberger Berman Global High Yield Sustainable Action Fund, Neuberger Berman 5G Connectivity Fund, Neuberger Berman Japan Equity Engagement Fund, Neuberger Berman Global Flexible Credit Fund, Neuberger Berman Global Diversified Income FMP – 2024 and Neuberger Berman China A-Share Equity Fund use the commitment approach. The commitment approach calculates leverage by measuring the market value of the underlying exposures of derivatives relative to the relevant Portfolio's NAV but such leverage will not exceed the Portfolio's Net Asset Value at any time.

A Portfolio may use an "absolute" VaR model where the measurement of VaR is relative to the NAV of the Portfolio or the Portfolio may use a relative VaR model where the measurement of VaR is relative to a derivatives free comparable benchmark or equivalent portfolio. The model used by certain Portfolios is noted in the column "Market Risk" in the table included below. The VaR methodology used is subject to several limitations. First, VaR is based on a model of stock price returns which uses risk factors. To the extent that there are missing risk factors, mis-specified risk factors, or risk factors which are not predictive, the VaR may not be indicative of future risk. Also, the returns to various risk factors are not directly observable in the market and must be estimated using statistical techniques. To the extent that these estimates may be imprecise, the VaR may not be indicative of future risk. In addition, the covariance between the risk factors is estimated over a particular historical time period. To the extent that the future time period may be different from the historical time period, the VaR may not be indicative of future risk. For these reasons, VaR may be more useful as a relative measure of risk among Portfolios, rather than as an absolute measure of risk.

A number of calculation standards are employed for the Portfolios using the VaR model. However, these calculation standards are dealt with in more detail in the risk management process of the Portfolio and may change from time to time at the discretion of the Investment Manager and in accordance with the requirements of the Central Bank.

The tables below detail the maximum, minimum and average usage of regulatory limit calculated during the year ended 31 December 2020 for each Portfolio using VaR:

Portfolio	Market Risk	Observed VaR at 31 December 2020	Maximum usage of Regulatory Limit*	Minimum usage of Regulatory Limit*	Average usage of Regulatory Limit*
Neuberger Berman Diversified Currency Fund	Absolute VaR	0.77%	6.7%	2.2%	4.0%
Neuberger Berman Global Bond Fund	Relative VaR	102.2	62.5%	48.2%	56.5%
Neuberger Berman Emerging Market Debt - Local Currency Fund	Relative VaR	122.6	61.3%	51.2%	56.8%
Neuberger Berman Emerging Market Debt - Hard Currency Fund	Relative VaR	116.8	66.6%	55.5%	60.4%
Neuberger Berman Emerging Market Corporate Debt Fund	Relative VaR	113.3	77.2%	56.6%	61.2%
Neuberger Berman Strategic Income Fund	Relative VaR	112.8	99.9%	41.8%	70.4%
Neuberger Berman Absolute Return Multi Strategy Fund	Absolute VaR	3.93%	91.1%	10.3%	22.0%
Neuberger Berman US Long Short Equity Fund	Absolute VaR	9.80%	58.2%	19.3%	48.6%
Neuberger Berman Emerging Market Debt Blend Fund	Relative VaR	132.5	66.3%	58.4%	63.0%
Neuberger Berman Asian Debt - Hard Currency Fund	Relative VaR	128.8	84.8%	48.9%	68.8%
Neuberger Berman China Bond Fund	Relative VaR	73.5	99.4%	27.0%	38.1%
Neuberger Berman Global Opportunistic Bond Fund	Relative VaR	132.2	99.7%	43.0%	79.7%

Appendix III (Continued)

INFORMATION ON GLOBAL EXPOSURE (UNAUDITED) (CONTINUED)

Portfolio	Market Risk	Observed VaR at 31 December 2020	Maximum usage of Regulatory Limit*	Minimum usage of Regulatory Limit*	Average usage of Regulatory Limit*
Neuberger Berman Multi-Asset Income Fund	Absolute VaR	8.36%	75.1%	10.9%	49.0%
Neuberger Berman US Equity Index PutWrite Fund	Absolute VaR	8.67%	91.5%	9.2%	45.3%
Neuberger Berman Global Equity Index PutWrite Fund	Absolute VaR	7.33%	78.7%	13.8%	43.2%
Neuberger Berman Uncorrelated Strategies Fund	Absolute VaR	2.85%	67.4%	5.1%	11.7%
Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund	Relative VaR	107.9	58.5%	50.2%	55.2%
Neuberger Berman Ultra Short Term Euro Bond Fund	Absolute VaR	1.17%	20.9%	1.4%	7.8%
Neuberger Berman Euro Opportunistic Bond Fund	Relative VaR	109.2	90.9%	36.0%	66.0%
Neuberger Berman Euro Bond Absolute Return Fund	Absolute VaR	2.58%	43.2%	5.7%	17.9%
Neuberger Berman Multi-Style Premia Fund	Absolute VaR	4.46%	18.66%	2.05%	6.65%
Neuberger Berman Macro Opportunities FX Fund	Absolute VaR	2.74%	24.2%	7.3%	14.2%

Regulatory Limit for Absolute VaR is 20% for the 1M 99% VAR. For Relative VaR it is 2 the benchmark VaR.

Depending on market conditions, the Portfolios may employ leverage from time to time. In this context, "leverage" is calculated, in accordance with the requirements of the Central Bank, as the sum of the notionals of the derivatives used. The disclosed level of leverage is not intended to be an additional risk exposure limit for the Portfolios. Furthermore, it is not intended that the leverage level by itself be indicative of the risk profile of the Portfolios. The table below details the level of leverage employed during the year ended 31 December 2020 and is calculated as the sum of the absolute value of the notionals of the derivatives used and expressed as a percentage of the Net Asset Value:

Portfolio	31 December 2020
Neuberger Berman Diversified Currency Fund	2,141%
Neuberger Berman Global Bond Fund	246%
Neuberger Berman Emerging Market Debt - Local Currency Fund	277%
Neuberger Berman Emerging Market Debt - Hard Currency Fund	134%
Neuberger Berman Emerging Market Corporate Debt Fund	111%
Neuberger Berman Strategic Income Fund	171%
Neuberger Berman Absolute Return Multi Strategy Fund	235%
Neuberger Berman US Long Short Equity Fund	133%
Neuberger Berman Emerging Market Debt Blend Fund	220%
Neuberger Berman Asian Debt - Hard Currency Fund	131%
Neuberger Berman China Bond Fund	156%
Neuberger Berman Global Opportunistic Bond Fund	496%
Neuberger Berman Multi-Asset Income Fund	374%
Neuberger Berman US Equity Index PutWrite Fund	137%
Neuberger Berman Global Equity Index PutWrite Fund	134%
Neuberger Berman Uncorrelated Strategies Fund	934%
Neuberger Berman Emerging Market Debt Sustainable Investment Grade Blend Fund	200%
Neuberger Berman Ultra Short Term Euro Bond Fund	133%
Neuberger Berman Euro Opportunistic Bond Fund	152%
Neuberger Berman Euro Bond Absolute Return Fund	201%
Neuberger Berman Multi-Style Premia Fund	221%
Neuberger Berman Macro Opportunities FX Fund	2,112%

Appendix IV

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED)

Securities Financing Transaction Regulation (“SFTR”) introduces reporting requirements for securities financing transactions (“SFTs”) and total return swaps.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at 31 December 2020 the following Portfolios held total return swaps as types of instruments under the scope of the SFTR:

Neuberger Berman High Yield Bond Fund
 Neuberger Berman Strategic Income Fund
 Neuberger Berman US Long Short Equity Fund
 Neuberger Berman Global Opportunistic Bond Fund
 Neuberger Berman Uncorrelated Strategies Fund
 Neuberger Berman CLO Income Fund
 Neuberger Berman Global Flexible Credit Fund

Neuberger Berman High Yield Bond Fund

Global Data:

The amount of assets across total return swaps as at 31 December 2020 was as follows:

Type of Asset	Amount US\$	Proportion of NAV (%)
Total Return Swaps – Assets	899,832	0.02

Data on Reuse of Collateral:

Cash collateral is received into the custody account for the Portfolio and therefore is not tracked specifically to determine if it is re-used. Therefore any cash collateral re-used cannot be reasonably verified.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Neuberger Berman High Yield Bond Fund (continued)

Concentration Data:

The Portfolio did not receive any securities as collateral for the total return swaps as at 31 December 2020.

The counterparties across all total return swaps as at 31 December 2020 were as follows:

Counterparty	Amount US\$
Goldman Sachs International	381,813
JPMorgan Chase Bank	518,019

Safekeeping of Collateral Received:

As at 31 December 2020 there was no collateral received or held with the Depository.

Aggregate Transaction Data:

The aggregate transaction data for collateral positions (including cash) pledged/(received) across all total return swaps as at 31 December 2020 was as follows:

	Type of collateral	Amount US\$*	Quality**	Maturity tenor (collateral)***	Currency of collateral	Country of counterparty establishment****	Settlement and clearing
Total Return Swap							
Goldman Sachs International	Cash Collateral	(310,000)	N/A	N/A	USD	United Kingdom	OTC
JPMorgan Chase Bank	Cash Collateral	(390,000)	N/A	N/A	USD	United States	OTC

* Cash collaterals may cover a combination of swaps instruments, as such a portion of the collaterals relates to swap agreements not in scope of the SFTR.

** There is no credit rating for cash assets. Cash denominated in USD is deemed to be at highest quality due to its high liquid nature.

*** Split to be provided by 7 maturity buckets (< 1 day, 1 day to 1 week, 1 week to 1 month, 1 month to 3 months, 3 months to 1 year, > 1 year, open maturity). Cash collateral has no maturity tenor.

**** Country corresponds with the address of our actual counterparty.

The maturity tenor of total return swaps positions as at 31 December 2020 was 1 month to 3 months.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Neuberger Berman High Yield Bond Fund (continued)

Safekeeping of Collateral Granted:

The proportion of collateral held in segregated, pooled or other accounts as at 31 December 2020 was as follows:

	%
Segregated Accounts	0%
Pooled Accounts	0%
Other	100%
	100%

Return/Costs:

For total return swaps transactions costs, if applicable, are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains/losses and change in unrealised gains/losses on the swap contracts during the reporting period.

Neuberger Berman Strategic Income Fund

Global Data:

The amount of assets across total return swaps as at 31 December 2020 was as follows:

Type of Asset	Amount US\$	Proportion of NAV (%)
Total Return Swaps – Assets	1,104,055	0.09

Appendix IV (Continued)

Aggregate Transaction Data:

The aggregate transaction data for collateral positions (including cash) pledged/(received) across all total return swaps as at 31 December 2020 was as follows:

	Type of collateral	Amount US\$*	Quality**	Maturity tenor (collateral)***	Currency of collateral	Country of counterparty establishment****	Settlement and clearing
Total Return Swap							
Goldman Sachs International	Cash Collateral	805,000	N/A	N/A	USD	United Kingdom	OTC

The maturity tenor of total return swaps positions as at 31 December 2020 was 1 month to 3 months.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Neuberger Berman Global Flexible Credit Fund (continued)

Safekeeping of Collateral Granted:

The proportion of collateral held in segregated, pooled or other accounts as at 31 December 2020 was as follows:

	%
Segregated Accounts	0%
Pooled Accounts	0%
Other	100%
	100%

Return/Costs:

For total return swaps transactions costs, if applicable, are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains/losses and change in unrealised gains/losses on the swap contracts during the reporting period.

Maturity tenor of securities lending agreements

The Company's securities lending transactions have open maturity.

Appendix IV (Continued)

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED) (CONTINUED)

Aggregate Transaction Data (continued):

Country in which counterparties are established

The following table provides details of the country of incorporation of counterparties across securities lending transactions:

Counterparty	Country of Incorporation
Barclays Capital Securities Ltd	United Kingdom
Citigroup Global Markets Limited	United Kingdom
Credit Suisse Securities (Europe) Ltd	United Kingdom
Goldman Sachs International	United Kingdom
J.P. Morgan Securities Plc	United Kingdom
Morgan Stanley & Co. International Plc	United Kingdom
UBS AG London Branch	United Kingdom

Settlement and clearing

All Portfolios engaged in securities lending agreements utilise Tri-party settlement and clearing.

Reuse of Collateral

As at 31 December 2020, the Company did not receive any cash collateral in relation to securities lending transactions. Non-cash collateral received cannot be sold, pledged or re-invested.

Safekeeping of Collateral

All collateral received, if any, is held at the Depository, Brown Brothers Harriman Trustee Services (Ireland) Limited.

Collateral Granted

As at 31 December 2020, there was no collateral granted with respect to securities lending transactions.

Return and Cost

Portfolios entering into securities lending transactions will receive all revenue generated from the securities lending transactions, net of direct and indirect operational costs, which will represent 90% of the total revenue generated. The remaining 10% will be paid to the Lending Agent in consideration of the direct and indirect operational costs of the provision of its services and the guaranty that it provides. Securities lending income earned by the Portfolios during the year is disclosed separately in the Profit and Loss Account.

Appendix V

REMUNERATION DISCLOSURE (UNAUDITED)

The European Union Directive 2014/91/EU (known as the “UCITS V Directive”) came into effect on 18 March 2016. The Company has adopted a remuneration policy in order to meet the requirements of the UCITS V Directive and ESMA’s Guidelines on Sound Remuneration Policies under the UCITS V Directive in a way and to the extent that is appropriate to the Company’s size, internal organisation and the nature, scope and complexity of its activities.

The Company’s remuneration policy applies to staff whose professional activities have a material impact on the risk profile of the Company.

As at 31 December 2020, the Company did not have any employees and the Company’s remuneration policy applied only to the Company’s board of directors who manage and control the Company. Please refer to Note 7 for details of Directors’ remuneration.

Appendix VI

GLOSSARY OF INDICES (UNAUDITED)

Bloomberg Barclays Euro Aggregate Bond Index (EUR)

The index is a benchmark that measures the investment grade, euro-denominated, fixed-rate bond market, including treasuries, government-related, corporate and securitised issues. Inclusion is based on currency denomination of a bond and not country of risk of the issuer.

Bloomberg Barclays Global Aggregate Index

The index measures global investment grade debt from twenty-four different local currency markets and includes fixed-rate treasury, government-related, corporate and securitised bonds from both developed and emerging markets issuers. The index is largely comprised of three major regional aggregate components: the Bloomberg Barclays US Aggregate Bond Index, the Bloomberg Barclays Pan-European Aggregate Bond Index, and the Bloomberg Barclays Asian-Pacific Aggregate Index. In addition to securities from these three indices, the Bloomberg Barclays Global Aggregate Index also includes investment grade Eurodollar, Euro-Yen, Canadian, and 144A Index-eligible securities not already in these three indices.

Bloomberg Barclays Global Aggregate Index hedged in USD

The index measures global investment grade debt from twenty-four different local currency markets and includes fixed-rate treasury, government-related, corporate and securitised bonds from both developed and emerging markets issuers. The index is largely comprised of three major regional aggregate components: the Bloomberg Barclays US Aggregate Bond Index, the Bloomberg Barclays Pan-European Aggregate Bond Index, and the Bloomberg Barclays Asian-Pacific Aggregate Index. In addition to securities from these three indices, the Bloomberg Barclays Global Aggregate Index also includes investment grade Eurodollar, Euro-Yen, Canadian, and 144A Index-eligible securities not already in these three indices. The index is fully hedged back to USD.

Bloomberg Barclays US Aggregate Bond Index

The index measures the investment grade, US dollar-denominated, fixed-rate, taxable bond market and includes Treasuries, government-related and corporate securities, mortgage-backed securities ("MBS") (agency fixed-rate and hybrid adjustable rate mortgage ("ARM") pass-throughs), asset-backed securities ("ABS"), and commercial mortgage-backed securities ("CMBS") (agency and nonagency).

CBOE MSCI EAFE PutWrite Index

The index is designed to track the performance of a hypothetical passive investment strategy that collects option premiums from writing an At-the-Money (ATM) MXEA Put option on a monthly basis and holds a rolling money market account invested in one-month T-bills to cover the liability from the short MXEA Put option position. The index is a total return index that is rebalanced monthly.

CBOE MSCI Emerging Markets PutWrite Index

The index is designed to track the performance of a hypothetical passive investment strategy that collects option premiums from writing an At-the-Money (ATM) MXEF Put option on a monthly basis and holds a rolling money market account invested in one-month T-bills to cover the liability from the short MXEF Put option position. The index is a total return index that is rebalanced monthly.

CBOE S&P 500® PutWrite Index

The index tracks the value of a passive investment strategy which consists of overlaying S&P 500 ("SPX") short put options over a money market account invested in one- and three-months Treasury bills. The SPX puts are struck at-the-money and are sold on a monthly basis.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

CBOE S&P 500® One-Week PutWrite Index	The index tracks the performance of a hypothetical strategy that sells an at-the-money (ATM) S&P 500 Index (SPX) put option on a weekly basis. The maturity of the written SPX put option is one week to expiry. The written SPX put option is collateralised by a money market account invested in one-month Treasury bills. The index rolls on a weekly basis, typically every Friday.
CBOE Russell 2000 One-Week PutWrite Index	The index tracks the performance of a hypothetical strategy that sells an ATM Russell 2000 Index put option on a weekly basis. The maturity of the written Russell 2000 put option is one week to expiry. The written Russell 2000 put option is collateralised by a money market account invested in one-month Treasury bills. The index rolls on a weekly basis, typically every Friday.
CBOE Russell 2000 PutWrite Index	The index tracks a proposed hypothetical short put strategy that sells a monthly ATM Russell 2000 Index put option. The written Russell 2000 put option is collateralised by a money market account invested in one-month Treasury bills. The index rolls on a weekly basis, typically every Friday.
FTSE Chinese Government and Policy Bank Bond 0-1 Year Select Index	The index includes fixed-rate book entry China government bonds with original maturity greater than 1 year and less than or equal to 7 years, fixed-rate China bonds issued by the policy banks with original maturity greater than 1 year and less than or equal to 7 years and fixed-rate and zero coupon China bonds with original maturity less than or equal to 1 year. The following instruments are excluded: savings bonds, special government bonds, central bank bills, private placements and callable and puttable bonds.
FTSE EPRA/NAREIT Developed Real Estate Index (NET)	The index is designed to represent general trends in eligible real estate equities worldwide. Relevant activities are defined as the ownership, disposal and development of income-producing real estate. The index series now covers Global, Developed and Emerging indices, as well the UK's AIM market. The FTSE EPRA Nareit Global Index is designed to track the performance of listed real estate companies and REITS in both developed and emerging markets.
FTSE NAREIT All Equity REITs Index (NET)	The index is a free-float adjusted, market capitalisation-weighted index that tracks the performance of US equity real estate investment trusts (REITs) that are listed on the New York Stock Exchange or NASDAQ. Equity REITs include all tax-qualified REITs with more than 50% of total assets in qualifying real estate assets other than mortgages secured by real property.
HFRX Equity Hedge Index	<p>The index comprises equity hedge strategies. Equity hedge strategies maintain positions both long and short in primarily equity and equity derivative securities. A wide variety of investment processes can be employed to arrive at an investment decision, including both quantitative and fundamental techniques; strategies can be broadly diversified or narrowly focused on specific sectors and can range broadly in terms of levels of net exposure, leverage employed, holding period, concentrations of market capitalizations and valuation ranges of typical portfolios. Equity hedge managers would typically maintain at least 50%, and may in some cases be substantially entirely invested, in equities, both long and short.</p> <p>Constituent funds are selected from an eligible pool of the more than 7,500 funds worldwide that report to the Hedge Fund Research (HFR) Database. Constituent funds must meet all of the following criteria: report monthly; report performance net of all fees; be U.S. dollar-denominated; be active and accepting new investments; have a minimum 24 months track record; and the fund's manager must have at least \$50 million in assets under management. The index is rebalanced quarterly.</p>

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

HFRX Global Hedge Fund Index

The index is designed to be representative of the overall composition of the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage. The strategies are asset weighted based on the distribution of assets in the hedge fund industry. Constituent funds are selected from an eligible pool of the more than 7,500 funds worldwide that report to the Hedge Fund Research ("HFR") Database. Constituent funds must meet all of the following criteria: report monthly; report performance net of all fees; be US dollar denominated; be active and accepting new investments; have a minimum 24 months track record; and the fund's manager must have at least \$50 million in assets under management. The index is rebalanced quarterly.

ICE BofA European Currency Non-Financial High Yield 3% Constrained Index hedged in EUR

The index contains all non-Financial securities in the ICE BofA European Currency High Yield Index but caps issuer exposure at 3%. Index constituents are capitalisation-weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 3%. Issuers that exceed the limit are reduced to 3% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face values of bonds of all other issuers that fall below the 3% cap are increased on a pro-rata basis. In the event there are fewer than 34 issuers in the index, each is equally weighted and the face values of their respective bonds are increased or decreased on a pro-rata basis.

ICE BofA Global High Yield Constrained Index (USD Hedged)

The index contains all securities in the ICE BofA Global High Yield Index but caps issuer exposure at 2%. Index constituents are capitalisation-weighted, based on their current amount outstanding, provided the total allocation to an individual issuer does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face values of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. In the event there are fewer than 50 issuers in the index, each is equally weighted and the face values of their respective bonds are increased or decreased on a pro-rata basis.

ICE BofA Global Hybrid Non-Financial 5% Constrained Custom Index (EUR Hedged)

The index tracks the performance of investment grade non-financial hybrid corporate debt publicly issued in major domestic and Eurobond markets. The benchmark is calculated on a total return basis. Additional disclosures for complete benchmark descriptions are available upon request.

ICE BofA US Dollar 3-Month Deposit Offered Rate Constant Maturity Index

The index tracks the performance of a synthetic asset paying Libor to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day's fixing rate.

That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.

ICE BofA US High Yield Constrained Index

The index tracks the performance of US dollar-denominated below investment grade corporate debt publicly issued in the US domestic market. In addition to meeting other criteria, qualifying securities must have a below investment grade rating (based on an average of Moody's, S&P and Fitch ratings), and have risk exposure to countries that are members of the FX-G10, Western Europe or territories of the US and Western Europe. Securities in legal default are excluded from the index. Index constituents are capitalisation-weighted, provided the total allocation to an individual issuer does not exceed 2%.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

ICE BofA 0-1 Year AAA Euro Government Index (EUR)

The index is a subset of ICE BofA All Maturity Euro Government Index including all securities with a remaining term to final maturity less than 1 years and rated AAA.

The index tracks the performance of EUR denominated sovereign debt publicly issued by Euro member countries in either the eurobond market or the issuer's own domestic market. Qualifying countries must be Euro members, have an investment grade foreign currency long-term sovereign debt rating (based on an average of Moody's, S&P and Fitch), and must have at least one readily available, transparent price source for their securities. To be considered for inclusion a country must be a Euro member as of the first of the month.

ICE BofA 0-3 Month US Treasury Bill Index

ICE BofA 0-3 Month US Treasury Bill Index is a subset of ICE BofA US Treasury Bill Index including all securities with a remaining term to final maturity less than 3 months.

ICE BofA US Treasury Bill Index tracks the performance of US dollar denominated US Treasury Bills publicly issued in the US domestic market. Qualifying securities must have at least one month remaining term to final maturity and a minimum amount outstanding of \$1 billion. Securities issued or marketed primarily to retail investors are excluded. Index constituents are market capitalisation weighted. Accrued interest is calculated assuming next-day settlement. Cash flows from bond payments that are received during the month are retained in the index until the end of the month and then are removed as part of the rebalancing. Cash does not earn any reinvestment income while it is held in the index. Information concerning constituent bond prices, timing and conventions is provided in the ICE BofA Bond Index Guide, which can be accessed on our public website (<https://indices.theice.com>), or by sending a request to iceindices@theice.com. The index is rebalanced on the last calendar day of the month, based on information available up to and including the third business day before the last business day of the month. New issues must settle on or before the calendar month end rebalancing date in order to qualify for the coming month. No changes are made to constituent holdings other than on month end rebalancing dates.

ICE BofA 3-Month US Treasury Bill Index

The index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date.

JP Morgan Asia Credit Index (JACI)

The index tracks the total return performance for actively traded USD denominated debt instruments in the Asia region (excluding Japan). The JP Morgan Asia Credit Index ("JACI") tracks total return performance of the Asia fixed-rate dollar bond market. JACI is a market cap-weighted index comprising sovereign, quasi-sovereign and corporate bonds and it is partitioned by country, sector and credit rating. The benchmark is calculated on a total return basis. Additional disclosures for complete benchmark descriptions are available upon request.

JP Morgan Corporate Emerging Markets Bond Index (CEMBI)-Diversified Index

The index tracks the performance of US dollar-denominated corporate emerging market bonds, including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Diversified version of the index is market capitalisation-weighted and limits the weights of those index countries with larger corporate debt stocks by including only specified portions of those countries' eligible current face amounts of debt outstanding.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

JP Morgan Emerging Markets Bond Index (EMBI) Global Diversified

The index tracks the performance of US dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities (Brady bonds, loans and Eurobonds), including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Global version of the index captures a broad, comprehensive universe of emerging market issues. The Diversified version of the index is market capitalisation-weighted and limits the weights of those index countries with larger debt stocks by including only specified portions of those countries' eligible current face amounts of debt outstanding.

JP Morgan Government Bond Index (GBI)-Emerging Markets Global Diversified

The index tracks the performance of local currency denominated bonds issued by emerging market governments, including emerging market countries from Asia, Europe, Latin America and the Middle East/Africa. The Global version of the index includes only countries that are accessible by most of the international investor base, while countries with explicit capital controls are excluded. The Diversified version of the index is market capitalisation-weighted, with a maximum weight to a country capped at 10%.

MSCI All Country World Index (Net)

The index is a free float-adjusted market capitalisation-weighted index that is designed to measure the equity market performance of developed and emerging markets. The index consists of 49 country indexes comprising 23 developed and 26 emerging market country indexes. The developed market country indexes included are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, the Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey, and the UAE. China A shares are included starting from 1 June, 2018 and are partially represented at 15% of their free float-adjusted market capitalization as of August 2019. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

MSCI China A Onshore Index (Net)

The index captures large and mid-cap representation across China securities listed on the Shanghai and Shenzhen exchanges. The index is based on the MSCI Global Investable Indexes ("GIMI") Methodology- a comprehensive and consistent approach to index construction that lends a global perspective cross regions, and variations in market capitalisation size, sector and style. This methodology aims to provide thorough coverage of the relevant investment opportunity set with a strong emphasis on index liquidity, investability and replicability. The index is reviewed quarterly - in February, May, August and November - with the objective of reflecting changes in the underlying equity markets in a timely manner, while limiting undue index turnover.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

MSCI China Index (Net)

The index is a free float-adjusted market capitalisation-weighted index that is designed to measure the equity market performance of Chinese securities readily accessible to nondomestic investors. The index includes equity securities issued by companies incorporated in the People's Republic of China ("PRC"), and listed in the form of China B shares on the Shanghai Stock Exchange (in US\$) or Shenzhen Stock Exchange (in HK\$), or China H shares on the Hong Kong Stock Exchange (in HK\$) and other foreign exchanges. It also includes Red-Chips and P-Chips, which are not incorporated in the PRC and are listed on the Hong Kong Stock Exchange. Red-Chips include companies that are directly or indirectly controlled by organisations or enterprises that are owned by the state, provinces, or municipalities of the PRC. P-Chips include non-state-owned Chinese companies incorporated outside the mainland and traded in Hong Kong. US-listed China stocks in the index.

China A shares are included starting from 1 June 2018 and are partially represented at 15% of their free float-adjusted market capitalisation. As of August 2019. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

MSCI Emerging Markets Index (Net)

The index is a free float-adjusted market capitalisation-weighted index that is designed to measure the equity market performance of emerging markets. The index consists of the following 26 emerging market country indexes: Argentina, Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, the Philippines, Poland, Qatar, Russia, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey, and the UAE. China A shares are included starting from 1 June 2018 and are partially represented at 15% of their free float-adjusted market capitalization as of August 2019. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

MSCI Japan Small Cap Net Index

The index is designed to measure the performance of the small cap segment of the Japanese market. With 974 constituents, the index represents approximately 14% of the free float-adjusted market capitalization of the Japan equity universe.

MSCI World Index (Net)

The index captures large and mid cap representation across 23 Developed Markets (DM) countries*. With 1,586 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

* DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US.

Russell 2000® Index

The index is a float-adjusted market capitalisation-weighted index that measures the performance of the small-cap segment of the US equity market. It includes approximately 2,000 of the smallest securities in the Russell 3000 Index (which measures the performance of the 3,000 largest US public companies based on total market capitalisation). The index is rebalanced annually in June.

Russell 2000® Value Index

The index is a float-adjusted market capitalisation-weighted index that measures the performance of the small-cap value segment of the US equity market. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth rates. The index is rebalanced annually in June.

Appendix VI (Continued)

GLOSSARY OF INDICES (UNAUDITED) (CONTINUED)

S&P 500® Index

The S&P 500 Index is a capitalization weighted index comprised of 500 stocks chosen for market size, liquidity, and industry group representation. The S&P 500 Index is constructed to represent a broad range of industry segments in the U.S. economy. The S&P 500 Index focuses on the large-cap segment of the market with over 80% coverage of US equities. Criteria for inclusion include financial stability (minimize turnover in the index), screening of common shares to eliminate closely held companies, and trading activity indicative of ample liquidity and efficient share pricing. Companies in merger, acquisition, leveraged-buy-outs, bankruptcy (Chapter 11 filing or any shareholder approval of recapitalization which changes a company's debt-to-equity ratio), restructuring, or lack of representation in their representative industry groups are eliminated from the index.

Weighted average of 2/3 JP Morgan Emerging Markets Bond Index Global Diversified Investment Grade Index (USD total return) and 1/3 of JP Morgan GBI EM Global Diversified Index Investment Grade 15% Cap Index (USD unhedged total return)

The blended index is composed of the weighted average of 2/3 JP Morgan EMBI Global Diversified Investment Grade Index (USD total return) (described previously) and 1/3 of JP Morgan GBI-EM Global Diversified Index Investment Grade 15% Cap Index (USD unhedged total return) (described previously), and is rebalanced monthly.

25% JP Morgan Emerging Markets Bond Index Global Diversified, 25% of JP Morgan Emerging Markets Corporate Bond Index Diversified and 50% of JP Morgan GBI EM Global Diversified Index

The blended index is composed of 25% JP Morgan Emerging Markets Bond Index Global Diversified (described previously), 25% of JP Morgan Emerging Markets Corporate Bond Index Diversified (described previously) and 50% of JP Morgan GBI EM Global Diversified Index (described previously), and is rebalanced monthly.

66% JP Morgan Emerging Markets Bond Index Global Diversified and 33% JP Morgan GBI EM Global Diversified Index

The blended index is composed of 66% JP Morgan Emerging Markets Bond Index Global Diversified (described previously) and 33% of JP Morgan GBI EM Global Diversified Index (described previously), and is rebalanced monthly.

50% CBOE S&P 500® PutWrite Index, 35% MSCI EAFE PutWrite Index, and 15% CBOE MSCI Emerging Markets PutWrite Index

The blended index is composed of 50% in the CBOE S&P 500 PutWrite Index (described previously), 35% in the MSCI EAFE PutWrite Index (described previously) and 15% in the CBOE MSCI Emerging Markets PutWrite Index, and is rebalanced monthly.

(42.5% CBOE S&P 500 One-Week PutWrite Index / 42.5% CBOE S&P 500 PutWrite Index / 7.5% CBOE Russell 2000 One-Week PutWrite Index / 7.5% CBOE Russell 2000 PutWrite Index)

The blended index is composed of 42.5% CBOE S&P 500 One-Week PutWrite Index (described above), 42.5% CBOE S&P 500 PutWrite Index (described above), 7.5% CBOE Russell 2000 One-Week PutWrite Index (described above) and 7.5% CBOE Russell 2000 PutWrite Index (described above), and is rebalanced monthly.

This document is issued by Neuberger Berman Europe Limited ("NBEL") which is authorised and regulated by the UK Financial Conduct Authority ("FCA") and is registered in England and Wales, at Lansdowne House, 57 Berkeley Square, London, W1J 6ER and is also a Registered Investment Adviser with the Securities and Exchange Commission in the US and regulated by the Dubai Financial Services Authority. In Switzerland the representative and paying agent is BNP Paribas Securities Services, succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland. Both the place of performance and the place of jurisdiction for Shares in the Company's sub-funds offered or distributed in or from Switzerland shall be the seat of the Swiss representative. The prospectus, key investor information document, the company's articles of association, the latest audited annual accounts and any subsequent half-yearly accounts of the Company may be obtained free of charge from the representative in Switzerland.

Neuberger Berman Investment Funds plc (the "Company") is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities under the European Communities ("UCITS") Regulations 2011 (S.I. 352 of 2011) of Ireland, as amended.

This document has been provided for information purposes only to and/or directed only at persons who are professional clients or eligible counterparties. All information is subject to change without notice. No part of this document may be reproduced in any manner without the written permission of NBEL. Firm data, where relevant, including employee and assets under management figures, reflect collective data for the various affiliated investment advisers that are subsidiaries of Neuberger Berman Group LLC (the "firm"). Firm history/timeline information dates back to the 1939 founding of Neuberger & Berman (the predecessor to Neuberger Berman Group LLC), and highlights key business expansions, including those that resulted from acquisitions of the various affiliated investment advisers that now comprise the firm. Investment professionals referenced include portfolio managers, research analysts/associates, traders, and product specialists and team dedicated economists/strategists.

While Neuberger Berman believe that the information is correct at the date of production, no warranty or representation is given to this effect and no responsibility can be accepted by Neuberger Berman to the recipient of this document or end users for any action taken on the basis of the information contained herein. No reliance may be placed for any purpose on the information and opinions contained in this document or their accuracy or completeness. Opinions expressed herein reflect the opinion of Neuberger Berman and are subject to change without notice. The Company may not be eligible for sale in some countries and it may not be suitable for all types of investor for further information see the current prospectus. Please go to www.nb.com/europe/literature.html for more information.

Fixed income securities are subject to the risk of an issuer's ability to meet principal and interest payments on the obligation (credit risk) and may also be subject to price volatility due to such factors as interest rate sensitivity, market perception of the creditworthiness of the issuer and general market liquidity (market risk). Fixed income securities are also exposed to the risk that their or their issuers' credit ratings may be downgraded, which can cause a significant drop in the value of such securities.

Lower rated or unrated (i.e. non-investment grade or high yield) securities are more likely to react to developments affecting market and credit risk than are more highly rated securities, which primarily react to movements in the general level of interest rates. Investors should carefully consider the relative risks of investing in high yield securities and understand that such securities generally are not meant for short-term investing. Investors who subscribe in a currency other than the base currency of the Company are exposed to currency risk. Fluctuations in these exchange rates may affect the return on investment.

Past performance is not indicative of future results. For details of the investment risks, which may include but are not limited to liquidity, interest rate, credit and currency risk, see the current prospectus. Please note that any dividends/interest which the Company may receive may be subject to withholding tax. The benchmark does not take into account the effects of tax and the deduction is therefore not reflected in the benchmark return illustrated herein. The investment objective and performance benchmark is a target only and not a guarantee of the Company performance. The index is unmanaged and cannot be invested in directly. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital. The investments of each Portfolio may be fully hedged into the Portfolio's base currency: this may reduce currency risks but may also expose the Portfolio to other risks such as the default of a counterparty. As noted above for further information relating to risks specific to this strategy please see the current prospectus.
