What is the product?

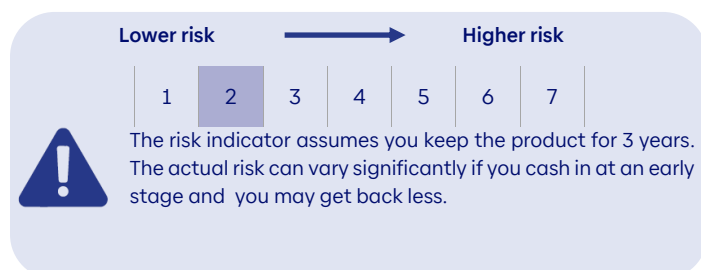

Objectives

The BIF - Eticx Conservative Internal Collective Fund will allow you to be exposed to all types of investments through UCITS or direct lines: mainly government, corporate and monetary debts. Our main criteria is to take into account investment funds that wish to invest according to sustainable development or socially responsible investment criteria. We would like to highlight UCITS or companies that have incorporated this approach through different elements such as: negative or positive screening, thematic investments, commitment approach. This is why we are offering within this Internal Collective Fund a holding representing an allocation of up to 100 % of bonds depending on the state of the markets.

Intended Retail investor

The Eticx Conservative Internal Collective Investment Fund is intended for investors who consider the aspects of sustainable finance and wish to delegate the financial management of their savings to a sector professional. Its reference currency is the Euro. The recommended holding period for this investment is 3 years.

What are the risks and what could I get in return?

Risk Indicator:

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified the risk of this investment option at 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level and, poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency exposure. If the underlying assets are denominated in a currency other than that of the premium you paid, so the final return to you will depend upon the exchange rate between the two currencies involved. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Investment: 10 000 EUR		1 year	3 years (recommended holding period)
Scenarios			
Stress scenario	What you might get back after costs	6 840 EUR	7 050 EUR
	Average return each year	-31.62 %	-10.98 %
Unfavourable scenario	What you might get back after costs	8 600 EUR	8 530 EUR
	Average return each year	-13.99 %	-5.18 %
Moderate scenario	What you might get back after costs	10 130 EUR	10 640 EUR
	Average return each year	1.30 %	2.10 %
Favourable scenario	What you might get back after costs	11 360 EUR	11 780 EUR
	Average return each year	13.55 %	5.62 %

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario : This type of scenario occurred for an investment between 2021 and 2022.

Moderate scenario : This type of scenario occurred for an investment between 2014 and 2017.

Favourable scenario : This type of scenario occurred for an investment between 2013 and 2016.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. The tables show the amounts that are taken from your investment to cover different types of costs.

Cost over the time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment: 10 000 EUR	If you cash in after 1 year	If you cash in after 3 years
Total costs	117 EUR	378 EUR
Annual cost impact *	1.2 %	1.2 %

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.3% before costs and 2.1% after costs.

Composition of costs			Annual cost impact if you exit after 3 years
One-off costs	Entry costs	This is the most you will pay, and you could pay less.	0.00 %
	Exit costs	The impact of the costs of exiting your investment when it matures.	0.00 %
Ongoing costs	Portfolio transaction costs	The impact of the costs of us buying and selling underlying investments for the product.	0.20 %
	Other ongoing costs	The impact of the costs we impose each year for managing your investments.	0.96 %
Incidental costs	Performance fees	The impact of the performance fees.	0.00 %
