KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

Objective

The fund's objective is total return that exceeds the rate of inflation as measured in the U.S. over the long term, measured in U.S. dollars.

Investment Policy

The fund invests primarily (at least 70%) in inflation-adjusted debt instruments. The fund invests primarily in U.S. Treasury inflation-adjusted debt instruments, but may also invest in inflation-adjusted debt instruments issued by other U.S. and foreign government and corporate entities. The fund invests substantially all of its assets in investment grade debt instruments. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

Distributions

Income will not be distributed to shareholders but reflected in the assets of the fund.

Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

Terms to Understand

Debt instruments represent obligations of corporations, governments, and other entities to repay money borrowed.

Derivatives are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

1	2	3	4	5	6	7
Lower risk						Higher risk
Typically lower rewards						Typically higher rewards

The class of the fund is in category 4 because there have been medium fluctuations in the five year returns shown.

Debt Instruments Risk: Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of its investments, and to issuer, market, economic, industry, political, and regulatory conditions. The fund invests in U.S. Treasury inflation-adjusted debt instruments, which may pay unpredictable interest rates based on the

level of inflation. The fund's performance will be closely tied to factors affecting the U.S. government.

Currency Risk: Changes in currency rates can significantly affect the value of your investment.

Derivatives Risk: Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.
