## Pictet - Global Emerging Debt

(the "Compartment") is a compartment of Pictet (the "Fund")

### HI ds EUR (the "Share class") - ISIN LU1388840073

This Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

## Objectives and Investment Policy

- The Compartment's objective is to seek revenue and capital growth by investing a minimum of two-thirds of its total assets or wealth in a diversified portfolio of bonds and other debt instruments issued or guaranteed by national or local governments of emerging countries and/or other issuers domiciled in emerging countries.
- The eligible financial instruments are mainly bonds, money market instruments and derivatives.
- The Compartment may invest up to 30% of its net assets in bonds or other debt securities denominated in RMB through the QFII ("Qualified Foreign Institutional Investor") and/or the RQFII ("Renminbi QFII").
- Investments in China may be performed, inter alia, on the China Interbank Bond Market ("CIBM").
- The Compartment may also invest up to 20% of its assets in Sukuk al Ijarah and Sukuk al Wakalah, Sukuk Al Mudaraba or any other type of Shariah-compliant fixed-income securities within the limits of the grand-ducal regulation dated 8 February 2008.
- The Compartment may use financial derivative instruments for investment and hedging purposes. The Compartment may also invest in structured products.
- The Compartment is actively managed by allocating its wealth to fixed income instruments of emerging countries, within a strict risk control environment.
- Investments may be denominated in any currencies.
- The Compartment's reference currency is USD. This currency-hedged Share class enables EUR investors to benefit from a performance in their reference currency similar to the Compartment's performance expressed in USD.
- The Share class may distribute a dividend composed of net investment income, capital gains and/or the capital itself.
- The price of the Share class is calculated on a daily basis. Investors may redeem shares of the Compartment on any business day in Luxembourg unless no underlying prices are available (market closed).
- The price of the Share class may be adjusted to make sure rebalancing costs caused by subscriptions or redemptions are borne by investors responsible for those flows.
- Recommendation: the Compartment may not be appropriate for investors who plan to withdraw their money within 3 years.
- The Compartment is actively managed. When selecting investments, the investment manager may give consideration to JPM Embi Global Diversified Hedged (Eur) but does not intend to track it. The Compartment's portfolio may thus differ significantly from the benchmark.

## Risk and Reward Profile

- The Share class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy.
- The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest category does not mean a risk-free investment.
- The Compartment offers no capital guarantee or asset protection measures.
- The Compartment may be exposed to the following material risks which are not adequately captured by the synthetic risk indicator and may negatively impact its performance:

- Operational risk: losses may result from, for instance, human errors, system failures, incorrect valuation and safekeeping of assets.
- Counterparty risk: losses may occur when a counterparty does not honour its obligations related to instruments or contracts such as over-the-counter derivatives.
- Impact of financial techniques: the use of leverage may amplify losses and gains, and/or may not result in the intended exposure.
- Liquidity risk: under certain market conditions (such as, but not limited to stressed markets or low volumes), difficulties may be encountered in valuing and/or trading some of the assets.
- Credit risk: sudden losses may occur when issuers of debt securities default on their payment obligations.
- Investments in emerging markets are generally more sensitive to risk events than those in developed markets. Such risk events may include changes in economic, political, fiscal and legal environment, as well as fraud.
- Shariah-compliant fixed-income investments (such as Sukuk) may lead to losses because of the lack of uniform regulatory standards and weak legal frameworks to settle disputes and defaults, among other risks.
