## ECONOPOLIS SUSTAINABLE EQUITIES, class I Cap. EUR

LU1248447622

a sub-fund of ECONOPOLIS FUNDS

Management Company: Conventum TPS part of BLI - Banque de Luxembourg Investments

## Objectives and investment policy

### Objectives

The objective of the sub-fund is to offer investors, by means of an actively managed portfolio, a long-term capital gain on their investment. This objective will be pursued by investing the assets of the sub-fund primarily in shares and other equity securities, without geographical limitation.

### Investment policy

The sub-fund invests mainly in shares and other equity securities, with diversification in terms of sectors and regions covered. The sub-fund will invest in shares and other equity instruments of companies active in developed markets (such as, but not limited to Europe, US and Japan) and may also invest in companies active in emerging markets.

The sub-fund's investment policy is based on three cornerstones in the equity security selection: a disciplined multi-steps approach in the research and analysis of the Investment Manager, a unique un-benchmarked philosophy and the importance of on-the-ground research. Investments will be conviction-based rather than benchmark-driven: conviction in themes, conviction in countries and conviction in companies.

For this sub-fund, a sustainable investment policy is in place, which can be consulted

on <https://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the prospectus of the fund.

The sub-fund may, subject to the limits defined by law, invest in financial derivative products, including, for example, futures, options, forward exchange contracts, credit default swaps or interest rate swaps in order to achieve the investment objectives and for risk hedging purposes.

The portfolio is actively managed on a discretionary basis without using a reference benchmark.

The currency of the share class is expressed in EUR.

The investor has the right to redeem his shares on demand. The dealing in shares is carried out on each complete bank business day in Luxembourg. The attention of the investor is drawn to the fact that in exceptional circumstances, the possibility for the investor to request the redemption of his shares may be limited or suspended.

These shares are capitalisation shares. Income and capital gains are reinvested.

- The risk category has been determined on the basis of historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown does not necessarily remain unchanged and the categorisation of the fund may shift over time.
- The lowest category does not mean a risk-free investment.

- Repayment of the initial investment is not guaranteed.

### Which materially relevant risks are not adequately captured by the synthetic indicator?

- The investment in emerging markets exposes the sub-fund to risks related to political, regulatory, financial or fiscal instabilities or uncertainties that may negatively affect the value of the investments or even question the ownership title of the sub-fund.
- Other risk factors, that an investor shall take into account with regards to his own situation and specific current and future circumstances, may exist.
