## What is this product?

### Type

The product is a share class of the sub-fund Moventum Plus Aktiv - Dynamisches Portfolio, which is part of Moventum Plus Aktiv (the "umbrella fund"), an open-ended investment company with variable capital (société d'investissement à capital variable - SICAV) of the umbrella type governed by Part I of the Luxembourg Law of 17 December 2010, as amended (2010 Law), and thus qualifies as a UCITS. The assets and liabilities of all sub-funds are segregated by law.

### Term

The sub-fund has no maturity date. Notwithstanding this provision, the sub-fund, in keeping with the articles of association, may be dissolved at any time by resolution of the board of directors / general meeting.

### Objectives

#### Investment objective

The objective of the investment policy for Moventum Plus Aktiv - Dynamisches Portfolio is to achieve higher long-term growth in the sub-fund currency while taking the investment risk into account. The sub-fund is actively managed. The composition of the portfolio is established, regularly reviewed and adjusted where appropriate by the Management Company exclusively in accordance with the criteria that are defined in the investment objectives / investment policy. The sub-fund is not managed using an index as a benchmark.

#### Investment policy

Environmental and social aspects and the principles of good corporate governance (Environment, Social, Governance – ESG) are also taken into account in the investment decision-making process for the sub-fund. More detailed information on this can be found on the website of the Management Company. The sub-fund is an equity fund. A minimum of 65% of the net sub-fund assets shall be invested in equity funds and a minimum of 25% shall be invested in bond funds. These funds may be denominated in EUR as well as in another currency. The equity funds in the portfolio generally pursue a broadly diversified, global or regionally limited investment policy and may contain equities of companies with high, medium and/or low market

capitalisation. At the same time, the portfolio includes sector and/or theme-based equity funds as well as equity funds that invest in equities of companies based in emerging markets. The bond funds in the portfolio primarily invest in high-quality government, mortgage and corporate bonds worldwide with a rating of AAA – BBB from recognised rating agencies. At the same time, the portfolio may also include bond funds whose investment focus is on bonds from issuers based in emerging markets and corporate bonds with a lower credit rating (high yields). The latter may have a rating below BBB from recognised rating agencies. In principle, the sub-fund may invest in equities, bonds, money market instruments, certificates, other structured products, target funds and fixed-term deposits, depending on the market situation and the assessment of the Fund Management. The sub-fund may use derivative financial instruments ("derivatives") in order to achieve the above-mentioned investment objectives as well as for investment and hedging purposes.

#### Dividend policy

The income remains in the fund.

#### Subscription and redemption

Investors may, in principle, redeem their units on any banking day in Luxembourg with the exception of 24 and 31 December. The redemption of units may, in due consideration of investors' interests, be suspended if this proves necessary in exceptional circumstances.

#### Intended retail investor

The fund is aimed at all types of investors who pursue the goal of asset accumulation or asset optimisation and wish to invest in the long term. They should be able to bear losses up to the amount of the capital invested. The fund shall promote environmental and/or social characteristics in accordance with Article 8 of Regulation (EU) 2019/2088.

## What are the risks and what could I get in return?

### Risk indicator

Lower risk

Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator is based on the assumption that you will hold the product for 5 years.

If you cash in the investment early, the actual risk may differ significantly and you may get back less.

The overall risk indicator helps you assess the risk associated with this product compared to other products. It shows how likely you are to lose money on this product because the markets develop in a certain way or because we are unable to pay you out.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

**Please be aware of currency risk** if your reference currency differs from the currency of the product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks not included in the risk indicator may be materially relevant:

- Liquidity risk
- Operational risk

Please see the sales prospectus for further information.

This product does not include protection against future market developments, so you could lose all or part of the capital invested.

## Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown illustrate the worst, average and best performance of the product over the last ten years. The markets could develop in an entirely different way in the future.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs, if applicable. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- 10,000 EUR will be invested.

	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	866 EUR	3,085 EUR
<b>Annual cost impact (*)</b>	8.7%	4.9% each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year will be 8.3 % before costs and 3.4 % after costs.

We may split a portion of the costs between us and the person who sells you the product to cover services provided to you. The latter will notify you of the amount if required by applicable laws.
