## Investment Objectives and Policies

The Articles provide that the investment objective and policies for each Fund be formulated by the Directors at the time of the creation of the Fund.

The investment objective of each Fund is to seek to provide Shareholders/Redeemable Shareholders (these terms are used interchangeably throughout the Financial Statements) with a Target Performance linked to the performance of a Reference Index or Reference Asset by purchasing directly or indirectly a portfolio of Transferable securities that may (but is not obliged to) comprise all or a representative sample of the constituent securities of that Reference Index or Reference Asset. All Funds use financial derivative instruments and transactions and/or Over-The-Counter ("OTC") derivatives to achieve the Target Performance.

In such Funds, the return that the Shareholder will receive will be dependent on the performance of the transferable securities, financial derivative instruments including OTC derivatives and the performance of any techniques used to link the transferable securities, financial derivative instruments ("FDIs") and OTC derivatives to the Reference Index or Reference Asset and thus the return Shareholders receive may not wholly correspond to the performance of the Reference Index or Reference Asset, depending on the structure of the relevant Fund as set out in the relevant Supplement. There is no assurance that the investment objective of any Fund whose performance is linked to the Reference Index or Reference Asset will actually be achieved.

The Company on behalf of the Funds intends to invest all or substantially all of the net proceeds of any issue of Shares in global equities and equity related securities (including but not limited to common stocks and other securities with equity characteristics, including but not limited to preferred stocks, warrants, forward foreign exchange contracts, rights (which are issued by a company to allow holders to subscribe for additional securities issued by that Company) and convertible securities, as well as depository receipts, for such securities all of which are traded on markets) financial derivative instruments, US treasury bills (the Commodity Funds only), units of other UCITS and swaps.

The swaps are an agreement between the Fund and the approved counterparty to exchange one stream of cash flows against another stream pursuant to a master agreement in accordance with the requirements of the international swaps and derivatives association, and such swaps may be funded, unfunded, total return or outperformance in nature.

Each approved counterparty to the swaps and the Company on behalf of the Fund have entered into a master agreement (including any supporting agreements) and will enter into confirmations for each swap transaction. Such confirmations may be entered into before or after the relevant transaction and may be in electronic form. The Authorised Participants may be counterparties to the swaps.

All Funds are Exchange Traded Funds ("ETFs"), which provide the flexibility of a share with the diversification of a Fund. They can be bought and sold like any other shares listed on a stock exchange. Any change in the investment objective or any material change to the investment policies of a Fund may only be made with the approval of the Directors, the relevant supervisory authority and by ordinary resolution of the Redeemable Shareholders of the Fund. Subject and without prejudice to the preceding sentence of this paragraph, in the event of a change of investment objective and/or policies of a Fund, a reasonable notification period must be given to each Redeemable Shareholder of the Fund to enable a Redeemable Shareholder to have its Redeemable Shares repurchased prior to the implementation of such change.

These swap-backed ETFs own securities that are not necessarily the ones in the index or strategy that the ETF is replicating as the index or strategy performance is obtained through the OTC swap transaction.

The specific investment objectives and policies for each Fund will be formulated by the Directors and set out in the Company's Prospectus and Fund Supplements. In particular, the reference index or strategy of each Fund is described in detail in the relevant Fund Supplement.

### **Performance Analysis (continued)**

#### **Market overview**

##### **Global equities**

During the period from the end of November 2023 to the end of November 2024, the MSCI World Index recorded a significant gain of 27.8%. This robust performance reflects a period of strong recovery in global equity markets, driven by improving macroeconomic conditions, disinflation, and easing monetary policies in major advanced economies.

A key catalyst for the positive equity performance was the shift in monetary policy by global central banks. Major central banks, such as the US Federal Reserve ("Fed") and the European Central Bank ("ECB"), adopted a more accommodative policy stance by reducing interest rates. This policy shift supported financial conditions and lowered the cost of borrowing, making equities more attractive relative to bonds. Disinflation was another major driver, with inflation in G7 countries falling from 4.5% in 2023 to 2.4% in 2024, which further bolstered corporate profit margins and investor sentiment. Additionally, robust consumer demand and wage growth in advanced economies supported consumption and corporate earnings growth. However, risks to equity valuations emerged from persistent services inflation, geopolitical risks, and episodes of market volatility linked to global trade tensions and conflicts in the Middle East.

##### **Emerging Markets equities**

Emerging market equities, as represented by the MSCI Emerging Markets ("EM") Index, posted a return of 11.9% during the review period. Investor sentiment toward developing markets improved, underpinned by solid domestic demand in key markets and improving macroeconomic stability in several large emerging economies. China's economy, a major component of the MSCI EM index, is expected to grow by 4.9% in 2024, driven by steady industrial production and growing external demand for high-tech goods. However, the real estate sector remained a drag on the economy, with property investment showing signs of stagnation. India maintained strong GDP growth of 6.8%, supported by higher rural demand and increased public investment, while consumption and exports remained key contributors to growth. Brazil saw growth taper in the second half of 2024 as adverse weather impacted agricultural output, though retail and private consumption rebounded. Overall, Brazil's economy is expected to grow by 3.2%, above the long-term average. Argentina faced more challenging conditions, with GDP expected to contract by -3.8%. Nonetheless, some recovery in agriculture, mining, and construction activities provided optimism toward year-end. Risks for emerging markets stemmed from policy divergence, with countries like India expected to ease monetary policy, while Brazil maintained a restrictive stance to combat inflation. Trade protectionism and heightened geopolitical risks added an additional layer of uncertainty.

##### **China equities**

During the period, the MSCI China Index rose by 13.5%. This performance was supported by policy interventions in the financial and real estate sectors, as well as shifts in domestic consumption and export dynamics. China's GDP growth in 2024 is projected at 4.9%, with external demand playing a significant role, particularly for high-tech products. Export competitiveness was supported by lower input costs. On the domestic front, infrastructure investment picked up, driven by special local government bond issuance aimed at financing urban redevelopment and green transition projects. However, household consumption remained muted due to high precautionary savings, despite regulatory adjustments aimed at stabilising the real estate sector. The People's Bank of China cut interest rates and reduced reserve requirements, improving liquidity in the financial system. Risks for Chinese equities included the ongoing challenges in the real estate sector, where regulatory easing has only partially stabilised demand. Local government debt also remains a source of risk, as reduced revenue from real estate-linked activities pressures regional finances. Additionally, the possibility of global trade protectionism could affect China's industrial production and export performance.

##### **US equities**

The MSCI USA Index outperformed other regions, posting an impressive gain of 33.9% during the reporting period. The period marked a strong resurgence in investor confidence, driven by solid macroeconomic conditions, easing inflation, the hype surrounding AI technologies, and supportive monetary policy. US GDP growth remained solid throughout 2024, with private consumption playing a vital role in driving economic momentum. Public consumption growth, led by increased subnational government spending, supported overall demand. Real wages rose, enhancing household purchasing power, while labour productivity rebounded, helping to offset potential cost pressures, and further supported corporate earnings growth.

The Fed began to ease monetary policy, cutting interest rates in the second half of 2024. This shift supported market sentiment and improved liquidity conditions. As borrowing costs declined, investors shifted allocations toward growth-oriented sectors, which benefited from improved earnings expectations. Risks for US equities included fiscal imbalances, with the US deficit projected to remain above 7.5% of GDP in 2024. Consequently, public debt is expected to rise, reaching over 120% of GDP.

##### **European equities**

European equities, as represented by the Euro Stoxx 50 Index, gained 12.4% during the review period. Market sentiment improved amid easing inflation, monetary policy normalisation, and increased public and private investment across key economies like Germany, France, and Italy. The ECB cut its deposit rate by 75 basis points in 2024, with further reductions expected through 2025. This policy shift, combined with public investment under the Next Generation EU recovery program, supported business activity. Germany's industrial production remained weak, contracting 5% on average compared to last year, but growth in services helped balance overall economic performance. France experienced improved consumer demand, with rising real wages driving stronger household consumption. Italy faced challenges related to the withdrawal of the Superbonus building tax credit, which dampened investment in the construction sector. Geopolitical risks, particularly conflicts in the Middle East and Russia-Ukraine, presented potential headwinds for European economies. Energy price volatility and financial stability risks within the commercial real estate sector remain key concerns for European economies.

### **Performance Analysis (continued)**

#### **Market overview (continued)**

##### **Japanese equities**

Japanese equities recorded a 16% gain during the review period, driven by strong domestic demand, wage growth, and supportive fiscal and monetary policies. After a weak first quarter, during which the economy contracted by 0.6%, Japan's economy rebounded with growth of 0.5% in Q2 and 0.3% in Q3 2024. This recovery was underpinned by a resurgence in private consumption, bolstered by higher wages following annual labour negotiations and the implementation of government stimulus measures. Persistent labour shortages in key sectors such as information services, construction, and accommodation exerted upward pressure on wages. The 5.1% increase in the minimum wage—the largest adjustment in four decades—fuelled real wage growth, which, in turn, supported household consumption. Monetary policy underwent a significant shift in 2024 as the Bank of Japan ("BoJ") moved away from its ultra-loose stance. In July 2024, the BoJ raised short-term interest rates from 0-0.1% to approximately 0.25%, marking a pivotal step in the normalisation of monetary policy. Concurrently, the BoJ began scaling back its holdings of Japanese Government Bonds, signalling a gradual shift toward a more neutral policy stance.

##### **Commodities**

The Bloomberg Commodity Index ("BCOM") posted a modest gain of 1.5% during the review period with mixed performance across key sub-sectors. Energy markets were influenced by production cuts from major oil-producing nations, which provided a stabilising effect on oil prices. Geopolitical tensions in the Middle East further added to market uncertainty, leading to increased volatility in energy prices. Natural gas prices rose significantly due to weather-related demand fluctuations and ongoing concerns over supply disruptions, particularly in Europe and Asia.

In metals markets, base metals like copper and aluminium saw strong demand, supported by the expansion of renewable energy infrastructure and the growing adoption of electric vehicles. However, the rally in prices was partially reversed later in the period, driven by weaker demand projections from key industrial markets, particularly China. Precious metals, notably gold, experienced a surge in value, fuelled by heightened geopolitical risks and expectations of monetary policy shifts in major economies.

Agricultural commodity prices presented a mixed picture. Beverage prices rose significantly due to weather-induced supply shocks, while grain prices declined as favourable weather conditions boosted production.

The Board considers that diversity in its membership is beneficial and therefore seeks to ensure that the Board's size, structure and composition, including skills, knowledge, experience and diversity is sufficient for the effective direction and control of the Company. However, as the Board is committed to appointing the most appropriate candidates as Directors of the Company, it has not set any measurable objectives in respect of this policy.

### Internal control and risk management systems

The Board also noted the independence of the Administrator from the Company's Investment Manager and Sub Investment Manager. Subject to the supervision of the Board, the appointment of the Administrator is intended to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The annual and semi-annual Financial Statements of the Company are required to be approved by the Board and filed with the Central Bank of Ireland and the relevant Stock Exchange within the relevant respective time periods. The statutory Financial Statements are required to be audited by independent auditors who report annually to the Board on their findings.

This report includes observations as to the extent to which (i) the annual Financial Statements provide a true and fair view (ii) adjustments were made to the accounting records maintained by the Administrator in order to provide Financial Statements giving a true and fair view and (iii) potential significant control weaknesses identified by the Auditor during the audit process. The Auditor presents this report at the board meeting at which the Financial Statements are presented to the Board for approval. ## **Independent Auditor's Report to the Members of Invesco Markets PLC**

### **Report on the audit of the financial statements**

#### ***Opinion***

We have audited the financial statements of Invesco Markets PLC ('the Company') for the year ended 30 November 2024 set out on pages 44 to 642, which comprise the Schedule of Investments, the Statement of Financial Position, the Statement of Comprehensive Income, the Statement of Change in Net Assets Attributable to Holders or Redeemable Participating Shares, the Statement of Cash Flows and related notes, including the material accounting policies set out in note 1.

The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union.

In our opinion:

- the financial statements give a true and fair view of the assets, liabilities and financial position of the Company as at 30 November 2024 and of its changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the financial statements have been properly prepared in accordance with IFRS as adopted by the European Union; and
- the financial statements have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

#### ***Basis for opinion***

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities section of our report. We believe that the audit evidence we have obtained is a sufficient and appropriate basis for our opinion. Our audit opinion is consistent with our report to the audit committee.

We were appointed as auditor by the directors on 3 June 2020. The period of total uninterrupted engagement is the five years ended 30 November 2024. We have fulfilled our ethical responsibilities under, and we remained independent of the Company in accordance with, ethical requirements applicable in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA) as applied to listed public interest entities. No non-audit services prohibited by that standard were provided.

#### ***Conclusions relating to going concern***

In auditing the financial statements, we have concluded that the director's use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the director's assessment of the entity's ability to continue to adopt the going concern basis of accounting included considering the inherent risks to the Company's business model and analysis of how those risks might affect the Company's financial resources or ability to continue operations over the going concern period. The risks we considered most likely to adversely affect the Company's available financial resources over this period was the availability of capital to meet operating costs and other financial commitments (liquidity risk) and the valuation of investments at fair value as a result of market performance (price risk). In the director's assessment it was noted that the Company held, and continues to hold, a large number of shares through different sub-funds, and the composition of the sub-funds' portfolios reduces the going concern risk resulting from market performance of the investments. The director's assessment is consistent with our understanding of the Company.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

#### ***Detecting irregularities including fraud***

We identified the areas of laws and regulations that could reasonably be expected to have a material effect on the financial statements and risks of material misstatement due to fraud, using our understanding of the entity's industry, regulatory environment and other external factors and inquiry with the directors. In addition, our risk assessment procedures included:

- Inquiring with the directors and other management as to the Company's policies and procedures regarding compliance with laws and regulations, identifying, evaluating and accounting for litigation and claims, as well as whether they have knowledge of non-compliance or instances of litigation or claims.
- Inquiring of directors as to the Company's high-level policies and procedures to prevent and detect fraud, as well as whether they have knowledge of any actual, suspected or alleged fraud.
- Inquiring of directors regarding their assessment of the risk that the financial statements may be materially misstated due to irregularities, including fraud.
- Inspecting the Company's regulatory and legal correspondence.
- Reading Board minutes.
- Performing planning analytical procedures to identify any usual or unexpected relationships.

We discussed identified laws and regulations, fraud risk factors and the need to remain alert among the audit team.

## Independent Auditor's Report to the Members of Invesco Markets PLC Report on the audit of the financial statements (continued)

Firstly, the Company is subject to laws and regulations that directly affect the financial statements including companies and financial reporting legislation. We assessed the extent of compliance with these laws and regulations as part of our procedures on the related financial statement items, including assessing the financial statement disclosures and agreeing them to supporting documentation when necessary.

Secondly, the Company is subject to many other laws and regulations where the consequences of non-compliance could have a material effect on amounts or disclosures in the financial statements, for instance through the imposition of fines or litigation. We identified the following areas as those most likely to have such an effect: certain aspects of company legislation recognising the financial and regulated nature of the Company's activities and its legal form.

Auditing standards limit the required audit procedures to identify non-compliance with these non-direct laws and regulations to inquiry of the directors and inspection of regulatory and legal correspondence, if any. These limited procedures did not identify actual or suspected non-compliance.

We assessed events or conditions that could indicate an incentive or pressure to commit fraud or provide an opportunity to commit fraud. As required by auditing standards, we performed procedures to address the risk of management override of controls and the risk of fraudulent revenue recognition. On this audit we do not believe there is a fraud risk related to revenue recognition. We did not identify any additional fraud risks.

In response to the fraud risks, we also performed procedures including:

- Examining a sample of journal entries posted during the period and at year end and also performing detailed test procedures on post closing adjustments.
- Evaluating the business purpose of significant unusual transactions.
- Assessing significant accounting estimates for bias.
- Assessing the disclosures in the financial statements for bias.

As the Company is regulated, our assessment of risks involved obtaining an understanding of the legal and regulatory framework that the Company operates and gaining an understanding of the control environment including the entity's procedures for complying with regulatory requirements.

Owing to the inherent limitations of an audit, there is an unavoidable risk that we may not have detected some material misstatements in the financial statements, even though we have properly planned and performed our audit in accordance with auditing standards. For example, the further removed non-compliance with laws and regulations (irregularities) is from the events and transactions reflected in the financial statements, the less likely the inherently limited procedures required by auditing standards would identify it.

In addition, as with any audit, there remains a higher risk of non-detection of irregularities, as these may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls. We are not responsible for preventing non-compliance and cannot be expected to detect non-compliance with all laws and regulations.

### **Key audit matters: our assessment of risks of material misstatement**

Key audit matters are those matters that, in our professional judgement, were of most significance in the audit of the financial statements and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by us, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

In arriving at our audit opinion above we considered the below key audit matters (unchanged from 2023):

Accuracy, Valuation and Ownership of financial assets at fair value through profit or loss EUR 59,421,473,839 (2023: EUR 36,136,861,392) and financial liabilities at fair value through profit or loss EUR 100,980,011 (2023: EUR 99,642,610)

We applied this percentage in our determination of performance materiality because we did not identify any factors indicating an elevated level of risk.

- entity level control deficiencies, such as in the control environment;
- the number and severity of deficiencies in control activities, including those that may be pervasive;
- turnover of senior management or key financial reporting personnel;
- the number and/or value of detected misstatements;
- the value of uncorrected misstatements, including the cumulative current period effect of immaterial prior period uncorrected misstatements; and
