Incorporation

abrdn SICAV I (the Company) was incorporated as a société anonyme, qualifying as a société d'investissement à capital variable on 25 February 1988 for an unlimited period and commenced operations on 26 April 1988. It is registered under number B27471 at the Register of Commerce and Companies of Luxembourg where its Articles of Incorporation are available for inspection and where copies thereof may be obtained. The Articles of Incorporation were also published in the RESA and were last amended on 6 February 2019.

As at 30 September 2024, the Company has issued shares in the following Funds:

abrdn – CCBI Belt & Road Bond Fund	Euro High Yield Bond Fund
All China Sustainable Equity Fund	Europe ex UK Sustainable Equity Fund
Asia Pacific Dynamic Dividend Fund	European Sustainable Equity Fund
Asia Pacific Sustainable Equity Fund	Frontier Markets Bond Fund
Asian Bond Fund	Future Minerals Fund
Asian Credit Sustainable Bond Fund	GDP Weighted Global Government Bond Fund
Asian High Yield Sustainable Bond Fund	Global Bond Fund
Asian SDG Equity Fund	Global Corporate Sustainable Bond Fund
Asian Smaller Companies Fund	Global Dynamic Dividend Fund
China A Share Sustainable Equity Fund	Global Government Bond Fund
China Next Generation Fund	Global High Yield Sustainable Bond Fund
China Onshore Bond Fund	Global Innovation Equity Fund
Climate Transition Bond Fund	Global Mid-Cap Equity Fund
Diversified Growth Fund	Global Small & Mid-Cap SDG Horizons Equity Fund
Diversified Income Fund	Global Sustainable Equity Fund
Emerging Markets Bond Fund	Indian Bond Fund
Emerging Markets Corporate Bond Fund	Indian Equity Fund
Emerging Markets Equity Fund	Japanese Smaller Companies Sustainable Equity Fund
Emerging Markets ex China Equity Fund	Japanese Sustainable Equity Fund
Emerging Markets Income Equity Fund	Latin American Equity Fund
Emerging Markets SDG Corporate Bond Fund	North American Smaller Companies Fund
Emerging Markets SDG Equity Fund	Select Emerging Markets Investment Grade Bond Fund
Emerging Markets Smaller Companies Fund	Short Dated Enhanced Income Fund
Emerging Markets Total Return Bond Fund	US Dollar Credit Sustainable Bond Fund
Euro Government Bond Fund	

The full name of each Fund is constituted by the name of the Company, abrdn SICAV I, followed by a hyphen and then the specific name of the Fund. Throughout the Financial Statements, the Funds are referred to by their short names as indicated above.

No subscriptions can be received on the basis of this document. Subscriptions are only valid if made on the basis of the current prospectus or on the Key Information Document, accompanied by a copy of the latest annual report or of the subsequent semi-annual report if it has been published.

Please see the Notes to the Financial Statements for changes during the year.

Statement of Changes in Portfolio

A statement giving the changes in the Schedule of Investments for the year ended 30 September 2024 can be obtained free of charge from the registered office of the Company.

Report of the Board of Directors

As at 30 September 2024, the total net assets of abrdn SICAV I (the "Company") stood at USD 15,130,990,000.

The Company aims to provide investors with a broad international range of diversified actively-managed Funds which, through their specific investment objectives and individual portfolios, offer investors the opportunity to conveniently build a diversified global stock and bond portfolio to meet individuals' investment goals.

The overall strategy of the Company and the separate Funds is to seek diversification through investment primarily in transferable securities.

The Board of Directors adheres to the Association of the Luxembourg Fund Industry ("ALFI") code of conduct for Luxembourg investment funds (revised June 2022). The code of conduct sets a framework of high-level principles and best practice recommendations for the governance of Luxembourg investment funds.

The Board of Directors considers that it has been in compliance with the Principles of the Code in all material respects for the year ended 30 September 2024.

The Board of Directors

Luxembourg, 12 December 2024

Report of the réviseur d'entreprises agréé

To the Shareholders of
abrdn SICAV I
35a, avenue John F. Kennedy
L-1855 Luxembourg

Opinion

We have audited the financial statements of abrdn SICAV I and each of its sub-funds ("the Fund"), which comprise the Statement of Net Assets and the Schedule of Investments as at 30 September 2024 and the Statement of Operations and Changes in Net Assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of abrdn SICAV I and each of its sub-funds as at 30 September 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Report of the réviseur d'entreprises agréé (continued)

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements (continued)

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-funds where a decision or an intention to close exists) to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Global Overview

Global equities

Global stock markets rose strongly over the 12 months under review. The prospect of an end to monetary tightening and potential rate cuts supported the asset class for much of the period, despite some weakness in the first quarter of 2024 due to inflation worries. Central banks raised interest rates faster and further than expected to counter multi-decade-high inflation. As a result, inflationary pressures eased over the period. Global economic growth held up better than expected, though fears of a US recession triggered by higher rates heightened towards the period's end.

At the start of the period, global equities generated negative returns in October 2023 amid concerns that rates would stay higher for longer. Nevertheless, the asset class recovered towards the end of 2023 as inflation trends led investors to anticipate rate cuts in 2024. Equities performed well in early 2024, supported by strong economic data, but weakened in April as fears resurfaced that interest rates might remain higher for longer due to stubborn inflation. Equities then improved from May, supported by renewed hopes of rate cuts and strong corporate earnings. Although global stocks sold off from mid-July to early August due to US recession fears, they soon recovered after reassuring economic data, and the US Federal Reserve (Fed)'s first rate cut in over four years at the end of the period, lifted the asset class further.

UK

The UK stock market, as represented by the FTSE All-Share Index, rose over the period. The FTSE 250 Index, which contains smaller companies typically more focused on the domestic UK economy, outperformed the FTSE 100 Index, home to multinational companies. The performance of the FTSE 100 Index lagged those of many overseas markets given it is home to a large number of defensive shares. However, it also contains several energy and mining companies, which supported the index's return as commodity prices ended the period close to where they were after the outbreak of the war in Eastern Europe in early 2022. Meanwhile, smaller UK companies were held back at the start of the period by heightened economic uncertainty. However, as the outlook for the domestic economy improved, they then performed better due to improved investor risk appetite. In late May, Prime Minister Rishi Sunak announced a snap UK general election for 4 July, as he looked to capitalise on an improving economic environment. However, the Labour Party subsequently secured a substantial majority, as anticipated. The Bank of England (BoE) kept its Bank Rate unchanged for most of the period before cutting it by 25 basis points (bps) in August to 5.00%. This decision came as the headline rate of UK annual consumer inflation remained at 2.2% in August, as expected, but just above the BoE's 2% target. However, there has been a steady downwards trend over the last year, leading to expectations of further rate cuts in the months ahead.

US

US share prices, as measured by the broad S&P 500 Index, rose strongly over the period. Growth-focused stocks, such as technology companies and especially artificial intelligence (AI)-related stocks like NVIDIA, Microsoft and Alphabet, performed well. These stocks are especially sensitive to the end of monetary tightening and the prospect of rate cuts due to the favourable effect on their future discounted earnings. Faced with a relatively robust economy, the Fed continued to maintain a restrictive policy stance for much of the period. This led to weak returns for the asset class at the start of the period as investors worried that interest rates would stay higher for longer. US stocks then rebounded towards the end of 2023 and over the first three months of 2024, as encouraging inflation trends led to optimism about future interest-rate cuts. However, they weakened in April as higher-than-expected inflation over the first quarter of the year led to renewed fears of a prolonged high-interest-rate environment. The asset class then rebounded in May and June due to fresh hopes of interest-rate cuts by the Fed by the end of the year, as well as better-than-expected corporate earnings. Fears of a US recession caused a sell-off in equities from mid-July to the start of August. However, in September, after a sustained fall in annual inflation and some mixed US economic data, the Fed lowered the target range for the fed funds rate by 50 bps to 4.75-5.00%, giving US stocks a boost towards the end of the period. Moreover, investors were now anticipating several more interest-rate cuts before the end of 2024.

Europe

Continental Europe's stock markets, as measured by the FTSE World Europe ex UK Index, rose over the period. Investor sentiment in the region improved due to declining annual inflation and an unexpectedly resilient European economy. At the start of the period, European equities weakened on concerns about further monetary tightening and slowing economic growth. However, those fears subsequently eased, leading to a notable rebound in equities towards the end of 2023. European stocks then continued their upward trend over the first quarter of 2024 before weakening in April on fears of interest rates staying higher for longer. Hopes of future rate cuts, along with robust corporate earnings, saw equities rise in May. French President Emmanuel Macron then called for a snap general election after his centrist alliance suffered a shock defeat to Marine Le Pen's far-right National Rally in the European Parliament elections in June, leading to a sharp sell-off in French equities. However, both French and European equities steadied in July after the National Rally's electoral gains were less than predicted. After a volatile start to August due to US recession worries, European equities ended the period higher. The European Central Bank (ECB) raised rates six times over the course of 2023 as it strove to bring the annual inflation rate back down to its 2% target. However, encouraged by signs of disinflation, the ECB then cut its deposit facility rate by 25 bps in both June and September 2024, taking it to 3.50%. According to a preliminary estimate, annual inflation

Global Overview (continued)

eased from 2.2% in August to a lower-than-expected 1.8% in September. Meanwhile, eurozone GDP grew sequentially by 0.2% in the second quarter of 2024, slightly below the 0.3% growth rate experienced in the first three months of the year.

Asia Pacific

Stock markets in the Asia Pacific (excluding Japan) region advanced over the period. Investor sentiment was supported by signs that high global inflation was beginning to subside, with diminishing fears that the world economy could be tipped into a recession by interest-rate hikes. As disinflation became more apparent, investors began anticipating major central banks cutting rates later in 2024, with the ECB leading the way with a rate reduction in June.

Chinese share prices lagged for much of the period. This was due to growing risks in the country's highly indebted property sector (centred around major developers like Evergrande and Country Garden), ongoing geopolitical tensions with the US, and a regulatory crackdown focusing on data privacy and national security. As a result, Chinese authorities announced various stimulus measures aimed at boosting investor sentiment, which helped to a degree. However, Chinese equities surged in September after the People's Bank of China surprisingly announced a raft of planned monetary support measures, including another 50-bp cut to banks' reserve requirement ratios and further reductions in loan prime rates. It is also looking to boost the property market, small business lending and investor sentiment. These measures were then followed by an announcement from the Chinese government that it would increase fiscal support for the economy. Meanwhile, the Taiwanese stock market recorded a solid gain over the period, helped by its relatively high weighting to the technology sector. Additionally, the Indian market performed strongly as investors were encouraged by the robust performance of the local economy, which continued to benefit from Prime Minister Narendra Modi's reforms.

The Japanese stock market, as measured by the TOPIX Index, recorded a strong double-digit gain in yen terms over the 12-month period; it increased less in US dollar terms due to the depreciation of the yen. Solid company results and an increased focus by Japanese companies on shareholder returns helped share prices climb notably higher over the period. Facing milder inflationary pressures than the world's other major central banks, the Bank of Japan (BoJ) left its key interest rate unchanged at -0.1% and the target for the 10-year government bond yield at around 0% at the start of the period. With annual core inflation still above the 2% target, the BoJ further tweaked its yield-curve control policy at its October meeting, but then raised its key short-term interest rate from -0.1% to 0.0-0.1% at its March meeting. This was the first rate hike since 2007, concluding eight years of negative interest rates. The BoJ also finally ended its yield-curve control policy. In July, it then hiked rates again, to 0.25%, and announced a plan to reduce its monthly bond purchases from early 2026. Given the BoJ's ongoing commitment to maintaining its accommodative monetary policy, the Japanese yen steadily weakened over the period before regaining all of its losses in the lead-up to the central bank's second rate hike (which caused Japanese equities to plunge in early August before they recovered later in the month).

Emerging markets

Emerging-market equities rose over the 12 months under review, though they lagged developed markets. US interest-rate expectations and China's uneven economic recovery dominated investor sentiment. The Fed's half-point rate cut at the end of the period prompted several emerging-market central banks to lower rates, too. Meanwhile, Chinese stocks were weighed down by growth concerns for most of the year, but they rebounded sharply in the final month after the government's aggressive stimulus measures. At the same time, the recovery in global AI-led technology stocks, which had broadened earlier in the year, took a breather as investors rotated into Chinese equities after the stimulus announcements and amid US recession fears. The unwinding of the Japanese yen carry trade also rattled markets in August, while fears of a widening conflict in the Middle East escalated significantly at the end of the period. On the political front, several large emerging economies held elections over the year. In India, cabinet appointments for Prime Minister Narendra Modi's new coalition government pointed to political continuity, while the ruling leftwing party's landslide election victory in Mexico sparked concerns over fiscal policy and constitutional change. Separately, the South Korean government introduced the corporate "Value-Up" programme to improve shareholder returns.

Bond markets

Global government bonds had a mostly positive performance over the 12-month period. After years of record-low interest rates, many central banks have significantly raised rates in an effort to contain inflation, a policy that has proven successful. As a result, the Fed, ECB and BoE all started easing their respective monetary policies, with investors looking ahead to further potential rate cuts later in 2024. That said, most major central banks are pursuing a data-dependent approach for now, as they remain wary of lingering inflationary pressures.

Corporate bond prices also performed solidly over the 12-month period, with both investment-grade and riskier high-yield bonds faring well due to the former's higher interest-rate sensitivity (as central banks started easing monetary policy) and the latter's exposure to a more robust economic environment than feared, which supported credit fundamentals. Also, income-oriented investors were drawn to corporate bonds because of their historically attractive yields.

Global Overview (continued)

Outlook

Macroeconomic conditions remain as unpredictable as ever, as highlighted by events in early August and September. Although the Fed has finally acted on interest rates, there is still potential for disappointment in both the speed and scale of future cuts, especially with elevated geopolitical tensions around the globe that could sharply affect investor sentiment and alter the deflationary environment. While a soft landing is the consensus base case, some market participants have raised the likelihood of a US recession after the weak labour report last month.

Within fixed-income markets, we continue to believe that we are approaching the end of the economic cycle. This belief is reinforced by incoming data across developed-market economies, which shows a softening in activity, a loosening in labour markets, and a decline in inflation measures. As a result, we see medium-term value in owning global government bonds. We anticipate an interest-rate-cutting cycle from the major central banks and an associated decline in yields, primarily via a steepening of the curve through falls in short-end yields. Central-bank data dependency continues to exacerbate rates volatility. Inflation data still has the propensity to upset, while US consumption remains somewhat resilient. Services inflation is proving more resilient than desired in certain quarters.

Fund returns: Source: Factset, Basis: performance is calculated over the stated period on the share price performance basis, based on the noted share class, net of annual charges and inclusive of reinvested income. Exceptions being the Global Bond Fund which is based gross of fees.

Benchmark returns: Source: Individually disclosed, Basis: The benchmark returns are quoted gross and contain no adjustment for fees.

Please remember that past performance is not a guide to future returns. The price of shares and the revenue from them may fall as well as rise. Investors may not get back the amount originally invested.

The performance data does not take account of the commissions and costs incurred on the subscription and redemption of shares.

Performance is calculated at each period end unless otherwise stated.

[†] Source: abrdn plc.

The other operating charges figure (OOC) is the total expenses paid by each share class, against its average net asset value. This includes the annual management charge, the other operating expenses and any synthetic element to incorporate the ongoing charges of any underlying qualifying investments. The OOC can fluctuate as underlying costs change. Where underlying costs have changed, the OOC disclosed in the Key Information Document will be updated to reflect current changes.

⁻ Subscriptions and redemptions for this share class were in USD.

^Δ Subscriptions and redemptions for this share class are in EUR.

* A perpetual bond is a bond with no maturity date. Perpetual bonds are not redeemable but pay a steady stream of interest.

† Managed by subsidiaries of abrdn plc.

Currently forward positions are not collateralised.

The accompanying notes form an integral part of these financial statements.

Notes to the Financial Statements

1. Presentation

a) Organisation

abrdrn SICAV I (the Company) was incorporated under the laws of the Grand Duchy of Luxembourg on 25 February 1988 as a société anonyme and qualifies as an open-ended société d'investissement à capital variable (a "SICAV") with UCITS status (an Undertaking for Collective Investment in Transferable Securities as defined in the European Union Directive 2009/65/EEC of 13 July 2009, as amended).

The Company is authorised as a UCITS under part I of the law dated 17 December 2010 on undertakings for collective investment, as amended.

The Company's financial year starts on 1 October and ends on 30 September of each year.

As at 30 September 2024, there were 49 separate active sub-funds (the "Funds"), providing shareholders with the opportunities for investment in a wide variety of markets, securities and currencies.

b) Aberdeen Global Indian Equity Limited (the Subsidiary)

Indian Equity makes a substantial part of its investments in India through a wholly owned Subsidiary, Aberdeen Global Indian Equity Limited, a company incorporated in Mauritius. Transactions involving both the Fund and its Subsidiary are accounted for in accordance with their economic substance and accordingly these financial statements reflect the activities of Indian Equity and of its Subsidiary as if all the activities had been undertaken by Indian Equity. On 30 May 2015, the tax residency of the Subsidiary changed from Mauritius to Singapore.

c) Presentation of the financial statements

The accompanying financial statements present the assets and liabilities of the individual Funds and of the Company taken as a whole. The financial information of each individual Fund is expressed in the currency designated in the prospectus for the Funds which is United States Dollars ("USD"). The financial statements have been prepared in accordance with Luxembourg GAAP, applicable to Undertakings for Collective Investment Funds, and with the format prescribed by the Luxembourg authorities for Luxembourg investment companies.

The combined statements were calculated on the basis of aggregation of individual Funds statements with no elimination of cross-investments if any. As of 30 September 2024, the cross-investments within the Company represent USD 58,028,731, or 0.38% of the combined net asset value of the Company.

As the financial statements are produced at a valuation point that is different from the daily dealing Net Asset Values ("NAVs") calculated on 30 September 2024, the NAVs shown throughout the report may differ from those advertised on 30 September 2024 for dealing in the Funds. Those NAVs may include dividend declarations effective for the distribution on 30 September 2024 and certain accounting adjustments relating to the year ended on 30 September 2024.

The financial statements of the Funds have been prepared on a going concern basis, except for those Funds closed to investors during the year (disclosed in the table below) and the Fund which will be closed post year-end, which have been prepared on a non-going concern basis:

Fund closures

Fund	Base currency	Closure date
Asia Pacific Multi Asset Fund	USD	18 April 2024
Emerging Markets Bond Fixed Maturity 2023 Fund	USD	2 October 2023
Global Bond Fixed Maturity 2023 Fund	USD	23 October 2023
Global Climate and Environment Equity Fund	USD	22 May 2024

As at 30 September 2024, the liquidation of some of the above Funds is not complete. There are remaining cash balances that will be used to cover outstanding liabilities, as follows:

Fund	Base currency	Cash balance
Asia Pacific Multi Asset Fund	USD	8,586
Emerging Markets Bond Fixed Maturity 2023 Fund	USD	1,273

Notes to the Financial Statements (continued)

2. Accounting policies

a) Accounting convention

These financial statements are prepared in accordance with Luxembourg regulations applicable to Undertakings for Collective Investment Funds. The financial statements have been prepared under the historical cost convention modified by the revaluation of investments, except for the Fund which will be closed post year-end detailed in the table below:

Fund	Base currency	Closure date
Asian High Yield Sustainable Bond Fund	USD	10 October 2024

To reflect the application of the non-going concern basis of accounting, the Fund listed in the table above, which will be closed post year-end, has been valued at its net realisable value, or bid value, at the balance sheet date.

Below is a reconciliation of the NAV of the Fund between its official pricing point on 30 September 2024 and as shown in the financial statements:

Fund	Asian High Yield Sustainable Bond Fund USD '000
Net Asset Value at official pricing point	16,136
Valuation impact (in Fund currency)	(1)
Net Asset Value as per financial statements	16,135

	A Acc Hedged SGD	A Acc USD	A Gross Mlnc Hedged SGD	A Gross Mlnc USD	K Acc USD
Asian High Yield Sustainable Bond Fund					
Net Asset Value per share at official pricing point	20.6093	10.5751	18.2327	9.3601	10.7253
Swing impact	0.0227	0.0116	0.0201	0.0103	0.0118
Valuation impact	0.0097	(0.0008)	0.0087	(0.0007)	(0.0008)
Net Asset Value per share as per financial statements	20.6417	10.5859	18.2615	9.3697	10.7363
Percentage impact of movement %	0.16	0.10	0.16	0.10	0.10

b) Investment valuation

In determining the value of the assets of the Company, each security and money market instrument listed on a recognised stock exchange or dealt on any other regulated market that operates regularly, is recognised and is open to the public, will be valued at their latest available prices at close of business on 30 September 2024. In the event there should be several such markets, they will be valued on the basis of their latest available prices on the main market for the relevant security.

Securities and money market instruments not listed or traded on a stock exchange or not dealt on another regulated market will be valued at their fair value at which it is expected they may be resold as determined prudently and in good faith by the Board of Directors. Suspended or delisted securities held at 30 September 2024 have been valued at fair value as instructed by the Valuation and Pricing Committee, details of these securities are included in Schedule of Investments.

All other securities and other assets will be valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors.

In the event that the latest available price does not, in the opinion of the Board of Directors, truly reflect the fair market value of the relevant securities and money market instruments, the value of such securities will be defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.

In accordance with the Company's prospectus, the fair value adjustment mechanism is applicable whenever a triggering event occurs. During the year, no fair value adjustments were applied to any of the Funds.

Mortgage and other asset backed securities are independently priced using appropriate models and certain corporate bonds may be priced using indicative broker quotes.

The liquidating value of future, forward or options contracts, if any, traded on exchanges or on other regulated markets shall be based upon the last available settlement prices of these contracts on exchanges and regulated markets on which the particular future, forward or options contracts are traded by the Company; provided that if a future, forward or options contract could not be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors may deem fair and reasonable.

Notes to the Financial Statements (continued)

2. Accounting policies (continued)

c) Investment income

Interest is accrued on a day-to-day basis. In the case of debt securities issued at a discount or premium to maturity value, the total income arising on such securities, taking into account the amortisation of such discount or premium on an effective interest rate basis, is spread over the life of the security.

Interest income on bonds may be received either in cash or as a Payment in Kind ("PIK"). Where a PIK bond settles physically (either because it matures, or it pays interest) the interest income is recognised as the lower of the market value and the nominal value of the settlement.

In the event where there is no physical settlement, the factor change on that holding is recognised as interest income in the Statement of Operations and Changes in Net Assets at the point when the factor change occurs.

Dividends are accounted for on an ex-dividend basis. Interest and dividend income are stated net of irrecoverable withholding taxes, if any.

Securities lending commission is accounted for on an accruals basis.

Bank interest income is accounted for on an accruals basis. It is composed of interest on bank account and interest on term deposits.

d) Foreign exchange

The books and records of each Fund are denominated in the base currency of the corresponding Fund. Amounts denominated in other currencies are translated into the base currency on the following basis:

(i) investment valuations and other assets and liabilities initially expressed in other currencies are converted on each business day into the base currency using exchange rates prevailing on each business day; and

(ii) purchases and sales of foreign investments, income and expenses are converted into the base currency using currency exchange rates prevailing on the respective dates of such transactions.

The combined statements correspond to the sum of the statements of each Fund, converted to USD. The combined figures in the Statement of Operations and Changes in Net Assets have been calculated using the exchange rates ruling at the year-end date. The resulting foreign exchange adjustment of USD 96,215,000 represents the movement in exchange rates between 30 September 2023 and 30 September 2024. This is a notional amount, which has no impact on the net assets of the individual Funds.

Realised and unrealised exchange differences on the revaluation of foreign currencies are taken to the Statement of Operations and Changes in Net Assets.

Main exchange rates used as at 30 September 2024 are as follows:

1 USD =	3.673000	AED	1 USD =	19.602078	MXN
1 USD =	969.932105	ARS	1 USD =	4.123507	MYR

1 USD =	480.769231	KZT	1 USD =	26.424966	ZMW

e) Realised gains and losses on investments

A realised investment gain or loss is the difference between the historic average cost of the investment and the sale proceeds. These are converted into the base currency using currency exchange rates prevailing on the respective dates of the sale transactions.

f) Forward foreign exchange contracts

Unsettled forward foreign exchange contracts are valued using forward rates of exchange applicable at the year-end date for the remaining period until maturity. All unrealised appreciation and depreciation are recognised in the Statement of Operations and Changes in Net Assets. Currently forward positions are not collateralised.

The quoted leverage excludes the impact of the foreign exchange forwards used in currency hedged share classes which are held for those shareholders only. It also excludes the temporary impacts that arise when renewing currency forwards and when closing some exchange cleared derivatives. Although the renewal of currency forwards and closure of exchange traded derivatives results in no change or a reduction in market exposure, gross derivative leverage would increase because new equal and offsetting derivative contracts are traded to facilitate this efficiently. The offsetting contracts are held to their maturity date, which is less than 5 working days for currency forwards.

g) Futures

Futures contracts are valued at the exchange quoted price at close of business on 30 September 2024. Initial margin deposits are made in cash upon entering into futures contracts. During the year the future contract is open, changes in the value of the contract are recognised as unrealised appreciation and depreciation by marking to market on a daily basis to reflect the market value of the contract at the end of each day's trading.

Variation margin payments are made or received, depending upon whether unrealised appreciation or depreciation are incurred. Variation margin payments are recorded in the futures margin account in the Statement of Net Assets and related movements on unrealised results are recorded in the Statement of Operations and Changes in Net Assets. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.

h) Swap/option contracts

Funds may enter into swap agreements such as credit default swaps, interest rate swaps, swaptions, overnight index swaps and inflation linked swaps. Gains or losses resulting from swap contracts are recognised in the Statement of Operations and Changes in Net Assets. Swaps are valued at fair value determined at close of business on 30 September 2024 using external independent third party supplied prices as determined in good faith, pursuant to procedures established by the Board of Directors.

Any outstanding interest accrual on swaps is recorded as either a net receivable or net payable in the Statement of Net Assets. Similarly, the interest received or paid on swaps is disclosed as a net amount in the Statement of Operations and Changes in Net Assets.

Funds may enter into the purchase of call and put options. Gains or losses resulting from option contracts are recognised in the Statement of Operations and Changes in Net Assets. Options are valued at the exchange quoted price at close of business on 30 September 2024.

Notes to the Financial Statements (continued)

3. Share class information

a) General

Within each Fund, the Company is entitled to create different share classes. These are distinguished by their distribution policy or by any other criteria stipulated by the Directors. Please refer to the prospectus for further details. For a list of current live share classes please visit abrdn.com.

The Funds are valued at 1:00 pm Luxembourg time on each dealing day, with the exception of Latin American Equity which is valued at 23:59 hours Luxembourg time on each dealing day.

b) UK Reporting Fund Regime

UK Reporting Fund Regime Status is granted prospectively by the UK taxation authorities. It is the intention of the Board of Directors to continue to comply with the requirements of the Reporting Fund Regime for certain share classes.

Equalisation applies only to shares purchased during the distribution period (Group 2 shares). It is the average amount of income included in the purchase price of Group 2 shares.

Annually and within six months of the year-end, the Manager will publish the UK Reporting Regime Report to investors for all share classes granted reporting Fund status on its website (abrdn.com).

The UK Reporting Regime Report to investors for each share class can also be requested in writing by contacting the Shareholder Service Centre as detailed in the Management and Administration section of this report.

c) Switches

Shares in one Fund may be exchanged or switched into shares of the same or a different class in another Fund or of a different class in the same Fund, subject to the qualifications for investment being met, on any dealing day for the relevant Funds. Shares in the same class may be switched between accumulation and distribution shares within the same class. Investors may switch either a specific number of shares or shares of a specified value.

For full details on switching contact the Global Distributor, UK Distributor, Transfer Agent or a client.operations.emea@abrdn.com.

d) Swing pricing adjustment

Frequent subscriptions and redemptions can potentially have a dilutive effect on the Fund's NAV per share and be detrimental to the long-term investors as a result of the transaction costs that are incurred by the Fund in relation to the trades undertaken by the Investment Manager.

The Board of Directors' current policy through delegation to the Investment Managers' Investor Protection Committee (IPC) is to apply a swing pricing adjustment to the NAV of each share class of all Funds. A swing factor is applied whenever net subscriptions or redemptions exceed a certain threshold determined by the Board of Directors (having considered prevailing market conditions).

The swing pricing adjustment will be recorded in the relevant Fund's NAV and becomes part of the Fund's relevant dealing NAV.

The swing pricing adjustment is a percentage adjustment applied to each share class in a Fund on a dealing day determined on the basis of estimates of any dealing charges (including commission and/or other costs) and/or any bid/offer spread that the Board of Directors believes are appropriate to take into account in respect of that Fund. Such dealing charges will reflect costs and liabilities not included in the calculation of the NAV of the relevant class. The adjustment is recorded in the Statement of Net Assets and Statement of Operations and Changes in Net Assets as "adjustment due to swing pricing".

The net asset values as at 30 September 2024 disclosed in this report do not include any swing pricing adjustments and hence may differ from those published on 30 September 2024 for dealing into the Funds.

The maximum swing factor rate applied on net subscriptions/redemptions exceeding a certain threshold as at and during the year ended 30 September 2024 was 0.75%. There is no pre-set maximum swing factor, the Directors can raise this limit if necessary to protect the interests of investors.

Further information can be found at www.abrdn.com.

e) Equalisation on the subscription and redemption of shares

Equalisation is operated in connection with the subscription and redemption of shares. It represents the income element included in the price for the subscription and redemption of shares.

Notes to the Financial Statements (continued)

4. Expenses

a) Investment management fees

The Investment Managers receive fees for the provision and co-ordination of investment services to the Company, which shall not exceed 3% of the NAV of each Fund. The fees are calculated as a percentage of the NAV of each Fund.

For the purpose of the calculation, the value of each Fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

These fees are accrued daily and are paid monthly in arrears to the Investment Managers. abrdn Investments Limited pays the fees of the Sub-Investment Managers. For certain classes of shares, the Investment Managers reserve the right, at their discretion, to reallocate any investment management fee they receive to certain recognised financial intermediaries or institutions in compliance with applicable laws and regulations.

Where a Fund invests in an open-ended collective investment scheme which is operated or managed by the Investment Manager or an associate of the Investment Manager, no additional annual management charge is incurred by the Fund on such an investment.

The following investment management fees rates were applicable as at 30 September 2024:

⁴ The investment management fee for the classes A,B,C,F and W decreased from 1.20 to 1.00, effective 24 November 2023.

⁵ The investment management fee for the classes G,I,N and X decreased from 0.60 to 0.50, effective 24 November 2023.

⁶ The investment management fee for the classes A,B,C,F and W decreased from 1.20 to 0.95, effective 16 May 2024.

⁷ The investment management fee for the classes G,I,N and X decreased from 0.60 to 0.50, effective 16 May 2024.

⁸ The investment management fee for the classes A,B,C,F and W decreased from 1.75 to 1.50, effective 30 September 2024.

⁹ The investment management fee for the classes G,I,N and X decreased from 1.00 to 0.75, effective 30 September 2024.

¹⁰ The investment management fee for the classes G,I,N and X decreased from 1.00 to 0.75, effective 16 May 2024.

¹¹ The investment management fee for the class L decreased from 1.50 to 0.80, effective 1 December 2023.

¹² The investment management fee for the classes G,I,N and X decreased from 1.00 to 0.85, effective 15 December 2023.

¹³ The investment management fee for the class L increased from 0.45 to 0.60, effective 1 December 2023.

b) Management Company charge

The Company pays an annual charge to the Management Company up to a maximum of 0.05% of the NAV of each Fund.

For the purpose of the calculation, the value of each Fund (and the value attributable to each share class) is taken as at the NAV per share on the previous dealing day, taking into account any subscriptions and/or redemptions on that day.

The Management Company charge shall be accrued daily and payable monthly in arrears. The current Management Company charge is an annual rate of 2.5 basis points (0.025%).

The Management Company charge shall be used to pay the Management Company for the services it provides to the Company (in particular the performance of its monitoring role) and shall include reimbursement for any additional regulatory capital costs incurred by the Management Company by reason of its appointment per annum.

c) Transaction costs

Transaction costs may arise on the acquisition and disposal of investments and these costs may include fees and commissions paid to agents, advisors, brokers, and dealers. These are included in "Net realised gain/(loss) on investments" in the Statement of Operations and Changes in Net Assets.

Dealing commission is usually paid for transactions in securities and derivatives over an exchange (e.g., equities). Transaction costs may not be separately identifiable for transactions that do not occur over an exchange as the costs may be included in the transaction price (e.g., bonds and money market instruments).

For the year ended 30 September 2024, the Funds incurred commission expenses relating to the sale and purchase of Future contracts which have been included in the Statement of Operations and Changes in Net Assets as "Net realised gain/(loss) on future contracts". Similarly, during the year ended 30 September 2024, the Funds incurred commission expenses relating to the sale and purchase of option contracts which have been included in the Statement of Operations and Changes in Net Assets as "Net realised gain/(loss) on option/swaption contracts".

During the year ended 30 September 2024, there were no transaction costs incurred relating to the trading of swaps.

For the year ended 30 September 2024, the Funds incurred transaction costs which have been defined as commissions and tax relating to purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets as follows:

d) General administration charge ("GAC")

Effective 1 June 2024 a general administration charge ("GAC") rate of 0.08% was applied, prior to this the GAC rate was 0.07%.

The operating expenses incurred by the Company are generally paid out of the assets of the relevant Fund. To seek to minimise the variability of these expenses, for a number of these operating expenses, a fixed rate charge of up to a maximum of 0.10% is charged to each share class.

The level of the effective GAC below this maximum level may vary at the Board of Directors' discretion, as agreed with the Management Company, and different rates may apply across the Funds and share classes. The Board of Directors may

Notes to the Financial Statements (continued)

4. Expenses (continued)

d) General administration charge ("GAC") (continued)

amend the maximum fixed level of the GAC applicable to each share class at any time at its discretion upon prior notice to the relevant shareholders.

The effective GAC is calculated in the same way as the investment management fee set out in 4.a) above.

The effective GAC is disclosed as part of the ongoing charges of a share class in the relevant PRIIPS KID.

Full details of the GAC, and the expenses that are included within the charges, can be found within the prospectus of the Company.

e) Distribution fees

Class B, class C and class W shares are subject to an annual distribution fee of 1% except for class B of Frontier Markets Bond for which a distribution fee of 0.75% is applied. These fees are accrued daily and paid monthly in arrears.

f) Expense cap

As at 30 September 2024 the maximum expense caps on the applicable share classes are listed below.

The expense caps are applicable until such time as the Board of Directors changes the expense caps, any changes resulting in an increase in expenses will be communicated to the shareholders as required by applicable legislation. Amounts receivable resulting from the application of expense caps for the year will be paid annually by the Investment Manager.

Fund	Share classes %						
	Class A	Class I	Class J	Class K	Class W	Class X	Class Z
Asian High Yield Sustainable Bond Fund	1.30	0.71	0.45	0.41	2.30	0.75	-
Emerging Markets Bond Fixed Maturity 2023 Fund	0.64	0.35	-	-	-	0.35	-
Global Bond Fixed Maturity 2023 Fund	0.39	-	-	-	-	0.35	-
Global Climate and Environment Equity Fund	1.53	0.94	-	0.53	-	0.94	-
Global Government Bond Fund*	-	-	-	-	-	-	0.104

* Effective 1 May 2024, expense cap was removed.

g) Depositary fees

The depositary fee is calculated at a rate determined by the territory or country in which the Fund assets are invested. Currently, the lowest rate is 0.0017% and the highest rate is 0.0431% of the NAV of the relevant Fund annually.

h) Bank interest

Bank interest expenses arise if there are negative interest rates on deposits and also owing to overdrafts that may arise from time to time.

i) Redemption charge

There are no redemption charges applicable to any class of shares.

5. Dividend distribution

The Directors declared monthly dividends for the Funds as listed below, for the year ended 30 September 2024, to all shareholders on record on the last day of the relevant month.

6. Taxation

a) Taxe d'abonnement

Under legislation and regulations prevailing in Luxembourg, the Funds are subject to the "taxe d'abonnement" (subscription tax) at the rate of 0.05% per annum, except for the share classes which benefit from a reduced tax rate of 0.01% being the classes of shares dedicated to institutional investors. The tax is payable quarterly on the basis of the value of the net assets of the Funds at the end of the relevant calendar quarter. For Funds with investment in Funds already subject to taxe d'abonnement there are exemptions available. For more information, please refer to the prospectus.

b) Indonesian taxes

Indonesian Government bonds issued in the domestic market are subject to 10% capital gains tax. The following provisions have been recorded in the other payables caption of the financial statements:

Fund	Currency	Provision for unrealised gains on IDR holdings '000
Emerging Markets Total Return Bond Fund	USD	9
GDP Weighted Global Government Bond Fund	USD	9
Global Bond Fund	USD	22

c) Indian taxes

Shares in Indian companies and units of equity-oriented funds chargeable to STT are subject to short-term and long-term capital gains tax. Following a rate increase with effect from 23 July 2024, capital gains from the disposal of Indian listed shares held for more than 12 months are now taxable at 12.5% of net capital gains exceeding INR 100,000 (plus additional local taxes) and 20% (plus additional local taxes) when the shares are held for less than 12 months. For the purposes of

Notes to the Financial Statements (continued)

6. Taxation (continued)

c) Indian taxes (continued)

calculating a provision it is assumed that a long-term holding strategy (more than 12 months) will be applied and therefore the provision will be based only on the long-term rate and methodology.

Aberdeen Global Indian Equity Limited (a subsidiary of abrdn SICAV I - Indian Equity), being a Singaporean tax resident entity, is expected to continue to benefit from exemption to Indian capital gains tax on any gains on disposal of shares which were acquired up to 31 March 2017. As such, no provision is accrued on any exempt holdings.

The following provisions have been recorded in the other payables caption of the financial statements:

Fund	Currency	Provision for unrealised gains on INR holdings '000
Asia Pacific Sustainable Equity Fund	USD	14,086
Asian SDG Equity Fund	USD	474
Asian Smaller Companies Fund	USD	7,082
Diversified Growth Fund	EUR	(1)
Diversified Income Fund	USD	5

Future Minerals Fund	USD	45
Global Innovation Equity Fund	USD	461
Global Small & Mid-Cap SDG Horizons Equity Fund	USD	34
Global Sustainable Equity Fund	USD	110
Indian Equity Fund	USD	72,435

d) Withholdings tax reclaims

Where possible, withholding tax reclaims have been filed in respect of the withholding tax applied on dividends and interests on bonds received during recent years. Receivables with respect to the potential refunded amounts are only booked when they are virtually certain.

e) Provision for foreign taxes

Capital gains, dividends and interest on securities received from other countries may be subject to withholding or capital gains taxes imposed by such countries. It is the Company's policy to provide for any material liability to foreign capital gains and income taxes.

7. Soft commission/commission sharing

The Investment Manager has entered into soft commission/commission sharing arrangements with brokers in respect of which certain goods and services used to support investment decision making were received. The Investment Manager does not make direct payment for these services but transacts an agreed amount of business with the brokers on behalf of the Company and commission is paid on these transactions. The goods and services utilised for the Fund include research and advisory services; economic and political analysis, portfolio analysis including valuation and performance measurement, market analysis data and quotation services; computer hardware and software incidental to the above goods and services and investment related publications.

8. Directors' interests and remuneration

None of the Directors were materially interested in any contracts of significance subsisting with the Company either during the year or at 30 September 2024.

The collective remuneration of the Board of Directors charged to the Company amounts to USD 174,104 for the year ended 30 September 2024.

Notes to the Financial Statements (continued)

9. Transactions with connected persons

a) Cross trades

Transactions with connected parties during the year were entered into in the ordinary course of business and on normal commercial terms between the Funds and the Management Company, Investment Manager, Investment Adviser, and any entity in which those parties or their connected persons (as defined in the Code on Unit Trusts and Mutual Funds issued by the Securities and Futures Commission of Hong Kong) have a material interest. To the best of the Management Company's knowledge, the Funds' portfolios do not have any other transactions with connected persons except for those disclosed below:

^AThere were no commissions paid to Citigroup broker entities for the period ended 30 September 2024.

^BThe unrounded commissions paid to Citigroup broker entities for the period ended 30 September 2024 was USD 129.

b) Connected transactions

During the year the Investment Manager undertook certain sale and purchase transactions which were enacted through broker entities forming part of the same group of companies as the Depositary, Citibank, and the details of these are included in the table above. Such transactions were carried out on an arm's length basis at current market value and market rates, and consistent with and the best interests of the Company. To the best of the Investment Manager's knowledge as at the date of preparing this interim report, there are no transactions between the Funds' portfolios and the Management Company, the Investment Manager or any of their connected persons as principal.

c) Related party transactions

Transactions with connected persons outlined in the Expenses Note 4 have been entered into in the ordinary course of business and on normal commercial terms. At the reporting date, the Management Company, abrdn Investments Luxembourg S.A. was a subsidiary of abrdn plc.

As at 30 September 2024 other Funds/Trusts and mandates managed by abrdn plc held investments in the Company valued at USD 4,578,781,772.

10. Overdraft facility

The Company has a USD 50 millions intra-day uncommitted unsecured credit line facility with Bank of America to finance short-term timing differences arising from subscriptions and redemptions. Any liability arising on this account will be recoverable from subscribers to the Company and is therefore not reflected in the financial statements of the Company.

Notes to the Financial Statements (continued)

11. Collateral

The Company paid/received cash collateral from the counterparties to the OTC financial derivative instruments in order to reduce the counterparty exposure, as detailed below:

Fund	Counterparty	Local currency	Local collateral received from the broker '000	Base currency	Base collateral received from the broker '000	Collateral expressed as a percentage of total net assets %
GDP Weighted Global Government Bond Fund	UBS	USD	110	USD	110	0.14
Global Bond Fund	Citigroup	USD	310	USD	310	0.03
Global Bond Fund	Goldman Sachs	USD	160	USD	160	0.01
Global Bond Fund	JP Morgan	USD	460	USD	460	0.04
Global Bond Fund	UBS	USD	490	USD	490	0.04

Fund	Counterparty	Local currency	Local collateral provided to the broker '000	Base currency	Base collateral provided to the broker '000	Collateral expressed as a percentage of total net assets %
Climate Transition Bond Fund	Barclays	USD	1,630	USD	1,630	1.18
Emerging Markets Bond Fund	HSBC	USD	110	USD	110	0.03
Emerging Markets Bond Fund	JP Morgan	USD	220	USD	220	0.06
Emerging Markets SDG Corporate Bond Fund	NatWest Markets	USD	140	USD	140	0.09
Emerging Markets Total Return Bond Fund	Goldman Sachs	USD	110	USD	110	0.12
GDP Weighted Global Government Bond Fund	JP Morgan	USD	230	USD	230	0.30
Global Bond Fund	Barclays	USD	540	USD	540	0.05

The Company did not pay/receive non-cash collateral to/from the counterparties to the OTC financial derivative instruments.

12. Securities lending

The Company has entered into a securities lending program for a number of equity and fixed income Funds. In return for making securities available for loan throughout the year, the Funds participating in the programs received fees which are reflected in the Financial Statements of each participating Fund under the "Securities lending income" caption. The Company has appointed Securities Finance Trust Company (the operating arm of eSec Lending) as agent for the equity and fixed income lending program. As remuneration for this agency role, Securities Finance Trust Company receives 10% of the fees from the securities lending program, abrdn Investments Limited (the Investment manager) receives 5% from the securities lending program and the Company receives 85% of the fees.

Collateralisation in the form of Government Bonds must be with a minimum issuer rating of AA (S&P rating) or Aa3 (Moody's rating). With respect to a government issuer that is rated by both Moody's and S&P, the lower of those two ratings shall apply.

A minimum over-collateralisation of 102% of the value of the underlying securities. The haircut for all eligible collateral will vary between 0 and 2% so that the minimum over-collateralisation of the value of the underlying securities will never fall below 100%.

The following countries may be accepted as collateral:

Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Japan, Luxembourg, Netherlands, New Zealand, Norway, Sweden, Switzerland, United Kingdom & United States.

Collateralisation in the form of equities must be from the listed equities from the following indices. Please refer to the prospectus for further details.

Index	Country
S&P 500	United States

d) Ukraine conflict

The military offensive from Russia against Ukraine since February 2022 continues to pose widespread sanctions on Russian assets. Geopolitical events can adversely affect assets of funds and performance thereon. To ensure the fair treatment of investors, abrdrn's Investor Protection Committee (IPC) undertakes regular reviews of market liquidity across each asset class and fund, making appropriate adjustments where necessary.

abrdrn's Valuation and Pricing Committee ("VPC") also continue to review the valuation of assets and the recoverability of income from those assets, making appropriate adjustments were necessary. The VPC is made up of a wide range of specialists across abrdrn with a wide range of experience in asset pricing.

As at 30 September 2024, the securities issued by Russian companies are valued at 'nil' in the portfolio statements of the respective Funds exposed to such securities. This nil value may not reflect the intrinsic value of those companies but rather reflect the fact that those securities are not tradable as of 30 September 2024.

e) Directors changes

Hugh Young resigned as a Director of the Board of Directors, effective 13 December 2023.

Xavier Meyer was appointed as a Director of the Board of Directors, effective 1 February 2024.

Stephen Bird resigned as a Director of the Board of Directors, effective 14 June 2024.

Emily Smart was appointed as a Director of the Board of Directors, effective 12 August 2024.

f) Prospectus changes

New visa stamped prospectuses were issued on 16 May 2024 and 30 September 2024.

g) IM Delegation changes

The below changes were effective on 14 June 2024:

Fund Name	Current Investment Manager	Current IM delegation	Investment Manager change	IM delegation change
All China Sustainable Equity Fund	abrdrn Hong Kong Limited, abrdrn Investments Limited	abrdrn Asia Limited	No change	N/A
Asian Bond Fund	abrdrn Inc.; abrdrn Investments Limited	abrdrn Asia Limited	abrdrn Investments Limited	No change
Asian Credit Sustainable Bond Fund	abrdrn Inc.; abrdrn Investments Limited	abrdrn Asia Limited	abrdrn Investments Limited	No change
Climate Transition Bond Fund	abrdrn Investments Limited	abrdrn Inc.	No change	abrdrn Asia Limited
Global Innovation Equity Fund	abrdrn Investments Limited	N/A	No change	abrdrn Inc.

h) Other significant events

On 1 June 2024 the general administration charge rate was increased from 0.07% to 0.08%.

Notes to the Financial Statements (continued)

14. Subsequent events

The following Fund will be closed post year-end:

Fund closures

Fund	Base currency	Closure date
Asian High Yield Sustainable Bond Fund	USD	10 October 2024

There are no other subsequent events to be reported after the year ended 30 September 2024.

15. SFDR disclosure

Information on the environmental/social characteristics for Funds disclosing under Article 8 of SFDR, or information on sustainable investments for Funds disclosing under Article 9 of SFDR, respectively, is made available in the annex to the annual report from pages 379 to 736, as part of Appendix 5 which is unaudited.

General Information

Further information on abrdn SICAV I can be obtained from:

abrdn Investments Luxembourg S.A.

35a, avenue John F. Kennedy
L-1855 Luxembourg
Grand Duchy of Luxembourg

You can find further information about the Company, all available Funds within the Company and share classes at www.abrdn.com. The prospectus, the PRIIPS KIDs, the articles of incorporation, the audited annual report and the unaudited semi-annual report of abrdn SICAV I may be obtained free of charge and in paper form from the Transfer Agent or the local paying agents, representatives and information agents. Please refer to the prospectus for the contact addresses of the local paying and information agents, representatives and information agents.

For investors located in EU/EEA countries, and where the Company is registered for distribution, and unless otherwise specified, facilities according to Article 92(1)(a) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available from the Transfer Agent.

The following facilities according to Article 92(1)(b) to (e) of the EU Directive 2009/65/EC (as amended by Directive 2019/1160) are available at www.eifs.lu/abrdn.

1. Information on how orders (subscription, repurchase and redemption) can be made and how repurchase/redemption proceeds are paid;
2. Information and access to procedures and arrangements relating to investors' rights and complaints handling;
3. The latest prospectus, the articles of incorporation, the annual and semi-annual reports, net asset value as well as the key information documents.

Subscription and redemption of shares

Applications for subscription, redemption and conversion of shares should be sent to the Transfer Agent.

Furthermore, any additional information which is available at the registered office of the Company will also be available at the Transfer Agent.

Share price publication

Subscription prices and redemption prices are available at www.abrdn.com and are also available at the offices of the Transfer Agent.

Taxation

Tax regulations and the practices of financial authorities are constantly subject to change. Because of the complexity of tax laws in different jurisdictions, it is recommended that investors contact a tax adviser regarding the effect on their individual tax situation.

Additional Information for investors in Germany

For the following Funds of the Company, no notification for marketing in the Federal Republic of Germany has been filed with the Federal Financial Supervisory Authority (BaFin), so that shares of these Funds may not be marketed to investors within the jurisdiction of the Investment Code (KAGB):

- abrdn - CCBI Belt & Road Bond Fund
- Emerging Markets Sustainable Equity Fund
- Asian High Yield Sustainable Bond Fund

It is possible to view the prospectus, the PRIIPS KIDs, the articles of incorporation of the Company as well as the annual and semi-annual reports at the Transfer Agent.

Furthermore, subscription, redemption and conversion prices of the shares and any notices to the shareholders and any additional information which is also available at the registered office of the Company will be available at the Transfer Agent.

General Information (continued)

Additional Information for investors in Germany (continued)

Share price publication

Subscription, redemption and conversion prices of the shares will also be available at www.abrdn.com and at the offices of the Transfer Agent. Any notices to the shareholders will be published in on www.abrdn.com.

In addition, communications to investors in the Federal Republic of Germany will be sent by mail in the following cases:

- suspension of the redemption of shares,
- termination of the management of the Fund or its liquidation,
- any amendments to the Fund rules which are inconsistent with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the Fund with one or more other Funds, and
- the change of the Company into a feeder fund or the modification of a master fund.

Additional Information for investors in Switzerland

1. Representative

Until 30 September 2024: The representative in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

Starting 1 October 2024: The representative in Switzerland is FIRST INDEPENDENT FUND SERVICES LTD, Feldeggstrasse 12, 8008 Zurich, Switzerland.

2. Paying agent

Until 30 September 2024: The paying agent in Switzerland is BNP Paribas, Paris, Zurich Branch, Selnaustrasse 16, 8002 Zurich, Switzerland.

Starting 1 October 2024: The paying agent in Switzerland is NPB New Private Bank Ltd, Limmatquai 1, 8001 Zurich, Switzerland.

3. Place where the relevant documents may be obtained

The prospectus, the PRIIPS KIDs, the articles of incorporation, the annual and semi-annual reports and a schedule of purchases and sales for the Funds can be obtained free of charge from the Swiss representative.

4. Publications

Publications in respect of abrdn SICAV I are published on the electronic platform of fundinfo AG Zurich (www.fundinfo.com). The subscription and redemption prices or the NAV with indication of "excluding commissions" are published on a daily basis on www.fundinfo.com.

5. Payment of retrocessions and rebates

In connection with distribution in Switzerland, abrdn Investments Luxembourg S.A. or its affiliates may pay retrocessions in order to cover the distribution and procurement activities of shares. These activities include but are not limited to the organisation of road shows, the attendance of events and fairs, the production of marketing material and the training of distribution collaborators. The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution. On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the Funds of the investors concerned. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. Rebates may also be paid directly to the investors in order to reduce the fees and cost attributed to the Fund, as long as they:

- are paid from fees which have been charged to the assets of the Fund and not in addition;
- are paid on the basis of objective criteria;
- are paid to all investors fulfilling the objective criteria in the same amount and at the same time.

General Information (continued)

Additional Information for investors in Switzerland (continued)

5. Payment of retrocessions and rebates (continued)

Rebates can only be paid if the following preconditions are fulfilled:

- The minimum investment in a collective investment scheme or in a range of collective investment schemes;
- The amount of fees resulting from the investment;
- The expected duration of the investment;
- The readiness of the investor to support the launch of the sub-fund.

At the request of the relevant investor receiving such rebate, abrdn Investments Luxembourg S.A. or its affiliates must disclose the amount free of charge.

6. Place of performance and jurisdiction

The place of performance and jurisdiction for the shares distributed in or from Switzerland is at the registered office of the representative.

Appendix 1: Risk Management (Unaudited)

The market risk measurement and monitoring of the Funds is carried out using either the Commitment approach or the Value at Risk (VaR) approach.

Funds which do not make significant use of financial derivative instruments and/or limit their use of financial derivative instruments to efficient portfolio management or hedging strategies are monitored using the Commitment approach.

Funds which utilise financial derivative instruments for efficient portfolio management purposes and/or for investment purposes in pursuing their investment objective (in addition to those used for hedging purposes) are monitored using either the relative or absolute VaR approach.

Risk Type

The Management Company uses the Commitment approach and the VaR approach for the abrdn SICAV I Funds as detailed below.

Commitment approach

The Commitment approach is based on the positions of financial derivative instruments, converted into their corresponding underlying equivalents as per ESMA Guidelines 10-788 – BOX 2.

Netting and Hedging might be considered for financial derivative and their underlying assets. The sum of these underlying equivalents must not exceed the net asset value of the Fund.

The global risk on derivatives has been determined according to the commitment approach during the reporting year.

Value at Risk (VaR) approach

In accordance with CSSF Circular 11/512, the Regulatory VaR limit associated with a Fund's total portfolio positions must not exceed two times (i.e. 200%) the VaR of its assigned Risk Benchmark for Funds under Relative VaR approach or 20% VaR (99% confidence level, 20-day holding period) for Funds monitored under the absolute VaR approach.

The VaR model used is a MonteCarlo Simulation model with historical observation period of risk factors of 3 years.

Appendix 1: Risk Management (Unaudited) (continued)

Leverage

For Funds measuring and monitoring the global risk on derivatives via VaR approach, the Management Company also determines the sum of the nominal values or equivalent values of all the relevant derivatives and estimates in this regard a degree of the expected average value (leverage).

The expected levels of leverage indicated below reflect the use of all derivative instruments within the portfolio of a given Fund. An expected level of leverage does not necessarily represent an increase of risk in the Fund as some of the financial derivative instruments used may even reduce the risk. Shareholders should note that the "Sum of Notionals" approach of the expected level of leverage does not make a distinction as to the intended use of a derivative, e.g. being either hedging or investment purposes.

The "Sum of Notionals" calculation typically results in a higher leverage figure than for the commitment approach calculation predominantly due to the exclusion of any netting and/or hedging arrangements.

The average leverage figures below have been compiled based on the daily figures from the period 1 October 2023 to 30 September 2024.

Fund	Global Exposure	Average Leverage Sum of Notional %
Asia Pacific Multi Asset Fund ¹	Relative VaR	159.30
Asian Bond Fund	Relative VaR	130.06

Lending transactions operate on a rolling one day contract and can be recalled on demand.

Data on reuse of collateral

Collateral is held with a segregated account by the Funds' Custodian and will not be sold, re-invested or pledged.

Safekeeping of collateral granted

At the year-end there was no collateral posted by the Funds.

Received

As at the year-end date, collateral was received for securities lending transactions into a segregated account at the Funds' Custodian in the form of Government bonds and main market listed equity valued at USD 395 million.

Return and cost per type of SFT

The revenues arising from securities lending is detailed in Note 12.

Appendix 3: Remuneration Policy (Unaudited)

Alternative Investment Fund Managers Directive (UCITS V)

Remuneration Disclosure UCITS V Annual Report and Accounts

Remuneration Policy

The abrdn plc Remuneration Policy applies with effect from 1 January 2023. The purpose of the abrdn plc Remuneration Policy (the "Policy") is to document clearly the remuneration policies, practices and procedures of abrdn as approved by the abrdn plc Remuneration Committee (the "Committee"). The Policy is available on request.

The Policy applies to employees of the abrdn group of companies ("Group" or "abrdn"), including UCITS V Management Companies ("ManCos") and the UCITS V funds that the ManCo manages.

Remuneration Principles

abrdn applies Group wide principles for remuneration policies, procedures and practices ensuring that:

- Remuneration within the Group is simple, transparent and fair.
- Our Policy supports our long-term strategy by reinforcing a performance-driven culture. It aligns the interests of our employees, shareholders and, importantly, our clients/customers.
- Our remuneration structure is flexible to accommodate the different challenges and priorities across all businesses and functions as appropriate.
- Remuneration policies, procedures and practices promote good conduct, including sound and effective risk management and do not encourage risk taking that exceeds the level of tolerated risk appetite.
- Remuneration extends beyond the provision of fixed and variable pay, with a focus on the retirement provision and the wellbeing needs of our employees, as part of our remuneration philosophy.

Total remuneration delivered is affordable for the Group.

Remuneration Framework

Employee remuneration is composed principally of fixed and variable elements of reward as follows:

- a) Fixed remuneration (salary and cash allowances, where appropriate) and Benefits (including pension).
- b) Variable remuneration (bonus, a proportion of which may be subject to retention or deferral depending on role and regulatory requirements; senior employees may also be awarded a long-term incentive award).

Appropriate ratios of fixed: variable remuneration will be set to as to ensure that:

- a) Fixed and variable components of total remuneration are appropriately balanced and
- b) The fixed component is a sufficiently high proportion of total remuneration to allow abrdn to operate a fully flexible policy on variable remuneration components, including having the ability to award no variable remuneration component in certain circumstances where either individual and/or Group performance does not support such an award.

Base salary	Base salary provides a core reward for undertaking the role and depending on the role, geographical or business market variances or other indicators, additional fixed cash allowances may make up a portion of fixed remuneration. Periodic reviews take into account the employee's role, scope of responsibilities, skills and experience, salary benchmarks (where available) and, where relevant, any local legislative or regulatory requirements.
Benefits (including retirement benefit where appropriate)	Benefits are made up of core benefits which are provided to all employees; and extra voluntary benefits that may be chosen by certain employees which may require contribution through salary sacrifice or other arrangements. Retirement benefits are managed in line with the relevant legislative requirements and governance structures. In certain, very limited circumstances, a cash allowance may be offered in lieu of a retirement arrangement.

Appendix 3: Remuneration Policy (Unaudited) (continued)

Annual Awards	Performance	Bonus	
			<p>Employees who have been employed during a performance year (1 January to 31 December) may be eligible to be considered for an annual bonus in respect of that year.</p> <p>Annual bonuses are based upon Group, Business/Function, Team and Individual performance (with individual performance assessed against agreed goals and behaviours). The variable remuneration pool for all eligible employees, including Identified Staff or Material Risk Takers ("MRTs"), is determined initially by reference to profitability and other quantitative and qualitative financial and non-financial factors including risk considerations (on an ex-post and ex-ante basis). In reaching its final funding decision, the Committee exercises its judgement to ensure that the outcome reflects holistic Company performance considerations.</p> <p>abrdrn Investments Luxembourg S.A. has specific obligations to act in the best interests of the UCITS V funds it manages and its investors. Accordingly, the performance of the underlying funds and the interests of investors (including, where relevant, investment risk) are also taken into account as appropriate. The Risk and Capital Committee and the Audit Committee formally advise the Committee as part of this process.</p> <p>The overall bonus pool is allocated to businesses and functions based on absolute and relative performance of each business and function and their alignment with strategic priorities and risk considerations. Allocation by region and subdivision/team is determined on a discretionary basis by the business/function and regional heads based on the absolute and relative performance of the constituent teams and alignment with strategic priorities.</p> <p>Individual annual bonus awards are determined at the end of the 12-month performance period with performance assessed against financial and non-financial individual objectives, including behaviour and conduct. Individual awards for Identified Staff are reviewed and approved by the Committee (with some individual award approvals delegated, as appropriate, to the Group's Compensation Committee, over which the Committee retains oversight). In carrying out these approvals, the Committee seeks to ensure that outcomes are fair in the context of overall Group performance measures and adjusted, where appropriate, to reflect input from the Risk and Capital Committee and the Audit Committee. Variable remuneration awards are subject to deferral for a period of up to three years. A retention period may also be applied as required by the relevant regulatory requirements. Deferral rates and periods comply, at a minimum, with regulatory requirements. In addition to the application of ex-ante adjustments described above, variable remuneration is subject to ex-post adjustment (malus / clawback arrangements).</p>

Appendix 3: Remuneration Policy (Unaudited) (continued)

Other elements of remuneration – selected employees	<p>The following remuneration arrangements may be awarded in certain very limited circumstances:</p> <p>Carried Interest Plans – These arrangements are designed to reward performance in roles where a carried interest plan is appropriate. Selected employees are granted carried interest shares in private market funds established by the Group.</p> <p>Buy-Out Awards/Guaranteed Bonuses – These are intended to facilitate/support the recruitment of new employees. Buy-outs are not awarded, paid or provided unless they are in the context of hiring new employees. Guaranteed bonuses are not awarded, paid or provided unless they are exceptional and in the context of hiring new employees and limited to the first year of service. These awards are only made where such a payment or award is permitted under any relevant remuneration regulations and are designed to compensate for actual or expected remuneration foregone from previous employers by virtue of their recruitment.</p> <p>Retention and Special Performance Awards / LTIP – Supports retention and/or the delivery of specific performance outcomes and/or to incentivise senior employees to support the long-term, sustained performance of abrdn. The Company may determine that it is appropriate to grant such awards in limited circumstances. Awards are structured to deliver specific retention and/or performance outcomes. Retention and/or special performance awards comply with all relevant regulatory requirements.</p> <p>Severance Pay – Payment made to support an employee whose role is considered to be redundant. Severance payments comply with any legislative and regulatory requirements and any payments are inclusive of any statutory entitlement. In the event of severance, the treatment of any individual elements of an employee’s remuneration is governed, as appropriate, by relevant plan or scheme rules.</p>
---	--

Control Function

The Group ensures that, as appropriate, senior employees engaged in a control function are independent from the business units they oversee and have appropriate authority to undertake their roles and duties. These include, but are not necessarily limited to, Risk, Compliance and Internal Audit function roles. Senior employees engaged in a control function are remunerated in a way that ensures they are independent from the business areas they oversee, have appropriate authority and have their remuneration directly overseen by the Committee.

Conflicts of Interest

The Policy is designed to avoid conflicts of interest between the Group and its clients and is designed to adhere to local legislation, regulations or other provisions. In circumstances or jurisdictions where there is any conflict between the Policy and local legislation, regulations or other provisions, then the latter prevail. Where the Committee receives input from members of management on the remuneration arrangements in operation across the Group, this never relates to their own remuneration.

Personal Investment Strategies

The Company adheres to the regulatory principles and industry best practice on the use of personal hedging strategies which act in restricting the risk alignment embedded in employee remuneration arrangements.

UCITS V Identified Staff/MRTs

The 'Identified Staff' or MRTs of abrdn Investments Luxembourg S.A. are those employees who could have a material impact on the risk profile of abrdn Investments Luxembourg S.A. or the UCITS V funds it manages. This broadly includes senior management, decision makers and control functions. For the purposes of this disclosure, 'Identified Staff' includes employees of entities to which activities have been delegated.

Quantitative remuneration disclosure

The table below provides an overview of the following:

- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its entire staff; and
- Aggregate total remuneration paid by abrdn Investments Luxembourg S.A. to its UCITS V 'Identified Staff'.

Amounts shown reflect payments made during the financial reporting period in question. The reporting period runs from 1 January 2023 to 31 December 2023 inclusive.

Appendix 3: Remuneration Policy (Unaudited) (continued)

	Headcount	Total Remuneration GBP'000
abr dn Investments Luxembourg S.A. staff¹	1,300	170,654
of which		
Fixed remuneration		139,925
Variable remuneration		30,729
abr dn Investments Luxembourg S.A. 'Identified Staff'²	95	34,647
of which		
Senior Management ³	40	21,090
Other 'Identified Staff'	55	13,557

¹As there are a number of individuals indirectly and directly employed by abr dn Investments Luxembourg S.A. this figure represents an apportioned amount of abr dn's total remuneration fixed and variable pay, apportioned to the ManCo on an AUM basis. The Headcount figure provided reflects the number of beneficiaries calculated on a Full Time Equivalent basis

²The Identified Staff disclosure relates to UCITS V MRTs and represents total compensation of those staff of the ManCo who are fully or partly involved in the activities of the ManCo.

³Senior management are defined in this table as ManCo Directors and members of the abr dn plc Board, together with its Executive Committee, Investment Management Committee.

Appendix 4: French Plan d'Épargne en Actions ("PEA") Disclosure (Unaudited)

Europe ex UK Sustainable Equity Fund

The Fund has undertaken, by virtue of the application of article 91, paragraph L of Annex II of the French 'Code général des impôts', to ensure that at least 75% of the net assets of the Fund are permanently invested in the eligible securities mentioned in paragraphs a, b and c of section 1° of article L.221-31 of the French 'Code monétaire et financier'.

As at the date of this report, the Fund had the following % in PEA eligible assets:

Europe ex UK Sustainable Equity Fund 81.34%.

The PEA eligibility of the Fund results from, to the best knowledge of the Company, tax law and practices in force in France as at 30 September 2024. Such tax law and practices may change from time to time and, therefore, the Fund which may currently be held within the framework of a PEA could lose its PEA eligibility. The Fund could lose its PEA eligibility due to changes impacting its investment universe or benchmark index.

Appendix 5: Sustainability Related Disclosures (Unaudited)

The EU Sustainable Finance Disclosure Regulation (SFDR) sets out in Articles 8 and 9 the sustainability-related reporting requirements, respectively for Funds that promote environmental or social characteristics and Funds that have sustainable investments as their objective. In addition, all financial products are required to disclose (see Company's prospectus) their approach to integrating sustainability risks into the investment decision-making in line with Article 6 of the SFDR. The following table outlines the SFDR Article under which the Funds make sustainability-related reporting.

Emerging Markets SDG Corporate Bond Fund	Article 9
Emerging Markets SDG Equity Fund	Article 9
Global Small & Mid-Cap SDG Horizons Equity Fund	Article 9

The above Article 6 Funds do not promote environmental or social characteristics and have no sustainable investment objectives. The investments underlying these financial products do not take into account the EU criteria for environmentally sustainable economic activities. These Funds also do not consider principal adverse impacts.

The above Article 8 Funds promote environmental or social objectives. The "do no significant harm" principle applies only to those investments underlying the financial products that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of these financial products do not take into account the EU criteria for environmentally sustainable economic activities.

The above Article 9 Funds have sustainable investments as their objective.

Product name: **abrdn SICAV I - All China Sustainable Equity Fund**Legal entity identifier **549300LJPPGVR19E3P13****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.50% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 0.0%, ESG Q2: 30.2%, ESG Q3: 61.4%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 75% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating BBB
- Benchmark rating BBB

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 5%, ESG Q2: 47%, ESG Q3: 48%, ESG Q4: 0%. The Fund achieved a 69.82% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (BBB) when compared with the benchmark (BB).

Period	2024	2023
E/S Characteristics	98.89%	95.27%
Sustainable investment	42.50%	39.89%
Other environmental	23.03%	16.78%
Social	19.47%	23.11%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TENCENT HOLDINGS LTD	Communications	9.52	China
KWEICHOW MOUTAI CO LTD-A	Consumer Staples	6.66	China

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 35% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	1.40
Financials	Insurance	5.14
Financials	Banking	7.67
Technology	Tech Hardware & Semiconductors	4.10
Technology	Software & Tech Services	1.73

Consumer Staples	Consumer Staple Products	11.75
Consumer Staples	Retail & Wholesale - Staples	1.30
Materials	Materials	2.21
Utilities	Utilities	0.90

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

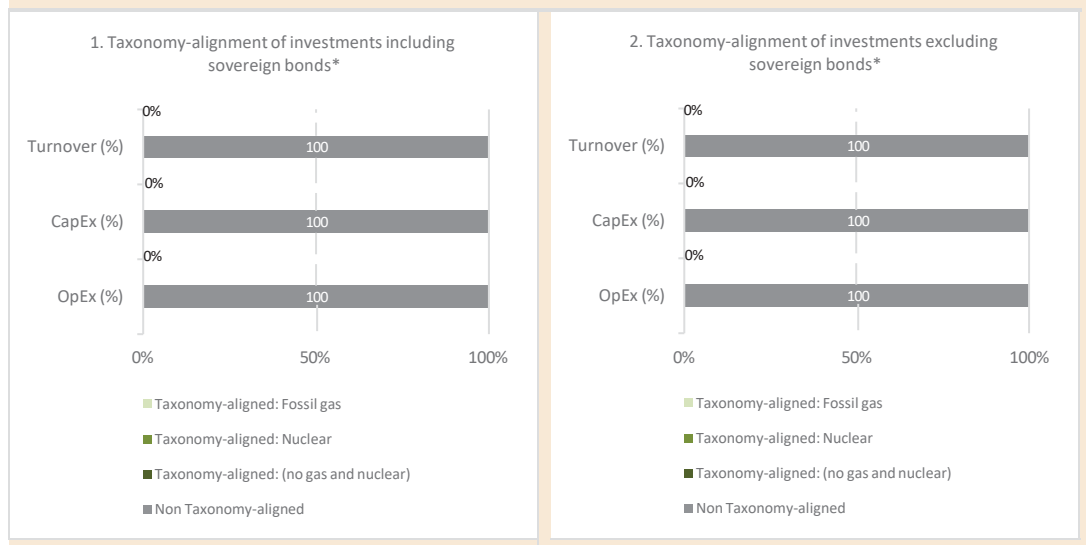

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.03% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 19.47%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.11% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Labour Rights, Supply Chain Management, and Corporate Governance: 1) Wuxi Biologics - We spoke with an independent director of Wuxi Biologics as part of our ongoing active ownership strategy with the company. We had a very open and candid

meeting, and discussed board and management interaction, board recruitment and refreshment, skill-set gaps, succession planning, and risk management. We will look to continue this conversation, but this was a good first meeting for us. 2) CATL - We engaged with CATL to understand its ESG practices in its European capacity expansion, and its stance towards the risks around Xinjiang and the Uyghur Forced Labor Prevention Act (UFLPA), a US law that prohibits goods from being imported into the United States that are either produced in Xinjiang, or by entities identified on the UFLPA Entity List, unless the importer can prove, by clear and convincing evidence, the goods were not produced with forced labour. CATL provided us with reassuring responses. Its ESG risk management framework includes a transparent materials tracing mechanism that allows it to provide a robust response to any concerns about its lithium supply. Hence, we are confident that CATL has a solid base in which to defend and address any ESG controversies that could impact its fundamentals. 3) Maxscend Microelectronics - We kick-started our ESG engagement with Maxscend which has a low ESG rating of CCC from MSCI, given that its management has expressed keen interest to improve its MSCI rating and ESG disclosure. We sent our suggestions around supply chain management and human capital management to Maxscend. These ideas were well accepted by its management, which would include them in its new ESG report for the current financial year. At the same time, we also highlighted to MSCI the areas of good disclosure by Maxscend that may help its assessment, and connected MSCI with Maxscend, given the lack of communication between them in the past.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***

Product name: **abrdn SICAV I - Asia Pacific Sustainable Equity Fund**Legal entity identifier **549300VQNI2BMVUKCH84****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.25% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 10.4%, ESG Q2: 48%, ESG Q3: 33.5%, ESG Q4: 2.3%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 30.69% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating A
- Benchmark rating A

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 14%, ESG Q2: 52%, ESG Q3: 31%, ESG Q4: 3%. The Fund achieved a 31.02% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved the same ESG rating based on MSCI data (A) when compared with the benchmark (A).

Period	2024	2023
E/S Characteristics	98.65%	98.12%
Sustainable investment	61.25%	55.73%
Other environmental	30.10%	15.65%
Social	31.14%	40.08%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
GREENCOAT UK WIND PLC	Real Estate	3.65	United Kingdom
RENEWABLES INFRASTRUCTURE GR	Energy	2.92	United Kingdom
LA BANQUE POSTALE 1.375% 04/24/2029	Financials	2.47	France
GREENCOAT RENEWABLES PLC	Financials	2.10	Ireland
INDIA GREEN POWER HOLD 4% 02/22/2027	Utilities	1.93	India
SUZANO AUSTRIA GMBH 3.75% 01/15/2031	Materials	1.89	Brazil

EQUINIX INC 1.55% 03/15/2028	Real Estate	1.06	United States of America

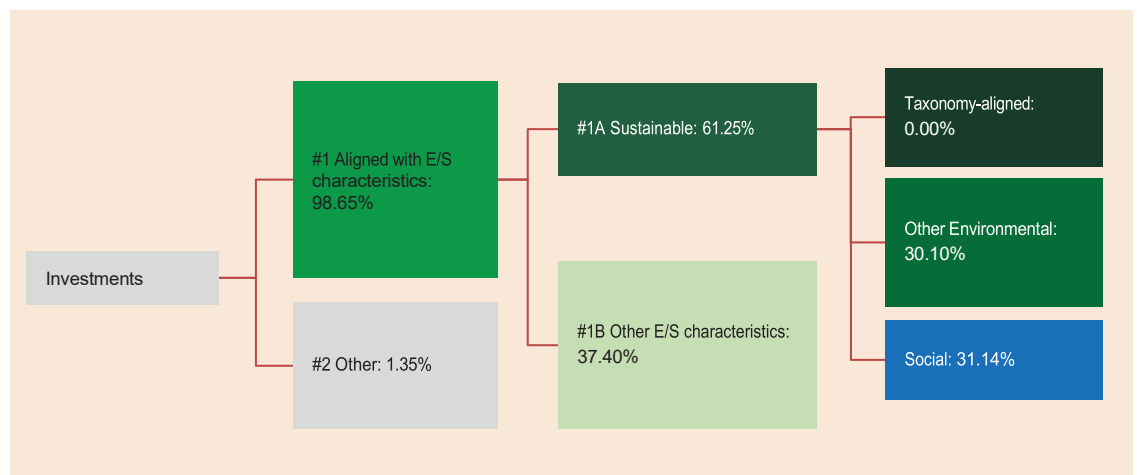

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	1.18
Financials	Insurance	6.65
Financials	Banking	11.96
Real Estate	Real Estate	4.66
Technology	Tech Hardware & Semiconductors	25.31
Technology	Software & Tech Services	1.65
Communications	Telecommunications	3.22
Communications	Media	9.61
Consumer Discretionary	Retail & Whsle - Discretionary	2.81
Consumer Discretionary	Consumer Discretionary Products	3.11
Consumer Discretionary	Consumer Discretionary Services	1.34
Health Care	Health Care	9.74
Industrials	Industrial Products	2.41
Consumer Staples	Consumer Staple Products	4.40
Materials	Materials	5.34
Utilities	Utilities	1.80
Energy	Oil & Gas	1.69
Energy	Renewable Energy	0.53

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

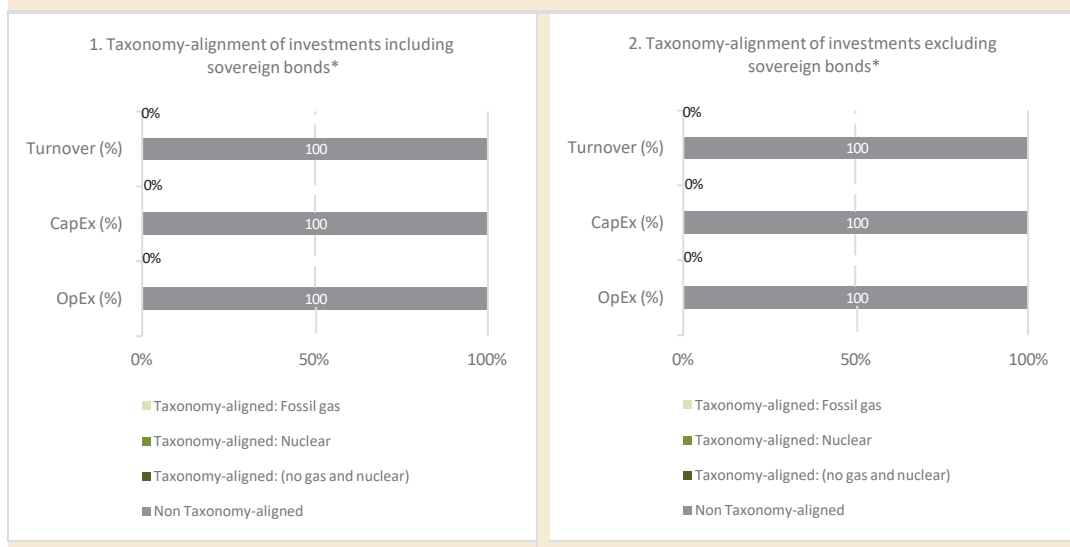

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30.10% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 31.14%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.35% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, and Corporate Governance: 1) Korea Shipbuilding & Offshore Engineering - Engaging with the company, we explored potential opportunities arising from the green economy trend. The company underscored its leadership in providing eco-

friendly marine vessel solutions. Notably, it disclosed plans to introduce ammonia-powered engines in the latter half of this year. 2) Ultratech Cement - At our recent meeting, we were pleased to note that Ultratech has committed to producing carbon-neutral concrete by 2050. The key hurdles are around carbon capture technology and the kiln. Ultratech is running a pilot study on the electrification of the kiln, but the costs are prohibitive currently and will require policy support, and so it is engaging the government on this. On the governance front, we learnt that the audit committee is now 100% independent and that there will be material board refreshment next year with three directors retiring. 3) Rio Tinto - We engaged with Rio Tinto to discuss proposed changes to its remuneration policy, which are due to be tabled at the 2024 annual general meeting. We had questions about several aspects of the proposals, notably related to performance measures and vesting thresholds for the long-term incentive plan and share deferral requirements for the annual bonus. We will continue our engagement to seek further clarification and reiterate our views.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - Asian Credit Sustainable Bond Fund**Legal entity identifier **2221004DUVC2YZH1DH93****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.47% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are no high risk issuers held in the fund. Therefore, since all issuers pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the MSCI ESG rating. This is implemented by excluding the bottom 10% of issuers with MSCI ESG rating that are in the benchmark.

We confirm that during the reporting period the Fund achieved a better ESG rating based on MSCI data when compared with the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark (JACI Diversified), in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 32.28 %.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

During the previous reporting period, the fund did not hold any high risk rating issuers. The screening criteria as applied and there were no holdings in the fund that failed the agreed criteria. The bottom 10% of issuers with a MSCI ESG Rating that are in the benchmark were excluded and for carbon the portfolio performed better than the benchmark, in line with our commitment to target lower carbon intensity relative to the benchmark. We confirmed that during the reporting period the Fund achieved a better ESG rating based on MSCI data when compared with the benchmark and that the Fund focused engagement and analysis on governance and that using the MSCI ESG Rating and the FI Risk Rating, we avoided those companies with the worst governance practices.

Period	2024	2023
E/S Characteristics	99.35%	98.21%
Sustainable investment	47.47%	51.34%
Other environmental	23.47%	25.24%
Social	23.99%	26.11%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 15% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are

economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (Capex)

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (Opex) reflecting green operational activities of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.47% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 23.99%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0.65% of assets in the “Other” category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than the benchmark,
- targeting an ESG rating better than or equal to the benchmark,
- promoting good governance, including social factors.

These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs within the investment process. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How does the reference benchmark differ from a broad market index?*

Not applicable

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

● *How did this financial product perform compared with the reference benchmark?*

Not applicable

● *How did this financial product perform compared with the broad market index?*

Not applicable

Product name: **abrdn SICAV I - Asian High Yield Sustainable Bond Fund**Legal entity identifier **213800YKEBWPY66HIS11****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.90% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund has closed to all investors and is in the process of liquidation at the year end date.

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irreparable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within

this Fund, however a broader suite of characteristics might also have been promoted on an investment-by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

The Fund has closed to all investors and is in the process of liquidation at the year end date.

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are no high risk issuers held in the fund. Therefore, since all issuers pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the MSCI ESG rating. This is implemented by excluding the bottom 10% of issuers with MSCI ESG rating that are in the benchmark.

We confirm that during the reporting period the Fund achieved a better ESG rating based on MSCI data when compared with the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark (JP Morgan JACI Non Investment Grade Index), in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was not applicable because at year-end the fund only held cash ahead of closure.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practice

● **...and compared to previous periods?**

The fund has closed to all investors and is in the process of liquidation at the year end date. During the previous reporting period, there were no high risk due to governance issuers held in the fund. The screening criteria as applied and there were no holdings in the fund that failed the agreed criteria. The bottom 5% of issuers with a MSCI ESG Rating that are in the benchmark were excluded and the portfolio performed better than the benchmark, in line with our commitment to target lower carbon intensity relative to the benchmark.

Period	2024	2023
E/S Characteristics	63.77%	99.02%
Sustainable investment	27.90%	43.62%
Other environmental	13.19%	18.94%
Social	14.71%	24.68%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The fund has closed to all investors and is in the process of liquidation at the year end date.

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund has closed to all investors and is in the process of liquidation at the year end date.

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Fund has closed to all investors and is in the process of liquidation at the year end date.

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Fund has closed to all investors and is in the process of liquidation at the year end date.

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has closed to all investors and is in the process of liquidation at the year end date.

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund has closed to all investors and is in the process of liquidation at the year end date.

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (Capex) showing the green investments made by investee companies, e.g. for a transition to a green economy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- operational expenditure (Opex) reflecting green operational activities of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund has closed to all investors and is in the process of liquidation at the year end date.
The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund has closed to all investors and is in the process of liquidation at the year end date.
The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has closed to all investors and is in the process of liquidation at the year end date.
The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 13.19% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The fund has closed to all investors and is in the process of liquidation at the year end date.

The share of sustainable investments with a social objective is 14.71%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund has closed to all investors and is in the process of liquidation at the year end date.

The Fund invested 36.23% of assets in the “Other” category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has closed to all investors and is in the process of liquidation at the year end date.

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than the benchmark,
- targeting an ESG rating better than or equal to the benchmark,
- promoting good governance, including social factors. These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs within the investment process. The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Product name: [abrdrn SICAV I - Asian SDG Equity Fund](#)

Legal entity identifier [2138001SZMMAO7HILY92](#)

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 49.03%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 46.92%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund aimed to achieve long term growth by investing in companies in Asian Market countries which, in our view, were making a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs'). Our SDG proposition focused on companies making a material, intentional, positive contribution to the environment and society. The specific methodology and criteria are outlined within our prospectus and website disclosures. For the relevant Prospectus, see [abrdrn.com](#). For the Fund's Sustainable Investment Approach, see [abrdrn.com](#). The sustainable development goal strategies invested in companies that were making a positive and material contributions to environmental and social challenges aligned with at least one of eight impact pillars or were an SDG Leader. The pillars and associated sub-themes and indicators were developed using the UN SDGs. But above all, we aimed to align our sustainable development objectives with the most pressing global problems according to the UN. Therefore as the needs of the world changed, our impact pillars might evolve. The linkages with the SDGs are below: Circular Economy 0.00%, Sustainable Energy 19.40%, Food & Agriculture 4.90%, Water & Sanitation 0.00%, Health & Social Care 20.40%, Financial Inclusion

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund invested in companies with a minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN’s SDGs. For companies classified in the benchmark as ‘Financials’, alternative measures of materiality are used based on loans and customer base. The breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 2.0%, SDG02 - Zero Hunger 1.5%, SDG03 - Good Health and Well-Being 20.4%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 28.0%, SDG08 - Decent Work and Economic Growth 12.1%, SDG09 - Industry, Innovation, Infrastructure 13.8%, SDG10 - Reduce Inequalities 0.0%, SDG11 - Sustainable Cities and Communities 3.3%, SDG12 - Responsible Consumption and Production, 0.0%, SDG13 - Climate action, 2.3%, SDG15 - Forestry 2.3%, and SDG Leader 11.5%. The Fund achieved a 71.61% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis). Application of the fund's approach resulted in at least 20% of the Fund’s investment universe being excluded as at 30 Sept 2024. Further, key performance indicators (KPIs), or targeted outputs, have been set for each company held in the Fund in order to assess how products and services contribute to positive social and environmental outcomes globally. These KPIs in addition to case studies and additional analysis are reported annually in the Fund’s SDG Report. Please see the most recent annual SDG report (available here: abrdn.com) for full discussion on these KPIs as they will vary year by year. We also confirm that during the reporting period, company exclusions are applied to exclude the particular areas of investment related to UN Global Compact, ILO and OECD, Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE) Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil and Gas and Electricity Generation. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

● **...and compared to previous periods?**

In the previous period the breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 2.0%, SDG02 - Zero Hunger 1.5%, SDG03 - Good Health and Well-Being 14.9%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 21%, SDG08 - Decent Work and Economic Growth 7.8%, SDG09 - Industry, Innovation, Infrastructure 9.5%, SDG10 - Reduce Inequalities 0.0%, SDG11 - Sustainable Cities and Communities 3.5%, SDG12 - Responsible Consumption and Production, 2.4%, SDG13 - Climate action, 2.2%, SDG15 - Forestry 1.0%, and SDG Leader 18.0%. The Fund achieved a 66.9% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis).

Period	2024	2023
Sustainable investment	95.94%	98.43%
Other environmental	49.03%	39.21%
Social	46.92%	59.22%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology

the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.

- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.74	Taiwan, Republic of China
CSL LTD	Health Care	4.58	Australia
GOODMAN GROUP	Real Estate	3.31	Australia
POWER GRID CORP OF INDIA LTD	Utilities	2.96	India
ICICI BANK LTD	Financials	2.77	India
HDFC BANK LIMITED	Financials	2.71	India
SBI LIFE INSURANCE CO LTD	Financials	2.62	India
SHENZHEN MINDRAY BIO-MEDIC-A	Health Care	2.50	China
CHROMA ATE INC	Industrials	2.39	Taiwan, Republic of China
ASML HOLDING NV	Technology	2.36	Netherlands
ASM INTERNATIONAL NV	Technology	2.18	Netherlands
NARI TECHNOLOGY CO LTD-A	Industrials	2.15	China
RESMED INC-CDI	Health Care	2.12	United States of America
CONTEMPORARY AMPEREX TECHN-A	Consumer Discretionary	1.93	China
ABB INDIA LTD	Industrials	1.91	India

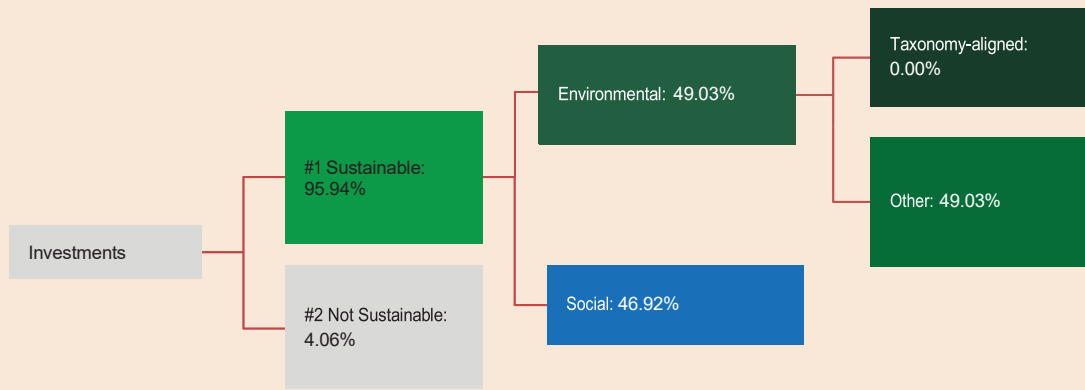

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

The Fund committed to hold a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.

The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the sustainable investments expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

Asset allocation describes the share of investments in specific assets.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

● **In which economic sectors were the investments made?**

Other tab

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	5.54
Industrials	Industrial Products	7.91
Industrials	Industrial Services	4.10
Materials	Materials	2.01
Energy	Renewable Energy	1.89
Health Care	Health Care	15.76
Financials	Banking	7.84
Financials	Financial Services	1.75
Financials	Insurance	4.52
Technology	Tech Hardware & Semiconductors	18.82
Technology	Software & Tech Services	2.51
Consumer Staples	Consumer Staple Products	2.35
Consumer Staples	Retail & Wholesale - Staples	2.95
Real Estate	Real Estate	9.57
Communications	Telecommunications	3.31
Utilities	Utilities	5.74

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 49.03% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 46.92%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 4.06% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Diverse SDG Exposure:

We aim to invest in companies whose products and services align with one of our eight impact pillars and measure how the businesses help countries achieve the UN' s sustainable development agenda. During the reference period we had holdings exposed to all eight or our impact pillars, fulfilling our goal of offering broad access to the SDG.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - Asian Smaller Companies Fund**

Legal entity identifier **549300KGE8BU4DTSR888**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.10% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 0.0%, ESG Q2: 34.3%, ESG Q3: 55.8%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 0%, ESG Q2: 33%, ESG Q3: 63%, ESG Q4: 0%. The Fund achieved a 78.72% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved the same ESG rating based on MSCI data (BBB) when compared with the benchmark (BBB).

Period	2024	2023
E/S Characteristics	98.96%	98.28%
Sustainable investment	50.10%	48.66%
Other environmental	15.69%	19.73%
Social	34.42%	28.93%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

[1] The Fund' s sustainable investments will contribute to either environmental or social objectives, or both. Where the objective relates to the environment, the investment will contribute to at least one of the following objectives: climate change mitigation, climate change adaptation, the sustainable use and protection of water and marine resources, the transition to a circular economy, pollution prevention and control, and the protection and restoration of biodiversity and ecosystems. Where the objective relates to social matters, the investment will contribute to social objectives in line with one of the Sustainable Development Goals. [The objectives of the sustainable investments may vary from time to time depending on the specific activity or investment. No specific environmental or social objective is being targeted, from those listed above.]

[2] Sustainable Investing Methodology

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives. An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund' s total aggregated proportion of Sustainable Investments. The Fund follows abrdn's Sustainable Leaders equity framework and only invests in companies that we deem are Sustainable Leaders. We define Sustainable Leaders based on the company' s management of sustainability risks and opportunities, incorporating internal data sources (abrdn ESG House Score), external sources (e.g. MSCI reports), thematic expertise from our Sustainability Group and regional expertise from our on-desk ESG analysts to.

These three categories are:

- Operational Leaders: Companies demonstrating ESG leadership across their operations, with excellent governance, strong management of material environmental and social issues, with identifiable contributions to Environmental or Social issues either from aligned revenue, capex, opex, or sustainable operations
- Improving Leaders: Companies where we can identify ongoing and future improvement in the management of material ESG risks and opportunities, with identifiable contributions to Environmental or Social issues either from aligned revenue, capex, opex, or sustainable operations
- Solutions Providers: Companies selling goods and services to solve society's greatest challenges, with identifiable contributions to Environmental or Social issues either from aligned revenue, capex, opex or sustainable operations

We use our proprietary research framework to identify Sustainable leaders, leveraging the ESG analysis which is integrated into the research done for all our equities holdings. Our analysts conclude their ESG analysis with a proprietary overall ESG Quality Rating (1 indicates best in class and 5 indicates laggards). In order to qualify for inclusion in the fund, companies must be rated 1 or 2, or be rated 3 where we have identified potential for improvement in the future.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

(1) GHG Emissions Scope 1 & 2 and carbon footprint: This is undertaken via monitoring of the carbon benchmark and we confirm that during the reporting period that the portfolio performed better than the benchmark and in line with our overall commitment.

(2) Fossil Fuel Sector Exposure: This figure represents companies that derive any revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels. It is not indicative of how active a company is in the fossil fuel sector in terms of percentage revenue, for which this fund deploys maximum revenue threshold criteria to actively minimise exposure to fossil fuels.

(3) Exclusions: We confirm that screening in line with our approach documents has been undertaken during the reporting period.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
FPT CORP	Technology	3.61	Viet Nam
CHROMA ATE INC	Industrials	3.57	Taiwan, Republic of China
MAKALOT INDUSTRIAL CO LTD	Consumer Discretionary	3.37	Taiwan, Republic of China
AUB GROUP LTD	Financials	3.36	Australia
HUB24 LTD	Technology	3.26	Australia
ASM INTERNATIONAL NV	Technology	3.21	Netherlands
PRO MEDICUS LTD	Technology	3.07	Australia
AEGIS LOGISTICS LTD	Energy	3.00	India
PRESTIGE ESTATES PROJECTS	Real Estate	2.84	India

AKR CORPORINDO TBK PT	Materials	2.58	Indonesia
JYOTHY LABS LTD	Consumer Staples	2.52	India
LEENO INDUSTRIAL INC	Technology	2.48	Korea (South)
Centuria Industrial REIT	Real Estate	2.28	Australia
ALCHIP TECHNOLOGIES LTD	Technology	2.27	Taiwan, Republic of China

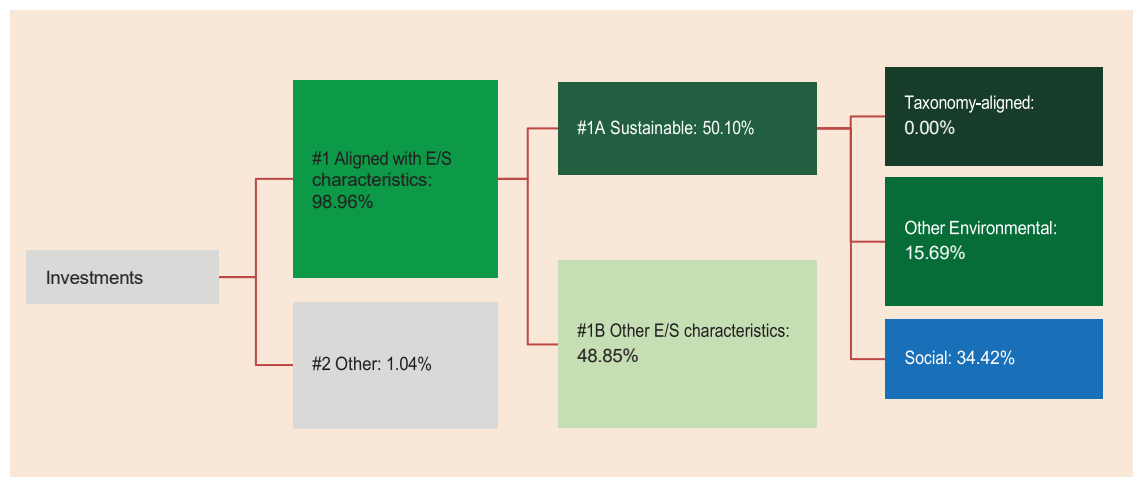

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Financials	Financial Services	3.87
Financials	Insurance	3.36
Technology	Tech Hardware & Semiconductors	16.23
Technology	Software & Tech Services	12.61
Consumer Discretionary	Consumer Discretionary Products	6.92
Consumer Discretionary	Retail & Whsle - Discretionary	5.02
Consumer Discretionary	Consumer Discretionary Services	0.40
Health Care	Health Care	8.79
Industrials	Industrial Products	7.18
Industrials	Industrial Services	5.51
Communications	Media	1.09
Communications	Telecommunications	0.57
Energy	Oil & Gas	3.00
Real Estate	Real Estate	9.38
Consumer Staples	Consumer Staple Products	6.25
Consumer Staples	Retail & Wholesale - Staples	0.02
Materials	Materials	7.51
Utilities	Utilities	0.41

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund holds 0% sustainable investments with an environmental objective aligned with the EU Taxonomy. This assessment has not been subject to an external review. These sustainable investments will not be EU Taxonomy aligned as the environmental objective does not have associated technical standards for comparison and relevant data is not available to confirm alignment.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15.69% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 34.42%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.04% of assets in the “Other” category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Corporate Governance and Climate Change: 1) Makalot - In our conversation with Makalot, we discussed various aspects, including its disclosures and environmental management framework. The management acknowledges the need for improved disclosure for its external ESG rating, attributing challenges to diverse global standards. They emphasize robust CSR and labor management practices and aim to reach 60% green energy usage within the next 5 years as required by contracts. Despite a capable management team, Makalot sees no need to replace long-standing executives solely for ESG score improvement. Acknowledging ESG's significance to customers, the company prioritizes transparency, disclosure, and traceability as key elements to secure contracts. 2) Zhejiang Shuanghuan - We discussed a range of ESG issues at our recent meeting. Reassuringly, staff attrition levels are low, and the company uses ESOPs to retain talent. 3) SITC - SITC are making practical step by step progress towards emissions reductions. We also see positive attitudes towards improving ESG practices, the latest being around disclosures relating to KPIs in the remuneration.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How does the reference benchmark differ from a broad market index?*

Not applicable

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - China A Share Sustainable Equity Fund**

Legal entity identifier **5493008HYR8SEZ4NF058**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.26% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of

operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also

have been promoted on an investment-by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 0.5%, ESG Q2: 27.4%, ESG Q3: 54.1%, ESG Q4: 0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 70.78% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

We confirm that during the reporting period the Fund achieved a better ESG rating based on MSCI data when compared with the benchmark:

- Fund rating BBB
- Benchmark rating BB

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 5%, ESG Q2: 31%, ESG Q3: 64%, ESG Q4: 0%. The Fund achieved a 63.78% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (BBB) when compared with the benchmark (BB).

Period	2024	2023
E/S Characteristics	96.35%	96.90%
Sustainable investment	56.26%	50.25%
Other environmental	29.08%	20.96%
Social	27.18%	29.29%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
KWEICHOW MOUTAI CO LTD-A	Consumer Staples	9.17	China

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 35% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	2.20
Financials	Banking	9.85
Financials	Insurance	3.55
Technology	Software & Tech Services	3.49
Technology	Tech Hardware & Semiconductors	6.97
Consumer Discretionary	Consumer Discretionary Products	18.28
Consumer Discretionary	Retail & Whsle - Discretionary	3.40
Health Care	Health Care	9.61
Industrials	Industrial Products	7.71
Industrials	Industrial Services	4.31
Consumer Staples	Consumer Staple Products	18.07
Consumer Staples	Retail & Wholesale - Staples	1.08
Materials	Materials	3.71
Energy	Renewable Energy	3.24
Real Estate	Real Estate	0.07
Utilities	Utilities	1.48

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 29.08% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

 **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective is 27.18%

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The Fund invested 3.65% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Labour Management and Corporate Governance: 1) Zhejiang Shuanghuan - We discussed a range of ESG issues at our recent meeting. Reassuringly, staff attrition levels are low, and the company uses ESOPs to retain talent. 3) SITC - SITC are

making practical step by step progress towards emissions reductions. We also see positive attitudes towards improving ESG practices, the latest being around disclosures relating to KPIs in the remuneration. 2) Zhejiang Weixing - We came away from a recent meeting very impressed with the Group's corporate culture. We remain mindful that the controlling shareholder invests in six major industries (including clothing accessories, new building materials, real estate, optical lenses, hydro power development, and financial investments), but are reassured that the businesses are managed independently. We will continue to engage on the nature of and dynamics within the broader group, including any transactions between related parties.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Product name: **abrdn SICAV I - Climate Transition Bond Fund**

Legal entity identifier **2138001IN6XY2E88UX09**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 81.97%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 5.96%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Climate Transition Bond Fund sought to achieve attractive long-term returns by investing in at least 90% of the assets in fixed-income securities that supported the transition to a low-carbon economy and society's adaptation to climate change.

The Fund drew on abrdn's deep resources and understanding of climate and environmental issues to help our clients benefit from the long-term shift towards greater sustainability. We aimed to achieve a combination of income and growth by investing in bonds issued by companies and countries that, in our view, were addressing the causes of climate change and adapted to its consequences.

These were companies that were lowering green-house-gas (GHG) emissions of their operations or helped others to reduce their emissions, and companies and countries that were helping society adapt to the physical risks of climate change.

The Fund used three key pillars to identify and acknowledge climate-change risks and opportunities. We set out these pillars below, showing how they linked to sustainable objectives around climate change.

- Leaders – the leading emission reducing companies (climate change mitigation)
- Adaptors – issuers improved resilience to the physical risks of climate change (climate change adaptation)
- Solutions – issuers helped the wider economy decarbonise (climate change mitigation)

Fund exposure to the pillars:

- Leaders – 31%
- Adaptors – 13%
- Solutions – 56%

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund invested in companies aligned to the three pillars. The breakdown of holdings aligned to the pillars:

- Leaders – 31%
- Adaptors – 13%
- Solutions – 56%

We also confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco, Gambling, Alcohol, Adult entertainment, Oil and Gas extraction, and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria

● **...and compared to previous periods?**

Fund exposure to the pillars:- Leaders – 37%- Adaptors – 9%- Solutions – 54%

Period	2024	2023
Sustainable investment	87.93%	87.24%
Other environmental	81.97%	78.45%
Social	5.96%	8.78%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within

tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are

captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 2: Carbon footprint (scope 1 and 2)
- PAI 3: GHG intensity of investee companies (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
LIMA METRO LINE 2 FIN LT 5.875% 07/05/2034	Industrials	2.16	Peru

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The Fund committed to hold a minimum of 75% in Sustainable Investments with an environmental objective.

The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Retail & Whsle - Discretionary	0.88
Consumer Discretionary	Travel & Lodging	1.43
Consumer Discretionary	Automobiles Manufacturing	1.15
Consumer Discretionary	Consumer Discretionary Products	2.25

Technology	Software & Tech Services	0.52
Government	Sovereigns	1.52
Government	Government Agencies	0.29
Government	Government Local	0.45
Real Estate	Real Estate	6.09
US Municipal	Transportation	0.76
US Municipal	Financing & Development	0.12
US Municipal	Education	0.11

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 81.97% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 5.96%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 12.07% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What actions have been taken to attain the sustainable investment objective during the reference period?

Diverse climate transition exposure:

We aim to invest in companies whose products and services align with one of our climate transition pillars. During the reference period we had holdings exposed to all three climate transition pillars.

Monitoring company progress:

We aim to review the companies in the Fund at least annually. Companies are removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our climate transition pillars.
- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company's operations, strategy or culture, to which the company does not appropriately respond.

Engagement:

For Climate Transition Bond Fund, engagement priorities will include review engagements to follow up on milestones previously set; enhance engagements to gain more information regarding the company's climate transition strategy; response engagements if there have been specific ESG news flow pertaining to the companies and thematic engagements where there is cross-over with broader abrdn engagement thematic priorities. Some examples over the year include:

- Enel 24th June 2024 At our annual ESG catch up with Enel we reiterated our milestones that we set in 2023 on free, prior, informed consent. We discussed the company's strategic direction including nuclear plans and the closing of coal plants by 2027. We were encouraged by their program to upskill the Board on climate expertise.

- Iberdrola 30th May 2024 We discussed Iberdrola's plans to report on biodiversity metrics by YE24, aiming for net positive biodiversity by 2030. Addressed network spending plans in Europe and US in addition to any potential shift in allocation here given. The company is making strong efforts to ensure solar supply chain compliance against forced labour, albeit challenges in transparency remain. Iberdrola expects minimal impact of US political changes on spending, with most network and renewable projects in the US already contracted.

- SSE 9th July 2024 Group ESG meeting with SSE to receive an update on its sustainability strategy and progress. Separately, we are members of the CA100+ working group for SSE. The findings from the CA100+ assessment of SSE's net zero strategy also help inform the milestones monitored under abrdn's financed emitters engagement programme (see above for milestones set by colleagues.) Broadly speaking, SSE is one of the leading companies in terms of the strength of its commitment to driving the energy transition, coupled with strong social policies. The three principal areas of engagement for the CA100+ working group are now: how the company balances its short and long-term targets and strategy (especially in the absence of a short-term emissions target); the potential for additional disclosures on anticipated emissions from different investments and the relative contribution of different key levers to reducing emissions; and risks associated with hitting SSE's 2030 climate-related targets. In addition, I anticipate that the UK energy policy environment and the risks/opportunities related to community opposition to new transmission infrastructure will become priority areas for engagement.

-Manila Water 21st May 2024 MWC is working on revising their emission reduction targets, recognising the need for stronger year-on-year goals. The build out of sufficient reserves over the past few years have proven to be helpful in managing recent heatwaves. They do not allow employees to work outdoors during peak hours, unless of an emergency. MWC monitors the proportion of water bills to household income in determining affordability and customer satisfaction. Currently, water bills represent 3% of household income of the customers they serve, which they believe to be affordable. Governance has remained relatively stable since the Razon leadership took over in 2021, and the complete exit of Ayala in early 2024. ESG remains to be a core focus of the new leadership, as demonstrated by the establishment of a Board-level ESG committee.

How did this financial product perform compared to the reference sustainable benchmark?

Product name: **abrdn SICAV I - Diversified Growth Fund**

Legal entity identifier **549300A4JW2X86C61F78**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.37% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment

by investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste and raw materials management and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

No benchmark was used for portfolio construction or as a basis for setting risk constraints in the management of the Fund or for attaining the abovementioned characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

ESG assessment by asset class:

Listed alternative investment companies

We confirm that the Fund only owned companies with an ESG score of 1-4. As at year-end, 9% of listed alternative investment companies had an ESG score of 1, 46% had an ESG score of 2, 37% had an ESG score of 3 and 7% had an ESG score of 4.

Credit

We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There are no high risk issuers held in the fund.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Emerging Market Debt (EMD)

We apply our proprietary ESGP framework – where 'P' are the political factors. This produces a relative quantitative score for each country from 0-100 (higher is better), which is calculated by combining a variety of data inputs related to Environmental, Social, Governance and Political pillars. Following standardisation of data points and adjusting for GDP per capita, the overall ESGP score for each country is calculated as an equally weighted average of each pillar. ESGP analysis is an integral part of the investment process, and the Fund commits to exclude the bottom 10% of countries within the ESGP framework. In addition, for each country in the ESGP universe, a Direction of Travel (DoT) indicator is assigned based on our internal assessment of whether a country is on an improving or deteriorating ESG trend, with each country being assigned a Positive, Negative or Neutral DoT indicator. Where a country sits in the bottom 10% of the ESGP universe but is assigned a Positive DoT indicator, it is re-included in the permissible investment universe, with an additional name falling into the bottom 10% to replace it. We confirm that no sovereign issuers in the bottom 10% were held in the fund.

Developed Market Government Bonds

Within this Fund the approach for Developed Market government bonds results in the exclusion of holdings relating to countries that in abrdn's view present more intense ESG risks. On an annual basis countries are ranked according to ESG factors which are aligned with the UN Sustainable Development Goals (SDGs). The Fund Investment Approach excludes countries in the bottom 25% of that ranking from our DM government bond allocation. We confirm that no bonds in the bottom 25% of that ranking were held during the reporting period.

Global REITs

We confirm that the Fund only owned companies with an ESG Quality Rating of 1-4. We also confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of companies that are in the benchmark based on the ESG House Score across each of the three regions: (1) UK & Europe, (2) APAC Including Japan, (3) US & Canada.

Equity Passive (QIS tracker)

The Fund Investment Approach includes a portfolio ESG score at least 110% of benchmark (abrdn and MSCI), carbon footprint (abrdn definition of Scope 1 + 2) of 50% of benchmark and green revenues of 150% of benchmark (FTSE Green Revenue). This is measured at the point of every quarterly rebalance. We confirm that the Fund complied with these 3 metrics during the reporting period.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	97.98%	%
Sustainable investment	34.37%	%
Other environmental	20.36%	%
Social	14.01%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and

ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels

sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.36% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 14.01%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.02% of assets in the “Other” category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied both ESG Screening Criteria and ESG Assessment by asset class to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics. Examples include:

We have engaged with both the management and board of INPP on of their asset (Cadent Gas) exposed to long-term risk of changing energy mixes to heat homes and businesses. In addition, we discussed management's ESG related KPIs. We pushed the company to provide investors with more details on the long-term outlook for the asset, how it is looking to evolve its business and how the asset is valued reflecting this. On KPIs, we pushed for more ambitious KPIs and have been asked for feedback on how these could be improved over time. This is an ongoing engagement.

It is our view that when companies are trading on discounts to NAV, it is in the best interest of shareholders to buy back shares using available capital that is not required to meet obligations. We have been engaging with companies and boards trading at material discounts to NAV to encourage share buybacks, meeting with boards to emphasise the importance of these and subsequently been sending letters to reiterate our views. We have then re-engaged with a number depending on response. Positively, following engagement, we have seen an increase in share buyback activity.

How did this financial product perform compared to the reference benchmark?

Not applicable

● **How does the reference benchmark differ from a broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - Diversified Income Fund**

Legal entity identifier **549300XT276EOJ765R93**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 33.12% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment

by investment basis:

Environment – promoting sound energy management and reducing greenhouse gas emissions, promoting good water, waste and raw materials management and addressing biodiversity/ecological impacts.

Social – promoting good labour practices and relations, maximising employee health and safety, supporting diversity in the workforce, and healthy relationships with communities.

No benchmark was used for portfolio construction or as a basis for setting risk constraints in the management of the Fund or for attaining the abovementioned characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

ESG assessment by asset class:

Listed alternative investment companies

We confirm that the Fund only owned companies with an ESG score of 1-4. As at year-end, 9% of listed alternative investment companies had an ESG score of 1, 46% had an ESG score of 2, 37% had an ESG score of 3 and 7% had an ESG score of 4.

Credit

We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future. There are no high risk issuers held in the fund.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Emerging Market Debt (EMD)

We apply our proprietary ESGP framework – where 'P' are the political factors. This produces a relative quantitative score for each country from 0-100 (higher is better), which is calculated by combining a variety of data inputs related to Environmental, Social, Governance and Political pillars. Following standardisation of data points and adjusting for GDP per capita, the overall ESGP score for each country is calculated as an equally weighted average of each pillar. ESGP analysis is an integral part of the investment process, and the Fund commits to exclude the bottom 10% of countries within the ESGP framework. In addition, for each country in the ESGP universe, a Direction of Travel (DoT) indicator is assigned based on our internal assessment of whether a country is on an improving or deteriorating ESG trend, with each country being assigned a Positive, Negative or Neutral DoT indicator. Where a country sits in the bottom 10% of the ESGP universe but is assigned a Positive DoT indicator, it is re-included in the permissible investment universe, with an additional name falling into the bottom 10% to replace it. We confirm that no sovereign issuers in the bottom 10% were held in the fund.

Developed Market Government Bonds

Within this Fund the approach for Developed Market government bonds results in the exclusion of holdings relating to countries that in abrdn's view present more intense ESG risks. On an annual basis countries are ranked according to ESG factors which are aligned with the UN Sustainable Development Goals (SDGs). The Fund Investment Approach excludes countries in the bottom 25% of that ranking from our DM government bond allocation. We confirm that no bonds in the bottom 25% of that ranking were held during the reporting period.

Global REITs

We confirm that the Fund only owned companies with an ESG Quality Rating of 1-4. We also confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of companies that are in the benchmark based on the ESG House Score across each of the three regions: (1) UK & Europe, (2) APAC Including Japan, (3) US & Canada.

Equity Passive (QIS tracker)

The Fund Investment Approach includes a portfolio ESG score at least 110% of benchmark (abrdn and MSCI), carbon footprint (abrdn definition of Scope 1 + 2) of 50% of benchmark and green revenues of 150% of benchmark (FTSE Green Revenue). This is measured at the point of every quarterly rebalance. We confirm that the Fund complied with these 3 metrics during the reporting period.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	97.62%	%
Sustainable investment	33.12%	%
Other environmental	19.59%	%
Social	13.53%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and

ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels

sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.59% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 13.53%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.38% of assets in the “Other” category. The investments included under “other” are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied both ESG Screening Criteria and ESG Assessment by asset class to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics. Examples include:

We have engaged with both the management and board of INPP on of their asset (Cadent Gas) exposed to long-term risk of changing energy mixes to heat homes and businesses. In addition, we discussed management’s ESG related KPIs. We pushed the company to provide investors with more details on the long-term outlook for the asset, how it is looking to evolve its business and how the asset is valued reflecting this. On KPIs, we pushed for more ambitious KPIs and have been asked for feedback on how these could be improved over time. This is an ongoing engagement.

It is our view that when companies are trading on discounts to NAV, it is in the best interest of shareholders to buy back shares using available capital that is not required to meet obligations. We have been engaging with companies and boards trading at material discounts to NAV to encourage share buybacks, meeting with boards to emphasise the importance of these and subsequently been sending letters to reiterate our views. We have then re-engaged with a number depending on response. Positively, following engagement, we have seen an increase in share buyback activity.

How did this financial product perform compared to the reference benchmark?

Not applicable

● **How does the reference benchmark differ from a broad market index?**

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - Emerging Markets Bond Fund**

Legal entity identifier **549300BA33Y94QDNRN64**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.12% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders.

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we do not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management, renewable energy usage and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – effectively tackled corruption and inequality, promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, encouraged healthy relationships with communities, promoted social cohesion and

integration and encouraged investment in human capital.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There is 1 high risk issuer held in the fund, the issuer is not high risk due to governance issues. Therefore, since all issuers pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

ESG Assessment Criteria: We apply our proprietary ESGP framework – where 'P' are the political factors. This produces a relative quantitative score for each country from 0-100 (higher is better), which is calculated by combining a variety of data inputs related to Environmental, Social, Governance and Political pillars. Following standardisation of data points and adjusting for GDP per capita, the overall ESGP score for each country is calculated as an equally weighted average of each pillar. ESGP analysis is an integral part of the investment process, and the Fund commits to exclude the bottom 5% of countries within the ESGP framework. In addition, for each country in the ESGP universe, a Direction of Travel (DoT) indicator is assigned based on our internal assessment of whether a country is on an improving or deteriorating ESG trend, with each country being assigned a Positive, Negative or Neutral DoT indicator. Where a country sits in the bottom 5% of the ESGP universe but is assigned a Positive DoT indicator, it is re-included in the permissible investment universe, with an additional name falling into the bottom 5% to replace it. We confirm that no sovereign issuers in the bottom 5% were held in the fund.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	96.37%	%
Sustainable investment	31.12%	%
Other environmental	7.37%	%
Social	23.75%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

01/10/2023 - 30/09/2024

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

The fund committed to hold a minimum of 67% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 33% of assets in the "Other" category, which may include developed market government securities, cash, money-market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 7.37% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 23.75%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 3.63% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG performance (Corporate Issuers)
- ESGP performance (Sovereign Issuers)
- Avoid poor ESG practices (Corporate & State-Owned Enterprise Issuers)
- Screening Criteria These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Product name: **abrdn SICAV I - Emerging Markets Corporate Bond Fund**Legal entity identifier **549300D7984IRKAKI626****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.51% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are 3 high risk issuers held in the fund, one issuer is not high risk due to governance issues. Therefore, since the issuer pass the good governance check, the fund is able to invest in this. But, the high risk rating prevents the names being considered as a sustainable investment. One of these is a Russian bank which we are unable to trade in due to sanctions so cannot exit the position. The other issuer is a defaulted position going through a restructure.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark (JPM Corporate EMBI Broad Diversified), in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 81.18%.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

During the previous reporting period, there were 2 high risk due to governance issuers held in the fund. Both of these cannot be traded and are still held in the fund. The screening criteria as applied and there were no holdings in the fund that failed the agreed criteria. The bottom 5% of issuers with an ESG House Score that are in the benchmark were excluded and the portfolio performed better than the benchmark, in line with our commitment to target lower carbon intensity relative to the benchmark.

Period	2024	2023
E/S Characteristics	97.02%	99.26%
Sustainable investment	43.51%	40.89%
Other environmental	19.99%	15.18%
Social	23.52%	25.70%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 66% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 15% in Sustainable Investments. The Fund invests a maximum of 34% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 19.99% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 23.52%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.98% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria,
- ESG screening criteria,
- a carbon intensity targeting lower than benchmark,
- promoting good governance including social factors. These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs. The fund has also engaged with issuers on

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - Emerging Markets Equity Fund**Legal entity identifier **549300VBMTVFH73MX846****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.78% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 11.9%, ESG Q2: 42.3%, ESG Q3: 39.7%, ESG Q4: 3.8%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 34.26% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating A
- Benchmark rating A

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 15%, ESG Q2: 44%, ESG Q3: 38%, ESG Q4: 3%. The Fund achieved a 37.42% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (A) when compared with the benchmark (BBB).

Period	2024	2023
E/S Characteristics	98.55%	98.57%
Sustainable investment	61.78%	57.29%
Other environmental	31.86%	16.39%
Social	29.92%	40.90%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.54	Taiwan, Republic of China

GRUPO FINANCIERO BANORTE-O	Financials	1.51	Mexico

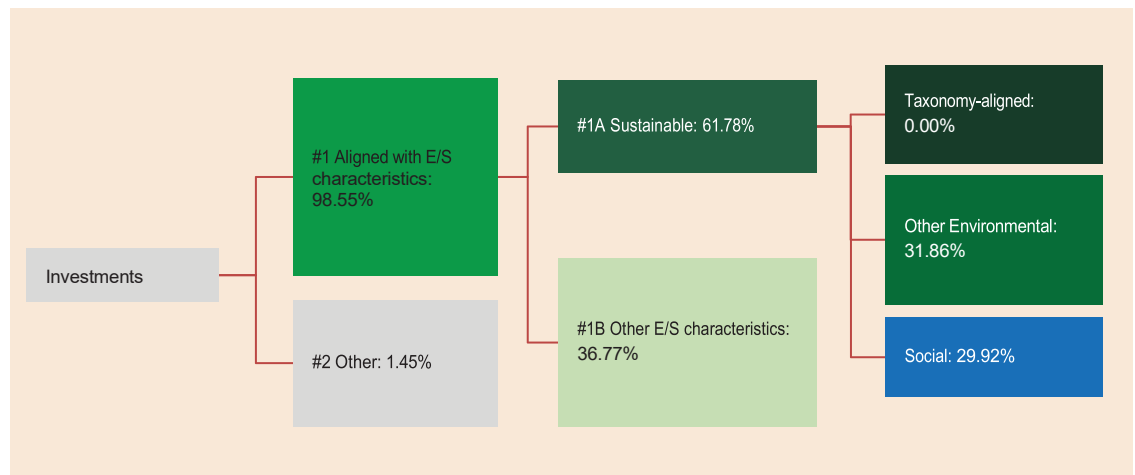

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31.86% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 29.92%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.45% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Supply Chain Management, and Corporate Governance: 1) CATL - We engaged with CATL to understand its ESG practices in its European capacity expansion, and its stance towards the risks around Xinjiang and the Uyghur Forced

Labor Prevention Act (UFLPA), a US law that prohibits goods from being imported into the United States that are either produced in Xinjiang, or by entities identified on the UFLPA Entity List, unless the importer can prove, by clear and convincing evidence, the goods were not produced with forced labour. CATL provided us with reassuring responses. Its ESG risk management framework includes a transparent materials tracing mechanism that allows it to provide a robust response to any concerns about its lithium supply. Hence, we are confident that CATL has a solid base in which to defend and address any ESG controversies that could impact its fundamentals. 2) Power Grid - We spoke with management of Power Grid to better understand their approach to climate change (including the governance of this approach), as well as the ways in which they are managing physical risk from climate change. In terms of net zero targets, whilst they have a target of achieving net zero by 2047, they are to an extent dependent on the development of alternatives to Sulfur hexafluoride (SF6) gas, an area in which they are working closely with vendors. In terms of the governance of climate change, it was clear that they have a clear structure of oversight, with board risk committee having ultimate oversight, given the group sees climate as a clear operational risk. As to physical risk, we discussed the different manifestations of physical risk, and management discussed the ways they are managing and mitigating this risk. We encouraged them to disclose more here, given current disclosure is not as detailed as it could be, and management seemed happy to do so. We'll continue to engage, but this was an encouraging conversation. 3) SBI Life Insurance - We engaged SBI Life Insurance on the implementation and disclosure of a responsible investment framework, and we were pleased to hear that the company is adopting stewardship principles and has a process to analyse, engage, and exercise voting rights for its portfolio companies. SBI Life is aware of the importance of better disclosure and working with various regulators to understand the requirements for the insurance industry, while at the same time, mapping Global Reporting Initiative G4 framework principles to its business. We also discussed agent retention rates, and we are glad to hear that SBI Life has 50% lower turnover rates versus the industry owing to its various initiatives, such as training and proper incentivisation. Overall, SBI Life is progressing well on its ESG journey, and we will continue to track its milestones

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Product name: **abrdn SICAV I - Emerging Markets Ex China Equity Fund**Legal entity identifier **549300GXXZQ6HH4AS682****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 66.86% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 11.5%, ESG Q2: 48.5%, ESG Q3: 35.9%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 18.37% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating A
- Benchmark rating A

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 15%, ESG Q2: 49%, ESG Q3: 36%, ESG Q4: 0%. The Fund achieved a 78.29% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (A) when compared with the benchmark (BBB).

Period	2024	2023
E/S Characteristics	98.02%	98.73%
Sustainable investment	66.86%	64.58%
Other environmental	35.74%	21.32%
Social	31.12%	43.25%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.60	Taiwan, Republic of China
SAMSUNG ELECTRONICS-PREF	Technology	6.77	Korea (South)
TENCENT HOLDINGS LTD	Communications	5.49	China
ALIBABA GROUP HOLDING LTD	Consumer Discretionary	3.67	China

AIA GROUP LTD	Financials	1.70	Hong Kong

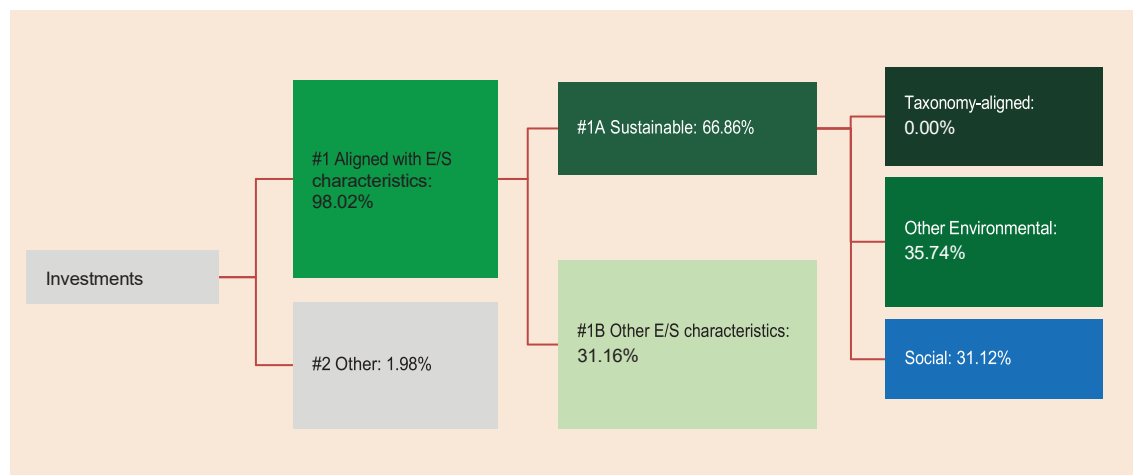

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	3.82
Financials	Banking	12.93
Financials	Insurance	4.85
Technology	Software & Tech Services	5.16
Technology	Tech Hardware & Semiconductors	24.08
Consumer Discretionary	Consumer Discretionary Products	3.59
Consumer Discretionary	Retail & Whsle - Discretionary	5.60
Consumer Discretionary	Consumer Discretionary Services	0.22
Health Care	Health Care	1.85
Industrials	Industrial Products	3.60
Industrials	Industrial Services	2.61

Communications	Telecommunications	2.01
Consumer Staples	Consumer Staple Products	4.26
Consumer Staples	Retail & Wholesale - Staples	2.10
Materials	Materials	3.37
Energy	Renewable Energy	1.26
Real Estate	Real Estate	4.30
Utilities	Utilities	5.61

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 35.74% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 31.12%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.98% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, and Corporate Governance: 1) Korea Shipbuilding & Offshore Engineering - Engaging with the company, we explored potential opportunities arising from the green economy trend. The company underscored its leadership in providing eco-

friendly marine vessel solutions. Notably, it disclosed plans to introduce ammonia-powered engines in the latter half of this year. 2) Power Grid - We spoke with management of Power Grid to better understand their approach to climate change (including the governance of this approach), as well as the ways in which they are managing physical risk from climate change. In terms of net zero targets, whilst they have a target of achieving net zero by 2047, they are to an extent dependent on the development of alternatives to Sulfur hexafluoride (SF6) gas, an area in which they are working closely with vendors. In terms of the governance of climate change, it was clear that they have a clear structure of oversight, with board risk committee having ultimate oversight, given the group sees climate as a clear operational risk. As to physical risk, we discussed the different manifestations of physical risk, and management discussed the ways they are managing and mitigating this risk. We encouraged them to disclose more here, given current disclosure is not as detailed as it could be, and management seemed happy to do so. We'll continue to engage, but this was an encouraging conversation.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **abrdn SICAV I - Emerging Markets Income Equity Fund**

Legal entity identifier **213800VCEJLGPIWHKG19**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.87% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of

operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also

have been promoted on an investment-by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 10.5%, ESG Q2: 28.3%, ESG Q3: 43.5%, ESG Q4: 6.9%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 20% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 71.04% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating A
- Benchmark rating A

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023

Social	31.01%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.61	Taiwan, Republic of China
SAMSUNG ELECTRONICS-PREF	Technology	6.98	Korea (South)

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	5.82
Consumer Discretionary	Retail & Whsle - Discretionary	7.11
Consumer Discretionary	Consumer Discretionary Services	2.10
Industrials	Industrial Products	2.96
Industrials	Industrial Services	6.14
Materials	Materials	4.14
Energy	Oil & Gas	2.12
Energy	Renewable Energy	0.08
Health Care	Health Care	1.81
Financials	Banking	17.55
Financials	Financial Services	2.07
Financials	Insurance	1.04

Technology	Software & Tech Services	3.09
Utilities	Utilities	1.77
Real Estate	Real Estate	2.31
Consumer Staples	Consumer Staple Products	2.98
Consumer Staples	Retail & Wholesale - Staples	0.13
Communications	Media	7.73
Communications	Telecommunications	4.26

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 26.86% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 31.01%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.77% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, and Corporate Governance: 1) Korea Shipbuilding & Offshore Engineering - Engaging with the company, we explored potential opportunities arising from the green economy trend. The company underscored its leadership in providing eco-friendly marine vessel solutions. Notably, it disclosed plans to introduce ammonia-powered engines in the latter

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

half of this year. 2) Power Grid - We spoke with management of Power Grid to better understand their approach to climate change (including the governance of this approach), as well as the ways in which they are managing physical risk from climate change. In terms of net zero targets, whilst they have a target of achieving net zero by 2047, they are to an extent dependent on the development of alternatives to Sulfur hexafluoride (SF6) gas, an area in which they are working closely with vendors. In terms of the governance of climate change, it was clear that they have a clear structure of oversight, with board risk committee having ultimate oversight, given the group sees climate as a clear operational risk. As to physical risk, we discussed the different manifestations of physical risk, and management discussed the ways they are managing and mitigating this risk. We encouraged them to disclose more here, given current disclosure is not as detailed as it could be, and management seemed happy to do so. We'll continue to engage, but this was an encouraging conversation.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

Product name: **abrdrn SICAV I - Emerging Markets SDG Corporate Bond Fund**

Legal entity identifier **213800ZA6YFUJIKUV566**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 39.14%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 55.64%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

SDG: The Fund aimed to achieve long term growth by investing in companies in Emerging Market countries which, in our view, will make a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs').

Our SDG proposition focused on companies making a material, positive contribution to the environment and society.

The specific methodology and criteria were outlined within our prospectus and website disclosures, which were available at abrdrn.com -> fund centre.

The sustainable development goal strategies invested in companies that made positive and material contributions to environmental and social challenges aligned with at least one of 8 pillars or were an SDG Leader or SDG Transition issue. The pillars and associated sub-themes and indicators were developed using the UN SDGs. But above all, we aimed to align our sustainable development objectives with the most pressing global problems according to the UN.

Therefore as the needs of the world changed, our impact pillars might have evolved. The linkages with the SDGs were illustrated in the table below.

Cash - 4.25
 Circular Economy - 3.01%
 Financial Inclusion - 26.81%
 Food & Agriculture - 4.98%
 Frontier Sovereign - 6.11%
 Health & Social Care - 3.68%
 Sustainable Energy - 14.74%
 Sustainable Real Estate & Infrastructure - 30.17%
 Water & Sanitation - 2.36%
 SDG Enablers- 2.55%
 SDG Transition - 1.34%

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund invested in companies with a minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN' s SDGs. For companies classified in the

benchmark as ' Financials' , alternative measures of materiality are used based on loans and customer base.

The breakdown of holdings aligned to the SDGs, SDG leaders and SDG Transition issues was:

1. No Poverty - 13.94%
2. Zero Hunger - 2.25%
3. Good Health & Well-Being - 5.65%
6. Clean Water & Sanitation - 2.36%
7. Affordable & Clean Energy - 15.47%
8. Decent Work & Economic Growth - 11.89%
9. Industry, Innovation & Infrastructure - 26.98%
11. Sustainable Cities & Communities - 2.46%
12. Responsible Consumption & Production - 0.82%
15. Life on Land - 3.83%
17. Partnership for the Goals - 6.11%

SDG Leaders 2.55%
 SDG Transition 1.34%

Cash 4.25%

The breakdown of holdings aligned to the abrdn eight pillars are:

Cash - 4.25%
 Circular Economy - 3.01%
 Financial Inclusion - 26.81%
 Food & Agriculture - 4.98%
 Frontier Sovereign - 6.11%
 Health & Social Care - 3.68%

Sustainable Energy - 14.74%

Sustainable Real Estate & Infrastructure - 30.17%

Water & Sanitation - 2.36%

SDG Enablers- 2.55%

SDG Transition - 1.34%

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark (JP Mogan ESG CEMBI Broad Diversified Index), in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 87.89%.

The Fund also excluded at 21.34% of the Fund's investment universe in terms of negative exclusions as at end of Sept 2024. The positive screening process refines the universe further. Further, key performance indicators (KPIs), or targeted outputs, have been set for each company held in the Fund in order to assess how products and services contribute to positive social and environmental

outcomes globally. These KPIs in addition to case studies and additional analysis are reported annually in the Fund's SDG Report. Please see the most recent report (available at abrdn.com -> fund centre) for full discussion on these KPIs as they will vary year by year.

We also confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, ILO and OECD, State Owned Enterprises (SOE), Tobacco, Thermal Coal, Oil & Gas, Electricity Generation, Gambling, Alcohol, Adult Entertainment and Weapons. These screening criteria apply in a binding manner. There was one issuer held in the fund that failed an Oil & Gas screen, however this screen incorrectly captured Oil & Gas Transportation, which the mandate does not exclude. Therefore, we have since amended the screen and the issuer is no longer failing.

● **...and compared to previous periods?**

For the previous period, the breakdown of holdings aligned to the SDGs, SDG leaders and SDG Transition issues was: 1. No Poverty - 16.28% 2. Zero Hunger - 0.25% 3. Good Health & Well-Being - 5.15% 4. Clean Water & Sanitation - 2.12% 5. Affordable & Clean Energy - 17.69% 6. Decent Work & Economic Growth - 11.15% 7. Industry, Innovation & Infrastructure - 21.61% 8. Reduced Inequalities - 3.62% 9. Sustainable Cities & Communities - 6.96% 10. Responsible Consumption & Production - 1.00% 11. Life on Land - 3.24% 12. Partnership for the Goals - 6.97% SDG Leaders 3.39% Cash 0.56% The Fund achieved a 52.25% lower carbon intensity than the benchmark as at 30 Sept 2023.

Period	2024	2023
Sustainable investment	94.78%	99.50%
Other environmental	39.14%	41.97%
Social	55.64%	57.53%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology

the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 2: Carbon footprint (scope 1 and 2)
- PAI 3: GHG intensity of investee companies (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.

- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.

- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The Fund committed to hold a minimum of 75% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.

The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Travel & Lodging	1.83
Consumer Discretionary	Consumer Discretionary Products	0.99
Consumer Discretionary	Auto Parts Manufacturing	0.19
Industrials	Industrial Services	2.20
Industrials	Industrial Other	2.94
Industrials	Railroad	3.88
Industrials	Transportation & Logistics	0.63
Materials	Metals & Mining	0.85
Materials	Containers & Packaging	1.21
Materials	Forest & Paper Products Manufacturing	2.24
Energy	Renewable Energy	2.39
Financials	Banking	6.80
Financials	Financial Services	6.31
Financials	Real Estate	1.80
Financials	Banks	13.20
Financials	Life Insurance	3.02
Financials	Commercial Finance	1.40
Consumer Staples	Supermarkets & Pharmacies	1.31
Consumer Staples	Retail & Wholesale - Staples	0.68
Utilities	Utilities	10.86
Utilities	Power Generation	4.16
Technology	Tech Hardware & Semiconductors	1.89
Technology	Semiconductors	1.39
Government	Sovereigns	6.19

Government	Government Agencies	1.95
Government	Supranationals	1.68
Government	Government Development Banks	2.60
Real Estate	Real Estate	0.25
Health Care	Health Care Facilities & Services	1.80
Communications	Wireless Telecommunications Services	2.72
Communications	Telecommunications	6.24
Communications	Cable & Satellite	0.86
Communications	Wireline Telecommunications Services	1.08

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies,

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 39.14% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 55.64%

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 5.22% of assets in the “not sustainable” category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Diverse SDG Exposure:

We aim to invest in companies whose products and services align with one of our eight impact pillars and measure how the businesses help countries achieve the UN’ s sustainable development agenda. During the reference period we had holdings exposed to all eight or our impact pillars, fulfilling our goal of offering broad access to the SDG.

Monitoring company progress in achieving SDG alignment:

We aim to review the companies in the Fund at least annually. Companies are removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our impact pillars.
- The company does not provide sufficient evidence of improved disclosure over what we would consider an appropriate timeline.
- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company’ s operations, strategy or culture, to which the company does not appropriately respond.

Engagement:

For these SDG Fund, engagement priorities will include engagements designed to encourage companies to follow a path to impact. We will work with companies to better understand how they allocate capital to the areas of under-investment highlighted by the UN SDGs. We will look to encourage better disclosure of this capital allocation process and measurement of positive contribution. Some examples over the year include:

- Shriram 22nd December 2023 Met Shriram to discuss the % of their loans to first time borrowers and females. We also discussed their impressive female financial literacy initiatives. The company mainly finances used vehicles and are currently cautious of EV loans given that these are higher value and the majority of their customers are first time borrowers. We are very comfortable with the name and their SDG alignment is clear.
- Turk Telekomunikasyon 26th June 2024 The company has made taken some notable steps to improve disclosure post our last meeting. Emissions data will continue to improve as consultants have been hired to continue their journey. Finally, the investment case surrounding penetration in rural communities is now easier to track with measurable statistics for lower social demographic KPIs included in recent green bond framework reporting.
- Suzano 14th May 2024 Follow-up engagement to understand the progress towards SBTi adoption, the evolution of net carbon reporting year-on-year changes, progress on connecting ecological corridors in high-risk biomes and progress on legacy controversies with indigenous communities. Feels like progress has been slow on these points so one to revisit with the company again in 2024.
- Geely Automobile 30th May 2024 We spoke with Geely due to historic allegations on suppliers using Uyghur population workers. We gained comfort that the as we discussed their supplier chain policies and oversight in detail and were impressed.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrnd SICAV I - Emerging Markets SDG Equity Fund**Legal entity identifier **213800G9VXZZAEETMY47****Sustainable investment objective****Does this financial product have a sustainable investment objective?**●● Yes●● No

It made **sustainable investments with an environmental objective**: 45.81%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: 52.42%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent was the sustainable investment objective of this financial product met?**

The Fund aimed to achieve long term growth by investing in companies in Emerging Market countries which, in our view, were making a positive contribution to society through their alignment achieving the United Nation's Sustainable Development Goals ('SDGs'). Our SDG proposition focused on companies making a material, intentional, positive contribution to the environment and society. The specific methodology and criteria are outlined within our prospectus and website disclosures. For the relevant Prospectus, see abrnd.com. For the Fund's Sustainable Investment Approach, see abrnd.com. The sustainable development goal strategies invested in companies that make positive and material contributions to environmental and social challenges aligned with at least one of eight impact pillars or are an SDG Leader. The pillars and associated sub-themes and indicators were developed using the UN SDGs. But above all, we aimed to align our sustainable development objectives with the most pressing global problems according to the UN. Therefore as the needs of the world changed, our impact pillars might evolve. The linkages with the SDGs are below: Circular Economy 0.9%, Sustainable Energy 22.7%, Food & Agriculture 3.4%, Water & Sanitation 0.0%, Health & Social Care 18.6%, Financial Inclusion

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund invested in companies with a minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. For companies classified in the benchmark as 'Financials', alternative measures of materiality are used based on loans and customer base. The breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 4.4%, SDG02 - Zero Hunger 1.5%, SDG03 - Good Health and Well-Being 17.0%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 20.8%, SDG08 - Decent Work and Economic Growth 16.0%, SDG09 - Industry, Innovation, Infrastructure 11.5%, SDG10 - Reduce Inequalities 0.0%, SDG11 - Sustainable Cities and Communities 1.2%, SDG12 - Responsible Consumption and Production, 0.9%, SDG13 - Climate action, 3.9%, SDG15 - Forestry 1.0%, and SDG Leader 19.9%. The Fund achieved a 78.89% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis). Application of the fund's approach resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024. Further, key performance indicators (KPIs), or targeted outputs, have been set for each company held in the Fund in order to assess how products and services contribute to positive social and environmental outcomes globally. These KPIs in addition to case studies and additional analysis are reported annually in the Fund's SDG Report. Please see the most recent annual SDG report (available here: abrdn.com) for full discussion on these KPIs as they will vary year by year. We also confirm that during the reporting period, company exclusions are applied to exclude the particular areas of investment related to UN Global Compact, ILO and OECD, Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE), Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil and Gas and Electricity Generation. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

● **...and compared to previous periods?**

In the previous period the breakdown of holdings aligned to the SDGs and to SDG leaders was as below: SDG01 - No poverty 14.9%, SDG02 - Zero Hunger 0.0%, SDG03 - Good Health and Well-Being 15.7%, SDG06 - Clean Water and Sanitation 0.0%, SDG07 - Affordable and Clean Energy 20.6%, SDG08 - Decent Work and Economic Growth 20.6%, SDG09 - Industry, Innovation, Infrastructure 7.3%, SDG10 - Reduce Inequalities 0.0%, SDG11 - Sustainable Cities and Communities 0.0%, SDG12 - Responsible Consumption and Production, 3.2%, SDG13 - Climate action, 1.8%, SDG15 - Forestry 0.5%, and SDG Leader 14.1%. The Fund achieved a 73.02% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis).

Period	2024	2023
Sustainable investment	98.23%	98.38%
Other environmental	45.81%	32.67%
Social	52.42%	65.72%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology

the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.

- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Technology	9.89	Taiwan, Republic of China

Utilities	Utilities	5.18

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 45.81% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 52.42%

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.77% of assets in the "not sustainable" category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Diverse SDG Exposure:

We aim to invest in companies whose products and services align with one of our eight impact pillars and measure how the businesses help countries achieve the UN' s sustainable development agenda. During the reference period we had holdings exposed to all eight or our impact pillars, fulfilling our goal of offering broad access to the SDG.

Monitoring company progress in achieving SDG alignment:

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

We aim to review the companies in the Fund at least annually. Companies are removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our impact pillars.
- The company does not provide sufficient evidence of improved disclosure over what we would consider an appropriate timeline.
- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company's operations, strategy or culture, to which the company does not appropriately respond.

SDG Governance

The SDG Governance Group is the governance body that maintains the definition of 'SDG alignment' and oversees the SDG Universe. The SDG Governance Group includes:

- Elizabeth Meyer, Senior Responsible Investment Manager
- Ann Meoni, Senior Responsible Investment Manager
- Nick Gaskell, Responsible Investment Manager
- Tony Hood, Investment Director
- Blair Couper, Investment Manager
- David Smith, Senior Investment Director
- Catriona Macnair, Investment Director
- Nina Petry, Investment Manager (departed subsequent to period-end)
- Fraser Harle, Investment Manager
- Mubashira Bukhar Khwaja, Investment Director
- Daniel Ng, Investment Manager
- Jerry Goh, Investment Manager

Asian SDG Equity Fund

- Sarah Norris, Head of ESG-Equities
- Dominic Byrne, Deputy Head of Global Equities (departed subsequent to period-end)
- Tzouliana Leventi, ESG Analyst

Members of this group write company-specific impact research and the group debates the merits of a company's inclusion in the SDG universe. Covering the unmet need, materiality figures, intentionality and measurability, the SDG Governance

Group evaluates the alignment of a company to the fund's SDG goals.

We consider the materiality of any potential negative externalities from the company's business activities or management practices. Companies with material exposure to operations running in direct opposition to any of the SDGs, and with no explicit statement of proposed divestment, will not be eligible where that specific business accounts for >10% of revenues or profits. An example would be excluding food and beverage companies that generate over 10% of revenues from selling items with high sugar or trans-fat content. Likewise, companies held in the strategy must not have had any significant ESG controversies which in the opinion of the analyst or the SDG Governance Group undermine the company's alignment to the UN SDGs or are in direct contravention of the UN SDGs.

Engagement:

For these SDG Fund, engagement priorities will include engagements designed to encourage companies to follow a path to impact. We will work with companies to better understand how they allocate capital to the areas of under-investment

highlighted by the UN SDGs. We will look to encourage better disclosure of this capital allocation process and measurement of positive contribution. Some examples over the year include:

As part of our ongoing engagement with Samsung Electronics, we discussed the on-going labour strikes with the company. We gained a better understanding of the context and dynamics of these strikes, as well as confidence that management was strongly inclined to resolve the strikes. We were reassured to hear that there has been no operational impact, and client orders are still being fulfilled. We will continue to monitor the issue closely. We spoke with management of Power Grid to better understand their approach to climate change (including the governance of this approach), and the ways in which they are managing physical risk from climate change. We encouraged them to disclose more here, given that the current disclosure is not as detailed as it

could be, and management seemed happy to do so. We will continue to engage the company, but this was an encouraging conversation. We continued our engagement with Samsung Biologics, covering issues including talent identification and succession planning, key performance indicators, supply chain management, water targets, and quality control. Whilst this was an encouraging meeting, there are areas in which we would prefer more detail. We will continue the discussion and will look to engage with the company again within a year. SDG reporting:

Impact measurement and reporting is a developing area. We are committed to presenting regular, transparent accounts of the impact generated by companies in the fund. We agree with the Global Impact Investing Network's stance that "context is critical to interpreting impact results in a robust and reliable way." In addition to case studies we provide pillar level data to show aggregate alignment with the SDGs.

The Fund's annual SDG report is available at abrdn.com.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Product name: **abrdn SICAV I - Emerging Markets Smaller Companies Fund**Legal entity identifier **5493003RH9AJFHA5QI62****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective: %** It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.08% of sustainable investments in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It made **sustainable investments with a social objective: %** It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 3.5%, ESG Q2: 36%, ESG Q3: 54.6%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 78.25% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating BBB
- Benchmark rating BBB

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 1%, ESG Q2: 39%, ESG Q3: 60%, ESG Q4: 0%. The Fund achieved a 85.232% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (BBB) when compared with the benchmark (BB).

Period	2024	2023
E/S Characteristics	97.85%	96.69%
Sustainable investment	49.08%	51.96%
Other environmental	15.76%	19.07%
Social	33.32%	32.89%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
FPT CORP	Technology	3.31	Viet Nam

FPT CORP	Technology	3.31	Viet Nam

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	5.50
Financials	Insurance	1.48
Financials	Banking	1.62
Technology	Software & Tech Services	5.22
Technology	Tech Hardware & Semiconductors	13.51
Consumer Discretionary	Consumer Discretionary Products	5.54
Consumer Discretionary	Retail & Whsle - Discretionary	5.12
Health Care	Health Care	11.78
Industrials	Industrial Products	10.33
Industrials	Industrial Services	10.30
Communications	Media	4.66
Consumer Staples	Consumer Staple Products	4.94
Consumer Staples	Retail & Wholesale - Staples	1.82
Materials	Materials	5.61
Real Estate	Real Estate	9.64

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

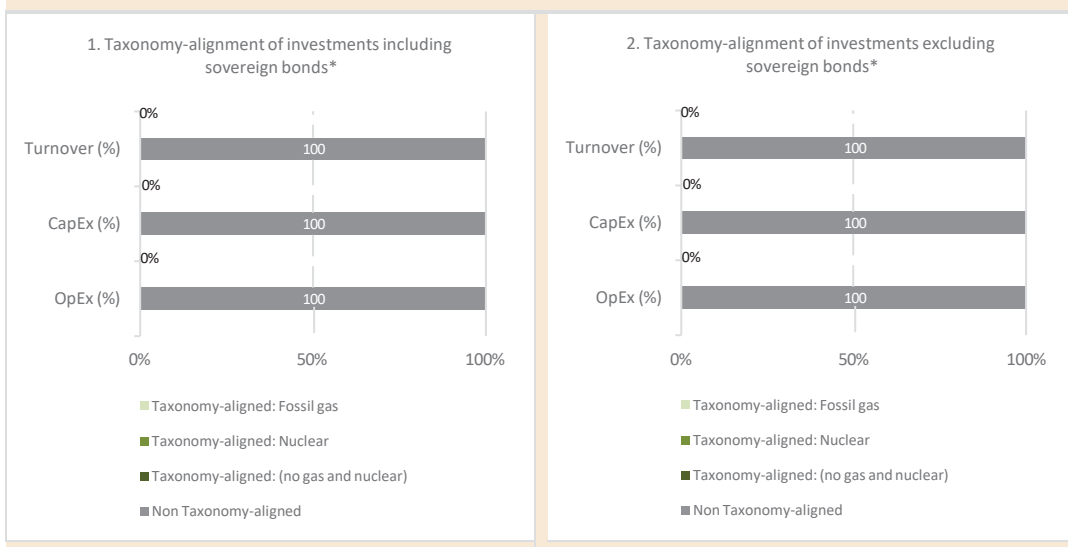

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15.76% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 33.32%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.15% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, and Corporate Governance: 1) Makalot - In our conversation with Makalot, we discussed various aspects, including its disclosures and environmental management framework. The management acknowledges the need for

improved disclosure for its external ESG rating, attributing challenges to diverse global standards. They emphasize robust CSR and labor management practices and aim to reach 60% green energy usage within the next 5 years as required by contracts. Despite a capable management team, Makalot sees no need to replace long-standing executives solely for ESG score improvement. Acknowledging ESG's significance to customers, the company prioritizes transparency, disclosure, and traceability as key elements to secure contracts. 2) Zhejiang Shuanghuan - We discussed a range of ESG issues at our recent meeting. Reassuringly, staff attrition levels are low, and the company uses ESOPs to retain talent. 3) SITC - SITC are making practical step by step progress towards emissions reductions. We also see positive attitudes towards improving ESG practices, the latest being around disclosures relating to KPIs in the remuneration.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Product name: **abrdn SICAV I - Euro High Yield Bond Fund**Legal entity identifier **549300Q9GK10S7HFDF57****Environmental and/or social characteristics****Does this financial product have a sustainable investment objective?**●● Yes●● No It made **sustainable investments with an environmental objective**: % in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy It made **sustainable investments with a social objective**: % It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 31.63% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There is 1 high risk issuer held in the fund, due to governance issues. We are actively exiting the position. The high risk rating prevents the name being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity: We confirm that during the reporting period the portfolio carbon intensity was lower than the benchmark (BofA Merrill Lynch Euro High Yield Constrained), in line with our overall commitment. As at year-end, the fund's weighted average carbon intensity (Scope 1 and 2) relative to the benchmark was 60.42 %.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	96.19%	%
Sustainable investment	31.63%	%
Other environmental	14.75%	%
Social	16.88%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:

01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
VODAFONE GROUP PLC 2.625% 08/27/2080	Communications	1.85	United Kingdom

What was the proportion of sustainability-related investments?

● What was the asset allocation?

The fund committed to hold a minimum of 67% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 33% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.75% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 16.88%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 3.81% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG assessment criteria
- ESG screening criteria,
- a carbon intensity targeting lower than the benchmark,
- promoting good governance including social factors. These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the PAIs within the investment process. The fund

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - Europe ex UK Sustainable Equity Fund**

Legal entity identifier **549300D74Z5SB5ZIUN31**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.28% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 30.9.2024

Q1 12%

Q2 73%

Q3 15%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 18.7 tCO/\$m

Benchmark: 103.1 tCO/\$m

ESG Fund Rating We confirm that during the reporting period the Fund achieved a better than or equal ESG rating based on MSCI data when compared with the benchmark:

Fund: AA

Benchmark: AA

● **...and compared to previous periods?**

ESG Q Scores: Q1 10% Q2 69% Q3 21% ESG Screening criteria were also met in the prior period WACI Scope 1&2: Fund: 17.8 Benchmark: 128.2 ESG Fund Rating: Fund: AA Benchmark: AA

Period	2024	2023
E/S Characteristics	99.50%	99.13%

Other environmental	20.73%	19.54%
Social	36.56%	26.18%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and

tax compliance.

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
NOVO NORDISK A/S-B	Health Care	8.70	Denmark

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	11.89
Financials	Insurance	4.47
Technology	Tech Hardware & Semiconductors	9.43
Technology	Software & Tech Services	11.18
Consumer Discretionary	Consumer Discretionary Products	6.92
Health Care	Health Care	17.79
Industrials	Industrial Products	11.49
Industrials	Industrial Services	3.51
Communications	Media	3.28
Consumer Staples	Consumer Staple Products	9.71
Materials	Materials	7.04
Utilities	Utilities	2.32

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.73% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 36.56%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0.50% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG scores, ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Governance, Human Rights and Climate Change. Examples include:

LMVH (Human Rights, Supply Chain Oversight). We met with LVMH to discuss news stories which suggested that one of LVMH's brands, Dior, was sourcing from a supplier based in Italy which had been engaged in abusive labour practices. LVMH acknowledged there had been a failure of oversight, and as a result the company is in the process of developing an action plan to enhance the group's auditing processes, in order to improve detection of such practices by suppliers. Following the call, we wrote a letter to LVMH to provide suggestions which could be made to enhance supply chain disclosure and oversight. These include for instance disclosing a list of LVMH's primary suppliers, greater information about LVMH's supplier auditing process and an updated group-wide responsible purchasing policy. We will continue to monitor and seek to engage on this topic again in the future.

Amplifon (Diversity, Circular Economy). During a meeting with Amplifon we discussed the company's recently announced 2027 ESG targets, which Amplifon will report annual progress towards starting next year. We are pleased that Amplifon has now set targets on gender diversity and circular economy, which is something we had requested in the past. Amplifon now has a target for 35% women at the global leadership level by 2028, as well as a commitment to continue expanding the sale of rechargeable hearing aids and improve their collection systems for recycling used batteries. Amplifon previously achieved its major ESG targets set in 2021, leading us to upgrade our sustainability view of the company.

SAP (Governance, Board Transition). We met with SAP to discuss the company's board chair transition plan which has not gone as intended, as the original candidate identified to replace the outgoing founder and chair, Dr Hasso Plattner, has now left the business. It appears that this was not the result of a personal issue or disagreement on strategy, but rather that due to a misunderstanding about the role and responsibilities of chairperson in a supervisory committee. An alternative candidate, Pekka Ala-Pietilä, was quickly identified and has now been elected to this role. The meeting gave reassurance that SAP is well prepared for succession planning even in difficult circumstances. We will continue to monitor and will seek to engage with SAP in the future to understand how this transition has gone.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***
Not applicable
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***
Not applicable
- ***How did this financial product perform compared with the reference benchmark?***
Not applicable
- ***How did this financial product perform compared with the broad market index?***
Not applicable

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - European Sustainable Equity Fund**

Legal entity identifier **549300S9LZDBGNKR0127**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

No

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.56% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 30.9.2024

Q1 11%

Q2 77%

Q3 12%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 19.4 tCO/\$m

Benchmark: 101.8 tCO/\$m

ESG Fund Rating We confirm that during the reporting period the Fund achieved a better than or equal ESG rating based on MSCI data when compared with the benchmark:

Fund: AA

Benchmark: AA

Period	2024	2023
E/S Characteristics	99.57%	98.13%
Sustainable investment	60.56%	48.26%
Other environmental	21.48%	19.46%
Social	39.08%	28.79%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and

tax compliance.

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Utilities	Utilities	2.19

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 21.48% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 39.08%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0.44% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG scores, ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Governance, Human Rights and Climate Change. Examples include:

LMVH (Human Rights, Supply Chain Oversight). We met with LVMH to discuss news stories which suggested that one of LVMH's brands, Dior, was sourcing from a supplier based in Italy which had been engaged in abusive labour practices. LVMH acknowledged there had been a failure of oversight, and as a result the company is in the process of developing an action plan to enhance the group's auditing processes, in order to improve detection of such practices by suppliers. Following the call, we wrote a letter to LVMH to provide suggestions which could be made to enhance supply chain disclosure and oversight. These include for instance disclosing a list of LVMH's primary suppliers, greater information about LVMH's supplier auditing process and an updated group-wide responsible purchasing policy. We will continue to monitor and seek to engage on this topic again in the future.

Amplifon (Diversity, Circular Economy). During a meeting with Amplifon we discussed the company's recently announced 2027 ESG targets, which Amplifon will report annual progress towards starting next year. We are pleased that Amplifon has now set targets on gender diversity and circular economy, which is something we had requested in the past. Amplifon now has a target for 35% women at the global leadership level by 2028, as well as a commitment to continue expanding the sale of rechargeable hearing aids and improve their collection systems for recycling used batteries. Amplifon previously achieved its major ESG targets set in 2021, leading us to upgrade our sustainability view of the company.

SAP (Governance, Board Transition). We met with SAP to discuss the company's board chair transition plan which has not gone as intended, as the original candidate identified to replace the outgoing founder and chair, Dr Hasso Plattner, has now left the business. It appears that this was not the result of a personal issue or disagreement on strategy, but rather that due to a misunderstanding about the role and responsibilities of chairperson in a supervisory committee. An alternative candidate, Pekka Ala-Pietilä, was quickly identified and has now been elected to this role. The meeting gave reassurance that SAP is well prepared for succession planning even in difficult circumstances. We will continue to monitor and will seek to engage with SAP in the future to understand how this transition has gone.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **abrdn SICAV I - Future Minerals Fund**

Legal entity identifier **549300J6LKERHANY5698**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.79% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework, we aimed to promote the below characteristics within

this fund:

Environment – reducing energy consumption and greenhouse gas emissions, increasing renewable energy usage/generation, reducing biodiversity/ecological impacts, and promoting the efficient use and extraction of raw materials whilst seeking to maximize opportunities for circular economy.

Social – labour practices and relations, employee health and safety, and supply chain management.

Benchmark

No benchmark was used for portfolio construction or as a basis for setting risk constraints in the management of the Fund. The Fund referenced the MSCI ACWI Index (USD) for use as an indicative comparator of the long-term performance of the Future Minerals theme against global equities. The Fund did not aim to outperform this index and it was not used for portfolio construction or risk management purposes. Further, the index did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 30.9.2024

Q2 43%

Q3 48%

Q4 9%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

We confirm that all holdings met Future Minerals theme defined as companies with a minimum of 20% of their current or forecast revenue, profit, assets, capital expenditure linked to one of the following pillars:

- Mineral extraction & processing: metals and mining companies with raw mineral exposure that clean energy technologies are reliant upon
- Upstream & downstream value chain: machinery and services that enable the clean energy transition and mineral conversion into clean energy products (e.g. electric vehicle battery makers)
- Recycling & sustainability: minerals and metals extraction from waste for re-use
- Compounds & advanced materials: other material producing companies that support the clean energy transition

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	99.59%	%
Sustainable investment	49.79%	%
Other environmental	34.55%	%
Social	15.25%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- a quantitative methodology based on a combination of publicly available data sources; and
- using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration, Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in

breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
LINDE PLC	Materials	4.93	United States of America
BHP GROUP LTD-DI	Materials	4.85	Australia
RIO TINTO PLC	Materials	4.79	Australia
AIR LIQUIDE SA	Materials	4.34	France
FREEPORT-MCMORAN INC	Materials	3.54	United States of America
SOUTHERN COPPER CORP	Materials	3.52	Mexico
TOTALENERGIES SE	Energy	3.03	France
QUIMICA Y MINERA CHIL-SP ADR	Materials	2.92	Chile
CAPSTONE COPPER CORP	Materials	2.67	Canada
NEWMONT CORP	Materials	2.64	United States of America
Chevron Corp	Energy	2.54	United States of America
MARTIN MARIETTA MATERIALS	Materials	2.46	United States of America
SHIN-ETSU CHEMICAL CO LTD	Materials	2.44	Japan
ANGLO AMERICAN PLC	Materials	2.25	South Africa
LG CHEM LTD	Materials	2.24	Korea (South)

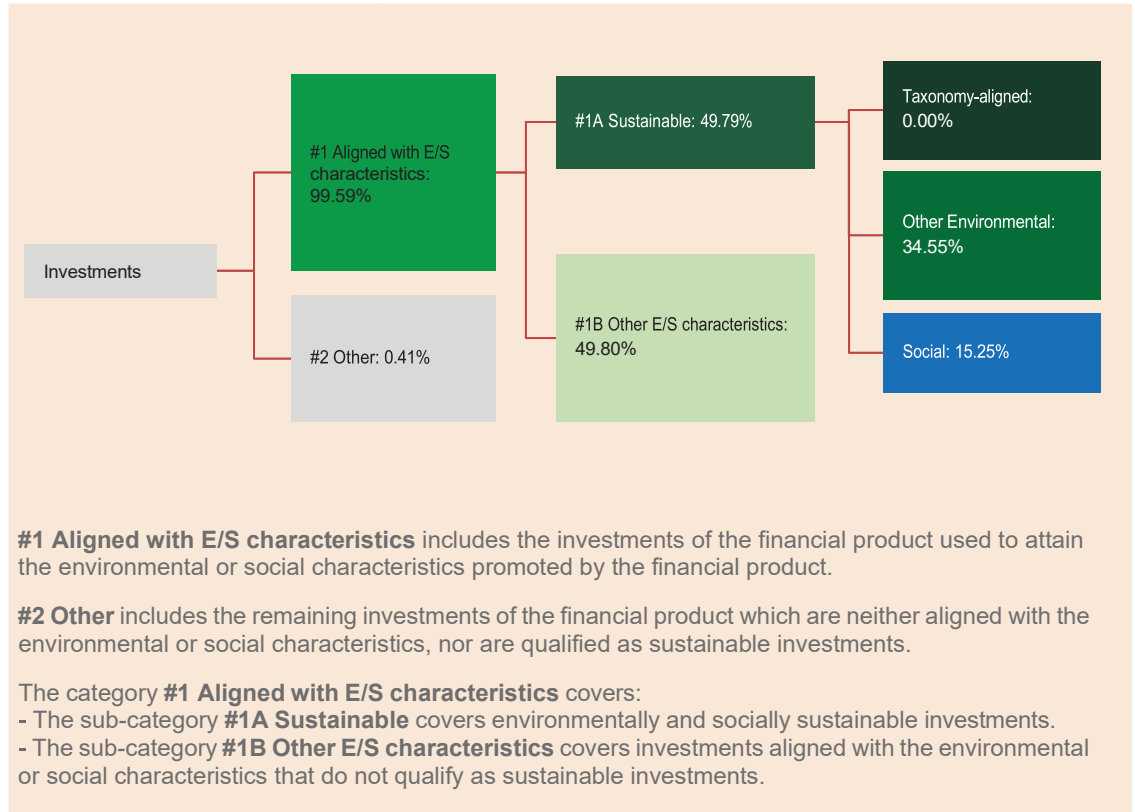

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 20% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	4.29
Industrials	Industrial Products	4.77
Industrials	Industrial Services	1.43
Materials	Materials	76.80
Energy	Oil & Gas	12.07

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.55% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 15.25%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0.41% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG Screening to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNG) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Human Rights and Climate Change. Examples include:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

Rio Tinto (Human Rights): We engaged on Community engagement and Workforce Culture. Significant investment is being made in community engagement in the Pilbara to co-design with traditional owners, with Rio embedding co-design and co-development in the Pilbara. On Workforce culture, a second Broderick review – the company expects to see progress but also think new issues will be likely to emerge. Will take time to deliver cultural change. The 26 recommendations of the Everyday Respect report are being implemented with rigour across the business. Lots of progress around facilities management including good lighting, people feel safe going round a camp at night. This has taken a lot of investment. Also huge amount of work being done on leadership and culture.

Capstone (Climate Change, Human Rights/Worker Safety): The company has not put in place net zero targets, but explained that they are not committing to net-zero without an achievable plan in place. They do subscribe to Paris Agreement however, targeting -30% in absolute emissions by 2030 (-48% intensity). This will be delivered by diesel displacement/electrification, improved renewable generation from the grid, and self-developed renewable electricity; some projects not yet disclosed here. We discussed the company's approach to Safety, with management acknowledging the main challenge is not training or policies, but adherence to them. As such oversight measures in place with leadership accountability, and zero-tolerance attitude with termination possible if procedures are not followed.

Product name: **abrdr SICAV I - Global Climate and Environment Equity Fund**

Legal entity identifier **213800IA6FFNPXL5L927**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** 0.00%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** 0.00%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of __% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The fund has closed to all investors and held no investments at the year-end reporting date.

When open, the abrdr Climate and Environment Global Equity Fund aimed to provide long-term growth by investing in companies listed globally that developed or used products and services designed to maximize resource efficiency, support the transition to a low carbon economy, and address wider environmental challenges.

The abrdr Climate and Environment Global Equity Fund invested in companies that made positive contributions to the climate and environmental challenges aligned with at least one of the five portfolio construction pillars. This ensured that the portfolio addressed the biggest areas of GHG emissions as identified by the WRI. When the fund was open, all holdings met these criteria.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure the measures applied by the Fund were:

The abrdn Climate and Environment Global Equity Fund invested in companies that make positive contributions to the climate and environmental challenges aligned with at least one of the five portfolio construction pillars:

How we source and power

How we build

How we transport:

How we make and use

How companies operate:

Application of the fund's approach resulted in at least 20% of the Fund' s investment universe being excluded as at 30 Sept 2024.

● **...and compared to previous periods?**

The fund has closed to all investors and holds no investments at the year end reporting date.

Period	2024	2023
Sustainable investment	0.00%	97.03%
Other environmental	0.00%	68.06%
Social	0.00%	28.98%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal,

less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund has closed to all investors and holds no investments at the year end reporting date. Prior to closure and during the reporting, the Fund considered the following:

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring is in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.

- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Technology	4.92	United States of America
NOVO NORDISK A/S-B	Health Care	4.43	Denmark
TETRA TECH INC	Industrials	4.28	United States of America
ANALOG DEVICES INC	Technology	4.12	United States of America
SCHNEIDER ELECTRIC SE	Industrials	4.03	United States of America
TRANE TECHNOLOGIES PLC	Industrials	3.73	United States of America
EQUINIX INC	Real Estate	3.53	United States of America
ADVANCED DRAINAGE SYSTEMS IN	Materials	3.37	United States of America
DSM-FIRMENICH AG	Materials	3.30	Switzerland
ECOLAB INC	Materials	3.26	United States of America
AUTODESK INC	Technology	3.22	United States of America
GRAPHIC PACKAGING HOLDING CO	Materials	3.13	United States of America
L'OREAL	Consumer Staples	3.05	France
SSE PLC	Utilities	3.03	United Kingdom
KINGSPAN GROUP PLC	Materials	2.87	Ireland

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The fund committed to hold a minimum of 75% in Sustainable Investments, including a minimum commitment of 20% to assets with an environmental objective and 5% to social objectives. The Fund invests a maximum of 25% of assets in the “Non Sustainable” category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the sustainable investments expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	1.75
Industrials	Industrial Services	7.87
Industrials	Industrial Products	17.98
Materials	Materials	22.53
Energy	Renewable Energy	2.72
Consumer Staples	Consumer Staple Products	3.05
Utilities	Utilities	11.12
Technology	Tech Hardware & Semiconductors	6.18
Technology	Software & Tech Services	11.00
Real Estate	Real Estate	5.60
Health Care	Health Care	7.28

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund has closed to all investors and holds no investments at the year end reporting date.

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives).

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

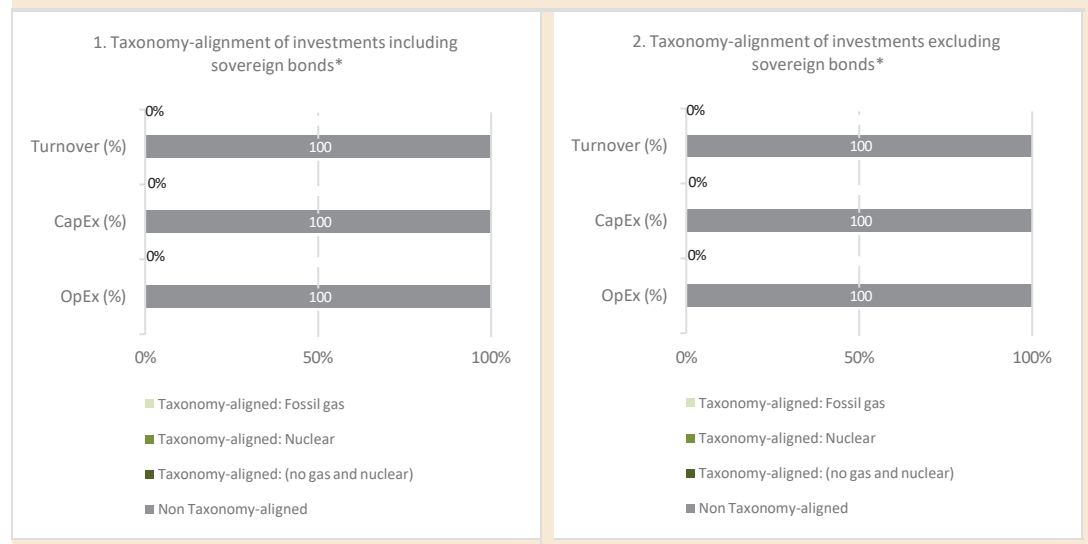

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund has closed to all investors and holds no investments at the year end reporting date.

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 0.00% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The fund has closed to all investors and holds no investments at the year end reporting date.

The share of sustainable investments with a social objective is 0.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The fund has closed to all investors and holds no investments at the year end reporting date.

The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Engagement:

For this Fund, engagement priorities included engagements designed to encourage companies to improve climate disclosure. We worked with companies to better understand how they allocate capital to the areas of under-investment highlighted by the UN SDGs. We looked to encourage better disclosure of this capital allocation process and measurement of positive contribution.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- ***How did the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - Global Corporate Sustainable Bond Fund**

Legal entity identifier **213800WIYPEVSD685504**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 46.21% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund’s binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Avoiding Poor ESG Business Practices We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are no high risk issuers held in the fund. Therefore, since all issuers pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

ESG Performance: Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark.

● **...and compared to previous periods?**

During the previous reporting period, the fund did not hold any high risk rating issuers. The screening criteria as applied and there were no holdings in the fund that failed the agreed criteria. The bottom 10% of issuers with an ESG House Score that are in the benchmark were excluded.

Period	2024	2023
E/S Characteristics	97.32%	98.87%
Sustainable investment	46.21%	36.46%
Other environmental	27.90%	16.47%
Social	18.31%	19.99%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
BANK OF AMERICA CORP 2.592% 04/29/2031	Financials	0.74	United States of America
BANK OF AMERICA CORP 2.651% 03/11/2032	Financials	0.70	United States of America
MORGAN STANLEY 4.431% 01/23/2030	Financials	0.66	United States of America
BANK OF AMERICA CORP 2.456% 10/22/2025	Financials	0.66	United States of America

HALEON US CAPITAL LLC 3.625% 03/24/2032	Consumer Staples	0.47	United States of America

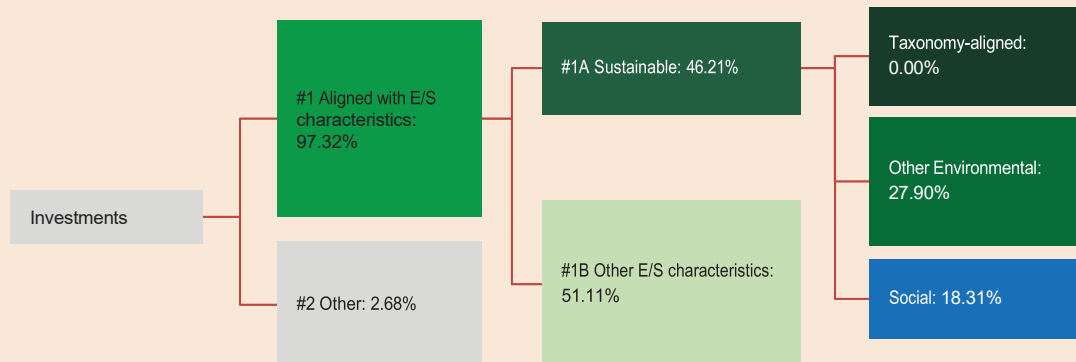

What was the proportion of sustainability-related investments?

● *What was the asset allocation?*

The fund committed to hold a minimum of 90% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Automobiles Manufacturing	2.53
Consumer Discretionary	Travel & Lodging	0.13
Consumer Discretionary	Retail & Whsle - Discretionary	0.79
Consumer Discretionary	Consumer Discretionary Products	0.20
Consumer Discretionary	Consumer Services	0.33
Consumer Discretionary	Consumer Discretionary Services	0.25
Consumer Discretionary	Retail - Consumer Discretionary	0.10
Industrials	Industrial Services	2.50

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 27.90% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 18.31%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.68% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG performance (Corporate Issuers)
- Avoid poor ESG practices (Corporate & State-Owned Enterprise Issuers)
- Screening Criteria These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial

weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - Global High Yield Sustainable Bond Fund**

Legal entity identifier **213800USPMOYN564PL94**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective: %**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 40.78% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: %**

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund’s binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are no high risk issuers held in the fund. Therefore, since all pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
E/S Characteristics	94.91%	%
Sustainable investment	40.78%	%
Other environmental	17.92%	%
Social	22.86%	%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
ENERFLEX LTD 9% 10/15/2027	Energy	1.26	Canada

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include government securities, cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Retail & Whsle - Discretionary	0.52

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 17.92% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 22.86%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 5.09% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG screening criteria,
- ESG Performance
- Avoiding Poor ESG Business Practices. These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?	
●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: % <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.81% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: %	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

Q1 6%

Q2 64%

Q3 28%

Q4 3%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 19.5 tCO/\$m

Other environmental	23.92%	14.73%
Social	31.89%	34.21%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and

tax compliance.

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Technology	5.30	Netherlands
AMAZON.COM INC	Consumer Discretionary	4.73	United States of America

GARTNER INC	Technology	3.07	United States of America
BE SEMICONDUCTOR INDUSTRIES	Technology	3.05	Netherlands

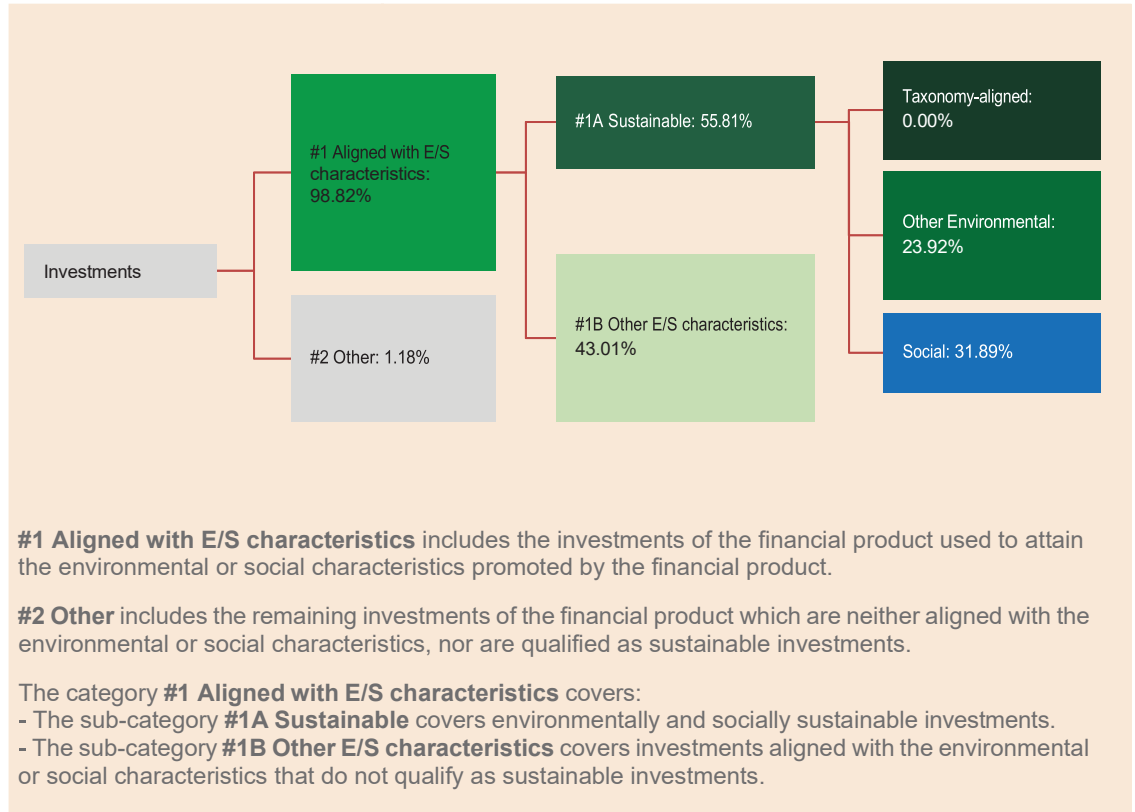

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	7.34
Financials	Banking	0.86
Technology	Tech Hardware & Semiconductors	20.48
Technology	Software & Tech Services	21.74
Consumer Discretionary	Consumer Discretionary Products	1.21
Consumer Discretionary	Retail & Whsle - Discretionary	7.82
Health Care	Health Care	14.29
Industrials	Industrial Products	9.11
Industrials	Industrial Services	1.88
Communications	Media	12.27
Energy	Oil & Gas	1.98

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.92% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 31.89%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.18% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG scores, ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Corporate Governance, Human Rights and Climate Change. Examples include:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

Novo Nordisk (Human Rights via Access to Medicine): We met with Novo Nordisk to discuss access and affordability to their diabetes drugs. Novo's access strategy for insulin is industry leading, with a \$3 per vial cap in over 80 developing countries, and prices in the US having fallen by up to 75% in the last few years. We would like for Novo Nordisk to provide a timeline for when its GLP-1 receptors might be included in their access and affordability strategy, particularly in developing countries. However, Novo Nordisk made clear that supply constraints amidst accelerating demand has made the situation challenging, in addition to the infrastructure barriers that exist in many developing countries. Novo did however highlight that they are optimistic about the role which small molecule treatments in their pipeline could play in unlocking a low-cost scalable alternative which could increase access globally, should trials prove successful.

Tencent (Climate Change and Human Rights): We met Tencent during an ESG NDR where they provided an update to their ESG strategy. Their focus areas are carbon neutrality, data privacy, protection of minors and governance. To manage emissions, data centres are built with flat, sizeable rooftops can support a large capacity of distributed rooftop PV, achieving an average PUE of 1.3. In managing data privacy, the company complies with local regulations and adopts the principle of minimal data sharing. Tencent is confident that they have sufficient and the most advanced controls in place to mitigate risks of minors gaming.

GTT (Climate Change and Corporate Governance): We had an ESG engagement with GTT as a follow up from last year. The meeting was very positive and enhanced the company fundamentals. We gained comfort around the improved disclosures and have closed this milestone. The company is a leader in the space and their technology can help reduce the carbon intensity of the fleets. They are working on further ESG/Sustainability targets and their scope 4 emissions. All these are very good developments as the company can have a real impact in the decarbonisation of the fleets. The "wrinkle" that we flagged in our previous engagement concerned the auditors who have been in place for the last 5 years. The company has re-elected the same auditor for 6 more years which we voted against and encouraged them to consider changing the auditor. We are closing the milestone with regards to disclosures but keeping the auditor milestone open. Also we introduced a new milestone for the separation of Chair and CEO role.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
CTS EVENTIM AG & CO KGAA	Consumer Discretionary	4.32	Germany
INTERMEDIATE CAPITAL GROUP	Financials	4.20	United Kingdom
AXON ENTERPRISE INC	Industrials	4.16	United States of America
GAZTRANSPORT ET TECHNIGA SA	Energy	4.02	France
DIPLOMA PLC	Industrials	3.57	United Kingdom
FAIR ISAAC CORP	Financials	1.55	United States of America
FAIR ISAAC CORP	Technology	1.95	United States of America
RATIONAL AG	Industrials	3.49	Germany
ROLLINS INC	Industrials	3.26	United States of America
CARLISLE COS INC	Materials	3.09	United States of America
CADENCE DESIGN SYS INC	Technology	2.95	United States of America
DECKERS OUTDOOR CORP	Consumer Discretionary	2.77	United States of America
SYNOPSIS INC	Technology	2.66	United States of America
YOKOGAWA ELECTRIC CORP	Industrials	2.53	Japan
GARTNER INC	Technology	2.47	United States of America

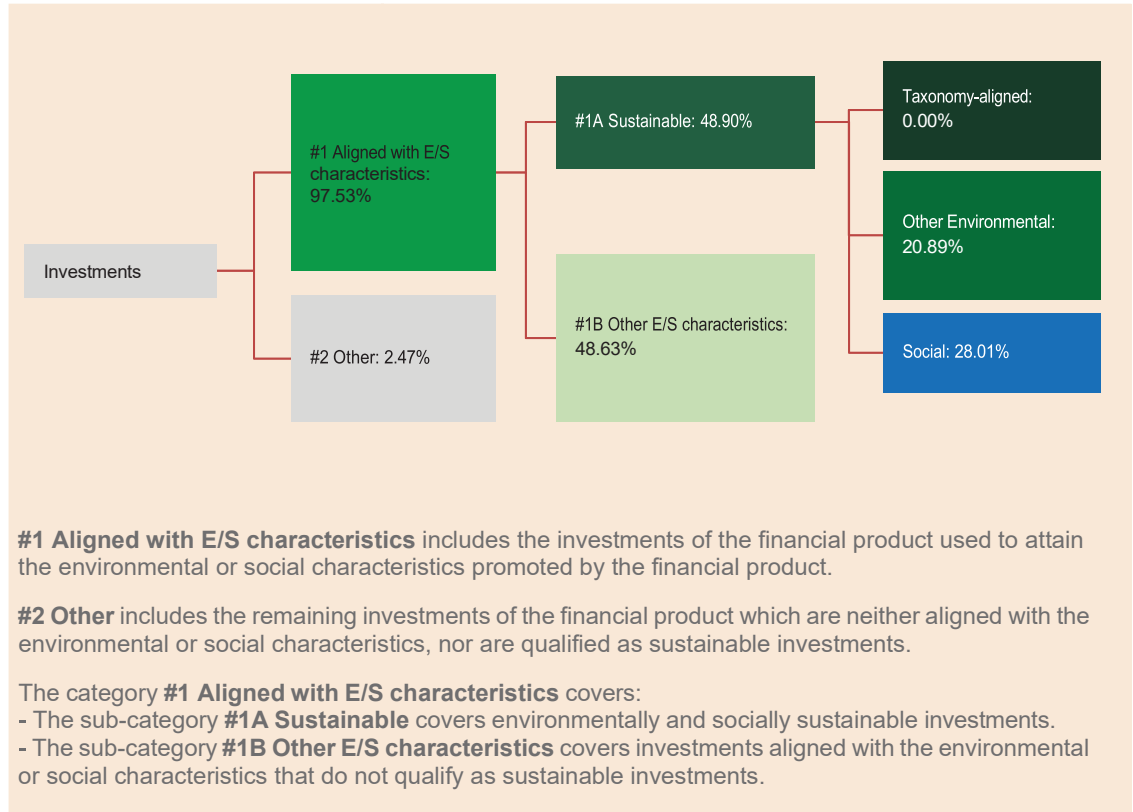

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	8.08
Financials	Banking	1.52
Financials	Insurance	1.07
Technology	Software & Tech Services	17.54
Technology	Tech Hardware & Semiconductors	2.99
Consumer Discretionary	Consumer Discretionary Products	6.61
Consumer Discretionary	Retail & Whsle - Discretionary	6.80
Consumer Discretionary	Consumer Discretionary Services	4.32
Health Care	Health Care	7.80
Industrials	Industrial Products	16.90
Industrials	Industrial Services	5.55
Communications	Media	2.34
Consumer Staples	Consumer Staple Products	1.66
Consumer Staples	Retail & Wholesale - Staples	4.80
Materials	Materials	5.65
Energy	Oil & Gas	4.02

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 20.89% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 28.01%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.47% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Governance, Labour and Climate Change. Examples include:

Rational AG(Climate Change, Corporate Governance-Diversity): We had an ESG update through email with Rational IR. The company is working to setup their ESG strategy and that includes carbon reduction targets, while aiming to enhance general data transparency and disclosure. The lack of female representation unfortunately continues in the board. The challenges hiring a female board member they are facing are understood but we would hope to see the board having a better diversity. Milestones set continue. Will engage post the disclosure of the ESG strategy to understand the progress

Five Below Inc (Climate Change, Labour Management): We had an overview meeting with Five Below given it is a new holding with lower ESG House score. The company is doing efforts to understand their carbon footprint and at a next step they will look to address the decarbonisation topic. No carbon reduction targets are available yet. In addition, there is a lack of supply chain code of conduct and no disclosure about health and safety incidents. We have implemented two milestones on the supply chain code of conduct and also H&S incidents disclosure improvements. The company is early in their ESG journey.

Intermediate Capital (Labour management): Priority engagement with Intermediate Capital to better understand the quality of human capital management strategy given the key importance to the evolution of the business, the company's activities on ESG matters and the respective visibility impactful ESG risks.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**
Not applicable
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**
Not applicable
- **How did this financial product perform compared with the reference benchmark?**
Not applicable
- **How did this financial product perform compared with the broad market index?**
Not applicable

Product name: **abrdn SICAV I - Global Small & Mid-Cap SDG Horizons Equity Fund**

Legal entity identifier **549300OBY6VYWLR7R110**

Sustainable investment objective

Does this financial product have a sustainable investment objective?

X Yes

No

X It made **sustainable investments with an environmental objective: 58.88%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

X in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

X It made **sustainable investments with a social objective: 35.77%**

It promoted **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Fund invested in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. For companies classified in the benchmark as "Financials", alternative measures of materiality were used based on loans and customer base, details of which can be found in the abrdn Global Small & Mid-Cap SDG Horizons Equity Investment Approach. By investing across SDG Horizons the fund sought (and continues to seek) opportunities in names contributing towards the SDGs across the value chain. During the reporting period, all holdings in the fund met this criteria, while at the same time respecting the "Do no Significant harm principle as per the abrdn process.

Sustainability indicators measure how the sustainable objectives of this financial product are attained

● **How did the sustainability indicators perform?**

The Fund will invest in companies with minimum of 20% of their revenue, profit, capital or operating expenditure or research and development linked to the UN's SDGs. For companies classified in the benchmark as "Financials", alternative measures of materiality are used based on loans and customer base, details of which can be found in the abrdn Global Small & Mid-Cap SDG Horizons Equity Investment Approach. By investing across SDG Horizons the fund will seek opportunities in names contributing towards the SDGs across the value chain.

As at year-end, the fund's exposure by area of materiality was:

Financial Inclusion	1%
Sustainable Real Estate & Infrastructure	26%
Water & Sanitation	7%
Sustainable Energy	21%
Education & Employment	10%
Circular Economy	16%
Health & Social Care	5%
SDG Enablers	14%

Application of the fund's approach resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

We also confirm that during the reporting period, company exclusions are applied to exclude the particular areas of investment related to UN Global Compact, ILO and OECD, Norges Bank Investment Management (NBIM), State Owned Enterprises (SOE), Weapons, Tobacco, Gambling, Alcohol, Thermal Coal, Oil and Gas and Electricity Generation. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 57.2 tCO/\$m

Benchmark: 203.1 tCO/\$m

● **...and compared to previous periods?**

N/A - No Previous report

Period	2024	2023
Sustainable investment	94.65%	%
Other environmental	58.88%	%
Social	35.77%	%

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary

devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
MSA SAFETY INC	Industrials	4.63	United States of America
HILL & SMITH PLC	Industrials	4.59	United Kingdom
CADENCE DESIGN SYS INC	Technology	4.56	United States of America
TETRA TECH INC	Industrials	4.44	United States of America
ADVANCED DRAINAGE SYSTEMS IN	Materials	4.11	United States of America
VOLUTION GROUP PLC	Industrials	4.08	United Kingdom
ICON PLC	Health Care	4.07	United States of America
BRUNELLO CUCINELLI SPA	Consumer Discretionary	3.94	Italy
NEMETSCHEK SE	Technology	3.79	Germany
BORREGAARD ASA	Materials	3.78	Norway
CHROMA ATE INC	Industrials	3.25	Taiwan, Republic of China
SANWA HOLDINGS CORP	Consumer Discretionary	3.06	Japan
SINBON ELECTRONICS CO LTD	Technology	2.93	Taiwan, Republic of China
DINO POLSKA SA	Consumer Staples	2.87	Poland
EUX	Industrials	2.70	Germany

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The Fund committed to hold a minimum of 85% in Sustainable Investments, including a minimum commitment of 15% to assets with an environmental objective and 15% to social objectives.

The Fund invests a maximum of 15% of assets in the "Non-Sustainable" category, which is mainly made up of cash, money market instruments and derivatives. The chart below shows the sustainable investments expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● **In which economic sectors were the investments made?**

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	8.92
Consumer Discretionary	Retail & Whsle - Discretionary	5.98
Industrials	Industrial Products	25.77
Industrials	Industrial Services	9.27
Materials	Materials	12.19
Energy	Renewable Energy	0.27
Health Care	Health Care	11.88
Financials	Banking	1.14
Financials	Financial Services	0.52
Technology	Tech Hardware & Semiconductors	5.81
Technology	Software & Tech Services	8.63
Consumer Staples	Consumer Staple Products	0.22
Consumer Staples	Retail & Wholesale - Staples	4.38

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?**

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A - First report

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 58.88% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 35.77%

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 5.35% of assets in the “not sustainable” category. The investments included are cash, money market instruments, and may also include derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to attain the sustainable investment objective during the reference period?

Monitoring companies' continued alignment with the SDGs:

We aim to review the companies in the investable universe at least annually. Companies will be removed from the investable universe if:

- The company begins to pursue a strategy that does not align to one of our impact pillars.
- Red flags, controversies and/or incidents emerge that highlight a persistent, structural ESG problem within the company's operations, strategy or culture, to which the company does not appropriately respond.

abrdn's SDG Management Group is the governing body that reviews new investment opportunities. This Group peer reviews all new candidates for the impact fund and its investable universe. The Group meets weekly and includes the Sustainable Development funds' portfolio managers, analysts from across our global and regional equity teams, and senior members of the Investment Sustainability Group. In order for a company to be included in the investable universe, consensus must be reached by the Group.

Company self-disclosure is a crucial part of our approach to impact investing. We believe that if a company intends to deliver a product to address a specific environmental or social need, the impact must be reported. Therefore we heavily rely on engagement with companies and our conversations with the supervisory board, executive management teams, and divisional heads.

Engagement examples from the past year have included:

Coats Group Plc: is a UK listed manufacturer of threads and textiles. We had an ESG engagement with Coats' sustainability officer to better understand their classification and initiatives within their materials sourcing. The company is ahead of competition, and they are leaders in threads and textiles with strong targets set to increase the percentage of materials sourced from sustainable materials to 60% by 2026. We have requested further breakdown and granularity of the R&D spent on sustainability initiatives. We will track progress on their already helpful reporting.

Vidrala SA: is a Spanish listed glass container manufacturer with leading position in Europe. We have engaged through email with the company -before initiating on a Sustainable Development stock for company and including Vidrala in the SDG Universe- in order to obtain the most up to date number of the "rate of recycled glass incorporation". The company derives 95% of the revenue from glass manufacturing, of which a significant portion is utilising as primary input recycled cullet. We will track progress on climate commitments and remuneration.

Brunello Cucinelli Spa: is an Italian listed luxury goods company. We had the opportunity to engage with the Co-CEO at the company's headquarters in Solomeo-Italy and discuss about their positive impact towards the local community. They provide exceptional working conditions and development opportunities to employees and the locality they operate in. Umbria has been an area with significant youth unemployment and the company is a very significant employer of the region. In addition, they pay employees a salary above the Italian average pay and above the average of the luxury goods sector. Very helpful engagement at the facilities and the headquarters of the company witnessing their positive efforts and discussing about their supply chain and manufacturing stages.

How did this financial product perform compared to the reference sustainable benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

- **How did the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

Not applicable

Product name: **abrdn SICAV I - Global Sustainable Equity Fund**

Legal entity identifier **549300JBCUEJEB0RMF41**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.81% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 30.9.2024

Q1 19%

Q2 67%

Q3 14%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 67.4 tCO/\$m

Benchmark: 127.6 tCO/\$m

ESG Fund Rating We confirm that during the reporting period the Fund achieved a better than or equal ESG rating based on MSCI data when compared with the benchmark:

Fund: AA

Benchmark: A

● **...and compared to previous periods?**

ESG Q Scores: Q1 18% Q2 69% Q3 13% ESG Screening criteria were also met in the prior period WACI Scope 1&2: Fund: 116 Benchmark: 142.5 ESG Fund Rating: Fund: AA Benchmark: A

Period	2024	2023
E/S Characteristics	97.11%	99.40%
Sustainable investment	72.81%	69.44%
Other environmental	30.79%	27.69%
Social	42.02%	41.75%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

- i. Sector Exclusions

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and

tax compliance.

- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

— ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Technology	6.02	United States of America
ELI LILLY & CO	Health Care	4.08	United States of America
L'OREAL	Consumer Staples	3.51	France

PROCTER & GAMBLE CO/THE	Consumer Staples	2.91	United States of America
TJX COMPANIES INC	Consumer Discretionary	2.86	United States of America
TETRA TECH INC	Industrials	2.80	United States of America
HDFC BANK LIMITED	Financials	2.48	India
MARVELL TECHNOLOGY INC	Technology	2.48	United States of America
COCHLEAR LTD	Health Care	2.46	Australia
LPL FINANCIAL HOLDINGS INC	Financials	2.41	United States of America

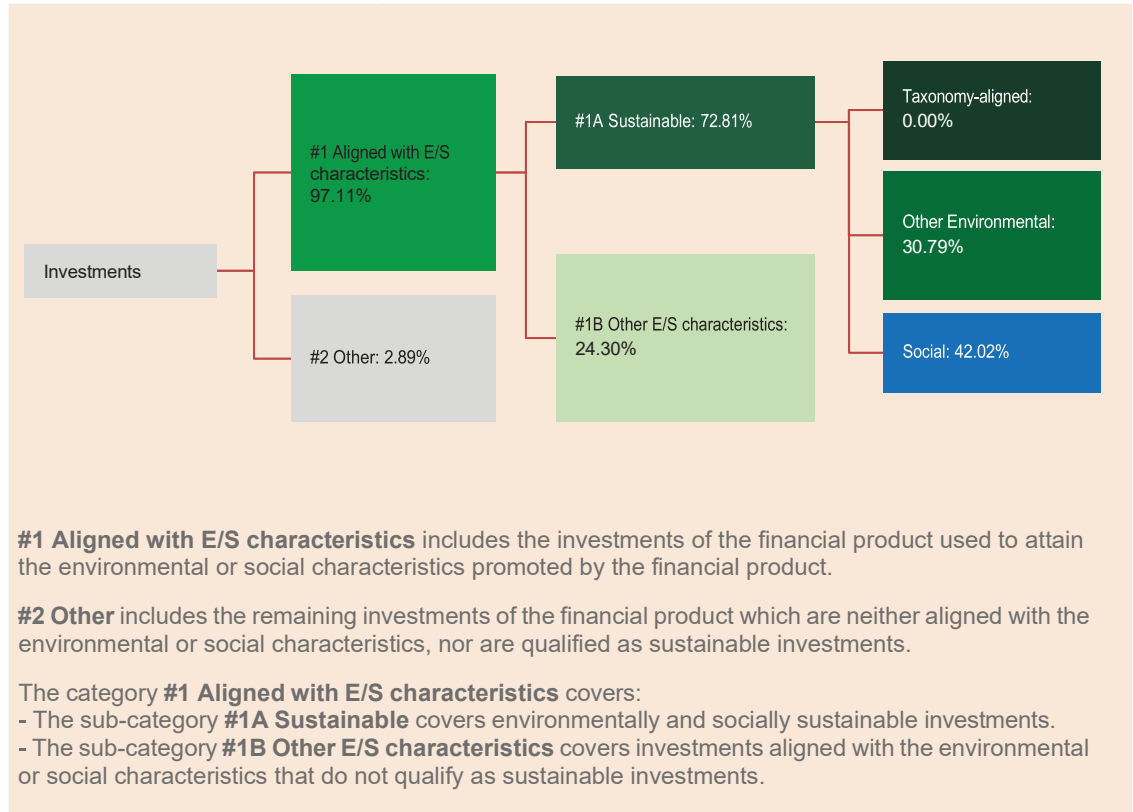

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	8.63
Financials	Insurance	2.94
Financials	Banking	3.59
Technology	Tech Hardware & Semiconductors	11.77
Technology	Software & Tech Services	13.83
Consumer Discretionary	Consumer Discretionary Products	1.53
Consumer Discretionary	Retail & Whsle - Discretionary	4.73
Health Care	Health Care	15.08
Industrials	Industrial Products	9.82
Industrials	Industrial Services	7.41
Consumer Staples	Consumer Staple Products	6.42
Consumer Staples	Retail & Wholesale - Staples	5.19
Materials	Materials	6.19
Utilities	Utilities	0.71

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 30.79% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 42.02%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.89% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG scores, ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Labour, Human Rights and Climate Change. Examples include:

London Stock Exchange Group (Labour and Climate Change): We engaged on human capital management at LSE, including progress in the integration of staff from the acquisition of Refinitiv which increased the number of employees 4x. In addition, we are seeking to better understand LSE's approach to responsible AI and environmental risks in the supply chain in light of significant growth in recent years in the company's Scope 3 emissions.

Raia Drogosil (Labour): We engaged on staff wages and remuneration. The company emphasizes career development opportunities for staff - be it in the wealthier Southeast or the poorer Northeast, RD stores tend to hire people without professional experience, without college degrees, often from poor families. These employees are trained within the company. Some leave after a while with employability skills, and others stay for years. We encouraged the company to increase disclosure on the profile of the people they recruit, career outcomes and salary progression to substantiate RD's status as a gainful employer.

Novo Nordisk (Human Rights vs Access to Medicine): We met with Novo Nordisk to discuss access and affordability to their diabetes drugs. Novo's access strategy for insulin is industry leading, with a \$3 per vial cap in over 80 developing countries, and prices in the US having fallen by up to 75% in the last few years. We would like for Novo Nordisk to provide a timeline for when its GLP-1 receptors might be included in their access and affordability strategy, particularly in developing countries. However, Novo Nordisk made clear that supply constraints amidst accelerating demand has made the situation challenging, in addition to the infrastructure barriers that exist in many developing countries. Novo did however highlight that they are optimistic about the role which small molecule treatments in their pipeline could play in unlocking a low-cost scalable alternative which could increase access globally, should trials prove successful.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: **abrdn SICAV I - Indian Equity Fund**

Legal entity identifier **5493007UVTAIT743FV49**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

X No

It made **sustainable investments with an environmental objective**: %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.64% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 0.0%, ESG Q2: 59.2%, ESG Q3: 37.3%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 58.65% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating BBB
- Benchmark rating BBB

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 0%, ESG Q2: 61%, ESG Q3: 39%, ESG Q4: 0%. The Fund achieved a 52.6% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (A) when compared with the benchmark (BBB).

Period	2024	2023
E/S Characteristics	97.72%	98.34%
Sustainable investment	71.64%	62.14%
Other environmental	25.81%	15.88%
Social	45.83%	46.27%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
ABERDEEN GBL INDIAN EQTY LTD	Unclassified	52.69	India
MAHINDRA & MAHINDRA LTD	Consumer Discretionary	3.90	India
AXIS BANK LTD	Financials	3.56	India
KEI INDUSTRIES LTD	Industrials	2.65	India
TITAN CO LTD	Consumer Discretionary	2.58	India
TATA CONSUMER PRODUCTS LTD	Consumer Staples	2.30	India
J.B. CHEMICALS & PHARMA LTD	Health Care	2.20	India
CHOLAMANDALAM INVESTMENT AND	Financials	2.07	India
SIEMENS LTD	Industrials	1.85	India
ABB INDIA LTD	Industrials	1.78	India
KFIN TECHNOLOGIES LTD	Financials	1.69	India
HAVELLS INDIA LTD	Industrials	1.45	India
NESTLE INDIA LTD	Consumer Staples	1.43	India
HINDUSTAN UNILEVER LTD	Consumer Staples	1.41	India
APAR INDUSTRIES LTD	Industrials	1.24	India

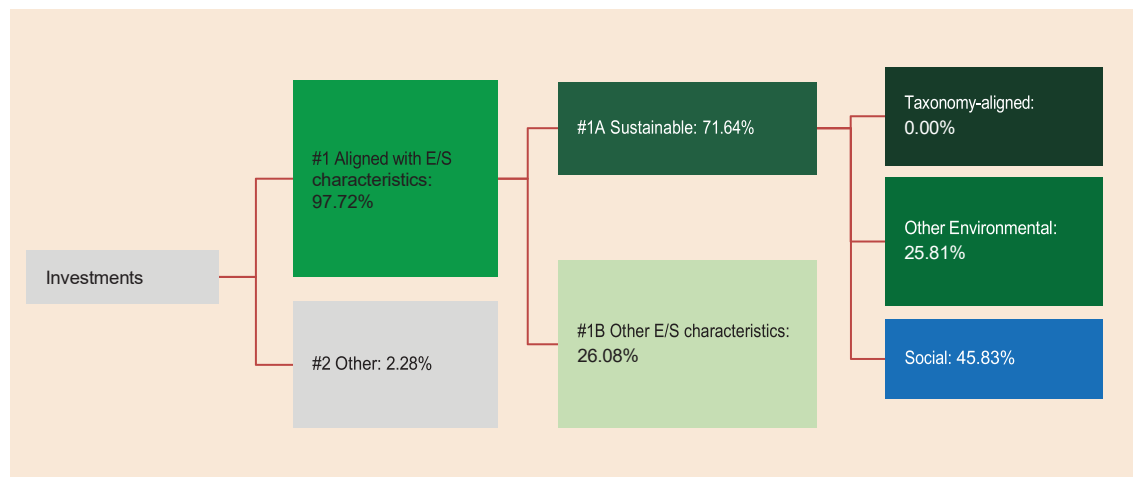

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	4.84
Financials	Insurance	0.62
Financials	Banking	4.80
Unclassified	Unclassified	53.44
Technology	Software & Tech Services	1.42
Consumer Discretionary	Consumer Discretionary Products	7.41
Consumer Discretionary	Consumer Discretionary Services	0.79
Health Care	Health Care	3.41
Industrials	Industrial Products	8.97
Communications	Media	0.33
Communications	Telecommunications	0.89
Consumer Staples	Consumer Staple Products	5.13
Materials	Materials	4.41
Utilities	Utilities	1.25
Real Estate	Real Estate	2.28

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.81% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 45.83%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 2.28% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, and Corporate Governance: 1) Ultratech Cement - At our recent meeting, we were pleased to note that Ultratech has committed to producing carbon-neutral concrete by 2050. The key hurdles are around carbon capture

technology and the kiln. Ultratech is running a pilot study on the electrification of the kiln, but the costs are prohibitive currently and will require policy support, and so it is engaging the government on this. On the governance front, we learnt that the audit committee is now 100% independent and that there will be material board refreshment next year with three directors retiring. 2) SBI Life Insurance - We engaged SBI Life Insurance on the implementation and disclosure of a responsible investment framework, and we were pleased to hear that the company is adopting stewardship principles and has a process to analyse, engage, and exercise voting rights for its portfolio companies. SBI Life is aware of the importance of better disclosure and working with various regulators to understand the requirements for the insurance industry, while at the same time, mapping Global Reporting Initiative G4 framework principles to its business. We also discussed agent retention rates, and we are glad to hear that SBI Life has 50% lower turnover rates versus the industry owing to its various initiatives, such as training and proper incentivisation. Overall, SBI Life is progressing well on its ESG journey, and we will continue to track its milestones. 3) Power Grid - We spoke with management of Power Grid to better understand their approach to climate change (including the governance of this approach), as well as the ways in which they are managing physical risk from climate change. In terms of net zero targets, whilst they have a target of achieving net zero by 2047, they are to an extent dependent on the development of alternatives to Sulfur hexafluoride (SF6) gas, an area in which they are working closely with vendors. In terms of the governance of climate change, it was clear that they have a clear structure of oversight, with board risk committee having ultimate oversight, given the group sees climate as a clear operational risk. As to physical risk, we discussed the different manifestations of physical risk, and management discussed the ways they are managing and mitigating this risk. We encouraged them to disclose more here, given current disclosure is not as detailed as it could be, and management seemed happy to do so. We'll continue to engage, but this was an encouraging conversation.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable

Product name: **abrdn SICAV I - Japanese Smaller Companies Sustainable Equity Fund**

Legal entity identifier **549300S5VXYQ7WSGV137**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective: %**

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 44.88% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective: %**

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 7.5%, ESG Q2: 46.6%, ESG Q3: 42.7%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 15.83% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund did not achieve a better ESG rating based on MSCI data when compared with the benchmark:

- Fund rating BBB
- Benchmark rating A

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrtn ESG House Score, we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 0%, ESG Q2: 47%, ESG Q3: 53%, ESG Q4: 0%. The Fund achieved a 68.74% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved a better ESG rating based on MSCI data (A) when compared with the benchmark (BBB).

Period	2024	2023
E/S Characteristics	99.01%	97.36%
Sustainable investment	44.88%	38.93%
Other environmental	14.64%	12.62%
Social	30.24%	26.31%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrtn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrtn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrtn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrtn uses a combination of the following approaches:

- a quantitative methodology based on a combination of publicly available data sources; and
- using abrtn's own insight and engagement outcomes abrtn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
LIFE CORP	Consumer Staples	4.01	Japan
HACHIJUNI BANK LTD/THE	Financials	3.88	Japan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 35% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Financials	Financial Services	5.15
Financials	Banking	3.88
Technology	Software & Tech Services	7.12
Technology	Tech Hardware & Semiconductors	6.70
Consumer Discretionary	Consumer Discretionary Products	5.55
Consumer Discretionary	Retail & Whsle - Discretionary	2.31
Consumer Discretionary	Consumer Discretionary Services	2.19
Health Care	Health Care	6.70
Industrials	Industrial Products	12.73
Industrials	Industrial Services	15.46
Communications	Media	2.15
Communications	Telecommunications	2.19
Consumer Staples	Consumer Staple Products	5.74
Consumer Staples	Retail & Wholesale - Staples	4.01
Materials	Materials	6.19
Real Estate	Real Estate	9.21
Utilities	Utilities	0.95

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.64% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 30.24%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 0.99% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 22/852.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Labour Management, Human Rights, and Corporate Governance: 1) tripla Co Ltd - This was our first ESG engagement with Tripla, a relatively small company with around 110 employees. Key ESG issues for the company include human capital management and data security. They seem to be managing talent attraction/retention really well, with incentivisation for their employees through flexible work programmes, emphasis on culture, as well as proper reward/remuneration to align them to corporate growth. Turnover rates have been low. On data security, this is important since their business model is digital, and they have put in place some useful access controls and mechanisms such as training to reduce cyber security risks. An encouraging first meeting. 2) Zenkoku Hoshu - Another positive engagement with Zenkoku Hoshu, and one where we covered a range of ESG issues, including: a) how the company manages climate change risks, b) consumer finance protection frameworks, and c) cyber and data privacy initiatives. The company seems to be progressive with respect to cyber security, which we were comforted by given the company is moving towards digitalisation and open IT architecture. We were also pleased to hear that they have been upgraded by MSCI from BB to BBB following our engagement last year; we are hopeful they will continue to see ratings improvement in future.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

Not applicable

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

Not applicable

- **How did this financial product perform compared with the reference benchmark?**

Not applicable

- **How did this financial product perform compared with the broad market index?**

Not applicable

Product name: **abrdn SICAV I - Japanese Sustainable Equity Fund**

Legal entity identifier **5493007G0SOE2SJAK375**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.56% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

1 indicates best in class performance with excellent governance, strong operational ESG integration and maximisation of revenue opportunities linked to sustainability themes. Overall an ESG Q1 indicates that ESG enhances a company's competitive advantage and strengthens an investment case. ESG Q 5 indicates poor governance and no oversight, little appetite to identify and manage ESG risks and no awareness of revenue opportunities linked to sustainability themes which mean there is significant investment risk. The breakdown of portfolio scores was as below: ESG Q1: 15.4%, ESG Q2: 48.4%, ESG Q3: 35.6%, ESG Q4: 0.0%.

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria. Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding at least the bottom 10% of issuers with an ESG House Score that are in the benchmark. Application of the binary exclusions and the ESG House-based exclusions resulted in at least 20% of the Fund's investment universe being excluded as at 30 Sept 2024.

Carbon intensity

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment. The Fund achieved a 30.69% lower carbon intensity than the benchmark as at 30 Sept 2024 (on a WACI basis).

ESG Fund Rating

We confirm that during the reporting period the Fund achieved the same ESG rating based on MSCI data when compared with the benchmark:

- Fund rating AA
- Benchmark rating AA

Promotes good governance including social factors

We confirm that during the reporting period the Fund focused engagement and analysis on governance and that using the abrdn ESG House Score, we avoided those companies with the worst governance practices

● **...and compared to previous periods?**

In the previous period the breakdown of portfolio scores was as below: ESG Q1: 12%, ESG Q2: 42%, ESG Q3: 46%, ESG Q4: 0%. The Fund achieved a 13.28% lower carbon intensity than the benchmark as at 30 Sept 2023 (on a WACI basis). We confirm that during the previous reporting period the Fund achieved the same ESG rating based on MSCI data (AA) when compared with the benchmark (AA).

Period	2024	2023
E/S Characteristics	99.34%	96.26%
Sustainable investment	43.56%	32.97%
Other environmental	11.83%	13.43%
Social	31.74%	19.55%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
HITACHI LTD	Industrials	5.68	Japan
MITSUBISHI UFJ FINANCIAL GRO	Financials	5.25	Japan
TOKIO MARINE HOLDINGS INC	Financials	4.45	Japan
TOYOTA MOTOR CORP	Consumer Discretionary	3.80	Japan
TOKYO ELECTRON LTD	Technology	3.79	Japan

TOKYU FUDOSAN HOLDINGS CORP	Real Estate	2.34	Japan

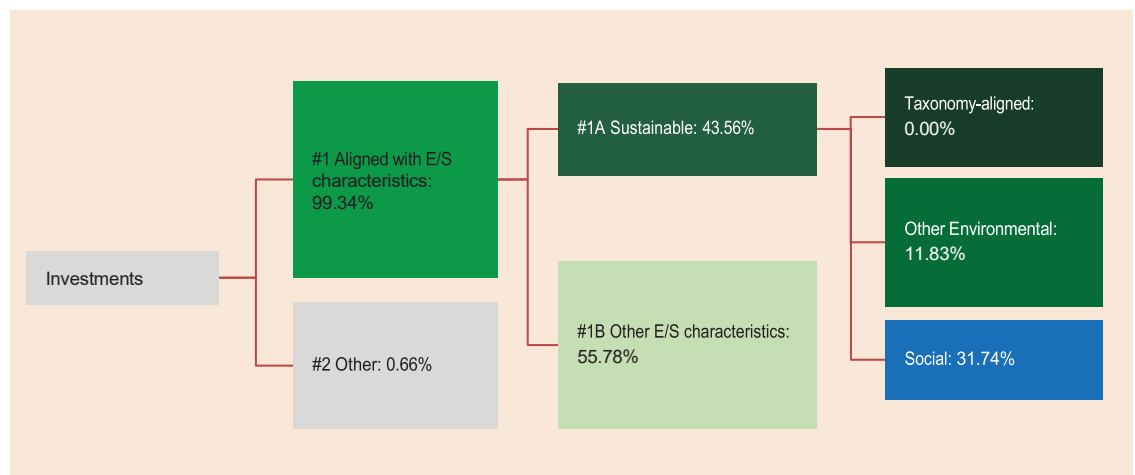

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 35% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Financials	Financial Services	2.79
Financials	Insurance	4.45
Financials	Banking	5.25

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 11.83% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

 **What was the share of socially sustainable investments?**

The share of sustainable investments with a social objective is 31.74%

 **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The Fund invested 0.66% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

 **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

To promote the environmental and social characteristics, the Fund applies ESG assessment criteria, ESG screening criteria and promotes good governance including social factors. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Human Rights, and Corporate Governance: 1) Recruit Holdings - Recruit continues to be one of the most progressive companies in terms of ESG management. The company is now working with their partners to reduce emissions

given they contribute 96% to total emissions, whilst the company hopes to achieve carbon neutrality by 2030. They've also signed up to SBTi as part of this target. We discussed the company's use of internal carbon pricing. The company is also working on measuring social impact, and has developed a framework to do so. They set to reduce the time by job seekers to be hired by 50% by 2030. On diversity, they have hired a new female board member from the US, and are committed to achieving 50% gender diversity throughout all levels. 2) Shin-Etsu - We sought updates on the company's ESG progress since our last full engagement. The company has steadily adopted frameworks and measures to mitigate ESG issues, including the development of a human rights framework and a process to understand their scope 3 emissions. We engaged on their carbon neutrality initiatives, and will continue to encourage the company to consider SBTi certification for their net zero targets. We spoke about chemical safety, and were encouraged to hear that they are certified with leading chemical safety certifications. Finally, we spoke about board dynamics, which have improved substantially. A positive update. 3) Socionext - This was a very comprehensive first ESG meeting. The company IPO-ed recently, and has been rated poorly by MSCI at a B, but is extremely keen on improving on disclosures. We discussed a range of ESG issues, including supply chain management, human capital development, chemical safety, and diversity. We were encouraged by management's articulation around the procedures they have put in place to manage ESG risks. We will continue to engage with the company to improve their ratings.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Product name: **abrdn SICAV I - North American Smaller Companies Fund**

Legal entity identifier **549300ZTQFMLH5BQO667**

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.93% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this fund; however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – reduced energy consumption and greenhouse gas emissions, increased renewable energy usage/generation, reduced biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund's binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria

Our equity analysts assign a proprietary score (1 to 5) to articulate how well a business is managing material ESG factors and the likely impact on performance. This score summarises insights across three key areas:

- 1.) Our view on the quality of the corporate governance and oversight of the business and management
- 2.) Identification of the most material environmental, social, and operational governance issues the company must manage
- 3.) An assessment of the management of the most material ESG risks and opportunities and impact the business' operational performance and valuation

ESG Q scores 30.9.2024

Q1 4%

Q2 30%

Q3 66%

ESG screening criteria

We confirm that during the reporting period, binary exclusions are applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector. We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 5% of issuers with an ESG House Score that are in the benchmark.

Carbon Intensity:

We confirm that during the reporting period the portfolio performed better than the benchmark, in line with our overall commitment.

WACI Scope 1&2:

Fund: 60.5 tCO/\$m

Benchmark: 130.7 tCO/\$m

Other environmental	4.45%	11.31%
Social	30.48%	22.73%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm (“Do No Significant Harm”/ “DNSH”) to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) “do no significant harm”. Pass indicates under abrdn’s methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn’s approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI’s indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

— ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration

investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.

- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological

weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

- PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.
- PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
PARSONS CORP	Technology	2.93	United States of America

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 70% of the Fund's assets aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 10% in Sustainable Investments. The Fund invests a maximum of 30% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Sector	Sub-sector	% Assets
Consumer Discretionary	Consumer Discretionary Products	4.81
Consumer Discretionary	Retail & Whsle - Discretionary	4.49

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 4.45% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 30.48%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.28% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied its criteria around ESG Screening and Carbon Intensity to promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Environment, and Human Rights. Examples include:

Vita Coco (Environment, Human Rights through Supply Chain Management): The company has worked on increasing its ESG disclosures by adding governance documents to its IR site, including a Code of Business Conduct and Ethics and a Position on Modern Slavery and Human Rights. Regarding Water resiliency - COCO recognizes that although water is not used in the core product, water is used in the manufacturing process and they need to do more to disclose this amount and steps they are taking to reduce water usage. They have worked closely with manufacturers in their supply chain to optimize the cleaning process, which has reduced water consumption, and plan to release findings from an ongoing water assessment this summer. On Supply chain management the company has a supply chain code of conduct which aligns to SMETA (Sedex Members Ethical Trade Audit). All coconut manufacturers must be SMETA audited, and four-pillar audit includes environmental, labor rights, discrimination, and employee health and safety).

Graphic Packaging (Environment): We discussed the manufacturing process and how over time the company will grow recycled PVC content which is now in low 60s. This can go to 80-90% but this is technically difficult as recycled PVC is not an easy material to work with. In trims recycling content is lower in the 30s and there is more room to grow (aim for 60% over time).

How did this financial product perform compared to the reference benchmark?

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.53% of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: %

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and social characteristics by aiming to invest in issuers that:

- Avoided severe, lasting or irremediable harm; and
- Appropriately addressed adverse impacts on the environment and society; and
- Supported a decent standard of living for their stakeholders

The Fund aimed to promote environmental and social characteristics holistically. In doing so, we did not consider all characteristics for all investments, but rather focused on the most relevant characteristics for each investment based on the nature of its activities, areas of operation, and products and services. However, using our proprietary research framework we aimed to promote the below characteristics within this Fund, however a broader suite of characteristics might also have been promoted on an investment-

by-investment basis:

Environment – promoted sound energy management and reduced greenhouse gas emissions, promoted good water, waste and raw materials management and addressed biodiversity/ecological impacts.

Social – promoted good labour practices and relations, maximised employee health and safety, supported diversity in the workforce, and healthy relationships with communities.

Benchmark

This Fund had a financial benchmark that was used for portfolio construction but did not incorporate any sustainable criteria and was not selected for the purpose of attaining these characteristics. This financial benchmark was used as a comparator for Fund performance and as a comparison for the Fund’s binding commitments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

ESG Assessment Criteria: We apply an ESG Risk Rating of Low, Medium, High (Low is better) to each issuer. This is credit profile-specific and represents how impactful we believe ESG risks are likely to be to the credit quality of the issuer now and in the future.

There are no high risk issuers held in the fund. Therefore, since all issuers pass the good governance check, the fund is able to invest in these. But, the high risk rating prevents the names being considered as a sustainable investment.

We continue to review these positions and engage where practical, however, we are in general holding these names as they are high conviction positions and ensure the fund can continue to meet its broader financial objectives.

ESG screening criteria: We confirm that during the reporting period, binary exclusions were applied to exclude the particular areas of investment related to UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal. These screening criteria apply in a binding manner and there are no holdings in the fund that fail the agreed criteria.

Our proprietary ESG House Score, developed by our central sustainability team in collaboration with the Quantitative investment team, is used to identify companies with potentially high or poorly managed ESG risks. The score is calculated by combining a variety of data inputs within a proprietary framework in which different ESG factors are weighted according to how material they are for each sector.

We confirm that during the reporting period the Fund excluded companies with the highest ESG risks, as identified by the ESG House Score. This is implemented by excluding the bottom 10% of issuers with an ESG House Score that are in the benchmark.

Good governance: We confirm that during the reporting period the Fund focused engagement and analysis on governance and that we avoided those companies with the worst governance practices.

● **...and compared to previous periods?**

During the previous reporting period, the fund held 1 high risk rating issuer which has been subsequently exited. The screening criteria as applied and there were no holdings in the fund that failed the agreed criteria. The bottom 10% of issuers with an ESG House Score that are in the benchmark were excluded.

Period	2024	2023
E/S Characteristics	98.30%	97.39%
Sustainable investment	49.53%	30.99%
Other environmental	24.22%	11.82%
Social	25.31%	19.17%

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The objective of the sustainable investment is to make a contribution to solving an environmental or social challenge, in addition to not causing significant harm, and being well governed. Each sustainable investment may make a contribution to Environmental or Social issues. In fact, many companies will make a positive contribution to both. abrdn use the six environmental objectives of the Taxonomy to inform Environmental contributions, including: (1) climate change mitigation, (2) climate change adaptation, (3) sustainable use and protection of water and marine resources, (4) transition to a circular economy, (5) pollution prevention and control, and (6) protection and restoration of biodiversity and ecosystems. In addition, abrdn use the 17 Sustainable Development Goals and their sub-goals to supplement the EU Taxonomy topics and provide a framework for considering Social objectives.

An economic activity must have a positive economic contribution to qualify as a Sustainable investment, this includes consideration of Environmental or Socially aligned revenues, Capex, Opex or sustainable operations. abrdn seek to establish or estimate the share of the investee company's economic activities/contribution towards a sustainable objective and it is this element that is weighted and counted towards the Sub-fund's total aggregated proportion of Sustainable Investments.

abrdn uses a combination of the following approaches:

- i. a quantitative methodology based on a combination of publicly available data sources; and
- ii. using abrdn's own insight and engagement outcomes abrdn overlay the quantitative methodology with a qualitative assessment to calculate an overall percentage of economic contribution towards a sustainable objective for each holding in a Fund

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

As required by the SFDR Delegated Regulation, the investment does not cause Significant Harm ("Do No Significant Harm"/ "DNSH") to any of the sustainable investment objectives. abrdn have created a 3-step process to ensure consideration of DNSH:

i. Sector Exclusions

abrdn have identified a number of sectors which automatically do not qualify for inclusion as a Sustainable Investment as they are considered to be causing significant harm. These include but are not limited to: (1) Defence, (2) Coal, (3) Oil & Gas Exploration,

Production and associated activities, (4) tobacco, (5) gambling and (6) alcohol.

ii. DNSH Binary Test

The DNSH test, is a binary pass/fail test which signals if the company passes or fails criteria for the SFDR Article 2 (17) "do no significant harm". Pass indicates under abrdn's methodology the company has no ties to controversial weapons, less than 1% of revenue from thermal coal, less than 5% of revenue from tobacco related activities, is not a tobacco producer, and has no red/severe ESG Controversies. If the company fails this test, it cannot be considered a Sustainable Investment. abrdn's approach is aligned with the SFDR PAIs included within tables 1, 2 & 3 of the SFDR Delegated Regulation and is based on external data sources and abrdn internal insights.

iii. DNSH Materiality Flag

Using a number of additional screens and flags, abrdn consider the additional SFDR PAI's indicators as defined by the SFDR Delegated Regulation to identify areas for improvement or potential future concern. These indicators are not considered to cause significant harm and therefore a company with active DNSH materiality flags may still be considered to be a Sustainable Investment. abrdn aim to enhance the engagement activities to focus on these areas and seek to deliver better outcomes by resolving the issue

During the reporting period, abrdn used the above approach to test the contribution to sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers Principle Adverse Impact Indicators defined by the SFDR Delegated Regulation.

Pre investment, abrdn applies a number of norms and activity-based screens related to PAIs, including but not limited to: UN Global Compact, controversial weapons, and thermal coal extraction.

UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).

Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the following PAI indicators are considered:

- abrdn monitors all mandatory and additional PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds. PAI indicators that either fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement.
- Consideration of portfolio carbon intensity and GHG emissions via our Climate tools and risk analysis
- Governance indicators via our proprietary governance scores and risk framework, including consideration of sound management structures, employee relations, remuneration of staff and tax compliance.
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, all sustainable investments are aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human rights. Breaches and violations of these international norms are flagged by an event-driven controversy and are captured in the investment process, and in turn excluded from consideration as a sustainable investment.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund has committed to consider the following PAIs in its investment process, this means that there is pre- and post-trade monitoring in place and that every investment for the Fund is assessed on these factors to determine its appropriateness for the Fund.

- PAI 1: GHG emissions (scope 1 and 2)
- PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Adverse impacts monitoring

Pre investment, abrdn applies a number of norms and activity-based screens related to the above PAIs, including but not limited to:

- UNGC: The Fund uses norms-based screens and controversy filters to exclude companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights, as well as state owned entities in countries which violate norms.
- Controversial Weapons: The Fund excludes companies with business activities related to controversial weapons (cluster munitions, anti-personnel landmines, nuclear weapons, chemical and biological weapons, white phosphorus, non-detectable fragments, incendiary devices, depleted uranium ammunition or blinding lasers).
- Thermal Coal Extraction: The Fund excludes companies with exposure to the fossil fuels sector based on percentage of revenue from thermal coal extraction.

abrdn apply a fund specific set of company exclusions, more detail on these and the overall process is captured within the Investment Approach, which is published at www.abrdn.com under "Fund Centre".

Post-investment the above PAI indicators are monitored in the following way:

- Company carbon intensity and GHG emissions is monitored via our Climate tools and risk analysis
- On an on-going basis the investment universe is scanned for companies that may be in breach of international norms described in the OECD guidelines for multinational enterprises and the UN guiding principles on business and human rights.

Post-investment we also undertake the following activities in relation to additional PAI's:

- Dependent on data availability, quality and relevance to the investments the consideration of additional PAI indicators will be on a case-by- case basis.
- abrdn monitors PAI indicators via our ESG integration investment process using a combination of our proprietary house score and 3rd party data feeds.
- Governance indicators are monitored via our proprietary governance scores and risk framework, including consideration of sound management structures, and remuneration.

Adverse impact mitigation

• PAI indicators that fail a defined pre-investment screen are excluded from the investment universe and cannot be held by the fund. We confirm that screening in line with our Investment Approach documents has been undertaken during the reporting period.

• PAI indicators that are monitored post investment which fail a specific binary test or are considered above typical are flagged for review and may be selected for company engagement. These adverse indicators may be used as a tool for engagement, for example where there is no policy in place and this would be beneficial abrdn may engage with the issuer or company to develop one, or where carbon emissions are considered to be high, abrdn may engage to seek the creation of a long-term target and reduction plan.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:
01/10/2023 - 30/09/2024

Largest Investments	Sector	% Assets	Country
EQUINIX INC 1.45% 05/15/2026	Real Estate	1.03	United States of America
WELLS FARGO & COMPANY 4.54% 08/15/2026	Financials	1.02	United States of America
BANK OF AMERICA CORP 2.456% 10/22/2025	Financials	1.01	United States of America
VENTAS REALTY LP 3.25% 10/15/2026	Financials	1.01	United States of America
ROYAL BANK OF CANADA 1.15% 07/14/2026	Financials	1.01	Canada
JPMORGAN CHASE & CO 6.07% 10/22/2027	Financials	0.99	United States of America
PENSKE TRUCK LEASING/PTL 1.2% 11/15/2025	Financials	0.95	United States of America
ROYALTY PHARMA PLC 1.2% 09/02/2025	Health Care	0.94	United States of America
VIATRIS INC 2.3% 06/22/2027	Health Care	0.85	United States of America
AMERICAN WATER CAPITAL C 2.8% 05/01/2030	Utilities	0.84	United States of America
CANADIAN PACIFIC RAILWAY 2.875% 11/15/2029	Industrials	0.83	Canada
CONSTELLATION BRANDS INC 2.875% 05/01/2030	Consumer Staples	0.83	United States of America

GOLDMAN SACHS GROUP INC 4.387% 06/15/2027	Financials	0.81	United States of America

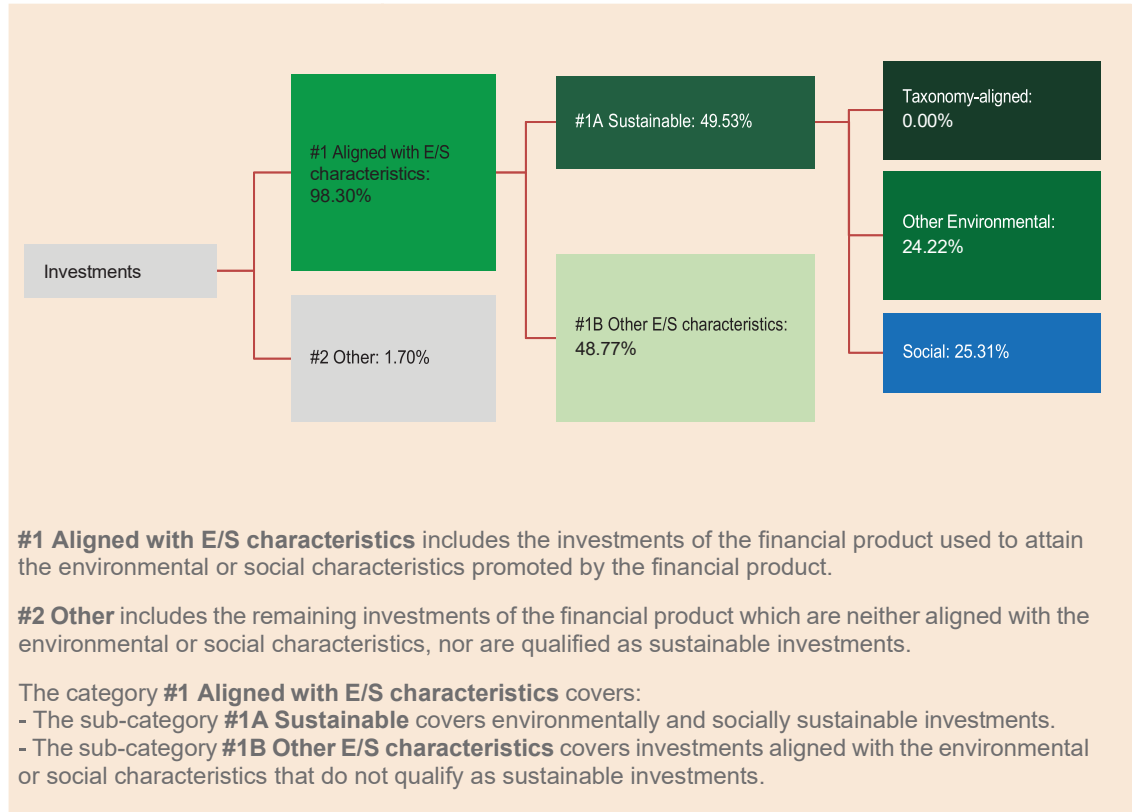

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The fund committed to hold a minimum of 90% of the Fund's assets are aligned with E/S characteristics. Environmental and social safeguards are met by applying certain PAI's, where relevant, to these underlying assets. Within these assets, the Fund commits to a minimum of 40% in Sustainable Investments. The Fund invests a maximum of 10% of assets in the "Other" category, which include cash, money market instruments and derivatives. The chart below shows the investments aligned with Environmental and Social Characteristics expressed as a percentage of Net Asset Value (NAV), achieved during the reporting period.

● In which economic sectors were the investments made?

Sector	Sub-sector	% Assets
Consumer Discretionary	Automobiles Manufacturing	1.68
Consumer Discretionary	Retail & Whsle - Discretionary	1.09
Consumer Discretionary	Consumer Discretionary Products	0.63
Consumer Discretionary	Consumer Discretionary Services	0.16
Consumer Discretionary	Educational Services	0.14
Industrials	Industrial Services	2.56
Industrials	TRANSPORTATION & LOGISTICS	0.34
Industrials	Railroad	1.33
Industrials	Industrial Products	2.37
Industrials	Electrical Equipment Manufacturing	1.02
Industrials	Machinery Manufacturing	0.26
Materials	Materials	0.87
Materials	Chemicals	0.86
Materials	Construction Materials Manufacturing	0.42
Energy	Pipeline	0.99
Energy	Oil & Gas	2.58
Financials	Banking	19.56

Financials	Financial Services	6.41
Financials	Real Estate	1.73
Financials	Banks	1.51
Financials	Commercial Finance	1.56
Financials	Insurance	2.48
Financials	Life Insurance	0.17
Financials	Property & Casualty Insurance	0.47
Consumer Staples	Consumer Staple Products	2.67
Consumer Staples	Food & Beverage	0.79
Consumer Staples	Retail & Wholesale - Staples	1.25
Real Estate	Real Estate	3.19
Communications	Telecommunications	2.43
Communications	Media	1.90

Communications	Cable & Satellite	0.72
Communications	Wireless Telecommunications Services	0.65
Communications	Entertainment Content	0.11
Utilities	Utilities	8.91
Technology	Tech Hardware & Semiconductors	2.87
Technology	Software & Tech Services	2.88
Technology	Software & Services	0.62
Technology	Semiconductors	0.36
Health Care	Health Care	10.22
Health Care	Biotechnology	0.58
Health Care	Health Care Facilities & Services	2.33
Health Care	Medical Equipment & Devices Manufacturing	0.45
Health Care	Pharmaceuticals	2.41
US Municipal	Utilities	0.45
US Municipal	Financing & Development	0.06
US Municipal	Transportation	0.24
US Municipal	Education	0.27

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the minimum mandatory allocation to sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%, the fund is permitted to allocate to such investments which would form part of the overall allocation to sustainable investments with an environmental objective.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives) .

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

The fund holds 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

Yes

In fossil gas

In nuclear energy

No

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (Capex)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (Opex)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0 % of the total investment.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

1 Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The fund holds 0% investments made in transitional and enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The fund held 0% investments in sustainable investments with an environmental objective aligned with the EU Taxonomy, during the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.22% of assets as at the year end date and is representative of the Reference Period.

Assessment on Taxonomy alignment is currently conducted with data from third party providers as well as self-reported data from investee companies when available.

Data providers' methodologies vary and results may not be fully aligned to all Taxonomy requirements, as long as publicly reported company data is lacking and assessments rely largely on equivalent data.

Out of caution, unless we are able to confirm available data for the majority of the portfolio's holdings, we will report 0 (zero) per cent of Taxonomy-Aligned Investments (concerning all environmental objectives), and the remainder as not aligned with the EU Taxonomy.

The compliance of the investments with the EU Taxonomy has not been subject to an assurance by auditors or a review by third parties.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective is 25.31%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund invested 1.70% of assets in the "Other" category. The investments included under "other" are cash, money market instruments, derivatives. The purpose of these assets are to meet liquidity, target return or manage risk and may not contribute to the environmental or social aspects of the Fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund has applied ESG assessment criteria including:

- ESG screening criteria,
- ESG Performance
- Avoiding Poor ESG Business Practices. These criteria promote Environmental & Social characteristics. In addition, the fund committed to consider the following PAIs within the investment process: PAI 1: GHG emissions (scope 1 and 2), PAI 10: Violations of the UN Global Compact (UNGC) principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and PAI 14:

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons). The fund has also engaged with issuers on relevant environmental or social topics which include Climate change, Environment, Labour, Human rights, Corporate Behaviour and Corporate Governance.

How did this financial product perform compared to the reference benchmark?

Not applicable

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable

- ***How did this financial product perform compared with the broad market index?***

Not applicable
