Pembina Pipeline Corporation

2016 ANNUAL REPORT

Building Something Extraordinary

News Release

Pembina Pipeline Corporation Reports Record Annual Results in 2016

Execution of strategy and growth delivered record operational and financial results in 2016

All financial figures are in Canadian dollars unless noted otherwise.

CALGARY, AB, February 23, 2017 – Pembina Pipeline Corporation ("Pembina" or the "Company") (TSX: PPL; NYSE: PBA) announced today its financial and operating results for the fourth quarter of 2016.

Financial Overview

($ millions, except where noted)	**3 Months Ended December 31** (unaudited)		**12 Months Ended December 31**	
	2016	2015	**2016**	2015
Conventional Pipelines revenue volumes *(mbpd)*[1][2]	**639**	621	**650**	614
Oil Sands & Heavy Oil contracted capacity *(mbpd)*[1]	**975**	880	**975**	880
Gas Services revenue volumes net to Pembina *(mboe/d)*[2][3]	**163**	103	**139**	110
Midstream Natural Gas Liquids ("NGL") sales volumes *(mbpd)*[1]	**164**	123	**143**	116
Total volume *(mboe/d)*[3]	**1,941**	1,727	**1,907**	1,720
Revenue	**1,251**	1,242	**4,265**	4,635
Net revenue[4]	**514**	407	**1,764**	1,507
Operating margin[4]	**376**	304	**1,335**	1,118
Gross profit	**270**	237	**1,001**	866
Earnings	**131**	130	**466**	406
Earnings per common share – basic *(dollars)*	**0.29**	0.32	**1.02**	1.02
Earnings per common share – diluted *(dollars)*	**0.28**	0.32	**1.01**	1.02
Adjusted EBITDA[4]	**342**	269	**1,189**	983
Cash flow from operating activities	**286**	285	**1,077**	801
Cash flow from operating activities per common share – basic *(dollars)*[4]	**0.73**	0.79	**2.78**	2.31
Adjusted cash flow from operating activities[4]	**292**	280	**986**	878
Adjusted cash flow from operating activities per common share – basic *(dollars)*[4]	**0.74**	0.77	**2.54**	2.53
Common share dividends declared	**190**	168	**737**	628
Preferred share dividends declared	**19**	13	**69**	48
Dividends per common share *(dollars)*	**0.48**	0.46	**1.90**	1.80
Capital expenditures	**453**	448	**1,745**	1,811
Acquisition			**566**	

	3 Months Ended December 31 (unaudited)				**12 Months Ended December 31**			
	2016		2015		**2016**		2015	
($ millions)	**Revenue**[5]	**Operating Margin**[4]	Revenue[5]	Operating Margin[4]	**Revenue**[5]	**Operating Margin**[4]	Revenue[5]	Operating Margin[4]
Conventional Pipelines	**184**	**118**	163	109	**719**	**494**	628	401
Oil Sands & Heavy Oil	**54**	**37**	56	36	**202**	**140**	213	139
Gas Services[5]	**82**	**60**	51	33	**271**	**195**	208	144
Midstream[5]	**194**	**158**	137	123	**572**	**496**	458	427
Corporate		**3**		3		**10**		7
Total	**514**	**376**	407	304	**1,764**	**1,335**	1,507	1,118

(1) mbpd is thousands of barrels per day.

(2) Revenue volumes are equal to contracted plus interruptible volumes.

(3) Revenue volumes converted to mboe/d (thousands of barrels of oil equivalent per day) from million cubic feet per day ("MMcf/d") at 6:1 ratio.

(4) Refer to "Non-GAAP Measures."

(5) The amounts presented for Midstream and Gas Services consist of net revenue (revenue less cost of goods sold including product purchases). Refer to "Non-GAAP Measures."

Highlights

- Generated earnings of $466 million in 2016, a 15 percent increase over the prior year;
- Adjusted EBITDA was $1,189 million during 2016, 21 percent higher than 2015;
- Cash flow from operating activities was $1,077 million for 2016 compared to $801 million for 2015, an increase of 34 percent on an annual basis. Adjusted cash flow from operating activities increased by 12 percent to $986 million in 2016 compared to 2015;
- On a per share (basic) basis, cash flow from operating activities increased 20 percent compared to the prior year;
- Gas Services generated record quarterly and annual revenue volumes of 976 MMcf/d and 836 MMcf/d, respectively, in 2016, representing a quarterly increase of 61 percent and an annual increase of 27 percent;
- Fourth quarter NGL sales volumes reached a record 164 mboe/d, a 33 percent increase compared to the respective period in 2015. For the full year, NGL sales volumes were a record 143 mboe/d, a 23 percent increase compared to 2015;
- Conventional Pipelines' fourth quarter revenue volumes increased to 639 mbpd in 2016 compared to 621 mbpd in the fourth quarter of 2015. For the full year, Conventional Pipelines' revenue volumes were 650 mbpd compared to 614 mbpd in 2015; and
- In 2016, Pembina added over 400 MMcf/d of additional processing capacity in its Gas Services business, increasing its total capacity to approximately 1.7 billion cubic feet per day. This was accomplished through the acquisition of the Kakwa River facility and expansions of the Company's Resthaven and Musreau facilities.

"2016 was a very successful year; I was encouraged to see such strong results amidst the uncertainty that surrounded the oil and gas industry for the majority of the year," said Mick Dilger, Pembina's President and Chief Executive Officer. "Our people worked hard to bring in record operational and financial results during the year, while running our existing businesses safely and responsibly and executing on our significant capital program. Across the board, our many achievements in 2016 are evidence of the merits of sticking to our long-term strategy."

Mr. Dilger added: "I'm very excited for what's sure to be a transformational 2017. We are about to bring into service the largest suite of growth projects in our history. Completion of these projects, along with approximately $1.7 billion of major projects we brought into service throughout 2016, including our Kakwa River facility acquisition, lends confidence in our ability to continue generating long-term and sustainable returns for our shareholders. As we focus on on-time and on-budget delivery of our existing capital program, we are also positioning our company for future opportunities as evidenced by our recent announcement of our Duvernay infrastructure development and service agreement."

New Developments in 2016 and Growth Projects Update

- Pembina's $2.4 billion Phase III Expansion is over 60 percent complete and construction continues on the largest section of the project between Fox Creek, Alberta and Namao, Alberta. The project continues to track under budget and on-schedule for a mid-2017 in-service date;
- Development continues on Gas Services' Duvernay infrastructure program. Engineering is 85 percent complete, as are all site grading and piling activities, for its 100 MMcf/d Duvernay I plant. The Field Hub has received all required regulatory and environmental approvals and engineering is 55 percent complete;
- Overall construction of the Company's third fractionator at Redwater ("RFS III") is 90 percent complete. The project, which continues to trend on-budget, is expected to be completed early in the third quarter of 2017;
- Pembina continues to advance construction of infrastructure in support of North West Redwater Partnership's planned refinery and has completed 70 percent of the overall project;

- At Pembina's Canadian Diluent Hub ("CDH"), pipeline connectivity is complete between Pembina's Conventional Pipelines' infrastructure and existing third-party diluent pipeline connectivity at the Company's Redwater site and volumes are flowing to third-party delivery connections. Additionally, 90 percent of civil work associated with CDH is complete; and
- Pembina's proposed propane dehydrogenation and polypropylene facility ("PDH/PP Facility") was conditionally awarded $300 million in royalty credits from the Alberta Government's Petrochemicals Diversification Program. If the project proceeds, Pembina expects to construct the PDH/PP Facility in close proximity to the Company's Redwater Fractionation complex.

Fourth Quarter Dividends

- Declared and paid dividends of $0.16 per qualifying common share in October, November and December 2016 for the applicable record dates; and
- Declared and paid quarterly dividends per qualifying preferred shares of: Series 1: $0.265625; Series 3: $0.29375; Series 5: $0.3125; Series 7: $0.28125; Series 9: $0.296875; Series 11: $0.359375; and Series 13: $0.359375 to shareholders on record as of November 1, 2016.

Fourth Quarter 2016 Conference Call & Webcast

Pembina will host a conference call on Friday, February 24, 2017 at 8:00 a.m. MT (10:00 a.m. ET) for interested investors, analysts, brokers and media representatives to discuss details related to the fourth quarter of 2016. The conference call dial-in numbers for Canada and the U.S. are 647-427-7450 or 888-231-8191. A recording of the conference call will be available for replay until March 3, 2017 at 11:59 p.m. ET. To access the replay, please dial either 416-849-0833 or 855-859-2056 and enter the password 15403233.

A live webcast of the conference call can be accessed on Pembina's website at pembina.com under Investor Centre, Presentation & Events, or by entering:

http://event.on24.com/r.htm?e=1307546&s=1&k=839F0601C7C0EB2364CB25344DAD8B85 in your web browser. Shortly after the call, an audio archive will be posted on the website for a minimum of 90 days.

2017 Investor Day

Pembina will hold an Investor Day on Tuesday, May 16, 2017 at One King West Hotel in Toronto, Ontario. For parties interested in attending the event, please email investor-relations@pembina.com to request an invitation.

About Pembina

Calgary-based Pembina Pipeline Corporation is a leading transportation and midstream service provider that has been serving North America's energy industry for over 60 years. Pembina owns and operates an integrated system of pipelines that transport various products derived from natural gas and hydrocarbon liquids produced primarily in western Canada. The Company also owns and operates gas gathering and processing facilities and an oil and natural gas liquids infrastructure and logistics business. Pembina's integrated assets and commercial operations along the majority of the hydrocarbon value chain allow it to offer a full spectrum of midstream and marketing services to the energy sector. Pembina is committed to working with its community and aboriginal neighbours, while providing value for investors in a safe, environmentally responsible manner. This balanced approach to operating ensures the trust Pembina builds among all of its stakeholders is sustainable over the long term. Pembina's common shares trade on the Toronto and New York stock exchanges under PPL and PBA, respectively. Pembina's preferred shares also trade on the Toronto stock exchange. For more information, visit www.pembina.com.

Forward-Looking Statements and Information

This document contains certain forward-looking statements and information (collectively, "forward-looking statements"), including forward-looking statements within the meaning of the "safe harbor" provisions of applicable securities legislation, that are based on Pembina's current expectations, estimates, projections and assumptions in light of its experience and its perception of historical trends. In some cases, forward-looking statements can be identified by terminology such as "schedule", "will", "expects", "future", "continue" and similar expressions suggesting future events or future performance.

In particular, this document contains forward-looking statements pertaining to, without limitation, the following: Pembina's corporate strategy; planning, construction, capital expenditure estimates, schedules, expected capacity, incremental volumes, in-service dates, rights, activities and operations with respect to planned new construction of, or expansions on existing pipelines, gas services facilities, fractionation facilities, terminalling, storage and hub facilities, facility and system operations and throughput levels; anticipated synergies between assets under development and existing assets of the Company; the future level and sustainability of cash dividends that Pembina intends to pay its shareholders; and expected future cash flows and the sufficiency thereof.

The forward-looking statements are based on certain assumptions that Pembina has made in respect thereof as at the date of this news release regarding, among other things: oil and gas industry exploration and development activity levels and the geographic region of such activity; the success of Pembina's operations and growth projects; prevailing commodity prices and exchange rates and the ability of Pembina to maintain current credit ratings; the availability of capital to fund future capital requirements relating to existing assets and projects; future operating costs; geotechnical and integrity costs; that any third-party projects relating to Pembina's growth projects will be sanctioned and completed as expected; that any required commercial agreements can be reached; that all required regulatory and environmental approvals can be obtained on the necessary terms in a timely manner; that counterparties will comply with contracts in a timely manner; that there are no unforeseen events preventing the performance of contracts or the completion of the relevant facilities; that there are no unforeseen material costs relating to the facilities which are not recoverable from customers; prevailing interest and tax rates; prevailing regulatory, tax and environmental laws and regulations; maintenance of operating margins; the amount of future liabilities relating to lawsuits and environmental incidents; and the availability of coverage under Pembina's insurance policies (including in respect of Pembina's business interruption insurance policy).

Although Pembina believes the expectations and material factors and assumptions reflected in these forward-looking statements are reasonable as of the date hereof, there can be no assurance that these expectations, factors and assumptions will prove to be correct. These forward-looking statements are not guarantees of future performance and are subject to a number of known and unknown risks and uncertainties including, but not limited to: the regulatory environment and decisions; the impact of competitive entities and pricing; labour and material shortages; reliance on key relationships and agreements; the strength and operations of the oil and natural gas production industry and related commodity prices; non-performance or default by counterparties to agreements which Pembina or one or more of its affiliates has entered into in respect of its business; actions by governmental or regulatory authorities including changes in tax laws and treatment, changes in royalty rates or increased environmental regulation; fluctuations in operating results; adverse general economic and market conditions in Canada, North America and worldwide, including changes, or prolonged weaknesses, as applicable, in interest rates, foreign currency exchange rates, commodity prices, supply/demand trends and overall industry activity levels; ability to access various sources of debt and equity capital; changes in credit ratings; counterparty credit risk; technology and security risks; and certain other risks detailed from time to time in Pembina's public disclosure documents available at www.sedar.com, www.sec.gov and through Pembina's website at www.pembina.com.

This list of risk factors should not be construed as exhaustive. Readers are cautioned that events or circumstances could cause results to differ materially from those predicted, forecasted or projected. The forward-looking statements contained in this document speak only as of the date of this document. Pembina does not undertake any obligation to publicly update or revise any forward-looking statements or information contained herein, except as required by applicable laws. The forward-looking statements contained in this document are expressly qualified by this cautionary statement.

Non-GAAP Measures

In this news release, Pembina has used the terms net revenue, operating margin, adjusted earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA), adjusted cash flow from operating activities, cash flow from operating activities per common share and adjusted cash flow from operating activities per common share (also known as "cash flow per share" and "adjusted cash flow per share"), which do not have any standardized meaning under IFRS ("Non-GAAP Measures"). Since Non-GAAP financial measures do not have a standardized meaning prescribed by GAAP and are therefore unlikely to be comparable to similar measures presented by other companies, securities regulations require that Non-GAAP financial measures are clearly defined, qualified and reconciled to their nearest GAAP measure. Except as otherwise indicated, these Non-GAAP measures are calculated and disclosed on a consistent basis from period to period. Specific adjusting items may only be relevant in certain periods. The intent of Non-GAAP measures is to provide additional useful information respecting Pembina's financial and operational performance to investors and analysts and the measures do not have any standardized meaning under IFRS. The measures should not, therefore, be considered in isolation or used in substitute for measures of performance prepared in accordance with IFRS.

Other issuers may calculate these Non-GAAP measures differently. Investors should be cautioned that these measures should not be construed as alternatives to revenue, earnings, cash flow from operating activities, gross profit or other measures of financial results determined in accordance with GAAP as an indicator of Pembina's performance. For additional information regarding Non-GAAP measures, including reconciliations to measures recognized by GAAP, please refer to Pembina's management's discussion and analysis for the period ended December 31, 2016, which is available online at www.sedar.com, www.sec.gov and through Pembina's website at www.pembina.com.

Management's Discussion & Analysis

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following management's discussion and analysis ("MD&A") of the financial and operating results of Pembina Pipeline Corporation ("Pembina" or the "Company") is dated February 23, 2017 and is supplementary to, and should be read in conjunction with, Pembina's audited consolidated financial statements for the period ended December 31, 2016 ("Financial Statements"). All dollar amounts contained in this MD&A are expressed in Canadian dollars unless otherwise noted.

Management is responsible for preparing the MD&A. This MD&A has been reviewed and recommended by the Audit Committee of Pembina's Board of Directors and approved by its Board of Directors.

This MD&A contains forward-looking statements (see "Forward-Looking Statements & Information") and refers to financial measures that are not defined by Generally Accepted Accounting Principles ("GAAP"). For more information about the measures which are not defined by GAAP, see "Non-GAAP Measures."

Readers should refer to page 43 for a list of abbreviations that may be used in this MD&A.

About Pembina

Calgary-based Pembina Pipeline Corporation is a leading transportation and midstream service provider that has been serving North America's energy industry for over 60 years. Pembina owns and operates an integrated system of pipelines that transport various products derived from natural gas and hydrocarbon liquids produced primarily in western Canada. The Company also owns and operates gas gathering and processing facilities and an oil and natural gas liquids infrastructure and logistics business. Pembina's integrated assets and commercial operations along the majority of the hydrocarbon value chain allow it to offer a full spectrum of midstream and marketing services to the energy sector.

Pembina is committed to working with its community and aboriginal neighbours, while providing value for investors in a safe, environmentally-responsible manner. This balanced approach to operating ensures the trust Pembina builds among all of its stakeholders is sustainable over the long term.

Pembina's common shares trade on the Toronto and New York stock exchanges under PPL and PBA, respectively. For more information, visit www.pembina.com.

Pembina's goal is to provide highly competitive and reliable returns to investors through monthly dividends on its common shares while enhancing the long-term value of its securities. To achieve this, Pembina's strategy is to:

- *Preserve value by providing safe, responsible, cost-effective and reliable services;*
- *Diversify the Company's asset base along the hydrocarbon value chain by providing integrated service offerings which enhance profitability;*
- *Pursue projects or assets that are expected to generate increased cash flow per share and capture long-life, economic hydrocarbon reserves; and*
- *Maintain a strong balance sheet through the application of prudent financial management to all business decisions.*

Pembina is structured into four businesses: Conventional Pipelines, Oil Sands & Heavy Oil, Gas Services and Midstream, which are described in their respective sections of this MD&A.

(1) Revenue volumes are equal to contracted and interruptible volumes.

(2) Gas Services revenue volumes converted to mboe/d from MMcf/d at 6:1 ratio.

(3) Refer to "Non-GAAP Measures."

Pembina generated solid financial and operational results in the fourth quarter of 2016. Revenue in the fourth quarter of 2016 was $1,251 million compared to $1,242 million for the same period in 2015. The slight increase in revenue for the quarter is driven by a larger asset base and improvements in NGL market pricing, offset by decreased opportunities in certain areas of the Company's Midstream business. Full-year revenue was $4.3 billion for 2016 compared to $4.6 billion for the same period in 2015. Despite increased revenue in the Conventional Pipelines and Gas Services businesses and improved NGL pricing, the decrease in revenue for the full-year of 2016 was due to decreases in marketing opportunities which primarily impacted revenues in the Midstream business. Net revenue (revenue less cost of goods sold including product purchases) was $514 million for the fourth quarter of 2016 compared to $407 million in the same period of 2015

and $1,764 million in 2016 compared to $1,507 million in 2015. These increases were driven by higher revenue volumes from new assets being placed into service in the Company's Midstream, Gas Services and Conventional Pipelines businesses. Lower costs of goods sold in the current year also contributed to the increase in net revenue.

Operating expenses were $123 million for the fourth quarter of 2016 compared to $110 million during the same period of 2015. This was predominantly driven by a larger asset base which resulted in higher integrity, power, and repairs and maintenance expenses. For the twelve months ended December 31, 2016, operating expenses were $419 million compared to $426 million in the same period of 2015. This decrease was primarily related to integrity program scheduling refinements and efficiencies during the year, partially offset by increased labour and power costs.

During the fourth quarter of 2016, operating margin increased by 24 percent to $376 million compared to $304 million in the fourth quarter of 2015. For the twelve months ended December 31, 2016, operating margin increased by 19 percent to $1,335 million compared to $1,118 million for the same period of 2015. These increases were driven by stronger performance across all businesses, including new assets placed into service and the Kakwa River facility acquisition.

Depreciation and amortization included in operations during the fourth quarter of 2016 was $73 million, consistent with the same period in 2015. For the twelve months ended December 31, 2016, depreciation and amortization included in operations increased to $273 million compared to $249 million in 2015. The increase is as a result of the year-over-year growth in Pembina's asset base with the Company's pipeline system expansions and new, in-service gas processing plants and fractionation facilities.

Gross profit for the fourth quarter of 2016 was $270 million compared to $237 million during the fourth quarter of 2015. This 14 percent increase was a result of increased operating margin, which was somewhat offset by increased unrealized losses on the market-to-market positions of commodity-related derivative financial instruments which was in a gain position of $6 million in the fourth quarter of 2015 compared to a loss of $33 million in the fourth quarter of 2016. For the twelve months ended December 31, 2016, gross profit was $1.0 billion compared to $866 million in 2015. This increase was driven by higher operating margin, partially offset by a $58 million increased loss on the unrealized market-to-market positions on derivative contracts and increased depreciation and amortization included in operations.

For the three-month period ended December 31, 2016, Pembina incurred general and administrative expenses (excluding corporate depreciation and amortization) of $44 million compared to $36 million during the comparable period of 2015. This increase was largely due to increases in the Company's incentive plan liabilities as a result of an increase in share price in the current year compared to a decrease in the previous year coupled with additional staff to support the growth in the Company's asset base. For the twelve-month period ended December 31, 2016, Pembina incurred general and administrative expenses (excluding corporate depreciation and amortization) of $175 million compared to $143 million in the prior year. This increase is largely due to the same reason described above, as well as higher rent expense as a result of non-cash and non-recurring rental adjustments of $10 million recognized during 2016.

Net finance costs incurred during the fourth quarter of 2016 were $38 million compared to $22 million for the same period in 2015. This increase was primarily due to increased interest expense and fluctuations in the fair value of the convertible debentures conversion feature. For the full twelve months of 2016, net finance costs were $153 million compared to $71 million for the twelve months of 2015. This increase is largely attributable to the revaluation of the convertible debentures conversion feature; for the full-year in 2016, the Company recognized a loss of $40 million on the revaluation of the conversion feature compared to a gain of $40 million in 2015.

Income tax expense for the fourth quarter of 2016 totaled $58 million, including current tax of $12 million and deferred tax of $46 million, compared to income tax expense of $31 million in 2015, including a current tax recovery of $19 million offset by deferred tax expense of $50 million. Current tax expense for the fourth quarter of 2016 is higher than the

comparable period in 2015 due to greater taxable income flowing from partnerships and an increase in the corporate income tax rate. The decrease in deferred tax expense in the fourth quarter of 2016 resulted from a larger increase in tax pools compared with the increase in accounting pools. Income tax expense was $189 million for the twelve months ended December 31, 2016, which included current tax of $50 million and deferred tax of $139 million, compared to income tax expense of $199 million in 2015, which included current tax of $41 million and deferred tax of $158 million. These variances are due to the same factors noted above.

The Company's earnings were $131 million ($0.29 per common share – basic and $0.28 per common share – diluted) during the fourth quarter of 2016 compared to $130 million ($0.32 per common share – basic and diluted) in the same period of 2015. Higher gross profit was partially offset by higher net finance costs and general and administrative expenses. Earnings attributable to common shareholders net of dividends attributable to preferred shareholders during the fourth quarter of 2016 were $112 million (2015: $117 million). Earnings were $466 million ($1.02 per common share – basic and $1.01 per common share – diluted) during 2016 compared to $406 million ($1.02 per common share – basic and diluted) during the prior year. The increase was due to higher gross profit and lower taxes, partially offset by higher net finance costs and general and administrative expenses. On a full-year basis, earnings attributable to common shareholders net of dividends attributable to preferred shareholders were $394 million in 2016 (2015: $355 million) due to the factors described above.

Pembina generated Adjusted EBITDA of $342 million and $1,189 million during the fourth quarter and twelve months of 2016 compared to $269 million and $983 million for the same periods in 2015. These 27 percent and 21 percent respective increases were due to higher gross profit, partially offset by higher general and administrative expenses, as discussed above.

Cash flow from operating activities for the quarter ended December 31, 2016 was $286 million ($0.73 per common share – basic) compared to $285 million ($0.79 per common share – basic) during the fourth quarter of 2015. For the twelve months ended December 31, 2016, cash flow from operating activities was $1,077 million ($2.78 per common share – basic) compared to $801 million ($2.31 per common share – basic) in 2015. These increases were primarily due to higher gross profit and lower cash taxes paid, partially offset by an increase in non-cash working capital.

Adjusted cash flow from operating activities for the fourth quarter of 2016 was $292 million ($0.74 per common share – basic) compared to $280 million ($0.77 per common share – basic) during the fourth quarter of 2015. Increased cash flow from operating activities (net of changes in non-cash working capital) and reduced tax expense were partially offset by additional preferred share dividends. For the twelve months ended December 31, 2016, adjusted cash flow from operating activities was $986 million ($2.54 per common share – basic) compared to $878 million ($2.53 per common share – basic) in 2015. This was driven by an increase in cash flow from operations (net of changes in non-cash working capital), offset by higher preferred share dividends, increased tax expense and lower share-based payments.

2016 per common share metrics were also impacted by increased common shares outstanding due to the DRIP and common share offering in the first quarter of 2016 which were issued to partially fund Pembina's capital program and the Kakwa River facility acquisition.

Business Overview

Pembina's Conventional Pipelines business comprises a strategically located pipeline network of approximately 10,000 kilometers, inclusive of expansion projects discussed below that are currently under development. This network transports hydrocarbon liquids and extends across much of Alberta and parts of B.C., Saskatchewan and North Dakota. The primary objectives of this business are to provide safe, responsible, reliable and cost-effective transportation services for customers, pursue opportunities for increased throughput, and maintain and/or grow sustainable operating margin on invested capital by capturing incremental volumes, expanding the Company's pipeline systems, managing revenue and following a disciplined approach to operating expenses.

Operational Performance

During the fourth quarter of 2016, Conventional Pipelines' revenue volumes averaged 639 mbpd. This represents an increase of three percent compared to the same period of 2015, when revenue volumes were 621 mbpd. Higher volumes resulted from the completion of capacity expansions on Pembina's Peace and Northern pipelines which were placed into service in 2015 and allowed for the receipt of higher revenue volumes at Pembina's existing connections and truck

terminals. Additional volumes from other connections that were commissioned throughout 2015 and 2016 as well as higher revenue volumes on the Vantage pipeline also contributed to the increase. These increases were somewhat offset by a multi-day construction outage in October 2016 on Pembina's Peace and Northern pipelines relating to the company's Phase III pipeline expansion (the "Phase III Expansion"). Revenue volumes averaged 650 mbpd in 2016 compared to 614 mbpd in 2015. The increase in revenue volumes was impacted by the same factors noted above. These increases were also somewhat offset by third-party outages and flooding, which impacted the Company's Western System, and scheduled and unscheduled outages at some of Pembina's gas services assets (see "Gas Services: Operational Performance").

Financial Performance

During the fourth quarter of 2016, Conventional Pipelines generated revenue of $184 million, 13 percent higher than the $163 million generated in the same quarter of the previous year. For the full twelve months of 2016, revenue was $719 million compared to $628 million in 2015. These increases resulted from: higher revenue volumes associated with the expansions mentioned above; new connections and laterals being placed into service; and increased Vantage pipeline revenues which benefited from a higher U.S. dollar exchange rate. Partially offsetting these increases were the October 2016 Phase III Expansion construction outage, third-party outages and flooding, the discontinuation of the south segment of the Western System and Pembina's gas services outages as noted above.

During the fourth quarter of 2016, operating expenses of $66 million were higher than the $52 million recognized in the fourth quarter of 2015. This was predominantly driven by higher integrity costs, as well as higher general repairs and maintenance expenses, increased labour and increased power expenses associated with Pembina's system expansions. For the twelve months ended December 31, 2016, operating expenses were $222 million compared to $224 million in 2015. Despite an increased asset base, this decrease was primarily the result of lower integrity and geotechnical spending on Pembina's systems in 2016 driven by integrity management program scheduling refinements and efficiencies. These decreases were mostly offset by higher operating expenses relating to Pembina's system expansions as noted above.

Operating margin was $118 million in the fourth quarter of 2016 compared to $109 million for the same period of 2015. This increase was due to higher revenue during the fourth quarter of the current year, partially offset by increased operating expenses. On a full-year basis for 2016, operating margin was $494 million, $93 million higher than the $401 million recorded in 2015. This increase was a result of higher revenues combined with lower operating expenses.

Depreciation and amortization included in operations during the fourth quarter of 2016 was $27 million, comparable to the $26 million recognized during the same period of the prior year. Depreciation and amortization included in operations for the twelve months ended December 31, 2016 was $103 million compared to $88 million in 2015. The increase in 2016 was due to additional in-service assets relating to Pembina's system expansions.

For the three and twelve months ended December 31, 2016, gross profit was $92 million and $393 million, respectively, compared to $84 million and $314 million for the same periods of 2015. These increases were due to higher operating margin partially offset by increased depreciation and amortization included in operations.

Capital expenditures for the fourth quarter and twelve months of 2016 totaled $294 million and $957 million, respectively, compared to $227 million and $932 million for the same periods of 2015. The majority of this spending related to Pembina's ongoing pipeline expansion projects which are described below.

New Developments

Pembina has completed over 60 percent of the overall Phase III Expansion program and construction continues on the Fox Creek to Namao, Alberta, portion of the project. Once complete, the Phase III Expansion is expected to provide a combined initial capacity of approximately 420 mbpd between Fox Creek and Namao. The overall project continues to

track under budget from the initial total capital cost of $2.4 billion and the Company expects an in-service date in mid-2017.

Pembina is continuing the development of large-scale pipeline infrastructure in northeast B.C. (the "NEBC Expansion") to support the growing liquids-rich Montney resource play, which has an expected capital cost of $235 million. During the quarter, Pembina received regulatory approval from the B.C. Oil and Gas Commission. Engineering is complete and construction has been initiated. Pembina expects to bring the pipeline into service in late 2017.

Pembina is also advancing a $70 million pipeline lateral in the Altares area of B.C. (the "Altares Lateral") which will connect into the Company's NEBC Expansion. Subject to environmental and regulatory approvals, the Altares Lateral is expected to have an in-service date of late 2017.

Business Overview

Pembina plays an important role in supporting Alberta's oil sands and heavy oil industry. Pembina is the sole transporter of synthetic crude oil for Syncrude Canada Ltd. (via the Syncrude Pipeline) and Canadian Natural Resources Limited's Horizon Oil Sands operation (via the Horizon Pipeline) to delivery points near Edmonton, Alberta. Pembina also owns and operates the Nipisi and Mitsue pipelines, which provide transportation for producers operating in the Pelican Lake and Peace River heavy oil regions of Alberta, and the Cheecham Lateral, which transports synthetic crude to oil sands producers operating southeast of Fort McMurray, Alberta. The Oil Sands & Heavy Oil business operates approximately 1,650 km of pipeline and has approximately 975 mbpd of contracted capacity, under long-term, extendible contracts, which provide for the flow-through of eligible operating expenses to customers. As a result, operating margin from this business is primarily driven by the amount of capital invested and is typically not significantly sensitive to fluctuations in operating expenses or actual throughput.

Financial Performance

The Oil Sands & Heavy Oil business realized revenue of $54 million in the fourth quarter of 2016 compared to $56 million in the fourth quarter of 2015. Revenue in 2016 was $202 million compared to $213 million in 2015. Operating expenses are eligible to be recovered under Pembina's contractual arrangements with its customers and therefore the reduction in operating expenses from the comparable periods, as discussed below, directly impacted revenue. In addition to the variance in operating expenses, lower revenue reflects lower interruptible volumes on the Nipisi system, partially offset by increased revenue as a result of the completion of the expansion of the Company's existing Horizon Pipeline System (the "Horizon Expansion") during the third quarter of 2016 (as described below).

Operating expenses were $17 million for the three months ended December 31, 2016 compared to $20 million for the same period in 2015. This decrease is primarily due to reduced integrity and geotechnical activities driven by integrity management program scheduling refinements and efficiencies, partially offset by higher power costs and other repairs and maintenance. For the year ended 2016, operating expenses were $62 million compared to $74 million for the prior year. The year-over-year reduction is predominantly attributable to reduced integrity and geotechnical expenses driven by integrity management program scheduling refinements and efficiencies, as well as lower power expenses.

Operating margin was $37 million for the three months ended December 31, 2016 and $140 million for the full year, consistent with $36 million and $139 million for the comparable periods in 2015 due to the factors discussed above.

Depreciation and amortization included in operations for the fourth quarter and twelve months of 2016 remained comparable to the same periods in 2015 at $4 million and $17 million, respectively.

For the three and twelve months ended December 31, 2016, gross profit was $33 million and $123 million, consistent with $32 million and $122 million achieved during the three and twelve months ended December 31, 2015. The slight increases are due to the same factors that impacted operating margin.

Capital expenditures for the three and twelve months ended December 31, 2016 were $5 million and $124 million, respectively, compared to $16 million and $28 million for the same periods in 2015. The spending in 2016 and 2015 related to the expansion of the Horizon Pipeline as well as an expansion of the Cheecham Lateral.

New Developments

In 2016, Pembina completed the Horizon Expansion, which was declared in-service on July 1 and increased the pipeline's capacity to 250 mbpd through upgrading mainline pump stations and other facility modifications. In addition, an expansion of the Cheecham Lateral was placed into service in September 2016, increasing the contracted capacity from 136 mbpd to 230 mbpd.

Business Overview

Pembina's operations include a natural gas gathering and processing business, which is strategically positioned in an active condensate and NGL-rich area of western Canada and is integrated with Pembina's other businesses. Gas Services provides gas gathering, compression, condensate stabilization, shallow cut processing and both sweet and sour deep cut processing services for its customers, primarily on a fee-for-service basis under long-term contracts. The condensate and NGL extracted through the facilities in this business are transported by Pembina's Conventional Pipelines business on its Peace and Vantage pipeline systems. A portion of the volumes are further processed at Pembina's fractionation facilities. Operating assets within Gas Services include:

- Pembina's Cutbank Complex (the "Cutbank Complex") – located near Grande Prairie, Alberta, this facility includes six shallow cut processing plants (the Cutbank Gas Plant, Musreau I, Musreau II, Musreau III, the Kakwa Gas Plant) and one deep cut gas processing plant (the Musreau Deep Cut facility) as well as the Kakwa River Facility, which is comprised of a 200 MMcf/d raw to deep cut sour gas processing facility and a 50 MMcf/d shallow cut sweet gas processing facility. In total, the Cutbank Complex has 675 MMcf/d of shallow cut sweet gas processing capacity (618 MMcf/d net to Pembina), 205 MMcf/d of sweet deep cut extraction capacity and 200 MMcf/d of deep cut sour gas processing capacity. The Cutbank Complex also includes approximately 450 km of gathering pipelines and nine field compression stations.
- Pembina's Saturn complex (the "Saturn Complex") – located near Hinton, Alberta; includes two identical 200 MMcf/d deep cut sweet gas processing plants (the "Saturn I" and "Saturn II" facilities) for a total of 400 MMcf/d of deep cut processing capacity, as well as 25 km of gathering pipelines.
- Pembina's Resthaven facility ("Resthaven") – located near Grande Cache, Alberta; includes 300 MMcf/d (gross) of deep cut sweet gas processing capacity, as well as 30 km of gathering pipelines.
- Pembina's Saskatchewan Ethane Extraction Plant ("SEEP") – located to service the southeast Saskatchewan Bakken region; has deep cut sweet gas processing capacity of 60 MMcf/d, ethane fractionation capabilities of up to 4.5 mbpd and a 104 km ethane delivery pipeline.

Operational Performance

Within the Gas Services business, revenue volumes, net to Pembina, were a record 976 MMcf/d during the fourth quarter of 2016, higher than the 606 MMcf/d recorded during the fourth quarter of 2015. Revenue volumes were positively impacted by the acquisition of the Kakwa River Facility in the second quarter of 2016 and the completion of Musreau III and the Resthaven Expansion which came into service in April 2016. In addition, revenue volumes were higher at the Resthaven facility in the fourth quarter of 2016, as the fourth quarter of the prior year was impacted by an unscheduled integrity outage. On a full-year basis in 2016, volumes increased 27 percent to 836 MMcf/d compared to 656 MMcf/d in 2015. This increase was due to the same factors noted above as well as the addition of the SEEP facility in August of 2015 and new assets that went into service in the third quarter of 2015 at the Saturn Complex. Partially offsetting these increases was a decline in volumes at the Saturn Complex due to a fire incident which took 200 MMcf/d of the total capacity of 400 MMcf/d out of service from May 17, 2016 to August 8, 2016. Insurance claims are pending for the insurable portion of the lost revenue.

Financial Performance

Gas Services contributed $82 million in net revenue during the fourth quarter of 2016 compared to $51 million in the fourth quarter of 2015. On a full-year basis, net revenue for 2016 was $271 million compared to $208 million in 2015. These 61 percent and 30 percent increases in net revenue are primarily a result of the acquisition of the Kakwa River Facility, the new assets that went into service at the Saturn Complex and the SEEP facility, as well as the completion of Musreau III and the expansion of Resthaven. Partially offsetting these factors were outages at the Resthaven facility and the Saturn Complex.

During the fourth quarter of 2016, Gas Services incurred operating expenses of $22 million compared to $18 million in the fourth quarter of 2015. This increase was due to higher operating costs at the Cutbank Complex due to higher overall throughput and the addition of the Kakwa River Facility. Full-year operating expenses were $76 million in 2016 compared to $64 million in the same period of 2015. This increase is due to additional operating costs associated with new assets, including the Kakwa River Facility, Saturn II, SEEP, Musreau III and the Resthaven expansion, partially offset by decreased power costs in 2016.

Gas Services realized operating margin of $60 million in the fourth quarter and $195 million for the full-year in 2016 compared to $33 million and $144 million during the same periods of the prior year. These increases are a result of higher revenue partially offset by the increase in operating expenses.

Depreciation and amortization included in operations during the fourth quarter and twelve months of 2016 was $15 million and $52 million, respectively, compared to $9 million and $33 million during the same periods of the prior year. These increases were primarily attributable to the addition of new assets.

For the three months ended December 31, 2016, gross profit was $45 million compared to $24 million in the same period of 2015. On a full-year basis, gross profit was $143 million compared to $111 million during the twelve months of the prior year. These increases were due to higher operating margin partially offset by increased depreciation expense.

Capital expenditures, not including acquisitions, for the fourth quarter and twelve months of 2016 were $38 million and $146 million, respectively, compared to $33 million and $242 million for the same periods of 2015. Capital spending in 2016 was largely to advance and substantially complete construction at Musreau III and the Resthaven expansion as well as to progress the development of Duvernay I (defined below in "New Developments"). In 2015, capital spending was primarily to finalize construction at SEEP and Saturn II, as well as to advance construction at Musreau III and the Resthaven expansion.

New Developments

Pembina continues to progress development of its 100 MMcf/d (gross) (75 MMcf/d net) shallow cut gas plant ("Duvernay I") at an expected capital cost of $125 million ($97 million net to Pembina). Engineering is 85 percent complete, all major equipment has been ordered and site grading and piling is complete. The Company anticipates bringing Duvernay I into service late in the fourth quarter of 2017. Pembina is also advancing preliminary engineering on a replica Duvernay II facility in the same area.

Development continues on supporting infrastructure for Duvernay I (the "Field Hub"). Pembina has received all Alberta Energy Regulator approvals for both the facilities and pipelines. The capital cost of the Field Hub and associated pipelines is expected to be $145 million. Engineering is 55 percent complete with all major equipment ordered for the facility and the civil work and access road completed. To align with the in-service date of Duvernay I, Pembina anticipates bringing the Field Hub into service late in the fourth quarter of 2017.

Subsequent to quarter end, Pembina entered into a 20-year infrastructure development and service agreement (the "Agreement") with Chevron Canada Limited ("Chevron"). The Agreement includes an area of dedication by Chevron, in excess of 10 gross operated townships (over 230,000 acres), concentrated in the prolific, liquids-rich Kaybob region of the Duvernay resource play near Fox Creek, Alberta. Under the Agreement and subject to Chevron sanctioning development in the region, Chevron has the right to require Pembina to construct, own and operate gas gathering pipelines and processing facilities, liquids stabilization facilities and other supporting infrastructure for the area of dedication, together with Pembina providing long-term service for Chevron on its pipelines and at its fractionation facilities. In aggregate, and subject to internal Chevron and regulatory approvals, the infrastructure developed over the term of this Agreement has the potential to represent a multi-billion dollar investment by Pembina. While this agreement and respective obligations of the parties are binding, infrastructure development remains contingent upon Chevron sanctioning, as well as necessary environmental and regulatory approvals.

Business Overview

Pembina offers customers a comprehensive suite of midstream products and services through its Midstream business as follows:

- Crude oil Midstream assets include:
    - 14 truck terminals providing pipeline and market access for crude oil and condensate production that are not pipeline connected;
    - Pembina Nexus Terminal which includes an area where 21 inbound pipeline connections and 13 outbound pipeline connections converge providing access to approximately 1.2 mmbpd of crude oil and condensate supply connected to the terminal;
    - Edmonton North Terminal ("ENT") which includes approximately 900 mbbls of above ground storage having access to crude oil, synthetic crude oil and condensate supply transported on Pembina's operated pipelines and products from various third-party operated pipelines; and

  - Canadian Diluent Hub, which is under development and will include 500 mbbls of above ground storage and will provide direct connectivity for growing domestic condensate volumes to the oil sands via downstream third-party pipelines.

- NGL midstream includes two vertically integrated NGL operating systems – Redwater West and Empress East (as defined below).
  - The Redwater West NGL system ("Redwater West") includes the 750 MMcf/d (322.5 MMcf/d net to Pembina) Younger extraction and fractionation facility in B.C.; two 73 mbpd NGL fractionators ("RFS I" and "RFS II") and 8.3 mmbbls of finished product cavern storage at Redwater, Alberta; and third-party fractionation capacity in Fort Saskatchewan, Alberta. Redwater West purchases NGL mix from various natural gas and NGL producers and fractionates it into finished products for further distribution and sale. Also located at the Redwater site is Pembina's rail-based terminal which services Pembina's proprietary and customer needs for importing and exporting NGL products.
  - The Empress East NGL system ("Empress East") includes 2.1 bcf/d of capacity in the straddle plants at Empress, Alberta; 20 mbpd of fractionation capacity and 1.1 mmbbls of cavern storage in Sarnia, Ontario; and 7.1 mmbbls of hydrocarbon storage at Corunna, Ontario. Empress East extracts NGL mix from natural gas at the Empress straddle plants and purchases NGL mix from other producers/suppliers. Ethane and condensate are generally fractionated out of the NGL mix at Empress and sold into Alberta markets. The remaining NGL mix is transported by pipeline to Sarnia, Ontario for further fractionation, distribution and sale. Storage and terminalling services are also provided to customers at the Corunna site.

The financial performance of Pembina's Midstream business can be affected by seasonal demands for products and other market factors. In NGL midstream, propane inventory generally builds over the second and third quarters of the year and is sold in the fourth quarter and the first quarter of the following year during the winter heating season. Condensate, butane and ethane are generally sold rateably throughout the year. See "Risk Factors" for more information.

Operational & Financial Performance

In the Midstream business, revenue was $954 million and $3.2 billion during the fourth quarter and full year of 2016, respectively, compared to $1.0 billion and $3.7 billion for the same periods in 2015. Despite the start-up of RFS II, increased storage revenue and increases in NGL pricing, the decreases in revenue for the quarter and full-year are due to decreases in certain marketing opportunities. Pembina's Midstream business generated net revenue of $194 million during the fourth quarter of 2016 compared to $137 million during the fourth quarter of 2015. This increase was largely the result of the start-up of RFS II as well as a stable-to-improving commodity price environment within the current year and higher realized storage revenue during the current period. Full-year net revenue was $572 million in 2016 compared to $458 million in 2015. This increase was due to the same factors noted above, partially offset by a decrease in net revenue for crude oil midstream which was impacted by tighter crude oil price differentials in the current year.

Operating expenses during the fourth quarter of 2016 were $21 million compared to $23 million in the fourth quarter of 2015. Operating expenses for the full-year were $69 million in 2016 compared to $71 million in 2015. These decreases were due to a crude-by-rail marketing contract expiry and disposition of interests in two full-service truck terminal joint ventures, partially offset by increased expenses associated with the start-up of RFS II.

Operating margin was $158 million during the fourth quarter of 2016 and $496 million during the full twelve months of the year compared to $123 million and $427 million in the comparable periods of 2015. These increases were primarily due to the same factors affecting net revenue and operating expenses as discussed above.

The Company's crude oil midstream operating margin was $46 million in the fourth quarter of 2016 compared to $37 million for the same period in 2015. This increase is due to increased storage revenue in the current period. For the full twelve months of the year, crude oil midstream operating margin was $162 million compared to $170 million during the prior year. This decrease is because of lower commodity-related margins as a result of tighter price differentials and the disposition of interests in two full-service truck terminal joint ventures, partially offset by increased storage revenue.

Operating margin for Pembina's NGL midstream activities was $112 million for the fourth quarter of 2016 compared to $86 million for the fourth quarter of 2015. For the twelve months ended December 31, 2016, operating margin was $334 million compared to $257 million for the same period in 2015. These increases were primarily due to the start-up of RFS II, as well as product margin increases for propane and butane, offset by increased realized losses on commodity-related derivatives.

Depreciation and amortization included in operations for Pembina's Midstream business was $27 million and $101 million in the fourth quarter and full twelve months of 2016, respectively, compared to $31 million and $107 million for the same periods of 2015. These decreases are due to certain useful life adjustments.

For the three months ended December 31, 2016, gross profit in this business was $97 million, consistent with the comparative period in the prior year. In the fourth quarter of 2016, gross profit was impacted by an unrealized loss on commodity-related derivatives of $34 million compared to a gain of $5 million in the fourth quarter of 2016. For the twelve months ended December 31, 2016, gross profit was $332 million compared to $316 million in 2015. The year-over-year increase was due to the same factors discussed above in respect of operating margin in addition to an unrealized loss on commodity-related derivatives of $63 million in the current year compared to a loss of $4 million in the prior year. In the current year, the number of commodity-related derivatives the Company has in place has increased due to incremental propane hedges to secure margin through the completion of the Company's heavy capital program.

Capital expenditures for the fourth quarter and full twelve months of 2016 totaled $112 million and $504 million compared to $169 million and $566 million for the same periods of 2015. Capital spending in this business in 2016 was primarily directed towards the ongoing construction of RFS III and further development of the projects outlined in the "New Developments" section below, as well as the completion of above ground storage tanks at ENT and progressing construction of CDH. Capital spending in this business in 2015 was primarily directed towards the development of RFS II, RFS III and NGL storage caverns and associated infrastructure. Capital was also deployed to progress above ground storage at ENT and the preliminary work for the CDH.

New Developments

As previously announced, Pembina has been evaluating a combined propane dehydrogenation ("PDH") and polypropylene ("PP") production facility (the "PDH/PP Facility") in Alberta's Industrial Heartland. The feasibility study, which was completed late in 2016, yielded encouraging results, demonstrating the economic merits for value-add processing for Alberta propane. The project was also conditionally awarded $300 million in royalty credits from the Alberta Government's Petrochemicals Diversification Program. Subject to conclusion of commercial negotiations with Pembina's partner, and other required approvals, a final investment decision with respect to the PDH/PP Facility is expected to be made in the second quarter of 2018.

Pembina has substantially advanced construction of RFS III, its 55 mbpd propane-plus third fractionator at Redwater, which continues to trend on-budget. Overall construction progress is at 90 percent and will be effectively complete by early in the second quarter of 2017, which will be followed by commissioning activities. The Company expects to be able to bring the project into service early in the third quarter of 2017.

Pembina continues to advance construction of infrastructure in support of North West Redwater Partnership's ("North West") planned refinery. Overall, the project is 70 percent complete, engineering and procurement activities are over 90 percent finished and nearly all materials and equipment are on site. By late-2017, all phases of the project will be placed into service.

Pembina is also progressing construction of CDH, with civil work in support of above ground storage construction over 90 percent complete and engineering over 95 percent complete. Pipeline connectivity between Pembina's Conventional Pipelines' infrastructure and existing third-party diluent pipeline connectivity at the Company's Redwater site is complete and volumes are flowing to third-party delivery connections. The full project has a targeted in-service date of mid-2017 to align with the in-service date of the Phase III Expansion and is trending under budget.

Pembina is also pursuing several new initiatives to further support operations at ENT. One of the major initiatives will be to develop a new delivery system from ENT into large-scale regional third-party infrastructure. Pembina will also be investing to improve delivery access for new commodities into ENT. These initiatives are expected to enhance Pembina's customer service offering and better position the Company's midstream infrastructure to accommodate increased volumes from the Phase III Expansion. The program will be developed in a number of different phases and will be placed into service throughout 2017.

Other Non-Operating Expenses

Pension Liability

Pembina maintains a defined contribution plan and non-contributory defined benefit pension plans covering employees and retirees. The defined benefit plans include a funded registered plan for all qualified employees and an unfunded supplemental retirement plan for those employees affected by the Canada Revenue Agency maximum pension limits. At the end of 2016, the pension plans carried a net obligation of $26 million compared to a net obligation of $22 million at the end of 2015. At December 31, 2016, plan obligations amounted to $190 million (2015: $168 million) compared to plan assets of $164 million (2015: $146 million). In 2016, the pension plans' expense was $11 million (2015: $11 million). Pembina's contributions to the pension plans totaled $15 million in 2016 (2015: $9 million).

Financing Activity

On January 15, 2016, Pembina closed a $170 million offering of 6.8 million cumulative redeemable minimum rate reset class A preferred shares, Series 11 (the "Series 11 Preferred Shares") at a price of $25.00 per share. The Series 11 Preferred Shares began trading on the Toronto Stock Exchange on January 15, 2016 under the symbol PPL.PR.K.

On March 29, 2016, Pembina closed a bought deal offering of 10.1 million common shares at a price of $34.00 per share for aggregate gross proceeds of approximately $345 million to fund the Kakwa River acquisition.

On April 27, 2016, Pembina closed a $250 million offering of 10 million cumulative redeemable minimum rate reset class A preferred shares, Series 13 (the "Series 13 Preferred Shares") at a price of $25.00 per share. The Series 13 Preferred Shares began trading on the Toronto Stock Exchange on April 27, 2016 under the symbol PPL.PR.M.

On August 11, 2016, Pembina closed an offering of $500 million of senior unsecured Series 7 medium-term notes (the "Series 7 Notes"). The Series 7 Notes have a fixed coupon of 3.71 percent per annum, paid semi-annually, and mature on August 11, 2026.

Subsequent to the year-end, on January 20, 2017, Pembina closed an offering of $300 million of senior unsecured Series 8 medium-term notes (the "Series 8 Notes"). The Series 8 Notes have a fixed coupon of 2.99 percent per annum, paid semi-annually, and mature on January 22, 2024. Simultaneously, Pembina closed an offering of $300 million of senior unsecured

Series 9 medium-term notes (the "Series 9 Notes"). The Series 9 Notes have a fixed coupon of 4.74 percent per annum, paid semi-annually, and mature on January 21, 2047.

Liquidity & Capital Resources

($ millions)	**December 31, 2016**	December 31, 2015
Working capital[1]	**(109)**	37
Variable rate debt[2]		
Bank debt	**353**	25
Total variable rate debt outstanding (average of 1.9%)	**353**	25
Fixed rate debt[2]		
Senior unsecured notes	**467**	467
Senior unsecured medium-term notes	**3,200**	2,700
Total fixed rate debt outstanding (average of 4.4%)	**3,667**	3,167
Convertible debentures[2]	**147**	149
Finance lease liability	**13**	12
Total debt and debentures outstanding	**4,180**	3,353
Cash and unutilized debt facilities	**2,211**	2,031

(1) As at December 31, 2016, working capital includes $6 million (December 31, 2015: $5 million) associated with the current portion of loans and borrowings.

(2) Face value.

Pembina anticipates its cash flow from operating activities, the majority of which is derived from fee-for-service contracts, will be more than sufficient to meet its short-term operating obligations and fund its targeted dividend level. In the short term, Pembina expects to source funds required for capital projects from cash and cash equivalents, its credit facility, the DRIP and by accessing the debt and equity capital markets, as required. Based on its successful access to financing in the debt and equity markets over the past several years and recently, Pembina believes it should continue to have access to funds. Refer to "Risk Factors – Additional Financing and Capital Resources" in this MD&A and "Counterparty Credit Risk" in note 24 to Pembina's Financial Statements for more information. Management remains satisfied that the leverage employed in Pembina's capital structure, of which a significant portion is used to fund assets under construction which will not contribute to the results until they come into service, is sufficient and appropriate given the characteristics and operations of the underlying asset base.

Pembina continues to closely monitor and reassess the creditworthiness of its counterparties, which has resulted in the Company reducing or mitigating its exposure to certain counterparties where it was deemed warranted and permitted under contractual terms. Financial assurances may include guarantees, letters of credit and cash. Letters of credit totaling $115 million (December 31, 2015: $68 million) are held primarily in respect of customer trade receivables.

Management may make adjustments to Pembina's capital structure as a result of changes in economic conditions or the risk characteristics of the underlying assets. To maintain or modify Pembina's capital structure in the future, Pembina may renegotiate new debt terms, repay existing debt, seek new borrowing and/or issue additional equity.

Pembina's credit facilities consist of an unsecured $2.5 billion (December 31, 2015: $2.0 billion) revolving credit facility which includes a $250 million accordion feature, which matures in May 2020, and an operating facility of $30 million (December 31, 2015: $30 million) due in May 2017, which is typically renewed on an annual basis. Borrowings on the revolving credit facility and the operating facility bear interest at prime lending rates plus nil to 1.25 percent (December 31, 2015: nil to 1.25 percent) or Bankers' Acceptances and LIBOR rates plus 1.00 percent to 2.25 percent (December 31, 2015: 1.00 to 2.25 percent). Margins on the credit facilities are based on the credit rating of Pembina's senior unsecured debt. There are no repayments due over the term of these facilities. As at December 31, 2016, Pembina

had $2.2 billion (December 31, 2015: $2.0 billion) of cash and unutilized debt facilities. At December 31, 2016, Pembina had loans and borrowings (excluding amortization, letters of credit and finance lease liabilities) of $4.0 billion (December 31, 2015: $3.2 billion). Pembina also had an additional $30 million (December 31, 2015: $23 million) in letters of credit issued pursuant to a separate credit facility. Pembina is required to meet certain specific and customary affirmative and negative financial covenants under its senior unsecured notes, medium-term notes and revolving credit and operating facilities, including a requirement to maintain certain financial ratios. Pembina is also subject to customary restrictions on its operations and activities under its notes and credit facilities, including restrictions on the granting of security, incurring indebtedness and the sale of its assets. Pembina's financial covenants include the following:

Debt Instrument	Financial Covenant[1]	Ratio	Ratio at December 31, 2016
Senior unsecured medium-term notes	Funded Debt to Capitalization	Maximum 0.70	0.33
Revolving unsecured credit facility	Debt to Capital	Maximum 0.65	0.33
	EBITDA to senior interest coverage	Minimum 2.5:1.0	7.2:1.0

[1] Terms as defined in relevant agreements.

In addition to the table above, Pembina has additional customary covenants on its other senior unsecured notes. Pembina was in compliance with all covenants under its notes and credit facilities as at the year ended December 31, 2016 (December 31, 2015 – in compliance) and, as of this date, is not at material risk of breaching its covenants.

Credit Ratings

The following information with respect to Pembina's credit ratings is provided as it relates to Pembina's financing costs and liquidity. Specifically, credit ratings affect Pembina's ability to obtain short-term and long-term financing and the cost of such financing. A reduction in the current ratings on Pembina's debt by its rating agencies, particularly a downgrade below investment-grade ratings, could adversely affect Pembina's cost of financing and its access to sources of liquidity and capital. In addition, changes in credit ratings may affect Pembina's ability, and the associated costs, to enter into normal course derivative or hedging transactions. Credit ratings are intended to provide investors with an independent measure of credit quality of any issues of securities. The credit ratings assigned by the rating agencies are not recommendations to purchase, hold or sell the securities nor do the ratings comment on market price or suitability for a particular investor. Any rating may not remain in effect for a given period of time or may be revised or withdrawn entirely by a rating agency in the future if, in its judgment, circumstances so warrant.

DBRS rates Pembina's senior unsecured notes and senior unsecured medium-term notes 'BBB' and Class A Preferred Shares Pfd-3. S&P's long-term corporate credit rating on Pembina is 'BBB' and its rating of the Class A preferred shares is P-3 (High).

Capital Expenditures

	3 Months Ended December 31 (unaudited)		12 Months Ended December 31	
($ millions)	**2016**	2015	**2016**	2015
Development capital				
Conventional Pipelines	**294**	227	**957**	932
Oil Sands & Heavy Oil	**5**	16	**124**	28
Gas Services	**38**	33	**146**	242
Midstream	**112**	169	**504**	566
Corporate/other projects	**4**	3	**14**	43
Total development capital	**453**	448	**1,745**	1,811
Acquisition			**566**	

For the three months ended December 31, 2016, capital expenditures were $453 million compared to $448 million during the same three-month period of 2015. For the year ended December 31, 2016, capital expenditures, excluding acquisitions, were $1,745 million compared to $1,811 million during the year ended December 31, 2015. Conventional Pipelines' capital expenditures were primarily incurred to progress ongoing pipeline expansion projects. Oil Sands & Heavy Oil's capital expenditures were largely in relation to the expansion of the Horizon Pipeline as well as an expansion of the Cheecham Lateral. Gas Services' capital was deployed to complete the Musreau III Facility, complete the Resthaven expansion as well as progress the development of Duvernay I. Midstream's capital expenditures were primarily directed towards completing the above ground storage at ENT as well as the ongoing construction of RFS II, RFS III, CDH and the infrastructure for North West.

Contractual Obligations at December 31, 2016

($ millions)	Payments Due By Period				
Contractual Obligations	**Total**	**Less than 1 year**	**1 – 3 years**	**3 – 5 years**	**After 5 years**
Leases and Other(1)	863	108	214	195	346
Loans and borrowings(2)	6,147	162	589	1,084	4,312
Convertible debentures(2)	167	10	157		
Construction commitments(3)	2,196	1,794	70	16	316
Total contractual obligations(2)(4)	9,373	2,074	1,030	1,295	4,974

(1) Includes office space, vehicles and over 3,500 rail car leases supporting future propane transportation in the Midstream business. The Company has sublet office space and rail cars up to 2027 and has contracted sub-lease payments for a potential of $100 million over the term.

(2) Excluding deferred financing costs. Including interest payments on senior unsecured notes.

(3) Excluding significant projects that are awaiting regulatory approval at December 31, 2016 and for which Pembina is not committed to construct.

(4) Pembina enters into product purchase agreements and power purchase agreements to secure supply for future operations. Purchase prices of both NGL and power are dependent on current market prices. Volumes and prices for NGL and power contracts cannot be reasonably determined and therefore an amount has not been included in the contractual obligations schedule. Product purchase agreements range from one to ten years and involve the purchase of NGL products from producers. Assuming product is available, Pembina has secured between 51 and 72 mpbd each year up to and including 2025. Power purchase agreements range from one to 25 years and involve the purchase of power from electrical service providers. The Company has secured between 4 and 29 MW/d each year up to and including 2041.

Pembina is, subject to certain conditions, contractually committed to the construction and operation of the Phase III Expansion, RFS III, the NEBC Expansion, infrastructure for North West, Duvernay I, as well as certain pipeline connections and laterals and select caverns at the Company's Redwater site. Additional commitments exist in relation to assets recently brought into service and other corporate infrastructure. See "Forward-Looking Statements & Information" and "Liquidity & Capital Resources."

Dividends

Common Share Dividends

Common share dividends are payable if, as, and when declared by Pembina's Board of Directors. The amount and frequency of dividends declared and payable is at the discretion of the Board of Directors, which considers earnings, cash flow, capital requirements, the financial condition of Pembina and other relevant factors when making its dividend determination.

Preferred Share Dividends

The holders of Pembina's class A preferred shares are entitled to receive fixed cumulative dividends payable quarterly on the 1st day of March, June, September and December, if, as and when declared by the Board of Directors of Pembina, for the initial fixed-rate period for each series of preferred share.

DRIP

Eligible Pembina shareholders have the opportunity to receive, by reinvesting the cash dividends declared payable by Pembina on their common shares, either (i) additional common shares at a discounted subscription price of 97 percent of the Average Market Price (as defined in the DRIP), pursuant to the "Dividend Reinvestment Component" of the DRIP, or (ii) a premium cash payment equal to 101 percent of the amount of reinvested dividends (the "Premium Dividend™"), pursuant to the "Premium Dividend™ Component" of the DRIP.

Participation in the DRIP for the fourth quarter and twelve months of 2016 was 58 percent and 61 percent (2015: 61 percent and 60 percent) of common shares outstanding. Proceeds for the fourth quarter of 2016 were $110 million and $449 million during the full year compared to $99 million and $373 million for the same periods of 2015.

Related Party Transactions

For the twelve months ended December 31, 2016, Pembina had no transactions with related parties as defined in International Accounting Standard 24 – *Related Party Disclosures*, except those pertaining to contributions to Pembina's defined benefit pension plan and transactions with key management personnel in the ordinary course of their employment or directorship agreements.

Critical Accounting Judgments and Estimates

The preparation of the Consolidated Financial Statements in conformity with IFRS requires management to make judgments, estimates and assumptions that are based on the circumstances and estimates at the date of the financial statements and affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Judgments, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The following judgment and estimation uncertainties are those management considers material to the Company's financial statements:

Judgments

(i) Business combinations

Business combinations are accounted for using the acquisition method of accounting. The determination of fair value often requires management to make judgments about future possible events. The assumptions with respect to

determining the fair value of property, plant and equipment and intangible assets acquired generally require the most judgment.

(ii) Depreciation and amortization

Depreciation and amortization of property, plant and equipment and intangible assets are based on management's judgment of the most appropriate method to reflect the pattern of an asset's future economic benefit expected to be consumed by the Company. Among other factors, these judgments are based on industry standards and historical experience.

(iii) Impairment

Assessment of impairment is based on management's judgment of whether there are internal and external factors that would indicate that an asset, or cash generating unit ("CGU") is impaired. The determination of a CGU is also based on management's judgment and is an assessment of the smallest group of assets that generate cash inflows independently of other assets. The asset composition of a CGU can directly impact the recoverability of the assets included therein. In assessing the recoverability, each CGU's carrying value is compared to its recoverable amount, defined as the greater of fair value less costs to sell and value in use.

Estimates

(i) Business Combinations

Estimates of future cash flows, forecast prices, interest rates and discount rates are made in determining the fair value of assets acquired and liabilities assumed. Changes in any of the assumptions or estimates used in determining the fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities, intangible assets and goodwill in the purchase price equation. Future earnings can be affected as a result of changes in future depreciation and amortization, asset or goodwill impairment.

(ii) Provisions and contingencies

Provisions recognized are based on management's judgment about assessing contingent assets and liabilities and timing, scope and amount of assets and liabilities. Management uses judgment in determining the likelihood of realization of contingent assets and liabilities to determine the outcome of contingencies.

Based on the long-term nature of the decommissioning provision, the most significant uncertainties in estimating the provision are the discount rates used, the costs that will be incurred and the timing of when these costs will occur.

(iii) Deferred taxes

The calculation of the deferred tax asset or liability is based on assumptions about the timing of many taxable events and the enacted or substantively enacted rates anticipated to be applicable to income in the years in which temporary differences are expected to be realized or reversed.

(iv) Depreciation and amortization

Estimated useful lives of property, plant and equipment and intangible assets are based on management's assumptions and estimates of the physical useful lives of the assets, the economic lives, which may be associated with the reserve lives and commodity type of the production area, in addition to the estimated residual value.

(v) Impairment tests

Impairment tests include management's best estimates of future cash flows and discount rates.

Changes in Accounting Policies

New standards adopted in 2016

There were no new standards or amendments issued by the International Accounting Standards Board ("IASB") that were adopted by Pembina as of January 1, 2016.

New standards and interpretations not yet adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRS Interpretation Committee ("IFRIC") and are effective for accounting periods beginning after January 1, 2017. These standards have not been applied in preparing these Financial Statements. Those which may be relevant to Pembina are described below:

IFRS 9 Financial Instruments (2014)

IFRS 9 *Financial Instruments* (2014) has a mandatory effective date of January 1, 2018 and is available for early adoption. The new standard introduces new requirements for the classification and measurement of financial assets, amends the impairment model, and includes a new general hedge accounting standard which aligns hedge accounting more closely with risk management.

The Company intends to adopt IFRS 9 Financial Instruments (2014) effective January 1, 2017. The Company does not expect the standard to have a material impact on the financial statements.

IFRS 15 *Revenue from Contracts with Customers*

In May 2014, the IASB issued IFRS 15 *Revenue from contracts with customers*, which supersedes existing revenue guidance, effective for periods beginning on or after January 1, 2018. IFRS 15 contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model outlines a five step analysis to assess contracts which involves identifying the contract, identifying the performance obligations, determining the transaction price, allocating the transaction price to the performance obligations and recognizing revenue when or as the entity satisfies a performance obligation. Detailed guidance is also provided on a number of areas for which there was not previously guidance, including contract costs and contract modifications. In April 2016, the IASB issued Clarifications to IFRS 15, *Revenue from contracts with customers*, which is effective at the same time as IFRS 15, and provides additional guidance on the five step analysis and transition.

The Company intends to adopt IFRS 15 and the Clarifications on the January 1, 2018 effective date. The Company has completed a detailed implementation plan, identified revenue streams, and major contracts types. The Company is in the process of evaluating the impact that the standard will have on its financial statements and disclosure, however, the extent of the impact has not yet been determined. The Company expects to report more detailed information on the impact of the new standard as it is determined.

IFRS 16 Leases

IFRS 16 *Leases* is effective for annual periods beginning on or after January 1, 2019. The new standard results in substantially all lessee leases being recorded on the statement of financial position.

The Company intends to adopt IFRS 16 for the annual period beginning on January 1, 2019. The Company is currently evaluating the impact that the standard will have on its results of operations and financial position.

Controls and Procedures

Disclosure Controls and Procedures

Pembina maintains disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in Pembina's filings is reviewed, recognized and disclosed accurately and in the appropriate time period.

An evaluation, as of December 31, 2016, of the effectiveness of the design and operation of Pembina's disclosure controls and procedures, as defined in Rule 13a - 15(e) and 15d - 15(e) under the United States Securities Exchange Act of 1934, as amended (the "Exchange Act") and National Instrument 52-109 Certification of Disclosure in Issuer's Annual and Interim Filings ("NI 52-109"), was carried out by management, including the Chief Executive Offer ("CEO") and the Chief Financial Officer ("CFO"). Based on that evaluation, the CEO and CFO have concluded that the design and operation of Pembina's disclosure controls and procedures were effective as at December 31, 2016 to ensure that material information relating to the Company is made known to the CEO and CFO by others, particularly during the period during which the annual filings are being prepared.

It should be noted that while the CEO and CFO believe that Pembina's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that Pembina's disclosure controls and procedures will prevent all errors or fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Internal Control over Financial Reporting

Pembina maintains internal control over financial reporting which is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with IFRS.

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a - 15(f) and 15d - 15(f) under the Exchange Act and under NI 52-109.

Management, including the CEO and the CFO, has conducted an evaluation of Pembina's internal control over financial reporting based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on management's assessment as at December 31, 2016, the CEO and CFO have concluded that Pembina's internal control over financial reporting is effective.

Further, there has been no change in the Company's internal control over financial reporting that occurred during the year covered by this Annual Report that has materially affected, or are reasonably likely to materially affect, Pembina's internal control over financial reporting.

The effectiveness of internal control over financial reporting as of December 31, 2016 was audited by KPMG LLP, an independent registered public accounting firm, as stated in their Report of Independent Registered Public Accounting Firm, which is included in this 2016 Annual Report to shareholders.

Due to its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of Pembina's financial statements would be prevented or detected. Further, the evaluation of the effectiveness of internal control over financial reporting was made as of a specific date, and continued effectiveness in future periods is subject to the risks that controls may become inadequate.

Risk Factors

Pembina's value proposition is based on balancing economic benefits against risk. Where appropriate, Pembina will reduce risk. In addition to an objective of contractually eliminating its business risk by contracting long-term firm-service commitments, Pembina has a formal Risk Management Program including policies, procedures and systems designed to mitigate any residual risks. The risks that may affect the business and operation of Pembina and its operating subsidiaries are described at a high level within this MD&A and more fully within Pembina's Annual Information Form ("AIF"), an electronic copy of which is available at www.pembina.com or on Pembina's SEDAR profile at www.sedar.com and which is filed under Form 40-F on Pembina's EDGAR profile at www.sec.gov. Further, additional discussion about counterparty risk, market risk, liquidity risk and additional information on financial risk management can be found in Note 24.

Shareholders and prospective investors should carefully consider these risk factors before investing in Pembina's securities, as each of these risks may negatively affect the trading price of Pembina's securities, the amount of dividends paid to shareholders and the ability of Pembina to fund its debt obligations, including debt obligations under its outstanding convertible debentures and any other debt securities that Pembina may issue from time to time.

Operational Risks

Operational risks include: pipeline leaks; the breakdown or failure of equipment, pipelines and facilities, information systems or processes; the compromise of information and control systems; the performance of equipment at levels below those originally intended (whether due to misuse, unexpected degradation or design, construction or manufacturing defects); spills at truck terminals and hubs; spills associated with the loading and unloading of harmful substances onto rail cars and trucks; failure to maintain adequate supplies of spare parts; operator error; labour disputes; disputes with interconnected facilities and carriers; operational disruptions or apportionment on third-party systems or refineries which may prevent the full utilization of Pembina's facilities and pipelines; and catastrophic events including but not limited to natural disasters, fires, floods, explosions, train derailments, earthquakes, acts of terrorists and saboteurs, and other similar events, many of which are beyond the control of Pembina. Pembina may also be exposed from time to time, to additional operational risks not stated in the immediately preceding sentences. The occurrence or continuance of any of these events could increase the cost of operating Pembina's assets or reduce revenue, thereby impacting earnings. Additionally, Pembina's facilities and pipelines are reliant on electrical power for their operations. A failure or disruption within the local or regional electrical power supply or distribution or transmission systems could significantly affect ongoing operations. Further, a significant increase in the cost of power or fuel could have a materially negative effect on the level of profit realized in cases where the relevant contracts do not provide for recovery of such costs.

Pembina is committed to preserving customer and shareholder value by proactively managing operational risk through safe and reliable operations. Senior managers are responsible for the daily supervision of operational risk by ensuring appropriate policies, procedures and systems are in place within their business units and internal controls are operating efficiently. Pembina also has an extensive program to manage system integrity, which includes the development and use of in-line inspection tools and various other leak detection technologies. Pembina's maintenance, excavation and repair programs are focused on risk mitigation and, as such, resources are directed to the areas of greatest benefit and infrastructure is replaced or repaired as required. Pembina carries insurance coverage with respect to some, but not all, casualty occurrences in amounts customary for similar business operations, which coverage may not be sufficient to compensate for all casualty occurrences. In addition, Pembina has a comprehensive Corporate Security Management Program designed to reduce security-related risks.

Commodity Price Risk

Pembina's Midstream business includes activities related to product storage, terminalling, and hub services. These activities expose Pembina to certain risks including that Pembina may experience volatility in revenue, and impairments related to the book value of stored product, due to fluctuations in commodity prices. Primarily, Pembina enters into contracts to purchase and sell crude oil and NGL at floating market prices. The prices of products that are marketed by Pembina are subject to volatility as a result of such factors as seasonal demand changes, extreme weather conditions, market inventory levels, general economic conditions, changes in crude oil markets and other factors. Pembina manages its risk exposure by balancing purchases and sales to lock-in margins. Notwithstanding Pembina's management of price and quality risk, marketing margins for commodities can vary and have varied significantly from period to period. This variability could have an adverse effect on the results of Pembina's commercial Midstream business and its overall results of operations. To assist in effectively smoothing that variability inherent in this business, Midstream is investing in assets that have a fee-based revenue component, and is looking to expand this area going forward.

The Midstream business is also exposed to possible price declines between the time Pembina purchases NGL feedstock and sells NGL products, and to decreasing frac spreads. Frac spread is the difference between the sale prices of NGL products and the cost of NGL sourced from natural gas and acquired at natural gas-related prices. Frac spreads can change significantly from period to period depending on the relationship between NGL and natural gas prices (the "frac spread ratio"), absolute commodity prices, and changes in the Canadian to U.S. dollar foreign exchange rate. There is also a differential between NGL product prices and crude oil prices which can change margins realized for midstream products separate from frac spread ratio changes. The amount of profit or loss made on the extraction portion of the NGL midstream business will generally increase or decrease with frac spreads. This exposure could result in variability of cash flow generated by the NGL midstream business, which could affect Pembina and the cash dividends that Pembina is able to distribute.

Pembina responds to commodity price risk by using an active Risk Management Program to fix revenues to pay for a minimum of 50 percent of the fixed committed term natural gas supply costs. Pembina's fixed committed plus discretionary natural gas supply can vary from year to year based on industry dynamics. Additionally, Pembina's Midstream business is also exposed to variability in quality, time and location differentials. The Company may also utilize commodity-related derivative instruments as part of its overall risk management strategy to assist in managing the exposure to commodity prices, as well as interest rates, cost of power and foreign exchange risk. The Company does not trade financial instruments for speculative purposes. Commodity price fluctuations and volatility can also impact producer activity and throughput in Pembina's infrastructure, as set out below.

For more information with respect to Pembina's financial instruments and financial risk management program, see Note 24 to Pembina's Financial Statements, which note is incorporated by reference herein.

Reserve Replacement, Throughput and Product Demand

Pembina's Conventional Pipeline tariff revenue is based upon a variety of tolling arrangements, including fee-for-service, cost-of-service agreements and market-based tolls. As a result, certain pipeline tariff revenue is heavily dependent upon throughput levels of crude oil, NGL and condensate. Future throughput on Pembina's crude oil and NGL pipelines and replacement of oil and gas reserves in the service areas will be dependent upon the activities of producers operating in those areas as they relate to exploiting their existing reserve bases and exploring for and developing additional reserves, and technological improvements leading to increased recovery rates. Similarly, the volumes of natural gas processed through Pembina's gas processing assets depends on production of natural gas in the areas serviced by the gas processing business and associated pipelines. Without reserve additions, or expansion of the service areas, volumes on such pipelines

and in such facilities would decline over time as reserves are depleted. As oil and gas reserves are depleted, production costs may increase relative to the value of the remaining reserves in place, causing producers to shut-in production or seek out lower cost alternatives for transportation. If the level of tariffs collected by Pembina decreases as a result, cash flow available for dividends to shareholders and to service obligations under Pembina's debt securities and Pembina's other debt obligations could be adversely affected.

Over the long-term, the ability and willingness of shippers to continue production, and as a consequence, Pembina's business, will also depend, in part, on the level of demand and prices for crude oil, condensate, NGL and natural gas in the markets served by the crude oil and NGL pipelines and gas processing and gathering infrastructure in which Pembina has an interest. Producers may shut-in production at lower product prices or higher production costs.

Global economic events may continue to have a substantial impact on the prices of such products. Pembina cannot predict the impact of future supply/demand or economic conditions, fuel conservation measures, alternative fuel requirements, governmental regulation or technological advances in fuel economy and energy generation devices on the energy and petrochemical industries or future demand for and prices of natural gas, crude oil, condensate and NGL. A lower commodity price environment will generally reduce drilling activity, and as a result the supply growth that has been fuelling the growth in midstream infrastructure could slow down. Producers in the areas serviced by the business may not be successful in exploring for and developing additional reserves or achieving technological improvements to increase recovery rates and production costs given lower commodity prices, and the gas plants and the pipelines may not be able to maintain existing volumes of throughput. These factors could negatively affect pipeline and processing capacity value as transportation and processing capacity becomes more abundant. Future prices of these products are determined by supply and demand factors, including weather and general economic conditions as well as economic, political and other conditions in other oil and natural gas regions, all of which are beyond Pembina's control. Lower production volumes will also increase the competition for natural gas supply at gas processing plants which could result in higher shrinkage premiums being paid to natural gas producers.

The rate and timing of production from proven natural gas reserves tied into the gas plants is at the discretion of the producers and is subject to regulatory constraints. The producers have no obligation to produce natural gas from these lands. Pembina's gas processing assets are connected to various third-party trunk line systems. Operational disruptions or apportionment on those third-party systems may prevent the full utilization of the business.

Customer Contracts

Throughput on Pembina's pipelines is or will be governed by transportation contracts or tolling arrangements with various producers of petroleum products. In addition, Pembina is party to numerous contracts of varying durations in respect of its gas gathering, processing and fractionation facilities as well as terminalling and storage services. Any default by counterparties under such contracts or any expiration of such contracts or tolling arrangements without renewal or replacement may have an adverse effect on Pembina's business. Further, some of the contracts associated with the services described above are comprised of a mixture of firm and non-firm contracts and the revenue that Pembina earns on contracts which are based on non-firm or firm without take-or-pay service is dependent on the volume of natural gas, NGL, crude oil and condensate produced by producers in the relevant geographic areas. Accordingly, lower than historical production volumes in these areas (for reasons such as low commodity prices) may have an adverse effect on Pembina's revenue.

Reputation

Reputational risk is the potential market or company specific events that could result in the deterioration of Pembina's reputation with key stakeholders. The potential for harming Pembina's corporate reputation exists in every business decision and all risks can have an impact on reputation, which in turn can negatively impact Pembina's business and its securities. Reputational risk cannot be managed in isolation from other forms of risk. Credit, market, operational, insurance, liquidity, regulatory and legal, technology risks, among others, must all be managed effectively to safeguard Pembina's reputation. Pembina's reputation could also be impacted by the actions and activities of other companies operating in the energy industry, particularly other energy infrastructure providers, over which it has no control. In particular, Pembina's reputation could be impacted by negative publicity related to pipeline incidents, unpopular expansion plans or new projects, and due to opposition from organizations opposed to energy, oil sands and pipeline development and particularly with shipment of production from oil sands regions. Negative impacts from a compromised reputation could include revenue loss, reduction in customer base, delays in obtaining regulatory approvals with respect to growth projects, and decreased value of Pembina's securities.

Environmental Costs and Liabilities

Pembina's operations, facilities and petroleum product shipments are subject to extensive national, regional and local environmental, health and safety laws and regulations governing, among other things, discharges to air, land and water, the handling and storage of petroleum products and hazardous materials, waste disposal, the protection of employee health, safety and the environment, and the investigation and remediation of contamination. Pembina's facilities could experience incidents, malfunctions or other unplanned events that result in spills or emissions in excess of permitted levels and result in personal injury, fines, penalties or other sanctions and property damage. Pembina could also incur liability in the future for environmental contamination associated with past and present activities and properties. The facilities and pipelines must maintain a number of environmental and other permits from various governmental authorities in order to operate, and these facilities are subject to inspection from time to time. Failure to maintain compliance with these requirements could result in operational interruptions, fines or penalties, or the need to install additional pollution control technology. Licenses and permits must be renewed from time to time and there is no guarantee that a license or permit will be renewed on the same or similar conditions. There can be no assurance that Pembina will be able to obtain all of the licenses, permits, registrations, approvals and authorizations that may be required to conduct operations that it may wish to undertake. Further, if at any time regulatory authorities deem any one of Pembina's pipelines or facilities unsafe or not in compliance with applicable laws, they may order it to be shut down. Certain significant environmental legislative initiatives that may materially impact Pembina's business and financial results and conditions are outlined below.

In 2016, the Canadian federal government announced that its initial proposed pan-Canadian carbon tax will be $10 per tonne commencing in 2018 and will escalate to $50 per tonne by 2022. In Alberta, the provincial government launched consultation on three separate initiatives under the *Climate Change Act* that are part of the Alberta Climate Leadership Plan. These recommendations included a new carbon levy on all carbon emissions commencing on January 1, 2017, revisions to the current larger facility emitters program and a proposed framework for the reduction of methane from fugitive and vented gas emissions. All Pembina business entities within Alberta have obtained exemption certification from the carbon levy for the majority of its business activities, which will limit Pembina's exposure to the levy until those exemptions expire in 2023. Where applicable, business entities have also obtained licences under the carbon levy regulations for the buying and selling of regulated fuels without the need to recover and remit the carbon levy on those fuel transactions. Nevertheless, until the government develops regulations for the additional initiatives under the Climate Change Leadership Plan, the impact to Pembina's business cannot be fully assessed and such impact could be material to

Pembina's operations and financial results and conditions. Through active participation with industry associations and direct engagement with regulatory bodies, Pembina will continue to monitor and assess for material impacts to Pembina's business as regulations and policies are developed.

In 2015, the Government of Alberta also advised that it would renew and update Alberta's Specific Gas Emitter Regulation ("SGER") which currently governs carbon emissions from large emitter facilities. As a result, by 2017 the SGER will require large emitters to reduce their emissions by 20 percent up from the previous 12 percent base levels, and will result in an increase in the price of carbon offset from $15/tonne of CO_2e to $20/tonne of CO_2e in 2016 and $30/tonne of CO_2e in 2017. Pembina currently has one facility participating in the SGER program and the regulation may trigger additional facilities in the future due to recent expansions that are now becoming operational. Currently, the impacts of SGER to Pembina are minimal. The Alberta Government is assessing the current SGER program which expires at the end of 2017 and is proposing to replace SGER with a revised regulatory framework at the time of expiration. Pembina is actively monitoring and assessing for impacts to Pembina's business as regulations and policies are developed, and such impacts could be material to Pembina's operations and financial results.

Additionally, oil sands facilities are currently charged a SGER levy based on each individual facility's historical emissions, irrespective of how intense (e.g. tonnes of greenhouse gases ("GHG") per barrel produced) or efficient that operation has been. The Government of Alberta, in its climate change legislation and guidelines, is also transitioning oil sands facilities from SGER to an output-based allocation approach for the carbon price and will legislate an overall limit to oil sands GHG emissions. The legislated emissions limit on oil sands operations will be a maximum 100 megatonnes in any year; currently oil sands operations emit roughly 70 megatonnes per year. This legislated change may limit oil sands production growth in the future.

Similar policy reviews on climate change are underway in B.C. and Ontario. In 2016, Ontario introduced two regulations under the *Ontario Climate Change Act*, the *Cap and Trade Program Regulations* ("Cap-and-Trade Regulations"), which took effect on July 1, 2016, and the *Quantification, Reporting and Verification of Greenhouse Gas Emissions Regulations* ("Emissions Regulation"), which took effect on January 1, 2017. As a product supplier of propane, Pembina is required to offset the carbon emissions from the product sold to market. Pembina is fully registered under the Cap-and Trade Regulations and the Emissions Regulation, and the product pricing adjustments have been initiated for transactions starting on January 1, 2017 to recover/offset our anticipated compliance costs.

While Pembina believes its current operations are in compliance with all applicable significant environmental and safety regulations, there can be no assurance that substantial costs or liabilities will not be incurred. Moreover, it is possible that other developments, such as changes in environmental and safety laws, regulations and enforcement policies thereunder, claims for damages to persons or property resulting from Pembina's operations, and the discovery of any new pre-existing environmental liabilities in relation to any of Pembina's existing or future properties or operations, could result in significant costs and liabilities to Pembina. If Pembina is not able to recover the resulting costs or increased costs through insurance or increased tariffs, cash flow available to pay dividends to shareholders and to service obligations under Pembina's debt securities and Pembina's other debt obligations could be adversely affected.

Changes in environmental and safety regulations and legislation are also likely to impact Pembina's customers and could result in development and production becoming uneconomical, which would impact throughput and revenue on Pembina's systems and in its facilities.

While Pembina maintains insurance in respect of damage caused by seepage or pollution in an amount it considers prudent and in accordance with industry standards, certain provisions of such insurance may limit the availability thereof in respect of certain occurrences unless they are discovered within fixed time periods, which typically range from 72 hours

to 30 days. Although Pembina believes it has adequate pipeline monitoring systems in place to monitor for a significant spill of product, if Pembina is unaware of a problem or is unable to locate the problem within the relevant time period, insurance coverage may lapse and not be available.

Regulation and Legislation

Legislation in Alberta and B.C. exists to ensure that producers have fair and reasonable opportunities to produce, process and market their reserves. In Alberta, the Alberta Energy Regulator (the "AER") and in B.C., the British Columbia Utilities Commission (the "BCUC"), may, on application and following a hearing (and in Alberta with the approval of the Lieutenant Governor in Council), declare the operator of a pipeline a common carrier of oil or NGL and, as such, must not discriminate between producers who seek access to the pipeline. Producers and shippers may also apply to the regulatory authorities for a review of tariffs, and such tariffs may then be regulated if it is proven that the tariffs are not just and reasonable. Applications by producers to have a pipeline operator declared a common carrier are usually accompanied by a request to have the regulatory authorities establish the conditions under which the carrier must accept and carry product, including the tolls that may be charged by the common carrier. The extent to which regulatory authorities in such instances can override existing transportation or processing contracts has not been fully decided. The potential for direct regulation of tolls, other than for the majority of Pembina's provincially regulated B.C. Pipelines, while considered remote by Pembina, could result in toll levels that are less advantageous to Pembina and could impair the economic operation of such regulated pipeline systems.

Since 2014, the AER is the primary regulatory body that Pembina deals with related to Alberta-issued energy permits, with some minor exceptions. In 2017, Pembina will continue to monitor for legislative or procedural changes that could impose an administrative or financial burden on the Company as a result of a single regulator. Additionally, certain of Pembina's subsidiaries own pipelines in B.C., which are regulated by the BCUC, and pipelines that cross provincial or international boundaries, which are regulated by the National Energy Board (the "NEB"). Certain of Pembina's operations and expansion projects are subject to additional regulations, and as Pembina's operations expand throughout Canada and North American, Pembina may be required to comply with the requirements of additional regulators and legislative bodies, including the Canadian Environmental Assessment Agency ("CEAA"), the British Columbia Environmental Assessment Office ("BCEAO"), the Ontario Ministry of Natural Resources, the Saskatchewan Ministry of Economy, and The Petroleum Branch of Manitoba Mineral Resources. In the U.S., tolls on pipelines are regulated by and reported to the Federal Energy Regulatory Commission ("FERC") and pipeline operations are governed by the Pipeline and Hazardous Materials Safety Administration ("PHMSA"), which sets standards for the design, construction, pressure testing, operation and maintenance, corrosion control, training and qualification of personnel, accident reporting and record keeping. The Office of Pipeline Safety, within PHMSA, inspects and enforces the pipeline safety regulations across the U.S. All regulations and environmental compliance obligations are subject to change at the initiative of the governing body. Pembina continually monitors existing and changing regulations in all jurisdictions in which it currently operates or into which it may expand in the future, and their implications to its operations. However, Pembina cannot predict future regulatory changes, and any such compliance and regulatory changes in any one or multiple jurisdictions could have a material adverse impact on Pembina, its financial results and its shareholders.

In 2015, the Government of Canada issued 30 federal mandate letters. The mandate letter for Minister McKenna was to set up an expert panel to review the environmental and regulatory processes associated with the CEAA. The mandate letter to Minister Carr is for the assessment of a broad range of issues related to the purpose, mandate, structure and role of the NEB. The mandate letter to Minister LeBlanc is to assess whether the changes made to the *Fisheries Act* in 2012 should be reversed. The mandate letter to Minister Garneau is to assess the changes made to the *Navigation Protection Act* in 2012 and whether they should be reversed. Pembina continues to actively monitor these and other regulatory

initiatives but cannot predict the outcome of these and similar reviews under way under the new political regime in Canada. Resulting changes to the regulatory processes could materially impact Pembina's business and financial results, directly as well as indirectly, by impacting the financial condition of its customers and, ultimately, production levels and throughput on Pembina's pipelines and in its facilities.

Recent political events in the U.S. have led to uncertainty regarding ongoing trade relationships, in particular in relation to the North American Free Trade Agreement ("NAFTA"). While the current U.S. administration has indicated its intention to renegotiate or withdraw from NAFTA, there have been no formal steps taken in this regard to date. As such, at this time Pembina is unable to predict what impact any such renegotiation or withdrawal may have; however, in the event that such impacts the exports of energy resources to the U.S. or Mexico this could have a material adverse effect on Pembina's business and financial condition, directly as well as indirectly by negatively impacting Pembina's customers' cash flow and production levels.

Pembina's business and financial condition could also be influenced by federal and foreign legislation affecting, in particular, foreign investment, through legislation such as the *Competition Act* (Canada) and the *Investment Canada Act* (Canada), and their equivalents in foreign jurisdictions.

There can be no assurance that income tax laws, regulatory and environmental laws or policies and government incentive programs relating to the pipeline or oil and natural gas industry, will not be changed in a manner which adversely affects Pembina or its shareholders or other security holders.

Abandonment Costs

Pembina is responsible for compliance with all applicable laws and regulations regarding the dismantling, decommissioning and site disturbance remediation activities and abandonment of its pipeline systems and other assets at the end of their economic life and these abandonment costs may be substantial. An accounting provision is made for the estimated cost of site restoration and capitalized in the relevant asset category. A provision is recognized if, as a result of a past event, Pembina has a present legal or constructive obligation that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Pembina's estimates as to the costs of such abandonment or decommissioning could be materially different than the actual costs incurred.

For more information with respect to Pembina's estimated net present value of decommissioning obligations, see Note 15 to Pembina's Financial Statements for the year ended December 31, 2016, which note is incorporated by reference herein. Electronic copies of this document can be found on Pembina's profile on the SEDAR website at www.sedar.com and the EDGAR website at www.sec.gov.

The proceeds of the disposition of certain assets, including in respect of certain pipeline systems and line fill, may be available to offset abandonment costs. While Pembina estimates future abandonment costs, actual costs may differ. Pembina may, in the future, determine it prudent or be required by applicable laws or regulations to establish and fund additional reclamation funds to provide for payment of future abandonment costs. Such reserves could decrease cash flow available for dividends to shareholders and to service obligations under Pembina's debt securities and Pembina's other debt obligations.

Pembina has complied with the NEB requirements on its NEB-regulated pipelines for the creation of abandonment funds and has completed the compliance-based filings that are required under the applicable NEB rules and regulations regarding the abandonment of its pipeline systems and assets. Pembina also has a 50 percent ownership in an NEB-regulated pipeline lateral which is operated by a joint venture partner and has paid its share of required abandonment funds into trust. The joint venture partner is responsible for the submission of the NEB-compliance based filings for this

asset. Pembina will continue to monitor any regulatory changes prior to the next five-year review and will complete the annual reporting as required by the NEB. Pembina owned and/or operated rate-regulated pipelines account for approximately 872.5 km of the total infrastructure in the Conventional Pipelines business.

Completion and Timing of Expansion Projects

The successful completion of Pembina's growth and expansion projects is dependent on a number of factors outside of Pembina's control, including the impact of general economic, business and market conditions, availability of capital at attractive rates, receipt of regulatory approvals, reaching long-term commercial arrangements with customers in respect of certain portions of the expansions, construction schedules and costs that may change depending on supply, demand and/or inflation, labour, materials and equipment availability, contractor non-performance, weather conditions, and cost of engineering services. There is no certainty, nor can Pembina provide any assurance, that necessary regulatory approvals will be received on terms that maintain the expected return on investment associated with a specific projects, or at all, or that satisfactory commercial arrangements with customers will be reached where needed on a timely basis or at all, or that third parties will comply with contractual obligations in a timely manner. Factors such as special interest group opposition, Aboriginal, landowner and other stakeholder consultation requirements, changes in shipper support over time, and changes to the legislative or regulatory framework could all have an impact on contractual and regulatory milestones being accomplished. As a result, the cost estimates and completion dates for Pembina's major projects can change during different stages of the project. Early stage projects face additional challenges including securing leases, easements, rights-of-way, permits and/or licenses from landowners or governmental authorities allowing access for such purposes, as well as Aboriginal consultation requirements. Accordingly, actual costs and timing estimates may vary from initial estimates and these differences can be significant, and certain projects may not proceed as planned, or at all. Further, there is a risk that maintenance will be required more often than currently planned or that significant maintenance capital projects could arise that were not previously anticipated.

Under most of Pembina's construction and operation agreements, the Company is obligated to construct the facilities regardless of delays and cost increases and Pembina bears the risk for any cost overruns and future agreements with customers entered into with respect to expansions may contain similar conditions. While Pembina is not currently aware of any significant undisclosed cost overruns at the date hereof, any such cost overruns in the future may adversely affect the economics of particular projects, as well as Pembina's business operations and financial results, and could reduce Pembina's expected return on investment which, in turn, could reduce the level of cash available for dividends and to service obligations under Pembina's debt securities and other debt obligations.

Operating and Capital Costs

Operating and capital costs of Pembina's business may vary considerably from current and forecast values and rates and represent significant components of the cost of providing service. In general, as equipment ages, costs associated with such equipment may increase over time. Dividends may be reduced if significant increases in operating or capital costs are incurred and this may also impact the ability of Pembina to service obligations under its debt securities and other debt obligations.

Although operating costs are to be recaptured through the tariffs charged on natural gas volumes processed and oil and NGL transported, respectively, to the extent such charges escalate, producers may seek lower cost alternatives or stop production of their natural gas and/or crude oil.

Competition

Pembina competes with other pipelines, midstream, marketing and gas processing and handling services providers in its service areas as well as other transporters of crude oil and NGL. The introduction of competing transportation alternatives into Pembina's service areas could potentially have the impact of limiting Pembina's ability to adjust tolls as it may deem necessary and result in the reduction of throughput in Pembina's pipelines. Additionally, potential pricing differentials on the components of NGL may result in these components being transported by competing gas pipelines. Pembina believes it is prepared for and determined to meet these existing and potential competitive pressures. Pembina also competes with other businesses for growth and business opportunities, which could impact its ability to grow through acquisitions.

Reliance on Principal Customers and Operators

Pembina relies on several significant customers to purchase product from the Midstream business. If for any reason these parties were unable to perform their obligations under the various agreements with Pembina, the revenue and dividends of the Company and the operations of the Midstream business could be negatively impacted. See "General Risk Factors – Credit Risk" in Pembina's 2016 AIF.

Additional Financing and Capital Resources

The timing and amount of Pembina's capital expenditures, and the ability of the Company to repay or refinance existing debt as it becomes due, directly affects the amount of cash dividends that Pembina pays. Future acquisitions, expansions of Pembina's assets, and other capital expenditures and the repayment or refinancing of existing debt as it becomes due will be financed from sources such as cash generated from operations, the issuance of additional shares or other securities (including debt securities) of Pembina and borrowings. Dividends may be reduced, or even eliminated, at times when significant capital or other expenditures are made. There can be no assurance that sufficient capital will be available on terms acceptable to Pembina, or at all, to make additional investments, fund future expansions or make other required capital expenditures. As a result of the ongoing weakness in the global economy, and in particular the commodity-related industry sectors, Pembina may experience restricted access to capital and increased borrowing costs. Although Pembina's business and asset base have not changed materially, the ability of Pembina to raise capital is dependent upon, among other factors, the overall state of capital markets and investor demand for investments in the energy industry and Pembina's securities in particular. To the extent that external sources of capital, including the issuance of additional shares or other securities or the availability of additional credit facilities, become limited or unavailable on favourable terms or at all due to credit market conditions or otherwise, the ability of Pembina to make the necessary capital investments to maintain or expand its operations, to repay outstanding debt and to invest in assets, as the case may be, may be impaired. To the extent Pembina is required to use cash flow to finance capital expenditures or acquisitions or to repay existing debt as it becomes due, the level of dividends payable may be reduced.

Debt Service

At the end of 2016, Pembina had exposure to floating interest rates on $353 million in debt. Floating rate debt exposure is, in part, managed by using derivative financial instruments.

Variations in interest rates and scheduled principal repayments, if required under the terms of Pembina's banking agreements could result in significant changes in the amounts required to be applied to debt service before payment of any dividends. Certain covenants in the Company's agreements with its lenders may also limit payments and dividends paid by Pembina.

Pembina and its subsidiaries are permitted to borrow funds to finance the purchase of pipelines and other energy infrastructure assets, to fund capital expenditures and other financial obligations or expenditures in respect of those

assets and for working capital purposes. Amounts paid in respect of interest and principal on debt incurred in respect of those assets reduce the amount of cash flow available for common share dividends. Variations in interest rates and scheduled principal repayments for which Pembina may not be able to refinance at favourable rates or at all, could result in significant changes in the amount required to be applied to service debt, which could have detrimental effects on the amount of cash available for common share dividends. Pembina, on a consolidated basis, is also required to meet certain financial covenants under the credit facilities and is subject to customary restrictions on its operations and activities, including restrictions on the granting of security, incurring indebtedness and the sale of its assets.

The lenders under Pembina's unsecured credit facilities have also been provided with guarantees and subordination agreements. If Pembina becomes unable to pay its debt service charges or otherwise commits an event of default such as bankruptcy, payments to all of the lenders will rank in priority to dividends and payments to holders of Series F Convertible Debentures.

Although Pembina believes the existing credit facilities are sufficient for immediate requirements, there can be no assurance that the amount will be adequate for the future financial obligations of Pembina or that additional funds will be able to be obtained on terms favourable to Pembina or at all.

Credit Ratings

Rating agencies regularly evaluate Pembina, basing their ratings of its long-term and short-term debt on a number of factors. This includes Pembina's financial strength as well as factors not entirely within its control, including conditions affecting the industry in which Pembina operates generally and the wider state of the economy. There can be no assurance that one or more of Pembina's credit ratings will not be downgraded.

Pembina's borrowing costs and ability to raise funds are directly impacted by its credit ratings. Credit ratings may be important to suppliers or counterparties when they seek to engage in certain transactions. A credit rating downgrade could potentially impair Pembina's ability to enter into arrangements with suppliers or counterparties, to engage in certain transactions and could limit Pembina's access to private and public credit markets and increase the costs of borrowing under its existing credit facilities. A downgrade could also limit Pembina's access to debt and preferred share markets and increase its cost of borrowing.

The occurrence of a downgrade in Pembina's credit ratings could adversely affect its ability to execute portions of its business strategy and could have a material adverse effect on its liquidity, results of operations and capital position.

Foreign Exchange Risk

Pembina's commodity-related transactions, rail car leases, Vantage pipeline tariff cash flows and some of its capital expenditure commitments may be subject to currency risk, primarily arising from the denomination of specific earnings, cash flows and expenditure commitments in U.S. dollars. Pembina partially mitigates this risk using an active Risk Management Program to exchange foreign currency for domestic currency at a fixed rate.

Interest Rate Risk

Pembina has floating interest rate debt which subjects the Company to interest rate risk. Pembina responds to this risk under the active Risk Management Program by entering into financial derivative contracts to fix interest rates.

Cyber Security

Pembina's infrastructure, technologies and data are becoming increasingly integrated, which creates a risk that failure of one system could lead to failure of another system. The risk of a cyber-attack targeting the industry is also increasing. A breach in the security or failure of the Company's information technology could result in operational outages, delays,

damage to assets or the environment, reputational harm, lost profits, lost data and other adverse outcomes. The Company's security strategy focuses on information technology security risk management which includes continuous monitoring, threat detection and an incident response protocol.

(1) Refer to "Non-GAAP Measures."

During the periods in the prior table, Pembina's results were impacted by the following factors and trends:

- Increased production in key operating areas and resource plays within the WCSB (Deep Basin, Montney and Duvernay) which has supported increased revenue volumes on Pembina's existing Conventional Pipelines, Gas Services and NGL Midstream infrastructure as well as supported the development of large-scale expansions across these businesses;
- New large-scale growth projects across Pembina's business being placed into service and the acquisitions of the Vantage pipeline and SEEP (October 2014) and the Kakwa River Facility (April 2016);
- Pre-financed portions of capital for projects under construction;

- Significantly weaker commodity market (especially the weaker propane and butane market) during the majority of 2015 and the early part of 2016;
- Increased common shares outstanding and common share dividends due to: the DRIP, debenture conversions, common share issuance, increasing the common share dividend rate, the acquisition of the Vantage pipeline and SEEP; and
- Increased preferred share dividends due to additional preferred shares issued.

Additional Information

Additional information about Pembina filed with Canadian and U.S. securities commissions, including quarterly and annual reports, AIFs (filed with the U.S. Securities and Exchange Commission under Form 40-F), Management Information Circulars and financial statements can be found online at www.sedar.com, www.sec.gov and through Pembina's website at www.pembina.com. Information contained in or otherwise accessible through Pembina's website or other websites, though referenced herein, is not incorporated by reference herein unless otherwise specifically indicated.

Non-GAAP Measures

Throughout this MD&A, Pembina has used the following terms that are not defined by GAAP but are used by management to evaluate the performance of Pembina and its businesses. Since non-GAAP measures do not have a standardized meaning prescribed by IFRS and are therefore unlikely to be comparable to similar measures presented by other companies, securities regulations require that non-GAAP measures are clearly defined, qualified and reconciled to their nearest GAAP measure. Except as otherwise indicated, these non-GAAP measures are calculated and disclosed on a consistent basis from period to period. Specific adjusting items may only be relevant in certain periods.

The intent of non-GAAP measures is to provide additional useful information with respect to Pembina's operational and financial performance to investors and analysts though the measures do not have any standardized meaning under IFRS. The measures should not, therefore, be considered in isolation or used in substitute for measures of performance prepared in accordance with IFRS. Other issuers may calculate these non-GAAP measures differently.

Investors should be cautioned that net revenue, Adjusted EBITDA, adjusted cash flow from operating activities, cash flow from operating activities per common share, adjusted cash flow from operating activities per common share, operating margin and total enterprise value should not be construed as alternatives to revenue, earnings, cash flow from operating activities, gross profit or other measures of financial results determined in accordance with GAAP as indicators of Pembina's performance.

Net revenue

Net revenue is a non-GAAP financial measure which is defined as total revenue less cost of goods sold including product purchases. Management believes that net revenue provides investors with a single measure to indicate the margin on sales before non-product operating expenses that is comparable between periods. Management utilizes net revenue to compare consecutive results, particularly in the Midstream business, to aggregate revenue generated by each of the Company's businesses and to set comparable objectives.

Cost of goods sold, including product purchases	**737**	835	**2,501**	3,128
Net revenue	**514**	407	**1,764**	1,507

Adjusted earnings before interest, taxes, depreciation and amortization ("Adjusted EBITDA")

Adjusted EBITDA is a non-GAAP measure and is calculated as earnings for the year plus share of profit (loss) from equity accounted investees (before tax, depreciation and amortization) plus net finance costs, income taxes, depreciation and amortization (included in operations and general and administrative expense) and unrealized gains or losses on commodity-related derivative financial instruments. The exclusion of unrealized gains or losses on commodity-related derivative financial instruments eliminates the non-cash impact of such gains or losses.

Adjusted EBITDA also includes adjustments for loss (gain) on disposal of assets, transaction costs incurred in respect of acquisitions, impairment charges or reversals and write-downs in respect of goodwill, intangible assets and property plant and equipment, and non-cash provisions. These additional adjustments are made to exclude various non-cash and other items that are not reflective of ongoing operations. Management believes that Adjusted EBITDA provides useful information to investors as it is an important indicator of an issuer's ability to generate liquidity through cash flow from operating activities. Adjusted EBITDA is also used by investors and analysts for assessing financial performance and for the purpose of valuing an issuer, including calculating financial and leverage ratios. Management utilizes Adjusted EBITDA to set objectives and as a key performance indicator of the Company's success. Pembina presents Adjusted EBITDA as management believes it is a measure frequently used by analysts, investors and other stakeholders in evaluating the Company's financial performance.

Adjusted cash flow from operating activities, cash flow from operating activities per common share and adjusted cash flow from operating activities per common share

Adjusted cash flow from operating activities is a non-GAAP measure which is defined as cash flow from operating activities plus the change in non-cash operating working capital, adjusting for current tax and share-based payment expenses, and deducting preferred share dividends declared. Adjusted cash flow from operating activities excludes preferred share dividends because they are not attributable to common shareholders. The calculation has been modified to include current tax and share-based payment expense as it allows management to better assess the obligations discussed below. Management believes that adjusted cash flow from operating activities provides comparable information to investors for assessing financial performance during each reporting period. Management utilizes adjusted cash flow from operating activities to set objectives and as a key performance indicator of the Company's ability to meet interest obligations, dividend payments and other commitments. Per common share amounts are calculated by dividing cash flow from operating activities, or adjusted cash flow from operating activities, as applicable, by the weighted average number of common shares outstanding.

Adjusted cash flow from operating activities per common share – basic *(dollars)*	**0.74**	0.77	**2.54**	2.53

Operating margin

Operating margin is a non-GAAP measure which is defined as gross profit before depreciation and amortization included in operations and unrealized gain/loss on commodity-related derivative financial instruments. Management believes that operating margin provides useful information to investors for assessing the financial performance of the Company's operations. Management utilizes operating margin in setting objectives and views it as a key performance indicator of the Company's success.

Reconciliation of operating margin to gross profit:

	3 Months Ended December 31 (unaudited)		12 Months Ended December 31

Gross profit	**270**	237	**1,001**	866

Total enterprise value

Total enterprise value is a non-GAAP measure which is calculated by aggregating the market value of common shares, preferred shares and convertible debentures at a specific date plus senior debt less cash and cash equivalents. Management believes that total enterprise value provides useful information to investors to assess the overall market value of the Company and as an input to calculate financial ratios. Management utilizes total enterprise value to assess Pembina's growth.

Forward-Looking Statements & Information

In the interest of providing Pembina's security holders and potential investors with information regarding Pembina, including management's assessment of the Company's future plans and operations, certain statements contained in this MD&A constitute forward-looking statements or information (collectively, "forward-looking statements"). Forward-looking statements are typically identified by words such as "anticipate", "continue", "estimate", "expect", "may", "will", "project", "should", "could", "would", "believe", "plan", "intend", "design", "target", "undertake", "view", "indicate", "maintain", "explore", "entail", "schedule", "objective", "strategy", "likely", "potential", "outlook", "aim", "propose", "goal", and similar expressions suggesting future events or future performance.

By their nature, such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Pembina believes the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this MD&A should not be unduly relied upon. These statements speak only as of the date of the MD&A.

In particular, this MD&A contains forward-looking statements pertaining to the following:

- the future levels and sustainability of cash dividends that Pembina intends to pay to its shareholders, the dividend payment date and the tax treatment thereof;
- planning, construction, capital expenditure estimates, schedules, regulatory and environmental applications and anticipated approvals, expected capacity, incremental volumes, in-service dates, rights, activities, benefits and operations with respect to new construction of, or expansions on existing, pipelines, gas services facilities, fractionation facilities, terminalling, storage and hub facilities and other facilities or energy infrastructure, as well as the impact of the Company's new projects on its future financial performance;
- pipeline, processing, fractionation and storage facility and system operations and throughput levels;
- treatment under governmental regulatory regimes including taxes, environmental and greenhouse gas regulations and related abandonment and reclamation obligations, and Aboriginal, landowner and other stakeholder consultation requirements;
- Pembina's estimates of and strategy for payment of future abandonment costs and decommissioning obligations, and deferred tax liability;
- Pembina's strategy and the development and expected timing of new business initiatives and growth opportunities and the impact thereof;
- increased throughput potential, processing capacity and fractionation capacity due to increased oil and gas industry activity and new connections and other initiatives on Pembina's pipelines and at Pembina's facilities;
- expected future cash flows and the sufficiency thereof, financial strength, sources of and access to funds at attractive rates, future contractual obligations, future financing options, future renewal of credit facilities, availability of capital to fund growth plans, operating obligations and dividends and the use of proceeds from financings;
- tolls and tariffs and processing, transportation, fractionation, storage and services commitments and contracts;
- operating risks (including the amount of future liabilities related to pipeline spills and other environmental incidents) and related insurance coverage and inspection and integrity programs;
- the adoption of new accounting standards;
- inventory and pricing in the North American liquids market;
- the impact of the current commodity price environment on Pembina; and
- competitive conditions and Pembina's ability to position itself competitively in the industry.

Various factors or assumptions are typically applied by Pembina in drawing conclusions or making the forecasts, projections, predictions or estimations set out in forward-looking statements based on information currently available to Pembina. These factors and assumptions include, but are not limited to:

- oil and gas industry exploration and development activity levels and the geographic region of such activity;
- the success of Pembina's operations;
- prevailing commodity prices, interest rates and exchange rates and the ability of Pembina to maintain current credit ratings;
- the availability of capital to fund future capital requirements relating to existing assets and projects;
- expectations regarding participation in Pembina's DRIP and pension plan;
- future operating costs including geotechnical and integrity costs being consistent with historical costs;
- oil and gas industry compensation levels remaining consistent;
- in respect of current developments, expansions, planned capital expenditures, completion dates and capacity expectations: that third parties will provide any necessary support; that any third-party projects relating to Pembina's growth projects will be sanctioned and completed as expected; that any required commercial agreements can be reached; that all required regulatory and environmental approvals can be obtained on the necessary terms in a timely manner; that counterparties will comply with contracts in a timely manner; that there are no unforeseen events preventing the performance of contracts or the completion of the relevant facilities; and that there are no unforeseen material costs relating to the facilities which are not recoverable from customers;
- in respect of the stability of Pembina's dividends: prevailing commodity prices, margins and exchange rates; that Pembina's future results of operations will be consistent with past performance and management expectations in relation thereto; the continued availability of capital at attractive prices to fund future capital requirements relating to existing assets and projects, including but not limited to future capital expenditures relating to expansion, upgrades and maintenance shutdowns; the success of growth projects; future operating costs; that counterparties to material agreements will continue to perform in a timely manner; that there are no unforeseen events preventing the performance of contracts; and that there are no unforeseen material construction or other costs related to current growth projects or current operations;
- prevailing regulatory, tax and environmental laws and regulations and tax pool utilization; and
- the amount of future liabilities relating to lawsuits and environmental incidents and the availability of coverage under Pembina's insurance policies (including in respect of Pembina's business interruption insurance policy).

The actual results of Pembina could differ materially from those anticipated in these forward-looking statements as a result of the material risk factors set forth below:

- the regulatory environment and decisions and Aboriginal and landowner consultation requirements;
- the impact of competitive entities and pricing;
- labour and material shortages;
- reliance on key relationships and agreements and the outcome of stakeholder engagement;
- the strength and operations of the oil and natural gas production industry and related commodity prices;
- non-performance or default by counterparties to agreements which Pembina or one or more of its subsidiaries has entered into in respect of its business;
- actions by governmental or regulatory authorities including changes in tax laws and treatment, changes in royalty rates or increased environmental regulation;
- fluctuations in operating results;
- adverse general economic and market conditions in Canada, North America and elsewhere, including changes, or prolonged weakness, as applicable, in interest rates, foreign currency exchange rates, commodity prices, supply/demand trends and overall industry activity levels;
- constraints on, or the unavailability of adequate infrastructure;
- changes in the political environment, in North America and elsewhere, and public opinion;
- ability to access various sources of debt and equity capital;
- changes in credit ratings;
- technology and security risks;
- natural catastrophe; and
- the other factors discussed under "Risk Factors" in Pembina's AIF for the year ended December 31, 2016. Pembina's MD&A and AIF are available at www.pembina.com and in Canada under Pembina's company profile on www.sedar.com and in the U.S. on the Company's profile at www.sec.gov.

These factors should not be construed as exhaustive. Unless required by law, Pembina does not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Any forward-looking statements contained herein are expressly qualified by this cautionary statement.

Financial Statements & Notes

MANAGEMENT'S REPORT

The audited Consolidated Financial Statements of Pembina Pipeline Corporation (the "Company" or "Pembina") are the responsibility of Pembina's management. The financial statements have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, using management's best estimates and judgments, where appropriate.

Management is responsible for the reliability and integrity of the financial statements, the notes to the financial statements and other financial information contained in this report. In the preparation of these financial statements, estimates are sometimes necessary because a precise determination of certain assets and liabilities is dependent on future events. Management believes such estimates have been based on careful judgments and have been properly reflected in the accompanying financial statements.

Management's Assessment of Internal Controls over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a - 15(f) and 15d - 15(f) under the United States Securities Exchange Act of 1934, as amended (the "Exchange Act") and under National Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings ("NI 52-109").

Management, including the Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO"), has conducted an evaluation of Pembina's internal control over financial reporting based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Based on management's assessment as at December 31, 2016, management has concluded that Pembina's internal control over financial reporting is effective.

Due to its inherent limitations, internal control over financial reporting is not intended to provide absolute assurance that a misstatement of Pembina's financial statements would be prevented or detected. Further, the evaluation of the effectiveness of internal control over financial reporting was made as of a specific date, and continued effectiveness in future periods is subject to the risks that controls may become inadequate.

The Board of Directors of the Company (the "Board") is responsible for ensuring management fulfils its responsibilities for financial reporting and internal control. The Board is assisted in exercising its responsibilities through the Audit Committee, which consists of four non-management directors. The Audit Committee meets periodically with management and the auditors to satisfy itself that management's responsibilities are properly discharged, to review the financial statements and to recommend approval of the financial statements to the Board.

KPMG LLP, the independent auditors, have audited the Company's financial statements in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States), and have also audited the effectiveness of Pembina's internal control over financial reporting as of December 31, 2016 and has included an attestation report on management's assessment in their reports which follow. The independent auditors have full and unrestricted access to the Audit Committee to discuss their audit and their related findings.

Changes in Internal Controls over Financial Reporting

There has been no change in the Company's internal control over financial reporting that occurred during the year covered by this Annual Report that has materially affected, or are reasonably likely to materially affect, Pembina's internal control over financial reporting.

INDEPENDENT AUDITORS' REPORT OF REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Pembina Pipeline Corporation

We have audited the accompanying consolidated financial statements of Pembina Pipeline Corporation, which comprise the consolidated statements of financial position as at December 31, 2016 and December 31, 2015, the consolidated statements of earnings and comprehensive income, changes in equity and cash flows for the years then ended, and notes, comprising a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on our judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

KPMG LLP is a Canadian limited liability partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity. KPMG Canada provides services to KPMG LLP.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of Pembina Pipeline Corporation as at December 31, 2016 and December 31, 2015, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Other Matter

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Pembina Pipeline Corporation's internal control over financial reporting as of December 31, 2016, based on the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 23, 2017 expressed an unmodified (unqualified) opinion on the effectiveness of Pembina Pipeline Corporation's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of Pembina Pipeline Corporation

We have audited Pembina Pipeline Corporation (the "Corporation") internal control over financial reporting as at December 31, 2016, based on the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report. Our responsibility is to express an opinion on the Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

An entity's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. An entity's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the entity; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the entity are being made only in accordance with authorizations of management and directors of the entity; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the entity's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

KPMG LLP is a Canadian limited liability partnership and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity. KPMG Canada provides services to KPMG LLP.

In our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with Canadian generally accepted auditing standards and the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial position of the Corporation as of December 31, 2016 and December 31, 2015, and the related consolidated statements of earnings and comprehensive income, changes in equity and cash flows for the years then ended, and our report dated February 23, 2017 expressed an unmodified (unqualified) opinion on those consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. REPORTING ENTITY

Pembina Pipeline Corporation ("Pembina" or the "Company") is an energy transportation and service provider domiciled in Canada. The consolidated financial statements ("Financial Statements") include the accounts of the Company, its subsidiary companies, partnerships and any interests in associates and joint arrangements as at and for the year ended December 31, 2016. These Financial Statements present fairly the financial position, financial performance and cash flows of the Company.

Pembina owns or has interests in conventional crude oil, condensate and natural gas liquids ("NGL") pipelines, oil sands and heavy oil pipelines, gas gathering and processing facilities, an NGL infrastructure and logistics business and midstream services that span across its operations. The Company's assets are located in Canada and in the United States.

2. BASIS OF PREPARATION

a. Basis of measurement and statement of compliance

The Financial Statements have been prepared on a historical cost basis with some exceptions, as detailed the accounting policies set out below in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB"). These accounting policies have been applied consistently for all periods presented in these financial statements.

Certain insignificant comparative amounts have been reclassified to conform to the presentation adopted in the current year.

The Financial Statements were authorized for issue by Pembina's Board of Directors on February 23, 2017.

b. Functional and presentation currency

The Financial Statements are presented in Canadian dollars. All financial information presented in Canadian dollars has been disclosed in millions, except where noted. The assets and liabilities of subsidiaries whose functional currencies are other than Canadian dollars are translated into Canadian dollars at the foreign exchange rate at the balance sheet date, while revenues and expenses of such subsidiaries are translated using average monthly foreign exchange rates, which approximate the foreign exchange rates on the dates of the transactions. Foreign exchange differences arising on translation are included in Other Comprehensive Income.

c. Use of estimates and judgments

The preparation of the Financial Statements in conformity with IFRS requires management to make judgments, estimates and assumptions that are based on the circumstances and estimates at the date of the financial statements and affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Judgments, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

The following judgment and estimation uncertainties are those management considers material to the Company's financial statements:

Judgments

(i) Business combinations

Business combinations are accounted for using the acquisition method of accounting. The determination of fair value often requires management to make judgments about future possible events. The assumptions with respect to determining the fair value of property, plant and equipment, intangible assets and liabilities acquired, as well as the determination of deferred taxes, generally require the most judgment.

(ii) Depreciation and amortization

Depreciation and amortization of property, plant and equipment and intangible assets are based on management's judgment of the most appropriate method to reflect the pattern of an asset's future economic benefit expected to be consumed by the Company. Among other factors, these judgments are based on industry standards and historical experience.

(iii) Impairment

Assessment of impairment is based on management's judgment of whether there are sufficient internal and external factors that would indicate that an asset, or cash generating unit ("CGU"), or group of CGU's are impaired. The determination of a CGU is also based on management's judgment and is an assessment of the smallest group of assets that generate cash inflows independently of other assets. The asset composition of a CGU can directly impact the recoverability of the assets included therein. In assessing the recoverability, each CGU's carrying value is compared to its recoverable amount, defined as the greater of fair value less costs to sell and value in use.

Estimates

(i) Business combinations

Estimates of future cash flows, forecast prices, interest rates and discount rates are made in determining the fair value of assets acquired and liabilities assumed. Changes in any of the assumptions or estimates used in determining the fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities, intangible assets and goodwill in the purchase price equation. Future earnings can be affected as a result of changes in future depreciation and amortization, asset or goodwill impairment.

(ii) Provisions and contingencies

Provisions recognized are based on management's judgment about assessing contingencies and timing, scope and amount of assets and liabilities. Management uses judgment in determining the likelihood of realization of contingent assets and liabilities to determine the outcome of contingencies.

Based on the long-term nature of the decommissioning provision, the most significant uncertainties in estimating the provision are the discount rates used, the costs that will be incurred and the timing of when these costs will occur.

(iii) Deferred taxes

The calculation of the deferred tax asset or liability is based on assumptions about the timing of many taxable events and the enacted or substantively enacted rates anticipated to be applicable to income in the years in which temporary differences are expected to be realized or reversed.

(iv) Depreciation and amortization

Estimated useful lives of property, plant and equipment and intangible assets are based on management's assumptions and estimates of the physical useful lives of the assets, the economic lives, which may be associated with the reserve lives and commodity type of the production area, in addition to the estimated residual value.

(v) Impairment tests

Impairment tests include management's best estimates of future cash flows and discount rates.

3. CHANGES IN ACCOUNTING POLICIES

There were no new standards or amendments issued by the International Accounting Standards Board ("IASB") that were adopted as of January 1, 2016. The accounting policies as disclosed in Note 4 have been applied to all periods consistently.

4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies as set out below have been applied consistently to all periods presented in these Financial Statements.

a. Basis of consolidation

i) Business combinations

The Company measures goodwill as the fair value of the consideration transferred including the recognized amount of any non-controlling interest in the acquiree, less the net recognized amount (generally fair value) of the identifiable assets acquired and liabilities assumed, all measured as of the acquisition date. When the excess is negative, a bargain purchase gain is recognized immediately in earnings.

The Company elects on a transaction-by-transaction basis whether to measure non-controlling interest at its fair value, or at its proportionate share of the recognized amount of the identifiable net assets, at the acquisition date.

Non-controlling interests represent equity interests in subsidiaries owned by outside parties. The share of net assets of subsidiaries attributable to non-controlling interests is presented as a separate component of equity. Their share of net income and other comprehensive income is also recognized in this separate component of equity. Changes in the Company's ownership interest in subsidiaries that do not result in a loss of control are accounted for as equity transactions. Adjustments to non-controlling interests are based on a proportionate amount of the net assets of the subsidiary. No adjustments are made to goodwill and no gain or loss is recognized in earnings.

Transaction costs, other than those associated with the issue of debt or equity securities, that the Company incurs in connection with a business combination are expensed as incurred.

ii) Subsidiaries

Subsidiaries are entities, including unincorporated entities such as partnerships, controlled by the Company. The financial results of subsidiaries are included in the Financial Statements from the date that control

commences until the date that control ceases. The accounting policies of subsidiaries are aligned with the policies adopted by the Company.

iii) Investments in associates

Associates are those entities in which the Company has significant influence and thereby has the power to participate in the financial and operational decisions, but does not control or jointly control the investee. Significant influence is presumed to exist when the Company holds between 20 and 50 percent of the voting power of another entity.

The Financial Statements include the Company's share of the earnings and other comprehensive income, after adjustments to align the accounting policies with those of the Company, from the date that significant influence commences until the date that significant influence ceases. The Company's investments in associates are accounted for using the equity method and are recognized initially at cost, including transaction costs.

When the Company's share of losses exceeds its interest in an equity-accounted investee, the carrying amount of that interest, including any long-term investments, is reduced to nil, and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee.

iv) Joint arrangements

Joint arrangements represent activities where the Company has joint control established by a contractual agreement. Joint control requires unanimous consent for the relevant financial and operational decisions. A joint arrangement is either a joint operation, whereby the parties have rights to the assets and obligations for the liabilities, or a joint venture, whereby the parties have rights to the net assets.

For a joint operation, the consolidated financial statements include the Company's proportionate share of the assets, liabilities, revenues, expenses and cash flows of the arrangement with items of a similar nature on a line-by-line basis, from the date that joint control commences until the date that joint control ceases.

Joint ventures are accounted for using the equity method of accounting and recognized at cost and adjusted thereafter for the post-acquisition change in the Company's share of the joint venture's net assets. The Company's consolidated financial statements include its share of the joint venture's profit or loss and other comprehensive income included in investment in joint ventures, until the date that joint control ceases.

Determining the type of joint arrangement as either joint operation or joint venture is based on management's assumptions of whether it has joint control over another entity. The considerations include, but are not limited to, determining if the arrangement is structured through a separate vehicle and whether the legal form and contractual arrangements give the entity direct rights to the assets and obligations for the liabilities within the normal course of business. Other facts and circumstances are also assessed by management, including the entity's rights to the economic benefits of assets and its involvement and responsibility for settling liabilities associated with the arrangement.

v) Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized revenue and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the

Company's interest in the investee. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

vi) Foreign currency

Transactions in foreign currencies are translated to the Company's functional currency at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the Company's functional currency at the exchange rate at that date. The foreign currency gain or loss on monetary items is the difference between amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in foreign currency translated at the exchange rate at the end of the reporting period.

Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Foreign currency differences arising on retranslation are recognized in earnings, with the exception of foreign exchange differences arising on translation of subsidiaries whose functional currencies are other than the Canadian dollar which are included in Other Comprehensive Income.

b. Cash and cash equivalents

Cash and cash equivalents comprise cash balances, call deposits and short-term investments with original maturities of ninety days or less that are subject to an insignificant risk of changes in their fair value, and are used by the Company in the management of its short-term commitments.

c. Trade and other receivables

Trade and other receivables are financial assets with fixed or determinable payments that are not quoted in an active market.

Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method less any impairment losses.

d. Inventories

Inventories are measured at the lower of cost and net realizable value and consist primarily of crude oil, NGL and spare parts. The cost of inventories is determined using the weighted average costing method and includes direct purchase costs and when applicable, costs of production, extraction, fractionation costs, and transportation costs. Net realizable value is the estimated selling price in the ordinary course of business less the estimated selling costs. All changes in the value of the inventories are reflected in inventories and cost of sales.

e. Financial instruments

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

i) Non-derivative financial assets

The Company initially recognizes loans, receivables and deposits on the date that they are originated. All other financial assets (including assets designated at fair value through earnings) are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognized as a separate asset or liability.

The Company classifies non-derivative financial assets into the following categories:

Financial assets at fair value through profit or loss

A financial asset is classified in this category if it is classified as held-for-trading or is designated as such on initial recognition. Directly attributable transaction costs are recognized in profit or loss as incurred.

Loans and receivables

Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method less any impairment losses.

Available for sale

These assets are initially measured at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, they are measured at fair value, with changes in those fair values recognized in other comprehensive income. When these assets are derecognized, the gain or loss accumulated in equity is reclassified to profit or loss. The Company did not have any financial assets classified as available for sale during the years covered in these financial statements.

ii) Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated at fair value through earnings) are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expire.

The Company's non-derivative financial liabilities are comprised of the following: bank overdrafts, trade payables and accrued liabilities, taxes payable, dividends payable, loans and borrowings including finance lease obligations and the liability component of convertible debentures.

Such financial liabilities are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition these financial liabilities are measured at amortized cost using the effective interest method.

Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

iii) Common share capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects.

iv) Preferred share capital

Preferred shares are classified as equity because they bear discretionary dividends and do not contain any obligations to deliver cash or other financial assets. Discretionary dividends are recognized as equity distributions on approval by the Company's Board of Directors. Incremental costs directly attributable to the issue of preferred shares are recognized as a deduction from equity, net of any tax effects.

v) Compound financial instruments

The Company's convertible debentures are compound financial instruments consisting of a financial liability and an embedded conversion feature. In accordance with IAS 39, the embedded derivatives are required to be separated from the host contracts and accounted for as stand-alone instruments.

Debentures containing a cash conversion option allow Pembina to pay cash to the converting holder of the debentures, at the option of the Company. As such, the conversion feature is presented as a financial derivative liability within long-term derivative financial instruments. Debentures without a cash conversion option are settled in shares on conversion, and therefore the conversion feature is presented within equity, in accordance with its contractual substance.

On initial recognition and at each reporting date, the embedded conversion feature is measured using a method whereby the fair value is measured using an option pricing model. Subsequent to initial recognition, any unrealized gains or losses arising from fair value changes are recognized through earnings in the statement of earnings and comprehensive income at each reporting date. If the conversion feature is included in equity, it is not remeasured subsequent to initial recognition. On initial recognition, the debt component, net of issue costs, is recorded as a financial liability and accounted for at amortized cost. Subsequent to initial recognition, the debt component is accreted to the face value of the debentures using the effective interest rate method. Upon conversion, the corresponding portions of the debt and equity are removed from those captions and transferred to share capital.

vi) Derivative financial instruments

The Company holds derivative financial instruments to manage its interest rate, commodity, power costs and foreign exchange risk exposures as well as cash conversion features on convertible debentures and a redemption liability. Embedded derivatives are separated from the host contract and accounted for separately if the economic characteristics and risks of the host contract and the embedded derivative meet the definition of a derivative, and the combined instrument is not measured at fair value through earnings. Derivatives are recognized initially at fair value with attributable transaction costs recognized in earnings as incurred. Subsequent to initial recognition, derivatives are measured at fair value and changes in non-commodity-related derivatives are recognized immediately in earnings in net finance costs and changes in commodity-related derivatives are recognized immediately in earnings in operating activities.

f. Property, plant and equipment

i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, estimated decommissioning provisions and borrowing costs on qualifying assets.

Cost may also include any gain or loss realized on foreign currency transactions directly attributable to the purchase or construction of property, plant and equipment. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate components of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized within other expense (income) in earnings.

ii) Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognized and recorded as depreciation expense. The cost of maintenance and repair expenses of the property, plant and equipment are recognized in earnings as incurred.

iii) Depreciation

Depreciation is based on the cost of an asset less its residual value. Significant components of individual assets are assessed and if a component has a useful life that is different from the remainder of the asset, that component is depreciated separately. Land and linefill are not depreciated.

Depreciation is recognized in earnings on a straight line or declining balance basis, which most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset.

Leased assets are depreciated over the shorter of the lease term and their useful lives unless it is reasonably certain that the Company will obtain ownership by the end of the lease term.

Depreciation methods, useful lives, economic lives and residual values are reviewed annually and adjusted if appropriate.

g. Intangible assets

i) Goodwill

Goodwill that arises upon acquisitions is included in intangible assets. See Note 4(a)(i) for the policy on measurement of goodwill at initial recognition.

Subsequent measurement

Goodwill is measured at cost less accumulated impairment losses.

In respect of equity-accounted investees, the carrying amount of goodwill is included in the carrying amount of the investment, and an impairment loss on such an investment is allocated to the investment and not to any asset, including goodwill, that forms the carrying amount of the equity-accounted investee.

ii) Other intangible assets

Other intangible assets acquired individually by the Company and have finite useful lives are recognized and measured at cost less accumulated amortization and accumulated impairment losses.

iii) Subsequent expenditures

Subsequent expenditures are capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures are recognized in earnings as incurred.

iv) Amortization

Amortization is based on the cost of an asset less its residual value.

Amortization is recognized in earnings over the estimated useful lives of intangible assets, other than goodwill, from the date that they are available for use.

Amortization methods, useful lives and residual values are reviewed annually and adjusted if appropriate.

h. Leased assets

Leases which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. The leased asset is initially recognized at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset.

Other leases are operating leases and are not recognized in the Company's statement of financial position.

i. Lease payments

Payments made under operating leases are recognized in earnings on a straight-line basis over the term of the lease. Lease incentives received are deferred and recognized over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance cost and the reduction of the outstanding liability. The finance cost is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining life.

i) Determining whether an arrangement contains a lease

At inception of an arrangement, the Company determines whether such an arrangement is or contains a lease. A specific asset is the subject of a lease if fulfilment of the arrangement is dependent on the use of that specified asset. An arrangement conveys the right to use the asset if the arrangement conveys to a lessee the right to control the use of the underlying asset.

At inception or upon reassessment of the arrangement, the Company separates payments and other consideration required by such an arrangement into those for the lease and those for other elements on the basis of their relative fair values. If the Company concludes, for a finance lease, that it is impracticable to separate the payments reliably, an asset and liability are recognized at an amount equal to the fair value of the underlying asset. Subsequently, the liability is reduced as payments are made and an imputed finance cost on the liability is recognized using the Company's incremental borrowing rate.

j. Impairment

i) Non-derivative financial assets

A financial asset not carried at fair value through earnings is assessed at each reporting date to determine whether it is impaired. A financial asset is impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset and that loss event has a negative impact on the estimated future cash flows of that asset that can be estimated reliably.

Objective evidence that financial assets are impaired can include default or delinquency by a debtor, restructuring of an amount due to the Company on terms that the Company would not consider otherwise, indications that a debtor or issuer will enter bankruptcy, adverse changes in the payment status of borrowers or issuers in the Company, economic conditions that correlate with defaults or the disappearance of an active market for a security or a significant or prolonged decline in the fair value below cost.

Trade receivables ("Receivables")

The Company considers evidence of impairment for Receivables at both a specific asset and collective level. All individually significant Receivables are assessed for specific impairment. All individually significant Receivables found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Receivables that are not individually significant are collectively assessed for impairment by grouping together Receivables with similar risk characteristics.

In assessing collective impairment, the Company uses historical trends of the probability of default, timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current economic and credit conditions are such that the actual losses are likely to be greater or less than suggested by historical trends.

An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the asset's original effective interest rate. Losses are recognized in earnings and reflected in an allowance account against Receivables. Interest on the impaired asset continues to be recognized through the unwinding of the discount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through earnings.

ii) Non-financial assets

The carrying amounts of the Company's non-financial assets, other than inventory, assets arising from employee benefits and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

For goodwill and intangible assets that have indefinite useful lives or that are not yet available for use, the recoverable amount is estimated annually in connection with the impairment test. An impairment loss is recognized if the carrying amount of an asset or its related CGU exceeds its estimated recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. For the purpose of goodwill impairment testing, CGUs are aggregated so that the level at which impairment testing is performed reflects the lowest level at which goodwill is monitored for internal purposes. Goodwill acquired in a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The Company's corporate assets do not generate separate cash inflows and are utilized by more than one CGU. Corporate assets are allocated to CGUs on a reasonable and consistent basis and tested for impairment as part of the testing of the CGU to which the corporate asset is allocated. If there is an indication that a corporate asset may be impaired, then the recoverable amount is determined for the CGU to which the corporate asset belongs.

Impairment losses are recognized in earnings. An impairment loss is recognized if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses recognized in respect of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to the CGU (group of CGUs), and then to reduce the carrying amounts of the other assets in the CGU (group of CGUs) on a pro rata basis.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Goodwill that forms part of the carrying amount of an equity-accounted investee is not recognized separately, and therefore is not tested for impairment separately. Instead, the entire amount of the investment is tested for impairment as a single asset when there is objective evidence that the equity-accounted investee may be impaired.

k. Employee benefits

i) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in earnings in the periods during which services are rendered by employees. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.

ii) Defined benefit pension plans

A defined benefit pension plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of Defined Benefit Pension Plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods, discounted to determine its present value, less the fair value of any plan assets. The discount rate used to determine the present value is established by referencing market yields on high-quality corporate bonds on the measurement date with cash flows that match the timing and amount of expected benefits.

The calculation is performed, at a minimum, every three years by a qualified actuary using the actuarial cost method. When the calculation results in a benefit to the Company, the recognized asset is limited to the present value of economic benefits available in the form of future expenses payable from the plan, any future refunds from the plan or reductions in future contributions to the plan. In order to calculate the present value of economic benefits, consideration is given to any minimum funding requirements that apply to any plan in the Company. An economic benefit is available to the Company if it is realizable during the life of the plan or on settlement of the plan liabilities.

When the benefits of a plan are improved, the portion of the increased benefit relating to past service by employees is recognized in earnings immediately.

The Company recognizes all actuarial gains and losses arising from defined benefit plans in other comprehensive income and expenses related to defined benefit plans in personnel expenses in earnings.

The Company recognizes gains or losses on the curtailment or settlement of a defined benefit plan when the curtailment or settlement occurs. The gain or loss on curtailment comprises any resulting change in the fair value of plan assets, change in the present value of defined benefit obligation and any related actuarial gains or losses and past service cost that had not previously been recognized.

iii) Short-term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

A liability is recognized for the amount expected to be paid under short-term cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

iv) Share-based payment transactions

For equity settled share-based payment plans, the fair value of the share-based payment at grant date is recognized as an expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognized as an expense is adjusted to reflect the number of awards for which the related service and non-market vesting conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the number of awards that meet the related service conditions at the vesting date.

For cash settled share-based payment plans, the fair value of the amount payable to employees is recognized as an expense with a corresponding increase in liabilities, over the period that the employees unconditionally

become entitled to payment. The liability is remeasured at each reporting date and at settlement date. Any changes in the fair value of the liability are recognized as an expense in earnings.

l. Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Provisions are remeasured at each reporting date based on the best estimate of the settlement amount. The unwinding of the discount rate is recognized as a finance cost.

i) Decommissioning obligation

The Company's activities give rise to dismantling, decommissioning and site disturbance remediation activities. A provision is made for the estimated cost of site restoration and capitalized in the relevant asset category.

Decommissioning obligations are measured at the present value, based on a risk-free rate, of management's best estimate of expenditure required to settle the obligation at the balance sheet date. Subsequent to the initial measurement, the obligation is adjusted at the end of each period to reflect the passage of time, changes in the risk-free rate and changes in the estimated future cash flows underlying the obligation. The increase in the provision due to the passage of time is recognized as finance costs whereas increases or decreases due to changes in the estimated future cash flows or risk-free rate are added to or deducted from the cost of the related asset.

m. Revenue

Revenue in the course of ordinary activities is measured at the fair value of the consideration received or receivable. Revenue is recognized when persuasive evidence exists that the significant risks and rewards of ownership have been transferred to the customer or the service has been provided, recovery of the consideration is probable, the associated costs can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably.

The timing of the transfer of significant risks and rewards varies depending on the individual terms of the sales or service agreement. For product sales, usually transfer of significant risks and rewards occurs when the product is delivered to a customer. For pipeline transportation revenues and storage revenue, transfer of significant risks and rewards usually occurs when the service is provided as per the contract with the customer. For rate or contractually regulated pipeline operations, revenue is recognized in a manner that is consistent with the underlying rate design as mandated by agreement or regulatory authority.

Certain commodity buy/sell arrangements where the risks and rewards of ownership have not transferred are recognized on a net basis in earnings.

n. Finance income and finance costs

Finance income comprises interest income on funds deposited and invested, gains on non-commodity-related derivatives measured at fair value through earnings and foreign exchange gains. Interest income is recognized as it accrues in earnings, using the effective interest rate method.

Finance costs comprise interest expense on loans and borrowings and convertible debentures, unwinding of discount rate on provisions, losses on disposal of available for sale financial assets, losses on non-commodity-related derivatives, impairment losses recognized on financial assets (other than trade and other receivables) and foreign exchange losses.

Borrowing costs that are not directly attributable to the acquisition or construction of a qualifying asset are recognized in earnings using the effective interest rate method.

o. Income tax

Income tax expense comprises current and deferred tax. Current and deferred taxes are recognized in earnings except to the extent that it relates to a business combination, or items are recognized directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for:

- temporary differences on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable earnings;
- temporary differences relating to investments in subsidiaries and joint arrangements to the extent that it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

In determining the amount of current and deferred tax, the Company takes into account income tax exposures and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Company to change its judgment regarding the adequacy of existing tax liabilities, such changes to tax liabilities will impact tax expense in the period that such a determination is made.

p. Earnings per common share

The Company presents basic and diluted earnings per common share ("EPS") data for its common shares. Basic EPS is calculated by dividing the earnings attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. To calculate earnings attributable to common shareholders, earnings are adjusted for accumulated preferred dividends. Diluted EPS is determined by adjusting the earnings attributable to common shareholders and the weighted average number of common shares outstanding, for the effects of all potentially dilutive common shares, which comprise convertible debentures and share options granted to employees ("Convertible Instruments"). Only outstanding and Convertible Instruments that will have a dilutive effect are included in fully diluted calculations.

The dilutive effect of Convertible Instruments is determined whereby outstanding Convertible Instruments at the end of the period are assumed to have been converted at the beginning of the period or at the time issued if issued during the year. Amounts charged to earnings relating to the outstanding Convertible Instruments are added back to earnings for the diluted calculations. The shares issued upon conversion are included in the denominator of per share basic calculations for the date of issue.

q. Segment reporting

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Company's other components. All operating segments' operating results are reviewed regularly by the Company's Chief Executive Officer ("CEO"), Chief Financial Officer ("CFO") and Senior Vice Presidents ("SVPs") to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available.

Segment results that are reported to the CEO, CFO and SVPs include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. Unallocated items comprise mainly corporate assets, corporate general and administrative expenses, finance income and costs, and income tax assets and liabilities.

Segment capital expenditure is the total cost incurred during the period to acquire property, plant and equipment, and intangible assets other than goodwill.

r. Cash flow statements

The cash flow statement is prepared using the indirect method for calculating cash flow from operating activities. Changes in balance sheet items that have not resulted in cash flows such as share-based compensation expense, unwinding of discount rates, unrealized gains and losses, depreciation and amortization, employee future benefit expenses, deferred income tax expense, share of profit from equity-accounted investees, among others, have been eliminated for the purpose of preparing this statement. Dividends paid to ordinary shareholders, among other expenditures, are included in financing activities. Interest paid is included in operating activities, with the exception of interest paid during construction, which is included in investing activities.

s. New standards and interpretations not yet adopted

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC and are effective for accounting periods beginning after January 1, 2017. These standards have not been applied in preparing these Financial Statements. Those which may be relevant to Pembina are described below:

IFRS 9 Financial Instruments (2014)

IFRS 9 *Financial Instruments* (2014) has a mandatory effective date of January 1, 2018 and is available for early adoption. The new standard introduces new requirements for the classification and measurement of financial assets, amends the impairment model, and includes a new general hedge accounting standard which aligns hedge accounting more closely with risk management.

The Company intends to adopt IFRS 9 Financial Instruments (2014) effective January 1, 2017. The Company does not expect the standard to have a material impact on the financial statements.

IFRS 15 *Revenue from Contracts with Customers*

In May 2014 the International Accounting Standards Board issued IFRS *15 Revenue from contracts with customers*, which supersedes existing revenue guidance, effective for periods beginning on or after January 1, 2018. IFRS 15 contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model outlines a five step analysis to assess contracts which involves identifying the contract, identifying the performance obligations, determining the transaction price, allocating the transaction price to the performance obligations and recognizing revenue when or as the entity satisfies a performance obligation. Detailed guidance is also provided on a number of areas for which there was no previous guidance, including contract costs and contract modifications. In April 2016 the IASB issued Clarifications to IFRS 15, Revenue from Contracts with Customers, which is effective at the same time as IFRS 15, and provides additional guidance on the five step analysis and transition.

The Company intends to adopt IFRS 15 and the clarifications on the January 1, 2018 effective date. The Company has completed a detailed implementation plan, identified revenue streams and major contracts types. The Company is in the process of evaluating the impact that the standard will have on its financial statements and disclosure, however, the extent of the impact has not yet been determined. The Company expects to report more detailed information on the impact of the new standard as it is determined.

IFRS 16 Leases

IFRS 16 *Leases* is effective for annual periods beginning on or after January 1, 2019. The new standard results in substantially all lessee leases being recorded on the statement of financial position.

The Company intends to adopt IFRS 16 for the annual period beginning on January 1, 2019. The Company is currently evaluating the impact that the standard will have on its results of operations and financial position.

5. DETERMINATION OF FAIR VALUES

A number of the Company's accounting policies and disclosures require the determination of fair value, for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

i) Property, plant and equipment

The fair value of property, plant and equipment recognized as a result of a business combination or transferred from a customer is based on market values when available and depreciated replacement cost when appropriate.

Depreciated replacement cost reflects adjustments for physical deterioration as well as functional and economic obsolescence.

ii) Intangible assets

The fair value of intangible assets acquired in a business combination is determined using the multi-period excess earnings method, whereby the subject asset is valued after deducting a fair return on all other assets that are part of creating the related cash flows.

The fair value of other intangible assets is based on the discounted cash flows expected to be derived from the use and eventual sale of the assets.

iii) Derivatives

Fair value of derivatives are estimated by reference to independent monthly forward prices, interest rate yield curves, currency rates and quoted market prices per share at the period ends.

Fair values reflect the credit risk of the instrument and include adjustments to take account of the credit risk of the company, entity and counterparty when appropriate.

iv) Non-derivative financial assets and liabilities

Fair value, which is determined for disclosure purposes, is calculated based on the present value of future principal and interest cash flows, discounted at the market rate of interest at the reporting date. In respect of the convertible debentures, the fair value is determined by the market price of the convertible debenture on the reporting date. For finance leases, the market rate of interest is determined by reference to similar lease agreements.

v) Share-based compensation transactions

The fair value of employee share options is measured using the Black-Scholes formula on grant date. Measurement inputs include share price on measurement date, exercise price of the instrument, expected volatility (based on weighted average historic volatility adjusted for changes expected due to publicly available information), weighted average expected life of the instruments (based on historical experience and general option holder behaviour), expected dividends, expected forfeitures and the risk-free interest rate (based on government bonds). Service and non-market performance conditions attached to the transactions are not taken into account in determining fair value.

The fair value of the long-term share unit award incentive plan and associated distribution units are measured based on the volume-weighted average price for 20 days ending at the reporting date of the Company's shares.

vi) Finance lease assets

The fair value of finance lease assets is based on market values at the inception date.

6. ACQUISITION

On April 20, 2016, the acquisition date, Pembina acquired certain sour natural gas processing assets with 250 million cubic feet per day ("MMcf/d") of processing capacity for cash consideration of $566 million (the "Acquisition"). The acquired assets include the recently constructed Kakwa River sweet and sour natural gas processing complex and associated infrastructure including gas gathering pipelines (99 percent working interest), sales gas pipeline and future disposal wells; and preliminary engineering studies, licenses and surface rights for the future construction of a sweet and sour natural gas processing facility (the "Kakwa River Facility"). The Kakwa River

Facility is underpinned by a 20-year, take-or-pay agreement. The purchase price was funded by net proceeds from Pembina's concurrently announced $345 million bought deal common share offering (refer to Note 16) and existing capacity under Pembina's revolving credit facility.

The following table summarizes the recognized amounts, at fair value, of assets acquired and liabilities assumed at the date of acquisition.

($ millions)	
Prepaid expenses	1
Property, plant and equipment	522
Intangible assets	49
Decommissioning provision	(1)
Deferred tax liabilities	(5)
	566

The fair value of property, plant and equipment was determined using the depreciated replacement cost method and the fair value of the definite-life intangible assets was determined using the income and multi-period excess earnings method. If new information obtained within one year of the date of acquisition about facts and circumstances that existed at the date of acquisition identifies adjustments to the above amounts, or any additional provisions that existed at the date of acquisition, then the accounting for the acquisition will be further revised.

The Company has recognized $1 million in acquisition-related expenses. These expenses are included in Other expense in the Financial Statements. All acquisition-related expenses have been expensed as incurred.

Revenue generated by the acquired business for the period from the acquisition date of April 20, 2016 to December 31, 2016 was $48 million. Gross profit for the same period was $23 million. If the acquisition had occurred on January 1, 2016, management estimates that consolidated revenue would have increased an additional $20 million, and consolidated gross profit for the year would have increased an additional $9 million. In determining these amounts, management has assumed that the fair value adjustments that arose on the date of acquisition would have been the same if the acquisition had occurred on January 1, 2016. In addition, no corporate allocations of general and administrative expenses have been considered as these are assumed to be insignificant.

7. TRADE RECEIVABLES AND OTHER

December 31 *($ millions)*	**2016**	2015
Trade accounts receivable from customers	**162**	112
Other accounts receivable	**274**	348

Property, plant and equipment under construction

Costs of assets under construction at December 31, 2016 totaled $1,965 million (2015: $1,721 million) including capitalized borrowing costs.

For the year ended December 31, 2016, included in additions and transfers are capitalized borrowing costs related to the construction of new pipelines or facilities amounting to $75 million (2015: $71 million), with capitalization rates ranging from 4.29 percent to 4.59 percent (2015: 4.38 percent to 4.67 percent).

Depreciation

Pipeline assets are depreciated using the straight line method over one to 75 years (an average of 48 years). Facilities and equipment are depreciated using the straight line method over one to 75 years (at an average rate of 41 years). Other assets are depreciated using the straight line method over one to 40 years (an average of 35 years) or declining balance method at rates ranging from six percent to 21 percent (at an average rate of eight percent per annum). These rates are established to depreciate remaining net book value over the shorter of their useful lives, or economic lives.

Commitments

At December 31, 2016, the Company had contractual construction commitments for property, plant and equipment of $2,196 million (December 31, 2015: $1,878 million), excluding significant projects awaiting regulatory approval.

9. INTANGIBLE ASSETS AND GOODWILL

		Intangible Assets

Intangible assets with finite useful life are amortized using the straight line method over 2 to 60 years (at an average of 15 years) or declining balance method at 24 percent per annum. The purchase option attributable to the Midstream operating segment of $277 million to acquire property, plant and equipment is not being amortized because it is not exercisable until 2018.

The aggregate carrying amount of intangible assets and goodwill allocated to each operating segment is as follows:

December 31 *($ millions)*		**2016**			2015	
	Goodwill	**Intangible Assets**	**Total**	**Goodwill**	**Intangible Assets**	**Total**

	2,097	**737**	**2,834**	2,097	725	2,822

Goodwill Impairment Testing

For the purpose of impairment testing, goodwill is allocated to the Company's operating segments which represents the lowest level within the Company at which the goodwill is monitored for management purposes. During the fourth quarter, impairment testing for goodwill was performed as at September 30, 2016. The recoverable amounts were based on their value in use and were determined to be higher than their carrying amounts.

The recoverable amount was determined using the value-in-use model by discounting the future cash flows generated from the continuing use of each operating segment. The calculation of the value in use is based on the following key assumptions:

- Cash flows are projected based on past experience, actual operating results and four years (2015: four years) of the business plan approved by management.
- Long-term growth: cash flows for periods up to 75 years (2015: 75 years) were extrapolated using a constant medium-term inflation, except where contracted, long-term cash flows indicated that no inflation should be applied or specific reduction in cash flows was more appropriate.
- Pre-tax discount rates were applied in determining the recoverable amount of operating segments. Discount rates were estimated based on past experience, the risk free rate and average cost of debt, targeted debt to equity ratio, in addition to estimates of the specific operating segment's equity risk premium, size premium, small capitalization premium, projection risk, betas and tax rate.

The following summarizes the key assumptions used in the impairment test:

	Operating Segments			
2016 *(percent)*	Conventional Pipelines	Oil Sands & Heavy Oil	Gas Services	Midstream
Pre-tax discount rate	6.42	6.69	6.07	6.41
Adjusted inflation rate	1.48	0.85	1.23	1.80
Change that would result in carrying value equal to recoverable amount				
Increase in pre-tax discount rate	7.85	3.66	3.86	4.31

10. INVESTMENTS IN EQUITY ACCOUNTED INVESTEES

The Company has a 50 percent interest in two joint ventures (Fort Saskatchewan Ethylene Storage Corporation and Fort Saskatchewan Ethylene Storage Limited Partnership) that are reported using the equity method of accounting. The carrying value of the investments at December 31, 2016 is $134 million (2015: $145 million).

At December 31, 2016, the Company had no contractual commitments for additional investment in its equity accounted investees (December 31, 2015: nil).

11. INCOME TAXES

The movements of the components of the deferred tax assets and deferred tax liabilities are as follows:

The Company has temporary differences associated with its investments in foreign subsidiaries and interests in joint arrangements. At December 31, 2016, the Company has not recorded a deferred tax asset or liability for these temporary differences (December 31, 2015: nil) as the Company controls the timing of the reversal and it is not probable that the temporary differences will reverse in the foreseeable future.

At December 31, 2016, the Company had US$68 million (December 31, 2015: US$54 million) of U.S. tax losses that will expire after 2030, and $205 million (December 31, 2015: $125 million) of Canadian tax losses that will expire after 2034. The Company has recorded deferred tax assets in respect of these losses as it has been determined that it is probable that future taxable profits will be sufficient to utilize these losses. Deferred tax assets in respect of the US tax losses were $31 million at December 31, 2016 (December 31, 2015: $28 million).

(1) The nominal interest rate is based on the Company's credit rating at December 31, 2016.

(2) Bankers' Acceptance.

(3) Operating facility expected to be renewed on an annual basis.

Subsequent to year end, Pembina closed an offering of $300 million of senior unsecured Series 8 medium-term notes (the "Series 8 Notes") on January 20, 2017. The Series 8 Notes have a fixed coupon of 2.99 percent per annum, paid semi-annually, and mature on January 22, 2024. Simultaneously, Pembina closed an offering of $300 million of senior unsecured Series 9 medium-term notes (the "Series 9 Notes"). The Series 9 Notes have a fixed coupon of 4.74 percent per annum, paid semi-annually, and mature on January 21, 2047.

On August 11, 2016 Pembina closed an offering of $500 million of senior unsecured series 7 medium-term notes (the "Series 7 Notes"). The Series 7 Notes have a fixed coupon of 3.71 percent per annum, paid semi-annually, and mature on August 11, 2026.

On June 16, 2015, Pembina issued $600 million of senior unsecured medium-term notes conducted in two tranches consisting of $500 million in senior unsecured medium-term notes, Series 6, having a fixed coupon of 4.24 percent per annum, paid semi-annually, and maturing on June 15, 2027, and $100 million through the re-opening of its 4.75 percent medium-term notes, Series 3, maturing on April 30, 2043.

On April 16, 2015, Pembina increased the available funds under its unsecured revolving credit facility to $2 billion and retained a $750 million accordion feature. The unsecured revolving credit facility maturity date was extended

to May 2020 from March 2019 and the $30 million operating facility maturity date was extended to May 2016 from July 2015.

On February 2, 2015, Pembina issued $600 million of senior unsecured medium-term notes conducted in two tranches consisting of $450 million in senior unsecured medium-term notes, Series 5, having a fixed coupon of 3.54 percent per annum, paid semi-annually, and maturing on February 3, 2025, and $150 million through the re-opening of its 4.75 percent medium-term notes, Series 3, maturing on April 30, 2043.

All facilities are governed by specific debt covenants which Pembina was in compliance with at December 31, 2016 (December 31, 2015: in compliance).

For more information about the Company's exposure to interest rate, foreign currency and liquidity risk, see financial instruments and financial risk management Note 24.

14. CONVERTIBLE DEBENTURES

On October 13, 2015, Pembina redeemed its Series C debentures and its Series E debentures. In each case, Pembina elected to satisfy the redemption of the debentures through the issuance of common shares.

The Series F debentures may be converted at the option of the holder at a conversion price of $29.53 per common share at any time prior to maturity and may be redeemed by the Company. On or after December 31, 2016, the Series F debentures may be redeemed in whole or in part at the option of the Company at a price equal to their principal amount plus accrued and unpaid interest. Any accrued unpaid interest will be paid in cash.

The Company retains a cash conversion option on the Series F convertible debentures, allowing the Company to pay cash to the converting holder of the debentures, at the option of the Company. The cash conversion feature is recognized as an embedded derivative and accounted for as a derivative financial instrument, measured at fair value using an option pricing model.

15. DECOMMISSIONING PROVISION

($ millions)	**2016**	2015
Balance at January 1	462	410
Unwinding of discount rate	10	10
Change in rates	(73)	28
Additions	55	42
Change in estimates and other	42	(28)
Total	**496**	462
Less current portion (included in accrued liabilities)	**(8)**	(12)
Balance at December 31	**488**	450

The Company applied a 1.8 percent inflation rate per annum (December 31, 2015: 2.0 percent) and a risk-free rate of 2.3 percent (December 31, 2015: 2.2 percent) to calculate the present value of the decommissioning provision. Changes in the measurement of the decommissioning provision were added to, or deducted from, the cost of the related asset in property, plant and equipment. When a re-measurement reduction of the decommissioning provision is in excess of the carrying amount of the related asset, the amount is credited to depreciation expense. No re-measurements were credited to depreciation expense for the year ended December 31, 2016 (December 31, 2015: $1 million).

16. SHARE CAPITAL

Pembina is authorized to issue an unlimited number of common shares, a number of a class of Class A Preferred Shares, issuable in series, not to exceed twenty percent of the number of issued and outstanding Common Shares at the time of issuance of any Class A Preferred Shares and an unlimited number of Class B Preferred Shares. The holders of the common shares are entitled to receive notice of, attend and vote at any meeting of the shareholders of the Company, receive dividends declared and share in the remaining property of the Company upon distribution of the assets of the Company among its shareholders for the purpose of winding-up its affairs.

Pembina has adopted a shareholder rights plan ("Plan") as a mechanism designed to assist the board in ensuring the fair and equal treatment of all shareholders in the face of an actual or contemplated unsolicited bid to take control of the Company. Take-over bids may be structured in such a way as to be coercive or discriminatory in effect, or may be initiated at a time when it will be difficult for the board to prepare an adequate response. Such offers may result in shareholders receiving unequal or unfair treatment, or not realizing the full or maximum value of their investment in Pembina. The Plan discourages the making of any such offers by creating the potential of significant dilution to any offeror who does so. The Plan was reconfirmed at Pembina's 2016 meeting of shareholders and must be reconfirmed at every third annual meeting thereafter. Accordingly, the Plan, with such amendments as the Board of Directors determines to be necessary or advisable, and as may otherwise be required by law, is expected to be placed before shareholders for approval at Pembina's 2019 annual meeting. A copy of the agreement relating to the current Plan has been filed on Pembina's SEDAR and EDGAR profiles.

On April 27, 2016, Pembina issued 10 million cumulative redeemable minimum rate reset class A Series 13 Preferred Shares for aggregate gross proceeds of $250 million. The holders of Series 13 Preferred Shares are entitled to receive fixed cumulative dividends at an annual rate of $1.4375 per share, if, as and when declared by the Board of Directors. The dividend rate will reset on June 1, 2021 and every fifth year thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield plus 4.96 percent, provided that, in any event, such rate shall not be less than 5.75 percent. The Series 13 Preferred Shares are redeemable by the Company at its option on June 1, 2021 every fifth year thereafter at a price of $25.00 per share plus accrued and unpaid dividends.

Holders of the Series 13 Preferred Shares have the right to convert their shares into cumulative redeemable floating rate Class A Preferred Shares, Series 14 ("Series 14 Preferred Shares"), subject to certain conditions, on June 1, 2021 and every fifth year thereafter. Holders of Series 14 Preferred Shares will be entitled to receive a cumulative quarterly floating dividend at a rate equal to the sum of the then 90-day government of Canada bond yield plus 4.96 percent, if, as and when declared by the Board of Directors.

On January 15, 2016, Pembina issued 6.8 million cumulative redeemable minimum rate reset class A Series 11 Preferred Shares for aggregate gross proceeds of $170 million. The holders of Series 11 Preferred Shares are entitled to receive fixed cumulative dividends at an annual rate of $1.4375 per share, if, as and when declared by the Board of Directors. The dividend rate will reset on March 1, 2021 and every five years thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield plus 5.00 percent, provided that, in any event, such rate shall not be less than 5.75 percent. The Series 11 Preferred Shares are redeemable by the Company at its option on March 1, 2021 and every fifth year thereafter at a price of $25.00 per share plus accrued and unpaid dividends.

Holders of the Series 11 Preferred Shares have the right to convert their shares into cumulative redeemable floating rate Class A Preferred Shares, Series 12 ("Series 12 Preferred Shares"), subject to certain conditions, on March 1, 2021 and every fifth year thereafter. Holders of Series 12 Preferred Shares will be entitled to receive a cumulative quarterly floating dividend at a rate equal to the sum of the then 90-day government of Canada bond yield plus 5.00 percent, if, as and when declared by the Board of Directors.

On April 10, 2015 Pembina issued 9 million cumulative redeemable rate reset class A preferred shares, Series 9 ("Series 9 Preferred Shares") for aggregate gross proceeds of $225 million. The holders of Series 9 Preferred Shares are entitled to receive fixed cumulative dividends at an annual rate of $1.1875 per share, if, as and when declared by the Board of Directors. The dividend rate will reset on December 1, 2020 and every five years thereafter at a rate equal to the sum of the then five-year Government of Canada bond yield plus 3.91 percent. The Series 9 Preferred Shares are redeemable by the Company at its option on December 1, 2020 and on December 1 of every fifth year thereafter.

Holders of the Series 9 Preferred Shares have the right to convert their shares into cumulative redeemable floating rate Class A Preferred shares, Series 10 ("Series 10 Preferred Shares"), subject to certain conditions, on December 1, 2020 and on December 1 of every fifth year thereafter. Holders of Series 10 Preferred Shares will be entitled to receive a cumulative quarterly floating dividend at a rate equal to the sum of the then 90-day Government of Canada Treasury Bill yield plus 3.91 percent, if, as and when declared by the Board of Directors of Pembina.

Dividends

The following dividends were declared by the Company:

Year Ended December 31 *($ millions)*	**2016**	2015

$0.859575 per qualifying Series 13 preferred share (2015: nil)	**9**	
	69	48

On March 1, Pembina announced an increase in the monthly dividend by 4.9 percent from $0.1525 per common share per month (or $1.83 annually) to $0.16 per common share per month (or $1.92 annually), effective for the dividend paid on May 13, 2016.

On January 5, 2017, Pembina announced that the Board of Directors declared a dividend of $0.16 per qualifying common share ($1.92 annually) in the total amount of $64 million, payable on February 15, 2017 to shareholders of record on January 25, 2017. Pembina's Board of Directors also declared quarterly dividends for the Company's preferred shares, Series 1, 3, 5, 7, 9, 11 and 13. All preferred share dividends, in the total amount of $19 million are payable on March 1, 2017 to shareholders of record on February 1, 2017.

Series	Dividend Amount
Series 1	$ 0.265625
Series 3	$ 0.293750
Series 5	$ 0.312500
Series 7	$ 0.281250
Series 9	$ 0.296875
Series 11	$ 0.359375
Series 13	$ 0.359375

On February 7, 2017, Pembina announced that the Board of Directors declared a dividend for February of $0.16 per qualifying common share ($1.92 annualized) payable on March 15, 2017 to shareholders of record on February 25, 2017.

DRIP

Eligible Pembina shareholders have the opportunity to receive, by reinvesting the cash dividends declared payable by Pembina on their common shares, either (i) additional common shares at a discounted subscription price of 97 percent of the Average Market Price (as defined in the DRIP), pursuant to the "Dividend Reinvestment Component" of the DRIP, or (ii) a premium cash payment equal to 101 percent of the amount of reinvested dividends (the "Premium Dividend™"), pursuant to the "Premium Dividend™ Component" of the DRIP.

Participation in the DRIP for the fourth quarter and twelve months of 2016 was 58 percent and 61 percent (2015 – 61 percent and 60 percent) of common shares outstanding. Proceeds for the fourth quarter of 2016 were $110 million and $449 million during the full year compared to $99 million and $373 million for the same periods of 2015.

17. DEFERRED REVENUE

Deferred revenue consists of asset purchases that occurred at a nominal value in exchange for future toll reductions which is amortized to revenue over the life of the asset. Deferred revenue also includes other payments received from customers or lessors related to capital expenditures or lease inducements which are amortized over the lease or contract terms.

18. PERSONNEL EXPENSES

Year Ended December 31 *($ millions)*	**2016**	2015

Health, savings plan and other benefits	**18**	16
	299	254

19. NET FINANCE COSTS

Year Ended December 31 *($ millions)*	**2016**	2015
Interest expense on financial liabilities measured at amortized cost:		
Loans and borrowings	**91**	71
Convertible debentures	**11**	32
Unwinding of discount rate	**10**	10
Gain in fair value of non-commodity-related derivative financial instruments	**(3)**	(1)
Loss (gain) on revaluation of conversion feature of convertible debentures	**40**	(40)
Foreign exchange losses (gains) and other	**4**	(1)
Net finance costs	**153**	71

Net interest paid of $163 million (2015: $147 million) includes interest paid during construction of $72 million (2015: $68 million).

20. OPERATING SEGMENTS

The Company determines its reportable segments based on the nature of operations and includes four operating segments: Conventional Pipelines, Oil Sands & Heavy Oil, Gas Services and Midstream.

Conventional Pipelines consists of the tariff-based operations of pipelines and related facilities to deliver crude oil, condensate and NGL in Alberta, British Columbia, Saskatchewan, and North Dakota, United States.

Oil Sands & Heavy Oil consists of the Syncrude, Horizon, Nipisi and Mitsue Pipelines, and the Cheecham Lateral. These pipelines and related facilities deliver synthetic crude oil produced from oil sands under long-term cost-of-service arrangements.

Gas Services consists of natural gas gathering and processing facilities, including nine shallow and deep cut sweet gas processing plants and gathering systems.

Midstream consists of the Company's interests in extraction and fractionation facilities, terminalling and storage hub services under a mixture of short, medium and long-term contractual arrangements.

The financial results of the business segments are included below. Performance is measured based on results from operating activities, net of depreciation and amortization, as included in the internal management reports that are reviewed by the Company's Chief Executive Officer, Chief Financial Officer and Senior Vice Presidents. These results are used to measure performance as management believes that such information is the most relevant in evaluating results of certain segments relative to other entities that operate within these industries. Intersegment transactions are recorded at market value and eliminated under corporate and intersegment eliminations.

12 Months Ended December 31, 2016 *($ millions)*	**Conventional Pipelines[1][2]**	**Oil Sands & Heavy Oil**	**Gas Services**	**Midstream[3][4]**	**Corporate & Intersegment Eliminations**	**Total**

[1] Eight percent of Conventional Pipelines revenue is under regulated tolling arrangements.
[2] Conventional Pipelines revenue includes $9 million associated with U.S. pipeline sales.
[3] NGL product and services, terminalling, storage and hub services revenue includes $122 million associated with U.S. midstream sales.
[4] Includes inventory write-down to net realizable value of $12 million recognized in 2015.
[5] Includes amortization of intangible assets.
[6] Pembina aggregates its NGL and crude oil midstream activities based on shared economic risk characteristics.
[7] In 2015, one customer accounted for 10 percent of total revenue (2014: no customers).

21. EARNINGS PER COMMON SHARE

Basic earnings per common share

The calculation of basic earnings per common share at December 31, 2016 was based on the earnings attributable to common shareholders of $394 million (2015: $355 million) and a weighted average number of common shares outstanding of 388 million (2015: 347 million).

Diluted earnings per common share

The calculation of diluted earnings per common share at December 31, 2016 was based on earnings attributable to common shareholders of $394 million (December 31, 2015: $355 million), and weighted average number of

common shares outstanding after adjustment for the effects of all dilutive potential common shares of 389 million (2015: 348 million).

Earnings attributable to common shareholders

Year Ended December 31 *($ millions)*	**2016**	2015
Earnings	**466**	406
Dividends on preferred shares	**(69)**	(48)
Cumulative dividends on preferred shares, not yet declared	**(3)**	(3)
Earnings attributable to common shareholders (basic and diluted)	**394**	355

Weighted average number of common shares

(In millions of shares, except as noted)	**2016**	2015
Issued common shares at January 1	**373**	338
Effect of shares issued	**8**	2
Effect of conversion of convertible debentures		2
Effect of shares issued under dividend reinvestment plan	**7**	5
Weighted average number of common shares at December 31 (basic)	**388**	347
Dilutive effect of share options on issue	**1**	1
Weighted average number of common shares at December 31 (diluted)	**389**	348
Basic earnings per common share (dollars)	**1.02**	1.02
Diluted earnings per common share (dollars)	**1.01**	1.02

At December 31, 2016, the effect of the conversion of the convertible debentures was excluded from the diluted earnings per common share calculation as the impact was anti-dilutive. If the convertible debentures were included, an additional 5 million (2015: 12 million) common shares would be added to the weighted average number of common shares and $8 million (2015: $24 million) would be added to earnings, representing after-tax interest expense of the convertible debentures.

The average market value of the Company's shares for purposes of calculating the dilutive effect of share options was based on quoted market prices for the period during which the options were outstanding.

22. PENSION PLAN

December 31 *($ millions)*	**2016**	2015
Registered defined benefit net obligation	**16**	14
Supplemental defined benefit net obligation	**10**	8
Other accrued benefit obligations	**1**	1
Net employee benefit obligations	**27**	23

The Company maintains a defined contribution plan and non-contributory defined benefit pension plans covering its employees. The Company contributes five to ten percent of an employee's earnings to the defined contribution plan until the employee's age plus years of service equals 50, at which time they become eligible for the defined benefit plans. The Company recognized $6 million in expense for the defined contribution plan during the year (2015 $5 million). The defined benefit plans include a funded registered plan for all employees and an unfunded supplemental retirement plan for those employees affected by the Canada Revenue Agency maximum pension

limits. The defined benefit plans are administered by a single pension fund that is legally separated from the Company. Benefits under the plans are based on the length of service and the annual average best three years of earnings during the last ten years of service of the employee. Benefits paid out of the plans are not indexed. The Company measures its accrued benefit obligations and the fair value of plan assets for accounting purposes as at December 31 of each year. The most recent actuarial valuation was at December 31, 2015. The defined benefit plans expose the Company to actuarial risks such as longevity risk, interest rate risk, and market (investment) risk.

Defined benefit obligations

December 31	**2016**		2015	
($ millions)	**Registered Plan**	**Supplemental Plan**	Registered Plan	Supplemental Plan
Present value of unfunded obligations		**10**		8
Present value of funded obligations	**180**		160	
Total present value of obligations	**180**	**10**	160	8
Fair value of plan assets	**164**		146	
Recognized liability for defined benefit obligations	**(16)**	**(10)**	(14)	(8)

The Company funds the defined benefit obligation plans in accordance with government regulations by contributing to trust funds administered by an independent trustee. The funds are invested primarily in equities and bonds. Defined benefit plan contributions totalled $15 million for the year ended December 31, 2016 (2015: $9 million).

The Company has determined that, in accordance with the terms and conditions of the defined benefit plans, and in accordance with statutory requirements of the plans, the present value of refunds or reductions in future contributions is not lower than the balance of the total fair value of the plan assets less the total present value of obligations. As such, no decrease in the defined benefit asset is necessary at December 31, 2016 (December 31, 2015: nil).

Registered defined benefit pension plan assets comprise

December 31 *(percentages)*	**2016**	2015
Equity securities	**61**	58
Debt	**38**	41
Other	**1**	1
	100	100

Movement in the present value of the defined benefit pension obligation

	2016		2015	
($ millions)	**Registered Plan**	**Supplemental Plan**	Registered Plan	Supplemental Plan
Defined benefits obligations at January 1	**160**	**8**	149	8
Benefits paid by the plan	**(8)**		(5)	
Current service costs	**11**		11	
Interest expense	**6**		6	
Actuarial losses (gains) in other comprehensive income	**11**	2	(1)	
Defined benefit obligations at December 31	**180**	**10**	160	8

Movement in the present value of registered defined benefit pension plan assets

($ millions)	**2016**	2015
Fair value of plan assets at January 1	**146**	138
Contributions paid into the plan	**15**	9
Benefits paid by the plan	**(8)**	(5)
Return (loss) on plan assets	**5**	(1)
Interest income	**6**	5
Fair value of registered plan assets at December 31	**164**	146

Expense recognition in earnings

Registered Plan		
Year Ended December 31 *($ millions)*	**2016**	2015
Current service costs	**11**	11
Interest on obligation	**6**	6
Expected return on plan assets	**(6)**	(6)
	11	11

The expense is recognized in the following line items in the statement of comprehensive income:

Year Ended December 31 *($ millions)*	**2016**	2015
Registered Plan		
Operating expenses	**5**	5
General and administrative expense	**6**	6
	11	11

Expense recognized for the Supplemental Plan was less than one million for each of the years ended December 31, 2016 and 2015.

Actuarial gains and losses recognized in other comprehensive income

	2016			2015		
($ millions)	**Registered Plan**	**Supplemental Plan**	**Total**	Registered Plan	Supplemental Plan	Total
Balance at January 1	**(20)**	**(1)**	**(21)**	(21)	(1)	(22)
Remeasurements gain:						
Actuarial gain (loss) arising from						
Demographic assumptions	**(1)**		**(1)**	(1)		(1)
Financial assumptions	**(5)**		**(5)**	2		2
Experience adjustments	**(3)**		**(3)**	1		1
Return (loss) on plan assets excluding	**4**		**4**	(1)		(1)
Recognized during the period after tax	**(5)**		**(5)**	1		1
Balance at December 31	**(25)**	**(1)**	**(26)**	(20)	(1)	(21)

Principal actuarial assumptions used:

December 31 *(weighted average percent)*	**2016**	2015
Discount rate	**3.9**	4.1
Future pension earning increases	**4.0**	4.0

Assumptions regarding future mortality are based on published statistics and mortality tables. The current longevities underlying the values of the liabilities in the defined plans are as follows:

December 31 *(years)*	**2016**	2015
Longevity at age 65 for current pensioners		
Males	**21.6**	21.5
Females	**24.0**	24.0
Longevity at age 65 for current member aged 45		
Males	**22.7**	22.6
Females	**25.0**	25.0

The calculation of the defined benefit obligation is sensitive to the discount rate, compensation increases, retirements and termination rates as set out above. An increase or decrease of the estimated discount rate of 3.9 percent by 100 basis points at December 31, 2016 is considered reasonably possible in the next financial year but would not have a material impact on the obligation.

The Company expects to contribute $14 million to the defined benefit plans in 2017.

23. SHARE-BASED PAYMENTS

At December 31, 2016, the Company has the following share-based payment arrangements:

Share option plan (equity settled)

The Company has a share option plan under which employees are eligible to receive options to purchase shares in the Company.

Long-term share unit award incentive plan (cash-settled)

In 2005, the Company established a long-term share unit award incentive plan. Under the share-based compensation plan, awards of restricted (RSU) and performance (PSU) share units are made to officers, non-officers and directors. The plan results in participants receiving cash compensation based on the value of the underlying notional shares granted under the plan. Payments are based on a trading value of the Company's common shares plus notional dividends and performance of the Company.

In 2015, the Company also established a deferred share units (DSU) plan. Under the DSU plan, directors are required to take at least forty percent of total director compensation, excluding meeting fees, as DSUs. A DSU is a notional share that has the same value as one Pembina common share. Its value changes with our share price. DSUs do not have voting rights but they accrue dividends as additional DSUs, at the same rate as dividends paid on our common shares. DSUs are paid out when a director retires from the board and are redeemed for cash using the weighted average of trading price of common shares on the TSX for the last five trading days before the redemption date, multiplied by the number of DSUs the director holds.

Terms and conditions of share option plan and share unit award incentive plan

The terms and conditions relating to the grants of the share option program and the long-term share unit award incentive plans are listed in the tables below:

Grant date share options granted to employees *(thousands of options, except as noted)*	Number of options	Contractual life of options
March 9, 2015	777	7 years
July 2, 2015	127	7 years
October 5, 2015	50	7 years
December 21, 2015	6	7 years
March 8, 2016	2,613	7 years
March 30, 2016	227	7 years
July 4, 2016	88	7 years
August 16, 2016	1,268	7 years
October 3, 2016	62	7 years
November 15, 2016	1,240	7 years

One-third vest on the first anniversary of the grant date, one-third vest on the second anniversary of the grant date and one-third vest on the third anniversary of the grant date.

Long-term share unit award incentive plan[1]

Grant date RSUs, PSUs and DSUs to Officers, Non-Officers[2] and Directors *(thousands of units, except as noted)*	PSUs [3]	RSUs [3]	DSUs	Total
January 1, 2015	252	243	27	522
January 1, 2016	365	372	49	786

PSUs vest on the third anniversary of the grant date. RSUs vest one-third on the first anniversary of the grant date, one-third on the second anniversary of the grant date and one-third on the third anniversary of the grant date. Actual units awarded based on the trading value of the shares and performance of the Company.

(1) Distribution Units are granted in addition to RSU and PSU grants based on notional accrued dividends from RSU and PSU granted but not paid.

(2) Non-Officers defined as senior selected positions within the Company.

(3) Contractual life of 3 years.

Disclosure of share option plan

The number and weighted average exercise prices of share options as follows:

(thousands of options, except as noted)	Number of Options	Weighted Average Exercise Price (dollars)
Outstanding at December 31, 2014	9,760	$40.60
Granted	960	$40.67
Exercised	(331)	$25.50
Forfeited	(383)	$44.12
Outstanding at December 31, 2015	10,006	$40.98
Granted	5,498	$36.41
Exercised	(577)	$28.20
Forfeited	(509)	$41.25
Expired	(108)	$46.83
Outstanding as at December 31, 2016	14,310	$39.68

As of December 31, 2016, the following options are outstanding:

(thousands of options, except as noted) Exercise Price *(dollars)*	Number outstanding at December 31, 2016	Options Exercisable	Weighted average remaining life
$14.84 – $19.99	170	170	0.67
$20.00 – 29.99	1,052	1,049	2.24
$30.00 – $39.99	6,865	1,367	5.82
$40.00 – $52.01	6,223	3,883	4.82
Total	14,310	6,469	5.06

The weighted average share price at the date of exercise for share options exercised in the year ended December 31, 2016 was $39.27 (December 31, 2015: $37.58).

Expected volatility is estimated by considering historic average share price volatility. The weighted average inputs used in the measurement of the fair values at grant date of share options are the following:

Share options granted

Year Ended December 31 *(dollars, except as noted)*	**2016**	2015
Weighted average		
Fair value at grant date	**3.71**	3.28
Share price at grant date	**36.47**	39.62
Exercise price	**36.41**	40.67
Expected volatility *(percent)*	**25.1**	21.4
Expected option life *(years)*	**3.67**	3.67
Expected annual dividends per option	**1.90**	1.83
Expected forfeitures *(percent)*	**6.7**	7.3
Risk-free interest rate (based on government bonds)*(percent)*	**0.7**	0.7

Disclosure of long-term share unit award incentive plan

The long-term share unit award incentive plans was valued using the volume weighted average price for 20 days ending December 31, 2016 of $41.18 (December 31, 2015: $29.71). Actual payment may differ from amount valued based on market price and company performance.

Employee expenses

Year Ended December 31 *($ millions)*	**2016**	2015
Share option plan, equity settled	**15**	16
Long-term share unit award incentive plan	**31**	9
Share-based compensation expense	**46**	25
Total carrying amount of liabilities for cash settled arrangements	**44**	32
Total intrinsic value of liability for vested benefits	**24**	20

24. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT

Financial Risk Management

Pembina has exposure to counterparty credit risk, liquidity risk and market risk. Pembina recognizes that effective management of these risks is a critical success factor in managing organization and shareholder value.

Risk management strategies, policies and limits ensure risks and exposures are aligned to Pembina's business strategy and risk tolerance. The Company's Board of Directors is responsible for providing risk management oversight at Pembina. The Company's Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of this risk framework in relation to the risks faced by the Company. Internal audit personnel assist the Audit Committee in its oversight role by monitoring and evaluating the effectiveness of the organization's risk management system.

Counterparty credit risk

Counterparty credit risk represents the financial loss the Company would experience if a counterparty to a financial instrument failed to meet its contractual obligations in accordance with the terms and conditions of the financial instruments with the Company. Counterparty credit risk arises primarily from the Company's cash and cash equivalents, trade and other receivables, and from counterparties to its derivative financial instruments. The carrying amount of the Company's cash and cash equivalents, trade and other receivables and derivative financial instruments represents the maximum counterparty credit exposure, without taking into account security held.

The Company manages counterparty credit risk through established credit management techniques, including conducting comprehensive financial and other assessments for all new counterparties and regular reviews of existing counterparties to establish and monitor a counterparty's creditworthiness, setting exposure limits, monitoring exposures against these limits and obtaining financial assurances where warranted. The Company utilizes various sources of financial, credit and business information in assessing the creditworthiness of a counterparty including external credit ratings, where available, and in other cases, detailed financial statement analysis in order to generate an internal credit rating based on quantitative and qualitative factors. The establishment of counterparty exposure limits is governed by a Board of Directors designated counterparty exposure limit matrix which represents the maximum dollar amounts of counterparty exposure by debt rating that can be approved for a counterparty. The Company continues to closely monitor and reassess the creditworthiness of its counterparties, which has resulted in the Company reducing or mitigating its exposure to certain counterparties where it was deemed warranted and permitted under contractual terms.

Financial assurances may include guarantees, letters of credit and cash. Letters of credit totaling $115 million (December 31, 2015: $68 million) are held primarily in respect of customer trade receivables.

Typically, the Company has collected its trade receivables in full and at December 31, 2016, 95 percent were current (2015: 87 percent). Management defines current as outstanding accounts receivable past due and under 30 days. The Company has a general lien and a continuing and first priority security interest in, and a secured charge on, all of a shipper's petroleum in its custody.

At December 31, the aging of trade and other receivables was as follows:

Past Due	**2016**	2015
31-60 days past due	**2**	3
61-90 days past due	**1**	2
Greater than 91 days	**4**	9
	7	14

Management believes the unimpaired amounts that are past due by greater than 30 days are fully collectible based on customer payment history and management's assessment of counterparty credit risk through established credit management techniques as discussed above. At December 31, 2016, the allowance for doubtful accounts amounted to $1 million (2015: $1 million). Pembina recognized $1 million in bad debt expense during 2016 (2015: $1 million).

The Company monitors and manages its concentration of counterparty credit risk on an ongoing basis. The Company believes these measures minimize its counterparty credit risk but there is no certainty that they will protect it against all material losses. As part of its ongoing operations, the Company must balance its market and counterparty credit risks when making business decisions.

Liquidity risk

Liquidity risk is the risk the Company will not be able to meet its financial obligations as they come due. The following are the contractual maturities of financial liabilities, including estimated interest payments.

			Outstanding balances due by period			
December 31, 2016 *($ millions)*	Carrying Amount	Expected Cash Flows	Less Than 1 Year	1 - 3 Years	3 - 5 Years	More Than 5 Years
Trade payables and accrued liabilities	645	645	645			
Taxes Payable	5	5	5			
Loans and borrowings	4,008	6,147	162	589	1,084	4,312
Convertible debentures	143	167	10	157		
Dividends payable	64	64	64			
Derivative financial liabilities	123	123	65	58		
Finance leases	14	14	7	7		

The Company manages its liquidity risk by forecasting cash flows over a 12 month rolling time period to identify financing requirements. These financing requirements are then addressed through a combination of credit facilities and through access to capital markets, if required.

Market risk

Pembina's results are subject to movements in commodity prices, foreign exchange and interest rates. A formal Risk Management Program including policies and procedures has been designed to mitigate these risks.

a. Commodity price risk

Pembina's Midstream business includes activities related to product storage, terminalling, and hub services. These activities expose Pembina to certain risks including that Pembina may experience volatility in revenue, and impairments related to the book value of stored product, due to fluctuations in commodity prices. Primarily, Pembina enters into contracts to purchase and sell crude and NGL at floating market prices. The prices of products that are marketed by Pembina are subject to volatility as a result of such factors as seasonal demand changes, extreme

weather conditions, general economic conditions, changes in crude oil markets and other factors. Pembina manages its risk exposure by balancing purchases and sales to lock-in margins. Notwithstanding Pembina's management of price and quality risk, marketing margins for commodities can vary and have varied significantly from period to period. This variability could have an adverse effect on the results of Pembina's commercial Midstream business and its overall results of operations. To assist in effectively smoothing that variability inherent in this business, Midstream is investing in assets that have a fee-based revenue component, and is looking to expand this area going forward.

The Midstream business is also exposed to possible price declines between the time Pembina purchases NGL feedstock and sells NGL products, and to decreasing frac spreads. Frac spread is the difference between the sale prices of NGL products and the cost of NGL sourced from natural gas and acquired at natural gas related prices. Frac spreads can change significantly from period to period depending on the relationship between crude oil and natural gas prices (the "frac spread ratio"), absolute commodity prices, and changes in the Canadian to US dollar foreign exchange rate. There is also a differential between NGL product prices and crude oil prices which can change margins realized for midstream products separate from frac spread ratio changes. The amount of profit or loss made on the extraction portion of the NGL midstream business will generally increase or decrease with frac spreads. This exposure could result in variability of cash flow generated by the NGL midstream business, which could affect Pembina and the cash dividends of Pembina.

Pembina responds to commodity price risk by using an active Risk Management Program to fix revenues to pay for a minimum of 50 percent of the fixed committed term natural gas supply costs. Pembina's fixed committed natural gas supply can vary from year to year based on industry dynamics. Additionally, Pembina's Midstream business is also exposed to variability in quality, time and location differentials and the Company may also utilize financial derivative instruments as part of its overall risk management strategy to assist in managing the exposure to commodity price risk as a result of these activities. The Company does not trade financial instruments for speculative purposes.

b. Foreign exchange risk

Certain of Pembina's cash flows, namely a portion of its commodity-related cash flows as well as certain U.S.-based infrastructure assets, are subject to currency risk, primarily arising from the denomination of specific cash flows in U.S. dollars. Additionally, a portion of Pembina's capital expenditures may also be denominated in U.S. dollars. Pembina responds to this risk using an active Risk Management Program to exchange foreign currency for domestic currency at a fixed rate.

c. Interest rate risk

Pembina has floating interest rate debt which subjects the Company to interest rate risk. Pembina responds to this risk under the active Risk Management Program to enter into financial derivative contracts to fix interest rates.

At the reporting date, the interest rate profile of the Company's interest-bearing financial instruments was:

Carrying Amounts of Financial Liability		
December 31 *($ millions)*	**2016**	2015
Fixed rate instruments	**3,655**	3,155
Variable rate instruments [1]	**353**	25
	4,008	3,180

[1] At December 31, 2016, the Company held positions in financial derivative contracts to fix interest rates on $100 million of the underlying variable rate instruments (December 31, 2015 - $100 million).

Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have (increased) decreased earnings by the amounts shown below. This analysis assumes that all other variables remain constant.

December 31 *($ millions)*	**2016**	2015
	± 100 bp	± 100 bp
Variable rate instruments	**±4**	±0
Interest rate swap	**±1**	±0
Earnings sensitivity (net)	**±3**	±0

Fair values

The basis for determining fair value is disclosed in Note 5.

The fair values of financial assets and liabilities, together with the carrying amounts shown in the Statements of Financial Position, are as follows:

	December 31, 2016		December 31, 2015	
($ millions)	**Carrying Value**	**Fair Value**	Carrying value	Fair Value
Financial assets carried at fair value				
Derivative financial instruments	**9**	**9**	14	14
Financial assets carried at amortized cost				
Cash and cash equivalents	**35**	**35**	28	28
Trade receivables and other	**451**	**451**	480	480
Other assets	**11**	**11**	11	11
	497	**497**	519	519
Financial liabilities carried at fair value				
Derivative financial instruments[2]	**123**	**123**	30	30
Financial liabilities carried at amortized cost				
Trade payables and accrued liabilities	**645**	**645**	533	533
Taxes Payable	**5**	**5**		
Dividends payable	**64**	**64**	57	57
Loans and borrowings[2]	**4,008**	**4,234**	3,180	3,261
Convertible debentures[1]	**143**	**210**	143	167
	4,865	**5,158**	3,913	4,018

(1) Carrying value excludes conversion feature of convertible debentures.
(2) Carrying value of current and non-current balances.

Interest rates used for determining fair value

The interest rates used to discount estimated cash flows, when applicable, are based on the government yield curve at the reporting date plus and adequate credit spread, and were as follows:

December 31 *(percents)*	**2016**	2015
Derivatives	**0.9 - 1.1**	0.8 - 1.0
Loans and borrowings	**1.9 - 4.8**	2.3 - 5.4

Fair value of power derivatives are based on market rates reflecting forward curves.

Fair value hierarchy

The fair value of financial instruments carried at fair value is classified according to the following hierarchy based on the amount of observable inputs used to value the instruments.

Level 1: Unadjusted quoted prices are available in active markets for identical assets or liabilities as the reporting date. Pembina does not use Level 1 inputs for any of its fair value measurements.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices). Level 2 valuations are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace. Instruments in this category include non-exchange traded derivatives such as over-the-counter physical forwards and options, including those that have prices similar to quoted market prices. Pembina obtains quoted market prices for its inputs from information sources including banks, Bloomberg Terminals and Natural Gas Exchange. All of Pembina's significant financial instruments carried at fair value are valued using Level 2 inputs.

The following table is a summary of the net derivative financial instruments, which is consistent with the gross balances:

	2016					2015				
December 31 *($ millions)*	**Current Asset**	**Non-Current Asset**	**Current Liability**	**Non-Current Liability**	**Total**	Current Asset	Non-Current Asset	Current Liability	Non-Current Liability	Total
Commodity, power, storage and rail financial	**9**		**(61)**	**(1)**	**(53)**	14		(6)	(1)	7
Interest rate			**(3)**	**(3)**	**(6)**			(3)	(5)	(8)
Foreign exchange			**(1)**		**(1)**			(1)		(1)
Conversion feature of convertible debentures (Note 14)				**(54)**	**(54)**				(14)	(14)
Net derivative financial instruments	**9**		**(65)**	**(58)**	**(114)**	14		(10)	(20)	(16)

Sensitivity analysis

The following table shows the impact on earnings if the underlying risk variables of the derivative financial instruments changed by a specified amount, with other variables held constant.

As at December 31, 2016 ($ millions)		**+ Change**	**- Change**
Frac spread related			
Natural gas	(AECO +/- $0.25 per GJ)	4	(4)
NGL (includes propane, butane and condensate)	(Belvieu/Conway +/- U.S. $0.10 per gal)	(25)	25
Foreign exchange (U.S.$ vs. Cdn$)	(FX rate +/- $0.20)	(15)	15
Product margin			
Crude oil	(WTI +/- $2.50 per bbl)	(5)	5
NGL (includes condensate)	(Belvieu/Conway +/- U.S. $0.10 per gal)	N/A	N/A
Corporate			
Interest rate	(Rate +/- 50 basis points)	1	(1)
Power	(AESO +/- $5.00 per MW/h)	0.4	(0.4)
Conversion feature of convertible debentures	(Pembina share price +/- $0.50 per common share)	(2)	2

25. OPERATING LEASES

Leases as lessee

Operating lease rentals are payable as follows:

December 31 *($ millions)*	**2016**	2015
Less than 1 year	**101**	91
Between 1 and 5 years	**383**	396
More than 5 years	**327**	424
	811	911

The Company leases a number of offices, warehouses, vehicles, land and rail cars under operating leases. The leases run for a period of one to twelve years, with an option to renew the lease after that date. The Company has sublet office space and rail cars up to 2027 and has contracted sub-lease payments for a minimum of $100 million over the term. The amounts shown in the table above are presented gross.

26. CAPITAL MANAGEMENT

The Company's objective when managing capital is to ensure a stable stream of dividends to shareholders that is sustainable over the long-term. The Company manages its capital structure based on requirements arising from significant capital development activities, the risk characteristics of its underlying asset base, and changes in economic conditions. Pembina manages its capital structure and short-term financing requirements using Non-GAAP measures, including the ratios of debt to EBITDA, debt to total enterprise value, adjusted cash flow to debt and debt to equity. The metrics are used to measure the Company's financial leverage and measure the strength of the Company's balance sheet. The Company remains satisfied that the leverage currently employed in its capital structure is sufficient and appropriate given the characteristics and operations of the underlying asset base. The Company, upon approval from its Board of Directors, will balance its overall capital structure through new equity or debt issuances, as required.

The Company maintains a conservative capital structure that allows it to finance its day-to-day cash requirements through its operations, without requiring external sources of capital. The Company funds its operating commitments, short-term capital spending as well as its dividends to shareholders through this cash flow, while new borrowing and equity issuances are primarily reserved for the support of specific significant development activities. The capital structure of the Company consists of shareholder's equity, comprised of common and preferred equity, plus long-term debt. Long-term debt is comprised of bank credit facilities, unsecured notes, finance lease obligations and convertible debentures.

Pembina is subject to certain financial covenants in its credit facility agreements and is in compliance with all financial covenants as of December 31, 2016.

Note 16 of these financial statements shows the change in Share Capital for the year ended December 31, 2016.

27. GROUP ENTITIES

Significant subsidiaries

	Ownership Interest	
December 31 *(percentages)*	**2016**	2015
Pembina Pipeline	**100**	100
Pembina Gas Services Limited Partnership	**100**	100
Pembina Oil Sands Pipeline LP	**100**	100
Pembina Midstream Limited Partnership	**100**	100
Pembina NGL Corporation	**100**	100
Pembina Facilities NGL LP	**100**	100
Pembina Midstream Inc.	**100**	100
Pembina Infrastructure and Logistics LP	**100**	100
Pembina Empress NGL Partnership	**100**	100
Pembina (Pro) Holding Company	**100**	100
Pembina Resource Services Canada	**100**	100
Pembina Resource Services (U.S.A.)	**100**	100
Pembina Prairie Facilities Ltd.	**100**	100

28. RELATED PARTIES

All transactions with related parties were made on terms equivalent to those that prevail in arm's length transactions.

Key management personnel and director compensation

Key management consists of the Company's directors and certain key officers.

Compensation

In addition to short-term employee benefits - including salaries, director fees and short term incentives - the Company also provides key management personnel with share-based compensation, contributes to post employment pension plans and provides car allowances, parking and business club memberships.

Key management personnel compensation comprised:

Year Ended December 31 *($ millions)*	**2016**	2015
Short-term employee benefits	**5**	5
Share-based compensation and other	**3**	5
Total compensation of key management	**8**	10

Transactions

Key management personnel and directors of the Company control less than one percent of the voting common shares of the Company (consistent with the prior year). Certain directors and key management personnel also hold Pembina convertible debentures and preferred shares. Dividend and interest payments received for the common shares and debentures held are commensurate with other non-related holders of those instruments.

Certain officers are subject to employment agreements in the event of termination without just cause or change of control.

Post-employment benefit plans

Pembina has significant influence over the pension plans for the benefit of their respective employees. No balance payable is outstanding at December 31, 2016 (December 31, 2015: nil).

Transactions

($ millions)		Transaction Value Year Ended December 31	
Post-employment benefit plan	Transaction	**2016**	2015
Defined benefit plan	Funding	**15**	9
