ORDINARY SHAREHOLDERS' MEETING
on 28 February 2020

DRAFT RESOLUTIONS

FIRST RESOLUTION

The shareholders' meeting, after having reviewed:

- The management report on the SICAV's activity during its fiscal year ending at the end of October 2019, and on this fiscal year's accounts,
- and the Statutory Auditors' general report on the annual accounts,

approves the fiscal year's accounts and balance sheet as presented, as well as the operations conveyed in these accounts and summarized in these reports.

SECOND RESOLUTION

After reviewing the Statutory auditor's special report on the agreements concerned by article L. 225-38 of the Commercial Code, the General Meeting takes note of this report and approves its conclusions.

THIRD RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the Compartment "LYXOR BEL 20 TR (DR) UCITS ETF", as follows:

332,260.29 euros of net income is broken down as follows:

- the amount of 103,505.89 euros is allocated to the "Retained earnings for the year" account,
- 228,754.40 is distributed, i.e. a dividend of 0.35 euros per share.

The meeting sets the payment date for this dividend at 11 December 2019.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 1.67 euros, accompanied, if applicable, by a tax credit of an amount determined on the date of payment of said interim dividends.

The General Meeting acknowledges that an interim dividend of 0.03 euros was paid on 12 December 2018 and 1.30 euros on 10 July 2019 and that, as a result, all of the interim dividends already distributed represent the entire income distributed for the fiscal year ended.

Dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/10/2016	-	-	-
31/10/2017	1.91	-	-
31/10/2018	1.87	-	-

In respect of net realised capital gains, the amount of -3,295,143.57 euros is fully capitalised.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

FOURTH RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the "LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF" compartment as follows:

- Capitalisation of the net earnings: -36,076.65 euros,
- Capitalisation of the net realised capital gains: 4,637,088.39 euros.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FIFTH RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the “LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF” compartment as follows:

- Capitalisation of the net earnings: -20,417.37 euros,
- Capitalisation of the net realised capital gains: 2,242,746.81 euros.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

SIXTH RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the “LYXOR BTP DAILY (-2X) INVERSE UCITS ETF” compartment as follows:

- Capitalisation of the net earnings: -794,326.31 euros,
- Capitalisation of the net realised capital gains: -91,400,219.26 euros.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

SEVENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor 10Y US TREASURY DAILY -2X INVERSE UCITS ETF” compartment as follows:

- Capitalisation of the net earnings: -43,739.89 US Dollars,
- Capitalisation of the net realised capital gains: -3,508,903.29 US Dollars.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

EIGHTH RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the “LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF” compartment as follows:

- Capitalisation of the net earnings: 3,086,337.37 euros.

Dividends related to net income distributed in respect of the previous three fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/10/2016	2.50	-	-
31/10/2017	-	-	-
31/10/2018	-	-	-

- Capitalisation of the net realised capital gains: -8,437,000.63 euros.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

NINTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “LYXOR GERMAN MID-CAP MDAX UCITS ETF” compartment are distributed as follows:

- Capitalisation of net income: 301,013.20 euros.

The General Meeting acknowledges that an interim dividend of 3.06 euros was paid on 10 July 2019 and that, consequently, all the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/10/2016	2.73	-	-
31/10/2017	3.14	-	-

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/10/2018	3.41	-	-

- Capitalisation of the net realised capital gains: -3,282,760.02 euros.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor HWABAO WP MSCI CHINA A (DR) UCITS ETF” compartment are distributed as follows:

With respect to net income, the sum of 925,653.76 euros is fully capitalised for ACC shares.

With respect to net realised capital gains, the amount of -409,344.22 euros is fully capitalised for ACC shares.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

ELEVENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “LYXOR MSCI WORLD EX EMU UCITS ETF” compartment are distributed as follows:

- Capitalisation of net income: -73,183.90 USD is capitalised,

- Capitalisation of net realised capital gains: 6,470,698.34 USD.

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TWELFTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor DJ GLOBAL TITANS 50 UCITS ETF” compartment are distributed as follows:

With respect to net income, the sum of 610,420.58 euros is:

- For the Dist equities:

- 95,264.48 euros is allocated to the "Retained earnings for the year" account,

- Distributed in the amount of 515,156.10 euros, i.e. a dividend of 0.30 euros per unit.

The meeting sets the payment date for this dividend at 11 December 2019.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 0.96 euros, accompanied, if applicable, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an initial interim dividend of 0.16 euros was paid on 12 December 2018 and a second interim dividend of 0.50 euros was paid on 10 July 2019 and that, as a result, all of the interim dividends already distributed represent all of the income distributed for the fiscal year ended.

The dividends related to the net income distributed for Dist equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/10/2016	0.80	-	-
31/10/2017	0.77	-	-
31/10/2018	0.78	-	-

With regard to net realised capital gains, the sum of 6,401,402.86 euros is allocated in full to the “undistributed net capital gains or losses” account for Dist equities.

In compliance with the regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed relative to the previous fiscal years.

THIRTEENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor SMI Daily (-2X) Inverse UCITS ETF” compartment are distributed as follows:

- For the ACC equities, Capitalisation of the net earnings: -487,419.14 CHF,
- For the ACC equities, Capitalisation of the net realised capital gains: -37,794,739.94 CHF.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FOURTEENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor Daily SHORT DAX X2 UCITS ETF” compartment are distributed as follows:

- For the ACC equities, Capitalisation of the net earnings: -446,788.19 euros,
- For the ACC equities, Capitalisation of the net realised capital gains: -28,125,993.29 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FIFTEENTH RESOLUTION

The General Meeting acknowledges that the distributable amounts to be capitalised for the fiscal year ending at the end of October 2019 for the “Lyxor IBEX 35 Doble Apalancado Diario UCITS ETF”, compartment are distributed as follows:

- Capitalisation of the net earnings: 184,140.47 euros,
- Capitalisation of the net realised capital gains: 34,649,377.41 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TWENTY-FIFTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “LYXOR EURO OVERNIGHT RETURN UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: -835,170.80 euros,
- Capitalisation of the net realised capital gains: 10,275,270.50 euros.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

TWENTY-SIXTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor World Water UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 3,095,983.65 euros is fully capitalised.

The General Meeting acknowledges that an interim dividend of 0.65 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for Dist equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
30/06/2017	0.60	-	-
29/06/2018	0.66	-	-
31/10/2018	-	-	-

With regard to net realised capital gains, the sum of 122,314,965.48 euros is allocated in full to the “undistributed net capital gains or losses” account.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TWENTY-SEVENTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor EURO STOXX 50 Daily (-2X) Inverse UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: -340,696.29 euros,
- Capitalisation of the net realised capital gains: -91,702,859.33 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TWENTY-EIGHTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor EURO STOXX 50 Daily (2X) Leveraged UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: 641,534.21 euros,
- Capitalisation of the net realised capital gains: 16,091,237.64 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

TWENTY-NINTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor EURO STOXX 50 Daily (-1X) Inverse UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: -599,994.55 euros,
- Capitalisation of the net realised capital gains: -185,630,652.98 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

THIRTIETH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor FTSE MIB Daily (-2X) Inverse (XBEAR) UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: -232,033.65 euros,
- Capitalisation of the net realised capital gains: -44,833,352.01 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

THIRTY-FIRST RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor FTSE MIB Daily (2X) Leveraged UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 1,450,245.95 euros is distributed as follows:

- Distributed up to 1,271,431.07 euros, i.e. a unit dividend of 0.07 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

- Allocated up to 178,814.88 euros to the “retained earnings” account for the fiscal year.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 0.57 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an interim dividend of 0.50 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
30/09/2016	0.44	-	-
29/09/2017	0.45	-	-
31/10/2018	0.53	-	-

With regard to net realised capital gains, the sum of 35,780,034.38 euros is allocated in full to the “undistributed net capital gains or losses” account.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

THIRTY-SECOND RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor FTSE MIB Daily (-1X) Inverse (BEAR) UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: 345,207.36 euros,
- Capitalisation of the net realised capital gains: -26,763,362.51 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

THIRTY-THIRD RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor Bund Daily (-2x) Inverse UCITS ETF” compartment are distributed as follows:

- Capitalisation of the net earnings: -995,537.26 euros,
- Capitalisation of the net realised capital gains: -97,468,242.98 euros.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

THIRTY-FOURTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor FTSE MIB UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 6,614,222.77 euros is distributed as follows:

- Distributed up to 3,069,836.64 euros, i.e. a unit dividend of 0.16 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

- The sum of 3,544,386.13 euros is allocated to the "Retained Earnings" account.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 0.87 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an interim dividend of 0.71 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
28/04/2017	0.68	-	-
30/04/2018	0.07	-	-
31/10/2018	0.66	-	-

With respect to net realised capital gains, the amount of 43,859,266.97 euros is entirely allocated to the “undistributed net capital gains or losses” account.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

THIRTY-FIFTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor IBEX 35 (DR) UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 9,531,253.03 euros is distributed as follows:

- Distributed up to 3,041,012.04 euros, i.e. a unit dividend of 0.66 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

- The sum of 6,490,240.99 euros is allocated to the "Retained Earnings" account.

On the basis of this distribution, to which is added the interim dividend paid in respect of the fiscal year, the total net dividend per equity is therefore set at 3.56 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an interim dividend of 2.90 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

In compliance with the regulations, the general meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

MULTI UNITS FRANCE

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/01/2017	3.81	-	-
31/01/2018	3.23	-	-
31/10/2018	3.21	-	-

With respect to net realised capital gains, the amount of -33,611,499.61 euros is fully capitalised.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

THIRTY-SIXTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor MSCI Europe (DR) UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 27,801,066.17 euros is distributed as follows:

- For Dist equities:
- Distributed up to 9,875,941.96 euros, i.e. a unit dividend of 0.89 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

- Allocated up to 17,925,124.21 euros to the “retained earnings” account for the fiscal year.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 4.49 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an interim dividend of 3.60 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for Dist equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/01/2017	4.06	-	-
31/01/2018	3.99	-	-
31/10/2018	4.22	-	-

With respect to net realised capital gains, the amount of -27,695,412.52 euros, as follows:

- Capitalised up to -27,695,412.52 euros for Dist equities.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

THIRTY-SEVENTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor MSCI USA UCITS ETF” are distributed, as follows:

With regard to the net earnings, the sum of 7,348,462.89 euros is:

- For ACC equities: capitalised up to 2,610,952.48 euros.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net earnings has been distributed for ACC equities in respect of previous fiscal years.

- For DIST equities: the sum of 4,737,510.41 euros is distributed, as follows:

- Distributed up to 2,297,672.40 euros, i.e. a unit dividend of 0.68 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

- Allocated up to 2,439,838.01 euros to the “retained earnings” account for the fiscal year.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 4.93 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that a first interim dividend of 1.77 euros was paid on 12 December 2018 and that a second interim dividend of 2.48 euros was paid on 10 July 2019, and that, as a result, all the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for DIST equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/01/2017	3.83	-	-
31/01/2018	3.53	-	-
31/10/2018	2.00	-	-

With regard to net realised capital gains, the sum of 181,802,726.87 euros is distributed as follows:

- For ACC equities, capitalised up to 145,083,866.34 euros,
- For Dist shares, allocated up to 36,718,860.53 euros to the "undistributed net capital gains or losses" account.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

THIRTY-EIGHTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the "Lyxor MSCI World UCITS ETF" compartment are distributed as follows:

With regard to the net earnings, the sum of 34,448,123.34 euros is distributed as follows:

- For DIST equities: a total to be allocated of 30,213,821.56 euros, as follows:
- Allocated up to 25,969,959.24 euros to the "retained earnings" account for the fiscal year,
- Distributed up to 4,243,862.32 euros i.e. a unit dividend of 0.34 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 3.89 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that an interim dividend of 0.79 euros was paid on 12 December 2018 and one of 2.76 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for DIST equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/03/2017	3.85	-	-
30/03/2018	3.67	-	-
31/10/2018	2.49	-	-

- For Monthly Hedged to USD - DIST equities, the amount to be allocated is 614,177.83 euros, as follows:
- Allocated up to 539,897.52 euros to the "retained earnings" account for the fiscal year,
- Distributed up to 74,280.31 euros i.e. a unit dividend of 0.19 euros.

The Meeting sets the payment date for this dividend at 11 December 2019.

On the basis of this distribution, to which are added the interim dividends paid in respect of the fiscal year, the total net dividend per share is therefore set at 2.51 euros, accompanied, where appropriate, by a tax credit of an amount determined on the date of payment of the said interim dividends.

The General Meeting acknowledges that a first interim dividend of 0.52 euros was paid on 12 December 2018 and that a second interim dividend of 1.80 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for Monthly Hedged to USD - DIST equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/03/2017	2.49	-	-

The dividends related to the net income distributed for DIST equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
28/04/2017	2.21	-	-
31/04/2018	1.1796	-	-
31/10/2018	0.91	-	-

- For Daily Hedged to CHF equities: capitalised up to 404,426.90 euros.

In accordance with regulations, the General Meeting acknowledges that no dividend has been distributed in respect of the net earnings for Daily Hedged to CHF equities for the previous 3 fiscal years.

- For Daily Hedged to GBP equities: capitalised up to 352,562.43 euros.

In accordance with regulations, the General Meeting acknowledges that no dividend has been distributed in respect of the net earnings for Daily Hedged to GBP equities for the previous 3 fiscal years.

- For Daily Hedged to USD equities: capitalised up to 2,423,647.66 euros.

In accordance with regulations, the General Meeting acknowledges that no dividend has been distributed in respect of the net earnings for Daily Hedged to USD equities for the previous 3 fiscal years.

With regard to net realised capital gains, the sum of 246,868,909.61 euros is distributed as follows:

- For DIST equities, the sum of 234,250,246.81 euros is allocated to the "undistributed net capital gains and losses" account,
- Capitalised up to 805,057.76 euros for the Daily Hedged to CHF equities,
- Capitalised up to 293,069.07 euros for the Daily Hedged to GBP equities,
- Capitalised up to 11,520,535.97 euros for the Daily Hedged to USD equities.

In accordance with regulations, the General Meeting acknowledges that no dividend has been distributed in respect of the net capital gains realised in previous years.

FORTY-THIRD RESOLUTION

The General Meeting finds that the distributable sums for the fiscal year ended at the end of October 2019 for the “LYXOR PEA OBLIGATIONS D’ETAT UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of -27,871.91 euros is:

- Capitalised up to -27,871.91 euros for ACC equities.

With regard to net realised capital gains, the sum of -1,784,602.56 euros is:

- Capitalised up to -1,784,602.56 euros for ACC equities.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FORTY-FOURTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor MSCI GREECE UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 1,067,399.94 euros is fully capitalised.

The General Meeting acknowledges that an interim dividend of 0.02 euros was paid on 10 July 2019 and that, consequently, all of the interim dividends already distributed represent the entire distributed income for the fiscal year ended.

The dividends related to the net income distributed for Dist equities for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
31/08/2016	-	-	-
31/08/2017	0.02	-	-
31/08/2018	0.02	-	-

With respect to net realised capital gains, the amount of 17,488,684.85 euros, is allocated to the “Net capital gains and losses of the fiscal year” account.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

FORTY-FIFTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor MSCI INDIA UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 11,540,219.05 euros is:

- Capitalised up to 9,936,612.70 euros for ACC (Eur) equities,
- Capitalised up to 1,603,606.35 euros, for ACC (USD) equities.

With respect to net realised capital gains, the amount of 45,071,497.07 euros, as follows:

- Capitalised up to 52,598,731.00 euros for ACC (Eur) equities,
- Capitalised up to -7,527,233.93 euros, for ACC (USD) equities.

In accordance with regulations, the General Meeting acknowledges that no dividend related to net realised capital gains has been distributed in respect of previous fiscal years.

FORTY-SIXTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor RUSSEL2000 UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of 21,746.96 euros is:

- Capitalised up to 21,746.96 euros for ACC equities

With regard to net realised capital gains, the sum of 439,190.99 euros is:

- Capitalised up to 439,190.99 euros for ACC equities

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FORTY-SEVENTH RESOLUTION

The General Meeting finds that the distributable sums to be capitalised for the fiscal year ended at the end of October 2019 for the “Lyxor NEW ENERGY UCITS ETF” compartment are distributed as follows:

With regard to the net earnings, the sum of -250,861.46 euros, pour les actions Dist, is fully capitalised.

The dividends related to the net income distributed for the three previous fiscal years were as follows (in euros):

Closing	Net dividend	Amount eligible for the 40% reduction	Amount not eligible for the 40% reduction
30/06/2017	0.19	-	-
29/06/2018	0.13	-	-
28/06/2019	0.32	-	-

With respect to net realised capital gains, for Dist equities, the amount of 7,293,728.34 euros is fully allocated to the "undistributed net capital gains and losses" account.

FORTY-EIGHTH RESOLUTION

The General Meeting decides to allocate the distributable amounts for the fiscal year ending at the end of October 2019 for the “PLANET MONDE” compartment as follows:

- Capitalisation of the net earnings: -1,199.02 euros,
- Capitalisation of the net realised capital gains: Nil.

In compliance with the regulations, the General Meeting acknowledges that no dividend has been distributed relative to the previous fiscal years.

FORTY-NINTH RESOLUTION

The General Meeting, having heard the reports of the Board of Directors and the Statutory Auditor, approves the proposed merger-absorption of the LYXOR EURO STOXX 50 DAILY(-1x) Inverse UCITS ETF Compartment of the MULTI UNITS FRANCE SICAV by the Comstage EURO STOXX50 DAILY SHORT GR UCITS ETF MF.

FIFTIETH RESOLUTION

The General Meeting, having heard the reports of the Board of Directors and the Statutory Auditor, approves the proposed merger-absorption of the LYXOR GERMAN MID-CAP MDAX UCITS ETF Compartment of the MULTI UNITS FRANCE SICAV by the Comstage MDAX TR UCITS ETF MF.

FIFTY-FIRST RESOLUTION

The General Meeting grants full powers to the bearer of a copy or extract of the various documents submitted to this meeting and of the minutes thereof to make all filings required by law.

Statutory auditor's report

**STATUTORY AUDITOR'S REPORT
ON THE FINANCIAL STATEMENTS
For the year ended 31 October 2019**

SICAV MULTI UNITS FRANCE
UCITS ESTABLISHED IN THE FORM OF A VARIABLE CAPITAL
INVESTMENT COMPANY WITH COMPARTMENTS
Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management Company
LYXOR INTERNATIONAL ASSET MANAGEMENT
189, rue d'Aubervilliers
75886 PARIS CEDEX 18

To the Shareholders,

Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of MULTI UNITS FRANCE Mutual Fund (SICAV), a UCITS established in the form of a variable capital investment company with compartments, for the year ended 31 October 2019.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the UCITS established in the form of a variable capital investment company with compartments at 31 October 2019 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "*Statutory Auditor's responsibilities for the audit of the financial statements*" in this report.

Independence

We conducted our audit engagement in accordance with the applicable rules on independence, from 01/11/2018 and up to the date of this report, and in particular we did not provide any non-audit services prohibited under Article 5, paragraph 1 of Regulation (EU) No. 537/2014 or by the auditors' professional code of ethics.

SICAV MULTI UNITS FRANCE

Justification of our assessments - Key audit matters

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the key matters as regards to the risk of material misstatement that, in our professional judgement, were the most significant for the audit of the financial statements and our responses to these risks.

These assessments were made as part of our audit of the financial statements, taken as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

Key audit matters	Audit response to cover these risks
<p>The main risks of the fund relate to the financial instruments in its portfolio.</p> <p>Any error in valuing or recording these financial instruments could lead to a misstatement in the calculation of the CIU's net asset value and in the financial statements.</p> <p>We therefore focused our work on the valuation and existence of the financial instruments in the portfolio.</p> <p>Valuation of financial instruments traded on a regulated or equivalent market</p> <p>Valuation of the CIU's financial instruments traded on a regulated or equivalent market is not complex as it is based primarily on listed prices provided by independent sources.</p> <p>However, the related amounts are significant and could lead to a material misstatement.</p> <p>The value of the financial instruments traded on a regulated or equivalent market is recorded in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We compared the year-end valuation of the CIU's financial instruments traded on a regulated or equivalent market with observable prices obtained from market databases.</p>

SICAV MULTI UNITS FRANCE

<p>Valuation of financial contracts traded over the counter</p> <p>As part of its investment strategy, the CIU uses over-the-counter swaps. The valuation of these swaps is not observable on a regulated or equivalent market. The valuation of over-the-counter swaps is therefore a key audit matter.</p> <p>The value of the swap is recorded under the line item "financial contracts" in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The commitment related to the swap is presented in the off-balance sheet statement. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We verified that the swap's valuation as recorded at year-end agreed to the value communicated by the counterparty to the swap.</p> <p>We gained an understanding of the internal control procedure performed by the management company over swaps valuation. We verified that this procedure had been applied at year-end.</p>
<p>Existence of financial instruments</p> <p>The portfolio's financial instruments are held in custody or maintained by the CIU's depository. The depository certifies the existence of financial instruments at year-end.</p> <p>There is nonetheless a risk that these financial instruments could be inaccurately or only partially recorded in the CIU's accounting.</p> <p>The existence of these financial instruments is a key audit matter as the related amounts are material and could lead to a material misstatement.</p>	<p>We verified the existence of the portfolio's financial instruments by reviewing the fund's reconciliation between the CIU's financial instruments held at year-end and these identified by the depository in an account opened in the fund's name. Any material differences were examined, if applicable using trade tickets or contracts.</p>

Specific verifications

In accordance with professional standards applicable in France, we have also performed the specific verifications required by French law.

Information given in the management report and in other documents addressed to shareholders on the financial situation and annual accounts

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report, and in the others documents addressed to the shareholders with respect to the financial situation and annual accounts.

SICAV MULTI UNITS FRANCE

Corporate governance report

We certify the existence, in the corporate governance report, of the information required by Article L. 225-37-4 of the French Commercial Code.

Disclosures arising from other legal and regulatory requirements

Appointment of the Statutory Auditors

We were appointed as Statutory Auditor of MULTI UNITS FRANCE Mutual Fund (SICAV), a UCITS established in the form of an open-ended collective investment funds, by the board of directors on 04/10/2013.

At 31 October 2019, our firm was in the sixth consecutive year of its engagement, i.e. the sixth year following the admission of the CIU's securities for trading on a regulated market.

Responsibilities of management and those charged with governance for the financial statements

It is the management company's responsibility to prepare the CIU's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the CIU's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the CIU or to cease operations.

It is the management company's responsibility to monitor the preparation of financial information and oversee the efficiency of the internal control and risk management system and the internal audit system relating to the preparation and processing of financial and accounting information.

These financial statements have been prepared by the board of directors.

Statutory Auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified by Article L. 823-10-1 of the French Commercial Code, our role in certifying the accounts does not consist of guaranteeing the viability or quality of management.

SICAV MULTI UNITS FRANCE

As part of an audit conducted in accordance with professional standards applicable in France, the Statutory Auditor uses professional judgement throughout the entire audit.

He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the CIU's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

To the Shareholders,

In our capacity as statutory auditor for your company, we present to you our report on the regulated agreements.

It is our responsibility to provide you, on the basis of the information given to us, with the characteristics and material provisions of the agreements of which we have been informed or that we may have discovered during our mission, without having to express an opinion as to their usefulness or merit or to seek out the existence of other agreements. It is up to you, according to the terms of article R.225-31 of the French Commercial code, to assess the importance of signing these contracts with a view to approving them.

It is also our responsibility, where applicable, to further provide you with the information indicated in article R.225-31 of the French Commercial code relative to the performance, during the elapsed fiscal year, of agreements already approved by the general meeting.

We have implemented the due diligence reviews that we considered necessary in view of the professional doctrine of the Compagnie nationale des commissaires aux comptes (the French National Society of Statutory Auditors) relative to this mission.

AGREEMENTS SUBMITTED FOR THE APPROVAL OF THE GENERAL MEETING

We hereby inform you that we have not been made aware of any authorised agreement during the elapsed fiscal year that would require the approval of the general meeting in application of the provisions of article L. 225-38 of the French Commercial code.

AGREEMENTS ALREADY APPROVED BY THE GENERAL MEETING

We hereby inform you that we have not been made aware of any agreement already approved by the general meeting performance of which continued during the elapsed fiscal year.

Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

The aggregation of the annual accounts is presented in euros.

The income statement presented only takes into account Compartments that are active at the balance sheet date.

The Compartments in the GBP currency have been converted to euros at the rate applicable on 31 October 2019 (WMC Reuters).

The Compartments in the USD currency have been converted to euros at the rate applicable on 31 October 2019 (WMC Reuters).

On 31 October 2019, the Multi Units France mutual fund was made up of 46 Compartments:

- Compartment No. 1: LYXOR BEL 20 TR (DR) UCITS ETF
- Compartment No. 2: LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
- Compartment No. 3: LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
- Compartment No. 4: LYXOR BTP DAILY (-2X) INVERSE UCITS ETF
- Compartment No. 5: LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF
- Compartment No. 6: LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF
- Compartment No. 7: LYXOR GERMAN MID-CAP MDAX UCITS ETF
- Compartment No. 8: LYXOR HWABAO WP MSCI CHINA A (DR) UCITS ETF
- Compartment No. 9: LYXOR MSCI WORLD EX EMU UCITS ETF
- Compartment No. 10: LYXOR DJ GLOBAL TITANS 50 UCITS ETF
- Compartment No. 11: LYXOR SMI DAILY (-2X) INVERSE UCITS ETF
- Compartment No. 12: LYXOR DAILY SHORTDAX X2 UCITS ETF
- Compartment No. 13: LYXOR IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF
- Compartment No. 14: LYXOR IBEX 35 DOBLE INVERSO DIARIO UCITS ETF
- Compartment No. 15: LYXOR NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF
- Compartment No. 16: LYXOR PEA PME (DR) UCITS ETF

- **Additional information (*)**

- **Changes during the year:**

During the fiscal year, the SICAV absorbed 5 new Compartments from MF:

Date of the NAV	Name of the CIU
09/05/2019	LYXOR MSCI GREECE UCITS ETF
09/05/2019	LYXOR MSCI INDIA UCITS ETF
05/09/2019	LYXOR CAC 40 (DR) UCITS ETF
05/09/2019	LYXOR NEW ENERGY UCITS ETF
05/09/2019	LYXOR RUSSELL 2000 UCITS ETF

And 7 compartments were liquidated:

Date of the NAV	Name of the CIU
03/12/2018	LYXOR IBOXX GERMANY 1-3Y (DR) UCITS ETF
06/12/2018	LYXOR CSI 300 A-SHARE UCITS ETF
06/12/2018	LYXOR FTSE 250 UCITS ETF
06/12/2018	LYXOR FTSE ALL SHARE UCITS ETF
27/02/2019	LYXOR FTSE US QUALITY LOW VOL DIVIDEND (DR) UCITS
24/07/2019	LYXOR IBEX 35 INVERSO DIARIO UCITS ETF
24/07/2019	LYXOR PEA AMERIQUE LATINE (MSCI EM LATIN AMERICA)

In addition, 9 Compartments were absorbed by the SICAV Multi Units Luxembourg during the fiscal year:

Date of the NAV	Name of the CIU
08/11/2018	LYXOR EURO STOXX BANKS (DR) UCITS ETF
08/11/2018	LYXOR EUROMTS HIGHEST RATED MACRO-WEIGHTED GOVT BO
08/11/2018	LYXOR EUROMTS HIGHEST RATED MW GB 1-3Y (DR)
08/11/2018	LYXOR EUROMTS HIGHEST RATED MW GB 3-5Y UCITS ETF
08/11/2018	LYXOR MSCI ALL COUNTRY WORLD UCITS ETF
08/11/2018	LYXOR ULTRA LONG DURATION EURO GOVERNMENT FTSE MTS
14/03/2019	LYXOR MSCI INDONESIA UCITS ETF
14/03/2019	LYXOR MSCI SELECT OECD EMERGING MARKETS GDP UCITS
14/03/2019	LYXOR THAILAND (SET50 NET TR) UCITS ETF

And 2 Compartments were created:

Date of the NAV	Name of the CIU
17/12/2018	LYXOR PEA OBLIGATIONS D'ÉTAT EURO UCITS ETF
19/07/2019	PLANET MONDE

(*) We recommend that you refer to the information on each compartment.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BEL 20 TR (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BEL 20 TR (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities from eurozone countries.

At least 60% of the LYXOR BEL 20 TR (DR) UCITS ETF Compartment (hereinafter the “Compartment”) is permanently exposed in one or several markets of equities that have been issued in one or several eurozone countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

The Board of directors reserves the right to capitalise and/or distribute all or part of the amounts available for distribution. The realised net capital gain will be capitalised.

Management objective:

The management objective of this Compartment is to replicate the upwards or downwards evolution of the Bel 20 NR™ index (“Benchmark Indicator”) listed in euros while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.20%.

Benchmark indicator:

The Benchmark Indicator is the Bel 20™ NR (Net Return) index (net dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator is a basket index disseminated in real-time, which monitors the continuous evolution of the prices of the 20 most liquid Belgian equities. The equities in the Benchmark Indicator are weighted according to their stock market capitalisations, adjusted by the “free float” while using the FTSE free float system. The Benchmark Indicator is continuously disseminated in real-time, but the official closing index is only disseminated after 5:40 p.m.

The monitored performance is that of the index closing prices.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components will be available at the following Internet site: <https://www.euronext.com>

Benchmark indicator revision and composition:

The Benchmark indicator is revised annually.

The exact composition and the Euronext’s revision rules of the Benchmark indicator are available on the Internet site: <https://www.euronext.com>. The above-mentioned rebalancing frequency has no impact on the costs within the framework of the implementation of the Investment strategy.

Benchmark indicator publication:

The Benchmark Indicator’s closing price is available on the Internet site: <https://www.euronext.com>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Euronext administrator of the Bel 20 NR™ benchmark index has until 01.01.2020 to apply for authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the management company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its financial manager by delegation, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument ("FFI"). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of balance sheet assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's internet site at www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009. The Compartment will be mainly invested in securities making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may use FFIs traded on a regulated market or over the counter.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments within the limits and under the conditions provided for by the regulations.

The counterparty to the aforementioned forward financial instruments will not have any discretionary power over the composition of the Compartment's investment portfolio or over the underlying assets of the forward financial instruments within the limits and under the conditions provided for by regulations.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment. Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the "Agent") to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs/expenses, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs/expenses will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating costs/expenses and on the entities to which these costs/expenses are paid will be provided in the Compartment's annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs/expenses borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs/expenses do not increase the Compartment's overall operating costs/expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs/expenses.

When Société Générale acts as counterparty to all transactions constituting effective portfolio management techniques, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

8. Contracts constituting financial guarantees

In all cases where the investment strategy used exposes the Compartment to counterparty risk, in particular in connection with temporary purchases and sales of securities, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

Pursuant to the terms of the contract signed with the Agent (see section 7 on “Securities financing transactions”), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company’s Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company’s relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company’s Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company’s senior management and/or to the Société Générale group’s Risk department.

Risk profile:

The shareholder’s money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment’s equity price can deviate from its indicative net asset value. The liquidity of the Compartment’s equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment’s indicative net asset value, and/or
- iv) A market maker’s violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace’s IT or electronic systems.

- Risk of concentration

The Compartment reproduces the performance of the Benchmark Indicator concentrated on a limited number of underlying securities. The exposure to such a low-diversified Benchmark Indicator may lead to a volatility higher than that of a more diversified index as well as a higher liquidity risk in the case of deterioration of the liquidity or a suspension of listing of one or more components of the Benchmark Indicator.

- Risk related to the use of derivative instruments

The Compartment may use forward financial instruments ("FFIs") traded over the counter or listed FFIs, in particular futures contracts and/or hedging swaps. These FFIs may involve a range of risks, at the contract level, including (but not limited to) the following: counterparty risk, hedging event, event affecting the Benchmark Indicator, tax regime risk, regulatory risk and liquidity risk. These risks may directly affect an FFI and may lead to an adjustment or even early termination of the FFI's contract, which may affect the net asset value of the Compartment.

Investment in FFIs may involve a high level of risk. The amount required to trade certain FFIs is potentially much lower than the exposure obtained through these instruments, which implies a "lever effect" at the level of each transaction. A relatively limited market movement would then have a proportionally very high impact, which may be favourable or unfavourable to the Compartment. The market value of FFIs is very volatile and can therefore be subject to significant variations.

The Compartment may use over-the-counter FFIs. Over-the-counter transactions may be less liquid than transactions traded on organized markets, where trading volumes are generally higher and prices may be more volatile.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and financial futures. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed.

Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Currency risk linked to the Compartment listing

The Compartment may be listed on certain markets of multilateral trading facilities in a currency other than that of the Benchmark Indicator. Investors buying the Compartment in a currency other than that of the Benchmark Indicator are exposed to currency risk. Therefore, the value of the investment made in a currency other than that of the Benchmark Indicator may be reduced in spite of an increase of the value of the benchmark Indicator, due to exchange rate fluctuations.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Belgian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 14 June 2002.*
- *Compartment creation date: 31 July 2002.*

Activity report

The investment objective of the sub-fund is to track the performance of BEL20 Private Return index EUR (Ticker:BELPRX).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BEL 20 TR (DR) UCITS ETF - Dist	FR0000021842	EUR	11.55% ⁽¹⁾	12.02%		168.95%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques”.

The Tracking Error is 0.0349% for the sub-fund. The Tracking Error target for the year was 0.2%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company’s voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company’s Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company’s method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has defined a shareholder engagement policy that includes a voting policy and an engagement policy. This document is available on Lyxor website.

The scope for voting is the following:

French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers.

To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

In terms of engagement, Lyxor joined the Climate Action 100+ initiative, committing itself to asking companies to improve their governance on climate change, reduce their greenhouse gas emissions and strengthen their financial climate-related communication through the implementation of the TCFD (Task Force on Climate-Related Financial Disclosures) recommendations.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethics data to identify companies considered in violation of its Defense policy.

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products.

- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy.

- MSCI and Sustainalytics ESG research to integrate ESG issues.

- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 38 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

In terms of the exercise of voting rights, the details of the vote on the fund are presented below.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

- Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

- The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

- Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

- A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

- Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

- Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

Portfolio ESG Rating as of October 2019

ESG score	Environmental	Social	Governance

Laggards (B,CCC) 6%

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 0%
Yellow Flag 29%
Green Flag 71%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	96%
80	113	86	Scope 1 reported (vs estimated)	94%
			Scope2 reported (vs estimated)	74%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	12.2%	5.9%	7.0%
Some efforts	53.9%	64.0%	54.0%
Limited efforts/Information	15.7%	23.7%	0.0%
No effort/No evidence	18.1%	6.4%	39.0%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	Liquid Fuel
Natural Gas	Nuclear
Renewables	Thermal Coal

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	14%
20-49.9%	0%
50-100%	7%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	12.1%
Energy Efficiency	15.4%
Green Building	7.8%
Pollution Prevention	15.4%
Sustainable Water	8.6%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.3%
Energy Efficiency	0.5%
Green Building	0.5%
Pollution Prevention	5.2%
Sustainable Water	0.1%

Voting Activity

By exercising its voting rights, Lyxor can contribute to improve the economic and financial performance of the companies in which it invests on behalf of its clients, with the aim of encouraging the adoption of best practices and mitigate the risk of business failure.

Data presented below reflects the exercise of Lyxor's voting rights since January 1st.

Meeting overview

In order to prevent the excessive costs inherent in the voting process, Lyxor attends general meetings when the consolidated holding represents more than 0.10% of the company's share capital. This table details the number of General Meetings in which Lyxor participated compared to all those held by issuers included in the fund.

Number of meetings	25
Number of Voted Meetings	2
Participation rate at General Meetings	8.0%

Instruction overview

As a responsible shareholder, Lyxor opposes resolutions that are not, in our opinion, in the interests of the shareholder. The table shows the distribution of FOR / AGAINST / ABSTENTION votes by resolution category.

Resolution	For	Against	Abstention
Routine/Business	100.0%	0.0%	0.0%
Directors Related	53.3%	46.7%	0.0%
Capitalization	100.0%	0.0%	0.0%
Non-Salary Comp.	100.0%	0.0%	0.0%

Breakdown by country

In 2019, the Lyxor' voting scope was the European issuers.

The data details the geographical distribution of the General Meetings at which the Lyxor BEL 20 TR (DR) UCITS ETF fund participated during the financial year.

Netherlands	50.0%
Belgium	50.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(* For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

Lyxor's best selection and execution policy

Information on best selection and execution policies is available at www.lyxor.com

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

As at 31 October 2019, the CIU does not have a securities position subject to the SFTR regulations, i.e. repurchase agreements, securities or commodities lending/borrowing, purchase/resale or sale/purchase transactions, margin call lending transactions and global income swap (TRS) agreements.

However, during the financial year, the CIU had recourse to securities lending/borrowing transactions subject to the SFTR regulations which generated income in the amount of €20,413.64 from which were deducted direct and indirect operating costs/expenses in the amount of €10,991.96 borne by the Management Company and/or the Agent (where applicable).

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial manager by delegation.

For this Compartment, the following fees can be added to the operation and management fees (see summary table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.50% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities	The amount of the transaction	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in Euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

In the event of a distribution, the Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BTP DAILY (2X) LEVERAGED is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor BTP Daily (2x) Leveraged UCITS ETF Compartment (hereafter the “Compartment”) is continuously exposed to rate securities listed in euros.

The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the market for Italian government bonds with residual maturities of 8.5 to 11 years while reproducing the evolution of the Solactive BTP Daily (-2x) Leveraged Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a strategy index developed by Solactive AG, using a proprietary methodology. It is calculated and maintained by Solactive AG.

The Benchmark Indicator offers reverse exposure, with a daily leverage effect x2, to the rise or fall in the trend the market for Italian government bonds with residual maturities of 8.5 to 11 years, of which Long-Term Euro-BTP futures contracts are an indicator representative, with daily x2 leverage. Thus, in the event of a fall in the Long-Term Euro-BTP over a trading day, the net asset value of the Compartment will increase double on the same trading day and, in the event of a rise in the Long-Term Euro-BTP, the daily net asset value of the Compartment will decrease doubling on the same trading day and shareholders will not benefit from the rise in the Long-Term Euro-BTP.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to the inverse of twice the daily performance of the Long-Term Euro-BTP futures, cumulated with the interest (at the reference rate) received daily on the valuation of the previous day's fixing of the Benchmark Indicator.

The Benchmark Indicator represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a market day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The performance tracked is that of the Benchmark Indicator's closing fixing in Euros.

As the Benchmark Indicator's calculation methodology is not based on a direct exposure to BTP bonds, but on indirect investment in futures, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: <https://www.solactive.com>.

Benchmark indicator publication

The Benchmark Indicator is revised daily.

The frequency of this adjustment could have an impact on the Compartment's costs and could therefore diminish its performance.

Benchmark indicator revision and composition

The Benchmark Indicator is calculated daily on the official closing fixing of Long-Term Euro-BTP futures at 5:15 pm. The Benchmark Indicator fixing is available on the website: <https://www.solactive.com>.

Pursuant to Article 34 of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive BTP Daily (-2x) Leveraged Index, is registered in ESMA's register of benchmark index administrators.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used which describes the measures to be implemented in the event of substantial changes to an index or the cessation of provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Interest rate sensitivity range within which the UCITS is managed:	Between 10 and 22
Currencies in which securities held by the Compartment are listed:	Euro: from 0 to 100% of net assets Others: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : from 0 to 100% of net assets Emerging countries: 0% of net assets

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The investment in the assets of undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:

- o Senior debt,
- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.

- Of diversification, in particular:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value.

The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying BTP futures at the Benchmark Indicator. For example, if the underlying BTP futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying BTP futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying BTP futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	10%	110	20%	120	x2
day 2	-11%	97.9	-22%	93.6	x2
Whole period	-2.10%		-12.00%		x3.05

Negative scenario 2:

Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	-5%	95	-10%	90	x2
day 2	6%	100.7	12%	100.8	x2
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	20%	120	40%	140	x2
day 2	-16%	100.8	-32%	95.2	x2
Whole period	0.80%		-4.80%		x-6

- Risk that the Compartment's management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Operational risk encompasses the risk of direct or indirect losses related to a number of factors (e.g. human error, fraud and malicious acts, information system failures and external events, etc.) that could have an impact on the fund and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of bonds may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of bonds.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment bonds. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the Italian State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

The investor who subscribes to this Compartment wishes to gain inverse exposure, both upwards and downwards, with a daily leverage amplification of 2, to the performance of the market for Italian government bonds with residual maturities of 8.5 to 11 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 6 April 2011.*
- *Compartment creation date: 27 April 2011.*

Activity report

The investment objective of the sub-fund is to track the performance of Solactive BTP Daily (2x) Leveraged Index (Ticker:SODL2BTP).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BTP Daily (2x) Leveraged UCITS ETF – Acc	FR0011023639	EUR	54.94% ⁽¹⁾	56.02%		274.84%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0029% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Until 20 June 2019 the Fund's Benchmark Indicator was SGI Daily Leveraged BTP, from 21 June 2019 the Benchmark Indicator is Solactive BTP Daily (2x) Leveraged Index.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies on fund holdings an exclusion of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs or their key components, depleted uranium munitions, as well as biological, chemical, nuclear or radiological weapons).

The fund applies on fund holdings an exclusion of firms, in application of the LYXOR Climate Policy related to the thermal coal.

LYXOR excludes companies whose turnover from activities related to the extraction of thermal coal is greater than 10% or companies that belong to the energy sector and from which more than 30% of the electricity production (mixed energy) comes from coal.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethix data to identify companies considered in violation of its Defense policy,
- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products,
- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 38 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

The exclusion described above is applied to the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.40% per year
Maximum indirect costs (commission and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

appendix

Lyxor BTP Daily (2x) Leveraged UCITS ETF is a Compartment under French law approved by the AMF. The Compartment prospectus is available on the Internet site www.lyxoretf.com or by simple request to the Management Company.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by Solactive AG. Solactive AG grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the Benchmark Indicator and/or the Benchmark Indicator Mark and/or relative to the level at which the said Benchmark Indicator may be at any given moment or day, or of any other type. The Benchmark Indicator is calculated and published by Solactive AG. Solactive AG makes every effort to ensure that the Reference Indicator is calculated correctly. Regardless of its obligations towards the issuer, Solactive AG is under no obligation to report errors affecting the Benchmark Index to third parties, including investors or financial intermediaries of the Compartment. Neither the publication of the Benchmark Index by Solactive AG, nor the licensing of the Benchmark Index or its mark in connection with the Compartment constitutes a recommendation by Solactive AG to invest in the Compartment's shares and in no way represents a guarantee or opinion of Solactive AG of an investment in the Compartment's shares. Solactive AG will not be liable for the consequences of any advice or opinion arising from this statement or any omission.

Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	3.69
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	203,551.27	1,333,946.79	1,760,862.19	2,170,386.73	3,921,316.68
Debt securities	1,635,940.13	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	3.69	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	-	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	556,082.04
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Account receivable	315,752.11
Deferred settlements sales	240,329.93
-	-
-	-
-	-
Other operations	-
Debts	561,286.63
Future currency exchange operations:	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	315,752.11
Account payable	240,329.93
Accrued expenses	5,204.59
-	-
-	-
Other operations	-

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	40,000	14,623,795.00	85,500	29,087,420.35
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.40
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	-456.99

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF

LYXOR BTP DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency EUR	31.10.2019	31.10.2018	31.10.2017	31.10.2016	30.10.2015
Net assets	11,020,338.22	18,120,054.29	13,023,967.59	13,780,531.73	18,401,644.45
Number of outstanding equities	29,400	74,900	44,900	51,900	71,900
Net asset value	374.8414	241.9232	290.066	265.5208	255.9338
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	156.49	-46.94	17.29	13.23	43.30

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Bonds and other debt securities listed in euros.

The Lyxor Bund Daily (2x) Leveraged UCITS ETF Compartment (hereafter the “Compartment”) is continuously exposed to rate securities listed in euros. The exposure to the equity risk does not exceed 10% of the net assets.

The Compartment is an UCITS ETF type strategy index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the market for German government bonds with residual maturities of 8.5 to 10.5 years while reproducing the evolution of the Solactive Bund Daily (2x) Leveraged Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a strategy index developed by Solactive AG, using a proprietary methodology. It is calculated and maintained by Solactive AG.

The Benchmark Indicator offers reverse exposure, with a daily leverage effect x2, to the rise or fall in the trend the market for German government bonds with residual maturities of 8.5 to 10.5 years, of which Euro-Bund futures contracts are an indicator representative, with daily x2 leverage. Thus, in the event of a fall in the Euro-Bund over a day, the net asset value of the Compartment will increase double on the same day and, in the event of a rise in the Euro-Bund, the daily net asset value of the Compartment will decrease doubling and shareholders will not benefit from the rise in the Euro-Bund.

Euro-Bund futures are a representative indicator of the German government bond market with residual maturities between 8.5 and 10.5 years, quoted on Eurex, and whose methodology is available on: www.eurexchange.com.

The daily performance of the Benchmark Indicator is equal to the inverse of twice the daily performance of the Euro-Bund futures, cumulated with the interest (at the reference rate) received daily on the valuation of the previous day's fixing of the Benchmark Indicator.

It is therefore an index that represents a short selling strategy with an amplifying x2 leverage on the Euro-Bund futures with daily rebalancing. An additional rebalancing may be carried out during the session if the Benchmark Indicator drops by more than 40% during a business day (i.e. if the variation of the daily price of the Bund future, in absolute value, is greater than 20%).

The performance tracked is that of the Benchmark Indicator's closing fixing in Euros.

As the Benchmark Indicator's calculation methodology is not based on a direct exposure to the German government bonds but on indirect investment in futures, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.solactive.com.

Benchmark indicator revision and composition

The Benchmark Indicator is revised daily.

The frequency of this adjustment could have an impact on the Compartment's costs and could therefore diminish its performance.

Benchmark indicator publication

The Benchmark Indicator is calculated daily on the official closing fixing of Euro-Bund futures at 5:15 pm.

The Benchmark Indicator fixing is available on the website: <https://www.solactive.com>.

Pursuant to Article 34 of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive 10Y US Treasury Futures Daily (-2x) Leveraged Index, is registered in ESMA's register of benchmark index administrators.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used which describes the measures to be implemented in the event of substantial changes to an index or the cessation of provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the German government bonds market with an average maturity of 10 years for which the Benchmark Indicator is a representative indicator.

The financial securities held as assets by the Compartment will mainly be securities that made up the Benchmark Indicator as well as other international equities of all economic sectors, listed on all markets, including small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by a non-member State of the OECD. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The aforementioned securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The aforementioned securities will be bonds chosen on the basis of criteria:

- of eligibility, in particular:
 - Senior debt,
 - Fixed maturity,
 - Maximum residual maturity,
 - Minimum issuing amount,
 - Requirement of a minimal threshold in S&P rating or equivalent.
- of diversification, in particular:
 - Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - Geographical area,
 - Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

The investment in the assets of undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the securities held as assets by the Compartment (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

Interest rate sensitivity range within which the UCITS is managed:	Between 10 and 22
Currencies in which securities held by the Compartment are listed:	Euro: up to 100% of net assets Others: up to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets
Geographical area of issuers of securities to which the Compartment is exposed:	Geographical area: Eurozone : up to 100% of net assets Emerging countries: 0% of net assets

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The Compartment will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State’s local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment’s assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting the price or level of the underlying Bund futures at the Benchmark Indicator on a daily basis. In particular, any depreciation of the underlying market will be amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the performance of the underlying Bund futures at the Benchmark Indicator.

For example, if the underlying Bund futures at the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the ETF will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the underlying Bund futures at the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying Bund futures at the Benchmark Indicator depreciate by 5% per day for 2 consecutive banking days, they will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	10%	110	20%	120	x2
day 2	-11%	97.9	-22%	93.6	x2
Whole period	-2.10%		-6.40%		x3.05

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Negative scenario 2:

Case in which the resulting leverage is less than 2 within the scenario of an increase of the Benchmark Indicator's underlying.

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	-5%	95	-10%	90	x2
day 2	6%	100.7	12%	100.8	x2
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show an increase over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is negative over the period:

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
		100		100	
day 1	20%	120	40%	140	x2
day 2	-16%	100.8	-32%	95.2	x2
Whole period	0.80%		-4.80%		x-6

- Risk that the management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Operational risk encompasses the risk of direct or indirect losses related to a number of factors (e.g. human error, fraud and malicious acts, information system failures and external events, etc.) that could have an impact on the fund and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's bonds on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the index, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the German State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of deterioration of the rating assigned by rating agencies to the issuer, which would have a negative impact on the price of the issuer's bonds as well as the risk of default on the part of an issuer. The Compartment is exposed to the credit risk of the German State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

The investor who subscribes to this Compartment wishes to gain inverse exposure, both upwards and downwards, with a daily leverage amplification of 2, to the performance of the market for German government bonds with residual maturities of 8.5 to 10.5 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 6 April 2011.*
- *Compartment creation date: 27 April 2011.*

Activity report

The investment objective of the sub-fund is to track the performance of Solactive Bund Daily (2x) Leveraged Index (Ticker:SODL2BUN).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Bund Daily (2x) Leveraged UCITS ETF – Acc	FR0011023654	EUR	16.53% ⁽¹⁾	17.08%		181.51%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0346% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is above the anticipated tracking error level. This difference is considered as immaterial.

The main explanation for the fact that the actual tracking error exceeds the expected tracking error is the replacement of the benchmark index in June 2019, which engendered transitional costs arising from the adjustment of exposure from the SGI Daily Leveraged Bund to the Solactive Bund Daily (2x) Leveraged Index. This is unlikely to reoccur.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies on fund holdings an exclusion of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs or their key components, depleted uranium munitions, as well as biological, chemical, nuclear or radiological weapons).

The fund applies on fund holdings an exclusion of firms, in application of the LYXOR Climate Policy related to the thermal coal.

LYXOR excludes companies whose turnover from activities related to the extraction of thermal coal is greater than 10% or companies that belong to the energy sector and from which more than 30% of the electricity production (mixed energy) comes from coal.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethix data to identify companies considered in violation of its Defense policy.
- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products.
- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy.
- MSCI and Sustainalytics ESG research to integrate ESG issues.
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 38 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

The exclusion described above is applied to the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees.

Fees invoiced to the Compartment	Basis	Schedule, rate (including tax)
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.20% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (Not certified by the auditor)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

appendix

Lyxor Bund Daily (-2x) Leveraged UCITS ETF is a Compartment under French law approved by the AMF. The Compartment prospectus is available on the Internet site www.lyxoretf.com or by simple request to the Management Company.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by Solactive AG. Solactive AG grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the Benchmark Indicator and/or the Benchmark Indicator Mark and/or relative to the level at which the said Benchmark Indicator may be at any given moment or day, or of any other type. The Benchmark Indicator is calculated and published by Solactive AG. Solactive AG makes every effort to ensure that the Reference Indicator is calculated correctly. Regardless of its obligations towards the issuer, Solactive AG is under no obligation to report errors affecting the Benchmark Index to third parties, including investors or financial intermediaries of the Compartment. Neither the publication of the Benchmark Index by Solactive AG, nor the licensing of the Benchmark Index or its mark in connection with the Compartment constitutes a recommendation by Solactive AG to invest in the Compartment's shares and in no way represents a guarantee or opinion of Solactive AG of an investment in the Compartment's shares. Solactive AG will not be liable for the consequences of any advice or opinion arising from this statement or any omission.

2. Evolution of the net assets

	31.10.2019	31.10.2018
Currency	EUR	EUR
Net assets at the start of the fiscal year	22,467,270.58	15,465,127.19
Subscriptions (including subscription commission acquired by the Compartment)	1,450,789.50	21,071,948.80
Redemptions (less the redemption commission acquired by the Compartment)	-15,417,679.50	-15,048,748.50
Capital gains generated on deposits and financial instruments	2,320,340.04	851,123.43
Capital losses generated on deposits and financial instruments	-821,775.66	737,033.75
Capital gains generated on financial contracts	65,195,294.49	44,565,368.06
Capital losses generated on financial contracts	-62,820,950.38	-43,683,917.25
Negotiation fees	-	-
Exchange differentials	-	-
Changes to the estimate difference of the deposits and financial instruments:	194,365.77	4,543.46

Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0.77	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	-	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	307,223.06
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Account receivable	307,223.06
-	-
-	-
-	-
Other operations	-
Debts	309,294.87
Future currency exchange operations:	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlements purchases	307,223.06
Accrued expenses	2,071.81
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	5,000	1,450,789.50	55,000	15,417,679.50
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.20
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	12,744.03

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.10 Allocation of the earnings table (in the Compartment's currency of account)

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits

LYXOR BUND DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

3.12 Table of the earnings and other characteristic elements of the Compartment during the last 5 fiscal years

Currency					
EUR	31.10.2019	31.10.2018	31.10.2017	31.10.2016	30.10.2015
Net assets	12,105,038.11	22,467,270.58	15,465,127.19	20,174,190.04	19,111,493.96
Number of outstanding equities	43,000	93,000	66,000	89,000	94,000
Net asset value	281.5125	241,5835	234.3201	226.6762	203.3137
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	51.68	8.40	-2.35	23.16	22.33

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR BTP DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR BTP DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Compartment Lyxor BTP Daily (-2x) Inverse UCITS ETF (the “Compartment”) is an index-based UCITS of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the market for Italian government bonds with residual maturities of 8.5 to 11 years while reproducing the evolution of the Solactive BTP Daily (-2x) Inverse Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.02%.

Benchmark indicator:

The Benchmark Indicator is a strategy index developed by Solactive AG, using a proprietary methodology. It is calculated and maintained by Solactive AG.

The Benchmark Indicator offers reverse exposure, with a daily leverage effect x2, to the rise or fall in the trend the market for Italian government bonds with residual maturities of 8.5 to 11 years, of which Long-Term Euro-BTP futures contracts are an indicator representative, with daily x2 leverage. Thus, in the event of a fall in the Long-Term Euro-BTP over a trading day, the net asset value of the Compartment will increase double on the same trading day and, in the event of a rise in the Long-Term Euro-BTP, the daily net asset value of the Compartment will decrease doubling on the same trading day and shareholders will not benefit from the rise in the Long-Term Euro-BTP.

The Long-Term Euro-BTP futures are a representative indicator of the market for Italian government bonds with the residual maturity of between 8.5 and 11 years, and initial maturities of less than 16 years. They are listed on Eurex, and their methodology is available at www.eurexchange.com

The daily performance of the Benchmark Indicator is equal to the inverse of twice the daily performance of the Long-Term Euro-BTP futures, cumulated with the interest (at the reference rate) received daily on the valuation of the previous day's fixing of the Benchmark Indicator.

The Benchmark Indicator represents a long selling strategy with an amplifying x2 leverage on the Long-Term Euro-BTP futures, with daily rebalancing. An additional rebalancing may be carried out during the session if the strategy index drops by more than 40% during a trading day (i.e. if the intraday decline of the Long-Term Euro-BTP futures, in absolute value, is greater than 20%).

The performance tracked is that of the Benchmark Indicator’s closing fixing in Euros.

As the Benchmark Indicator's calculation methodology is not based on a direct exposure to the Italian government bonds, but on indirect investment in futures, the Compartment's performance will be impacted by the cost related to the roll of the aforesaid futures on a quarterly basis.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment's performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment's equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: www.sgindex.fr

Benchmark indicator publication

The Benchmark Indicator is revised daily.

The frequency of this adjustment could have an impact on the Compartment's costs and could therefore diminish its performance.

Benchmark indicator revision and composition

The Benchmark Indicator is calculated daily on the official closing fixing of Long-Term Euro-BTP futures at 5:15 pm. The Benchmark Indicator fixing is available on the website: <https://www.solactive.com>.

Pursuant to Article 34 of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive BTP Daily (-2x) Inverse Index, is registered in ESMA's register of benchmark index administrators.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used which describes the measures to be implemented in the event of substantial changes to an index or the cessation of provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is inversely exposed with a daily amplifying x2 leverage, upward or downward, to the daily performance of the Italian government bonds market for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed, for up to 20% of its assets, to debts issued by an OECD member State. This 20% limit can be increased to 35% for a single bond when this proves to be justified by exceptional market conditions, notably when certain securities are excessively dominant and/or in case of high volatility of a debt issue, or in case of a political and/or economic event that is having or could have an incidence on the assessment of an issuing State's debt and/or that could affect an issuing State's credit rating, or any other event likely to affect the liquidity of a financial security included within the Benchmark Indicator.

Notwithstanding the hypotheses indicated in the above paragraph, securities guaranteed or issued by a same issuer can represent up to 35% of the assets, and 100% of the assets if the Compartment holds at least 6 debt issues, none of which exceeds 30% of the assets. The securities are financial instruments issued or guaranteed by an OECD member State, the local or regional authorities of a European Union Member State, or a party to the EEA agreement.

The Compartment's sensitivity to the interest rate is between 10 and 22.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international securities (equities, bonds), listed in one of the currencies of an OECD country.

The investment in the assets of undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The aforementioned securities will be bonds chosen on the basis of criteria of eligibility, in particular:

- o Senior debt,
- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.

Of diversification, in particular:

- o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives guarantee in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly inversely exposed to the fluctuations affecting the price or level of the underlying BTP futures at the Benchmark Indicator on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even higher depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the opposite of the performance of the underlying BTP futures at the Benchmark Indicator. For example, if the underlying BTP futures of the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the underlying BTP futures of the Benchmark Indicator will have appreciated by 4.5% over the same period.

LYXOR BTP DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

If the underlying BTP futures of the Benchmark Indicator depreciate by 10% a given banking day then is appreciate by 6% the next banking day, they will have depreciated by a total of 4.6%, while the Compartment will be appreciated (before deduction of the applicable fees) by 5.6% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	10%	100	-20%	100	x2
day 2	-5%	110	10%	80	x2
		104.5		88	
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2:

Case in which the resulting negative leverage is less than 2 within the scenario of a decrease of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	-10%	100	20%	100	x2
day 2	6%	90	-12%	120	x-2
		95.4		105.6	
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show a decrease over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is positive over the period

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1	5%	100	-10%	100	x-2
day 2	-5%	105	10%	90	x2
		99.75		99	
Whole period	-0.25%		-1.00%		x 4

- Risk that the Compartment's management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses future financial instruments (“FFI”) negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator.

These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment’s net asset value.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Operational risk encompasses the risk of direct or indirect losses related to a number of factors (e.g. human error, fraud and malicious acts, information system failures and external events, etc.) that could have an impact on the fund and/or investors. The Management Company aims to reduce this risk through the implementation of controls and procedures.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment’s manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment’s underlyings can affect the Compartment’s tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment’s net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment’s underlyings, the Compartment’s net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment’s net asset value can also be affected.

If the event persists, the Compartment’s manager will decide on measures having to be adopted, which can have an impact on the Compartment’s net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator’s components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator’s performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as “OTC derivatives”) and/or efficient portfolio management techniques (hereinafter referred to as “EPMTs”). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF’s equity price can deviate from its indicative net asset value. The liquidity of the Compartment’s equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment’s indicative net asset value, and/or
- iv) A market maker’s violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace’s IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the Italian State and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment’s underlyings.

- Credit risk

It represents the potential risk of improvement of the issuer credit quality that could notably led to an improvement of the rating assigned by rating agencies to the issuer, which would have a positive impact on the price of the issuer’s bonds and thus have a negative impact on the net asset value of the Compartment. The Compartment is exposed to the credit risk of the Italian State.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

The investor who subscribes to this Compartment wishes to gain inverse exposure, both upwards and downwards, with a daily leverage amplification of 2, to the performance of the market for Italian government bonds with residual maturities of 8.5 to 11 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As this product is an arbitration product, this Compartment could not be suitable for investors that wish to make a medium or long-term investment. "U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 12 April 2011.*
- *Compartment creation date: 27 April 2011.*

Activity report

The investment objective of the sub-fund is to track the performance of Solactive BTP Daily (-2x) Inverse Index (Ticker:SODI2BTP).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor BTP Daily (-2x) Inverse UCITS ETF - Acc	FR0011023621	EUR	-38.34% ⁽¹⁾	-38.02%		-82.48%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0744% for the sub-fund. The Tracking Error target for the year was 0.02%.

The realized tracking error level is above the anticipated tracking error level. This difference is considered as immaterial.

The main explanation for the fact that the actual tracking error exceeds the expected tracking error is the replacement of the benchmark index in June 2019, which engendered transitional costs arising from the adjustment of exposure from the SGI Daily Double Short BTP to Solactive BTP Daily (-2x) Inverse Index. This is unlikely to reoccur.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies on fund holdings an exclusion of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs or their key components, depleted uranium munitions, as well as biological, chemical, nuclear or radiological weapons).

The fund applies on fund holdings an exclusion of firms, in application of the LYXOR Climate Policy related to the thermal coal.

LYXOR excludes companies whose turnover from activities related to the extraction of thermal coal is greater than 10% or companies that belong to the energy sector and from which more than 30% of the electricity production (mixed energy) comes from coal.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethix data to identify companies considered in violation of its Defense policy.
- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products.
- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy.
- MSCI and Sustainalytics ESG research to integrate ESG issues.
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 36 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

The exclusion described above is applied to the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

LYXOR BTP DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the financial manager by delegation when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the CIU	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.40% per year
Maximum indirect costs (commission and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Capitalisation of all the amounts available for distribution.

appendix

Lyxor BTP Daily (-2x) Inverse UCITS ETF is a Compartment under French law approved by the AMF. The Compartment prospectus is available on the Internet site www.lyxoretf.com or by simple request to the Management Company.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by Solactive AG. Solactive AG grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the Benchmark Indicator and/or the Benchmark Indicator Mark and/or relative to the level at which the said Benchmark Indicator may be at any given moment or day, or of any other type. The Benchmark Indicator is calculated and published by Solactive AG. Solactive AG makes every effort to ensure that the Reference Indicator is calculated correctly. Regardless of its obligations towards the issuer, Solactive AG is under no obligation to report errors affecting the Benchmark Index to third parties, including investors or financial intermediaries of the Compartment. Neither the publication of the Benchmark Index by Solactive AG, nor the licensing of the Benchmark Index or its mark in connection with the Compartment constitutes a recommendation by Solactive AG to invest in the Compartment's shares and in no way represents a guarantee or opinion of Solactive AG of an investment in the Compartment's shares. Solactive AG will not be liable for the consequences of any advice or opinion arising from this statement or any omission.

Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-10.32	3.87	-5.54	0.08	-7.54

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 27 April 2011.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Terms of determination and allocation of amounts available for distribution:

Class of Acc equity: Capitalisation of all the amounts available for distribution.

Class of Dist equity: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Compartment is to be inversely exposed with a daily x2 leverage, upwards or downwards, to the daily performance of the US Treasury bonds market with residual maturities of 6.5 to 10 years while reproducing the evolution of the Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index (the “Benchmark Indicator”) listed in US Dollar (USD), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.07%.

Benchmark indicator:

The Benchmark Indicator is a strategy index developed by Solactive AG, using a proprietary methodology. It is calculated and maintained by Solactive AG.

The Benchmark Indicator provides inverse exposure with 2x daily leverage to increases and decreases in the prices of US Treasury bonds with residual maturities of 6.5 to 10 years, for which CBOT 10-Year T-Note futures are a representative indicator of performance with daily x2 leverage. Therefore, if the price of CBOT 10-Year T-Note futures declines on a given trading day, the Compartment’s net asset value may be expected to increase by twice as much that day, whereas if the price of CBOT 10-Year T-Note futures rises on a given trading day, the Compartment’s net asset value may be expected to decrease by twice as much that day and shareholders will not profit from the increase in CBOT 10-Year T-Note prices.

CBOT 10-Year T-Note futures are a representative index of the market for US Treasury bonds with residual maturities of 6.5 to 10 years. The index methodology is available at: <https://www.cmegroup.com>.

The Benchmark Indicator’s daily performance is equivalent to the inverse of twice the daily performance of CBOT 10Y T-Note futures plus the interest at the fed funds rate received daily on the value of the Benchmark Indicator’s fixing the previous day.

The index is therefore representative of a shorting strategy on CBOT 10-Year T-Note futures with 2x leverage and daily adjustment. Further adjustment during a trading session is possible if the Benchmark Indicator falls by more than 40% on a trading day (i.e. if the absolute value of CBOT 10-Year T-Note futures increases by more than 20% on a given day).

The performance tracked is that of the Benchmark Indicator’s closing fixing in USD.

Since the methodology used to calculate the Benchmark Indicator is not based on direct investment in US Treasury bonds but on indirect investment in futures, the Compartment’s performance will be affected by the cost of ‘rolling over’ positions on these futures contracts every quarter.

This phenomenon could negatively and progressively impact, potentially in a significant manner, the gap between the Compartment’s performance and the gross performance of the short positions on the underlyings of the aforesaid futures, notably in case of long-term investment in the Compartment’s equities.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition of the Benchmark Indicator are available at the following Internet site: <https://www.solactive.com>.

Benchmark indicator revision and composition

The Benchmark Indicator is revised daily.

The frequency of this adjustment could have an impact on the Compartment's costs and could therefore diminish its performance.

Benchmark indicator publication

The Benchmark Indicator is calculated daily on the value of the fixing of CBOT 10-Year T-Note futures at 3.00 pm Eastern Standard Time.

The Benchmark Indicator's fixing is available on the Internet at: <https://www.solactive.com>.

Pursuant to Article 34 of European Parliament and Council Regulation (EU) 2016/1011 of 8 June 2016, Solactive AG, the administrator of the Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index, is registered in ESMA's register of benchmark index administrators.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmarks used which describes the measures to be implemented in the event of substantial changes to an index or the cessation of provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

An investor subscribing to this Compartment is inversely exposed with a daily amplifying x2 leverage, upward or downward, to the performance of the US Treasury bond market with residual maturities of 6.5 to 10 years for which the Benchmark Indicator is a representative indicator.

The securities held as assets by the Compartment will mainly be bonds issued by a Member State of the OECD or issued by non-government issuers residing in one of the Member States of the OECD.

Interest rate sensitivity range within which the UCITS is managed:	Between 8 and 20
Currencies in which securities held by the Compartment are listed:	US: from 0 to 100% of net assets
Level of foreign exchange risk borne by the Compartment:	Up to 0% of net assets ⁽¹⁾
Geographical area of issuers of securities to which the Compartment is exposed:	US: from 0 to 100% of net assets

⁽¹⁾ The equity classes that are not denominated in USD may however be exposed to currency risk.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the regulatory ratios, bonds issued by an OECD member country or by a non-governmental issuer resident in an OECD country.

The aforementioned securities will be bonds chosen on the basis of criteria:

- Of eligibility, in particular:
 - o Senior debt,

- o Fixed maturity,
- o Maximum residual maturity,
- o Minimum issuing amount,
- o Requirement of a minimal threshold in S&P rating or equivalent.
- Of diversification, in particular:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives guarantee in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets. In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);

- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Interest rate risk

The price of a bond can be affected by unexpected fluctuations of interest rates, which can themselves notably be affected by yield curves. The bonds included in the composition of the Benchmark Indicator are therefore exposed to such fluctuating interest rates. In general, a bond's price increases when interest rates drop, while this price will drop when those of interest rates rise.

- Risk of daily readjustment of the leverage

Investors are doubly inversely exposed to the fluctuations affecting the price or level of the underlying CBOT 10y US Treasury futures at the Benchmark Indicator on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even higher depreciation of the Compartment's net asset value.

The daily readjustment of the exposure shown in the formula of the underlying "double short" Benchmark Indicator implies that, over a period of more than one banking day, the Compartment's performance will not be equal to the double of the opposite of the performance of the underlying CBOT 10y US Treasury futures at the Benchmark Indicator. For example, if the underlying CBOT 10y US Treasury futures of the Benchmark Indicator appreciate by 10% on one banking day and then depreciate by 5% on the next banking day, the Compartment will have depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the underlying CBOT 10y US Treasury futures of the Benchmark Indicator will have appreciated by 4.5% over the same period.

If the underlying CBOT 10y US Treasury futures of the Benchmark Indicator depreciate by 10% a given banking day then is appreciate by 6% the next banking day, they will have depreciated by a total of 4.6%, while the Compartment will be appreciated (before deduction of the applicable fees) by 5.6% over the same period.

Negative scenario 1:

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1		100		100	
	10%	110	-20%	80	x-2
day 2		104.5	10%	88	x-2
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2:

Case in which the resulting negative leverage is less than 2 within the scenario of a decrease of the Benchmark Indicator's underlying

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1		100		100	
	-10%	90	20%	120	x-2
day 2		95.4	-12%	105.6	x-2
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day, and in case of strong volatility of the Benchmark Indicator's underlyings over this period, the Compartment's net asset value will decline even if the Benchmark Indicator's underlyings also show a decrease over this same period.

Inverted leverage scenario 3:

Case in which the resulting leverage is positive over the period

	Underlying of the Benchmark Indicator		Strategy index		induced leverage
	performance day i	Day value i	performance day i	Day value i	
day 1		100		100	
	5%	105	-10%	90	x-2
day 2		99.75	10%	99	x-2
Whole period	-0.25%		-1.00%		x4

- Risk that the Compartment's management objective may only be partially reached:

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to its formula or calculation method (other than a minor modification such as the adjustment of the underlyings used with this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk related to low diversification

The Benchmark Indicator to which the investors are exposed only covers the market for bonds issued by the US government and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Credit risk

It represents the potential risk of improvement of the issuer credit quality that could notably lead to an improvement of the rating assigned by rating agencies to the issuer, which would have a positive impact on the price of the issuer's bonds and thus have a negative impact on the net asset value of the Compartment. The Compartment is exposed to the credit risk of the US government.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

The investor who subscribes to this Compartment wishes to gain inverse exposure, both upwards and downwards, with a daily leverage amplification of 2, to the performance of the market for US Treasury bonds with residual maturities of 6.5 to 10 years.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As this product is an arbitration product, this Compartment could not be suitable for investors that wish to make a medium or long-term investment.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 10 December 2013.*
- *Compartment creation date: 8 January 2014.*

Activity report

The investment objective of the sub-fund is to track the performance of the Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index.

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor 10Y US Treasury Daily (-2x) Inverse UCITS ETF - Acc	FR0011607084	USD	-14.82% ⁽¹⁾	-14.46%		-23.57%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0064% for the sub-fund. The Tracking Error target for the year was 0.07%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Until 20 August 2019 the Fund's Benchmark Indicator was SGI Double Short 10y US Treasury Index (TR), from 21 August 2019 the Benchmark Indicator is Solactive 10Y US Treasury Futures Daily (-2x) Inverse Index.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies on fund holdings an exclusion of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs or their key components, depleted uranium munitions, as well as biological, chemical, nuclear or radiological weapons).

The fund applies on fund holdings an exclusion of firms, in application of the LYXOR Climate Policy related to the thermal coal.

LYXOR excludes companies whose turnover from activities related to the extraction of thermal coal is greater than 10% or companies that belong to the energy sector and from which more than 30% of the electricity production (mixed energy) comes from coal.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethix data to identify companies considered in violation of its Defense policy,
- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products,
- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 38 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

The exclusion described above is applied to the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

After carefully analyzing the Indicators and data available to take into account and measure the transition risks that climate change poses to Issuers, Lyxor will not report on those matters at this time. We will work with our external providers in order to enhance our knowledge to report and better reflect the risk of transition in the coming years.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

LYXOR 10Y US TREASURY DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives. They are invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	Maximum 0.20% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in USD.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change:
 - Index change in August 2019.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equity: Capitalisation of all the amounts available for distribution.

Class of Dist equity: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

Lyxor 10Y US Treasury Daily (-2x) Inverse UCITS ETF is a Compartment under French law approved by the AMF. The Compartment prospectus is available on the Internet site www.lyxoretf.com or by simple request to the Management Company.

The Compartment in no way benefits from the sponsorship, support or promotion, and is not sold by Solactive AG. Solactive AG grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the Benchmark Indicator and/or the Benchmark Indicator Mark and/or relative to the level at which the said Benchmark Indicator may be at any given moment or day, or of any other type. The Benchmark Indicator is calculated and published by Solactive AG. Solactive AG makes every effort to ensure that the Reference Indicator is calculated correctly. Regardless of its obligations towards the issuer, Solactive AG is under no obligation to report errors affecting the Benchmark Index to third parties, including investors or financial intermediaries of the Compartment. Neither the publication of the Benchmark Index by Solactive AG, nor the licensing of the Benchmark Index or its mark in connection with the Compartment constitutes a recommendation by Solactive AG to invest in the Compartment's shares and in no way represents a guarantee or opinion of Solactive AG of an investment in the Compartment's shares. Solactive AG will not be liable for the consequences of any advice or opinion arising from this statement or any omission.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of eurozone countries.

At least 60% of the Lyxor FTSE Italia Mid Cap PIR (DR) UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several eurozone countries including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The management objective of this Compartment is to replicate the upwards or downwards evolution of the “FTSE Italia PIR Mid Cap Net Tax Index” (“Benchmark Indicator”) listed in euros (EUR) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

It is representative of the performance of the equities of medium-capitalisation listed on Borsa Italiana.

The maximum tracking error target between the evolution of the Compartment's net asset value and that of the Benchmark Indicator is 2%.

Benchmark indicator:

The Benchmark Indicator is the FTSE Italia PIR Mid Cap Net Tax Index.

The Benchmark Indicator is an index weighted by the adjusted market capitalisation of the free float representing the performance of the shares of the mid-market capitalization listed on Borsa Italiana.

The Benchmark Indicator includes the components of the FTSE Italia Mid Cap Index eligible for the "Piano Individuale di Risparmio a lungo termine" (PIR) according to the Italian Finance Law 2017 (Law N° 232 of 11 December 2016) as amended.

The FTSE Italia Mid Cap Index represents the 60 companies listed on Borsa Italiana that are ranked highest in terms of market capitalization and liquidity (based on daily trading volumes) and are not included in the FTSE MIB index.

Each component of the Benchmark Indicator is capped at 10% at each quarterly rebalancing of the Benchmark Indicator. Any component with a weighting greater than 10% will be reduced to a weighting of 10%. The sum of the weights of components with a weight greater than 5% is capped at 40%.

The Benchmark Indicator is rebalanced quarterly, in March, June, September and December.

The Benchmark Indicator is a Net Dividends Reinvested Index, which includes the returns of index components, including net dividends and other distributions, in the calculation of the index’s performance.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available on the Internet site: www.ftserussell.com/.

Benchmark indicator revision and composition

The Benchmark Indicator is rebalanced quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by FTSE and available on the Internet site: www.ftserussell.com/.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator is also calculated in real-time on each trading day.

The closing price of the Benchmark Indicator is available on the Internet site: www.ftserussell.com/.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall FTSE of the benchmark index FTSE Italia PIR Mid Cap Net Tax Index has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Benchmark Indicator has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

The Compartment's equities are included in the list of investments eligible for the "Piano Individuale di Risparmio a lungo termine" (PIR) scheme under the 2017 Italian Finance Law. (Law No. 232 of 11 December 2016).

The Compartment must invest at least 70% of its assets in financial instruments, whether or not traded on a regulated market or multilateral trading facility, issued by or entered into with companies domiciled in Italy, or in a Member State of the European Union or EEA with a permanent establishment in Italy.

At least 30% of these financial instruments, representing 21% of the total value of the Compartment's assets, must be issued by companies not included in the FTSE MIB Index or any other equivalent index.

The Compartment may not invest more than 10% of the total value of its assets in financial instruments issued by or entered into with a single company, or companies belonging to the same group, or in cash deposits.

The Compartment may not invest in companies domiciled in countries that do not have an adequate information exchange agreement with Italy.

These investment restrictions will be respected for at least two thirds of each calendar year from 03/03/2017.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure transparency on the use of the direct index replication method (i.e. either full replication of the Benchmark Indicator or sampling to limit replication costs) and on its consequences in terms of the assets in the Compartment's portfolio, information on the updated composition of the basket of 'balance sheet' assets in the Compartment's portfolio is available on the page dedicated to the Compartment accessible on Lyxor's Internet site at www.lyxoretf.com. The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may use FFIs traded on a regulated market or over the counter.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments within the limits and under the conditions provided for by the regulations.

The counterparty to the aforementioned forward financial instruments will not have any discretionary power over the composition of the Compartment's investment portfolio or over the underlying assets of the forward financial instruments within the limits and under the conditions provided for by regulations.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment.

Expected proportion of assets under management which may be subject to securities financing transactions: 10% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the “Agent”) to provide the following services in connection with the Compartment’s temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment’s behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment’s behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

The Compartment shall be entitled to all income from the temporary disposal of securities, net of any direct and indirect operating costs.

These operating costs/expenses, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment’s management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs/expenses will be calculated as a percentage of the Compartment’s gross income. Information on direct and indirect operating costs/expenses and on the entities to which these costs/expenses are paid will be provided in the Compartment’s annual report.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs/expenses borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs/expenses do not increase the Compartment’s overall operating costs/expenses they have been excluded from ongoing expenses.

If necessary, the Compartment’s annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment’s counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs/expenses.

When Société Générale acts as counterparty to all transactions constituting effective portfolio management techniques, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

8. Financial guarantees

In all cases where the investment strategy used exposes the Compartment to counterparty risk, in particular in connection with temporary purchases and sales of securities, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets. In the event of default by the counterparty, the COMPARTMENT may dispose of the assets received from the counterparty in order to extinguish the counterparty’s debt to the COMPARTMENT as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the UCITS may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions based in an OECD country are selected and only after a thorough analysis based on the specific criteria of the Management Company's Risks department, which include, for example, financial stability, credit rating, risk exposure, credit spread, nature of business activity and track record.

The list of authorized counterparties is reviewed monthly and possibly more frequently in the event of a market shock. It involves different departments (management, risks, operations and support) of the Management Company. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risk of investing in mid-cap companies

The Compartment is exposed to mid-cap companies, which may increase market and liquidity risks. Market movements impacting the price of these securities are therefore more marked and faster than on large caps, both upward and downward. The net asset value of the Compartment may behave in the same way and therefore decline more quickly and significantly than a similar investment in large cap securities.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

The Compartment may use forward financial instruments ("FFIs") traded over the counter or listed FFIs, in particular futures contracts and/or hedging swaps. These FFIs may involve a range of risks, at the contract level, including (but not limited to) the following: counterparty risk, hedging event, event affecting the Benchmark Indicator, tax regime risk, regulatory risk and liquidity risk. These risks may directly affect an FFI and may lead to an adjustment or even early termination of the FFI's contract, which may affect the net asset value of the Compartment.

Investment in FFIs may involve a high level of risk. The amount required to trade certain FFIs is potentially much lower than the exposure obtained through these instruments, which implies a "lever effect" at the level of each transaction. A relatively limited market movement would then have a proportionally very high impact, which may be favourable or unfavourable to the Compartment.

The market value of FFIs is very volatile and can therefore be subject to significant variations.

The Compartment may use over-the-counter FFIs. Over-the-counter transactions may be less liquid than transactions traded on organized markets, where trading volumes are generally higher and prices may be more volatile.

- Risk related to the use of effective portfolio management techniques

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed. Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment's equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities market of medium-capitalisation listed on Borsa Italiana.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 7 March 2014.*
- *Compartment creation date: 28 March 2014.*

Activity report

The investment objective of the sub-fund is to track the performance of FTSE Italia PIR Mid Cap Net Tax Index EUR (Ticker: ITPIRMCN).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor FTSE Italia Mid Cap PIR (DR) UCITS ETF - Acc	FR0011758085	EUR	9.09% ⁽¹⁾	9.46%		38.74%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative expenses;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques”.

The Tracking Error is 0.0702% for the sub-fund. The Tracking Error target for the year was 2%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company’s voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company’s Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company’s method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has defined a shareholder engagement policy that includes a voting policy and an engagement policy. This document is available on Lyxor website.

The scope for voting is the following:

French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers.

To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

In terms of engagement, Lyxor joined the Climate Action 100+ initiative, committing itself to asking companies to improve their governance on climate change, reduce their greenhouse gas emissions and strengthen their financial climate-related communication through the implementation of the TCFD (Task Force on Climate-Related Financial Disclosures) recommendations.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethical data to identify companies considered in violation of its Defense policy,

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products,

- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy,

- MSCI and Sustainalytics ESG research to integrate ESG issues,

- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 36 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

In terms of the exercise of voting rights, the details of the vote on the fund are presented below.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

- Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

- The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

- Potential emissions from these same known reserves of fossil fuels (expressed in tCO2e / \$ M invested),

- A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

- Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

- Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

LYXOR FTSE ITALIA MID CAP PIR (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Portfolio ESG Rating as of October 2019

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 1%
Yellow Flag 1%
Green Flag 98%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	96%
160	154	111	Scope 1 reported (vs estimated)	97%
			Scope2 reported (vs estimated)	51%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	5.6%	0.0%	4.5%
Some efforts	51.7%	59.0%	16.5%
Limited efforts/Information	2.2%	7.1%	1.9%
No effort/No evidence	39.9%	33.3%	76.4%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

	10.9%
Power generation by fuel as maximum percentage of total (rebased at 100%)	
Hydro	14.9%
Liquid Fuel	0.0%
Natural Gas	60.8%
Nuclear	18.4%
Renewables	5.9%
Thermal Coal	

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	10%
20-49.9%	5%
50-100%	4%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	14.9%
Energy Efficiency	16.4%
Green Building	0.7%
Pollution Prevention	3.8%
Sustainable Water	12.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	4.3%
Energy Efficiency	0.2%
Green Building	0.0%
Pollution Prevention	0.2%
Sustainable Water	0.5%

Voting Activity

By exercising its voting rights, Lyxor can contribute to improve the economic and financial performance of the companies in which it invests on behalf of its clients, with the aim of encouraging the adoption of best practices and mitigate the risk of business failure.

Data presented below reflects the exercise of Lyxor's voting rights since January 1st.

Meeting overview

In order to prevent the excessive costs inherent in the voting process, Lyxor attends general meetings when the consolidated holding represents more than 0.10% of the company's share capital. This table details the number of General Meetings in which Lyxor participated compared to all those held by issuers included in the fund.

Number of meetings	74
Number of Voted Meetings	71
Participation rate at General Meetings	95.9%

Instruction overview

As a responsible shareholder, Lyxor opposes resolutions that are not, in our opinion, in the interests of the shareholder. The table shows the distribution of FOR / AGAINST / ABSTENTION votes by resolution category.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

Lyxor's best selection and execution policy

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

As at 31 October 2019, the CIU does not have a securities position subject to the SFTR regulations, i.e. repurchase agreements, securities or commodities lending/borrowing, purchase/resale or sale/purchase transactions, margin call lending transactions and global income swap (TRS) agreements.

However, during the financial year, the CIU had recourse to securities lending/borrowing transactions subject to the SFTR regulations which generated income in the amount of €462,209.95 from which were deducted direct and indirect operating costs/expenses in the amount of €248,882.28 borne by the Management Company and/or the Agent (where applicable).

Effective portfolio management techniques and derivative financial instruments

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;

Transaction commissions invoiced to the Compartment.

Direct and indirect operational costs/fees related to temporary acquisitions and sales of securities;

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.40% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None
Costs/fees related to temporary acquisition and disposal of securities	The amount of the transaction	20% maximum for the Management Company
		15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

Unit capitalisation ⁽²⁾	-3.16	7.34	37.29	-17.18	23.34

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 28 March 2014.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR GERMAN MID-CAP MDAX UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR GERMAN MID-CAP MDAX UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of eurozone countries.

At least 60% of the Lyxor German Mid-Cap MDAX UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several eurozone countries including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Dist equities: The Board of Directors reserves the right to distribute all or part of the income and/or to capitalize it once or several times a year. The realised net capital gain will be capitalised.

Management objective:

The management objective of this Compartment is to replicate the upward or downward evolution of the “MDAX Index” (the “Benchmark Indicator”), listed in euros (EUR) while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It is representative of German mid-cap companies.

The anticipated level of the ex-post tracking error under normal market conditions is 0.08%.

Benchmark indicator:

The Benchmark Indicator is the MDAX Index.

The Benchmark Indicator is a free float-adjusted market capitalization-weighted index. It represents the performance of mid-cap stocks, ranked after DAX shares in terms of market capitalisation and liquidity.

The Benchmark Indicator is calculated by Deutsche Börse AG

The Benchmark Indicator is a Dividends Reinvested Index, which includes the returns of index components, including dividends and other distributions, in the calculation of the index’s performance.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components is available on the Deutsche Börse AG Internet site: www.dax-indices.com

Benchmark indicator revision and composition

The composition of the Benchmark Indicator is reviewed semi-annually and rebalanced quarterly.

Each Benchmark Indicator is weighted by its float-adjusted market capitalisation, with the weight of each component being capped at 10% when the index is rebalanced. The float-adjusted market capitalisation is the market value of the securities issued and available for trading.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark indicator publication

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities. The Benchmark Indicator is also calculated in real-time on each trading day.

The Benchmark Indicator's closing price is available on the Deutsche Börse AG Internet site: www.dax-indices.com

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Director shall Deutsche Börse AG of the MDAX Index has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the manager intends to use primarily the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation of the international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment’s management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager by delegation reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties. As a result, the Management Company will not commit to a formal, traceable and verifiable procedure for open competition between the counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts negotiated over the counter at over-the-counter and/or temporary acquisitions and sales of securities), the Compartment may be forced to resell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the depreciation of the financial securities acquired as part of this reuse of guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risk of investing in mid-cap companies

Le Compartiment is exposed to medium-capitalisation companies and more specifically to the equity securities of medium and intermediate sized enterprises (ISC), which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and rapidly than those of large-cap stocks. The Compartiment's net asset value could behave similarly and therefore fall more sharply and strongly than that of a similar investment in large-cap stocks.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartiment uses future financial instrument ("FFI") negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartiment's net asset value.

- Risks related to collateral management

Operational risk:

The Compartiment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartiment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartiment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartiment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartiment's underlyings can affect the Compartiment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartiment (and/or to its counterparty in the FFI), the Compartiment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartiment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartiment's underlyings, the Compartiment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartiment equities. The calculation of the Compartiment's net asset value can also be affected.

If the event persists, the Compartiment's manager will decide on measures having to be adopted, which can have an impact on the Compartiment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartiment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the equities of German mid-cap companies.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 23 April 2014.*
- *Compartment creation date: 15 May 2014.*

Activity report

The investment objective of the sub-fund is to track the performance of DAX MID CAP INDEX EUR (Ticker:MDAX).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor German Mid-Cap MDAX UCITS ETF - Dist	FR0011857234	EUR	7.91% ⁽¹⁾	8.56%		56.54%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0198% for the sub-fund. The Tracking Error target for the year was 0.08%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

-The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

-Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

-A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

-Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

LYXOR GERMAN MID-CAP MDAX UCITS ETF
(compartment of the Multi Units France Sicav)

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 15%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	96%
221	228	84	Scope 1 reported (vs estimated)	98%
			Scope2 reported (vs estimated)	84%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated In Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	0.0%	4.6%	8.3%
Some efforts	72.3%	86.8%	47.7%
Limited efforts/information	7.9%	3.5%	3.0%
No effort/No evidence	19.9%	5.1%	40.9%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

	1.9%
Power generation by fuel as maximum percentage of total (rebased at 100%)	
Hydro	9.1%
Liquid Fuel	
Natural Gas	53.2%
Nuclear	9.4%
Renewables	0.4%
Thermal Coal	27.9%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	18%
20-49.9%	3%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	7.9%
Energy Efficiency	12.1%
Green Building	1.1%
Pollution Prevention	10.6%
Sustainable Water	9.4%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.2%
Energy Efficiency	1.8%
Green Building	0.2%
Pollution Prevention	0.3%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:
<https://www.lyxor.com/politiques>

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending⁽¹⁾	Securities borrowing⁽²⁾	Repo operations⁽³⁾	Reverse repo operations⁽⁴⁾	TRS⁽⁵⁾
Absolute value	-	-	-	-	47,609,053.14
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed in the TRS corresponds (i) for the TRS for which the management company has undertaken to deliver a basket of securities to the TRS counterparty, to the market value of the basket of securities committed in the TRS, increased by the market value of the TRS on the accounting date and/or (ii) for the TRS for which the management company does not deliver a basket of securities, to the value of the nominal value of the TRS on the balance sheet date.

2. Concentration data

2.1. The ten biggest issuers of guarantees for all types of securities financing operations and total return swaps (breakdown of the volumes of guarantees and raw materials received, with the names of the issuers).

1	Name	-
	Amount	-

2.2. The ten main counterparties for each type of securities financing operation and total return swap separately (name of the counterparty and gross volume of operations in progress).

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax ⁽¹⁾	Net asset	maximum 0.2% per year
Maximum indirect costs (commission and management fees)	Net asset	None
Outperformance commission	Net asset	None
Transfer commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment’s accounting is carried out in euros (EUR).

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

In the event of a distribution, the Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year.

appendix

This financial instrument is not sponsored, recommended, distributed or otherwise supported by Deutsche Börse AG (the "Licensor"). The Licensor grants no guarantee and issues no statement, whether explicit or implicit, regarding the results arising from use of the index and/or the index's registered trademark, or the value of the index at any given time or date, or regarding any other matter. The Index is calculated and published by the Licensor. However, within the limits of the law, the Licensor shall not be liable to all and any third parties in the event of potential errors in the Index. Moreover, the Licensor is under no obligation to report potential errors in the Index to any third parties, including investors.

Neither the publication of the Index by the Licensor, nor the license granted for the Index and its registered trademark for use with the financial instrument or other securities or financial products arising from the index amount to a recommendation by the Licensor for capital investment, nor do they carry, in any way, a guarantee or opinion from the Licensor concerning the advisability of investing in this product.

In its capacity as sole holder of all the rights relating to the Index and the Index's registered trademark, the Licensor has only granted to the financial instrument's issuer the right to use the Index and the Index's registered trademark, together with all and any reference to the Index and its registered trademark in relation to the financial instrument.

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	279,373.90
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Deferred settlement sales	266,845.18
Account receivable	12,528.72
-	-
-	-
-	-
Other operations	-
Debts	287,352.62
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Account payable	266,845.18
Deferred settlement purchases	12,528.72
Accrued expenses	7,978.72
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	63,447	8,341,763.67	586,100	77,235,539.68
Subscription / redemption commission		-		-
Remittances		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.20
Performance commissions (variable fees): amount of costs for the fiscal year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees	None
3.8.2 Description of the other commitments received and/or given	None

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	155,237.46

Distribution per unit (including advances)	3.06	3.41	3.14	2.73	3.10
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-8.70	1.52	6.47	-3.95	50.25

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 15 May 2014.

Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of Lyxor Hwabao WP MSCI China A (DR) UCITS ETF Compartment (the "Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index Compartment.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equity: Capitalisation of the income.

Class of Dist equity: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment's management objective is to replicate the evolution, upward or downward, of the MSCI China A Net Total Return Index (the "Benchmark Indicator") listed in US Dollar (USD), while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 2%.

Benchmark indicator:

The Benchmark Indicator is a free float-adjusted market capitalisation-weighted index representing an exposure to the performance of the large and mid-cap A-shares market.

A shares are shares of companies incorporated in the People's Republic of China excluding Hong Kong and Macau (the "PRC") that are traded on the Shanghai and Shenzhen stock exchanges and listed in Chinese Yuan ("CNY").

The Benchmark Indicator corresponds to the A-shares available on the Shanghai Hong-Kong Stock Connect or the Shenzhen Hong-Kong Stock Connect (the "Stock Connect Programmes") and which are components of the MSCI China All Shares Index.

The MSCI China All Shares Index is representative of large and mid-cap companies within a universe that includes companies incorporated in China, or outside China but considered by MSCI to be Chinese. This universe includes shares listed in Hong Kong, Shanghai, Shenzhen or other markets outside China.

The Benchmark Indicator is a free float-adjusted market capitalization-weighted index, which means that the weight of each of its components is proportional to its free float market capitalisation.

The Benchmark Indicator is a Net Dividend Reinvested index. A Dividend Net Reinvested index considers the performance of the components, including net dividends and all forms of distribution in the performance of the index.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components are available at the Internet site: www.msci.com.

Benchmark indicator revision and composition

The Benchmark Indicator is revised quarterly, according to the methodology described in the Benchmark Indicator's Rulebook, available on the MSCI Internet site: [site: www.msci.com](http://www.msci.com).

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy. Benchmark Indicator publication:

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the closing price using the official closing price of the stock exchange on which the constituent securities are listed. The Benchmark Indicator is available on a daily fixing basis via Reuters and Bloomberg.

The Benchmark Indicator's closing price is available at the Internet site: <http://www.msci.com>.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited director of the MSCI China A Net Return Index Benchmark Indicator is included in the register of directors and benchmark indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the benchmark indices used, describing the measures to be implemented in the event of substantial changes to an index or termination of supply of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the highest possible correlation with the Benchmark Indicator's performance, the Compartment will use a direct replication method, which means that the Compartment will primarily invest in the equities comprising the Benchmark Indicator.

As part of the optimisation of the Benchmark Indicator's direct replication method, the Compartment, represented by its delegated asset manager, may decide to use a so-called "sampling" technique that involves investing in a selection of representative securities comprising the Benchmark Indicator, with the aim of limiting the costs related to the investment in the Benchmark Indicator's various components and/or to take into account the operational constraints of investing in the various Benchmark Indicator constituents. A sampling-based replication strategy could notably prompt the Compartment to invest in a representative selection of securities (but not all securities) comprising the Benchmark Indicator, in different proportions than is the case within the Benchmark Indicator, or even to invest in securities other than the Benchmark Indicator's components.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument ("FFI"). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

To ensure that investors can benefit from transparency with regard to the adopted direct replication method (complete replication of the Benchmark Indicator or sampling in order to limit the replication costs) and to the consequences in terms of assets held by the Compartment, information on the updated composition of the basket of balance sheet equities held in the Compartment's portfolio is available on the page dedicated to the Compartment, accessible on the site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

Investors are also informed of the fact of the Compartment's asset financial management sub-delegate being in possession of a Renminbi Qualified Foreign Institutional Investor licence ("RQFII" or the "RQFII Licence") in the People's Republic of China ("PRC") and of obtaining a RQFII "quota" dedicated to the Compartment's investments (the "Quota"), will allow the aforesaid financial management sub-delegate, acting in the name and on behalf of the Compartment, to implement the Investment strategy described above. More specifically, subject to the risks identified in the "Risk Profile section below, it is indicated that the aforesaid RQFII Licence and Quota will notably allow the financial management sub-delegate:

- to invest in the A-Shares in the Compartment's name and on its behalf, within the conditions and limits included in the said Quota and Licence, without a minimum holding period.

- to repatriate, into and out of the PRC, the sums related to the Compartment's purchase/sale operations of A-Shares on each business day in the PRC, while performing, if relevant, the exchange operations needed for the conversion of the sums denominated in RMB into the currency of the relevant unit class.

In order to implement the investment strategy described above, the financial management sub-delegate of the Compartment may also invest in A Shares through the common trading platforms of the Stock Connect Programmes. In particular, the Stock Connect Programmes allow investors outside the PRC to invest in A-Shares traded in RMB on the Shanghai and Shenzhen stock exchanges without necessarily having a License and RQFII Quota.

Additional information on the conditions and limits governing operations performed by the financial management sub-delegate relative to Chinese A-shares, within the framework of the corresponding RQFII Licence and/or Stock Connect Programs, can also be provided to investors who make a written request for such information to the Management Company.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009. The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the financial manager by delegation reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may use FFIs traded on a regulated market or over the counter.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments within the limits and under the conditions provided for by the regulations.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

No financial guarantee will be granted / received by the Compartment within the framework of the implementation of its management objective.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Specific risks linked to investment in People's Republic of China:

Investors in the Compartment should be aware of the following risks inherent to investments in the People's Republic of China (PRC):

- RQFII plan risks

The Compartment's capacity to achieve its investment objective depends, amongst other things, on the RQFII quota allotted to it. If the Compartment's RQFII quota is too small, this could adversely affect the Compartment's operation. PRC regulations governing RQFII status may also be amended at any time by the China Securities Regulatory Commission (CSRC) and/or, with respect to foreign exchange, by the State Administration of Foreign Exchange ("SAFE") bureau, which could adversely affect the Compartment's capacity to achieve its investment objective and result in its dissolution. In particular, RQFII status means that any increase of the investment quota is subject to authorisation by the SAFE. If the Compartment wishes to increase its quota, it may take quite a long time to obtain approval from the SAFE. Any restriction involving the Compartment's granted quota may affect its investments. Such a restriction may therefore affect the trading of the Compartment's shares on an exchange, which could, in such circumstances and depending on the exchange's rules, trade above their Net Asset Value. Lastly, if the delegated asset manager loses its RQFII licence, if the RQFII quota is reduced, or if RQFII requirements are significantly increased, the Board of Directors may decide to dissolve the Compartment, subject to AMF approval.

- Stock Connect Programs risks

The ability of the Compartment to achieve its management objective depends, inter alia, on the possibility of accessing A Shares through the Stock Connect Programmes. To date, Stock Connect Programs are subject to a daily quota on the cumulative net purchase orders executed. Saturation of this quota would result in the automatic suspension of purchase orders on the Stock Connect Programme concerned (at least temporarily), which could have a detrimental and negative impact on the Compartment's ability to achieve its management objective.

- Economic, political and social risks

Any political change, social instability and/or unfavourable diplomatic, political, economic and/or social development that may occur in or in connection with the PRC (hereinafter a "Policy Change") could result in the imposition by the Chinese government of additional restrictions and limits, such as expropriation, confiscatory taxes or the nationalization of certain companies included in the Benchmark Indicator. Investors should also note that a Policy Change may have an adverse impact on PRC stock exchanges and on the Compartment's performance, and could ultimately result in the Compartment's dissolution by decision of the Board of Directors.

- Economic risks in PRC

The economy of the PRC has grown very rapidly. It is, however, not certain that this growth will continue and it may be irregular across the different sectors of the PRC economy. The PRC government has from time to time put in place various measures to prevent an excessively sharp acceleration of the business cycle, and the transition of the country's economy from a socialist economy to one that is more market-oriented has caused economic and social tensions that could stop this transition or compromise its success. Any of these risks could diminish the Compartment's performance.

- Capital repatriation risks

The system for repatriating capital is subject to the approval of the Chinese SAFE authorities and to the risk that the repatriation of capital may be restricted in terms of amount or frequency (as of the date of the Compartment's inception, however, RQFII regulations allow capital to be repatriated daily without requiring approval).

Furthermore, the regulations and standard economic practices in the PRC that govern the repatriation of funds from the domestic Chinese market to other markets and their conversion into a foreign currency could be modified in a way that adversely affects the Compartment.

The unfavourable regulatory developments and situations described above could suspend or restrict the conversion or transfer of foreign currencies and could possibly:

- Diminish the Compartment's capacity to fully achieve its investment management objective and/or;
- Diminish the Compartment's performance, and/or;
- Ultimately result in the Compartment's dissolution, by decision of the Board of Directors. Added values and other capital gains are subject to the same risk.

-PRC legal system risk

The legal system in the PRC is based on statutory law. However, some regulations have yet to be implemented and there is no assurance that they will actually ever be implemented in their entirety. In particular, PRC regulations on the control of exchange rates are relatively recent and their application is still quite uncertain. Moreover, these regulations give the Chinese authorities (and in particular CSRC and SAFE) broad discretion in their respective interpretation of the regulations, which leaves uncertainty as to how they might be applied and used.

All of these considerations may adversely affect the performance of the Compartment.

State control of exchange rates and of future exchange rate movements

Under the current RQFII system, offshore RMB (CNH) can be converted into onshore RMB (CNY) and vice-versa on a one-for-one basis. The CNH also serves as a pivot currency between the share class currencies USD and CNY. There is no guarantee that, in the future, an exchange rate will not be applied to the conversion of CNH into CNY or vice-versa.

-Dependence on the A-shares market

The existence of a liquid market for A-shares depends on the supply of and demand for A-shares. It should be noted that the Shanghai and Shenzhen stock exchanges, on which the A-shares are listed, are undergoing huge changes and that their market capitalisations and trading volume are less than those of exchanges in developed countries. The volatility of A-share markets and any difficulty in trading A-shares or in settling A-share trades could result in significant fluctuations in the price of the securities traded in these markets, and ultimately in the Compartment's Net Asset Value.

Taxation in the PRC

The government of the PRC has implemented several tax reforms in recent years, and it is possible that the current tax legislation and regulations could be revised or modified in the future.

Furthermore the PRC's tax authority (the "State Administration of Taxation") has confirmed the 10% withholding tax on dividends, premiums and interest paid to investors with RQFII status (subsequent to the "PRC Corporate Income Tax Law", which came into effect on 1 January 2008) or who invest via the Shanghai Hong-Kong Stock Connect (subsequent to Caishui circular [2014] No. 81).

This withholding tax may be reduced by virtue of a double taxation treaty with China, provided that certain conditions are met and subject to the approval of PRC tax authorities.

It should also be noted that any dividends paid to shareholders by the Compartment will be obtained from the receipt of corresponding amounts from the investment in the A-shares and that all amounts of this kind will be net of the withholding tax on dividends, premiums and interest applicable in the PRC.

Concerning the taxation of share sales, on 14 November 2014, the PRC Ministry of Finance and tax authority issued circulars, which among other things specified the tax treatment to be applied to capital gains from the sale of "A-Shares" purchased subject to an RQFII quota or via the Shanghai Hong-Kong Stock Connect, the following should in particular be noted:

Capital gains on sales before 17 November 2014 are taxable,

Capital gains on sales as of 17 November 2014 are temporarily tax exempt.

The PRC tax authority has not made a definitive pronouncement on how the tax would be calculated or collected, nor on the duration of the exemption.

Accordingly, we attract the attention of investors to the following:

The Compartment's Net Asset Value may be adversely affected by a change in PRC tax rules;

The adverse impact on the Compartment's performance resulting from a change in PRC tax rules will depend on the date on which the Compartment's equities are bought or sold; and

The magnitude of this adverse impact on the Compartment's performance may not be proportional to the number of shares that an investor holds in the Compartment if tax obligations in the PRC are amended retroactively and, in certain circumstances, could amount to 100% of the Net Asset Value of a share class.

The asset manager by delegation has made 10% provision on Compartment's capital gains up to 14 November 2014. Furthermore, it should be noted that although the PRC tax authority has confirmed the temporary exemption of withholding tax on capital gains on share sales as of 17/11/2014, there is no way of knowing with certainty what investor obligations will be with respect to PRC's taxation of capital gains on share sales before 17/11/2014. Until further information is provided on the taxation and calculation of withholding tax on capital gains before 17 November 2014, there can be no assurance as to whether the aforementioned provision is sufficient or not, since it cannot currently be known with certainty what obligations may be imposed on investors with RQFII status in respect of the PRC's taxation of capital gains. If the provision made proves to be insufficient, this could adversely affect the Compartment's Net Asset Value. However, and as is the case for any mutual fund that complies with Directive 2009/65/EC, the Compartment's shareholders can lose no more than the capital they invest and the expense of purchasing and selling shares. Furthermore, since Chinese tax authorities have only confirmed a temporary exemption of the taxation of capital gains made as of 17 November, the asset manager by delegation may decide to make a provision if Chinese tax authorities specify the duration of the exemption or amend this temporary rule in part or in whole. In this event, such a provision would adversely affect all of the Compartment's net asset values calculated as of the date of the first provision. Such a provision would also reduce the Compartment's performance relative to that of the Benchmark Indicator.

In addition to the withholding tax on dividends, premiums, interest and capital gains referred to above, since 19 September 2008, the sellers of A-shares have been required to pay a stock market tax of 0.1 % of the share price. The PRC authorities may decide to modify this tax.

-Accounting and reporting standards:

The standards and practices for accounting, auditing and the reporting of financial information that apply to PRC companies may differ from those of countries with more developed financial markets. Such differences can adversely affect certain practices such as asset valuation methods and the reporting of information to investors.

- Order execution risk in the PRC

Under the RQFII regulations, the financial management sub-delegate chooses one or more intermediaries in charge of order execution ("Broker") in the PRC to handle A shares on the Shanghai Stock Exchange and the Shenzhen Stock Exchange. The financial management sub-delegate may choose the same Broker for transactions on the Shanghai Stock Exchange and the Shenzhen Stock Exchange. In the event of default of a Broker, the Compartment may experience difficulties and delays in recovering its assets, which may have a negative impact on the valuation of the Compartment.

The Management Company and the financial management sub-delegate these risks of conflicts of interest by implementing procedures designed to identify and limit them and to ensure their fair resolution where necessary.

- Custody risk in the PRC

Under RQFII regulations, a sub-custodian in the PRC must be selected. The sub-custodian selected is Bank of China Limited, which in this capacity holds the Compartment's onshore RMB and securities accounts in the PRC. Under RQFII regulations, these accounts must be registered jointly in the names of the financial management sub-delegate (which has the RQFII license) and the Compartment. There is therefore a risk that the assets held in PRC may not be as well protected as if they were registered in the Compartment's name only.

When, pursuant to the investment strategy, the delegated asset manager purchases and/or sells A-shares via the Stock Connect Program, the sub-custody in relation to these transactions may be carried out by a sub-custodian other than Bank of China Limited (the "Third Party Sub-custodian"). In this case, the Compartment's accounts with the Third-Party sub-custodian will be opened in the joint name of the Depositary and the Compartment.

- Risk of temporary suspension of quotation:

Trading in the Benchmark Indicator's constituents may be temporarily suspended, making it impossible for the Compartment to value these securities correctly and/or buy or sell them.

Other risks in investing in this Compartment:

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk of investing in small and mid-cap companies

Le Compartment is exposed to small and medium capitalisation companies and more specifically to the equity securities of small and medium companies and intermediate sized companies (ISC), which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and rapidly than those of large-cap stocks. The Compartment's net asset value could behave similarly and therefore fall more sharply and strongly than that of a similar investment in large-cap stocks.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, sector or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Risks related to the absence of perfect replication

Replication of the Benchmark Indicator by means of an investment in all of the Benchmark Indicator's components could prove to be costly or operationally very difficult. Also, the Compartment's manager may employ optimisation techniques, notably the sampling technique that involves investing in a representative selection of securities (but not all securities) comprising the Benchmark Indicator, in different proportions than is the case within the Benchmark Indicator, or even investing in securities other than the components of the index or future financial instruments.

The use of these optimisation techniques could result in a greater ex-post tracking error and notably lead to differing performances between the Compartment and the Benchmark Indicator.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss that would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Currency risk linked to the Benchmark Indicator

The Compartment is exposed to currency risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than that of the Benchmark Indicator, or may be derived from securities listed in a currency other than that of the Benchmark Indicator. Fluctuations in exchange rates may therefore adversely affect the Benchmark Indicator tracked by the Compartment.

- Currency risk linked to the Compartment listing

The Compartment may be listed on certain markets of multilateral trading facilities in a currency other than that of the Benchmark Indicator. Investors buying the Compartment in a currency other than that of the Benchmark Indicator are exposed to currency risk. Therefore, the value of the investment made in a currency other than that of the Benchmark Indicator may be reduced in spite of an increase of the value of the benchmark Indicator, due to exchange rate fluctuations.

- Liquidity risk (primary market)

Should the Compartment adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- Suspension or stoppage of the calculation of the Benchmark Indicator, and/or;
- Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or;
- The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or;
- A market maker's violation of the rules applicable to this marketplace, and/or;
- A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses future financial instrument ("FFI") traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment, the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value. "Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said index,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to be exposed upwards or downwards to performance of the large and mid-capitalisations on the "A shares" market, namely, securities issued by companies incorporated in People's Republic of China, excluding Hong Kong.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 7 May 2014.*
- *Compartment creation date: 28 August 2014.*

Activity report

The investment objective of the sub-fund is to track the performance of the MSCI China A Net Return Index (Ticker:NU718708).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Hwabao WP MSCI China A (DR) UCITS ETF - Acc	FR0011720911	USD	25.79% ⁽¹⁾	27.64%		35.09%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- sampling techniques or efficient portfolio management techniques»

The Tracking Error is 1.2807% for the sub-fund. The Tracking Error target for the year was 2%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

Until 24 March 2019 the Fund's Benchmark Indicator was MSCI China A Onshore Net Return Index USD, from 25 March 2019 the Benchmark Indicator is MSCI China A Net Total Return Index.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-18-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-18-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

•Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

•The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

•Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

•A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

•Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

•Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 1%
Yellow Flag 15%
Green Flag 80%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	86%
311	459	316	Scope 1 reported (vs estimated)	29%
			Scope2 reported (vs estimated)	12%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	3%
Thermal Coal	2%
Natural Gaz	1%
Oil	1%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	4 925
Gas (MMBOE)	0.0004
Oil (MMBOE)	0.0004

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	3 101.7
Thermal Coal	8 995.4
Oil	149.4
Gas	117.8
Total	12 368.8

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	8 995.4
Oil Sands	0.0
Shale Oil or Shale Gas	4.6
Sum High Impact Reserves	9 000.0
Other	3 368.8

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	2.2%	1.3%	0.4%
Some efforts	26.8%	55.2%	4.8%
Limited efforts/information	19.0%	29.6%	0.0%
No effort/No evidence	52.0%	13.9%	84.8%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The raw data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

1.7%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	16%
20-49.9%	4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:
<https://www.lyxor.com/politiques>

Lyxor's best selection and execution policy

Information on best selection and execution policies is available at www.lyxor.com

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

In the course of the fiscal year, the CIU did not perform financing operations subject to the Securities Financing Transactions Regulation, i.e. repos, securities or commodities lending/borrowing transactions, buy-sell back or sell-buy back transactions, margin lending transactions, or total return swaps (TRS).

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The Management Company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The Management Company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The Management Company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the Management Company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Classes of equities and units of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Classes of equities and units of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the Management Company's responsibility.

The exchange rates used for the assessment of financial instruments denominated in Renminbi (RMB) is the WM Reuters fixing rate at 17:00 p.m. GMT published by Thomson Reuters on the day the Compartment's net asset value is determined.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial management delegatee.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the Board of directors when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management and administrative fees external to the portfolio management company (CAC, Custodian, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.65% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in USD.

3.1.4 Breakdown of the off-balance sheet headings by market type (notably rates, equities)

	Rate	Equities	Exchange	Other
Hedging operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-
Other operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-

3.2 Breakdown by rate types of the asset, liability and off-balance sheet items

	Fixed rate	Variable rate	Revisable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	626,806.71
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging operations	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	626,806.71	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	-	-	-	-	-
Off-balance sheet					
Hedging operations	-	-	-	-	-
Other operations	-	-	-	-	-

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency in which the accounting is maintained.

By main currency	CNY	-	-	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	60,078,126.90	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	27,308.97	-	-	-
Financial accounts	576,883.31	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	11,966.26	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	27,308.97
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Adjustment accounts	26,431.31
Security deposits (paid)	877.66
-	-
-	-
-	-
Other operations	-
Debts	31,651.16
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Accrued expenses	27,337.84
Account payable	4,313.32
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

Number of equities issued/redeemed during the fiscal year:	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment
France.

Representative of the Swiss Compartment

Société Générale, Paris, Zurich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Fund, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich.

Calculation of the Total Expense Ratio(in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct.

Average fortune of the fund for the period from 01/11/18 to 31/10/19: 55,516,171.85

Management commission of the fund: 0.65 % tax included

Extract from the profit and loss account

Expenses in euros	Annual report 31/10/2018	Half-yearly report 30/04/2019	Annual report 31/10/2019
Management commission of the fund	364,850.84	147,122.79	250,284.59
Performance fee to be paid to the manager of collective investments of capital	0.00	0.00	0.00
Custodian bank fee	0.00	0.00	0.00
Other expenses	5,757.82	4,079.82	0.00
Taxes	0.00	0.00	0.00
Total operating expenses	364,850.84	147,122.79	250,284.59

Calculation of the TER for 12 months from 01/11/18 to 31/10/19:

TER including performance fee

$$(250,284.59 / 55,516,171.85) * 100$$

0.35 %

Performance fee as a share in percentage of the net average assets:

- %

* Update of the TER from 01/04/19

LYXOR HWABAO WP MSCI CHINA A (DR) UCITS ETF
(compartment of the Multi Units France) - Fiscal year closing on 31.10.2019

Performance of the Compartment

The details of the performance of the Compartment's units calculated in compliance with the principles of the Swiss Fund Association are given below:

	Annual performance from 31/10/2018 to 31/10/2019	Annual performance from 31/10/2017 to 31/10/2018	Annual performance from 30/10/2016 to 31/10/2017
LYXOR FORTUNE SG MSCI CHINA A (DR) UCITS ETF			
Unit C-USD	+25.79%	-28.92%	+16.86%
MSCI CHINA A NET TOTAL RETURN (USD)			
Unit C-USD	+27.64%	-28.92%	+16.86%

Past performances are no indicator of future performances. The performances indicated here do not take into account the impact of possible subscription and redemption commissions and costs of Compartment units.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR MSCI World Ex EMU UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Class of Monthly Hedged EUR - Acc equities: Capitalisation of all the amounts available for distribution.

Class of Monthly Hedged EUR - Dist equities: The Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Class Monthly Hedged GBP - Acc equities: Capitalisation of all the amounts available for distribution.

Class Monthly Hedged GBP - Dist equities: The Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Class Monthly Hedged CHF - Acc equities: Capitalisation of all the amounts available for distribution.

Class Monthly Hedged CHF - Dist equities: The Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to replicate, downwards and upwards, the evolution of the World ex EMU Net Total Return index (the “Benchmark Indicator” hereafter), listed in USD, that is representative of the performance of large and mid-cap companies in the developed countries excluding Euro zone countries, while minimizing the tracking error between the Compartment and the Benchmark indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.07%.

Benchmark indicator:

The Benchmark Indicator is a “Net Total Return” index, which means that all net dividends from the Benchmark Indicator components are reinvested in the Benchmark Indicator.

The Benchmark Indicator is an equity index calculated and published by the supplier of international indices, MSCI.

It measures the overall performance of the developed markets outside of the Euro zone. It covers approximately 85% of each country’s stock market capitalisations.

The Benchmark indicator is made up of the combination of several MSCI indices each representing countries classified as developed by MSCI, while excluding Euro zone countries.

The weight of each security in the Benchmark indicator is adjusted according to its market capitalisation, on the basis of the free-float. Consequently, the number of securities included in the composition of the basket comprising the Benchmark indicator can change over time.

The MSCI methodology and its calculation method entail the Benchmark indicator being made up of a variable number of companies.

A full description and the complete methodology used to construct the Benchmark Indicator and information on the composition and respective weightings of the Benchmark Indicator components are available on the Internet site: <https://www.msci.com/>.

The performance tracked is that of the Benchmark Indicator's closing price.

BENCHMARK INDICATOR REVISION AND COMPOSITION

The composition of the Benchmark Indicator is reviewed quarterly.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: https://www.msci.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

BENCHMARK INDICATOR PUBLICATION

The Benchmark Indicator is calculated at the closing price each day, by using the official closing price of the listing market of the component securities.

The Benchmark Indicator's closing price is available on the Internet site: https://www.msci.com.

In accordance with the provisions of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the MSCI Limited director of the World ex EMU Net Total Return benchmark index is registered in the register of directors and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment will notably be securities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,

- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets. In the event of default by the counterparty, the Compartment may dispose of the assets received from the counterparty in order to extinguish the counterparty's debt to the Compartment as part of the guaranteed transaction.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;

(iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;

(iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT.

In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risks related to collateral management

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

- Legal risk

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of investing in small and mid-cap companies

Le Compartment is exposed to small and medium capitalisation companies and more specifically to the equity securities of small and medium companies and intermediate sized companies (ISC), which may increase market and liquidity risks. The prices of these securities therefore increase and decrease more sharply and rapidly than those of large-cap stocks. The Compartment's net asset value could behave similarly and therefore fall more sharply and strongly than that of a similar investment in large-cap stocks.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of Future Financial Instrument

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator.

These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,

vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the compartment.

- Risk linked to currency hedging specific to the equity classes Monthly Hedged to EUR - Acc, Monthly Hedged to EUR - Dist, Monthly Hedged to GBP - Acc, Monthly Hedged to GBP - Dist, Monthly Hedged to CHF - Acc and Monthly Hedged to CHF - Dist:

In order to hedge the exchange risk on the EUR (respectively GBP and CHF) against the currency of each of the securities comprising the Benchmark indicator specific to the relevant Monthly Hedged equity class, the Compartment uses a hedging strategy intended to reduce the impact of fluctuations between the currency of each of the securities comprising the Benchmark Indicator and the currency of the said equity class. This hedge nevertheless remains imperfect as a result of its monthly adjustment frequency and the employed instruments; the Compartment can therefore be subject to downward market movements that will impact the net asset value of the equity class. Moreover, the cost of implementing the currency hedge will have a negative impact on the net asset value of the Monthly Hedged equity classes.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

The investor subscribing to this Compartment wishes to obtain an exposure to the performance of large and mid-cap companies of developed countries, excluding the Euro zone countries.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 10 October 2016.*
- *Compartment creation date: 24 October 2016.*

Activity report

The investment objective of the sub-fund is to track the performance of MSCI World ex EMU Net Return USD Index USD (Ticker: M1WOM).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor MSCI World Ex EMU UCITS ETF - Acc	FR0013209921	USD	12.80% ⁽¹⁾	12.90%		40.53%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative expenses;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index”.

The Tracking Error is 0.0081% for the sub-fund. The Tracking Error target for the year was 0.07%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

•Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

•The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

•Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

•A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

•Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

•Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 3%
Orange Flag 28%
Yellow Flag 34%
Green Flag 36%

Climate Risks & Energy Transition

			Scope2 reported (vs estimated)	78%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	7%
Thermal Coal	2%
Natural Gaz	5%
Oil	5%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	226
Gas (MMBOE)	0.0013
Oil (MMBOE)	0.0021

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	451.2
Thermal Coal	412.8
Oil	988.8
Gas	352.0
Total	2 265.2

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	412.8
Oil Sands	353.5
Shale Oil or Shale Gas	181.3
Sum High Impact Reserves	947.6
Other	1 317.6

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	6.8%	3.8%	2.7%
Some efforts	74.4%	88.4%	68.4%
Limited efforts/Information	3.6%	2.8%	4.2%
No effort/No evidence	15.2%	5.1%	24.7%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

4.3%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	3.7%
Liquid Fuel	0.6%
Natural Gas	35.4%
Nuclear	24.1%
Renewables	5.7%
Thermal Coal	30.4%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	22%
20-49.9%	3%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	11.2%
Energy Efficiency	21.2%
Green Building	3.5%
Pollution Prevention	5.1%
Sustainable Water	4.4%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.4%
Energy Efficiency	2.0%
Green Building	0.4%
Pollution Prevention	0.2%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate maximum Acc and Dist equities	Schedule, rate maximum Monthly Hedged to EUR - Acc, Monthly Hedged to EUR - Dist, Monthly Hedged to GBP - Acc, Monthly Hedged to GBP - Dist, Monthly Hedged to CHF- Acc, Monthly Hedged to CHF - Dist equities

Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	-	-	-	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future currency exchange operations by type of operation (purchase/sale).

Receivables	2,115,838.05
Future currency exchange operations:	
Future purchases of currency	-
Total negotiated amount of future currency sales	-
Other receivables:	
Account receivable	2,115,838.05
Deferred settlement sales	-
-	-
-	-
-	-
Other operations	-
Debts	2,141,215.65
Future currency exchange operations	
Future sales of currency	-
Total negotiated amount of future currency purchases	-
Other debts:	
Deferred settlement purchases	1,660,911.00
Account payable	454,927.05
Accrued expenses	25,377.60
-	-
-	-
Other operations	-

3.6 Shareholders' equity

Number of equities issued/redeemed during the fiscal year:	Number of equities	Subscriptions		Redemptions	
		Amount	Number of equities	Amount	Amount
EQUITY Acc / FR0013209921	161,308	20,676,842.16	367,800	46,633,906.64	
Subscription / redemption commission by equity category:		Amount		Amount	
EQUITY Acc / FR0013209921		-		-	
Remittances by equity category:		Amount		Amount	
EQUITY Acc / FR0013209921		-		-	
Commissions acquired by the CIU by equity category:		Amount		Amount	
EQUITY Acc / FR0013209921		-		-	

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	%
Equity category:	
EQUITY Acc / FR0013209921	0.35
Performance commissions (variable fees): amount of costs for the fiscal year	Amount
Equity category:	
EQUITY Acc / FR0013209921	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-
- CIU 3	-
- CIU 4	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1	Current value of the financial instruments that are the subject of temporary acquisition:	
	- Financial instruments sold under forward repurchase agreements	-
	- Other temporary operations	-
3.9.2	Current value of the financial instruments comprising security deposits:	
	Financial instruments received as guarantees and not included in the balance sheet:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
	Financial estimates given as guarantees and maintained in their original item:	
	- equities	-
	- bonds	-
	- debt securities	-
	- other financial instruments	-
3.9.3	Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
	- CIU Securities	-
	- Swaps	337,841.12

Distribution per unit (including advances)*	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation *	10.31	22.64	10.18	0.08	-

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the Compartment. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR DJ GLOBAL TITANS 50 UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor DJ Global Titans 50 UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Dist equities: The Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The management objective of the Lyxor DJ Global Titans 50 UCITS ETF Compartment is to reproduce, both upwards and downwards, the evolution of the Dow Jones Global Titans 50 Total Return index (the “Benchmark Indicator”) listed in Euro, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator:

The Benchmark Indicator is the Dow Jones Global Titans 50 Total Return index.

The Benchmark Indicator is a Total Return type index (i.e. all dividends detached by the components of the Benchmark Indicator are reinvested in the Benchmark Indicator).

The Benchmark Indicator is a weighted capitalization index of worldwide and multinational companies. It represents the performance of the world's 50 leading companies within 18 sectors. 9 countries are represented within this index.

The securities are selected by Dow Jones on the basis of four criteria:

- Relatively low risk and price volatility
- Established leadership in their sector on the worldwide level
- A stable profit capability
- Broad worldwide diversification

It is published by Dow Jones over the five banking days and is the leading worldwide index with regulated futures contracts. The monitored performance is that of the closing price of the equities comprising the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available on the Internet site: <http://www.djindexes.com/titans/>.

Benchmark indicator publication

The Benchmark Indicator’s closing price is available on the Internet site: <http://www.djindexes.com/titans/>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the administrator DJI Opco, LLC of the Dow Jones Global Titans 50 Total Return benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Benchmark Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The Benchmark Indicator components are rebalanced quarterly by DJI Opco, LLC

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

The exact composition and the revision rules of the Benchmark Indicator composition published by Dow Jones are available on the Internet site:

<http://www.djindexes.com/titans/>.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Benchmark Indicator, as well as other international and/or Euro zone equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

As part of the future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged. Guarantees received in cash shall, at the discretion of the manager, be either:

- (i) deposited with an enabled institution;
- (ii) invested in high-quality State bonds;
- (iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;
- (iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

Reinvested cash financial guarantees must be diversified, in compliance with the applicable requirements for non-cash financial guarantees.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial management delegatee. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upwards or downwards, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase/sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses future financial instrument (“FFI”) traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment’s net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment’s manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment’s underlyings can affect the Compartment’s tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment’s net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment’s underlyings, the Compartment’s net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment’s net asset value can also be affected.

If the event persists, the Compartment’s manager will decide on measures having to be adopted, which can have an impact on the Compartment’s net asset value. “Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said index,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator’s components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator’s performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The Compartment is exposed to an exchange risk to the extent that the underlying securities making up the Benchmark Indicator could be listed in a currency other than that of the Benchmark Indicator, or be derivatives of securities listed in a currency other than that of the Benchmark Indicator. Fluctuating exchange rates are then likely to negatively affect the Benchmark Indicator monitored by the Compartment.

Subscribers concerned and typical investor profile

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the international equity markets.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers. The minimum recommended investment term is greater than 5 years.

“U.S. Persons” (as defined below - see “COMMERCIAL ORDER INFORMATION”) may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 8 February 2018.*
- *Compartment creation date: 23 March 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of Dow Jones Global Titans 50 Total Return (Ticker:DJGTET).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor DJ Global Titans 50 UCITS ETF – Dist	FR0007075494	EUR	15.23% ⁽¹⁾	15.72%		176.05%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0211% for the sub-fund. The Tracking Error target for the year was 0.05%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

- The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),
- Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),
- A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

- Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

Portfolio ESG Rating as of October 2019

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 6%
Orange Flag 48%
Yellow Flag 44%
Green Flag 2%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
39	109	58	Scope 1 reported (vs estimated)	98%
			Scope 2 reported (vs estimated)	91%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales

• Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	9%
Thermal Coal	1%
Natural Gaz	9%
Oil	9%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	191
Gas (MMBOE)	0.0027
Oil (MMBOE)	0.0036

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	669.6
Thermal Coal	349.4
Oil	1 642.0
Gas	889.9
Total	3 550.9

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	349.4
Oil Sands	340.9
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	690.3
Other	2 860.5

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	11.7%	10.0%	1.8%
Some efforts	85.8%	90.0%	86.0%
Limited efforts/Information	0.0%	0.0%	3.8%
No effort/No evidence	2.5%	0.0%	8.4%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The raw data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

1.1%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	Liquid Fuel
Natural Gas	Nuclear
Renewables	100.0%
Thermal Coal	

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	26%
20-49.9%	5%
50-100%	0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:
<https://www.lyxor.com/politiques>

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate including tax
Financial management fees and administrative fees external to the portfolio management company including tax ⁽¹⁾	Net assets	maximum 0.40% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

In the event of a distribution, the Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR SMI DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR SMI DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Lyxor SMI Daily (-2x) Inverse UCITS ETF Compartment (the “Compartment”) is an index-based UCITS of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to obtain an inverse exposure with a x2 daily leverage, upward or downward, to the Swiss equities market while reproducing the evolution of the SMI Daily Short Leverage index (the “Benchmark Indicator”), and while insofar as possible minimising the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The Benchmark Indicator reflects the evolution of the SMI® Swiss Market Index Total Return index (the “Parent Index”) with a daily x2 inverse leverage effect, i.e. if the underlying index shows an evolution of +2% on the same day, the index with a leverage effect will show an evolution of -4%, less the borrowings costs, on the same day and vice versa.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark Indicator is the SMI Daily Short Leverage strategy index (net dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities), listed in in Swiss francs (CHF).

The Benchmark Indicator is a strategy index defined and calculated by SIX Swiss Exchange SA.

The Benchmark Indicator offers a daily inverse exposure, upward or downward, to the evolution of the Parent Index with a x2 daily leverage affect. As such, in case of a decline of the Parent Index on a given day, the Compartment’s net asset value will doubly increase that same day and, in case of an increase of the Parent Index on a given day, the Compartment’s net asset value will doubly drop that same day and the shareholders will not benefit from any increase of this index. The Parent Index is weighted on the basis of the float’s market value with a strong capitalisation of the Swiss equities market. It includes the 20 largest and most liquid securities that represent around 85% of the total capitalisation of the Swiss equities market. The index is calculated in real-time in CHF and is available on the site: www.six-swiss-exchange.com.

The performance of the Benchmark Indicator is equal to twice the inverse daily performance of the Parent Index plus interest (SAR Swiss Average Rate On®) collected daily on 3 times the valuation of the closing price of the Parent Index. It is therefore an index that represents a short selling strategy with a x2 leverage on the Parent Index, with daily rebalancing. An additional rebalancing will be carried out during the session if the Parent Index grows by more than 25% during a business day, relative to the previous business day’s closing price.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components will be available at the following Internet site:

http://www.six-swiss-exchange.com/indices/data_centre/strategy_indices/leveraged_indices_en.html et http://www.six-swissexchange.com/indices/data_centre/shares/smi_family_fr.html

The monitored performance is that of the index closing prices, in CHF.

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Indicator's closing price is available on Internet site: <http://www.six-swiss-exchange.com/indices>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the director of SIX Swiss Exchange AG of the SMI Daily Short Leverage benchmark index has until 01.01.2020 to apply for authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been entered in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The composition of the SMI Daily Short Leverage index is dependent on the revision of the Benchmark Indicator.

The leverage introduced into the formula for calculating the Benchmark Indicator is reset daily. The consequences linked to the daily leverage reset are explained, in particular, in the Benchmark Indicator and the Risk Profile sections of this prospectus.

The revision of the Benchmark Indicator's composition is dependent on the composition of the Parent Index. The Parent Index composition is revised daily.

The exact composition of the Parent Index and SIX Swiss Exchange's rules for revising its composition, and consequently that of the Benchmark Indicator are available on the Internet site at:

http://www.six-swiss-exchange.com/indices/data_centre/shares/smi_family_fr.html

and

http://www.six-swiss-exchange.com/indices/data_centre/strategy_indices/leveraged_indices_en.html

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will reach its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to reach its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Parent Index, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

This could notably be the case in the event of a public offer affecting one of the securities making up the Benchmark Indicator or in the event of a significant liquidity restriction affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the eligibility and diversification criteria mentioned above, including the list of eligible indices, investors are invited to consult the Internet site www.lyxoretf.com.

Investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of its net assets. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value of the Compartment's asset (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph 1 above).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depository. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees in a non-cash form will not be sold, reinvested or pledged.

Guarantees received in cash shall, at the discretion of the manager, be either:

(i) deposited with an enabled institution;

(ii) invested in high-quality State bonds;

(iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;

(iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

Reinvested cash financial guarantees must be diversified, in compliance with the applicable requirements for non-cash financial guarantees.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension, that could notably be due to:

i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or

ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

iv) A market maker's violation of the rules applicable to this marketplace, and/or

v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to daily readjustment of the leverage

Investors are inversely and doubly exposed to the fluctuations affecting the price or level of the Parent Index on a daily basis. In particular, any appreciation of the underlying market will be inversely increased and will entail an even stronger depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" strategy index implies that, over a period of more than one business day, the Compartment's performance will not be equal to twice the opposite of the performance of the Parent Index. For example, if the Parent Index appreciates by 10% on one business day then depreciates by 5% on the next business day, the ETF will be depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the Parent Index will be appreciated by 4.5% in all over the same period.

If the Parent Index depreciates by 5% per day for 2 consecutive business days, it will have depreciated by a total of 9.75%, while the ETF will have appreciated (before deduction of the applicable fees) by 21% over the same period.

Negative scenario 1

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
		100		100	
Day 1	10%	110	-20%	80	x-2
Day 2	-5%	104.5	10%	88	x-2
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2

Case in which the resulting negative leverage is less than 2 within the scenario of a decline of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
		100		100	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2

LYXOR SMI DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts a decline over this same period.

Leverage scenario:

Case in which the induced leverage is positive over the period

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	5%	105	-10%	90	x-2
Day 2	-5%	99.75	10%	99	x-2
Whole period	-0.25%		-1.00%		x4

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator’s components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator’s performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to obtain an inverse exposure with a x2 amplifying lever, upward or downward, to the Swiss equities market.

The amount that it is reasonable to invest in this Compartment depends on each investor’s personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Regarding an arbitrage product, this Compartment could not be suitable for investors that wish to make a mid or long term investment.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

“U.S. Persons” (as defined below - see “COMMERCIAL ORDER INFORMATION”) may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 15 February 2018.*
- *Compartment creation date: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of the SMI Daily Short Leverage CHF (Ticker:SMISL).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor SMI Daily (-2x) Inverse UCITS ETF - Acc	FR0010869438	CHF	-32.48% ⁽¹⁾	-31.87%		-89.22%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0306% for the sub-fund. The Tracking Error target for the year was 0.15%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Due to the investment policy of this fund, Lyxor will not disclose any metrics in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:
<https://www.lyxor.com/politiques>

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the date of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the net asset value calculation date. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the net asset value calculation date. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates published by the fixing WM Reuters on the same day of the closing date of the Compartment's net asset value.

appendix

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions. The latter reward the management company when the Compartment has exceeded its objectives. They are therefore invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document (KIID).

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative expenses external to the management company ⁽¹⁾	Net assets	maximum 0.60% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

(1) including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS

Accounting currency

The Compartment’s accounting is carried out in CHF.

APPENDIX TO THE REPORT
intended for Swiss subscribers

This appendix makes the annual report with the FINMA requirements for the marketing in Switzerland. **It has not been certified by the accountants.**

Country of origin of the Compartment

France.

Representative of the Swiss Compartment

Société Générale, Paris, Zurich Branch, has been authorised by the FINMA as the Fund's representative in Switzerland while also assuming the payment service. The prospectus, articles of association, annual and semi-annual reports of the Fund, the KIIDs as well as the list of purchases and sales made by the Fund during the fiscal year can be obtained on request and at no cost from the representative's head office in Switzerland, Société Générale, Paris, Zurich Branch, Talacker 50, PO Box 5070, 8021 Zurich.

Calculation of the Total Expense Ratio (in compliance with the recommendations of the Swiss Funds & Asset Management Association SFAMA)

Annual closing of the collective investment: 31-Oct

UCITS management commission: 0.60 % including tax

Average assets of the fund for the period from 01/06/17 to 31/10/18: 56,307,937.18

Excerpt from the income statement

Expenses in euros	Annual report 31/10/2018	Half-yearly report 30/04/2019	Annual report 31/10/2019
Fund management commission	442,430.12	153,120.90	338,013.37
Performance fee to be paid to the manager of collective investments of capital	0.00	0.00	0.00
Depository bank commission	0.00	0.00	0.00
Other expenses	0.00	0.00	0.00
Taxes	0.00	0.00	0.00
Total operating expenses	442,430.12	153,120.90	338,013.37
Total operating expenses including bonus	442,430.12	153,120.90	338,013.37

Calculation of the TER for 12 months, from 01/11/18 to 31/10/19:

TER, including performance fee

$$(338,013.37 / 56,307,937.18) * 100$$

0.60 %

Performance fee as a share in percentage of the net average assets:

0.00

LYXOR SMI DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav) - Fiscal year closing on 31.10.2019

Performance of the Compartment

The details of the performance of the Compartment's units calculated in compliance with the principles of the Swiss Fund Association are given below:

	Annual performance from 31/10/2018 to 31/10/2019	Annual performance from 31/05/2017 to 31/10/2018	Annual performance from 31/05/2016 to 31/05/2017
<i>Lyxor SMI Daily (-2x) Inverse UCITS ETF- Acc (CHF)</i>	-32.48%	-16.06%	-28.10%
<i>SMI Daily Short Leverage (CHF)</i>	-31.87%	-15.07%	-27.45%

Past performances are no indicator of future performances. The performances indicated here do not take into account the impact of possible subscription and redemption commissions and costs of Compartment units.

LYXOR DAILY SHORTDAX X2 UCITS ETF

rapport
annuel

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

Compartments / feeder	LYXOR DAILY SHORT DAX X2 UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Lyxor Daily Shortdax x2 UCITS ETF compartment (the "Compartment") is an indexed UCITS ETF.

Terms of determination and allocation of amounts available for distribution:

Class of I-USD equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is to obtain an inverse exposure with a x2 daily leverage, upward or downward, to the German equities market while reproducing the evolution of the ShortDAX x2 Benchmark Indicator ("Benchmark indicator"), and while insofar as possible minimising the tracking error between the Compartment's performances and those of the ShortDAX x2 Benchmark Indicator. The Benchmark Indicator reflects the evolution of the DAX® index (the "Parent Index") with a daily x2 inverse leverage effect, i.e. if the underlying index shows an evolution of +2% on the same day, the index with a leverage effect will show an evolution of -4%, less the borrowings costs, on the same day and vice versa.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark Indicator is the ShortDAX x2 strategy index (gross dividends reinvested, which means that the Benchmark Indicator's performance includes the gross dividends paid by its underlying equities), listed in Euros (EUR).

The Benchmark Indicator is a strategy index defined and calculated by Deutsche Börse AG.

The Benchmark Indicator offers a daily inverse exposure, upward or downward, to the evolution of the Parent Index with a x2 daily leverage affect. As such, in case of a decline of the Parent Index on a given day, the Compartment's net asset value will doubly increase that same day and, in case of an increase of the Parent Index on a given day, the Compartment's net asset value will doubly drop that same day and the shareholders will not benefit from any increase of this index.

The Parent Index is made up of the 30 largest German securities. These companies are the ones that are most actively traded on the Frankfurt Stock Exchange. The Frankfurt Stock Exchange represents 85% of the German swaps, 35% of the European swaps. The index methodology is available on <http://www.dax-indices.com>.

The performance of the Benchmark Indicator is equal to twice the inverse daily performance of the Parent Index plus interest (EONIA) collected daily on 3 times the valuation of the closing price of the Parent Index.

It is therefore an index that represents a short selling strategy with a x2 lever on the Parent Index, with daily rebalancing. An additional rebalancing will be carried out during the session if the strategy index falls by more than 50% during a business Day.

The Parent Index is an index weighted by float equity market capitalisation that measures the evolution of the 30 biggest German securities listed on regulated markets of the Frankfurt stock exchange.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator's components will be available at the following Internet site: <https://www.dax-indices.com/indices>

The monitored performance is that of the index closing prices, in Euro.

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Benchmark Indicator's closing price is available on Internet site: <http://www.daxindices.com>.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Deutsche Börse AG director of the ShortDAX x2 benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The revision of the Benchmark Indicator's composition is dependent on the composition of the Parent Index. The Parent Index is revised daily.

The leverage introduced into the formula for calculating the Benchmark Indicator is reset daily. The consequences linked to the daily leverage reset are explained, in particular, in the Benchmark Indicator and the Risk Profile sections of this prospectus.

The exact composition of the Parent Index and Deutsche Börse AG's rules for revising its composition, and consequently that of the Benchmark Indicator are available on the Internet site at: <https://www.dax-indices.com/indices>

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will reach its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to reach its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the abovementioned eligibility and diversification criteria, investors can visit the following Internet site: www.lyxoretf.com.

Investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of its net assets. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

Guarantees received in cash shall, at the discretion of the manager, be either:

- (i) deposited with an enabled institution;
- (ii) invested in high-quality State bonds;
- (iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;
- (iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market.

The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as “OTC derivatives”) and/or efficient portfolio management techniques (hereinafter referred to as “EPMTs”). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to daily readjustment of the leverage

Investors are inversely and doubly exposed to the fluctuations affecting the price or level of the Parent Index on a daily basis. In particular, any appreciation of the underlying market will be inversely increased and will entail an even stronger depreciation of the Compartment’s net asset value. The daily readjustment of the exposure shown in the formula of the underlying “double short” strategy index implies that, over a period of more than one business day, the Compartment’s performance will not be equal to twice the opposite of the performance of the Parent Index.

For example, if the Parent Index appreciates by 10% on one business day then depreciates by 5% on the next business day, the ETF will be depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the Parent Index will be appreciated by 4.5% in all over the same period.

If the Parent Index depreciates by 5% per day for 2 consecutive business days, it will have depreciated by a total of 9.75%, while the ETF will have appreciated (before deduction of the applicable fees) by 21% over the same period.

Negative scenario 1

Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	100 110	-10%	100 90	x-1
Day 2	-8%	101.2	8%	97.2	x-1
Whole period	1.20%		-2.80%		x-2.33

Negative scenario 2

Case in which the resulting negative leverage is less than 1 within the scenario of a decline of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-10%	100 90	10%	100 110	x-1
Day 2	6%	95.4	-6%	103.4	x-1
Whole period	-4.60%		3.40%		x-0.74

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts a decline over this same period.

Reverse leverage scenario:

Case in which the induced leverage is positive over the period

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	5%	100 105	-5%	100 95	x-1
Day 2	-5%	99.75	5%	99.75	x-1
Whole period	-0.25%		-0.25%		x1

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value. "Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the index undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing for this Compartment wishes to obtain an inverse exposure with a x2 amplifying lever, upward or downward, to the German equities market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Regarding an arbitrage product, this Compartment could not be suitable for investors that wish to make a mid or long term investment. Investors are therefore recommended to study their individual situations with their usual estate management advisers.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF: 15 February 2018.*
- *Compartment creation date: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of the SHORTDAX X2 Index EUR (Ticker:SHRTDAX2).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Daily ShortDAX x2 UCITS ETF – Acc	FR0010869495	EUR	-27.90% ⁽¹⁾	-27.34%		-92.53%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0451% for the sub-fund. The Tracking Error target for the year was 0.15%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Due to the investment policy of this fund, Lyxor will not disclose any metrics in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment. The financial instruments traded on a regulated market are assessed at the closing price on the day before the date of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the net asset value calculation date. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the net asset value calculation date. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Units and equities in undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates published by the fixing WM Reuters on the same day of the closing date of the Compartment's net asset value.

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative fees external to the management company ⁽¹⁾	Net assets	maximum 0.60% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transfer commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of I-USD equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Class of Acc equities: Capitalisation of all the amounts available for distribution.

This financial instrument is not sponsored, recommended, distributed or supported in any other manner by Deutsche Börse AG (the "Licensor"). The Licensor provides no guarantee and makes no explicit or implicit statement with regard to the results produced through the usage of the Index and/or its registered trademark of the Index, with regard to the value of the Index at a given moment or on a given date, or in any other regard. The Index is calculated and published by the Licensor. Nevertheless, to the extent allowed under the law, the Licensor will not be liable to third parties for possible errors involving the Index. The Licensor is also not obliged, relative to third parties, including investors, to point out potential errors involving the Index. Neither the publication of the Index by the Licensor nor the granting of a licence regarding the Index as well as its registered trademark of the Index for usage relative to the financial instrument or to the other securities or financial products resulting from the Index in any way represent a recommendation from the Licensor relative to a capital investment, and in no manner whatsoever include a guarantee or opinion from the Licensor with regard to the attractiveness of an investment in this product. In its capacity as sole proprietor of all rights related to the Index and its registered trademark of the Index, the Licensor has only granted a licence to the issuer of the financial instrument for the usage of the Index and its registered trademark of the Index, as well as for any reference to the Index and its registered trademark of the Index relative to the financial instrument. The investor is invited to formulate his/her own opinion as to the advisability of the envisaged investment, and to consult with his/her usual advisers prior to acquiring any equities.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of countries of the Euro Area.

At least 60% of the Lyxor Ibex 35 Doble Apalancado Diario UCITS ETF Compartment, (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several Euro zone countries, possibly including the French market.

The Compartment is an UCITS ETF type strategy index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is be exposed with a daily x2 leverage, upwards or downwards, to the Spanish equity market while reproducing the evolution to the Ibex 35® Doble Apalancado Neto strategy index (the “Benchmark indicator”), listed in Euro (EUR), and while insofar as possible minimising the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark Indicator of the Compartment is the Ibex 35® Doble Apalancado Neto strategy index increased by the dividends possibly collected by the Compartment pursuant to the holding of the equities comprising the Benchmark Indicator.

The Benchmark Indicator is an equity strategy index that is calculated, maintained and published by Sociedad de Bolsas. The Benchmark Indicator provides a exposure with a daily x2 leverage to the upward or downward evolution of the IBEX 35® index (the “Parent Index”). As such, in case of an increase of the Parent Index on a net asset value calculation day, the Compartment’s net asset value will increase doubly on the same net asset value calculation day and, in case of a decrease of the Parent Index on a net asset value calculation day, the Compartment’s net asset value will fall doubly on the same net asset value calculation day.

The Parent Index is the main benchmark of the Madrid Stock Exchange and is made up of the 35 most traded equities in the Spanish market. The Parent Index is an index that is weighted by floating market capitalisation.

The Benchmark Indicator is daily calculated in a closing price using the official closing price of the stock exchange where the constituent securities are listed.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator and relative weights of the Benchmark Indicator are available on the Internet site:

<http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

The monitored performance is that of the closing prices of the Benchmark Indicator.

Benchmark indicator publication

The Benchmark Indicator's closing price is available on the Internet site:

<http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Sociedad de Bolsas director of the Ibex 35@ Doble Apalancado Neto benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Benchmark indicator revision and composition

The Benchmark Indicator's revision depends on its Parent Index's revision. The Parent Index is revised biannually.

The leverage in the Benchmark Indicator computation formula undergoes a daily readjustment. The consequences related to the daily readjustment of the leverage are detailed, for instance, in the Benchmark Indicator and Risk profile sections of this prospectus.

The exact composition of the Benchmark Indicator and the rules for its revision are available on the Internet site:

<http://www.bolsamadrid.es/ing/asp/Indices/Resumen.aspx>

The above-mentioned rebalancing frequency has no impact on the costs within the framework of the implementation of the Investment strategy.

The advantage of the "Leverage" strategy

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Indicator. By borrowing securities to carry out the strategy, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Index rises, the gains over a given day will be twice as much as with a "single" investment in the Parent Index. However, in a bear market the multiplier effect of the leverage also doubles losses on a daily basis. The daily multiplier effect also affects the strategy risks.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

The securities held as assets by the Compartment may notably be securities that make up the Parent Index, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The equities in the Compartment's assets will be chosen so as to limit the costs related to the replication of the Benchmark Indicator.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets of the Compartment. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value in the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph 1 above).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;

- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) deposited with an enabled institution;
- (ii) invested in high-quality State bonds;
- (iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;
- (iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

Reinvested cash financial guarantees must be diversified, in compliance with the applicable requirements for non-cash financial guarantees.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

The Compartment presents a high equity risk.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting from one day to the next the price or level of the Parent Index. In particular, any depreciation of the underlying market will be amplified and will result in an even larger depreciation of the net asset value of the Compartment. The daily readjustment shown in the formula of the underlying Benchmark Indicator implies that, over a period of more than one trading day, the Compartment's performance will not be equal to the double of the performance of the Parent Index. For example, if the Parent Index appreciates by 10% on one trading day and then depreciates by 5% on the next trading day, the Compartment will have appreciated in total, after these two days (and before deduction of the applicable fees), by 8%, while the Parent Index will have appreciated by 4.5% over the same period. If the Parent Index depreciates by 5% per day for 2 consecutive trading days, it will have depreciated by a total of 9.75%, while the Compartment will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1

Case in which the induced leverage is greater than 2 within the scenario of a decline of the Parent Index

	Underlyings of the Benchmark Indicator		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	100	20%	100	x-2
Day 2	-11%	97.9	-22%	93.6	x-2
Whole period	-2.10%		-6.40%		x3.05

Negative scenario 2

Case in which the induced leverage is less than 2 within the scenario of an increase of the Parent Index

	Underlyings of the Benchmark Indicator		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-5%	95	-10%	90	x-2
Day 2	6%	100.7	12%	100.8	x-2
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts an increase over this same period.

Reverse induced leverage scenario

Case in which the induced leverage is negative over the period

	Underlyings of the Benchmark Indicator		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	20%	120	40%	140	x-2
Day 2	-16%	100.8	-32%	95.2	x-2
Whole period	0.80%		-4.80%		x6

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as “OTC derivatives”) and/or efficient portfolio management techniques (hereinafter referred to as “EPMTs”). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk that the Compartment's management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the index, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,

- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the index undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to be exposed with a daily x2 leverage, whether upwards or downwards, to the Spanish equity market.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present (and for 5 years), but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The investment objective of the sub-fund is to track the performance of Ibex 35® Doble Apalancado Neto (Ticker:IBXQ).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor IBEX 35 Doble Apalancado Diario UCITS ETF – Acc	FR0011042753	EUR	13.48% ⁽¹⁾	13.83%	75.62%	

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0760% for the sub-fund. The Tracking Error target for the year was 0.1%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

-The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

-Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

-A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

-Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 27%
Yellow Flag 32%
Green Flag 41%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	97%
230	260	211	Scope 1 reported (vs estimated)	100%
			Scope2 reported (vs estimated)	88%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	9%
Thermal Coal	3%
Natural Gaz	8%
Oil	5%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0029
Oil (MMBOE)	0.0012

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	190.4
Thermal Coal	0.0
Oil	492.2
Gas	939.8
Total	1 622.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	1 622.4

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	16.3%	0.0%	2.1%
Some efforts	79.7%	99.5%	74.2%
Limited efforts/information	3.2%	0.0%	20.0%
No effort/No evidence	0.8%	0.5%	3.7%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

22.7%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	14.2%
Liquid Fuel	0.3%
Natural Gas	38.5%
Nuclear	16.6%
Renewables	24.5%
Thermal Coal	6.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	33%
20-49.9%	4%
50-100%	2%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	34.1%
Energy Efficiency	37.7%
Green Building	5.4%
Pollution Prevention	4.2%
Sustainable Water	7.2%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	2.8%
Energy Efficiency	1.0%
Green Building	1.5%
Pollution Prevention	0.1%
Sustainable Water	0.6%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the calculation day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.

Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.

Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the Compartment's net asset value.

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative expenses external to the management company ⁽¹⁾	Net assets	maximum 0.40% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

(1) including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

appendix

Sociedad de Bolsa provides no guarantee of any kind, neither explicit nor implicit, regarding the results that could be obtained via the usage of the Sociedad de Bolsa index. Sociedad de Bolsa will not be liable (whether on the basis of negligence or any other basis) for any error affecting the index with regard to any party, and it will have no obligation to inform anyone of any possible error affecting the index.

The Lyxor IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF is in no way sponsored or promoted by Sociedad de Bolsa, that does not market it.

2. Evolution of the net assets

	31.10.2019	31.10.2018
Currency	EUR	EUR

LYXOR IBEX 35 DOBLE APALANCADO DIARIO UCITS ETF
(compartment of the Multi Units France Sicav)

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency for the keeping of the accounts.

By main currency	GBP	JPY	CHF	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	33,734,027.26	10,997,901.53	5,040,039.96	1,857,689.53
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	-	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	33,734,027.26	10,997,901.53	5,040,039.96	1,857,689.53
Debts	-	-	-	-
Financial accounts	-	0.39	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future foreign exchange operations by type of operation (purchase/sale).

Receivables	-
Future currency exchange operations:	-
Future purchases of currency	-
Total traded amount of future Sales of currencies	-
Other receivables:	-
-	-
-	-
-	-
-	-
-	-
Other operations	-
Debts	26,590.56
Future currency exchange operations:	-
Future sales of currencies	-
Total traded amount of future Purchases of currencies	-
Other debts:	-
Accrued expenses	26,590.56
-	-
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	2,252,500	37,533,758.39	4,511,700	79,032,384.76
Subscription / redemption commission		-		-
Retrocessions		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.40
Performance commissions (variable fees): amount of costs for the year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	74,199,569.57

(compartment of the Multi Units France Sicav)

3.12 Table of the profit and loss and other characteristic elements of the Compartment during the last 5 fiscal years

Currency					
EUR	31.10.2019	31.10.2018	31.08.2017	31.08.2016	31.08.2015
Net assets	74,172,978.62	101,495,769.89	84,714,921.88	88,610,667.62	102,345,622.95
Number of outstanding equities	4,086,715	6,345,915	4,111,444	6,225,976	5,103,360
Net asset value	18.1497	15.9938	20.6046	14.2324	20.0545
Unit distribution on capital gains and losses (including advances)	-	-	-	-	-
Unit distribution (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	8.52	-6.56	9.25	-1.20	-22.29

⁽¹⁾ Pursuant to the Fiscal Instruction of 4 March 1993 from the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the outstanding units on that date.

⁽²⁾ The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 19 April 2018.

(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR IBEX 35 DOBLE INVERSO DIARIO UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Lyxor Ibex 35 Doble Inverso Diario UCITS ETF Compartment (the "Compartment") is an index-based UCITS ETF.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment's management objective is to be inversely exposed and with a daily x2 leverage, upwards or downwards, to the Spanish equity market while reproducing the evolution of the Ibex 35[®] Doble Inverso strategy index (the "Benchmark Indicator"), listed in Euro (EUR), regardless of its evolution, and while insofar as possible minimizing the tracking error between the Compartment's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark Indicator is calculated on a daily basis at closing prices using the official closing price of the stock exchanges where the constituent stocks are listed.

The Benchmark indicator is also calculated in real time every day that the Benchmark Indicator is published. The Benchmark Indicator's closing price is available on the Internet site:

<http://www.bolsamadrid.es/ing.aspx/Indices/Resumen.aspx>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Sociedad de Bolsas director of the Ibex 35[®] Doble Inverso benchmark index has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its management objective.

The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Parent Index, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets of the Compartment.

The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value in the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph 1 above).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of daily readjustment of the leverage

Investors are inversely and doubly exposed to the fluctuations affecting the price or level of the Parent Index on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will entail an even stronger depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" strategy index implies that, over a period of more than one business day, the Compartment's performance will not be equal to twice the opposite of the performance of the Parent Index.

For example, if the Parent Index appreciates by 10% on one trading day then depreciates by 5% on the next trading day, the Compartment will be depreciated in all, after these two days (and before deduction of the applicable fees), by 12%, while the Parent Index will be appreciated by 4.5% over the same period.

If the Parent Index depreciates by 5% per day for 2 consecutive trading days, it will have depreciated by a total of 9.75%, while the Compartment will have appreciated (before deduction of the applicable fees) by 21% over the same period.

Negative scenario 1

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Parent Index

	Parent Index		Benchmark Indicator		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	110	-20%	80	x-2
Day 2	-5%	104.5	10%	88	x-2
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2

Case in which the resulting negative leverage is less than 2 within the scenario of a decline of the Parent Index

	Parent Index		Benchmark Indicator		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-10%	90	20%	120	x-2
Day 2	6%	95.4	-12%	105.6	x-2
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts a decline over this same period.

Reverse leverage scenario:

Case in which the induced leverage is positive over the period

	Parent Index		Benchmark Indicator		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	5%	100	-10%	100	x-2
Day 2	-5%	105	10%	90	x-2
		99.75		99	
Whole period	-0.25%		-1.00%		x4

- Risk that the Compartment's management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this index or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to be inversely exposed with a daily x2 leverage, whether upwards or downwards, to the Spanish equity market.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As an arbitration product, this Compartment could not be suitable to investors who wish to make a mid- or long-term investment.

“U.S. Persons” (as defined below - see “COMMERCIAL ORDER INFORMATION”) may not invest in the Compartment.

For more details, the prospectus can be obtained by requesting it from the management company.

The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France Sicav: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 15 February 2018.*
- *Compartment creation date: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of IBEX 35® DOBLE INVERSO TOTAL RETURN (Ticker: IBEXDS).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor IBEX 35 Doble Inverso Diario UCITS ETF - Acc	FR0011036268	EUR	-20.92% ⁽¹⁾	-20.21%	-82.41%	

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0359% for the sub-fund. The Tracking Error target for the year was 0.15%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the Compartment [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Due to the investment policy of this fund, Lyxor will not disclose any metrics in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the calculation day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters the day of the Compartment's net asset value.

appendix

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.60% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

(1) including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

appendix

Sociedad de Bolsa provides no guarantee of any kind, neither explicit nor implicit, regarding the results that could be obtained via the usage of the Sociedad de Bolsa index.

Sociedad de Bolsa will not be liable (whether on the basis of negligence or any other basis) for any error affecting the index with regard to any party, and it will have no obligation to inform anyone of any possible error affecting the index.

The Lyxor IBEX 35 DOBLE INVERSO DIARIO UCITS ETF is in no way sponsored or promoted by Sociedad de Bolsa, that does not market it.

Previous fiscal year distribution on profit and loss	-	-
Net profit and loss of the fiscal year before adjustment account	-79,412.87	-147,669.83
Advance(s) paid during the fiscal year on net capital gains and losses	-	-
Advance(s) paid during the fiscal year on profit and loss	-	-
Other elements	-	-
Net assets at the end of the fiscal year	25,071,264.53	11,462,461.34

3. Information supplements

3.1 Financial instruments: breakdown by the instrument's legal or economic type

3.1.1 Breakdown of the "Bonds and similar securities" item by type of instrument

	Traded on a regulated or similar market	Not traded on a regulated or similar market
Index-linked bonds	-	-
Convertible bonds	-	-
Fixed-rate bonds	-	-
Variable-rate bonds	-	-
Zero-coupon bonds	-	-
Participating securities	-	-
Other instruments	-	-

3.1.2 Breakdown of the "Debt securities" item by legal or economic type

	Traded on a regulated or similar market	Not traded on a regulated or similar market
Treasury Bills	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by non-financial issuers	-	-
Negotiable EUropean Commercial Paper (NEU CP) issued by bank issuers	-	-
Negotiable EUropean Medium Term Note (NEU MTN)	-	-
Other instruments	-	-

3.1.3 Breakdown of the "Sale operations on financial instruments" item by instrument type

	Securities under reverse repurchase agreement sold	Securities borrowed sold	Securities acquired with redemption right sold	Short sales
Equities	-	-	-	-
Bonds	-	-	-	-
Debt securities	-	-	-	-
Other investments	-	-	-	-

LYXOR IBEX 35 DOBLE INVERSO DIARIO UCITS ETF
(compartment of the Multi Units France Sicav)

3.1.4 Breakdown of the off-balance sheet headings by market type (notably rates, equities)

	Rate	Equities	Exchange	Other
Hedging				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	-
Other commitments	-	-	-	-
Other operations				
Commitments on regulated or similar markets	-	-	-	-
Over-the-counter commitments	-	-	-	24,634,688.78
Other commitments	-	-	-	-

3.2 Breakdown by rate types of the asset, liability and off-balance sheet items

	Fixed rate	Variable rate	Revisable rate	Other
Assets				
Deposits	-	-	-	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	0.72
Liabilities				
Temporary financial securities operations	-	-	-	-
Financial accounts	-	-	-	4.31
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.3 Breakdown by residual maturity of the asset, liability and off-balance sheet items

	0-3 months	3 months - 1 year	1-3 years	3-5 years	>5 years
Assets					
Deposits	-	-	-	-	-
Bonds and similar securities	-	-	-	-	-
Debt securities	-	-	-	-	-
Temporary financial securities operations	-	-	-	-	-
Financial accounts	0.72	-	-	-	-
Liabilities					
Temporary financial securities operations	-	-	-	-	-
Financial accounts	4.31	-	-	-	-
Off-balance sheet					
Hedging	-	-	-	-	-
Other operations	-	-	-	-	-

LYXOR IBEX 35 DOBLE INVERSO DIARIO UCITS ETF
(compartment of the Multi Units France Sicav)

3.4 Breakdown by listing or assessment currency of the asset, liability and off-balance sheet items

This breakdown is given for the main listing or assessment currencies, with the exception of the currency for the keeping of the accounts.

By main currency	GBP	CHF	AUD	Other currencies
Assets				
Deposits	-	-	-	-
Equities and similar securities	10,773,617.22	2,530,922.35	1,263,321.41	-
Bonds and similar securities	-	-	-	-
Debt securities	-	-	-	-
CIU	-	-	-	-
Temporary financial securities operations	-	-	-	-
Receivables	-	-	-	-
Financial accounts	0.72	-	-	-
Other assets	-	-	-	-
Liabilities				
Sale operations on financial instruments	-	-	-	-
Temporary financial securities operations	10,773,617.22	2,530,922.35	1,263,321.41	-
Debts	-	-	-	-
Financial accounts	-	-	-	-
Off-balance sheet				
Hedging	-	-	-	-
Other operations	-	-	-	-

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future foreign exchange operations by type of operation (purchase/sale).

Receivables	-
Future currency exchange operations:	
Future purchases of currency	-
Total traded amount of future Sales of currencies	-
Other receivables:	
-	-
-	-
-	-
-	-
-	-
Other operations	-
Debts	11,264.47
Future currency exchange operations:	
Future sales of currencies	-
Total traded amount of future Purchases of currencies	-
Other debts:	
Accrued expenses	11,264.47
-	-
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	10,345,123	39,061,130.92	5,745,407	22,556,706.75
Subscription / redemption commission		-		-
Retrocessions		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.60
Performance commissions (variable fees): amount of costs for the year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	25,082,532.59

3.10 Allocation of the profit and loss table (in the Compartment accounting currency)

Advances paid during the fiscal year

Date	Overall amount	Unit amount	Total tax credits	Unit tax credits
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
-	-	-	-	-
Total advances	-	-	-	-

	31.10.2019	31.10.2018
	EUR	EUR
Allocation of the profit and loss		
Sums still to be allocated		
Carried forward	-	-
Profit and loss	-125,482.65	-70,899.35
Total	-125,482.65	-70,899.35
Allocation		
Distribution	-	-
Carried forward for the fiscal year	-	-
Capitalisation	-125,482.65	-70,899.35
Total	-125,482.65	-70,899.35
Information relative to the equities and resulting in a distribution right		
Number of equities	-	-
Unit distribution	-	-
Tax credits linked to the allocation of the profit and loss	-	-

3.11. Allocation table of the distributable sums related to the net capital gains and losses
(in the Compartment accounting currency)

Advances on net capital gains and losses paid for the fiscal year

Date	Overall amount	Unit amount
-	-	-
-	-	-
-	-	-
-	-	-
-	-	-
Total advances	-	-

	31.10.2019	31.10.2018
Allocation of the net capital gains and losses	EUR	EUR
Sums still to be allocated		
Non-distributed prior net capital gains and losses	-	-
Net capital gains and losses of the fiscal year	-20,960,372.92	13,007,718.52
Advances paid on net capital gains and losses of the fiscal year	-	-
Total	-20,960,372.92	13,007,718.52
Allocation		
Distribution	-	-
Non-distributed net capital gains and losses	-	-

(compartment of the Multi Units France Sicav)

3.12 Table of the profit and loss and other characteristic elements of the Compartment during the last 5 fiscal years

Currency					
EUR	31.10.2019	31.10.2018	31.08.2017	31.08.2016	31.08.2015
Net assets	25,071,264.53	11,462,461.34	29,247,141.10	28,004,359.79	31,466,625.65
Number of outstanding equities	7,204,600	2,604,884	7,587,721	4,500,069	5,078,358
Net asset value	3.4798	4.4003	3.8545	6.223	6.1962
Unit distribution on capital gains and losses (including advances)	-	-	-	-	-
Unit distribution (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-2.92	4.96	-1.64	3.42	-7.19

⁽¹⁾ Pursuant to the Fiscal Instruction of 4 March 1993 from the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the outstanding units on that date.

⁽²⁾ The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 19 April 2018.

4. Inventory as of 31.10.2019

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification

International equities.

At least 60% of the Lyxor Nasdaq-100 Daily (2x) Leveraged UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an index-based strategy fund of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective

The Compartment’s management objective is to obtain an exposure, upwards or downwards, to the American equity market while reproducing the NASDAQ-100 Leveraged Notional Net Return Index strategy index (the “Benchmark indicator”), listed in US Dollars (USD), regardless of its evolution, and while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.15%.

Benchmark indicator

The Benchmark Indicator is the NASDAQ-100 Leveraged Notional Net Return Index strategy index (Net Dividends Reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator is a strategy index defined by NASDAQ OMX Group Inc. It is calculated and maintained by S&P.

The NASDAQ-100 Leveraged Notional Net Return Index is a strategy index that reflects the evolution of the NASDAQ-100 (NDX) index (the “Parent Index”) with a daily x2 leverage, which means that if the Parent Index climbs by 2% over a trading day, the Benchmark Indicator climbs by 4% over the same trading day, less borrowing costs, and vice versa. The double performance is obtained by doubling the investment on each trading day, via a loan, in the basket of equities of the Parent Index. The cost of the loan is taken into account when calculating the Benchmark Indicator.

The Benchmark Indicator is a subgroup of the Parent Index. The Parent Index is an American technology index offering an indexation to the American technology sector.

It is composed of 100 securities and comprises the largest capitalisations of the following sectors: Internet services and software, computer services and consulting, software, electronic equipment and instruments, office electronics and semi-conductors.

The NASDAQ-100 Leveraged Notional Net Return Index strategy index was created on 18 November 2009.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator will be available on the Internet site: <https://indexes.nasdaqomx.com/>

The monitored performance is that of the index closing prices in USD.

BENCHMARK INDICATOR PUBLICATION

The Benchmark Indicator is calculated on a daily basis at closing prices using the official closing market prices of the stock exchanges where the constituent stocks are listed. The Benchmark indicator is also calculated in real time every day that the Benchmark Indicator is published.

The Benchmark Indicator's closing price is available on the Internet site: <https://indexes.nasdaqomx.com/>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the NASDAQ OMX Group, Inc director of the NASDAQ-100 Leveraged Notional Net Return Index Benchmark Indicator has until 01.01.2020 to apply for an approval or a registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

BENCHMARK INDICATOR REVISION AND COMPOSITION

The revision of the Benchmark Indicator's composition depends on the revision of its Parent Index's composition. The composition of the Parent Index is revised quarterly.

The leverage in the Benchmark Indicator computation formula undergoes a daily readjustment. The consequences related to the daily readjustment of the leverage are detailed, for instance, in the Benchmark Indicator and Risk profile sections of this prospectus.

The exact composition of the Parent Index and the revision rules of its composition and incidentally of the Benchmark Indicator published by NASDAQ OMX Group Inc. are available on the Internet site: <https://indexes.nasdaqomx.com/>

The above-mentioned rebalancing frequency has no impact on the costs within the framework of the implementation of the Investment strategy.

ADVANTAGES OF THE "LEVERAGE" STRATEGY

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Indicator. By borrowing securities to carry out the strategy, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Index rises, the gains on a given trading day are twice as much as obtained with a "single" investment in the Parent Index. Conversely, in case of a bear market, the loss will be twice as much, on a daily basis, due to the multiplier effect of the leverage. This daily multiplier effect also applies to the risks of this strategy.

Investment strategy

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Parent Index, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The Compartment will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equity of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value in the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph above).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations.

The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;

- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the CIU may recall at any time the global amount of liquidities taking into account the accrued interests; or
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument (“FFI”)) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment’s equity price can deviate from its indicative net asset value. The liquidity of the Compartment’s equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment’s indicative net asset value, and/or
- iv) A market maker’s violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace’s IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as “OTC derivatives”) and/or efficient portfolio management techniques (hereinafter referred to as “EPMTs”). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment’s assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting from day to day the price or level of the Parent Index. In particular, any depreciation of the underlying market will be increased and will entail an even stronger depreciation of the Compartment’s net asset value. The daily readjustment shown in the formula of the underlying “leveraged” strategy index implies that, over a period of more than one trading day, the Compartment’s performance will not be equal to the double performance of the Parent Index.

For example, if the Parent Index appreciates by 10% on one trading day then depreciates by 5% on the next trading day, the ETF will be appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the Parent Index will be appreciated by 4.5% over the same period. If the Parent Index depreciates by 5% per day for 2 consecutive trading days, it will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1	Case in which the resulting leverage is greater than 2 within the scenario of a decline of the Parent Index				
	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	110	20%	120	x2
Day 2	-11%	97.9	-22%	93.6	x2
Whole period	-2.10%		-6.40%		x3.05

LYXOR NASDAQ-100 DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Negative scenario 2	Case in which the resulting leverage is greater than 2 within the scenario of a decline of the Parent Index				
	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-5%	100 95	-10%	100 90	x2
Day 2	6%	100.7	12%	100.8	x2
Whole period		0.70%		0.80%	x1.14

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts an increase over this same period.

Reverse leverage scenario	Case in which the induced leverage is negative over the period				
	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	20%	100 120	40%	100 140	x2
Day 2	-16%	100.8	-32%	95.2	x2
Whole period		0.80%		-4.80%	x-6

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the index" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,

- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the index

The Compartment is exposed to an exchange risk to the extent that the underlying securities comprising the strategy index could be listed in a currency other than that of the index, or be derivatives of securities listed in a currency other than that of the index. Fluctuating exchange rates are then likely to negatively affect the strategy index monitored by the Compartment.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the upward or downward evolution in the American equity market.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The recommended minimum investment period is at least 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 15 February 2018.*
- *Compartment creation date: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of NASDAQ 100 Leveraged Notional Net Return Index USD (Ticker: XNDXNNRL).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Nasdaq-100 Daily (2x) Leveraged UCITS ETF – Acc	FR0010342592	EUR	28.92% ⁽¹⁾	29.51% ⁽³⁾		1,738.14%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

⁽²⁾ “Since the Share Class NAV is not calculated in the Index currency, the share class may be exposed to currency risk. The calculation methodology for the Foreign Exchange rate during the period is share currency/ index currency.”

⁽³⁾ “When the Benchmark Index is denominated in a currency other than the share currency, the performance of the Benchmark Index is converted into the share's currency for comparison purpose. FOREX transactions are executed on a daily basis (WM Reuters 5 pm rate on the relevant date).”

The Tracking Error is 0.0453% for the sub-fund. The Tracking Error target for the year was 0.15%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D.533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

- The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),
- Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),
- A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

- Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 22%
Yellow Flag 53%
Green Flag 25%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	99%
22	90	48	Scope 1 reported (vs estimated)	95%
			Scope2 reported (vs estimated)	61%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	15.1%	8.6%	0.4%
Some efforts	70.6%	82.6%	66.5%
Limited efforts/information	1.1%	1.7%	0.3%
No effort/No evidence	13.2%	7.0%	32.8%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

0.4%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	3.3%
Liquid Fuel	
Natural Gas	29.0%
Nuclear	13.0%
Renewables	21.7%
Thermal Coal	33.0%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	28%
20-49.9%	5%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	2.9%
Energy Efficiency	33.5%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	1.7%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.2%
Energy Efficiency	4.8%
Green Building	0.0%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

Lyxor's best selection and execution policy

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules for the assets

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the calculation day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates published by the WM Reuters fixing on the day before the closing date of the Compartment's net asset value.

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative fees external to the management company ⁽¹⁾	Net assets	maximum 0.60% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transfer commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

appendix

LYXOR NASDAQ-100 DAILY LEVERAGE UCITS ETF (the “Compartment”) is not sponsored, validated, sold or promoted by “The Nasdaq Stock Market”, Inc. (Nasdaq and its affiliates are hereinafter referred to as the “Companies”). The Companies have not validated the Product’s legality or relevance, nor the accuracy and adequacy of the descriptions and representations made with regard to the Product. The Companies do not guarantee and make no express or tacit commitment to the shareholders of the Product or to any other person with regard to the advisability of purchasing equities in general, or of subscribing to the Product, or regarding the ability of the Nasdaq-100 Index[®] to follow the performance of the equity markets. The only link between the Companies and LYXOR INTERNATIONAL ASSET MANAGEMENT (the “Licensee”) consists of a licence agreement for the brands Nasdaq[®], Nasdaq-100[®] and Nasdaq-100 Index[®] and certain other trade names of the Companies and relative to the use of the Nasdaq-100 Index[®], that is set up, composed and calculated by Nasdaq without considering the Licensee or the Product. Number of outstanding equities	340,467	348,525	331,938	288,318	520,218
Net asset value	278.0826	215.6997	177.4445	113.4242	108.6408
Unit distribution on capital gains and losses (including advances)	-	-	-	-	-
Unit distribution (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	50.47	55.61	39.00	-3.39	36.23

⁽¹⁾ Pursuant to the Fiscal Instruction of 4 March 1993 from the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the outstanding units on that date.

⁽²⁾ The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 19 April 2018.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR PEA PME (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR PEA PME (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities from Euro zone countries.

At least 60% of the Lyxor PEA PME (DR) UCITS ETF Compartment, (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several Euro zone countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

The Board of Directors reserves the right to distribute all or part of the income and/or to capitalize it once or several times a year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to replicate, upwards and downwards, the evolution of the CAC PME GR Index (the “Benchmark Indicator”) listed in euros (EUR), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator. It represents the securities of small and medium enterprises and mid-caps companies listed on the Euronext Paris market, and eligible for PEA PME.

The anticipated level of the ex-post tracking error under normal market conditions is 0.30%.

Benchmark indicator:

The Benchmark Indicator is the CAC PME GR Index.

The Benchmark indicator represents the performance of the best-rated small and mid-caps companies as well as middle-market companies listed on the Euronext Paris market, selected according to a liquidity criterium and the “SME” criteria.

The Benchmark indicator has between 20 and 40 components representing the performance of the best-rated small and mid-caps market capitalization companies as well as middle-market companies listed on the Euronext Paris market.

This Benchmark indicator is weighted by the modified market capitalization, with a fixed cap of 7.5% for each component of the Benchmark Index, as well as a fixed cap of 25% per industrial sector.

The Benchmark indicator is rebalanced quarterly over a period of 5 days. On each rebalancing date, the eligible securities are selected on the basis of the below criteria:

- The securities are filtered so as to only select securities meeting a “liquidity factor” fixed at a minimum volume of average daily transactions at 3 months and 1% of the free-float adjusted market capitalization.
- The securities must also satisfy the “SME criteria”, implying the two following conditions for the issuer of said securities:
 - The company must have between 250 and 4999 employees
 - The annual turnover must not exceed 1.5 billion euros, or a balance sheet total of less than 2 billion euros.

The Benchmark indicator is a Gross Dividends Reinvested index. A Gross Dividends Reinvested index considers the performance of the components, including the reinvestment of the gross dividends and all forms of distribution in the performance of the index.

Benchmark indicator publication

The performance monitored is that of the closing price of the Benchmark Indicator.

The complete methodology is available at the following address: www.euronext.com.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the director Euronext Paris S.A. of the CAC PME GR Index has until 01.01.2020 to request authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The Benchmark Indicator is reviewed quarterly, over a period of 5 days.

An exhaustive description and methodology for the construction of the Benchmark Indicator as well as information on the respective composition and weights of the components of the Benchmark Indicator are available on the Internet site: www.euronext.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment will use a direct replication method, which means that it will invest mainly in the Benchmark Indicator's constituents.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its financial manager by delegation, may decide to employ a "sampling" technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (FFI). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment's tracking error.

The Internet site www.lyxoretf.com has a page dedicated to the Compartment, which allows investors to benefit from transparency on the direct replication method used (full replication of the Benchmark Indicator or sampling to limit replication costs). The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site.

The Compartment also permanently complies with the limits on assets which may be acquired in the context of a PEA-PME, namely the holding of securities whose eligibility is defined by the INSEE criteria; the issuing company must have less than 5000 employees, and its annual turnover must not exceed 1.5 million euros, or it must have a total balance sheet of less than 2 billion euros.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

The Compartment will be mainly invested in bonds making up the Benchmark Indicator.

At all times, the Compartment will invest at least 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the agreement on the European Economic Area and that has signed, with France, a tax convention that includes an administrative assistance clause for the purpose of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

Investment in the assets of undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

3. Off-balance sheet assets (derivative instruments)

On an ancillary basis, the Compartment may use FFIs traded on a regulated market or over the counter.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments within the limits and under the conditions provided for by the regulations.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

Pursuant to its investment strategy, the Compartment may use various efficient portfolio management techniques in compliance with Article R214-18 of the French Monetary and Financial Code, including the temporary sale of securities.

- Maximum proportion of assets under management which may be subjected to securities financing transactions: up to 25% of the assets of the Compartment.

- Expected proportion of assets under management which may be subject to securities financing transactions: 20% of the assets of the Compartment.

For this purpose the management company will appoint Société Générale as intermediary (hereinafter the "Agent") to provide the following services in connection with the Compartment's temporary securities transactions. If such an Agent is used it may be authorised to (i) lend securities, on the Compartment's behalf, under framework agreements, such as global master securities lending agreements (GMSLA) and/or any other internationally recognised framework agreement, and (ii) invest, on the Compartment's behalf, any liquid assets received as guarantee for these securities lending transactions, subject to the restrictions specified in the securities lending agreement, the rules of this prospectus and the applicable regulations.

As a reminder, the Management Company is an entity of the Société Générale group and is therefore linked to the Agent.

In the event that such temporary disposals are used, all income from such transactions, net of direct and indirect operating costs/expenses, will be returned to the Compartment.

These operating costs/expenses, which are incurred to manage the portfolio more efficiently, may be borne by the Compartment's management company, the Agent and/or other intermediaries that are involved in these transactions.

These direct and indirect operating costs/expenses will be calculated as a percentage of the Compartment's gross income. Information on direct and indirect operating costs/expenses and on the entities to which these costs/expenses are paid will be provided in the annual report of the Sicav Multi Units France.

All income obtained from the lending of securities (from which must be deducted all direct and indirect operating costs/expenses borne by the Agent and if applicable by the management company) shall be paid to the relevant Compartment. Since these direct and indirect costs/expenses do not increase the Compartment's overall operating costs/expenses they have been excluded from ongoing expenses.

If necessary, the Compartment's annual report will provide the following information:

- the exposure resulting from the use of efficient portfolio management techniques/transactions;
- the identity of the counterparty(ies) involved in these transactions;
- the nature and amount of any guarantee received to reduce the Compartment's counterparty risk, and;
- the income generated by efficient portfolio management techniques over the relevant period, and any associated direct and indirect operating costs/expenses.

When Société Générale acts as counterparty to all transactions constituting effective portfolio management techniques, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

8. Financial guarantees

In all cases where the investment strategy used exposes the Compartment to counterparty risk, in particular in connection with temporary purchases and sales of securities, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;

- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment in the event of temporary securities transactions. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

Pursuant to the terms of the contract signed with the Agent (see section 7 on "Securities financing transactions"), the Management Company will select eligible counterparties for securities financing transactions on the basis of the criteria indicated below and will provide Société Générale with a list of these counterparties.

The Management Company selects its financial intermediaries and counterparties in accordance with a strict policy, particularly when it enters into financial contracts (securities financing transactions) on the Compartment behalf. Counterparties for securities financing transactions and financial intermediaries are selected from among well-known and reputable intermediaries using a rigorous process that involves several criteria for assessing the quality of research services (e.g. fundamental financial analysis, information on companies, added value of staff, and the reliability of recommendations) or of execution services (e.g. access to markets and information, transaction costs, execution price, and the settlement of transactions).

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will be invested mainly in financial instruments selected by the management company. These instruments will be subject to market developments and risks.

The shareholder is exposed through the Compartment mainly to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the low diversification of the Benchmark Indicator

The Benchmark Indicator to which investors are exposed covers a given region, sector or strategy and therefore does not necessarily allow for the same broad asset diversification as an index that would be exposed to several regions, sectors or strategies. Exposure to such an undiversified index may result in greater volatility than exposure to more diversified markets. Nevertheless, the diversification rules derived from the UCITS standards apply at all times to the underlying assets of the Compartment.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for Future Financial Instrument (FFI)) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the index, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk arising from a lack of perfect replication

Replicating the performance of the Benchmark Indicator by investing in all of its constituents may prove to be very difficult to implement and costly. The Compartment manager may therefore use various optimisation techniques, such as 'sampling', which consists in investing in a selection of representative securities (and not all securities) that constitute the Benchmark Indicator, in proportions that differ from those of the Benchmark Indicator or even investing in securities that are not index constituents and derivatives. The use of such optimization techniques may increase the ex post tracking error and cause the Compartment to perform differently from that Benchmark Indicator.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risk related to the use of effective portfolio management techniques:

In the event that the counterparty to the efficient portfolio management technique (hereinafter referred to as the "EPMT") processed by the If the Compartment fails to do so, the Compartment may incur a risk in the event that the value of the guarantees received by the Compartment is insufficient. Compartment would be less than the value of the assets of the Compartment transferred to the counterparty under the EPMT concerned. This risk could materialize in particular in the event of (i) a poor valuation of the securities covered by this transaction and/or (ii) adverse market movements and/or (iii) a deterioration in the issuers' credit ratings securities received as collateral and/or (iv) market illiquidity on which the collateral received is listed. Holders' attention is drawn to the fact that (i) EPMT s could be concluded with Société Générale (an entity of the same name group as the Management Company) and/or (ii) that Société Générale could be appointed as agent of the Compartment in the EPMT framework. The Management Company oversees the potential risks of conflicts of interest related to the execution of intra-group transactions by setting up procedures to identify them, limit them and ensure their fair resolution where necessary.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk related to the use of futures

On an ancillary basis, the Compartment may use forward financial instruments ("FFIs") traded over the counter or listed FFIs, in particular futures contracts and/or hedging swaps. These FFIs may involve a range of risks, at the contract level, including (but not limited to) the following: counterparty risk, hedging event, event affecting the Benchmark Indicator, tax regime risk, regulatory risk and liquidity risk. These risks may directly affect an FFI and may lead to an adjustment or even early termination of the FFI's contract, which may affect the net asset value of the Compartment.

Investment in FFIs may involve a high level of risk. The amount required to trade certain FFIs is potentially much lower than the exposure obtained through these instruments, which implies a "lever effect" at the level of each transaction. A relatively limited market movement would then have a proportionally very high impact, which may be favourable or unfavourable to the Compartment.

The market value of FFIs is very volatile and can therefore be subject to significant variations.

The Compartment may use over-the-counter FFIs. Over-the-counter transactions may be less liquid than transactions traded on organized markets, where trading volumes are generally higher and prices may be more volatile.

- Risk that the management objective may only be partially reached

Nothing guarantees that the management objective will be reached. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to a change of the tax regime

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,

- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a FFI), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Risk associated with investing in small and mid-cap companies

The Compartment is exposed to small cap companies and more specifically to securities issued on the equity markets of Small and Medium Enterprises (SMEs) and mid-market companies (ISEs), which may increase market and liquidity risks. Market movements are therefore more pronounced, both upwards and downwards, and faster than on large caps. The net asset value of the Compartment may behave in the same way and therefore decrease more quickly and significantly than a similar investment in large cap securities.

Subscribers concerned and typical investor profile:

The equities of the Compartment are open to any subscriber.

The investor subscribing to this Compartment wishes to gain exposure to the equity markets of small and medium-sized companies and mid-cap companies listed on the Euronext Paris market

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers. The minimum recommended investment duration is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Date of creation of the Sicav Multi Units France: 4 March 2002.*
- *Date of approval by the AMF: 14 March 2014.*
- *Date on which the Compartment was approved by the AMF: 8 February 2018.*
- *Date of creation of the Fund: 9 April 2014.*
- *Date of creation of the Compartment: 23 March 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of CAC PME GR EUR (Ticker: CACPG).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor PEA PME (DR) UCITS ETF - Dist	FR0011770775	EUR	-4.68% ⁽¹⁾	-5.26%		-15.76%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index;
- income related to securities financial transactions;
- sampling techniques or efficient portfolio management techniques.”

The Tracking Error is 0.1887% for the sub-fund. The Tracking Error target for the year was 0.3%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company’s voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company’s Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company’s method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

As part of the SRI Policy, Lyxor has defined a shareholder engagement policy that includes a voting policy and an engagement policy. This document is available on Lyxor website.

The scope for voting is the following:

French Funds (Fonds Communs de Placement – FCP)*, French & Luxembourgish SICAV (*) limited to European issuers.

To prevent excess cost resulting by the voting process, Lyxor votes only where its consolidated holdings represent at least 0.10% of the company's equity capital.

(*) Except the vehicles using a method of synthetic replication which are designed to track a financial exposure through a performance swap.

This fund applies an active ownership. This stake lets us influence companies to improve their ESG practices in the long term.

In terms of engagement, Lyxor joined the Climate Action 100+ initiative, committing itself to asking companies to improve their governance on climate change, reduce their greenhouse gas emissions and strengthen their financial climate-related communication through the implementation of the TCFD (Task Force on Climate-Related Financial Disclosures) recommendations.

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

Lyxor is using a variety of external information sources, including the following extra-financial rating agencies:

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Defense List produced by the Group, based on ISS-Ethix data to identify companies considered in violation of its Defense policy,

- In the global context of the Societe Generale Group Environmental and Social Policies, LYXOR used the Global Compact List produced by the Group, based on Sustainalytics data to identify companies that are associated with serious and repeated breaches of criteria, standards and/or mandatory requirements relating to controversial sectors and products,

- In addition to internal research conducted on corporate governance, Lyxor uses ISS Proxy voting adviser for voting recommendations. These recommendations are based on the Lyxor's Voting Policy,

- MSCI and Sustainalytics ESG research to integrate ESG issues,

- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

Active Ownership - Governance:

A governance committee oversees the implementation of Lyxor's Voting Policy. It is empowered to establish voting guidelines and is responsible to ensure that these guidelines and procedures are followed. Lyxor revises its voting policy on a yearly basis. An annual voting report will be published on the Website Lyxor.com

Active Ownership - Operational set up:

For an optimal voting preparation process and execution Lyxor uses a Proxy Voting Advisor.

Lyxor currently uses the services of ISS (Institutional Shareholder Services) for the implementation of its voting policy.

Where electronic voting is possible, voting is cast through a Proxy Exchange Platform. In exceptional cases where electronic voting is not possible (notably for some French companies) proxy voting forms are filled out and sent to the relevant issuers by post.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The detailed results of our shareholder engagement are available in the Lyxor annual voting report published on the Website Lyxor.com.

This year, as part of its engagement policy, Lyxor conducted 36 discussions with 32 European companies. The topics discussed mainly concerned corporate governance but also the integration of extra-financial issues in the overall strategy of the company or measures taken to reduce their greenhouse gas emissions.

In terms of the exercise of voting rights, the details of the vote on the fund are presented below.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

- Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

- The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

- Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

- A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

- Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

- Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

LYXOR PEA PME (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Portfolio ESG Rating as of October 2019

Utilities			3.4%						

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 0%
Orange Flag 0%
Yellow Flag 0%

88	157	201	Scope 1 reported (vs estimated)	87%
			Scope2 reported (vs estimated)	0%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated In Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0000
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	0.0
Thermal Coal	0.0
Oil	0.0
Gas	0.0
Total	0.0

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	0.0
Other	0.0

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	3.6%	0.0%	0.0%
Some efforts	45.0%	64.0%	18.0%
Limited efforts/information	6.7%	11.0%	0.0%
No effort/No evidence	44.7%	25.0%	82.0%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	Liquid Fuel
Natural Gas	Nuclear
Renewables	Thermal Coal

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	14%
20-49.9%	0%
50-100%	4%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	3.6%
Energy Efficiency	11.0%
Green Building	3.4%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	3.6%
Energy Efficiency	1.6%
Green Building	0.4%
Pollution Prevention	0.0%
Sustainable Water	0.0%

Voting Activity

By exercising its voting rights, Lyxor can contribute to improve the economic and financial performance of the companies in which it invests on behalf of its clients, with the aim of encouraging the adoption of best practices and mitigate the risk of business failure.

Data presented below reflects the exercise of Lyxor's voting rights since January 1st.

Meeting overview

In order to prevent the excessive costs inherent in the voting process, Lyxor attends general meetings when the consolidated holding represents more than 0.10% of the company's share capital. This table details the number of General Meetings in which Lyxor participated compared to all those held by issuers included in the fund.

Number of meetings	41
Number of Voted Meetings	8
Participation rate at General Meetings	19.5%

Instruction overview

As a responsible shareholder, Lyxor opposes resolutions that are not, in our opinion, in the interests of the shareholder. The table shows the distribution of FOR / AGAINST / ABSTENTION votes by resolution category.

Resolution	For	Against	Abstention
Routine/Business	90.9%	9.1%	0.0%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/61/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

Transparency of securities financing operations and reuse of financial instruments SFTR regulation

(Accounting currency of the CIU)

As at 31 October 2019, the CIU does not have a securities position subject to the SFTR regulations, i.e. repurchase agreements, securities or commodities lending/borrowing, purchase/resale or sale/purchase transactions, margin call lending transactions and global income swap (TRS) agreements.

However, during the financial year, the CIU had recourse to securities lending/borrowing transactions subject to the SFTR regulations which generated income in the amount of €114,440.65 from which were deducted direct and indirect operating costs/expenses in the amount of €61,621.89 borne by the Management Company and/or the Agent (where applicable).

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules of assets

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

appendix

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.
- Direct and indirect operational costs/fees related to temporary acquisitions and sales of securities

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document “KIID”.

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative expenses external to the management company ⁽¹⁾	Net assets	maximum 0.05% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None
Direct and indirect operational costs/expenses related to temporary acquisitions and sales of securities	Amount of income generated by these operations	20% maximum for the Management Company; 15% maximum for the Agent

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

In the event of a distribution, the Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year.

appendix

The Compartment does not benefit in any way from the sponsorship, support, promotion of and is not sold by Euronext N.V. or its subsidiaries (hereinafter referred to as "Euronext") (collectively referred to as the "Holders"). The Holders do not grant any guarantee or make any commitment, whether expressly or implicitly, or as to the results to be obtained by using the CAC PME Index (hereinafter "the Index") and/or the level at which the said Index is located at a given time and day or of any other type.

The Index is calculated by or on behalf of Euronext. Holders will not be liable (due to negligence or otherwise) of any error affecting the Index with respect to any person and they will not be required to inform anyone of any error affecting them.

Euronext N.V. or its subsidiaries holds all proprietary rights to the Index. Euronext N.V. and its subsidiaries, do not guarantee, approve, or are not involved in any way in the issuance and offer of the product. Euronext N.V. or its subsidiaries may not be held liable for any inaccuracies in the data on which the Index is based, any fault, error or omission in the calculation or dissemination of the Index, or in its use in connection with this issue and offer.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR RUSSELL 1000 GROWTH UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR RUSSELL 1000 GROWTH UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor Russell 1000 Growth UCITS ETF Compartment (the "Compartment") is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an index-based UCITS of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year.

The realised net capital gain will be capitalised.

Management objective

The Compartment's management objective is to replicate, upwards as well as downwards, the performance of the Russell 1000[®] Growth Net Total Return index (the "Benchmark Indicator"), listed in dollars (USD), which measures the performance of the value segment of large capitalisation companies on the US market, while minimising the tracking error between the performance of the Compartment and that of the Benchmark Index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator

Benchmark indicator description

The Benchmark Indicator is the Russell 1000[®] Growth Net Total Return (net dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator measures the performance of the segment of large-cap companies with growth potential in the American market. It includes the Russell 1000 companies with the biggest price-to-book ratio and that have the biggest growth potential.

The Benchmark Indicator has been created in an effort to offer a reliable market indicator for large-cap companies with growth potential. An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator are available on the Internet site: www.russell.com

The monitored performance is that of the Benchmark Indicator closing prices in US dollars.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective through an indirect replication method which means that the Compartment will have recourse to the conclusion of one or several forward swap contracts traded over-the-counter that will allow the Compartment to achieve its management objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment will notably be securities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The securities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small caps markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

At all times, the Compartment will invest at least 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the agreement on the European Economic Area and that has signed, with France, a tax convention that includes an administrative assistance clause for the purpose of combating fraud or tax evasion.

This minimum holding level provides for eligibility for a Stock Savings Plan.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF mentioned in article R214-13 of the [French] Monetary and Financial Code. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value of the equities in the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the Benchmark Indicator.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.

- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowing.

7. Temporary securities acquisition and sale operations

None.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment’s assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment’s net asset value;
- (e) The Compartment’s Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets. Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's share price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective.

In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors.

In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by the supplier of the index,
- iii) The supplier of the index is incapable of providing the level or value of the Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile: The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the performances of the segment of large-cap companies with growth potential in the American market by reproducing the evolution of the Benchmark Indicator.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

“U.S. Persons” (as defined below - see “COMMERCIAL ORDER INFORMATION”) may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Creation date of the Multi Units France mutual fund: 4 March 2002.*
- *Compartment approval date by the AMF (Financial Markets Authority): 15 February 2018.*
- *Compartment creation date: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of Russell 1000® Growth Net Total Return (Ticker: RU1GN30U).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Russell 1000 Growth UCITS ETF - Dist	FR0011119155	USD	16.43% ⁽¹⁾	16.65%	71.46%	
Lyxor Russell 1000 Growth UCITS ETF - Acc	FR0011119171	USD	16.43% ⁽¹⁾	16.65%	99.40%	

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.008% for the sub-fund. The Tracking Error target for the year was 0.05%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 2-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

-The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

-Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

-A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

-Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag	0%
Orange Flag	22%
Yellow Flag	44%
Green Flag	34%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	90%
12	48	41	Scope 1 reported (vs estimated)	74%
			Scope2 reported (vs estimated)	66%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	0%
Thermal Coal	0%
Natural Gaz	0%
Oil	0%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated In Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0001
Oil (MMBOE)	0.0000

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M invested	
Metallurgical Coal	1.4
Thermal Coal	0.0
Oil	20.3
Gas	0.0
Total	52.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	0.0
Shale Oil or Shale Gas	51.0
Sum High Impact Reserves	51.0
Other	1.4

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	9.1%	5.6%	1.1%
Some efforts	87.4%	81.9%	84.4%
Limited efforts/information	1.7%	2.1%	0.1%
No effort/No evidence	21.8%	10.4%	34.4%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	Liquid Fuel
Natural Gas	Nuclear
Renewables	Thermal Coal

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	22%
20-49.9%	4%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	3.2%
Energy Efficiency	26.8%
Green Building	0.4%
Pollution Prevention	2.9%
Sustainable Water	2.3%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.1%
Energy Efficiency	3.1%
Green Building	0.0%
Pollution Prevention	0.2%
Sustainable Water	0.1%

Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<https://www.lyxor.com/politiques>

Lyxor's best selection and execution policy

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates disseminated by the WM Reuters on the same day of the Compartment's net asset value date.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transfer commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document.

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative fees external to the management company, including tax ⁽¹⁾	Net assets	maximum 0.19% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transfer commissions	Net assets	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

In the event of a distribution, the Board of directors reserves the right to distribute all or part of the amounts available for distribution, one or more times each year.

appendix

The LYXOR RUSSELL1000 GROWTH UCITS ETF Compartment is in no way sponsored, endorsed, sold or promoted by Franck Russell Company ("Russell"), Russell makes no declaration and does not issue any express or tacit guarantee relative to bearers of the equities of the LYXOR RUSSELL1000 GROWTH UCITS ETF Compartment or more generally to the public, with regard to the advisability of a transaction involving equities of the UCITS in general or equities of the LYXOR RUSSELL1000 GROWTH UCITS ETF Compartment in particular, or regarding the ability of the Russell 1000[®] Growth Net Total Return index to replicate the performance of the market or of one of its segments. The publication of the Russell 1000[®] Growth Net Total Return index under no circumstances implies or suggests the advisability of investing in one or all of the securities making up the Russell 1000[®] Growth Net Total Return index. The only relation with Lyxor International Asset Management is the agreement of Franck Russell Company ("Russell") regarding the brands and names registered for Russell and relative to the Russell 1000[®] Growth Net Total Return index that is created and calculated by Russell without any consultation with Lyxor International Asset Management or the Fund. Russell cannot be held liable and has not studied the Fund nor any literature or other publication, and it makes no declaration and does not issue any express or tacit guarantee with regard to its accuracy or exhaustiveness. At any time and without warning, Russell reserves the right to revise, modify, close or otherwise change the Russell 1000[®] Growth Net Total Return index. Russell assumes no liability or obligation regarding the administration, management or marketing of the LYXOR RUSSELL1000 GROWTH UCITS ETF Compartment.

RUSSELL DOES NOT GUARANTEE THE ACCURACY AND/OR EXHAUSTIVENESS OF THE INDICES OR OF ANY INCLUDED DATA. (compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR RUSSELL 1000 VALUE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the Lyxor Russell 1000 Value UCITS ETF Compartment (the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an index-based fund of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to replicate, upwards as well as downwards, the performance of the Russel 1000® Value Net Total Return Index (the "Benchmark Index"), listed in dollars (USD), which measures the performance of the value segment of large capitalisation companies on the US market, while minimising the tracking error between the performance of the Compartment and that of the Benchmark Index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.05%.

Benchmark indicator:

Description of the Benchmark Indicator

The Benchmark Indicator is the Russell 1000® Value Net Total Return (net dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator measures the performance of the segment of equities known as “value” (or value shares) of large-cap companies in the American market. It includes the Russell 1000 companies with the lowest price-to-book ratio and that have the lowest growth potential.

The Benchmark Indicator has been created in an effort to offer a reliable market indicator for so-called “value” large-cap companies. This Benchmark Indicator is totally updated every year, in order to take into account new growth values and to ensure the consistency of the “value” market represented by the Benchmark Indicator.

The monitored performance is that of the Benchmark Indicator closing prices. The Benchmark Indicator is calculated by Russell Investments.

Benchmark indicator methodology

Russell provides a family of US equity indexes weighted by market capitalisation. All of the US indices are sub-sets of the Russell 3000E™ Index, which represents approximately 99% of the US stock market.

The Benchmark Indicator is a sub-set of the Russell 1000® Index which represents the latter’s ‘value’ equities which are selected on the basis of variables such as the price-to-book ratio, the I/B/E/S medium-term growth and the growth of historical sales per equity.

Each year, Russell Investments observes the following methodology to select the stocks that are to be included in the Benchmark Indicator:

- Classification by market capitalisation as at 31 May
- The largest 3,000 securities comprise the Russell 3000[®] Index
- The largest 1,000 securities comprise the Russell 1000[®] Index

The following are excluded:

- Securities traded at less than one dollar.
- Securities traded on the OTC Bulletin Board or on the Pink Quote market
- Closed funds, SCS, royalty trusts, etc.
- Non-US equities and American Depositary Receipts (ADRs).

Dividends are reinvested at the ex-dividend date.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator are available on the Internet site: www.russell.com

Benchmark indicator publication

The Benchmark Indicator's closing price is available on the Internet site: www.russell.com.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, Frank Russel Company Director of the Russell 1000[®] Value Net Total Return Benchmark has until 01.01.2020 to apply for approval or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Benchmark indicator revision and composition

The Benchmark Indicator is revised annually.

The exact composition of the Benchmark Indicator and Russell rules for index composition revision are available on the Internet site: www.russell.com. The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

For information, on 14 October 2011, the Benchmark Indicator comprised 657 securities.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective through an indirect replication method which means that the Compartment will have recourse to the conclusion of one or several forward swap contracts traded over-the-counter that will allow the Compartment to achieve its management objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment will notably be securities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The securities basket held may be adjusted on a daily basis so that its value be higher or equal to 100% of the net assets in most cases. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity.

This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small caps markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a CIU, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

Investment in the assets of undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net asset.

The manager will not invest in units or equities of AIF mentioned in article R214-13 of the [French] Monetary and Financial Code. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value of the equities in the Compartment's assets (or of any other financial instrument included in the Compartment's assets, where appropriate) against the Benchmark Indicator.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowing.

7. Temporary securities acquisition and sale operations

None.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and

such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Guarantees received in a currency other than the Euro may be subject to an additional margin.

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged.

The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the Compartment may recall at any time the global amount of liquidities taking into account the accrued interests;
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts negotiated over the counter at over-the-counter and/or temporary acquisitions and sales of securities), the Compartment may be forced to resell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the depreciation of the financial securities acquired as part of this reuse of guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company shall implement a policy for selecting financial intermediaries and counterparties particularly when it enters into total return swaps on the Compartment's behalf.

Financial establishments of an OECD country which have been found to be satisfactory are selected. Such analysis is done on the basis of the Management Company risk department's specific criteria, such as financial stability, rating, exposure, credit spread, type of business, track-record, etc.

The list of authorised counterparties shall be reviewed periodically or in the event of a market shock or decline in the selection criteria. This involves various departments (investment management, risks, operations, and support staff) of the Management Company. The counterparties selected are monitored regularly in accordance with the Management Company's Execution Policy. An escalation procedure to Senior Management of the Management Company and/or the Risk Department of the Société Générale group is provided in the event of an incident.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's share price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or

- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors.

In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

“Events affecting the Benchmark Indicator” are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market’s actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by the supplier of the index,
- iii) The supplier of the index is incapable of providing the level or value of the Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator’s components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator’s performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction (“ST”), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment’s counterparty in a future financial instrument), the Compartment’s net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST’s treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the performances of the segment of large-cap companies with growth potential in the American market by reproducing the evolution of the Benchmark Indicator.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one’s investments so as to avoid an exposure only to this Compartment’s risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

“U.S. Persons” (as defined below - see “COMMERCIAL ORDER INFORMATION”) may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- *The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment’s complete prospectus and the latest annual and periodic documents are sent within one week of the bearer’s written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux.*
- *Date of creation of the Sicav Multi Units France: 4 March 2002.*

- *Date of creation of the Fund: 27 October 2011.*
- *Date of creation of the Compartment: 19 April 2018.*

Activity report

The investment objective of the sub-fund is to track the performance of Russell 1000® Value Net Total Return (Ticker:RU1VN30U).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor Russell 1000 Value UCITS ETF - Acc	FR0011119205	EUR	10.64% ⁽¹⁾	10.35%		49.10%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0011% for the sub-fund. The Tracking Error target for the year was 0.05%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

-The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

-Potential emissions from these same known reserves of fossil fuels (expressed in tCO2e / \$ M invested),

-A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

-Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings. To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag 3%
Orange Flag 31%
Yellow Flag 30%
Green Flag 36%

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	99%
148	245	323	Scope 1 reported (vs estimated)	83%
			Scope2 reported (vs estimated)	76%
			Scope 1&2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales

• Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	11%
Thermal Coal	5%
Natural Gaz	7%
Oil	7%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated In Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	2
Gas (MMBOE)	0.0022
Oil (MMBOE)	0.0030

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

ICO2e/\$M Invested	
Metallurgical Coal	0.6
Thermal Coal	3.8
Oil	1 341.8
Gas	416.8
Total	2 082.4

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

ICO2e/\$M Invested	
Thermal Coal	3.8
Oil Sands	261.4
Shale Oil or Shale Gas	688.8

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	4.8%	1.0%	3.3%
Some efforts	74.1%	88.3%	61.9%
Limited efforts/information	4.7%	2.8%	7.7%
No effort/No evidence	16.4%	7.8%	27.1%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

9.5%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	2.3%
Liquid Fuel	0.4%
Natural Gas	32.2%
Nuclear	24.3%
Renewables	7.4%
Thermal Coal	33.5%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	19%
20-49.9%	4%
50-100%	1%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	15.9%
Energy Efficiency	17.9%
Green Building	4.6%
Pollution Prevention	8.6%
Sustainable Water	4.7%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	0.6%
Energy Efficiency	1.3%
Green Building	0.6%
Pollution Prevention	0.2%
Sustainable Water	0.1%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this assessment.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.
- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates disseminated by the fixing WM Reuters on the same day of the Compartment's net asset value date.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the “Financial instruments” item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the “Other temporary operations” item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract’s nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transfer commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document.

Fees invoiced to the CIU	Basis	Schedule rate
Financial management fees and administrative fees external to the management company ⁽¹⁾	Net assets	maximum 0.19% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transfer commissions	Net assets	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Class of Dist equities: The Board of directors reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

The LYXOR RUSSELL 1000 VALUE UCITS ETF Compartment is in no way sponsored, endorsed, sold or promoted by Franck Russell Company ("Russell"), Russell makes no declaration and does not issue any express or tacit guarantee relative to bearers of the equities of the LYXOR RUSSELL 1000 VALUE UCITS ETF Compartment or more generally to the public, with regard to the advisability of a transaction involving mutual fund equities in general or equities of the LYXOR RUSSELL 1000 VALUE UCITS ETF Compartment in particular, or regarding the ability of the Russell 1000[®] Value Net Total Return index to replicate the performance of the market or of one of its segments. The publication of the Russell 1000[®] Value Net Total Return index under no circumstances implies or suggests the advisability of investing in one or all of the securities making up the Russell 1000[®] Value Net Total Return index. The only relation with Lyxor International Asset Management is the agreement of Franck Russell Company ("Russell") regarding the brands and names registered for Russell and relative to the Russell 1000[®] Value Net Total Return index that is created and calculated by Russell without any consultation with Lyxor International Asset Management or the Fund. COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR CAC 40 DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR CAC 40 DAILY (2X) LEVERAGED UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

Equities of eurozone countries.

At least 60% of the Lyxor CAC 40 Daily (2x) Leveraged UCITS ETF Compartment (the “Compartment”) is continuously exposed in one or several markets of equities issued in one or several eurozone countries including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to reproduce, both upwards and downwards, the evolution of the CAC 40[®] LEVERAGE GROSS RETURN strategy index (“Benchmark Indicator”), regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The Benchmark Indicator reflects the evolution of the CAC 40[®] Gross Return index (the “Parent Index”) with daily x2 leverage, which means that if the underlying index climbs by 2% over the same day, the index with leverage climbs by 4%, less borrowing costs, over the same day and vice versa.

The anticipated level of the ex-post tracking error of the normal market conditions is 0.12%.

Benchmark indicator:

The Benchmark indicator is the CAC 40[®] LEVERAGE GROSS RETURN strategy index (gross dividends reinvested, which means that the Benchmark Indicator's performance includes the gross dividends paid by its underlying equities), listed in Euro.

The Benchmark Indicator is a strategy index defined by the supplier of international indices, Euronext. It is calculated by Euronext.

The Benchmark Indicator is a strategy index that reflects the evolution of the Parent Index with daily x2 leverage, which means that if the underlying index climbs by 2% over the same day, the index with leverage climbs by 4%, less borrowing costs, over the same day and vice versa. The double performance is obtained by doubling the investment, via a loan, in the basket of equities used by the index. The cost of the borrowing is taken into account when calculating the strategy index.

The Parent Index is an index that is weighted by floating market capitalisation, which measures the changes of 40 securities listed on the regulated markets of Euronext Paris. The eligible securities are chosen for their strong market capitalisation, their sector-based representativeness and the significant volume of transactions involving them.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and relative weights of the Benchmark Indicator are available on the Internet site: <https://www.euronext.com/en>.

The monitored performance is that of the Benchmark Indicator closing prices, in Euros.

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the closing price using the official closing prices of the exchanges where the index constituents are listed. The Benchmark Indicator is also calculated in real time every day that the Benchmark Indicator is published.

The Benchmark Indicator's closing price is available on the Internet site: <https://www.euronext.com/en>.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the director of Euronext Paris S.A. of the CAC 40® LEVERAGE GROSS RETURN benchmark index has until 01.01.2020 to request approval or registration, if necessary.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure for monitoring the reference indices used, describing the measures to be implemented in the event of changes to an index or discontinuance of the provision of that index.

Benchmark indicator revision and composition

The revision of the composition of the Benchmark Indicator depends on the revision of the Parent Index. The composition of the Parent Index is reviewed quarterly.

The leverage factor used in the Benchmark Indicator calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Indicator and Risk Profile sections of this prospectus.

The exact composition of the Parent Index and the rules for revising the composition of this index, and consequently the Benchmark Indicator published by Euronext, are available on the Internet at: <https://www.euronext.com/en>

The advantage of the "leverage" strategy

The "Leverage" strategy (with a daily leverage effect) is a dynamic strategy that is applied to the Benchmark Indicator. By borrowing securities to implement the strategy, it enables investors to double the effect of their investment, on a daily basis, in comparison with a "single" investment in the Parent Index. If the Benchmark Indicator rises, the gain over a given day will be twice as much as with a "single" investment in the Parent Index. However, in a bear market the multiplier effect of the leverage also doubles losses on a daily basis. The daily multiplier effect thus affects the risks of the overall investment strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Benchmark Indicator, as well as other European equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The Compartment will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equity of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of an UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the eligibility and diversification criteria mentioned above, including the list of eligible indices, investors are invited to visit www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets of the Compartment. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depository in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None.

The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depository. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong;

and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;

- (v) bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the CIU may recall at any time the global amount of liquidities taking into account the accrued interests; or
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument (“FFI”)) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment’s equity price can deviate from its indicative net asset value. The liquidity of the Compartment’s equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment’s indicative net asset value, and/or
- iv) A market maker’s violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace’s IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as “OTC derivatives”) and/or efficient portfolio management techniques (hereinafter referred to as “EPMTs”). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of daily readjustment of the leverage

Investors are doubly exposed to the fluctuations affecting from one day to the next the price or level of the Parent Index. In particular, any depreciation of the underlying market will be amplified and will result in an even larger depreciation of the net asset value of the Compartment. The daily readjustment shown in the formula of the underlying leveraged strategy index implies that, over a period of more than one trading day, the Compartment’s performance will not be equal to twice the performance of the Parent Index.

For example, if the Parent Index appreciates by 10% on one trading day and then depreciates by 5% on the next trading day, the ETF will have appreciated in all, after these two days (and before deduction of the applicable fees), by 8%, while the Parent Index will have appreciated by 4.5% over the same period.

If the Parent Index depreciates by 5% per day for 2 consecutive trading days, it will have depreciated by a total of 9.75%, while the ETF will have depreciated (before deduction of the applicable fees) by 19% over the same period.

Negative scenario 1: Case in which the resulting leverage is greater than 2 within the scenario of a decline of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	100	20%	100	x2
Day 2	-11%	97.9	-22%	93.6	x2
Whole period	-2.10%		-6.40%		x3.05

LYXOR CAC 40 DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Negative scenario 2: Case in which the resulting leverage is less than 2 within the scenario of an increase of the Parent Index					
	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-5%	100	-10%	100	x2
Day 2	6%	95	12%	90	x2
Whole period	0.70%		0.80%		x1.14

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts an increase over this same period.

Reverse leverage scenario: Case in which the induced leverage is negative over the period					
	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	20%	100	40%	100	x2
Day 2	-16%	120	-32%	140	x2
Whole period	0.80%		-4.80%		x-6

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the major companies securities market of the Euro zone.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment term is greater than 5 years.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The investment objective of the sub-fund is to track the performance of CAC 40® LEVERAGE GROSS RETURN (Ticker: CACGL).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor CAC 40 Daily (2x) Leveraged UCITS ETF – Acc	FR0010592014	EUR	31.36% ⁽¹⁾	32.64%	33.60%	

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0420% for the sub-fund. The Tracking Error target for the year was 0.12%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533-22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio carbon footprint:

-Measuring the GHG emissions of its investments provides investors with an indication of their current financed emissions. For the sake of transparency, in these reports, Lyxor states that the main data on GHG emissions are based solely on scopes 1 & 2 due to the lack of availability of certain data, particularly those related to scope 3. For the total of carbon footprints, LYXOR indicates the percentage of the declarative data and estimates.

- In view of the Transition Risk and more specifically the stranded assets, Lyxor has chosen to present:

-The share of reserves (thermal coal, gas, oil) of which an investor would be responsible according to his investment in the portfolio (/ \$ M invested),

-Potential emissions from these same known reserves of fossil fuels (expressed in tCO₂e / \$ M invested),

-A focus is presented on potential emissions from high-impact fossil fuel reserves (thermal coal, oil sands, oil and shale gas).

- With regard to carbon risk management:

-Lyxor presents at the portfolio level a classification of issuers based on their efforts on energy initiatives (use of cleaner energy sources, management of energy consumption and efficiency operational, carbon reduction targets).

- In regards with the portfolio's exposure to issuers offering environmental solutions :

-Lyxor presents the revenue exposure for environmental solutions that contribute to the Sustainable Development Goals (SDGs).

For each issuer (Corporate & Government), ESG Industry sector is provided by MSCI ESG Ratings.
To be noticed, Government issuers are classified as belonging to "Financials" Industry Sector.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management.

The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries. For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance: Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance: Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency.

All ESG metrics are calculated on benchmark index.

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red: Indicates that a company is involved in one or more very severe controversies;
- Orange: Indicates that a company has been involved in one or more recent severe structural controversies that are ongoing;
- Yellow: Indicates that the company is involved in severe-to-moderate level controversies;
- Green: Indicates that the company is not involved in any major controversies.
- None: Sovereign and/or Company not covered

Red Flag	0%
Orange Flag	32%
Yellow Flag	46%
Green Flag	22%

Climate Risks & Energy Transition

Portfolio Carbon Footprint as of October 2019

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
216	239	150	Scope 1 reported (vs estimated)	99%
			Scope2 reported (vs estimated)	99%
			Scope 1& 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

The GHG Protocol, developed by the world Resources Institute (WRI) and the World Business Council on Sustainable Development (WBCSD) sets the global standard for how to measure, manage and report greenhouse gas emissions.

This will provide investors some insight of their current financed emissions

LYXOR has developed a proprietary methodology to carry out the carbon footprint measurement of its portfolios.

LYXOR relies on issuer's carbon and environmental metrics (companies and governments) provided by MSCI. These metrics are partly based on declarative data and / or are estimated.

The GHG Protocol has set the global standard for GHG reporting, notably the three scopes of reporting information:

- Scope 1: Direct GHG Emissions from operations.
- Scope 2: Electricity indirect GHG Emissions. (the companies' indirect emissions from electricity, heating, or steam consumption).
- Scope 3: Other indirect GHG emissions.

The carbon footprint part of the report aims to account for the greenhouse gas emissions produced by the companies held in portfolio. The emissions are expressed in terms of carbon dioxide equivalents (CO2e).

LYXOR reports on all its funds, three Carbon intensities when transparency is allowed:

- Carbon emissions financed (tons CO2 e / \$M invested): they represent the carbon footprint of the standardized portfolio by \$M invested
- Carbon intensity (tons CO2e / \$M Sales): shows the carbon efficiency of the portfolio in terms of emissions per \$M of sales
- Weighted Average Carbon Intensity (tons CO2e / \$M Sales): a measure of the portfolio's exposure to the most carbon-intensive companies, reflected by the average carbon intensity of the companies (CO2 emissions normalized by revenue). The carbon intensity of the portfolio is calculated as the weighted average of the carbon intensities of underlying issuers.

These measures do not take into account all emissions induced by the company particularly those related to the use of products or upstream by suppliers (scope 3).

Note: These measures are applicable to equity portfolios, but only the weighted average carbon intensity (tCO2e / \$M sales) is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

All Carbon & Climate metrics are calculated on benchmark index.

Portfolio exposure to transition risk

The data represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

These metrics include only corporate issuers rated in Carbon.

Weight of the portfolio rated in Carbon	
Fossil Fuel Reserves	12%
Thermal Coal	0%
Natural Gaz	11%
Oil	11%

Stranded Assets: Fossil Fuel Reserves

The table shows the reserves for which an investor would be responsible based on comparable dollar investments in the portfolio.

MMBOE stands for Million Barrels of Oil Equivalents.

These metrics include only corporate Issuers rated in Carbon.

Based on Investment of : \$1,000,000	
Thermal Coal (Tons)	0
Gas (MMBOE)	0.0036
Oil (MMBOE)	0.0040

Stranded Assets: Potential Emissions from Fossil Fuel Reserves

Different fuels have different carbon content and different net calorific value. To make reserves of these fuels comparable in terms of contribution to greenhouse gas emissions, we calculate the potential emissions of the fuels and express these as tons of CO2 using the Potsdam Institute methodology.

In that the total potential emissions of existing known fossil fuel reserves vastly exceed the limit of emissions that scientific consensus indicates must be met in order to manage climate change, many of these reserves may not be usable. If this is the case, the market values of companies holding reserves may be overstated because they are based in part on the present value of these reserves assuming that they can be fully utilized.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Metallurgical Coal	234.0
Thermal Coal	0.0
Oil	1 796.2
Gas	1 170.4
Total	3 200.6

Stranded Assets: High Impact Fossil Fuel Reserves

Certain fuels such as coal, oil sands, shale oil and shale gas are arguably more exposed to stranded assets risk as they have a higher carbon content than other types of oil and gas. Coal is by far the most carbon intensive fuel type, emitting roughly twice as much carbon emissions per kilowatt hour (kwh) than natural gas. In addition to higher carbon intensity, the extraction of unconventional sources of oil and gas can be costly because of various geological, technical and environmental challenges – this is the case with oil sands, which have been targeted as being particularly climate-unfriendly.

With regards to coal, the carbon stranded assets debate has focused on thermal coal, which is mainly used in power generation. While both thermal and metallurgical coal have a high carbon content, metallurgical, or coking coal is primarily used in steel making and has few substitutes, so many investors believe that while thermal coal is particularly vulnerable to stranding, there will still be a future for metallurgical coal.

These metrics include only corporate issuers rated in Carbon.

tCO2e/\$M Invested	
Thermal Coal	0.0
Oil Sands	342.1
Shale Oil or Shale Gas	0.0
Sum High Impact Reserves	342.1
Other	2 858.4

LYXOR CAC 40 DAILY (2X) LEVERAGED UCITS ETF
(compartment of the Multi Units France Sicav)

Carbon Risk Management: Energy Initiatives

Companies have a variety of strategies to reduce emissions, including setting targets for reductions, using cleaner energy sources and managing energy consumption. While these efforts vary considerably across companies, we categorize them as No Efforts, Limited Efforts, Some Efforts, and Aggressive Efforts to make them more comparable. This information is presented for the portfolio.

These metrics include only corporate issuers rated in Carbon.

	Use of Cleaner Energy Sources	Energy Consumption Management & Operation Efficiency	Target Effort
Aggressive efforts	3.2%	13.7%	14.7%
Some efforts	96.2%	86.3%	77.2%
Limited efforts/information	0.0%	0.0%	2.8%
No effort/No evidence	0.6%	0.0%	5.3%

Energy Mix of energy producers within the portfolio

The company's fuel mix is estimated by taking the ratio of power-generation volume by fuel type (reported or estimated) and the total power-generation volume.

The row data used are the company-reported power-generation volume (MWh) by fuel type, where available. Where companies report total power-generation volume and percentages by fuel type rather than power-generation volume by fuel type (MWh), the data provider multiplies the total by the percentage for each fuel type to calculate MWh figures.

Source : MSCI ESG Research

Share of issuers in terms of power generation in portfolio

12.5%

Power generation by fuel as maximum percentage of total (rebased at 100%)

Hydro	19.4%
Liquid Fuel	2.2%
Natural Gas	44.9%
Nuclear	11.1%
Renewables	11.0%
Thermal Coal	11.4%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These issuers are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products).

These metrics include only corporate issuers rated in Carbon.

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	29%
20-49.9%	8%
50-100%	0%

Weight of Companies Offering Clean Technology Solutions

Alternative Energy	25.1%
Energy Efficiency	17.8%
Green Building	6.2%
Pollution Prevention	7.5%
Sustainable Water	7.1%

Revenue exposure to environmental solutions which contribute to SDGs

Revenue exposure to environmental solutions reflects the extent to which company revenue is exposed to products and services that help solve the world's major environmental challenges. It is calculated as a weighted average, using portfolio or index weights and each issuer's percent of revenue generated from sustainable environmental solutions.

These metrics include only corporate issuers rated in Carbon.

Environmental Solutions Contribution

Alternative Energy	1.1%
Energy Efficiency	1.9%
Green Building	0.7%
Pollution Prevention	0.2%
Sustainable Water	0.4%

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter “AIFM Directive”) and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter “UCITS V Directive”), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

1. Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Financial management fees and administrative fees external to the portfolio management company including tax ⁽¹⁾	Net assets	maximum 0.40% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

appendix

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	7.71	3.30	3.17	-2.23	*-

⁽¹⁾In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

⁽²⁾The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of units in circulation. This calculation method is applied from 1 January 2013.

Compartment creation date: 19 April 2018.

LYXOR CAC 40 DAILY (-2X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR CAC 40 DAILY (-2X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Lyxor CAC 40 Daily (-2x) Inverse UCITS ETF Compartment (the “Compartment”) is an index-based UCITS of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Class of Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is an inverse exposure with a double daily leverage upwards or downwards, to the French equity market while reproducing the CAC 40 Double Short GR strategy index listed in Euros (the “Benchmark Indicator”), irrespective of its evolution, and while insofar as possible minimising the tracking error between the Compartment’s performances and those of the CAC 40 Double Short GR.

The anticipated level of the ex-post tracking error of the normal market conditions is 0.15%.

Benchmark indicator:

The Benchmark Indicator is the CAC40 Double Short GR strategy index (Gross dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator is a strategy index defined and maintained by Euronext.

The Benchmark Indicator offers an inverse exposure, adjusted each day, upwards or downwards to the evolution of the CAC40 Gross Total Return index (the “Parent Index”), with a double leverage. As such, in case of a decline of the Parent Index over a given trading day, the Compartment’s net asset value will increase twofold on that same market day and, should the Parent Index rise over a given trading day, the Compartment’s net asset value will decline twofold over that same trading day and the shareholders will not benefit from the increase of the Parent Index.

The adoption of a short position relative to the Parent Index implies borrowing costs that are part of the methodology used to calculate the Benchmark Indicator.

As such, the performance calculated over one trading day of the Benchmark Indicator is equal to double the inverse performance of the Parent Index over that same trading day, plus the interest (EONIA) collected each day on 3 times the valuation of the preceding closing price of the Benchmark Indicator, less the cost of the short position relative to this trading day over twice the CAC40 index basket.

The Parent Index is an index weighted by the floating capitalisation that measures the evolution of the 40 most significant securities listed on the Euronext Paris regulated markets.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and relative weights of the Benchmark Indicator are available on the Internet site:

<http://indices.nyx.com/sites/indices.nyx.com>

The monitored performance is that of the closing price of the equities comprising the Benchmark Indicator.

Benchmark indicator publication

The Benchmark Indicator is calculated daily at the official closing price of the exchanges where the index constituents are listed. The Indicator Index is also calculated in real time every day that the Benchmark Index is published.

The Benchmark Indicator's closing price is available on the Internet site: <https://www.euronext.com/en>.

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Euronext Paris S.A. director of the CAC 40 Double Short GR benchmark index has until 01.01.2020 to apply for authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been entered in the register of administrators and reference indices maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Management Company has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision

The revision of the composition of the Benchmark Indicator depends on the revision of the composition of its Parent Index. The composition of the Parent Index is revised quarterly.

The leverage factor used in the Benchmark Indicator calculation formula is reset daily. The consequences of this daily resetting are explained in the Benchmark Indicator and Risk Profile sections of the prospectus.

The exact composition of the Parent Index and Euronext rules for revising the composition of this index, and consequently that of the Benchmark Indicator, are available on the Internet site: <https://www.euronext.com/en>

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Benchmark Indicator, as well as other European equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

The Compartment will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equity of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets of the Compartment. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section's paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of the future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps traded over-the-counter, exchanging the value in the Compartment's assets (or of any other asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section's paragraph 1 above).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.

- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company's conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted.

Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

The financial guarantees received on another form than cash will not be sold, reinvested or pledged. The guarantees received in cash will be, at the manager discretion:

- (i) Placed as a deposit to an approved institution;
- (ii) Invested in government bonds of highest grade;
- (iii) Used for reverse repurchase transactions provided that these transactions are concluded with credit institutions which are the subject of prudential supervision and that the CIU may recall at any time the global amount of liquidities taking into account the accrued interests; or
- (iv) Invested in short-term monetary collective investment undertakings, as set out in the guidelines for a common definition of European monetary collective investment undertakings.

The financial guarantees in cash reinvested shall be diversified in accordance with the requirements applicable to financial guarantees other than in cash.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market.

The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or

- iv) A market maker's violation of the rules applicable to this marketplace, and/or
v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event. In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of daily readjustment of the leverage

Investors are inversely and doubly exposed to the fluctuations affecting the price or level of the Parent Index on a daily basis. In particular, any appreciation of the underlying market will be inversely amplified and will result in an even greater depreciation of the Compartment's net asset value. The daily readjustment of the exposure shown in the formula of the underlying "double short" strategy index implies that, over a period of more than one trading day, the Compartment's performance will not be equal to twice to the inverse performance of the Parent Index.

For example, if the Parent Index appreciates by 10% on one trading day then depreciates by 5% on the next trading day, the ETF will depreciate in all, after these two days (and before deduction of the applicable fees), by 12%, while the Parent Index will have appreciated by 4.5% over the same period.

If the Parent Index depreciates by 5% per day for 2 consecutive trading days, it will have depreciated by a total of 9.75%, while the ETF will have appreciated (before deduction of the applicable fees) by 21% over the same period.

Negative scenario 1

Case in which the resulting negative leverage is greater than 2 within the scenario of an increase of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	100	-20%	100	x-2
Day 2	-5%	104.5	10%	88	x-2
Whole period	4.50%		-12.00%		x-2.67

Negative scenario 2

Case in which the resulting negative leverage is less than 2 within the scenario of a decline of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-10%	100	20%	100	x-2
Day 2	6%	95.4	-12%	105.6	x-2
Whole period	-4.60%		5.60%		x-1.22

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts a decline over this same period.

Reverse leverage scenario:

Case in which the induced leverage is positive over the period

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	5%	100	-10%	100	x-2
Day 2	-5%	99.75	10%	99	x-2
Whole period	-0.25%		-1.00%		x4

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value. "Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.

- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

The investor subscribing to this Compartment is inversely exposed, with a double leverage, to the upward or downward evolution of the French equity market.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As an arbitration product, this Compartment could not be suitable to investors who wish to make a mid- or long-term investment.

"U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The investment objective of the sub-fund is to track the performance of CAC 40 Double Short GR EUR (Ticker: CACDSH).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor CAC 40 Daily (-2x) Inverse UCITS ETF – Acc	FR0010411884	EUR	-32.26% ⁽¹⁾	-31.64%	-94.29%	

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0391% for the sub-fund. The Tracking Error target for the year was 0.15%.

The tracking error has remained below the anticipated tracking error due to market conditions and replication techniques implemented by the management teams.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate quality criteria in its investment policy. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Due to the investment policy of this fund, Lyxor will not disclose any metrics in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition.

Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

Transparency of securities financing operations and reuse of financial instruments SFTR regulation
(Accounting currency of the CIU)

1. General information.

1.1. Amount of securities and raw materials loaned in proportion with the total assets that can be loaned, defined as excluding the cash and cash equivalents.

Securities lending	
% of loaned assets	-

1.2. Amount of the assets committed to each type of securities financing operation and total return swap, expressed in absolute value (in the currency of the collective investment undertaking) and in proportion with the assets under management of the collective investment undertaking.

	Securities lending ⁽¹⁾	Securities borrowing ⁽²⁾	Repo operations ⁽³⁾	Reverse repo operations ⁽⁴⁾	TRS ⁽⁵⁾
Absolute value	-	-	-	-	277,847,677.53
% of assets under management	-	-	-	-	100.00

⁽¹⁾ The amount of assets engaged in securities lending transactions corresponds to the market value of the securities lent at the balance sheet date.

⁽²⁾ The amount of assets engaged in securities borrowing transactions corresponds to the market value of the guarantees (cash or securities) delivered by the fund as part of the securities borrowing on the balance sheet date.

⁽³⁾ The amount of assets engaged in repurchase transactions corresponds to the market value of the securities repurchased on the balance sheet date.

⁽⁴⁾ The amount of assets engaged in reverse repurchase transactions corresponds to the market value of securities purchased under repurchase agreements at the balance sheet date.

⁽⁵⁾ The amount of assets committed in the TRS corresponds (i) for the TRS for which the management company has undertaken to deliver a basket of securities to the TRS counterparty, to the market value of the basket of securities committed in the TRS, increased by the market value of the TRS on the accounting date and/or (ii) for the TRS for which the management company does not deliver a basket of securities, to the value of the nominal value of the TRS on the balance sheet date.

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the calculation day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates published the WM Reuters on the same day of the Compartment's net asset value date.

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;

Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative expenses external to the management company ⁽¹⁾	Net assets	maximum 0.60% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

appendix

The Compartment in no way benefits from sponsorship, support or promotion and is not sold by Euronext or its subsidiaries (hereinafter referred to as "Euronext") (collectively referred to as the "Holders").

The Holders grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the CAC 40 DOUBLE SHORT GR INDEX (hereinafter the "Index") and/or relative to the level at which this Index may be at any given moment or day, or of any other type. The index is calculated by or in the name of Euronext. The Holders will not be liable (whether on the basis of negligence or any other basis) for any error affecting the index with regard to any party, and it will have no obligation to inform anyone of any possible error affecting the index.

3.5 Receivables and Debts: breakdown by type

Details of the elements comprising the "other receivables" and "other debts" items, notably breakdown of the future foreign exchange operations by type of operation (purchase/sale).

Receivables	8,204,526.99
Future currency exchange operations:	
Future purchases of currency	-
Total traded amount of future Sales of currencies	-
Other receivables:	
Deferred settlements sales	7,144,596.56
Account receivable	1,059,930.43
-	-
-	-
-	-
Other operations	-
Debts	8,347,401.67
Future currency exchange operations:	
Future sales of currencies	-
Total traded amount of future Purchases of currencies	-
Other debts:	
Deferred settlements purchases	8,204,526.99
Accrued expenses	142,874.68
-	-
-	-
-	-
Other operations	-

3.6 Shareholders' equity

	Subscriptions		Redemptions	
	Number of equities	Amount	Number of equities	Amount
Number of equities issued/redeemed during the fiscal year	106,291,361	422,384,502.90	46,286,694	190,438,719.94
Subscription / redemption commission		-		-
Retrocessions		-		-
Commissions acquired by the Compartment		-		-

3.7 Management fees

Operating and management fees (fixed fees) as % of the average net assets	0.60
Performance commissions (variable fees): amount of costs for the year	-
Retrocession of management fees:	
- Total amount of fees retroceded to the Compartment	-
- Breakdown by "target" CIU:	
- CIU 1	-
- CIU 2	-

3.8 Commitments given and received

- 3.8.1 Description of guarantees received by the Compartment with indication of the capital guarantees **None**
 3.8.2 Description of the other commitments received and/or given **None**

3.9 Other information

3.9.1 Current value of the financial instruments that are the subject of temporary acquisition:	
- Financial instruments sold under forward repurchase agreements	-
- Other temporary operations	-
3.9.2 Current value of the financial instruments comprising security deposits:	
Financial instruments received as guarantees and not included in the balance sheet:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
Financial estimates given as guarantees and maintained in their original item:	
- equities	-
- bonds	-
- debt securities	-
- other financial instruments	-
3.9.3 Financial instruments held in the portfolio, issued by entities linked to the management company (fund) or to the financial managers (Sicav) and CIU managed by these entities:	
- CIU securities	-
- Swaps	2,337,448.32

EUR					
Net assets	277,847,677.53	125,602,502.26	186,026,323.38	128,712,940.62	153,302,950.79
Number of outstanding equities	86,487,835	26,483,168	33,875,479	14,008,541	15,858,462
Net asset value	3.2125	4.7427	5.4914	9.1881	9.6669
Unit distribution on capital gains and losses (including advances)	-	-	-	-	-
Unit distribution (including advances)	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation ⁽²⁾	-2.04	-0.78	-4.49	-0.76	-5.67

⁽¹⁾ Pursuant to the Fiscal Instruction of 4 March 1993 from the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the outstanding units on that date.

⁽²⁾ The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

Compartment creation date: 19 April 2018.

COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

LYXOR CAC 40 DAILY (-1X) INVERSE UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR CAC 40 DAILY (-1X) INVERSE UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

The Lyxor CAC 40 Daily (-1x) Inverse UCITS ETF Compartment (the “Compartment”) is an index-based UCITS of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Class Acc equities: Capitalisation of all the amounts available for distribution.

Management objective:

The Compartment’s management objective is to obtain an inverse exposure, upwards or downwards, to the French equities market while reproducing the evolution to the CAC 40[®] Short benchmark indicator (the “Benchmark indicator”) and while insofar as possible minimising the tracking error between the Compartment’s performances and those of the CAC 40[®] Short strategy index.

The anticipated level of the ex-post tracking error under the normal market conditions is 0.08%.

Benchmark Indicator:

The Benchmark Indicator is the CAC 40[®] Short strategy index (net dividends reinvested, which means that the Benchmark Indicator’s performance includes the net dividends paid by its underlying equities) listed in Euro.

The Benchmark Indicator provides a daily inverse exposure to the upward or downward evolution of the CAC 40[®] index, dividends reinvested (the “Parent Index”). As such, in case of a decline of the Parent Index over one day, the Compartment’s net asset value will increase on the same day and, in case of an increase of the Parent Index over one day, the Compartment’s net asset value will drop on the same day and the bearers will not benefit from any increase of this Parent Index.

The Parent Index is the main benchmark for the Paris Stock Exchange. It measures the evolution of 40 securities chosen for their strong market capitalisation, their sector-based representativeness and the significant volume of transactions involving them.

The performance of the Benchmark Indicator is equal: to the daily inverse performance of the Parent Index, plus the interest (EONIA) collected each day on twice the valuation of the closing price of the Benchmark Indicator (less the cost of the short sale, relative to one day, on the basket of the Parent Index).

It is therefore an index that represents a short selling strategy on the Parent Index with daily rebalancing. The Benchmark Indicator is an equity index that is calculated, maintained and published by Euronext.

The monitored performance is that of the closing prices of the Benchmark Indicator.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and relative weights of the Benchmark Indicator are available on the Internet site: <https://www.euronext.com/en>

Benchmark Indicator publication

The Benchmark Indicator is calculated on a daily basis at closing prices using the official closing price of the stock exchange where the index constituents are listed. The closing price of the Benchmark Indicator is available on the Internet site: <https://www.euronext.com/en>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the director of Euronext Paris S.A. of the CAC 40® Short benchmark index has until 01.01.2020 to request authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The composition of the Benchmark Indicator is not revised since it depends on the Parent Index's revision. The Parent Index is revised quarterly.

The exact composition of the Benchmark Indicator and the rules for its revision published by Euronext are available on the Internet site: <https://www.euronext.com/en>

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European Directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. The objective of these swap contracts will be to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities held as assets by the Compartment may notably be securities that make up the Parent Index, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the forward exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com. The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

The Compartment will invest permanently at least of 75% of its assets in companies that have their head office in a Member State of the European Union or in another State that is a party to the treaty on the European Economic Area and that has signed with France a tax agreement containing an administrative assistance clause for the purposes of combating fraud or tax evasion. This minimum holding level provides for eligibility for a Stock Savings Plan.

As part of the management of its exposure, the Compartment may be exposed up to 20% of its assets in equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each equity of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument or of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

In the present case, the manager intends to primarily use the following assets:

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:

- o Subordination to the main market indices or to the Benchmark Indicator,
- o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).

- of diversification, notably:

- o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- o Geographical area,
- o Sector.

For more information on the eligibility and diversification criteria mentioned above, including the list of eligible indices, investors are invited to visit www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities (“UCITS”) that comply with Directive 2009/65/EC is limited to 10% of the net assets. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the Compartment receives securities as guarantee under the conditions and limits of this section’s paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the Compartment, given that they are received by the Compartment in full ownership.

As part of the future optimisation of the Compartment’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment’s assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “Counterparty”) will have no discretionary power regarding the composition of the Compartment’s investment portfolio, nor regarding the underlying assets of the future financial instruments.

When Société Générale acts as a counterparty to forward financial instruments, conflicts of interest may arise between the Management Company and Société Générale, these situations are governed by the Management Company’s conflict of interest management policy.

In the event of default by a counterparty to a total return swap agreement (TRS) or early termination of the agreement, the Compartment may be exposed to the performance of its balance sheet assets until a new total return swap agreement is concluded with another counterparty, if applicable. In this context, the Compartment may suffer losses and/or incur costs/costs and its ability to achieve its management objective may also be negatively impacted. Where the Compartment enters into several total return swaps with one or more counterparties, the risks mentioned above apply to the portion of the assets committed under the terminated contract and/or for which the counterparty is in default.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with credit institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowings

Up to a maximum of 10% of its net assets, the Compartment may temporarily have recourse to borrowings.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operations.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment’s use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations.

The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as a guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by supranational institutions and bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Financial guarantees received shall not be sold, reinvested or pledged.

Guarantees received in cash shall, at the discretion of the manager, be either:

- (i) deposited with an enabled institution;
- (ii) invested in high-quality State bonds;
- (iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;

(iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

Reinvested cash financial guarantees must be diversified, in compliance with the applicable requirements for non-cash financial guarantees.

In the event of default by the counterparty to a securities financing transaction (forward exchange contracts and/or temporary acquisitions and sales of securities), the Compartment may be forced to sell the guarantees received under this transaction under unfavourable market conditions and thus incur a loss. In the event that the Compartment is authorised to reinvest the guarantees received in cash, the loss incurred may be caused by the loss of the financial securities acquired as part of this reuse of the guarantees.

COUNTERPARTY SELECTION POLICY

The Management Company implements a policy of selecting intermediaries and financial counterparties, in particular when entering into total return swaps on behalf of the Compartment.

Only financial institutions established in an OECD country and which after analysis are deemed to be satisfactory are selected. This analysis is conducted using criteria that are specific to the Management Company's Risks department, which for example include financial stability, credit rating, risk exposure, credit spread, economic sector, and credit history.

The list of authorised counterparties is reviewed monthly and possibly more frequently in the event of a market shock. This review involves all of the Management Company's relevant departments, including Asset Management, Risks, Operations and Support Services. The counterparties and intermediaries thus selected are regularly monitored pursuant to the Management Company's Execution Policy. All incidents are subject to an escalation procedure for reporting to the Management Company's senior management and/or to the Société Générale group's Risk department.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

If, when the Compartment (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure, the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Liquidity risk on a place of listing

The Compartment's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's units or equities on a place of listing can be affected by any suspension, that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

Counterparty risk

The Compartment is particularly exposed to counterparty risk resulting from its use of OTC financial contracts (hereinafter referred to as "OTC derivatives") and/or efficient portfolio management techniques (hereinafter referred to as "EPMTs"). It is exposed to the risk of bankruptcy, non-payment or any other type of default by any counterparty with which it has entered into an OTC Derivative and/or a EPMT. In the event of default by the counterparty, the OTC Derivative and/or the EPMT may be terminated early and the Compartment may, if necessary, enter into another OTC Derivative and/or EPMT with a third party counterparty, at the market conditions prevailing at the time of the occurrence of this event.

In particular, the realization of this risk may result in losses for the Compartment and have an impact on the ability of the Compartment to achieve its management objective. In accordance with the regulations applicable to a UCITS, the counterparty risk may not exceed 10% of the total value of the Compartment 's assets per counterparty.

- Risks related to collateral management

Operational risk:

The Compartment may bear the risk of direct or indirect losses as a result of operational failures related to the conclusion of any Total Return Swap (TRS) and/or securities financing transactions, as referred to in Regulation (EU) 2015/2365.

Legal risk:

The Compartment may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

- Risk of daily readjustment of the leverage

Investors are inversely exposed to the fluctuations affecting the price or level of the Parent Index on a daily basis. The daily readjustment shown in the formula of the underlying “short” strategy index implies that, over a period of more than one trading day, the Compartment’s performance will not be equal to the inverse performance of the Parent Index. Investors are indeed under-exposed to volatility.

For example, if the Parent Index appreciates by 10% on one trading day then depreciates by 5% on the next trading day, the ETF will have depreciated in total, after these two days (and before deduction of the applicable fees), by 5.5%, while the Parent Index will have appreciated by 4.5% in total.

If the Parent Index depreciates by 5% per day for 2 consecutive business days, it will have depreciated by a total of 9.75%, while the ETF will have appreciated (before deduction of the applicable fees) by 10.25% over the same period.

Negative scenario 1

Case in which the resulting negative leverage is greater than 1 within the scenario of an increase of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	10%	100	-10%	90	x-1
Day 2	-8%	101.2	8%	97.2	x-1
Whole period	1.20%		-2.80%		x-2.33

Negative scenario 2

Case in which the resulting negative leverage is less than 1 within the scenario of a decline of the Parent Index

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	-10%	90	10%	110	x-1
Day 2	6%	95.4	-6%	103.4	x-1
Whole period	-4.60%		3.40%		x-0.74

Moreover, it is possible that over an observation period of more than one day and in case of strong volatility of the Parent Index over this period, the Compartment's net asset value will decline even if the Parent Index also posts a decline over this same period.

Reverse leverage scenario:

Case in which the induced leverage is positive over the period

	Parent Index		Strategy index		Induced leverage
	Day i performance	Day i value	Day i performance	Day i value	
Day 1	5%	100	-5%	100	x-1
Day 2	-5%	105	5%	95	
Day 2	-5%	99.75	5%	99.75	
Whole period	-0.25%		-0.25%		x1

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the Compartment uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value. "Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,

- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings of this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction fees relative to the execution, delivery versus payment or specific fiscal constraints, without these fees being reflected in the Benchmark Indicator's performance.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

Subscribers concerned and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an inverse exposure to the upward or downward evolution of the Euro Area equity market.

The amount that it is reasonable to invest in this Compartment depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

As an arbitration product, this Compartment could not be suitable to investors who wish to make a mid- or long-term investment. "U.S. Persons" (as defined below - see "COMMERCIAL ORDER INFORMATION") may not invest in the Compartment.

For more details, the complete prospectus can be obtained by requesting it from the management company.

Activity report

The investment objective of the sub-fund is to track the performance of CAC40 Short Index EUR (Ticker: CACSH).

Performances over the period:

Share name	ISIN	Share currency	Performance over the accounting year			Share performance since inception
			Share	Index	Foreign exchange	
Lyxor CAC 40 Daily (-1x) Inverse UCITS ETF - Acc	FR0010591362	EUR	-17.04% ⁽¹⁾	-16.61%		-70.39%

⁽¹⁾ “The difference between the yearly performance of the fund and its index is due to:

- the management and the administrative fees;
- index replication costs;
- taxation incurred in relation to the methodology used in the Benchmark Index.”

The Tracking Error is 0.0204% for the sub-fund. The Tracking Error target for the year was 0.08%.

The realized tracking error level is below the anticipated tracking error level due to market conditions and replication techniques implemented by the portfolio managers. This difference is considered as immaterial.

The sub-fund complies permanently with the French PEA requirements. Further details are available upon request with the management company.

Index Linked Swap's counterparty is: Société Générale.

The figures relating to past performances refer or relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission *(not audited by the auditor)*

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The “voting policy” document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's Internet site or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2*)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

Pursuant to articles L.533-22-1 and D. 533-16-1 of the Monetary and Financial Code, subscribers are informed of the fact that the UCI does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy

For ETF Funds ("Exchange Traded Fund") which aims to track its underlying benchmark index via a physical replication. These funds offer a transparent exposure to the underlying benchmark index.

To apply exclusion or a stock selection based on ESG criteria would imply to diverge from the benchmark and a higher tracking error.

Lyxor has implemented a shareholder engagement. The Lyxor voting policy has been published and available on Lyxor website, Lyxor.com.

For the reporting year, the voting scope does not include this fund.

The general approach taken by the management company on the ESG criteria are set out in the responsible investor policy available on the Lyxor.com website.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2*)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

Due to the investment policy of this fund, Lyxor will not disclose any metrics in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition.

Lyxor International Asset Management (LIAM) is a portfolio management company regulated by the Autorité des marchés financiers to conduct investment business in compliance with provisions of the UCITS (2009/65/CE) and AIFM (2011/81/EU) Directives. Société Générale is a French credit institution approved by the Autorité de contrôle prudentiel et de résolution.

Breakdown of the fixed and variable compensation for the financial year

The beneficiaries of the remuneration paid for all investment vehicles managed by Lyxor International Asset Management represent a population of 95 people, equivalent to 93 full-time positions.

Lyxor International Asset Management	Employees	Full Time Equivalent	€ fixed compensation	€ variable compensation	€ total
Total population	95	93	7,034,345	4,644,200	11,678,545
Regulated population	28	26.4	2,129,500	2,397,752	4,527,252
Of which management teams	22	22	1,600,252	1,009,000	2,669,252
Of which other regulated people	6	4.4	737,500	1,120,500	1,858,000

(*) For employees who joined the Management Company during the financial year, the calculation of remuneration indicated above is based solely on the remuneration received from the date of arrival of the employee concerned.

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LIAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:
<https://www.lyxor.com/politiques>

1 Accounting rules and methods

The annual accounts are presented in the form provided for in ANC Regulation 2014-01, as amended.

Assessment rules

The Compartment's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended collective investment undertakings.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day before the calculation day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. The management company independently carries out a verification of this valuation.
- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary securities acquisitions and sales are assessed at the market price.
- Units and equities of undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.
- Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

appendix

- The exchange rates used for the assessment of financial instruments listed in a currency other than the Compartment's reference currency are the exchange rates published the WM Reuters on the same day of the Compartment's net asset value date.

Posting method for the negotiation fees

The chosen method is that of excluded fees.

Posting method of incomes from fixed income securities

The chosen method is that of the coupon received.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock exchange tax, etc.) and the transfer commission which, if relevant, may notably be collected by the depository and management company. For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are invoiced to the Compartment;
- Transfer commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule rate
Financial management fees and administrative expenses external to the management company ⁽¹⁾	Net assets	maximum 0.40% per year
Maximum indirect costs (commissions and management fees)	Net assets	None
Transactions commissions	Collection on each transaction	None
Outperformance commissions	Net assets	None

⁽¹⁾ including all fees excluding transaction fees, outperformance fees and fees related to investments in UCITS.

Accounting currency

The Compartment accounting is carried out in Euro.

Indication of accountancy changes declared to each of the shareholders individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the shareholders individually (*Not certified by the auditor*)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

Class of Acc equities: Capitalisation of all the amounts available for distribution.

appendix

Lyxor CAC 40 Daily (-1x) Inverse UCITS ETF in no way benefits from any sponsorship, support or promotion and is not sold by Euronext Paris SA or its subsidiaries (hereinafter called "Euronext") (collectively designated as the "Holders"). The Holders grant no guarantee and undertake no commitment, whether explicitly or implicitly, relative to the results to be obtained through the use of the CAC 40[®] Short Index and/or relative to the level at which the said Index may be at any given moment or day, or of any other type. The index is calculated by or in the name of Euronext. The Holders will not be liable for any error affecting the Index with regard to any party and they will have no obligation to inform anyone of any possible error affecting the Index.

Unit capitalisation ⁽²⁾	-5.20	-0.74	-5.71	-4.73	-3.68

⁽¹⁾ Pursuant to the Fiscal Instruction of 4 March 1993 from the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the outstanding units on that date.

⁽²⁾ The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.
Compartment creation date: 19 April 2018.

LYXOR CAC MID 60 (DR) UCITS ETF
(compartment of the Multi Units France Sicav)

Compartments / feeder	LYXOR CAC MID 60 (DR) UCITS ETF is a compartment of the MULTI UNITS FRANCE Sicav
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

French equities.

At least 60% of the Lyxor CAC Mid 60 (DR) UCITS ETF Compartment (“the Compartment”) is permanently exposed in at least a French equity market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

Class of Dist equities: The Board of directors reserves the right to distribute all or part of the income, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is to reproduce, both upwards and downwards, the evolution of the evolution of the CAC Mid 60 Gross Total Return index (the “Benchmark Indicator”) listed in euros, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 1%.

Benchmark indicator:

The Benchmark Indicator is the CAC Mid 60 Gross Total Return strategy index, (gross dividends reinvested, which means that the Benchmark Indicator's performance includes the net dividends paid by its underlying equities).

The Benchmark Indicator is an index that is weighted by floating market capitalisation, which measures the changes to 60 midcap securities listed on the Euronext Paris regulated markets.

The eligible securities are ranked by floating market capitalisation and traded capital. Only the best-ranked securities are used and they are not part of the CAC Large 60 index.

The Benchmark Indicator is an equities index calculated and published by the index supplier Euronext. The Benchmark Indicator is an index that measures the performance of the 60 best ranked securities that are not part of the CAC Large 60 index. A buffer zone is applicable where the current settlers ranked 56 to 65 have priority compared to the candidate securities that are not part of the CAC Mid 60 or CAC Large 60 indices when revised. The weight of each security in the index is adjusted according to its equity market capitalization on the basis of the float. The float is rounded to the superior limit by stage of 5%.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components will be available on the Internet site: <https://www.euronext.com/en>

The monitored performance is that of the closing price of the Benchmark Indicator.

Benchmark indicator publication

The Benchmark Indicator’s closing price is available on the Internet site: <https://www.euronext.com/en>

In accordance with Article 52 of Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the Euronext Paris S.A. administrator of the CAC Mid 60 Gross Total Return benchmark index has until 01.01.2020 to apply for authorisation or registration, if applicable.

As of the date of the last update of this prospectus, the administrator of the Reference Index has not yet been registered on the register of administrators and benchmarks maintained by ESMA.

In accordance with Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016, the GSP has a procedure monitoring of the reference indices used describing the measures to be implemented in the event of substantial changes made to an index or to discontinue the provision of that index.

Benchmark indicator revision and composition

The review of the composition and number of shares takes place quarterly at the close of business on the third Friday of March, June, September and December. The exact composition of the Parent Index and Euronext rules for revising the composition of this index, and consequently that of the Benchmark Indicator, are available on the Internet site: <https://www.euronext.com/en>

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will achieve its management objective using the direct replication method, which means that the Compartment will invest mainly in securities making up the Benchmark Indicator.

In order to optimise the direct replication method that is used to track the Benchmark Indicator, the Compartment, represented by its delegated asset manager, may decide to employ a “sampling” technique that consists in investing in a selection of representative Benchmark Indicator constituents in order to reduce the costs of investing directly in all of the various Benchmark Indicator constituents. This sampling technique could cause the Compartment to invest in a selection of representative Benchmark Indicator securities (and not in all of them) in proportions that do not reflect their weight within the Benchmark Indicator, and even to invest in securities that are not constituents of the Benchmark Indicator.

To achieve the highest possible correlation with the performance of the Benchmark Indicator, the Compartment may also, on an ancillary basis, engage in transactions involving Future Financial Instrument (“FFI”). These transactions could for example be futures contracts on indices and/or swaps for hedging purposes and in particular to minimise the Compartment’s tracking error. The Internet site www.lyxoretf.com has a page dedicated to the Compartment, which allows investors to benefit from transparency on the direct replication method used (full replication of the Benchmark Indicator or sampling to limit replication costs). The frequency of any updates and/or the date on which the aforementioned information is updated is also indicated on the same page of the aforementioned Internet site.
