Informations about the Fund

Classification

International equities.

Determination and allocation of distributable sums

Accumulation and/or distribution at the discretion of the Management Company.

Tax treatment

The Fund is eligible for the Plan d'Epargne en Actions ("PEA" reserved for French investors) and life insurance policies. The Fund may provide a support vehicle for life insurance policies denominated in units of account.

The UCITS, by its nature, is not subject to taxation. However, unitholders may be taxed on any income distributed by the Fund or when they sell Fund units. The tax treatment applicable to amounts distributed by the Fund or unrealised or realised capital gains or losses will depend on the individual unitholder's tax situation, residence for tax purposes and/or the investment jurisdiction of the Fund. If an investor is uncertain of his or her tax position, the investor should consult a financial advisor or a professional investment consultant to determine the tax rules applicable to his or her particular situation before any investment. Some income distributed by the UCITS to unitholders residing outside France may be subject to withholding tax in France.

Benchmark index

The Fund's benchmark index is the euro-denominated MSCI USA Leveraged 2x Daily Strategy Index with net dividends reinvested (net return).

The MSCI USA Leveraged 2x Daily Strategy Index is an "equities" index calculated and published by the international index supplier MSCI Inc. ("MSCI").

Management fees & commissions

Subscription and redemption fees: 0,35% including tax.

Subscription fee not retained by the Fund: None.

In compliance with current regulations, this mutual fund has, during the financial period just ended, levied charges at rates which are in line with those stated in the Prospectus and used under the following headings:

- Notes to the Annual Accounts /- Management fees.
- Shareholders' Funds /- Subscription and/or redemption fees /- Management fees.

Investment objective

The Fund's investment objective is to track the performance of the MSCI USA Leveraged 2x Daily Strategy Index (see "Benchmark index" section), as closely as possible, whether the Strategy Index rises or falls.

The Fund is managed so as to achieve a gap between changes in its NAV and changes in the value of the MSCI USA Leveraged 2x Daily Strategy Index (referred to below as the "MSCI USA Leveraged 2x Daily Strategy Index") as small as possible. The target for maximum tracking error between the Fund's NAV and the value of the MSCI USA Leveraged 2x Daily Strategy Index is 2%.

If the "tracking error" exceeds 2%, the objective would nevertheless be to remain below 15% of the volatility of the MSCI USA Leveraged 2x Daily Strategy Index.

Investment strategy

The Fund is managed by "index tracking".

UCITS AMUNDI ETF LEVERAGED MSCI USA

DAILY UCITS ETF

1. Strategy employed:

The Fund is managed using a technique known as "index-tracking", the objective of which is to replicate changes in the performance of the MSCI USA Leveraged 2x Daily Strategy Index using a synthetic replication method.

To maintain the closest possible correlation with the performance of the MSCI USA Leveraged 2x Daily Strategy Index, the Fund will buy a diversified portfolio of stocks (the "Portfolio") and an over-the-counter (OTC) total return swap, a financial derivative instrument which turns the exposure to the securities in the Portfolio into exposure to the MSCI USA Leveraged 2x Daily Strategy Index.

The Management Company reserves the right to suspend exposure to the MSCI USA Leveraged 2x Daily Strategy Index as soon as the MSCI USA Index increases by more than 45% compared to the closing price for the previous Trading Day. In this case, the Fund Manager will confirm the level of the MSCI USA Leveraged 2x Daily Strategy Index retained for the calculation of the Fund's net asset value for the Trading Day during which this increase over 45% occurred.

The Fund shall observe the investment rules stipulated in Articles R214-21, R214-22 and R214-23 the French Monetary and Financial Code.

The Portfolio comprising directly held assets described in the "Assets used" section, complies with the provisions of Article R 214-21 of the French Monetary and Financial Code (CMF).

The Fund's exposure to the Index achieved through the total return swap may be eligible for exemption ratios applicable to the index-tracking UCITS referred to in Article R214-22 of the French Monetary and Financial Code (CMF). That Article stipulates that an index may comprise up to 20% equities or debt securities issued by the same entity; this limit may be raised to 35% maximum for a single issuing entity, when such increase is justified by special market circumstances such as the regulated markets where some marketable securities or some money-market instruments are largely dominant.

2. Assets used (except embedded derivatives):

The Fund's exposure to the Index is achieved through the total return swap.

The Portfolio consists of the Fund's directly held assets described below.

- Equities:

The Fund will constantly maintain at least 60% exposure to one or more foreign (non-French) equity markets. The Fund will have at least 60% exposure to the US stockmarket.

Up to 100% of the Fund's net assets will be invested, subject to the legal and regulatory ratios, in international equities (any economic sector, traded on any market).

The stocks in the Fund's portfolio will consist of stocks included in the MSCI USA Leveraged 2x Daily Strategy Index and other international stocks, from all economic sectors, including small-cap markets. The equities in the Fund's assets will be chosen to limit costs associated with reproducing the MSCI USA Leveraged 2x Daily Strategy Index.

Over 75% of the portfolio's value will, at all times, consist of stocks of companies registered in a Member State of the European Union, or in another State which is part of the European Economic Area (EEA) and has signed a tax convention with France that provides for administrative assistance to prevent fraud and tax evasion. This minimum level of equity exposure makes the Fund eligible for a Plan d'Epargne en Actions (French Stock Savings Plan – PEA).

At least 95% of the Fund will be permanently invested in listed shares. For the purposes of interpreting this ratio, shares issued by REITs (as defined by the German Ministry of Finance) or UCIs are not considered as shares.

- Interest-rate instruments:

Up to 25% of the Fund's net assets may be invested in any kind of bond instruments.

Overview of the procedure for choosing intermediaries / counterparties and comments

The Management Company generally issues a bid tender. In this case, a comprehensive Request For Proposal ("RFP") (total return swap and market making) was issued for a portion of the AMUNDI ETF Fund product line. For this reason, neither the Management Company nor the Delegated Fund Manager have undertaken or shall undertake, for this particular Fund, a formal competitive bidding procedure that can be tracked and monitored among counterparties for OTC derivative financial instruments, as the counterparty has already been selected during the comprehensive RFP. The Fund may carry out these transactions with BNP Paribas SA or any other Company of the BNP Paribas SA group as counterparties or intermediaries.

Semi-Annual Report

Décembre 2017

'The fund's objective is to track the MSCI USA Leveraged 2x Daily strategy Index while remaining eligible for the PEA (i.e. the fund undertakes to hold 75% of its assets in PEA-eligible equities at all times). It therefore holds a basket of shares and a performance swap which turns the Fund's equity exposure into an exposure to the MSCI USA Leveraged 2x Daily. The MSCI USA Leveraged 2x Daily strategy Index tracks the performance of a strategy which consists in doubling exposure to the MSCI USA index through short-term borrowing. It accordingly offers double exposure to the upward and downward trends experienced by the MSCI USA index. In this respect, if the MSCI USA index rises by 1%, the Fund's NAV will rise by 2% minor borrowing costs, and conversely if the index falls by 1% the Fund's NAV will fall by 2% plus borrowing costs.'

For the period under review, the portfolio AMUNDI ETF LEVERAGED MSCI USA DAILY UCITS ETF performance is 10.48% . The benchmark performance is 10.68% with a tracking error of 0%.

Past performance is no guarantee of future performance.
