Objectives and investment policy

The objective of the investment policy for Moventum Plus Aktiv - Defensives Portfolio is to achieve higher long-term growth in the sub-fund currency whilst taking the investment risk into account. The sub-fund is actively managed. The composition of the portfolio is established, regularly reviewed and adjusted where appropriate by the Management Company solely in accordance with the criteria set in the investment objectives / investment policy. Aside from financial aspects, the sub-fund also takes environmental and social aspects and the principles of good corporate governance (Environment, Social, Governance - ESG) into account in its investment decision-making process in accordance with the Investment Manager's ESG Policy. The bond funds in the portfolio predominantly invest worldwide in government, mortgage and corporate bonds of a high quality with a rating of AAA – BBB from recognised rating agencies. The latter may have a rating below BBB from recognised rating agencies. The equity funds in the portfolio generally pursue a broadly diversified, global and regionally limited investment policy and may include both equities from companies with high, moderate and/or lower market capitalisation. Risk and reward profile

The historical data used for calculating the synthetic indicator are not a reliable indication of the future risk and reward profile of the share class. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.

This share class has been placed in the aforementioned risk class because its share price is subject to medium fluctuation, therefore the profit potential and loss exposure may be moderate.

Because of the calculation model used, all risks may not be taken into consideration when placing the share class in a risk class. Detailed information can be found in the section entitled "Risks" of the prospectus. The following risks have no direct influence on this categorisation, but may be significant for the Fund:

Credit risks:

The Fund may invest part of its assets in bonds. The issuers of these bonds could become insolvent, causing the bonds to lose some or all of their value.

Liquidity risks:

The Fund may invest part of its assets in securities that are not traded on a stock exchange or similar market. It may be difficult to find a buyer for such securities in the short term. As a result, the risk that share redemptions will be suspended may increase.

Counterparty risks:

The Fund may enter into various transactions with counterparties. If a counterparty becomes insolvent, that party will not be able to meet some or all of its open obligations to the Fund.

Risks relating to the use of derivatives:

The Fund may enter into derivative transactions for the purposes listed above in the section "Investment policy". This means increased opportunities, but also increased risk of losses. The use of derivatives to hedge against losses may also reduce the profit opportunities of the Fund.

Operating risks and custodial risks:

The Fund may fall victim to fraud or other criminal activities. It may suffer losses through misunderstandings or errors on the part of employees of the investment company or third parties or be hurt by external events, such as natural disasters. There is a risk of loss associated with holding assets in custody, especially abroad. This risk may result from insolvency, negligence or misconduct on the part of the Custodian or a sub-custodian.
