## What is this product?

#### Type

This product is a share in a sub-fund of the investment company with variable capital BL, an undertaking for collective investment in transferable securities (UCITS) under Luxembourg law.

#### Term

This sub-fund has no maturity date. However, the board of directors of the fund may decide to close the sub-fund under certain circumstances.

#### Objectives

The aim of the sub-fund is to seek long-term capital gains.

The sub-fund is mainly invested in investment funds and with an exposure to equities markets up to a minimum of 75% of the net assets.

The manager's objective is to select a majority of target funds with a proven sustainability profile.

The assets may be invested in money market instruments, in bond funds, in all types of fixed-term and/or variable transferable securities listed or traded on a regulated market and/or structured products (instruments whose value depends on different investments, including derivatives).

All investments in structured products are qualified as transferable securities and the underlyings may be composed of shares, debt securities, commodities (including precious metals), baskets of debt securities and/or shares, indices and/or baskets of stock market products.

If the sub-fund is invested in structured products on precious metals, this is done via investment vehicles which track the value of the underlying product (Exchange Traded Commodities). These products will not include derivatives and will not give rise to the physical delivery of the underlying metal. The sub-fund may invest up to 25% of its net assets in this type of instrument.

Debt securities and other equivalent securities may be issued by companies, States or other entities.

Investments are made without any geographical, sector-based or monetary restrictions.

The sub-fund may invest in derivatives in order to hedge or optimise the portfolio.

The underlying funds are selected on the basis of quantitative and qualitative criteria. The monitoring process is performed through regular contact with the managers of each of the underlying funds in the portfolio. The objective is to use underlying funds which best meet the themes, styles, regions and representative sectors of the fund manager's convictions.

75% of the portfolio's investments will be made in funds categorised under Article 8 that target sustainable investments, or under Article 9 SFDR.

**Benchmark:** The portfolio is actively managed on a discretionary basis without reference to a benchmark.

This product is aimed at investors who are looking for earnings and capital growth over a long time period. The investor may experience losses up to the amount invested. This product is suited to investors with a basic to in-depth knowledge and experience of the product and the global equity markets.

## What are the risks and what could I get in return?

### Risk indicator

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator:  
Emerging market risk

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

## What happens if BLI - Banque de Luxembourg Investments is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.
