Copies of the report and accounts to 30 September 2021 may be obtained from the registered office of BMO Investments (Lux) I Fund (the "Fund") at 49, Avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg and from foreign representatives and will be posted to shareholders on request. Notices to Shareholders are published in the *Recueil Electronique des Sociétés et Associations* (the "RESA") and in Luxembourg newspapers, to the extent required by Luxembourg law, and in such other newspapers as the Directors may decide. The articles of incorporation of the Fund (the "Articles") have been lodged at the *Registre de Commerce et des Sociétés* of Luxembourg where they are available for inspection and copies can be obtained upon request. The net asset value of each of the Fund's shares is published in accordance with the relevant appendices of the Fund's latest prospectus (the "Prospectus"). The issue and redemption prices are available from BMO Asset Management Limited, Exchange House, Primrose Street, London EC2A 2NY, United Kingdom, at the registered office of the Fund and will be published as further described in the Prospectus.

No subscription can be received on the basis of financial reports. Subscriptions are only valid if made on the basis of the current Prospectus, the latest key investor information documents and the latest annual and the most recent semi-annual report, if published thereafter.

The information contained in this report is historical and should not be taken as a guide to future performance. Statements contained in this report concerning future performance are the opinions of management and there can be no guarantee that such opinions will prove to be correct.

BMO Investments (Lux) I Fund The Portfolios and their Objectives

BMO Diversified Growth Fund

The investment objective of the Portfolio is to achieve capital appreciation over the medium to long-term through a broadly diversified mix of holdings into traditional and alternative assets including investments in: equities, bonds, indirect property and indirect commodities. The Portfolio intends to target a return of 1mth Euribor (or the equivalent local currency 1mth libor rate per hedged share class) +4% over a rolling 3 year period. Portfolio efficiency is maximised, and costs minimised, by using the most efficient products in the market place, that provide liquid, low-cost exposure to the relevant asset class. A combination of cash, Exchange Traded Funds (ETF), financial derivative instruments, listed certificates issued by investment banks, as well as swap contracts and currency are used to structure the Portfolio.

BMO Euro Bond Fund

The investment objective of the Portfolio is to ensure an adequate return of the invested capital while reducing risk due to an adequate investment diversification. The assets of the Portfolio are mainly invested, directly or through the use of financial derivative instruments, in debt securities having a fixed and variable income listed on a stock exchange or dealt in on another regulated market of an OECD-member state, whilst attempting to reduce the exchange risks. Without changing the specific investment policy of the Portfolio and as market conditions and investment opportunities prevail, the Portfolio may, on an ancillary basis, invest in securities listed on a stock exchange or dealt in on a regulated market of a non OECD-member state. Taking into account the principle of investment risk spreading, the Portfolio will invest, directly or indirectly through the use of financial derivative instruments, in investment grade (at the time of the purchase and as defined by recognised rating agents such as Moody's Services or Standard & Poor's) bonds and money market instruments. The Portfolio may invest in financial derivative instruments to achieve its investment objective. Such instruments may also be used for hedging purposes. These instruments may include, but are not limited to, futures, forwards, options, swaptions, interest rate swaps and inflation swaps.

BMO European Growth & Income Fund

The investment objective of the Portfolio is to achieve long-term capital appreciation and an enhanced level of income by investing in companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). In addition to equity and equity-related securities, the Portfolio may also invest in warrants on equity and equity related securities.

BMO European Smaller Companies Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of European domiciled companies listed on the various European States Stock Exchanges. The Investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in Europe. For this portion of the portfolio the Portfolio will invest at least two thirds (i.e. 50% of its total assets) in small capitalisation companies with a maximum stock exchange capitalisation of Euro 3 billion or equivalent. If the market capitalisation of a company in which the Portfolio holds an investment comes to exceed Euro 3 billion or equivalent, such a holding will be sold or will be counted within the remaining one third of the total assets. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Eurozone Equity Fund (liquidated with effect from 22 June 2021)

The investment objective of the Portfolio is to achieve long-term capital appreciation through investments in transferable securities, with a high-income potential, a solid financial structure and a successful management, whilst considering the investment risk spreading. The Portfolio will invest in a carefully selected range of high quality equities and other equity assets, as well as in convertible securities, which provide direct and/or indirect exposure to the geographical areas of countries situated in the European Monetary Union (E.M.U.). The securities in which the Portfolio invests will either be listed on a stock exchange or dealt in on another regulated market in an E.M.U participating country, or these securities will be issued by issuers whose activities predominantly take place in or whose revenues are derived from an E.M.U. participating country. The Portfolio may hold other types of transferable securities (including non-convertible preferred stocks and public debt securities) of OECD issuers or listed on a stock exchange of an OECD member state, in such proportion as prevailing market conditions shall warrant.

BMO Global Absolute Return Bond Fund

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio seeks to deliver an absolute return irrespective of bond market direction. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net

BMO Investments (Lux) I Fund The Portfolios and their Objectives (continued)

assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

BMO Global Convertible Bond Fund

The investment objective of the Portfolio is to achieve high returns by investing its assets through a balanced portfolio consisting of convertible securities. The Portfolio will invest its assets in a balanced portfolio consisting of convertible debt securities and synthetic convertibles which offer the most attractive risk/reward characteristics in terms of upward participation and downward protection. The Portfolio will invest at least two thirds of its total assets in convertible debt securities issued by corporations located in Europe, the United States, Japan and Asia.

BMO Global Smaller Companies Equity Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of listed securities of companies on a worldwide basis. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest primarily in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) issued by small and medium sized companies. Small and medium sized companies will generally be companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company subsequently reaches or exceeds US\$ 10 billion or equivalent after acquisition by the Portfolio. The Portfolio may also hold cash, exchange traded funds and fixed interest securities should this be considered to be appropriate at any particular time. In normal market conditions investment in liquid assets and debt instruments of any kind will not exceed 15% of the Portfolio's Net Asset Value.

BMO Global Total Return Bond Fund

The investment objective of the Portfolio is to deliver a return through a combination of income and capital growth. The Portfolio aims to achieve this objective through investing at least two thirds of its total assets in corporate bonds. In addition thereto, the Portfolio will invest in bonds issued by other entities including sovereign and supranational issuers. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets. Exposure to China through the Hong-Kong and Shanghai Bond Connect will normally not exceed 5% of the Portfolio's net assets. The Portfolio may also invest in other transferable securities, collective investment schemes, money market instruments, deposits, cash and cash equivalent, financial derivative instruments and forward transactions.

BMO Plus II Fund

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing in shares or units of other collective investment schemes that invest in global developed market equities and bonds or by investing in global developed equity and bond markets directly. Up to 5% of the Portfolio's total assets may be invested in shares or units of other collective investment schemes that invest in emerging market equities.

BMO Responsible Euro Corporate Bond Fund

The investment objective of the Portfolio is to achieve an above average rate of return over the long-term, measured in Euro, through investing mainly in investment grade fixed income debt securities, floating rate and other debt securities, including asset backed securities and contingent convertible bonds, issued by companies. Investment grade securities are defined as securities that are rated Baa3/BBB- or higher by Moody's, Standard & Poor's or another recognised credit rating agency. The Portfolio may also invest up to 15% of its net assets in sub investment grade fixed income debt securities, floating rate and other debt securities. Investments in asset backed securities may not exceed 10% of the Portfolio's net assets. Investments in contingent convertible bonds will not exceed 10% of the Portfolio's net assets.

BMO Responsible Global Emerging Markets Equity Fund

The purpose of the Portfolio is to provide a medium through which investors may participate in an actively managed portfolio, primarily invested in equity and equity-related securities of companies in emerging markets worldwide. The Portfolio may, as described below, invest in companies which are listed or traded on a recognised exchange in emerging market countries worldwide, which have, in the opinion of the Investment Manager, the potential for generating long term returns and contribute to or benefit from the sustainable economic development of the emerging market countries. The subscription proceeds relating to the different Classes of Shares in issue shall be invested in one common underlying portfolio of investments. Each Class of Shares will have a proportional entitlement to the assets (and liabilities) of the Portfolio (calculated according to the prevailing Net Asset Values of each Class). The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds

BMO Investments (Lux) I Fund The Portfolios and their Objectives (continued)

with warrants), of companies that are incorporated under the laws of, and have their registered office in, an emerging market country, or that derive a predominant part of their economic activity from emerging market countries, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Responsible Global Equity Fund

The Portfolio focuses on long-term capital growth through investment in companies across the world. Its objective is to maximise returns through investment in an ethically screened and diverse universe of companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-related securities (excluding convertible bonds and bonds with warrants) of companies, in any market, that meet the ethical and sustainable criteria. The Portfolio will invest a more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO SDG Engagement Global Equity Fund

The Portfolio aims to achieve long-term capital growth and support sustainable development. The Portfolio invests primarily in a diversified portfolio of equity and equity-related securities (excluding convertible bonds and bonds with warrants) of small- and mid-capitalisation companies, which may be anywhere in the world and be in any industry or sector. The Portfolio will hold more than 50% in equities securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Sustainable Multi-Asset Income Fund

The investment objective of the Portfolio is to achieve capital appreciation and income, while maintaining long-term value. The Portfolio will invest in a diversified mix of holdings in traditional and alternative asset classes. The Portfolio will invest a majority of its assets in equity securities and debt securities, including investment grade, below investment grade debt securities and contingent convertible bonds. The Portfolio may invest in derivatives to enhance performance by gaining exposure to a number of alternative sources of return and controlling risk. Derivatives may be traded through recognised exchanges or over-the-counter ("OTC") and may include but are not limited to, options, futures, swaps (including, but not limited to, total return swaps on strategies, equity baskets, equity indices, property or commodity indices), contracts for difference and forward contracts. The Portfolio may invest up to 10% of its net assets in below investment grade debt securities. The Portfolio will not invest in securities that are "distressed" or "defaulted" at the time of their purchase by the Portfolio. In the event of a downgrading of any debt security held by the Portfolio, the Investment Manager will take all reasonable efforts to keep this exposure below 5% of the Portfolio's net assets and to realise the distressed or defaulted securities as soon as reasonably practicable if this is tin the best interest of the Shareholders. Investments in contingent convertible bonds will not exceed 5% of the Portfolio's net assets. The Portfolio will invest a minimum of 26% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO Sustainable Opportunities European Equity Fund

The investment objective of the Portfolio is to achieve long-term capital appreciation by investing in European companies listed on one of the European States Stock Exchanges or a regulated market. The Portfolio will invest at least 75% of its total assets in equity securities of companies that are incorporated under the laws of, and have their registered office in, a country in Europe. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA").

BMO US Smaller Companies Fund

The investment objective of the Portfolio is to make available to investors participation in a Portfolio consisting of securities of United States companies listed on United States Stock Exchanges or NASDAQ. The investment policy is directed towards achieving long-term capital growth through investment in small and medium sized companies. The Portfolio will invest at least two thirds of its total assets in equity and equity-linked securities (excluding convertible bonds and bonds with warrants) of small capitalisation companies that are incorporated under the laws of, and have their registered office in the United States, or that derive a predominant part of their economic activity from the United States, even if listed elsewhere. The Portfolio will invest more than 50% in equity securities in the sense of sec. 2 para. 8 of the German Investment Tax Reform Act ("GITA"). The Portfolio will invest in companies with a maximum stock exchange capitalisation of US\$ 10 billion or equivalent at the time of purchase. The Portfolio may hold and continue to invest its assets in companies with a higher capitalisation if the capitalisation of the relevant company has reached or exceeded US\$ 10 billion or equivalent after acquisition by the Portfolio.

BMO Investments (Lux) I Fund Chairman's Statement

Dear Shareholders

This statement provides a review of the conditions faced by the Portfolio in the financial year to 30 September 2021, and thoughts on the outlook for the coming year. Specific details of the Portfolio, together with the managers' comments, can be found later in this report.

During the year, the size of the Fund increased by EUR 1,591 million to EUR 5,458 million (EUR 3,867 million as at 30 September 2020). The Portfolio growth was driven by strong inflows into the Responsible and Sustainable Funds, namely, BMO Responsible Euro Corporate Bond Fund, BMO Responsible Global Emerging Markets Equity Fund, BMO Responsible Global Equity Fund and BMO SDG Engagement Global Equity Fund.

Global equities made gains over the 12 months, with accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines providing positive impetus for much of the reporting period. While the global economy continued to grow, inflation and interest rate expectations were on the increase over the period.

Developed markets outperformed as emerging markets struggled with high COVID cases and deaths, and low vaccination rates. China was one of the worst performing equity markets over the 12 months, with sentiment being impacted as the Chinese authorities tightened rules and issued guidelines to increase supervision for a range of Chinese businesses, including internet companies, education providers and pharmaceutical firms. Credit concerns impacted China's huge property sector, as property developer Evergrande appeared close to defaulting on its huge debt pile.

European markets struggled in the first part of the period with new lockdowns and slow vaccination programmes. As the period progressed, European countries made steady progress in vaccination campaigns, allowing their economies to begin reopening. UK equity markets were buoyed as a no-deal Brexit was averted at the very end of 2020, with the UK and European Union agreeing to tariff-free and quota-free trade in goods. However, as the period progressed, bottleneck supply issues, labour shortages and soaring energy prices impacted activity levels.

Global government bond yields rose, with US 10-year Treasury bond yields moving from around 0.7% to end the period at approximately 1.5%. German 10-year bund yields increased by 33 basis points, ending the period at around -0.2%. In July 2021, the European Central Bank adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%".

As we look ahead, there are plenty of contrasting themes to challenge financial markets; stimulus is soon likely to be reduced by central bankers and the global economy will have to try to survive without a continuous injection of additional capital. Although the withdrawal of stimulus demonstrates a robust global economy, it is likely to be followed by rising interest rates, which will negatively impact bond markets. Peak growth rates look to have now passed, and this will likely lead to additional volatility in equity markets.

Patrick Johns Chairman of the Board of Directors October 2021

Performance

Over the twelve months to 30 September 2021, the Class X shares EUR returned 11.5%. The Class A shares EUR returned 9.8%. By comparison the benchmark of 1-month Euribor, plus 4% per annum, returned 3.4% over the same period. Performance is net of fees and in euro terms.

The strategy generated a positive return over the period. Exposure to equities drove returns for the Portfolio as global equity markets rallied sharply. In contrast, fixed income positioning generally cost performance as yields increased, mostly on the back of inflation concerns and an improving global economy. Alternatives contributed positively with both alternative betas and alternatives strategies delivering positive returns. Listed alternatives contributed with property and private equity performing strongly as economies reopened.

Market Review

Global equity markets rose strongly over the twelve months. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves. We anticipate government bond yields to rise and yield curves to steepen over the remainder of 2021. Overall, we also remain cautious in our outlook for credit. For several months, investors have been bracing themselves for signs that central banks across the US, UK and Europe will begin tapering their aset purchase programmes. As concerns of reductions in central bank purchases gather pace, we expect the technical backdrop that has been supporting bond markets since the onset of the Covid-19 pandemic to deteriorate, and potentially lead to both higher yields and wider credit spreads. This, however, may well be a drawn-out affair and contrasts with the underlying fundamental strength supporting credit markets, which have been relatively stable throughout the year and continue to offer investors a good source of income. While valuations generally leave little room for further spread tightening, we continue to identify pockets of opportunities at the issuer level.

Multi-Asset Team

October 2021

BMO Investments (Lux) I Fund BMO Euro Bond Fund

Performance

Over the twelve months to 30 September 2021, the I Acc EUR share class returned -1.8%. By comparison, the BBI Euro Aggregate Treasury TR Index returned -1.7%. Performance is total return and in euro terms.

Over the twelve-month period, the BMO Euro Bond Fund performed in line with its benchmark. Performance benefited from bearish interest rate positions that had been designed to take advantage of an expected rise in yields as the market looked to an easing of Covid-19 restrictions and stronger economic growth. These positions comprised short duration and yield curve steepening positions in Europe and the US. Positive contributions from cross market strategies in the first half of the year, comprising short positions in the US Treasury market versus long positions in Europe, reversed in the second half of the year as US Treasuries outperformed amid fears of the Delta wave. We had anticipated that the rise in US rates would take place at a faster pace than that of Germany. This reflected the relative success of the vaccination rollout programme in the US, which has pointed to an earlier re-opening of the US economy.

Market Review

Eurozone government bond yields were on the increase as markets priced in the recovery in growth and inflation after the announcement of successful vaccines for Covid-19. Eurostat's flash estimate put eurozone inflation at 3.4% in September 2021, up from -0.3% in October 2020. Official data showed the eurozone economy grew by 2.2% during the second quarter. Eurozone economic momentum slowed as the third quarter progressed, according to business survey data. Along with the resurgence in coronavirus infections, rising inflation and supply constraints also weighed. During the period, the European Central Bank (ECB) expanded quantitative easing by €500 billion and extended emergency measures to help eurozone banks. In March, the ECB said it would speed up the pace of bond purchases under its emergency pandemic support programme. However, in September the ECB announced that it was slowing down the pace of bond purchases as financing conditions had improved. In July, the ECB adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. The European Union (EU) agreed to a €1.8 trillion EU-wide Covid-19 recovery fund, with the European Commission to raise €750 billion in debt markets. A no-deal Brexit was averted at the very end of 2020, with the EU and UK agreeing to tariff-free and quota-free trade in goods. German 10-year bund yields increased by 33 basis points, ending the period at around -0.2%.

Outlook

We anticipate European government bond yields to move higher and steeper. The global rollout of Covid-19 vaccines combined with a higher inflationary backdrop and supportive fiscal policy means further normalisation should be priced into government bond yields. Nevertheless, the vaccine rollout in Europe has lagged that of the US and UK, with the likelihood that eurozone growth will take an additional quarter to return. Although the ECB has increased the pace of quantitative easing, a deluge of government bond issuance during the first quarter means that the second quarter should see much more favourable supply/demand characteristics for eurozone government bonds. The surprise installation of former ECB President Draghi as Italian Prime Minister combined with ECB bond buying is constructive for peripheral eurozone debt.

Performance

In the twelve months to 30 September 2021, the Class A EUR shares returned 24.9%. By comparison the FTSE All-World Developed Europe NR Index return was 28.9%. All figures are net of fees and in euro terms.

The Portfolio delivered strong absolute returns in the half year, but ended the period behind the benchmark, as positive vaccine news meant the market continued to move ahead, but under very different leadership. Given the nature of the rally, led as it was by more cyclical and lower quality businesses, it is perhaps not surprising that most of the underperformance came from a negative asset allocation, namely due to the portfolio's underweight to the energy sector. In terms of stock selection, the largest contribution was from ASML, the leading manufacturer of equipment for chip makers, as an extremely tight supply environment over the period was supportive to both market sentiment and the company's bottom line. Storebrand, the Norwegian financial services group, outperformed on the back of strong results driven by lower costs and a positive surprise on the insurance business. Nordic Bank DNB delivered solid fourth-quarter results and outperformed on the back of the shift in the interest rate outlook. The biggest negative contributions came from some of 2020's winners, including Ubisoft Entertainment and Just Eat Takeaway.com, which had been beneficiaries of spending patterns during lockdowns. SAP was also a detractor, following its announcement that the transition to the cloud would be more protracted and expensive than previously thought.

Market Review

European equity markets recovered strongly over the twelve months. The eurozone once again entered recession in the first quarter of 2021, with the economy shrinking 0.3% following a 0.4% contraction in the prior quarter as lockdowns and restrictions took a toll on the service sector. As the period progressed, European countries made steady progress in vaccination campaigns, allowing their economies to begin reopening. Official data showed the eurozone economy grew by 2.2% during the second quarter. Eurostat's flash estimate put eurozone inflation at 3.4% in September 2021, up from -0.3% in October 2020. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. Eurozone economic momentum slowed as the third quarter progressed, according to business survey data. Along with the resurgence in coronavirus infections, rising inflation and supply constraints weighed. While the gauge pointed to continuing economic expansion throughout the third quarter, September's eurozone flash composite Purchasing Managers' Index fell to a five-month low. In July, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. A no-deal Brexit was averted at the very end of 2020, with the EU and UK agreeing to tariff-free and quota-free trade in goods.

Outlook

Economies continue to recover as the vaccine rollout progresses across Europe but the Delta variant and resistance to vaccination amongst younger age groups pose challenges to the outlook. As we move into the winter, the demands on hospitals will, once again, be the key determinant of whether European economic activity continues to normalise. Although the demand picture remains robust, upward price pressures and supply chain difficulties could also create volatility. The ability to still benefit from a positive economic backdrop whilst mitigating cost pressures will be key. In our view, the businesses able to do this will be those with wide economic moats and strong balance sheets. Such companies should be more resilient through business cycles and prove long-term structural winners.

David Moss

Portfolio Manager October 2021

BMO Investments (Lux) I Fund BMO European Smaller Companies Fund

Performance

Over the twelve months to 30 September 2021, the Class A EUR share returned 38.0%. By comparison the EMIX Smaller European Companies Index (NR), returned 39.9%. Performance is net of fees and in euro terms.

The Portfolio lagged the very strong rise of the market over the period as holdings of a defensive nature underperformed amid the strong market environment and a rotation towards value/cyclical stocks, such as Gerresheimer, the drug delivery system manufacturer. There was also rotation away from some businesses which had prospered during lockdowns, such as Just Eat Takeaway.com. Avon Rubber was hit by the re-tendering of a key contract with the US Army. Fjordkraft was hit by unfavourable moves in Norwegian spot electricity markets. On the positive side, ASM International, leading supplier of semiconductor process equipment for wafer processing, outperformed on the back of strong results and it and Nordic Semiconductor were supported by positive news flow in the sector around tight supply. The online-broker, flatexDEGIRO, outperformed on strong business flows.

Market Review

European equity markets recovered strongly over the twelve months, with smaller companies strongly outperforming the wider market. The eurozone once again entered recession in the first quarter of 2021, with the economy shrinking 0.3% following a 0.4% contraction in the prior quarter as lockdowns and restrictions took a toll on the service sector. As the period progressed, European countries made steady progress in vaccination campaigns, allowing their economies to begin reopening. Official data showed the eurozone economy grew by 2.2% during the second quarter. Eurostat's flash estimate put eurozone inflation at 3.4% in September 2021, up from -0.3% in October 2020. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750 billion in debt markets. Eurozone economic momentum slowed as the third quarter progressed, according to business survey data. Along with the resurgence in coronavirus infections, rising inflation and supply constraints weighed. While the gauge pointed to continuing economic expansion throughout the third quarter, September's eurozone flash composite Purchasing Managers' Index fell to a five-month low. In July, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. A no-deal Brexit was averted at the very end of 2020, with the EU and UK agreeing to tariff-free and quota-free trade in goods.

Outlook

Economies continue to recover as the vaccine rollout progresses across Europe but the Delta variant and resistance to vaccination amongst younger age groups pose challenges to the outlook. As we move into the winter, the demands on hospitals will, once again, be the key determinant of whether European economic activity continues to normalise. Although the demand picture remains robust, upward price pressures and supply chain difficulties could also create volatility. The ability to still benefit from a positive economic backdrop whilst mitigating cost pressures will be key. In our view, the businesses able to do this will be those with wide economic moats and strong balance sheets that can align themselves with the growth megatrends. Such companies should be more resilient through business cycles and prove long-term structural winners.

BMO Investments (Lux) I Fund BMO Global Absolute Return Bond Fund

Performance

Over the twelve months to 30 September 2021, the Class F GBP Hedged shares returned 3.8%. By comparison, the Libor GBP 3-month return was 0.1%. Performance is total return, net of fees and in sterling terms.

The Portfolio generated a positive absolute return over the period. This was achieved despite negative returns form government bond markets as yields rose in response to successful vaccines and economic recovery. Positive performance came from credit exposure and the structural tilt to shorter dated bonds. Relative value strategies made a significant, positive contribution, primarily through outright short interest rate duration stances and cross-market positions reflecting the relative pace of economic recovery.

Market Review

Global government bond yields rose, with US 10-year Treasury bond yields moving from around 0.7% to end the period at approximately 1.5%. German 10-year bund yields increased by 33 basis points, ending the period at around -0.2%. In July 2021, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%". The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. Credit yield spreads narrowed, reflecting the positive economic outlook, though corporate bonds also saw a negative duration impact from rising long-term rates.

Outlook

We expect economic growth to continue to slow but to remain well above historical averages. Meanwhile, we anticipate inflation to stay firm against supply shortages and tight labour markets. We expect the Federal Reserve to begin tapering quantitative easing in the fourth quarter, though anticipate rates to remain on hold in both the US and eurozone until late 2022. In tandem, we continue to expect rate increases across emerging markets in response to higher inflation. Overall, bond yields should rise further to accommodate increased bond issuance and higher inflationary risk. Nevertheless, we are mindful that a broader risk-off event could suddenly take bond yields lower. Despite stretched valuations, fundamentals within credit remain supportive. As we anticipate a period of more credit upgrades than downgrades, our focus on high quality BB bonds may benefit from a general increase in rising stars, with more bond issuers transitioning from high yield to investment grade. However, we do expect higher volatility in the fourth quarter and, given the low levels of credit spreads, we will remain cautious and tactical in anticipation of better entry levels. Overall, we continue to run lower duration portfolios and maintain a more cautious credit stance. We expect increased volatility to provide more opportunities for our active style to add value.

BMO Investments (Lux) I Fund Annual Report & Accounts 2021

BMO Investments (Lux) I Fund BMO Global Convertible Bond Fund

Performance

In the twelve months to 30 September 2021, the return on the A EUR shares was 10.3%, while the return for the Thomson Reuters Global Focus Customised TR Index was 8.5%. The A EUR Hedged share class returned 9.3% and the I EUR Hedged share class returned 9.6%. Performance is net of fees and in euro terms.

Convertibles continued to be driven higher with strengthening equity markets. Our strategy continued to be focussed on selling down deep-in-the-money convertibles and gearing back to more balanced alternatives. Notably within Electronics (semiconductors, Sony, Siemens), IT (Palo Alto, Match Group, Insight Enterprise), Retail/Wholesale (Kering, Ocada) and Telecom (Cellnex, Lumentum) convertibles were sold that had run up to high levels. Within Property, the Portfolio benefited from the take-over of Deutsche Wohnen by Vonovia and strong performance of US single family REIT Invitation Homes and e-real estate agent Zillow, which were subsequently exited. Reinvestments were geared towards companies that were expected to benefit from re-opening of the economies as vaccine roll-outs progressed. Positions in travel and lodging companies such as IAG, Jet2 and Accor were amongst others initiated. Furthermore, electronic payment providers Worldline and Nexi were added; the companies are to benefit from recovery in in-store shopping and catering amongst others through pick-up in transactions. A position in Shaftesbury was initiated as well; leisure properties of this UK REIT centre in London's West-End and its bars and restaurants amongst others in Covent Garden were expected to benefit from the quick vaccination roll-out in the UK. US convertibles were under significant pressure during the first quarter on concerns for rising bond yields, trading significantly below (issue) levels earlier in the year. We used the market correction to initiate positions in renewable energy convertibles (Enphase Energy, Solaredge Technology), Beyond Meat (which through partnerships should benefit from increasing trend towards healthy and vegetarian food) and MP Materials (rare earth producer, used in electronic vehicles and wind turbines). In IT, NortonLifeLock, a consumer cyber security provider in a still underpenetrated market with increasing cyber risks, was added. On retraction, we added (amongst others) Shopify - a cloud-based and multichannel commerce platform that provides merchants with a single view on customers and their businesses in various channels. New issues by Ford, which is increasing its focus on electronic vehicle production, and various semiconductor companies provided attractive investments as well. During the latter part of the year, utility exposure was increased. The merger of French water, waste-management and energy-services firm Veolia with Suez should be concluded by the end of the year, which we expect to unlock significant synergies that are yet to be reflected in the valuations. We topped up EDF after the pullback in anticipation that the European Union and France will reach agreement on nuclear power tariffs.

Electronics was the main driver of absolute and relative performance, benefitting from our overweight exposure to semiconductors (STMicroelectronics, Microchip, II-VI, On Semiconductor, BESI Semiconductor). Anticipated recovery in global economies and secular growth through electrification of cars, IoT, cloud and AI as well 5G investments set convertibles higher. Siemens was another notable performance driver. The German industrial has posted strong order growth and uplifted its long-term revenue target. IT was another strong driver for returns. Palo Alto was one of the strongest contributors. The cybersecurity firm is successfully transferring into higher-growth recurring revenues and has introduced attractive medium-term revenue targets with high free-cash-flow margins. Relative outperformance was broad based against index. Cowen (US financial services), Sika (Swiss construction materials manufacturer) and Kering (French luxury goods) were notable sector drivers. Finally, strong recovery of convertibles that fell to distressed levels during the COVID-19 period was positive. US offshore driller Transocean, Dutch soil researcher Fugro and Dutch builder BAM rebounded strongly on improved outlook and strengthening balance sheet. The convertible of AKKA Technologies, a high-technology engineering consulting firm, recovered from distressed levels as Adecco Group acquired a controlling stake.

Market Review

Convertible bonds generated positive returns over the period. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

High vaccination rates have allowed restrictions to be eased in many areas and we expect reopening to continue as countries learn to live with Covid-19. However, against shortages of key inputs along with transportation and labour bottlenecks, pent-up demand faces delayed fulfilment while prices have risen against supply constraints. This could weigh on margins and consumer spending, leading to negative earnings surprises. Combined with rising bond yields in anticipation of tapering and interest rate hikes by central banks, this may trigger higher volatility for equities. Against a backdrop of still subdued yields, convertibles provide low interest rate sensitivity compared to credits while benefiting from the long-term return potential offered by equities. Higher volatility enhances the implied option value in convertibles and the asset class should benefit from its favourable risk/reward profile. We remain focused on securing profits and exploiting fresh investment opportunities.

Anja Eijking

BMO Investments (Lux) I Fund BMO Global Smaller Companies Equity Fund

Performance

Over the twelve months to 30 September 2021, the Class I USD shares returned 36.1%. By comparison, the MSCI World Small Cap NR Index, returned 40.2%. Performance is net of fees and in US dollar terms.

The Portfolio lagged the very strong rise of the market. Certain holdings of a defensive nature underperformed amid the strong market environment and a rotation towards value/cyclical stocks. In terms of individual holdings, the most significant detractors included our position in streaming company Wheaton Precious Metals and SSR Mining as sentiment on the outlook for precious metals sagged. Fjordkraft was hit by unfavourable moves in Norwegian spot electricity markets. Positive individual contributors included US apparel maker Boot Barn rallying on strong earnings and guidance. Nordic Semiconductor were supported by positive news flow in the semiconductor industry around tight supply. Software firm Cerence was boosted by stronger-than-expected results and an improving outlook for the auto sector.

Market Review

Global equity markets rose strongly over the twelve months, with smaller companies outperforming the wider market. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves.

Catherine Stanley

Portfolio Manager October 2021

BMO Investments (Lux) I Fund BMO Global Total Return Bond Fund

Performance

Over the twelve months to 30 September 2021, the Class I Acc EUR shares returned 4.0%. By comparison, its market reference, the Bloomberg Barclays Global Aggregate TR EUR Hedged Index returned -1.4%. Performance is total return, net of fees and in euro terms.

The Portfolio generated a positive return over the period, significantly outperforming the benchmark. This was achieved despite negative returns form government bond markets as yields rose in response to successful vaccines and economic recovery. Positive performance came from credit exposure. Relative value strategies made a significant, positive contribution, primarily through outright short interest rate duration stances and cross-market positions reflecting the relative pace of economic recovery.

Market Review

Global government bond yields rose, with US 10-year Treasury bond yields moving from around 0.7% to end the period at approximately 1.5%. German 10-year bund yields increased by 33 basis points, ending the period at around -0.2%. In July 2021, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%". The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. Credit yield spreads narrowed, reflecting the positive economic outlook, though corporate bonds also saw a negative duration impact from rising long-term rates.

Outlook

We expect economic growth to continue to slow but to remain well above historical averages. Meanwhile, we anticipate inflation to stay firm against supply shortages and tight labour markets. We expect the US Federal Reserve to begin tapering quantitative easing in the fourth quarter, though anticipate rates to remain on hold in both the US and eurozone until late 2022. In tandem, we continue to expect rate increases across emerging markets in response to higher inflation. Overall, bond yields should rise further to accommodate increased bond issuance and higher inflationary risk. Nevertheless, we are mindful that a broader risk-off event could suddenly take bond yields lower. Despite stretched valuations, fundamentals within credit remain supportive. As we anticipate a period of more credit upgrades than downgrades, our focus on high quality BB bonds may benefit from a general increase in rising stars, with more bond issuers transitioning from high yield to investment grade. However, we do expect higher volatility in the fourth quarter and, given the low levels of credit spreads, we will remain cautious and tactical in anticipation of better entry levels. Overall, we continue to run lower duration portfolios and maintain a more cautious credit stance. We expect increased volatility to provide more opportunities for our active style to add value.

BMO Fixed Income Team Portfolio Manager October 2021

BMO Investments (Lux) I Fund BMO Plus II Fund

Performance

Over the twelve months to 30 September 2021, the Portfolio returned 26.9% (net of fees, in euro terms).

The Portfolio reduced equity exposure to approximately 80% in June 2021, opening a 20% government bond position in order to reduce risk, and continues to hold a marginal cash position. Geographically, eurozone and US equities continued to be the preferred exposure, accounting for more than 70% of the equity portfolio. Over the period, the Portfolio benefited from the strong return of the equity market as central banks continued to support financial markets and governments pushed for more fiscal help to revive economic growth. Being fully invested for most of the year, the Portfolio was able to capture the rise of global equities, while the geographic allocation also enhanced performance as eurozone outperformed most equity markets over this period. The rotation to government bonds cost performance but achieved the primary aim of reducing portfolio volatility.

Market Review

Global equity markets rose strongly over the twelve months. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves.

Paul Niven Portfolio Manager October 2021

BMO Investments (Lux) I Fund BMO Responsible Euro Corporate Bond Fund

Performance

Over the twelve months to 30 September 2021, the Class F Inc EUR shares returned 1.0%. This compares to the BBI Euro Aggregate Corporate TR Index, which returned 1.7%. Performance is total return, net of fees and in euro terms.

The Portfolio underperformed the index, primarily owing to sector positioning and duration positioning. The Responsible investment policies adopted by the fund means it cannot get exposure to certain sectors such as industrials and energy. These sectors, as well as some areas of the market that were worst hit during the Covid-19 pandemic such as airports, performed particularly well into the end of 2020 and into 2021. Our underweight exposure detracted from relative returns. In January 2021, we actively moved to a shorter duration position as yields started to rise, which was positive for relative returns at the beginning of the year. However, the position subsequently detracted from relative returns through the summer months as yields retraced their earlier moves.

Market Review

European corporate bonds delivered positive returns over the 12 months, outperforming government bonds. New issuance activity was buoyant against robust demand for credit. Along with raising cash and refinancing debt, global issuers also sought to finance resurgent mergers and acquisitions activity. During the period, the European Central Bank (ECB) expanded quantitative easing by €500bn and extended emergency measures to help eurozone banks. In March 2020, the ECB said it would speed up the pace of bond purchases under its emergency pandemic support programme. However, in September 2020 the ECB announced that it was slowing down the pace of bond purchases as financing conditions had improved. In July 2021, the ECB adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. Both the US and eurozone economies found support from reopening due to their respective vaccination campaigns. However, momentum began to slow as the period progressed against supply constraints, higher inflation and resurgence in Covid-19 infections owing to the Delta variant.

Outlook

Overall, we remain cautious in our outlook for European corporate bonds. For several months, investors have been bracing themselves for signs that central banks across the US, UK and Europe will begin tapering their asset purchase programmes. As concerns of reductions in central bank purchases gather pace, we expect the technical backdrop that has been supporting markets since the onset of the Covid-19 pandemic to deteriorate, and potentially lead to both higher yields and wider credit spreads. This, however, may well be a drawn-out affair and contrasts with the underlying fundamental strength supporting credit markets, which have been relatively stable throughout the year and continue to offer investors a good source of income. While valuations generally leave little room for further spread tightening, we continue to identify pockets of opportunities at the issuer level.

Andrew Brown

Portfolio Manager October 2021

BMO Investments (Lux) I Fund BMO Responsible Global Emerging Markets Equity Fund

Performance

Over the twelve months to 30 September 2021, the Class A Inc USD shares returned 15.2%. By comparison, the MSCI Emerging Markets NR Index, returned 18.2%. Performance is net of fees and in US dollar terms.

The fund underperformed its benchmark over the twelve months. In terms of the individual exposures, having a zero holding in electronics group Samsung was a significant negative, with the stock boosted by the positive news on coronavirus vaccines and good financial results. Meanwhile positions in China were hit by a widening regulatory crackdown and changing sentiment where holding Beijing Sinnet Technology was negatively impacted. Vitasoy International, the snacks and beverage group, also saw significant weakness after consumers decided to shun their brands. The biggest contributor to relative performance over the period was not owning benchmark heavyweight Alibaba which fell 20%. The abrupt cancellation of the IPO of Alibaba's financial services subsidiary (Ant Group) and subsequent announcement of anti-trust investigations by the Chinese government placed considerable pressure on Alibaba's share price. Although Alibaba has been perceived as one of the Covid-19 winners, we do not own this name because of concern over its shareholding structure and very questionable governance standards. Indian bank HDFC was buoyed by the encouraging news on Covid-19 vaccines and recovery hopes. Other positive contributors included Hong Kong-listed transport and logistics company SITC International.

Market Review

Emerging markets (EM) rallied strongly over the twelve months. Pacific stocks found support from a strengthening global economy. However, as the period progressed, EM equities suffered from concerns over tightening regulation and state control in China, a slowing Chinese economy and property market, as well as rising Covid-19 cases across the region owing to the Delta variant. The Chinese authorities tightened rules and issued guidelines to increase supervision for a range of Chinese businesses, including internet companies, education providers and pharmaceuticals/biotechnology firms. Chinese property developer Evergrande appeared close to defaulting on its huge debt pile. The Chinese economy expanded 6.5% in the fourth quarter of 2020, supported by a sharp rise in industrial output in December, which followed growth of 4.9% and 3.2% in the third and second quarters of 2020 respectively. Meanwhile, there were concerns over tighter Chinese credit conditions. China's economy expanded 7.9% year on year during the second quarter compared with the 18.3% expansion of the prior quarter. Purchasing Mangers' Index survey data suggested the Chinese economy contracted in August but stablished in September. Against this backdrop, China was one of the worst-performing global markets over the period, while Malaysia was also among the laggards. India strongly outperformed, buoyed by foreign inflows and recovery hopes.

Outlook

While the medium-term outlook continues to look supportive, several risks persist. The ongoing regulatory clampdown in China combined with the broader Chinese social policy of "Common Prosperity" does pose questions around the growth achievable by the major players in the "new economy." We expect volatility to persist over the coming months and there may well present attractive entry points into the market. Elsewhere, we have seen a significant pick-up in vaccine rollout across many emerging markets, raising the prospect of a sustained acceleration in growth for these areas as a result. Meanwhile, some EM countries have benefited from higher commodity prices. We do not expect abrupt tapering of support packages or material increases in base rates by developed nations, though major central banks appear likely to reduce monetary accommodation sooner rather than later.

Performance

Over the twelve months to 30 September 2021, the Class A EUR shares returned 26.3%; by comparison the MSCI World NR Index returned 30.3%. Performance net of fees and in euro terms.

The Portfolio underperformed the benchmark over the period. Stock selection drove the bulk of the underperformance, with not owning US tech giant, Alphabet being a drag, though this was partially offset by not holding Amazon.com. SAP underperformed on the back of a disappointing announcement that the transition to the cloud would be more protracted and expensive than previously thought. Humana, the US health insurance group, was hit by uncertainty over the net impact of Delta variant. On the positive side, strong results and the rally across the financials segment saw US specialist bank SVB Financial perform strongly. Lighting and building management solution company Acuity Brands rallied as its new management reinvigorated its LED product range. Our zero exposure to the energy sector was negative, as it rallied strongly.

Market Review

Global equity markets rose strongly over the twelve months. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves.

Performance

Over the twelve months to 30 September 2021, the Class AAcc USD shares returned 35.7%; by comparison the MSCI SMID Cap NR Index returned 36.2%. Performance is net of fees and in US dollar terms.

The Portfolio performed in line with the benchmark. The Portfolio lagged the rotation in the stock market towards potential beneficiaries of the anticipated opening up of the economy. A zero weighting to the oil sector was a negative as this switched to being one of the best performing areas. On the positive side, strong results led to US apparel manufacturer, Kontoor Brands, performing strongly whilst US specialist lender, SVB Financial, also had solid results and gained as financials rallied. US industrial technology firm, Zebra Technologies, saw gains as it strengthened its position in hand-held devices. The negative side was dominated by stocks affected by the rotation to cheaper, more cyclical, so the likes of Japan Exchange Group were detractors despite delivering strong results. However, Largan Precision was hit by the semiconductor shortage and sanctions on Huawei, while Americold Realty Trust was a victim of food supply chain disruption in the US.

Market review

Global equity markets rose strongly over the twelve months. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of company, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves.

BMO Investments (Lux) I Fund BMO Sustainable Multi-Asset Income Fund

Performance

Over the twelve months to 30 September 2021, the Class I Acc EUR share returned 11.0%. Performance is net of fees and in euro terms.

Our portfolio positioning retains its bias towards higher quality, sustainable growth companies that can prosper despite near-term economic and policy-driven volatility, giving us a bias towards Healthcare, Information Technology and Industrials. Our integrated approach to Sustainable Investment prevents any allocation to companies that manufacture weapons or tobacco or that own fossil fuel reserves. We continue with our strategy of adding to positions where we see strong underlying quality and where the market allows us to add at more attractive levels. Over the year, the largest allocation has either been to sustainable equities or sustainable credit, with a smaller position in alternatives, which has grown slightly over the 12-month period. There has generally been a small allocation to government bonds and liquidity. We continue to see more income opportunities in sustainable equity and have been adjusting the portfolio accordingly. Sustainable equities have been the dominant driver of performance over the last year, notably in the fourth quarter of 2020, whilst our alternatives and sustainable credit have also been small positives.

Market review

Global equity markets rose strongly over the twelve months. Shares rallied against accommodative monetary policy and fiscal support measures as well as the rollout of Covid-19 vaccines. While the global economy accelerated, inflation and interest rate expectations were on the increase over the period. European markets benefited from hopes around economic reopening. Brent crude oil futures surged from \$41 to \$79 per barrel. China slid amid weaker economic data and after the Chinese authorities launched regulatory crackdowns targeting various types of companies, including internet firms, private education providers and pharmaceutical/biotechnology groups. Global government bond yields rose over the period against economic recovery hopes as well as higher government borrowing and issuance. Inflation expectations increased given the potential for effective Covid-19 vaccination campaigns to drive a strong economic recovery.

Outlook

While fears around Chinese property developer Evergrande have partially distracted investors from ongoing positive surprises on the earnings front, rising rates during September have spurred a rotation from growth to value, with financials and energy stocks also being in demand. In addition, uncertainty has resurfaced about just how transitory the current inflationary pick-up will be, whilst a number of companies have referenced supply chain disruptions as impacting their operations. We have argued that some short-term challenges may subdue profit growth, although this should not prevent markets from moving higher. We maintain the view that any near-term uncertainty around market leadership and/or fears of peak margins are not sufficient to derail the bull market by themselves. We anticipate government bond yields to rise and yield curves to steepen over the remainder of 2021. Overall, we also remain cautious in our outlook for credit. For several months, investors have been bracing themselves for signs that central banks across the US, UK and Europe will begin tapering their asset purchase programmes. As concerns of reductions in central banks purchases gather pace, we expect the technical backdrop that has been supporting bond markets since the onset of the Covid-19 pandemic to deteriorate, and potentially lead to both higher yields and wider credit spreads. This, however, may well be a drawn-out affair and contrasts with the underlying fundamental strength supporting credit markets, which have been relatively stable throughout the year and continue to offer investors a good source of income. While valuations generally leave little room for further spread tightening, we continue to identify pockets of opportunities at the issuer level.

Simon Holmes

Fund Manager October 2021

Performance

In the twelve months to 30 September 2021, the A share class returned 28.0%. By comparison the benchmark returned 28.8%. Performance is net of fees and in euro terms. The benchmark for this Portfolio was changed to MSCI Europe NR on 14/10/19, previously it was the FTSE All-World Developed Europe NR.

The Portfolio delivered strong absolute returns in the twelve months, but ended the period behind the benchmark, as positive vaccine news meant the market continued to move ahead, but under very different leadership. Given the nature of the rally, it is perhaps not surprising that all of the underperformance came from a negative asset allocation, namely due to the portfolio's underweight to the banks and energy sectors. This was partly offset by positive stock selection driven primarily by the fund's cyclical and financial holdings. The largest contribution was from the holding of ASML, the leading manufacturer of equipment for chip makers, as an extremely tight supply environment over the period was supportive to both market sentiment and the company's bottom line. Nordic Bank DNB delivered solid fourth-quarter results and outperformed on the back of the shift in the interest rate outlook. Among the detractors were SAP, on the back of a disappointing announcement that the transition to the cloud would be more protracted and expensive than previously thought. Deutsche Boerse saw profit-taking on disappointing results. The investment thesis around Elekta, the radiotherapy group, weakened as we saw increasing evidence of intensifying competition as well as profit shortfalls on supply chain issues, so we decided to exit this position.

Market Review

European equity markets recovered strongly over the twelve months. The eurozone once again entered recession in the first quarter of 2021, with the economy shrinking 0.3% following a 0.4% contraction in the prior quarter as lockdowns and restrictions took a toll on the service sector. As the period progressed, European countries made steady progress in vaccination campaigns, allowing their economies to begin reopening. Official data showed the eurozone economy grew by 2.2% during the second quarter. Eurostat's flash estimate put eurozone inflation at 3.4% in September 2021, up from -0.3% in October 2020. The European Union (EU) agreed to a €1.8tn EU-wide Covid-19 recovery fund, with the European Commission to raise €750bn in debt markets. Eurozone economic momentum slowed as the third quarter progressed, according to business survey data. Along with the resurgence in coronavirus infections, rising inflation and supply constraints weighed. While the gauge pointed to continuing economic expansion throughout the third quarter, September's eurozone flash composite Purchasing Managers' Index fell to a five-month low. In July, the European Central Bank (ECB) adopted a new strategy to pursue a symmetric 2% inflation target over the medium term, replacing its previous goal to maintain inflation "below but close to 2%." The ECB also pledged to allow temporary overshoots of the 2% target where it views price pressures as transitory. A no-deal Brexit was averted at the very end of 2020, with the EU and UK agreeing to tariff-free and quota-free trade in goods.

Outlook

Economies continue to recover as the vaccine rollout progresses across Europe but the Delta variant and resistance to vaccination amongst younger age groups pose challenges to the outlook. As we move into the winter, the demands on hospitals will, once again, be the key determinant of whether European economic activity continues to normalise. Although the demand picture remains robust, upward price pressures and supply chain difficulties could also create volatility. The ability to still benefit from a positive economic backdrop whilst mitigating cost pressures will be key. In our view, the businesses able to do this will be those with wide economic moats and strong balance sheets that are positively aligned with the sustainability megatrends. Such companies should be more resilient through business cycles and prove long-term structural winners.

Sacha El Khoury Portfolio Manager

October 2021

BMO Investments (Lux) I Fund BMO US Smaller Companies Fund

Performance

Over the 12 months to 30 September 2021, the BMO US Smaller Companies Fund returned 54.1%. By comparison, the benchmark (Russell 2000 Index) returned 47.3%. Returns are net of fees, in US dollar terms and on a total return basis.

Market Review

Despite a number of geopolitical headlines and the ongoing pandemic, US equities delivered exceptionally positive results for the period which was initially sparked in November of last year as investors responded to encouraging news on vaccines. This mostly supported cyclical sectors including energy and financials as investors gained confidence that a vaccine could lead to a full reopening of the economy, while traditionally defensive utilities and consumer staples lagged. While mega-cap growth stocks led the market for most of 2020, the fourth quarter of last year was the catalyst for a notable rotation from growth to value. Riskier deep-value companies led the charge during this rotation, which also coincided with a remarkable momentum correction. More recently, equities experienced a reversal in leadership which was largely influenced by easing concerns over inflation and falling bond yields, which supported higher-risk growth companies at the expense of more reasonably priced cyclicals.

Relating the market environment back to our process, the strategy's emphasis on companies with attractive valuations was a significant contributor to performance, as more reasonably priced securities led during the market's rally following the effects of "Pfizer Monday" in November.

The Disciplined Small-Cap Core strategy outperformed the Russell 2000® Index for the period. Both sector allocation and stock selection were positive for the period. The strategy's underweight position in utilities and real estate added to performance, while an underweight position in materials and an overweight position in health care detracted from performance. Stock selection was strongest in financials and health care and weakest in energy and real estate.

Outlook

Looking forward, we believe our portfolios are well positioned for continued alpha generation, as we see positives from each of the three components of our strategy across global equity markets, beyond just valuation. After more than a year of a massive recovery in equities led by the least profitable, lowest quality, and highest risk stocks, companies with strong profitability and high-quality profiles are now the most attractively valued than they've been since the Tech Bubble in 2000, reinforcing the potential for high returns by emphasizing fundamental strength. While Valuation Spreads have reverted from near all-time highs last year, spreads are still significantly wider than normal, yielding a strong positive prediction for our focus on company valuations. Meanwhile, market leadership has broadened substantially since the depths of the COVID-19 drawdown in early 2020, signaling above-average return potential for companies with positive momentum/investor sentiment.

1. BMO Investments (Lux) I Fund, (THE "FUND")

The Fund is a "Société d'Investissement à Capital Variable" and is qualified as a Luxembourg investment company. Under the laws of the Grand Duchy of Luxembourg, the Fund is registered as an undertakings for collective investment pursuant to Part I of the amended Law of 17 December 2010 relating to undertakings for collective investment (the "Law").

FundRock Management Company S.A. has been designated by the directors of the Fund as management company by an agreement dated 30 December 2005 as amended and restated by an agreement dated 25 February 2016 (the "Management Company"). The list of the investment funds managed by the Management Company may be obtained, on request, at the registered office of the Management Company.

The Management Company was incorporated as a "société anonyme" under the laws of the Grand Duchy of Luxembourg on 10 November 2004 and its articles have been amended for the last time on 31 December 2015 which was published in the *Mémorial C* on 19 January 2016. The Management Company is approved as a management company and regulated by chapter 15 of the Law.

The Fund's board of directors (the "Board" or "Directors" and each a "Director") has adopted the ALFI Code of Conduct, which sets out the principles of good governance, and considers that the Fund has been in compliance with it in all material respects throughout the financial year ended 30 September 2021.

2. SIGNIFICANT ACCOUNTING POLICIES

Presentation of financial statements

The financial statements have been presented in accordance with the reporting requirements of the Luxembourg supervisory authorities and Luxembourg generally accepted accounting principles ("GAAP").

Combined accounts

The combined financial statements have been presented in Euro, the functional currency of the Fund. Where a Portfolio is denominated in a currency other than Euro, the average exchange rate has been used for the Statement of Operations and Changes in Net Assets. The exchange rate ruling as at the reporting date has been used for the Statement of Net Assets.

Investments

As per the Prospectus and for the purpose of determining the Net Asset Value used for subscriptions and redemptions, the quoted investments and those traded in other regulated markets are valued on the basis of the last available price at 30 September 2021.

Securities which are not quoted on, or dealt, in an official or another regulated market, or securities which are so quoted or dealt in but in which the last sale price is not available, and securities for which the last sale price is not representative of the fair market value, the value of such securities will be determined based on an agreed pricing basis and the reasonably foreseeable sales price determined prudently and in good faith, upon the advice of the Investment Manager, by the Directors. Purchases and sales of investments are recognised on the trade date. Gains or losses on sales of investments are computed on the average cost basis and include transaction costs.

Investment income

Dividends are recognised in income, net of irrecoverable withholding tax, on the date upon which the relevant securities are declared "ex-dividend". Interest income, net of irrecoverable withholding tax, is accrued on a daily basis and includes the amortisation of premiums and accretion of discounts.

Translation of foreign currencies

Assets and liabilities denominated in currencies other than the Portfolios' reporting currencies have been translated at the rates of exchange ruling at 30 September 2021. Cost of investments and income and expenditure which are denominated in currencies other than the Portfolios' reporting currency have been translated at the exchange rates ruling on the day of transaction. The exchange gain or loss arising from the translation of these items is taken into account in the determination of the results of operations. The average USD/EUR exchange rate during the year was 0.836881. The USD/EUR exchange rate as at 30 September 2021 was 0.862850.

Cross portfolio investments

At 30 September 2021 there were no cross investments.

Futures contracts on securities and indices

Initial margin deposits are made upon entering into futures contracts and can be made either in cash or securities. During the year the futures contract is open, changes in the value of the contract are recognised as unrealised gains or losses by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised losses or gains are incurred. When the contract is closed, the Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract.

as at 30 September 2021

Forward foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realised profit or loss includes net gains or losses on forward foreign exchange contracts which have been settled or offset by other contracts with the same counterparty.

Options Purchased and Options Written

The premium paid for options purchased is recorded as an investment and is subsequently adjusted to the current market value of the option. Premiums paid for the purchase of options which expire unexercised are treated as realised losses on the expiration date. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security, foreign currency or index, in determining whether the relevant Portfolio has realised a gain or a loss. If a purchased call option is exercised, the premium increases the cost basis of the security, foreign currency or index purchased by the Portfolio.

For a written option, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio as realised gains on the expiration date. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the relevant Portfolio has realised a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security purchased by the relevant Portfolio.

Future style options

In the case of options on futures, no premium margin is required as a daily profit and loss adjustment (variation margin) is made by the procedure known as "marking-to-market". The profit of one party to the contract is the loss of the other party. The resulting gains and losses are either debited or credited to the appropriate account on a daily basis via the mark-to-market process. The final valuation is made at the final settlement price of either the expiration date of the option or the day on which it was exercised.

Total Return Swaps

The Fund may enter into swap contracts in which the Fund and the counterparty agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices.

Cash and cash equivalents

Cash and other liquid assets are valued at their face value, including interest accrued, where applicable. Interest is also accrued on bank overdrafts. All cash at bank are held either directly with a sub-depositary or by State Street Bank International GmbH, Luxembourg Branch, on overnight deposit with a third party institution which has been approved by the Board.

Income and receivable from securities lending

The Fund may lend its portfolio securities to specialised banks and credit institutions and other financial institutions of high standing and highly qualified registered brokers/dealers or through recognised clearing institutions such as Clearstream or Euroclear subject to complying with the provisions set forth in the CSSF Circular 08/356. Loans will be secured continuously by eligible collateral authorised from time to time by the CSSF. During the whole period of lending, collateral must be at least equal to the value of the global valuation of the securities lent. Each counterparty will possess an industry standard credit rating that is acceptable to the Investment Manager with reference to the market conditions prevailing at the relevant time.

Total amount of "Security lending income": 65,226 EUR

Total amount of "Security lending receivable": 2,112 EUR

As at 30 September, 2021, total amount of "Security lending receivable" is included in "Other assets".

Net amortization/Net accretion

Net amortization/Net accretion, includes the amortization and accretion of premiums / discounts from both, the long and short term fixed income securities. All components are netted and disclosed in the Statement of Operations and Changes in Net Assets as a positive sum under the income position "Net amortization/ Net accretion" and as a negative sum under the expense position "Net amortization / Net accretion".

3. EQUALISATION

The Fund follows the accounting practice known as "equalisation" by which a portion of the issue and redemption price representing, on a per share basis, accrued distributable investment income (excluding capital gains or losses), is credited or charged to distributable income. The amounts attributable to this income equalisation account are included in the proceeds from subscriptions to the Fund's shares or in the payment for the Fund's shares redeemed, and in the "Net equalisation", items of the Statement of Operations and Changes in Net Assets.

as at 30 September 2021

4. INVESTMENT MANAGEMENT FEES

The Fund entered into an agreement with the Management Company and BMO Asset Management Limited ("BAML") to act as investment manager to the following Portfolios for a monthly fee calculated on the average of the net asset value of each of the following Portfolios managed by it during the preceding month at the following rates:

* Refer to Appendix I.

** BAML replaced BMO Portugal, Gestão de Patrimónios, S.A. as investment manager to BMO Plus II Fund on 28 May 2021. Until this date, Investment Management Fees of 1.30% were accrued and paid to BMO Portugal, Gestão de Patrimónios, S.A. to account for a 4% stamp duty levied by the Portugal Tax Authority on investment management fees.

BAML is a company incorporated in England and regulated by the Financial Conduct Authority ("FCA").

For the BMO Global Convertible Bond Fund, BAML has delegated the portfolio management functions to BMO Asset Management Netherlands B.V.

For BMO US Smaller Companies Fund, BAML has delegated the portfolio management functions to BMO Asset Management Corp.

There are no Investment Management Fees payable on Class X shares or Class L shares (if any).

5. ADMINISTRATION AND DEPOSITARY FEES

State Street Bank International GmbH, Luxembourg Branch ("the Depositary") is entitled to fees payable by the Fund, accruing daily and payable monthly in arrears, of up to 0.50% of the assets under custody plus a transaction charge with respect to its function as the Depositary of the Fund. The actual level of the fees and transaction charges payable for the custody services vary, depending on the different countries. In addition, for acting as Registrar, Transfer, Domiciliary, Administrative and Paying Agent to the Fund, State Street Bank International GmbH, Luxembourg Branch will be entitled to fees of up to 0.045% of the applicable Net Asset Value plus a transaction charge.

In addition State Street Bank International GmbH, Luxembourg Branch is entitled to pass on to the Fund fees charged by external price vendors where the cost of obtaining vendor prices is not contained within the standard State Street Bank International GmbH, Luxembourg Branch fund accounting fixed percentage fee.

6. DIRECTORS' FEES

Each of the Directors of the Fund is entitled to remuneration for their services at the rate determined by the Fund in general meeting from time to time. Those Directors of the Fund who are employees of BMO Asset Management (Holdings) plc (parent of the Investment Managers), or any of its subsidiaries, waive their fees in carrying out their duties as Directors of the Fund. Directors' fees are paid to the remaining directors and allocated to the Portfolios based on average net assets. For the year to 30 September 2021, the Chairman Patrick Johns is entitled to a fee of EUR 27,000 per annum and directors Jacques Elvinger and Ailbhe Jennings are entitled to a fee of EUR 22,000 per annum. In addition, each Director may be paid reasonable expenses in connection with meetings of the Board or otherwise properly incurred in connection with the business of the Fund.

7. MANAGEMENT COMPANY FEE

The Fund pays to the Management Company an annual Management Company fee payable out of the assets of the Fund of up to a maximum of 0.0375% of the net asset value (on a sliding scale dependant on the size of the Portfolio), with no minimum fee.

8. TAXATION

The Fund is not subject to taxation in Luxembourg on its income, profits or gains. However, the Fund is liable in Luxembourg to a subscription tax (*taxe d'abonnement*) of 0.05% per annum of its net assets, such tax being payable quarterly and calculated on the basis of the total net assets of the Fund at the end of the relevant quarter. The rate of the annual subscription tax is reduced to 0.01% per annum for the Portfolios which, in accordance with Article 174 of the Law, invest exclusively in money market instruments as defined in the Grand-Ducal Regulation of 14 April 2003 and in respect of classes of shares which are only sold to and held by Institutional Investors. No stamp duty or other tax will be payable in Luxembourg on the issue of Shares in the Fund.

Interest and dividend income received by the Fund may be subject to non-recoverable withholding tax in the source countries. The Fund may further be subject to tax on the realised or unrealised capital appreciation of its assets in the countries of origin.

Distributions made by the Fund are not subject to withholding tax in Luxembourg.

as at 30 September 2021

The Fund is not subject to net wealth tax.

Dividend and interest income are recognised in the Combined Statement of Operations and Changes in Net Assets on a net basis.

As from 1 April 2007, investment vehicles listed in article 44, 1, d) of the Luxembourg VAT law (SICAVs, SICAFs and management companies of FCPs) should be registered as taxable persons for VAT purposes. As taxable persons for VAT purposes these investment vehicles must comply with the standard obligations foreseen in the Luxembourg VAT law such as VAT registration, VAT compliance and payment of the VAT due on services subject to reverse charge.

Investors should be aware that a United Kingdom offshore funds regime was introduced applicable to United Kingdom investors into "offshore funds". The Board has obtained reporting fund status approval from HM Revenue & Customs for the classes of shares listed below.

The following share classes were included in the application (as at 30 September 2021):

BMO European Growth & Income Fund - Class A Shares - Euro BMO European Growth & Income Fund - Class A Shares - GBP BMO European Smaller Companies Fund - Class A Shares - Euro BMO European Smaller Companies Fund - Class A Acc Shares - Euro BMO European Smaller Companies Fund - Class I Shares - Euro BMO European Smaller Companies Fund - Class I Acc Shares - Euro BMO European Smaller Companies Fund - Class R Acc Shares - Euro BMO Global Absolute Return Bond Fund - Class F Acc Shares - GBP (Hedged) BMO Global Absolute Return Bond Fund - Class I Acc Shares - GBP (Hedged) BMO Global Convertible Bond Fund - Class A Shares - Euro BMO Global Convertible Bond Fund - Class A Shares - Euro (Hedged) BMO Global Convertible Bond Fund - Class A Shares - GBP BMO Global Convertible Bond Fund - Class A Acc Shares - Euro (Hedged) BMO Global Convertible Bond Fund - Class A Acc Shares - US\$ (Hedged) BMO Global Convertible Bond Fund - Class Hong Kong A Shares - US\$ BMO Global Convertible Bond Fund - Class I Shares - Euro BMO Global Convertible Bond Fund - Class I Shares - Euro (Hedged) BMO Global Convertible Bond Fund - Class P Shares - Euro (Hedged) BMO Global Convertible Bond Fund - Class R Shares - Euro BMO Global Smaller Companies Equity Fund - Class A Shares - US\$ BMO Global Smaller Companies Equity Fund - Class A Acc Shares - Euro BMO Global Smaller Companies Equity Fund - Class A Acc Shares - US\$ BMO Global Smaller Companies Equity Fund - Class I Shares - US\$ BMO Global Smaller Companies Equity Fund - Class I Acc Shares - GBP BMO Global Smaller Companies Equity Fund - Class R Acc Shares - GBP BMO Global Total Return Bond Fund - Class I Acc Shares - Euro BMO Responsible Euro Corporate Bond Fund - Class X Shares - GBP (Hedged) * BMO Responsible Global Emerging Markets Equity Fund - Class A Shares - US\$ BMO Responsible Global Emerging Markets Equity Fund - Class A Acc Shares - CHF BMO Responsible Global Emerging Markets Equity Fund - Class I Acc Shares - US\$ BMO Responsible Global Emerging Markets Equity Fund - Class P Acc Shares - CHF BMO Responsible Global Emerging Markets Equity Fund - Class P Acc Shares - Euro BMO Responsible Global Emerging Markets Equity Fund - Class P Acc Shares - US\$ BMO Responsible Global Emerging Markets Equity Fund - Class R Acc Shares - CHF BMO Responsible Global Emerging Markets Equity Fund - Class R Acc Shares - Euro BMO Responsible Global Emerging Markets Equity Fund - Class R Acc Shares - GBP BMO Responsible Global Emerging Markets Equity Fund - Class R Acc Shares - US\$ BMO Responsible Global Equity Fund - Class A Shares - Euro BMO Responsible Global Equity Fund - Class A Shares - US\$ BMO Responsible Global Equity Fund - Class A Acc Shares - Euro BMO Responsible Global Equity Fund - Class A Acc Shares - US\$ BMO Responsible Global Equity Fund - Class I Shares - Euro BMO Responsible Global Equity Fund - Class I Shares - GBP BMO Responsible Global Equity Fund - Class I Shares - US\$

*Refer to Appendix I

The Directors intend to issue the annual investor report on or around 31 March each year via the BMO Website (This information is unaudited).

9. RELATED PARTY TRANSACTIONS

For certain share classes, BAML may be entitled to a placing and/or introductory fee of not more than 5% of the subscription value of the Fund shares. Out of this fee, stockbrokers or other approved introducing agents may be paid a proportion.

Patrick Johns (Chairman) is a non-executive adviser to BMO Global Asset Management Limited.

Jacques Elvinger, a Director of the Fund, is a partner in the Luxembourg law firm Elvinger Hoss Prussen, société anonyme. Mr Elvinger has been an Avocat à la Cour, Luxembourg since 1984.

Hugh Moir, a Director of the Fund until 08 November 2021, was Head of Operations and IT at BMO Asset Management (Holdings) plc until 08 November 2021.

Ailbhe Jennings, a Director of the Fund, is Non-executive adviser to BMO Global Asset Management, a subsidiary of BMO Asset Management (Holdings) plc.

Rogier van Harten, a Director of the Fund, is Head of Institutional Distribution for Continental Europe, BMO Asset Management Netherlands B.V., a subsidiary of BMO Asset Management (Holdings) plc.

The Fund has entered into an Agency Agreement for the lending of securities in return for a loan fee. During the year under review, State Street Bank International GmbH, London Branch earned EUR 13,045 as securities lending agent. The Investment Managers earned EUR 8,697 for monitoring and oversight of the securities lending program.

No marketing expenses or distribution fees were charged to the following Portfolios:

as at 30 September 2021

BMO Euro Bond Fund BMO Eurozone Equity Fund* BMO Plus II Fund

*See Appendix I

Any costs incurred in relation to the distribution of these Portfolios/Share Classes (if any) will be borne by BAML.

During the period from 01 October 2020 to 30 September 2021, the BMO Diversified Growth Fund had invested in the BMO Investments (III) (Ireland) Plc - BMO Multi-Strategy Global Equity Fund, managed by the same investment manager. Investment management fees of EUR 37,761 for this portion of the net assets of this Portfolio is waived.

BAML may pass on to the Fund certain approved expenses incurred in the marketing of the Fund. The maximum chargeable during any accounting period is 0.025% of the net asset value of the Fund as the respective Portfolio(s).

BAML may also charge a fee to the Fund to cover the costs incurred in the distribution of the Fund in the various jurisdictions in which it is registered. The amount to be charged during any accounting period may not exceed 0.05% of the net asset value of the Fund or the respective Portfolio(s).

No marketing expenses or distribution fee will be charged to the Hong Kong Share Classes of any Portfolio. Any costs incurred in relation to the distribution of the Hong Kong Share Classes (if any) will be borne by BAML.

BAML is entitled to an annual service fee of 0.015% of the equity and bond investments of the Portfolios making use of its Responsible Engagement Overlay services as described in the Prospectus. This service is not charged to the Hong Kong Share Classes for any Portfolio.

10. STATEMENT OF CHANGES IN INVESTMENTS

A list, specifying for each Portfolio the total purchases and sales which occurred during the year under review, may be obtained, upon request, at the registered office of the Fund and the Fund's Registrar/Administrative Agent, Depositary, or Paying Agent in the relevant jurisdiction.

11. PERFORMANCE FEE

No performance fees were charged to any of the Portfolios during the year.

12. SOFT COMMISSIONS ARRANGEMENTS AND OTHER SIMILAR ARRANGEMENTS

Since the implementation of MiFID II, in January 2018, all third party investment research consumed by investment teams in EMEA, were paid for directly by BMO Global Asset Management. The use of Commission Sharing Agreements ceased at the end of December 2017 and since then, Client Portfolios have only incurred execution-related commission costs.

13. SECURITIES LENDING

The volume of the securities lending transactions will be kept at an appropriate level. The Fund will be entitled to request the return of the securities lent in a manner that enables it, at all times, to meet its redemption obligations. It will be ensured that securities lending transactions do not jeopardise the management of the Fund's assets in accordance with the investment policy.

The income earned from the securities lending program is reflected net of fees in the Statement of Operations and Changes in Net Assets.

State Street Bank International GmbH, London Branch as the securities lending agent receives a 15% fee for their services. The Investment Manager as the Fund's securities lending co-ordinator receives an administration fee of 10% to cover operational costs. There is no hidden revenue. As a result, the Fund receives 75% of the gross revenue generated from securities lending. It is the Investment Manager's policy to return all revenue to the Fund less direct and indirect operational costs.

The table below shows the market value of securities on loan as well as the market value of collateral held as at 30 September 2021. The collateral held at this date provided coverage of 104.00%.

	Market Value of Securities on Loan	Market Value of Collateral held	Nature of Collateral held
Portfolio	in EUR	in EUR	
BMO Diversified Growth Fund	592,615	622,918	Government Bonds
BMO Euro Bond Fund	19,422,906	19,810,418	Government Bonds
BMO European Growth & Income Fund	491,881	516,057	Government Bonds
BMO European Smaller Companies Fund	73,184	77,161	Government Bonds
BMO Global Absolute Return Bond Fund	1,225,452	1,247,803	Government Bonds
BMO Global Total Return Bond Fund	466,707	475,219	Government Bonds

as at 30 September 2021

Portfolio	Market Value of Securities on Loan in EUR	Market Value of Collateral held in EUR	Nature of Collateral held
BMO Responsible Global Emerging Markets Equity Fund	21,397,538	22,619,501	Government Bonds
BMO SDG Engagement Global Equity Fund	615,610	648,052	Government Bonds
BMO Sustainable Multi-Asset Income Fund	19,820	20,882	Government Bonds
BMO Sustainable Opportunities European Equity Fund	58,112	62,801	Government Bonds
	44,363,825	46,100,812	

The counterparties for securities were: Bank of Nova Scotia, Barclays Capital Securities Ltd., BNP Paribas Arbitrage SNC, Citigroup Global Markets Ltd., Deutsche Bank AG, Goldman Sachs International, HSBC Bank Plc., JP Morgan Securities Plc., Merrill Lynch International and Societe Generale S.A.

14. DIVIDENDS DISTRIBUTION

During the year, the BMO Sustainable Multi-Asset Income Fund, which had an ex-dividend date of 11 December 2020, paid the following dividends to shareholders on 15 December 2020.

			Amount of Dividends
	Share class	Dividend	paid out to
Share class Name	Currency	per Share	Shareholders
BMO Sustainable Multi-Asset Income Fund - Class A Shares - Euro	Euro	12.3700	1,162,344
BMO Sustainable Multi-Asset Income Fund - Class F Shares - Euro	Euro	0.0600	6
BMO Sustainable Multi-Asset Income Fund - Class I Shares - Euro	Euro	13.8000	4,871
BMO Sustainable Multi-Asset Income Fund - Class R Shares - Euro	Euro	0.0300	3

During the year, the BMO Sustainable Multi-Asset Income Fund, which had an ex-dividend date of 11 June 2021, paid the following dividends to shareholders on 15 June 2021.

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
BMO Sustainable Multi-Asset Income Fund - Class A Shares - Euro	Euro	13.3200	1,214,697
BMO Sustainable Multi-Asset Income Fund - Class F Shares - Euro	Euro	0.0700	7
BMO Sustainable Multi-Asset Income Fund - Class I Shares - Euro	Euro	14.9600	5,281
BMO Sustainable Multi-Asset Income Fund - Class R Shares - Euro	Euro	0.0700	7

For all distributing classes of shares which have registered for United Kingdom Reporting Fund Status it is intended to distribute 100 percent of reportable income (computed in accordance with the definition of reportable income under the United Kingdom Offshore Funds (Tax) Regulations 2009 (as amended)) which accrues to the Portfolio or distributing class, however it should be noted that this cannot be guaranteed. It may be that the Directors consider in certain cases that the amounts available for distribution are so minimal that a distribution is not commercially viable. Where Share Classes have not been registered for UK Reporting Fund Status, the Directors will determine an alternative basis for determining the level of any dividend.

The Board may decide to make dividend payments to Shareholders once a year or more frequently provided that no payment will be made as a result of which the total net assets of the Fund would become less than the minimum required by Luxembourg law.

During the year ended to 30 September 2021, dividends with an ex-dividend date of 15 January 2021 were paid out to shareholders on 29 January 2021 as follows:

Share class Name	Share class Currency	Dividend per Share	Amount of Dividends paid out to Shareholders
BMO European Growth and Income - Class A Shares - Euro	Euro	0.0137	1,993
BMO European Growth and Income - Class A Shares - GBP	GBP	0.0174	25,410

BMO SDG Engagement Global Equity - Class XP Shares - CHF (Hedged)	CHF	0.0571	43,306

15. SWING PRICING

Under certain circumstances (for example, large volumes of deals), investment and/or disinvestment costs may have an adverse effect on the Shareholders' interests in a Portfolio. In order to prevent this effect, called "dilution", the Board may determine that a "swing pricing" methodology applies so as to allow for the Net Asset Value per Share to be adjusted upwards or downwards by dealing and other costs and fiscal charges which would be payable on the effective acquisition or disposal of assets in the relevant Portfolio if the net capital activity exceeds, as a consequence of the aggregate transactions in that Portfolio on a given Valuation Date (as defined in the Prospectus), a threshold (the "Threshold") set by the Board from time to time.

Description of the swing pricing methodology:

If the net capital activity on a given Valuation Date leads to a net inflow/outflow of assets in excess of the Threshold in the relevant Portfolio, the Net Asset Value used to process all subscriptions, redemptions or conversions in that Portfolio is adjusted upwards/downwards by the swing factor set by the Board from time to time.

The swing factor shall not exceed 2% of the Net Asset Value per Share of the relevant Portfolio. Further, for the purpose of calculating the expenses of a Portfolio which are based on the Net Asset Value of the relevant Portfolio (including any applicable performance fee), the Administrative Agent will continue to use the un-swung Net Asset Value.

The swing pricing mechanism was in place for all sub funds during the financial period.

16. TRANSACTION COSTS

For the year ended 30 September 2021, the following Sub-Funds of the BMO Investments (Lux) I Fund incurred transaction costs related to purchases and sales of transferable securities as follows:

Portfolio	Portfolios Currency	Transaction Costs
BMO Diversified Growth Fund	EUR	7,800
BMO European Growth & Income Fund	EUR	18,174
BMO European Smaller Companies Fund	EUR	8,372
BMO Eurozone Equity Fund *	EUR	32,433
BMO Global Convertible Bond Fund	EUR	5
BMO Global Smaller Companies Equity Fund	USD	16,311
BMO Plus II Fund	EUR	33,154
BMO Responsible Global Emerging Markets Equity Fund	USD	898,384
BMO Responsible Global Equity Fund	EUR	499,840
BMO SDG Engagement Global Equity Fund	USD	1,403,606
BMO Sustainable Multi-Asset Income Fund	EUR	52,392

as at 30 September 2021

Portfolio	Portfolios Currency	Transaction Costs
BMO Sustainable Opportunities European Equity Fund	EUR	27,688
BMO US Smaller Companies Fund	USD	12,704

*Refer to Appendix I.

These transaction costs are corresponding to broker fees and are included in the caption "Investments at cost" in the Statement of Net Assets of the report, and respectively in the captions "Net realised gain / (loss) on sales of investments" and "Net change in net unrealised appreciation / (depreciation) on investments" in the Statement of Operations and Changes in Net Assets.

17. EVENTS WHICH OCCURED DURING THE YEAR

BMO Portugal, Gestão de Patrimónios, S.A. ("BMO Portugal"), the investment manager for the BMO Plus II Fund, informed the Board of its decision to terminate operations on 30 June 2021. The Board appointed BAML to replace BMO Portugal as the investment manager of the BMO Plus II Fund effective 28 May 2021.

18. SIGNIFICANT EVENT

The widespread outbreak in early 2020 of an infectious respiratory illness, COVID-19, caused an ongoing global pandemic resulting in travel restrictions, disruption of healthcare systems, prolonged quarantines, cancellations, supply chain disruptions, lower consumer demand, layoffs, ratings downgrades, defaults and other significant economic impacts. Certain markets have experienced temporary closures, extreme volatility, severe losses, reduced liquidity and increased trading costs.

COVID-19 has therefore created market turmoil and increased market volatility generally and this has impacted the prices of all asset classes, resulting in an impact to the Net Asset Values of the Sub-Funds. The financial statements reflect the position at 30 September 2021 and the results for the financial year then ended, and do not reflect the totality of any impacts from the COVID-19 pandemic which, as at the date of these accounts, is ongoing.

19. SUBSEQUENT EVENTS

Following the announcement on 12 April 2021 regarding Ameriprise Financial's proposed acquisition of BMO's EMEA Asset Management business, including BMO GAM Asia Limited (BMO GAM (EMEA)), Columbia Threadneedle confirmed that this acquisition completed on the 8th November 2021. BMO GAM (EMEA) is now part of Columbia Threadneedle Investments, the global asset management business of Ameriprise Financial.

Carne Global Fund Managers (Luxembourg) S.A. replaced FundRock Management Company S.A. as Management Company to the Fund with effect from 1 October 2021.

Columbia Management Investment Advisers, LLC became the sub-investment manager of BMO US Smaller Companies Fund with effect from 16 December 2021.

20. SOCIALLY RESPONSIBLE INVESTMENT

BAML is convinced that investors increasingly care about environmental, social and corporate governance (ESG) issues and that these may have a material impact on the companies in which we invest. Therefore the Fund has appointed BAML to engage with companies held by the portfolios in order to improve the ESG performance and safeguard investor value. The Responsible Engagement Overlay service, known as reo®, aims to encourage companies to behave more responsibly with regard to social, environmental and corporate issues, in ways that are consistent with shareholder values. The objective of reo® is to encourage investee companies to enhance their business performance by adopting better corporate governance, social and environmental practices. reo® does not entail taking a view of acceptability of what investee companies do nor does it lead to exercising a significant influence over the management of such companies, reo® is about using BAML ability, as manager of the Fund's equity and bond Portfolios, to encourage investee companies, through a constructive dialogue, to behave more responsibly with regard to corporate governance, social and environmental practices. In BAML's view, reo® may contribute towards business success and therefore increase the value of the investee companies' shares and consequently the value of the Fund's investments. More information on reo® and the specific companies engaged via the reo® service is available in the semi-annual engagement activity report on the BMO Global Asset Management website.

21. APPROVAL OF THE FINANCIAL STATEMENTS

The Board approved the financial statements on 14 December 2021.

BMO Investments (Lux) I Fund Risk Management, Remuneration and PEA Eligible Assets (unaudited)

RISK MANAGEMENT Global exposure calculation method

The commitment approach

The following Portfolios use the commitment approach in order to monitor and measure their global exposure:

BMO European Growth & Income Fund BMO European Smaller Companies Fund BMO Eurozone Equity Fund BMO Global Convertible Bond Fund BMO Global Smaller Companies Equity Fund BMO Plus II Fund BMO Responsible Euro Corporate Bond Fund BMO Responsible Global Emerging Markets Equity Fund BMO Responsible Global Equity Fund BMO SDG Engagement Global Equity Fund BMO Sustainable Opportunities European Equity Fund BMO US Smaller Companies Fund

The VaR approach

The following portfolios use an Absolute Value-at-Risk ("VaR") approach in order to monitor and measure their global exposure:

BMO Diversified Growth Fund BMO Global Absolute Return Bond Fund BMO Global Total Return Bond Fund BMO Sustainable Multi-Asset Income Fund

The VaR figures have been calculated based on the following input data and confidence interval:

Confidence interval	99%
Analysis time horizon	One month (20 days)
Time series extension	1 Year
Methodology	Absolute VaR
VaR method	Historical Simulation
CSSF Limit	20%

The utilisation of the VaR from 01 October 2020 to 30 September 2021 was as follows:

BMO Diversified Growth Fund	VaR Amounts	Utilisation of the VaR Limit
Minimum	2.65%	13.25%
Maximum	14.64%	73.20%
Average	7.69%	38.43%

The average leverage used, computed with sum of notionals, was 219.72%.

BMO Global Absolute Return Bond Fund	VaR Amounts	Utilisation of the VaR Limit
Minimum	0.59%	2.95%
Maximum	5.57%	27.85%
Average	2.61%	13.06%

The average leverage used, computed with sum of notionals, was 356.54%.

BMO Global Total Return Bond Fund	VaR Amounts	Utilisation of the VaR Limit
Minimum	0.66%	3.30%
Maximum	6.64%	33.20%
Average	3.06%	15.31%

BMO Investments (Lux) I Fund Risk Management, Remuneration and PEA Eligible Assets (unaudited) (continued)

The average leverage used, computed with sum of notionals, was 363.50%.

BMO Sustainable Multi-Asset Income Fund	VaR Amounts	Utilisation of the VaR Limit
Minimum	2.29%	11.45%
Maximum	14.47%	72.35%
Average	6.59%	32.94%

The average leverage used, computed with sum of notionals, was 127.11%.

The following portfolio use a Relative Value-at-Risk ("VaR") approach in order to monitor and measure their global exposure:

BMO Euro Bond Fund

The VaR figures have been calculated based on the following input data and confidence interval:

Confidence interval	99%
Analysis time horizon	One month (20 days)
Time series extension	1 Year
Methodology	Relative VaR
VaR method	Historical Simulation
CSSF Limit	200%

The utilisation of the VaR from 01 October 2020 to 30 September 2021 was as follows:

BMO Euro Bond Fund	VaR Amounts	Utilisation of the VaR Limit
Minimum	89.89%	44.95%
Maximum	126.61%	63.31%
Average	109.28%	54.64%

The average leverage used, computed with sum of notionals, was 19.67%

BMO Investments (Lux) I Fund Remuneration and PEA Eligible Assets (unaudited)

REMUNERATION POLICY

FundRock Management Company S.A.

FundRock Management Company S.A. (the "Management Company") has established and applies a remuneration policy in accordance with the ESMA Guidelines on sound remuneration policies under the UCITS V Directive (ESMA 2016/575) and AIFMD (ESMA 2016/579) and any related legal & regulatory provisions applicable in Luxembourg. The remuneration policy is aligned with the business strategy, objectives, values and interests of the Management Company and the funds that it manages and of the investors in such funds, and which includes, inter alia, measures to avoid conflicts of interest; and it is consistent with and promotes sound and effective risk management and does not encourage risk taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the funds that the Management Company manages.

As an independent management company relying on a full-delegation model (i.e. delegation of the collective portfolio management function), the Management Company ensures that its remuneration policy adequately reflects the predominance of its oversight activity within its core activities. As such, it should be noted that the Management Company's employees who are identified as risk-takers under UCITS V are not remunerated based on the performance of the funds under management.

A paper version of the remuneration policy is made available free of charge to investors at the Management Company's registered office.

The amount of remuneration for the financial year ending 31 December 2020 paid by the Management Company to its staff:

EUR 12,070,862 Fixed remuneration: EUR 11,288,396 Variable remuneration: EUR 782,466

Number of beneficiaries: 133

The aggregated amount of remuneration for the financial year ending 31 December 2020 paid by the Management Company to Identified staff/risk takers is as follows:

Identified staff/risk takers: EUR 1,948,900

The total amount of remuneration is based on a combination of the assessment of the performance of the individual, the overall results of FundRock, and when assessing individual performance, financial as well as non-financial criteria are taken into account.

The Policy is subject to annual review by the Compliance Officer and the update is performed by HR department of FundRock and is presented for review to the Remuneration Committee and approval by the board of directors of the Management Company.

BMO Group (below note refers to BMO Group only)

In accordance with the UCITS V Directive, the Investment Managers to the Fund have adopted a remuneration policy which is consistent with the remuneration principles applicable to UCITS management companies and aligned with the BMO Global Asset Management (EMEA) Remuneration Policy. The size of the BMO Group (the "Group") and the size of the funds it manages, the internal organisation and the nature, the scope and the complexity of their activities have been taken into consideration in this disclosure.

Remuneration policy

The purpose of the Group's remuneration policy is to describe the remuneration principles and practices within the Group and for such principles and practices:

(a) to be consistent with, and promote, sound and effective risk management;

(b) to be in line with the business strategy, objectives, values and interests of the Group;

(c) not to encourage excessive risk-taking as compared to the investment policy of the relevant sub-funds of the Group;

(d) to provide a framework for remuneration to attract, motivate and retain staff (including directors) to which the policy applies in order to achieve the objectives of the Crown and

order to achieve the objectives of the Group; and

(e) to ensure that any relevant conflicts of interest can be managed appropriately at all times.

Decision making and governance

The board of directors (the Group's Board) is responsible for the remuneration policy of the Group and for determining the remuneration of the directors of the Group and other staff who undertake professional activities for the Group. The Group's Board has delegated to the Risk and Remuneration Committee (the "Committee") of BMO Asset Management (Holdings) plc (formerly F&C Asset Management plc) responsibility for maintaining a compliant remuneration policy. The Committee solely comprises non-executive directors of BMO Asset Management (Holdings) plc. The Group's Board has adopted the remuneration policy applicable to all members of the Group ("BMO Global Asset Management (EMEA)") for this financial year as reviewed and approved by the Committee periodically (at least annually). The Committee is responsible for, and oversees, the implementation of the remuneration policy in line with the UCITS Regulations. The Group's Board considers that the members of the Committee have appropriate expertise in risk management and remuneration to perform this review.

BMO Investments (Lux) I Fund Remuneration and PEA Eligible Assets (unaudited) (continued)

Applicability

The remuneration policy, which incorporates compliance with UCITS V requirements, applies to staff whose professional activities have a material impact on the risk profile of the Group or of the funds it manages ("Identified Staff") and so covers:

a) senior management;

- b) risk takers;
- c) control functions; and

d) employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profile of the Group.

The Identified Staff list and the selection criteria above are subject to regular review (at least annually) by the Committee as well as formally reviewed in the event of significant organisation changes and changes in remuneration regulations the Group is subject to.

Linking remuneration with performance

The Group's remuneration policy is part of the BMO Global Asset Management (EMEA) framework for promoting sound remuneration management, with the objective of providing total compensation to its employees that is warranted by corporate, business unit/function and individual performance and is comparable to market competitors, whilst being consistent with and promoting sound and effective risk management and the achievement of fair outcomes for all customers. Its purpose is to facilitate achievement of the business objectives and corporate values of the Group, with the primary focus on clients, whilst ensuring that BMO Global Asset Management (EMEA) is able to attract, retain and motivate the key talent required to achieve these business objectives and corporate values without incentivising excessive or inappropriate risk.

When setting remuneration levels, the following components and principles form part of the remuneration management framework:

- Fixed remuneration is determined taking into account factors including the requirements of the particular role and the staff
 member's experience, expertise, contribution level and the fixed pay for comparable roles. Fixed remuneration is set, with
 reference to market data, at a level that is sufficient to attract high calibre staff as well as to permit the operation of a fully-flexible
 remuneration policy (including the possibility of a staff member receiving reduced or no variable remuneration in a particular year).
 The Committee keeps the balance between fixed and variable remuneration under review.
- Variable remuneration is determined annually by reference to both financial and non-financial company performance considerations. External competitor practices are included in the funding review to ensure compensation opportunities in the markets within which the Group operates are given due consideration and retention risks are effectively managed. Incentive funding is developed in view of current and projected economics and risks, supported by BMO Global Asset Management (EMEA) Audit and Compliance Committee inputs, ensuring risk-adjustments and qualitative and quantitative considerations, such as the cost and quantity of capital and liquidity are actively considered as funding adjustments. The Committee ensures that all incentive awards are not paid through vehicles or methods that facilitate the avoidance of the requirements with regard to remuneration imposed by applicable law and/or regulations.
- Variable remuneration is allocated to respective business functions by reference to:
 - · contribution of the respective business function or unit to corporate performance;
 - business function performance relative to pre-determined targets and objectives, including adherence to risk management obligations; and
 - competitive market pay data.

Individual award allocations are referenced to the individual achievement during the performance year relative to pre-agreed objectives and assessment of market comparability. Performance is assessed in relation to pre-agreed objectives, which include financial and non-financial goals (including the achievement of fair customer outcomes), compliance with the BMO Group's policies and procedures, adherence to risk management and compliance requirements and the BMO Code of Conduct. The assessment of performance for Identified Staff reflects multi-year performance in a manner appropriate to the life-cycle of the funds that are managed by the Group.

 Application of Financial Conduct Authority's Handbook (SYSC 19E: UCITS Remuneration Code) pay-out process rules, save for disapplication at individual or Group level, which is determined by an annual proportionality assessment.

Quantitative remuneration disclosure

The total remuneration paid by BMO Fund Management Limited to its staff is zero, as all UCITS staff are employed by other companies in BMO Global Asset Management (EMEA).

BMO Investments (Lux) I Fund Remuneration and PEA Eligible Assets (unaudited) (continued)

The table below provides an overview of aggregate total remuneration paid to UCITS Identified Staff in respect of the proportion of their pay aligned to their UCITS responsibilities. It is not possible to apportion remuneration by individual Identified Staff working a specific UCITS fund, therefore figures are provided in aggregate on a UCITS management company basis.

	Headcount	Fixed Remuneration (£m)	Variable Remuneration (£m)	Total Remuneration (£m)
BMO Fund Management Limited Remuneration of UCITS Identified Staff				
of which:	52	0.50	1.41	1.91
Senior Management	16	0.11	0.33	0.44
Other Code Staff	36	0.39	1.08	1.47

Notes on the quantitative remuneration disclosure

Total remuneration reported is the sum of salary, cash bonus, any deferred annual bonus, value of any long-term incentive awards granted in respect of performance in the reportable financial year, plus the value of any applicable cash allowances.

"Senior Management" are defined in this table as the UCITS Directors, Executive and Non-Executive Directors and Group Management Team members of BMO Global Asset Management. "Other Code Staff" includes all other identified Code staff in business areas, internal control functions and corporate functions.

The Identified Staff disclosure represents total compensation of those staff who are fully or partly involved in the activities of the UCITS funds, apportioned to the estimated time relevant to the UCITS or to the amount attributable to the UCITS allocated on an AUM basis.

PEA ELIGIBLE ASSETS

The following Portfolios were eligible, up to 15 July 2021, for inclusion in a personal equity plan ("plan d'épargne en actions" or "PEA") in France:

BMO European Growth & Income Fund (87.75% of invested in eligible assets as at 15 July 2021) BMO European Smaller Companies Fund (87.51% of invested in eligible assets as at 15 July 2021) BMO Sustainable Opportunities European Equity Fund (90.29% of invested in eligible assets as at 15 July 2021)

These Portfolios invested more than 75% of their assets in PEA eligible assets* as at 15 July 2021.

* Eligible PEA Assets are: (i) shares or investment certificates in companies and investment certificates in cooperative bodies, (ii) units in limited liability companies or equivalent companies (i.e. units not tradable and not listed) and units in companies governed by the French Law No. 47-1775 of 10 September 1947 relating to cooperative bodies, and (iii) subscription rights or warrants for shares/units mentioned in (i) and (ii) above.

BMO Investments (Lux) I Fund Portfolio Turnover Ratio (unaudited)

The Portfolio Turnover Ratio have been calculated for the year ended 30 September 2021 based on the following formula:

PTR=	(Total purchases + Total sales) - (Total subscriptions + Total redemptions)	x 100
1 117-	Average net assets of the Portfolio	X 100

Portfolio	Portfolio Currency	Total Net Assets, average during the year	Portfolio Turnover Ratio as of 30 September 2021 (annualised) %

* Refer to Appendix I.
** BAML replaced BMO Portugal,Gestão de Patrimónios, S.A. as investment manager to BMO Plus II Fund on 28 May 2021. Until this date, Investment Management Fees of 1.30% were accrued and paid to BMO Portugal,Gestão de Patrimónios, S.A. to account for a 4% stamp duty levied by the Portugal Tax Authority on investment management fees.

Performance fees are not applicable and therefore not included within the TER.

For share class launched during the year (refer to Appendix I), the operating expenses incurred up until the year end have been annualised to provide a more comparable estimate of the TER for the share class.

Global data

The following table details the market value of securities lent as a proportion of the relevant Portfolio's total lendable assets and Net Assets, and the value of Total Return Swaps ("TRS") as a proportion of the Portfolio's Net Assets, as at 30 September 2021. Total lendable assets represents the total market value of the securities portfolio excluding derivatives as at the reporting date. The value of TRS is based on the Unrealised Gain/(Loss) on an absolute basis.

			TRS			
Portfolio	Portfolio currency	Market value of securities lent	% of lendable assets	% of Net Assets	Unrealised profit/loss	% of Net Assets
BMO Diversified Growth Fund	EUR	592,615	0.56%	0.48%	58,321	0.05%

The above maturity tenor analysis has been based on the contractual maturity date of the securities lent, and of the relevant TRS transaction.

The following table provides an analysis of the non cash collateral received for the securities lending transactions and OTC by clearing mechanism indicating as well the triparty agent and the bilateral, as at 30 September 2021:

	Security lent non cash collateral received	OTC non cash collateral received
Triparty		
JP Morgan Chase Bank	4,572,730	-
Bank of New York	13,681,041	-
Total	18,253,771	-
bilateral	27,847,041	-

Data on reuse of collateral

As at 30 September 2021, none of the cash collateral received in respect of OTC derivative transactions (including TRS) was re-invested. In respect of securities lending transactions, the Fund does not accept cash collateral in the securities lending program.

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Safekeeping of collateral

The following table provides an analysis of the amounts of non-cash collateral received by the Portfolios in respect of securities lending transactions and OTC derivatives transactions (including TRS) and held by the Funds' Depositary (or through its delegates) or through a third party Depositary, as at 30 September 2021:

Data on return and cost

For the securities lending transactions the breakdown of return and cost by portfolio is disclosed in the Notes. Please refer to the note "Securities lending".

All returns from OTC derivative transactions (including TRS) will accrue to the Portfolio and are not subject to any returns sharing agreement with the Portfolio's manager or any other third parties.

For TRS transactions costs are not separately identifiable. For these investments, transaction costs are included in the purchase and sales price and are part of the gross investment performance of each Portfolio. Returns are identified as the realised gains and change in unrealised appreciations on swaps contract during the reporting period.

SFDR Periodic Disclosure

Product name/legal identifier: BMO Responsible Euro Corporate Bond Fund

Reference period: 01 October 2020 to 30 September 2021

The Portfolio promotes environmental or social characteristics and, while it did not have as its objective a sustainable investment Portfolio, it had a proportion of investments in <u>companies that provide sustainability</u> <u>solutions or that otherwise make a positive contribution to society or the environment</u>. The criteria for these investments may not fully equate to the criteria for sustainable investments under evolving regulations. Due to the widespread lack of available data and regulatory uncertainty, the Portfolio is not yet in a position to confirm the degree of Taxonomy alignment of its sustainable investments with an environmental objective.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To ensure that the environmental and/or social characteristics promoted by the Portfolio are met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy:

- Avoid The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.
- **Invest** The Investment Manager additionally invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.
- **Improve** The Investment Managers engage with the companies that the Portfolio invests in on significant ESG issues with most relevance to their business, to reduce risk, improve performance, encourage best practice, and underpin long-term investor value. The Investment Manager believes that this active ownership is part of our duty as an investor acting in the best interests of our clients, and as a participant in the global financial system. An independent Responsible Investment Advisory Council (RIAC) works with the RI and investment team to provide input on key ESG trends and engagement priorities.

The E/S characteristics promoted by the Portfolio have been met through the implementation of the "Avoid, Invest, Improve" philosophy across all corporate holdings in the Portfolio. This consists of a set of clearly defined exclusions that reflect our minimum ESG standards, a robust governance system to ensure ESG risks are identified and managed in investors' best interest throughout the investment process, and a systematic engagement process that uses our position as stewards of capital to drive positive change.

Avoid

The Portfolio follows the Investment Manager's Responsible Investment philosophy which excludes certain companies from being held in the Portfolio. All holdings have been screened by the Investment Manager's Responsible Investment team and, as a result of the policies applied, a number of companies that fail to meet minimum environmental, or socials standards are excluded. A full list of exclusion criteria can be found at the webpage below.

hiips://www.bmogam.com/uploads/2021/05/b4fda90e402c53e33c96e125d360cd81/responsible-investmentstrategies-summary-criteria.pdf

These screens have been applied to all portfolio assets other than Cash, Forward FX, Exchange Traded Futures, OTC Derivatives.

Minimum safeguards were applied. All trading counterparties for derivative instruments and cash deposits must be approved by our Counterparty Credit Committee. This approval process uses a rating model which informs our overall assessment of each trading bank, and which distinctly accounts for ESG factors within the rating process. ESG factors make up approximately 10% of the counterparty assessment, and the lowest scoring banks are automatically flagged for further assessment by the Committee. This process ensures that banks who have weak ESG scores are excluded from our approved list.

Over the year, 2 companies have been re-rated from Acceptable to Unacceptable under our screening criteria and consequently been sold from the Portfolio.

- 1) Microsoft: breaches the Responsible Funds' weapons-related criteria
- 2) HSBC: breaches the Responsible Funds' conduct-based criteria

Invest -

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

The Investment Manager invests a proportion of its assets in companies that it considers to be sustainability leaders and that otherwise contribute substantially to achievement of the UN Sustainable Development Goals.

The Portfolio additionally invests a proportion of its assets in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. This investment is primarily (but not exclusively) achieved through investment in green, sustainable or sustainability-linked bonds issued by companies (so called "Labelled Bonds"). All Labelled Bonds must be individually assessed by the Investment Manager's Responsible Investment team, which considers the impact on society and/or the environment or the materiality of the sustainability target before they are Approved for investment. The Portfolio currently holds 28% of NAV in Labelled Bonds.

For a Labelled Bond¹ to be eligible for investment during the reference period, it must have satisfied the below criteria:

Substantially contributes to sustainable objectives:

Use of proceeds: We require the issuer to provide clear detail on the nature of projects and investments that will be made using the bond's proceeds. We require the proceeds to be used in key environmental project categories. These are:

- 1. Renewable energy and transmission
- 2. Alternative fuels
- 3. Energy efficiency
- 4. Clean transport
- 5. Biodiversity conservation
- 6. Sustainable waste management
- 7. Water
- 8. Green buildings
- 9. Sustainable land use (forestry and agriculture)

Other Criteria:

- Whether the issuance sufficiently meets the IMCA's Green Bond Principles (GBP), Social Bond Principles (SBP), Sustainability Bond Guidelines (SBG) and Sustainability-Linked Bond Principles.
- Project evaluation and selection: We require the issuer to provide in the prospectus or other disclosures criteria and process for selecting projects/investments.

¹ Labelled bond criteria as per our internal policies which are subject to change

- Management of proceeds: We require the issuer to establish and disclose process to segregate proceeds.
- Reporting: We require issuers to report on how the proceeds have been used. This should be done in a timely fashion (good practice is within a year of the issuance). Where appropriate, issuers should strive to provide project-by-project detail. Best practice in this area includes project-by-project impact reporting as provided by the European Investment Bank.

Does no Significant Harm (including good governance):

We assess:

- The issuer's ESG Risk Rating and MSCI ESG industry percentile supplemented with detailed analysis for poorly rated stocks.
- The number and nature of red flags and controversies

We exclude companies with:

- Very poor overall ESG management that presents a serious risk to the integrity of the Portfolio
- Severe environmental or financial management issues that undermine our confidence in the issuer's ability to fulfil its Green Bond commitments (e.g. major controversies related to management of environmental projects such as renewables; major controversies in environmental lending means we are not confident in their green projects abilities).

Improve

By encouraging companies to move towards best practice in the management of ESG issues instead of simply excluding them from the investable universe, we believe we will achieve superior ESG results for our clients and society overall. Our engagement encompasses a broad spectrum of ESG issues, covering companies across sectors and geographies. Generally, our model is to use confidential dialogue with a view to establish trust and developing a partnership with the company to achieve goals; however, we may express our views publicly if this dialogue is not progressing. Our engagement process is built around four key pillars:

- Objective setting: setting specific engagement objectives is necessary to track results, assess achievements and determine next steps. Our RI team takes the lead in developing objectives, but it does this in close consultation and collaboration with investment teams to ensure consistency of messages to companies. We aim to clearly communicate engagement objectives, expectations and desired measures of success to companies upfront.
- Tracking results: we log and report activity in real time in an online engagement database. This includes engagement activity, method of engagement, company response and instances of change. We track both progress of engagements (at issue-level with a company) and record cases where we have delivered engagement success or milestones. Our engagement and milestone entries aim to capture the narrative around materiality and impact of the progress made by the company.
- Escalation: if we deem initial engagement efforts to be unsuccessful, we will consider following escalation strategies such as contacting the board, using voting, filing a resolution, and reducing exposure or divesting.
- Reporting: we report publicly on our active ownership activities on an annual basis via our Responsible Investment Review

Please see the attached table for a detailed breakdown of our engagement activity. Here we highlight two of our engagements with companies held in the Portfolio, and the outcomes achieved.

Smurfit Kappa

We met the board chair to discuss the governance of the company and company specific sustainability issues and how the board oversaw the operations during the COVID pandemic. The chair has served on the board nine years, albeit only as the chair for two. There has been a high level of refreshment in recent years and we discussed plans for his refreshment in light of UK Governance Code best practice recommendations. We also sought to better understand how the board oversees pertinent sustainability issues within the company and the reporting around that process.

A sustainability committee was established last year which is still being bedded into the process. The company is in the process of establishing a science-based target for emissions reduction. We had previously requested that the company signs up to providing disclosure under the Workforce Disclosure Initiative. We followed up on this request providing additional context as to why we consider this important for stakeholder transparency. A further meeting has been requested with the sustainability team to carry out a deeper dive into sustainability management within the company.

Tesco

We held a call with the company's heads of environment and responsible sourcing to discuss its response to deforestation linked to commodities sourcing. The company has received negative coverage from Greenpeace messaging that it is linked to deforestation of the Amazon, though the link appears to be that it sources from two UK subsidiaries to a Brazilian meat producer. These provide meat produced in the UK and Ireland, as the company stopped sourcing meat from Brazil in 2018.

The company however recognises the link to deforestation due to soy as animal feed and tries to affect change through multiple levers such as collaborating in industry initiatives and building capacity with suppliers to implement better control of the supply chain. It has no direct business relationship with the multinational trading companies but is in dialogue through the collaborative forums. It has signed up to the UK Soy Manifesto committing to only source deforestation and conversion-free soy, but believes certifications need to improve and sees legislation on due diligence as a key component. Innovation by suppliers is key and the company supports this through an incubator programme.

Methodology: weight of each issue/issuer held at end of each quarter, averaged by the number of quarters the issue/issuer was held. E.g., if an issue was bought at the end of the period, say September, it will be averaged over 1 quarter to give an accurate reflection of the size it represented in the portfolio.

To which sustainable objectives did the investments contribute to and how did they not cause significant harm?

The Portfolio includes investments which contribute significantly to addressing sustainability challenges as defined by the UN Sustainable Development Goals.

Illustration: Breakdown of Portfolio by contribution to UN SDGs

NOTE: Data as of 30 December 2020.

The SDGs most represented remain SDG8 – Decent Work and Economic Growth and SDG9 – Industry, Innovation and Infrastructure. Retail banking and insurance services support target 8.10, which aims for universal access to finance – examples being insurers Axa and Aviva. SDG9 links to several business lines including loans to small and medium-sized businesses, supporting target 9.3 on financial services to small enterprises.

Clean energy is also a key focus area, with 12% of the portfolio linking to SDG7 – Affordable and Clean Energy. This includes a number of investments in green bonds. At the end of 2020, green and social bonds made up 20% of the Portfolio overall.

Just over 15% of business activities undertaken by the companies in the portfolio have no specific SDG link. This includes some of the wealth management divisions of the banks we invest in, as well as companies such as retailers where there is no direct SDG link, but we are satisfied that there are good sustainability management standards.

Some of the activities of our portfolio companies may conflict with certain SDGs, with these negative links also shown in the chart. For instance, the Portfolio invests in utility companies with strong climate strategies, but some of these also have a proportion of fossil fuel power generation.

In this Portfolio, we have investments in companies focused on sustainability opportunities, and have also expanded our focus on green bonds to include social and sustainability bonds.

We participated in a sustainability bond from NatWest Group, where the proceeds were earmarked for both green and social projects, such as affordable housing. We also participated in a social bond from Pearson that is being used for projects that target underserved learners and communities, aligning with SDG4 – Quality Education. Corporate issuance into all these types of bonds has been hitting record levels – a trend which we expect to continue.

Alongside this we also invest in a number of companies who we consider to be sustainability leaders. These include Thermo Fisher Scientific, Smurfit Kappa and Munich Re. Thermo Fisher Scientific are a global provider of high-quality, innovative life sciences equipment and services which enhance accuracy and safety in clinical research, drug development, and diagnostics testing. As one of the largest paper-based packaging companies in the world, Smurfit Kappa is providing a sustainable alternative to plastics. It uses 75% recycled raw materials, and its products are recyclable, contributing to a circular economy. Finally, re-insurer Munich Re was a pioneer in analysing the physical impacts of climate change, and how these will impact on the economy and society. Its insurance products enable customers to protect themselves financially against the worst impacts.

The Investment Managers' overall approach to the integration of sustainability risks at all points in the investment cycle serve to mitigate the risks of significant harm. For example, the Investment Manager also considers principal adverse impacts of sustainability factors in its investment decision making process and will make detailed disclosures of those impacts in compliance with the required timing under SFDR.

The "avoid" element of the Portfolio's sustainability criteria are aligned with (and the remaining elements of the criteria consider) the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organization on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

The "Invest" section above also details our criteria for investment in Labelled Bonds, which includes negative screening for significant harm.

Alignment with the EU Taxonomy?

Of the sustainable investments made by the Portfolio, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the Portfolio that are aligned with the EU Taxonomy. The investments underlying the remainder of the Portfolio do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What was the proportion of investments that were not aligned with the products E/S characteristics?

The E/S criteria of the Portfolio do not apply to Cash, Forward FX, Exchange Traded Futures, OTC Derivatives.

As a result, on average, 5.7% of the net asset value of the Portfolio has not been screened for alignment with the Portfolio's E/S characteristics.

As above, all trading counterparties for derivative instruments and cash deposits must be approved by our Counterparty Credit Committee. This approval process uses a rating model which informs our overall assessment of each trading bank, and which distinctly accounts for ESG factors within the rating process. ESG factors make up approximately 10% of the counterparty assessment, and the lowest scoring banks are automatically flagged for further assessment by the Committee. This process ensures that banks who have weak ESG scores are excluded from our approved list.

SFDR Periodic Disclosure

Product name/legal identifier: BMO Responsible Global Emerging Markets Equity Fund

Reference period: 01 October 2020 to 30 September 2021

The Portfolio promotes environmental or social characteristics and, while it did not have sustainable investment as its objective, it had a proportion of <u>investments in companies that provide sustainability solutions or that</u> <u>otherwise make a positive contribution to society or the environment</u>. The criteria for these investments may not <u>fully equate to the criteria for sustainable investments under evolving regulations</u>. Due to the widespread lack of available data and regulatory uncertainty, the Portfolio is not yet in a position to confirm the degree of Taxonomy alignment of its sustainable investments with an environmental objective.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To ensure that the environmental and/or social characteristics promoted by the Portfolio are met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy and has satisfied these as below:

• **Avoid** – The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.

All companies held in the portfolio satisfied the Portfolio's minimum criteria prior to investment.

Conduct and product-based exclusion screens have been applied to all portfolio assets other than cash. We aim to fully invest the portfolio with cash levels typically below 5%.

• **Invest** – The Investment Manager invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

Within the underlying investments, 97% demonstrate a greater than 50% of revenue alignment with sustainable themes.

• Improve – The Investment Managers engage with the companies that the Portfolios invest in on significant ESG issues with most relevance to their business, to reduce risk, improve performance, encourage best practice, and underpin long-term investor value. The Investment Managers believe that this active ownership is part of our duty as an investor acting in the best interests of our clients, and as a participant in the global financial system. An independent Responsible Investment Advisory Council (RIAC) also works with the RI and investment team to provide input on key ESG trends and engagement priorities.

Over the previous year the Portfolio had 69 investee company engagements, representing:

- 31 companies engaged across 14 countries
- 82% of portfolio assets

• 22 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our engagement objective

Engagement priorities during the period included climate change, specifically carbon emissions management and adaptation and resilience; board independence and effectiveness; ESG oversight and reporting; and gender diversity.

We voted at 100% of our shareholder meetings in line with our Corporate Governance Guidelines.

To which sustainable objectives did investments contribute to and how did they not cause significant harm?

The Portfolio includes investments which contribute significantly to address sustainability challenges as defined within our responsible investment and fund policies. The BMO Responsible Global Emerging Markets Strategy looks to invest in companies that help address sustainability challenges across the emerging world, both through their products and services as well as their own operations while satisfying minimum standards related to the sustainability of their operations and governance.

Below is a breakdown as a percentage of NAV the proportion of the Portfolio that had or will have greater than 50% of revenues positively aligned with sustainable themes within the next 3 years¹:

- 11% Food and nutrition
- 28% Health and wellbeing
- 26% Responsible finance
- 4% Sustainable infrastructure
- 28% Technological innovation

Examples of key investments and how they contributed to a sustainable objective are as below:

TSMC (8.2%) >50% revenue linked to Technological Innovation

¹ The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

TSMC is the market leader in its industry both from a technological perspective and also from market share perspective. It has a market share of 52% of the foundry industry. TSMC is contributing to the technological innovation objective by bringing down the cost of technology. It is doing this by investing in newer and better semiconductor chips that are as efficient if not more than the previous versions at a cheaper cost per node. Semiconductor chips are found in thousands of electronic products such as computers, smartphones and appliances,

Tencent (7.6%) - 22% revenue linked to technological innovation, 28% revenue linked to responsible finance

Tencent provides internet and mobile value-added services (VAS), online advertising, online gaming, and ecommerce transactions. 22% of Tencent's company revenue is linked to technological innovation, delivering technological and connectivity solutions to advance sustainable development. 28% of Tencent's revenue is linked to responsible finance including by empowering SME's through its ad and fintech operations. Through fintech/social networks Tencent provides frictionless connection between various parties. For example, allowing SME's access to finance, individuals communicating between one other and new innovations such as wedoctor a healthcare platform. More broadly speaking digitalisation has substantially improved the quality and efficiency of life and production. One of the main tenets of this investment case is the super-app Weixin which connects 1.2bn user globally that enables to do many functions from chatting to shopping to paying bills to running a business to seeking medical advice..

HDFC Bank (4.9%) >50% revenue linked to responsible finance

More than 50% of HDFC bank's revenues are linked to providing financial services to advance financial inclusion SME development, green finance and sustainable financial markets. HDFC Bank is a leading provider of Consumer Finance in India with dominant positions in all key consumer segments e.g. personal loans and credit cards. HDFC bank is committed to increasing financial inclusion both from a CSR perspective but also by developing technologies to amplify the reach of its service and operations in educating and enhancing offerings to existing and new clients. It's sustainable livelihoods programme has brought access to financial services to over 10 million new customers in underbanked parts of the population. It announced a commitment to become carbon neutral in its direct operations by 2032 and Fossil fuel-related financing accounts for only a small percentage of financing portfolio. HDFC bank also has a Social and Environmental management system in place to assess ESG factors in large corporate lending transactions.

We balance our investment in sustainable themes with due diligence and screening criteria to avoid harmful practices which are counter to sustainability objectives. As confirmed above, all holdings in the portfolio have undergone the following due diligence:

1. Compliance with Exclusion Criteria

The "avoid" element of the Portfolios' sustainability criteria assess company conduct and are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labor Organization on Fundamental Principles and Rights at Work and the International Bill of Human Rights. In addition, the Portfolio excludes harmful products such as alcohol, gambling, nuclear power generation, tobacco and weapons. The Portfolio also excludes companies with oil, gas and coal reserves.

2. Minimum governance and sustainability standards

The Portfolio invests in companies that meet high sustainability standards in how they operate, based on an assessment of their policies and performance with respect to overall management of material environmental and social risks, opportunities and impacts. We expect companies to have an approach to managing these issues commensurate with the magnitude of the potential impacts of their operations.

Companies are also required to comply with minimum corporate governance standards across the three areas of board balance and independence, transparency and disclosure, and shareholder rights as detailed below. Standards in each jurisdiction are established usually by voluntary codes of corporate governance or by regulatory requirements, e.g. company law, listing requirements. We assess companies' practices against those standards that are stricter, whether voluntary or mandatory.

- i) Board balance, independence and diversity: The Investment Manager will require companies meet best practice standards of board composition, including independence and diversity, as well as committee composition, specific to their countries of domicile. These are usually defined in local codes of corporate governance and/or listing governance standards. Please refer to Appendix I for a definition of director independence and a list of countries and their recommended minimum board independence standards.
- ii) Transparency and Disclosure: Boards should publish an annual report, post it on the company website, and clearly disclose basic information on its corporate governance practices indicating board composition, committee membership, and how internal controls have been evaluated. Director biographical information should be available for investors to evaluate director competence and independence. Companies should also disclose their ownership structure, including disclosure of any parties with a significant ownership stake. Failure to disclose any of the above constitutes an automatic breach of the governance standard. Companies should also comply with local standards on sustainability reporting.
- iii) Shareholder Rights: In most cases, the Investment Manager will look for companies to have a single class of voting shares. In some cases, companies will retain multiple classes of stock. In these cases, we will review and assess the rights assigned to the different share classes, including for example voting rights or tag-along rights to be extended in the case of a take-over. The retention of a poison pill, or a history of abuse of shareholder rights will be viewed as automatic breaches of the governance standard. Indicators of a history of abuse triggering a breach might include: disregard for tag-along rights during a change of control, excessively dilutive share issuances, or inappropriate related-party transactions.

3. Due Diligence

Beyond a written commitment, the investment manager will also investigate if the proposed companies have been the subject of serious or ongoing concerns over poor corporate governance or unsustainable business practices. Examples of this might include abuse of shareholder rights, fines or lawsuits linked to corruption, market abuse, environmental pollution, or human rights and labour standards abuses.

Where due diligence unearths evidence of unsustainable or unethical business practices, a company will need to demonstrate responsiveness to the concerns and targets or progress in addressing them to be eligible for inclusion in the Portfolio. As part of its assessment, the investment manager will evaluate the adequacy of measures taken by the company to respond to the issue(s) identified, whether they are recurrent or one-off incidents, and the scale of any impacts from the issue(s). If relevant, the investment manager will design an engagement plan to encourage positive change.

Do Portfolio holdings align with the EU Taxonomy?

Of the sustainable investments made by the Portfolio, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the Portfolio that are aligned with the EU Taxonomy. The investments underlying the remainder of the Portfolio do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What was the proportion of investments that were not aligned with the products E/S characteristics?

The E/S criteria of the Portfolio do not apply to cash.

As a result, on average, 3.06% of the net asset value of the Portfolio has not been screened for alignment with the Portfolio's E/S characteristics.

SFDR Periodic Disclosure

Product name/legal identifier: BMO Responsible Global Equity

Reference period: 01 October 2020 to 30 September 2021

The Portfolio promotes environmental or social characteristics and, while it did not have sustainable investment as its objective, it had a proportion of investments in <u>companies that provide sustainability solutions or that</u> <u>otherwise make a positive contribution to society or the environment</u>. The criteria for these investments may not fully equate to the criteria for sustainable investments under evolving regulations. Due to the widespread lack of available data and regulatory uncertainty, the Portfolio is not yet in a position to confirm the degree of Taxonomy alignment of its sustainable investments with an environmental objective.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To ensure that the environmental and/or social characteristics promoted by the Portfolio are met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy:

- Avoid The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.
- **Invest** The Investment Manager invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.
- **Improve** The Investment Managers engage with the companies that the Portfolios invest in on significant ESG issues with most relevance to their business, to reduce risk, improve performance, encourage best practice, and underpin long-term investor value. The Investment Managers believe that this active ownership is part of our duty as an investor acting in the best interests of our clients, and as a participant in the global financial system. An independent Responsible Investment Advisory Council (RIAC) works with the RI and investment team to provide input on key ESG trends and engagement priorities.

In addition, the investment restrictions of the Portfolio also embed the following environmental and social criteria:

Full disclosure of exclusionary criteria can be found at:

hiips://www.bmogam.com/uploads/2021/05/b4fda90e402c53e33c96e125d360cd81/responsible-investmentstrategies-summary-criteria.pdf

These screens have been applied to all portfolio assets other than cash, cash equivalents and hedging assets, unless otherwise stated.

The Portfolio has met these characteristics to the extent set out below.

The Portfolio avoids companies with unsustainable practices/products whilst prioritising investment in companies that address sustainability challenges. The Portfolio's primary focus is to invest positively, in sustainability leaders and solution providers. We find a rich source of ideas comes from considering long-term social and environmental themes which provide a mental framework for idea generation. This allows the identification of companies whose products and services have a clear "A.I.M." (Additionality, Intentionality, Materiality):

- Additionality: To what extent is the company a sustainability innovator, rather than a follower? Are the products and services truly innovative and making a real-world impact on society/environment? Here we focus on and evidence the Portfolio's exposure through our view of high quality, wide moat businesses.
- Intentionality: How core is sustainability to the company's strategy and overall raison d'être? Here we leverage our extensive engagement capability to assess the company's transparency and communication around strategic goals, which will evidence the management team and Board's intentions in prioritising these issues/opportunities.
- Materiality: How material are sustainability opportunities for the company? Here, we take the view that over 50% of revenues need to be positively aligned to long term sustainability themes as proxied by the SDGs (Sustainable Development Goals) or be on a pathway to doing so in 2-3 years.

We believe that effecting positive change through our influence as shareholder would create value for all stakeholders and minimise risk.

Avoid

Full disclosure of exclusionary criteria can be found at: <u>hiips://www.bmogam.com/uploads/2021/05/b4fda90e402c53e33c96e125d360cd81/responsible-investment-</u> <u>strategies-summary-criteria.pdf</u>

These screens have been applied to all portfolio assets other than [cash, cash equivalents and hedging assets, unless otherwise stated.

We enhance our responsible investment criteria where needed. During the year we updated our screening criteria to include:

- Addition of deforestation criteria
 - Exclude companies that derive >10% of revenue from the production of palm oil or sales/product ranges reliant on palm oil and are not members of the Roundtable on Sustainable Palm Oil (RSPO).
 - Exclude companies that derive >10% of revenue from the production of soy and are not members of the Roundtable on Responsible Soy (RTRS).
 - Exclude companies that derive >10% of revenue from the production of sugar and are not members of Bonsucro
 - Exclude companies that derive >10% of revenue from timber-related activities and do not use FSC-/PEFC-certified timber.
- Change to the pornography criteria to extend the 3% revenue threshold for its sale to cover telecommunications companies
- Clarified wording regarding animal testing and welfare criteria

Full details of our exclusion and responsible investment criteria are available in the link provided above.

Invest

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

73% of portfolio NAV (measured as average % weight over the period) invested in companies that provide sustainability solutions or that otherwise make a positive contribution to society or the environment. This is assessed through SDG revenue mapping, i.e. linking the business's underlying segmental revenues to specific SDG targets, as well as a fundamental assessment of the business' sustainability credentials, spanning both product and conduct. In the former, the analyst will also provide a linkage of revenues to broad sustainability themes that proxy the SDGs. In the latter, governance practices are also assessed using both external and internal data.

Improve

Holdings are engaged based on a prioritisation process established by BMO GAM's Responsible Investment team to improve their environmental, social, and governance performance.

The BMO GAM-wide prioritisation process has three elements:

- 1. Priority companies: a set of companies assessed as being ESG laggards with enhanced need for engagement.
- 2. Engagement projects: thematic projects assessed as most relevant in the responsible investment space, with cross industry engagement over a longer period (1-3years)
- 3. Event driven engagement: prior to AGMs or as a reaction to current events (money laundering, environmental pollution etc)

For all companies to be engaged, engagement objectives and timelines are agreed.

Over the previous year the Portfolio had 66 investee company ESG engagements, representing:

- 31 companies engaged across 10 countries
- 23 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our engagement objective

Engagement themes during the period included labour standards (29% of engagements), corporate governance (31%), climate change (11%), environmental stewardship (9%), public health (8%) and business conduct (11%).

We voted at 100% of our shareholder meetings in line with our Corporate Governance Guidelines

The Portfolio has zero exposure to companies with fossil fuel reserves.

To which sustainable objectives did the investments contribute to and how did they not cause significant harm?

The Portfolio includes investments which contribute significantly to address sustainability challenges as defined within our responsible investment and fund policies.

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

We balance our investment in sustainable themes with due diligence and screening criteria to avoid harmful practices which are counter to sustainability objectives. Consistent with the goal to invest in companies that have a positive impact on society and the environment, we have developed an exclusion policy to set threshold standards. We monitor the universe of holdings every quarter, and any position held by a fund that no longer qualifies must be sold within the following six months. Criteria relate to harmful products or practices and also conduct.

The "avoid" element of the Portfolios' sustainability criteria are aligned with (and the remaining elements of the criteria consider) the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labor Organization on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The team also consider governance, biodiversity, water use and taxation as part of their sustainability research. Holdings reported as sustainable have satisfied all of the above criteria.

Alignment with the EU Taxonomy?

Of the sustainable investments made by the Portfolio, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the Portfolio that are aligned with the EU Taxonomy. The investments underlying the remainder of the Portfolio do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives. As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What was the proportion of investments that were not aligned with the products E/S characteristics?

The E/S criteria of the Portfolio do not apply to cash, cash equivalents and hedging assets.

As a result, on average, 0.59% of the net asset value of the Portfolio has not been screened for alignment with the Portfolio's E/S characteristics, as this is the 12mth average cash balance within the portfolio which has not been assessed through a sustainability lens.

Derivatives are permitted within a Portfolio in order

to assist with efficient management of overall asset class positions such as mitigating interest rate fluctuations, hedging against price falls in equity markets, or managing currency exposure. Derivatives are not used for the purposes of attaining the environmental or social characteristics promoted by a Portfolio but ESG criteria are applied.

Currency exposure may arise from unhedged equity positions or a currency strategy and are limited to developed markets or major emerging markets. No ESG screens are applied to currencies.

SFDR Periodic Disclosure

Product name/legal identifier: BMO SDG Engagement Global Equity Fund

Reference period: 01 October 2020 to 30 September 2021

The Portfolio has sustainable investment as its objective and seeks to achieve positive impact through targeted, impact-focused, active engagement with companies, using the UN Sustainable Development Goals (SDG) framework.

To what extent was the sustainable investment objective of this financial product met?

The Portfolio aims to support sustainable development by investing in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment, using the SDG framework which address a range of global problems including poverty, inequality, climate, environmental degradation, prosperity, and peace and justice.

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

To ensure that the sustainable objective of the Portfolio is met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy and has satisfied these as below:

• **Avoid** – The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.

All companies held in the portfolio have satisfied compliance with the Portfolio's minimum criteria.

• **Invest** – The Investment Manager invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.

Within the underlying investments, 81.95% demonstrate alignment with sustainable themes and/or the SDGs in line with our fund policy.

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

• **Improve** – The Portfolio has an objective to clearly demonstrate positive progress aligned with the broad themes set out in the investment policy of the Portfolio. Clear engagement targets are set out for every company held in order to drive improvement towards the SDGs.

Over the previous year the Portfolio had 90 investee company engagements, representing:

- 42 companies engaged across 16 countries
- 33 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our SDG engagement objective

Engagement themes during the period included labour standards (25% of engagements), corporate governance (25%), climate change (23%), environmental stewardship (17%), public health (3%) and conduct (7%).

The investment manager voted at 100% of our shareholder meetings in line with our Corporate Governance Guidelines

To which sustainable objectives did the investments contribute to and how did they not cause significant harm?

The Portfolio primarily makes investments which contribute significantly to addressing sustainability challenges as defined within our sustainable investment and Portfolio policies. The BMO SDG Engagement Global Equity Fund proactively allocates to investments whose activities are oriented or contribute to sustainable development through a methodology designed to focus on the 17 SDGs.

We balance our investment in sustainable themes with due diligence and screening criteria to avoid harmful practices which are counter to sustainability objectives. Consistent with the goal to invest in companies that have a positive impact on society and the environment, we have developed an exclusion policy to set threshold standards. We monitor the universe of holdings every quarter, and any position held by a fund that no longer qualifies must be sold within the following six months. Criteria relate to harmful products or practices and also conduct.

The "avoid" element of the Portfolios' sustainability criteria are aligned with (and the remaining elements of the criteria consider) the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labor Organization on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The team also consider governance, biodiversity, water use and taxation as part of their sustainability research. Holdings reported as sustainable have satisfied all of the above criteria.

Alignment with the EU Taxonomy?

The Portfolio invests in sustainable investments as defined by Article 2(17) of SFDR. Of these sustainable investments, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What were the investments that were not sustainable, what was their purpose and were there any minimum environmental or social safeguards?

The E/S criteria of the Portfolio do not apply to cash, cash equivalents and hedging assets.

As a result, on average, 1.20% of the net asset value of the Portfolio has not been screened for alignment with the Portfolio's E/S characteristics.

Derivatives are permitted within a Portfolio in order to assist with efficient management of overall asset class positions such as mitigating interest rate fluctuations, hedging against price falls in equity markets, or managing currency exposure. Derivatives are not used for the purposes of attaining the environmental or social characteristics promoted by a Portfolio but ESG criteria are applied.

Currency exposure may arise from unhedged equity positions or a currency strategy and are limited to developed markets or major emerging markets. No ESG screens are applied to currencies.

What actions were taken to attain the sustainable investment objective during the reference period?

As highlighted above, in pursuit of the sustainability investment objective, substantial investee company engagement was undertaken during the reference period. There were **90 engagement** activities undertaken during the period, achieving **33 milestones**, or instances of positive change. As highlighted above, these milestones span across Environmental, Social and Governance issues, driving tangible change within investee companies in the pursuit of sustainability improvements.

SFDR Periodic Disclosure

Product name/legal identifier: BMO Sustainable Multi-Asset Income Fund

Reference period: 01 October 2020 to 30 September 2021

The Portfolio promotes environmental or social characteristics and, while it did not have sustainable investment as its objective, it had a proportion of investments in <u>companies that provide sustainability solutions or that</u> <u>otherwise make a positive contribution to society or the environment</u>. The criteria for these investments may not fully equate to the criteria for sustainable investments under evolving regulations. Due to the widespread lack of available data and regulatory uncertainty, the Portfolio is not yet in a position to confirm the degree of Taxonomy alignment of its sustainable investments with an environmental objective.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To ensure that the environmental and/or social characteristics promoted by the Portfolio are met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy:

- Avoid The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.
- **Invest** The Investment Manager invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.
- **Improve** The Investment Managers engage with the companies that the Portfolios invest in on significant ESG issues with most relevance to their business, to reduce risk, improve performance, encourage best practice, and underpin long-term investor value. The Investment Managers believe that this active ownership is part of our duty as an investor acting in the best interests of our clients, and as a participant in the global financial system.

The E/S characteristics promoted by the Portfolio have been met through the implementation of the "Avoid, Invest, Improve" philosophy across the Portfolio. This consists of a set of clearly defined exclusions, a governance system to ensure ESG risks are identified and managed in investors' best interest throughout the investment process, an assessment of the alignment with positive sustainability themes, and a systematic engagement process that uses our position as stewards of capital to drive positive change.

Avoid

The Portfolio adheres to its Investment Policy, which details various exclusions and minimum standards, and the most recent version can be found via the link below.

hiips://api.fundpress.io/documents/retrieve/3282270c-6f11-41af-8429-183becc6d53d/filename/20210625 BMOSustainableMulti-AssetIncomeFundPolicies F %20SF57 All En Professional.pdf

The screens and thresholds detailed in the Investment Policy above have been applied to all portfolio assets other than cash from operations e.g. dividends from a (sustainable) equity denominated in a currency that would be excluded as per our sovereign approach.

Screening criteria were updated in the year under review to:

- Set a more stringent threshold related to tobacco exclusion
- Set more stretching carbon intensity thresholds
- Set a more stretching threshold relating to countries in the current Transparency International's Corruption Perceptions Index
- Update "invest" themes, policy on currency exposures, green and social bond wording
- Clarify "improve" approach

Invest (targeted investment in sustainability leadership)

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

Core to all BMO GAM sustainable strategies is the proactive allocation to investments whose activities are oriented to providing sustainability solutions, i.e. with some positive impact on societies and the environment.

Our 'Invest' approach applies to both traditional assets (e.g. equity and debt securities) and alternative opportunities, which may include areas such as social housing, renewable energy or microfinance. Sovereign bonds are not being evaluated against "invest" themes.

78.5% of investments as a proportion (%) of NAV are in issuers that provide sustainability solutions or that otherwise make a positive contribution to society or the environment, as per the criteria set out later in the document.

This figure is based on average holdings over the course of the period, considered on a quarterly basis. This was calculated by considering the weight of each holding held at the end of each quarter, averaged by the number of quarters held for.

Those holdings have been selected on the basis of having a strong association with addressing sustainability challenges and opportunities such as:

1. Health and wellbeing:

- Companies improving the nutritional value of food and drinks
- Companies improving the quality and/or accessibility of health products and services
- Companies providing goods and services that promote health and well-bring

2. Sustainable Finance

- Companies improving financial inclusion
- Companies providing access to finance
- Companies providing financial services to support SMEs
- Companies providing insurance services
- 3. Energy transition
 - Companies providing product/services which reduce fossil fuel dependence
 - Companies increasing renewable energy production
 - Companies enabling transition to EV
 - Companies improving fuel efficiency for transportation vehicles

4. Sustainable cities and infrastructure

- Companies building and maintaining affordable housing
- Companies supplying goods and services to enable building and maintaining affordable housing
- Companies building and maintaining low-carbon commercial buildings
- Companies enabling the provision of public transport services
- Companies providing infrastructure to enable access to electricity, telecommunication services
- Companies supporting economic development, mobility, health and well-being through sustainable infrastructure development
- 5. Resource efficiency
 - Companies enabling recycling
 - Companies providing products/services which reduce waste

- Companies with ambitious and leading practices to mitigate their environmental and social impacts
- Companies improving water quality through water and wastewater treatment
- Companies providing products and services to increase water-use efficiency
- Companies enabling the reduction of resources used in the production of products

6. Digital empowerment, connection, and protection

- Companies providing technologies that empower people to make better decisions for better environmental or societal outcomes
- Companies providing technologies that democratize digital access
- Companies providing technologies to improve safety
- Companies providing technologies to improve connectivity (incl infrastructure)
- Companies providing technologies to mitigate the environmental impacts of business activities (i.e. improving efficiency)

7. Education

- Companies providing high-quality education and/or professional training
- Companies upgrading education facilities

We also make reference to the framework of the Sustainable Development Goals (SDGs) in identifying investments making a positive impact on society and the environment.

Improve

The Manager has engaged with issuers based on a prioritisation process established by the Investment Manager's Responsible Investment team to improve their environmental, social, and governance performance.

The Investment Manager's prioritisation process has three elements:

1. Priority companies: a set of companies assessed as being ESG laggards with enhanced need for engagement.

2. Engagement projects: thematic projects assessed as most relevant in the responsible investment space, with cross industry engagement over a longer period (1-3years) Our ESG projects are structured around seven high-level themes:

- Environmental stewardship
- Climate change
- Human rights
- Labour standards
- Business conduct
- Public health
- Corporate governance

3. Event driven engagement: prior to AGMs or as a reaction to current events (money laundering, environmental pollution etc)

The Portfolio's holdings have been considered by name and by weighting in our GAM EMEA-wide prioritisation process.

For all companies to be engaged, engagement objectives and timelines will be agreed.

During the period under review the Portfolio undertook the following engagement activity:

Engagement Stats	
Engagements	192
Companies Engaged	67
Milestones achieved	62
Countries covered	18

Theme	% of Engagements	% Milestones* Achieved
Climate Change	20.63%	30.65%
Environmental Stewardship	10.94%	8.06%
Business Conduct	5.00%	0.00%
Human Rights	8.75%	0.00%
Labour Standards	25.00%	14.52%
Public Health	9.69%	24.19%
Corporate Governance	20.00%	22.58%

* milestones as instances where companies make tangible improvement in their policies and practices in alignment with our engagement and voting objectives.

SDG Goal		Milestones Achieved
1	No Poverty	3%
2	Zero Hunger	2%
3	Good Health and Well-Being	21%
4	Quality Education	0%
5	Gender Inequality	2%
6	Clean Water and Sanitation	2%
7	Affordable and Clean Health	2%
8	Decent Work and Economic Growth	13%
9	Industry, Innovation and Infrastructure	0%
10	Reduced inequality	0%
11	Sustainable Cities and Communities	0%
12	Responsible Consumption and Production	13%
13	Climate Action	24%
14	Life Below Water	0%
15	Life on Land	0%
16	Peace and Justice Strong Institutions	0%
17	Partnerships to Achieve the Goal	0%

The SDG framework provides an ambitious roadmap towards a more sustainable world. We believe it is a useful tool for companies and investors to be able to contribute to achieving the objectives of the 2030 Agenda. The framework has created a common language between stakeholders, and we are seeing that having a positive impact within our engagement. We have developed our engagement database to include the 169 SDG targets, which allows us to log interactions, progress and results to this granular level where relevant.

What were the top investments of the financial product?

Top 15 holdings are as follows:

No.	Investment	Sector	% Assets	Exposure Country
1	Thermo Fisher Scientific Inc	Health Care	1.9%	UNITED STATES
2	Microsoft Corp	Information Technology		UNITED STATES
3	Home Reit PLC	Real Estate	1.7%	BRITAIN
4	Renewables Infrastructure Group Ltd/The	Utilities	1.6%	GUERNSEY
5	Impact Healthcare Reit PLC	Real Estate	1.6%	BRITAIN

15	Taiwan Semiconductor Manufacturing Co Ltd	Information Technology	1.3%	TAIWAN

All sectors are based on GICS and sourced from Bloomberg. *GICS sector unavailable from Bloomberg, hence the fund management team have assigned a relevant sector

Methodology: The weight of each holding held at the end of each quarter, averaged by the number of quarters held for.

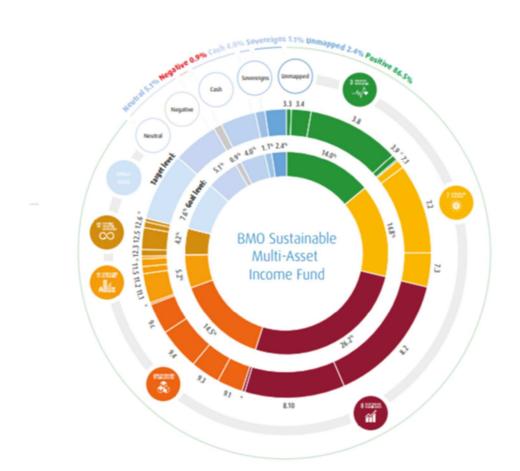

Historic holdings as referenced here (based on quarterly averages) may no longer be held as whilst deemed sustainable at the time of holding, given more recent company actions they are no longer deemed sustainable. Of the names listed above, this only applies to Microsoft, which was sold in May 2021, following the announcement of a contract to provide Integrated Visual Augmentation System (IVAS) headsets, a technology considered to be a weapon, to the US Army. Unlike previous services and technology provided by Microsoft to the US government, and by extension the Department of Defence and US Army, these IVAS headsets are strategic, offering a direct battlefield advantage, customised and directly improve combat efficiency and as a result, we divested from the company.

To which sustainable objectives did investments contribute to and how did they not cause significant harm?

The Portfolio includes investments which contribute significantly to address sustainability challenges as defined within our responsible investment and fund policies.

We map the portfolio holdings to the UN SDGs, by revenue for equities and bonds and by asset allocation for Investment Trusts as the underlying revenue data isn't typically available. Using holdings data as of 31 December 2020, 86.5% of the portfolio was positively mapped, 5.1% was neutral and 0.9% was negatively mapped. The remainder of the portfolio was 4.0% cash, 1.1% sovereigns and 2.4% unmapped. This mapping is done annually by the Responsible Investment team and is included in annually produced Impact Reports. The link to the most recent Impact Report for the Portfolio is below.

<u>bmo-sustainable-multi-asset-income-fund-impact-report.pdf (bmogam.com)</u> <u>Illustration: Breakdown of Portfolio assets by contribution to UN SDGs</u> <u>Data as at 30 December 2020</u>

The goal most represented in this strategy is SDG 8 – Decent Work and Economic Growth at 26.2%. This reflects holdings in technology companies such as Taiwan Semiconductor Manufacturing Co, which support Target 8.2 calling for boosting economic productivity through technological upgrading and innovation; and in software firms such as Autodesk, which provides specialist applications including for Smart City design. Other highly represented goals include SDG 7 - Affordable and Clean Energy at 14.8%, SDG 9 - Industry, Innovation and Infrastructure at 14.5% and SDG 3 – Good Health and Well-being at 14.0%. The Portfolio's holdings in the latter's area include pharmacy store CVS Health Corp, and Fresenius, which specialises in dialysis treatment, as well as providing medical supplies and running hospitals.

We have also analysed some of our alternatives holdings, such as Home REIT, which contributes to SDG target 11.1 by investing in assets dedicated to providing accommodation to the homeless.

Our analysis identified a 0.9% negative mapping – representing business activities that could be detrimental to sustainable development. This relates to activities including the snack food business of food producer Mondelez which detracted from SDG 2 - Zero Hunger, and services provided by product testing firm Intertek to the resources industry, detracting from SDG 13 - Climate Action.

Names we consider to be sustainability leaders include Schneider Electric, which maps primarily to SDG 9 - Industry Innovation and Infrastructure. The company is a leader in helping the world transition towards a more electric, digital, decarbonised and decentralised energy. Chemicals business Linde, which also maps to SDG 9, helps its customers through its products to improve their environmental performance and reduce their carbon footprint. At the same time, they have strong programs to minimise their own environmental footprint.

Hoya, which maps primarily to SDG 3 - Good Health and Well-being is a Japanese optical products specialist which supports people around the world through the production of eyeglass lenses, contact lenses and intraocular lenses used for cataract operations, combatting the leading cause of blindness worldwide. Our alternative holdings also contribute to a sustainable objective, and all map positively to the UN SDGS based on asset allocations. Examples include The Renewables Infrastructure Group, which maps to SDG 7 - Affordable and Clean Energy, and invests in a diversified portfolio of renewables infrastructure which contribute towards a net zero carbon future, and Impact Healthcare REIT, which owns healthcare properties such as residential and nursing care homes in the UK and maps positively to SDG 3 - Good Health and Wellbeing.

Securities held are analysed by investment team analysts and portfolio managers in the following way:

Equities: Our equity investments' sustainability is assessed in line with a clear "A.I.M." framework (Additionality, Intentionality, Materiality):

- Additionality: To what extent is the company a sustainability innovator, rather than a follower? Are the products and services truly innovative and making a real-world impact on society/environment? Here we focus on and evidence the Portfolio's exposure through our view of high quality, wide moat businesses.
- Intentionality: How core is sustainability to the company's strategy and overall raison d'être? Here we leverage our extensive engagement capability to assess the company's transparency and communication around strategic goals, which will evidence the management team and Board's intentions in prioritising these issues/opportunities.
- Materiality: How material are sustainability opportunities for the company? Here, we take the view that over 50% of revenues need to be positively aligned to long term sustainability themes as proxied by the SDGs (Sustainable Development Goals) or be on a pathway to doing so in 2-3 years.

We believe that effecting positive change through our influence as shareholder would create value for all stakeholders and minimise risk.

Credit: Our credit investments include investments in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. This investment is primarily achieved through investment in green, sustainable or sustainability-linked bonds issued by companies (so called "Labelled Bonds"). All Labelled Bonds must be individually assessed by the Responsible Investment team, who consider the impact to society and/or the environment or the materiality of the sustainability target before they are approved for investment.

Alternatives (Investment Trusts): Investment Trusts are considered on a qualitative basis, based on their ESG credentials in terms of both purpose, such as social housing or renewable infrastructure, their integration of sustainability within their investment process, and their management of ESG issues. Questionnaires are sent prior to investment and then on an ongoing basis to ensure alignment with our sustainability considerations, and regular updates are sought via update calls with managers. We consider sustainability perspective and risk management perspective, we invest in both social focused and environmental focused trusts. Despite this, we expect social focus trusts to be cognisant of their environmental impact and take all necessary steps to minimise any damage.

Government Bonds and currency must adhere to the investment policy as outlined above. Holdings are monitored on an ongoing basis to ensure continued alignment with the investment policy above, both on desk and via the Dealing system.

In addition, we use the hard exclusion of UNGC = Fail and a 'soft' test of ESG Industry rank (internally generated score) < 25 percentile, which is then passed back to the Responsible Investment team to either agree the data is wrong, in which case the holding can be retained, or to confirm that it should be sold.

Alignment with the EU Taxonomy?

Of the sustainable investments made by the Portfolio, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the Portfolio that are aligned with the EU Taxonomy. The investments underlying the remainder of the Portfolio do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What was the proportion of investments that were not aligned with the products environmental and social characteristics?

The product employs exclusions related to both environmental and social on all Portfolio assets other than cash from operations e.g. dividends from a (sustainable) equity, which may be denominated in a currency that would be excluded as per our sovereign approach. Therefore all assets, apart from this cash mentioned above, are aligned.

SFDR Periodic Disclosure

Product name/legal identifier: BMO Sustainable Opportunities European Equity Fund

Reference period: 01 October 2020 to 30 September 2021

The Portfolio promotes environmental or social characteristics and, while it did not have sustainable investment as its objective, it had a proportion of investments in <u>companies that provide sustainability solutions or that</u> <u>otherwise make a positive contribution to society or the environment</u>. The criteria for these investments may not fully equate to the criteria for sustainable investments under evolving regulations. Due to the widespread lack of available data and regulatory uncertainty, the Portfolio is not yet in a position to confirm the degree of Taxonomy alignment of its sustainable investments with an environmental objective.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

To ensure that the environmental and/or social characteristics promoted by the Portfolio are met, the investment strategy embeds an "Avoid, Invest, Improve" philosophy:

- Avoid The Investment Manager has a set of exclusion criteria setting threshold standards to avoid investment in companies with socially or environmentally damaging products or unsustainable business or governance practices.
- **Invest** The Investment Manager invests in companies providing sustainability solutions and/or companies making a positive contribution to society and/or the environment. Within this element, the Investment Managers will look to key sustainability themes and characteristics such as health and wellbeing, resource efficiency, technological innovation, sustainable mobility, energy transition or responsible finance.
- **Improve** The Investment Managers engage with the companies that the Portfolios invest in on significant ESG issues with most relevance to their business, to reduce risk, improve performance, encourage best practice, and underpin long-term investor value. The Investment Managers believe that this active ownership is part of our duty as an investor acting in the best interests of our clients, and as a participant in the global financial system.

Avoid

The investment restrictions of the Portfolio also embed the following environmental and social criteria:

Product-based exclusions:

- Weapons¹ We do not invest in companies that manufacture weapons or weapons systems².
- Tobacco³ We do not invest in companies producing tobacco or companies that derive more than 5% revenues from products that contain tobacco or from the wholesale trading of tobacco products.
- Fossil fuels
 - We do not invest in companies with fossil fuel reserves, covering metallurgical coal, thermal coal, conventional oil, shale oil, oil sands, natural gas and shale gas.
 - We exclude electricity utilities with a carbon intensity of >393 gCO2/kWH⁴, independent of its fuel source. Where carbon intensity data is not available, we will exclude electric utilities where:

 $^{^{1}}$ Revenue threshold for controversial weapons is set at 0%, threshold for conventional weapons is 1%, threshold for components is 5%.

 $^{^2}$ Companies that manufacture weapons, components of weapons, or weapons system, i.e. conventional weapons, biological/chemical weapons systems, blinding laser weapons, depleted uranium weapons, incendiary weapons, non-detectable fragments and nuclear weapons.

³ Revenue threshold set at 1%

⁴ This is consistent with a 'below 2 degrees scenario'. Max. gCO2

- 1. > 10% of the power production is based on coal.
- 2. > 30% of the power production is based on oil & gas.
- 3. >5% of the power production is based on nuclear sources.
- We exclude electricity utilities with expansion plans that would increase their negative environmental impact or that are contrary to a below 2 degrees scenario and electricity utilities constructing new coalfired power stations and/or nuclear power stations.
- We exclude operators of nuclear power plants.
- We exclude companies with revenues above 5% from production of essential parts for nuclear power plants.
- Uranium mining: We exclude all companies operating active uranium mines.

Conduct-based exclusions

- UNGC breaches We exclude companies with severe breaches of the UN Global Compact principles⁵.
- Weak corporate ESG performers⁶ Using our in-house ESG rating methodology, we exclude the companies scoring at or below 25/100 in their ESG rating unless sector experts from the Responsible Investment team opine positively on their ESG management⁷.

Further aspects considered:

- Biodiversity: We expect companies to minimise negative impact on biodiversity.
- Water Use: We expect companies to comply with national regulations and international agreements regarding managing water consumption.
- Taxation: We expect companies to pay fair and appropriate taxes, and transparently report their taxes.

The Portfolio has met these characteristics to the extent set out below:

The Portfolio avoids companies with unsustainable practices/products whilst prioritising investment in companies that address sustainability challenges. The Portfolio's primary focus is to invest positively, in sustainability leaders and solution providers. We find a rich source of ideas comes from considering long-term social and environmental themes which provide a mental framework for idea generation. This allows the identification of companies whose products and services have a clear "A.I.M." (Additionality, Intentionality, Materiality):

- Additionality: To what extent is the company a sustainability innovator, rather than a follower? Are the products and services truly innovative and making a real-world impact on society/environment? Here we focus on and evidence the Portfolio's exposure through our view of high quality, wide moat businesses.
- Intentionality: How core is sustainability to the company's strategy and overall raison d'être? Here we leverage our extensive engagement capability to assess the company's transparency and communication around strategic goals, which will evidence the management team and Board's intentions in prioritising these issues/opportunities.
- Materiality: How material are sustainability opportunities for the company? Here, we take the view that over 50% of revenues need to be positively aligned to long term sustainability themes as proxied by the SDGs (Sustainable Development Goals) or be on a pathway to doing so in 2-3 years.

We believe that effecting positive change through our influence as shareholder creates value for all stakeholders and minimises risk.

These screens have been applied to all portfolio assets other than cash.

Changes have been made to the policy (namely in relation to the thresholds for electricity utilities).

⁵ The UN Global Compact are 10 principles businesses should follow and incorporate in order to meet their basic responsibilities to people and planet, which fall under 4

broad headings (Human Rights, Labour, Environment and Anti-Corruption).

⁶ ESG ranking is used as a flag for further qualitative analysis

⁷ In-house ESG rating methodology uses third party ESG data as an input

Invest

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

86% of portfolio NAV (measured as average % weight over the period) invested in companies that provide sustainability solutions or that otherwise make a positive contribution to society or the environment. This is assessed through SDG revenue mapping, i.e. linking the business's underlying segmental revenues to specific SDG targets, as well as a fundamental assessment of the business' sustainability credentials, spanning both product and conduct. In the former, the analyst will also provide a linkage of revenues to broad sustainability themes that proxy the SDGs. In the latter, governance practices are also assessed using both external and internal data.

Improve

Holdings are engaged based on a prioritisation process established by BMO GAM's Responsible Investment team to improve their environmental, social, and governance performance.

The BMO GAM-wide prioritisation process has three elements:

- 1. Priority companies: a set of companies assessed as being ESG laggards with enhanced need for engagement.
- 2. Engagement projects: thematic projects assessed as most relevant in the responsible investment space, with cross industry engagement over a longer period (1-3years)
- 3. Event driven engagement: prior to AGMs or as a reaction to current events (money laundering, environmental pollution etc)

For all companies to be engaged, engagement objectives and timelines will be agreed.

Over the previous year the Portfolio had 70 investee company engagements, representing:

- 22 companies engaged across 9 countries
- 16 milestones achieved, meaning the company made a tangible improvement in their policies and practices in alignment with our SDG engagement objective

Engagement themes during the period included labour standards (31% of engagements), corporate governance (31%), climate change (15%), environmental stewardship (7%), public health (11%) and conduct (3%). The Portfolio also undertook engagements aligned with 14 of the 17 Sustainable Development Goals.

We voted at 100% of our shareholder meetings in line with our Corporate Governance Guidelines.

What were the top investments of the financial product?

Top 15 investments by % of NAV

Largest Investments	Sector	% Assets (average weight over the period)	Exposure Country
ASML Holding	Information Technology	5.65	Netherlands

To which sustainable objectives did the investments contribute to and how did they not cause significant harm?

The Portfolio includes investments which contribute significantly to address sustainability challenges as defined within our sustainable investment and fund policies.

The Investment Manager is developing its criteria for sustainable investments and expects to disclose the proportion of sustainable investments in the Portfolio assets for future reference periods, in line with regulatory requirements and as issuers improve their non-financial disclosures. The Investment Manager's "Invest" criteria may not fully equate to the criteria for sustainable investments under evolving regulations.

Just over 86% of the Portfolio's holdings (average weight over the period) align positively to sustainability themes, which closely track the SDGs. The long-term social and environmental themes provide a robust and comprehensive mental framework for idea generation. This allows the identification of companies whose products and services have a clear "A.I.M." (Additionality, Intentionality, Materiality).

By order of magnitude, the Portfolio is exposed to the following themes:

Sustainability themes	Average weight (%)
Health & Well-being	32.25
Digital Empowerment	16.04
Sustainable Cities	11.13
Resource Efficiency	10.04
Sustainable Finance	9.37
Connect & Protect	4.57
Sustainable Mobility	2.08
Energy transition	0.70

We balance our investment in sustainable themes with due diligence and screening criteria to avoid harmful practices which are counter to sustainability objectives. Consistent with the goal to invest in companies that have a positive impact on society and the environment, we have developed an exclusion policy to set threshold standards. We monitor the universe of holdings every quarter, and any position held by a Portfolio that no longer qualifies must be sold within the following six months. Criteria relate to harmful products or practices and also conduct.

The "avoid" element of the Portfolios' sustainability criteria are aligned with (and the remaining elements of the criteria consider) the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labor Organization on Fundamental Principles and Rights at Work and the International Bill of Human Rights. The team also considers governance, biodiversity, water use and taxation as part of their sustainability research. Holdings reported as sustainable have satisfied all of the above criteria.

Alignment with the EU Taxonomy?

Of the sustainable investments made by the Portfolio, it is expected that a proportion will be aligned with the EU Taxonomy. This means that those Taxonomy-aligned investments take into account the EU criteria for environmentally sustainable economic activities and contribute to either the climate adaptation and/or climate mitigation objectives set out in Article 9 of the Taxonomy Regulation.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. The "do no significant harm" principle applies only to those investments underlying the Portfolio that are aligned with the EU Taxonomy. The investments underlying the remainder of the Portfolio do not take into account the EU criteria for environmentally sustainable economic activities. Any other sustainable investments must also not significantly harm any environmental or social objectives.

As at the date of this disclosure, the SFDR Level 2 disclosure rules prescribing the Taxonomy aligned information to be provided to investors, including the methodology for calculating the proportion of investments which are Taxonomy aligned, are not yet in effect.

In addition, accurate data to allow for Taxonomy alignment information to be provided to investors is dependent on the disclosure of such data by the companies in which the Portfolio is invested. While the European Union is introducing regulations to require large European companies to make this disclosure for financial periods starting in 2023, equivalent requirements may not be introduced in the same timeframe in the markets in which this Portfolio invests.

When all relevant regulations are finalised and investee companies start to report on their Taxonomy alignment, the Investment Manager expects to be able to report positively on Taxonomy alignment. However, as at the date of this disclosure, and as a result of the relevant rules not having been finalised, the Investment Manager cannot provide sufficiently accurate data to reliably state an exact percent of investments that are Taxonomy aligned.

Further details of the Portfolio's investment in environmentally sustainable economic activities will be disclosed in line with the timing requirements of the SFDR Level 2 disclosure rules which are currently expected to come into force on 1 January 2023.

While the disclosure requirements under SFDR and the EU Taxonomy remain uncertain, these do not impact the way in which the Portfolio is managed. The Portfolio continues to comply with the sustainability criteria described in the preceding section of this report.

What was the proportion of investments that were not aligned with the products E/S characteristics?

The E/S criteria of the Portfolio do not apply to cash, cash equivalents and hedging assets.

As a result, on average, 0.95% of the net asset value of the Portfolio has not been screened for alignment with the Portfolio's E/S characteristics.

Derivatives are permitted within a Portfolio in order to assist with efficient management of overall asset class positions such as mitigating interest rate fluctuations, hedging against price falls in equity markets, or managing currency exposure. Derivatives are not used for the purposes of attaining the environmental or social characteristics promoted by a Portfolio but ESG criteria are applied.

Currency exposure may arise from unhedged equity positions or a currency strategy and are limited to developed markets or major emerging markets. No ESG screens are applied to currencies.

Taxonomy Disclosures

As set out in the Prospectus, the Investment Managers integrate sustainability risks in their investment decision making processes and consider the adverse impacts of their investment decisions on sustainability factors. However as the Portfolios listed below (the "Article 6 Portfolios") do not promote environmental and sustainable characteristics in line with SFDR, the Investment Managers do not disclose against their alignment with the Taxonomy Regulation. Accordingly, the investments underlying the Article 6 Portfolios do not take into account the EU criteria for environmentally sustainable economic activities.

The Article 6 Portfolios are:

- BMO Diversified Growth Fund
- BMO European Growth & Income Fund
- BMO European Smaller Companies Fund
- BMO Global Convertible Bond Fund
- BMO Global Smaller Companies Equity Fund
- BMO Global Total Return Bond Fund
- BMO US Smaller Companies Fund
- BMO Global Absolute Return Bond Fund
- BMO Plus II Fund
- BMO Euro Bond Fund
