JPM Asia Pacific Income C (mth) - SGD (hedged) a Share Class of JPMorgan Funds – Asia Pacific Income Fund a Sub-Fund of JPMorgan Funds

LU1288022665

The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund aims to provide income and long term capital growth by investing primarily in income generating securities of countries in the Asia Pacific region (excluding Japan).

Investment Policy: At least 67% of the Sub-Fund's assets (excluding cash and cash equivalents) will be invested in equity securities, debt securities, convertible securities and Real Estate Investment Trusts ("REITs"). Issuers of these securities will be companies that are domiciled in, or carrying out the main part of their economic activity in, the Asia Pacific region (excluding Japan) or governments or their agencies of countries in the Asia Pacific region (excluding Japan).

The Sub-Fund will hold between 25% and 75% of its assets in equity securities and between 25% and 75% of its assets in debt securities.

The Sub-Fund uses an investment process based on the fundamental analysis of individual securities and their income potential. The Investment Manager will vary asset and country allocations over time to reflect market conditions and opportunities.

Certain countries in the Asia Pacific region may be considered emerging market countries.

The Sub-Fund may invest in China A-Shares via the China-Hong Kong Stock Connect Programmes.

The Sub-Fund may invest a significant proportion of its assets in below investment grade and unrated debt securities. There are no credit quality or maturity restrictions with respect to the debt securities in which the Sub-Fund may invest.

The Sub-Fund may hold up to a maximum of 10% of its assets in Contingent Convertible Securities.

The Sub-Fund may invest in assets denominated in any currency. The Investment Manager may choose to hedge all or some of the currency exposure.

The Sub-Fund may use financial derivative instruments for the purposes of hedging and efficient portfolio management.

This Share Class seeks to minimise the effect of currency fluctuations between the Reference Currency of the Sub-Fund (USD) and the Reference Currency of this Share Class (SGD).

Redemption and Dealing: Shares of the Sub-Fund may be redeemed on demand, with dealing normally on a daily basis.

Management Discretion: The Investment Manager has the discretion to buy and sell investments on behalf of the Sub-Fund within the limits of the Objective and Investment Policy.

Benchmark: The benchmark of the Share Class is 50% MSCI All Country Asia Pacific ex Japan Index (Total Return Net) USD Cross Hedged to SGD / 50% J.P. Morgan Asia Credit Index (Total return Gross) Hedged to SGD.

The benchmark is a point of reference against which the performance of the Share Class may be measured. The portfolio of the Sub-Fund may bear little resemblance to its benchmark.

Distribution Policy: This Share Class will normally pay dividends.

Risk and Reward Profile

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its simulated Net Asset Value has shown medium fluctuations historically.

Other material risks:

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Returns to investors will vary from year to year, depending on dividend income and capital returns generated by the underlying financial assets. Capital returns may be negative in some years and dividends are not guaranteed.
- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for emerging market and below investment grade debt securities.
- In addition, emerging markets may be subject to increased risks, including less developed custody and settlement practices, higher volatility and lower liquidity than non emerging market securities.

- The Sub-Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.
- The Sub-Fund may be concentrated in industry sectors and/or countries and as a result, may be more volatile than more broadly diversified funds.
- Convertible bonds are subject to the credit, interest rate and market risks stated above associated with both debt and equity securities and to risks specific to convertible securities. Convertible bonds may also be subject to lower liquidity than the underlying equity securities.
- Contingent Convertible Securities are likely to be adversely impacted should specific trigger events occur (as specified in the contract terms of the issuing company). This may be as a result of the security converting to equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.
- Investments in REITs may be subject to increased liquidity risk and price volatility due to changes in economic conditions and interest rates.
- This Share Class will give priority to dividend payments, rather than capital growth. Certain fees and expenses attributable to the Share Class will not be deducted from the dividend but will instead be reflected in the value of the Shares. Where the dividend paid exceeds the gains of the Share Class, this will result in a corresponding reduction in the value of Shares, and erosion of your investment.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimise the effect of currency fluctuations may not always be successful. Investors may have exposure to currencies other than the currency of their Share Class.
- Further information about risks can be found in "Appendix IV - Risk Factors" of the Prospectus.
