

Man Funds VI plc (formerly GLG Investments VI plc)

(An Investment Company with Variable Capital)

Report and Financial Statements for the year ended 31 December 2016

ADDITIONAL INFORMATION FOR INVESTORS IN GERMANY

The Bundesanstalt für Finanzdienstleistungsaufsicht (Federal Agency for Financial Services Supervision) has been notified of the intention to distribute Shares of the Company's Portfolios in the Federal Republic of Germany.

Note: It should be noted that for the following Portfolios MAN AHL TARGETRISK and MAN NEWSMITH UK EQUITY ALTERNATIVE no notification has been filed and that the shares of these Portfolios may not be distributed to investors within the scope of applicability of the Investment Code.

The Paying and Information Agent in Germany is

BHF-BANK Aktiengesellschaft Bockenheimer Landstrasse 10 60323 Frankfurt am Main

Redemption and switching requests for the Shares of the Portfolios which are authorised for distribution in Germany can be lodged at the Paying Agent.

Redemption proceeds, possible dividends and all other payments can be paid upon request of the Shareholders through the Paying Agent and may also be paid out in cash to the Shareholders.

The latest available Prospectus, the Key Investor Information Documents, the Memorandum and Articles of Association, Annual and Semi-Annual Reports as well as the Issue, Redemption and Switching Prices can be obtained free of charge in hardcopy form at the Information Agent. The Management Agreement, the Investment Management Agreement, the Administration Agreement, the Distribution Agreement, the Custodian Agreement, the Administrative Services Agreement, the UCITS Regulations, and a list of past and current directorships and partnerships held by each Director over the last five years, can be inspected and obtained by Shareholders at the Information Agent. Issue, Redemption and Switching Prices will be published on the Fund's website https://www.man.com/DE/all-prices. Any other documents and information that must be published in Ireland, with the exception of the agreements mentioned above, the UCITS Regulations, and the list of past and current directorships and partnerships held by each Director other the agreements mentioned above, the UCITS Regulations, and the list of past and current directorships and partnerships held by each Director over the last five years, will be published for investors in Germany by way of investor letter.

The statement of changes in the composition of the investment portfolio is also available free of charge upon request at the office of the German Paying and Information Agent.

In accordance with § 298 (2) of the Investment Code investors in Germany are informed by way of investor letter and publication in the electronic Federal Gazette (Bundesanzeiger) under the following circumstances:

- Suspension of the redemption of a Portfolio's Shares,
- Termination of the management or winding-up of a Portfolio,
- Any amendments to the articles of association of the company which are inconsistent with the
 previous investment principles, which affect material investor rights or which relate to
 remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- Merger of Portfolios,
- Conversion of a Portfolio in a feeder fund or the amendments to a master fund.

Man Funds VI plc may elect to comply with the reporting duties pursuant to § 5 (1) Investment Tax Act which have to be observed as prerequisites for the taxation according to §§ 2 and 4 Investment Tax Act with respect to the share classes of any Portfolio. Prior to investing in a Portfolio, investors may contact the Administrator or the Paying and Information Agent in Germany for details of the share classes and Portfolios in respect of which such election has been made. Man Funds VI plc can, however, not guarantee that the tax effects resulting from the compliance with these reporting duties will be achieved at the investor level. Failure to comply with the duties may in addition result in negative tax consequences for investors taxable in Germany investing in the Portfolio. Investors taxable in Germany should not invest in other share classes or other Portfolios as substantial tax charges can be the consequence. Before investing in a Portfolio of Man Funds VI plc investors taxable in Germany should therefore discuss with

their tax advisers the implications of acquiring, holding, transferring and redeeming Shares in such Portfolio. Investors taxable in Germany are strongly advised to ask for tax advice before investing into Portfolios and share classes which do not fulfill the requirements of the Investment Tax Act.

Investment Manager's Report

Man GLG European Alpha Alternative - Annual Report Commentary

Man GLG European Alpha Alternative (the "Fund") was down 1.87% in 2016.

Stock selection was positive while sector attribution, hedge selection and market attribution were negative.

The Fund's management team were changed in December, with Philippe Isvy and Pierre Valade making way for Jean-Robin Peters.

Whilst the strategy of the new management team differs, the objectives of the fund remain identical – namely low volatility returns with limited net exposure.

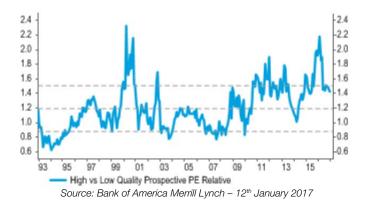

Market and Fund Outlook

2016 saw a mixed equity performance across regions with the S&P/US +9.5%, SXXP/Europe -1.2%, Nikkei/Japan +0.4%, MSCI Asia Pacific excl. Japan +3.7% and MSCI Emerging Markets +8.6%. Within Europe, sector performance was very diverse as can be seen in the table below:

Sector	Ticker	Absolute
Basic Resources	SXPP	61.9%
Oil & Gas	SXEP	22.9%
Construction & Materials	SXOP	9.2%
Industrial Goods & Services	SXNP	8.5%
Chemicals	SX4P	3.9%
Technology	SX8P	3.4%
Personal & Household Goods	SXQP	2.0%
Automobiles & Parts	SXAP	-3.9%
Food & Beverage	SX3P	-5.4%
Insurance	SXIP	-5.6%
Retail	SXRP	-6.7%
Banks	SX7P	-6.8%
Financial Services	SXFP	-7.4%
Media	SXMP	-7.6%
Real Estate	SX86P	-8.0%
Utilities	SX6P	-8.9%
Health Care	SXDP	-10.2%
Travel & Leisure	SXTP	-11.1%
Telecommunications	SXKP	-15.8%

The year was littered with political events, together with changing interest rate expectations. The election of Donald Trump as President of the United States proved a catalyst for "recovery style" stocks, and thus a sharp rally in value stocks at the expense of high quality stocks in the last quarter of the year; as expressed by the chart below:

High vs. Low Quality stocks '12m Fwd P/E

Fund Positioning

While the new management team's strategy slightly differs from that of Philippe and Pierre's, stock selection remains the key expected driver of returns for the new team in FY17. The team's key focus is on discovering companies with inflecting or accelerating/decelerating earnings growth profiles. Whilst political risks remain with both French and German elections upcoming, together with the unknown that is the UK's exit path away from the European Union, the process in place ought to be well calibrated to exploit the opportunities that we see ahead.

Investment Manager's Report (continued)

Man GLG Alpha Select Alternative – Annual Report Commentary

The Fund recorded a -1.1% net return in a year that was filled with surprises, many of which have led to deep ramifications across global markets.

The year began with an overall reduction in risk appetite due to concerns about China weakening their currency, a potential US recession and oil prices falling to \$28 per barrel. Sterling suffered a persistent slide against the dollar in the run up to the UK referendum which prompted the Bank of England to become more cautious about the potential Brexit scenario. The uncertainty surrounding the vote prompted many central banks to continue with, and in some cases increase, their accommodative policies. Markets regained some composure and steadied after the first quarter despite the revised view of lower global growth (attributable to unstable commodity prices), weaker growth in developed markets and concerns over stability in emerging markets.

The summer brought the first major surprise of the year as the UK voted to leave the EU, consequently sending shockwaves through markets and leading to political uncertainty in the UK following the resignation of Prime Minister, David Cameron. The Leave vote impacted Fund performance negatively and it suffered a large loss, with domestic stocks and financials being the main detractors.

Heading into the vote, the team saw an opportunity in the market as the valuation gap between domestic UK and multi-nationals had reached historically extreme levels. On top of this, the FX market was indicating the likelihood of a 'Remain' result as Sterling strengthened during the week of the referendum and this opinion was also backed by the bookmakers (who usually seem to get it right). However, what many commentators missed was the large proportion of respondents in the polls who remained 'undecided'. It was the team's firm opinion that those 10-15% of undecided voters would vote for the status quo on the day. For this reason, the team were willing to make the bet that the Remain side would win the vote and positioned the portfolio to take advantage of opportunities that would arise from such a scenario.

Unfortunately, the team were wrong about the outcome of the vote, which cost the Fund on both the long and short side of the book. Whilst the team were not surprised by the magnitude of the falls in a number their UK domestic facing longs, it was the performance of some of the names on the short side of the book that was a surprised, and therefore increased the magnitude of losses over the vote.

In the second half of the year, Donald Trump's unforeseen victory in the US election again caught markets off guard. However, the initial volatility was brief as markets responded positively to his fiscal stimulus plans. Trump's victory led to increased risk appetite on account of increased growth expectations, which saw equities finish the year strongly while bond yields pushed higher. In Europe, the Italian PM Renzi reigned from his post in the wake of a devastating defeat in the referendum on constitutional reform. Furthermore, the ECB expanded their QE programme although the Euro inadvertently appreciated in spite of the central bank's actions. In the commodity complex, oil prices rose following an agreement by the OPEC oil cartel in union with non-members, to curb output.

While the Fund was negatively impacted by the Brexit vote and a lack of exposure to commodities during H1, the second half of the year saw the Fund recoup the majority of its losses. Whilst it is frustrating that the Fund did not make further progress, there are some positives to be taken from 2016. Firstly, the Fund has historically bounced back from losses and that was again the case this year meaning that drawdowns have been limited in both scale and duration. Secondly, in a year so driven by unexpected macro and geopolitical events, the Fund has protected capital. Thirdly, bar the situation around the Brexit vote, the short book has contributed significantly to the Fund this year both as a source of returns and as a way to limit volatility. Challenging years always offer plenty of insight into developing and improving the team's process and the main conclusion this year is to focus more on the individual shorts within the portfolio.

Furthermore, the nature of the Fund's strategy means that returns are rarely driven by the overall level of equity markets. The speed and scale of change at the stock and industry level means that the team continue to believe that a unit of risk is best used in backing their analysis of those changes rather than at the market level. This is especially the case as volatility looks likely to continue into 2017 with several European elections, most notably in Germany and France, as well as the ongoing process of implementing Brexit. Interest rates and inflation also remain at levels that do not necessarily mean that equity markets need to de-rate from their current multiples. However, in a cycle that has been so driven by historically low interest rates inflating valuations of many asset classes, the team believe the outlook for equity market performance going forward is quite balanced.

Finally, the volatility of the macroeconomic and political backdrop means that (generally) the team find better risk-reward opportunities at the stock level than they do thematically. As a result, entering 2017, the portfolio is reasonably balanced thematically and it is expected that the majority of performance will be driven by the team's bottom-up stock analysis. The outlook for improving growth and somewhat higher bond yields means that there are a number of 'value' opportunities, mainly in financials. However, given demographic headwinds and a high starting level of indebtedness, it is not clear that bond yields will move significantly higher in the medium-term. As a result, the team continue to hold a number of higher rated and higher quality stocks in the portfolio as they believe that the starting valuations of these positions are not unacceptably high and thus they should be capable of absorbing some further increase in bond yields.

Man GLG European Equity Alternative – Annual Report Commentary

<u>Overview</u>

2016 proved to be a challenging year for Man GLG European Equity Alternative (the 'Fund'). The first half of the year was plagued by difficult conditions for equity market neutral long short strategies, particularly the first two months of the year when macro themes dominated and investors experienced significant sector rotation and factor volatility. Although conditions improved during the second quarter, this was brought to an abrupt halt by the Brexit vote. Then, from Brexit vote onwards, investors faced a number of binary events throughout the second half of 2016 that arguably left investors more focused on capital preservation than delivering alpha.

Overall, we did a reasonably good job navigating our way through the difficult first two months of the year but did less well over Brexit, drawing down more than we would have liked in the two days after the referendum. Our Brexit drawdown required us to speed up some changes that were already in motion, not least improving the fund's risk management process, improving portfolio construction and focusing a greater portion of our risk on alpha (further details on these changes are provided below).

The post-Brexit period was one of recovery, executing on the improvements we wanted to make to the strategy and navigating our way through the remaining binary events, most notably the US Election, the Italian Referendum and pivotal central bank policy decisions in December. We think we did a better job managing through these latter events, making sure we kept our book level portfolio construction tight, complemented by prudent use of overlays at the fund level.

Investment Manager's Report (continued)

Man GLG European Equity Alternative - Annual Report Commentary (continued)

Performance

Given these challenging conditions, the Fund ended the year down -2.18% net of fees¹ in 2016.

Looking at book returns, we saw strong contributions from Speciality Consumer (+1.19%), Europe Midcap (+1.05%) and once again from our Event strategy (+1.05%). Returns from specific risk dominated the contributions from all three managers. We also saw solid contributions from our Industrials (+0.62%) and Consumer Trading (+0.44%) managers over the year. However, on the negative side, our Pharma (-1.16%), Financials (-0.88%) and Healthcare (-0.47%) managers found conditions tough. Clearly, conditions in the US healthcare sector have been challenging for a while and both of our managers that focused on the sector struggled to adapt to the increased regulatory focus and concerns over political intervention. As we discuss later, a number of our underperforming managers have since left the platform.

Our UK focused teams also had a difficult year with UK Core (-.66bp) having a rare negative year, suffering the bulk of their losses in the two days after the Brexit referendum. However, it has been pleasing to see how the book has recovered since Brexit, particularly with improved portfolio construction resulting in a greater focus on stock selection alpha. Despite a difficult year for our UK Core book, the manager remains one of our top performing strategies over recent years.

Turning to factor attribution, our returns from Specific risk were modestly positive over the year in what has been a difficult year for alpha generation in our strategy. However, our losses on factors, particularly Style risk factors, were unusually high in the first half of the year. There was, however, a material change in conditions and performance during the second half of the year. If the first half was characterised by a tough alpha creation environment and losses in predominantly volatile Style factors, the second half saw our alpha generation improve significantly, augmented by a helpful contribution from our modest Industry risk and by far tighter management of Style risk factors. Pleasingly, we have carried this positive momentum into the first few weeks of 2017.

A focus on specific risk

The losses the fund sustained over Brexit required us to execute with greater urgency and precision changes that had been in motion for the last twelve months. It highlighted to us the difficulty in predicting how factors might behave, particularly in response to shocks such as Brexit, and the dangers of having too much exposure to them. Analysis of historic performance showed that our returns from stock specific (or idiosyncratic) risk have been overwhelmingly superior to our returns on factors. As such, by increasing the portion of our risk in specific as opposed to factors, we hope to both improve returns and reduce the severity and length of drawdowns. This measure has been formally implemented in the final quarter of 2016: The fund seeks to operate with at least three quarters of its risk in specific (up from around 40-50% in prior years) and is attentively managed to this level through a combination, as necessary, of fund level hedges or book level intervention.

Furthermore, a number of measures have been implemented to ensure that the limited factor exposure we take is sufficiently well diversified. Consequently, a large move in any one factor or factor group is unlikely to unduly harm returns. We have also applied the same diversification concept to our specific risk, making sure it is sufficiently broadly distributed across a number of different companies so that we can more effectively monetise our stock selection skill.

Team changes

One result of increasing the emphasis on fundamental stock selection alpha, and reducing our exposure to factors, was that we made more changes to our portfolio manager roster than normal. In the final quarter of 2016, we de-allocated from ten developed strategies. For some managers this was for performance reasons, in others it was due to them having an investment process and/or portfolio construction that was inconsistent with our greater orientation towards specific risk and in some cases it was both.

Many of our investors may view this as an unusually aggressive restructuring of the portfolio management team when compared to recent history. However, as noted above, we felt it was in our investor's best interest to be both thoughtful and decisive in our actions, which we are confident we have been. We would like to make it clear though that this does not herald any change to the philosophy of the fund; our emphasis on collaboration underpins not just the Fund team, but the whole of Man GLG, and we remain strongly committed to our skills based approach to fund management and will continue to nurture and develop our portfolio management talent.

Despite the reduction in the number of developed strategies within the Fund, we remain strongly committed to investing in the Fund's platform. We continue to invest in our risk modelling, risk management, execution and quantitative research capabilities. Furthermore, we have added considerable analyst resources to our portfolio management teams. This represents a subtle change in approach from the past. We feel that adding analyst resources to our best stock pickers will allow them to expand their universe of stocks and provide us with a greater opportunity to leverage their stock picking skills. We believe this to be a more effective strategy than simply adding individual portfolio managers to the roster with no analyst support. Furthermore, as some of the analysts make the inevitable transition to portfolio manager in the years ahead, we will have the confidence that they have been well trained by our best stock pickers and will have accumulated a huge amount of information on their ability to pick winners and losers. A number of analysts have already been added to the team in Q4 2016 and more will be added in Q1 2017 and beyond.

This increased investment in analyst resources does not preclude adding fresh portfolio management talent for the platform in 2017 from external sources. We see a number of areas where we can improve our sector coverage that have significant alpha potential. We will continue to work closely with the firm's dedicated business development specialist to identify and selectively recruit leading portfolio management talent. Our platform continues to have significant appeal to the best portfolio management talent in the market due to our focus on collaboration, our investment in developing best-of-class portfolio construction and risk management tools for the team as well as our multi asset expertise across the broader GLG and Man platform. We believe that all of these factors combined make us a highly compelling destination for discerning and thoughtful portfolio management talent.

Investment Manager's Report (continued)

Man GLG European Equity Alternative – Annual Report Commentary (continued)

Management changes

Finally, there were also changes in the management team of the overall strategy during the year. Simon Savage moved on to Man Solutions to build out the Group's Alternative Beta offering. Pierre Lagrange, one of the co-founders of GLG, was appointed Senior Advisor to Man Group and Man GLG. It is great to have both of them still available to us so we can benefit from their tremendous insight. Fabian Blohm joined the firm from Citadel to become Co-Head of the Strategy, alongside Neil Mason who has been part of the Fund's management team since 2014. Juan Parra joined the firm to manage our Centre Book, a key initiative for the strategy, initially developed in partnership with our Man colleagues at Man Numeric and Man AHL. It is initiatives like this that demonstrate both the power of our collaborative approach and the benefits of being part of Man Group.

Looking ahead

As we start 2017, we are highly optimistic about the prospects for the strategy. The changes implemented post-Brexit has helped to deliver respectable performance in the second half of 2016 and that momentum has continued into the first few weeks of 2017. With the fund's risk focused on the team's demonstrable strength in fundamental stock selection and our improved risk management framework now fully operational, we think we are excellently positioned to capitalise on equity dispersion going forward.

¹ Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. The net returns are calculated net of management fees of 2% per annum and, as applicable, performance fees of 20% of the amount by which the Fund exceeds its relevant hurdle. Please note that some share classes may charge higher management fees.

Man GLG Global Equity Alternative – Annual Report Commentary

<u>Overview</u>

2016 proved to be a challenging year for the Man GLG Global Equity Alternative Fund. The first half of the year was plagued by difficult conditions for equity market neutral long short strategies, particularly the first two months of the year when macro themes dominated and investors experienced significant sector rotation and factor volatility. Although conditions improved during the second quarter, this was brought to an abrupt halt by Brexit. Then, from Brexit onwards, investors faced a number of binary events throughout the second half of 2016 that arguably left investors more focused on capital preservation than delivering alpha.

Overall, we did a reasonably good job navigating our way through the difficult first two months of the year but did less well over Brexit, drawing down more than we should have in the two days after the referendum. Our Brexit drawdown required us to speed up some changes that were already in motion, not least improving the fund's risk management process, improving portfolio construction and focusing a greater portion of our risk on alpha (further details on these changes are provided below).

The post-Brexit period was one of recovery, executing on the improvements we wanted to make to the strategy and navigating our way through the remaining binary events, most notably the US Election, the Italian Referendum and pivotal central bank policy decisions in December. We think we did a better job managing through these latter events, making sure we kept our book level portfolio construction tight, complemented by prudent use of overlays at the fund level.

Performance

Given these challenging conditions, the Man GLG Global Equity Alternative Fund (the 'Fund') ended the year down -1.96% in 2016.

Looking at book returns, we saw strong contributions from Speciality Consumer (+119bp), Europe Midcap (+105bp) and once again from our Event strategy (+105bp). Returns from specific risk dominated the contributions from all three managers. We also saw solid contributions from our Industrials (+62bp) and Consumer Trading (+44bp) managers over the year. However, on the negative side, our Pharma (-116bp), Financials (-88bp) and Healthcare (-47bp) managers found conditions tough. Clearly, conditions in the US healthcare sector have been challenging for a while and both of our managers that focused on the sector struggled to adapt to the increased regulatory focus and concerns over political intervention. As we discuss later, a number of our underperforming managers have since left the platform.

Our UK focused teams also had a difficult year with UK Core (-66bp) having a rare negative year, suffering the bulk of their losses in the two days after the Brexit referendum. However, it has been pleasing to see how the book has recovered since Brexit, particularly with improved portfolio construction resulting in a greater focus on stock selection alpha. Despite a difficult year for our UK Core book, the manager remains one of our top performing strategies over recent years.

Turning to factor attribution, our returns from Specific risk were modestly positive over the year in what has been a difficult year for alpha generation in our strategy. However, our losses on factors, particularly Style risk factors, were unacceptably high in the first half of the year. There was, however, a material change in conditions and performance during the second half of the year. Despite the reduction in the number of developed strategies within the Fund, we remain strongly committed to investing in the Fund's platform. We continue to invest in our risk modelling, risk management, execution and quantitative research capabilities. Furthermore, we have added considerable analyst resources to our portfolio management teams. This represents a subtle change in approach from the past. We feel that adding analyst resources to our best stock pickers will allow them to expand their universe of stocks and provide us with a greater opportunity to leverage their stock picking skills. We believe this to be a more effective strategy than simply adding individual portfolio managers to the roster with no analyst support. Furthermore, as some of the analysts make the inevitable transition to portfolio manager in the years ahead, we will have the confidence that they have been well trained by our best stock pickers and will have accumulated a huge amount of information on their ability to pick winners and losers. A number of analysts have already been added to the team in Q4 2016 and more will be added in Q1 2017 and beyond.

This increased investment in analyst resources does not preclude adding fresh portfolio management talent for the platform in 2017 from external sources. We see a number of areas where we can improve our sector coverage that have significant alpha potential. We will continue to work closely with the firm's dedicated business development specialist to identify and selectively recruit leading portfolio management talent. Our platform continues to have significant appeal to the best portfolio management talent in the market due to our focus on collaboration, our investment in developing best-of-class portfolio construction and risk management tools for the team as well as our multi asset expertise across the broader GLG and Man platform. All of these factors combined make us a highly compelling destination for discerning and thoughtful portfolio management talent.

Management changes

Finally, there were also changes in the management team of the overall strategy during the year. Simon Savage moved on to Man Solutions to build out the Group's Alternative Beta offering. Pierre Lagrange, one of the co-founders of GLG, was appointed Senior Advisor to Man Group and Man GLG. It is great to have both of them still available to us so we can benefit from their tremendous insight. Fabian Blohm joined the firm from Citadel to become Co-Head of the Strategy, alongside Neil Mason who has been part of the Fund's management team since 2014. Juan Parra joined the firm to manage our Centre Book, a key initiative for the strategy, initially developed in partnership with our Man colleagues at Numeric and AHL. It is initiatives like this that demonstrate both the power of our collaborative approach and the benefits of being part of Man Group.

Looking ahead

As we start 2017, we are highly optimistic about the prospects for the strategy. The changes implemented post-Brexit has helped to deliver respectable performance in the second half of 2016 and that momentum has continued into the first few weeks of 2017. With the fund's risk focused on the team's demonstrable strength in fundamental stock selection and our improved risk management framework now fully operational, we think we are excellently positioned to capitalise on equity dispersion going forward.

Man GLG European Alpha Alternative Enhanced – Annual Report Commentary

Man GLG European Alpha Alternative Enhanced (the "Fund") was down 2.71% in 2016.

Stock selection was positive while sector attribution, hedge selection and market attribution were negative.

The Fund's management team were changed in December, with Philippe Isvy and Pierre Valade making way for Jean-Robin Peters.

Whilst the strategy of the new management team differs, the objectives of the Fund remain identical – namely low volatility returns with limited net exposure.

Market and Fund Outlook

2016 saw a mixed equity performance across regions with the S&P/US +9.5%, SXXP/Europe -1.2%, Nikkei/Japan +0.4%, MSCI Asia Pacific excl. Japan +3.7% and MSCI Emerging Markets +8.6%.

Investment Manager's Report (continued)

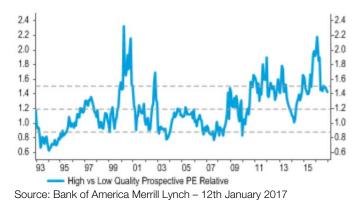

Man GLG European Alpha Alternative Enhanced - Annual Report Commentary (continued)

Within Europe, sector performance was very diverse as can be seen in the table below:

Sector	Ticker	Absolute
Basic Resources	SXPP	61.9%
Oil & Gas	SXEP	22.9%
Construction & Materials	SXOP	9.2%
Industrial Goods & Services	SXNP	8.5%
Chemicals	SX4P	3.9%
Technology	SX8P	3.4%
Personal & Household Goods	SXQP	2.0%
Automobiles & Parts	SXAP	-3.9%
Food & Beverage	SX3P	-5.4%
Insurance	SXIP	-5.6%
Retail	SXRP	-6.7%
Banks	SX7P	-6.8%
Financial Services	SXFP	-7.4%
Media	SXMP	-7.6%
Real Estate	SX86P	-8.0%
Utilities	SX6P	-8.9%
Health Care	SXDP	-10.2%
Travel & Leisure	SXTP	-11.1%
Telecommunications	SXKP	-15.8%

The year was littered with political events, together with changing interest rate expectations. The election of Donald Trump as President of the United States proved a catalyst for "recovery style" stocks, and thus a sharp rally in value stocks at the expense of high quality stocks in the last quarter of the year; as expressed by the chart below:

High vs. Low Quality stocks '12m Fwd P/E

Fund Positioning

While the new management team's strategy slightly differs from that of Philippe and Pierre's, stock selection remains the key expected driver of returns for the new team in FY17. The team's key focus is on discovering companies with inflecting or accelerating/decelerating earnings growth profiles. Whilst political risks remain with both French and German elections upcoming, together with the unknown that is the UK's exit path away from the European Union, the process in place ought to be well calibrated to exploit the opportunities that we see ahead.

Investment Manager's Report (continued)

Man GLG Cred-Eq Alternative – Annual Report Commentary

Performance Summary

Man GLG Cred-Eq Alternative, "the Fund", posted a net return of negative 2.62% in 2016 after management fees.

Market Review

Markets in 2016 were driven by central banks and political developments. Notable events included the U.S election and Brexit which both caused significant uncertainty and volatility. There was also a Fed rate hike and an eventual OPEC output cut for markets to digest. Markets started 2016 very much on the back foot as risk assets tumbled from day one with sentiment impacted by the continuing oil price slide, China worries and broader global growth concerns. In Europe the ECB expanded their asset purchase program to include corporate bonds – their first foray into the private unsecured market. The macroeconomic backdrop towards the end of the year was defined by the U.S election and the surprise result ignited a number of global market moves. The Fed also implemented a widely expected 25bps rate hike in December, marking its first increase in 12 months. A more hawkish than anticipated tone emerged from the meeting as policymakers now forecast 3 rate hikes in 2017, up from 2 previously, on continued improvements in the labour market and the U.S economy overall. In terms of overall asset returns for 2016, a standout performer was oil (WTI) which staged a strong recovery after falling to multi-year lows in February and finished the year up 45%. In the rates space returns were fairly unexciting though UK Gilts were the clear underperformed and fell 7% in USD terms. However, given the 16% post-Brexit depreciation of GBP versus USD, Gilts actually returned 11% in local currency terms. European financials (SX7E Index) and Italy (FTSEMIB Index) were the weakest performers in the equity space, finishing down 8% and 10%, respectively, after being down as much as 30% and 20%, respectively, at the end of 1H. In credit, US HY (BUHY Index) was the big winner and gained 17.5%, helped in particular by the large move higher in energy prices which boosted credits in that sector. Higher beta credits also outperformed their IG-rated peers in Europe.

Fund Performance

Despite posting ten months of consecutive positive performance, the fund unfortunately ended 2016 in negative territory after suffering heavy losses in the first month of the year. January was a difficult month for a lot of investors as markets remained weak following the soft end to 2015, driven by growing fears of a slowdown in China and an ongoing slide in oil prices. Positive contributors to fund performance included a hedged position in NetSuite convertible bonds, active trading in a basket of European financial equities, and a long position in Maurel et Prom convertibles. Conversely, negative performance was driven by a long position in Aabar convertible bonds, a long position in Telecom Italia equities, and a long position in RBS equity. All three of the biggest losers were due to performance in the months of January and February. The NetSuite position made money after the company was acquired by Oracle and the embedded change of control provision kicked in to increase the final conversion ratio. The fund enhanced its returns from this position by dynamically trading the equity delta as expectations over the likelihood the deal would close continued to change. The fund made money in European financials after twice buying the stocks on a sell-off ahead of a broader rally in the sector from mid-year onwards. Lastly, Maurel bonds made money after a key shareholder made an offer to acquire the whole company and simultaneously offered to repurchase the bonds at par. When the deal was first announced in July the bonds jumped almost 40% in one day. On the other hand, as mentioned previously, the biggest losses came in January and February. Aabar bonds, exchangeable into shares of Italian bank Unicredit, fell steeply as Italian banks fell anywhere between 30-50% in January on concerns over the level of non-performing loans (NPLs) and the potential for bail-ins. Although Italy later reached a deal with the EU on a new government guarantee scheme to manage the NPLs, there were some concerns that the planned programme might be too small. The bonds also cheapened as non-vanilla and non-IG names were hit hardest in the month. The Telecom Italia position lost money as the shares fell 13% in January and underperformed the broader market after management played down speculation surrounding the possible merger between their Brazilian arm and Oi in Brazil, and a deal with Orange in Europe. Finally, to compound the weakness in European financials at the start of the year, RBS issued a surprise profit warning on pension, RMBS litigation and conduct charges. This impacted the fund's long position in RBS equity and there was also some read-across to Lloyds equity, also held by the fund, which fell on concerns over the viability of dividends in the near-term.

In the primary convertible bond market 2016 saw 87 new deals (Source: "Prospect News, Convertibles Daily") in the US worth a combined \$35bn and 48 deals in Europe totalling \$27bn. This compares with last year's figures of 93 deals worth \$40bn, and 44 deals worth a combined \$25bn, in the US and Europe, respectively.

2017 Outlook

Looking ahead to 2017 we expect that asset returns will continue to be dominated by political developments and monetary policy changes. Trump's election win in the US adds to the uncertainty given the sheer number of policy changes he has talked about making. While this of course presents challenges, we are optimistic that it also means there will be plenty of opportunities to make strong returns in 2017. As far as the convertible bond asset class is concerned, despite 2016 volumes being down slightly on 2015 levels, we are constructive on the outlook for primary issuance volumes in 2017 given the supportive environment of rising US rates, ongoing M&A activity, and recent strength in equity markets.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations.

Man GLG European Mid-Cap Equity Alternative – Annual Report Commentary

The political and economic backdrop was challenging for Hedge Funds in 2016. Although the year was ultimately defined by the surprise Brexit vote in the UK and the shock election win by President Donald Trump in the US there were many other potential political roadbumps along the way including the Italian election. During the year we also witnessed two major phases of significant hedge fund de-leveraging (February and June) where stock prices were predominately driven by liquidity as opposed to fundamental factors. It was also a year where consensus investor positioning was exposed and significant sector and style rotation caught out many managers who found themselves overexposed to quality stocks and defensive bond proxies and underexposed to low quality value stocks, energy related companies and Financials. This was particularly relevant during the post Trump election rally in the fourth quarter of the year. One consensual trade continued to work as the Dollar also continued to rally against most developed currencies.

Investment Manager's Report (continued)

Man GLG European Mid-Cap Equity Alternative – Annual Report Commentary

We build our portfolios from the bottom up and we control the sector risk, country risk and other risks that are not stock specific. This should limit the potential impact from sharp rotations as seen in 2016. We are also running low market exposure which means the fund returns generally exhibit low correlation with market returns.

Our performance in 2016 was primarily driven by positive stock specific factors and we were also impacted slightly positively by our market and industry positioning. In contrast we were impacted slightly negatively by our country weights and by non-stock-specific style factors such as our small net short in low valuation companies.

We continue to believe our asset class is becoming increasingly inefficient. This is because of the structural changes that are taking place on the sell side which means there are fewer research analysts researching companies in the Mid Cap space. The remaining analysts have also been forced to move up the market cap range to larger companies and are also now covering many more stocks which means the breadth and quality of the research being produced has deteriorated. This represents continued opportunity for us.

The primary positive contributors to stock specific returns are disclosed in the table below.

			Impact	
			(Gross	
F	Long / Chart	No	return	Commonton
<u>op 5</u>	Long / Short		bps)	<u>Commentary</u>

	5 51011	company	-50	cost saving programme kicked m

As we start 2017 we would like to take this opportunity to wish our investors a happy New Year and to express our thanks to you for your support.

We are optimistic for the year ahead: after a period where stocks have been driven by macro factors and a sharp sector rotation we expect that stock specific and fundamental driven analysis will yield significant investment opportunities. We are confident our repeatable and disciplined process will continue to provide alpha generating ideas.

Man GLG Unconstrained Emerging Equity – Annual Report Commentary

PERFORMANCE SUMMARY

The Fund gained 5.31% (USD) and 8.56% (EUR) over the year of 2016. By comparison, the Fund's benchmark, the MSCI Emerging Markets TR index, gained 11.19% (USD) and 14.55% (EUR) respectively. This underperformance needs, in our view, to be seen in the context of a market which was dominated by passive flows and the by the outperformance of 'value' stocks. In these circumstances, underperformance by the Fund is within anticipated bounds given the Fund's clear style as active, concentrated and focused on quality, growth stocks.

Investment Manager's Report (continued)

Man GLG Unconstrained Emerging Equity – Annual Report Commentary

MARKET SUMMARY

2016 was the sixth year in succession that Emerging Markets ('EM') underperformed Developed Markets ('DM'), however for the first year in four EM rose in absolute terms. Indeed, until the US election result in November sparked off significant outperformance by US markets in particular, EM had outperformed DM by almost 10%. This improved performance in EM is, we believe, the result of the factors below:

- Despite a resumption of US dollar strength post the US elections, highly volatile asset classes such as commodities and high-yield bonds had a very good year. EM has historically been correlated with these asset classes.
- The Chinese economy was more resilient in 2016 than expected, with credit growth, the housing market and infrastructure development proving supportive. Capital flight out of China also appeared to have been brought under control by the authorities. In these circumstances, the concerns over China that had proved a hurdle to performance in EM in 2015 largely dissipated.
- In certain other major EM's, political developments were more favourable than in 2015. This was notably the case in Brazil, where a new government took power after the impeachment of President Rousseff, and signalled its commitment to reform. In India, the government took drastic structural measures to attempt to improve the formalisation of the economy and improve its tax base.

KEY POSITIONS

The Fund's investment style can be characterised as 'quality growth at a reasonable price', meaning that the Managers seek out investment opportunities in businesses which they perceive to have good growth prospects and the ability to finance that growth through internal cash flow and solid balance sheets, but whose shares have upside potential on valuation grounds. Thus the average weighted return on invested capital of the Fund's was significantly higher than that of the benchmark, but the Fund had lower debt to equity and a lower free cash-flow based valuation, on average. These investments are made across a concentrated portfolio that comprised 45 companies at the end of the period, with the five largest positions being ITC Limited (consumer goods, India), Check Point Software (security software, Israel), FEMSA (consumer goods, Mexico), Korea Zinc (metals processing, Korea) and Tencent Holdings (internet, China). The largest country allocation was to India (19.9% of the Fund), followed by China (18.9% of the Fund, of which 7.8% to domestic shares).

MARKET / FUND OUTLOOK

The managers do not anticipate that the bias towards value and benchmarking so prevalent in 2016 will remain so extreme in the future. The managers have seen such periods before and their experience is that such periods of intense style concentration can create contrarian opportunities to reinforce positions in existing position which are 'out of favour'. Furthermore, the managers continue to believe that China's long-term growth will inexorably decline and that this will provide a ceiling to the performance of commodities and cyclical assets. Nevertheless, the managers remain positive on the opportunities of investment in a variety of EM markets. Sentiment towards emerging markets still remains depressed compared to that towards the US. The Managers believe that valuations in EM appear to be particularly attractive when adjusted for the cyclically low level of earnings in emerging markets. Thus, we remain fundamentally optimistic that investment in good emerging market companies at today's depressed prices will prove rewarding to the long-term investor.

Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Performance data is shown net of fees with income reinvested, and does not take into account sales and redemption charges where such costs are applicable.

Man GLG Global Emerging Markets Debt Total Return – Annual Report Commentary

Market Review

Emerging Market (EM) Hard Currency (H.C.) and EM local currency segment (L.C.), as measured by JP Morgan Emerging Market Bond Index Global (JPM EMBIG) and JP Morgan Government Bond Index Emerging Market Global Diversified (JPM GBI-EM GD) were up by an impressive 10.19% and 9.94% in 2016. Improved EM economic fundamentals, after five years of an economic slowdown, EM currency depreciation and policy adjustment, allowed the EM markets to ripe the benefits of the environment of global search for yield, amid the still expansionary G-3 monetary policy regimes.

The performance, was more muted since the Man GLG Global Emerging Markets Debt EMD total return fund (the Fund) was launched in 3 May 2016, with the JPM EMBIG and JPM GBI-EM GD returning -3.45% and +2.76%, respectively. Even so, the market showed a remarkable level of resilience in the face of various potential disruptive events, coming from the European Union (the Brexit vote, the recapitalisation of Italian banks, the Italian constitutional referendum, and the Hungarian referendum about EU refugee quotas), the U.S. presidential election in November and the subsequent surge in U.S. yields.

Performance in 2016, was also unabated by the political noise coming from some of EM countries such as, the 1MDB corruption scandal in Malaysia, the corruption scandal and impeachment of Dilma Rousseff in Brazil, the military coup attempt in Turkey, the political fighting between Jacob Zuma and Pravin Gordhan in South Africa, or the devaluation of the Nigerian naira.

PERFORMANCE

The fund in the 8 months since inception to year end, returned net of fees $+5.76\%^1$, in a period that the blend of the index for the EM Hard currency and Local Currency² returned -0.34%, and with volatility of returns that was about half of that of the blend (4.5% versus 8.4%).

About 78% of this return was originated by the active management of its EM currency positions³, with the biggest contributors to performance being the long exposure to the ZAR, BRL and COP, and the short position to the TRY. The long to the MXN was the major detractor in the L. C. segment.

In the H.C. the largest contributors to performance were the long exposures to Mexico, Colombia, Argentina, Brazil, while the largest detractors were the short exposure to Russia, Kazakhstan and Lebanon.

Investment Manager's Report (continued)

Man GLG Global Emerging Markets Debt Total Return - Annual Report Commentary (continued)

PERFORMANCE

Interesting to note, that when the blend of the EM Hard Currency and Local Currency indexes moved up, between June and November, the Fund captured 75% of that upside. However, it avoided, to a great extent, the drawdowns of the months of May and November, where the blend was down by -1.3% and -5.9% respectively, and the Fund dropped by just -0.1% and -0.5%, respectively. This is synchrony with the aim of the strategy of maximizing upside capture while minimizing the downsize capture in the blend of external and local debt benchmarks, thus seeking to deliver positive absolute returns while reducing volatility normally associated with emerging markets.

Fund Activity:

During most of 2016, the Fund ran a conservative position in the H.C space, as we saw very limited upside to returns coming from further yield compression and believed that the deteriorating credit quality of some of its components was not fully reflected in the level of EM spreads⁴. As a result, the Fund in this segment was skewed towards the short end ⁵, where the movement of pull-to-par offered protection from a potential upward move in USD interest rates and volatility in EM spreads. Duration weighted exposure (DWE) was low, ranging throughout the year from -0.25 years to 1.1 years, while credit spread duration (Spread DWE) ⁶ exposure ranged from -0.7 years to 1.3 years. In December we increased the DWE of the fund from 1.1 years to 1.9 years, while we kept the Spread DWE stable at 0.7 years. This reflected our view that US Treasury yields, having increased about 0.80% in the last quarter of 2016, had some ground to stabilise in the short term, while, in contrast, EM spreads, that in the same period only moved 0.05% wider, were more vulnerable to a correction.

Throughout last year, we remained more constructive on L.C. and fairly positive on some important segments in this space. From a fundamental perspective, the flexible exchange rate regimes allowed these countries, through currency depreciation, to substantially improve their current accounts and, by extension, their balance of payments. On valuations, the JPM GBI EM GD weighted bilateral real exchange rate closed 2016 trading below the levels seen during the 2008 Great Financial crisis. Lastly, market positioning remained much cleaner in this segment of the asset class with market risk concentration by professional managers significantly underinvested or outright short.

¹ USD Institutional share class, ISIN: IE00BD3B6F79. Returns are net calculated and are up to December 30th 2016. Please note that past performance is no indicator of future performance.

² Measured as 50% JPM EMBIG and 50% JPM GBI-EM GD.

³ At end of December 2016, the fund had a 50% net long exposure in local markets. Average since inception has been 37% net long invested position.

⁴ Measured as the difference between the yield of JPM EMBIG and the yield of U.S. Treasuries.

⁵ External debt portion at the end of 2016 was 52%. Average since inception was 33% net long invested position.

⁶ Spread duration is a measure of a bond's price sensitivity to spread changes (estimate of how much the price of a specific bond will move when the spread of that specific bond changes). In this event, the Fund was underweight in Spread duration as the spread duration of its portfolio was lower than that of its benchmark.

While most currencies in JPM GBI EM currency seemed to be on the cheap side versus the USD, the MXN stood out as the cheapest, with the real effective exchange rate at a level similar to the prevailing just after the Tequila crisis, back in 1995, when the country's fundamentals were considerably worse. In addition to the MXN, our other key long FX positions at the end of 2016 were ZAR, COP and the BRL.

Outlook:

We expect EM market conditions to remain volatile in 2017, given the increased political uncertainty globally on the back of Trump's victory and upcoming European elections, shifting monetary policy in U.S., and rising U.S. Treasury yields. However, we are constructive on the segment overall as EM real GDP growth is expected to rise in 2017 and 2018, outlook for oil and other commodities is more stable (versus same time last year) and valuations may become more attractive as volatility unfolds.

We view local currency instruments as one of the few areas within the EM debt universe that are attractively valued, supported by fundamentals, relatively underinvested, offers an attractive yield, and gives the potential for capital gains if our assumptions prove to be correct.

We believe that EM currencies are mispriced because the majority of investors who historically took exposure to them did so during the period when valuations were at their peak. When these currencies depreciated to allow EM economies to adjust to the reality of a slower Chinese and Global economy, these investors experienced extremely painful losses which subsequently led to outflows and unusually clean market positioning.

We also believe that the case for hard currency debt has improved, although the path will be bumpier than what investors have been used in the past. EM external debt yields, having risen over 0.90% since their minimum in September 2016, are becoming more attractive. Given our expectation that U.S. yields should continue to gradually normalise, we believe the short-end of hard currency curve of countries with strong balance sheet and floating currency regime may offer attractive risk adjusted carry.

EM spreads, on the other hand, remain at historical tight levels and may be more vulnerable to a correction. We think that one of the key drivers behind a potential rise in EM spreads could be losses coming from credit stress events in countries with fragile fundamentals (commodity dependent countries, with apparently strong balance sheets but heavily managed currency regimes) which we believe will happen with increasing regularity.

Market positioning in H.C. seems cleaner, despite the strong showing in EM hard currency new issuance in 2016 that is showing no signs of abating as we started 2017. Particularly, the Beta to benchmark of the largest H.C. mutual funds that peaked in mid-2016 at a level around 2, coming down to 1 as we approached year end. Likewise, year-to-date EM H.C. fund flows that peaked at around USD 43.2 billion at the time of U.S. elections, closed the year at a still strong, but more modest, USD33.6bn.

In this environment, an investment approach combining flexibility, selectivity and focus on downside protection, such as the one of this Fund, is crucial.

Investment Manager's Report (continued)

Man GLG Global Fundamental Equity – Annual Report Commentary (continued)

Performance and Market: the Equity Hedge fund index (HFRXEH Index)¹ returned +0.18% in Dec-2016. The fund only commenced operation on 29-Dec-2016 and there were only cashflows coming in with no equity positions at the end of 2016. Therefore the fund performance and contribution breakdown are not available for Dec-2016. The Fund started investing in equities in mid-January 2017. **Fund Performance:** N/A

Contribution Breakdown: N/A

Outlook: Currently we are focused on 4th quarter of 2016 earnings season and aiming to take advantage of situations where market expectations appear to be missing core micro fundamental changes. We have been selectively using options when appropriate to further isolate the event to strive to be more capitally efficient in seeking Alpha during earnings season when our theses are often tested.

Retail Outlook

We think the sentiment around France election is too negative. We expect French retailers to benefits from food inflation in second half year of 2017 which should be a positive for French Food Retailers gross margin and free cash flow.

Chemicals Outlook

We expect significant earnings upgrades for midstream and upstream players. We are less excited by downstream players where we see elevated valuation and gross margin pressure due to sharp oil price recovery and other inputs pressure such as TiO2. However, we still like selected consumer downstream producers such as some paint companies or Fragrance and Flavours companies.

Fertilizers Outlook

We believe Urea and Potash will continue to generate limited cash due to incremental capacities being ramped up in North America. We are getting more constructive on end-demand but we see better entry points in second half year of 2017 or first half year of 2018. Automotive Outlook

We are getting less constructive on OEM's due to (1) demand normalization in China and North America; and (2) raw materials headwind (1 ton of steel and 2 oil barrels per vehicle).

We think earnings and cash growth should be very limited in 2017. We recently turned net negative on the automotive sector.

Steels/Construction

We are constructive on European and Asian steel makers which we believe should improve their cash generation from 2nd quarter of 2017 onwards driven by 200euro/ton increase year-on-year.

<u>Transports</u>

We like cheap European long haul carriers exposed to Asian routes which we believe should benefit from yields improvement driven by better traffic. We are less constructive on European budget long and short hauls.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

Performance and Market: the Equity Hedge fund index (HFRXEH Index) ¹ returned +0.18% in Dec-2016. The Fund only commenced operation on 29 December 2016 and there was only cashflows coming in with no equity positions at the end of 2016. Therefore the Fund performance and contribution breakdown are not available for Dec-2016. The Fund started investing in equities in early January 2017.

Fund Performance: N/A

Contribution Breakdown: N/A

Outlook: Currently we are focused on 4th quarter of 2016 earnings season and aiming to take advantage of situations where market expectations appear to be missing core micro fundamental changes. We look to selectively using options when appropriate to further isolate the event to strive to be more capitally efficient in seeking Alpha during earnings season when our theses are often tested.

Looking forward, we see lots of change/disruption of various durations some driven by technology, consumer behaviour but also others driven by potential changes in policies arising from regime change. Our process is designed to look for situations where change is mispriced and we look forward to opportunities to monetise these disconnects especially as earnings season approaches in January.

The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

¹Please note that the HFRXEH Index is not a formal benchmark and does not form part of the Fund's investment objectives or investment policy.

For all the sub-funds past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Performance is net of all fees. The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Investment Manager's Report (continued)

Man AHL Multi Strategy Alternative - Annual Report Commentary

The AHL Multi Strategy Programme ('AMS') made a small positive return for 2016, performing broadly in line with the HFRX Global Hedge Fund Index and out-performing the Barclay BTOP50 Index. The year was, in general, a challenging one for hedge funds and a good year for equities, which recovered well after a difficult start. Many of the models that were added into AMS most recently, especially new machine learning models, performed well which gives us confidence for the future given our substantial investment in this area.

Market summary

In 2016 the twin shocks of Brexit and the US election heralded the rise of a new 'populism', as discontented voters railed against the status quo. Arguably, the long term geopolitical impact could be deeper, longer and more uncertain than the immediate effect on markets would suggest. Major equity indices, in particular, shrugged off both events to have a solid year once they had recovered from their rocky start. Currencies were a little more reflective of events as Sterling became the major casualty of the Brexit vote and the Dollar the primary beneficiary of the US election.

Performance review by style

Of the five styles comprising AMS, Fundamental trading was the best performing style with Systematic Equity and Volatility both making solid positive contributions. Momentum recorded a small loss for the year and technical trading faced more challenging conditions to incur a larger loss.

The fundamental component of the programme consists of a wide variety of fundamental and economic models trading futures and forwards across a broad range of stock index, fixed income and currency markets. At the start of the year, declining yields provided a profitable environment for carry-based fixed income models, whilst the relative value stock index trading model had a great run in the latter half of the year.

In volatility trading, models mostly found opportunity on the short side this year, although we note that long volatility positions in, for example, Nikkei in April were profitable. Despite the effect of two sizeable shocks, volatility trading remained solidly up for the year as profit accrued in the run-up to both events proved a sufficient cushion.

The equity component consists of an equity market neutral model across four global regions and an alpha capture model generating trading signals from broker recommendations. Equity market neutral had a mixed year but ended slightly up, largely thanks to a late surge by the US model. The alpha capture models had a good year, despite being hit by widespread reversals following the US election.

Momentum trading within the programme comprises both traditional futures and forwards trend-following and more recent innovations such as trading individual cash equity sectors. Momentum trading had a somewhat frustrating year in which many markets lacked consistent direction. Fixed income provided some fertile ground with rallying bonds early in the year and the sell-off at the end of the year. In currencies, choppy price action early in the year gave way to a strong Dollar rally following the US election which provided a welcome boost towards the end of the year.

The technical trading component comprises a diverse set of signals, often with relatively short holding periods, trading on the most liquid futures and forwards. Technical trading was by far the most challenging area in 2016. In particular, short term breakout signals struggled around events in which potential breakout events failed to follow through in subsequent price action. On the bright side, the newer machine learning predictors performed very well.

OUTLOOK FOR 2017

The outlook for global markets remains highly uncertain, with significant political upheaval possible across the US, Europe, and beyond, with potentially significant ramifications for global markets. We believe the diverse alpha streams within the AHL Multi Strategy Programme should serve to insulate investors from this uncertainty whilst continuous improvement across all investment styles is designed to give us the best possible chance of performing in an uncertain world.

Man AHL TargetRisk – Annual Report Commentary

All sectors and nearly all markets added value this year, but importantly not all at the same time. We saw good diversification when some sectors were not working others help deliver strong performance. The end result was strong positive performance for 2016.

The top sector was fixed income which started off the year strong during the sell off and Brexit referendum but suffered in the last quarter after the US elections in particular. The world bond index ended up 2.1% for the year. The top markets in the sector were both UK notional and inflation protected bonds that did especially well after the referendum. US Treasuries gave back nearly all of their performance after the election and ended up being some of the most challenging markets by the end of the year. Despite some performance give back in the last quarter the sector still managed to attribute 4.4%.

Despite the selloff in Q1, equities stormed back and ended the year strongly notably the US and UK equity markets. The world index ended up 7.5%, but made nearly all of its gains in the second half of the year. In TargetRisk, equities ended up attributing 4.0% for the year.

Commodities had a strong recovery in Q2 as oil recovered from two strong years of sell offs. OPEC agreed on production cuts over the year plus expectation of growth caused the commodity and most energy markets to raise over the course of the year. As a result commodities netted the fund 1.8%.

Credit markets following a similar behaviour as equities also ended the year strongly. US High Yield was helped by the recovery in the oil markets as many of the names are tied to the energy sector. As a whole the sector was up 1.8% for the year.

Investment Manager's Report (continued)

Man AHL Volatility Alternative- Annual Report Commentary

While the first half of 2016 was characterised by market fluctuations and several quickly-reverting jumps in implied volatilities, the second half enjoyed long periods of range-bound markets and relatively stable implied volatilities. Realised volatilities returned to medium-run lows after the Brexit referendum, especially in US and European equity markets, where the term structure of implied volatility steepened substantially. The VIX index fell to just above 11 points in August and December, and the 3-month basis of the VIX futures rose from just under 1 vol point at the beginning of the year to over 4 at the beginning of July. Later events, such as the negative result of the Italian constitutional referendum and the surprise result of the US election, had surprisingly little long-term impact on the level of equity markets or perceived market risks. The largest move in the second half of the year came from the rise in US treasury yields as traders priced in an expectation of fiscal stimulus from the Trump administration.

As a result, while the fund lost 1.5% in the first half of the year, the second half of the year was highly profitable, as it realised just over 4.5%, for an annual return of 3%. Both the gamma and vega strategies contributed positive P&L over the course of the year, with the vega strategy profitable in both halves of the year while the gamma strategy underperformed in the first half, but erased the losses and outperformed the vega strategy in the second half. The source of the vega strategy's performance was likewise divided between halves of the year, with the fall in overall volatility levels providing the positive returns in the first half while it primarily profited from the steepness of the term structure in the second half.

Within the gamma strategy, the equities sector stood out as the best performer, with the S&P leading over the entire year, followed by the DAX and FTSE, which also performed well in the second half of the year. The few exceptions to the strong performance in the equities sector were in Asia, where the gamma strategy was profitable during the second half of the year but only partially recovered from underperformance in that region during the month of January. The fixed income sector also ended the year with positive performance, despite taking some losses in the sharp rise in bond yields after the election of Trump. The only sector with negative performance in the gamma strategy was FX, which ended the year slightly negative, primarily due to losses in "safe haven" currency crosses during Brexit.

For all the sub-funds past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Performance is net of all fees. The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

Investment Manager's Report (continued)

Man Numeric Market Neutral Alternative – Annual Report Commentary

Market Overview

After a tumultuous first quarter, in which equity markets fell sharply then subsequently rebounded, global equity markets stabilized in the second quarter. That is until the results of the June 23rd UK referendum (aka Brexit) were known. Central Banks were also active early in the year, as the Bank of Japan instituted negative interest rates and the European Central Bank implemented another round of quantitative easing. During the third quarter, US equity market gains were broad-based, with seven of ten economic sectors within the S&P 500 Index generating positive returns. Emerging equity markets, which have led the global stock markets higher all year, were strong during the third quarter as well and retained their pole position for the full year period. President Trump's surprise election in early November initially brought about a sharp sell-off in global equities, but quickly turned into a market rally, particularly in the US. There was a broad divergence of outcomes across geographies and asset classes. US interest rates moved sharply higher, as investors started to quantitative easing. The USD Index strengthened to its highest level since 2002 by the end of the year, as investors anticipate the end of quantitative easing.

Performance Commentary

For the twelve month period ending December 31, 2016, the Man Numeric Market Neutral Alternative IN USD (the "Fund") return was 3.70% net of fees. The fund is comprised of three complementary components; Diversified Market Neutral ("DMN"), Fundamental Statistical Arbitrage ("FSA") and the Innovation Portfolio ("IP"). During this reporting period, all three components contributed to performance.

The DMN component was the main driver of the positive performance, as six of eight of our portfolios within DMN had positive returns. The IP component was up primarily due to favorable performance from the Retail, Dislocation, Skew, and REITs sleeves. The FSA component also contributed slightly to performance for the period, with Japan and the US contributing the most to performance.

Past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations.

For all the sub-funds past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Performance is net of all fees. The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

Dividends

The Directors do not propose the payment of a dividend at this time (2015: US\$Nil).

Future developments

The Fund will continue to pursue the Portfolios' investment objectives as outlined in note 1.

Significant events during the year

Prospectus

A new Prospectus was issued on 6 May 2016 to reflect the authorisation by the Central Bank of a new sub-fund, Man GLG Emerging Markets Debt Total Return. The Prospectus also included amendments in order to address disclosure requirements pursuant to recent regulatory requirements, including Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (the "UCITS V Directive") and the Central Bank (Supervision and Enforcement Act) 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations) 2015, (the "Central Bank UCITS Regulations")". The Prospectus also reflected the revocation of authorisation by the Central Bank of the following sub-funds since the date of the most recent prior Prospectus (GLG EM Currency & Fixed Income Alternative, GLG EM Diversified Alternative, Man Commodities Fund, GLG Global Emerging Markets Macro Alternative and Man NewSmith European Equity Alternative). It also reflected the change in dealings procedure where each business day is now both a dealing day and a valuation day.

Addendum dated 9 December 2016 was issued to reflect the authorisation by the Central Bank of two new sub-funds, Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity.

Directors' report (continued) For the year ended 31 December 2016

Significant events during the year (continued)

Portfolios

Man GLG Global Emerging Markets Debt Total Return commenced operations on 3 May 2016. Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity commenced operations on 29 December 2016.

Man GLG Total Return, Man GLG Asian Equity Alternative, Man GLG Directional Equities alternative and Man GLG European Alpha Alternative Enhanced ceased operations on 8 February 2016, 20 April 2016, 30 September and 23 December 2016 respectively.

De-listing of Share Classes

Share classes D H USD and I H USD of Man GLG Total Return were delisted from Irish Stock Exchange on 7 December 2016.

Share class IN H NOK of Man GLG Global Equity Alternative was delisted from Irish Stock Exchange on 7 December 2016.

For detailed information on new share classes launched during the year please refer Note 20.

Effective 6 October 2016, GLG Investments VI plc was renamed Man Funds VI plc.

In response to the CBI publishing the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers (the "Investor Money Regulations" or "IMR") in March 2015 (effective from 1 July 2016), the Manager undertook, together with BNY Mellon Fund Services (Ireland) Designated Activity Company, a review of the way in which subscription, distribution and redemption monies are routed to and from the Fund or the relevant sub-fund. As a result of this review, subscription and redemption monies will (effective from 1 July 2016), be routed through a sub-fund cash collection account in the name of the sub-fund. Pending issue of the units and / or payment of subscription proceeds to an account in the name of the sub-funds, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the sub-fund in respect of amounts paid by or due to it.

Michael Jackson and Victoria Parry resigned as directors of the Fund with effect from 21 April 2016 and Bronwyn Wright and Ronan Daly were appointed as directors of the Fund on 21 April 2016.

Effective 27 January 2016, BNY Mellon Fund Services (Ireland) Limited was renamed BNY Mellon Fund Services (Ireland) DAC.

Effective 14 April 2016, BNY Mellon Trust Company (Ireland) Limited acts as Depositary.

Effective 21 April 2016 Matheson replaced J&E Davy as listing sponsor to the Fund.

Effective 6 October 2016 GLG Partners Asset Management Limited was renamed to Man Asset Management (Ireland) Limited.

There were no other significant events during the year ended 31 December 2016.

Significant events since the year end

Effective 26 January 2017, GLG Asian Equity Alternative Fund has been removed from the Official List and from trading on the Main Securities Market of the Irish Stock Exchange.

Investment objectives

The investment objectives of each sub-fund are as stated in note 1. Investment in the Fund carries with it a degree of risk including but not limited to the risks referred to in note 6 of these Financial Statements. For a more detailed description of risks associated with investment in the Fund, please refer to the Prospectus.

Directors and Secretary

The Directors and secretary during the year and up to 21 April 2017 are listed on page 1. Unless indicated, they served for the entire year.

Directors' and secretary's interests

Neither the Directors, nor their families, nor the secretary (Matsack Trust Limited) nor the Investment Managers had any interests in the Shares of the Fund at 31 December 2016, with the exception of one Subscriber Shares held by Man Asset Management (Ireland) Limited in a nominee capacity.

The Fund has adopted the corporate governance code for collective investment schemes and management companies issued by the Irish Funds (the "IF Code"). The Directors are satisfied that they act independently and in the interests of the Fund as a whole and have determined that Eric Fortier and Ronan Daly are independent directors as that term is defined in the IF Code.

Directors' responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law and regulations.

Irish company law requires the Directors to prepare financial statements giving a true and fair view of the state of affairs of the Fund and the profit or loss of the Fund for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS"). Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Fund as at the financial year end date and of the profit or loss of the Fund for the financial year and otherwise comply with the Companies Act 2014.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question and note the effects and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business.

Man Funds VI plc Directors' report (continued) For the year ended 31 December 2016

Man glg.

Directors' responsibilities (continued)

The Directors are responsible for ensuring that the company keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the company, enable at any time the assets, liabilities, financial position and profit or loss of the company to be determined with the reasonable accuracy, enable them to ensure that the financial statements and directors' report comply with the Companies Act 2014 and enable these financial statements to be audited. They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Accounting records

The Directors are responsible for ensuring that proper accounting records as outlined in Section 281 to 285 of the Companies Act 2014 ("Act") are kept by the Fund. To achieve this, the Directors have appointed an experienced third party fund administrator to ensure that the requirements of Section 281 to 285 of the Companies Act 2014 are complied with. The books and accounting records are maintained at the Administrator's office at Guild House, Guild Street, IFSC, Dublin 1, Ireland.

Independent auditors

The Independent auditors, Ernst & Young, Chartered Accountants, will continue in office in accordance with Section 383 (2) of the Companies Act 2014.

Corporate governance

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes whose shares are admitted to trading on the Irish Stock Exchange, the Fund is subject to corporate governance practices imposed by:

- i) The Irish Companies Acts 2014 which is available for inspection at the registered office of the Fund;
- ii) The Articles of Association of the Fund which are available for inspection at the registered office of the Fund;
- iii) The Central Bank in their UCITS Notices and Guidance Notes which can be obtained from the Central Bank website at:

http://www.centralbank.ie/regulation/marketsupdate/Documents/170103_AIF%20RULEBOOK_January%202017.pdf and are available for inspection at the registered office of the Fund; and

iv) The Irish Stock Exchange ("ISE") through the ISE Code of Listing Requirements and Procedures which can be obtained from the ISE's website at:- http://www.ise.ie

The Irish Funds ("IF") has published the IF Code that may be adopted on a voluntary basis by Irish authorised collective investment schemes. It should be noted that the IF Code reflects existing corporate governance practices imposed on Irish authorized collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

The Board of Directors is responsible for establishing and maintaining adequate internal control and risk management systems of the Fund in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Fund's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board of Directors has procedures in place to ensure all relevant books of account are properly maintained and are readily available, including production of annual financial statements. The annual financial statements of the Fund are required to be approved by the Board of Directors of the Fund and the annual financial statements of the Fund are required to be filed with the Central Bank and the Irish Stock Exchange. The statutory financial statements are required to be audited by independent auditors who report annually to the board on their findings.

The board evaluates and discusses significant accounting and reporting issues as the need arises.

The convening and conduct of shareholders' meetings are governed by the Articles of Association of the Fund and the Companies Acts. Although the Directors may convene an extraordinary general meeting of the Fund at any time, the Directors are required to convene an annual general meeting of the Fund within twelve months of the date of the previous annual general meeting. Shareholders representing not less than ninety-five per cent of the paid up share capital of the Fund may also request the directors to convene a shareholders' meeting. Not less than twenty one days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting unless the auditors of the Fund and all the shareholders of the Fund entitled to attend and vote agree to shorter notice.

Two members present either in person or by proxy constitute a quorum at a general meeting.

The Fund may from time to time by ordinary resolution increase the share capital by such amount and/or number as the resolution may prescribe.

The Fund may also by ordinary resolution:

- 1) consolidate all or any of its share capital into Shares of larger amount;
- 2) subject to the provision of the Companies Acts subdivide its Shares, or any of them, into Shares of smaller amount or value and provide for any of such Shares resulting from such sub-division to have, as compared with the others, any such preferred, deferred or other rights or be subject to any such restrictions as the Fund has power to attach to unissued or new Shares;
- cancel any Shares which, at the date of the passing of the resolution, have not been taken or agreed to be taken by any person and reduce the amount of its authorised share capital by the amount of the Shares so cancelled; or
- 4) re-denominate the currency of any class of Shares.

Man Funds VI plc Directors' report (continued) For the year ended 31 December 2016

Corporate governance (continued)

Every holder of participating shares or non-participating shares present in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present in person or by proxy is entitled to one vote in respect of each share held by him and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Fund requires a simple majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Fund requires a majority of not less than seventy five per cent of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

Unless otherwise determined by an ordinary resolution of the Fund in a general meeting, the number of Directors may not be less than one or more than ten. Currently the Board of Directors of the Fund is composed of four Directors, being those listed in the corporate information in these financial statements.

The business of the Fund is managed by the Directors, who exercise all such powers of the Fund as are not by the Companies Act 2014 or by the Articles of Association of the Fund required to be exercised by the Fund in general meeting.

A Director may, and the company secretary of the Fund on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman shall not have a casting vote and the resolution shall fail. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The Board has adopted the voluntary Irish Funds (IF) Corporate Governance Code for Irish Domiciled Collective Investment Schemes and Management Companies, issued 14 December 2011 (the "Code"), with effect from 31 December 2012. The Board has reviewed and assessed the measures included in the Code and considers its corporate governance practices and procedures since the adoption of the Code as consistent therewith.

The Directors acknowledge that they are responsible for securing the company's compliance with the relevant obligations as set out in section 225 of the Act.

The directors confirm that:

- 1) A compliance policy document has been drawn up that sets out policies, that in our opinion are appropriate to the company, respecting compliance by the company with its relevant obligations.
- 2) appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the company's relevant obligations, and
- 3) during the financial year, the arrangements or structures referred to in (2) have been reviewed.

The Directors confirm that during the financial year end 31 December 2016:

- a) so far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditors are unaware; and
- b) the Directors have taken all steps that ought to have been taken by the Directors in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

Audit Committee

The Board of Directors has decided it was not necessary to constitute an audit committee given the frequency of the meetings of the Board of Directors throughout the year and the size of the Board of Directors. Instead, it is deemed more appropriate that the entirety of the Board of Directors carry out the activities that would otherwise be carried out by an audit committee.

Connected party transactions

The Directors are satisfied that there are arrangements in place to ensure that transactions carried out with connected parties of the Fund are carried out as if negotiated at arm's length and any such transactions are in the best interests of the Shareholders of the Fund. The Directors are satisfied that any transactions entered into with connected parties during the year complied with the aforementioned obligation.

The Fund has adopted the corporate governance code for collective investment schemes and management companies issued by the Irish Funds (the "IF Code"). The Directors are satisfied that they act independently and in the interest of the Fund as a whole and have determined that Eric Fortier and Ronan Daly are independent directors as that term is defined in the IF Code.

On behalf of the Board

REPORT FROM THE DEPOSITARY TO THE SHAREHOLDERS DATED 21 APRIL 2017

For the period from 01 January 2016 to 31 December 2016 (the "Period")

BNY Mellon Trust Company (Ireland) Limited (the "Depositary" "us", "we", or "our") has enquired into the conduct of Man Funds VI plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

Son myadden

For and on behalf of BNY Mellon Trust Company (Ireland) Limited, Guild House, Guild Street, IFSC, Dublin 1.

#### 1. General

Man Funds VI plc (formerly GLG Investments VI Plc) (the "Fund") was incorporated as an investment company with variable capital and segregated liability between sub-funds under the laws of Ireland as a public limited company on 28 November 2007 under registration number 449860. The Fund has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS"), pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "Regulations"). The Fund's investment manager is GLG Partners LP for Man GLG Portfolios, AHL Partners LLP for Man AHL Portfolios and Numeric Investors LLC for Numeric Portfolios (the "Investment Managers"). The Fund's registered office is at 70 Sir John Rogerson's Quay, Dublin, Ireland. The Fund has no employees.

The Fund is structured as an umbrella fund with segregated liability between sub-funds (each a "Portfolio") which means that different Portfolios may be created from time to time by the Directors with the approval of the Central Bank. Each Portfolio will be represented by a different series of Redeemable Participating Shares (the "Shares") and will be invested in accordance with the investment objectives and policies applicable to such Portfolio. As at 31 December 2016 the Fund was comprised of fourteen Portfolios.

#### Man GLG Portfolios

Man GLG Asian Equity Alternative (ceased operations on 20 April 2016), Man GLG Total Return (ceased operations on 8 February 2016) Man GLG European Alpha Alternative Enhanced (ceased operations 23 December 2016), Man GLG European Alpha Alternative, Man GLG European Equity Alternative, Man GLG Alpha Select Alternative, Man GLG Global Equity Alternative, Man GLG Cred-Eq Alternative, Man GLG European Mid-Cap Equity Alternative, Man GLG Unconstrained Emerging Equity, Man GLG Global Emerging Markets Debt Total Return (commenced operations on 3 May 2016), Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity (commenced operations on 29 December 2016).

#### Man AHL Portfolios

Man AHL Multi Strategy Alternative, Man AHL Directional Equities Alternative (ceased operations on 30 September 2016), Man AHL TargetRisk and Man AHL Volatility Alternative.

Numeric Portfolio Man Numeric Market Neutral Alternative.

All Classes of Redeemable Participating Shares are together referred to as the "Redeemable Participating Shares" or "Shares".

As at 31 December 2016 the following Portfolios were registered with Swiss Financial Market Supervisory Authority FINMA: GLG Alpha Select Alternative, GLG European Alpha Alternative, GLG European Equity Alternative, GLG Global Equity Alternative, GLG Asian Equity Alternative, GLG Cred-Eq Alternative, Man AHL Multi Strategy Alternative, Man AHL TargetRisk, Man AHL Volatility Alternative, Man Mumeric Market Neutral Alternative, Man GLG Mid-Cap Equity Alternative, Man GLG Unconstrained Emerging Equity and Man GLG Global Emerging Markets Debt Total Return.

The investment objectives and policies of each active Portfolio are detailed below.

#### Man GLG European Alpha Alternative

Man GLG European Alpha Alternative's investment objective is to provide a positive absolute return for investors while maintaining a low volatility, regardless of market conditions, through stock selection and the utilising of long/short strategies.

The Portfolio invests primarily in securities of issuers in Europe or of issuers which derive a substantial part of their revenues from activities in Europe. The Portfolio invests predominantly in common stocks and other equity and equity linked instruments of such issuers, including, without limitation, equity derivatives.

As at 31 December 2016, Class DN EUR, Class DN H GBP, Class DN H USD, Class IN EUR, Class IN H GBP and Class IN H USD were in operation and were listed on the official list of the Irish Stock Exchange ("ISE").

#### Man GLG Alpha Select Alternative

Man GLG Alpha Select Alternative's investment objective is to provide investors with positive returns through investments primarily in the United Kingdom securities markets.

The Portfolio invests primarily in common stock and other equity and equity-linked securities (which may include but are not limited to such instruments as options and swaps) of issuers in the United Kingdom or of issuers which derive a substantial part of their revenues from activities in the United Kingdom and may invest the remainder in equity and equity linked securities of issuers and on markets located outside the United Kingdom. Although it is not intended to provide for any geographic or sectorial specialisation other than the above, it is anticipated that the Portfolio's investments will primarily be in mid and large capitalisation companies including companies in the FTSE 100 Index.

As at 31 December 2016, Class DN GBP, Class DN H EUR, Class DN H USD, Class IN GBP, Class IN H EUR and Class IN H USD were in operation and were listed on the official list of the ISE.

#### 1. General (continued)

#### Man GLG European Equity Alternative

Man GLG European Equity Alternative's investment objective is to provide investors with positive returns primarily through investments in issuers in Europe and of issuers which derive a substantial part of their revenues from activities in Europe.

The Portfolio's policy is to achieve those returns through investments in short, medium and, to a lesser extent, long-term investment opportunities. This policy will be pursued through a strategy of active trading with the Portfolio primarily investing in listed equities including, without limitation, common stock and other equity and equity-linked securities (which may include, but are not limited to, such instruments as options and swaps), of issuers in Europe and of issuers which derive a substantial part of their revenues from activities in Europe.

As at 31 December 2016, Class DN EUR, Class DN H CHF, Class DN H GBP, Class DN H NOK, Class DN H SEK, Class DN H SGD, Class DN H USD, Class IN EUR, Class IN H GBP, Class IN H SEK and Class IN H USD were in operation and were listed on the official list of the ISE. As at 31 December 2016, Class IN H NOK and Class IXN H GBP were in operation but delisted on the official list of the ISE.

#### Man GLG Total Return

Man GLG Total Return's investment objective was to provide investors with wealth preservation and growth over a rolling three-year time period in all market conditions through investment in a risk constrained low volatility strategy with a broadly diversified range of underlying investments.

The Portfolio ceased operations on 8 February 2016.

#### Man GLG Global Equity Alternative

Man GLG Global Equity Alternative's investment objective is to provide investors with positive returns through investments in a global range of issuers with a diversified regional allocation.

The Portfolio's policy is to achieve those returns through investments in short, medium and, to a lesser extent, long-term investment opportunities globally. This policy is pursued through a strategy of active trading with the Portfolio primarily investing in listed equities globally including, without limitation, common stock and other equity and equity-linked securities (which may include, but are not limited to, such instruments as options and swaps). The Portfolio seeks to apply a long/short investment strategy and the Investment Manager may utilise synthetic short positions where it deems it appropriate in its sole discretion based on the opportunities in the market and the extent to which the Investment Manager believes that there are overvalued issuers or issuers which may fall in value. The Portfolio will not have a set long/short ratio.

As at 31 December 2016, Class DN EUR, Class DN H CHF, Class DN H USD, Class IN EUR and IN H USD were in operation and were listed on the official list of the ISE.

#### Man GLG Asian Equity Alternative

Man GLG Asian Equity Alternative's investment objective was to seek to provide investors with a positive return of income primarily through long and short investments in issuers that are either domiciled in the Asia Pacific region (including Australia), or that derive a substantial part of their revenues from within the Asia Pacific region (including Australia), or whose securities are traded in a market in the Asia Pacific region (including Australia).

The Portfolio ceased operations on 20 April 2016.

#### Man GLG European Alpha Alternative Enhanced

Man GLG European Alpha Alternative Enhanced's investment objective was to provide a positive absolute return for investors while maintaining a moderate volatility, regardless of market conditions, through stock selection and the use of typically market-neutral long/short strategies. The focus of the Portfolio will be stock selection, with no particular sector exposure targets.

The Portfolio ceased operations on 23 December 2016.

#### Man GLG Cred-Eq Alternative

Man GLG Cred-Eq Alternative's investment objective is to provide investors with absolute returns over the medium term by taking both long and short positions in an actively managed portfolio of convertible, credit and equity asset classes.

The Portfolio seeks to select the best possible investments from a wide range of opportunities globally, adopting a fundamentally driven investment approach across convertibles, credit and equities.

As at 31 December 2016, Class DN EUR, Class DN H USD, Class IN EUR and Class IN H USD were in operation.

#### Man AHL Multi Strategy Alternative

Man AHL Multi Strategy Alternative aims to achieve medium-term capital growth in all market conditions by being broadly diversified along system styles, asset classes, regions, and time horizons.

The Portfolio will seek to achieve its objective by allocating all or substantially all of its assets in accordance with the AHL Multi-Strategy Programme (as described in further detail in the Prospectus).

As at 31 December 2016, Class DN H EUR, Class DN H GBP, Class DN H SEK, Class DN USD, Class IN H CHF, Class IN H EUR, Class IN H SEK, IN H USD and Class IN USD were in operation.

#### Man AHL Directional Equities Alternative

The Portfolios' aim was to provide investors with absolute returns over the medium term primarily by using financial derivative instruments to take both long and short positions in a quantitatively managed portfolio of equities.

The Portfolio ceased operations on 30 September 2016.

#### 1. General (continued)

#### Man AHL TargetRisk

The Man AHL TargetRisk Portfolio aims to generate capital growth over the medium to long term by providing dynamic long only exposure to a range of assets and to provide an excess return stream with a stable level of volatility regardless of market conditions.

The Portfolio seeks to achieve its objective by allocating all or substantially all of its assets in accordance with a proprietary quantitative model, the 'Man TargetRisk' strategy, to provide an excess return stream with a stable level of volatility regardless of market conditions.

As at 31 December 2016, Class D H EUR, Class D H SEK, Class D USD, Class I H EUR, Class I H GBP, Class I H SEK and Class I USD were in operation.

#### Man AHL Volatility Alternative

Man AHL Volatility Alternative Portfolio seeks to provide investors with absolute returns over the medium term by taking long and short positions in an actively managed portfolio trading volatility instruments.

The Portfolio seeks to achieve its objective by allocating all or substantially all of its assets in accordance with AHL's proprietary quantitative model to systematically identify opportunities in volatility markets around the world.

As at 31 December 2016, Class DN USD, Class IN H EUR and Class IN USD were in operation.

#### Man GLG European Mid-Cap Equity Alternative

The Portfolio's investment objective is to seek to provide an attractive risk-adjusted total return, through appreciation and income. The Portfolio will seek to achieve these returns primarily through long and synthetically short investments in equity securities or equity derivatives. The Portfolio may invest up to 20% of its Net Asset Value in emerging markets or in currencies of OECD countries and/or derivatives.

As at 31 December 2016, Class DN EUR, Class DN H SEK, Class DN H USD, DNY EUR, Class IN EUR, Class IN H CHF, Class IN H GBP, Class IN H SEK, Class IN H USD, Class IN F EUR, Class INF H CHF, Class INF H GBP and Class INF H USD were in operation.

#### Man Numeric Market Neutral Alternative

Man Numeric Market Neutral Alternative's investment objective is to earn an average return on investment, after fees, which is appreciably higher than the total return (assuming reinvestment of dividends) in USD of the Merrill Lynch 91-day Treasury Bills Index.

The Portfolio will seek to apply a long/short investment strategy and intends to invest in derivatives providing long and "synthetic short" positions.

As at 31 December 2016, Class DN H EUR, Class DN H SEK, Class DN H NOK, Class DN USD, Class IN H CHF, Class IN H EUR, Class IN H NOK, Class IN H SEK, Class IN USD, Class INU H EUR, Class INU H GBP Dist and INU USD were in operation.

#### Man GLG Unconstrained Emerging Equity

Man GLG Unconstrained Emerging Equity's investment objective is to achieve capital gains in the medium to long-term, through investment in emerging market equities.

The Portfolio will seek to achieve the above objective primarily through investment in emerging market equities. Such equities will generally be listed or traded on Recognised Markets in emerging markets worldwide and the Portfolio will not have a particular sectoral, industry or market capitalisation focus.

As at 31 December 2016, Class D C SEK, Class D C USD, Class DF C USD, Class DF C NOK, Class DF SEK, Class I C SEK, Class I C USD, Class IF C EUR, Class IF C GBP, Class IF C NOK, Class IF C SEK and Class IF C USD were in operation.

#### Man GLG Global Emerging Markets Debt Total Return

Man GLG Global Emerging Markets Debt Total Return's investment objective is to achieve a return in all market conditions over the long term primarily through investment in a portfolio of fixed income securities denominated in local currency.

As at 31 December 2016, Class D H EUR, Class D H GBP, Class D H NOK, Class D H SEK, Class D USD, Class DL H EUR, Class DMF USD, Class DY USD, Class I H CHF, Class I H EUR, Class I H EUR Dist, Class I H GBP, Class I H NOK, Class I H SEK, Class I USD, Class IL USD, Class IL USD, Class II H EUR, Class IMF H EUR Dist, Class IMF H GBP Dist and IMF USD were in operation.

#### Man GLG Innovation Equity Alternative

Man GLG Innovation Equity Alternative's investment objective is to provide investors with absolute returns by taking both long and short positions in equities issued by companies globally.

The Portfolio will seek to apply a long/short investment strategy and intends to take full advantage of the ability to invest in derivatives providing long and "synthetic short" positions.

As at 31 December 2016, Class IN USD, Class IN H CHF, Class IN H EUR, Class IN H GBP, Class IN H NOK and Class IN H SEK were in operation. As at 31 December 2016, the Portfolio does not have any exposure to indices.

#### Man GLG Global Fundamental Equity

Man GLG Global Fundamental Equity's investment objective is to provide investors with absolute returns by taking both long and short positions in equities issued by companies globally.

The Portfolio will seek to apply a long/short investment strategy and intends to take full advantage of the ability to invest in derivatives providing long and "synthetic short" positions.

As at 31 December 2016, Class IN USD, Class IN H CHF, Class IN H EUR, Class IN H GBP, Class IN H NOK and Class IN H SEK were in operation. As at 31 December 2016, the Portfolio does not have any exposure to indices.

#### 2. Summary of significant accounting policies

#### (a) Accounting convention

The financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU. The financial statements have been prepared using the historical cost basis except for financial assets and liabilities held at fair value through profit or loss which have been measured at fair value.

The combined company balances are expressed in US\$, being the presentation currency of the Fund as a whole. For combined company balances in statement of financial position, the non US\$ Portfolios are translated using the exchange rate at the date of statement of financial position. For combined company balances in statement of comprehensive income, the non US\$ Portfolios are translated at the average exchange rate prevailing during the year. The combined subscriptions and redemptions in the statement of changes in net assets are also translated at the average rate prevailing during the current year. The translation loss resulting from the preparation of the combined company balances in the financial statements amounting to US\$56,052,912 (31 December 2015: loss of US\$213,634,541) has been shown in the combined company column of statement of comprehensive income. The gain/(loss) does not have any effect on the individual Portfolios.

#### (b) Changes in accounting policy and disclosure

The accounting policies adopted in the preparation of the audited financial statements are consistent with those followed in the preparation of the Fund's audited financial statements for the year ended 31 December 2015, except for the adoption of new standards and interpretations effective on the dates described below.

#### Standards issued but not yet effective:

#### IFRS 9- Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments which reflects all phases of the financial instruments project and replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required but comparative information is not compulsory. Early application of previous versions of IFRS 9 (2009, 2010 and 2013) is permitted if the date of initial application is before 1 February 2015. Management is currently assessing the impact of this standard on the Fund. At present, management believes the adoption of IFRS 9 is unlikely to have a material effect on the classification and measurement of the Fund's financial assets or financial liabilities.

#### IFRS 15 - Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15 revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognising revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after 1 January 2018 with early adoption permitted. Management is currently assessing the impact of IFRS 15 and plans to adopt the new standard on the required effective date.

At the date of authorisation of the financial statements there were a number of other Standards and Interpretations which were in issue but not yet effective. Management anticipates that the adoption of these Standards and Interpretations in future periods will have no material impact on the financial statements of the Fund.

#### (c) Use of accounting judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the amounts reported and disclosures made in these financial statements and accompanying notes, including certain valuation assumptions. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities in the future.

#### (d) Going concern

Management has made an assessment of the Fund's ability to continue as a going concern and are satisfied that the Fund has resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Fund's ability to continue as a going concern, therefore, the financial statements are prepared on a going concern basis.

#### (e) Revenue recognition

Interest income and dividend income are recorded on an accrual basis and ex-dividend basis respectively, gross of withholding tax.

#### 2. Summary of significant accounting policies (continued)

#### (f) Financial assets and liabilities

For Net Asset Value (NAV) purposes, the valuation of investments is performed in accordance with the Prospectus. For financial statements purposes, investments have been valued in accordance with IFRS using the policies outlined below. At 31 December 2016 and 31 December 2015, there are no material differences between these valuation methodologies.

#### This category has two sub-categories:

(i) financial assets and liabilities held for trading: Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading as the Fund does not designate any derivatives as hedges in a hedging relationship.

(ii) those designated by management at fair value through profit or loss at initial recognition: These include equity securities and debt instruments that are not held for trading. These financial assets and liabilities ("financial instruments") are designated upon initial recognition on the basis that they are part of a group of financial instruments which are managed and have their performance evaluated on a fair value basis, in accordance with risk management and investment strategies of the Fund. The financial information about these financial instruments is provided internally on that basis to the Investment Managers. As at 31 December 2016 and 2015, the Fund did not hold any financial assets and liabilities designated by management at fair value through profit or loss at initial recognition.

The Fund recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Regular-way purchases and sales of investments are recognised on the trade date, which is the date on which the Fund commits to purchase or sell the asset. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. All transaction costs for such instruments are recognised directly in statement of comprehensive income.

After initial measurement, the Fund measures financial instruments, which are classified as at fair value through profit or loss, at their fair values.

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices as on the statement of financial position date.

In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

The Fund may from time to time invest in financial instruments that are not traded in an active market (for example over-the-counter derivatives and private placements of both equities and fixed income securities). These financial instruments are valued at their fair value in the manner described in the subsequent accounting policies.

The Directors have appointed an Independent Pricing Committee ("IPC") to undertake certain services concerning the valuation policies and procedures relating to the Fund. The IPC is an independent body set up to: (1) establish a pricing matrix (a table which lays out a pricing source for certain assets and liabilities) which the Directors have adopted for the Fund and which is used by the Administrator to calculate the value of the assets and liabilities held by the Fund; and (2) to establish the prices of any positions held in the Fund that do not have an independently ascertainable value as per the pricing matrix. In addition, the IPC provides general governance and oversight of the valuation process.

Any exchange traded derivative instruments (including, but not limited to, options and futures) dealt in on a market are valued at the settlement price on the relevant Valuation Day for such instruments on such a market. If the settlement price is not available, their probable realisation value shall be determined with care and in good faith by the Directors.

Investments are derecognised when the rights to receive cash flows have expired or the Fund has transferred substantially all of the risks and rewards of ownership.

#### (g) Securities sold short

The Fund may sell securities short. A short sale is a transaction in which the Fund sells a security it does not own. The proceeds received for short sales are recorded as liabilities and the Fund records an unrealised gain or loss to the extent of the difference between the proceeds received and the value of the open short position. The Fund records a realised gain or loss when the short position is closed. By entering into short sales, the Fund bears the market risk of an unfavourable change in the price of the security sold short in excess of the proceeds received. Short sales expose the Fund to potentially unlimited liability.

#### (h) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liabilities simultaneously. As at 31 December 2016 and 31 December 2015, no financial assets and liabilities are offset in the statement of financial position. Please refer to Note 5.

#### (i) Derivatives

The Fund may trade in derivative financial instruments whose values are based upon an underlying asset, index, currency or interest rate. The net unrealised gains or losses, rather than contracts or notional amounts, represents the approximate future cash flows from trading.

The Fund engaged in asset swapped convertible option transactions ("ASCOTs"), contracts for difference, forward currency contracts, futures contracts, option contracts, swap contracts, credit default swaps and total return swaps.

#### 2. Summary of significant accounting policies (continued)

#### (i) Derivatives (continued)

#### - Contracts for difference ("CFD")

An unfunded contract for difference ("CFD") is an agreement between the Fund and a third party which allows the Fund to acquire an exposure to the price movement of specific securities without actually purchasing the securities. Upon entering into an unfunded CFD, the Fund is required to deposit with a broker an initial cash margin equal to a certain percentage of the contract amount. Variation margin payments are made or received by the Fund depending upon the fluctuation in the value of the underlying securities. The changes in contract values are recorded as unrealised gains or losses and the Fund recognises a realised gain or loss when the contract is closed. CFDs are similar to total return swaps, but are more standardised and primarily used in the UK and Ireland.

#### - Forward contracts

Forward contracts are recorded on the trade date and are valued at the applicable foreign exchange rates on the last business day of the year. The difference between the fair value of the original contract amount and the fair value of the open forward currency contract position is reflected as unrealised appreciation or depreciation on open forward currency contracts in the statement of financial position and as a net change in unrealised appreciation or depreciation on open forward currency contracts in the statement of comprehensive income. Realised gains or losses are recognised on the maturity or trade date of the contract and are included in net realised gains/(losses) in the statement of comprehensive income.

#### - Futures contracts

Futures contracts are recorded on the trade date and are valued at the last traded price on the last business day of the year. The difference between the original contract amount and the fair value of the open futures position is reflected as financial assets or financial liabilities at fair value through profit or loss in the statement of financial position and as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. Realised gains or losses are recognised on the closing or trade date of the contract and are included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

#### - Option contracts

The Fund may invest in option contracts. An option contract gives the owner the right, but not the obligation, to buy ("call option") or to sell ("put option") a specified item at a fixed price during a specified year for a non-refundable fee ("premium"). The maximum loss to a buyer of an option is the loss of the premium. The writer of a call option has to bear the risk of an unfavourable change in the value underlying the option and, unless an offsetting long position is owned, the theoretical loss is unlimited. The loss to the writer of a put option is limited to the exercise price of the option, versus the premium collected on its sale. Option contracts are held at fair value with reference to quoted market prices, when available, or based on pricing models that consider the time value of money, volatility and the current market and contractual prices of the underlying financial instruments.

#### - Swap contracts

Swaps are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. The swaps are valued at an amount equal to the gain or loss that would be realised if the position was closed out on the valuation date. The Fund's main swap contracts consist of credit default swaps and total return swaps.

Swaps are marked-to-market daily and changes in value are recorded as unrealised appreciation/(depreciation). When the swap is terminated, the Fund will record a realised gain/(loss) equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract, if any. Swap transactions involve, to varying degrees, elements of credit and market risk in excess of the amounts recognised in the statement of financial position. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavourable changes in interest rates and/or market values associated with these transactions.

#### - Credit default swaps

The Fund may enter into credit default swaps to manage its exposure to certain sectors of the market or to reduce credit risk or for speculative purposes. The Fund may enter into credit default swap agreements to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). Credit default swaps are agreements in which one party pays fixed periodic payments to counterparty in consideration for a guarantee from the counterparty to make a specific payment should a negative credit event take place (e.g. default, bankruptcy or debt restructuring). The Fund may either buy or sell (write) credit default swaps. As a buyer, the Fund will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap there pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index. As a seller (writer), the Fund will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising of an index. In the event of default by the counterparty, the Fund may recover amounts paid under the agreement either partially or in total by offsetting any payables and/or receivables with collateral held or pledged.

These periodic payments received or made by the Fund are included in net realised gain/(loss) on investment at fair value through profit or loss in the statement of comprehensive income.

#### - Interest rate swaps

Interest rate swaps relate to contracts taken out by the Fund with major brokers in which the Fund either receives or pays a floating rate of interest in return for paying or receiving, respectively, a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Changes in the value of the interest rate swap agreements and amounts received or paid in connection with them are recognised as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

Notes to the Financial Statements (continued) For the year ended 31 December 2016

#### 2. Summary of significant accounting policies (continued)

#### (i) Derivatives (continued)

#### - Total return swaps

The Fund may also hold investment positions through total return swaps. Total return swaps are contracts in which the Fund pays or receives a series of cash flows based upon the total return of a specified asset in return for paying or receiving, respectively, a fixed or floating rate of interest based upon that same specified asset.

#### - Equity swaps

Equity swaps are valued based on the differences between the notional long/(short) position of the underlying equity security calculated from a reference price on the date of entering the contract and the fair value at the date of closing the trade, or the reporting date if prior to termination of the contract. For unsettled positions, the fair value on open equity swaps is included in the statement of financial position / condition. The change in fair value is included in the statement of comprehensive income as net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

#### - Swaptions

A swaption represents a derivative contract granting its owner the right but not the obligation to enter into an underlying interest rate swap contract by some specified date in the future. Swaptions are recorded at fair value which is determined using valuation models that consider the terms of the swaption contract and volatility of the underlying forward interest rates. The fair value of the open position is reflected in financial assets or liabilities at fair value through profit or loss in the statement of financial position, which includes the premium paid/received, if any. The change in fair value is included in the statement of comprehensive income as net gain/(loss) on financial assets and liabilities at fair value through profit or loss.

#### - Warrants

The Fund invests in warrants through listed exchanges and OTC markets. The listed warrants are traded on recognised exchanges and valued at the last traded price. OTC traded warrants are valued by reference to quoted prices. Change in realised and unrealised gains and losses are recorded in the statement of comprehensive income.

#### (j) Realised and unrealised gains and losses

All realised and unrealised gains and losses on securities and derivatives are recognised as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. Unrealised gains and losses comprise changes in the fair value of financial instruments for the year and from reversal of prior year's unrealised gains and losses for financial instruments which were realised in the reporting year. Realised gains and losses represent the difference between an instrument's initial carrying amount and disposal amount, or cash payments or receipts made on derivative contracts (excluding payments or receipts on collateral margin accounts for such instruments). The cost of securities is accounted for on a specific identification basis.

#### (k) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs incurred by the Fund during the year are recognised in the statement of comprehensive income.

#### (I) Functional and presentation currency

The Fund seeks to generate returns in United States dollars, its capital-raising currency. The liquidity of the Fund is managed on a dayto-day basis in United States dollars in order to handle the issue and redemption of the Fund's Redeemable Participating Shares. The Fund's performance is also evaluated in United States dollars. Therefore, the United States dollar is considered as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The Fund's functional and presentational currency is the United States dollar.

#### (m) Securities sold under agreements to repurchase and securities purchased under agreements to resell

Securities sold under agreement to repurchase at a specified future date are not derecognised from the statement of financial position as the Fund retains substantially all the risks and rewards of ownership. The corresponding cash received is recognised in the statement of financial position with a corresponding obligation to repay it, reflecting its economic substance as a loan to the Fund. The difference between the sale and repurchase prices is treated as interest expense and is accrued over the life of the agreement and is included in the statement of comprehensive income. Where the counterparty has the right to sell or pledge the securities sold to it then the assets are separately disclosed as securities purchased under agreement to resell.

Securities purchased under agreements to resell at a specified future date ("Reverse Repurchase Agreements") are not recognised in the statement of financial position unless they are subsequently sold to third parties ('rehypothecation'), in which case, the obligation to return the securities is recorded as a short sale within trading liabilities and measured at fair value with any gains or losses included in the statement of comprehensive income. The corresponding cash paid is derecognised and a corresponding receivable is recorded in the statement of financial position reflecting the Fund's right to receive it back. The difference between the purchase and resale prices is treated as interest income, accrued over the life of the agreement and included in the statement of comprehensive income.

#### (n) Foreign currency

Transactions during the year denominated in foreign currencies have been translated at the rates of exchange ruling at the dates of transactions. Assets and liabilities denominated in foreign currencies are translated at the rates of exchange in effect at the date of the statement of financial position. For investment transactions and investments held as at year end denominated in foreign currency, resulting gains or losses are included in the net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. All other foreign currency gains and losses are included in the net gain/(loss) on foreign currency in the statement of comprehensive income.

### Man Funds VI plc Notes to the Financial Statements (continued)

For the year ended 31 December 2016

#### 2. Summary of significant accounting policies (continued)

#### (o) Other expenses

Other expenses are recognised in the statement of comprehensive income on an accruals basis.

#### (p) Redeemable participating shares

Redeemable shares are classified as equity instruments when:

- The redeemable shares entitle the holder to a pro rata share of the Fund's net assets in the event of the Fund's liquidation
- The redeemable shares are in the class of instruments that is subordinate to all other classes of instruments
- All redeemable shares in the class of instruments that is subordinate to all other classes of instruments have identical features
- The redeemable shares do not include any contractual obligation to deliver cash or another financial asset other than the holder's
  rights to a pro rata share of the Fund's net assets
- The total expected cash flows attributable to the redeemable shares over the life of the instrument are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund over the life of the instrument

In addition to the redeemable shares having all of the above features, the Fund must have no other financial instrument or contract that has:

- Total cash flows based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund
- The effect of substantially restricting or fixing the residual return to the redeemable shareholders

The Fund continuously assesses the classification of the redeemable shares. If the redeemable shares cease to have all the features, or meet all the conditions set out, to be classified as equity, the Fund will reclassify them as financial liabilities and measure them at fair value at the date of reclassification, with any differences from the previous carrying amount recognised in equity. If the redeemable shares subsequently have all the features and meet the conditions to be classified as equity, the Fund will reclassify them as equity instruments and measure them at the carrying amount of the liabilities at the date of the reclassification.

#### (q) Cash and cash equivalents, balances with brokers and balances due from/to brokers

Cash and cash equivalents in the statement of financial position may consist of cash at bank, demand deposits, short-term deposits in financial institutions and short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, with original maturities of three months or less, net of outstanding bank overdrafts when applicable. Short-term investments that are not held for the purpose of meeting short-term cash commitments and restricted margin accounts are not considered cash and cash equivalents. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts when applicable.

Due from brokers include receivables for securities sold (in a regular way transaction) that have been contracted for but not yet delivered on the statement of financial position date. These are carried at amortised cost using the effective interest method less any allowance for impairment. Due to brokers are payables for securities purchased (in a regular way transaction) that have been contracted for but not yet delivered on the statement of financial position date. These are measured at amortised cost using the effective interest method. Balances with brokers and balances due to brokers represent the margin account balances held at the Fund's brokers and balances payable to the Fund's brokers at the period/year end, and can include amounts transferred as collateral (and therefore subject to a security interest) against open derivative contracts.

#### (r) Distributions to shareholders

In accordance with the Fund's' constitution, the Fund may fully distribute its distributable income to shareholders.

Distributable income includes capital gains arising from the disposal of investments.

Unrealised gains and losses are included in the net assets attributable to shareholders and are not distributable until realised. Capital losses are not distributed to shareholders, but are retained to be offset against any future realised capital gains. Distributions to shareholders are recognized in statement of comprehensive income as finance costs.

#### 3. Cash and cash equivalents, balances with brokers / balances due from/to brokers

At the year end, amounts disclosed as cash and cash equivalents, balances with brokers and balances due to brokers were held at the Bank of New York Mellon (Brussels), Bank of America Merrill Lynch, Barclays Plc, BNP Paribas, Citibank N.A., Credit Suisse Securities (Europe) Limited, Deutsche Bank AG, Goldman Sachs International, HSBC Bank Plc, JP Morgan Securities Plc, Macquarie Bank, Morgan Stanley & Co. International Plc, Royal Bank of Scotland, Societe Generale, Standard Chartered Plc and UBS AG. These include amounts transferred as collateral against open derivatives, deposits held at call with banks and, other short term highly liquid investments with original maturities of three months or less.

#### 3. Cash and cash equivalents, balances with brokers / balances due from/to brokers (continued)

The portions of balances with brokers represented by collateral as at 31 December 2016 and as at 31 December 2015 were:

#### 4. Financial assets and liabilities at fair value through profit or loss

#### Forward contracts

As part of its portfolio management techniques, the Fund may use forward contracts to economically hedge any non-functional currency exposure (although formal hedge accounting is not used). Forward contracts may also be used for trading purposes. Forward contracts entered into by the Fund represent a firm commitment to buy or sell an underlying asset, or currency at a specified value and point in time based upon an agreed or contracted quantity.

Forward contracts may expose the Fund to the risks associated with the absence of an exchange market on which to close out an open position. The investment manager closely monitors the Fund's exposure under forward contracts as part of the overall management of the Fund's market risk.

#### Fair value of financial instruments

The Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in determining the measurements in line with IFRS 13.

The fair value hierarchy has the following levels:

- Level 1 Quoted market price in an active market for an identical instrument.
- Level 2 Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

#### Valuation techniques

Listed or publicly traded investment in equity and debt securities, managed funds and derivatives

When fair values of listed or publicly traded equity and debt securities, equities and managed funds and derivatives are based on quoted market prices, or binding dealer price quotations, in an active market for identical assets without any adjustments, the instruments are included within Level 1 of the hierarchy.

#### Unlisted debt securities and treasury bills

The Fund invests in debt securities, corporate and government bonds and treasury securities. In the absence of a quoted price in an active market, they are valued using observable inputs such as recently executed transaction prices in securities of the issuer or comparable issuers and yield curves. Adjustments are made to the valuations when necessary to recognise differences in the instruments terms. To the extent that the significant inputs are observable, the Fund categorises these investments as Level 2.

Notes to the Financial Statements (continued) For the year ended 31 December 2016

#### 4. Financial assets and liabilities at fair value through profit or loss (continued)

#### Fair value of financial instruments (continued)

#### Valuation techniques (continued)

#### Over-the-counter derivatives

The Fund uses widely recognised valuation models for determining fair values of over-the-counter interest rate swaps, currency swaps and forward foreign exchange contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including both credit and debit valuation adjustments for counterparty and own credit risk, foreign exchange spot and forward rates and interest rate curves. For these financial instruments, significant inputs into models are market observable and are included within Level 2.

#### Unlisted equity investments

The Fund invests in private equity companies which are not quoted in an active market. Transactions in such investments do not occur on a regular basis. The Fund uses a market based valuation technique for these positions. The Fund's Investment Manager determines comparable public companies (peers) based on industry, size, leverage and strategy, and calculates an appropriate trading multiple for each comparable company identified. The multiple is calculated by dividing the enterprise value of the comparable company by an earnings measure. The trading multiple is then discounted for considerations such as illiquidity and size differences between the comparable companies based on company-specific facts and circumstances. The discounted multiple is applied to the corresponding earnings measure of the investee company to measure the fair value. The Fund classifies the fair value of these investments as Level 3.

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

The following tables summarise the financial instruments at fair value through profit or loss as at 31 December 2016 and 31 December 2015 and the financial instruments measured at fair value in the statement of financial position grouped into the fair value hierarchy:

Short term balances are excluded from the tables as their carrying value at the year ended 31 December 2016 approximates to their fair value.

Investments are reviewed at each financial reporting point to ensure that they are correctly classified between Level 1, 2 and 3 in accordance with the fair value hierarchy outlined above. Where an investment's characteristics change during the year and investments no longer meet the criteria of a given level, they are transferred into a more appropriate level at the end of relevant financial reporting year.

For the year ended 31 December 2016 and 31 December 2015, there were no transfers between Level 1 and Level 2.

A reconciliation of the movements in level 3 assets/liabilities for the year ended 31 December 2016 and 31 December 2015 is set out below:

## Man Funds VI plc Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 4. Financial assets and liabilities at fair value through profit or loss (continued)

## Fair value of financial instruments (continued)

During the year, some positions were transferred into and out of Level 3 because either they became illiquid or liquid depending on whether multiple broker quotes were available or not.

All net realised and unrealised gains/(losses) in the tables above are reflected in the accompanying statements of comprehensive income. Net amount of US\$49,458 (31 December 2015: US\$77,979) relates to those Level 3 financial instruments held by the Fund at 31 December 2016 and is reflected in net gains/(losses) on financial assets at fair value through profit or loss in the statement of comprehensive income.

The fair value of investments classified within Level 3 is based on unobservable inputs that may be subjected to significant variability. Because of the inherent uncertainty of valuation with respect to such investments, the Fund's estimates of fair value may differ significantly from fair values that would have been used observable inputs been available for the valuation of such investments, and the differences could be material.

The table below discloses the valuation technique used in the valuation for Level 3 investments and quantifies the effect of significant unobservable inputs used to value investments that fall in this category. The ranges of these inputs are not representative of the appropriate inputs to use when calculating the fair value of any one Level 3 asset or liability. Accordingly, the ranges of inputs presented below do not represent uncertainty in, or possible ranges of fair value measurements of the Fund's Level 3 assets/liabilities.

			Unobservable	
	Fair Value	Valuation technique	input	Range

31 December 2015

The impact of the range of possible unobservable impacts on the fair value of investments is an increase/decrease of up to £Nil (31 December 2015: N/A) for Man GLG Alpha Select Alternative, €Nil (31 December 2015: €Nil) for GLG European Equity Alternative, €Nil (31 December 2015: €Nil) for GLG Global Equity Alternative, US\$Nil (31 December 2015: US\$Nil) for Man AHL Directional Equities Alternative and US\$Nil (31 December 2015: US\$Nil) for Man GLG Unconstrained Emerging Equity Alternative.

### Derivative financial instruments

The Fund may trades derivative financial instruments, including contracts for difference, futures, forward contracts, currencies, swaps contracts and options whose values are based upon an underlying asset, index, currency or interest rate.

The Fund is subject to both market and credit risk in trading derivative financial instruments. Market risk is the potential for changes in value due to changes in market interest rates, foreign exchange rates, indices and changes in the value of the underlying financial instruments. Credit risk is the possibility that a loss may occur if a counterparty fails to perform according to the terms of the contract. Substantially all derivative contracts are transacted on a margin basis. Such transactions may expose the Fund to significant off-balance sheet risk in the event margin deposits and collateral investments are not sufficient to cover losses incurred.

The Investment Managers manages the risks associated with these transactions by maintaining margin deposits and collateral investments with its brokers in compliance with individual exchange regulations and internal guidelines. The Investment Managers also take an active role in managing and controlling the Fund's market and counterparty risks and monitoring trading activities and margin levels daily, and, as necessary, deposits additional collateral or reduces positions.

Derivative financial instruments are generally based on notional amounts which are not recorded in the financial statements. These notional amounts represent the theoretical principal value on which the cash flows of the derivative transactions are based. Unrealised gains or losses, rather than notional amounts, or the exchange-traded derivatives traded by the Fund are included in the statement of financial position. The net unrealised gains or losses, rather than contract or notional amounts, represent the Fund's approximate future cash flows from trading activities.

Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 4. Financial assets and liabilities at fair value through profit or loss (continued)

## Derivative financial instruments (continued)

## 6. Financial risk management

#### Overall risk management

The Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The most important types of financial risks to which the Fund is exposed are market risk, credit risk and liquidity risk. Market risk includes equity price risk, interest rate risk and foreign currency risk. The Fund manages these risks on an aggregate basis along with the risks associated with its investing activities as part of its overall risk management policies.

The nature and extent of the financial instruments outstanding at the dates of the statement of financial position and the risk management policies employed by the Fund are discussed below.

The following summary is not intended to be a comprehensive summary of all of the risks and investors should refer to the Prospectus for a more detailed discussion of the risks inherent in investing in the Fund.

#### Market risk

Market risk can include equity risk, commodity risk, interest rate risk, credit spread risk, volatility and foreign currency risk. The Fund's exposure to these factors is measured and monitored using Value at Risk ("VaR").

## Man Funds VI plc Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 6. Financial risk management (continued)

#### Market risk (continued)

The table below identifies the VAR calculated on the Fund as at 31 December 2016, and the stand alone contribution to the Fund VaR from each of the principal risk factors. The VaR measure is a 1 day, 97.78% confidence Monte Carlo VaR, using a historic observation period of six months. This signifies that the Fund would not be expected to lose more than the stated amount 97.78% of the time. The results are based on historically observed correlations and volatilities which may not always be an accurate prediction of the future and relate only to the positions held as at the close of business on 31 December. These positions inevitably change over time.

As of 31 December the following table represents the Fund 1 day VaR as a percentage of Net Assets:

#### Man GLG European Alpha Alternative

Average	0.69%	n/a
Highest	1.41%	n/a
Lowest	0.11%	n/a

#### Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund has exposure to interest rate risk on cash held at the bank, balances due to and from brokers and certain derivative contracts. That exposure may not necessarily be significant due to the generally short term nature of those holdings. But a more significant exposure exists in that the value of all financial instruments held by the Fund may be affected either positively or negatively by changes in interest rates.

Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 6. Financial risk management (continued)

## Interest rate risk (continued)

The following tables detail the Fund's exposure to interest rate risk by the earlier of contractual maturities or re-pricing:

Liabilities not exposed to interest risk comprise certain financial liabilities through profit or loss, accrued expenses and other liabilities. These amounts normally require contractual settlement within one quarter and, in all cases, within one year.

The following tables detail the effect on net assets should interest rates have increased/decreased by 50 basis points (bps) with all other variables remaining constant, assuming that a 50bps increase/decrease in the base interest rate would result in a correlating 50bps increase/decrease in the value of net assets. In reality, an increase/decrease of 50bps would not result in a direct correlating increase/decrease in the fair value of net assets, as the movement in the value of the net assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The volatility measures presented in the Market Risk section capture, among all other variables, these actual interest rate sensitivities.

The Fund is indirectly exposed to interest rate risk through its investment strategy, which is deliberately designed to generate returns through trading strategies focused on exploiting price differentials in rates. The sensitivity of these exposures is modelled through the overall VaR analysis provided in the market risk section.

#### Currency risk

Currency risk exists where assets and liabilities are denominated in currencies other than the functional currency, and also on nonfunctional currency redeemable participating shares. The Fund may use forward currency contracts for the purpose of currency speculation, as well as for hedging its foreign currency Share Class exposure.

Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 6. Financial risk management (continued)

### Currency risk (continued)

#### Other price risk

Other market price risks arise mainly from uncertainty about future prices of financial instruments held. They represent the potential loss the Fund might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

### 6. Financial risk management (continued)

### Credit/counterparty risk

The investment Managers performs due diligence on all counterparties before they become a service provider or counterparty to the Fund, and credit quality checks are part of this process. The credit quality of the Fund's banks, brokers and Depositary is regularly monitored and factored into allocation decisions.

The Fund is exposed to credit/counterparty risk on parties with whom it trades and bears the risk of settlement default. Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. For example, it represents the financial risk associated with a security issuer (either Government or Corporate) failing to discharge an obligation or commitment, or filing for bankruptcy. The Fund seeks to reduce concentrations of credit risk by undertaking transactions with several customers and counterparties on recognised and reputable exchanges. The Fund only buys and sells investments through brokers which have been approved by the Investment Manager as an acceptable counterparty.

Financial assets which potentially expose the Fund to counterparty credit risk consist principally of investments in cash balances and deposits with and receivables from brokers and other receivables. The extent of the Fund's exposure to counterparty credit risk in respect of these financial assets approximates their carrying value as recorded in the Fund's statement of financial position. In addition, where the Fund borrows cash to finance leveraged investments, additional collateral is lodged with the counterparty to provide them with security for potential adverse movements in the collateral. Whilst most finance providers afford some segregated protection for this collateral, this facility may not always be available to the Fund, and consequently can expose the Fund to the credit worthiness of the counterparty.

Credit risk also arises on transactions with brokers related to transactions awaiting settlement. Risks relating to unsettled transactions are considered small due to the short settlement period involved and the high credit quality of the brokers used. Broker balances are primarily due from large reputable institutions and are, thus, considered at minimal risk for default. As delivery versus payment is the standard procedure for trade settlements, there is no significant credit risk arising from transactions settlements.

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Fund.

The Fund's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that the counterparties fail to perform their obligations as of 31 December 2016 in relation to each class of recognised financial assets, including derivatives, is the carrying amount of those assets in the consolidated statement of financial position. Credit risk is mitigated through the diversity of counterparties and regular monitoring of concentration risk.

As at 31 December 2016 the majority of the Fund's assets were held with ABN Amro Group NV, Bank of America Merrill Lynch, Barclays Plc, BNP Paribas SA, Citibank N.A., Credit Suisse Securities (Europe) Limited, Deutsche Bank AG London, Goldman Sachs International, HSBC Plc, JP Morgan Securities Plc, Macquarie Group, Morgan Stanley & Co. International Plc, Nomura Holdings, Societe Generale, Standard Chartered, The Bank of New York Mellon (London), The Royal Bank of Scotland Plc and UBS AG, , and. (the "Brokers"). Each of these counterparties are considered by the Fund to be a highly rated and reputable institution and, thus, the individual and aggregate credit risk exposure is considered to not be significant.

The following tables detail the Fund's primary exposures to its counterparties:

In addition, at 31 December 2016, the Fund had credit risk exposure equivalent to US\$97,925,000 (31 December 2015: US\$136,817) on credit instruments over which it has sold protection to third parties through credit default swaps.

The below tables show the breakdown by Credit Spread of all credit securities held in the portfolio. This does not include any non-credit hedges held against these (for example equity securities) or deposits held with credit institutions. The "Credit Spread" is the measure which reflects the difference in yield of a credit security relative to an assumed credit risk-free security. For some security classes, the Credit Spread is the quotation method used by the market. For others, the Credit Spread is implied from the market price.

### Liquidity risk

Liquidity risk is defined as the risk that the Fund will encounter difficulty in meeting its obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Redeemable Participating Shareholder redemption requests are the main liquidity risk for the Fund.

The Fund's Redeemable Participating Shares are redeemable as outlined in Note 10. The exposure to liquidity risk through Redeemable Participating Shareholder redemption requests is managed by specifically setting the redemption notice period to accommodate the expected liquidity of the underlying investments as agreed by the Investment Manager. The Fund is therefore potentially exposed to weekly redemptions by its shareholders.

The Fund's financial instruments include Level 1 financial instruments which are considered readily realisable as they are all listed on major recognised exchanges.

The Fund's financial instruments also include investments in Level 2 and 3 financial instruments, which are not quoted in an active public market and which generally may be illiquid. As a result, the Fund may not be able to liquidate quickly some of its investments in these instruments at an amount close to their fair value in order to meet its liquidity requirements.

The main liability of the Fund is associated with the need to satisfy Redeemable Participating Shareholder's request for redemptions. The Fund seeks to mitigate this risk by investing primarily in securities that are listed or traded on recognised markets, thus assets comprise mainly realisable securities, which can be readily sold.

The tables below summarise the maturity profile of the Fund's financial liabilities:

### Option writing

As a writer of options, the Fund receives a premium at the outset and then bears the risk of unfavorable changes in the price of the financial instrument underlying the option. As a result of writing option contracts, the Fund is obligated to purchase or sell, at the holder's option, the underlying financial instrument at a fixed price which may differ from the prevailing market price at that date. Writing options may incur losses which greatly exceed the premium income received.

### Securities sold short

Securities sold short are those in which a security is sold that the Fund does not own in anticipation of a decline in the market value of the security. The Fund's risk is that the value of the security will increase rather than decrease. Consequently, the settlement amount of the liability for securities sold short may exceed the amount recorded in the statement of financial position, as the Fund is obligated to purchase the security in the market at prevailing prices to settle its obligations.

Performance fees accrue at each Valuation Point and are calculated by the Administrator on the dates set out below in respect of each Share Class (each a "Calculation Date"):

- a) in the case of all Share classes, with the exception of the Class "DN H SGD" Shares and the Class "DN H SGD Dist" Shares in GLG EM Currency & Fixed Income Alternative, the "E" Share Classes in Man NewSmith UK Equity Alternative and Man NewSmith European Equity Alternative, performance fees are calculated semi-annually in arrears as at the last Business Day in the six month period ending on 30 June and the last Business Day in the six month period ending 31 December in each year; or
- b) in the case of the Class "DN H SGD" Shares and the Class "DN H SGD Dist" Shares in GLG EM Currency & Fixed Income Alternative, the "E" Share Classes in Man NewSmith UK Equity Alternative and Man NewSmith European Equity Alternative, performance fees are calculated annually in arrears as at the last Business Day in the twelve month period ending 31 December in each year

Such performance fees are only payable in respect of Shares for which the closing Net Asset Value per Share is over and above its high watermark at the end of the performance year. The Manager receives a performance fee for the Class IL H USD of the GLG EM Diversified Alternative equal to 20% of the aggregate appreciation in value on each investor's Shares over the amount of the investor's bench mark for those Shares (which is based on the 3 month EURIBOR for Euro Class Shares, 3 month GBP LIBOR for GBP Class Shares and 3 month USD LIBOR for USD Class Shares).

The Manager receives no performance fee for Classes DH USD, DH USD Dist, DH EUR, DH EUR Dist, DH CHF, D GBP, D GBP Dist, DH, SEK, DH NOK, DH DKK, DH SGD, DH AUD, DH PLN, DH JPY, IH USD, IH USD Dist, IH EUR, IH EUR Dist, IH CHF, I GBP, I GBP Dist, IH SEK, IH NOK, IH DKK, IH SGD, IH AUD, IH PLN and IH JPY of GLG Total Return, Classes D C AUD, D C CHF, D C EUR, D C GBP, D C JPY, D C SGD, D C USD, DF C EUR, DF C GBP, DF C NOK, DF C SEK, DF C USD, DY C EUR, DY C USD, I C AUD, I C CHF, I C DKK, I C EUR, I C GBP, I C JPY,I C NOK, I C SEK, I C SGD, I C USD, IF C CHF, IF C EUR, IF C GBP, IF C NOK, IF C SEK and IF C USD of Man GLG Unconstrained Emerging Equity, Classes D USD, D H EUR, D H DKK, D H GBP, D H JPY, D H NOK, D H SEK, D H SGD, D H AUD, I USD, I H EUR, I H CHF, I DKK, I H GBP, I H JPY, I H NOK, I H SEK, I H SGD and I H AUD of Man AHL Target Risk.

The Manager pays the fees of the Investment Manager, Administrator and the Distributor.

The Manager may also receive distribution fees, up-front sales charges and contingent deferred sales charges.

### Administration fees

The Fund is subject to an administration fee in respect of each Portfolio in relation to administration services provided by the Administrator and the Investment Manager. The administration fee is an amount which may not exceed 0.30% per annum of the Net Asset Value of the relevant Portfolio. The amount paid to each of the Administrator and Investment Manager is determined between the parties from time to time.

The Investment Manager receives only the portion of the administration fee relating to the administrative support services it provides pursuant to the Administrative Services Agreement. Part of the administration fee is paid by the Fund to the Manager (for on-payment to the Administrator) monthly in arrears and the remainder is paid by the Fund to the Investment Manager. The Fund also reimburses the Manager out of the assets of the Fund for reasonable out-of-pocket expenses incurred by the Administrator and the Investment Manager. The Manager is responsible for reimbursing the Administrator and the Investment Manager for these expenses.

### 8. Fees and expenses (continued)

### Depositary fees

The Fund pays the Depositary a depositary fee which may not exceed 0.04% per annum of the Net Asset Value of the relevant Portfolio together with value added tax, if any, applicable to such fees. The Fund also reimburses the Depositary out of the assets of the relevant Portfolio for reasonable out-of-pocket expenses will accrue from day to day (which will not exceed normal commercial rates) and reasonable out of pocket expenses of any sub-custodian appointed by the Depositary and will be liable for transaction charges. The fee and expenses of the Depositary are paid monthly in arrears.

Amounts unpaid by the Fund at the year end relating to management, performance, administration and depositary fees are shown below:

	2016 Combined	2015 Combined
	Fund	Fund
	US\$	US\$
Management fees	3,108,281	3,983,838
Performance fees	4,582,368	4,074,073
Administration fees	1,239,509	1,216,783
Depositary fees	479,719	180,553

### Directors' fees

The Fund will pay the fees of the Directors. Currently each Director's fee is not expected to exceed €8,000 per annum. The Directors' fees for the year ended 31 December 2016 and 31 December 2015 were US\$24,000 (2015: US\$24,000). In addition, the Directors receive reimbursement for travel and other out-of-pocket expenses relating to attendance at meetings and other matters, including any expenses relating to the performance of due diligence for the benefit of the Fund.

### 9. Related party transactions

The Fund has adopted the corporate governance code for collective investment schemes and management companies issued by the Irish Funds Industry Association (the "IF Code"). The Directors are satisfied that they act independently and in the interests of the Fund as a whole and have determined that Eric Fortier and Ronan Daly are independent directors as that term is defined in the IF Code.

During the period Eric Fortier earned Directors' fee of €8,000, Michael Jackson and Victoria Parry each earned Directors' fee of €2,433 and Ronan Daly and Bronwyn Wright each earned Directors' fee of €5,568. John Morton has elected to waive his Directors' fee as he is the Global Co-Head of GLG Product Legal within Man Group Plc.

Victoria Parry is also a Director of Man Asset Management (Ireland) Limited, the Manager of the Fund, she resigned as Director of the Fund on 21 April 2016.

Michael Jackson is a partner at Matheson, the legal advisers of the Fund. He resigned as Director of the Fund on 21 April 2016, but was not involved in the provision of day-to-day legal assistance to the Fund.

During the year fees of US\$301,656 (31 December 2015: US\$168,131) were paid to Matheson, as Legal Advisers to the Fund.

Each of the Directors is or may become involved in other financial investment and professional activities which may cause conflicts of interest with the management of the Fund. These activities include management or administration of other companies (including those with investment objectives similar to those of the Fund or structures that may be related to Man Group plc sponsored investment funds), purchases and sales of securities and other investments, investment and management counselling and serving as directors, advisers and/or agents of other companies, including companies and legal structures in which the Fund may invest and/or which may invest into the Fund.

Man Asset Management (Ireland) Limited (formerly GLG Partners Asset Management Limited) is a related party through its holding of 1 Subscriber Share in the Fund. John Morton, a director of the Fund, holds the second Subscriber Share.

GLG Partners LP is also a related party as the Investment Manager of the Fund, and therefore all subsidiaries of Man Group plc are also related parties.

31 December 2016		Total Fees	Fees payable
Related party	Type of fee	US\$	US\$
Man Asset Management (Ireland) Limited	Management fees	41,549,957	3,108,281
Man Asset Management (Ireland) Limited	Performance fees	5,170,713	4,582,368
Man Asset Management (Ireland) Limited	Administration fees	8,101,236	1,239,509
Directors	Directors' fees	47,765	-
Matheson	Legal fees	301,656	-

Notes to the Financial Statements (continued) For the year ended 31 December 2016

## 9. Related party transactions (continued)

31 December 2015		<b>Total Fees</b>	Fees payable
Related party	Type of fee	US\$	US\$
Man Asset Management (Ireland) Limited	Management fees	44,611,780	3,983,838
Man Asset Management (Ireland) Limited	Performance fees	8,286,314	4,074,073
Man Asset Management (Ireland) Limited	Administration fees	7,634,271	1,216,783
Directors	Directors' fees	33,821	249,314

* The amount paid to each of the Administrator and Investment Manager is determined between the parties from time to time, but, for the avoidance of doubt, the Investment Manager receives only the portion of the administration fee relating to the administrative support services it provides pursuant to the Administrative Services Agreement. Part of the administration fee will be paid by the Fund to the Manager (for on-payment to the Administrator) monthly in arrears and the remainder will be paid by the Fund to the Investment Manager.

The above amounts are payable on demand and do not bear interest. Furthermore, the above transactions were made on terms equivalent to those that prevail in arm's length transactions.

As at 31 December 2016 entities affiliated with Man Group plc owned Redeemable Participating Shares as detailed below:

Portfolio	Redeemable Partie	cipating Shares
	2016	2015
Man GLG European Alpha Alternative	420,899	3,150
Man Numeric Market Neutral Alternative	378,210	378,000

Man GLG European Equity Alternative	10,084	-
Man GLG European Mid-Cap Equity Alternative	9,628	-
Man GLG Cred-Eq Alternative	3,453	2,753

As at 31 December 2016 and 31 December 2015 none of any outstanding Redeemable Participating Shares were owned by entities affiliated with Man Group plc.

### 10. Share capital

The authorised share capital of the Fund is 500,000,000,002 divided into 2 Subscriber Shares of €1 each and 500,000,000,000 Shares of no par value initially designated as unclassified Shares. The Directors are empowered to issue up to 500,000,000,000 Shares of no par value designated as Shares of any series or class on such terms as they think fit.

### Subscriber Shares of the Fund

The Subscriber Shares are each held by Man Asset Management (Ireland) Limited (formerly GLG Partners Asset Management Limited) and John Morton in Nominee capacity.

### **Redeemable Participating Shares**

The Fund's Redeemable Participating Shares are redeemable at the shareholder's option on each weekly Dealing Day with 1 business day written notice for Man GLG European Alpha Alternative, Man GLG European Alpha Alternative Enhanced, Man GLG Unconstrained Emerging Equity, Man GLG Total Return, Man Numeric Market Neutral Alternative, Man AHL Multi Strategy Alternative, Man AHL Directional Equities Alternative and Man AHL Target Risk and with 5 days' written notice for GLG EM Currency & Fixed Income Alternative, EM Diversified Alternative, Man GLG Alpha Select Alternative, Man GLG European Equity Alternative, Man GLG Atlas Macro Alternative, Man GLG Global Equity Alternative, GLG Global Emerging Markets Macro Alternative, Man GLG European Mid-Cap Equity Alternative, Man GLG Cred-Eq Alternative, Man GLG Asian Equity Alternative and Man AHL Volatility Alternative. The Fund's Redeemable Participating Shares are classified as financial liabilities. The Fund is therefore potentially exposed to weekly redemptions by its shareholders. The exposure to liquidity risk through shareholder redemption requests is managed by specifically setting the redemption notice period to accommodate the expected liquidity of the underlying investment as agreed by the Investment Managers.

## 10. Share capital (continued)

### Redeemable Participating Shares (continued)

The Fund manages its obligation to repurchase the Shares when required to do so and its overall liquidity risk by:

- Allowing for redemptions only during the first Business Day of each calendar week.
- Requiring a 5 Business Day notice period before redemptions.

The Subscriber Shares were fully issued when the Fund was launched. They entitle the holders to attend and vote at general meetings of the Fund but do not entitle the holders to participate in the profits or assets of the Fund except for a return of capital on a winding-up. The Subscriber Share capital is beneficially held by or on behalf of the Manager. All issued Shares are fully paid. All these Issued Subscriber Shares are fully paid.

The Shares are entitled to dividends and to payment of a proportionate share based on the Fund's NAV per Share on the redemption date.

Subscriptions for Shares Classes may be subject to an up-front sales charge of up to 5% of the subscription amount, payable to the Manager.

### Capital management

As a result of the ability to issue, repurchase and resell Redeemable Participating Shares, the capital of the Fund can vary depending on the demand for the redemptions and subscriptions to the Fund. The Fund is not subject to externally imposed capital requirements and has no restrictions on the issue, redemption of Redeemable Participating Shares other than those set out in the Fund' Prospectus, repurchase and resell of the shares.

The Fund's objectives for managing capital may include:

- investing the capital in investments meeting the description, risk exposure and expected return indicated in the Fund's Prospectus;
- achieving consistent returns while safeguarding capital by investing in diversified portfolios, by participating in derivative and
  other advanced capital markets and by using various investment strategies and hedging techniques; maintaining sufficient
  liquidity to meet the expenses of the Fund and to meet redemption requests as they arise; and
- maintaining sufficient size to make the operation of the Fund cost-efficient; and
- Maintaining sufficient liquidity to meet the expenses of the Fund and to meet redemption requests as they arise.

Refer to 'Risk Associated with Financial Instruments' (note 6 under Liquidity risk) for the policies and processes applied by the Fund in managing its capital and its obligation to repurchase the Shares.

### 13. Segregation of liabilities between portfolios

Upon the establishment of the Fund on 28 November 2007, the Fund availed of the provisions of the Investment Funds, Companies and Miscellaneous Provisions Act, 2005 to segregate liabilities between each portfolio.

#### 14. Securities owned and securities sold, not yet purchased

Possession of securities owned is maintained by major multinational broker-dealers as at 31 December 2016 and 31 December 2015. Securities sold, not yet purchased represent obligations of the Fund to purchase the securities at prevailing market prices. The future satisfaction of such obligations may be for an amount greater than the amount recorded.

### 15. Taxation

The Fund qualifies as an investment undertaking as defined in Section 739 B of the Taxes (Consolidation) Acts 1997. It is not chargeable to Irish tax on its income or capital gains. Tax may arise on the happening of a chargeable event.

A chargeable event includes any distribution payments to Shareholders or any encashment, redemption or transfer of Shares. No tax will arise on the Fund in respect of chargeable events regarding:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Fund; or
- (ii) certain exempted Irish resident investors who have provided the Fund with the necessary signed statutory declarations; or
- (iii) Shares held in a recognised clearing system as designated by the order of the Irish Revenue Commissioners.

Following legislative changes in the Finance Act 2006, the holding of Shares at the end of a relevant year will, in respect of Irish Resident investors, also constitute a chargeable event. To the extent that any tax issues arise on such a chargeable event, such tax will be allowed as a credit against any tax payable on the subsequent encashment, redemption, cancellation or transfer of the relevant Shares.

Relevant Year is defined as a period of 8 years beginning with the acquisition of a share by a shareholder and each subsequent period of 8 years beginning immediately after the preceding relevant year.

### 16. Soft commissions

The Investment Managers have entered into arrangements with the brokerage houses from which the Fund derives benefit. These commission sharing agreements are in conformity with the rules of the Investment Managers' UK regulator, the UK's Financial Conduct Authority.

#### 17. Auditors' remuneration

For the year ended 31 December 2016, the Fund incurred audit fees as disclosed in the statement of comprehensive income; these amounts represent a provision. The actual audit fees are US\$236,099 (31 December 2015: US\$204,731).

The fees paid during the year for any tax advisory services, other assurance services or other non-audit services provided by the auditors of the Fund were US\$124,803 (31 December 2015: US\$44,489).

#### 18. Efficient portfolio management

The Fund may employ investment techniques and instruments for efficient portfolio management of the assets of any Portfolio including hedging against market movements, currency exchange or interest rate risks under the conditions and within the limits stipulated by the Central Bank under the UCITS Regulations and described below.

Techniques and instruments which are used for the purpose of efficient portfolio management, including FDIs which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- i. they are economically appropriate in that they are realised in a cost effective way;
- ii. they are entered into for one or more of the following specific aims:
  - (a) reduction of risk;
  - (b) reduction of cost;
  - (c) generation of additional capital or income for a Portfolio with an appropriate level of risk taking into account the risk profile of the Portfolio as described in the Prospectus, the risk diversification rules set out in UCITS Notice 9 and the general provisions of the UCITS Regulations
- iii. their risks are adequately captured by the risk management procedures implemented by the Fund, and
- iv. they cannot result in a change to a Portfolio's declared investment objective or add substantial supplementary risks in comparison to the general risk policy as described in its sales documents.

While the use of such techniques and instruments will be in line with the best interests of the Fund, individual techniques may result in increased counterparty risk and potential conflicts of interest. Details of the proposed efficient portfolio management techniques and policies adopted by the Fund in relation to their use by the Portfolios and details of the relevant risks are set out in the Prospectus. As at 31 December 2016 there were no investment techniques or instruments being used for efficient portfolio management purposes.

#### 19. Transaction costs

For the year ended 31 December 2016 and year ended 31 December 2015, the Fund incurred transaction costs disclosed in the statement of comprehensive income as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss, as follows:

	31 December 2016	31 December 2015
Man GLG European Alpha Alternative	€4,965,742	€9,480,460

#### 20. Significant events during the year

Effective 27 January 2016, BNY Mellon Fund Services (Ireland) Limited was renamed to BNY Mellon Fund Services (Ireland) DAC.

Effective 24 March 2016, BNY Mellon Trust Company (Ireland) Limited acts as Depositary.

Effective 21 April 2016 Matheson replaced J&E Davy as listing sponsor to the Fund.

Effective 6 October 2016, GLG Partners Asset Management (Ireland) Limited was renamed Man Asset Management (Ireland) Limited.

Effective 6 October 2016, GLG Investments VI plc was renamed Man Funds VI plc.

#### De-listing of Share Classes

Share classes D H USD and I H USD of Man GLG Total Return were delisted from Irish Stock Exchange on 7 December 2016.

Share class IN H NOK of Man GLG Global Equity Alternative was delisted from Irish Stock Exchange on 7 December 2016.

#### Portfolios

Man GLG Global Emerging Markets Debt Total Return commenced operations on 3 May 2016. Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity commenced operations on 29 December 2016.

Man GLG Total Return, Man GLG Asian Equity Alternative, Man GLG Directional Equities alternative and Man GLG European Alpha Alternative Enhanced ceased operations on 8 February 2016, 20 April 2016, 30 September and 23 December 2016 respectively.

#### Directors

Michael Jackson and Victoria Parry resigned as directors of the Fund with effect from 21 April 2016 and Bronwyn Wright and Ronan Daly were appointed as directors of the Fund on 21 April 2016.

#### Prospectus

Addendum dated 9 December 2016 was issued to reflect the authorisation by the Central Bank of two new sub-funds, Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity.

A new Prospectus was issued on 6 May 2016 to reflect the authorisation by the Central Bank of a new sub-fund, Man GLG Emerging Markets Debt Total Return. The Prospectus also included amendments in order to address disclosure requirements pursuant to recent regulatory requirements, including Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (the "UCITS V Directive") and the Central Bank (Supervision and Enforcement Act) 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations) 2015, (the "Central Bank UCITS Regulations")". The Prospectus also reflected the revocation of authorisation by the Central Bank of the following sub-funds since the date of the most recent prior Prospectus (GLG EM Currency & Fixed Income Alternative, GLG EM Diversified Alternative, Man Commodities Fund, GLG Global Emerging Markets Macro Alternative and Man NewSmith European Equity Alternative. It also reflected the change in dealings procedure where each business day is now both a dealing day and a valuation day.

## 20. Significant events during the year (continued)

In response to the CBI publishing the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers (the "Investor Money Regulations" or "IMR") in March 2015 (effective from 1 July 2016), the Manager undertook, together with BNY Mellon Fund Services (Ireland) Designated Activity Company, a review of the way in which subscription, distribution and redemption monies are channelled to and from the Fund or the relevant sub-fund. As a result of this review, subscription and redemption monies will (effective from 1 July 2016), be channelled through a sub-fund cash collection account in the name of the sub-fund. Pending issue of the units and / or payment of subscription proceeds to an account in the name of the sub-funds, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the sub-fund in respect of amounts paid by or due to it.

#### 21. Significant events since the year end

Effective 26 January 2017, GLG Asian Equity Alternative Fund has been removed from the Official List and from trading on the Main Securities Market of the Irish Stock Exchange.

### 22. Stock lending

The Fund may enter into stock lending programmes organised by generally recognised International Central Securities Depositaries Systems provided that the programme is subject to a guarantee from the system operator. No such transactions incurred during the year.

## 23. Contingent liabilities and commitments

There were no contingent liabilities or commitments other than those already disclosed in these financial statements as at 31 December 2016 (31 December 2015: Nil).

## 24. Approval of financial statements

The Directors approved these financial statements on 21 April 2017.

# INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MAN FUNDS VI PLC (FORMERLY GLG INVESTMENTS VI PLC)

We have audited the financial statements of Man Funds VI plc (formerly GLG Investments VI plc)("the Fund") for the year ended 31 December 2016 which comprise the Statement of financial position, Statement of changes in net assets, Statement of comprehensive income, Statement of cash flows and the related notes 1 to 24. The financial reporting framework that has been applied in their preparation is Irish law, the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

This report is made solely to the Fund's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Fund's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Fund and the Fund's members as a body, for our audit work, for this report, or for the opinions we have formed.

#### Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 20 the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view and otherwise comply with the Companies Act 2014. Our responsibility is to audit and express an opinion on the financial statements in accordance with Irish law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

#### Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the Fund's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the Investment Managers' report, Directors' report, Report from the Depositary to the Shareholders and the Schedule of investments to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

Continued /...

# INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MAN FUNDS VI PLC (FORMERLY GLG INVESTMENTS VI PLC) (Continued)

#### **Opinion on financial statements**

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the Fund as at 31 December 2016 and of its loss for the year then ended;
- have been properly prepared in accordance with IFRSs as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015.

#### Matters on which we are required to report by the Companies Act 2014

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Fund were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.
- In our opinion the information given in the directors' report is consistent with the financial statements.

#### Matters on which we are required to report by exception

We have nothing to report in respect of sections 305 to 312 of the Companies Act 2014 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

Gareth Harman for and on behalf of Ernst & Young Chartered Accountants and Statutory Audit Firm

Dublin

# Man Funds VI plc Supplementary information (unaudited) For the year ended 31 December 2016

#### Report of Directors' Remuneration (Unaudited)

The directors of the Fund who are also employees of Man Group plc and companies within its group structure ("Man Group") do not receive any remuneration in respect of their services as directors of the Fund. The other directors receive fixed remuneration in respect of their services which is set at a level determined by the Board as a whole and which is not performance related. This is detailed in note 9 of these financial statements. None of the directors are currently in receipt of variable remuneration in respect of their services as directors of the Fund and none of the directors are currently in receipt of a pension from the Fund. The Fund has appointed Man Asset Management (Ireland) Limited as its UCITS management company. As such, the provisions of Article 14b of Directive 2009/65/EC in relation to remuneration are not applicable to the Fund. However, they do apply to Man Asset Management (Ireland) Limited, which has adopted a remuneration policy to ensure compliance.

## Man Funds VI plc Unaudited reporting requirement in respect of the Securities Financing Transactions Regulation For the year ended 31 December 2016

The Investment Manager may, on behalf of each sub-fund and subject to the conditions and within the limits laid down by the Financial Conduct Authority and the Prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC Financial Derivative Instruments ("FDI") provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The sub-funds engaged in securities lending activity during the year for the purposes of efficient portfolio management, and invested in total return swaps, repos or reverse repos.

#### Securities Lending

All securities lending transactions entered into by the sub-funds are subject to a written legal agreement between the sub-funds and the Lending Agent, which is the Bank of New York Mellon, London Branch, and separately between the Lending Agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is delivered to an account in the name of the Depositary on behalf of the sub-fund. Collateral received is segregated from the assets belonging to the sub-fund's Depositary or the Lending Agent.

The total income earned from securities lending transactions is split between the relevant sub-fund and the securities lending agent. The sub-fund receives at least 80% while the securities lending agent receives up to 20% of such income with all operational costs borne out of the securities lending agent's share. Income received during the year by each sub-fund from securities lending transactions is disclosed in other income in the statement of comprehensive income included as part of the financial statements.

The following table details the value of securities on loan, the maturity tenor of which is always open, as they are recallable or terminable on a daily basis. Additionally there is an analysis of the maturity tenor of the associated collateral received as at 31 December 2016 based on the respective transaction contractual maturity date, split between counterparty borrower, with the country of incorporation of the counterparty shown in brackets:

## Man Funds VI plc Unaudited reporting requirement in respect of the Securities Financing Transactions Regulation (continued) For the year ended 31 December 2016

#### Securities Lending (continued)

As at the balance sheet date, all of the cash collateral received in respect of securities lending transactions, was re-invested in repos managed by various counterparties as per below:

	Market Value	% of Net Assets
Man GLG European Equity Alternative	€19,336,894	2.85%
Man GLG Global Equity Alternative	€5,880,677	3.11%
Man GLG Cred-Eq Alternative	€972,834	2.12%
Man GLG European Mid-Cap Equity Alternative	€106,108	0.03%
Man GLG Unconstrained Emerging Equity	US\$1,750,426	2.59%

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Income earned by the sub-funds from the reinvestment of cash collateral in repos, net of any interest payable to the relevant counterparty, for the year ended 31 December 2016 is disclosed in the table below and is presented within other income in the statement of comprehensive income:

Man GLG European Alpha Alternative Man GLG Alpha Select Alternative	€54,447 £240
Man GLG European Equity Alternative	€333,850
Man GLG Global Equity Alternative	€119,581
Man GLG European Alpha Alternative Enhanced	€1,999
Man GLG Cred-Eq Alternative	€4,864
Man GLG European Mid-Cap Equity Alternative	€14,511
Man GLG Unconstrained Emerging Equity	US\$17,666

All of the non-cash collateral received by the sub-funds was held by BNY Mellon, London Branch on a tri party settlement basis as at 31 December 2016.

100% of cash collateral is maintained in a segregated account with the custodian. 100% of non-cash collateral is maintained in pooled accounts

#### Portfolio Swaps

OTC derivative transactions are entered into by the sub-funds under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the sub-funds and a counterparty that governs OTC derivative transactions (including total return swaps and portfolio swaps) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes therefore any collateral disclosures provided below/elsewhere in the report are in respect of all OTC derivative transactions entered into by the sub-funds under the ISDA Master agreement, not just portfolio swaps.

The collateral figures provided on the next page relate to collateral held to support specific SFTRs, other cash held at brokers to support SFTRs, and other derivative transactions held at brokers where SFTRs are transacted.

The following table details the value of portfolio swaps as a proportion of the sub-fund's net asset value, as at 31 December 2016:

	Portfolio swaps
	% of net assets
Man GLG European Alpha Alternative	-1.86%
Man GLG Alpha Select Alternative	0.97%
Man GLG European Equity Alternative	-0.98%
Man GLG Global Equity Alternative	-0.95%
Man GLG Cred-Eq Alternative	-2.98%
Man AHL Multi Strategy Alternative	0.98%
Man AHL TargetRisk	0.04%
Man GLG European Mid-Cap Equity Alternative	0.71%
Man Numeric Market Neutral Alternative	-0.23%
Man GLG Unconstrained Emerging Equity	1.31%

Unaudited reporting requirement in respect of the Securities Financing Transactions Regulation (continued) For the year ended 31 December 2016

#### Portfolio Swaps (continued)

All returns and costs from securities borrowing from OTC transactions were accrued to the sub-funds and were not subject to any returns sharing arrangements with the Fund's Investment Manager or any other third parties.
