Investment Reviews

Metzler European Smaller Companies Sustainability*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in European equities and equity related securities, in such a way that companies of growth sectors will be the main focus of the investment portfolio.

Fund Report

Apart from a major correction in October, the European equity market was in a steady upward trend during the period under review, initially fuelled by improving economic data and the approval of the first COVID-19 vaccines. In the meantime, the outlook dimmed again due to the new pandemic waves but this was more than compensated for - both by the growing fiscal policy efforts of industrialised countries and the prospects of an emerging wave of consumption by private households that built up large reserves during the pandemic. This, together with broadly rising commodity prices, also led the market to rapidly reprice its inflation expectations. This broke the long-standing downward trend in interest rates.

Beneath the surface of these calm-looking waters, however, there were huge shifts in market preferences, frequent changes in favorites and as a result, significantly increased volatility in the equity markets. Against this backdrop, small and mid-cap stocks outperformed large caps overall, but successful stock picking was particularly challenging.

Among the biggest winners in the fund was the stock of hydrogen technology provider Ceres Power, which benefited from the accelerating trend towards electrification worldwide. Also among the winners was the stock of UK retailer WH Smith, which is predominantly focused on airports, train stations and high streets and benefited from the gradual reopening of the economy.

In contrast, shares in the French service company Solutions 30 lost considerable ground as a result of multiple "short attacks." The share of the Austrian semiconductor manufacturer ams AG also lost ground. Here, rumours about losses of orders from Apple as well as the company's own weakness in communication with the market weighed on the company.

The shift in market preferences in favour of stocks that react cyclically or were burdened by Covid led us to adjust our portfolio. In particular, we sold stocks whose prices had risen sharply and which are now considered expensive, thus securing profits. These included stocks of VAT Group (vacuum valves, Switzerland), Paradox Interactive (video games, Sweden) and SimCorp (software, Denmark). We also divested several stocks that had "outgrown" our investable universe due to very good performance. Examples include Scout 24 (real estate portal, Germany), Sinch (technology company, Sweden), Indutrade (industrial conglomerate, Sweden) and Amplifon (hearing aid retailer, Italy). We also sold the shares of Rheinmetall (armaments, Germany) and S&T (IT technology, Austria), which had performed rather disappointingly.

In return, we increased our exposure to stocks with a cyclical character. For example, we acquired stocks in Beazley (insurance, UK), Storebrand (insurance, Norway), Inchcape (car sales, UK), Pets at Home (pet supplies, UK) and the Breedon Group (building materials, UK). We also added growth stocks to our portfolio that we consider to be of high quality, such as Swedish industrial conglomerate Addtech, Dutch food ingredients and bioplastics specialist Corbion, and Swedish video game developer Stillfront.

Investment Reviews

Metzler European Growth Sustainability*

Investment Objective	<p>The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in European equities and equity related securities, in such a way that companies of growth sectors will be the main focus of the investment portfolio.</p>
Fund Report	<p>The European stock markets developed significantly positively in the half-year under review as a result of an improved economic outlook and the start of the international vaccination campaigns. Despite strong absolute performance, European growth stocks underperformed the broad European market somewhat.</p> <p>To take account of the more positive economic trend, we made a number of adjustments to the fund. The core of the changes was to reduce positions in companies with very defensive business models and to place greater emphasis on the cyclical component in the portfolio. Accordingly, we divested our holdings in Reckitt Benckiser (British manufacturer of cleaning products and household goods), Unilever (British consumer goods manufacturer), Essity (Swedish producer of tissue paper), Airbus (European aircraft manufacturer) and Deutsche Börse. In turn, we acquired shares in UPM-Kymmene (Finnish paper producer), CRH (Irish building materials producer), Lanxess (German specialty chemicals group) and Vinci (French concession and construction group) due to the more cyclical business models of the companies behind them. We also took advantage of a price correction to acquire new holdings for the fund: in Alfen, a specialist for innovative products and projects in the field of electrical energy from the Netherlands, and in the world's largest manufacturer of wind turbines, Vestas from Denmark. Both companies are benefiting strongly from the structural trend towards more renewable energies and from the energy transition. We also participated in the IPO of Auto1 Group, a fast-growing digital trading platform for used cars based in Berlin.</p> <p>In the half-year under review, the fund benefited significantly from its positioning in the IT sector with an overweight in ASML (equipment supplier for the semiconductor industry from the Netherlands) and in utilities from its position in the Danish offshore wind farm operator Ørsted. In addition, in the financial sector, the holding in the German insurer Allianz had a significant positive impact on portfolio performance.</p> <p>The fund's performance was negatively impacted in particular by the underweight in the consumer goods sectors (consumer durables and consumer staples) and in the commodities sector – especially the exclusion of heavy benchmark weights such as Diageo (spirits/UK) and Glencore (commodities/Switzerland) from the portfolio. In addition, the fact that we did not hold a stake in Evolution Gaming (gambling/Sweden) in the fund cost performance.</p>

Investment Reviews

Metzler Global Selection

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by gaining exposure to equity markets by investing predominantly in a portfolio of equities, equity related securities and Investment funds which are dealt in on a Recognised Market. The Fund may invest up to 100% of its net assets in Investment Funds in accordance with the conditions set down by the Central Bank.

Fund Report

After a brief interruption in October 2020, the upward trend on the international equity markets continued during the reporting period. After the spread of the corona pandemic had slowed somewhat during the summer months, partly due to the weather, the number of infections increased significantly again from September. As a result, contact restrictions were tightened again in some countries. In addition, the upcoming presidential elections in the US initially caused uncertainty on the markets. From November, the markets received support from the emerging election victory of Democratic presidential candidate Joe Biden. In addition, there were increasing signs that a COVID-19 vaccine with high efficacy would soon be available. The approval of the first vaccine significantly improved the chances that the corona pandemic could be contained with widespread vaccination. This, together with extensive government stimulus packages and monetary policy measures by central banks, led to further gains on the stock markets by the end of 2020. The rise in share prices also continued in the first quarter of 2021. Equity markets thus proved surprisingly resilient as capital market interest rates rose sharply, particularly in the US. Some economic indicators from the US, but also from Asia and Europe, are already signaling a strong economic upturn for the current year. Positive impetus came from the adoption of the USD 1.9 trillion aid package by the US Congress and hopes that the significant progress made with vaccinations will help combat the corona pandemic. In addition, major central banks have repeatedly reiterated that they will continue their very expansionary monetary policies and that interest rate hikes will not be an issue for some time to come.

In the six months to the end of March 2021, the MSCI Europe stock index gained 20.1% from a Euro perspective, the MSCI US advanced by 18.8%, the MSCI Japan 16.8%, and the MSCI Emerging Markets 22.2%.

In the reporting period, we maintained the fundamentally broad global diversification of the fund's assets. The fund, which is primarily invested in equity funds, started October with a net equity allocation of around 97%. In October, net equity exposure was temporarily reduced to around 75% as COVID-19 infections increased and there was great uncertainty regarding the US presidential election. In the first half of November, we increased the equity allocation again following the Democratic victory in the US election. In the second half of January, net equity exposure was increased further by around 7 percentage points. This step was taken in view of the expansionary monetary and fiscal policy worldwide, the progress made in containing the corona pandemic and the expected strong economic recovery. As a result, the fund was able to benefit well from the positive development of the equity markets. At the end of March, net equity allocation was around 83%.

The USD currency risk resulting from US equity funds was partially hedged during the reporting period. The hedge was unwound on February 17 and March 8 as the US is making much faster progress than the euro zone in addressing the corona crisis, for example through successful vaccination of large sections of the population and extensive government spending programs. Part of the fund volume continues to be invested in a gold ETC for broader diversification of the fund.

Investment Reviews

Metzler Japanese Equity Sustainability Fund*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities of companies located in Japan, comprised in the Tokyo Stock Price Index (TOPIX).

Fund Report

The market rallied in Q4 2020 with TOPIX (without dividends, yen basis) gaining 11.0%. The momentum continued into Q1 2021, and TOPIX advanced 8.3%. Index return was positive in every month of the reporting period except for October, reflecting strong expectations for the global economy to recover. The index closed at 1,954.00 at the end of March, resulting in a rise of 20.2% over the half-year period.

In October, the market declined as uncertainties over the progress of additional stimulus measures in the US and increase in the number of COVID-19 infections in Europe dampened investor sentiment. Stocks rebounded sharply in November thanks to positive news on COVID-19 vaccines, expectations for additional monetary easing by the ECB and better than expected earnings results of Japanese companies. ECB's additional monetary easing, passing of economic stimulus packages in the US and Japan and an agreement on a trade deal between the UK and EU helped the positive momentum to continue in December. Despite some headwinds such as increasing number of COVID-19 infections in Europe and spread of a new variant from the UK, TOPIX managed to recover to pre-covid levels and finished the month strongly. The Japanese market rallied in the first half of January on heightened expectations for additional economic stimulus measures to be passed by the new Biden administration in the US, but lost steam in the second half due to increased profit taking selling following a strong rally. In February, the rally resumed as expectations for a US economic recovery fueled rallies on Wall Street and the Nikkei Average closed above 30,000 for the first time since August 1990. Afterwards, the market declined as investors became wary of surging US Treasury yields. The market rebounded strongly in the first half of March thanks to another economic stimulus bill in the US and favourable US employment indicators. News of losses at financial institutions in connection with transactions with Archegos Capital caused the market to pull back at the end of the reporting period.

The fund posted a return of 25.27% (in Japanese yen terms i.e. excluding the EUR/JPY currency impact) versus 21.48% of the benchmark, TOPIX Total Return Index.

Positive contribution came from sectors such as Information & Communication, Chemicals, Marine Transportation, Wholesale Trade and Pharmaceutical. Iron & Steel and Pulp & Paper. On the other hand, Electric Appliances, Construction, Foods, Iron & Steel and Rubber Products contributed negatively.

In terms of individual stocks, the best contributors were overweight positions in Nippon Yusen (Marine Transportation), Ebara (Machinery), Toyota Industries Corp. (Transportation Equipment), Shimachu (Retail Trade), and no position in Keyence (Electric Appliances). Worst performers were overweight in Hitachi Construction Machinery (Machinery), IPEX and NEC Corp. (Electric Appliances), Komeri (Retail Trade) and no position in Tokyo Electron (Electric Appliances).

Although the progress of COVID-19 vaccinations in Japan is well behind many countries, vaccinations for the general public have started, beginning with the elderly. This will be a catalyst to push the economy up in the latter half of the year, as evidenced by expectations for a strong recovery in corporate earnings for FY2021. Value stocks have recovered considerably vs. growth since late last year, but we believe the positive momentum will continue in the near term as US long-term rates are likely to remain on an upward trend. We will continue to search for companies with positive earnings momentum and attractive valuations in order to deliver superior returns to our investors.

Investment Reviews

Metzler Global Equities Sustainability*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities and equity related securities of international growth companies.

Fund Report

In the first reporting quarter (October to December 2020), global stock markets continued their upward trend unabated, which lasted until the beginning of 2021. In the second reporting quarter (January to March 2021), stock market activity worldwide was characterised by sustained high volatility. Price gains were followed by temporary losses. The price increases in the last quarter of 2020 were primarily driven by broad-based fiscal policy aid packages in many nations as a result of the Corona pandemic and continued loose monetary policy. In addition, Brexit and the US presidential election created more volatility in international markets. Along with a gradually emerging containment of the pandemic, investor sentiment since the beginning of 2021 was overall strongly influenced by expectations of a reopening of the global economy, a stronger resumption of industrial production and a resurgence of travel, especially in Asia and the US. Then, since the beginning of 2021, rising interest rates and inflation expectations weighed on growth stocks in particular. This favoured a broad rotation in the equity market in favour of cyclical stocks.

In the first quarter of the report, we already began to gear our portfolio more cyclically in order to benefit from a reopening of the economy. New purchases included shares in the Chinese insurance group PingAn, which should offer attractive long-term growth potential and is characterised by technological innovations. We also added to a position in the Swedish commodities company Boliden. In the aviation sector, we shifted some stocks: The position in Airbus was sold after a price recovery; in return, we invested in shares of the suppliers MTU Aero Engines and Transdigm. We also bought shares in KION, a German supplier of forklift trucks, warehouse technology and supply chain solutions. We are convinced of KION's dynamic growth, which combines structural growth in automation with the cyclical forklift truck business. We also increased our position in Recruit Holdings, the global market leader in online advertising portals from Japan. In turn, we locked in gains and slightly reduced the weighting of selected US technology and healthcare stocks.

In the second quarter, we added to positions in cyclically sensitive stocks and in stocks that historically benefit from rising interest rates. We bought shares in Lincoln National, a US life insurance company, and Sompo, a Japanese insurance company with a strong capital position and an above-average dividend yield. We also bought shares in Royal Bank of Canada and increased our position in Allianz. We increased our exposure to stocks that benefit from rising commodity prices, for example, by buying shares in Kansas City Southern, Mosaic and LyondellBasell. Other new purchases included shares in UPM Kymmene, Dexcom, AstraZeneca and Japanese stocks Sony and Bridgestone. Conversely, technology stocks Alphabet, Microsoft, Apple, Facebook and Adobe were reduced.

Among the stocks with the highest positive performance contributions in the reporting period were the US technology stocks Alphabet and Microsoft as well as shares of the European semiconductor supplier ASML. In contrast, the shares of the technology companies Amazon, Alibaba and Adobe in particular weighed on the fund's performance.

Investment Reviews

Metzler Eastern Europe

Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation by investing predominantly in equities and equity related securities of companies located in Europe, with at least two thirds of the Fund's assets invested in Eastern European equities and equity related securities.

Fund Report

The recovery on the stock markets continued in the past half-year. Following the announcement of the first effective vaccine against the coronavirus, share prices rose significantly from November 2020 onwards, as an early end to the pandemic and a return to normality became very likely. In particular, cyclical stocks, which had suffered heavily from the corona-related economic slump, increased significantly in value.

The stock exchanges in Eastern Europe also recovered significantly in the reporting period. The MSCI Russia gained 27.8% from a euro investor's perspective. The Polish stock market, as measured by the MSCI Poland, gained 7.5% and the MSCI Turkey 4.1%. In the reporting period, the Russian stock market benefited from the sharp rise in commodity prices and generally low equity valuations. Brent crude oil cost USD 70 per barrel again for the first time in March, returning to its pre-crisis level. With oil prices at USD 60–70 per barrel, we expect dividend yields of over 10% from Russian oil companies, combined with very solid balance sheets and low production costs.

At the end of 2020, we significantly increased our holdings in cyclical companies that are likely to benefit from the end of the pandemic. In particular, financial and energy stocks were very attractively valued and promised significant upside potential looking ahead to 2021. In return, we reduced shares in companies that had performed very well during the year - software companies, gold producers and food retailers.

The past six months also saw a large number of interesting new listings on Eastern European stock exchanges. With Allegro, Ozon and Kaspi, the leading online retailers in Poland, Russia and Kazakhstan are now represented in the portfolio. Corona has massively accelerated the trend towards online shopping, and we believe this trend will continue after the end of the pandemic. We also participated in the IPOs of Russian value retailer Fix Price and logistics real estate group CTP for the portfolio.

At the end of 2020, investors had associated the change at the head of the Turkish central bank with hopes of a return to an orthodox monetary policy. This hope was dashed after just four months, after the country's central bank chief was surprisingly replaced again. As a result, a further devaluation of the Turkish lira seems very likely. In our portfolio, we are therefore focusing on Turkish export stocks that benefit from currency devaluation and on interesting individual stocks with structural growth opportunities.

Metzler Focus Japan Sustainability*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in equities and/or equity related securities of companies located in Japan, which are listed or traded on recognised markets in Japan. The Fund will for the most part be invested in up to 35 securities, however this number may be increased if the Investment Manager deems appropriate.

Fund Report

TOPIX rose 11.02% in October-December 2020 quarter and 8.27% in January-March 2021 quarter respectively, resulting in a gain of 20.21% in October-March period with TOPIX closing at 1,954.00 at the end of March 2021, and the fund was up 26.4% (in JPY terms i.e. excluding the EUR/JPY currency impact), outperforming the benchmark by 4.9%.

In Q4 2020, the Japanese stock market rallied with expectations for recovery in global economy thanks to the vaccine development, a sharp corporate earnings recovery, and the second US stimulus package. In October, the market moved within a narrow range amid stalled talks over additional economic stimulus measures in the US, along with an increase in new COVID-19 cases in the US and Europe. In November, the US stocks boosted by the expectations for the interest rates to remain low globally and news of COVID-19 vaccines. The Japanese equities rallied in response. The market gained another ground from the expectations of upward earnings revisions following announcements of better-than-expected earnings results. In December, the expectations for vaccinations and an additional stimulus package in the US fueled further rallies. Moreover, a trade deal struck between the UK and EU, additional monetary easing by the ECB, and indications of a prolonged period of monetary easing in the US also supported the market. The Nikkei Stock Average hit a 30-year high.

In Q1 2021, the Japanese stock market continued to rise. In January, the US stocks started with the new “triple-blue” administration, which led to a rise in long-term rates and increased expectations for an additional economic stimulus package. The Nikkei Stock Average topped 30,000 on February 15, triggered by the foreign investors and the futures with expectations for the economic recovery in the US. However, with a sharp increase in the US long-term rates weighed heavily, therefore, the Japanese stock market ended February with a significant decline. In March, the economic sensitives and financials rallied on the additional economic stimulus measures in the US and expectations for vaccinations to pave the way for a recovery in economic activities. The high-priced stocks weakened due to the rise in the US long-term rates and the BOJ's decision to purchase only ETFs that track TOPIX, not the Nikkei225. In this quarter, this BOJ's decision resulted in a large gap between the TOPIX and the Nikkei225 benchmark indices in the performance. The market conditions were notably return reversals by factor. The economic sensitive value stocks performed well, but overvalued growth stocks were sold off.

After reviewing factors such as expected returns and earnings outlook, we newly bought eight names and sold off seven names during October- March period. The number of names in the portfolio became 30. In terms of sectors, we increased “Communications & Services” related names such as NS Solutions. The stock was at an attractive price in spite of a large potential growth in online and remote development businesses. In addition, we increased “Financials” exposure by adding weights of holding names in November 2020. On the other hand, we decreased “Consumer Goods” related names such as PEPTIDREAM and Yamada Holdings.

We newly bought OSG, a manufacture of cutting tools centering on hole-finishing solutions, in February 2021. We expect its earnings to begin reflecting orders pick up from now. Following a recovery in automobile production in China and the US, we expect orders for automotive taps and drills to remain on an uptrend through the year 2021.

In February 2021, we sold off PEPTIDREAM, a developer and provider of drug discovery platform that can identify hit candidates from extensive libraries of nonstandard peptide. The share price became overvalued caused by the sharp rise after the upward.

The global manufacturing PMI has been recovering as the IMF predicted the global economy will grow 6.0% in 2021, an increase of 0.5% from the previous forecast. The US ISM manufacturing index was 64.7 in March, which is the highest since December 1983. We think this high score over 50 in the US ISM manufacturing index will last for a year from the past lesson. We continue to overweight the foreign demand related manufacturing sectors such as Machinery, Electric appliances, and Precision instruments. This is because these companies' sales and earnings have strong relationship with the global manufacturing PMI.

Investment Reviews

Metzler Focus Japan Sustainability*

The Nikkei225 reached 30,000 JPY for the first time in 30 years, since the collapse of the bubble economy in late 1980s. Over the past 30 years, the NY Dow has increased ten times, from 3,000 USD to 30,000 USD. However, the Japanese stocks (the Nikkei 225) have been completely flat at 30,000 JPY, which is an extreme underperformance of one-tenth. As a result, the valuations of Japanese stocks are among the lowest in developed countries. Especially, when compared the P/B ratio of various countries, it shows that Japan is extremely undervalued, at 1.37% in TOPIX as at the end of March 2021.

To conclude, we think that the global investors are now reviewing the true value of Japanese stocks. The COVID-19 pandemic brought us the urgent shift of business styles and daily life-styles to remote working. At the same time, the trend toward de-carbonization and the shift to EVs are accelerating. The Japanese companies are now getting attention in terms of their unique high technological components, materials and equipment. The presence of the Japan's niche advanced technology increases with the establishment of this new society.

Metzler Euro Corporates Short Term Sustainability*

Investment Objective

The investment objective of the Fund is to achieve interest income and long term capital appreciation by investing predominantly in corporate debt securities of global issuers denominated in Euro, with a period to maturity of up to five years.

Fund Report

During October, the corona pandemic in Europe increasingly threatened to spiral out of control. In many countries, an exponential growth of new daily infections was observed. Many governments felt compelled to adopt extensive measures to contain the spread of the virus. While attempts were made to minimize restrictions on the economy, these renewed restrictions were expected to cause a second slump in economic growth during the year. The stock markets in particular suffered considerable price losses as a result. The reactions on the bond markets were much less pronounced. Although yields on bonds considered to be safe, such as Bunds or Pfandbriefe, fell, the risk premiums on many corporate bonds and government bonds issued by peripheral European countries increased only moderately. The main reason for this is likely to have been the continued very expansive monetary policy with its numerous bond-buying programs. In addition, the President of the European Central Bank Lagarde made it clear that all existing programs would be reviewed and adjusted if necessary in order to be able to react to a deterioration in the situation. The outlook was also clouded by uncertainties regarding the upcoming US presidential election, as well as the stalled negotiations between the EU and the United Kingdom on an agreement to regulate trade relations after the end of the Brexit transition period.

During November, the exponential growth of new Corona infections was halted. In addition, there was promising news regarding the imminent availability of a vaccine with high efficacy. For example, two manufacturers reported that their studies on the developed vaccines showed efficacy of more than 90%. This raised hopes that the approval process would be shortened and that the vaccines would be used quickly. On the capital markets, the prospect of a foreseeable end to the pandemic led to a significant recovery, from which risk premiums for corporate bonds also benefited. Yields on German government bonds rose perceptibly, although this was put into perspective again as November progressed. The election in the US caused temporary irritation, as the result initially appeared to be closer than expected, before the lead for the challenger Biden increased.

In December, the number of infections remained at a high level. In Germany, for example, the number of new infections per day rose at times to more than 30,000. As capacity in intensive care units became tight in many places, further lockdown measures were implemented. In addition, reports of a mutation of the coronavirus that had been discovered in Great Britain and was classified as significantly more contagious than the previously widespread virus caused uncertainty. At the same time, the first vaccinations were started in Great Britain and later also in the EU. This was associated with the hope of achieving widespread protection against the coronavirus in many countries in the course of the following months. Despite high rates of new infections, the financial markets subsequently remained largely stable or even friendly. In addition, politicians and central banks continued their support. For example, new economic stimulus packages were adopted in Japan and the US. The ECB increased the so-called "Pandemic Emergency Purchase Program" (PEPP) by EUR 500 billion and provided further long-term refinancing facilities for banks at very attractive conditions. In addition, the ECB President reiterated that they would be prepared to do even more if necessary. The central bank's massive intervention in the markets was reflected in the continued very low level of interest rates and stable risk premiums for corporate bonds. In addition, the EU and the United Kingdom reached a last-minute agreement on a trade deal, although some ambiguities still remain with regard to implementation.

Investment Reviews

Metzler Euro Corporates Short Term Sustainability*

In January, the number of infections remained at a high level. The World Health Organization put the number of people infected with the coronavirus worldwide at over 100 million. In addition to the spread of much more infectious mutations of the coronavirus, the slow pace of vaccination, particularly in the EU, caused disappointment. There was a lack of the necessary vaccine doses as well as efficient distribution of vaccines. This was accompanied by concerns that the economic upswing would take longer than expected to materialize. Accordingly, the major central banks clearly indicated that they would maintain monetary policy measures longer and more extensively if necessary in order not to jeopardize the economic recovery. Lagarde stressed that every effort would be made to keep refinancing conditions favorable for the economy. Moreover, the economy seemed to be coping much better with the renewed lockdown measures than at the beginning of the pandemic. The economy also received further support from politicians in the form of plans by the newly sworn-in U.S. President Biden to launch a further economic stimulus program with a volume of up to USD 1.9 trillion.

In February, the number of new daily infections fell significantly. At the same time, there was discernible progress in vaccination in many countries, as well as promising evidence that vaccinated individuals are unlikely to transmit the coronavirus to others. Optimistic estimates indicated that the US and the UK could achieve the necessary herd immunity as early as the spring and thus reopen the economy completely in Europe, this should be the case in the summer. The outlook for the economy was assessed as correspondingly positive. For example, the expectations component of the ZEW index rose significantly in February. In the US in particular, the economic recovery was underpinned by robust economic data. In addition, President Biden's new fiscal package cleared an important political hurdle with its approval by the House of Representatives. On the bond markets, the improved economic situation combined with the prospect of further fiscal stimulus resulted in rising yields, and not only in the US. For example, the yield on ten-year Bunds climbed from below -0.5% at the beginning of the month to more than -0.25% at times. In the euro zone, the rising yields on government bonds were met with unease. The ECB President commented that they were closely monitoring the development of the yield curve at the long end. The ECB's chief economist saw a risk that the optimism of market participants might be getting too far ahead of the actual recovery of the economy.

The corona pandemic continued to dominate the daily news in March. While the much more advanced vaccination campaign in the UK and the US had an increasingly positive impact, the much slower pace of vaccination and uncertainties surrounding AstraZeneca's vaccine noticeably dampened the mood in continental Europe. At the same time, incidence figures rose in many European countries despite lockdown measures.

However, a look at the capital markets showed a diametrically different picture. For example, international stock markets saw almost only rising prices and Germany's leading index, the DAX, was able to break through the 15,000 point level for the first time in its history. Risk premiums for corporate bonds were robust in March. For lower-rated bonds, risk premiums actually declined in some cases, as they did for paper with shorter maturities. The rise in capital market interest rates since the beginning of the year indicated that market participants had priced in a strong economic upturn supported not least by the expansive monetary policy of the central banks and in particular fiscal policy in the US.

Risk premiums for corporate bonds declined overall in the reporting period. The relative performance of corporate bonds versus comparable German government bonds was positive on average. Bonds with lower ratings outperformed those with higher ratings on average, and subordinated bonds outperformed senior bonds.

In the reporting period, we maintained an overweighting of bonds with lower ratings and of securities with remaining maturities of more than three years. The proportion of BBB rated bonds was increased at the end of the reporting period. We added some individual securities to the portfolio, including by participating in new issues. In addition, we partly reallocated bonds with shorter remaining maturities to bonds with longer maturities. At the individual security level, we occasionally reallocated securities from issuers with high greenhouse gas emissions to securities with more favorable CO2 values. Quantitative duration management was used to systematically benefit from interest rate dynamics within the euro zone. Trading signals were implemented using liquid, exchange-traded futures contracts on interest rates and bonds. Active duration management contributed negatively to overall performance during the reporting period.

Investment Reviews

Metzler Wertsicherungsfonds 90

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation while aiming to restrict negative returns within a calendar year to 10%, thus aiming to preserve a minimum Net Asset Value per Share (adjusted for dividend distributions) at year end of 90% of the Net Asset Value per Share at the beginning of a calendar year. To achieve this objective, the Fund pursues a capital preservation strategy (Wertsicherungsstrategie). The Fund will seek to attain its investment objective by gaining exposure to the global equity and debt securities markets. The Fund will gain this exposure by predominantly investing in global stock index derivatives and interest rate/bond derivatives.

Fund Report

The fund started the fiscal year on October 1, 2020 with an equity allocation of around 25% and a bond allocation of around 59%, corresponding to a duration at fund level of 3.8 years. In the three months up to the end of the value protection period, prices on the stock market developed very positively overall. The combination of global equity indices such as EURO STOXX 50, TOPIX and S&P 500, which is also implemented in the fund, gained 13.0% in value. The equity allocation was raised in line with the price gains and stood at around 31% at the end of the year. The bond markets, on the other hand, showed a slightly negative performance of -0.3% in the 4th quarter. The bond ratio was therefore reduced and stood at a duration of around 1.6 years at fund level at the end of the year. From October 1 to December 31, 2020, the fund recorded a gain of 2.80% in share class A, 2.87% in share class B, and 2.94% in share class C.

As of January 1, 2021, portfolio management adjusted the ratios with a view to meeting the target of 90% minimum portfolio value for year-end 2021. As a result, the fund started the new calendar year with an equity ratio of approximately 33% and a duration of 1.8 years. The stock markets continued to develop very positively and are continuing their recovery rally unabated. The basket of global stock indices implemented in the portfolio gained 6.4% in the first three months. In this environment, the equity allocation was further increased and stood at around 50% at the end of the quarter. In contrast, bond prices recorded significant losses of -3.1% in the same period and in the meantime virtually collapsed due to growing inflation fears. The fund's duration was therefore reduced to 0.8 years by the end of the quarter. From January 01 to March 31, 2021, the Fund recorded a gain of 1.68% in Share Class A, 1.76% in Share Class B, and 1.81% in Share Class C.

Investment Reviews

Metzler Alternative Multi Strategy

Investment Objective The investment objective of the Fund is to achieve long term capital appreciation by investing predominantly in a broadly diversified portfolio of derivatives strategies based on the equity, bond and currency markets.

Fund Report The past six months have been dominated by reflation. Equity markets and commodities gained significantly, and interest rates trended higher. The election of Joe Biden as U.S. President and the narrow agreement in the Brexit negotiations initially helped to calm things down. Fiscal and monetary stimulus in the US and the Corona vaccination progress in several countries then led to a significant improvement in consumer and business sentiment. However, this positive development fueled concerns about higher inflation rates, which could force central banks to adopt more restrictive policies again.

The fund performed positively during the reporting period. Momentum and volatility strategies made the largest contributions to performance across all asset classes. Among carry strategies, dividends continued their recovery and also made significant positive contributions to performance. However, fixed income carry strategies detracted slightly from performance. Value strategies painted a mixed picture and were negative overall as of the reporting date.

Performance over the entire reporting period breaks down as follows:

- Volatility: 1.26%
- Carry: 0.89 %
- Momentum: 2.15
- Value: -1.14 %

The largest positions as of March 31, 2021 were:

Equity Futures (in %):

IBEX 35: 6.13%, SMI: 6.11%, ESTX50: 5.21%, OMX: -5.59%, AEX: -3.55%, FTSE TAIWAN: -2.50%.

Bonds (duration in years):

Australian 10y: 3.38, Canadian 10y: 1.08, Euro Bobl: 0.85, JGB: -3.72, Euro-Bund: -2.48, Euro-Schatz: -1.16

Currencies (in % vs. EUR):

Investment Reviews

Metzler Wertsicherungsfonds 98

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation while aiming to restrict negative returns within a calendar year to 2%, thus aiming to preserve a minimum Net Asset Value per Share (adjusted for dividend distributions) at year end of 98% of the Net Asset Value per Share at the beginning of a calendar year. To achieve this objective, the Fund pursues a capital preservation strategy (Wertsicherungsstrategie). The Fund will seek to attain its investment objective by gaining exposure to the EU debt securities markets and the global equity markets. The Fund will gain this exposure by predominantly investing in EU interest rate/bond derivatives and global equity index derivatives.

Fund Report

The fund started the fiscal year on October 1, 2020 with an equity allocation of around 1.3% and a bond allocation of around 16%, corresponding to a duration at fund level of 1.1 years. In the three months up to the end of the value protection period, prices on the stock market developed very positively overall. The combination of global equity indices such as EURO STOXX 50, TOPIX and S&P 500, which is also implemented in the fund, gained 13.0% in value. The equity allocation was raised in line with the price gains and stood at around 2.7% at the end of the year. The bond markets also performed positively in the 4th quarter, gaining 0.4%. The bond ratio was therefore reduced only slightly and stood at a duration of around 0.8 years at fund level at the end of the year. From October 1 to December 31, 2020, the fund recorded a gain of 0.01%.

As of January 1, 2021, portfolio management adjusted the ratios with a view to meeting the target of 98% minimum portfolio value for year end 2021. As a result, the fund started the new calendar year with an equity ratio of 2.8% and a duration of 0.8 years. The stock markets continued to develop very positively and are continuing their recovery rally unabated. The basket of global equity indices implemented in the portfolio gained 6.4% in the first three months. In this environment, the equity allocation was further increased and stood at around 5.0% at the end of the quarter. In contrast, bond prices recorded significant losses of -1.7% in the same period and in the meantime virtually collapsed due to growing inflation fears. The fund's duration was therefore not increased further until the end of the quarter and was kept at 0.8 years. From January 1 to March 31, 2021, the fund recorded a loss of 0.14 %.

Investment Reviews

Metzler Sovereign Select LCR Sustainability*

Investment Objective

The investment objective of the Fund is to achieve interest income and increase the value of its investments over the long term. The Fund shall invest at least 90% of its net asset value in global sovereign debt securities issued by governments or German Bundesländer (local German federal states). The Fund shall be managed in accordance with the eligibility rules for the Liquidity Coverage Ratio imposed by Basel III.

Fund Report

In the reporting period, the fund's securities portfolio consisted of government bonds and other public-sector bonds (German federal states) denominated in local currency. Currency risks were hedged with forward contracts.

The half-year under review continued to be dominated by the coronavirus and the global fight against the pandemic. In the fall of last year, new infections threatened to spiral out of control again, particularly in Europe, prompting national governments to adopt comprehensive restrictions on trade and on public and private life in order to contain the so called second wave. Despite the renewed restrictions on the economy, bond markets were largely stable. The main reason for this was probably the very expansionary monetary policy pursued by central banks worldwide. News about the high effectiveness of vaccines and the imminent start of vaccination programs towards the end of 2020 gave the financial markets a new boost. There was also further support from policymakers and central banks. In the US, for example, a new stimulus package was adopted, while the European Central Bank (ECB) increased the so called Pandemic Emergency Purchase Program (PEPP) by EUR 500 bn at its meeting in December.

Despite interim setbacks, the pace of vaccination accelerated in many countries at the start of the first quarter of 2021. According to optimistic estimates, the United States and the United Kingdom could achieve the necessary herd immunity as early as the spring to fully re-open the economy. Europe could follow in the summer. Market players were correspondingly positive in their assessment of the economic outlook. For example, the expectations component of the ZEW index rose significantly in February. In the US in particular, the economic recovery was underpinned by robust economic data. In addition, President Biden's new fiscal package cleared an important political hurdle with its approval by the House of Representatives. On the bond markets, the improved economic environment combined with the prospect of further fiscal stimulus resulted in rising yields. For example, yields on ten-year Treasuries and ten-year Bunds rose to 1.75% (+82 basis points) and -0.33% (+24 basis points) respectively from the turn of the year to the reporting date.

The rising yields on government bonds were noted with unease in some cases; nevertheless, the central banks emphasized their intention to keep refinancing conditions favorable. In addition to isolated inflation concerns and the increased refinancing needs of governments, the rise in capital market rates signals above all that market participants are apparently continuing to price in a strong economic upturn in capital market prices.

In line with the rise in yields, prices for government bonds fell for the most part during the reporting period, which also caused the fund price to fall. The yield curves of Anglo-Saxon countries in particular reacted clearly to the improved economic outlook and became steeper at the long end of their maturities. By contrast, the prices of securities from countries on the periphery of the European Monetary Union developed relatively favorably, partly as a result of the massive support provided by the ECB.

Among the investment regions, eurozone bonds accounted for around 21% of the fund at the end of March. German Bunds had the largest weighting within the euro segment, at around 13%. Among the bonds outside the euro zone, US Treasuries had the highest weighting with a good 21% of the fund volume. The "high-yield markets" within the industrialized countries (Australia and New Zealand) together accounted for just under 14% of fund assets on the reporting date. Emerging market bonds together accounted for around 15% of the portfolio (Singapore, Poland and the Czech Republic).

Investment Reviews

Metzler European Dividend Sustainability*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The investment objective will be obtained by investing predominantly in European equities and equity related securities such as, but not limited to, warrants, ADRs and GDRs, that are listed or traded on Recognised Markets. The Fund will have no industry or market capitalisation focus. The main investment focus of the investment portfolio will be on companies with an historical record of paying dividends, or with a high potential to pay dividends in the future.

Fund Report

The European stock markets performed very positively in the first half of fiscal year 2020/2021. On balance, the MSCI Europe gained 20.06% in the reporting period. Throughout the half-year under review, news on the COVID-19 pandemic were the main driver of market movements in both directions, particularly on the efficacy and availability of vaccines and on impending impositions or extensions of lockdowns. In October, stock prices were extremely volatile against the backdrop of the upcoming US presidential election. Once this uncertainty was overcome and the very high efficacy of BioNTech/Pfizer's COVID-19 vaccine was announced, European shares rose steadily until the end of March. Drivers were, in particular, the approvals of further COVID-19 vaccines and the vaccination successes of several countries, which point to significant growth in the global economy.

High dividend yield stocks (as measured by the MSCI Europe High Dividend Yield) underperformed the European blue-chip index (MSCI Europe) slightly during the reporting period, gaining 19.57%. With a gain of 17.74%, the fund underperformed the benchmark MSCI Europe High Dividend Yield. The fund's investment focus is on high quality and less cyclical companies, which contributed significantly to the fund's underperformance. Prices in the markets were driven by cheaply valued companies, but whose business model is structurally troubled (mining stocks and tobacco companies, among others). Such stocks are highly weighted in the benchmark. However, for sustainability reasons, we invest only very selectively in mining stocks and do not hold any tobacco stocks, which had the most negative impact on relative performance during the reporting period. Otherwise, the fund largely developed in step with the dividend index. In addition, our dividend strategy focuses not only on the size of the dividend, but above all on dividend growth and sustainable coverage of the dividend by free cash flow. These quality factors were also in low demand during the reporting period.

At sector level, the fact that the consumer goods, energy and technology sectors were significantly overweighted had a positive impact. Individual stock selection in the commodities and industrial goods sectors and the underweight in the food, beverages & tobacco sector proved less favorable. Winners at the individual stock level included two UK stocks (Taylor Wimpey and St. James's Place). Stocks with high domestic revenue exposure were in particular demand due to the general upturn in equity markets and the UK's vaccination lead over the EU. Residential real estate developer Taylor Wimpey (77.2%) also benefited from a planned change in legislation that is expected to significantly speed up the construction of residential properties and lower regulatory hurdles. Investment and wealth advisory provider St. James's Place (47.1%) saw significant inflows of funds from customers. Furthermore, the holding of the global market leader for lithography machines ASML was beneficial, increasing by 64.8%. The company is benefiting from continued strong demand for semiconductors and computer chips. Continuing supply bottlenecks for semiconductors are causing prices to rise significantly.

The relative performance was most heavily impacted by shares not included in the portfolio. Shares in the German software group SAP (-21.4%), which published significantly lower growth forecasts for the next two years, had a negative impact on fund performance. The British manufacturer of cleaning and hygiene products (-8.5%) lost ground, mainly due to its defensive business model. Investors took profits from 2020 in such stocks in the reporting period. Papers of Spanish telecom towers operator Cellnex (-5.5%) lost favor with investors following the announcement of a capital increase. The funds are needed for the acquisition of radio towers in several European countries. In addition, rising interest rates weighed on companies with long-duration assets.

Investment Reviews

Metzler European Dividend Sustainability*

During the quarter, we reduced our overweight in the energy sector after the oil price performed very well. Thus, we sold shares in the refiner Repsol and reduced positions in the oil company Total. Instead, we participated in the IPO of CTP, a developer and operator of logistics real estate. The company is already a leading player in Central and Eastern Europe and is looking to expand into Western and Southern Europe. The business model is very similar to VGP, in whose IPO we already participated in 2017 and have held in the portfolio since then. We expect a similarly positive development for CTP, which came to the stock exchange at a relatively low valuation and at the same time has a very convincing management team and a visible expansion strategy.

Investment Reviews

Metzler European Equity Enhanced

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The Fund will seek to attain its investment objective by utilising an 'enhanced equity strategy' which involves the Investment Manager holding long European equity exposure, implementing a covered call derivative strategy to generate additional income on this equity exposure whilst, depending on market conditions, using a protective put derivative strategy to protect the Fund against significant market declines. To achieve this strategy the Fund will invest in European equities, equity related securities (for example, ADRs, GDRs, warrants), equity derivatives and equity index derivatives all of which are listed or traded on a Recognised Market.

Fund Report

The fund invests in European equity indices. We explicitly built equity risk in the SMI, FTSE 100 and EURO STOXX 50 equity indices. In addition, we sold standardized options on the equity investment. Currency risks in Swiss francs (CHF) and British pounds (GBP) were actively taken in the amount of the allocated equity markets SMI and FTSE 100.

After the European stock markets took a short breather in the first weeks of the fourth quarter in their recovery from the corona-induced price drop in March 2020, share prices developed very favorably in the remaining weeks of 2020, continuing their upward trend. Further driven by support from global monetary and fiscal policy, a recovery in the manufacturing industry and increasing vaccination success against the coronavirus, share prices even reached new highs at times in the first months of 2021.

In line with our investment strategy, we reduced the fund's equity exposure countercyclically in an environment of sharply rising share prices, temporarily achieving a net equity exposure of less than 51%. However, by adjusting the call strike levels, we were able to avoid a more limited participation in the price gains on the stock market, so that the equity ratio in the fund oscillated between 50.7% and 118.3% in the period under review.

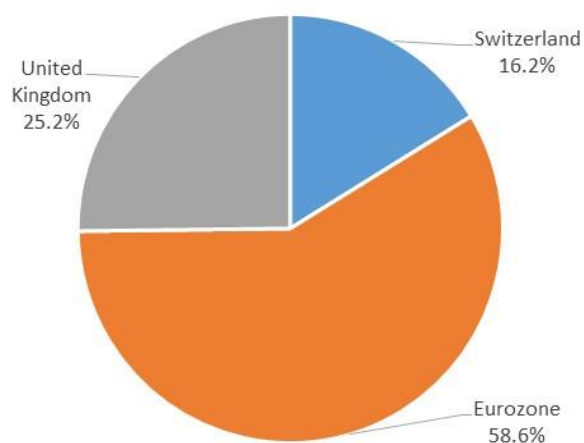

The fund tracked the market very well during the period under review. The premiums of the written call options more than compensated for the limited participation in the price increase on the stock markets, so that the fund outperformed its benchmark assets in the period under review.

Investment Reviews

Metzler US Equity Enhanced

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The Fund will seek to attain its investment objective by utilising an 'enhanced equity strategy' which involves the Investment Manager holding long US equity exposure, implementing a covered call derivative strategy to generate additional income on this equity exposure whilst, depending on market conditions, using a protective put derivative strategy to protect the Fund against significant market declines. To achieve this strategy, the Fund will invest in US equities, equity related securities (for example, ADRs, GDRs, warrants), equity derivatives and equity index derivatives all of which are listed or traded on a Recognised Market.

Fund Report

The fund invests in the US equity market. In doing so, we explicitly built equity risk in the S&P 500 equity index. In addition, we sold standardized options on the equity investment. Currency risks in US dollar (USD) were actively taken in the amount of the allocated equity market.

After the US stock market took a small breather in the first weeks of the fourth quarter in its recovery from the corona-related price drop in March 2020, share prices developed very favorably in the remaining weeks of 2020, continuing their upward trend. Further driven by support from global monetary and fiscal policy, a recovery in the manufacturing industry and increasing vaccination success against the coronavirus, share prices even reached new highs at times in the first months of 2021.

In line with our investment strategy, we reduced the fund's equity exposure countercyclically in an environment of sharply rising share prices, temporarily achieving a net equity exposure of less than 50%. However, by adjusting the call strike levels, we were able to avoid a more limited participation in the price gains on the stock market, so that the equity ratio in the fund oscillated between 49.1% and 126.5% in the period under review.

The fund tracked the market very well during the period under review. The premiums of the written call options more than compensated for the limited participation in the price increase on the stock markets, so that the fund outperformed its benchmark assets in the period under review.

Metzler Japanese Equity Enhanced

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The Fund will seek to attain its investment objective by utilising an 'enhanced equity strategy' which involves the Investment Manager holding long Japanese equity exposure, implementing a covered call derivative strategy to generate additional income on this equity exposure whilst, depending on market conditions, using a protective put derivative strategy to protect the Fund against significant market declines. To achieve this strategy, the Fund will invest in Japanese equities, equity related securities (for example, ADRs, GDRs, warrants), equity derivatives and equity index derivatives all of which are listed or traded on a Recognised Market.

Fund Report

The fund invests in the Japanese equity market. In doing so, we explicitly built equity risk in the Nikkei 225 equity index. In addition, we sold standardized options on the equity investment. Currency risks in Japanese yen (JPY) were taken in the amount of the allocated equity market.

After the Japanese stock market took a short breather in the first weeks of the fourth quarter in its recovery from the corona-related price drop in March 2020, share prices developed very favorably in the remaining weeks of 2020, continuing their upward trend. Further driven by support from global monetary and fiscal policy, a recovery in the manufacturing industry and increasing vaccination success against the coronavirus, share prices even reached new highs at times in the first months of 2021.

In line with our investment strategy, we reduced the fund's equity exposure countercyclically in an environment of sharply rising share prices, temporarily achieving a net equity exposure of less than 33%. However, by adjusting the call strike levels, we were able to avoid a more limited participation in the price gains on the stock market, so that the equity ratio in the fund oscillated between 32.8% and 125.2% in the period under review.

The fund tracked the market very well during the period under review. However, the premiums of the written call options only partially compensated for the limited participation in the price increase on the equity markets, so that the fund underperformed its benchmark assets in period under review.

Investment Reviews

Metzler China A Share Sustainability Fund*

Investment Objective

The investment objective of the Fund is to achieve long term capital appreciation. The investment objective will be obtained by gaining exposure to the Chinese equity markets. The Fund will gain this exposure by predominantly investing in A-Shares of Chinese companies, denominated in RMB, listed on the Shanghai or Shenzhen stock exchanges ("China A-Shares") via the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect (collectively "Stock Connect").

Fund Report

In the last half year, MSCI World returned 15.08% in CNY (19.57% in USD), MSCI China A returned 9.13% in CNY (13.39% in USD), and MSCI China All Shares returned 7.49% in CNY (11.68% in USD).

The Chinese A-share stock market remained robust in Q4 2020. The US election ended and the good news of the vaccine came out in November, further lift up the business sentiment. Given more certainty and recovery of global demand, the upward trend continued in early 2021, pushing up the CSI300 index to 5-year high. (CSI300 represents top 300 stocks traded on the Shanghai Stock Exchange and the Shenzhen Stock Exchange) However, such strong momentum reversed after mid-February, with ascending 10-year US Treasury yield hitting 14-month high in March, weighing down on A-share market and led to fall in 5-consecutive weeks (measured by CSI300).

China economy is experiencing rapid recovery. Since the pandemic, enterprises have been increasing working hours to improve the capacity utilization rate, which recovered to 3-year average level in Q3 2020. Demand of consumer goods, such as clothes, cosmetics, jewelries and automotive became prosperous. CPI has seen negative year on year growth over the past half year, as pork supply returning to normal, dragging down the pork prices, which accounted for large part of CPI's calculation. China's exports remained strong. After Biden's inauguration, the United States government passed USD 1.9trillion fiscal stimulus. Meanwhile, the vaccine rolled out quickly, currently nearly 20% of US population have been fully vaccinated. With the recovery of overseas demand, China's exports will stay in expansionary territory.

We believe that the valuation has returned to a more reasonable range following the market correction after Chinese Lunar New Year ("LNY"), the likelihood of further significant correction is now low. However, we observe the expectations of policy and liquidity tightening, new dynamics of US-China relations and a number of "black-swan" events continue to cast uncertainty into the market, which we expect will consolidate for a while further.

Our underperformance during March was largely due to the re-valuation of high quality and high growth names in China. Many of our core holdings rallied significant at the start of the year but then saw significant pull back in March, as investors refocused on valuations. We think as liquidity conditions have tightened, valuation is an important factor that cannot be ignored this year. We will attach more importance to valuation and margin of safety, and look for more diversification when building portfolios.

We think volatility and dispersion are likely to remain high in the Chinese stock market this year. Under current market condition, it will be more difficult to outperform the broad market through sector allocation alone. This should provide fundamental stock pickers an edge, and our efforts will remain focused on stock selection within each sector. In terms of portfolio positioning, we will be more balanced and diversified in sector allocation.

In terms of stock selection, we are taking advantage of the recent market weakness to shore up the portfolio. Whilst we have put more attention on reasonable valuation, we look for long-term visibility and sustainability of growth justifications instead of just focusing on short-term price multiples. Indeed recent quarterly and annual earnings reports provided further evidence, reinforcing our long-term views on companies operating in areas with little to no ceilings to growth and with market-leading competitive positioning. As a result our high conviction positions have remained stable, names such as Oriental YuHong Waterproof, Haid Group, Anta Sports, Tencent, Sany Heavy Industry etc. continue to report solid growth whilst also trading at a reasonable multiple. At the same time, as the market correction has led some companies to trade cheaply, we are sifting through the "cheap" end of the spectrum as some companies, in our opinion, have upside growth potential that is yet to be valued correctly by the market.

Investment Reviews

Metzler Wertsicherungsfonds 92

Investment Objective

The investment principle of the Fund is to achieve long term capital appreciation while aiming to restrict negative returns within a calendar year to 8%, thus aiming to preserve a minimum Net Asset Value per Unit (adjusted for dividend distributions) at year end of 92% of the Net Asset Value per Unit at the beginning of a calendar year. To achieve this objective, the Fund pursues a capital preservation strategy.

Fund Report

Metzler Wertsicherungsfonds 92 (CHF) started in January 2020 with an equity allocation of 40.4% and a bond allocation of 38.6%, corresponding to a duration at fund level of 2.5 years.

In the reporting period, the equity markets proved to be extremely strong despite some smaller setbacks. After some ups and downs in the previous reporting period and a starting recovery since the end of March 2020, the strongly positive trend for the equity markets continued and kept going smoothly until the end of March 2021. Thus, the severe losses from Q1 2020 could be overcompensated clearly until the end of the year, already. This strong positive trend was maintained in Q1 2021. Bonds moved sideways in Q4 2020 with a slight negative tendency. Rising inflation expectations in the USA and similar changing expectations in Europe weakened the bond market performance in Q1 2021 considerably. The equity exposure in the fund has been increased continuously to 26.1% until year end and to 41.4% until the end of Q1 2021. The bond exposure decreased in the sideways moving bond markets from 3.57 years duration (55%) to 1.97 year (30.3%) at year end and to 0.72 years duration (11.1%) at the end of Q1 2021.

Notes to the Financial Statements

General

Metzler International Investments plc (the "Company") was incorporated on 21 December 1994 under the laws of the Republic of Ireland as an investment company with variable capital and has its registered office at Kilmore House, Spencer Dock, North Wall Quay, Dublin 1, Ireland. The Company is authorised as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 (amending the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, as may be modified, amended, supplemented, consolidated or re-enacted from time to time.

The Company is managed by Metzler Ireland Limited, ('the Manager'), whose ultimate holding company is B. Metzler seel. Sohn & Co. Holding AG, a German registered corporation.

The Company is organised as an umbrella fund and contains twenty sub funds (the Funds) all of which were active at period end, namely:

Presentation of Financial Statements

The financial statements are prepared under the historical cost convention modified by the inclusion of securities stated at fair value.

The Statement of Financial Position is on pages 122 to 127.

In the opinion of the Directors the financial statements give the information required by the Companies Acts 2014.

* Fund name changed on 10 February 2021. Please refer to note 15 for details.

Notes to the Financial Statements

1. Significant Accounting Policies

The following is a summary of the significant accounting policies adopted by the Company:

i) Basis of Accounting

The financial statements are prepared in accordance with Financial Reporting Standard 102 ("FRS 102"): The Financial Reporting Standard applicable in the UK and the Republic of Ireland, the European Communities (Undertakings for Collective Investment in Transferable Securities Regulations) 2011 (as amended), the European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

The financial statements are prepared on a fair value basis for financial assets and financial liabilities designated at fair value through profit or loss ("FVTPL"). All other assets and liabilities are stated at amortised cost or redemption amount (redeemable shares). The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

Critical Accounting Estimates and Judgements

The preparation of Financial Statements in conformity with FRS 102 requires the use of certain critical accounting estimates and judgements. It also requires the Board of Directors, based on the advice of the Manager, to exercise its judgement in the process of applying the Company's accounting policies. The estimates and associated judgements are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. Metzler Ireland Limited, as the Manager, makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the actual results.

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss

Classification

The Company has designated its assets and liabilities into the categories below in accordance with FRS 102.

Financial Assets and Liabilities at Fair Value Through Profit or Loss

The Company recognises and measures financial assets and financial liabilities in accordance with International Accounting Standard 39 ("IAS 39") as permitted by FRS 102 and has applied Sections 11 and 12 for disclosures. The category of financial assets and liabilities at fair value through profit or loss is sub-divided into two sub-categories. However, the Company has classified all of its financial assets as held for trading. Financial assets held for trading include equities, bonds, investment funds and derivatives. These instruments are acquired principally for the purpose of generating a profit from fluctuations in price. Financial assets classified as loans and receivables include cash and cash equivalents and debtor balances.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss (continued)

Recognition/Derecognition

The Company recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Company. Financial assets and financial liabilities at fair value through profit or loss ('FVTPL') are initially recognised at the transaction price on trade date, which is the date on which the Company becomes a party to the contractual provisions of the instrument. The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the Statement of Comprehensive Income. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability. The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value, with transaction costs for such instruments being recognised in Statement of Comprehensive Income. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in profit or loss in the Statement of Comprehensive Income in the period in which they arise. Financial assets classified as loans and receivables are carried at amortised cost less impairment loss if any. Financial liabilities, other than those measured at fair value, are measured at amortised cost using the effective interest rate. Financial liabilities measured at amortised cost include management fees payable, payable for investments/redemptions and accounts payable.

Fair Value Measurement Principles

"Fair Value" is the price for which the asset could be exchanged, or liability transferred, between knowledgeable willing parties in an arm's length transaction. The best evidence of fair value is a quoted market price for an identical asset in an active market. Quoted in an active market refers to quoted prices that are readily and regularly available and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted price is usually the current closing price. Financial assets and financial liabilities are valued using close of business prices. The fair value of financial instruments is based on their quoted market prices at the reporting date, valued at 31 March 2021, without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at current closing prices. If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

When discounted cash flow techniques are used, estimated future cash flows are based on managements best estimates and the discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the reporting date. Fair values for unquoted equity investments are estimated, if possible, using applicable price/earnings ratios for similar listed companies adjusted to reflect the specific circumstances of the issuer.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ii) Financial Assets and Financial Liabilities at Fair Value Through Profit or Loss (continued)

Fair Value Measurement Principles (continued)

The fair value of derivatives that are not exchange-traded is estimated at the amount that the Company would receive or pay to terminate the contract at the period end taking into account current market conditions and the current creditworthiness of the counterparties. Specifically, the fair value of a forward contract is determined as a net present value of estimated future cash flows, discounted at appropriate market rates on the valuation date. Exchange traded futures (including index futures) and options contracts shall be valued at the settlement price as determined by the market in question. If such market price is not available, the value shall be the probable realisation value estimated with care and in good faith by the Directors or such other competent person appointed by the Directors and approved for the purpose by the Depositary.

Fair Value Disclosures

A key disclosure required in the financial statements is the categorisation of fair value measurements within a three-level hierarchy that reflects the significance of inputs used in measuring fair values. The fair value hierarchy in place for the Company is as described in Note 3.

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Amortised cost Measurement

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment or uncollectability in the case of a financial asset.

Impairment

A financial asset not classified at FVTPL is assessed at each reporting date to determine whether there is objective evidence of impairment. A financial asset or a group of financial assets is impaired if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset(s) and that loss event(s) had an impact on the estimated future cash flows of that asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired includes significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of the amount due on terms that the Company would not otherwise consider, indications that a borrower or issuer will enter bankruptcy, or adverse changes in the payment status of the borrowers. An impairment loss in respect of a financial asset measured at amortised cost is calculated as the difference between its carrying amount and the present value of the estimated future cash flows discounted at the assets original effective interest rate. Losses are recognised in profit or loss and reflected in an allowance account against receivables. Interest on the impaired asset continues to be recognised. If an event occurring after the impairment was recognised causes the amount of impairment loss to decrease, then the decrease in impairment loss is reversed through profit or loss.

iii) Security Transactions

Security transactions are recorded in the accounts of the Company on the trade date upon which the transaction takes place.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

iv) **Income from Investments**

Dividend income relating to investments is recognised in profit or loss in the Statement of Comprehensive Income on the ex-dividend date. Interest income on investments is accounted for on an effective interest rate basis. Other income distributions from investment funds are recognised in profit or loss in the Statement of Comprehensive Income as 'distributions' when declared. Bank Interest income is recorded on an effective yield basis.

Capital gains, dividends and interest received on investments made by the Company may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in profit or loss in the Statement of Comprehensive Income and net of any tax credits.

v) **Expenses**

Each Fund shall pay all of its expenses. Expenses are accrued on a daily basis.

vi) **Realised and Unrealised Gains and Losses on Sale of Investments**

The computation of realised gains and losses on the sale of investments is made on the basis of average cost. Net gain from financial instruments at FVTPL includes all realised and unrealised fair value changes and foreign exchange differences.

vii) **Foreign Currency Translation**

The functional currency of the Company is Euro ("EUR") as the Board of Directors have determined that this reflects the Company's primary economic environment, with the exception of Metzler Wertsicherungsfonds 92, the functional currency being Swiss Franc ("CHF"). The presentation currency of the Company is also Euro, with the exception of Metzler Wertsicherungsfonds 92. Transactions in foreign currencies are translated at the foreign currency exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency at the foreign currency closing exchange rate ruling at the reporting date. Foreign currency exchange differences arising on translation and realised gains and losses on disposals or settlements of monetary assets and liabilities are recognised in the Statement of Comprehensive Income. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the foreign currency exchange rates ruling at the dates that the values were determined.

Foreign currency exchange differences relating to investment at fair value through profit or loss and derivative financial instruments are included in net gains/losses on financial assets at fair value through profit or loss. All other foreign currency exchange differences relating to monetary items, including cash are presented in the Statement of Comprehensive Income

viii) **Cash Flow Statement**

The Company has availed of the exemption available to open-ended investment funds under FRS 102 (Section 7.1A(c)) and is not presenting a cash flow statement.

Notes to the Financial Statements

1. Significant Accounting Policies (continued)

ix) Going Concern

The Company's activities, together with the factors likely to affect its future developments, performance and position are set out in the financial statements, together with its financial and liquidity positions. In addition, the notes to the financial statements address the Company's financial risk management objectives, details of the financial instruments used by the Company and its exposure to credit and liquidity risks. The Board of Directors have a reasonable expectation that the entity has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going concern basis of accounting in preparing the financial statements.

x) Net Asset Value per Share

The Net Asset Value per redeemable share is determined by dividing the value of the Net Assets of each class of redeemable shares by the total number of redeemable shares in issue at the time.

xi) Distributions

Distributions payable on redeemable shares are recognised in the Statement of Comprehensive Income as finance costs.

xii) Redeemable Shares

Redeemable shares are redeemable at the shareholder's option and are classified as financial liabilities. The redeemable shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The redeemable share is carried at the redemption amount that is payable at the reporting date if the shareholder exercised its right to put back the share to the Company.

xiii) Transaction Fees

Transaction fees are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

xiv) Equalisation

On the purchase or sale of redeemable shares in the Company, an amount per share which, in the opinion of the Directors, represents the net income per share of the Fund accrued but undistributed up to the time of the issue or redemption is allocated to a separate income account. This amount is reflected as an allocation from/to the Statement of Comprehensive Income from the Statement of Changes in Net Assets attributable to holders of redeemable shares. This account is known as the 'Equalisation Account'. This Income and Expense Equalisation procedure is undertaken to ensure that each participating share of Metzler International Investments plc represents the same amount of capital and interest in the net accrued earnings of the individual Fund at any given time so that the earnings per share are not diluted by any allotments of new shares or increased by any redemptions of existing shares.

Notes to the Financial Statements

2. Management, Depositary and Performance Fees

Management fees of up to 2% of the Net Asset Value of each Fund are payable to the Manager in respect of each class of Participating Shares. Management fees accrue daily and are payable quarterly in arrears.

The Depositary will be paid by the Company an annual custody fee per Fund, accruing and calculated daily and paid monthly in arrears at a rate ranging from 0.0075% to 0.6% per annum calculated by reference to the market value of the investments that the Fund may make in the relevant market. In addition, the Depositary shall be paid an annual trustee fee per Fund not exceeding 0.03% of the net asset value of each Fund. The Depositary shall also be entitled to be paid by the Company transaction charges and any out-of-pocket expenses incurred by the Depositary in the performance of its duties and functions under the Depositary Agreement. In accordance with the Schedule below, the Manager may also be entitled to a performance related management fee (the 'Performance Fee') in each Performance Period if the performance of the relevant Fund (or Class of Shares within the Fund) has relatively outperformed the applicable benchmark for that Fund (or class) (the 'Benchmark').

Fund name	Benchmark	Max % of outperformance payable (Participation Rate)	% of outperformance payable (Participation Rate)
Metzler Eastern Europe (Class A Shares only)	MSCI EFM Europe and CIS IMI Custom Capped NR Index	25%	15%
Metzler European Growth Sustainability* (Class A Shares only)	MSCI Europe Growth net	25%	15%

Metzler Euro Corporates Short Term Sustainability*	ICE BofAML EMU Corporates, Non-Financial, 1 3 yr	25%	15%
Metzler Alternative Multi Strategy (Class A Shares only)	Ice BofAML Euro Currency 3-Month Deposit Bid Rate Index	15%	15%

* Fund name changed on 10 February 2021. Please refer to note 15 for details.

3. Fair Value Information

A key disclosure required in the financial statements is the categorisation of fair value measurements within a three-level hierarchy that reflects the significance of inputs used in measuring fair values.

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e., developed using market data) for the asset or liability, either directly or indirectly

Level 3: Inputs are unobservable (i.e., for which market data is unavailable) for the asset or liability.

7. Share Capital

The authorised share capital of the Company consists of the following:

Capital requirement

The Company regards Net Assets Attributable to Holders of Redeemable Shares as the Capital of each sub-fund. The Company's objective is to manage this Capital in line with the investment objectives of each sub-fund. The Company is not subject to any additional regulatory capital requirements.

Participating Shares

The Company has a variable share capital consisting of participating shares. The authorised share capital of the Company is 500,000,000 shares of no par value. Please refer to fund summary information on pages 117 to 121 for details of active share classes.

The number of redeemable shares in issue for each class at 31 March 2021 is included in the Statement of Financial Position on pages 122 to 127.

The Company regards Net Assets Attributable to Holders of Redeemable Shares as the Capital of each sub-fund. The Company's objective is to manage this Capital in line with the investment objectives of each sub-fund.

Non-Participating Shares

The Company has an initial authorised capital of EUR 39,000 divided into 30,000 Subscriber Shares of EUR 1.30 each. At the end of the year, seven of these Subscriber shares were fully paid up and the remaining 29,993 shares were paid up to the extent of one quarter of their par value.

Notes to the Financial Statements

8. Taxation

Under the Taxes Consolidation Act 1997 of Ireland, as amended, the Company will not be liable for tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a 'Relevant Period', a 'Relevant Period' being an eight year period beginning with the acquisition of the shares by the shareholder and each subsequent period of eight years beginning immediately after the preceding Relevant Period.

A chargeable event does not include:

- (i) Any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- (ii) An exchange of shares representing one Fund of the Company; or
- (iii) An exchange of shares arising on a qualifying amalgamation or reconstruction of the Company with another Fund or
- (iv) Certain exchanges of shares between spouses and former spouses.

A chargeable event will not occur in respect of shareholders who are neither resident nor ordinarily resident in Ireland and who provide the Company with a relevant declaration to that effect. In the absence of an appropriate declaration, the Company will be required to withhold Irish tax on the occurrence of a chargeable event.

There were no chargeable events during the year. Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the Company or its shareholders.

9. Related Party Transactions

The following transactions with connected parties were entered into during the year by the Company in the ordinary course of business and on normal commercial terms:

Metzler Ireland Limited, as Manager, earned a management fee (out of which the Investment Managers received a fee) of EUR 6,999,375 (30 September 2020: EUR 12,517,404) of which EUR 4,024,352 (30 September 2020: EUR 3,098,638) was due at the period end. There was no performance fee paid to the Manager (30 September 2020: EUR 989,678), for the reporting period, EUR 356,674 was accrued at the period end (30 September 2020: EUR 989,678).

During the period, Metzler European Smaller Companies Sustainability*, Metzler European Growth Sustainability*, Metzler Global Equities Sustainability*, Metzler Eastern Europe and Metzler European Dividend Sustainability* incurred research fees payable to the Investment Manager of EUR 251,509 (year ended 30 September 2020: EUR 24,786). EUR 652,837 had been accrued at the period end for the period Q1 2020 to Q1 2021 (year ended 30 September 2020: EUR 524,620).

During the period, B. Metzler seel. Sohn & Co. was the counterparty to the Metzler Sovereign Select LCR Sustainability and the Metzler Wertsicherungsfonds 92 for forward currency contracts. Please refer to the Portfolio and Statement of Changes in Investments, commencing on page 42, for further details.

* Fund name changed on 10 February 2021. Please refer to note 15 for details.

Notes to the Financial Statements

10. Financial Risk Management

The Funds are exposed to a variety of financial risks in pursuing their stated investment objectives. These risks are defined in FRS 102 as including market risk (which in turn includes currency risk, interest rate risk and price risk), liquidity risk and credit risk. The Funds take exposure to certain of these risks to generate investment returns on their respective portfolios, although these risks can also potentially result in a reduction of the Net Assets of each Fund. The Investment Manager uses its best endeavours to minimise the potentially adverse effects of these risks to the performance of the Funds where it can do so while still managing the investments of the Fund in a way that is consistent with the investment objective and policy of each Fund. The risks, and the measures adopted by the Funds for managing these risks, are detailed below.

a) Market Price Risk

Market price risk is the risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. It represents the potential loss a Fund might suffer through holding market positions in the face of price movements, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Funds are principally invested in equities, bonds, index futures contracts, options contracts, forward exchange contracts and investment funds and have adopted a number of investment restrictions which are set out in the prospectus which limit the exposure of each Fund to adverse changes in the price of any individual financial asset.

In addition, the Investment Managers consider the asset allocation of the respective Funds on a daily basis in order to minimise the risk associated with particular countries or industry sectors whilst continuing to follow each Fund's investment objectives. The maximum risk arising from an investment in a financial instrument of the Company is determined by the fair value of its financial instruments, except for derivatives. The maximum exposure on short put options is limited to the strike price while the maximum exposure on short call options is theoretically unlimited. The maximum exposure on future and forward contracts is represented by their respective gross notional amounts.

b) Relative VaR

A sophisticated risk measurement technique called relative 'Value-at-Risk' (VaR) is used to measure the market risk of the relevant Funds. In accordance with the requirements of the Central Bank, the daily VaR of the relevant Fund may not exceed twice the daily VaR of a comparable derivative-free portfolio or benchmark. Information on the reference benchmarks for the Funds, as at 31 March 2021, is detailed below:

Metzler Wertsicherungsfonds 92	100% MSCI - World Index - Net TR

The calculation of relative VaR is carried out for the Funds using the following quantitative standards:

- (i) the calculation model used is the Historical Simulation model;
- (ii) the confidence level is 99%;
- (iii) the holding period is 10 days;
- (iv) the historical observation period is 1 year;
- (v) stress tests are carried out monthly and the results are monitored by the Manager. Appropriate stress tests are used to measure any potential major depreciation of the Fund's value as a result of unexpected changes in the risk parameters, to analyse potential situations in which the use of derivative instruments would bring about a loss; and back-testing of the Funds is carried out daily, to compare the potential market risk amount calculated by the model to the actual change in the value of the portfolio. The results are monitored by the Manager.
- (vi)

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based give rise to some limitations, including the following:

- A 10-day holding period assumes that it is possible to hedge or dispose of positions within that period. This may not be the case for certain highly illiquid assets or in situations in which there is severe general market illiquidity.
- A 99% confidence level does not reflect losses that may occur beyond this level, meaning that within the model used there is a 1% probability that losses could exceed the VaR.
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.
- The use of historical data as a basis for determining the possible range of future outcomes may not always cover all possible scenarios, especially those of an exceptional nature.
- The VaR measure is dependent upon the Funds position and the volatility of market prices.
- The VaR of an unchanged position reduces if market price volatility declines and vice versa.

For the period ended 31 March 2021 and the year ended 30 September 2020, details of the lowest, the highest and the average utilisation of the VaR limit calculated for the Funds are as follows:

Average Level of Leverage	334.31	328.48	91.57	98.73	-	-	146.80	153.80

* Fund name changed on 10 February 2021. Please refer to note 15 for details.

The leverage of the Fund shall be calculated as the sum of the notional of the financial derivative instruments. This method of measuring leverage involves simply adding all the notional and allowing no offsets of long against short positions and no adjustments based on the duration of instruments.

Notes to the Financial Statements

10. Financial Risk Management (continued)

d) Currency Risk

A portion of the financial assets of the Company is denominated in currencies other than Euro, the functional currency of the Company, with the effect that the Net Assets and total return can be affected by currency movements.

The total currency exposure as at 31 March 2021 and at 30 September 2020 was as follows:

Fund Currency	Investments & Non Monetary Assets (Liabilities) 31.03.2021 EUR	Other Monetary Assets (Liabilities) 31.03.2021 EUR	Hedged 31.03.2021 EUR	Net Unhedged 31.03.2021 EUR	Investments & Non Monetary Assets (Liabilities) 30.09.2020 EUR	Other Monetary Assets (Liabilities) 30.09.2020 EUR	Hedged 30.09.2020 EUR	Net Unhedged 30.09.2020 EUR

Notes to the Financial Statements

10. Financial Risk Management (continued)

d) Currency Risk (continued)

The currency risk of each Fund is actively managed on a daily basis by the Investment Managers by monitoring and considering the country and associated currency allocation of each Fund's portfolio and by initiating adjustments to these allocations where appropriate, taking due account of the investment objectives of each Fund and the best interests of shareholders. Financial Derivative Instruments are included in Monetary Assets (Liabilities).

e) Interest rate risk profile of financial assets

The Company is exposed to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows.

All Funds except Metzler Euro Corporates Short Term Sustainability*, Metzler Wertsicherungsfonds 90, Metzler Alternative Multi Strategy, Metzler Wertsicherungsfonds 98, Metzler Sovereign Select LCR Sustainability* and Metzler Wertsicherungsfonds 92.

Substantially all of the financial instruments at year end of Metzler European Smaller Companies Sustainability*, Metzler European Growth Sustainability*, Metzler Global Selection, Metzler Japanese Equity Fund Sustainability*, Metzler Global Equities Sustainability*, Metzler Eastern Europe, Metzler Focus Japan Sustainability*, Metzler European Dividend Sustainability*, Metzler European Equity Enhanced, Metzler Global Equity Enhanced, Metzler US Equity Enhanced, Metzler Japanese Equity Enhanced, Metzler German Equity Enhanced and Metzler China A Share Sustainability Fund* are equities and thus non-interest bearing. Any excess cash is held with the Depositary and invested at short term market interest rates. As a result, the above Funds are subject to limited exposure to fair value interest rate risk due to the prevailing levels of market interest rates.

* Fund name changed on 10 February 2021. Please refer to note 15 for details.

f) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting its obligations associated with financial liabilities. The Company's Prospectus provides for the daily creation and cancellation of shares and the Company is therefore exposed to the liquidity risk of meeting shareholder redemptions at any time. The Company's assets are considered to be liquid as they can be readily disposed of in the event that cash needs to be raised to meet redemptions or to pay expenses. The Company's redemption policy provides for a two to four days settlement cycle. Redemption applications for Metzler Global Selection, Metzler Japanese Equity Sustainability Fund*, Metzler Focus Japan Sustainability*, Metzler Japanese Equity Enhanced and Metzler China A Share Sustainability Fund* should be submitted a day before trade date due to Asian markets timing issues. These settlement cycles are deemed adequate by the Directors of the Company for meeting redemption requirements.

Notes to the Financial Statements

10. Financial Risk Management (continued)

f) Liquidity risk (continued)

Under the terms of the Company's Prospectus, the redemption proceeds are paid within 14 days of the day on which a redemption request is received. In addition, the Company's Prospectus states that the Manager is not bound to redeem on any Dealing Day more than 10% of the shares of any one Fund. If the number of requests received exceeds that limit, the requests may be reduced proportionately. The Investment Managers monitor liquidity of each Fund on a daily basis and initiate appropriate investment action where necessary to meet liquidity requirements. The Company's financial liabilities are redeemable participating shares, short term creditors and accruals all payable within one year. The residual contractual maturities of financial liabilities as at the reporting date are as follows:

Notes to the Financial Statements

10. Financial Risk Management (continued)

g) Credit risk

Credit risk arises from the possibility that a loss may occur from the failure of another party to perform according to the terms of the contract. The Company will be exposed to credit risk on the counterparties with which it trades in relation to forward currency, options and futures contracts. The Company is also exposed to credit risk on the issuers of debt securities it holds and is further exposed to a credit risk on parties with whom it trades equities. An additional credit risk exists in relation to cash held on deposit with a credit institution.

All of the Funds within the Company are exposed to a credit risk on parties with whom they trade equities. However, transactions in these financial instruments are generally settled or paid for on delivery, or cleared through the appropriate clearing system for the market on which the instruments are traded. The risk of default is not considered to be material as delivery of securities sold is generally only made once the Depositary has received confirmation of payment. Payment is also generally only made on a purchase once confirmation of delivery of the securities has been received by the Depositary. The trade will fail if either party fails to deliver the required confirmations.

Metzler Euro Corporates Short Term Sustainability*, Metzler Wertsicherungsfonds 90, Metzler Alternative Multi Strategy, Metzler Wertsicherungsfonds 98, Metzler Sovereign Select LCR Sustainability* and Metzler Wertsicherungsfonds 92 are exposed to credit risk on the issuers of their debt securities. To minimise the risk, the Investment Managers of the Funds have primarily purchased AAA, AA, A, BBB and BB debt securities, as rated by S&P or an equivalent rating, from sovereign issuers. The Funds are also exposed to a credit risk in relation to the counterparty with whom they trade derivative contracts, with the Funds' rights with respect to cash and assets held with, and owing from, these counterparties subject to delay or limitation in the event of bankruptcy or insolvency of a counterparty. The counterparty with whom the Funds are currently trading these financial derivative instruments is JPMorgan, currently rated A- by S&P (30 September 2020: A- by S&P).

In addition, the Funds are also exposed to a credit risk in relation to the counterparty with whom they trade derivative contracts, with the Funds' rights with respect to cash and assets held with, and owing from, these counterparties subject to delay or limitation in the event of bankruptcy or insolvency of a counterparty. The counterparty with whom the Funds are currently trading these financial derivative instruments is JPMorgan and B. Metzler seel. Sohn & Co. KGaA. JPMorgan is currently rated A- by S&P (30 September 2019: A- by S&P). B. Metzler seel. Sohn & Co. KGaA does not currently have a credit rating as it is a privately owned company).

Substantially all of the Company's securities are held on a fiduciary basis by Brown Brothers Harriman Trustee Services (Ireland) Limited (the Depositary). Its parent BBH&Co is currently rated A+ by Fitch (30 September 2020: A+ by Fitch). These assets are held in segregated accounts of each Fund (in accordance with UCITS regulations), reducing the credit risk of holding the assets in safekeeping. The Company will however be exposed to the credit risk of a credit institution holding its deposits. The cash held on overnight deposit for each Fund is held with recognised and reputable financial institutions which form part of the Depositary's list of financial institutions with whom it places money on overnight deposit. An agreement has been reached with the Depositary that the Depositary or its agent will use reasonable endeavours to preclude more than 15% of a respective Funds NAV being placed on overnight deposit with any one institution.

The Investment Managers analyse credit concentration based on the counterparty of the financial assets that the Company holds and structure the portfolio in line with regulatory guidelines to diversify credit risk. Details of the parties with whom the Company is exposed to credit risk are disclosed in the Portfolio and Statement of Changes in Investments. At the year end, the maximum credit exposure of the Company is best represented by carrying amounts of the financial assets as disclosed in the Statement of Financial Position.

Notes to the Financial Statements

10. Financial Risk Management (continued)

g) Credit risk (continued)

At the period end, the Companys financial assets exposed to credit risk amounted to the following:

Notes to the Financial Statements

11. Functional Currency

Since the presentation currency of the Company is EUR, the balances for the Metzler Wertsicherungsfonds 92 (CHF) has been translated to EUR for the purposes of determining the aggregated Company total amounts as follows:

- Opening Statement of Financial Position amounts are translated at the EUR/CHF exchange rate as at 30 September 2020.
- Closing Statement of Financial Position amounts are translated at the EUR/CHF exchange rate as at 31 March 2021.

12. Financial Derivative Instruments

During the year, forward currency, futures and covered options contracts were entered into for the purpose of investment and/or hedging strategies. Details of the individual contracts are outlined in the Portfolio and Statement of Changes in Investments commencing on page 43.

13. Exchange Rates

The Euro exchange rates used at the period end 31 March 2021 and at the previous year end 30 September 2020 were:

Currency	Currency Code	FX Rate 31.03.2021	FX Rate 30.09.2020
Australian Dollar	AUD	1.5427	1.6355
British Pound	GBP	0.8517	0.9068
Canadian Dollar	CAD	1.4769	1.5660

14. Investments

All the investments held at the period end, with the exception of permitted investments in units of open-ended investment funds, are listed or traded on a Recognised Market.

Notes to the Financial Statements

15. Changes to the Prospectus

The following name changes occurred on 10 February 2021

From Metzler European Smaller Companies to Metzler European Smaller Companies Sustainability;
From Metzler European Growth to Metzler European Growth Sustainability; and
From Metzler Japanese Equity Fund to Metzler Japanese Equity Sustainability Fund;
From Metzler International Growth to Metzler Global Equities Sustainability;
From Metzler Focus Japan to Metzler Focus Japan Sustainability;
From Metzler Euro Corporates Short Term to Metzler Euro Corporates Short Term Sustainability;
From Metzler Sovereign Select LCR to Metzler Sovereign Select LCR Sustainability.
From Metzler China A Share Equity Fund to Metzler China A Share Sustainability Fund;

16. Segregated Liability

The Company is structured as an umbrella fund with segregated liability between its sub funds. Accordingly, each Fund will bear its own liabilities and is not liable for liabilities of other Funds.

17. Significant Events during the period

On 11 March 2020, the Director-General of the World Health Organisation announced that it had assessed the worldwide outbreak of COVID-19 as a pandemic. This event continues to create significant market volatility across global financial markets. The coronavirus disease 2019 ('COVID-19') global pandemic and the aggressive responses taken by many governments or voluntarily imposed by private entities, including closing borders, restricting travel and imposing prolonged quarantines or similar restrictions, as well as the closure of, or operation changes to, many retail and other businesses, has had negative impacts, and in many cases severe negative impacts, on the global economy and on the business activities in the countries in which the Fund invests. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may be expected to impact the Fund and its investments. It is, however, important to note that markets have performed strongly in April and May claiming back most of the losses experienced during the period.

Dividends

On 11 December 2020 the Directors resolved that dividends be declared as follows:

Metzler European Smaller Companies Class A Shares	EUR 1.86 per share
Metzler European Smaller Companies Class B Shares	EUR 1.94 per share
Metzler European Smaller Companies Class X Shares	EUR 0.61 per share

19. Events since the Period End Date

On 31 May 2021, Universal-Investment Group will complete the acquisition of Metzler Ireland Limited following the recent approval of the acquisition by the Central Bank of Ireland.

As a new Universal-Investment Group company, Metzler Ireland Limited will trade in the future as Universal-Investment Ireland. The change in name and ownership of the company will see no interruption to business, and Universal-Investment Ireland will continue provide Management Company services to the Metzler International Investments plc.

Additional Disclosures to the Shareholders of Metzler International Investments plc

Remuneration Disclosures

Sustainability and the avoidance of excessive risks have always been given top priority in the Metzler Group remuneration policy, which is thus based on a long term perspective. The Metzler remuneration policy, which is applied to all group companies, is a component of the overall low risk business strategy of the Metzler Group.

Metzler's remuneration to staff comprises of fixed (base salary) and variable (bonus or special payments) remuneration components. The base salary element provides employees with appropriate compensation for their work which reflects the tasks and responsibilities entrusted to them, and encourages the long-term commitment of employees to Metzler. This system thus rules out any significant dependence on variable remuneration components so that the possibility of employees being rewarded for taking unreasonable risks is avoided. The remuneration of staff is not linked to the performance of individual funds.

One of the key aims of the remuneration policy is the alignment of risks taken by identified staff with the interests of Metzler Ireland Limited, the funds under management and the underlying unitholders. The Board of Metzler Ireland Limited in applying this remuneration policy aims to avoid or appropriately manage any relevant conflicts of interest and believes the adoption of the stated remuneration policy achieves this objective.
