# Dear Investor,

The following pages will provide you with detailed information on the trends observed on the equity and bond markets during the period under review (1 October 2014 to 30 September 2015). You will also find a comprehensive set of figures on your investments, including the statement of assets for the reporting period which ended on 30 September 2015.

## Dealing with the change in the markets

A volatile capital market, changing regulatory requirements and new customer demands are all challenges we are meeting successfully.

In the first half of the year under review, the international equity and bond markets were generally buoyant. Important issues were the continuing decline in oil prices and the significant shift in the exchange rate between the euro and the US dollar. Eurozone bond investments were helped by the very loose monetary policy followed by the European Central Bank, while since autumn 2014 the US bond markets had moved towards initial interest rate rises on the part of the US Federal Reserve (FED). Geopolitical cross fire, such as the Ukraine conflict or the Greek crisis, only led to temporary uncertainty. A massive trend reversal began in mid-August 2015. It was triggered by the market upheavals in China, accompanied by a devaluation of the yuan and falling commodity prices. After this, uncertainty about future global growth increased significantly. In September, the US Federal Reserve Bank (FED) increased the nervousness with the postponement of their long-awaited initial interest rate hike. All in all, the international equity markets suffered significant losses. With the growing uncertainty, the risky bond segments, such as corporate bonds, high-yield securities and securities from emerging markets, also came under significant pressure. By contrast, government bonds from the eurozone - particularly peripheral papers - and the US, which are traditionally regarded as safe havens, could improve.

## Bond markets influenced by monetary policy

The European government bond markets were heavily impacted by the European Central Bank (ECB) in the last twelve months. The markets did, however, have support with the govern-

ment bond purchase programme for covered bonds and asset-backed securities (ABS) of the equivalent of 60 billion euros a month continuing at least until September 2016. The ECB decision then led to historic lows in yields in April 2015. The trendsetting ten-year government bonds yielded just 0.05 per cent. The return on Spanish and Italian ten-year securities in peripheral countries temporarily dropped by 1.1 per cent. However, shortly after this, the mood changed dramatically. Working together, various market technical factors sparked a fierce sell-off and led to an abrupt trend reversal. In the sell-off, for example, the return on ten-year government bonds rose quickly again to about one per cent. Moreover, the tough negotiations between Greece and its creditors, concerns about China's economic development and its impact on the rest of the world as well as the impending turnaround in interest rates by the FED led to uncertainty and volatile capital markets. The yields also fluctuated. The European Central Bank showed recently that, if necessary, it was ready for further expansionary monetary policy measures, which stabilised the markets in the past few weeks. Yields therefore recently dropped in the eurozone. The index of the European government bond market (iBoxx Euro Sovereign) increased by 4.0 per cent during the year under review.

There were also price gains on the US bond market. US treasury bills rose by 4.2 per cent across the entire market (JP Morgan Global Bond US Index). This development was influenced by speculation on the US interest rate reversal during the year under review. However, this did not occur. Just a few weeks ago, the odds in favour of it were not so bad, but then the fragile economic situation in China and the adverse impact of the rate hike on other emerging markets caused the FED to backtrack. In addition, continued low US inflation offered no reason to raise key interest rates.

There was a contrasting situation on the market for European corporate bonds during the year under review. At the index level (Merrill Lynch Euro Corporates Index, EROO), investment grade corporate securities continued to increase in value during the first half of the year. This was then followed by a market correction from April/May which caused all previously generated gains to disappear over the course of

the year. The high new issue volume was primarily responsible for the pressure on the secondary market from this date. In addition, accompanied by economic concerns - notably in China - a deterioration in liquidity was increasingly observed. This put further pressure on the market, especially at the end of the period under review, regarding company-specific problems at British-Swiss commodities trader Glencore and the exhaust gas scandal at Volkswagen. The market as a whole remained almost unchanged recording -0.2 per cent on balance during the period under review. The risk premiums (asset swap spreads) rose by 113 basis points back above the one per cent mark.

The market for bonds denominated in euro or US dollar from emerging markets was subject to significant fluctuations. At the index level (JPMorgan EMBI Global Diversified Index), the market also remained virtually unchanged during the past twelve months. The sharp fall in commodity prices, which caused major problems for a large number of commodity exporters from emerging economies, also impacted market activity. Russia, with the decline of the rouble, and Brazil, which recently experienced a credit downgrade, were important themes within the bond segment. Risk premiums rose by around 130 to 430 basis points.

## Growth concerns cause equity markets to fall into the red

The expansive monetary policy of the European Central Bank, the debt crisis in Greece, the expected turnaround in interest rates in the US, concerns about growth in China, and most recently the VW fraud scandal were the main themes of the period under review. International equities initially recorded significant gains before the escalation of the Greek crisis at the end of June 2015 led to considerable price losses. With the agreement on interim financing and the start of negotiations on a third bailout package, the world markets started a brief recovery rally before the market turmoil in China fuelled renewed uncertainty. Triggered by concerns about the stability of Chinese and consequently global economic growth, the equity markets were particularly weak in August 2015. The main driver was the Chinese central bank's devaluation of the yuan in three stages by a total of 3.7 per cent. The surprising

measure triggered fears on the market of a currency war. In September, the US Federal Reserve Bank (FED) increased the distress on the markets with the postponement of their long-awaited initial interest rate hike. In doing so, it invoked not least the many economic uncertainties outside the US, especially in the emerging markets. The last straw was the news that the VW group had been manipulating the exhaust gas measurements of its diesel vehicles for many years with the help of special software. This resulted in a massive crisis of confidence (not only) in the entire German automotive industry. Overall, the MSCI World Index (calculated in local currency) fell by 2.6 per cent on balance during the period under review.

In addition to concerns about China, in the US, the wait for an interest rate hike by the FED was a dominant factor. The news that the US gross domestic product, with a gain of 3.7 per cent in the period from April to June 2015 was more positive than expected, fuelled prices only briefly. The markets were fixated on the September meeting of the FED. Up into early summer, analysts had expected the turnaround in interest rates for this meeting, and it was only later that some experts pushed back on expectations. The uncertainty was correspondingly great. The FED justified the decision to leave interest rates unchanged based on the world economic situation, the fluctuations in the financial markets and low inflation - and thus triggered a slide in prices. Subsequent inconsistent statements concerning the future interest rate path increased uncertainty among investors. Against the backdrop of significant price falls in August and September this year, the S&P 500 lost 2.7 per cent in the period under review, and the Dow Jones Industrial Average was down 4.5 per cent.

In Europe, the EURO STOXX 50 Index was down 3.9 per cent during the last year. European stock exchanges were initially buoyed by the expansive monetary policy of the ECB, which increased their securities purchases to 60 billion euros per month. Meanwhile, the debt dispute between the EU and Greece had an adverse impact. After the solution of the problems in Greece at the beginning of July 2015, from mid-August concerns about China and the wait for the FED's decision moved to the fore. The fundamental picture for European equities, however, continued to be positive. The euro weakened against the US dollar and increased the international competitiveness of European companies. In addition, the decline in crude oil prices has increased consumer purchasing pow-

er and reduced company costs. Nevertheless, the latest economic data failed to lift the mood palpably. In Germany, in any case, the exhaust scandal at Volkswagen was the dominant topic. After the exhaust gas test manipulations became known, VW preference shares fell by an impressive 42.3 per cent. The uncertainty also had an impact on the securities of the other two major automobile manufacturers, Daimler and BMW, and was also responsible for the decline in the DAX in the last quarter by 11.7 per cent. The leading German index, however, increased on balance by 2.0 per cent during the last twelve months.

Japanese equities made significant gains in the first nine months of the period under review under the influence of the expansive monetary policy, the weak yen and robust economic data. However, they then experienced a major downward trend in the last quarter. Yet over the course of the year, the Nikkei 225 still rose by 7.5 per cent. Despite the deterioration of some economic indicators, the corporate reporting season proved to be encouraging for the second quarter of 2015. However, from August of this year, the turbulence on the Chinese stock market and the appreciation of the yen against the US dollar and the Chinese yuan acted as a significant drag. From an economic point of view, the growth of gross domestic product (GDP) and industrial output also disappointed. By contrast, on a positive note, there was the development of the purchasing managers' index. Overall, cyclical sectors with high dependence on China were recently among the biggest losers.

The stock markets of the emerging markets were mainly influenced by the development in China, but also by US monetary policy and low commodity prices. The MSCI Emerging Markets (in local currency) dropped a total of 9.4 per cent. Due to regulatory relaxations that are facilitating investments in Shanghai and Hong Kong, prices in the Middle Kingdom rose since the start of 2015 before dropping significantly in the last four months. In China's wake, all the major Asian indices posted losses. Overall, the MSCI Far East (ex Japan) (calculated in local currency) fell by 9.6 per cent in the period under review. The losses in Latin America even amounted to 14.8 per cent (MSCI EM Latin America). Eastern Europe fell by 2.6 per cent in local currency (MSCI EM Eastern Europe).

### **Important information:**

Unless otherwise specified, the data source for the financial indices is Datastream. All unit performance data on the following pages is taken from Union Investment's own calculations in accordance with the method applied by the German Investment Funds Association (BVI), unless otherwise specified. The ratios illustrate past performance. Future results may be either higher or lower.

Detailed information on the Management Company and the Depositary of the investment fund (the "Fund") can be found on the last pages of this report.

# UnInstitutional Convertibles Protect

Annual report  
01.10.14 - 30.09.15

## Investment policy

### Investment aim, investment policy and significant results

UnInstitutional Convertibles Protect primarily invests in convertible bonds, bonds with a warrant on securities, and other fixed- and variable-rate interest-bearing securities of international issuers. Assets held in foreign currencies are generally hedged. The fund's assets may also be invested in money market instruments and bank deposits. The objective of the fund is to generate long-term growth and market-oriented income. The management company decided as of 1 October 2014 to alter the rules on costs set out in the management and special regulations for the investment funds approved for sale in Germany. These changes involve combining the costs of the main administrative tasks, the custodian fee as well as the custody charges in a flat fee.

### Portfolio structure and significant changes

In the past year UnInstitutional Convertibles Protect has mainly concentrated the fund assets in bond-related investments. At the end of the reporting period the proportion was 86 per cent. Liquidity was held at 11 per cent of the fund assets.

From the regional viewpoint, the focus was on bond-related investments in North America, with 45 per cent of the funds. Well behind were securities from the eurozone (20 per cent), European countries not in the eurozone (12 per cent), Japan (10 per cent) and the emerging markets (7 per cent).

From a sector viewpoint the fund was constantly invested in corporate bonds during the financial year, ending at 96 per cent. Of this, 80 per cent was in the industrial sector and 14 per cent in finance at year-end.

The average rating of fund investments rose one notch by the end of the year to BBB+. The average capital commitment period (duration) of the bonds in the portfolio had increased to 5 years 4 months by year-end. The final average return after fluctuations was 0.7 per cent.

UnInstitutional Convertibles Protect will pay a dividend of EUR 1.41 per unit for the financial year from 1 October 2014 to 30 September 2015.

Note: Due to a risk-based approach, there might be different values represented by the statement of net assets.

1) Information about selling fees, redemption fees and the maximum amount of the management fee for target fund units can be obtained on application free of charge from the registered office of the management company, from the custodian bank and the paying agents. No management fee or a reduced one is calculated for units held of a target fund, which are managed directly or on the basis of a transfer from the same management company or from a company with to the management company is related by means of joint management or domination or significant direct or indirect interests.

\*) The securities indicated were lent partly or in full.

## Forward exchange transactions

On the 30.09.2015 the following open forward exchange transactions were outstanding:

Currency		Monetary amount	Market value in EUR	Percentage of fund assets
USD/EUR	Currency buys	35,000,000.00	31,348,748.56	4.05
EUR/CHF	Currency sales	13,800,000.00	12,659,679.38	1.63
EUR/GBP	Currency sales	19,350,000.00	26,254,411.35	3.39
EUR/HKD	Currency sales	264,100,000.00	30,522,003.70	3.94
EUR/JPY	Currency sales	7,850,000,000.00	58,729,918.89	7.58
EUR/SEK	Currency sales	22,000,000.00	2,350,661.16	0.30
EUR/SGD	Currency sales	6,600,000.00	4,155,713.32	0.54
EUR/USD	Currency sales	509,000,000.00	455,900,371.89	58.88

## Exchange rates

For the valuation of assets in a foreign currency, the following exchange rate for September 30th, 2015 was used for conversion into EUR.

Australian dollar	AUD	1	1.5890
British pound	GBP	1	0.7367
China's offshore renminbi	CNH	1	7.1033
Chinese Yuan Renminbi	CNY	1	7.0952
Hong Kong dollar	HKD	1	8.6496
Japanese yen	JPY	1	133.6530
Swedish krone	SEK	1	9.3605
Swiss franc	CHF	1	1.0905
Singapore dollar	SGD	1	1.5866
US dollar	USD	1	1.1161

## Purchases and sales from 01.10.2014 to 30.09.2015

Purchases and sales of securities, loans evidenced by promissory notes and derivatives, including changes without money movements, made during the reporting period insofar as they are not specified in the schedule of assets.

**Identity of the counterparty(-ies) in these techniques for efficient portfolio management:**

CITIGROUP GLOBAL MARKETS LTD., LONDON  
CREDIT SUISSE SECURITIES EUROPE LTD., LONDON  
MORGAN STANLEY & CO. INTL. PLC., LONDON

**Type and amount of the collateral received which is attributed to the UCITS' counterparty risk:** EUR 26,569,314.93

of which:

Bank deposits	EUR	0.00
Debenture bonds	EUR	17,846,390.25
Shares	EUR	8,722,924.68

Income received from securities lending for the purpose of efficient portfolio management for the whole reporting period, including any direct and indirect costs and fees EUR 156,156.26

Earnings from securities lending transactions are distributed between the Fund and the management company Union Investment Luxembourg S.A. for its activity as an agent after deducting associated costs and the vast majority is credited to Fund assets.

**Additional information on collateral accepted for OTC derivatives and techniques for efficient portfolio management**

**Identity of the issuer, if the collateral received from the issuer exceeds 20% of the net asset value of the UCITS**

N.A.

**Collateralisation via securities issued or guaranteed by a EU Member State**

The UCITS is not completely collateralised by securities issued or guaranteed by a EU Member State.

# Notes on the report as at the end of September 2015

The fund's accounts are kept in Euro.

The fund's annual accounts were prepared based on the applicable classification and valuation principles in the country of domicile.

The price of securities and other exchange-listed derivatives reflects the relevant stock exchange or market value at the end of the financial year. Securities traded on a regulated market are valued at the market prices published for the relevant market. Investment fund units in target funds are valued at their most recently published prices.

If the fund holds OTC derivatives on the closing date, these are valued daily on the basis of indicative quotes from brokers or mathematical valuation models.

If the fund has pending forward exchange transactions, these are valued based on the forward rates applicable to the residual maturity.

Securities whose prices are not in line with market conditions and all assets for which no representative market value can be obtained are valued at a price established by the Management Company in good faith using recognised valuation rules.

Bank deposits were estimated at par value.

Assets and liabilities denominated in a currency other than that of the fund are converted at the latest available mean rate of exchange into Euro. Transactions in foreign currencies are converted into the fund currency at the time of compiling the accounts. Realised and unrealised currency gains and losses are included as income or expenses.

The deferred interest includes accrued interest as at the end of the financial year.

The item "Interest on bonds" also includes, if applicable, pro rata income from issue yields.

The issue or redemption price of the fund units are determined from the net asset value per unit on the respective valid trading days and, if relevant, plus any initial sales charge and/or redemption fee as defined in the sales prospectus. The initial sales charge shall be levied in favour of the Management Company and the sales agent and can be scaled according to the size of the order. The redemption fee is credited to the fund.

The fees of the Management Company and the all-in fee are calculated based on the net fund assets per calendar day and paid out on a monthly basis. The all-in fee covers the Custodian Bank fee, customary securities account and depositary fees for holding assets in custody, auditors' fees, costs of appointing proxies and costs of principal management activities, such as fund accounting and reporting. The calculation is based on a contractual agreement.

The Fund is subject to a performance-related management fee which is charged by the Management Company based on the terms defined in the prospectus. The performance-related management fee for the financial year ending 30 September 2015 is accrued on a daily basis and recorded in the income statement. The paid amounts for the financial year are shown in the income statement under the position "performance-related management fee", the accrued expenses are shown in the position "net change in unrealised gains and losses".

If profit and loss includes other expenses, these expenses consist of the costs referred to in the prospectus, such as government fees, collateral management fees, or cost of changes to the prospectus.

Earnings and expense adjustments have been charged to the ordinary net income. These include net income generated during the reporting period, which purchasers of units pay as part of the issue price, and sellers of units receive in the redemption price.

Fund assets are currently subject to a "taxe d'abonnement" of 0.05 per cent p.a. in Luxembourg, payable quarterly and based on the respective reported net fund assets at the end of the quarter. Insofar as fund assets are invested in other Luxembourg investment funds that are already subject to the taxe d'abonnement, the portion of fund assets invested in such Luxembourg investment funds is exempt from this tax.

Income from the investments of the fund's assets will not be taxed in Luxembourg. However, it may be subject to withholding or other tax in the countries in which the fund assets are invested. Neither the Management Company nor the Custodian Bank will obtain individual or collective receipts for such taxes.

As at 30 September 2015, the fund has lent securities as per the information provided in the schedule of assets. The fund has received collateral to the amount of the market value of the securities lent in the form of transferable securities or other liquid assets.

The performance of the fund's units is calculated based on the unit values published on the closing dates, according to the BVI formula. In individual cases, it may vary slightly from the performance of the units as shown in the fund report.

The calculation method used to calculate the "ongoing charges" indicator, is that outlined by the Committee of European Securities Regulators (Circular CESR/10-674 of 1 July 2010).

The "ongoing charges" indicate the costs charged to the fund and may vary from year to year. They take into account the management charges and all-in fee, the tax d'abonnement and all other costs charged to the fund. For funds with a significant holding in other funds, the costs of those funds will be taken into account. This figure shows the total costs as a percentage of the average fund volume during the financial year. Any performance-related fee and transaction costs incurred - except the transaction costs of the Custodian Bank - are not included in the figure "ongoing charges".

The transaction costs refer to all costs that were listed or invoiced separately in the financial year in the name of the fund and are directly related to the purchase or sale of assets.

The Management Company, in its role as the management company of the fund, may benefit from "soft commissions" (e.g. broker research, financial analyses, market and price information systems) in connection with trade transactions. Said commissions are used in the interests of unitholders when making investment decisions. Transactions of this type cannot be conducted with natural persons; the service providers concerned may trade only in the interests of the fund and the services provided must be directly associated with fund activities.

#### **Note on the Law of 17 December 2010**

The fund was set up in accordance with Part I of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment ("Law of 17 December 2010") and fulfils the conditions laid down by Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of legal and administrative provisions relating to undertakings for collective investment in transferable securities ("Directive 2009/65/EC").

# Auditor's Report

To the unitholders of  
UnilInstitutional Convertibles Protect

In accordance with the task assigned to us on 17 September 2015 by the Board of Directors of the Management Company, we have audited the attached annual accounts for UnilInstitutional Convertibles Protect, including the composition of the Fund's assets and the statement of assets held as at 30 September 2015, the income and expenditure statement and the change in Fund's assets for the financial year ending on that date, as well as a summary of the main accounting methods and other explanatory notes to the statements.

*Responsibility of the Board of Directors of the Management Company relevant to the annual accounts*

The Board of Directors of the Management Company is responsible for the preparation and correct presentation of the annual accounts in accordance with Luxembourg laws and regulations on the preparation of annual accounts and for the internal auditing they consider necessary to allow the preparation of annual accounts to be free from material misstatement, whether due to fraud or error.

*Responsibility of the Auditor*

It is our responsibility to issue an audit certificate for the annual accounts based on our audit. We conducted our audit in accordance with the International Standards on Auditing for Luxembourg, as adopted by the Commission de Surveillance du Secteur Financier. These standards require us to comply with professional requirements and to plan and execute the audit in such a way that we can determine, with an adequate degree of certainty, whether the annual accounts are free of material misstatement.

An audit involves auditing activities required to issue an auditing certificate on the assessments and information contained in the annual accounts. The procedures selected depend on the Auditor's judgement, including the assessment of the risks of material misstatement of the annual accounts, whether due to fraud or error. As part of this risk assessment, the Auditor examines the internal control system set up to prepare the annual accounts and the accuracy of its descriptions to determine the appropriate auditing procedures for the circumstances, but not to issue an opinion on the effectiveness of the internal control system. An audit also includes an assessment of the appropriateness of the accounting policies and methods applied and the justification of the estimates made in the accounts by the Board of Directors of the Management Company as well as of the overall presentation of the annual accounts.

In our opinion, adequate and appropriate evidence has been provided to arrive at an auditor's opinion.

*Audit opinion*

According to our assessment, the annual accounts convey a true picture of the financial position and assets of UnilInstitutional Convertibles Protect as at 30 September 2015, as well as the performance and income of the net fund assets for the financial year ending on this date, in accordance with Luxembourg laws and regulations on the preparation of annual accounts.

*Miscellaneous*

We have examined the additional information provided in the annual report as part of our assignment, but have not conducted special auditing procedures on this information according to the above-mentioned standards. Consequently, the audit opinion does not apply to such information. We have no comments to make on any such information within the framework of a general description of the annual accounts.

Luxembourg, 11 December 2015

ERNST & YOUNG  
Société Anonyme  
Cabinet de révision agréé

Dr. Christoph Haas

## Other information

### Information on EU taxation of interest

For the reporting period, the Fund had an interest share of >25 %. Distributions and redemptions have been affected by EU rules on the taxation of interest.

### Other information

Securities transactions are only ever carried out with counterparties included in a list of approved parties by the fund management. The list is reviewed on an ongoing basis. Criteria such as quality of execution, level of transaction costs, quality of research and reliability in the settlement of securities transactions are given precedence. Furthermore, the annual reports of the counterparties are examined.

The proportion of securities transactions conducted during the period under review (1 October 2014 to 30 September 2015) on account of the retail funds managed by Union Investment Luxembourg S.A. with companies within the Group or associated with it through significant holdings amounted to 5.60 per cent. The total transactions volume amounted to EUR 2,992,508,226.00.

### Information on risk management processes

The absolute VaR approach is used for monitoring the total risk associated with derivatives.

The VaR (value-at-risk) model is used to ascertain the absolute VaR approach. The Value-at-Risk (VaR) indicator is a mathematical-statistical concept and indicates the possible losses of a portfolio over a specific period that is unlikely to be exceeded.

A Monte Carlo simulation is used in order to ascertain the VaR indicator. The parameters used for this are:

- Holding period: 20 days
- Confidence level: 99 %
- Historical monitoring period: 1 year (balanced)

The utilisation of the total risk associated with derivatives determined via the above model and the corresponding limit utilisation at a regulatory limit of 20 % amounted for the minimal, maximal and average VaR value to:

Minimum VaR 2.45 %; Limit utilisation 12%,

Maximum VaR 4.15 %; Limit utilisation 21%,

Average VaR 3.32 %; Limit utilisation 17%.

### Leverage effect

The determined average utilisation of the leverage effect using the gross method amounted to 184%.
