

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec Emerging Markets Local Currency Dynamic Debt Fund

A sub-fund of Investec Global Strategy Fund
Managed by Investec Asset Management Luxembourg S.A.

Class S Income-2 shares in euros
ISIN: LU1056027235

Objectives and investment policy

The Fund aims to provide income and long-term capital growth.

The Fund invests primarily in bonds (contracts to repay borrowed money which typically pay interest at fixed times). These bonds are issued by governments, institutions or companies in emerging markets (countries that are in economic terms less developed than the major Western countries) predominantly in the currency of the issuing country.

The Fund may invest in other assets such as cash, other funds and derivatives (financial contracts whose value is linked to the price of an underlying asset).

The Investment Manager is free to choose how the Fund is invested. However, the JPMorgan GBI-EM Global Diversified Composite EUR Index is currently taken into account when the Fund's investments are selected.

Any income due from your investment is paid out to you monthly.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Charges from capital: Expenses are charged to the capital account, so capital will be reduced and any income payments will be increased to an equivalent extent. This could constrain future capital and income growth. Income may be taxable.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivative counterparty: A counterparty to a derivative transaction may fail to meet its obligations thereby leading to financial loss.

Derivatives: The use of derivatives may increase overall risk by magnifying the effect of both gains and losses. This may lead to large changes in value and potentially large financial loss.

Developing market: These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Government securities exposure: The portfolio may invest more than 35% of its assets in government securities issued or guaranteed by a permitted single state.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Liquidity: There may be insufficient buyers or sellers of particular investments giving rise to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than might be anticipated.

The full list of Fund's risks are contained in the appendices of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2017. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

One-off charges taken before or after you invest

Entry charge	10.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in euro.

The Fund was launched on 31 January 2011 and this share class on 29 April 2014.

Practical information

The Fund's depositary is State Street Bank Luxembourg S.C.A. The latest published prices for shares in the Fund are available on www.investecassetmanagement.com.
