

## Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

### Sparinvest SICAV - Ethical Global Value EUR RD

ISIN LU0725777444

This Fund is managed by Sparinvest S.A., a subsidiary of Sparinvest Holdings SE.

#### Objectives & Investment Policy

The Fund applies an ethical screening which may exclude certain securities from investment. Screening criteria have reference to involvement in controversial activities such as the production of alcohol, gambling, tobacco, pornography and military equipment, oil sands and thermal coal.

The Fund invests at least 2/3 of its total net assets in equity securities and/or equity-equivalent securities (such as ADR/GDR) and up to 1/3 of its total net assets in convertible securities and/or warrants on transferable securities.

Stocks are mainly traded on stock exchanges or regulated markets in developed markets/industrialized countries. Stock selection is based on the value approach. The approach is to invest in equities which our analysis suggests are undervalued and offer satisfying long term return potential.

The Fund can have up to 15% in cash holdings.

This Fund does not use derivatives.

The aim is to create a long term outperformance relative to its benchmark MSCI World (EUR). The Fund pursues an active investment strategy, which is the reason why the Fund's performance may deviate from its benchmark.

As an investor in this Fund you get diversification and professional management of your investments. Sparinvest monitors your investments for you.

You can buy and sell your shares on Luxembourg full bank business days.

The Share Class' currency is EUR. The Fund's reference currency is EUR.

The Share Class is distributing, i.e. income generated by the Fund will normally paid out.

#### Risk and Reward Profile

The risk/reward indicator shows the relation between risk and return. Category 1 does not mean a risk free investment.

The ranking on the scale is determined by the fluctuations in the value of the Fund over the past five years. Large fluctuations result in higher risk and a ranking to the right on the scale. Small fluctuations result in lower risk and a ranking to the left on the scale.

The Fund is rated 6. The Fund is in this specific category due to the nature of its investments, meaning that the historical returns the SRRI is based on, has shown a level of volatility higher than 15% but less than 25%.

The risk category is not guaranteed and may change over time as historical data does not necessarily give a reliable indication of the future risk profile of the Fund.

When investing in this Fund you need to take the following risk factors into account:

\* Stock market risk: The stock markets fluctuate widely and are influenced by companies' internal affairs and the industries the companies invest in. Fluctuations can also be caused by the political, regulative and economical state of the countries that are represented in the portfolio.

\* Country risk: Investments in foreign stocks on developed markets give a different currency exposure than that of domestic stocks. This might give you a smaller or larger currency exposure measured in EUR. The exposure means that the risk will be different from that of your domestic stock market.

\* Company specific risk: Some stocks may fluctuate widely from the general fluctuations of the market due to currency and sector exposure, but also due to the managerial affairs in the company, etc.

The above mentioned list of risk factors is not exhaustive. Other factors may influence the pricing of the underlying securities and therefore the value of the Fund's investments.
