

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec Global Bond Fund

A sub-fund of Investec Global Strategy Fund
Managed by Investec Asset Management Luxembourg S.A.

Class F Accumulation shares in US dollars
ISIN: LU0345761901

Objectives and investment policy

The Fund aims to provide an income and to protect and grow the value of the Fund's investments in terms of their international purchasing power (i.e. the quantity and quality of products and services that the value of your investment could buy across the world).

The Fund invests around the world in bonds (contracts to repay borrowed money which typically pay interest at fixed times) issued by governments, institutions or companies.

At least 90% of the value of the Fund is invested in investment grade (high quality) bonds as rated by the credit rating agencies (companies that rate the ability of the issuers of bonds to repay borrowed money).

The Fund may use derivatives (financial contracts whose value is linked to the price of an underlying asset) for efficient portfolio management purposes e.g. with the aim of either managing the Fund risks or reducing the costs of managing the Fund.

The Investment Manager is free to choose how the Fund is invested. However, the Barclays Global Aggregate Bond Index is currently taken into account when the Fund's investments are selected.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the lower end of the Risk and Reward Indicator scale. This is because it invests in bonds whose returns tend to fluctuate more than those of cash funds but less than those of funds which invest in the shares of companies.

Risks that may not be fully captured by the Risk and Reward Indicator:

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

Default: There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivative counterparty: A counterparty to a derivative transaction may fail to meet its obligations to the Fund thereby leading to financial loss.

Derivatives: The use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.

Developing market: Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Interest rate: The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Third party operational: The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix 1 of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2014. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US dollars.

The Fund was launched on 20 December 1985 and this share class on 31 January 2007.
