Pioneer Funds - Euro Strategic Bond

A Sub-Fund of Pioneer Funds

Management Company: Pioneer Asset Management S.A.

KEY INVESTOR INFORMATION

Class F EUR Non-Distributing - LU0190667898

Objectives and Investment Policy

Objective Seeks to increase the value of your investment and to provide income over the medium to long term.

Portfolio securities The Sub-Fund invests mainly in euro denominated below-investment grade bonds from anywhere in the world, including emerging markets. The Sub-Fund may invest up to 90% of its assets in below-investment grade bonds and up to 20% in bonds rated below CCC by Standard & Poor or equivalent. The Sub-Fund may also invest in investment grade bonds and convertible bonds. On an ancillary basis, the Sub-Fund may invest in equities. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

Investment process The investment manager uses a combination of market analysis and analysis of individual bond issuers to identify those bonds that appear more creditworthy than their ratings indicate.

Terms to Understand

Bonds Securities that represent an obligation to repay a debt, with interest. Below-investment-grade bonds generally pay higher interest rates but are considered less likely to make all scheduled payments.

Convertible bonds Securities that are structured like bonds but have the potential to increase in value if the issuer's stock price goes up.

Derivatives Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Emerging markets Countries whose securities markets are less established than those of developed countries. Examples include many countries in Africa, Asia, Eastern Europe and South America.

Equities Securities that represent partial ownership of a company.

Recommended for investors who understand the risks of this Sub-Fund and plan to invest for the medium to long term.

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Risk and Reward Profile

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is consistent with the risk limits set for the Sub-Fund. Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The Sub-Fund's risk indicator is not guaranteed and may change over time.

The Sub-Fund's risk category reflects the risk profile of the mix of asset classes in which it invests.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Additional key risks

The risk indicator may not adequately capture the following additional key risks of the Sub-Fund:

Counterparty risk Contract parties may default on their obligations under derivatives contracts entered into with the Sub-Fund.

Credit risk The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.

Liquidity risk In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk Losses may occur due to human error or omission, process errors, system disruptions or external events.

Derivatives risk Derivatives create leverage in the Sub-Fund and may cause movements in the value of the underlying investments to amplify gains or losses to the Sub-Fund.

Emerging market risk Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
