## **Directors' Report**

The Board of Directors (the "Directors") present their annual report together with the audited financial statements for the year ended 31 March 2015. Lazard Global Investment Funds plc (the "Company") is an open ended investment company with variable capital structured as an umbrella fund with segregated liability between sub-funds (individually referred to as the "Fund" and collectively as the ("Funds"), which at the year-end had 7 Funds (31 March 2014: 7 Funds) in existence.

#### Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' report and the financial statements in accordance with Irish law.

Irish law requires the Directors to prepare financial statements for each financial year that gives a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and of the profit or loss of the Company for the financial year. Under that law the Directors have prepared the financial statements in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland and Irish law).

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing these financial statements, the Directors are required to:

- · select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify
  the standards in question, subject to any material departures from those standards being disclosed and explained in the
  notes to the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will
  continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- · correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy; and
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those
  financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The measures taken by the Directors to ensure compliance with the Company's obligation to keep accounting records are through the appointment of an experienced administrator, State Street Fund Services (Ireland) Limited and through such appointment, the use of appropriate systems and procedures. The accounting records are held at the office of the Administrator. Under the UCITS Regulations, the Directors are required to entrust the assets of the Company to the Custodian for safe-keeping. In carrying out this duty, the Company has delegated custody of the Company's assets to State Street Custodial Services (Ireland) Limited. Both State Street Fund Services (Ireland) Limited and State Street Custodial Services (Ireland) Limited are regulated by and under the supervision of the Central Bank of Ireland (the "Central Bank").

Audited annual reports and unaudited interim reports are available on www.lazardassetmanagement.co.uk. The Directors are responsible for the maintenance and integrity of the financial statements published on this website. Information published on the internet is accessible in many countries with different legal requirements. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

#### **Connected Party Transactions**

In accordance with the Central Bank's Regulation UCITS 14.5, any transaction carried out with the Company by its promoter, manager, custodian, investment adviser and/or associated or group companies of these entities ("connected parties") must be carried out as if negotiated at arm's length. Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected parties on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from the Company's delegates that the connected parties carrying out those transactions do carry them out on a similar basis.

#### Connected Party Transactions (continued)

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section of this Directors' Report and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the Prospectus which identifies many of the connected party transactions and the general nature of the contractual arrangements with the principal connected parties but it is not exhaustive of all connected party transactions. Shareholders should also refer to the provisions of the Prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from the Company's management and its relevant delegates, the Board of Directors of the Company is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Manager) in place to ensure that the obligations described above are applied to all transactions with connected parties; and
- (ii) transactions with connected parties entered into during the year complied with these obligations, as attested by the Manager through regular updates to the Directors.

The Board of Directors is not aware of any transactions with connected parties during the year ended 31 March 2015, other than those disclosed through these financial statements. Details of fees paid to related parties and certain connected parties are set out in Note 11 to the financial statements. However, shareholders should understand that not all connected parties are related parties as such, the latter term is defined by FRS 8 - Related Party Disclosures.

#### **Principal Activities**

The investment objectives of each Fund within the Company are set out in the Prospectus. The Company is authorised by the Central Bank of Ireland as a UCITS pursuant to the UCITS Regulations. However, shareholders should understand that not all connected parties are related parties as such, the latter term is defined by FRS 8 - Related Party Disclosures.

#### **Review of Business and Future Developments**

The Investment Manager's Reports contain a review of the factors which contributed to the performance for the year. The Directors do not anticipate any changes in the structure of the Company or investment objectives of any of the Funds in the immediate future. The Lazard Emerging Markets Corporate Debt Fund has been approved by the Central Bank, this Fund has not yet launched. Please refer to Notes 14 and 15 for further information.

#### **Risk Management Objectives and Policies**

Information in relation to the Company's risk management objectives and policies are included in Note 9 to the financial statements.

#### **Results and Dividends**

The results and distributions for the year are set out in the Profit and Loss Account on pages 19 and 20. Please see Notes 13 and 15 for details of any distributions paid and payable during the year ended 31 March 2015.

#### Significant Events During the Year And Since The Year End

Please see Notes 14 and 15 for details of any significant events during the year or since the year end.

#### **Directors**

The names of the persons who were Directors of the Company during the year ended 31 March 2015 are set out below:

Michael Allen\*\* (British) Gavin Caldwell\* (Irish) John Donohoe\*/\*\* (Irish) Andreas Huebner (German) Daniel Morrissev\*/\*\* (Irish)

William Smith (British)

- \* Independent Directors (see Corporate Governance Statement below)
- \*\* Member of the Audit Committee

All Directors served for the entire year.

All Directors of the Company, except Andreas Huebner, are also Directors of Lazard Fund Managers (Ireland) Limited (the "Manager").

#### **Directors' and Secretary's Interests**

Michael Allen, Andreas Huebner and William Smith are employees of the Lazard Group, as well as Directors of the Company. Michael Allen, Andreas Huebner and William Smith are not entitled to Directors' fees from the Company. Neither the Directors nor the Secretary have any shareholdings in the Company.

Directors' fees payable by the Company are disclosed in Note 3 to the financial statements.

#### **Transactions Involving Directors**

As contemplated by the Corporate Governance Code issued by the Irish Funds Industry Association (see below), Letters of Appointment have been entered into between the Company and each of the Directors, all terminable on three months notice.

Daniel Morrissey is a Director of the Company and is also a partner of William Fry (the Company's legal advisers as to Irish Law). The partners of William Fry own Wilton Secretarial Limited (the "Secretary"). Accordingly, Daniel Morrissey had a beneficial interest under the Companies Act 2014 in legal and secretarial fees paid to William Fry and the Secretary.

John Donohoe is a Director of the Company and is also a Director of Carne Global Financial Services Limited who provide governance and Money Laundering Reporting Officer ("MLRO") services to the Manager, Lazard Fund Managers (Ireland) Limited and to the Company. Fees of USD 46,519 were due to Carne Global Financial Services Limited during the year ended 31 March 2015 (31 March 2014: USD 58,306).

All of the Directors, apart from Andreas Huebner, are also directors of the Manager and have an interest in fees paid by the Company to the Manager.

The Directors are not aware of any other contracts or arrangements of any significance in relation to the business of the Company in which any Director had any beneficial interest as defined in the Companies Act 1990 at any time during the years ended 31 March 2015 and 31 March 2014.

#### **UK Reporting Status**

An application has been submitted and approved by the HRMC for offshore fund reporting status. This is relevant to UK tax payers only.

#### **Corporate Governance Statement**

Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes, the Company is subject to corporate governance practices imposed by:

- The Irish Companies Act 2014 which is available for inspection at the registered office of the Company and may also be
  obtained at www.irishstatutebook.ie.
- The Articles of Association of the Company which are available for inspection at the registered office of the Company at 2 Grand Canal Square, Dublin 2, Ireland and at the Companies Registration Office in Ireland.
- The Central Bank in their UCITS Notices and Guidance Notes which can be obtained from the Central Bank's website at: www.centralbank.ie and which are available for inspection at the registered office of the Company.

A corporate governance code (the "IFIA Code") was issued by the Irish Funds Industry Association in December 2011 that may be adopted on a voluntary basis by Irish authorised collective investment schemes. The IFIA Code may be inspected on/obtained from www.irishfunds.ie. In December 2012, the Directors adopted the IFIA Code having regard for certain other key pillars of governance within the collective investment fund governance structure, including:

- the role of the Promoter unique within the collective investment fund structure (which is, or a related company of which is, normally the investment manager of the collective investment fund), as recognised by the Central Bank, in supporting the corporate governance culture of the Company; and
- the uniqueness of the independent segregation of duties as between the Investment Manager, the Administrator (with responsibility for the calculation of the net asset value, amongst other duties) and the independent Custodian (with responsibility for safeguarding the assets of the Company and overseeing how the Company is managed), such segregation of duties/functions being achieved through delegation of respective responsibilities to and appointment of suitably qualified regulated third party entities who are subject to regulatory supervision.

#### **Corporate Governance Statement (continued)**

The Company has no employees and the Directors are all non-executive. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and distribution functions to third parties without abrogating the Directors' overall responsibility. The Directors have in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Directors.

These delegations of functions and the appointment of regulated third party entities are detailed in the Company's Prospectus. In summary, they are:

- 1. The Company has appointed Lazard Fund Managers (Ireland) Limited as its Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Funds. Lazard Fund Managers (Ireland) Limited is regulated by and under the supervision of the Central Bank;
- 2. Lazard Fund Managers (Ireland) Limited, the Manager, has delegated the performance of the investment management functions in respect of the Company and of its Funds to Lazard Asset Management LLC (the "Investment Manager"). The Investment Manager has direct responsibility for the decisions relating to the day-to-day running of the Funds which it manages and is accountable to the Directors of the Company for the investment performance of the Funds. The Investment Manager has internal controls and risk management processes in place to ensure that all applicable risks pertaining to the management of the Funds are identified, monitored and managed at all times and appropriate reporting is made to the Directors on a regular basis. The Investment Manager is regulated by and under the supervision of the regulator of its operating jurisdiction, namely the Securities and Exchange Commission of the United States;
- 3. Lazard Fund Managers (Ireland) Limited, the Manager, has delegated its responsibility as Administrator, Registrar and Transfer Agent to State Street Fund Services (Ireland) Limited (the "Administrator"). This entity has responsibility for the day-to-day administration of the Company and the Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank;
- 4. Lazard Fund Managers (Ireland) Limited, the Manager, has delegated the distribution responsibility for the Funds of the Company to the entities described in the Prospectus. These entities are regulated by and subject to the supervision of the regulators of their respective operating jurisdictions.
- 5. The Company also has appointed State Street Custodial Services (Ireland) Limited (the "Custodian") as custodian of its assets. This entity has responsibility for the safekeeping of such assets in accordance with the UCITS Regulations and for exercising independent oversight over how the Company is managed. The Custodian is regulated by and under the supervision of the Central Bank.

The Directors receive reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Custodian which enable them to assess the performance of the delegate service providers and the Custodian (as the case may be).

#### Financial Reporting Process - description of main features

The Directors are ultimately responsible for overseeing the establishment and maintenance of adequate internal control and risk management systems of the Company in relation to the financial reporting process. As the Company has no employees and all directors serve in a non executive capacity, all functions relating to the Company's financial reporting process, including the preparation of the Company's financial statements, have been outsourced to the Administrator.

The Manager has appointed the Administrator to maintain the accounting records of the Company independently of the Investment Manager and the Custodian and through this appointment the Directors have procedures in place to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and half yearly financial statements.

Subject to the supervision of the Directors and the Manager, the appointment of the Administrator is intended to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors are responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and for ensuring that processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. The appointment of an administrator (which is regulated by the Central Bank) independent of the investment manager to the Company is intended to mitigate though not eliminate the risk of fraud or irregularities which may impact the financial statements of the Company.

#### **Corporate Governance Statement (continued)**

#### Financial Reporting Process - description of main features (continued)

During the year of these financial statements, the Directors were responsible for the review and approval of the annual financial statements as set out in the Statement of Directors' Responsibilities. The statutory financial statements are required to be audited by independent auditors who report annually to the Directors on their findings. The Directors monitor and evaluate the independent auditor's performance, qualifications and independence. As part of their review procedures, the Directors receive presentations from relevant parties including consideration of Irish accounting standards and their impact on the annual financial statements, and presentations and reports on the audit process. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

An Audit Committee, currently consisting of Daniel Morrissey, John Donohoe and Michael Allen, all non-executive Directors, has also been formed and is charged with oversight of the Company's audit and financial control functions.

The audited annual financial statements of the Company are required to be approved by the Directors and filed with the Central Bank.

#### **Composition of the Board of Directors**

For the appointment and replacement of Directors, the Company is governed by its Articles of Association and Irish statute comprising the Companies Act 2014 as applicable to investment funds. The Articles of Association may be amended by special resolution of the shareholders. The Articles of Association do not provide for retirement of Directors by rotation. However, the Directors may be removed by the shareholders by ordinary resolution in accordance with the procedures established under the Irish Companies Act 2014. A Director may also be removed upon notice from the Company in accordance with the Letter of Appointment between him and the Company.

The Directors are responsible for managing the business affairs of the Company in accordance with the Articles of Association. There are currently six directors (refer to page 6 for details), all of whom are non-executive. Each of William Smith, Michael Allen and Andreas Huebner are full time executives of the Lazard Group. Each of Gavin Caldwell, John Donohoe and Daniel Morrissey are regarded as independent directors having regard to the terms of the IFIA Code on Independence and Independent Directors although firms in which John Donohoe and Daniel Morrissey have an interest are in receipt of professional fees from the Company. Consequently, neither John Donohoe nor Daniel Morrissey meet the requirements of paragraph 4.1 of the IFIA Code which requirements are required to be met by one Director and which requirements are met by Gavin Caldwell. All related party transactions during the year are detailed in the notes to the financial statements.

The Directors meet at least quarterly. Other than the Audit Committee, there are no permanent sub-committees of the Directors.

#### **Independent Auditors**

The independent auditors, Pricewaterhouse Coopers have indicated their willingness to remain in office in accordance with Section 383 of the Companies Act 2014.

#### On behalf on the Board of Directors

Director: Daniel Morrissey Director: Gavin Caldwell

Date: 29 June 2015

## **Investment Manager's Reports**

### **Lazard Emerging Markets Bond Fund**

Over the past 12 months, the Lazard Emerging Markets Bond Fund returned 3.42% in US Dollar terms against a return of 5.65% for the JP Morgan EMBI Global Diversified Index.<sup>1</sup>

#### **Market Review**

The period was a volatile one for emerging markets debt as a number of macroeconomic factors that had served as tailwinds in recent years have now become headwinds. These challenges include slowing Chinese growth, lower commodity prices, a strong US dollar, and the prospect of rising US interest rates. Despite these challenges, external emerging markets debt performed well, benefiting from the decline in US Treasury rates.

#### Portfolio Review

The Fund produced a positive return during the period but underperformed the Index.

The primary driver of the Fund's performance relative to the benchmark was bottom-up security selection, especially during the fourth quarter of 2014. Specifically, the Fund's overweight exposure to high yield and commodity-sensitive sovereigns was the largest detractor from performance. In hindsight, the drop in oil prices was faster and greater in magnitude than we thought possible. Oil had been the one commodity that did not sell off over the past several years. Despite weaker demand due to slower global growth and an increase in supply due to US shale production, we believed that Saudi Arabia would continue to act as the swing producer, as it had in the past, in order to maintain price stability. This proved not to be the case and oil-sensitive and high yield credits began a sell-off that was exacerbated by thin year-end liquidity. Although we had begun to reduce the Fund's overweight to high yield and commodity-related sovereigns in the third quarter, the Fund began the fourth quarter with an overweight position to high yield sovereign credits with significant oil exposure, such as Venezuela. The Fund's off-benchmark exposure to corporates also detracted. Within corporates, we had been seeking to avoid "original sin" credits (i.e., those with a currency mismatch between revenue and interest expense). This led to an overweight in the oil and gas sector as many of these companies have dollar-based revenues. In December, we began to reposition the Fund to take a more conservative bias as we believed the collapse in oil prices was not a temporary phenomenon. We reduced or eliminated exposures in many high yield countries and moved to a benchmark-neutral position in oil-sensitive credits by early 2015. Through the first quarter of 2015, the Fund's more conservative stance was beneficial to returns helping reduce the negative impact in being overweight in high yield and commodity-sensitive sovereigns.

#### Outlook

In general, we have become more cautious in the near term; however, we believe that emerging markets debt will continue to deliver attractive risk-adjusted returns over the medium term. We also continue to believe that hard currency debt will outperform local currency debt, and we expect to use any episodes of strength in emerging markets currencies as an opportunity to further decrease our exposure to local currencies. In our view, the recent weakness in US economic data is more of a first-quarter phenomenon and we expect the economy to start picking up in the coming months. Therefore, we will look for opportunities to reduce our exposure to higher quality duration-sensitive sovereign credit and potentially add to our corporate exposure.

### **Lazard Emerging Markets Local Debt Fund**

Over the past 12 months, the Lazard Emerging Markets Local Debt Fund returned -11.04% in US Dollar terms against -11.14% for the JP Morgan GBI-EM Global Diversified Index.<sup>1</sup>

#### **Market Review**

The negative performance of local currency debt markets was overwhelmingly driven by negative spot currency returns, which detracted 18.4% from the J.P. Morgan GBI-EM Global Diversified Index's total return. The disappointing performance of emerging markets currencies was driven by a confluence of factors. These included the divergent monetary policy outlook between the United States and most emerging markets; a sharp depreciation in the currencies of key emerging markets trading partners, such as the euro zone and Japan; and sharply lower commodity prices, which hurt a number of commodity exporters.

#### **Portfolio Review**

The Fund underperformed the Index.

The Fund benefited from an underweight position in emerging markets currencies in the second half of 2014. The Fund's short position in the euro and euro-related currencies, such as the Romanian leu and Hungarian forint, added to performance as these currencies sold off in anticipation of the European Central Bank's quantitative easing program. The Fund's overweight in Brazilian local rates was also beneficial. Brazil was its largest duration overweight for much of the period and we focused on the long end of the curve. Our view was driven by very high real yields in Brazil, which we believe more than compensate for expected currency weakness over a long-term horizon. Among the detractors from performance were an underweight in Turkish local rates, which reflected our view that Turkey's inflation remains very high and monetary policy complacent. In Mexico, the Fund had a long-standing overweight in the peso on valuation grounds and was overweight duration through exposure at the very back end of the yield curve, as we expected the curve to flatten. However, the central bank surprised us in June with a 50 basis point rate cut, leading to currency weakness, lower rates, and a steepening of the local curve. The currency was further challenged by the drop in oil prices and concerns that poor public safety (which prompted protests against the government) would undermine the political capital of President Peña Nieto's administration. The peso depreciation translated into the underperformance of the local rates curve.

#### Outlook

In general, we have become more cautious in the near term; however, we believe that emerging markets debt will continue to deliver attractive risk-adjusted returns over the medium term. We also continue to believe that hard currency debt will outperform local currency debt, and we expect to use any episodes of strength in emerging markets currencies as an opportunity to further decrease our exposure to local currencies. In our view, the recent weakness in US economic data is more of a first-quarter phenomenon and we expect the economy to start picking up in the coming months. Therefore, we will look for opportunities to reduce our exposure to higher quality duration-sensitive sovereign credit and potentially add to our corporate exposure.

### Lazard Emerging Markets Total Return Debt Fund

Over the past 12 months, the Lazard Emerging Markets Total Return Debt Fund has returned -1.98% in US Dollar terms. 1

#### **Market Review**

The 12 month reporting period was a volatile one for emerging markets debt as a number of macroeconomic factors that had served as tailwinds in recent years became headwinds. These challenges include slowing Chinese growth, lower commodity prices, a strong US dollar, and the prospect of rising US interest rates. During the period, hard currency emerging markets debt outperformed local debt by an astounding 17%. Hard currency debt benefited from declining US Treasury rates, while local debt suffered from negative spot currency returns as investors increasingly focused on the divergent paths of monetary policy between the US Federal Reserve and emerging markets central banks.

#### **Portfolio Review**

Throughout this time, the Fund maintained a strong bias towards external debt which was beneficial to performance. Overall, the allocation decision to allocate the vast majority of net long exposure to hard currency debt was beneficial to returns. However, within the Fund's hard currency allocation, country selection was a key detractor from performance as the Fund was long a number of high yield sovereigns with significant oil exposure. We began to pare the Fund's exposure to many of these credits in November, but the Fund's long positions in Venezuela and Ecuador detracted meaningfully from performance in December. Venezuela entered the oil price collapse from a position of extreme weakness, with an overvalued exchange rate, one of the highest levels of inflation in the world, and a double-digit fiscal deficit. Ecuador's very poor track record in meeting its obligations during times of low oil prices further contributed to its poor performance during the quarter. We continued to reduce the Fund's exposure to oil-sensitive credits in December, in line with a transition to a more neutral risk profile. A second key detractor from performance was security selection within the Fund's corporate exposure. Specifically, exposure to a handful of high yield oil and gas credits weighed on returns. High yield corporates significantly underperformed investment-grade debt and, within high yield, oil and gas was the worst-performing industry. On a more positive note, currency positioning was an incremental contributor to performance as a result of short positions in the euro, Singapore dollar, and Hungarian forint. We continue to believe that the euro is on a downward trajectory versus the dollar due to divergent central bank policies. We view the Singapore dollar as an attractive beta reducer due to its low carry and explicit peg to a basket of emerging markets and G10 currencies.

#### **Outlook**

In general, we have become more cautious in the near term; however, we believe that emerging markets debt will continue to deliver attractive risk-adjusted returns over the medium term. We also continue to believe that hard currency debt will outperform local currency debt, and we expect to use any episodes of strength in emerging markets currencies as an opportunity to further decrease our exposure to local currencies. In our view, the recent weakness in US economic data is more of a first-quarter phenomenon and we expect the economy to start picking up in the coming months. Therefore, we will look for opportunities to reduce our exposure to higher quality duration-sensitive sovereign credit and potentially add to our corporate exposure.

### **Lazard Emerging Markets Allocation Fund**

Over the past 12 months, the Lazard Emerging Markets Allocation Fund returned -6.66% in US Dollar terms against 0.44% for the MSCI Emerging Markets Index.<sup>1</sup>

#### **Market Review**

The 12 month period ended 31 March 2015 saw markets dominated by concerns over the stability of the world economy, the likelihood of rising US interest rates and the geopolitical conflict in Ukraine. The MSCI Emerging Markets Index rose marginally in US dollar terms. By region, Asian equities performed relatively well, increasing by almost 11%. Latin American shares were affected by the weakness in commodity prices and fell by almost 21%, while Eastern European stocks were adversely impacted by the Ukrainian conflict and dropped by more than 23%. Two prominent features of the period were commodity price weakness, especially crude oil price declines in December, as well as substantial US dollar strength. By sector, the health care, consumer staples, information technology and telecom services outperformed the Index, while the energy and materials stocks were the major underperformers.

#### **Performance Review**

The Fund underperformed the Index over the period.

The portfolio is managed using a combination of the investment manager's emerging markets equity strategies, including relative value, relative growth, and small cap, and of the investment manager's emerging-market fixed income strategies, including debt and currencies. The investment manager considers a market forecast based on four categories pertinent to allocation decisions among the strategies: Economy, Valuation, Liquidity and Sentiment.

Changes made to the market forecast during the period reflected a consideration of many factors, including monetary policies of central banks around the globe; global macro data readings (particularly the Purchasing Managers Index, which measures economic activity) in China, the United States, the euro zone, and Japan; fiscal policy in developed and emerging markets; geopolitical events and risks; and equity and fixed income valuations, along with other data.

Stock selection and higher-than-index exposures in Russia, Colombia and Brazil hurt returns. Stock selection in China, as well as stock selection in the energy, consumer discretionary, industrials, consumer staples and health care sectors also detracted from performance. Exposure to the local currencies of Russia, Ghana and Nigeria and external debt positions in Venezuela also weighed on performance.

For the 12-month period ending 31 March 2015, stock selection and lower-than-index exposures to Malaysia and South Korea added value. Stock selection and higher-than-index exposure to Indonesia, stock selection in India, lower-than-index exposure to materials and no exposure to utilities also helped returns., With regards currency exposure, Romania, China and South Korea helped performance, as did select debt positions in Portugal, Hungary and Ivory Coast.

#### **Outlook**

Support for global growth should come in the form of cheaper energy prices, easing monetary policy, and no major elections. However, uncertainty about Russia-Ukraine and Greece may continue to weigh on markets. There will be potential market downside where currencies have been significantly weak and there are material government and corporate dollar liabilities maturing. India is looking stretched after a strong run and is hitting resistance until fresh allocations get deployed or companies start to see the impact of the reforms. China is not as stretched on valuations but the rally has been driven by domestic retail investors betting on aggressive rate cuts from the People's Bank of China (PBOC), which will likely cause near-term volatility. Northeast Asia should perform well in a firmer global economy outside of certain expensive tech names mostly associated with the Apple supply chain.

### Lazard Emerging Markets Debt Blend Fund

Over the past 12 months, the Lazard Emerging Markets Debt Blend Fund returned -5.89% in US Dollar terms against -3.05% for the 50% JP Morgan EMBI Global Diversified/50% JP Morgan GBI-EM Global Diversified Blended Index.<sup>1</sup>

#### **Market Review**

The period was a volatile one for emerging markets debt as a number of macroeconomic factors that had served as tailwinds in recent years became headwinds. These challenges include slowing Chinese growth, lower commodity prices, a strong US dollar, and the prospect of rising US interest rates. During the period, hard currency emerging markets debt outperformed local debt by an astounding 17%. Hard currency debt benefited from declining US Treasury rates while local debt suffered from negative spot currency returns as investors increasingly focused on the divergent paths of monetary policy between the US Federal Reserve and emerging markets central banks.

#### **Portfolio Review**

The Fund underperformed the Index over the period. Bottom-up security selection, especially during the fourth quarter of 2014, detracted from performance. Specifically, the Fund's overweight exposure to high yield and commodity sensitive sovereigns was the largest detractor from performance. In hindsight, the drop in oil prices was faster and greater in magnitude than we thought possible. Oil had been the one commodity that did not sell off over the past several years. Despite weaker demand due to slower global growth and an increase in supply due to US shale production, we believed that Saudi Arabia would continue to act as the swing producer, as it has in the past, in order to maintain price stability. This proved not to be the case and oil-sensitive and high yield credits began a sell-off that was exacerbated by thin year-end liquidity. Although we had begun to reduce the Fund's overweight to high yield and commodity-related sovereigns in the third quarter, the Fund began the fourth quarter with an overweight position to high yield sovereign credits with significant oil exposure. In that vein, countries such as Venezuela and Ecuador were among the largest detractors from performance. The Fund's off-benchmark exposure to corporates also detracted. Within corporates, we had been seeking to avoid "original sin" credits (i.e., those with a currency mismatch between revenue and interest expense). This led to an overweight in the oil and gas sector as these companies have dollar-based revenues. In December, we began to reposition the Fund to take a more conservative bias as we believed the collapse in oil prices was not a temporary phenomenon. We reduced or eliminated exposures in many high yield countries and moved to a benchmark-neutral position in oil-sensitive credits by early 2015. Through the first quarter of 2015, the Fund's more conservative stance was beneficial to returns. It helped in reducing the negative impact in being overweight in high yield and commodity-sensitive sovereigns.

#### Outlook

In general, we have become more cautious in the near-term; however, we believe that emerging markets debt will continue to deliver attractive risk-adjusted returns over the medium term. We also continue to believe that hard currency debt will outperform local currency debt, and we expect to use any episodes of strength in emerging markets currencies as an opportunity to further decrease our exposure to local currencies. In our view, the recent weakness in US economic data is more of a first-quarter phenomenon and we expect the economy to start picking up in the coming months. Therefore, we will look for opportunities to reduce our exposure to higher quality duration-sensitive sovereign credit and potentially add to our corporate exposure.

### **Lazard Opportunities Fund**

Over the past 12 months, the Lazard Opportunities Fund returned -2.30% in Sterling terms.<sup>1</sup>

#### **Market and Portfolio Review**

The best performing equity and credit sector during the past 12 months was utilities, which the portfolio had little to no exposure to as a function of the lack of available convertible issues in the sector. Also, the portfolio's modest amount of energy exposure created drawdowns in the 4th quarter. The precipitous drop in energy names offset the success of positioning in Healthcare and Technology sectors. Additionally, there was a trend of longer dated, higher rated names benefitting from the continued rally in the US Treasury market. In general, the markets saw an outperformance of credits higher up on the quality spectrum. Thus, the portfolio's small and mid-cap equity exposure, low duration, and single-B/ non-rated credits lead to an underperformance versus a long only, unhedged index. Moreover, the portfolio's use of equity and interest rate hedges, which the long only indices do not employ, were a further headwind to performance. In a way, the general nature of the portfolio was on the opposite side of the several factors (duration, large cap, higher rated credits) that drove performance. Nonetheless, the portfolio upheld its mandate to provide low volatility, low beta returns while using hedges to mitigate risk. Broadly speaking, 2014 was a tough year to be hedged with the S&P 500, Russell 2000 and US Treasuries up for the year and equity volatility, although subject to short lived spikes, generally subdued.

The majority of positive performance generated in 2014 related to convertible securities was due to the performance of the underlying equity, especially larger cap US equities.

#### Outlook

As we move into 2015, we believe equities will be subject to a higher amount of sustained volatility given the geopolitical risks and divergent monetary policies between the U.S. Federal Reserve other major developed market central banks, such as the European Central Bank, the Bank of Japan, and the People's Bank of China. Add on the prospects of a hard landing in China, a possible exit of Greece from the Euro Zone, terrorism, further flare-ups with Russia and Ukraine, a pick-up in corporate defaults in the energy patch, and "unknown" unknowns, and the recipe is ripe for equities to provide hedgers and traders more opportunities going forward. Consequently, we have used the 4th quarter to opportunistically cut positions and eliminate energy names that have asymmetric risk reward profiles, add to healthcare, technology, and energy consumer names such as airlines, and add to more balanced, high gamma names that should benefit from a pick-up in equity volatility. Lastly, convertible issuance, especially in the US should continue at a strong pace with companies looking to refinance, repurchase stock and fund M&A activity.

### **Lazard Global Hexagon Equity Fund**

Over the past 12 months, the Lazard Global Hexagon Equity Fund returned 1.2% in US Dollar terms. 1

#### **Market Review**

Global equities rose during the past 12 months. The United States benefited from broadly encouraging macro developments, while Japan and latterly Europe rose on the back of central bank policy. This was in response to deteriorating economic data and took bond rates towards zero, driving up asset prices. Currencies were volatile, with the differentials in growth and monetary policy driving a strong US dollar and weak euro and yen. Emerging markets were mixed, with India benefiting from the election of a new, reformminded leader, and China from domestic investor flows as interest rates start to fall. Commodity dependent countries, such as Russia and Brazil struggled. While almost all commodities were weak in the face of rising supply and slowing Chinese demand, the collapse in the oil price was dramatically exacerbated by a change in Organisation of the Petroleum Exporting Countries (OPEC) policy. Overall this is a positive for most parts of the global economy.

#### **Portfolio Review**

The best performing sector in 2014 was health care. Despite a penalising short on the Nasdaq Biotech Index, which cost the portfolio 0.7%, most of our long health care positions performed well in the context of a strong performance for the sector. Positions such as Zoetis, Novartis, Bayer and Shire were among our best performing health care names, more than offsetting the hedging and contributing over 1.5% to performance. The bottom performing sectors for the calendar year were financials and energy. In financials, the portfolio's losses came predominantly from three names: Sberbank, Piraeus Bank and Erste Bank. All three fell sharply for region-specific macro reasons, which resulted in two of the names triggering stop losses. In energy, the portfolio's losses stemmed from an early position in Tullow, the London-headquartered oil and gas exploration company, which we closed at the beginning of 2015.

During the first quarter of 2015, the Fund was up 3.4%, outperforming the HFRX Equity Hedge Index, which was up 2.2%. The long portfolio and index hedges had gains of 3.5% and 2.1%, respectively, while the short portfolio was down 2.2%. Within portfolio hedges, currency hedges were up 3.6%, and index hedges were down 1.6% over the same period. The top performing sector during the first quarter was industrials, which contributed nearly 1.0% to performance, while the bottom performing sector was materials, which cost the portfolio 0.6%.

### **Outlook**

Buoyed by the ECB's €1.1 trillion government bond-buying program that began in early March 2015, European equities continue to be well-positioned beneficiaries. The MSCI Europe Index had a strong first quarter with cyclical names as the primary performance drivers. Demand for European equity mutual funds and ETFs have been strong as European bond yields fall to record lows and the euro weakens against the US dollar. Many investors are focused on the European auto sector, which has undergone a sharp correction since last October and has become a crowded trade. Meanwhile, we are taking advantage of the re-rating in European equity markets through our positions in banks/asset managers including Italy's Azimut and the UK's Standard Chartered.

In the United States, the portfolio maintains a market neutral positioning. The S&P 500 managed to end the first quarter of 2015 in positive territory, supported by hopes of a delayed rate hike and strong M&A activity. While some American companies are worried about the negative impact of a strengthening dollar on overseas operations and sales, we are focused on investment opportunities such as J.M. Smucker (food company known for its fruit jams and preserves), whose sales come nearly all from the United States and has little concern over currency fluctuations.

### **Lazard Global Hexagon Equity Fund (continued)**

### **Outlook (continued)**

Emerging markets equities experienced a volatile but positive first quarter of 2015 overall, but performance (in local currency terms) was generally subdued due to US dollar strength. We continue to rely on our fundamental, bottom-up approach to analyse and identify investment ideas and expect our current bias towards quality emerging market names to contribute to overall performance. In China, there are some green shoots, as stimulus expectations build after the release of disappointing first quarter 2015 economic data.

## **Custodian's Report**

# Custodian's Report to the Shareholders of Lazard Global Investment Funds plc

We have enquired into the conduct of Lazard Global Investment Funds plc (the "Company") for the year from 1 April 2014 to 31 March 2015 in our capacity as Custodian to the Company.

This report including the opinion has been prepared for and solely for circulation to the Shareholders in the Company in accordance with the Central Bank's UCITS Notice 4 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

### Responsibilities of the Custodian

Our duties and responsibilities are outlined in the Central Bank's UCITS Notice 4. One of those duties is to enquire into the conduct of the Company in each annual accounting year and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that year in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Custodian must state why this is the case and outline the steps which we have taken to rectify the situation.

### **Basis of Custodian Opinion**

The Custodian conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in UCITS Notice 4 and to ensure that, in all material respects, the Company has been managed:

- i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations; and
- ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

### **Opinion**

In our opinion, the Company has been managed during the year, in all material respects:

- i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the "Regulations") (as amended); and
- ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Regulations.

<sup>\*</sup> Lazard Global Hexagon Equity Fund launched on 5 November 2013.

## **Notes to the Financial Statements**

### 1. General

Lazard Global Investment Funds plc (the "Company") was incorporated on 3 February 2009 as an open-ended investment company with variable capital and with segregated liability between its sub-funds organised under the laws of Ireland. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") for the purposes of the UCITS Regulations. The Company is structured as an umbrella fund in that the share capital of the Company may be divided into different classes of Shares with one or more classes representing a separate sub-fund (each a "Fund") of the Company.

The Company currently has seven Funds in existence as at 31 March 2015, all of which are registered in Switzerland. Lazard Emerging Markets Debt Blend Fund, Lazard Opportunities Fund and Lazard Global Hexagon Equity Fund were registered in Switzerland on 15 July 2014. As at 31 March 2015, Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund, Lazard Emerging Markets Allocation Fund, Lazard Emerging Markets Debt Blend Fund, Lazard Opportunities Fund and Lazard Global Hexagon Equity Fund (launched 5 November 2013) were funded. The investment objectives of each Fund within the Company are set out in the Prospectus and relevant supplements for the Funds.

### 2. Significant Accounting Policies

The significant accounting policies and estimation techniques adopted by the Company in the preparation of the financial statements are set out below. All references to net assets throughout the financial statements refer to net assets attributable to holders of Redeemable Participating Shares unless otherwise stated.

#### **Basis of preparation**

The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

The financial statements have been prepared on a going concern basis and in accordance with accounting standards generally accepted in Ireland and the provisions of the Companies Act, 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those accounting standards issued by the Financial Reporting Council and promulgated by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland).

The Company has availed of certain exemptions contained in Financial Reporting Standard (FRS) 1 (Revised) 'Cash Flow Statements' and has presented a Statement of Changes in Net Assets in place of a cash flow statement. In the opinion of the Directors, this information also satisfies the requirement of FRS 3 'Reporting Financial Performance' in relation to a reconciliation of movements in Shareholders' funds.

#### Foreign Exchange Translation

(a) Functional and presentation currency: Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). This is USD except for Lazard Opportunities Fund which is GBP. The Company has adopted the functional currency of each Fund as the presentation currency for these financial statements.

For the purpose of combining the financial statements of each Fund to arrive at the consolidated figures, the financial assets and financial liabilities in the financial statements have been translated to USD at the exchange rate at 31 March 2015. The amounts in the Profit and Loss Account and in the Statement of Changes in Net Assets attributable to Redeemable Participating Shareholders have been translated to USD using an average rate for the year. This has no effect on the net asset value per share attributable to the individual Fund. All exchange rates are disclosed in Note 7.

The foreign currency translation adjustment of USD (6,392,579) (2014: USD 4,488,513) included in the "Statement of Changes in Net Assets attributable to Redeemable Participating Shareholders" reflects the movement in exchange rates for the year. This is a notional amount which has no impact on the results of the individual Funds.

(b) Assets and liabilities other than those denominated in the functional currency of each Fund are translated into the functional currency at the exchange rate ruling at the year end. Transactions in foreign currencies are translated into the functional currency at the exchange rates ruling at the dates of the transactions. The resulting gain or loss arising on translation of securities and other assets and liabilities is included in net movement in unrealised gains and losses on investments/currency. Forward currency contracts which are outstanding at the year end are valued at year end forward rates. The resulting unrealised gain or loss is included in net movement in unrealised gains and losses on investments/currency. Realised gains and losses arising between the transaction and settlement dates on purchases or sales of securities denominated in the non-base currencies and on settled forward currency contracts are included in net realised gains and losses on investments/currency.

### 2. Significant Accounting Policies (continued)

#### Accounting estimates and judgements

The preparation of the financial statements, in accordance with accounting standards generally accepted in Ireland, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the year. Actual results could differ from those estimates.

#### Going concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company has the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on a going concern basis.

#### **Financial instruments**

#### (i) Classification

The Company classifies its financial instruments as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are classified as held for trading or designated by the Directors at fair value through profit or loss at inception. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Company's documented investment strategy. The Company's policy is for the Investment Manager and the Directors to evaluate the information about these financial assets and liabilities on a fair value basis together with other related financial information.

#### (ii) Recognition and Derecognition

Regular-way purchases and sales of investments are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are initially recognised at fair value, and transaction costs for all financial assets carried at fair value through profit or loss are recognised on an accruals basis. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

#### (iii) Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Profit and Loss Account in the year in which they arise.

#### (iv) Fair Value Estimation

Securities listed on a recognised stock exchange or traded on any other organised market are valued at the current mid price on the stock exchange or market which constitutes the principal market for such securities. If for specific assets the current mid price does not, in the opinion of the Directors, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Unlisted securities and thinly traded securities are valued in good faith by the Directors based on quotations received from third parties including relevant brokers, however no securities were valued in this manner as at 31 March 2015 and 31 March 2014.

Under FRS 26, financial assets and liabilities must be measured at fair value. Investment securities should be valued at "bid" as the most appropriate approximation of "fair value" in accordance with FRS 26. At the year end, the Funds were valued at current mid price, for dealing purposes, consistent with the Prospectus. For financial reporting purposes, a bid valuation has been used for inclusion in the Financial Statements. Consequently, the differences between using bid market prices and current mid market prices adjust the carrying amount of the net assets attributable to redeemable participating shareholders and the movement in the adjustment from year to year is recognised in the Profit and Loss Account. The cumulative differences are included as "adjustment from bid market prices to mid market prices" on the Balance Sheet.

### 2. Significant Accounting Policies (continued)

#### (iv) Fair Value Estimation (continued)

The valuation point for all Funds is 4pm (New York time) on each dealing day and each valuation day.

Investments in open-ended collective investment schemes are valued at fair value at the latest available unaudited Net Asset Value for the shares or units obtained from the relevant Administrator. The change in the daily Net Asset Value of these shares is recognised as net gain/(loss) on investments and foreign currency in the Profit and Loss Account. Lazard Emerging Markets Allocation Fund invests in Lazard Emerging Markets Total Return Debt Fund and Lazard Emerging Markets Debt Blend Fund, both Funds of the Company.

Each of the Funds may employ investment techniques and financial derivative instruments for efficient portfolio management and/ or investment purposes subject to the conditions and within the limits laid down by the Prospectus and the Central Bank and these are as follows:

#### **Futures Contracts**

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted daily settlement prices on the relevant exchange as of the Balance Sheet date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. For each relevant Fund, gains or losses on open futures contracts are shown in the Portfolio of Investments of each relevant Fund and as appropriate, on the Balance Sheet as financial assets or liabilities at fair value through profit or loss.

#### Forward foreign currency exchange contracts

The unrealised appreciation or depreciation on open forward foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the year end. Unrealised appreciation or depreciation on forward contracts is reported in the Balance Sheet and the Profit and Loss Account. Realised gains and losses are reported with all other foreign currency gains and losses in the Profit and Loss Account.

#### **Contracts for Difference**

Open Contracts for Difference ("CFDs") are carried at the net amount due to/from the counterparty under the terms of the agreement, including unrealised gains and losses from changes in fair value of the notional equities, and are recorded as derivative assets/liabilities at fair value on the Balance Sheet. Realised and unrealised gains and losses are recognised in the Profit and Loss account. When the Company holds long CFDs it receives the dividends relating to the underlying equity and pays interest to the third party. When the CFDs are sold short, the Company receives interest on the contract value. The contracts are valued based on the market value of the underlying security.

#### **Options**

The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is included in determining initial fair value of the securities or foreign currency purchased. Premiums paid from the purchase of options which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is included in determining initial fair value of securities or foreign currencies purchased. Premiums received from written options which expire unexercised are treated as realised gains. The over-the-counter options ("OTC") are valued at close of business daily at the price provided by the counterparty and this valuation is then validated by a Bloomberg valuation and a valuation sourced from the Investment Manager. Should no counterparty valuation be received, then the Bloomberg valuation would apply, (provided it is in line with the Investment Manager). Exchange traded options are valued at settlement price.

#### Credit default swaps

Credit default swaps involve, to varying degrees, elements of credit and counterparty risk in excess of the amount recognised in the Balance Sheet. Valuation of the credit default swap is an estimate of a credit default event happening at a particular point in time. Notional principal amounts are used to express the extent of involvement in these transactions, but the amounts potentially subject to credit risk are much smaller. The fair values of credit default swaps are calculated using standard net present value methodologies whereby all future cashflows of the fixed side of the swap are discounted to their present value using the appropriate interest rate and whereby all future cashflows of the default side of the swap are discounted to their present value based on the cost of default to the default payer. This cost is determined by the recovery rate, notional amount of the contract, and default probability among other factors.

### 2. Significant Accounting Policies (continued)

#### (iv) Fair Value Estimation (continued)

#### Credit default swaps (continued)

The credit default contracts are marked-to-market daily based upon quotations from the counterparty, (the primary source), and the change, if any, is recorded as an unrealised gain or loss. The counterparty prices are validated by a Bloomberg valuation, (independent of the counterparty inputs), and a valuation is sourced from the Investment Manager. If a counterparty valuation has not been received or is incorrect, then the Bloomberg valuation is applied (provided it is in line with the Investment Manager). Payments received or made as a result of a credit event or termination of the contract are recognised, net of a proportional amount of the upfront payment, as realised gains or losses.

#### Interest rate swaps

The fair value of interest rate swaps is calculated using standard net present value methodologies whereby all future cash flows of the interest rate swaps are discounted to their present value using the appropriate interest rate. Interest rate swap contracts are marked-to-market daily based upon quotations from the counterparty, (the primary source), and the change, if any, is recorded as an unrealised gain or loss. The counterparty prices are validated by a Bloomberg valuation, (independent of counterparty inputs), and a valuation is sourced from the Investment Manager. If a counterparty valuation has not been received or is incorrect, then the Bloomberg valuation is applied (provided it is in line with the Investment Manager). Payments received or made are recorded as realised gains or losses.

#### Total return swaps

A total return swap is an agreement in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset. The total return swap may be applied to any underlying asset but is most commonly used with equity indices, single stocks, bonds and defined portfolios of loans and mortgages. The fair value of the swap is reported as an asset or liability as appropriate on the Balance Sheet and movements in the fair value are recorded in the Profit and Loss Account as part of net gain/(loss) on financial assets and financial liabilities at fair value through profit or loss and foreign currencies.

The fair value of the total return swap that is held on Lazard Opportunities Fund is based on a valuation received from the counterparty. This valuation is based on the gain or loss of all the underlying securities, mostly convertible bonds and common stocks. The gain/loss of these securities make up the overall fair value on the swap.

#### Realised and unrealised gains and losses on investments

Realised gains and losses are calculated based on a FIFO basis. Realised and unrealised gains and losses arising from changes in the fair value of financial assets and financial liabilities at fair value through profit or loss category are included in the Profit and Loss Account in the year in which they arise.

#### Interest income and expense

Interest income and expense are recognised in the Profit and Loss Account for all debt instruments using the effective interest method. The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating the interest income or interest expense over the relevant year. Bond interest income is reported gross of irrecoverable withholding tax, which is disclosed separately in the Profit and Loss Account, and net of any tax credits.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts throughout the expected life of the financial instrument, or a shorter period where appropriate, to the net carrying amount of the financial asset or financial liability.

#### **Dividend income**

Dividend income is recognised through profit and loss on an ex-dividend basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Profit and Loss Account.

#### **Expenses**

Expenses are accounted for on an accruals basis.

### 2. Significant Accounting Policies (continued)

#### Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Balance Sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

#### **Distributions**

Distributions with an ex date during the financial year are included as a finance cost in the Profit and Loss Account. Dividends will not be paid in respect of any class of share which is an accumulating class. Income and profits, if any, attributable to an accumulating share class will be accumulated, reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the Net Asset Value of the relevant accumulating share class. Please see Note 13 for details of any distributions paid during the year ended 31 March 2015.

#### **Equalisation**

Income equalisation arrangements apply to each Fund. The arrangements are intended to ensure that the income per Share which is distributed in respect of the distribution period is not affected by changes in the number of Shares in issue during the period. The arrangements have no effect on the Net Asset Value of any Share Class. The calculation of equalisation is based on total accumulated undistributed net income.

#### **Anti-Dilution Levy**

The anti-dilution levy is paid to the Funds and is used to defray the cost related to the associated purchase or sale of securities within the Funds as a result of shareholder transactions. Anti-dilution levies are included in the movement in net assets resulting from share transactions in the Statement of Changes in Net Assets attributable to Redeemable Participating Shareholders.

#### **Transaction costs**

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on the purchase and sale of fixed income securities, money market instruments, forward foreign exchange currency contracts and swaps are included in the purchase and sale price of the investment and are not separately identifiable. Transaction costs on purchases and sales of equities, futures contracts, options contracts and collective investment schemes are included in net gains/(losses) on financial instruments at fair value through profit or loss in the Profit and Loss Account for each Fund.

Custody transaction costs include transaction costs paid to the custodian and the sub-custodian. Purchases and sales transaction costs include identifiable brokerage charges, commissions, transaction related taxes and other market charges. Custody transaction costs are included in custodian fees as disclosed in Note 3. These costs are separately identifiable transaction costs and the total costs incurred by each Fund during the year are disclosed in Note 3.

#### 3. Fees

#### **Management Fees**

The Company has appointed as Manager, Lazard Fund Managers (Ireland) Limited, (the "Manager"). The Manager has responsibility for the management and administration of the Company's affairs and the distribution of the Shares, subject to the overall supervision and control of the Directors.

### 3. Fees (continued)

#### **Management Fees (continued)**

The Manager is entitled to a charge per annum of the Net Asset Value attributable respectively to each of the following Share classes.

		Lazard nerging Markets	Lazard Emerging Markets Total	Lazard Emerging Markets	Lazard Emerging	Lazard	Lazard Global Hexagon

The USD Hedged Institutional Accumulating Class was fully redeemed on 16 January 2015.

<sup>&</sup>lt;sup>j</sup> The USD X Class was fully redeemed on 13 February 2015.

<sup>&</sup>lt;sup>k</sup> The USD Management Class launched on 20 February 2015.

### 3. Fees (continued)

#### **Management Fees (continued)**

Manager. The Manager will be responsible for discharging the fees and expenses of the Investment Manager, the Promoter and the Distributor out of its fee. For the year ended 31 March 2015, management fees of USD 30,054,649 (31 March 2014: USD 20,214,734) were charged of which USD 4,538,453 (31 March 2014: USD 3,966,264) remained payable at the year end.

#### **Performance Fees**

The Manager is entitled to receive a performance fee in respect of Lazard Emerging Markets Total Return Debt Fund, Lazard Opportunities Fund and Lazard Global Hexagon Equity Fund. Below is a description of how this fee is calculated for each Fund.

#### Lazard Emerging Markets Total Return Debt Fund

The Manager is entitled to receive a monthly performance fee in respect of each of the Share classes (the "Performance Fee") excluding the B Classes, the X Classes and the USD Management Class, equal to 20% of the Net Gain, if any, during the relevant Performance Period. A Performance Fee in respect of each relevant Share class shall accrue and become due and payable only in the event that both of the conditions below are met:

- the Ending NAV per Share for any Performance Period during the year has exceeded the Hurdle NAV per Share; and
- the Ending NAV per Share for the applicable Performance Periods exceeds the High Water Mark.

#### **Performance Period**

A Performance Period will end on the last Business Day of each calendar month and will begin on the earlier of (i) the end of the last Business Day of the previous month or (ii) the last Business Day that a Performance Fee was payable or, for a Share class' initial Performance Period, the first Business Day following closure of that Share class' Initial Offer Period.

#### **Ending NAV per Share**

With respect to each relevant Share class, the Ending NAV per Share is the Net Asset Value per Share of the relevant class, prior to the accrual of any applicable Performance Fee and deduction of any applicable dividend, as at the last Valuation Point for the current Performance Period.

#### **Net Gain**

With respect to each relevant Share class, the "Net Gain per Share" is the difference between the Ending NAV per Share and the higher of (1) the Hurdle NAV per Share and (2) the High Water Mark. "Net Gain" is the Net Gain per Share multiplied by the closing number of Shares of the relevant class in issue for the relevant Performance Period.

#### **Hurdle NAV per Share**

The Hurdle NAV per Share is calculated with respect to each Share class using an annualised hurdle rate of 5% (the "Hurdle Rate"). For the calendar year in which a Share class is first issued, the Hurdle NAV per Share of the relevant Share class will be calculated by multiplying the Initial Offer Price per Share of that class by a pro rata portion of Hurdle Rate for the remainder of the year (i.e., 5% divided by 365 and multiplied by the number of days following the closure of the Initial Offer Period for the relevant Share class until the end of the relevant calendar year) and adding the result to the Initial Offer Price per Share of the relevant class. For each subsequent year following the year in which the relevant Share class first issued, the Hurdle NAV per Share will be calculated with respect to that Share class by multiplying the Net Asset Value per Share of the relevant class on the last Valuation Point of the prior calendar year by the Hurdle Rate (i.e. 5% as defined above) and adding the result to such Net Asset Value per Share. In each case, the Hurdle NAV per Share will be adjusted for any dividends paid during the relevant calendar year.

#### **High Water Mark**

The High Water Mark is the greater of: (i) the highest Net Asset Value per Share of the relevant Share class (after deduction of any applicable Performance Fee and any applicable dividend) on the last Valuation Point for any previous Performance Period for which a Performance Fee was payable; or (ii) the Initial Offer Price per Share of the relevant class. The High Water Mark will be adjusted for any appropriate dividend paid.

### 3. Fees (continued)

#### **Performance Fees (continued)**

#### Lazard Emerging Markets Total Return Debt Fund (continued)

#### General

For each Share class, the Performance Fee will be calculated by taking the Net Gain per Share of the relevant class for the applicable Performance Period, and multiplying this by the closing number of Shares of the relevant class in issue and multiplying the resultant figure by 20%. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall be realized and become payable at the point of redemption. The Performance Fee will be accrued daily and payable as of the end of the relevant Performance Period. The Performance Fee shall be calculated independently by the Administrator and verified by the Custodian. The Performance Fee will be divided between Manager and the Investment Manager in such proportions as shall be agreed between the Manager and the Investment Manager from time to time. For the year ended 31 March 2015, performance fees of USD 649,837 (31 March 2014: USD Nil) were charged and USD Nil (31 March 2014: USD Nil) were payable at the year end.

#### **Lazard Opportunities Fund**

The Manager is entitled to receive a monthly performance fee in respect of each share class in the Fund, with the exception of the EA classes, equal to 20% of the Net Gain, if any, in excess of the relevant shares class high water mark during the corresponding "Performance Period". In the case of the EA classes, the Manager is entitled to receive a monthly performance fee equal to 10% of the Net Gain, if any, in excess of the relevant shares class high water mark during the corresponding "Performance Period".

#### **Performance Period**

The performance fee will be calculated for each Performance Period which will begin as of the date of the Fund's commencement and end on the last Valuation Point of the first following month, and on each successive last Valuation Point of each month thereafter (or the date of the dissolution of the Fund).

#### **Net Gain**

The "Net Gain" is the difference between the Net Asset Value of the relevant share class (before deduction of any performance fee) as at the last Valuation Point for the relevant Performance Period and the relevant share class high water mark recorded at the end of the previous Performance Period (or the initial Net Asset Value, in the case of the first Performance Period), adjusted for subscriptions and redemptions.

#### **High Water Mark**

A performance fee will be payable in respect of a particular share class only to the extent that gains in the relevant share class Net Asset Value (before deduction of any performance fee) as at the end of the relevant Performance Period exceeds the highest Net Asset Value achieved by that share class at the end of a previous Performance Period (commonly referred to as a "high water mark").

#### General

The performance fee will be accrued weekly and payable as of the end of the relevant Performance Period. Any performance fee accrued in respect of shares redeemed during a Performance Period will be realised and become payable at the point of redemption. The performance fee will be calculated independently by the Administrator and verified by the Custodian. For the year ended 31 March 2015, performance fees of GBP 25,780 (31 March 2014: GBP 250,319) were charged and GBP Nil (31 March 2014: GBP 55,335) were payable at the year end.

#### **Lazard Global Hexagon Equity Fund**

The Manager is entitled to receive a monthly performance fee in respect of the USD Institutional Accumulating Class, the Euro Hedged Institutional Accumulating Class, the GBP Hedged Institutional Accumulating Class and the CHF Hedged Institutional Accumulating Class, equal to 20% of the Net Gain, if any, in excess of the relevant Share class high water mark during the corresponding "Performance Period". The Manager is also entitled to receive a monthly performance fee in respect of each of the L Classes and the EA Classes, equal to 10% of the Net Gain, if any, in excess of the relevant Share class high water mark during the corresponding "Performance Period". No performance fee will be charged to the assets of the X Classes.

#### **Performance Period**

In each case, the Performance Fee will be calculated for each "Performance Period", which will begin as of the date of the Fund's commencement and end on the last Valuation Point of the first following month, and on each successive last Valuation Point of each month thereafter (or the date of the dissolution of the Fund).

### 3. Fees (continued)

#### **Performance Fees (continued)**

#### Lazard Global Hexagon Equity Fund (continued)

#### **Net Gain**

The "Net Gain" is the difference between the Net Asset Value of the relevant Share class (before deduction of any performance fee) as at the last Valuation Point for the relevant Performance Period and the relevant Share class high water mark recorded at the end of the previous Performance Period (or the initial offer price, in the case of the first Performance Period), adjusted for subscriptions and redemptions.

#### **High Water Mark**

A Performance Fee will be payable in respect of a particular Share class only to the extent that gains in the relevant Share class Net Asset Value (before deduction of any performance fee) as at the end of the relevant Performance Period exceeds the highest Net Asset Value achieved by that Share class at the end of a previous Performance Period (commonly referred to as a "high water mark").

#### General

The Performance Fee will be accrued weekly and payable as of the end of the relevant Performance Period. Any Performance Fee accrued in respect of Shares redeemed during a Performance Period shall be realised and become payable at the point of redemption. The Performance Fee shall be calculated independently by the Administrator and verified by the Custodian. For the year ended 31 March 2015, performance fees of USD 105,401 (31 March 2014: USD 5,181) were charged and USD 1,977 (31 March 2014: USD 154) were payable at the year end.

There is no performance fee charged in relation to any of Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Allocation Fund or Lazard Emerging Markets Debt Blend Fund.

#### **Reimbursement from Manager**

Each class of Shares of each Fund shall bear its attributable portion of the other expenses of the Company, (as set out in detail under the heading "Other Expenses" in the section of the Prospectus entitled "Fees and Expenses"), subject to an overall cap on expenses of 0.23% per annum of the Net Asset Value of the Funds with respect to Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund and Lazard Emerging Markets Debt Blend Fund. In the case of Lazard Emerging Markets Allocation Fund and Lazard Global Hexagon Equity Fund the cap is 0.30% and in the case of Lazard Opportunities Fund, the cap is 0.55%. As at the 31 March 2015, the above cap on expenses is in effect on Lazard Emerging Markets Bond Fund, Lazard Emerging Markets Allocation Fund and Lazard Global Hexagon Equity Fund. The Manager will be responsible for any such expenses in excess of this limit with the exception of the expenses of acquiring and disposing of Investments (including brokerage expenses, custodial and sub-custodial transaction charges, stamp duties and other relevant taxes). For the avoidance of doubt, the Manager will not be responsible for the costs of hedging the currency exposure for the benefit of any particular Share class of the Fund, which costs shall be attributable exclusively to the relevant Share class. For the year ended 31 March 2015, reimbursement from the Manager was USD 205,379 (31 March 2014: USD 222,608) of which USD 45,407 (31 March 2014: USD 31,421) remained receivable at the year ende.

#### **Administration, Transfer Agency and Custody Fees**

The Manager has appointed as Administrator, State Street Fund Services (Ireland) Limited (the "Administrator").

The Administrator is entitled to an annual fee payable by the Funds of up to 0.10% of the Funds Net Asset Value. Such fees shall accrue daily and be payable monthly in arrears. The Administrator shall also be entitled to recover from the Funds its reasonable out-of-pocket expenses.

Shareholder and transfer agency services fees which shall be charged at normal commercial rates subject to a minimum monthly fee of USD 750 for each Share class that has issued in the Funds (exclusive of transaction charges, which shall be at normal commercial rates).

The Company has appointed as Custodian, State Street Custodial Services (Ireland) Limited (the "Custodian"). The Custodian is entitled to be paid by the Funds an annual fee for the performance of its trustee functions of up to 0.02% of the Funds' Net Asset Value. Such fees shall accrue daily and be paid by the Fund monthly in arrears.

### 3. Fees (continued)

#### Administration, Transfer Agency and Custody Fees (continued)

The Custodian is also entitled to charge the Funds transaction fees, which shall be at normal commercial rates, and to be reimbursed by the Funds for the fees and transactions charges of any sub-custodian (which shall also be at normal commercial rates), together with its reasonable, out-of-pocket expenses and those of any sub custodians.

For the year ended 31 March 2015, administration, transfer agency and custody fees of USD 5,717,556 (31 March 2014: USD 3,663,189) were charged of which USD 832,811 (31 March 2014: USD 716,015) remained payable at the year end.

For six months from the date of launch of each Fund, fees payable to State Street for provision of Administration and Custodian services shall be subject to a cap of 18.5 basis points. Custodial fees related to safekeeping and related transaction costs are excluded from this cap, as are all relevant out of pocket expenses, whether payable to the Custodian, Administrator or other third party.

#### **Directors' Fees**

Directors' fees charged over the year were USD 41,782 (2014: USD 86,489), of which USD 21,583 (2014: USD 93,489) were outstanding at 31 March 2015.

#### **Auditors' Fees**

Fees and expenses paid to the statutory auditors, PricewaterhouseCoopers (Ireland), in respect of the financial year, entirely relate to the audit of the financial statements of the Company. There were no fees and expenses paid in respect of other assurance, tax advisory or non-audit services provided by the auditors for the years ended 31 March 2015 or 31 March 2014.

Auditors' remuneration for the year was USD 82,737 (2014: USD 96,390) of which USD 82,270 was outstanding at 31 March 2015 (2014: USD 102,947). These fees are exclusive of VAT.

#### **Transaction Fees**

As disclosed in Note 2, transaction fees are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Under purchases and sales transaction fees detailed below are the transaction fees on the purchase and sales of equities, futures contracts, options contracts and collective investment schemes. Commission/brokerage costs on the purchase and sale of fixed income securities, money market instruments, contracts for difference, forward foreign exchange currency contracts and swaps, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note.

The following tables show the transaction costs for the year ended 31 March 2015 and 31 March 2014:

#### 31 March 2015

	Lazard Emerging Markets Bond Fund	Lazard Emerging Markets Local Debt Fund	Lazard Emerging Markets Total Return Debt Fund	Lazard Emerging Markets Allocation Fund	Lazard Emerging Markets Debt Blend Fund	Lazard Opportunities Fund	Lazard Global Hexagon Equity Fund	Total

Purchases and sales transaction fees	1,203	-	4,310	36,915	18,979	7,179	263,763	336,594

### 4. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis the Company will not be liable to taxation in respect of its income and gains, other than on the occurrence of a chargeable event. Generally a chargeable event arises on any distribution, redemption, repurchase, cancellation, transfer of shares or on the ending of a 'relevant period', a 'relevant period' being an eight year period beginning with the acquisition of the shares by the shareholders and each subsequent period of eight years beginning immediately after the preceding relevant period.

A chargeable event does not include:

- a) any transactions in relation to shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland: or
- b) an exchange of shares representing a Fund for another Fund: or
- c) an exchange of shares arising on a qualifying amalgamation or reconstruction of a Fund with another Fund: or
- d) certain exchanges of shares between spouses and former spouses.

A chargeable event will not occur in respect of shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the Company with a relevant declaration to that effect.

In the absence of an appropriate declaration, the Company will be liable to Irish Tax on the occurrence of a chargeable event. There were no chargeable events during the period under review.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by a Fund or its shareholders.

# 5. Number Of Shares In Issue and Net Assets Attributable to Redeemable Participating Shareholders

#### **Authorised**

The authorised share capital of the Company was two Subscriber Shares of par value of £1.00 each. The two Subscriber Shares are held by the Manager and the Promoter.

The Company also has an authorised share capital of 5,000,000,000,000 shares of no par value which are available for issue as fully paid Participating Shares in each of the Company's Funds ("Redeemable Participating Shares"). They may be redeemed by the Company at the request of the shareholder. The value of shares issued and redeemed during the year is set out in the Statement of Changes in Net Assets attributable to Redeemable Participating Sharesholders.

Each Fund issues redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value. The redeemable participating share is carried at the redemption amount that is payable at the Balance Sheet date if the holder exercises the right to put the share back to the Fund.

**EURO Hedged**

Zambian Kwacha	7.6400	6.1500

The following year end exchange rates have been used to translate assets and liabilities in other currencies to GBP:

Exchange Rates against GBP Pound	31 March 2015	31 March 2014
Australian Dollar	1.9432	1.7987
Canadian Dollar	1.8801	1.8401
Euro	1.3822	1.2096
Hong Kong Dollar	11.5094	12.9322
Japanese Yen	178.0288	171.6915
Swedish Krona	12.8024	10.8091
US Dollar	1.4845	1.6672
South African Rand	17.9866	17.5349

The following average exchange rates have been used to translate Profit and Loss Account balances in other currencies to GBP:

Average Exchange Rates against GBP Pound	31 March 2015	31 March 2014
US Dollar	1.60984	1.59133

## 8. Cash and Cash Equivalents

Cash and cash equivalents as at 31 March 2015 and 31 March 2014 comprises current deposits with banks. State Street Custodial Services (Ireland) Limited (the "Custodian") may utilise one or more sub-custodians for holding cash of the Funds. Substantially all of the cash, bank overdrafts and deposits, including overnight deposits are held with the Custodian's global sub-custodian, State Street Bank and Trust Company. Cash collateral is held with Bank of America Corporation, Barclays Bank Plc and JP Morgan Chase and Company and is subject to the counterparty risk of those entities. Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options and open futures contracts, this cash is held with Deutsche Bank AG at the year end. (See Note 9, Counterparty/Issuer Risk and Credit Risk).

## 9. Risk Management Policies and Procedures

The Funds' investment activities expose them to the various types of risk which are associated with the financial instruments and markets in which they invest. The following information is not intended to be a comprehensive summary of all risks and investors should refer to the Prospectus and Supplements for a more detailed discussion of the risks inherent in investing in the Funds.

The Board of Directors (the "Directors") review reports from Lazard Asset Management LLC (the "Investment Manager") on a quarterly basis and more frequently as required in relation to the Funds' performance and risk profile. The Investment Manager is also responsible for ensuring that the Funds are managed within the terms of the Funds' investment guidelines and limits set out in the Prospectus' and Supplements as well as the Investment Manager's own internal investment guidelines and limits. The Directors delegate to the Manager who in turn delegates to the Investment Manager responsibility for the monitoring and managing of risk for the Funds.

There is a Risk Management Team responsible for overseeing the risk management process of the Investment Manager. The Team has delegated the monitoring to the respective Head of Risk in the country of operation of the Investment Manager. The Head of Risk, reports into the Oversight Committee. The Oversight Committee is the central management body for the Investment Manager's investment platform. It reviews and monitors all Funds to ensure they remain consistent with their stated goals and objectives in terms of product characteristics, performance and risk meaning that Funds are managed in line with client expectations and their legal and constitutional regulations. There have been no material updates in the risk management process since 31 March 2014.

The following paragraphs outline procedures undertaken to manage the market, credit and liquidity risks of the Funds. These are consistent with the risks that existed at 31 March 2014.

#### **Market Risk**

Market risk arises mainly from uncertainty about future values of financial instruments held specifically from price, currency and interest rate movements. It represents the potential loss the Funds might suffer through holding market positions in the face of market movements.

The global exposure will be calculated using an advanced risk measurement approach. The investment management team will use value-at-risk as an integral part of their ongoing monitoring and management of the Fund's market risk.

Each Fund's global exposure will be calculated daily by way of an absolute value-at-risk ("VaR") model using the Bloomberg Alpha Portfolio Analytics and Risk application. Bloomberg Alpha is used for all the required calculations and reporting for value at risk ("VaR"). VaR is a category of risk measures which, unlike market risk metrics such as the Greeks, duration and convexity, can be applied to all asset types and can cover all sources of market risk. VaR summarizes the maximum expected loss over a target horizon with a given level of confidence. VaR is a useful measure in that it can summarize the maximum loss in a single monetary value or a percentage of the overall portfolio. The Investment Manager will also be using Algorithmics system for VaR calculations and risk analyses. Analytics from Algorithmics are also used in Bloomberg Alpha. The VaR model will use the following quantitative standards:

- The confidence level should be 99%;
- The holding period should be 1 trading day; and
- The historical observation period should not be less than 1 year; however, a shorter observation period may be used if justified, for example, as a result of significant recent changes in price volatility.

There are three popular approaches for calculating VaR, namely Historical Simulation, analytical Variance-Covariance method and Monte Carlo Simulation. The investment management team uses the simple yet powerful approach of the historical simulation method which assumes that historical return distribution is a good representation of future returns. This method is one of the most reliable methods as it requires making the minimum number of assumptions. It also incorporates the volatilities and correlations explicitly by using the real market returns. As the VaR reports generated by Bloomberg Alpha are based on 99% confidence interval and 1 day holding period, the 20% 20-day limit is scaled down according to appropriate factors. The absolute 1-day 99% VaR limit is 20% / sqrt(20) = 4.47%.

In case the VaR for certain holdings does not get calculated by the system due to data errors or modelling limitation, the Risk Management Team will assess the VaR impact of those holdings and incorporate that figure as an add-on to the VaR. This approach may ignore possible diversification benefits, and will provide a conservative VaR level for the portfolio.

Stress testing will be performed on a monthly and as required basis. Back testing results will be recorded daily and results analysed quarterly or semi-annually. The data in the VaR model is updated on a daily basis and contains one year's market data.

## 9. Risk Management Policies And Procedures (continued)

#### **Market Risk (continued)**

Bloomberg Alpha is used for stress testing to evaluate the market risk inherent in the portfolio under abnormal market conditions. The risk methodology used in stress tests is similar to the one used in calculating VaR. The portfolio Profit and Loss (P&L) or % return is generated by calculating a projected portfolio market value, based on a change in Risk Factors. To generate the market value, a "Full Valuation Methodology" is used to theoretically value every security within the Fund or the sensitivities to rates and spreads are used to assess the impact of larger market moves.

Since VaR cannot incorporate all possible scenarios, stress testing helps capture sudden and dramatic changes in the portfolio's value given atypical market circumstances. Stress testing is utilised monthly and on an ad hoc basis. Daily monitoring of the sensitivities to interest rates, FX and credit spreads gives a better picture of how the portfolio might react to sudden market moves.

#### Some limitations of VaR are:

- the models are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive (in the case of probability-based methods, such as VaR, profits and losses are almost certain to exceed the reported amount with a frequency depending on the confidence interval chosen); and
- future market conditions could vary significantly from those experienced in the past.

The tables below for 31 March 2015 and 31 March 2014 indicate the VaR of the Fund's financial instruments, measured as the potential one business day loss in value from adverse changes in market rates, with a 99 percent confidence level.

#### For the year ended 31 March 2015

	1-Day 99%	Min	Max	Average	VaR
Portfolio	, VaR	VaR	VaR	VaR	Limit
Lazard Emerging Markets Bond Fund	0.77%	0.57%	1.14%	0.79%	4.47%
Lazard Emerging Markets Local Debt Fund	1.53%	0.91%	1.65%	1.29%	4.47%
Lazard Emerging Markets Total Return Debt Fund	0.49%	0.30%	0.92%	0.53%	4.47%
Lazard Emerging Markets Allocation Fund	1.17%	0.90%	1.42%	1.12%	4.47%
Lazard Emerging Markets Debt Blend Fund	0.99%	0.61%	1.10%	0.83%	4.47%
Lazard Opportunities Fund	1.10%	0.22%	4.22%	0.94%	4.47%
Lazard Global Hexagon Equity Fund (VaR since 12-01-2013)	1.18%	0.47%	2.87%	1.32%	4.47%

#### For the year ended 31 March 2014

	1-Day 99%	Min	Max	Average	VaR
Portfolio	VaR	VaR	VaR	VaR	Limit
Lazard Emerging Markets Bond Fund	1.10%	0.47%	1.46%	1.05%	4.47%
Lazard Emerging Markets Local Debt Fund	1.60%	0.84%	1.70%	1.42%	4.47%
Lazard Emerging Markets Total Return Debt Fund	0.57%	0.18%	1.06%	0.61%	4.47%
Lazard Emerging Markets Allocation Fund	1.36%	1.16%	1.70%	1.34%	4.47%
Lazard Emerging Markets Debt Blend Fund	1.08%	0.24%	1.22%	0.96%	4.47%
Lazard Opportunities Fund	1.45%	0.41%	1.46%	0.94%	4.47%
Lazard Global Hexagon Equity Fund (VaR since 12-01-2013)	1.34%	0.79%	1.47%	1.07%	4.47%

The average level of leverage figures provided below are calculated as the sum of the absolute value of notionals of the derivatives used as is required by the UCITS Regulations. This figure does not take into account any netting and hedging arrangements that the Funds may have in place at any time even though these netting and hedging arrangements are used for risk reduction purposes. As these netting and hedging arrangements, if taken into account, may reduce the level of leverage, this calculation may not provide an accurate measure of the Funds' actual leverage position.

## 9. Risk Management Policies And Procedures (continued)

#### **Market Risk (continued)**

Below is the daily average level of leverage for each Fund during the one year period ending 31 March 2015 and 31 March 2014.

#### Level of leverage

Fund Name	Average 31 March 2015	Average 31 March 2014
Lazard Emerging Markets Bond Fund	98%	98%
Lazard Emerging Markets Local Debt Fund	158%	168%
Lazard Emerging Markets Total Return Debt Fund	196%	182%
Lazard Emerging Markets Allocation Fund	126%	122%
Lazard Emerging Markets Debt Blend Fund	107%	114%
Lazard Opportunities Fund	381%	281%
Lazard Global Hexagon Equity Fund	380%	316%

#### (i) Market Price Risk

Market price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. The Funds are exposed to market price risk arising from its investments in securities. By diversifying the portfolio, the risk that a price change of a particular investment will have a material impact on the Funds is controlled. The Investment Manager manages the Funds' market risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy. The core philosophy of total performance measurement entails the active management of return, risk and cost. Relative-to-benchmark risk is controlled through the construction of diversified portfolios where exposures to certain market features (such as capitalisation or industry) are limited. As at 31 March 2015 and 31 March 2014 all of the securities (excluding derivatives) were designated at fair value through profit or loss.

Refer to the Portfolio of Investments on pages 70 to 98 for details of the fair value of the securities held on each Fund.

#### (ii) Foreign Currency Risk

The Funds may invest in securities denominated in currencies other than its functional currency (or, indeed, the currency of the investor). Furthermore, the Funds may invest in forward foreign currency exchange contracts in currencies for the purpose of implementing investment views as well as hedging. Consequently, the Funds are exposed to risks that the exchange rate of its reporting currency relative to other currencies may change in a manner that has an adverse effect on the value of the portion of the Funds' assets that are denominated in currencies other than its own currency. Currencies may also move in such a way as to cause losses on currency forward foreign currency exchange contracts.

For portfolios in which currency risk is hedged out, the currency risk is managed by regular rebalancing of the forward foreign currency exchange contracts to maintain zero (or close to zero) currency exposure. For those portfolios for which currency exposure is a critical source of return, exposures are managed relative to the appropriate benchmark. For other portfolios, there is no explicit currency-management policy.

The tables immediately below provide the exposure to different currencies as at 31 March 2015 and 31 March 2014:

Lazard Emerging Markets Bond Fund	2015 Net Monetary Assets USD	Lazard Emerging Markets Bond Fund	2014 Net Monetary Assets USD

#### (iii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in prevailing interest rates. The Funds are exposed to interest rate risk through its investments in securities with fixed and floating rates of interest, held within the Funds and their respective cash balances. The Investment Manager manages the Funds' interest rate risk on a daily basis in accordance with the respective Fund's investment objective, policies and core philosophy.

The interest rate profile of the financial assets and liabilities of the Funds at 31 March 2015 and 31 March 2014 was as follows:

2015	Up to 1 year	1 - 5 years	Over 5 years	Non-Interest Bearing	Total

#### **Credit Risk**

Credit risk is the risk that the counterparty or issuer to a financial instrument will fail to discharge an obligation or commitment that it has entered into with a Fund. The Funds' main credit risk concentrations arise from trading equity and debt securities, collective investment schemes and FDIs in addition to cash balances held at the Custodian. Refer to the Portfolio of Investments on pages 70 to 98 for details of the monetary values relating to the above.

All transactions involving transferable securities are settled upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet their obligations.

The tables below detail the Portfolio of Investments by rating category for the Funds which invest in fixed-income securities and money market instruments as at 31 March 2015 and 31 March 2014:

2015	Lazard Emerging Markets Bond Fund	Lazard Emerging Markets Local Debt Fund	Lazard Emerging Markets Total Return Debt Fund	Lazard Emerging Markets Allocation Fund
	% of Investments	% of Investments	% of Investments	% of Investments

C rating	2.49	-		
No rating	29.07	88.01		
	100.00	100.00		

Lazard Global Hexagon Equity Fund is not included in the above tables as the Fund comprises solely of securities that do not have a credit rating.

\* Moody's credit rating.

Substantially all of the cash and securities held by the Funds are held via State Street Custodial Services (Ireland) Limited (the "Custodian"), except for the financial derivative instruments that are held with counterparties as disclosed on the Portfolio of Investments. State Street Bank and Trust Company act as the global sub-custodian for State Street Custodial Services (Ireland) Limited.

While cash held by the global sub-custodian and the Custodian is identifiable as belonging to the Funds, the Funds will be exposed to the credit risk of the financial institution where cash is deposited. In the event of insolvency of the financial institution, the Funds will be treated as a general creditor of the financial institution in relation to cash holdings of the Funds.

In circumstances such as the insolvency of a sub-custodian or registrar, or retro-active application of legislation, the Funds may not, in all cases, be able to establish title to investments made and may suffer losses as a result. The Funds may find it impossible to enforce their rights against third parties. In addition, as the Funds may invest in markets where custodial and/or settlement systems are not fully developed, there is a transaction and custody risk involved in dealing in such markets. In certain circumstances, a Fund may not be able to recover some of its assets. Such circumstances may include any acts or omissions or the liquidation, bankruptcy or insolvency of a sub-custodian, retroactive application of legislation and fraud or improper registration of title. The costs borne by a Fund in investing and holding investments in such markets will generally be higher than in organised securities markets.

The Funds' securities are always separately identified on the accounting records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved. Thus in the event of insolvency or bankruptcy of the Custodian, the Funds' assets are segregated and protected and this further reduces counterparty risk.

## 9. Risk Management Policies And Procedures (continued)

#### **Credit Risk (continued)**

Bankruptcy or insolvency by the Custodian may cause the Funds' rights with respect to the cash and the securities held by the Custodian to be delayed or limited. The Funds monitor their risk by monitoring the credit quality and financial position of the Custodian that the Funds use. The long term credit rating of the parent company of the Custodian and Global Sub-Custodian, State Street Corporation, is A1 (31 March 2014: A1). The Custodian has a general lien in the normal course of business over the assets of the Funds.

The extent of the Funds' exposure to credit risk in respect of the financial statements approximates the carrying value as recorded in the Funds' Balance Sheet on pages 21 and 22. There were no past due or impaired assets as of 31 March 2015 and 31 March 2014.

#### Counterparty/Issuer Risk

The Funds are exposed to a credit risk to parties with whom they trade and will bear the risk of settlement default. Counterparty/issuer risk is monitored and managed by a formal counterparty or issuer exposure management program within the Investment Manager. The Investment Manager's approved list of counterparties is generally limited to the most highly rated and recognised dealers in their sectors. The Investment Manager performs ongoing monitoring of this list. Counterparty/issuer risk is monitored on an ongoing basis in the following manner:

- Approved broker selection the trading system only permits trading with approved brokers. New brokers are added, subject to
  a formal review process that includes a review of the broker's creditworthiness, financial strength, ability to enter into legally
  enforceable arrangements and standing in the financial community.
- Broker monitoring performed through a variety of ongoing activities, including the assessment of certain regulatory filings and financial statements.
- · Measurement and monitoring of counterparty or issuer trade exposure a daily review of outstanding positions is performed.

A Funds is exposed to a credit risk on the over the counter ("OTC") counterparties with whom it trades, that these counterparties may not perform their obligations and that settlement of transactions may not occur. All OTC counterparties must meet the following criteria as set out in the UCITS regulations namely:

- (i) A credit institution in accordance with UCITS Notices, or
- (ii) Have a minimum credit rating of A2 or equivalent, or in the opinion of the Investment Manager, an implied credit minimum rating of A2 or equivalent.

Exposures to individual counterparties are limited to 10% of Net Asset Value in the case of (i) above and 5% of Net Asset Value in the case of (ii) above.

The Lazard Opportunities Fund holds a total return swap which can contain (but not exclusively) global convertible and corporate securities (equity and debt, including fixed and/or floating rate investment grade, high-yield and distressed corporate fixed income securities); exchange-traded funds ("ETFs"); global equities, government securities, exchange traded notes ("ETNs"); interest rates; global foreign currencies, 144A securities and Regulation S securities, contracts for differences on equity securities and equity indices. The risk factors associated with this Fund and the total return swap are included in the prospectus supplement. Deutsche Bank AG acts as counterparty to the total return swap. On a daily basis, margin is posted between the fund's cash account and the counterparty to ensure that the fund's risk exposure to the counterparty (caused by any profit and loss on the swap) is reduced to the extent required by the Central Bank or the UCITs regulations.

Cash collateral is held with Bank of America Corporation, Barclays Bank Plc and JP Morgan Chase and Company. Counterparty cash received by a Fund as collateral for financial derivative instrument transactions is recorded as an asset on the Balance Sheet within "Broker cash held as collateral for financial derivative instrument transactions" and a related liability to repay the collateral is disclosed within "Broker cash due to counterparties for financial derivative instrument transactions". Non cash collateral does not form part of the Net Asset Value of the Fund and is recorded at the base of each relevant Portfolio of Investments for reference purposes only (please refer to page 92 on the Portfolio of Investments for Lazard Global Hexagon Equity Fund).

Cash is also deposited by or on behalf of the Funds for initial margin purposes with brokers for options and open futures contracts, this cash is held with Deutsche Bank AG at the year end and is subject to the credit risk of Deutsche Bank AG.

## 9. Risk Management Policies And Procedures (continued)

#### Counterparty/Issuer Risk (continued)

Investments pledged by the Funds as collateral are recognised at fair value in the relevant Fund's Portfolio of Investments and such investments are referenced accordingly at the base of the Portfolio of Investments. See the following for details of OTC counterparty exposure for the Funds as at 31 March 2015 and 31 March 2014.

<sup>\*</sup> Moody's credit rating.

The Funds have an ISDA agreement and Credit Support Annex in place with all the counterparties. The Portfolio of Investments includes details of the open forward foreign currency exchange contracts and the counterparties as at the year end.

As authorised by the Directors, Lazard Asset Management LLC, in its capacity as investment manager to the Company and as agent for the relevant Funds, adhered to the ISDA 2013 EMIR Portfolio Reconciliation, Dispute Resolution and Disclosure Protocol (the "Protocol") on 15 September 2013 in relation to non-centrally cleared OTC derivatives, including FX forwards. As of the same date, the Company also became an adherent to the Protocol in its own right. (All counterparties to non-centrally cleared OTC derivatives held by the Funds are also adherents to the Protocol).

<sup>\*\*</sup> Deutsche Bank AG is the counterparty to the options. Bank of America Corporation, Barclays Bank Plc and JP Morgan Chase and Company are the counterparties to the credit default swaps. Deutsche Bank AG is the counterparty to the open futures contracts and the equity basket total return swap held on Lazard Opportunities Fund. JP Morgan Chase and Company are the counterparty to the contracts for difference on Lazard Global Hexagon Equity Fund. Please see the base of the relevant Portfolio of Investments for the counterparty details relating to the open forward foreign currency exchange contracts.

<sup>\*\*\*</sup> The net exposure represents the unrealised of the mark-to-market value with the counterparty as at year end.

## 9. Risk Management Policies And Procedures (continued)

#### **Liquidity Risk**

The Funds' assets comprise mainly realisable securities which can be readily sold. The main liability of the Funds is the redemption of any shares that investors wish to sell. Shareholders have the right to require the Funds to redeem their shares in the Funds on any business day subject to restrictions set out in the prospectus (Lazard Opportunities Fund and Lazard Global Hexagon Equity Fund are weekly dealing Funds). If total requests for redemption and/or switching on any dealing day for any Fund exceed 10% of the Net Asset Value of that Fund, each redemption or switching request in respect of Shares in such Fund may, at the discretion of the Directors, be reduced pro rata so that the total number of Shares of such Fund for redemption or switching on that dealing day shall not exceed 10% of the Net Asset Value of that Fund. Any redemption or switching request so reduced shall be carried forward to the next dealing day and effected in priority to subsequent redemption or switching requests on the following dealing day(s). The Funds have the ability to borrow in the short term to ensure settlement. No such borrowings have arisen during the years ended 31 March 2015 and 31 March 2014.

The Funds' financial liabilities due for payment within one month relate in the most part, to security purchases awaiting settlements, redemptions of redeemable participating shares and payment of expenses and bank overdraft interest. Details of these amounts where relevant, can be found in the Balance Sheet. There are no financial liabilities that fall due over 1 month except for the financial derivative instruments which are outlined on the Portfolios of Investments at 31 March 2015 or at 31 March 2014.

#### Fair values of financial assets and financial liabilities

All of the financial assets and financial liabilities of the Funds are held at market value, which equates to fair value as determined in accordance with the accounting policies in note 2.

#### **Fair Value Measurement**

FRS 29 Financial Instruments: Disclosures, requires enhanced disclosures about financial instruments carried at fair value and liquidity risk. Investments measured and reported at fair value are classified and disclosed in one of the following fair value hierarchy levels based on the significance of the inputs used in measuring its fair value:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the valuation date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are inputs other than quoted prices in active markets included within level 1 that are observable for the asset or liability, either directly or indirectly. Fair value is determined through the use of models or other valuation methodologies. Level 2 inputs include the following:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers, or in which little information is released publicly.
- c) Inputs other than quoted prices that are observable for the asset or liability (e.g. interest rate and yield curves observable at commonly quoted intervals, volatilities, prepayment speeds, loss severities, credit risks and default rates).
- d) Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs reflect the Company's own assumptions about how market participants would be expected to value the asset or liability. Unobservable inputs are developed based on the best information available in the circumstances, other than market data obtained from sources independent of the Company and might include the Company's own data.

An investment is always categorised as level 1, 2 or 3 in its entirety. In certain cases, the fair value measurement for an investment may use a number of different inputs that fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and is specific to the investment.

## 9. Risk Management Policies And Procedures (continued)

#### **Fair Value Measurement (continued)**

The following tables provide a breakdown of the financial instruments of each Fund by valuation category at 31 March 2015 and 31 March 2014:

Investments, whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities and exchange traded derivatives. The Funds do not adjust the quoted price for these instruments.

Financial instruments that do not have quoted market prices but are valued based on market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2, these include bonds and over-the-counter derivatives.

There were no level 3 securities held on the Funds during the years ended 31 March 2015 or 31 March 2014.

There were no movements of financial instruments between levels during the years ended 31 March 2015 or 31 March 2014.

## 10. Soft Commission Arrangements

In relation to Lazard Global Hexagon Equity Fund, the Investment Manager for the Company, in accordance with common market practice for investment managers, entered into dealing arrangements with brokers whereby part of the dealing commissions paid to them is used to discharge the cost of investment related services supplied to them by the broker or by third parties. These services may be either market research or be related to the execution of trades on behalf of clients.

The Investment Manager places business with these counterparties including transactions relating to the Lazard Global Hexagon Equity Fund's investments. The Investment Manager will endeavour at all times to obtain best execution on all transactions for all clients including the Fund, and is satisfied that these arrangements are of benefit to the Fund. For the other six Funds, there were no soft commission arrangements during the years ended 31 March 2015 or 31 March 2014.

## 11. Related Party Transactions

The authorised share capital of the Company was two Subscriber Shares of par value of £1.00 each. The two Subscriber Shares are held by the Manager and the Promoter. All material related party transactions with the Manager and Directors are included in Note 3 to the financial statements.

Michael Allen, Andreas Hübner and William Smith are full time executives of the Lazard Group as well as Directors of the Company. Michael Allen, Andreas Hübner and William Smith are not entitled to any Directors' fees.

Daniel Morrissey is a Director of the Company and is also a partner of William Fry (the Company's legal advisers). The partners of William Fry own Wilton Secretarial Limited (the "Secretary") and accordingly, Daniel Morrissey had a beneficial interest under the Companies Act, 1990 in legal and secretarial fees paid to William Fry and the Secretary amounting to USD 367,226 for the year ended 31 March 2015 (31 March 2014: USD 378,819).

### 11. Related Party Transactions (continued)

John Donohoe is a Director of the Company and is also a CEO and Principal of Carne Global Financial Services Limited who provide governance, directors support and MLRO (Money Laundering Reporting Officer) services to the Manager and the Company. There were payments made to Carne Global Financial Services Limited for governance, directors support and MLRO services of USD 46,519 for the year ended 31 March 2015 (31 March 2014: USD 58,306).

Michael Allen, William Smith, Daniel Morrissey, John Donohoe and Gavin Caldwell are all directors of the Manager.

As at 31 March 2015, the following entities held investments in Lazard Global Investment Funds plc:

Entity Name	Fund Name	Value	Currency	% of NAV of each Fund
LLTD1 S.A.R.L	Lazard Emerging Markets Bond Fund	11,289,218	USD	69.72
Lazard Group LLC	Lazard Emerging Markets Total Return Debt Fund	2,582,476	USD	0.25
Lazard Asset Management LLC	Lazard Emerging Markets Allocation Fund	14,720,679	USD	47.84
Lazard Japan Asset Management KK	Lazard Opportunities Fund	573,045,296	JPY	9.37
Lazard Asset Management Pacific Co	Lazard Global Hexagon Equity Fund	99,760	USD	0.07
Lazard Group LLC	Lazard Global Hexagon Equity Fund	2,552,098	USD	1.78

#### 12. Cross-Investments

Lazard Emerging Markets Allocation Fund held 51,372 shares (31 March 2014: 40,153 shares) in Lazard Emerging Markets Total Return Debt Fund and 30,000 shares (31 March 2014: Nil) in Lazard Emerging Markets Debt Blend Fund at the year end. As a result of the cross-investment by Lazard Emerging Markets Allocation Fund into the two respective Funds, it is the USD management class on each Fund that is being invested into, so therefore there are no fees charged to the assets attributable to this class.

Issues and redemptions of shares and the related realised gains and losses for the year ended 31 March 2015 and 31 March 2014 were:

31 March 2015	Lazard Emerging Markets Total Return Debt Fund	Lazard Emerging Markets Debt Blend Fund
	USD	USD
Opening cost	4,207,709	-

The above distributions were paid on behalf of the Shareholders of that class in the relevant Fund on 7 October 2013.

## 14. Significant Events During The Year

During the year ended 31 March 2015, the following classes were launched.

Fund Name	Share Class	Launch Date
Lazard Emerging Markets Total Return Debt Fund	CHF Hedged Institutional Accumulating Class	2 December 2014
Lazard Emerging Markets Allocation Fund	GBP Hedged Retail C Distributing Class	15 August 2014
Lazard Emerging Markets Debt Blend Fund	EURO Institutional Accumulating K Class	28 April 2014
	EURO Institutional Distributing K Class	22 October 2014
	CHF Hedged Institutional Accumulating Class	14 November 2014
	USD Management Class	20 February 2015
Lazard Opportunities Fund	USD Hedged Institutional Accumulating EA Class	2 May 2014
	YEN Hedged Institutional Accumulating Class	10 October 2014
Lazard Global Hexagon Equity Fund	USD Institutional Accumulating EA Class	16 May 2014

## 14. Significant Events During The Year (continued)

During the year ended 31 March 2015, the following classes were fully redeemed.

Fund Name	Share Class	Termination Date
Lazard Emerging Markets Total Return Debt Fund	USD X Class	13 February 2015
Lazard Opportunities Fund	USD Hedged Institutional Accumulating Class	16 January 2015
Lazard Global Hexagon Equity Fund	GBP Hedged Institutional Accumulating EA Class	12 September 2014

On 16 February 2015, updated supplements for all of the Funds were approved by the Central Bank, these were updated to reflect:

- a change in the valuation point on Lazard Global Hexagon Equity Fund;
- a change in the accrual of management fees on Lazard Opportunities Fund and Lazard Global Hexagon Equity Fund;
- a change in the settlement time on Lazard Emerging Markets Allocation Fund.

There were no other significant events during the year.

## 15. Significant Events Since The Year End

Distributions with an ex date during the financial year are included as a finance cost in the Profit and Loss Account. Dividends will not be paid in respect of any class of Share which is an accumulating class. Income and profits, if any, attributable to an accumulating Share class will be accumulated and reinvested in the relevant Fund on behalf of the Shareholders of that class and will be reflected in the Net Asset Value of the relevant accumulating Share class. Distributions were declared on the below share classes on Lazard Emerging Markets Local Debt Fund, Lazard Emerging Markets Total Return Debt Fund and Lazard Emerging Markets Allocation Fund in respect of the period from 1 October 2014 to 31 March 2015. These were paid on behalf of the Shareholders of that class in the relevant Fund on 9 April 2015 and details of these distributions are as follows:

Fund  Ex Date:		rd Emerging arkets Local Debt Fund	Lazard Emerging Markets Total Return Debt Fund		
31 March 2015	Amount USD	Distribution per Share	Amount USD	Distribution per Share	
USD Institutional Distributing Class	1,175,105	1.9937	-	-	
EURO Hedged Institutional Distributing Class	-	-	5,304,536	2.5270	
EURO Hedged Institutional Distributing B Class			3,453,970	2.0493	
GBP Hedged Institional Distributing Class	12,596	3.2659	-	-	
AUD Hedged Management Class	-	-	749,014	2.0096	

There were no other significant events since the year end.

## 16. Approval Of The Financial Statements

The financial statements were approved by the Directors on 29 June 2015.

#### **Lazard Emerging Markets Allocation Fund (continued)**

Portfolio of Investments as at 31 March 2015

The counterparties for the open forward foreign currency exchange contracts are:

Barclays Bank Plc

BNP Paribas SA

Citibank NA

HSBC Bank Plc

JP Morgan Chase and Company

Standard Chartered Plc

State Street Bank and Trust Company

UBS AG

#### **Abbreviations used**

ADR - American Depositary Receipt

GDR - Global Depositary Receipt

SDR - Special Drawing Right

Equities are primarily classified by the country of incorporation of the entity in which the Fund holds shares. Fixed income securities are primarily classified by the country of incorporation of the issuer for corporate fixed income securities and country of issuer for government type fixed income securities. Collective Investment Schemes are primarily classified by the country of domicile of the CIS.

The counterparty for the open forward foreign currency exchange contracts is State Street Bank and Trust Company.  $\begin{tabular}{ll} \hline \end{tabular}$ 

The counterparty for the contracts for difference is JP Morgan Chase and Company.

\* A portion of these securities is pledged as collateral in connection with the collateral requirements for the option and the contracts for difference held by the Fund. The amount of collateral that is pledged is USD 25,204,485.

#### **Abbreviations used**

ADR - American Depositary Receipt

Equities are primarily classified by the country of incorporation of the entity in which the Fund holds shares. Fixed income securities are primarily classified by the country of the Fund holds shares. Fixed income securities are primarily classified by the country of incorporation of the issuer for corporate fixed income securities and country of issuer for government type fixed income securities.

#### Statements of Major Changes in Investments (unaudited)

#### **Lazard Emerging Markets Bond Fund**

In accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, a statement of largest changes in the composition of the Portfolios of Investments during the reporting year is provided to ensure that shareholders can identify changes in the investments held by the Funds. These are defined as the aggregate purchases and sales of an investment (including maturities but excluding repurchase agreements, overnight discount notes and time deposits, which are employed chiefly as a means of seeking to ensure efficient portfolio management) exceeding 1.00% of the total value of purchases and sales for the year. At a minimum the largest 20 purchases and sales are listed.
