INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At all times, the UCITS is 60% exposed to at least one foreign equity market or to the equity markets of several countries, possibly including the French market.

The MF is index-based fund of the UCITS ETF type.

Terms of determination and allocation of amounts available for distribution:

Class of units C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

Management objective:

The MF's management objective is to replicate the MSCI India Net Total Return index (the "Benchmark Indicator"), listed in US Dollars (USD), regardless of its evolution, while insofar as possible minimizing the tracking error between the MF's performances and those of the Benchmark Indicator.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The benchmark indicator is the MSCI India Net Total Return index (net dividends reinvested), listed in US Dollars (USD) (the "Benchmark Indicator"). The Benchmark Indicator is an equity index calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator is made up exclusively of Indian equities (India) and retains the fundamental characteristics of the MSCI indices, i.e.: Adjustment of the stock market capitalization of the securities in the Benchmark Indicator on the basis of the float, and sector classification according to the GICS (Global Industry Classification Standard) classification.

The objective of the Benchmark Indicator is to represent 85% of the capitalization adjusted on the basis of the float, of each group of industries of the Indian market.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalization of the Indian market, while also reflecting the market's economic diversity.

The MSCI methodology and its calculation method entail the Benchmark Indicator being made up of a variable number of companies.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as the information on the composition and on the respective importance of components of the Benchmark Indicator will be available on MSCI website: www.mscibarra.com.

The monitored performance is that of the closing prices of the Benchmark Indicator. The Benchmark Indicator is weighted by market capitalisation.

Benchmark indicator revision

The Benchmark indicator is reviewed quarterly, in order to take into account changes affecting a stock's market capitalisation (number of securities and free float) or its classification by sector. The principal changes in a company's capital structure may be implemented in real time (merger or acquisition, large rights issues or IPOs).

The MSCI rules for Benchmark indicator revision are published by MSCI and are available on MSCI website: www.mscibarra.com.

The rebalancing frequency indicated above does not affect the cost of implementing the Investment strategy.

Benchmark Indicator publication

The official MSCI indices are calculated on a daily basis at closing prices using the official closing stock market prices for the constituent stocks. The Benchmark Indicator is also calculated in real time every banking day.

The Benchmark Indicator is available in real time via Reuters and Bloomberg.

Reuters code: .dMIIN0000NUS

Bloomberg code: NDEUSIA

The Benchmark Indicator's closing price is available on MSCI website: www.mscibarra.com.

In accordance with Regulation (EU) 2016/1011, the management company has a reference index monitoring plan which it uses within the meaning of the said Regulation.

MSCI is administrator of the Benchmark Index. In accordance with EU Regulation 2016/1011, the administrator must apply for approval/registration with the competent authority by 1 January 2020 at the latest.

Investment strategy:

1. Strategy employed

The MF will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the MF will reach its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to reach its investment objective. The objective of these swap contracts will be to exchange (i) the value of the MF's assets, which will consist of balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the Benchmark Indicator.

The securities in the MF's assets will notably be securities making up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small caps markets.

The securities basket held may be adjusted daily so that its value will be superior or equal to 100% of the Fund's net assets in most cases. Where necessary, the aim of this adjustment will be the neutralisation of the counterparty risk resulting from the future exchange contract described above.

As part of the management of its exposure, the MF can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit will be checked on each rebalancing date of the Benchmark Indicator, in application of the Benchmark Indicator's calculation method that limits the exposure to each of equities of a single issuing entity to 20%, and for which the calculation is carried out by the sponsor or the calculation agent of the Benchmark Indicator. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The MF may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including within the small cap markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
 - o Subordination to the main market indices or to the Benchmark Indicator,
 - o Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
 - o Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent).
- of diversification, notably:
 - o Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
 - o Geographical area,
 - o Sector.

The investment in undertakings for collective investment in transferable securities (“UCITS”) compliant with the Directive 2009/65/EC is limited to 10% of the assets of the MF. As part of these investments, the MF can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked. The manager will not invest in units or equities of AIF or other investment funds established on the basis of foreign laws.

When the MF receives securities as guarantee under the conditions and limits of this section’s paragraph 8 below, they will also constitute balance sheet assets received in full ownership by the MF, given that they are received by the MF in full ownership.

As part of a future optimisation of the MF’s management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The MF will use Index-linked swaps traded over the counter, thereby swapping the value of the MF’s assets (or of any other financial instrument or asset held by the MF, where appropriate) against the value of the Benchmark Indicator (in compliance with the description contained in this section’s paragraph 1 above).

As part of a future optimisation of the MF management, the manager reserves the right to use other instruments within the limits of the regulations, such as to achieve the management objective, for example including future financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be traded with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the “**Counterparty**”) will have no discretionary power regarding the composition of the MF’s portfolio, nor regarding the underlying assets of the future financial instruments.

- Maximum proportion of assets under management which may be the object of a Total Return Swap (TRS): 100% of the assets under management.
- Expected proportion of assets under management which may be the object of a Total Return Swap (TRS): up to 100% of the assets under management.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the MF may have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the MF may temporarily have recourse to borrowing.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary securities acquisition and/or sale operation.

8. Financial guarantees

In all cases in which the MF is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the MF’s use of forward swap contracts traded over the counter, the MF can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the MF in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the MF is totally neutralized.

Any financial guarantee received by the MF will be provided to the MF in full ownership and listed in the MF’s account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the MF’s assets.

Any financial guarantee received by the MF within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at the mark-to-market price at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty’s performances;

- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the MF's net asset value;
- (e) The MF's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Fund may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

- such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and
- such financial guarantees consists of at least six different issues of which none exceeds 30% of the MF's assets.

In compliance with the aforesaid conditions, the guarantees received by the MF can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The MF's management company will apply a margin to the financial guarantees received by the MF. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged. Guarantees received in cash shall, at the discretion of the manager, be either:

- (i) deposited with an enabled institution;
- (ii) invested in high-quality State bonds;
- (iii) used for reverse repurchase transactions, on the condition that such transactions are performed with credit institutions which are subject to prudential regulation and on the condition that the UCITS may at any time withdraw the total amount of the liquidity, taking into account accrued interest;
- (iv) invested in short-term money mutual funds, as they are defined in the guidelines for a common definition of European money mutual funds.

Reinvested cash financial guarantees must be diversified, in compliance with the applicable requirements for non-cash financial guarantees.

Risk profile:

The bearer's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the MF, the bearer is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the incomes.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of capital loss. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to an index with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the MF's underlyings.

- Liquidity risk (primary market)

Should the MF (or one of its counterparties for future financial instrument ("FFI")) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the MF could be negatively affected.

Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of units.

- Liquidity risk on a place of listing

The MF's share price can deviate from its indicative net asset value. The liquidity of the MF's units on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the MF's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Counterparty risk

The MF is exposed to the risk of bankruptcy, payment default or any other type of default of every counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of FFI traded over-the-counter with Société Générale or with any other counterparty. In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the MF's assets per counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The MF will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the MF's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the MF's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Risk related to the exposure to Emerging markets

The MF's exposure to emerging markets results in a greater risk of loss that would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the Benchmark Indicator.

- Risk that the management objective may only be partially achieved

Nothing guarantees that the management objective will be achieved. Indeed, no asset or financial instrument will allow an automatic and continuous replication of the Benchmark Indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to achieve its investment objective, the MF uses FFI traded over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment or early termination of the FFI transaction, which could affect the MF's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the MF is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the MF's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the MF's underlyings can affect the MF's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the MF (and/or to its counterparty in the FFI), the MF's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the MF is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the units may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the MF's underlyings, the MF's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the units.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of MF units. The calculation of the MF's net asset value can also be affected.

If the event persists, the MF's manager will decide on measures having to be adopted, which can have an impact on the MF's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by the supplier of the index,
- iii) The supplier of the Benchmark Indicator is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to the formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the MF at a reasonable cost.
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components traded over-the-counter (such as bonds, for example) become non-liquid.

- Securities transaction risk

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the MF (and/or in a valuation of the ST by the MF's counterparty in a future financial instrument), the MF's net asset value may be affected, notably should the actual treatment of the ST by the MF differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the class of units C- (EUR/USD)

The abovementioned class of units is exposed to an exchange risk to the extent that it is listed in a currency other than that of the Benchmark Indicator. The net asset value of the abovementioned class of units can therefore decrease due to fluctuating exchange rates even though the value of the Benchmark Indicator has increased.

- Exchange risk linked to the Benchmark Indicator

The MF is exposed to the exchange risk insofar as the underlying securities making up the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the MF.

- Legal risk

The mutual fund may bear a legal risk related to the conclusion of any Total Return Swap contract (TRS) as laid down in Regulation (EU) 2015/2365.

Subscribers concerned and typical investor profile:

The MF is "open to any subscriber".

An investor subscribing to this MF wishes to obtain an exposure to the Indian equities market.

The amount that it is reasonable to invest in this MF depends on your personal situation. To determine this amount, you must take into account your personal wealth and/or estate, cash requirements at the present and for five years, but also your desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this MF's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers. The minimum recommended investment term is greater than 5 years.

Indications on the tax treatment:

Investors should take note that the following information constitutes only a general summary of the tax regime applicable to an investment in a French MF, under the current French tax legislation. Investors are therefore requested to study their personal situations with their usual tax advisers.

France:

The MF can serve as the support for a life insurance contract listed in units of account.

1. On the level of the MF

In France, the co-ownership status of MFs means that they are automatically exempt from corporate tax; by nature, they therefore benefit from a certain degree of transparency. As such, the incomes collected and generated by the MF through its management are not taxable at the level of the MF itself.

Abroad (in countries in which the MF is invested), capital gains on the sale of foreign transferable securities and foreign income received by the MF as part of its management may, if relevant, be subject to tax (generally in the form of a withholding tax). In certain limited cases, the foreign taxation can be reduced or cancelled in the presence of tax agreements that may be applicable.

2. On the level of the bearers of MF units**2.1 Bearers residing in France**

The sums distributed by the MF to French residents as well as the capital gains or losses on transferable securities are subject to the applicable taxation. Investors are invited to study their personal situations with their usual tax advisers.

2.2 Bearers not residing in France

Subject to any applicable tax agreements, the amounts distributed by the MF may, in certain circumstances, be subject to a levy or withholding tax in France.

Moreover, the capital gains realised on the purchase/sale of the MF's units are generally tax exempt. Bearers residing outside of France will be subject to the provisions of the tax legislation applicable in their country of residence.

Information on obligatory and automatic exchange of tax information

The management company is liable to collect and transmit information on subscribers to shares in the mutual fund to the competent tax authorities, for the sole purpose of compliance with article 1649 AC of the General Tax Code and Council Directive 2014/107/EU of 9 December 2014, amending Directive 2011/16/EU concerning automatic and obligatory exchange of tax information.

In this regard, subscribers have the right to access, rectify and delete information held concerning them by communicating with the financial institution in compliance with the "IT and liberties" [Data Processing] Act of 06 January 1978, but are also obliged to provide the necessary information for declarations, at the request of the financial institution.

Information relative to the "FATCA" law

France and the United States have signed a Model I intergovernmental agreement ("IGA") for the implementation in France of the American law known as the "FATCA" law that targets tax evasion amongst American taxpayers holding financial assets abroad. The expression "American taxpayers" refers to a natural person who is an American citizen or resident, a partnership or company created in the United States or by virtue of American federal law or of the laws of one of the American States, or a trust if (i) a court located in the United States has, pursuant to the law, the power to issue orders or decisions substantially relating to all questions relative to the trust's administration and if (ii) one or more American taxpayers has a right of control over all of the trust's substantial decisions, or over the estate of a deceased person who was a citizen or resident of the United States.

The MF has been registered as a "reporting financial institution" with the American tax authorities. As such, the MF is required to provide the French tax authorities, for 2014 and subsequent years, with information regarding certain holdings or sums paid to certain American taxpayers or to non-American financial institutions considered as non-participants in the FATCA that will be the subject of an automatic information exchange between the French and American tax authorities. Investors will be required to certify their FATCA status to their financial intermediary or to the management company, as relevant.

As a result of the MF's application of its obligations under the IGA as implemented in France, the MF will be considered as complying with the FATCA and should be exempt from the withholding tax established by the FATCA on certain revenues or proceeds from American sources.

For investors whose units are held through an account holder located in a jurisdiction that has not signed an IGA, it is recommended that they should consult this account holder in order to be informed of its intentions with regard to the FATCA. Moreover, certain account holders may be required to collect additional information from investors in order to comply with their obligations under the FATCA or of the country in which the account is held. Also, the scope of the obligations under the FATCA or an IGA can vary according to the account holder's jurisdiction. Investors should therefore check with their usual tax advisers.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The CIU complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.
- Approval date by the AMF (French Financial Markets Authority): 1 September 2006.
- Fund creation date: 25 October 2006.

Activity report

The net asset value of the unit C-EUR of the LYXOR MSCI INDIA UCITS ETF MF shows an evolution of 3.86% over the fiscal year and was equal to EUR 15.7568 on 28/02/2018, resulting in the fund's performance being equal to 75.47% since inception.

The net asset value of the unit C-USD of the LYXOR MSCI INDIA UCITS ETF MF shows an evolution of 19.21% over the fiscal year and was equal to USD 19.2186 on 28/02/2018, resulting in the fund's performance being equal to 59.62% since inception.

The fund replicates the performance of the MSCI Emerging Markets India Ne index, listed in US dollars (USD), representative of the performance of market of large and mid-caps, listed in India.

This index has shown an evolution of 21.17% over the fiscal year. As the C-EUR class is not valued in the index currency, the evolution of its net asset value is subject to an exchange risk. Over the fiscal year, the EUR has increased by 14.78% against the USD.

This gap between the annual performance of the UCITS and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees of the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI Emerging Markets India Ne index, the MF will reach its management objective using the indirect replication method which means that it will enter into one or more OTC swap contracts enabling it to reach its investment objective. The objective of these swap contracts will be to exchange (i) the value of the MF's assets, which will consist of balance sheet assets (excluding any securities received as guarantees), for (ii) the value of the securities that underlie the MSCI Emerging Markets India Ne index.

The equities in the MF's assets will notably be securities making up the MSCI Emerging Markets India Ne index, as well as other European equities, from all economic sectors, listed on all markets, including the small caps markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 28/02/2018, the tracking error reached the level of 0.0298% for the MF. The level of the target tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the year.

The counterparty for the Index-Linked Swaps obtained by the fund is: Société Générale.

The figures referring to past performance relate to past periods and are not a reliable indicator of future results.

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the Financial Markets Authority General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the CIU

The management company's method for measuring the overall risk of the CIU: the method chosen is the commitment method.

ESG criteria

Pursuant to articles L533 22-1 and D533-16-1 of the Monetary and Financial Code.

1. Description of Environmental, Social, and Governance (ESG) criteria (reference II-2°)

Lyxor is a signatory to the United Nations Principles for Responsible Investment (UN PRI) and has adopted a responsible investment policy that sets out the values and practices established by our organization to integrate environmental, social and governance ("ESG") in its investment solutions. Lyxor's SRI Policy is available under the website Lyxor.com and is revised each year.

For this fund the SRI Policy includes the following key areas:

a) Description of the nature of the main criteria considered for ESG issues and the reasons for choosing them (reference III-1°-a)

The fund applies exclusions of the firms that are to be excluded in application of the Defense Sector Policy, due to their involvement in activities linked to prohibited or controversial weapons (anti-personnel mines, cluster bombs, depleted uranium weapons).

b) Description of the general information used for the analysis of issuers on criteria relating to compliance with ESG issues (reference III-2°)

The explicit inclusion of ESG risks and opportunities into traditional financial analysis and investment decisions must be based on a systematic process and appropriate research sources. The integration process focuses on the potential impact of ESG issues on company financials (positive and negative), which in turn may affect the investment decision.

LYXOR is using a variety of external information sources, including the following extra-financial rating agencies:

- ISS Ethix to identify companies that are considered in breach of its Defence Policy,
- Sustainalytics to identify companies that are associated with serious and repeated breaches of norms and standards adopted by LYXOR and/or mandatory requirements related to controversial sectors and products,
- ISS Proxy voting adviser for research on the governance performance of companies and for voting recommendations. These recommendations are based on the LYXOR's Voting Policy,
- MSCI and Sustainalytics ESG research to integrate ESG issues,
- Vigeo-Eiris to develop its ESG analysis and rating methodology applied to unlisted SME / ETI assets.

Each partnership has been put in place following a rigorous selection based on request for proposals and due diligence processes addressing specific topics.

c) Description of the methodology of the ESG analysis and the results (reference III-3°a)

More than 80 listed and non-listed securities in nearly 20 countries around the world are prohibited.

Specific controls are performed (pre & post trade) within the Risk department, in total independence of operational teams. All breaches are notified to Funds Managers for immediate resolution. The post trade control is on NAV frequency basis.

For the swap based vehicles, the financial exposition via the derivative product is reported on a monthly basis.

d) Description of how the results of the analysis on ESG issues are integrated in investment policies (Reference II-2°-d)

The exclusion described above is applied to 100% of the fund holdings.

2. Description of integration of climate risks and the contribution to the energy transition (Reference II-2°)

Lyxor extends gradually an ESG & Carbon rating capacity with a proprietary approach for its vehicles.

In addition to carbon footprint, in regard with the communication on how climate risk are taken into account and the contribution of a portfolio to the energy and ecological transition and its alignment with the international goal of limiting global warming to 2 degrees by 2100, we have decided to report whenever it is possible the following metrics calculated at portfolio level:

- Portfolio Carbon Footprint
- Portfolio exposure to transition risk
- Portfolio exposure to issuers offering environmental solutions

Measuring the GHG emissions of its investments is seen as a first step. This will provide investors with an indication of their current financed emissions.

ESG Measurement methodology (Corporate & Government issuers)

The underlying notes of the environmental, social and governance pillars aim to establish the risk Companies. They assess the financial risks associated with exposure to ESG factors and their management. The risk scale ranges from 0 (high risk) to 10 (low risk).

Security scores at the Theme and ESG Pillar level are absolute and comparable across all industries.

For Sectors and Themes, the portfolio-level score is based only on the subset of securities that have relevant scores. Security weights of the subset are rebalanced to equal 100%.

The weightings of the three criteria, Environmental, Social, and Governance, take into account the specific issues of each sector.

For Corporate: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Climate Change, Natural Capital, Pollution & Waste, Env Opportunities
- Social: Human Capital, Product Liability, Stakeholder Opposition, Soc Opportunities
- Governance; Corporate Governance, Stakeholder Opposition, Soc Opportunities

For Government: Metrics exposure and management of Key ESG issues cover the following themes:

- Environment: Env Externalities, Natural Resources
- Social: Human Capital, Economic Environment
- Governance; Financial Governance, Political Governance

Source : The Company carbon footprint data are provided by the MSCI agency

Portfolio Exposure to ESG Controversies

Shows the percentage of portfolio securities with Red, Orange, Yellow and Green flagged ESG controversies.

The severity of the assessment through color-coded alerts :

- Red indicates involvement in one or more very severe controversies
- Orange indicates involvement in controversies just shy of the criteria for a red flag
- Yellow indicates significant controversy
- Green indicates no involvement in any major ESG controversies

Red Flag	2%
Orange Flag	10%
Yellow Flag	42%
Green Flag	46%

Portfolio Carbon Footprint as of 2018-02-28

Carbon Emissions tons CO2e/\$M invested	Carbon Intensity tons CO2e/\$M sales	Weighted Average Carbon Intensity tons CO2e/\$M sales	Portfolio rated by weight	100%
359	734	654	Scope 1 reported (vs estimated)	38%
			Scope2 reported (vs estimated)	41%
			Scope 1 & 2 estimations are based on MSCI methodology	

Carbon Measurement methodology

Definition : The carbon footprint aims to account for the greenhouse gas emissions produced by the companies held in portfolio.

Carbon Emissions tons CO2e/\$M invested : It measures the volume of greenhouse gas (GHG) emissions that the portfolio is responsible for, in proportion to its share capital.

Carbon Intensity tons CO2e/\$M sales : An intensity metric that shows the fund's proprietary share of the portfolio companies' carbon dioxide emissions relative to the fund's proprietary share of the portfolio companies' income shall be used when reporting the equity portfolio's carbon footprint.

Weighted Average Carbon Intensity tons CO2e / \$M sales: The Weighted Average Carbon Intensity is the sum product of the portfolio weights and Carbon Intensities.

Scope : Carbon emissions are separated into scope 1 + scope 2 emissions.

Scope 1 emissions: direct greenhouse gas emissions(combustibles, refrigerants, fuel consumption of owned vehicles).

Scope 2 emissions: indirect emissions (electricity, generated steam).

Source : The Company carbon footprint data are provided by the MSCI agency.

Please note that while each of the metrics is applicable to equity portfolios, the Portfolio-level Carbon Emissions (#1), Total Carbon Emissions (#2), and Carbon Intensity metrics (#3), are not applicable to fixed income and multi-asset class portfolios. These metrics utilize an ownership methodology that is not relevant to bond holders. The Weighted Average Carbon Intensity metric (#4), is applicable to both equity and corporate fixed income/ multi-asset class portfolios.

Portfolio exposure to transition risk

The data below represents portfolio exposure to issuers with fossil fuel reserves (in terms of the weight of the portfolio), which may be stranded in the context of a low carbon transition. Thermal coal reserves are the most carbon intensive and therefore the most at risk.

The brown area is defined as the percentage of MWh generated from fossil fuels or Share of fossil fuel energies or share of the portfolio invested in fossil fuel extraction (to reflect products and services exposed to fossil fuels).

Weight of the portfolio

Fossil Fuel Reserves	28%
Thermal Coal	5%
Natural Gaz	24%
Oil	24%

Portfolio exposure to issuers offering environmental solutions

The data represent the portfolio's exposure to issuers offering environmental solutions (in terms of the weight of the portfolio) and the type of solutions proposed: energy efficiency, alternative energy, sustainable water, pollution prevention or sustainable construction. These emitters are likely to benefit from a low carbon transition.

The green area is defined as the percentage of outstandings invested in companies whose activity contributes to the fight against climate change (to reflect eco-solutions / green products)

Issuer with a revenue dedicated to environmental solutions between:

0-19.9%	24%
20-49.9%	1%
50-100%	0%

Breakdown of the fixed and variable compensation for the financial year

The compensation beneficiaries represent a group of 74 persons, whose time is divided between all of the vehicles managed by Lyxor International Asset Management.

Lyxor International Asset Management	# employees	€fixed compensation	€variable compensation	€total
Total population	74	6,066,070	3,896,435	9,962,505
Regulated population	20	1,813,532	1,906,435	3,719,967
Of which management teams	15	1,123,932	713,500	1,837,432
Of which other regulated people	5	689,600	1,192,935	1,882,535

No carried interest was paid during the financial year.

Compensation policy and practices

The compensation paid by Lyxor International Asset Management consists of fixed compensation and can, if allowed by economic conditions, include a variable component in the form of a discretionary bonus. This variable compensation is not related to the performance of the managed vehicles (no profit-sharing in the capital gains).

Lyxor International Asset Management applies the Société Générale Group remuneration policy. For LAM, this Group policy takes into account the provisions related to remuneration listed in directives 2011/61/EU of the European Parliament and of the Council of 8 June 2011 (hereinafter "AIFM Directive") and 2014/91/EU of the European Parliament and of the Council of 23 July 2014 (hereinafter "UCITS V Directive"), applicable to the sector of fund managers.

Within this framework, Lyxor International Asset Management has notably implemented, for all employees receiving partly deferred variable compensation, a mechanism for the exposure of part of this variable compensation to an index made up of several investment funds representing the activity of the Lyxor group, in order to ensure that the interests of employees are aligned with those of investors.

The Lyxor International Asset Management remuneration policy has no impact on the risk profile of the FIA or UCITS, and serves to cover all of the conflicts of interest related to the financial management of the vehicles.

The details of the updated remuneration policy are available on the following Internet site:

<http://www.lyxor.com/fr/menucorporate/nous-connaître/mentions-reglementaires/>

4. Data on the reuse of guarantees (collateral).

Financial guarantees received in a non-cash form shall not be sold, reinvested or pledged.

5. Retention of the guarantees received by the collective investment undertaking in connection with securities financing operations and total return swaps.

Number of custodians	1
1 Name	SOCIETE GENERALE
Amount	28,849,693.51

6. Retention of the guarantees provided by the collective investment undertaking in connection with securities financing operations and total return swaps.

The custodian, Société Générale S.A., exercises three types of responsibility; respectively, the monitoring of the regularity of the decisions of the management company, the monitoring of cash flows of the CIU and the custody of the assets of the CIU.

Société Générale S.A also works with a limited number of sub-custodians, selected according to the most rigorous quality standards, including the management of possible conflicts of interest which may arise from these appointments. The Custodian has established an effective policy for identification, prevention and management of conflicts of interest, in compliance with national and international regulations as well as international norms.

7. Data on the earnings and costs for each type of securities financing operation and total return swap.

The CIU shall utilise over-the-counter index-linked swaps trading the value of the CIU's assets (or, as the case may be, any other asset held by the CIU) against the value of the Benchmark Indicator.

The revenue and costs linked to these Total Return Swaps (TRS) are included in the assessment of the instruments as well as in the result presented in the statement of net assets and the statement of net asset values.

Statutory auditor's report

STATUTORY AUDITOR'S REPORT
ON THE FINANCIAL STATEMENTS
For the year ended 28 February 2018

LYXOR MSCI INDIA UCITS ETF
UCITS CONSTITUTED AS A FONDS COMMUN DE PLACEMENT
Governed by the French Monetary and Financial Code (Code monétaire et financier)

Management Company
LYXOR INTERNATIONAL ASSET MANAGEMENT
17, cours Valmy
92800 PUTEAUX

Opinion

In compliance with the assignment entrusted to us by the management company, we conducted an audit of the accompanying financial statements of LYXOR MSCI INDIA UCITS ETF, a UCITS constituted as a fonds commun de placement, for the year ended 28 February 2018.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the UCITS at 28 February 2018 and of the results of its operations for the year then ended, in accordance with French accounting principles.

Basis of our opinion

Audit standards

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained sufficient and appropriate to provide a basis for our audit opinion. Our responsibilities under these standards are described in the section "*Statutory Auditor's responsibilities for the audit of the financial statements*" in this report.

Independence

We conducted our audit engagement in accordance with the applicable rules on independence, from 01/03/2017 and up to the date of this report, and in particular we did not provide any non-audit services prohibited under Article 5, paragraph 1 of Regulation (EU) No. 537/2014 or by the auditors' professional code of ethics.

LYXOR MSCI INDIA UCITS ETF

Justification of our assessments - Key audit matters

In accordance with the requirements of articles L.823-9 and R.823-7 of the French Commercial Code (Code de commerce) relating to the justification of our assessments, we bring to your attention the key matters as regards to the risk of material misstatement that, in our professional judgement, were the most significant for the audit of the financial statements and our responses to these risks.

These assessments were made as part of our audit of the financial statements, taken as a whole, and therefore contributed to the opinion we formed which is expressed above. We do not provide an opinion on individual items in the financial statements.

<i>Key audit matters</i>	<i>Audit response to cover these risks</i>
<p>The main risks of the CIU relate to the financial instruments in its portfolio.</p> <p>Any error in valuing or recording these financial instruments could lead to a misstatement in the calculation of the CIU's net asset value and in the financial statements.</p> <p>We therefore focused our work on the valuation and existence of the financial instruments in the portfolio.</p> <p>Valuation of financial instruments traded on a regulated or equivalent market</p> <p>Valuation of the CIU's financial instruments traded on a regulated or equivalent market is not complex as it is based primarily on listed prices provided by independent sources.</p> <p>However, the related amounts are significant and could lead to a material misstatement.</p> <p>The value of the financial instruments traded on a regulated or equivalent market is recorded in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We compared the year-end valuation of the CIU's financial instruments traded on a regulated or equivalent market with observable prices obtained from market databases.</p>

PricewaterhouseCoopers Audit, 63, rue de Villiers 92208 Neuilly-sur-Seine Cedex, France
T: +33 (0) 1 56 57 58 59, F: +33 (0) 1 56 57 58 60, www.pwc.fr

Société d'expertise comptable inscrite au tableau de l'ordre de Paris - Ile de France. Société de commissariat aux comptes membre de la compagnie régionale de Versailles. Société par Actions Simplifiée au capital de 2 510 460 €. Registered office: 63 rue de Villiers 92200 Neuilly-sur-Seine. RCS Nanterre 672 006 483. TVA n° FR 76 672 006 483. Siret 672 006 483 00362. Code APE 6920 Z. Bureaux : Bordeaux, Grenoble, Lille, Lyon, Marseille, Metz, Nantes, Nice, Paris, Poitiers, Rennes, Rouen, Strasbourg, Toulouse.

LYXOR MSCI INDIA UCITS ETF

<p>Valuation of financial contracts traded over the counter</p> <p>As part of its investment strategy, the CIU uses over-the-counter swaps. The valuation of these swaps is not observable on a regulated or equivalent market. The valuation of over-the-counter swaps is therefore a key audit matter.</p> <p>The value of the swap is recorded under the line item "financial contracts" in the balance sheet and presented in the detailed portfolio provided in the notes to the financial statements. The commitment related to the swap is presented in the off-balance sheet statement. The valuation rules for these financial instruments are disclosed in the "Significant accounting policies" note to the financial statements.</p>	<p>We verified that the swap's valuation as recorded at year-end agreed to the value communicated by the counterparty to the swap.</p> <p>We gained an understanding of the internal control procedure performed by the management company over swaps valuation. We verified that this procedure had been applied at year-end.</p>
<p>Existence of financial instruments</p> <p>The portfolio's financial instruments are held in custody or maintained by the CIU's depository. The depository certifies the existence of financial instruments at year-end.</p> <p>There is nonetheless a risk that these financial instruments could be inaccurately or only partially recorded in the CIU's accounting.</p> <p>The existence of these financial instruments is a key audit matter as the related amounts are material and could lead to a material misstatement.</p>	<p>We verified the existence of the portfolio's financial instruments by reviewing the CIU's reconciliation between the CIU's financial instruments held at year-end and these identified by the depository in an account opened in the CIU's name. Any material differences were examined, if applicable using trade tickets or contracts.</p>

Verification of the management report and other documents addressed to unit-holders

In accordance with professional standards applicable in France, we have also performed the specific verifications required by French law.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the management report, and in the documents addressed to the unit-holders with respect to the financial position and the financial statements.

LYXOR MSCI INDIA UCITS ETF

Disclosures arising from other legal and regulatory requirements

Appointment of the Statutory Auditors

We were appointed as Statutory Auditor of LYXOR MSCI INDIA UCITS ETF, a UCITS constituted as a fonds commun de placement, by the management company on 01/09/2006

At 28 February 2018, our firm was in the twelfth consecutive year of its engagement, i.e. the twelfth year following the admission of the CIU's securities for trading on a regulated market.

Responsibilities of management and those charged with governance for the financial statements

It is the management company's responsibility to prepare the CIU's financial statements presenting a true and fair view in accordance with French accounting principles and to implement the internal control that it deems appropriate for the preparation of financial statements that do not contain material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the CIU's ability to continue as a going concern, disclosing in the financial statements, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the CIU or to cease operations.

It is the management company's responsibility to monitor the preparation of financial information and oversee the efficiency of the internal control and risk management system and the internal audit system relating to the preparation and processing of financial and accounting information.

These financial statements have been prepared by the management company.

Statutory Auditor's responsibilities for the audit of the financial statements

Audit purpose and approach

It is our responsibility to prepare a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements, taken as a whole, are free of material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As indicated in article L.823-10-1 of the French Commercial Code, our statutory audit of the financial statements is not to guarantee the viability or the quality of your management.

LYXOR MSCI INDIA UCITS ETF

As part of an audit conducted in accordance with professional standards applicable in France, the Statutory Auditor uses professional judgement throughout the entire audit.

He also:

- identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence that is sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements;
- concludes on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the CIU's ability to continue as a going concern. Such conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to issue a qualified opinion or a disclaimer of opinion;
- evaluates the overall presentation of the financial statements and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

1 Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The MF's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of open-ended undertakings for collective investment.

The financial instruments traded on a regulated market are assessed at the closing price on the day before the calculation day of the net asset value. When these financial instruments are traded on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily traded.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a linear distribution, over the residual lifespan, of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the current value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments traded on organised markets are assessed at the clearing price on the day before the calculation day of the net asset value. Conditional future financial instruments traded on organised markets are assessed at the market value on the day of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this assessment.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable market value, under the management company's responsibility.
- Units and equities in undertakings for collective investment in transferable securities operating under French law are assessed at the last net asset value known on the calculation date of the MF's net asset value.
- Units and equities of UCITSs operating under foreign law are assessed at the last unit net asset value known on the calculation date of the MF's net asset value.

Financial instruments traded on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable market value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments listed in a currency other than the MF's reference currency are the exchange rates disseminated by the WM Reuters on the same day of the MF's net asset value date.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Financial instruments received as collateral

These financial instruments are listed under the "Financial instruments" item according to their nature, and the debt representing the obligation to return financial instruments is recorded on the liabilities side, for the same value, under the "Other temporary operations" item.

These financial instruments are valued according to the same valuation rules as financial securities of a similar nature, as presented above.

Assessment methods for off-balance sheet commitments

Off-balance sheet operations are assessed at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the CIU) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the CIU) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the CIU).

Operation and management fees

These fees include all of the fees invoiced directly to the MF, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transfer commission which, if relevant, may notably be collected by the custodian and management company.

For this MF, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the MF has exceeded its objectives and are therefore invoiced to the MF;
- Transfer commissions invoiced to the MF.

For more details on the fees actually invoiced to the MF, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the CIU	Basis	Schedule rate
Financial management fees and administrative fees external to the portfolio management company (Auditor, Depository, distribution, lawyers) including tax ⁽¹⁾	Net asset	maximum 0.85% per year
Outperformance commission	Net asset	None
Transfer commissions	Collection on each transaction	None

⁽¹⁾ including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS

appendix

Accounting currency

The MF accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Other changes declared to each of the bearers individually (Not certified by the auditor)

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of units

Class of units C-EUR and Units C-USD: Capitalisation of all the amounts available for distribution.

appendix

LYXOR MSCI INDIA UCITS ETF (the "Fund") is in no way sponsored, endorsed, sold or promoted by MSCI Inc. ("MSCI"), or by any MSCI subsidiary, or by any of the entities involved in the preparation of the MSCI indices. The MSCI indices are the exclusive property of MSCI and the MSCI indices are trademarks belonging to MSCI or its subsidiaries and have been the subject of a licence granted, for certain requirements, to Lyxor Asset Management. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the preparation or calculation of the MSCI indices makes any declaration or issues any express or implicit guarantee relative to holders of the Fund's units or more generally to the public, with regard to the timeliness of a transaction involving mutual fund units in general or the Fund's units in particular, or regarding the ability of any MSCI index to replicate the performance of the overall equity market. MSCI or its subsidiaries are the owners of certain names, registered trademarks and of the MSCI indices that are determined, composed and calculated by MSCI without discussion with Lyxor International Asset Management or the Fund. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the preparation of the MSCI indices is required to take into account the needs of Lyxor International Asset Management or of the holders of the Fund's units when determining, composing or calculating the MSCI indices. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the preparation of the MSCI indices makes any decision regarding the launch date, the price, the quantity of the Fund's units, or even the determination and calculation of the formula used to establish the Fund's net asset value. Neither MSCI, nor any MSCI subsidiary, nor any of the entities involved in the preparation of the MSCI indices assumes any liability or obligation with regard to the Fund's administration, management or marketing.

THOUGH MSCI OBTAINS INFORMATION FOR INTEGRATION OR USE IN THE CALCULATION OF THE INDICES FROM SOURCES THAT MSCI CONSIDERS TO BE RELIABLE, NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OR CALCULATION OF THE MSCI INDICES GUARANTEES THE EXACTNESS AND/OR EXHAUSTIVE NATURE OF THE INDICES OR OF ANY INCLUDED DATA. NEITHER MSCI NOR ANY OTHER PARTY INVOLVED IN THE CREATION OF A CALCULATION FOR THE MSCI INDICES GIVES ANY EXPRESS OR IMPLICIT GUARANTEE AS TO THE RESULTS THAT MAY BE OBTAINED BY THE HOLDER OF A MSCI LICENCE, THE CUSTOMERS OF THE SAID LICENSEE AS WELL AS THE COUNTERPARTIES, UNIT HOLDERS IN THE FUND OR ANY OTHER PERSON OR ENTITY, BASED ON THE USAGE OF THE INDICES OR OF ANY DATA INCLUDED WITH REGARD TO THE RIGHTS GRANTED BY LICENCE OR FOR ANY OTHER USAGE. NEITHER MSCI NOR ANY OTHER PARTY GIVES EXPRESS OR IMPLICIT GUARANTEES AND MSCI REJECTS ALL GUARANTEES REGARDING THE COMMERCIAL VALUE OR ADEQUACY FOR A SPECIFIC USAGE OF THE INDICES OR INCLUDED DATA. NOTWITHSTANDING THE ABOVE, UNDER NO CIRCUMSTANCES MAY THE LIABILITY OF MSCI OR OF ANY OTHER PARTY BE SOUGHT WITH REGARD TO ANY DAMAGES, WHETHER DIRECT, INDIRECT OR OTHER (INCLUDING THE LOSS OF EARNINGS), EVEN IN CASE OF KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES.

Unit distribution (including advances)*	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) (1)	-	-	-	-	-
Unit capitalisation*	0.11	1.22	-0.89	4.45	-1.25

* The amounts of the unit distribution, the unit capitalisation and the tax credits are indicated in the accounting currency of the CIU. The unit capitalisation corresponds to the sum of profit and loss and net capital gains or losses on the number of circulating units. This calculation method is applied since 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 of the Directorate General for taxes, the unit tax credit will be determined on the ex-dividend date by distribution of the total amount of the tax credits between the circulating units on that date.
