## What is this product?

#### Type

This product is a share in a sub-fund of the investment company with variable capital ECONOPOLIS FUNDS, an undertaking for collective investment in transferable securities (UCITS) under Luxembourg law.

#### Term

This sub-fund has no maturity date. However, the board of directors of the fund may decide to close the sub-fund under certain circumstances.

#### Objectives

The objective of the sub-fund is to offer investors, by means of an actively managed portfolio, a long-term capital gain on their investment.

The sub-fund will invest in shares and other equity instruments of companies active in developed markets (such as, but not limited to Europe, US and Japan) and may also invest up to 49% in companies active in emerging markets (i.e. South Korea, Taiwan, Hong Kong, China, India, Brazil, Mexico, South Africa, Indonesia). The sub-fund may invest directly in China A shares listed on the markets of the People's Republic of China, through China Connect.

The sub-fund can invest in shares and other equity securities of which the selection will be based upon on-going financial evaluations, analysis of the macro economic environment and specific profile of the issuer, future developments etc.

The sub-fund must hold at least 90% of its net assets in equities.

The sub-fund will be primarily invested in equity securities of companies that are able to benefit from demographic changes, including, but not limited to, the following sub-themes: medical care, sport & exercise, sustainable food, rising emerging market consumer, urbanization, recreation, changing consumer habits, medical innovations, wealth transfer, automation, ... There are no limits or restrictions regarding currencies, and geographical regions or other specific economic or industrial sectors or niches.

The sub-fund's investment policy is based on three cornerstones in the equity security selection: a disciplined multi-steps approach in the research and analysis of the Investment Manager, a unique unbenchmarked philosophy and the importance of on-the-ground research.

The sub-fund may invest in financial derivative products, including, for example, futures, options, forward exchange contracts in order to achieve the investment objectives and for risk hedging purposes.

The sub-fund promotes environmental or social characteristics.

For this sub-fund, a sustainable investment policy is in place, which can be consulted on <https://www.econopolis.be/en/sustainability>.

Additional information on sustainability is available in the prospectus of the fund.

**Benchmark:** The portfolio is actively managed on a discretionary basis without reference to a benchmark.

What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

**Be aware of currency risk.** You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Other risk factors might exist.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment be-

tween March 2024 and December 2025.

Moderate scenario: This type of scenario occurred for an investment between December 2017 and December 2022, by referring to a benchmark.

Favourable scenario: This type of scenario occurred for an investment between October 2016 and October 2021, by referring to a benchmark.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if BLI – Banque de Luxembourg Investments, acting under the commercial name Conventum Third Party Solutions is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

|                        | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| <b>Total costs</b>     | 141 EUR                  | 1,074 EUR                 |
| Annual cost impact (*) | 1.4%                     | 1.4% each year            |

(\*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 11.8% before costs and 10.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
