Securities registered pursuant to Section 12(b) of the Act:

(Title of Each Class)	(Name of each exchange on which registered)
Common Stock, \$1 par value per share	New York Stock Exchange
Depository Shares, each representing a 1/4,000th ownership interest in a share of Non-Cumulative Perpetual Preferred Stock, Series C, without par value per share	New York Stock Exchange
Depository Shares, each representing a 1/4,000th ownership interest in a share of Fixed-to-Floating Rate Non-Cumulative Perpetual Preferred Stock, Series D, without par value per share	New York Stock Exchange
Depository Shares, each representing a 1/4,000th ownership interest in a share of Non-Cumulative Perpetual Preferred Stock, Series E, without par value per share	New York Stock Exchange
Depository Shares, each representing a 1/4,000th ownership interest in a share of Non-Cumulative Perpetual Preferred Stock, Series G, without par value per share	New York Stock Exchange

**Securities registered pursuant to Section 12(g) of the Act:**

None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or emerging growth company. See the definitions of "large accelerated filer", "accelerated filer", "smaller reporting company", and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
Emerging growth company  (Do not check if a smaller reporting company)

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the per share price (\$89.73) at which the common equity was last sold as of the last business day of the registrant's most recently completed second fiscal quarter (June 30, 2017) was approximately \$33.38 billion.

The number of shares of the registrant's common stock outstanding as of January 31, 2018 was 367,653,199.

Portions of the following documents are incorporated by reference into Parts of this Report on Form 10-K, to the extent noted in such Parts, as indicated below.

(1) The registrant's definitive Proxy Statement for the 2018 Annual Meeting of Shareholders to be filed pursuant to Regulation 14A on or before April 30, 2018 (Part III).

**PART I**

**ITEM 1. BUSINESS**

**GENERAL**

State Street Corporation, referred to as the Parent Company, is a financial holding company organized in 1969 under the laws of the Commonwealth of Massachusetts. Our executive offices are located at One Lincoln Street, Boston, Massachusetts 02111 (telephone (617) 786-3000). For purposes of this Form 10-K, unless the context requires otherwise, references to "State Street," "we," "us," "our" or similar terms mean State Street Corporation and its subsidiaries on a consolidated basis. The Parent Company is a source of financial and managerial strength to our subsidiaries. Through our subsidiaries, including our principal banking subsidiary, State Street Bank and Trust Company, referred to as State Street Bank, we provide a broad range of financial products and services to institutional investors worldwide, with \$33.12 trillion of AUCA and \$2.78 trillion of AUM as of December 31, 2017.

As of December 31, 2017, we had consolidated total assets of \$238.43 billion, consolidated total deposits of \$184.90 billion, consolidated total shareholders' equity of \$22.32 billion and 36,643 employees. We operate in more than 100 geographic markets worldwide, including in the U.S., Canada, Europe, the Middle East and Asia.

On the "Investor Relations" section of our corporate website at [www.statestreet.com](http://www.statestreet.com), we make available, free of charge, all reports we electronically file with, or furnish to, the SEC including our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, as well as any amendments to those reports, as soon as reasonably practicable after those documents have been filed with, or furnished to, the SEC. These documents are also accessible on the SEC's website at [www.sec.gov](http://www.sec.gov). We have included the website addresses of State Street and the SEC in this report as inactive textual references only. Information on those websites is not part of this Form 10-K.

We have Corporate Governance Guidelines, as well as written charters for the Examining and Audit Committee, the Executive Committee, the Executive Compensation Committee, the Nominating and Corporate Governance Committee, the Risk Committee and the Technology Committee of our Board of Directors, or Board, and a Code of Ethics for senior financial officers, a Standard of Conduct for Directors and a Standard of Conduct for our employees. Each of these documents is posted on the "Investor Relations" section of our website under "Corporate Governance."

We provide additional disclosures required by applicable bank regulatory standards, including supplemental qualitative and quantitative information with respect to regulatory capital (including market risk associated with our trading activities) and the liquidity coverage ratio, summary results of semi-annual State Street-run stress tests which we conduct under the Dodd-Frank Act and resolution plan disclosures required under the Dodd-Frank Act. These additional disclosures are available on the "Investor Relations" section of our website under "Filings and Reports."

We use acronyms and other defined terms for certain business terms and abbreviations, as defined on the acronyms list and glossary included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**BUSINESS DESCRIPTION**

**Overview**

We conduct our business primarily through State Street Bank, which traces its beginnings to the founding of the Union Bank in 1792. State Street Bank's current charter was authorized by a special Act of the Massachusetts Legislature in 1891, and its present name was adopted in 1960. State Street Bank operates as a specialized bank, referred to as a trust or custody bank, that services and manages assets on behalf of its institutional clients.

Our clients include mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, foundations, endowments and investment managers.

**Additional Information**

Additional information about our business activities is provided in the sections that follow. For information about our management of credit and counterparty risk; liquidity risk; operational risk; market risk associated with our trading activities; market risk associated with our non-trading, or asset-and-liability management, activities, primarily composed of interest-rate risk; and capital, as well as other risks inherent in our businesses, refer to "Risk Factors" included under Item 1A, the "Financial Condition" section of Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, or Management's Discussion and Analysis, and our consolidated financial statements and accompanying notes included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

## LINES OF BUSINESS

We have two lines of business: Investment Servicing and Investment Management.

### Investment Servicing

Our Investment Servicing line of business performs core custody and related value-added functions, such as providing institutional investors with clearing, settlement and payment services. Our financial services and products allow our large institutional investor clients to execute financial transactions on a daily basis in markets across the globe. As most institutional investors cannot economically or efficiently build their own technology and operational processes necessary to facilitate their global securities settlement needs, our role as a global trust and custody bank is generally to aid our clients to efficiently perform services associated with the clearing, settlement and execution of securities transactions and related payments.

Our investment servicing products and services include: custody; product and participant level accounting; daily pricing and administration; master trust and master custody; depotbank services (a fund oversight role created by regulation); record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; performance, risk and compliance analytics; and financial data management to support institutional investors.

We provide some or all of these integrated products and services to clients in the U.S. and in many other markets, including, among others, Australia, Cayman Islands, France, Germany, Ireland, Italy, Japan, Luxembourg and the U.K. As of December 31, 2017, we serviced AUCA of approximately \$24.42 trillion in the Americas, approximately \$7.03 trillion in Europe and the Middle East and approximately \$1.67 trillion in the Asia-Pacific region.

### Investment Management

Our Investment Management line of business, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR® ETF brand. As of December 31, 2017, SSGA had AUM of approximately \$2.78 trillion.

Additional information about our lines of business is provided under "Line of Business Information" included under Item 7, Management's Discussion and Analysis, and in Note 24 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. Additional information about our non-U.S. activities is provided in Note 25 to the consolidated financial statements included under Item 8 of this Form 10-K.

## COMPETITION

We operate in a highly competitive environment and face global competition in all areas of our business. Our competitors include a broad range of financial institutions and servicing companies, including other custodial banks, deposit-taking institutions, investment management firms, insurance companies, mutual funds, broker/dealers, investment banks, benefits consultants, investment analytic businesses, business service and software companies and information services firms. As our businesses grow and markets evolve, we may encounter increasing and new forms of competition around the world.

We believe that many key factors drive competition in the markets for our business. For Investment Servicing, quality of service, technological expertise, economies of scale, quality and scope of services, sales and marketing, required levels of capital and price drive competition, and are critical to our servicing business. For Investment Management, key competitive factors include expertise, experience, availability of related service offerings, quality of service and performance and price.

Our competitive success may depend on our ability to develop and market new and innovative services, to adopt or develop new technologies, to bring new services to market in a timely fashion at competitive prices, to continue to expand our relationships with existing clients, and to attract new clients.

We are a systemically important financial institution and are subject to extensive regulation and supervision with respect to our operations and activities. Not all of our competitors have similarly been designated as systemically important nor are all of them subject to the same degree of regulation as a bank or financial holding company, and therefore some of our competitors may not be subject to the same limitations, requirements and standards with respect to their operations and activities. See "Supervision and Regulation" in this Item for more information.

## SUPERVISION AND REGULATION

State Street is registered with the Federal Reserve as a bank holding company pursuant to the Bank Holding Company Act of 1956. The Bank Holding Company Act generally limits the activities in which bank holding companies and their non-banking subsidiaries may engage to managing or controlling banks and to a range of activities that are considered to be closely related to banking. Bank holding companies that have elected to be treated as financial holding companies, such as the Parent Company, may engage in a broader range of activities considered to be "financial in nature." These limits also apply to non-banking entities that we are deemed to "control" for purposes of the Bank Holding Company Act, which may include companies of which we own or control more than 5% of a class of voting shares. The Federal Reserve may order a bank holding company to terminate any activity, or its ownership or control of a non-banking subsidiary, if the Federal Reserve finds that the activity, ownership or control constitutes a serious risk to the financial safety, soundness or stability of a banking subsidiary or is inconsistent with sound banking principles or statutory purposes. The Bank Holding Company Act also requires a bank holding company to obtain prior approval of the Federal Reserve before it acquires substantially all the assets of any bank, or ownership or control of more than 5% of the voting shares of any bank.

The Parent Company has elected to be treated as a financial holding company and, as such, may engage in a broader range of non-banking activities than permitted for bank holding companies and their subsidiaries that have not elected to become financial holding companies. Financial holding companies may engage directly or indirectly in activities that are defined by the Federal Reserve to be financial in nature, either de novo or by acquisition, provided that the financial holding company gives the Federal Reserve after-the-fact notice of the new activities. Activities defined to be financial in nature include, but are not limited to, the following: providing financial or investment advice; underwriting; dealing in or making markets in securities; making merchant banking investments, subject to significant limitations; and any activities previously found by the Federal Reserve to be closely related to banking. In order to maintain our status as a financial holding company, we and each of our U.S. depository institution subsidiaries must be well capitalized and well managed, as defined in applicable regulations and determined in part by the results of regulatory examinations, and must comply with Community Reinvestment Act obligations. Failure to maintain these standards may ultimately permit the Federal Reserve to take enforcement actions against us and restrict our ability to engage in activities defined to be financial in nature. Currently,

under the Bank Holding Company Act, we may not be able to engage in new activities or acquire shares or control of other businesses.

In response to the financial crisis, as well as other factors such as technological and market changes, both the scope of the laws and regulations and the intensity of the supervision to which our business is subject have increased in recent years. Regulatory enforcement and fines have also increased across the banking and financial services sector. Many of these changes have occurred as a result of the Dodd-Frank Act and its implementing regulations, most of which are now in place. The U.S. President has issued an executive order that sets forth principles for the reform of the federal financial regulatory framework, and the Republican majority in Congress has also suggested an agenda for financial regulatory reform. The implementation of any such reforms, or if implemented whether they would be beneficial to State Street, is uncertain. Irrespective of any regulatory change, we expect that our business will remain subject to extensive regulation and supervision.

In addition, increased regulatory requirements have been and are being implemented internationally with respect to financial institutions, including, but not limited to, the implementation of the Basel III final rule (refer to "Regulatory Capital Adequacy and Liquidity Standards" below in this "Supervision and Regulation" section and under "Capital" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, of this Form 10-K for a discussion of Basel III), the Alternative Investment Fund Managers Directive (AIFMD), the Bank Recovery and Resolution Directive (BRRD), the European Market Infrastructure Regulation (EMIR), the Undertakings for Collective Investment in Transferable Securities (UCITS) directives, the Markets in Financial Instruments Directive II (MiFID II) and the Markets in Financial Instruments Regulation (MiFIR) (the majority of the provisions of MiFID II and MiFIR will apply from January 3, 2018) and the E.U. General Data Protection Regulation (GDPR).

Many aspects of our business are subject to regulation by other U.S. federal and state governmental and regulatory agencies and self-regulatory organizations (including securities exchanges), and by non-U.S. governmental and regulatory agencies and self-regulatory organizations. Some aspects of our public disclosure, corporate governance principles and internal control systems are subject to SOX, the Dodd-Frank Act and regulations and rules of the SEC and the NYSE.

## Regulatory Capital Adequacy and Liquidity Standards

### Basel III Final Rule

We are subject to the Basel III framework in the U.S. Provisions of the Basel III final rule become effective under a transition timetable which began in January 2014, with full implementation required beginning on January 1, 2019. U.S. banking regulators have also jointly issued a final market risk capital rule to implement the changes to the market risk capital framework in the U.S. The final market risk capital rule became effective and was applicable to State Street in January 2013, and replaced the market risk capital framework associated with Basel I and Basel II.

The Basel III final rule provides for two frameworks: the "standardized" approach, intended to replace Basel I, and the "advanced" approaches, applicable to advanced approaches banking organizations, like State Street, as originally defined under Basel II. The standardized approach modifies the provisions of Basel I related to the calculation of RWA and prescribes standardized risk weights for certain on- and off-balance sheet exposures.

Among other things, the Basel III final rule does the following:

- Adds requirements for a minimum common equity tier 1 risk-based capital ratio of 4.5% and a minimum supplementary leverage ratio of 3% for advanced approaches banking organizations;
- Raises the minimum tier 1 risk-based capital ratio from 4% under Basel I and Basel II to 6%;
- Leaves the existing, minimum total capital ratio at 8%;
- Implements the capital conservation and countercyclical capital buffers, referenced below, as well as a G-SIB surcharge included under "Capital" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, of this Form 10-K;
- Implements the previously described standardized approach to replace the calculation of RWA under Basel I; and
- Implements the advanced approaches for the calculation of RWA.

Additionally, beginning January 1, 2018, the SLR rule introduced a higher minimum SLR requirement for the eight U.S. G-SIBs of at least 6% for the insured banking entity (State Street Bank) in order to be well capitalized under the U.S. banking regulators' PCA framework, as well as a requirement of a minimum SLR of 5% for the holding company (the Parent Company) in order to avoid any limitations on distributions and discretionary bonus payments. In

addition to the SLR, State Street is subject to a minimum tier 1 leverage ratio of 4%, which differs from the SLR primarily in that the denominator of the tier 1 leverage ratio is a quarterly average of on-balance sheet assets and does not include any off-balance sheet exposures. The Parent Company is required to include SLR disclosures, calculated on a transitional basis, with its other Basel disclosures.

Under the Basel III final rule, a banking organization would be able to make capital distributions (subject to other regulatory constraints, such as regulator review of its capital plans) and discretionary bonus payments without specified limitations, as long as it maintains the required capital conservation buffer of 2.5% plus applicable G-SIB surcharge over the minimum required common equity tier 1 risk-based capital ratio and each of the minimum required tier 1 and total risk-based capital ratios (plus any potentially applicable countercyclical capital buffer). Banking regulators would establish the minimum countercyclical capital buffer, which is initially set by banking regulators at zero, up to a maximum of 2.5% of total risk-weighted assets under certain economic conditions.

Under the Basel III final rule, our total regulatory capital is divided into three tiers, composed of common equity tier 1 capital, tier 1 capital (which includes common equity tier 1 capital), and tier 2 capital. The total of tier 1 and tier 2 capital, adjusted as applicable, is referred to as total regulatory capital.

Common equity tier 1 capital is composed of core capital elements, such as qualifying common shareholders' equity and related surplus; retained earnings; the cumulative effect of foreign currency translation; and net unrealized gains (losses) on debt and equity securities classified as AFS; reduced by treasury stock. Subject to certain phase-in or phase-out provisions, tier 1 capital is composed of common equity tier 1 capital plus additional tier 1 capital composed of qualifying perpetual preferred stock and minority interests. Goodwill and other intangible assets, net of related deferred tax liabilities, are deducted from common equity tier 1 capital and tier 1 capital. Subject to certain phase-in or phase-out provisions, tier 2 capital is composed primarily of qualifying subordinated long-term debt.

Certain other items, if applicable, must be deducted from tier 1 and tier 2 capital. These items primarily include deductible investments in unconsolidated banking, financial and insurance entities where we hold more than 50% of the entities' capital; and the amount of expected credit losses that exceeds recorded allowances for loan and other credit losses. Expected credit losses are calculated for wholesale credit exposures by formula in conformity with the Basel III final rule.

As required by the Dodd-Frank Act, we and State Street Bank, as advanced approaches banking organizations, are subject to a permanent "capital floor," also referred to as the Collins Amendment, in the assessment of our regulatory capital adequacy, including the capital conservation buffer and countercyclical capital buffer described above in this "Supervision and Regulation" section). Since 2015, our risk-based capital ratios for regulatory assessment purposes are the lower of each ratio calculated under the standardized approach and the advanced approaches.

#### **Global Systemically Important Bank**

In addition to the Basel III final rule, we are subject to the Federal Reserve's final rule imposing a capital surcharge on U.S. G-SIBs. The surcharge requirements within the final rule began to phase-in on January 2016 and will be fully effective on January 1, 2019. The eight U.S. banks deemed to be G-SIBs, including State Street, are required to calculate the G-SIB surcharge according to two methods, and be bound by the higher of the two:

- Method 1: Assesses systemic importance based upon five equally-weighted components: size, interconnectedness, complexity, cross-jurisdictional activity and substitutability;
- Method 2: Alters the calculation from Method 1 by factoring in a wholesale funding score in place of substitutability and applying a 2x multiplier to the sum of the five components

Method 2 is identified as the binding methodology for State Street and the applicable surcharge on January 1, 2017 was calculated to be 1.5%. Assuming completion of the phase-in period for the capital conservation buffer, and a countercyclical buffer of 0%, the minimum capital ratios as of January 1, 2019, including a capital conservation buffer of 2.5% and G-SIB surcharge of 1.5% in 2019, would be 8.5% for common equity tier 1 capital, 10.0% for tier 1 risk-based capital and 12.0% for total risk-based capital, in order for State Street to make capital distributions and discretionary bonus payments without limitation. Further, State Street, like all other U.S. G-SIBs, is also subject to a 2% leverage buffer under the Basel III final rule. If State Street fails to exceed the 2% leverage buffer, it will be subject to increased restrictions (depending upon the extent of the shortfall) regarding capital distributions and discretionary executive bonus payments. Not all of our competitors have similarly been designated as systemically important nor are all of them subject to the same degree of regulation as a bank or financial holding company, and therefore some of our competitors may not be subject to the same additional capital requirements.

#### **Total Loss-Absorbing Capacity (TLAC)**

In December 2016, the Federal Reserve released its final rule on TLAC, LTD and clean holding company requirements for U.S. domiciled G-SIBs, such as State Street, that are intended to improve the resiliency and resolvability of certain U.S. banking organizations through enhanced prudential standards. The TLAC final rule imposes: (1) TLAC requirements (i.e., combined eligible tier 1 regulatory capital and eligible LTD); (2) separate eligible LTD requirements; and (3) clean holding company requirements designed to make short-term unsecured debt (including deposits) and most other ineligible liabilities structurally senior to eligible LTD.

Among other things, the TLAC final rule requires State Street to comply with minimum requirements for external TLAC and external LTD, plus an external TLAC buffer. Specifically, State Street must hold (1) combined eligible tier 1 regulatory capital and eligible LTD in the amount equal to at least 21.5% of total risk-weighted assets (using an estimated G-SIB method 1 surcharge of 1%) and 9.5% of total leverage exposure, as defined by the SLR final rule, and (2) qualifying external LTD equal to the greater of 7.5% of risk-weighted assets (using an estimated G-SIB method 2 surcharge of 1.5%) and 4.5% of total leverage exposure, as defined by the SLR final rule.

Based upon current estimates, assumptions and guidance, we project that compliance with TLAC and LTD will result in increasing our outstanding LTD by approximately \$1.5 billion at December 31, 2018 compared to debt outstanding at December 31, 2017. Our estimates regarding TLAC and LTD are subject to additional regulatory guidance and interpretation. State Street must comply with the TLAC final rule starting on January 1, 2019.

#### **Liquidity Coverage Ratio and Net Stable Funding Ratio**

In addition to capital standards, the Basel III final rule introduced two quantitative liquidity standards: the LCR and the NSFR.

We are subject to the final rule issued by the U.S. banking regulators implementing the BCBS' LCR in the U.S. The LCR is intended to promote the short-term resilience of internationally active banking organizations, like State Street, to improve the banking industry's ability to absorb shocks arising from market stress over a 30 calendar day period and improve the measurement and management of liquidity risk.

The LCR measures an institution's HQLA against its net cash outflows. We report LCR to the Federal Reserve daily. As of December 31, 2017, our LCR was in excess of the requirement of 100%. In addition, we publicly disclose certain qualitative and quantitative information about our LCR consistent

with the requirements of the Federal Reserve's December 2016 final rule.

Compliance with the LCR has required that we maintain an investment portfolio that contains an adequate amount of HQLA. In general, HQLA investments generate a lower investment return than other types of investments, resulting in a negative impact on our NII and our NIM. In addition, the level of HQLA we are required to maintain under the LCR is dependent upon our client relationships and the nature of services we provide, which may change over time. Deposits resulting from certain services provided ("operational deposits") are treated as more resilient during periods of stress than other deposits. As a result, if balances of operational deposits increased relative to our total client deposit base, we would expect to require less HQLA in order to maintain our LCR. Conversely, if balances of operational deposits decreased relative to our total client deposit base, we would expect to require more HQLA.

The BCBS has also issued final guidance with respect to the NSFR. In the second quarter of 2016, the OCC, Federal Reserve and FDIC issued a proposal to implement the NSFR in the U.S. that is largely consistent with the BCBS guidance. The proposal would require banking organizations to maintain an amount of available stable funding, which is calculated by applying standardized weightings to its equity and liabilities based on their expected stability, that is no less than the amount of its required stable funding, which is calculated by applying standardized weightings to its assets, derivatives exposures, and certain other off-balance sheet exposures based on their liquidity characteristics.

Failure to meet current and future regulatory capital requirements could subject us to a variety of enforcement actions, including the termination of State Street Bank's deposit insurance by the FDIC, and to certain restrictions on our business, including those that are described above in this "Supervision and Regulation" section.

For additional information about our regulatory capital position and our regulatory capital adequacy, as well as current and future regulatory capital requirements, refer to "Capital" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, and Note 16 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

#### **Capital Planning, Stress Tests and Dividends**

Pursuant to the Dodd-Frank Act, the Federal Reserve has adopted capital planning and stress test requirements for large bank holding companies, including us, which form part of the Federal Reserve's annual CCAR framework. CCAR is used by the

Federal Reserve to evaluate our management of capital, the adequacy of our regulatory capital and the potential requirement for us to maintain capital levels above regulatory minimums. Under the Federal Reserve's capital plan final rule, we must conduct periodic stress testing of our business operations and submit an annual capital plan to the Federal Reserve, taking into account the results of separate stress tests designed by us and by the Federal Reserve.

The capital plan must include a description of all of our planned capital actions over a nine-quarter planning horizon, including any issuance of debt or equity capital instruments, any capital distributions, such as payments of dividends on, or purchases of, our stock, and any similar action that the Federal Reserve determines could affect our consolidated capital. The capital plan must include a discussion of how we will maintain capital above the minimum regulatory capital ratios, including the minimum ratios under the Basel III final rule that are phased in over the planning horizon, and serve as a source of strength to our U.S. depository institution subsidiaries under supervisory stress scenarios. The capital plan requirements mandate that we receive no objection to our plan from the Federal Reserve before making a capital distribution. These requirements could require us to revise our stress-testing or capital management approaches, resubmit our capital plan or postpone, cancel or alter our planned capital actions. In addition, changes in our strategy, merger or acquisition activity or unanticipated uses of capital could result in a change in our capital plan and its associated capital actions, including capital raises or modifications to planned capital actions, such as purchases of our stock, and may require resubmission of the capital plan to the Federal Reserve for its non-objection if, among other reasons, we would not meet our regulatory capital requirements after making the proposed capital distribution.

In addition to its capital planning requirements, the Federal Reserve has the authority to prohibit or to limit the payment of dividends by the banking organizations it supervises, including the Parent Company and State Street Bank, if, in the Federal Reserve's opinion, the payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the banking organization. All of these policies and other requirements could affect our ability to pay dividends and purchase our stock, or require us to provide capital assistance to State Street Bank and any other banking subsidiary.

In June 2017, we received the results of the Federal Reserve's review of our 2017 capital plan in connection with its 2017 annual CCAR process. The Federal Reserve did not object to the capital actions we proposed in our 2017 capital plan and, in June 2017, our Board approved a new common stock

purchase program authorizing the purchase of up to \$1.4 billion of our common stock from July 1, 2017 through June 30, 2018. As of December 31, 2017, we purchased approximately 7.4 million shares of our common stock at an average per-share cost of \$94.54 and an aggregate cost of approximately \$700 million under this program. Our 2017 capital plan included an increase, subject to approval by our Board, to our quarterly stock dividend to \$0.42 per share from \$0.38 per share, beginning in the third quarter of 2017. Our common stock and other stock dividends, including the declaration, timing and amount thereof, remain subject to consideration and approval by our Board of Directors at the relevant times.

The Federal Reserve, under the Dodd-Frank Act, requires us to conduct semi-annual State Street-run stress tests and to publicly disclose the summary results of our State Street-run stress tests under the severely adverse economic scenario. In October 2017, we provided summary results of our 2017 mid-cycle State Street-run stress tests on the "Investor Relations" section of our corporate website. We are also required to undergo an annual supervisory stress test conducted by the Federal Reserve.

The Dodd-Frank Act also requires State Street Bank to conduct an annual stress test. State Street Bank must submit its 2018 annual State Street Bank-run stress test to the Federal Reserve by April 5, 2018.

In January 2017, the Federal Reserve adopted revisions to the capital plan and stress test requirements that, among other things, reduce the *de minimis* threshold for additional capital distributions that a firm may make during a capital plan cycle without seeking the Federal Reserve's prior approval. The final rule also establishes a one-quarter "blackout period" while the Federal Reserve is conducting CCAR during which firms are not permitted to submit *de minimis* exception notices or prior approval requests for additional capital distributions. The Federal Reserve is currently considering making further changes to CCAR requirements, which may change our minimum capital requirements.

#### **The Volcker Rule**

We are subject to the Volcker rule and implementing regulations. The Volcker rule prohibits banking entities, including us and our affiliates, from engaging in certain prohibited proprietary trading activities, as defined in the final Volcker rule regulations, subject to exemptions for market-making related activities, risk-mitigating hedging, underwriting and certain other activities. The Volcker rule also requires banking entities to either restructure or divest certain ownership interests in, and relationships with, covered funds (as such terms are defined in the final Volcker rule regulations).

The final Volcker rule regulations require banking entities to establish extensive programs designed to ensure compliance with the restrictions of the Volcker rule. We have established a compliance program which we believe complies with the final Volcker rule regulations as currently in effect. Such compliance program restricts our ability in the future to service certain types of funds, in particular covered funds for which SSGA acts as an advisor and certain types of trustee relationships. Consequently, Volcker rule compliance entails both the cost of a compliance program and loss of certain revenue and future opportunities.

#### **Enhanced Prudential Standards**

As a SIFI, we are subject to heightened prudential standards, including heightened capital, leverage, liquidity and risk management requirements, single-counterparty credit limits and early remediation requirements. Bank holding companies with \$50 billion or more in consolidated assets, which includes us, became automatically subject to the systemic-risk regime in 2010.

The FSOC can recommend prudential standards, reporting and disclosure requirements to the Federal Reserve for SIFIs, and must approve any finding by the Federal Reserve that a financial institution poses a grave threat to financial stability and must undertake mitigating actions. The FSOC is also empowered to designate systemically important payment, clearing and settlement activities of financial institutions, subjecting them to prudential supervision and regulation, and, assisted by the Office of Financial Research within the U.S. Department of the Treasury can gather data and reports from financial institutions, including us.

Under the Federal Reserve's final rule implementing certain enhanced prudential standards for large bank holding companies, we are required to comply with various liquidity-related risk management standards and maintain a liquidity buffer of unencumbered highly liquid assets based on the results of internal liquidity stress testing. This liquidity buffer is in addition to other liquidity requirements, such as the LCR and, when implemented, the NSFR. The final rule also establishes requirements and responsibilities for our risk committee and mandates risk management standards. We became subject to these standards in January 2015.

In March 2016, the Federal Reserve re-proposed rules that would establish single-counterparty credit limits for large banking organizations, with more stringent limits for the largest banking organizations. U.S. G-SIBs, including us, would be subject to a limit of 15% of tier 1 capital for credit exposures to any "major counterparty" (defined as other U.S. G-SIBs, foreign G-SIBs and non-bank SIFIs supervised by the

Federal Reserve) and to a limit of 25% of tier 1 capital for credit exposures to any other unaffiliated counterparty.

In September 2017, the Federal Reserve issued a final rule that imposes contractual requirements on certain “qualified financial contracts” to which U.S. G-SIBs, including us, and their subsidiaries are parties. Under the final rule, certain qualified financial contracts generally must expressly provide that transfer restrictions and default rights against a U.S. G-SIB, or subsidiary of a U.S. G-SIB, are limited to the same extent as they would be under the Federal Deposit Insurance Act and Title II of the Dodd-Frank Act and their implementing regulations. In addition, certain qualified financial contracts may not, among other things, permit the exercise of any cross-default right against a U.S. G-SIB or subsidiary of a U.S. G-SIB based on an affiliate’s entry into insolvency, resolution or similar proceedings, subject to certain creditor protections. There is a phased-in compliance schedule based on counterparty type, with a first compliance date of January 1, 2019.

In addition, the final rules create an early-remediation regime to address financial distress or material management weaknesses determined with reference to four levels of early remediation, including heightened supervisory review, initial remediation, recovery, and resolution assessment, with specific limitations and requirements tied to each level.

The systemic-risk regime also provides that, for institutions deemed to pose a grave threat to U.S. financial stability, the Federal Reserve, upon an FSOC vote, must limit that institution’s ability to merge, restrict its ability to offer financial products, require it to terminate activities, impose conditions on activities or, as a last resort, require it to dispose of assets. Upon a grave-threat determination by the FSOC, the Federal Reserve must issue rules that require financial institutions subject to the systemic-risk regime to maintain a debt-to-equity ratio of no more than 15 to 1 if the FSOC considers it necessary to mitigate the risk of the grave threat. The Federal Reserve also has the ability to establish further standards, including those regarding contingent capital, enhanced public disclosures, and limits on short-term debt, including off-balance sheet exposures.

#### **Resolution Planning**

State Street, like other bank holding companies with total consolidated assets of \$50 billion or more, periodically submits a plan for rapid and orderly resolution in the event of material financial distress or failure — commonly referred to as a resolution plan or a living will — to the Federal Reserve and the FDIC under Section 165(d) of the Dodd-Frank Act. Through resolution planning, we seek, in the event of the insolvency of State Street, to maintain State Street

Bank’s role as a key infrastructure provider within the financial system, while minimizing risk to the financial system and maximizing value for the benefit of our stakeholders. We have and will continue to focus management attention and resources to meet regulatory expectations with respect to resolution planning.

We submitted our 2017 resolution plan describing our preferred resolution strategy to the Federal Reserve and FDIC on June 30, 2017. On December 19, 2017, the Federal Reserve and FDIC announced that they had completed their review and had not identified deficiencies or specific shortcomings. Nonetheless, the agencies identified four common areas in which more work may need to be done by all firms, including State Street, to continue to improve resolvability: intra-group liquidity; internal loss-absorbing capacity; derivatives; and payment, clearing and settlement activities. State Street’s next resolution plan is due July 1, 2019.

In the event of material financial distress or failure, our preferred resolution strategy is the SPOE Strategy. The SPOE Strategy provides that prior to the bankruptcy of the Parent Company and pursuant to a support agreement among the Parent Company, SSIF (a direct subsidiary of the Parent Company), State Street’s Beneficiary Entities (as defined below) and certain other State Street entities, SSIF is obligated, up to its available resources, to recapitalize and/or provide liquidity to State Street Bank and the other State Street entities benefiting from such capital and/or liquidity support (collectively with State Street Bank, “Beneficiary Entities”), in amounts designed to prevent the Beneficiary Entities from themselves entering into resolution proceedings. Following the recapitalization of, or provision of liquidity to the Beneficiary Entities, the Parent Company would enter into a bankruptcy proceeding under the U.S. Bankruptcy Code. The Beneficiary Entities and other State Street subsidiaries would be transferred to a newly organized holding company held by a reorganization trust for the benefit of the Parent Company’s claimants.

Under the support agreement, the Parent Company has pre-funded SSIF by contributing certain of its assets (primarily its liquid assets, cash deposits, investments in intercompany debt, investments in marketable securities and other cash and non-cash equivalent investments) to SSIF contemporaneous with entering into the support agreement and will continue to contribute such assets, to the extent available, on an on-going basis. In consideration for these contributions, SSIF has agreed in the support agreement to provide capital and liquidity support to the Parent Company and all of the Beneficiary Entities in accordance with the Parent Company’s capital and liquidity policies. Under the support agreement, the Parent Company is only permitted to

retain cash needed to meet its upcoming obligations and to fund expected expenses during a potential bankruptcy proceeding. SSIF has provided the Parent Company with a committed credit line and issued (and may issue) one or more promissory notes to the Parent Company (the "Parent Company Funding Notes") that together are intended to allow the Parent Company to continue to meet its obligations throughout the period prior to the occurrence of a "Recapitalization Event" (as defined below). The support agreement does not contemplate that SSIF is obligated to maintain any specific level of resources and SSIF may not have sufficient resources to implement the SPOE Strategy.

In the event a Recapitalization Event occurs, the obligations outstanding under the Parent Company Funding Notes would automatically convert into or be exchanged for capital contributed to SSIF. The obligations of the Parent Company and SSIF under the support agreement are secured through a security agreement that grants a lien on the assets that the Parent Company and SSIF would use to fulfill their obligations under the support agreement to the Beneficiary Entities. SSIF is a distinct legal entity separate from the Parent Company and the Parent Company's other affiliates.

In accordance with its policies, State Street is required to monitor, on an ongoing basis, the capital and liquidity needs of State Street Bank and the other Beneficiary Entities. To support this process, State Street has established a trigger framework that identifies key actions that would need to be taken or decisions that would need to be made if certain events tied to State Street's financial condition occur. In the event that State Street experiences material financial distress, the support agreement requires State Street to model and calculate certain capital and liquidity triggers on a regular basis to determine whether or not the Parent Company should commence preparations for a bankruptcy filing and whether or not a Recapitalization Event has occurred.

Upon the occurrence of a Recapitalization Event: (1) SSIF would not be authorized to provide any further liquidity to the Parent Company; (2) the Parent Company would be required to contribute to SSIF any remaining assets it is required to contribute to SSIF under the support agreement (which specifically exclude amounts designated to fund expected expenses during a potential bankruptcy proceeding); (3) SSIF would be required to provide capital and liquidity support to the Beneficiary Entities to support such entities' continued operation to the extent of its available resources and consistent with the support agreement; and (4) the Parent Company would be expected to commence Chapter 11 proceedings under the U.S. Bankruptcy Code. No person or entity, other than a party to the support agreement, should rely, including in evaluating any

State Street entity from a creditor's perspective or determining whether to enter into a contractual relationship with any State Street entity, on any State Street affiliate being or remaining a Beneficiary Entity or receiving capital or liquidity support pursuant to the support agreement.

A "Recapitalization Event" is defined under the support agreement as the earlier occurrence of one or more capital and liquidity thresholds being breached or the authorization by the Parent Company's Board of Directors for the Parent Company to commence bankruptcy proceedings. These thresholds are set at levels intended to provide for the availability of sufficient capital and liquidity to enable an orderly resolution without extraordinary government support. The SPOE Strategy and the obligations under the support agreement may result in the recapitalization of State Street Bank and the commencement of bankruptcy proceedings by the Parent Company at an earlier stage of financial stress than might otherwise occur without such mechanisms in place. An expected effect of the SPOE Strategy and applicable TLAC regulatory requirements is that State Street's losses will be imposed on the Parent Company shareholders and the holders of long-term debt and other forms of TLAC securities currently outstanding or issued in the future by the Parent Company, as well as on any other Parent Company creditors, before any of its losses are imposed on the holders of the debt securities of the Parent Company's operating subsidiaries or any of their depositors or creditors, or before U.S. taxpayers are put at risk.

There can be no assurance that credit rating agencies, in response to our resolution plan or the support agreement, will not downgrade, place on negative watch or change their outlook on our debt credit ratings, generally or on specific debt securities. Any such downgrade, placement on negative watch or change in outlook could adversely affect our cost of borrowing, limit our access to the capital markets or result in restrictive covenants in future debt agreements and could also adversely impact the trading prices, or the liquidity, of our outstanding debt securities.

State Street Bank is also required to submit periodically to the FDIC a plan for resolution in the event of its failure, referred to as an IDI plan. Under the IDI plan rule, submission of the IDI plan is scheduled for July 1, 2018.

#### **Orderly Liquidation Authority**

Under the Dodd-Frank Act, certain financial companies, including bank holding companies such as State Street, and certain covered subsidiaries, can be subjected to the orderly liquidation authority. The U.S. Treasury Secretary, in consultation with the U.S. President, must first make certain extraordinary

financial distress and systemic risk determinations, and action must be recommended by two-thirds of the FDIC Board and two-thirds of the Federal Reserve Board. Absent such actions, we, as a bank holding company, would remain subject to the U.S. Bankruptcy Code.

The orderly liquidation authority went into effect in 2010, and rulemaking is proceeding in stages, with some regulations now finalized and others planned but not yet proposed. If we were subject to the orderly liquidation authority, the FDIC would be appointed as the receiver of State Street Bank, which would give the FDIC considerable powers to resolve us, including: (1) the power to remove officers and directors responsible for our failure and to appoint new directors and officers; (2) the power to assign assets and liabilities to a third party or bridge financial company without the need for creditor consent or prior court review; (3) the ability to differentiate among creditors, including by treating junior creditors better than senior creditors, subject to a minimum recovery right to receive at least what they would have received in bankruptcy liquidation; and (4) broad powers to administer the claims process to determine distributions from the assets of the receivership to creditors not transferred to a third party or bridge financial institution.

In 2013, the FDIC released its proposed single-point-of-entry strategy for resolution of a SIFI under the orderly liquidation authority. The FDIC's release outlines how it would use its powers under the orderly liquidation authority to resolve a SIFI by placing its top-tier U.S. holding company in receivership and keeping its operating subsidiaries open and out of insolvency proceedings by transferring the operating subsidiaries to a new bridge holding company, recapitalizing the operating subsidiaries and imposing losses on the shareholders and creditors of the holding company in receivership according to their statutory order of priority.

#### **Derivatives**

Title VII of the Dodd-Frank Act imposed a comprehensive regulatory structure on the OTC derivatives market, including requirements for clearing, exchange trading, capital, margin, reporting and record-keeping. Title VII also requires certain persons to register as a major swap participant, a swap dealer or a securities-based swap dealer. The CFTC, the SEC, and other U.S. regulators have largely implemented key provisions of Title VII, although certain final regulations have only been in place a short period of time and others have not been finalized. Through this rulemaking process, these regulators collectively have adopted or proposed, among other things, regulations relating to reporting and record-keeping obligations, margin and capital requirements, the scope of registration and the

central clearing and exchange trading requirements for certain over-the-counter derivatives. The CFTC has also issued rules to enhance the oversight of clearing and trading entities. The CFTC, along with other regulators, including the Federal Reserve, have also issued final rules with respect to margin requirements for uncleared derivatives transactions.

State Street Bank has registered provisionally with the CFTC as a swap dealer. As a provisionally registered swap dealer, State Street Bank is subject to significant regulatory obligations regarding its swap activity and the supervision, examination and enforcement powers of the CFTC and other regulators. The CFTC has granted State Street Bank a limited-purpose swap dealer designation. Under this limited-purpose designation, interest-rate swap activity engaged in by State Street Bank's Global Treasury group is not subject to certain of the swap regulatory requirements otherwise applicable to swaps entered into by a registered swap dealer, subject to a number of conditions. For all other swap transactions, our swap activities remain subject to all applicable swap dealer regulations.

#### **Money Market Funds**

The SEC has adopted amendments to the regulations governing money market funds to address potential systemic risks and improve transparency for money market fund investors. Among other things, the amendments require a floating net asset value for institutional prime money market funds (i.e., money market funds that are either not restricted to natural person investors or not restricted to investing primarily in U.S. government securities) and permit (and in some cases require) all money market funds to impose redemption fees and gates under certain circumstances. As a result of these reforms, money market funds may be required to take certain steps that will affect their structure and/or operations, which could in turn affect the liquidity, marketability and return potential of such funds. Full conformance with these amendments was required by October 14, 2016.

Money market reforms are also being introduced in Europe in 2018 and 2019. The SEC's amended regulations, and the potential reforms in Europe, could alter the business models of money market fund sponsors and asset managers, including many of our servicing clients and SSGA, and may result in reduced levels of investment in money market funds. As a result, these requirements may have an adverse impact on our business, our operations or our consolidated results of operations.

#### **Subsidiaries**

The Federal Reserve is the primary federal banking agency responsible for regulating us and our subsidiaries, including State Street Bank, with respect to both our U.S. and non-U.S. operations.

Our banking subsidiaries are subject to supervision and examination by various regulatory authorities. State Street Bank is a member of the Federal Reserve System, its deposits are insured by the FDIC and it is subject to applicable federal and state banking laws and to supervision and examination by the Federal Reserve, as well as by the Massachusetts Commissioner of Banks, the FDIC, and the regulatory authorities of those states and countries in which State Street Bank operates a branch. Our other subsidiary trust companies are subject to supervision and examination by the OCC, the Federal Reserve or by the appropriate state banking regulatory authorities of the states in which they are organized and operate. Our non-U.S. banking subsidiaries are subject to regulation by the regulatory authorities of the countries in which they operate.

We and our subsidiaries that are not subsidiaries of State Street Bank are affiliates of State Street Bank under federal banking laws, which impose restrictions on various types of transactions, including loans, extensions of credit, investments or asset purchases by or from State Street Bank, on the one hand, to us and those of our subsidiaries, on the other. Transactions of this kind between State Street Bank and its affiliates are limited with respect to each affiliate to 10% of State Street Bank's capital and surplus, as defined by the aforementioned banking laws, and to 20% in the aggregate for all affiliates, and in some cases are also subject to strict collateral requirements. Derivatives, securities borrowing and securities lending transactions between State Street Bank and its affiliates became subject to these restrictions pursuant to the Dodd-Frank Act. The Dodd-Frank Act also expanded the scope of transactions required to be collateralized. In addition, the Volcker rule generally prohibits similar transactions between the Parent Company or any of its affiliates and covered funds for which we or any of our affiliates serve as the investment manager, investment adviser, commodity trading advisor or sponsor and other covered funds organized and offered pursuant to specific exemptions in the final Volcker rule regulations.

Federal law also requires that certain transactions by a bank with affiliates be on terms and under circumstances, including credit standards, that are substantially the same, or at least as favorable to the bank, as those prevailing at the time for comparable transactions involving other non-affiliated companies. Alternatively, in the absence of comparable transactions, the transactions must be on terms and under circumstances, including credit standards, that in good faith would be offered to, or would apply to, non-affiliated companies.

State Street Bank is also prohibited from engaging in certain tie-in arrangements in connection with any extension of credit or lease or sale of property or furnishing of services. Federal law provides as well for a depositor preference on amounts realized from the liquidation or other resolution of any depository institution insured by the FDIC.

Our subsidiaries, SSGA FM and SSGA Ltd., act as investment advisers to investment companies registered under the Investment Company Act of 1940. SSGA FM, incorporated in Massachusetts in 2001 and headquartered in Boston, Massachusetts, is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940 and is registered with the CFTC as a commodity trading adviser and pool operator. SSGA Ltd., incorporated in 1990 as a U.K. limited company and domiciled in the U.K., is also registered with the SEC as an investment adviser under the Investment Advisers Act of 1940. SSGA Ltd. is also authorized and regulated by the FCA and is an investment firm under the MiFID. Our subsidiary, State Street Global Advisors Asia Limited (SSGA Asia), a Hong Kong incorporated company, is registered as an investment adviser with the SEC and additionally is licensed by the Securities and Futures Commission of Hong Kong to perform a variety of activities, including asset management. SSGA Asia also holds permits as a qualified foreign institutional investor (QFII) and a renminbi qualified foreign institutional investor (RQFII), approved by the Securities Regulatory Commission in the People's Republic of China, and in Korea is registered with the Financial Services Commission as a cross-border investment advisory company and a cross-border discretionary investment management company. In addition, a major portion of our investment management activities are conducted by State Street Global Advisors Trust Company, which is a subsidiary of State Street Bank and a Massachusetts chartered trust company subject to the supervision of the Massachusetts Commissioner of Banks and the Federal Reserve with respect to these activities. Many aspects of our investment management activities are subject to federal and state laws and regulations primarily intended to benefit the investment holder, rather than our shareholders.

These laws and regulations generally grant supervisory agencies and bodies broad administrative powers, including the power to limit or restrict us from conducting our investment management activities in the event that we fail to comply with such laws and regulations, and examination authority. Our business related to investment management and trusteeship of collective trust funds and separate accounts offered to employee benefit plans is subject to ERISA, and is regulated by the U.S. DOL.

State Street has two subsidiaries that operate as a U.S. broker/dealer and are registered as such with the SEC, are subject to regulation by the SEC (including the SEC's net capital rule) and are members of the Financial Industry Regulatory Authority, a self-regulatory organization. State Street Global Advisors Funds Distributors LLC, (SSGAFD) operates as a limited purpose broker/dealer distributing and related marketing activities for SSGA's U.S. mutual funds and ETFs. SSGAFD also acts as a placement agent for certain private funds advised by SSGA FM. Our other U.S. broker/dealer is State Street Global Markets LLC (SSGM LLC) which provides agency execution services.

The U.K. broker/dealer business operates through our subsidiary, State Street Global Markets International Limited, which is registered in the U.K. as a regulated securities broker, is authorized and regulated by the FCA and is an investment firm under the MiFID, and is a member of the London Stock Exchange. In accordance with the rules of the FCA, the U.K. broker/dealer publishes information on its risk management objectives and on policies associated with its regulatory capital requirements and resources.

Our activities as a futures commission merchant are subject to regulation by the CFTC in the U.S. and various regulatory authorities internationally, as well as the membership requirements of the applicable clearinghouses. In addition, we have a subsidiary registered with the CFTC as a swap execution facility.

Our businesses, including our investment management and securities and futures businesses, are also regulated extensively by non-U.S. governments, securities exchanges, self-regulatory organizations, central banks and regulatory bodies, especially in those jurisdictions in which we maintain an office. For instance, among others, the FCA, the U.K. PRA and the Bank of England regulate our activities in the U.K.; the Central Bank of Ireland regulates our activities in Ireland; the German Federal Financial Supervisory Authority regulates our activities in Germany; the Commission de Surveillance du Secteur Financier regulates our activities in Luxembourg; our German banking group is also subject to direct supervision by the European Central Bank under the ECB Single Supervisory Mechanism; the Securities and Futures Commission regulates our asset management activities in Hong Kong; the Australian Prudential Regulation Authority and the Australian Securities and Investments Commission regulate our activities in Australia; and the Financial Services Agency and the Bank of Japan regulate our activities in Japan. We have established policies, procedures, and systems designed to comply with the requirements of these organizations. However, as a global financial services institution, we face complexity, costs and risks related to regulation.

The majority of our non-U.S. asset servicing operations are conducted pursuant to the Federal Reserve's Regulation K through State Street Bank's Edge Act subsidiary or through international branches of State Street Bank. An Edge Act corporation is a corporation organized under federal law that conducts foreign business activities. In general, banks may not make investments in their Edge Act corporations (and similar state law corporations) that exceed 20% of their capital and surplus, as defined, and the investment of any amount in excess of 10% of capital and surplus requires the prior approval of the Federal Reserve.

In addition to our non-U.S. operations conducted pursuant to Regulation K, we also make new investments abroad directly (through us or through our non-banking subsidiaries) pursuant to the Federal Reserve's Regulation Y, or through international bank branch expansion, neither of which is subject to the investment limitations applicable to Edge Act subsidiaries.

Additionally, Massachusetts has its own bank holding company statute, under which State Street, among other things, may be required to obtain prior approval by the Massachusetts Board of Bank Incorporation for an acquisition of more than 5% of any additional bank's voting shares, or for other forms of bank acquisitions.

#### **Anti-Money Laundering and Financial Transparency**

We and certain of our subsidiaries are subject to the Bank Secrecy Act of 1970, as amended by the USA PATRIOT Act of 2001, and related regulations, which contain AML and financial transparency provisions and which require implementation of an AML compliance program, including processes for verifying client identification and monitoring client transactions and detecting and reporting suspicious activities. AML laws outside the U.S. contain similar requirements. We have implemented policies, procedures and internal controls that are designed to promote compliance with applicable AML laws and regulations. AML laws and regulations applicable to our operations may be more stringent than similar requirements applicable to our non-regulated competitors or financial institutions principally operating in other jurisdictions. Compliance with applicable AML and related requirements is a common area of review for financial regulators, and any failure by us to comply with these requirements could result in fines, penalties, lawsuits, regulatory sanctions, difficulties in obtaining governmental approvals, restrictions on our business activities or harm to our reputation.

On June 1, 2015, we entered into a written agreement with the Federal Reserve and the Massachusetts Division of Banks relating to

deficiencies identified in our compliance programs with the requirements of the Bank Secrecy Act, AML regulations and U.S. economic sanctions regulations promulgated by OFAC. As part of this agreement, we have been required to, among other things, implement improvements to our compliance programs and retain an independent firm to conduct a review of account and transaction activity to evaluate whether any suspicious activity was not previously reported. If we fail to comply with the terms of the written agreement, we may become subject to fines and other regulatory sanctions, which may have a material adverse effect on us.

#### **Deposit Insurance**

FDIC-insured depository institutions are required to pay deposit insurance assessments to the FDIC. The Dodd-Frank Act made permanent the general \$250,000 deposit insurance limit for insured deposits.

The FDIC's DIF is funded by assessments on insured depository institutions. The FDIC assesses DIF premiums based on an insured depository institution's average consolidated total assets, less the average tangible equity of the insured depository institution during the assessment period. For larger institutions, such as State Street Bank, assessments are determined based on regulatory ratings and forward-looking financial measures to calculate the assessment rate, which is subject to adjustments by the FDIC, and the assessment base.

The FDIC is required to determine whether and to what extent adjustments to the assessment base are appropriate for "custody banks" that satisfy specified institutional eligibility criteria. The FDIC has concluded that certain liquid assets could be excluded from the deposit insurance assessment base of custody banks. This has the effect of reducing the amount of DIF insurance premiums due from custody banks. State Street Bank is a custody bank for this purpose. The custody bank assessment adjustment may not exceed total transaction account deposits identified by the institution as being directly linked to a fiduciary or custody and safekeeping asset.

In March 2016, the FDIC issued a final rule that imposes on IDIs with at least \$10 billion in assets, which includes State Street Bank, a surcharge of 4.5 cents per \$100 per annum of their assessment base for deposit insurance, as defined by the FDIC, until the DIF reaches the required ratio of 1.35, which the FDIC estimates will occur in 2018. The surcharge took effect for the assessment period beginning July 2016.

#### **Prompt Corrective Action**

The FDIC Improvement Act of 1991 requires the appropriate federal banking regulator to take "prompt corrective action" with respect to a depository

institution if that institution does not meet certain capital adequacy standards, including minimum capital ratios. While these regulations apply only to banks, such as State Street Bank, the Federal Reserve is authorized to take appropriate action against a parent bank holding company, such as our Parent Company, based on the under-capitalized status of any banking subsidiary. In certain instances, we would be required to guarantee the performance of a capital restoration plan if one of our banking subsidiaries were undercapitalized.

#### **Support of Subsidiary Banks**

Under Federal Reserve regulations, a bank holding company such as our Parent Company is required to act as a source of financial and managerial strength to its banking subsidiaries. This requirement was added to the Federal Deposit Insurance Act by the Dodd-Frank Act. This means that we have a statutory obligation to commit resources to State Street Bank and any other banking subsidiary in circumstances in which we otherwise might not do so absent such a requirement. In the event of bankruptcy, any commitment by us to a federal bank regulatory agency to maintain the capital of a banking subsidiary will be assumed by the bankruptcy trustee and will be entitled to a priority payment.

#### **Insolvency of an Insured U.S. Subsidiary Depository Institution**

If the FDIC is appointed the conservator or receiver of an FDIC-insured U.S. subsidiary depository institution, such as State Street Bank, upon its insolvency or certain other events, the FDIC has the ability to transfer any of the depository institution's assets and liabilities to a new obligor without the approval of the depository institution's creditors, enforce the terms of the depository institution's contracts pursuant to their terms or repudiate or disaffirm contracts or leases to which the depository institution is a party. Additionally, the claims of holders of deposit liabilities and certain claims for administrative expenses against an insured depository institution would be afforded priority over other general unsecured claims against such an institution, including claims of debt holders of the institution and, under current interpretation, depositors in non-U.S. branches and offices, in the liquidation or other resolution of such an institution by any receiver. As a result, such persons would be treated differently from and could receive, if anything, substantially less than the depositors in U.S. offices of the depository institution.

#### **ECONOMIC CONDITIONS AND GOVERNMENT POLICIES**

Economic policies of the U.S. government and its agencies influence our operating environment. Monetary policy conducted by the Federal Reserve

directly affects the level of interest rates, which may affect overall credit conditions of the economy. Monetary policy is applied by the Federal Reserve through open market operations in U.S. government securities, changes in reserve requirements for depository institutions, and changes in the discount rate and availability of borrowing from the Federal Reserve. Government regulation of banks and bank holding companies is intended primarily for the protection of depositors of the banks, rather than for the shareholders of the institutions and therefore may, in some cases, be adverse to the interests of those shareholders. We are similarly affected by the economic policies of non-U.S. government agencies, such as the ECB.

#### **CYBER RISK MANAGEMENT**

In October 2016, the Federal Reserve, FDIC and OCC issued an advance notice of proposed rulemaking regarding enhanced cyber risk management standards, which would apply to a wide range of large financial institutions and their third-party service providers, including State Street and its banking subsidiaries. The proposed standards would expand existing cybersecurity regulations and guidance to focus on cyber risk governance and management; management of internal and external dependencies; and incident response, cyber resilience and situational awareness. In addition, the proposal contemplates more stringent standards for institutions with systems that are critical to the financial sector.

#### **STATISTICAL DISCLOSURE BY BANK HOLDING COMPANIES**

The following information, included under Items 6, 7 and 8 of this Form 10-K, is incorporated by reference herein:

“Selected Financial Data” table (Item 6) - presents return on average common equity, return on average assets, common dividend payout and equity-to-assets ratios.

“Distribution of Average Assets, Liabilities and Shareholders’ Equity; Interest Rates and Interest Differential” table (Item 8) - presents consolidated average balance sheet amounts, related fully taxable-equivalent interest earned and paid, related average yields and rates paid and changes in fully taxable-equivalent interest income and interest expense for each major category of interest-earning assets and interest-bearing liabilities.

“Investment Securities” section included in Management’s Discussion and Analysis (Item 7) and Note 3, “Investment Securities,” to the consolidated financial statements (Item 8) - disclose information regarding book values, market values, maturities and weighted-average yields of securities (by category).

Note 4, “Loans and Leases,” to the consolidated financial statements (Item 8) - discloses our policy for placing loans and leases on non-accrual status.

“Loans and Leases” section included in Management’s Discussion and Analysis (Item 7) and Note 4, “Loans and Leases,” to the consolidated financial statements (Item 8) - disclose distribution of loans, loan maturities and sensitivities of loans to changes in interest rates.

“Loans and Leases” and “Cross-Border Outstandings” sections of Management’s Discussion and Analysis (Item 7) - disclose information regarding cross-border outstandings and other loan concentrations of State Street.

“Credit Risk Management” section included in Management’s Discussion and Analysis (Item 7) and Note 4, “Loans and Leases,” to the consolidated financial statements (Item 8) - present the allocation of the allowance for loan and lease losses, and a description of factors which influenced management’s judgment in determining amounts of additions or reductions to the allowance, if any, charged or credited to results of operations.

“Distribution of Average Assets, Liabilities and Shareholders’ Equity; Interest Rates and Interest Differential” table (Item 8) - discloses deposit information.

Note 8, “Short-Term Borrowings,” to the consolidated financial statements (Item 8) - discloses information regarding short-term borrowings of State Street.

## ITEM 1A. RISK FACTORS

### Forward-Looking Statements

This Form 10-K, as well as other reports and proxy materials submitted by us under the Securities Exchange Act of 1934, registration statements filed by us under the Securities Act of 1933, our annual report to shareholders and other public statements we may make, may contain statements (including statements in the Management's Discussion and Analysis included in such reports, as applicable) that are considered "forward-looking statements" within the meaning of U.S. securities laws, including statements about our goals and expectations regarding our business, financial and capital condition, results of operations, strategies, cost savings and transformation initiatives, investment portfolio performance, dividend and stock purchase programs, outcomes of legal proceedings, market growth, acquisitions, joint ventures and divestitures, client growth and new technologies, services and opportunities, as well as industry, regulatory, economic and market trends, initiatives and developments, the business environment and other matters that do not relate strictly to historical facts.

Terminology such as "plan," "expect," "intend," "objective," "forecast," "outlook," "believe," "priority," "anticipate," "estimate," "seek," "may," "will," "trend," "target," "strategy" and "goal," or similar statements or variations of such terms, are intended to identify forward-looking statements, although not all forward-looking statements contain such terms.

Forward-looking statements are subject to various risks and uncertainties, which change over time, are based on management's expectations and assumptions at the time the statements are made, and are not guarantees of future results. Management's expectations and assumptions, and the continued validity of the forward-looking statements, are subject to change due to a broad range of factors affecting the national and global economies, regulatory environment and the equity, debt, currency and other financial markets, as well as factors specific to State Street and its subsidiaries, including State Street Bank. Factors that could cause changes in the expectations or assumptions on which forward-looking statements are based cannot be foreseen with certainty and include, but are not limited to:

- the financial strength of the counterparties with which we or our clients do business and to which we have investment, credit or financial exposures that our clients have as a result of our acts as their agent, including an asset manager;
- increases in the volatility of, or declines in the level of, our NII, changes in the composition or valuation of the assets recorded in our consolidated statement of condition (and our

ability to measure the fair value of investment securities) and changes in the manner in which we fund those assets;

- the liquidity of the U.S. and international securities markets, particularly the markets for fixed-income securities and inter-bank credits; the liquidity of the assets on our balance sheet and changes or volatility in the sources of such funding, particularly the deposits of our clients; and demands upon our liquidity, including the liquidity demands and requirements of our clients;
- the level and volatility of interest rates, the valuation of the U.S. dollar relative to other currencies in which we record revenue or accrue expenses and the performance and volatility of securities, credit, currency and other markets in the U.S. and internationally; and the impact of monetary and fiscal policy in the U.S. and internationally on prevailing rates of interest and currency exchange rates in the markets in which we provide services to our clients;
- the credit quality, credit-agency ratings and fair values of the securities in our investment securities portfolio, a deterioration or downgrade of which could lead to other-than-temporary impairment of the respective securities and the recognition of an impairment loss in our consolidated statement of income;
- our ability to attract deposits and other low-cost, short-term funding, our ability to manage the level and pricing of such deposits and the relative portion of our deposits that are determined to be operational under regulatory guidelines and our ability to deploy deposits in a profitable manner consistent with our liquidity needs, regulatory requirements and risk profile;
- the manner and timing with which the Federal Reserve and other U.S. and foreign regulators implement or reevaluate the regulatory framework applicable to our operations (as well as changes to that framework), including implementation or modification of the Dodd-Frank Act and related stress testing and resolution planning requirements, implementation of international standards applicable to financial institutions, such as those proposed by the Basel Committee and European legislation (such as the AIFMD, UCITS, the Money Market Funds Regulation and MiFID II / MiFIR); among other consequences, these regulatory changes impact the levels of regulatory capital and liquidity we must maintain, acceptable levels of credit exposure to third parties, margin requirements applicable to derivatives, restrictions on banking and financial activities and the manner in which

we structure and implement our global operations and servicing relationships. In addition, our regulatory posture and related expenses have been and will continue to be affected by changes in regulatory expectations for global systemically important financial institutions applicable to, among other things, risk management, liquidity and capital planning, resolution planning, compliance programs, and changes in governmental enforcement approaches to perceived failures to comply with regulatory or legal obligations;

- adverse changes in the regulatory ratios that we are, or will be, required to meet, whether arising under the Dodd-Frank Act or implementation of international standards applicable to financial institutions, such as those proposed by the Basel Committee, or due to changes in regulatory positions, practices or regulations in jurisdictions in which we engage in banking activities, including changes in internal or external data, formulae, models, assumptions or other advanced systems used in the calculation of our capital or liquidity ratios that cause changes in those ratios as they are measured from period to period;
- requirements to obtain the prior approval or non-objection of the Federal Reserve or other U.S. and non-U.S. regulators for the use, allocation or distribution of our capital or other specific capital actions or corporate activities, including, without limitation, acquisitions, investments in subsidiaries, dividends and stock purchases, without which our growth plans, distributions to shareholders, share repurchase programs or other capital or corporate initiatives may be restricted;
- changes in law or regulation, or the enforcement of law or regulation, that may adversely affect our business activities or those of our clients or our counterparties, and the products or services that we sell, including additional or increased taxes or assessments thereon, capital adequacy requirements, margin requirements and changes that expose us to risks related to the adequacy of our controls or compliance programs;
- economic or financial market disruptions in the U.S. or internationally, including those which may result from recessions or political instability; for example, the U.K.'s decision to exit from the European Union may continue to disrupt financial markets or economic growth in Europe or potential changes in bi-lateral and multi-lateral trade agreements proposed by the U.S.;
- our ability to create cost efficiencies through changes in our operational processes and to

further digitize our processes and interfaces with our clients, any failure of which, in whole or in part, may among other things, reduce our competitive position, diminish the cost-effectiveness of our systems and processes or provide an insufficient return on our associated investment;

- our ability to promote a strong culture of risk management, operating controls, compliance oversight, ethical behavior and governance that meets our expectations and those of our clients and our regulators, and the financial, regulatory, reputation and other consequences of our failure to meet such expectations;
- the impact on our compliance and controls enhancement programs associated with the appointment of a monitor under the deferred prosecution agreement with the DOJ and compliance consultant appointed under a settlement with the SEC, including the potential for such monitor and compliance consultant to require changes to our programs or to identify other issues that require substantial expenditures, changes in our operations, or payments to clients or reporting to U.S. authorities;
- the results of our review of our billing practices, including additional findings or amounts we may be required to reimburse clients, as well as potential consequences of such review, including damage to our client relationships or our reputation and adverse actions by governmental authorities;
- the results of, and costs associated with, governmental or regulatory inquiries and investigations, litigation and similar claims, disputes, or civil or criminal proceedings;
- changes or potential changes in the amount of compensation we receive from clients for our services, and the mix of services provided by us that clients choose;
- the large institutional clients on which we focus are often able to exert considerable market influence and have diverse investment activities, and this, combined with strong competitive market forces, subjects us to significant pressure to reduce the fees we charge, to potentially significant changes in our AUCA or our AUM in the event of the acquisition or loss of a client, in whole or in part, and to potentially significant changes in our fee revenue in the event a client re-balances or changes its investment approach or otherwise re-directs assets to lower- or higher-fee asset classes;
- the potential for losses arising from our investments in sponsored investment funds;

- the possibility that our clients will incur substantial losses in investment pools for which we act as agent, the possibility of significant reductions in the liquidity or valuation of assets underlying those pools and the potential that clients will seek to hold us liable for such losses;
- our ability to anticipate and manage the level and timing of redemptions and withdrawals from our collateral pools and other collective investment products;
- the credit agency ratings of our debt and depository obligations and investor and client perceptions of our financial strength;
- adverse publicity, whether specific to State Street or regarding other industry participants or industry-wide factors, or other reputational harm;
- our ability to control operational risks, data security breach risks and outsourcing risks, our ability to protect our intellectual property rights, the possibility of errors in the quantitative models we use to manage our business and the possibility that our controls will prove insufficient, fail or be circumvented;
- our ability to expand our use of technology to enhance the efficiency, accuracy and reliability of our operations and our dependencies on information technology and our ability to control related risks, including cyber-crime and other threats to our information technology infrastructure and systems (including those of our third-party service providers) and their effective operation both independently and with external systems, and complexities and costs of protecting the security of such systems and data;
- changes or potential changes to the competitive environment, including changes due to regulatory and technological changes, the effects of industry consolidation and perceptions of State Street as a suitable service provider or counterparty;
- our ability to complete acquisitions, joint ventures and divestitures, including the ability to obtain regulatory approvals, the ability to arrange financing as required and the ability to satisfy closing conditions;
- the risks that our acquired businesses and joint ventures will not achieve their anticipated financial, operational and product innovation benefits or will not be integrated successfully, or that the integration will take longer than anticipated, that expected synergies will not be achieved or unexpected negative synergies or liabilities will be experienced, that client and deposit retention goals will not be met, that other regulatory or operational challenges will be experienced, and that disruptions from the transaction will harm our relationships with our clients, our employees or regulators;
- our ability to recognize evolving needs of our clients and to develop products that are responsive to such trends and profitable to us, the performance of and demand for the products and services we offer, and the potential for new products and services to impose additional costs on us and expose us to increased operational risk;
- our ability to grow revenue, manage expenses, attract and retain highly skilled people and raise the capital necessary to achieve our business goals and comply with regulatory requirements and expectations;
- changes in accounting standards and practices; and
- the impact of the U.S. tax legislation enacted in 2017, and changes in tax legislation and in the interpretation of existing tax laws by U.S. and non-U.S. tax authorities that affect the amount of taxes due.

Actual outcomes and results may differ materially from what is expressed in our forward-looking statements and from our historical financial results due to the factors discussed in this section and elsewhere in this Form 10-K or disclosed in our other SEC filings. Forward-looking statements in this Form 10-K should not be relied on as representing our expectations or beliefs as of any time subsequent to the time this Form 10-K is filed with the SEC. We undertake no obligation to revise our forward-looking statements after the time they are made. The factors discussed herein are not intended to be a complete statement of all risks and uncertainties that may affect our businesses. We cannot anticipate all developments that may adversely affect our business or operations or our consolidated results of operations, financial condition or cash flows.

Forward-looking statements should not be viewed as predictions, and should not be the primary basis on which investors evaluate State Street. Any investor in State Street should consider all risks and uncertainties disclosed in our SEC filings, including our filings under the Securities Exchange Act of 1934, in particular our annual reports on Form 10-K, our quarterly reports on Form 10-Q, and our current reports on Form 8-K, or registration statements filed under the Securities Act of 1933, all of which are accessible on the SEC's website at [www.sec.gov](http://www.sec.gov) or on the "Investor Relations" section of our corporate website at [www.statestreet.com](http://www.statestreet.com).

## Risk Factors

In the normal course of our business activities, we are exposed to a variety of risks. The following is a discussion of various risk factors applicable to State Street. Additional information about our risk management framework is included under "Risk Management" in Management's Discussion and Analysis included under Item 7 of this Form 10-K. Additional risks beyond those described in Management's Discussion and Analysis or in the following discussion may apply to our activities or operations as currently conducted, or as we may conduct them in the future, or in the markets in which we operate or may in the future operate.

### **Credit and Counterparty, Liquidity and Market Risks**

**We assume significant credit risk to counterparties, many of which are major financial institutions. These financial institutions and other counterparties may also have substantial financial dependencies with other financial institutions and sovereign entities. This credit exposure and concentration could expose us to financial loss.**

The financial markets are characterized by extensive interdependencies among numerous parties, including banks, central banks, broker/dealers, insurance companies and other financial institutions. These financial institutions also include collective investment funds, such as mutual funds, UCITS and hedge funds that share these interdependencies. Many financial institutions, including collective investment funds, also hold, or are exposed to, loans, sovereign debt, fixed-income securities, derivatives, counterparty and other forms of credit risk in amounts that are material to their financial condition. As a result of our own business practices and these interdependencies, we and many of our clients have concentrated counterparty exposure to other financial institutions and collective investment funds, particularly large and complex institutions, sovereign issuers, mutual funds, UCITS and hedge funds. Although we have procedures for monitoring both individual and aggregate counterparty risk, significant individual and aggregate counterparty exposure is inherent in our business, as our focus is on servicing large institutional investors.

In the normal course of our business, we assume concentrated credit risk at the individual obligor, counterparty or group level. Such concentrations may be material and can often exceed 10% of our consolidated total shareholders' equity. Our material counterparty exposures change daily, and the counterparties or groups of related counterparties to which our risk exposure exceeds 10% of our consolidated total shareholders' equity are also variable during any reported period; however,

our largest exposures tend to be to other financial institutions.

Concentration of counterparty exposure presents significant risks to us and to our clients because the failure or perceived weakness of our counterparties (or in some cases of our clients' counterparties) has the potential to expose us to risk of financial loss. Changes in market perception of the financial strength of particular financial institutions or sovereign issuers can occur rapidly, are often based on a variety of factors and are difficult to predict.

This was observed during the financial crisis, when economic, market, political and other factors contributed to the perception of many financial institutions and sovereign issuers as being less credit worthy. This led to credit downgrades of numerous large U.S. and non-U.S. financial institutions and several sovereign issuers (which exposure stressed the perceived creditworthiness of financial institutions, many of which invest in, accept collateral in the form of, or value other transactions based on the debt or other securities issued by sovereigns). These or other factors could again contribute to similar consequences or other market risks associated with reduced levels of liquidity. As a result, we may be exposed to increased counterparty risks, either resulting from our role as principal or because of commitments we make in our capacity as agent for some of our clients.

Additional areas where we experience exposure to credit risk include:

- *Short-term credit.* The degree of client demand for short-term credit tends to increase during periods of market turbulence, which may expose us to further counterparty-related risks. For example, investors in collective investment vehicles for which we act as custodian may experience significant redemption activity due to adverse market or economic news. Our relationship with our clients and the nature of the settlement process for some types of payments may result in the extension of short-term credit in such circumstances. We also provide committed lines of credit to support such activity. For some types of clients, we provide credit to allow them to leverage their portfolios, which may expose us to potential loss if the client experiences investment losses or other credit difficulties.
- *Industry and country risks.* In addition to our exposure to financial institutions, we are from time to time exposed to concentrated credit risk at an industry or country level. This concentration risk also applies to groups of unrelated counterparties that may have similar investment strategies involving one or more particular industries, regions, or other

characteristics. These unrelated counterparties may concurrently experience adverse effects to their performance, liquidity or reputation due to events or other factors affecting such investment strategies. Though potentially not material individually (relative to any one such counterparty), our credit exposures to such a group of counterparties could expose us to a single market or political event or a correlated set of events that, in the aggregate, could have a material adverse impact on our business.

- *Subcustodian risks.* Our use of unaffiliated subcustodians exposes us to credit risk, in addition to other risks, such as operational risk, dependencies on credit extensions and risks of the legal systems of the jurisdictions in which the subcustodians operate, each of which may be material. These risks are amplified due to changing regulatory requirements with respect to our financial exposures in the event those subcustodians are unable to return a client's assets, including, in some regulatory regimes, such as the E.U.'s UCITS and AIFM directives, requirements that we be responsible for resulting losses suffered by our clients.
- *Settlement risks.* We are exposed to settlement risks, particularly in our payments and foreign exchange activities. Those activities may lead to extension of credit and consequent losses in the event of a counterparty breach, failure to provide credit extensions or an operational error. Due to our membership in several industry clearing or settlement exchanges, we may be required to guarantee obligations and liabilities, or provide financial support, in the event that other members do not honor their obligations or default. Moreover, not all of our counterparty exposure is secured, and even when our exposure is secured, the realizable value of the collateral may have declined by the time we exercise our rights against that collateral. This risk may be particularly acute if we are required to sell the collateral into an illiquid or temporarily-impaired market or with respect to clients protected by sovereign immunity. We are exposed to risk of short-term credit or overdraft of our clients in connection with the process to facilitate settlement of trades and related foreign exchange activities, particularly when contractual settlement has been agreed with our clients. The occurrence of overdrafts at peak volatility could create significant credit exposure to our clients depending upon the value of such clients' collateral at the time.
- *Securities lending and repurchase agreement indemnification.* On behalf of clients enrolled in our securities lending program, we lend securities to banks, broker/dealers and other institutions. In the event of a failure of the borrower to return such securities, we typically agree to indemnify our clients for the amount by which the fair market value of those securities exceeds the proceeds of the disposition of the collateral recalled from the borrower in connection with such transaction. We also lend and borrow securities as riskless principal, and in connection with those transactions receive a security interest in securities from the borrowers of securities and advances as collateral to securities lenders. Borrowers are generally required to provide collateral equal to a contractually agreed percentage equal to or in excess of the fair market value of the loaned securities. As the fair market value of the loaned securities or collateral changes, additional collateral is provided by the borrower or collateral is returned to the borrower. In addition, our agency securities lending clients often purchase securities or other financial instruments from financial counterparties, including broker/dealers, under repurchase arrangements, frequently as a method of reinvesting the cash collateral they receive from lending their securities. Under these arrangements, the counterparty is obligated to repurchase these securities or financial instruments from the client at the same price (plus an agreed rate of return) at some point in the future. The value of the collateral is intended to exceed the counterparty's payment obligation, and collateral is adjusted daily to account for shortfall under, or excess over, the agreed-upon collateralization level. As with the securities lending program, we agree to indemnify our clients from any loss that would arise on a default by the counterparty under these repurchase arrangements if the proceeds from the disposition of the securities or other financial assets held as collateral are less than the amount of the repayment obligation by the client's counterparty. In such instances of counterparty default, for both securities lending and repurchase agreements, we, rather than our client, are exposed to the risks associated with collateral value.
- *Stable value arrangements.* We provide benefit-responsive contracts, known as wraps, to defined contribution plans that offer a stable value option to their participants. During the financial crisis, the book value of

obligations under many of these contracts exceeded the market value of the underlying portfolio holdings. Concerns regarding the portfolio of investments protected by such contracts, or regarding the investment manager overseeing such an investment option, may result in redemption demands from stable value products covered by benefit-responsive contracts at a time when the portfolio's market value is less than its book value, potentially exposing us to risk of loss.

- *U.S. municipal obligations remarketing credit facilities.* We provide credit facilities in connection with the remarketing of U.S. municipal obligations, potentially exposing us to credit exposure to the municipalities issuing such bonds and to their increased liquidity demands. In the current economic environment, where municipalities are subject to increased investor concern, the risks associated with such businesses increase.
- *Senior secured bank loans.* In recent years, we have increased our investment in senior secured bank loans, both in the U.S. and in Europe. We invest in these loans to non-investment grade borrowers through participation in loan syndications in the non-investment grade lending market. We rate these loans as "speculative" under our internal risk-rating framework, and these loans have significant exposure to credit losses relative to higher-rated loans. We are therefore at a higher risk of default with respect to these investments relative to other of our investments activities. In addition, unlike other financial institutions that may have an active role in managing individual loan compliance, our investment in these loans is generally as a passive investor with limited control. As this portfolio grows and becomes more seasoned, our allowance for loan losses related to these loans may increase through additional provisions for credit losses.
- *Unavailability of netting.* We are generally not able to net exposures across counterparties that are affiliated entities and may not be able in all circumstances to net exposures to the same legal entity across multiple products. As a consequence, we may incur a loss in relation to one entity or product even though our exposure to an entity's affiliates or across product types is over-collateralized.

Under evolving regulatory restrictions on credit exposure we may be required to limit our exposures to specific issuers or counterparties or groups of counterparties, including financial institutions and

sovereign issuers, to levels that we may currently exceed. These credit exposure restrictions under such evolving regulations may adversely affect our businesses, may require that we expand our credit exposure to a broader range of issuers and counterparties, including issuers and counterparties that represent increased credit risk and may require that we modify our operating models or the policies and practices we use to manage our consolidated statement of condition. The effects of these considerations may increase when evaluated under a stressed environment in stress testing, including CCAR. In addition, we are an adherent to the ISDA 2015 Universal Resolution Stay Protocol and as such are subject to restrictions against the exercise of rights and remedies against fellow adherents, including other major financial institutions, in the event they or an affiliate of theirs enters into resolution. Although our overall business is subject to these factors, several of our activities are particularly sensitive to them, including our currency trading business and our securities finance business.

Given the limited number of strong counterparties in the current market, we are not able to mitigate all of our and our clients' counterparty credit risk.

**Our investment securities portfolio, consolidated financial condition and consolidated results of operations could be adversely affected by changes in market factors including interest rates, credit spreads and credit performance.**

Our investment securities portfolio represented approximately 41% of our total assets as of December 31, 2017. The gross interest income associated with our investment portfolio represented approximately 15% of our total gross revenue for the year ended December 31, 2017 and has represented as much as 30% of our total gross revenue in the fiscal years since 2007. As such, our consolidated financial condition and results of operations are materially exposed to the risks associated with our investment portfolio, including, without limitation, changes in interest rates, credit spreads, credit performance (including risk of default), credit ratings, our access to liquidity, foreign exchange markets, mark-to-market valuations, and our ability to profitably manage changes in repayment rates of principal with respect to these securities. Despite recent increases to interest rates in the U.S., the continued low interest-rate environment that has persisted since the financial crisis began in mid-2007 limits our ability to achieve a NIM consistent with our historical averages. Any further increases in interest rates in the U.S. have the potential to improve NII and NIM over time. However, any such improvement could be mitigated due to a greater disparity between interest rates in the U.S. and international markets, especially to the extent that interest rates remain low

in Europe and Japan. Higher interest rates could also reduce mark-to-market valuations further. In addition, new and proposed regulatory liquidity standards, such as the LCR, require that we maintain minimum levels of high quality liquid assets in our investment portfolio, which generally generate lower rates of return than other investment assets. This has resulted in increased levels of high quality liquid assets as a percentage of our investment portfolio and an associated negative impact on our NII and our NIM. As a result of this we may not be able to attain our historical levels of NII and NIM. For additional information regarding these liquidity requirements, refer to the "Liquidity Coverage Ratio and Net Stable Funding Ratio" section of "Supervision and Regulation" included under Item 1, Business, of this Form 10-K. We may enter into derivative transactions to hedge or manage our exposure to interest rate risk, as well as other risks, such as foreign exchange risk and credit risk. Derivative instruments that we hold for these or other purposes may not achieve their intended results and could result in unexpected losses or stresses on our liquidity or capital resources.

Our investment securities portfolio represents a greater proportion of our consolidated statement of condition and our loan and lease portfolios represent a smaller proportion (approximately 10% of our total assets as of December 31, 2017), in comparison to many other major financial institutions. In some respects, the accounting and regulatory treatment of our investment securities portfolio may be less favorable to us than a more traditional held-for-investment lending portfolio. For example, under the Basel III final rule, after-tax changes in the fair value of AFS investment securities, such as those which represent a majority of our investment portfolio, are included in tier 1 capital. Since loans held for investment are not subject to a fair value accounting framework, changes in the fair value of loans (other than incurred credit losses) are not similarly included in the determination of tier 1 capital under the Basel III final rule. Due to this differing treatment, we may experience increased variability in our tier 1 capital relative to other major financial institutions whose loan-and-lease portfolios represent a larger proportion of their consolidated total assets than ours.

Additional risks associated with our investment portfolio include:

- *Asset class concentration.* Our investment portfolio continues to have significant concentrations in several classes of securities, including agency residential MBS, commercial MBS and other ABS, and securities with concentrated exposure to consumers. These classes and types of securities experienced significant liquidity, valuation and credit quality deterioration

during the financial crisis that began in mid-2007. We also hold non-U.S. MBS and ABS with exposures to European countries, whose sovereign-debt markets have experienced increased stress at times since 2011 and may continue to experience stress in the future. For further information, refer to the risk factor titled "*Our businesses have significant European operations, and disruptions in European economies could have an adverse effect on our consolidated results of operations or financial condition*".

Further, we hold a large portfolio of U.S. state and municipal bonds. In view of the budget deficits that a number of states and municipalities currently face, the risks associated with this portfolio are significant.

- *Effects of market conditions.* If market conditions deteriorate, our investment portfolio could experience a decline in market value, whether due to a decline in liquidity or an increase in the yield required by investors to hold such securities, regardless of our credit view of our portfolio holdings. For example, we recorded significant losses not related to credit in connection with the consolidation of our off-balance sheet asset-backed commercial paper conduits in 2009 and the repositioning of our investment portfolio in 2010. In addition, in general, deterioration in credit quality, or changes in management's expectations regarding repayment timing or in management's investment intent to hold securities to maturity, in each case with respect to our portfolio holdings, could result in OTTI. Similarly, if a material portion of our investment portfolio were to experience credit deterioration, our capital ratios as calculated pursuant to the Basel III final rule could be adversely affected. This risk is greater with portfolios of investment securities that contain credit risk than with holdings of U.S. Treasury securities.
- *Effects of interest rates.* Our investment portfolio is further subject to changes in both U.S. and non-U.S. (primarily in Europe) interest rates, and could be negatively affected by changes in those rates, whether or not expected. This is particularly true in the case of a quicker-than-anticipated increase in interest rates, which would decrease market values in the near-term, or monetary policy that results in persistently low or negative rates of interest on certain investments. The latter has been the case, for example, with respect to ECB monetary policy, including negative interest rates in

some jurisdictions, with associated negative effects on our investment portfolio reinvestment, NII and NIM. The effect on our NII has been exacerbated by the effects in recent fiscal years, but not in 2017, of the strong U.S. dollar relative to other currencies, particularly the Euro. If European interest rates remain low or decrease and the U.S. dollar strengthens relative to the Euro, the negative effects on our NII likely will continue or increase. The overall level of NII can also be impacted by the size of our deposit base, as further increases in interest rates could lead to reduced deposit levels and also lower overall NII. Further, a reduction in deposit levels could increase the requirements under the regulatory liquidity standards requiring us to invest a greater proportion of our investment portfolio holdings in high quality liquid assets that have lower yields than other investable assets. See also, "Our business activities expose us to interest-rate risk" below.

#### **Our business activities expose us to interest-rate risk.**

In our business activities, we assume interest-rate risk by investing short-term deposits received from our clients in our investment portfolio of longer- and intermediate-term assets. Our NII and NIM are affected by among other things, the levels of interest rates in global markets, changes in the relationship between short- and long-term interest rates, the direction and speed of interest-rate changes and the asset and liability spreads relative to the currency and geographic mix of our interest-earning assets and interest-bearing liabilities. These factors are influenced, among other things, by a variety of economic and market forces and expectations, including monetary policy and other activities of central banks, such as the Federal Reserve and ECB, that we do not control. Our ability to anticipate changes in these factors or to hedge the related on- and off- balance sheet exposures, and the cost of any such hedging activity, can significantly influence the success of our asset-and-liability management activities and the resulting level of our NII and NIM. The impact of changes in interest rates and related factors will depend on the relative duration and fixed- or floating- rate nature of our assets and liabilities. Sustained lower interest rates, a flat or inverted yield curve and narrow credit spreads generally have a constraining effect on our NII. In addition, our ability to change deposit rates in response to changes in interest rates and other market and related factors is limited by client relationship considerations. For additional information about the effects on interest rates on our business, refer to "Financial Condition - Market Risk Management - Asset-and-Liability

Management Activities" in Management's Discussion and Analysis included under Item 7 of this Form 10-K.

**If we are unable to effectively manage our liquidity, including by continuously attracting deposits and other short-term funding, our consolidated financial condition, including our regulatory capital ratios, our consolidated results of operations and our business prospects, could be adversely affected.**

Liquidity management, including on an intra-day basis, is critical to the management of our consolidated statement of condition and to our ability to service our client base. We generally use our liquidity to:

- meet clients' demands for return of their deposits;
- extend credit to our clients in connection with our investor services businesses; and
- fund the pool of long- and intermediate-term assets that are included in the investment securities carried in our consolidated statement of condition.

Because the demand for credit by our clients is difficult to predict and control, and may be at its peak at times of disruption in the securities markets, and because the average maturity of our investment securities portfolio is longer than the contractual maturity of our client deposit base, we need to continuously attract, and are dependent on access to, various sources of short-term funding. During periods of market disruption, the level of client deposits held by us has in recent years tended to increase; however, since such deposits are considered to be transitory, we have historically deposited so-called excess deposits with U.S. and non-U.S. central banks and in other highly liquid but low-yielding instruments. These levels of excess client deposits, as a consequence, have increased our NII but have adversely affected our NIM.

In managing our liquidity, our primary source of short-term funding is client deposits, which are predominantly transaction-based deposits by institutional investors. Our ability to continue to attract these deposits, and other short-term funding sources such as certificates of deposit, is subject to variability based on a number of factors, including volume and volatility in global financial markets, the relative interest rates that we are prepared to pay for these deposits, the perception of safety of these deposits or short-term obligations relative to alternative short-term investments available to our clients, including the capital markets, and the classification of certain deposits for regulatory purposes and related discussions we may have from time to time with clients regarding better balancing our clients' cash management needs with our economic and regulatory objectives.

The Parent Company is a non-operating holding company and generally maintains only limited cash and other liquid resources at any time primarily to meet anticipated near-term obligations. To effectively manage our liquidity we routinely transfer assets among affiliated entities, subsidiaries and branches. Internal or external factors, such as regulatory requirements and standards, including resolution planning, influence our liquidity management and may limit our ability to effectively transfer liquidity internally which could, among other things, restrict our ability to fund operations, dividends or stock repurchases, require us to seek external and potentially more costly capital and impact our liquidity position.

In addition, while not obligations of State Street, the investment products that we manage for third parties may be exposed to liquidity risks. These products may be funded on a short-term basis, or the clients participating in these products may have a right to the return of cash or assets on limited notice. These business activities include, among others, securities finance collateral pools, money market and other short-term investment funds and liquidity facilities utilized in connection with municipal bond programs. If clients demand a return of their cash or assets, particularly on limited notice, and these investment pools do not have the liquidity to support those demands, we could be forced to sell investment securities held by these asset pools at unfavorable prices, damaging our reputation as an asset manager and potentially exposing us to claims related to our management of the pools.

The availability and cost of credit in short-term markets are highly dependent on the markets' perception of our liquidity and creditworthiness. Our efforts to monitor and manage our liquidity risk, including on an intra-day basis, may not be successful or sufficient to deal with dramatic or unanticipated changes in the global securities markets or other event-driven reductions in liquidity. As a result of such events, among other things, our cost of funds may increase, thereby reducing our NII, or we may need to dispose of a portion of our investment securities portfolio, which, depending on market conditions, could result in a loss from such sales of investment securities being recorded in our consolidated statement of income.

**Our business and capital-related activities, including our ability to return capital to shareholders and purchase our capital stock, may be adversely affected by our implementation of regulatory capital and liquidity standards that we must meet or in the event our capital plan or post-stress capital ratios are determined to be insufficient as a result of regulatory capital stress testing.**

#### *Basel III and Dodd-Frank Act*

We are required to calculate our risk-based capital ratios under both the Basel III advanced approaches and the Basel III standardized approach, and we are subject to the more stringent of the risk-based capital ratios calculated under the advanced approaches and those calculated under the standardized approach in the assessment of our capital adequacy.

In implementing certain aspects of these capital regulations, we are making interpretations of the regulatory intent. The Federal Reserve may determine that we are not in compliance with the capital rules and may require us to take actions to come into compliance that could adversely affect our business operations, our regulatory capital structure, our capital ratios or our financial performance, or otherwise restrict our growth plans or strategies. In addition, banking regulators could change the Basel III final rule or their interpretations as they apply to us, including changes to these standards or interpretations made in regulations implementing provisions of the Dodd-Frank Act, which could adversely affect us and our ability to comply with the Basel III final rule.

Along with the Basel III final rule, banking regulators also introduced additional requirements, such as the SLR, LCR and the proposed NSFR.

For example, the specification of the various elements of the NSFR in the final rule could have a material effect on our business activities, including the management and composition of our investment securities portfolio and our ability to extend credit through committed facilities, loans to our clients or our principal securities lending activities. In addition, further capital and liquidity requirements are under consideration by U.S. and international banking regulators. Any of these rules could have a material effect on our capital and liquidity planning and related activities, including the management and composition of our investment securities portfolio and our ability to extend committed contingent credit facilities to our clients. The full effects of these rules, and of other regulatory initiatives related to capital or liquidity, on State Street and State Street Bank are subject to further regulatory guidance, action or rule-making.

#### *Systemic Importance*

As a G-SIB, we generally expect to be held to the most stringent provisions under the Basel III final rule. For example, we are subject to the Federal Reserve's final rules on the implementation of capital surcharges for U.S. G-SIBs, and on TLAC, LTD and clean holding company requirements for U.S. G-SIBs which we refer to as the "TLAC final rule". For additional information on these requirements, refer to the "Regulatory Capital Adequacy and Liquidity Standards" section under "Supervision and

Regulation” included under Item 1, Business, of this Form 10-K.

Not all of our competitors have similarly been designated as systemically important nor are all of them subject to the same degree of regulation as a bank or financial holding company, and therefore some of our competitors are not subject to the same additional capital requirements.

#### CCAR

We are required by the Federal Reserve to conduct periodic stress testing of our business operations and to develop an annual capital plan as part of the Federal Reserve’s Comprehensive Capital Analysis and Review (CCAR) process. That process, the severity and other characteristics of which may evolve from year-to-year, is used by the Federal Reserve to evaluate our management of capital, the adequacy of our regulatory capital and the requirement for us to maintain capital above our minimum regulatory capital requirements under stressed economic conditions. The results of the CCAR process are difficult to predict due, among other things, to the Federal Reserve’s use of proprietary stress models that differ from our internal models. The amounts of the planned capital actions in our capital plan in any year, including stock purchases and dividends, may be substantially reduced from the amounts included in prior capital plans. These reductions may reflect changes in one or more different factors, including but not limited to our business prospects and related capital needs, our capital position, proposed acquisitions or other uses of capital, the models used in our capital planning process, the supervisory models used by the Federal Reserve to stress our balance sheet, the Federal Reserve’s hypothetical economic scenarios for the CCAR process, the Federal Reserve’s CCAR instructions and the Federal Reserve’s supervisory expectations for the capital planning process. The Federal Reserve may object to our capital plan, or we may decide that we need to adjust our capital plan to avoid an objection by the Federal Reserve, potentially requiring us, as applicable, to revise our stress-testing or capital management approaches, resubmit our capital plan or postpone, cancel or alter our planned capital actions. In addition, changes in our business strategy, merger or acquisition activity or uses of capital could result in a change in our capital plan and its associated capital actions, and may require us to resubmit our capital plan to the Federal Reserve for its non-objection. We are also subject to asset quality reviews and stress testing by the ECB and in the future we may be subject to similar reviews and testing by other regulators.

Our implementation of capital and liquidity requirements, including our capital plan, may not be approved or may be objected to by the Federal

Reserve, and the Federal Reserve may impose capital requirements in excess of our expectations or require us to maintain levels of liquidity that are higher than we may expect and which may adversely affect our consolidated revenues. In the event that our implementation of capital and liquidity requirements under regulatory initiatives or our current capital structure are determined not to conform with current and future capital requirements, our ability to deploy capital in the operation of our business or our ability to distribute capital to shareholders or to purchase our capital stock may be constrained, and our business may be adversely affected. In addition, we may choose to forgo business opportunities, due to their impact on our capital plan or stress tests, including CCAR. Likewise, in the event that regulators in other jurisdictions in which we have banking subsidiaries determine that our capital or liquidity levels do not conform with current and future regulatory requirements, our ability to deploy capital, our levels of liquidity or our business operations in those jurisdictions may be adversely affected.

For additional information about the above matters, refer to “Business - Supervision and Regulation - Regulatory Capital Adequacy and Liquidity Standards” included under Item 1, Business, and “Financial Condition - Capital” in Management’s Discussion and Analysis included under Item 7 of this Form 10-K.

**Fee revenue represents a significant majority of our consolidated revenue and is subject to decline, among other things, in the event of a reduction in, or changes to, the level or type of investment activity by our clients.**

We rely primarily on fee-based services to derive our revenue. This contrasts with commercial banks that may rely more heavily on interest-based sources of revenue, such as loans. During 2017 total fee revenue represented approximately 80% of our total revenue. Fee revenue generated by our investment servicing and investment management businesses is augmented by trading services, securities finance and processing fees and other revenue.

The level of these fees is influenced by several factors, including the mix and volume of our AUCA and our AUM, the value and type of securities positions held (with respect to assets under custody) and the volume of portfolio transactions, and the types of products and services used by our clients. For example, reductions in the level of economic and capital markets activity tend to have a negative effect on our fee revenue, as these often result in reduced asset valuations and transaction volumes. They may also result in investor preference trends towards asset classes and markets deemed more secure,

such as cash or non-emerging markets, with respect to which our fee rates are often lower.

In addition, our clients include institutional investors, such as mutual funds, collective investment funds, UCITS, hedge funds and other investment pools, corporate and public retirement plans, insurance companies, foundations, endowments and investment managers. Economic, market or other factors that reduce the level or rates of savings in or with those institutions, either through reductions in financial asset valuations or through changes in investor preferences, could materially reduce our fee revenue and have a material adverse effect on our consolidated results of operations.

**Our businesses have significant European operations, and disruptions in European economies could have an adverse effect on our consolidated results of operations or financial condition.**

While the European economy made some progress towards recovery during 2017, concerns remain with regard to sovereign debt sustainability, interdependencies among financial institutions and sovereigns, the impacts of the British exit or potential other exits from the European Union, the planned unwinding of European Central Bank quantitative easing measures and political and other risks, such as relating to populism, refugee migration or terrorist threats, in one or more European nations. In addition, both divergence between the pace of monetary tightening in the U.S. and Europe and the recent strength of the Euro have led to increased uncertainty around the sustainability of the economic progress made in 2017 in Europe. Given the scope of our European operations, economic or market uncertainty, volatility, illiquidity or disruption resulting from these and related factors could have a material adverse impact on our consolidated results of operations or financial condition.

**Geopolitical and economic conditions and developments could adversely affect us, particularly if we face increased uncertainty and unpredictability in managing our businesses.**

Global credit and other financial markets can suffer from substantial volatility, illiquidity and disruption, particularly in the wake of geopolitical disruptions and as global monetary authorities begin to withdraw monetary policy easing measures. If such volatility, illiquidity or disruption were to result in an adverse economic environment in the U.S. or internationally or result in a lack of confidence in the financial stability of major developed and emerging markets, such developments could have an adverse effect on our business, as well as the businesses of our clients and our significant counterparties and could also increase the difficulty and unpredictability of aligning our business strategies, our infrastructure

and our operating costs in light of current and future market and economic conditions. These risks could be compounded by tighter monetary conditions, restrictions on free trade and political uncertainty in the U.S. and internationally.

Market disruptions can adversely affect our consolidated results of operations if the value of AUCA or AUM decline, while the costs of providing the related services remain constant or increase. These factors could reduce the profitability of our asset-based fee revenue and could also adversely affect our transaction-based revenue, such as revenues from securities finance and foreign exchange activities, and the volume of transactions that we execute for or with our clients. Further, the degree of volatility in foreign exchange rates can affect our foreign exchange trading revenue. In general, increased currency volatility tends to increase our market risk but also increases our opportunity to generate foreign exchange revenue. Conversely, periods of lower currency volatility tend to decrease our market risk but also decrease our foreign exchange revenue.

In addition, as our business grows globally and a significant percentage of our revenue is earned (and of our expenses paid) in currencies other than U.S. dollars, our exposure to foreign currency volatility could affect our levels of consolidated revenue, our consolidated expenses and our consolidated results of operations, as well as the value of our investment in our non-U.S. operations and our investment portfolio holdings. The extent to which changes in the strength of the U.S. dollar relative to other currencies affect our consolidated results of operations, including the degree of any offset between increases or decreases to both revenue and expenses, will depend upon the nature and scope of our operations and activities in the relevant jurisdictions during the relevant periods, which may vary from period to period.

As our product offerings expand, in part as we seek to take advantage of perceived opportunities arising under various regulatory reforms and resulting market changes, the degree of our exposure to various market and credit risks will evolve, potentially resulting in greater revenue volatility. We also will need to make additional investments to develop the operational infrastructure and to enhance our compliance and risk management capabilities to support these businesses, which may increase the operating expenses of such businesses or, if our control environment fails to keep pace with product expansion, result in increased risk of loss from such businesses.

**We may need to raise additional capital or debt in the future, which may not be available to us or may only be available on unfavorable terms.**

We may need to raise additional capital in order to maintain our credit ratings, in response to regulatory changes, including capital rules, or for other purposes, including financing acquisitions and joint ventures. In particular, the Federal Reserve's TLAC final rule, which goes into effect on January 1, 2019, will require State Street to maintain a minimum amount of eligible LTD outstanding, and we may need to issue more long-term debt in order to meet the minimum eligible LTD requirement.

However, our ability to access the capital markets, if needed, on a timely basis or at all will depend on a number of factors, such as the state of the financial markets and securities law requirements and standards. In the event of rising interest rates, disruptions in financial markets, negative perceptions of our business or our financial strength, or other factors that would increase our cost of borrowing, we cannot be sure of our ability to raise additional capital, if needed, on terms acceptable to us. Any diminished ability to raise additional capital, if needed, could adversely affect our business and our ability to implement our business plan, capital plan and strategic goals, including the financing of acquisitions and joint ventures and our efforts to maintain regulatory compliance.

**Any downgrades in our credit ratings, or an actual or perceived reduction in our financial strength, could adversely affect our borrowing costs, capital costs and liquidity and cause reputational harm.**

Major independent rating agencies publish credit ratings for our debt obligations based on their evaluation of a number of factors, some of which relate to our performance and other corporate developments, including financings, acquisitions and joint ventures, and some of which relate to general industry conditions. We anticipate that the rating agencies will continue to review our ratings regularly based on our consolidated results of operations and developments in our businesses, including regulatory considerations such as resolution planning. One or more of the major independent credit rating agencies have in the past downgraded, and may in the future downgrade, our credit ratings, or have negatively revised their outlook for our credit ratings. The current market and regulatory environment and our exposure to financial institutions and other counterparties, including sovereign entities, increase the risk that we may not maintain our current ratings, and we cannot provide assurance that we will continue to maintain our current credit ratings. Downgrades in our credit ratings may adversely affect our borrowing costs, our capital costs and our ability

to raise capital and, in turn, our liquidity. A failure to maintain an acceptable credit rating may also preclude us from being competitive in various products.

Additionally, our counterparties, as well as our clients, rely on our financial strength and stability and evaluate the risks of doing business with us. If we experience diminished financial strength or stability, actual or perceived, including the effects of market or regulatory developments, our announced or rumored business developments or consolidated results of operations, a decline in our stock price or a reduced credit rating, our counterparties may be less willing to enter into transactions, secured or unsecured, with us; our clients may reduce or place limits on the level of services we provide them or seek other service providers; or our prospective clients may select other service providers, all of which may have adverse effects on our reputation.

The risk that we may be perceived as less creditworthy relative to other market participants is higher in the current market environment, in which the consolidation, and in some instances failure, of financial institutions, including major global financial institutions, have resulted in a smaller number of much larger counterparties and competitors. If our counterparties perceive us to be a less viable counterparty, our ability to enter into financial transactions on terms acceptable to us or our clients, on our or our clients' behalf, will be materially compromised. If our clients reduce their deposits with us or select other service providers for all or a portion of the services we provide to them, our revenues will decrease accordingly.

***Operational, Business and Reputational Risks***

**We face extensive and changing government regulation in the U.S. and in foreign jurisdictions in which we operate, which may increase our costs and expose us to risks related to compliance.**

Most of our businesses are subject to extensive regulation by multiple regulatory bodies, and many of the clients to which we provide services are themselves subject to a broad range of regulatory requirements. These regulations may affect the scope of, and the manner and terms of delivery of, our services. As a financial institution with substantial international operations, we are subject to extensive regulation and supervisory oversight, both inside and outside of the U.S. This regulation and supervisory oversight affects, among other things, the scope of our activities and client services, our capital and organizational structure, our ability to fund the operations of our subsidiaries, our lending practices, our dividend policy, our common stock purchase actions, the manner in which we market our services, our acquisition activities and our interactions with

foreign regulatory agencies and officials.

In particular, State Street is registered with the Federal Reserve as a bank holding company pursuant to the Bank Holding Company Act of 1956. The Bank Holding Company Act generally limits the activities in which we and our non-banking subsidiaries may engage to managing or controlling banks and to activities considered to be closely related to banking. As a bank holding company that has elected to be treated as a financial holding company under the Bank Holding Company Act, State Street and some of our non-banking subsidiaries may also engage in a broader range of activities considered to be "financial in nature." Financial holding company status may be denied if State Street and its banking subsidiaries do not remain well capitalized and well managed or fail to comply with Community Reinvestment Act obligations. Currently, under the Bank Holding Company Act, we may not be able to engage in new activities or acquire shares or control of other businesses.

The U.S. President has issued an executive order that sets forth principles for the reform of the federal financial regulatory framework, and the Republican majority in Congress has also suggested an agenda for financial regulatory reform. It is too early to assess whether there will be any major changes in the regulatory environment or a rebalancing of the post financial crisis framework and what the impact will be on our results of operations or financial condition, including, without limitation, increased expenses or changes in the demand for our services, or on the U.S.-domestic or global economies or financial markets. We expect that our business will remain subject to extensive regulation and supervision. Several other aspects of the regulatory environment in which we operate, and related risks, are discussed below. Additional information is provided under "Supervision and Regulation" included under Item 1, Business, of this Form 10-K.

#### *Resolution Planning*

State Street, like other bank holding companies with total consolidated assets of \$50 billion or more, periodically submits a plan for rapid and orderly resolution in the event of material financial distress or failure commonly referred to as a resolution plan or a living will to the Federal Reserve and the FDIC under Section 165(d) of the Dodd-Frank Act. Through resolution planning, we seek, in the event of insolvency, to maintain State Street Bank's role as a key infrastructure provider within the financial system, while minimizing risk to the financial system and maximizing value for the benefit of our stakeholders. Significant management attention and resources are required in an effort to meet regulatory expectations

with respect to resolution planning.

In the event of material financial distress or failure, our preferred resolution strategy is the SPOE Strategy. Our resolution plan, including our implementation of the SPOE strategy with a secured support agreement, involves important risks, including that: (1) the SPOE Strategy and the obligations under the support agreement may result in the recapitalization of State Street Bank and the commencement of bankruptcy proceedings by the Parent Company at an earlier stage of financial stress than might otherwise occur without such mechanisms in place; (2) an expected effect of the SPOE Strategy, together with applicable TLAC regulatory requirements, is that State Street's losses will be imposed on Parent Company shareholders and the holders of long-term debt and other forms of TLAC securities currently outstanding or issued in the future by the Parent Company, as well as on any other Parent Company creditors, before any of its losses are imposed on the holders of the debt securities of certain of the Parent Company's operating subsidiaries or any of their depositors or creditors or before U.S. taxpayers are put at risk; (3) there can be no assurance that there would be sufficient recapitalization resources available to ensure that State Street Bank and our other material entities are adequately capitalized following the triggering of the requirements to provide capital and/or liquidity under the support agreement; and (4) there can be no assurance that credit rating agencies, in response to our resolution plan or the support agreement, will not downgrade, place on negative watch or change their outlook on our debt credit ratings, generally or on specific debt securities. Additional information about the SPOE Strategy, including related risks, is provided under "Resolution Planning" included under Item 1, Business, of this Form 10-K.

#### *Systemic Importance*

Our qualification in the U.S. as a SIFI, and our designation by the FSB as a G-SIB, to which certain regulatory capital surcharges may apply subjects us to incrementally higher capital and prudential requirements, increased scrutiny of our activities and potential further regulatory requirements or increased regulatory expectations than those applicable to some of the financial institutions with which we compete as a custodian or asset manager. This qualification and designation also has significantly increased, and may continue to increase, our expenses associated with regulatory compliance, including personnel and systems, as well as implementation and related costs to enhance our programs.

#### *Global and Non-U.S. Regulatory Requirements*

The breadth of our business activities, together with the scope of our global operations and varying

business practices in relevant jurisdictions, increase the complexity and costs of meeting our regulatory compliance obligations, including in areas that are receiving significant regulatory scrutiny. We are, therefore, subject to related risks of non-compliance, including fines, penalties, lawsuits, regulatory sanctions, difficulties in obtaining governmental approvals, limitations on our business activities or reputational harm, any of which may be significant. For example, the global nature of our client base requires us to comply with complex laws and regulations of multiple jurisdictions relating to economic sanctions and money laundering. In addition, we are required to comply not only with the U.S. Foreign Corrupt Practices Act, but also with the applicable anti-corruption laws of other jurisdictions in which we operate. Further, our global operating model requires we comply with outsourcing oversight requirements, including with respect to affiliated entities, and data security standards of multiple jurisdictions. Regulatory scrutiny of compliance with these and other laws and regulations is increasing. State Street faces sometimes inconsistent laws and regulations across the various jurisdictions in which we operate. The evolving regulatory landscape may interfere with our ability to conduct our operations, with our pursuit of a common global operating model or with our ability to compete effectively with other financial institutions operating in those jurisdictions or which may be subject to different regulatory requirements than apply to us. In particular, non-U.S. regulations and initiatives that may be inconsistent or conflict with current or proposed regulations in the U.S. could create increased compliance and other costs that would adversely affect our business, operations or profitability. Geopolitical events such as the U.K.'s planned exit from the European Union also have the potential to increase the complexity and cost of regulatory compliance.

In addition to U.S. regulatory initiatives we are further affected by non-U.S. regulatory initiatives, including, but not limited to, the AIFMD, the BRRD, the EMIR, GDPR, the UCITS directives, the Money Market Funds Regulation, MiFID II and MiFIR and the proposed E.U. risk reduction package. Recent, proposed or potential regulations in the U.S. and E.U. with respect to money market funds, short-term wholesale funding, such as repurchase agreements or securities lending, or other "shadow banking" activities, could also adversely affect not only our own operations but also the operations of the clients to which we provide services. In the E.U., the AIFMD and UCITS V increase the responsibilities and potential liabilities of custodians and depositories to certain of their clients for asset losses.

EMIR requires the reporting of all derivatives to a trade repository, the mandatory clearing of certain derivatives trades via a central counterparty

(including the exchange of margin) and risk mitigation techniques for derivatives not cleared via a central counterparty. State Street is likely to become indirectly subject to EMIR's risk mitigation obligations when it transacts with E.U. counterparties. EMIR will continue to impact our business activities, and increase costs, in various ways, some of which may be adverse. Further, the European Commission's proposal to introduce a proposed financial transaction tax or similar proposals elsewhere, if adopted, could materially affect the location and volume of financial transactions or otherwise alter the conduct of financial activities, any of which could have a material adverse effect on our business and on our consolidated results of operations or financial condition.

#### *Consequences of Regulatory Environment and Compliance Risks*

Domestic and international regulatory reform could limit our ability to pursue certain business opportunities, increase our regulatory capital requirements, alter the risk profile of certain of our core activities and impose additional costs on us, otherwise adversely affect our business, our consolidated results of operations or financial condition and have other negative consequences, including a reduction of our credit ratings. Different countries may respond to the market and economic environment in different and potentially conflicting manners, which could increase the cost of compliance for us.

The evolving regulatory environment, including changes to existing regulations and the introduction of new regulations, may also contribute to decisions we may make to suspend, reduce or withdraw from existing businesses, activities, markets or initiatives. In addition to potential lost revenue associated with any such suspensions, reductions or withdrawals, any such suspensions, reductions or withdrawals may result in significant restructuring or related costs or exposures.

If we do not comply with governmental regulations, we may be subject to fines, penalties, lawsuits, delays, or difficulties in obtaining regulatory approvals or restrictions on our business activities or harm to our reputation, which may significantly and adversely affect our business operations and, in turn, our consolidated results of operations. The willingness of regulatory authorities to impose meaningful sanctions, and the level of fines and penalties imposed in connection with regulatory violations, have increased substantially since the financial crisis. Regulatory agencies may, at times, limit our ability to disclose their findings, related actions or remedial measures. Similarly, many of our clients are subject to significant regulatory requirements and retain our services in order for us to assist them in complying with those legal

requirements. Changes in these regulations can significantly affect the services that we are asked to provide, as well as our costs.

Adverse publicity and damage to our reputation arising from the failure or perceived failure to comply with legal, regulatory or contractual requirements could affect our ability to attract and retain clients. If we cause clients to fail to comply with these regulatory requirements, we may be liable to them for losses and expenses that they incur. In recent years, regulatory oversight and enforcement have increased substantially, imposing additional costs and increasing the potential risks associated with our operations. If this regulatory trend continues, it could continue to adversely affect our operations and, in turn, our consolidated results of operations and financial condition.

For additional information, see the risk factor below, *“Our businesses may be adversely affected by government enforcement and litigation.”*

**Our calculations of credit, market and operational risk exposures, total risk-weighted assets and capital ratios for regulatory purposes depend on data inputs, formulae, models, correlations and assumptions that are subject to changes over time, which changes, in addition to our consolidated financial results, could materially impact our risk exposures, our total risk-weighted assets and our capital ratios from period to period.**

To calculate our credit, market and operational risk exposures, our total risk-weighted assets and our capital ratios for regulatory purposes, the Basel III final rule involves the use of current and historical data, including our own loss data and similar information from other industry participants, market volatility measures, interest rates and spreads, asset valuations, credit exposures and the creditworthiness of our counterparties. These calculations also involve the use of quantitative formulae, statistical models, historical correlations and significant assumptions. We refer to the data, formulae, models, correlations and assumptions, as well as our related internal processes, as our “advanced systems.” While our advanced systems are generally quantitative in nature, significant components involve the exercise of judgment based, among other factors, on our and the financial services industry’s evolving experience. Any of these judgments or other elements of our advanced systems may not, individually or collectively, precisely represent or calculate the scenarios, circumstances, outputs or other results for which they are designed or intended. Collectively, they represent only our estimate of associated risk.

In addition, our advanced systems are subject to update and periodic revalidation in response to changes in our business activities and our historical

experiences, forces and events experienced by the market broadly or by individual financial institutions, changes in regulations and regulatory interpretations and other factors, and are also subject to continuing regulatory review and approval. For example, a significant operational loss experienced by another financial institution, even if we do not experience a related loss, could result in a material change in the output of our advanced systems and a corresponding material change in our risk exposures, our total risk-weighted assets and our capital ratios compared to prior periods. An operational loss that we experience could also result in a material change in our capital requirements for operational risk under the advanced approaches, depending on the severity of the loss event, its characterization among the seven Basel-defined UOMs, and the stability of the distributional approach for a particular UOM, and without direct correlation to the effects of the loss event, or the timing of such effects, on our results of operations. Due to the influence of changes in our advanced systems, whether resulting from changes in data inputs, regulation or regulatory supervision or interpretation, State Street-specific or more general market, or individual financial institution-specific, activities or experiences, or other updates or factors, we expect that our advanced systems and our credit, market and operational risk exposures, our total risk-weighted assets and our capital ratios calculated under the Basel III final rule will change, and may be volatile, over time, and that those latter changes or volatility could be material as calculated and measured from period to period.

**We are subject to enhanced external oversight as a result of certain agreements entered into in connection with the resolution of prior regulatory or governmental matters.**

In June 2015, we entered into a written agreement with the Federal Reserve and the Massachusetts Division of Banks relating to deficiencies identified in our compliance programs with the requirements of the Bank Secrecy Act, AML regulations and U.S. economic sanctions regulations promulgated by OFAC. As part of this agreement, we have been required to, among other things, implement improvements to our compliance programs and to retain an independent firm to conduct a review of account and transaction activity to evaluate whether any suspicious activity was not previously reported.

Separately, in connection with the resolution of certain proceedings relating to our having charged six clients of our U.K. transition management business during 2010 and 2011 amounts in excess of the contractual terms, in January 2017, we entered into a deferred prosecution agreement with the Department of Justice and the United States Attorney for the District of Massachusetts under which we agreed to

retain an independent compliance and ethics monitor for a term of three years (subject to extension) who will, among other things, review and monitor the effectiveness of our compliance controls and business ethics and make related recommendations, and in September 2017, we entered into a settlement agreement with the SEC that also requires us to retain an independent ethics and compliance consultant for a one year period. We have retained a monitor who is fulfilling our obligations under both the deferred prosecution agreement and the SEC settlement. Under the deferred prosecution agreement we also have a heightened obligation promptly to report issues involving potential or alleged fraudulent activities to the Department of Justice.

As a result of the enhanced inspections and monitoring activities to which we are subject under these agreements, governmental authorities may identify areas in which we may need to take actions, which may be significant, to enhance our regulatory compliance or risk management practices. Such remedial actions may entail significant cost, management attention, and systems development and such efforts may affect our ability to expand our business until such remedial actions are completed. These actions may be in addition to remedial measures required by the Federal Reserve and other financial regulators following examinations as a result of increased prudential expectations regarding our compliance programs, culture and risk management. Our failure to implement enhanced compliance and risk management procedures in a manner and in a time frame deemed to be responsive by the applicable regulatory authority could adversely impact our relationship with such regulatory authority and could lead to restrictions on our activities or other sanctions. Moreover, the identification of new or additional facts and circumstances suggesting inappropriate or non-compliant conduct, whether identified by the monitor or a regulatory authority, in the course of an inspection, or independently by us could lead to new governmental proceedings or the re-opening of matters that were previously resolved. The presence of the monitor, as well as governmental programs rewarding whistleblowing, may also increase the instances of current or former employees alleging that certain practices are inconsistent with our legal or regulatory obligations.

**Our businesses may be adversely affected by government enforcement and litigation.**

The businesses in which we operate are highly-regulated and subject to extensive external scrutiny that may be directed generally to participants in the businesses or markets in which we are involved or may be specifically directed at us, including as a result of whistleblower and qui tam claims. In the course of our business, we are frequently subject to various regulatory, governmental and law

enforcement inquiries, investigative demands and subpoenas, and from time to time, our clients, or the government on its own behalf or on behalf of our clients or others, make claims and take legal action relating to, among other things, our performance of our fiduciary, contractual or regulatory responsibilities. Often, the announcement of any such matters, or of any settlement of a claim or action, whether it involves us or others in our industry, may spur the initiation of similar claims by other clients or governmental parties. Regulatory authorities have, and are likely to continue to, initiate cross industry reviews when a material issue is identified at a financial institution. Such inquiries involve costs and management time and may lead to proceedings relating to our own activities.

Regardless of the outcome of any governmental enforcement or litigation matter, responding to such matters is time-consuming and expensive and can divert the attention of senior management. Governmental enforcement and litigation matters can involve claims for disgorgement, demands for substantial monetary damages, the imposition of civil or criminal penalties, and the imposition of remedial sanctions or other required changes in our business practices, any of which could result in increased expenses, loss of client demand for our products or services, or harm to our reputation. The exposure associated with any proceedings that may be threatened, commenced or filed against us could have a material adverse effect on our consolidated results of operations for the period in which we establish a reserve for respect to such potential liability or upon our reputation. In government settlements since the financial crisis, the fines imposed by authorities have increased substantially and may exceed in some cases the profit earned or harm caused by the regulatory or other breach. For example, in connection with the resolution of the U.K. transition management matter, we agreed to pay a fine of £22.9 million (approximately \$37.8 million) to the FCA in 2014 and fines of \$32.3 million to each of the Department of Justice and the SEC in 2017. As a further example, we paid an aggregate of \$575 million in 2016 to resolve a series of investigations and governmental and private claims alleging that our indirect foreign exchange rates prior to 2008 were not adequately disclosed or were otherwise improper. These matters have also resulted in regulatory focus on the manner in which we charge clients and related disclosures. This focus may lead to increased and prolonged governmental inquiries and client, qui tam and whistleblower claims associated with the amount and disclosure of compensation we receive for our products and services.

Moreover, U.S and certain international governmental authorities have increasingly brought criminal actions against financial institutions, and

criminal prosecutors have increasingly sought and obtained criminal guilty pleas, deferred prosecution agreements or other criminal sanctions from financial institutions. For example, in 2017 we entered into a deferred prosecution agreement with the U.S. Department of Justice in connection with the resolution of the U.K transition management matter, and such agreement could increase the likelihood that governmental authorities will seek criminal sanctions against us in pending or future legal proceedings. See “We are subject to various legal proceedings relating to the manner in which we have invoiced certain expenses, and the outcome of such proceedings could materially adversely affect our results of operations or harm our business or reputation.”

In many cases, we are required or may choose to report inappropriate or non-compliant conduct to the authorities, and our failure or delay to do so may represent an independent regulatory violation or be treated as an indication of non-cooperation with governmental authorities. Even when we promptly report a matter, we may nonetheless experience regulatory fines, liabilities to clients, harm to our reputation or other adverse effects. Moreover, our settlement or other resolution of any matter with any one or more regulators or other applicable party may not forestall other regulators or parties in the same or other jurisdictions from pursuing a claim or other action against us with respect to the same or a similar matter.

For more information about current contingencies relating to legal proceedings, see Note 13 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. The resolution of certain pending or potential legal or regulatory matters could have a material adverse effect on our consolidated results of operations for the period in which the relevant matter is resolved or an accrual is determined to be required, on our consolidated financial condition or on our reputation.

In view of the inherent difficulty of predicting the outcome of legal and regulatory matters, we cannot provide assurance as to the outcome of any pending or potential matter or, if determined adversely against us, the costs associated with any such matter, particularly where the claimant seeks very large or indeterminate damages or where the matter presents novel legal theories, involves a large number of parties, involves the discretion of governmental authorities in seeking sanctions or negotiated resolution or is at a preliminary stage. We may be unable to accurately estimate our exposure to the risks of legal and regulatory contingencies when we record reserves for probable and estimable loss contingencies. As a result, any reserves we establish may not be sufficient to cover our actual financial

exposure. Similarly, our estimates of the aggregate range of reasonably possible loss for legal and regulatory contingencies are based upon then-available information and are subject to significant judgment and a variety of assumptions and known and unknown uncertainties. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from the estimate at any time.

**We are subject to various legal proceedings relating to the manner in which we have invoiced certain expenses, and the outcome of such proceedings could materially adversely affect our results of operations, or harm our business or reputation.**

In December 2015, we announced a review of the manner in which we invoiced certain expenses to some of our Investment Servicing clients, primarily in the United States, during an 18-year period going back to 1998, and our determination that we had incorrectly invoiced clients for certain expenses. We informed our clients in December 2015 that we will pay to them the amounts we concluded were incorrectly invoiced to them, plus interest. We currently expect the cumulative total of our payments to customers for these matters to be at least \$360 million, in connection with that review, which is ongoing. We are implementing enhancements to our billing processes, see “Our efforts to improve our billing processes and practices are ongoing and are likely to result in the identification of additional billing errors.” We are reviewing the conduct of our employees with respect to billing matters and have taken steps to address conduct with respect to such matters that we believe is inconsistent with our standards, including, in some cases, termination of employment. We are also evaluating other billing practices relating to our Investment Servicing clients.

We have received a purported class action demand letter alleging that our invoicing practices were unfair and deceptive under Massachusetts law. A class of customers, or particular customers, may assert that we have not paid to them all amounts incorrectly invoiced, and may seek double or treble damages under Massachusetts law. In addition, in March 2017, a purported class action was commenced against us alleging that our invoicing practices violated duties owed to retirement plan customers under ERISA.

We are also responding to requests for information from, and are cooperating with investigations by, governmental and regulatory authorities on these matters, including the civil and criminal divisions of the DOJ, the SEC, the DOL, the Massachusetts Attorney General, and the New Hampshire Bureau of Securities Regulation, which could result in significant fines or other sanctions, civil and criminal, against us. If these governmental or

regulatory authorities were to conclude that all or a portion of the billing error merited civil or criminal sanctions, any fine or other penalty could be a significant percentage or a multiple of the portion of the overcharging serving as the basis of such a claim or of the full amount of the overcharging. The governmental and regulatory authorities have significant discretion in civil and criminal matters as to the fines and other penalties they seek to impose. The severity of such fines or other penalties could take into account factors such as the amount and duration of our incorrect invoicing, the government's or regulator's assessment of the conduct of our employees, as well as prior conduct such as that which resulted in our January 2017 deferred prosecution agreement in connection with U.K. transition management matter and our recent settlement of civil claims regarding our indirect foreign exchange business.

The outcome of any of these proceedings and, in particular, any criminal sanction could materially adversely affect our results of operations and could have significant collateral consequences for our business and reputation.

**Our efforts to improve our billing processes and practices are ongoing and are likely to result in the identification of additional billing errors.**

In 2015, we determined that we had made errors in billing our asset servicing customers, principally in the United States. In 2016, we began the process of remediating these errors, improving our billing processes and controls in the asset servicing business and other businesses, and testing these improved billing processes and controls. As a result of such review, we may modify, enhance, and, where necessary, replace our existing global billing processes and implement and test controls for the new system. The objectives of this billing transformation process are to obtain greater billing accuracy and consistency across business lines. Our goal is for this billing transformation process to be completed in 2019, but there can be no assurance as to when we will complete this process or that it will allow us to meet the objectives we have set for it. Because of the scale of our business, implementing enhanced billing controls will be expensive and time consuming, may not succeed in identifying and remediating all weaknesses and inefficiencies in our billing processes and cannot be implemented in all our business units concurrently. Accordingly, the costs of the billing transformation process, and the costs to remediate billing errors which may be discovered in that process, would likely be incurred over a period that we are now unable accurately to determine. As we work through this process, we have discovered and may continue to discover areas where we believe our billing processes need improvement, where we believe we have made billing

errors with respect to particular customers and categories of fees and expenses, and where we believe billing arrangements between ourselves and particular customers should be clarified. Such discoveries may lead to increased expense and decreased revenues, the need to remediate prior billing errors, government investigations, or litigation that may materially impact our business, financial results and reputation.

**We are subject to variability in our assets under custody and administration and assets under management, and in our financial results, due to the significant size of many of our institutional clients, and are also subject to significant pricing pressure due to the considerable market influence exerted by those clients.**

Our clients include institutional investors, such as mutual funds, collective investment funds, UCITS, hedge funds and other investment pools, corporate and public retirement plans, insurance companies, foundations, endowments and investment managers. In both our asset servicing and asset management businesses, we endeavor to attract institutional investors controlling large and diverse pools of assets, as those clients typically have the opportunity to benefit from the full range of our expertise and service offerings. Due to the large pools of assets controlled by these clients, the loss or gain of one client, or even a portion of the assets controlled by one client, could have a significant effect on our AUCA or our AUM, as applicable, in the relevant period. Loss of all or a portion of the servicing of a client's assets can occur for a variety of reasons, including client decision or diversification of service providers or acquisition or restructuring activity affecting a client. For example, as previously reported, as a result of a decision to diversify providers, one of our large clients will move a portion of its assets, largely common trust funds, currently with State Street to another provider. The transition will principally occur in 2018 and beyond and represents approximately \$1 trillion in assets with respect to which we will no longer derive revenue post-transition. Our AUM or AUCA are also affected by decisions by institutional owners to favor or disfavor certain investment instruments or categories. Similarly, if one or more clients changes the asset class in which a significant portion of assets are invested (e.g., by shifting investments from emerging markets to the U.S.), those changes could have a significant effect on our results of operations in the relevant period, as our fee rates often change based on the type of asset classes we are servicing or managing. For example, in 2017 several industry-wide trends continued to impact AUCA and AUM asset levels. Those trends included continued client redemptions out of hedge funds, as to which fees are generally higher, as well as strong retail flows from

mutual funds into ETFs, as to which fees are generally lower. As our fee revenue is largely reliant on the levels of our AUCA and AUM, these changes in levels of differing asset types could have a corresponding significant effect on our results of operations in the relevant period. Large institutional clients also, by their nature, are often able to exert considerable market influence, and this, combined with strong competitive forces in the markets for our services, has resulted in, and may continue to result in, significant pressure to reduce the fees we charge for our services in both our asset servicing and asset management lines of business. Many of these large clients are also under competitive and regulatory pressures that are driving them to manage the expenses that they and their investment products incur more aggressively, which in turn exacerbates their pressures on our fees.

**Our business may be negatively affected by adverse business decisions or our failure to properly implement or execute strategic programs and priorities.**

In order to maintain and grow our business, we must make strategic decisions about our current and future business plans, including plans to target cost initiatives and enhance operational processes and efficiencies, plans to improve existing and to develop new service offerings and enhancements, plans to enhance existing and develop new information technology and other systems, migrate from existing systems and other infrastructure and to address staffing needs, plans for entering or exiting business lines or geographic markets and plans for acquiring or disposing of businesses.

In late 2015, we announced Beacon, a multi-year program to create cost efficiencies through changes in our operational processes and to further digitize our processes and interfaces with our clients. We anticipate we will undertake additional strategic initiatives of varying sizes, some of which may be material. Operational process and information technology transformations, such as Beacon and future strategic initiatives we may undertake, entail significant risks. The program, and any future strategic initiatives we implement, may prove to be inadequate to achieve its objectives, may not be responsive to industry, technological or market changes, may result in increased or unanticipated costs, may result in earnings volatility, may take longer than anticipated to implement, may involve elements reliant on the performance of third parties and may not be successfully implemented or meet client expectations. In addition, our efforts to manage expenses may be matched or exceeded by our competitors. Any failure to implement Beacon or any other strategic initiative we may undertake, in whole or in part may, among other things, reduce our competitive position, diminish the cost effectiveness

of our systems and processes or provide an insufficient return on our associated investment. In particular, elements of many initiatives include investment in systems integration and new technologies and also the development of new, and the evolution of existing, methods and tools to accelerate the pace of innovation, the introduction of new services and enhancements to the security of our data systems. The transition to new operating processes and technology infrastructure may cause disruptions in our relationships with clients and employees and may present other unanticipated technical or operational hurdles. In addition, the relocation or expansion of servicing activities and other operations to different geographic regions requires that client, regulatory and other third party data use, storage and security challenges, as well as other regulatory compliance other considerations, be resolved. As a result, we may not achieve some or all of the cost savings or other benefits anticipated by the relevant strategic initiative and may experience unanticipated challenges from clients, regulators or other parties or reputational harm. In addition, other systems development initiatives, which are not included in Beacon, may not have access to the same level of resources or management attention and, consequently, may be delayed or unsuccessful. Many of our systems require enhancements to meet the requirements of evolving regulation, to permit us to optimize our use of capital or to reduce the risk of operating error. We may not have the resources to pursue all of these objectives, including Beacon and any other strategic initiatives, simultaneously.

The success of the program and our other strategic plans could also be affected by market disruptions and unanticipated changes in the overall market for financial services and the global economy. We also may not be able to abandon or alter these plans without significant loss, as the implementation of our decisions may involve significant capital outlays, often far in advance of when we expect to generate any related revenues or cost expectations. Accordingly, our business, our consolidated results of operations and our consolidated financial condition may be adversely affected by any failure or delay in our strategic decisions, including the program or elements thereof. For additional information about the program, see "Expenses" in "Consolidated Results of Operations" included under Item 7, Management's Discussion and Analysis, of this form 10-K.

**Cost shifting to non-U.S. jurisdictions and outsourcing may expose us to increased operational risk and reputational harm and may not result in expected cost savings.**

We manage expenses by migrating certain business processes and business support functions to lower-cost geographic locations, such as India,

Poland and China, and by outsourcing to vendors and joint ventures. We may accomplish this shift by establishing or increasing our level of activity at operations in lower-cost locations, by outsourcing to vendors in various jurisdictions or through joint ventures. This effort exposes us to the risk that we may not maintain service quality, control or effective management and/or business resiliency within these operations during and after transition. These migrations also involve risks that our outsourcing vendors or joint ventures may not comply with their servicing and other contractual obligations to us, including with respect to indemnification and information security, and to the risk that we may not satisfy applicable regulatory responsibilities regarding the management and oversight of third parties and outsourcing providers. Diversification of our geographic footprint also exposes us to the relevant macroeconomic, political, legal and similar risks generally involved in doing business in the jurisdictions in which we establish lower-cost locations or joint ventures or in which our outsourcing vendors locate their operations. The increased elements of risk that arise from certain operating processes being conducted in some jurisdictions could lead to an increase in reputational risk. During periods of transition of operations, greater operational risk and client concern exist with respect to maintaining a high level of service delivery and business resiliency. The extent and pace at which we are able to move functions to lower-cost locations, joint ventures and outsourcing providers may also be affected by political, regulatory and client acceptance issues, including with respect to data use, storage and security. Such relocation or outsourcing of functions also entails costs, such as technology, real estate and restructuring expenses, that may offset or exceed the expected financial benefits of the relocation or outsourcing. In addition, the financial benefits of lower-cost locations and of outsourcings may diminish over time or could be offset in the event that the U.S. or other jurisdictions impose tax and other measures which seek to discourage the use of lower cost jurisdictions.

**Our businesses may be negatively affected by adverse publicity or other reputational harm.**

Our relationship with many of our clients is predicated on our reputation as a fiduciary and a service provider that adheres to the highest standards of ethics, service quality and regulatory compliance. Adverse publicity, regulatory actions or fines, litigation, operational failures or the failure to meet client expectations or fiduciary or other obligations could materially and adversely affect our reputation, our ability to attract and retain clients or key employees or our sources of funding for the same or other businesses. For example, over the past several years we have experienced adverse publicity with

respect to our indirect foreign exchange trading, and this adverse publicity has contributed to a shift of client volume to other foreign exchange execution methods. Similarly, governmental actions and reputational issues in our transition management business in the U.K. have adversely affected our revenue from that business and, with the related deferred prosecution agreement with the DOJ entered into in early 2017 and SEC settlement, these effects have the potential to continue. The client invoicing matter we announced in December 2015 has the potential to result in similar effects. For additional information about the settlement, see the risk factor "Our businesses may be adversely affected by government enforcement and litigation".

Preserving and enhancing our reputation also depends on maintaining systems, procedures and controls that address known risks and regulatory requirements, as well as our ability to timely identify, understand and mitigate additional risks that arise due to changes in our businesses and the marketplaces in which we operate, the regulatory environment and client expectations.

**Our controls and procedures may fail or be circumvented, our risk management policies and procedures may be inadequate, and operational risk could adversely affect our consolidated results of operations.**

We may fail to identify and manage risks related to a variety of aspects of our business, including, but not limited to, operational risk, interest-rate risk, foreign exchange risk, trading risk, fiduciary risk, legal and compliance risk, liquidity risk and credit risk. We have adopted various controls, procedures, policies and systems to monitor and manage risk. While we currently believe that our risk management process is effective, we cannot provide assurance that those controls, procedures, policies and systems will always be adequate to identify and manage the internal and external, including service provider, risks in our various businesses. The risk of individuals, either employees or contractors, engaging in conduct harmful or misleading to clients or us, such as consciously circumventing established control mechanisms to exceed trading or investment management limitations, committing fraud or improperly selling products or services to clients, is particularly challenging to manage through a control framework. The financial and reputational impact of control or conduct failures can be significant. Persistent or repeated issues with respect to controls or individual conduct may raise concerns among regulators regarding our culture, governance and control environment. While we seek to contractually limit our financial exposure to operational risk, the degree of protection that we are able to achieve varies, and our potential exposure may be greater than the revenue we anticipate that we will earn from

servicing our clients.

In addition, our businesses and the markets in which we operate are continuously evolving. We may fail to identify or fully understand the implications of changes in our businesses or the financial markets and fail to adequately or timely enhance our risk framework to address those changes. If our risk framework is ineffective, either because it fails to keep pace with changes in the financial markets, regulatory or industry requirements, our businesses, our counterparties, clients or service providers or for other reasons, we could incur losses, suffer reputational damage or find ourselves out of compliance with applicable regulatory or contractual mandates or expectations.

Operational risk is inherent in all of our business activities. As a leading provider of services to institutional investors, we provide a broad array of services, including research, investment management, trading services and investment servicing that expose us to operational risk. In addition, these services generate a broad array of complex and specialized servicing, confidentiality and fiduciary requirements, many of which involve the opportunity for human, systems or process errors. We face the risk that the control policies, procedures and systems we have established to comply with our operational requirements will fail, will be inadequate or will become outdated. We also face the potential for loss resulting from inadequate or failed internal processes, employee supervision or monitoring mechanisms, service-provider processes or other systems or controls, which could materially affect our future consolidated results of operations. Given the volume and magnitude of transactions we process on a daily basis, operational losses represent a potentially significant financial risk for our business. Operational errors that result in us remitting funds to a failing or bankrupt entity may be irreversible, and may subject us to losses.

We may also be subject to disruptions from external events that are wholly or partially beyond our control, which could cause delays or disruptions to operational functions, including information processing and financial market settlement functions. In addition, our clients, vendors and counterparties could suffer from such events. Should these events affect us, or the clients, vendors or counterparties with which we conduct business, our consolidated results of operations could be negatively affected. When we record balance sheet accruals for probable and estimable loss contingencies related to operational losses, we may be unable to accurately estimate our potential exposure, and any accruals we establish to cover operational losses may not be sufficient to cover our actual financial exposure, which could have a material adverse effect on our consolidated results of operations.

**The quantitative models we use to manage our business may contain errors that result in inadequate risk assessments, inaccurate valuations or poor business decisions, and lapses in disclosure controls and procedures or internal control over financial reporting could occur, any of which could result in material harm.**

We use quantitative models to help manage many different aspects of our businesses. As an input to our overall assessment of capital adequacy, we use models to measure the amount of credit risk, market risk, operational risk, interest-rate risk and liquidity risk we face. During the preparation of our consolidated financial statements, we sometimes use models to measure the value of asset and liability positions for which reliable market prices are not available. We also use models to support many different types of business decisions including trading activities, hedging, asset-and-liability management and whether to change business strategy. Weaknesses in the underlying model, inadequate model assumptions, normal model limitations, inappropriate model use, weaknesses in model implementation or poor data quality, could result in unanticipated and adverse consequences, including material loss and material non-compliance with regulatory requirements or expectations. Because of our widespread usage of models, potential weaknesses in our model risk management practices pose an ongoing risk to us.

We also may fail to accurately quantify the magnitude of the risks we face. Our measurement methodologies rely on many assumptions and historical analyses and correlations. These assumptions may be incorrect, and the historical correlations on which we rely may not continue to be relevant. Consequently, the measurements that we make for regulatory purposes may not adequately capture or express the true risk profiles of our businesses. Moreover, as businesses and markets evolve, our measurements may not accurately reflect this evolution. While our risk measures may indicate sufficient capitalization, they may underestimate the level of capital necessary to conduct our businesses.

Additionally, our disclosure controls and procedures may not be effective in every circumstance, and, similarly, it is possible we may identify a material weakness or significant deficiency in internal control over financial reporting. Any such lapses or deficiencies may materially and adversely affect our business and consolidated results of operations or consolidated financial condition, restrict our ability to access the capital markets, require us to expend significant resources to correct the lapses or deficiencies, expose us to regulatory or legal proceedings, subject us to fines, penalties or judgments or harm our reputation.

**We may incur losses arising from our investments in sponsored investment funds, which could be material to our consolidated results of operations in the periods incurred.**

In the normal course of business, we manage various types of sponsored investment funds through SSGA. The services we provide to these sponsored investment funds generate management fee revenue, as well as servicing fees from our other businesses. From time to time, we may invest in the funds, which we refer to as seed capital, in order for the funds to establish a performance history for newly launched strategies. These funds may meet the definition of variable interest entities, as defined by U.S. GAAP, and if we are deemed to be the primary beneficiary of these funds, we may be required to consolidate these funds in our consolidated financial statements under U.S. GAAP. The funds follow specialized investment company accounting rules which prescribe fair value for the underlying investment securities held by the funds.

In the aggregate, we expect any financial losses that we realize over time from these seed investments to be limited to the actual amount invested in the consolidated fund. However, in the event of a fund wind-down, gross gains and losses of the fund may be recognized for financial accounting purposes in different periods during the time the fund is consolidated but not wholly owned. Although we expect the actual economic loss to be limited to the amount invested, our losses in any period for financial accounting purposes could exceed the value of our economic interests in the fund and could exceed the value of our initial seed capital investment.

In instances where we are not deemed to be the primary beneficiary of the sponsored investment fund, we do not include the funds in our consolidated financial statements. Our risk of loss associated with investment in these unconsolidated funds primarily represents our seed capital investment, which could become realized as a result of poor investment performance. However, the amount of loss we may recognize during any period would be limited to the carrying amount of our investment.

**Our reputation and business prospects may be damaged if our clients incur substantial losses in investment pools in which we act as agent or are restricted in redeeming their interests in these investment pools.**

We manage assets on behalf of clients in several forms, including in collective investment pools, money market funds, securities finance collateral pools, cash collateral and other cash products and short-term investment funds. Our management of collective investment pools on behalf of clients exposes us to reputational risk and operational losses. If our clients incur substantial

investment losses in these pools, receive redemptions as in-kind distributions rather than in cash, or experience significant under-performance relative to the market or our competitors' products, our reputation could be significantly harmed, which harm could significantly and adversely affect the prospects of our associated business units. Because we often implement investment and operational decisions and actions over multiple investment pools to achieve scale, we face the risk that losses, even small losses, may have a significant effect in the aggregate.

Within our Investment Management business, we manage investment pools, such as mutual funds and collective investment funds that generally offer our clients the ability to withdraw their investments on short notice, generally daily or monthly. This feature requires that we manage those pools in a manner that takes into account both maximizing the long-term return on the investment pool and retaining sufficient liquidity to meet reasonably anticipated liquidity requirements of our clients. The importance of maintaining liquidity varies by product type, but it is a particularly important feature in money market funds and other products designed to maintain a constant net asset value of \$1.00. In the past, we have imposed restrictions on cash redemptions from the agency lending collateral pools, as the per-unit market value of those funds' assets had declined below the constant \$1.00 the funds employ to effect purchase and redemption transactions. Both the decline of the funds' net asset value below \$1.00 and the imposition of restrictions on redemptions had a significant client, reputational and regulatory impact on us, and the recurrence of such or similar circumstances in the future could adversely impact our consolidated results of operations and financial condition. We have also in the past continued to process purchase and redemption of units of investment products designed to maintain a constant net asset value at \$1.00 although the fair market value of the fund's assets were less than \$1.00. If in the future we were to continue to process purchases and redemptions from such products at \$1.00 when the fair market value of our collateral pools' assets is less than \$1.00, we could be exposed to significant liability.

If higher than normal demands for liquidity from our clients were to occur, managing the liquidity requirements of our collective investment pools could become more difficult. If such liquidity problems were to recur, our relationships with our clients may be adversely affected, and, we could, in certain circumstances, be required to consolidate the investment pools into our consolidated statement of condition; levels of redemption activity could increase; and our consolidated results of operations and business prospects could be adversely affected. In

addition, if a money market fund that we manage were to have unexpected liquidity demands from investors in the fund that exceeded available liquidity, the fund could be required to sell assets to meet those redemption requirements, and selling the assets held by the fund at a reasonable price, if at all, may then be difficult.

Because of the size of the investment pools that we manage, we may not have the financial ability or regulatory authority to support the liquidity or other demands of our clients. Any decision by us to provide financial support to an investment pool to support our reputation in circumstances where we are not statutorily or contractually obligated to do so could result in the recognition of significant losses, could adversely affect the regulatory view of our capital levels or plans and could, in some cases, require us to consolidate the investment pools into our consolidated statement of condition. Any failure of the pools to meet redemption requests, or under-performance of our pools relative to similar products offered by our competitors, could harm our business and our reputation.

**Development of new products and services may impose additional costs on us and may expose us to increased operational and model risk.**

Our financial performance depends, in part, on our ability to develop and market new and innovative services and to adopt or develop new technologies that differentiate our products or provide cost efficiencies, while avoiding increased related expenses. This dependency is exacerbated in the current "FinTech" environment, where financial institutions are investing significantly in evaluating new technologies, such as "Blockchain," and developing potentially industry-changing new products, services and industry standards. The introduction of new products and services can entail significant time and resources, including regulatory approvals. Substantial risks and uncertainties are associated with the introduction of new products and services, including technical, control and model validation requirements, which may need to be developed and implemented, rapid technological change in the industry, our ability to access technical and other information from our clients, the significant and ongoing investments required to bring new products and services to market in a timely manner at competitive prices and the preparation of marketing, sales and other materials that fully and accurately describe the product or service and its underlying risks and are compliant with applicable regulations. Our failure to manage these risks and uncertainties also exposes us to enhanced risk of operational lapses which may result in the recognition of financial statement liabilities. Regulatory and internal control requirements, capital requirements, competitive alternatives, vendor relationships and shifting market

preferences may also determine if such initiatives can be brought to market in a manner that is timely and attractive to our clients. Failure to successfully manage these risks in the development and implementation of new products or services could have a material adverse effect on our business and reputation, as well as on our consolidated results of operations and financial condition.

**We depend on information technology, and any failures of or damage to, attack on or unauthorized access to our information technology systems or facilities, or those of third parties with which we do business, including as a result of cyber-attacks, could result in significant limits on our ability to conduct our operations and activities, costs and reputational damage.**

Our businesses depend on information technology infrastructure, both internal and external, to, among other things, record and process a large volume of increasingly complex transactions and other data, in many currencies, on a daily basis, across numerous and diverse markets and jurisdictions. In recent years, several financial services firms have suffered successful cyber-attacks launched both domestically and from abroad, resulting in the disruption of services to clients, loss or misappropriation of sensitive or private data and reputational harm. We also have been subjected to cyber-attack, and although we have not to our knowledge suffered a material breach or suspension of our systems, it is possible that we could suffer such a breach or suspension in the future. Cyber-threats are sophisticated and continually evolving. We may not implement effective systems and other measures to effectively prevent or mitigate the full diversity of cyber-threats or improve and adapt such systems and measures as such threats evolve and advance.

Our computer, communications, data processing, networks, backup, business continuity or other operating, information or technology systems and facilities, including those that we outsource to other providers, may fail to operate properly or become disabled, overloaded or damaged as a result of a number of factors, including events that are wholly or partially beyond our control, which could adversely affect our ability to process transactions, provide services or maintain systems availability, maintain compliance and internal controls or otherwise appropriately conduct our business activities. For example, there could be sudden increases in transaction or data volumes, electrical or telecommunications outages, natural disasters, cyber-attacks or employee or contractor error or malfeasance.

The third parties with which we do business, which facilitate our business activities or with whom we otherwise engage or interact, including financial

intermediaries and technology infrastructure and service providers, are also susceptible to the foregoing risks (including regarding the third parties with which they are similarly interconnected or on which they otherwise rely), and our or their business operations and activities may therefore be adversely affected, perhaps materially, by failures, terminations, errors or malfeasance by, or attacks or constraints on, one or more financial, technology, infrastructure or government institutions or intermediaries with whom we or they are interconnected or conduct business.

In particular, we, like other financial services firms, will continue to face increasing cyber threats, including computer viruses, malicious code, distributed denial of service attacks, phishing attacks, ransomware, information security breaches or employee or contractor error or malfeasance that could result in the unauthorized release, gathering, monitoring, misuse, loss or destruction of our, our clients' or other parties' confidential, personal, proprietary or other information or otherwise disrupt, compromise or damage our or our clients' or other parties' business assets, operations and activities. Our status as a global systemically important financial institution likely increases the risk that we are targeted by such cyber- security threats. In addition, some of our service offerings, such as data warehousing, may also increase the risk we are, and the consequences of being, so-targeted. We therefore could experience significant related costs and exposures, including lost or constrained ability to provide our services or maintain systems availability to clients, regulatory inquiries, enforcements, actions and fines, litigation, damage to our reputation or property and enhanced competition.

Due to our dependence on technology and the important role it plays in our business operations, we must persist in improving and updating our information technology infrastructure (1) as some of our systems are approaching the end of their useful life, are redundant or do not share data without reconciliation; and (2) in order to be more efficient, enhance resiliency, meet client expectations and support opportunities of growth. Updating these systems often involves implementation, integration and security risks, including risks that we may not adequately anticipate the market or technological trends or client needs or experience unexpected challenges that could cause financial, reputational and operational harm. However, failing to properly respond to and invest in changes and advancements in technology can limit our ability to attract and retain clients, prevent us from offering similar products and services as those offered by our competitors and inhibit our ability to meet regulatory requirements.

**Any theft, loss or other misappropriation or inadvertent disclosure of, or inappropriate access to, the confidential information we possess could have an adverse impact on our business and could subject us to regulatory actions, litigation and other adverse effects.**

Our businesses and relationships with clients are dependent on our ability to maintain the confidentiality of our and our clients' trade secrets and confidential information (including client transactional data and personal data about our employees, our clients and our clients' clients). Unauthorized access, or failure of our controls with respect to granting access to our systems, may occur, potentially resulting in theft, loss, or other misappropriation of such information. Any theft, loss, other misappropriation or inadvertent disclosure of confidential information could have a material adverse impact on our competitive position, our relationships with our clients and our reputation and could subject us to regulatory inquiries, enforcement and fines, civil litigation and possible financial liability or costs.

**We may not be able to protect our intellectual property, and we are subject to claims of third- party intellectual property rights.**

Our potential inability to protect our intellectual property and proprietary technology effectively may allow competitors to duplicate our technology and products and may adversely affect our ability to compete with them. To the extent that we do not protect our intellectual property effectively through patents, maintaining trade secrets or other means, other parties, including former employees, with knowledge of our intellectual property may leave and seek to exploit our intellectual property for their own or others' advantage. In addition, we may infringe on claims of third-party patents, and we may face intellectual property challenges from other parties, including clients or service providers with whom we may engage in the development or implementation of other products, services or solutions. The risk of such infringement is enhanced in the current competitive "Fintech" environment, particularly with respect to our development of new products and services containing significant technology elements and dependencies, any of which could become the subject of an infringement claim. We may not be successful in defending against any such challenges or in obtaining licenses to avoid or resolve any intellectual property disputes. Third-party intellectual rights, valid or not, may also impede our deployment of the full scope of our products and service capabilities in all jurisdictions in which we operate or market our products and services.

**Acquisitions, strategic alliances, joint ventures and divestitures pose risks for our business.**

As part of our business strategy, we acquire complementary businesses and technologies, enter into strategic alliances and joint ventures and divest portions of our business. We undertake transactions of varying sizes to, among other reasons, expand our geographic footprint, access new clients, technologies or services, develop closer or more collaborative relationships with our business partners, bolster existing servicing capabilities, efficiently deploy capital or leverage cost savings or other business or financial opportunities. We may not achieve the expected benefits of these transactions, which could result in increased costs, lowered revenues, ineffective deployment of capital, regulatory concerns, exit costs or diminished competitive position or reputation.

Transactions of this nature also involve a number of risks and financial, accounting, tax, regulatory, strategic, managerial, operational, cultural and employment challenges, which could adversely affect our consolidated results of operations and financial condition. For example, the businesses that we acquire or our strategic alliances or joint ventures may under-perform relative to the price paid or the resources committed by us; we may not achieve anticipated revenue growth or cost savings; or we may otherwise be adversely affected by acquisition-related charges. The intellectual property of an acquired business may be an important component of the value that we agree to pay for such a business. However, such acquisitions are subject to the risks that the acquired business may not own the intellectual property that we believe we are acquiring, that the intellectual property is dependent on licenses from third parties, that the acquired business infringes on the intellectual property rights of others, that the technology does not have the acceptance in the marketplace that we anticipated or that the technology requires significant investment to remain competitive. Further, past acquisitions have resulted in the recognition of goodwill and other significant intangible assets in our consolidated statement of condition. For example, we recorded goodwill and intangible assets of \$453 million associated with our acquisition of GE Asset Management in 2016. These assets are not eligible for inclusion in regulatory capital under applicable requirements. In addition, we may be required to record impairment in our consolidated statement of income in future periods if we determine that the value of these assets has declined.

Through our acquisitions or joint ventures, we may also assume unknown or undisclosed business, operational, tax, regulatory and other liabilities, fail to properly assess known contingent liabilities or assume businesses with internal control deficiencies.

While in most of our transactions we seek to mitigate these risks through, among other things, due diligence and indemnification provisions, these or other risk-mitigating provisions we put in place may not be sufficient to address these liabilities and contingencies. Other major financial services firms have recently paid significant penalties to resolve government investigations into matters conducted in significant part by acquired entities.

Various regulatory approvals or consents, formal or informal, are generally required prior to closing of these transactions, which may include approvals or non-objections from the Federal Reserve and other domestic and non-U.S. regulatory authorities. These regulatory authorities may impose conditions on the completion of the acquisition or require changes to its terms that materially affect the terms of the transaction or our ability to capture some of the opportunities presented by the transaction, or may not approve the transaction. Any such conditions, or any associated regulatory delays, could limit the benefits of the transaction. Acquisitions or joint ventures we announce may not be completed if we do not receive the required regulatory approvals, if regulatory approvals are significantly delayed or if other closing conditions are not satisfied.

**The integration of our acquisitions results in risks to our business and other uncertainties.**

The integration of acquisitions presents risks that differ from the risks associated with our ongoing operations. Integration activities are complicated and time consuming and can involve significant unforeseen costs. We may not be able to effectively assimilate services, technologies, key personnel or businesses of acquired companies into our business or service offerings as anticipated, alliances may not be successful, and we may not achieve related revenue growth or cost savings. We also face the risk of being unable to retain, or cross-sell our products or services to, the clients of acquired companies or joint ventures and the risk of being unable to cross-sell acquired products or services to our existing clients. Acquisitions of investment servicing businesses entail information technology systems conversions, which involve operational risks. Acquisitions of technology firms can involve extensive information technology integration, with associated risk of defects and product enhancement and development activities, the costs of which can be difficult to estimate. Clients of businesses that we have acquired may be dissatisfied with the acquisition and choose to limit or terminate their relationship with us, a risk which increases where those clients are competitors. The loss of some of these clients or a significant reduction in the revenues generated from them, for competitive or other reasons, could adversely affect the benefits that we expect to achieve from these acquisitions or cause impairment to goodwill and other intangibles.

With any acquisition, the integration of the operations and resources of the businesses could result in the loss of key employees, the disruption of our and the acquired company's ongoing businesses or inconsistencies in standards, controls, procedures or policies that could adversely affect our ability to maintain relationships with clients or employees, maintain regulatory compliance or to achieve the anticipated benefits of the acquisition. Integration efforts may also divert management attention and resources.

**Competition for our employees is intense, and we may not be able to attract and retain the highly skilled people we need to support our business.**

Our success depends, in large part, on our ability to attract and retain key people. Competition for the best people in most activities in which we engage can be intense, and we may not be able to hire people or retain them, particularly in light of challenges associated with evolving compensation restrictions applicable, or which may become applicable, to banks and some asset managers and that potentially are not applicable to other financial services firms in all jurisdictions or to technology firms, generally. The unexpected loss of services of key personnel in business units, control functions, information technology, operations or other areas could have a material adverse impact on our business because of their skills, their knowledge of our markets, operations and clients, their years of industry experience and, in some cases, the difficulty of promptly finding qualified replacement personnel. Similarly, the loss of key employees, either individually or as a group, could adversely affect our clients' perception of our ability to continue to manage certain types of investment management mandates to provide other services to them or to maintain a culture of innovation and proficiency.

**We are subject to intense competition in all aspects of our business, which could negatively affect our ability to maintain or increase our profitability.**

The markets in which we operate across all facets of our business are both highly competitive and global. These markets are changing as a result of new and evolving laws and regulations applicable to financial services institutions. Regulatory-driven market changes cannot always be anticipated, and may adversely affect the demand for, and profitability of, the products and services that we offer. In addition, new market entrants and competitors may address changes in the markets more rapidly than we do, or may provide clients with a more attractive offering of products and services, adversely affecting our business. Our efforts to develop and market new products, particularly in the "Fintech" sector, may position us in new markets with pre-existing

competitors with strong market position. We have also experienced, and anticipate that we will continue to experience, significant pricing pressure in many of our core businesses, particularly our custodial and investment management services. This pricing pressure has and may continue to impact our revenue growth and operational margins and may limit the positive impact of new client demand and growth in AUCA. Many of our businesses compete with other domestic and international banks and financial services companies, such as custody banks, investment advisors, broker/dealers, outsourcing companies and data processing companies. Further consolidation within the financial services industry could also pose challenges to us in the markets we serve, including potentially increased downward pricing pressure across our businesses.

Some of our competitors, including our competitors in core services, have substantially greater capital resources than we do or are not subject to as stringent capital or other regulatory requirements as are we. In some of our businesses, we are service providers to significant competitors. These competitors are in some instances significant clients, and the retention of these clients involves additional risks, such as the avoidance of actual or perceived conflicts of interest and the maintenance of high levels of service quality and intra-company confidentiality. The ability of a competitor to offer comparable or improved products or services at a lower price would likely negatively affect our ability to maintain or increase our profitability. Many of our core services are subject to contracts that have relatively short terms or may be terminated by our client after a short notice period. In addition, pricing pressures as a result of the activities of competitors, client pricing reviews, and rebids, as well as the introduction of new products, may result in a reduction in the prices we can charge for our products and services.

**Long-term contracts expose us to pricing and performance risk.**

We enter into long-term contracts to provide middle office or investment manager and alternative investment manager operations outsourcing services to clients, including services related but not limited to certain trading activities, cash reporting, settlement and reconciliation activities, collateral management and information technology development. We also may enter into longer-term arrangements with respect to custody, fund administration and depository services. These arrangements generally set forth our fee schedule for the term of the contract and, absent a change in service requirements, do not permit us to re-price the contract for changes in our costs or for market pricing. The long-term contracts for these relationships require, in some cases, considerable up-front investment by us, including technology and

conversion costs, and carry the risk that pricing for the products and services we provide might not prove adequate to generate expected operating margins over the term of the contracts.

The profitability of these contracts is largely a function of our ability to accurately calculate pricing for our services, efficiently assume our contractual responsibilities in a timely manner, control our costs and maintain the relationship with the client for an adequate period of time to recover our up-front investment. Our estimate of the profitability of these arrangements can be adversely affected by declines in the assets under the clients' management, whether due to general declines in the securities markets or client-specific issues. In addition, the profitability of these arrangements may be based on our ability to cross-sell additional services to these clients, and we may be unable to do so.

Performance risk exists in each contract, given our dependence on successful conversion and implementation onto our own operating platforms of the service activities provided. Our failure to meet specified service levels or implementation timelines may also adversely affect our revenue from such arrangements, or permit early termination of the contracts by the client. If the demand for these types of services were to decline, we could see our revenue decline.

**Changes in accounting standards may adversely affect our consolidated financial statements.**

New accounting standards, or changes to existing accounting standards, resulting both from initiatives of the FASB as well as changes in the interpretation of existing accounting standards, by the FASB or the SEC or otherwise reflected in U.S. GAAP, potentially could affect our consolidated results of operations, cash flows and financial condition. These changes can materially affect how we record and report our consolidated results of operations, cash flows, financial condition and other financial information. In some cases, we could be required to apply a new or revised standard retroactively, resulting in the revised treatment of certain transactions or activities, and, in some cases, the revision of our consolidated financial statements for prior periods. For additional information regarding change in accounting standards, refer to the "Recent Accounting Developments" section of Note 1 included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**Changes in tax laws, rules or regulations, challenges to our tax positions with respect to historical transactions, and changes in the composition of our pre-tax earnings may increase our effective tax rate and thus adversely affect our consolidated financial statements.**

Our businesses can be directly or indirectly affected by new tax legislation, the expiration of existing tax laws or the interpretation of existing tax laws worldwide.

On December 22, 2017, the United States enacted the Tax Cuts and Jobs Act (H.R. 1), effective January 2018. This decreased the U.S. corporate income tax rate from 35% to 21%, repealed the alternative minimum tax and replaced the existing worldwide tax system with a modified territorial system. The modified territorial system eliminates income tax on foreign dividends and introduces new provisions that generate incremental tax on foreign earnings, base erosion payments and limit the benefit of foreign tax credits. There is uncertainty around the application of these provisions, generally and as to their applicability to our business, and guidance from the Internal Revenue Service has been limited to date. Although we have not yet fully determined the impact of these provisions, it is possible these new provisions could diminish the benefit of the lower U.S. corporate income tax rate.

U.S. state governments, including Massachusetts, and jurisdictions around the world continue to review proposals to amend tax laws, rules and regulations applicable to our businesses that could have a negative impact on our capital or after-tax earnings. In the normal course of our business, we are subject to review by U.S. and non-U.S. tax authorities. A review by any such authority could result in an increase in our recorded tax liability. In addition to the aforementioned risks, our effective tax rate is dependent on the nature and geographic composition of our pre-tax earnings and could be negatively affected by changes in these factors.

**We may incur losses as a result of unforeseen events, including terrorist attacks, natural disasters, the emergence of a pandemic or acts of embezzlement.**

Acts of terrorism, natural disasters or the emergence of a pandemic could significantly affect our business. We have instituted disaster recovery and continuity plans to address risks from terrorism, natural disasters and pandemic; however, anticipating or addressing all potential contingencies is not possible for events of this nature. Acts of terrorism, either targeted or broad in scope, or natural disasters could damage our physical facilities, harm our employees and disrupt our operations. A pandemic, or concern about a possible pandemic, could lead to operational difficulties and impair our ability to manage our business. Acts of terrorism, natural disasters and pandemics could also negatively affect our clients, counterparties and service providers, as well as result in disruptions in general economic activity and the financial markets.

**ITEM 1B. UNRESOLVED STAFF COMMENTS**

None.

**ITEM 2. PROPERTIES**

Our headquarters is located at State Street Financial Center, One Lincoln Street, Boston, Massachusetts, a 36-story leased office building. Various divisions of our two lines of business, as well as support functions, occupy space in this building. We occupy four buildings located in Quincy, Massachusetts, one of which we own and three of which we lease, along with the Channel Center, another leased office building located in Boston, all of which function as our principal operations facilities.

We occupy a total of approximately 8.1 million square feet of office space and related facilities worldwide, of which approximately 7.2 million square feet are leased. The following table provides information on our office space and related facilities:

Principal Properties <sup>(1)</sup>	City	State/ Country	Owned/ Leased
<b>U.S. and Canada:</b>			
State Street Financial Center	Boston	MA	Leased
Channel Center	Boston	MA	Leased

<sup>(1)</sup> We lease other properties in the above regions which consists of 36 locations in the U.S. and Canada, 34 locations in EMEA and 30 locations in APAC.

**ITEM 3. LEGAL PROCEEDINGS**

The information required by this Item is provided under "Legal and Regulatory Matters" in Note 13 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K, and is incorporated herein by reference.

**ITEM 4. MINE SAFETY DISCLOSURES**

Not applicable.

**EXECUTIVE OFFICERS OF THE REGISTRANT**

The following table presents certain information with respect to each of our executive officers as of February 26, 2018.

<b>Name</b>	<b>Age</b>	<b>Position</b>
Joseph L. Hooley	60	Chairman and Chief Executive Officer
Eric W. Aboaf	53	Executive Vice President and Chief Financial Officer
Jeffrey N. Carp	61	Executive Vice President, Chief Legal Officer and Secretary
Jeff D. Conway	52	Executive Vice President, Global Head of Operations and Business Transformation
Andrew J. Erickson	48	Executive Vice President, Head of Global Services
Hannah M. Grove	54	Executive Vice President and Chief Marketing Officer
Kathryn M. Horgan	52	Executive Vice President and Chief Human Resources and Citizenship Officer
Karen C. Keenan	55	Executive Vice President and Chief Administrative Officer
Andrew P. Kuritzkes	57	Executive Vice President and Chief Risk Officer
Louis D. Maiuri	53	Executive Vice President, Head of Global Markets and Global Exchange
Elizabeth Nolan	55	Executive Vice President, Chief Executive Officer for Europe, Middle East and Africa
Ronald P. O'Hanley	61	President and Chief Operating Officer
Elizabeth Schaefer	43	Senior Vice President, Deputy Controller and Chief Accounting Officer (interim)
Wai-Kwong Seck	62	Executive Vice President, Chief Executive Officer for Asia Pacific
Antoine Shagoury	47	Executive Vice President and Global Chief Information Officer
George E. Sullivan	57	Executive Vice President, Head of Alternative Investment Solutions
Cyrus Taraporevala	51	President and Chief Executive Officer, State Street Global Advisors

All executive officers are appointed by the Board and hold office at the discretion of the Board. No family relationships exist among any of our directors and executive officers.

On November 7, 2017 State Street Corporation announced that Mr. Hooley will retire as Chief Executive Officer by the end of 2018 and will remain as a director and Chairman of the Board of Directors throughout 2019. Mr. O'Hanley will succeed Mr. Hooley as State Street's Chief Executive Officer, upon Mr. Hooley's retirement.

Mr. Hooley joined State Street in 1986 and currently serves as Chairman and Chief Executive Officer. He was appointed Chief Executive Officer in March 2010 and Chairman of the Board in January 2011. He served as our President and Chief Operating Officer from 2008 through December 2014. From 2002 to 2008, Mr. Hooley served as Executive Vice President and head of Investor Services and, in 2006, was appointed Vice Chairman and Global Head of Investment Servicing and Investment Research and Trading. Mr. Hooley was elected to serve on the Board of Directors effective October 22, 2009.

Mr. Aboaf joined State Street in December 2016 as Executive Vice President and has served as Executive Vice President and Chief Financial Officer since February 2017. Prior to joining State Street, Mr. Aboaf served as chief financial officer of Citizens Financial Group, a financial services and retail banking firm, from April 2015 to December 2016, with responsibility for all finance functions and corporate development. From 2003 to March 2015, he served in

several senior management positions for Citigroup, a global investment banking and financial services corporation, including as global treasurer and as the chief financial officer of the institutional client group, which included the custody business.

Mr. Carp joined State Street in 2006 as Executive Vice President and Chief Legal Officer. Later in 2006, he was also appointed Secretary. From 2004 to 2005, Mr. Carp served as executive vice president and general counsel of Massachusetts Financial Services, an investment management and research company. From 1989 until 2004, Mr. Carp was a senior partner at the law firm of Hale and Dorr LLP, where he was an attorney since 1982. Mr. Carp served as State Street's interim Chief Risk Officer from February 2010 until September 2010.

Mr. Conway joined State Street more than 30 years ago and serves as Executive Vice President and head of State Street's operations and business transformation globally. Prior to his current role, he was Chief Executive Officer for Europe, the Middle East and Africa from March 2015 until December 2017. As part of his transition from that role, he remains responsible for some of our UK-regulated activities. Prior to that role, Mr. Conway held several other management positions within the Company, including leading Global Exchange from April 2013 to March 2015. From 2007 to April 2013, Mr. Conway served as the global head of our Investment Management Services business.

Mr. Erickson joined State Street in April 1991 and since November 2017 has served as the

Executive Vice President and head of our Global Services business. Prior to this role and commencing in June 2016, he served as the Executive Vice President and head of Investment Services business in the Americas. Prior to that role, Mr. Erickson was the head of our Global Services business in Asia Pacific from April 2014 to June 2016 and prior to that was Head of North Asia for Global Services from 2010 to April 2014. Mr. Erickson has also held several other positions within State Street during his over 25 years with the Company.

Ms. Grove joined State Street in 1998 and currently serves as Executive Vice President and Chief Marketing Officer, a role she has been in since 2008. Prior to this role, Ms. Grove served as senior vice president for State Street's Global Marketing division. Prior to joining State Street, Ms. Grove was the marketing director for World Times' Money Matters Institute, a collaboration between the United Nations and the World Bank that sought to foster sustainable development in emerging economies.

Ms. Horgan joined State Street in April 2009 and has served as Executive Vice President and Chief Human Resources and Citizenship Officer since March 2017. Prior to March 2017, she served as Executive Vice President from 2012, and Chief Operating Officer, from 2011, for State Street's Global Human Resources division. Prior to that role, Ms. Horgan served as the senior vice president of human resources for State Street Global Advisors. Prior to joining State Street, Ms. Horgan was the executive vice president of human resources for Old Mutual Asset Management, a global, diversified multi-boutique asset management company, from 2006 to 2009.

Ms. Keenan joined State Street in July 2007 as part of the acquisition of Investors Financial Services (IBT) and since June 2016 has served as Executive Vice President and Chief Administrative Officer, managing cross-organizational initiatives, overseeing data strategy projects, overseeing the Compliance Department and leading key components of regulatory initiatives. Prior to this role, from July 2015 to June 2016, Ms. Keenan led the Global Markets division worldwide, following her role as the head of Global Markets in EMEA from 2012 to 2016. From 2010 to 2012, Ms. Keenan served as the chief strategy officer for Global Markets. While with IBT, she served as chief financial officer during its initial public offering and its early years as a public company.

Mr. Kuritzkes joined State Street in 2010 as Executive Vice President and Chief Risk Officer. Prior to joining State Street, Mr. Kuritzkes was a partner at Oliver, Wyman & Company, an international management consulting firm, and led the firm's Public Policy practice in North America. He joined Oliver, Wyman & Company in 1988, was a

managing director in the firm's London office from 1993 to 1997, and served as vice chairman of Oliver, Wyman & Company globally from 2000 until the firm's acquisition by MMC in 2003. From 1986 to 1988, he worked as an economist and lawyer for the Federal Reserve Bank of New York.

Mr. Maiuri joined State Street in October 2013 and has served as Executive Vice President and head of State Street Global Markets since June 2016 and head of State Street Global Exchange since July 2015. From 2013 to July 2015, he led State Street's Securities Finance division. Before joining State Street, Mr. Maiuri served as executive vice president and deputy chief executive officer of asset servicing at BNY Mellon, a global banking and financial services corporation, from May 2009 to October 2013.

Ms. Nolan joined State Street in October 2015 and serves as Chief Executive Officer for Europe, the Middle East and Africa, with regulatory approval pending for U.K. banking activities. Prior to that, she served as Executive Vice President and co-head of State Street Global Services for Europe, the Middle East and Africa from January 2017 to January 2018. Prior to that role, she served as head of European Banking from October 2015 to January 2017. Before joining State Street, from January 2015 to October 2015, Ms. Nolan served as managing director at Deutsche Bank in the global custody and clearing business. Prior to that role, Ms. Nolan spent 12 years at J.P. Morgan in various senior leadership roles, including from 2009 to 2014 as the head of client services and client onboarding globally for markets and investor services.

Mr. O'Hanley joined State Street in April 2015 and has served as President and Chief Operating Officer since November 2017. Prior to this role Mr. O'Hanley served as the Chief Executive Officer and President of State Street Global Advisors, the investment management arm of State Street Corporation and was appointed as Vice Chairman January 1, 2017. Prior to joining State Street, Mr. O'Hanley was president of Asset Management & Corporate Services for Fidelity Investments, a financial and mutual fund services corporation, from 2010 to February 2014. From 1997 to 2010, Mr. O'Hanley served in various positions at Bank of New York Mellon, a global banking and financial services corporation, serving as President and Chief Executive Officer of BNY Asset Management in Boston from 2007 to 2010.

Ms. Schaefer joined State Street in 2014, and since September 2017 has served as Interim Chief Accounting Officer. Ms. Schaefer continues to serve as Senior Vice President and Deputy Controller, a position she has held since July 2016, prior to which she served as Director of SEC Reporting, Accounting Policy & Regulatory Compliance. Prior to joining

State Street, she served in various roles at American Express Company, a global services company whose principal products and services are charge and credit card products and travel-related services, including, from August 2012 to December 2014, senior roles within the Controllershship organization.

Mr. Seck joined State Street in 2011 as Executive Vice President and head of Global Markets and Global Services across Asia Pacific. Prior to joining State Street, Mr. Seck was chief financial officer of the Singapore Exchange for eight years. Previously he held senior-level positions in the Monetary Authority of Singapore, the Government of Singapore Investment Corporation, Lehman Brothers and DBS Bank.

Mr. Shagoury joined State Street in November 2015 as Executive Vice President, Information Technology and Global Chief Information Officer (CIO). Prior to joining State Street, Mr. Shagoury had several senior management positions from 2010 to November 2015 with the London Stock Exchange Group, a British-based stock exchange and financial information company, including the group chief operating officer and chief information officer.

Mr. Sullivan joined State Street in 2007 as part of the IBT acquisition and has served as Executive Vice President and global head of State Street's Alternative Investment Solutions group. Mr. Sullivan spent 15 years at IBT, where his role was managing director of Global Fund Services.

Mr. Taraporevala joined State Street in April 2016 and since November 2017 has served as president and chief executive officer of SSGA. He joined SSGA as Executive Vice President and Global Head of Product and Marketing. Prior to joining SSGA, Mr. Taraporevala was the head of Retail Management Accounts and Life Insurance & Annuities for Fidelity Investments from 2012 to October 2015. Prior to that, Mr. Taraporevala held senior leadership roles at BNY Mellon Asset Management, including executive director of North American distribution.

**PART II**

**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

**MARKET FOR REGISTRANT'S COMMON EQUITY**

Our common stock is listed on the New York Stock Exchange under the ticker symbol STT. There were 5,214 shareholders of record as of January 31, 2018. The information required by this item concerning the market prices of, and dividends on, our common stock during the past two years is provided under "Quarterly Summarized Financial Information (Unaudited)" included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K, and is incorporated herein by reference.

In June 2017, our Board approved a common stock purchase program authorizing the purchase by us of up to \$1.4 billion of our common stock through

June 30, 2018. As of December 31, 2017, we had approximately \$700 million remaining under that program.

The following table presents purchases of our common stock and related information for each of the months in the quarter ended December 31, 2017. All shares of our common stock purchased during the quarter ended December 31, 2017 were purchased under the above-described Board-approved program. Stock purchases may be made using various types of mechanisms, including open market purchases or transactions off market, and may be made under Rule 10b5-1 trading programs. The timing of stock purchases, types of transactions and number of shares purchased will depend on several factors, including market conditions, our capital position, our financial performance and investment opportunities. The common stock purchase program does not have specific price targets and may be suspended at any time.

(Dollars in millions, except per share amounts; shares in thousands)	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares That May Yet be Purchased Under Publicly Announced Program

<b>Total</b>	<b>3,656</b>	<b>\$ 95.71</b>	<b>3,656</b>	<b>\$ 700</b>

Additional information about our common stock, including Board authorization with respect to purchases by us of our common stock, is provided under "Capital" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, and in Note 15 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K, and is incorporated herein by reference.

**RELATED STOCKHOLDER MATTERS**

As a bank holding company, our Parent Company is a legal entity separate and distinct from its principal banking subsidiary, State Street Bank, and its non-banking subsidiaries. The right of the Parent Company to participate as a shareholder in any distribution of assets of State Street Bank upon its liquidation, reorganization or otherwise is subject to the prior claims by creditors of State Street Bank, including obligations for federal funds purchased and securities sold under repurchase agreements and deposit liabilities.

Payment of dividends by State Street Bank is subject to the provisions of the Massachusetts banking law, which provide that State Street Bank's Board of Directors may declare, from State Street Bank's "net profits," as defined below, cash dividends annually, semi-annually or quarterly (but not more frequently) and can declare non-cash dividends at any time. Under Massachusetts banking law, for purposes of determining the amount of cash dividends that are payable by State Street Bank, "net profits" is defined as an amount equal to the remainder of all earnings from current operations plus actual recoveries on loans and investments and other assets, after deducting from the total thereof all current operating expenses, actual losses, accrued dividends on preferred stock, if any, and all federal and state taxes.

No dividends may be declared, credited or paid so long as there is any impairment of State Street Bank's capital stock. The approval of the Massachusetts Commissioner of Banks is required if the total of all dividends declared by State Street Bank in any calendar year would exceed the total of its net profits for that year combined with its retained net profits for the preceding two years, less any required transfer to surplus or to a fund for the retirement of any preferred stock.

Under Federal Reserve regulations, the approval of the Federal Reserve would be required for the payment of dividends by State Street Bank if the total amount of all dividends declared by State Street Bank in any calendar year, including any proposed dividend, would exceed the total of its net income for such calendar year as reported in State Street Bank's *Consolidated Reports of Condition and Income for a Bank with Domestic and Foreign Offices Only - FFIEC 031*, commonly referred to as the "Call Report," as submitted through the Federal Financial Institutions Examination Council and provided to the Federal Reserve, plus its "retained net income" for the preceding two calendar years. For these purposes, "retained net income," as of any date of determination, is defined as an amount equal to State Street Bank's net income (as reported in its Call Reports for the calendar year in which retained net income is being determined) less any dividends declared during such year. In determining the amount of dividends that are payable, the total of State Street Bank's net income for the current year and its retained net income for the preceding two calendar years is reduced by any net losses incurred in the current or preceding two-year period and by any required transfers to surplus or to a fund for the retirement of preferred stock.

Prior Federal Reserve approval also must be obtained if a proposed dividend would exceed State Street Bank's "undivided profits" (retained earnings) as reported in its Call Reports. State Street Bank may include in its undivided profits amounts contained in its surplus account, if the amounts reflect transfers of undivided profits made in prior periods and if the Federal Reserve's approval for the transfer back to undivided profits has been obtained.

Under the PCA provisions adopted pursuant to the FDIC Improvement Act of 1991, State Street Bank may not pay a dividend when it is deemed, under the PCA framework, to be under-capitalized, or when the payment of the dividend would cause State Street Bank to be under-capitalized. If State Street Bank is under-capitalized for purposes of the PCA framework, it must cease paying dividends for so long as it is deemed to be under-capitalized. Once earnings have begun to improve and an adequate capital position has been restored, dividend payments may resume in

accordance with federal and state statutory limitations and guidelines.

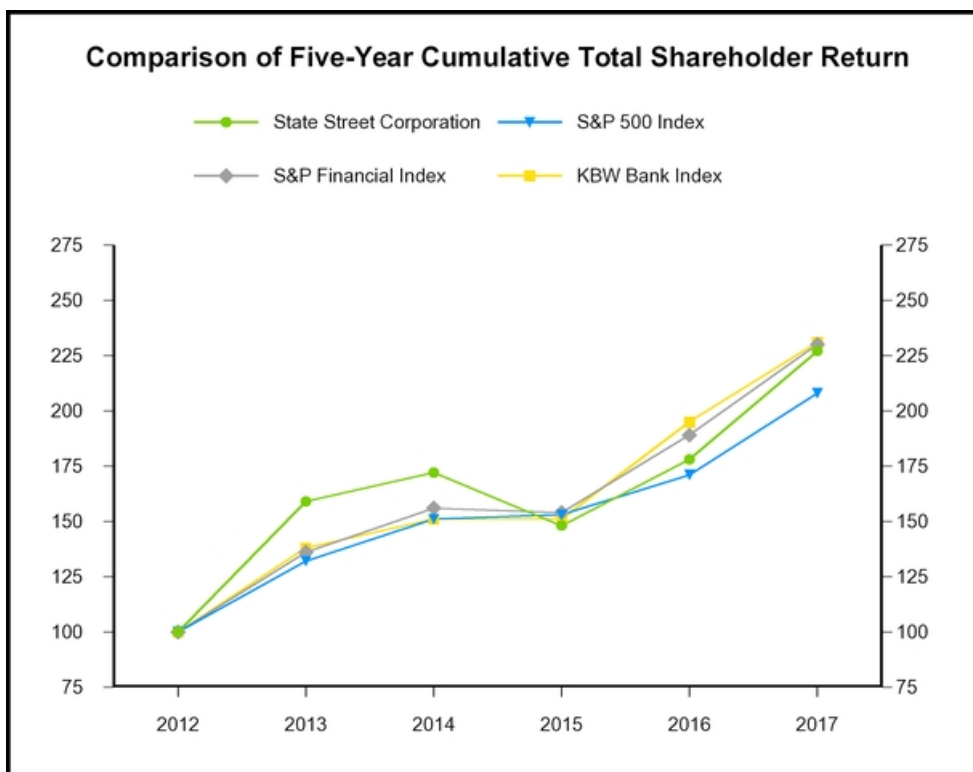

In 2017, our Parent Company declared aggregate quarterly common stock dividends to its shareholders of \$1.60 per share, totaling approximately \$596 million. In 2016, our Parent Company declared aggregate quarterly common stock dividends to its shareholders of \$1.44 per share, totaling approximately \$559 million. Currently, any payment of future common stock dividends by our Parent Company to its shareholders is subject to the review of our capital plan by the Federal Reserve in connection with its CCAR process. Information about dividends declared by our Parent Company and dividends from our subsidiary banks is provided under "Capital" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, and in Note 15 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K, and is incorporated herein by reference. Future dividend payments of State Street Bank and our non-banking subsidiaries cannot be determined at this time. In addition, refer to "Capital Planning, Stress Tests and Dividends" in "Supervision and Regulation" included under Item 1, Business, of this Form 10-K and the risk factor titled "*Our business and capital-related activities, including our ability to return capital to shareholders and purchase our capital stock, may be adversely affected by our implementation of the revised regulatory capital and liquidity standards that we must meet under the Basel III final rule, the Dodd-Frank Act and other regulatory initiatives, or in the event our capital plan or post-stress capital ratios are determined to be insufficient as a result of regulatory capital stress testing*" included under Item 1A, Risk Factors, of this Form 10-K.

Information about our equity compensation plans is included under Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters, and in Note 18 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K, and is incorporated herein by reference.

**SHAREHOLDER RETURN PERFORMANCE PRESENTATION**

The graph presented below compares the cumulative total shareholder return on State Street's common stock to the cumulative total return of the S&P 500 Index, the S&P Financial Index and the KBW Bank Index over a five-year period. The cumulative total shareholder return assumes the investment of \$100 in State Street common stock and in each index on December 31, 2012. It also assumes reinvestment of common stock dividends.

The S&P Financial Index is a publicly available, capitalization-weighted index, comprised of 67 of the Standard & Poor's 500 companies, representing 27 diversified financial services companies, 23 insurance companies, and 17 banking companies. The KBW Bank Index is a modified cap-weighted index consisting of 24 exchange-listed stocks, representing national money center banks and leading regional institutions.

## ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### GENERAL

As of December 31, 2017, we had consolidated total assets of \$238.43 billion, consolidated total deposits of \$184.90 billion, consolidated total shareholders' equity of \$22.32 billion and 36,643 employees. We operate in more than 100 geographic markets worldwide, including in the U.S., Canada, Europe, the Middle East and Asia.

Our operations are organized into two lines of business, Investment Servicing and Investment Management, which are defined based on products and services provided.

*Investment Servicing* provides services for institutional clients, including mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, investment managers, foundations and endowments worldwide. Products include custody; product and participant level accounting; daily pricing and administration; master trust and master custody; depotbank services (a fund oversight role created by regulation); record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; performance, risk and compliance analytics; and financial data management to support institutional investors.

*Investment Management*, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR<sup>®</sup> ETF brand.

For financial and other information about our lines of business, refer to "Line of Business Information" in this Management's Discussion and Analysis and Note 24 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

This Management's Discussion and Analysis should be read in conjunction with the consolidated financial statements and accompanying notes to consolidated financial statements included under Item

8, Financial Statements and Supplementary Data, of this Form 10-K. Certain previously reported amounts presented in this Form 10-K have been reclassified to conform to current-period presentation.

We prepare our consolidated financial statements in conformity with U.S. GAAP. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in its application of certain accounting policies that materially affect the reported amounts of assets, liabilities, equity, revenue and expenses.

The significant accounting policies that require us to make judgments, estimates and assumptions that are difficult, subjective or complex about matters that are uncertain and may change in subsequent periods include:

- accounting for fair value measurements;
- other-than-temporary impairment of investment securities;
- impairment of goodwill and other intangible assets; and
- contingencies.

These significant accounting policies require the most subjective or complex judgments, and underlying estimates and assumptions could be subject to revision as new information becomes available. Additional information about these significant accounting policies is included under "Significant Accounting Estimates" in this Management's Discussion and Analysis.

Certain financial information provided in this Form 10-K, including in this Management's Discussion and Analysis, is prepared on both a U.S. GAAP, or reported basis, and a non-GAAP basis, including certain non-GAAP measures used in the calculation of identified regulatory ratios. We measure and compare certain financial information on a non-GAAP basis, including information (such as capital ratios calculated under regulatory standards scheduled to be effective in the future) that management uses in evaluating our business and activities.

Non-GAAP financial information should be considered in addition to, and not as a substitute for or superior to, financial information prepared in conformity with U.S. GAAP. Any non-GAAP financial information presented in this Form 10-K, including this Management's Discussion and Analysis, is reconciled to its most directly comparable currently applicable regulatory ratio or U.S. GAAP-basis measure.

We further believe that our presentation of fully taxable-equivalent NII, a non-GAAP measure, which reports non-taxable revenue, such as interest income

associated with tax-exempt investment securities, on a fully taxable-equivalent basis, facilitates an investor's understanding and analysis of our underlying financial performance and trends.

This Management's Discussion and Analysis contains statements that are considered "forward-looking statements" within the meaning of U.S. securities laws. Forward-looking statements include statements about our goals and expectations regarding our business, financial and capital condition, results of operations, strategies, financial portfolio performance, dividend and stock purchase programs, expected outcomes of legal proceedings, market growth, acquisitions, joint ventures and divestitures and new technologies, services and opportunities, as well as industry, regulatory, economic and market trends, initiatives and developments, the business environment and other matters that do not relate strictly to historical facts. These forward-looking statements involve certain risks and uncertainties which could cause actual results to differ materially. We undertake no obligation to revise the forward-looking statements contained in this Management's Discussion and Analysis to reflect events after the time we file this Form 10-K with the SEC. Additional information about forward-looking statements and related risks and uncertainties is provided in "Risk Factors" under Item 1A of this Form 10-K.

We provide additional disclosures required by applicable bank regulatory standards, including supplemental qualitative and quantitative information with respect to regulatory capital (including market risk associated with our trading activities) and the liquidity coverage ratio, summary results of semi-annual State Street-run stress tests which we conduct under the Dodd-Frank Act, and resolution plan disclosures required under the Dodd-Frank Act. These additional disclosures are accessible on the "Investor Relations" section of our corporate website at [www.statestreet.com](http://www.statestreet.com).

We have included our website address in this report as an inactive textual reference only. Information on our website is not incorporated by reference into this Form 10-K.

We use acronyms and other defined terms for certain business terms and abbreviations, as defined on the acronyms list and glossary included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

<sup>(1)</sup> Additional information about our preferred stock dividends is provided in Note 15 to the consolidated financial statements in this Form 10-K.

<sup>(2)</sup> Represents the portion of net income available to common equity allocated to participating securities, composed of unvested and fully vested SERP shares and fully vested deferred director stock awards, which are equity-based awards that contain non-forfeitable rights to dividends, and are considered to participate with the common stock in undistributed earnings.

The following "Financial Results and Highlights" section provides information related to significant events, as well as highlights of our consolidated financial results for the year ended December 31, 2017 presented in Table 1: Overview of Financial Results. More detailed information about our consolidated financial results, including comparisons of our financial results for the year ended December 31, 2017 to those for the year ended December 31, 2016, is provided under "Consolidated Results of Operations," "Line of Business Information" and "Capital" which follows these sections, as well as in our consolidated financial statements included in this Form 10-K. In this Management's Discussion and Analysis, where we describe the effects of changes in foreign exchange rates, those effects are determined by applying applicable weighted average foreign exchange rates from the relevant 2016 period to the relevant 2017 period results.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Financial Results and Highlights

- EPS of \$5.24 in 2017 increased 5% compared to \$4.97 in 2016.
  - Both 2017 and 2016 include the impact of notable items. The 2017 results include a one-time estimated net impact of \$270 million associated with the Tax Cuts and Jobs Act (TCJA). This impact consisted of a one-time estimated tax expense of approximately \$250 million and a one-time reduction of approximately \$20 million in revenue.
    - Actual effects of the TCJA may differ from these estimates, among other things, due to additional tax and regulatory guidance and changes in our assumptions and interpretations.
  - The 2016 results include an acceleration of compensation expense of \$249 million (\$161 million after-tax) and tax benefits of \$211 million resulting from a reduction in accrued tax expense attributable to retained foreign earnings and tax benefits from capital actions involving our overseas affiliates.
- 2017 ROE of 10.6% increased from 10.5% in 2016.
- Pre-tax margin of 26.0% in 2017 increased from 20.8% in 2016.

### Revenue

- Total revenue and fee revenue increased 9% and 10%, respectively, in 2017 compared to 2016, primarily driven by strength in servicing fees, management fees, processing and other fees, and the impact of the weaker U.S. dollar, partially offset by lower trading services revenue.
- Servicing fee revenue increased 6% in 2017 compared to 2016, primarily due to market appreciation and net new business, partially offset by continued hedge fund outflows and the impact of the businesses we exited in 2017.
- Management fee revenue increased 25% in 2017 compared to 2016, primarily due to the GEAM business acquired in 2016, continued strength in global equity markets, and ETF flows.
- NII increased 11% in 2017 compared to 2016, driven by higher market interest rates in the U.S. and loan portfolio growth, partially offset by a smaller balance sheet.

### Expenses

- Total expenses increased 2% in 2017 compared to 2016, primarily due to higher restructuring charges, information systems and communications costs, and compensation and employee benefit costs, partially offset by approximately \$150 million of Beacon savings. Total Beacon program-to-date savings were approximately \$325 million through December 31, 2017.
- In 2017, we recorded restructuring charges of \$245 million related to Beacon. We expect Beacon target savings of \$550 million to be realized by mid-2019, 18 months ahead of schedule.

### AUCA/AUM

- AUCA increased 15% in 2017 compared to 2016, primarily due to strength in equity markets, flows, and new business. In 2017, we secured new asset servicing mandates of approximately \$445 billion. Our AUCA pipeline of asset servicing mandates remaining to be installed in future periods totaled approximately \$350 billion as of December 31, 2017.
- AUM increased 13% in 2017 compared to 2016, primarily driven by strength in equity markets, weaker U.S. dollar, and positive ETF flows.

### Capital

- We declared aggregate common stock dividends of \$1.60 per share, totaling approximately \$596 million in 2017, compared to \$1.44 per share, totaling \$559 million in 2016, representing an increase of approximately 11% on a per share basis.
- In 2017, we acquired 16.8 million shares of common stock at an average per-share cost of \$86.37 and an aggregate cost of approximately \$1,450 million under common stock purchase programs approved by our Board.
- CET1 capital ratio under the Basel III standardized approach increased to 11.9% as of December 31, 2017, compared to 11.6% as of December 31, 2016.
- Tier 1 leverage ratio increased to 7.3% as of December 31, 2017, compared to 6.5% as of December 31, 2016.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**CONSOLIDATED RESULTS OF OPERATIONS**

This section discusses our consolidated results of operations for 2017 compared to 2016, as well as 2016 compared to 2015, and should be read in conjunction with the consolidated financial statements and accompanying notes to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**Total Revenue****TABLE 2: TOTAL REVENUE**

<sup>(nm)</sup> Not meaningful

**Fee Revenue**

Table 2: Total Revenue, provides the breakout of fee revenue for the years ended December 31, 2017, 2016 and 2015.

Service and management fees collectively made up approximately 78% of total fee revenue in both 2017 and 2016 compared to approximately 76% in 2015. The level of these fees is influenced by several factors, including the mix and volume of our AUCA and our AUM, the value and type of securities positions held (with respect to assets under custody), the volume of portfolio transactions, and the types of products and services used by our clients, and is generally affected by changes in worldwide equity and fixed-income security valuations and trends in market asset class preferences.

Generally, servicing fees are affected by changes in daily average valuations of AUCA. Additional factors, such as the relative mix of assets serviced, the level of transaction volumes, changes in service level, the nature of services provided, balance credits, client minimum balances, pricing concessions, the geographical location in which services are provided and other factors, may have a significant effect on our servicing fee revenue.

Management fees generally are affected by changes in month-end valuations of AUM. Management fees for certain components of managed assets, such as ETFs, are affected by daily average valuations of AUM. Management fee revenue is more sensitive to market valuations than servicing fee revenue, as a higher proportion of the underlying services provided, and the associated management fees earned, are dependent on equity and fixed-income security valuations. Additional factors, such as the relative mix of assets managed, may have a significant effect on our management fee revenue. While certain management fees are directly determined by the values of AUM and the investment strategies employed, management fees may reflect other factors, including performance fee arrangements, as well as our relationship pricing for clients using multiple services.

Asset-based management fees for actively managed products are generally charged at a higher percentage of AUM than for passive products. Actively managed products may also include performance fee arrangements which are recorded when the fee is earned, based on predetermined benchmarks associated with the applicable fund's performance.

In light of the above, we estimate, using relevant information as of December 31, 2017 and assuming that all other factors remain constant, that:

- A 10% increase or decrease in worldwide equity valuations, on a weighted average basis, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total servicing and management fee revenues of approximately 3%; and
- A 10% increase or decrease in worldwide fixed income markets, on a weighted average basis, over the relevant periods for which our servicing and management fees are calculated, would result in a corresponding change in our total servicing and management fee revenues of approximately 1%.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

See Table 3: Daily, Month-End and Year-End Equity Indices and Table 4: Year-End Debt Indices, for selected indices. While the specific indices presented are indicative of general market trends, the asset types and classes relevant to individual client portfolios can and do differ, and the performance of associated relevant indices can therefore differ from the performance of the indices presented.

Daily averages, month-end averages, and year-

end indices demonstrate worldwide changes in equity and debt markets that affect our servicing and management fee revenue. Year-end indices affect the values of AUCA and AUM as of those dates.

Further discussion of fee revenue is provided under Line of Business Information in this Management's Discussion and Analysis in this Form 10-K.

**Net Interest Income**

See Table 2: Total Revenue, for the breakout of interest income and interest expense for the years ended December 31, 2017, 2016 and 2015. NII was \$2,304 million for 2017 compared to \$2,084 million and \$2,088 million for 2016 and 2015, respectively.

NII is defined as interest income earned on interest-earning assets less interest expense incurred on interest-bearing liabilities. Interest-earning assets, which principally consist of investment securities, interest-bearing deposits with banks, repurchase agreements, loans and leases and other liquid assets, are financed primarily by client deposits, short-term borrowings and long-term debt.

NIM represents the relationship between annualized fully taxable-equivalent NII and average total interest-earning assets for the period. It is calculated by dividing fully taxable-equivalent NII by average interest-earning assets. Revenue that is exempt from income taxes, mainly that earned from certain investment securities (state and political subdivisions), is adjusted to a fully taxable-equivalent basis using the U.S. federal and state statutory income tax rates.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

<sup>(1)</sup> Reflects the impact of balance sheet netting under enforceable netting agreements of approximately \$31 billion, \$30 billion and \$30 billion for the years ended December 31, 2017, 2016 and 2015, respectively. Excluding the impact of netting, the average interest rates would be approximately 0.79%, 0.43% and 0.19% for the years ended December 31, 2017, 2016 and 2015, respectively.

<sup>(2)</sup> Average rate includes the impact of FX swap expense of approximately \$141 million, \$27 million and \$44 million for the years ended December 31, 2017, 2016 and 2015, respectively. Average rates for total interest-bearing deposits excluding the impact of FX swap expense were 0.02%, 0.04% and 0.04% for the years ended December 31, 2017, 2016 and 2015, respectively.

See Table 5: Average Balances and Interest Rates - Fully Taxable-Equivalent Basis, for the breakout of NII on a fully taxable-equivalent basis for the years ended December 31, 2017, 2016 and 2015. NII on a fully taxable-equivalent basis increased in 2017 compared to 2016, as benefits due to higher U.S. market interest rates, disciplined liability pricing and loan portfolio growth, partially offset by a smaller balance sheet. Average balances in 2017 reflect management actions to reduce the usage of wholesale certificates of deposit (CDs) on our balance sheet. Average interest-bearing and noninterest-bearing deposits were approximately \$6.71 billion lower in 2017 compared to 2016, primarily due to a \$9.64 billion reduction in wholesale CDs, partially offset by an increase in client deposits.

We recorded aggregate discount accretion in interest income of approximately \$19 million in 2017, respectively, related to the assets we consolidated onto our balance sheet in 2009 from our asset-backed commercial paper conduits. Assuming that we hold the former conduit securities remaining in our investment portfolio until they mature or are sold, we expect to generate aggregate discount accretion in

future periods of approximately \$123 million over their remaining terms.

The timing and ultimate recognition of any applicable discount accretion depends, in part, on factors that are outside of our control, including anticipated prepayment speeds and credit quality. The impact of these factors is uncertain and can be significantly influenced by general economic and financial market conditions. The timing and recognition of any applicable discount accretion can also be influenced by or ongoing management of the risks and other characteristics associated with our investment securities portfolio, including sales of securities which would otherwise generate interest revenue through accretion.

Changes in the components of interest-earning assets and interest-bearing liabilities are discussed in more detail below. Additional information about the components of interest income and interest expense is provided in Note 17 to the consolidated financial statements included in this Form 10-K.

Average total interest-earning assets were \$7.95 billion lower in 2017 compared to 2016, primarily driven by lower levels of wholesale CDs and

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

corresponding reductions in interest-bearing deposits with banks and investment securities.

Interest-bearing deposits with banks averaged \$47.51 billion in 2017 compared to \$53.09 billion in 2016. These deposits primarily reflect our maintenance of cash balances at the Federal Reserve, the ECB and other non-U.S. central banks.

Securities purchased under resale agreements averaged \$2.13 billion in 2017 compared to \$2.56 billion in 2016, which reflects the impact of balance sheet netting under enforceable netting agreements of approximately \$31 billion and \$30 billion for 2017 and 2016, respectively. We maintain an agreement with a clearing organization that enables us to net all securities sold under repurchase agreements against those purchased under resale agreements with counterparties that are also members of the clearing organization.

Investment securities averaged \$95.78 billion in 2017 compared to \$100.74 billion in 2016. The decrease in average investment securities was driven by a reduction in U.S. Treasury securities and continued investment in loans and leases.

Loans and leases averaged \$21.92 billion in 2017 compared to \$19.01 billion in 2016. The increase in average loans and leases resulted from growth in loans to municipalities, hedge fund collateralized lending, mutual fund lending, and continued investment in senior secured loans. Loans and leases also includes U.S. and non-U.S. overdrafts, which provide liquidity to clients in support of investment activities. Average U.S. and non-U.S. overdrafts remained relatively stable in 2017 at \$2.26 billion and \$1.46 billion, respectively, from \$2.28 billion and \$1.36 billion in 2016.

Average other interest-earning assets remained relatively stable with \$22.88 billion in 2017 and \$22.86 billion in 2016. Our average other interest-earning assets, largely associated with our enhanced custody business, comprised approximately 12% of our average total assets in 2017 and 2016. The enhanced custody business is our securities financing business where we act as principal with respect to our custody clients and generate securities finance revenue. The NII earned on these transactions is generally lower than the interest earned on other alternative investments.

Aggregate average U.S. and non-U.S. interest-bearing deposits decreased to \$122.56 billion in 2017 from \$125.66 billion in 2016. The lower levels in 2017 compared to the prior year period were a result of higher U.S. and non-U.S. interest bearing client deposit levels during the year, offset by management actions to reduce wholesale CDs. In 2017, a full year average of \$3.62 billion of non-U.S. interest-bearing deposits was transferred to U.S. interest bearing

deposits. Future deposit levels will be influenced by the underlying asset servicing business, client deposit behavior, and market conditions, including the general levels of U.S. and non-U.S. interest rates.

Average other short-term borrowings declined to \$1.31 billion in 2017 from \$1.67 billion in 2016, as bonds matured in the tax-exempt investment program.

Average long-term debt was \$11.60 billion in 2017, compared to \$11.40 billion in 2016. These amounts reflect issuances of senior debt, partially offset by maturities, during the respective periods.

Average other interest-bearing liabilities were \$4.61 billion in 2017 compared to \$5.39 billion in 2016. Other interest-bearing liabilities primarily reflect our level of cash collateral received from clients in connection with our enhanced custody business, which is presented on a net basis where we have enforceable netting agreements.

Several factors could affect future levels of NII and NIM, including the volume and mix of client liabilities; actions of various central banks; changes in the level of U.S. and non-U.S. interest rates and the slope of various yield curves around the world; revised or proposed regulatory capital or liquidity standards, or interpretations of those standards; the amount of discount accretion generated by the former conduit securities that remain in our investment securities portfolio; the yields earned on securities purchased compared to the yields earned on securities sold or matured; changes in the type and amount of credit or other loans we extend; and changes in our enhanced custody business.

Based on market conditions and other factors, including regulatory standards, we continue to reinvest the majority of the proceeds from pay-downs and maturities of investment securities in highly-rated securities, such as U.S. Treasury and agency securities, municipal securities, federal agency MBS and U.S. and non-U.S. mortgage- and ABS. The pace at which we continue to reinvest and the types of investment securities purchased will depend on the impact of market conditions, the implementation of regulatory standards, including interpretation of those standards and other factors over time. We expect these factors and the levels of global interest rates to influence what effect our reinvestment program will have on future levels of our NII and NIM.

### Provision for Loan Losses

We recorded a provision for loan losses of \$2 million in 2017 compared to \$10 million in 2016 and \$12 million in 2015. The provisions in these periods were recorded in connection with our exposure to non-investment grade borrowers composed of senior secured loans, which we purchased in connection with our participation in loan syndications in the non-

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

investment grade lending market. Additional information about these senior secured loans is provided under "Loans and Leases" in "Financial Condition" in this Management's Discussion and Analysis and in Note 4 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

### Expenses

Table 6: Expenses, provides the breakout of expenses for the years ended December 31, 2017, 2016 and 2015.

**TABLE 6: EXPENSES**

(Dollars in millions)	Years Ended December 31,			% Change 2017 vs. 2016	% Change 2016 vs. 2015
	2017	2016	2015

Number of employees at year-end	36,643	33,783	32,356	8	4

<sup>nm</sup> Not meaningful

Compensation and employee benefits expenses increased 1% in 2017 compared to 2016, primarily due to increased costs to support new business, annual merit and performance based incentive compensation increases, partially offset by Beacon savings. In December 2016, we recorded a pre-tax charge of \$249 million (\$161 million after tax) associated with an amendment of the terms of outstanding, previously issued, deferred cash-settled incentive compensation awards for certain employees to remove continued service requirements, thereby accelerating the future expense that would have been recognized over the remaining term of the awards had the continued service requirement not been removed.

Compensation and employee benefits expenses increased 7% in 2016 compared to 2015. The increase was primarily due to the aforementioned acceleration of compensation expenses and the impact of the GEAM business acquired in 2016.

Headcount increased 8% in 2017 compared to 2016. The growth in headcount was primarily within low cost locations. These increases were driven by strategic initiatives and new business, including the impact of large client lift outs, as well as regulatory initiatives and contractor conversions to full-time employees and partially offset by other reductions from Beacon.

Information systems and communications expenses increased 6% in 2017 compared to 2016. The increases were primarily related to technology infrastructure costs and investments supporting Beacon.

Information systems and communications expenses increased 8% in 2016 compared to 2015. The increase was primarily related to investments supporting new business and Beacon, and the impact of the GEAM business acquired in 2016.

Other expenses decreased 2% in 2017 compared to 2016, primarily due to lower professional services costs.

Other expenses decreased 28% in 2016 compared to 2015. The decrease was primarily due to lower litigation-related expenses and higher expenses in 2015 associated with the previously disclosed expense billing matter.

As a systemically important financial institution, we are subject to enhanced supervision and prudential standards. Our status as a G-SIB has also resulted in heightened prudential and conduct expectations of our U.S. and international regulators with respect to our capital and liquidity management and our compliance and risk oversight programs. These heightened expectations have increased our regulatory compliance costs, including personnel and systems, as well as significant additional implementation and related costs to enhance our regulatory compliance programs. We anticipate that these evolving regulatory compliance requirements and expectations will continue to affect our expenses.

### Acquisition Costs

We recorded acquisition costs of \$21 million, \$69 million and \$20 million in 2017, 2016 and 2015, respectively. In 2017, all such costs related to our acquisition of the GEAM business on July 1, 2016.

### Restructuring Charges

In connection with Beacon, we announced in 2016 that we expected:

(i) to incur aggregate pre-tax restructuring charges of approximately \$300 million to \$400 million beginning in 2016 through December 31, 2020 including approximately \$250 million to \$300 million in severance and benefits costs associated with targeted staff reductions (a substantial portion of which would result in future cash expenditures) and

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

approximately \$50 million to \$100 million in information technology application rationalization and real estate actions; and

(ii) to achieve estimated annual pre-tax net run-rate expense savings of \$550 million by the end of 2020, relative to 2015, all else equal, for full effect in 2021. Actual expenses may increase or decrease in the future due to other factors.

In 2017, we recorded restructuring charges of \$245 million, compared to \$142 million in 2016, related to Beacon. In aggregate, we have recorded restructuring charges of \$387 million related to Beacon, including \$280 million in severance costs and \$107 million in information technology application rationalization and real estate action.

In 2017, we achieved approximately \$150 million in year-over-year expense savings related to Beacon and expect target savings of \$550 million to be realized by mid-2019.

The following table presents aggregate restructuring activity for the periods indicated.

**TABLE 7: RESTRUCTURING CHARGES**

(In millions)	Employee Related Costs	Real Estate Actions	Asset and Other Write-offs	Total

<b>Accrual Balance at December 31, 2017</b>	<b>\$ 166</b>	<b>\$ 32</b>	<b>\$ 3</b>	<b>\$ 201</b>

**Income Tax Expense**

Income tax expense (benefit) was \$722 million in 2017, \$(22) million in 2016 and \$318 million in 2015. Our 2017 effective tax rate was 24.9%, compared to (1.0)% in 2016 and 13.8% in 2015. The 2017 income tax expense includes a one-time estimated tax expense of \$250 million for the provisional impact of the enactment of the TCJA. Actual effects of the TCJA may differ from these estimates, among other things, due to additional tax and regulatory guidance and changes in our assumptions and interpretations. The 2016 benefit included a reduction in accrued tax expense attributable to retained foreign earnings and tax benefits from capital actions involving our overseas affiliates.

Additional information regarding income tax expense, including unrecognized tax benefits, and tax contingencies are provided in Notes 13 and 22 to the consolidated financial statements under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**LINE OF BUSINESS INFORMATION**

Our operations are organized into two lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided. The results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry.

*Investment Servicing* provides services for institutional clients, including mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, investment managers, foundations and endowments worldwide. Products include custody; product- and participant-level accounting; daily pricing and administration; master trust and master custody; record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; and performance, risk and compliance analytics to support institutional investors.

*Investment Management*, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR® ETF brand.

For information about our two lines of business, as well as the revenues, expenses and capital allocation methodologies associated with them, refer to Note 24 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in this Form 10-K.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Investment Servicing

Servicing Fees

Servicing fees increased 6% in 2017 compared to 2016, primarily due to continued market appreciation and net new business, partially offset by continued hedge fund outflows and the impact of the businesses we exited in 2017. Servicing fees in 2016 included a revenue reduction of \$48 million related to reimbursements to our clients related to the manner in which we invoiced certain expenses to our clients.

Servicing fees decreased 2% in 2016 compared to 2015, primarily due to lower international market levels.

Servicing fees generated outside the U.S. were approximately 45% of total servicing fees in 2017 compared to approximately 42% in both 2016 and 2015.

<sup>(1)</sup> Geographic mix is based on the location in which the assets are serviced.

The increase in total AUCA as of December 31, 2017 compared to December 31, 2016 primarily resulted from higher global equity markets. Asset levels as of December 31, 2017 do not reflect the approximately \$350 billion of new business in assets

to be installed, which was awarded to us in 2017 and prior periods but not installed prior to December 31, 2017, including approximately \$445 billion of new asset servicing mandates awarded to us in 2017. This new business will be reflected in AUCA in future periods after installation and will generate servicing

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

fee revenue in subsequent periods. The \$350 billion of new business assets to be serviced does not include new business which has been contracted, but for which the client has not yet provided permission to publicly disclose and is not yet installed. Also not included is the loss of business which occurs from time to time or changes in AUCA, usually from changes in market values of customer assets, subscriptions or redemptions from our customer investment products.

With respect to these new assets, we will provide various services, including, accounting, bank loan servicing, compliance reporting and monitoring, custody, depository banking services, foreign exchange, fund administration, hedge fund servicing, middle-office outsourcing, performance and analytics, private equity administration, real estate administration, securities finance, transfer agency, and wealth management services.

As a result of a decision to diversify providers, one of our large clients will move a portion of its assets, largely common trust funds, currently with State Street to another service provider. We expect to remain a significant service provider to this client. The transition will principally occur in 2018 and beyond and represents approximately \$1 trillion in assets with respect to which we will no longer derive revenue post-transition.

### **Trading Services**

Trading services revenue is composed of revenue generated by FX trading, as well as revenue generated by brokerage and other trading services as noted in Table 2: Total Revenue.

#### *Foreign Exchange Trading Revenue*

We primarily earn FX trading revenue by acting as a principal market-maker through both "direct sales and trading" and "indirect foreign exchange trading."

- *Direct sales and trading:* Represent FX transactions at negotiated rates with clients and investment managers that contact our trading desk directly. These principal market-making activities include transactions for funds serviced by third party custodians or prime brokers, as well as those funds under custody at State Street.
- *Indirect FX trading:* Represent FX transactions with clients or their investment managers routed to our FX desk through our asset-servicing operation; in which all cases, we are the funds' custodian. We execute indirect FX trades as a principal at rates disclosed to our clients.

Our FX trading revenue is influenced by multiple factors, including: the volume and type of client FX

transactions and related spreads; currency volatility, reflecting market conditions; and our management of exchange rate, interest rate and other market risks associated with our foreign exchange activities. The relative impact of these factors on our total FX trading revenues often differs from period to period. For example, assuming all other factors remain constant, increases or decreases in volumes or bid-offer spreads across product mix tend to result in increases or decreases, as the case may be, in client-related FX revenue.

Our clients that utilize indirect FX trading can, in addition to executing their FX transactions through dealers not affiliated with us, transition from indirect FX trading to either direct sales and trading execution, including our "Street FX" service, or to one of our electronic trading platforms. Street FX, in which we continue to act as a principal market-maker, enables our clients to define their FX execution strategy and automate the FX trade execution process, both for funds under custody with us as well as those under custody at another bank.

#### *Brokerage and Other Trading Services*

We also offer a range of brokerage and other trading products tailored specifically to meet the needs of the global pension community, including transition management and commission recapture. These products and services are generally offered by us as agent of the institutional investor. Revenue earned from these services is recorded in other trading, transition management and brokerage revenue within brokerage and other trading services revenue.

Total brokerage and other trading services revenue primarily consists of "electronic FX services" and "other trading, transition management and brokerage revenue."

- *Electronic FX services:* Our clients may choose to execute FX transactions through one of our electronic trading platforms. These transactions generate revenue through a "click" fee.
- *Other trading, transition management and brokerage revenue:* As our clients look to State Street to enhance and preserve portfolio values, they may choose to utilize our Transition or Currency Management capabilities or transact with our Equity Trade execution group. These transactions generate revenue via commissions charged for trades transacted during the management of these portfolios.

In recent years, our transition management revenue was adversely affected by compliance issues in our U.K. business during 2010 and 2011, including settlements with the FCA in 2014 and the DOJ and

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

SEC in 2017, including a deferred prosecution agreement. The reputational and regulatory impact of those compliance issues continues and may adversely affect our results in future periods.

### **Securities Finance**

Our securities finance business consists of three components:

(1) an agency lending program for SSGA-managed investment funds with a broad range of investment objectives, which we refer to as the SSGA lending funds;

(2) an agency lending program for third-party investment managers and asset owners, which we refer to as the agency lending funds; and

(3) security lending transactions which we enter into as principal, which we refer to as our enhanced custody business.

Securities finance revenue earned from our agency lending activities, which is composed of our split of both the spreads related to cash collateral and the fees related to non-cash collateral, is principally a function of the volume of securities on loan, the interest-rate spreads and fees earned on the underlying collateral, and our share of the fee split.

As principal, our enhanced custody business borrows securities from the lending client or other market participants and then lends such securities to the subsequent borrower, either a State Street client or a broker/dealer. We act as principal when the lending client is unable to, or elects not to, transact directly with the market and execute the transaction and furnish the securities. In our role as principal, we provide support to the transaction through our credit rating. While we source a significant proportion of the securities furnished by us in our role as principal from third parties, we have the ability to source securities through assets under custody and administration from clients who have designated State Street as an eligible borrower.

Securities finance revenue as presented in Table 8: Investment Servicing Line of Business Results, increased 8% in 2017 compared to 2016, primarily as a result of higher revenue in our enhanced custody business.

Market influences may continue to affect client demand for securities finance, and as a result our revenue from, and the profitability of, our securities lending activities in future periods. In addition, the constantly evolving regulatory environment, including revised or proposed capital and liquidity standards, and interpretations of those standards, may influence modifications to the way in which we deliver our agency lending or enhanced custody businesses, the volume of our securities lending activity and related revenue and profitability in future periods.

### **Processing Fees and Other**

Processing fees and other revenue includes diverse types of fees and revenue, including fees from our structured products business, fees from software licensing and maintenance, equity income from our joint venture investments, gains and losses on sales of other assets, derivative financial instruments to support our clients' needs and to manage our interest-rate and currency risk, and amortization of our tax-advantaged investments.

Processing fees and other revenue, presented in Table 8: Investment Servicing Line of Business Results, increased 102% in 2017 compared to 2016. The increase is primarily due to a pre-tax gain of \$30 million on the dispositions of our joint venture interests in IFDS U.K. and BFDS in the first quarter of 2017 and the sale of an equity trading platform business in the third quarter of 2017, partially offset by a pre-tax gain of approximately \$53 million related to the sale of WM/Reuters in 2016.

Processing fees and other revenue decreased 65% in 2016 compared to 2015. The decrease was primarily due to a gain from the sale of commercial real estate and a gain from the final paydown of a commercial real estate loan in 2015, partially offset by a pre-tax gain on the sale of WM/Reuters in 2016.

### **Expenses**

Total expenses for Investment Servicing increased 1% in 2017 compared to 2016, primarily due to costs to support new business, higher annual merit and performance based incentive compensation, including higher seasonal deferred incentive compensation expense for retirement eligible employees and payroll taxes in the first quarter of 2017 compared to the first quarter of 2016. These increases were partially offset by Beacon savings and a one-time acceleration of compensation expense of approximately \$42 million in the fourth quarter of 2016.

Additional information about expenses is provided under "Expenses" in "Consolidated Results of Operations" included in this Management's Discussion and Analysis of this Form 10-K.

nm Not meaningful

**Management Fees**

Through SSGA, we provide a broad range of investment management strategies, specialized investment management advisory services, OCIO and other financial services for corporations, public funds, and other sophisticated investors. SSGA

offers an array of investment management strategies, including passive and active, such as enhanced indexing, using quantitative and fundamental methods for both U.S. and global equity and fixed income securities. SSGA also offers ETFs, such as the SPDR® ETF brand. While certain management fees are directly determined by the values of AUM and the investment strategies employed, management fees reflect other factors as well, including our relationship pricing for clients who use multiple services, and the benchmarks specified in the respective management agreements related to performance fees.

Management fees increased 25% in 2017 compared to 2016, primarily due to the full year of acquired GEAM business compared to a half year in 2016, higher global equity markets and higher revenue yielding ETF inflows.

Management fees increased 10% in 2016 compared to 2015, primarily due to the acquired GEAM business in the second half of 2016.

Management fees generated outside the U.S. were approximately 28% of total management fees in 2017, compared to 32% and 35% in 2016 and 2015, respectively. The percentage of management fees generated outside the U.S. in 2017 decreased from 2016 primarily due to the acquired GEAM business.

<sup>(3)</sup> Amounts represent long-term portfolios, excluding ETFs.

<sup>(4)</sup> Includes AUM acquired as part of the acquisition of the GEAM business on July 1, 2016.

The preceding table does not include approximately \$20 billion of new asset management business which was awarded but not installed as of December 31, 2017. New business will be reflected in AUM in future periods after installation, and will generate management fee revenue in subsequent periods. Total AUM as of December 31, 2017 included managed assets lost but not liquidated. Lost business occurs from time to time and it is difficult to predict the timing of client behavior in transitioning these assets as the timing can vary significantly.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**Expenses**

Total expenses for Investment Management increased 6% in 2017 compared to 2016 primarily due to the full year of the acquired GEAM business compared to a half year in 2016, higher annual merit and performance based incentive compensation, including higher seasonal deferred incentive compensation expense for retirement eligible employees and payroll taxes in the first quarter of 2017 compared to the first quarter of 2016, and higher costs to support new business. These increases were partially offset by a one-time acceleration of compensation expense of approximately \$81 million in the fourth quarter of 2016 and Beacon savings.

Additional information about expenses is provided under "Expenses" in "Consolidated Results of Operations" included in this Management's Discussion and Analysis of this Form 10-K.

**FINANCIAL CONDITION**

The structure of our consolidated statement of condition is primarily driven by the liabilities generated by our Investment Servicing and Investment Management lines of business. Our clients' needs and our operating objectives determine balance sheet volume, mix, and currency denomination. As our clients execute their worldwide cash management and investment activities, they utilize deposits and short-term investments that constitute the majority of our liabilities. These liabilities are generally in the form of interest-bearing transaction account deposits, which are denominated in a variety of currencies; non-interest-bearing demand deposits; and repurchase agreements, which generally serve as short-term investment alternatives for our clients.

Deposits and other liabilities resulting from client initiated transactions are invested in assets that generally have contractual maturities significantly longer than our liabilities; however, we evaluate the operational nature of our deposits and seek to maintain appropriate short-term liquidity of those liabilities that are not operational in nature and maintain longer-termed assets for our operational deposits. Our assets consist primarily of securities held in our AFS or HTM portfolios and short-duration financial instruments, such as interest-bearing deposits with banks and securities purchased under resale agreements. The actual mix of assets is determined by the characteristics of the client liabilities and our desire to maintain a well-diversified portfolio of high-quality assets.

<sup>(1)</sup> Primarily composed of securities guaranteed by the federal government with respect to at least 97% of defaulted principal and accrued interest on the underlying loans.

<sup>(2)</sup> Includes securities at amortized cost or fair value on the date of transfer from AFS.

Additional information about our investment securities portfolio is provided in Note 3 to the consolidated financial statements included in this Form 10-K.

We manage our investment securities portfolio to align with the interest-rate and duration characteristics of our client liabilities that we consider to be operational deposits and in the context of the overall structure of our consolidated statement of condition, in consideration of the global interest-rate environment. We consider a well-diversified, high-credit quality investment securities portfolio to be an important element in the management of our consolidated statement of condition.

Average duration of our investment securities portfolio increased to 2.7 years as of December 31, 2017, compared to 2.5 years as of December 31, 2016. The increase is primarily driven by the deployment of non-U.S. cash into foreign securities.

In 2017, we sold \$12.2 billion of AFS, primarily Agency MBS and U.S. Treasury securities in our investment portfolio, to position for the then-existing interest rate environment resulting in a pre-tax loss of \$39 million.

In 2017, \$496 million of Agency MBS previously classified as AFS were transferred to HTM, and in 2016, \$4.9 billion of Agency MBS and Student Loan ABS previously classified as AFS were transferred to HTM. Both transfers reflect our intent to hold these securities until their maturity. These securities were transferred at fair value, which included a net unrealized loss of \$2.8 million and a net unrealized gain of \$87 million as of December 31, 2017 and 2016, respectively, within accumulated other comprehensive loss which will be accreted into interest income over the remaining life of the transferred security (ranging from approximately 10 to 42 years).

Approximately 90% of the carrying value of the portfolio was rated "AAA" or "AA" as of December 31, 2017 and 91% as of December 31, 2016.

**TABLE 19: INVESTMENT PORTFOLIO BY EXTERNAL CREDIT RATING**

	December 31, 2017	December 31, 2016

Ireland	787	85
Hong Kong	666	664
Sweden	538	188
Germany	529	713
Norway	514	508
Finland	299	223
Austria	234	57
South Korea	19	634
Other <sup>(1)</sup>	136	88
<b>Total</b>	<b>\$ 26,471</b>	<b>\$ 20,500</b>
<b>Held-to-maturity:</b>		
United Kingdom	\$ 410	\$ 504
Netherlands	372	473
Singapore	353	180
Australia	235	374
Germany	127	329
Spain	104	98
Other <sup>(2)</sup>	123	122
<b>Total</b>	<b>\$ 1,724</b>	<b>\$ 2,080</b>

<sup>(1)</sup> Included approximately \$37 million and \$22 million as of December 31, 2017 and December 31, 2016, respectively, related to Portugal, which was related to MBS and auto loans.

<sup>(2)</sup> Included approximately \$75 million and \$80 million as of December 31, 2017 and December 31, 2016, respectively, related to Italy, Portugal and Norway, all of which were related to MBS and auto loans.

Approximately 80% and 88% of the aggregate carrying value of these non-U.S. debt securities was rated "AAA" or "AA" as of December 31, 2017 and December 31, 2016, respectively. The majority of these securities comprised senior positions within the security structures; these positions have a level of protection provided through subordination and other forms of credit protection. As of December 31, 2017 and December 31, 2016, approximately 61% and 65%, respectively, of the aggregate carrying value of these non-U.S. debt securities was floating-rate, and accordingly, we consider these securities to have minimal interest-rate risk.

As of December 31, 2017, our non-U.S. debt securities had an average market-to-book ratio of 100.4%, and an aggregate pre-tax net unrealized gain of approximately \$114 million, composed of gross unrealized gains of \$180 million and gross unrealized losses of \$66 million. These unrealized amounts included;

- a pre-tax net unrealized gain of \$35 million, composed of gross unrealized gains of \$95 million and gross unrealized losses of \$60 million, associated with non-U.S. debt securities available-for-sale and;
- a pre-tax net unrealized gain of \$79 million, composed of gross unrealized gains of \$85 million and gross unrealized losses of \$6 million, associated with non-U.S. debt securities held-to-maturity.

As of December 31, 2017, the underlying collateral for non-U.S. MBS and ABS primarily included Australian, Dutch, Italian and U.K. prime mortgages and German auto loans. The securities listed under "Canada" were composed of Canadian government securities and corporate debt and covered bonds. The securities listed under "France" were composed of auto loans, prime mortgages, and corporate debt and covered bonds. The securities listed under "Japan" were substantially composed of Japanese government securities and corporate debt.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**Municipal Obligations**

We carried approximately \$9.15 billion of municipal securities classified as state and political subdivisions in our investment securities portfolio as of December 31, 2017 as shown in Table 18: Carrying Values of Investment Securities, all of which were classified as AFS. As of the same date, we also provided approximately \$9.32 billion of credit and liquidity facilities to municipal issuers.

**TABLE 22: STATE AND MUNICIPAL OBLIGORS<sup>(1)</sup>**

(Dollars in millions)	Total Municipal Securities	Credit and Liquidity Facilities <sup>(2)</sup>	Total	% of Total Municipal Exposure
<b>As of December 31, 2017</b>				
<b>State of Issuer:</b>

<b>Total</b>	<b>\$ 5,156</b>	<b>\$ 6,992</b>	<b>\$ 12,148</b>	

<sup>(1)</sup> Represented 5% or more of our aggregate municipal credit exposure of approximately \$18.47 billion and \$19.57 billion across our businesses as of December 31, 2017 and December 31, 2016, respectively.

<sup>(2)</sup> Includes municipal loans which are also presented within Table 24.

Our aggregate municipal securities exposure presented in Table 22: State and Municipal Obligors, was concentrated primarily with highly-rated counterparties, with approximately 92% of the obligors rated "AAA" or "AA" as of December 31, 2017. As of that date, approximately 49% and 51% of our aggregate municipal securities exposure was associated with general obligation and revenue bonds, respectively. The portfolios are also diversified geographically, with the states that represent our largest exposures widely dispersed across the U.S.

Additional information with respect to our assessment of OTTI of our municipal securities is provided in Note 3 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

<sup>(1)</sup> The maturities of MBS, ABS and collateralized mortgage obligations are based on expected principal payments.

<sup>(2)</sup> Yields were calculated on a fully taxable-equivalent basis, using applicable statutory tax rates (35% as of December 31, 2017). Going forward, the statutory tax rate will reflect the impact of TCJA.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**Impairment**

Impairment exists when the fair value of an individual security is below its amortized cost basis. Impairment of a security is further assessed to determine whether such impairment is other-than-temporary. For AFS and HTM debt securities, we record impairment in our consolidated statement of income when management intends to sell (or may be required to sell) the securities before they recover in value, or when management expects the present value of cash flows expected to be collected from the securities to be less than the amortized cost of the impaired security (a credit loss).

We conduct periodic reviews of individual securities to assess whether OTTI exists. Our assessment of OTTI involves an evaluation of economic and security-specific factors. Such factors are based on estimates, derived by management, which contemplate current market conditions and security-specific performance. To the extent that market conditions are worse than management's expectations or due to idiosyncratic bond performance, OTTI could increase, in particular the credit-related component that would be recorded in our consolidated statement of income.

We recorded less than \$1 million of OTTI in 2017 and \$2 million in 2016. Management considers the aggregate decline in fair value of the remaining investment securities and the resulting gross unrealized losses of \$657 million as of December 31, 2017 to be temporary and not the result of any material changes in the credit characteristics of the securities. Additional information with respect to OTTI, net impairment losses and gross unrealized losses is provided in Note 3 to the consolidated financial statements included in this Form 10-K.

Our evaluation of potential OTTI of structured credit securities with collateral in the U.K. and continental Europe takes into account the outcome from the Brexit referendum and other geopolitical events, and assumes no disruption of payments on these securities.

**Loans and Leases**

**TABLE 24: U.S. AND NON-U.S. LOANS AND LEASES**

(In millions)	As of December 31,				
	2017	2016	2015	2014	2013
<b>Domestic:</b>					
Commercial and financial	\$ 18,696	\$ 16,412	\$ 15,899	\$ 14,515	\$ 10,305
Commercial real estate	98	27	28	28	209
Lease financing	267	338	337	335	339
Total domestic	19,061	16,777	16,264	14,878	10,853
<b>Non-U.S.:</b>					
Commercial and financial	3,837	2,476	1,957	2,653	1,877
Lease financing	396	504	578	668	756
Total non-U.S.	4,233	2,980	2,535	3,321	2,633
<b>Total loans and leases</b>	<b>\$ 23,294</b>	<b>\$ 19,757</b>	<b>\$ 18,799</b>	<b>\$ 18,199</b>	<b>\$ 13,486</b>
Average loans and leases	\$ 21,916	\$ 19,013	\$ 17,948	\$ 15,912	\$ 13,781

The increase in loans in the commercial and financial segment as of December 31, 2017 compared to December 31, 2016 was primarily driven by higher levels of loans to investment funds and loans to municipalities.

As of both December 31, 2017 and December 31, 2016, our investment in senior secured loans totaled approximately \$3.5 billion. In addition, we had binding unfunded commitments as of December 31, 2017 and December 31, 2016 of \$279 million and \$76 million, respectively, to participate in such syndications.

These senior secured loans, which are primarily rated "speculative" under our internal risk-rating framework (refer to Note 4 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, in this Form 10-K), are externally rated "BBB," "BB" or "B," with approximately 89% and 92% of the loans rated "BB" or "B" as of December 31, 2017 and December 31, 2016, respectively. Our investment strategy involves generally limiting our investment to larger, more liquid credits underwritten by major global financial institutions, applying our internal credit analysis process to each potential investment, and diversifying our exposure by counterparty and industry segment. However, these loans have significant exposure to credit losses relative to higher-rated loans.

Loans to municipalities included in the commercial and financial segment were \$2.1 billion and \$1.4 billion as of December 31, 2017 and December 31, 2016, respectively.

As of December 31, 2017 and December 31, 2016, unearned income deducted from our investment in leveraged lease financing was \$75 million and \$94 million, respectively, for U.S. leases and \$159 million and \$192 million, respectively, for non-U.S. leases.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

Additional information about all of our loan-and-leases segments, as well as underlying classes, is provided in Note 4 to the consolidated financial statements included in this Form 10-K.

No loans were modified in troubled debt restructurings in 2017 or 2016.

**TABLE 25: CONTRACTUAL MATURITIES FOR LOANS AND LEASES**

Loans and leases with floating or adjustable interest rates	9,138
<b>Total</b>	<b>\$ 9,632</b>

**TABLE 27: ALLOWANCE FOR LOAN AND LEASE LOSSES**

(In millions)	Years Ended December 31,				
	2017	2016	2015	2014	2013
<b>Allowance for loan and lease losses:</b>					
Beginning balance	\$ 53	\$ 46	\$ 38	\$ 28	\$ 22
Provision for loan and lease losses <sup>(1)</sup>	2	10	12	10	6
Charge-offs <sup>(2)</sup>	(1)	(3)	(4)	—	—
<b>Ending balance</b>	<b>\$ 54</b>	<b>\$ 53</b>	<b>\$ 46</b>	<b>\$ 38</b>	<b>\$ 28</b>

<sup>(1)</sup> The provision for loan and lease losses is related to commercial and financial loans.

<sup>(2)</sup> The charge-offs are related to commercial and financial loans.

The provision of \$2 million and the charge-offs of \$1 million recorded in 2017 were associated with our exposure to senior secured loans to non-investment grade institutional borrowers, which were purchased in connection with our participation in syndicated loans.

As of December 31, 2017 and December 31, 2016, approximately \$47 million and \$44 million, respectively, of our allowance for loan and lease losses were related to senior secured loans included in the commercial and financial segment. As this portfolio grows and matures, our allowance for loan and lease losses related to these loans may increase through additional provisions for credit losses. The remaining \$7 million and \$9 million as of December 31, 2017 and December 31, 2016, respectively, were related to other components of commercial and financial loans.

### Cross-Border Outstandings

Cross-border outstandings are amounts payable to us by non-U.S. counterparties which are denominated in U.S. dollars or other non-local currency, as well as non-U.S. local currency claims not funded by local currency liabilities. Our cross-border outstandings consist primarily of deposits with banks; loans and lease financing, including short-duration advances; investment securities; amounts related to foreign exchange and interest-rate contracts; and securities finance. In addition to credit risk, cross-border outstandings have the risk that, as a result of political or economic conditions in a country, borrowers may be unable to meet their contractual repayment obligations of principal and/or interest when due because of the unavailability of, or restrictions on, foreign exchange needed by borrowers to repay their obligations.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

As market and economic conditions change, the major independent credit rating agencies may downgrade U.S. and non-U.S. financial institutions and sovereign issuers which have been, and may in the future be, significant counterparties to us, or whose financial instruments serve as collateral on which we rely for credit risk mitigation purposes, and may do so again in the future. As a result, we may be exposed to increased counterparty risk, leading to negative ratings volatility.

The cross-border outstandings presented in Table 28: Cross-Border Outstandings, represented approximately 26%, 28% and 25% of our consolidated total assets as of December 31, 2017, 2016 and 2015 respectively.

**TABLE 28: CROSS-BORDER OUTSTANDINGS<sup>(1)</sup>**

(In millions)	Investment Securities and Other Assets	Derivatives and Securities on Loan	Total Cross-Border Outstandings

Australia	4,035	292	4,327
Canada	3,156	1,113	4,269
Luxembourg	3,034	514	3,548

<sup>(1)</sup> Cross-border outstandings included countries in which we do business, and which amounted to at least 1% of our consolidated total assets as of the dates indicated.

As of December 31, 2017, there were no countries whose aggregate cross-border outstandings amounted to between 0.75% and 1% of our consolidated assets. As of December 31, 2016, aggregate cross-border outstandings in countries which amounted to between 0.75% and 1% of our consolidated assets totaled approximately \$1.84 billion and \$2.38 billion to France and the Netherlands, respectively. As of December 31, 2015, aggregate cross-border outstandings in countries which amounted to between 0.75% and 1% of our consolidated assets totaled approximately \$2.20 billion to the Netherlands.

**Risk Management**

**General**

In the normal course of our global business activities, we are exposed to a variety of risks, some inherent in the financial services industry, others more specific to our business activities. Our risk management framework focuses on material risks, which include the following:

- credit and counterparty risk;
- liquidity risk, funding and management;
- operational risk;
- information technology risk;
- market risk associated with our trading activities;
- market risk associated with our non-trading activities, which we refer to as asset-and-liability management, and which consists primarily of interest-rate risk;
- strategic risk;
- model risk; and
- reputational, fiduciary and business conduct risk.

Many of these risks, as well as certain factors underlying each of these risks that could affect our businesses and our consolidated financial statements, are discussed in detail under Item 1A, Risk Factors, of this Form 10-K.

The scope of our business requires that we balance these risks with a comprehensive and well-integrated risk management function. The identification, assessment, monitoring, mitigation and reporting of risks are essential to our financial performance and successful management of our businesses. These risks, if not effectively managed, can result in losses to State Street as well as erosion of our capital and damage to our reputation. Our approach, including Board and senior management oversight and a system of policies, procedures, limits, risk measurement and monitoring and internal controls, allows for an assessment of risks within a framework for evaluating opportunities for the prudent use of capital that appropriately balances risk and return.

Our objective is to optimize our return while operating at a prudent level of risk. In support of this objective, we have instituted a risk appetite framework that aligns our business strategy and financial objectives with the level of risk that we are willing to incur.

Our risk management is based on the following major goals:

- A culture of risk awareness that extends across all of our business activities;

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

- The identification, classification and quantification of State Street's material risks;
- The establishment of our risk appetite and associated limits and policies, and our compliance with these limits;
- The establishment of a risk management structure at the "top of the house" that enables the control and coordination of risk-taking across the business lines;
- The implementation of stress testing practices and a dynamic risk-assessment capability;
- A direct link between risk and strategic-decision making processes and incentive compensation practices; and
- The overall flexibility to adapt to the ever-changing business and market conditions.

Our risk appetite framework outlines the quantitative limits and qualitative goals that define our risk appetite, as well as the responsibilities for measuring and monitoring risk against limits, and for reporting, escalating, approving and addressing exceptions. Our risk appetite framework is established by ERM, a corporate risk oversight group, in conjunction with the MRAC and the RC of the Board. The Board formally reviews and approves our risk appetite statement annually, or more frequently as required.

The risk appetite framework describes the level and types of risk that we are willing to accommodate in executing our business strategy, and also serves as a guide in setting risk limits across our business units. In addition to our risk appetite framework, we use stress testing as another important tool in our risk management practice. Additional information with respect to our stress testing process and practices is provided under "Capital" under Item 7, Management's Discussion and Analysis, of this Form 10-K.

Disclosures about our management of significant risks can be found on the following pages within this Form 10-K.

**Governance and Structure**

We have an approach to risk management that involves all levels of management, from the Board and its committees, including its E&A Committee, RC, the ECC, as well as the Technology Committee, to each business unit and each employee. We allocate responsibility for risk oversight so that risk/return decisions are made at an appropriate level, and are subject to robust and effective review and challenge. Risk management is the responsibility of each employee, and is implemented through three lines of defense: the business units, which own and manage the risks inherent in their business, are considered the first line of defense; ERM and other support functions, such as Compliance, Finance and Vendor Management, provide the second line of defense; and Corporate Audit, which assesses the effectiveness of the first two lines of defense.

The responsibilities for effective review and challenge reside with senior managers, management oversight committees, Corporate Audit and, ultimately, the Board and its committees. While we believe that our risk management program is effective in managing the risks in our businesses, internal and external factors may create risks that cannot always be identified or anticipated.

Corporate-level risk committees provide focused oversight, and establish corporate standards and policies for specific risks, including credit, sovereign exposure, market, liquidity, operational, information technology as well as new business products, regulatory compliance and ethics, vendor risk and model risks. These committees have been delegated the responsibility to develop recommendations and remediation strategies to address issues that affect or have the potential to affect State Street.

We maintain a risk governance committee structure which serves as the formal governance mechanism through which we seek to undertake the consistent identification, management and mitigation of various risks facing State Street in connection with its business activities. This governance structure is enhanced and integrated through multi-disciplinary involvement, particularly through ERM. The following chart presents this structure.

	<b>Form 10-K Page Number</b>
Governance and Structure	76

Strategic Risk Management	102

## Management Risk Governance Committee Structure

### Executive Management Committees:

### Risk Committees:

### Enterprise Risk Management

The goal of ERM is to ensure that risks are proactively identified, well-understood and prudently managed in support of our business strategy. ERM provides risk oversight, support and coordination to allow for the consistent identification, measurement and management of risks across business units separate from the business units' activities, and is responsible for the formulation and maintenance of corporate-wide risk management policies and guidelines. In addition, ERM establishes and reviews limits and, in collaboration with business unit management, monitors key risks. Ultimately, ERM works to validate that risk-taking occurs within the risk appetite statement approved by the Board and conforms to associated risk policies, limits and guidelines.

The CRO is responsible for State Street's risk management globally, leads ERM and has a dual reporting line to State Street's CEO and the Board's RC. ERM manages its responsibilities globally through a three-dimensional organization structure:

- "Vertical" business unit-aligned risk groups that support business managers with risk management, measurement and monitoring activities;
- "Horizontal" risk groups that monitor the risks that cross all of our business units (for example, credit and operational risk); and
- Risk oversight for international activities, which combines intersecting "Verticals" and "Horizontals" through a hub and spoke model to provide important regional and legal entity perspectives to the global risk framework.

Sitting on top of this three-dimensional organization structure is a centralized group responsible for the aggregation of risk exposures across the vertical, horizontal and regional dimensions, for consolidated reporting, for setting the corporate-level risk appetite framework and associated limits and policies, and for dynamic risk assessment across State Street.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### **Board Committees**

The Board has four committees which assist it in discharging its responsibilities with respect to risk management: the RC, the E&A Committee, the ECC, and the Technology Committee.

The RC is responsible for oversight related to the operation of our global risk management framework, including policies and procedures establishing risk management governance and processes and risk control infrastructure for our global operations. The RC is responsible for reviewing and discussing with management our assessment and management of all risks applicable to our operations, including credit, market, interest rate, liquidity, operational and business risks, as well as compliance and reputational risk and related policies.

In addition, the RC provides oversight on strategic capital governance principles and controls, resolution planning, and monitors capital adequacy in relation to risk. The RC is also responsible for discharging the duties and obligations of the Board under applicable Basel and other regulatory requirements.

The E&A Committee oversees management's operation of our comprehensive system of internal controls covering the integrity of our consolidated financial statements and reports, compliance with laws, regulations and corporate policies. The E&A Committee acts on behalf of the Board in monitoring and overseeing the performance of Corporate Audit and in reviewing certain communications with banking regulators. The E&A Committee has direct responsibility for the appointment, compensation, retention, evaluation and oversight of the work of our independent registered public accounting firm, including sole authority for the establishment of pre-approval policies and procedures for all audit engagements and any non-audit engagements.

The ECC has direct responsibility for the oversight of all compensation plans, policies, and programs of State Street in which executive officers participate and incentive, retirement, welfare as well as equity plans in which certain other employees of State Street participate. In addition, the ECC oversees the alignment of our incentive compensation arrangements with our safety and soundness, including the integration of risk management objectives, and related policies, arrangements and control processes consistent with applicable related regulatory rules and guidance.

The Technology Committee leads and assists in the Board's oversight of the role of technology in executing State Street's strategy and supporting State Street's global business and operational requirements. The Technology Committee reviews the use of technology in our activities and operations,

as well as significant technology and technology-related strategies, investments and policies. In addition, the Technology Committee reviews and approves technology and technology-related risk matters, including information and cyber security.

### **Executive Management Committees**

MRAC is the senior management decision-making body for risk and capital issues, and oversees our financial risks, our consolidated statement of condition, and our capital adequacy, liquidity and recovery and resolution planning. Its responsibilities include:

- The approval of the policies of our global risk, capital and liquidity management frameworks, including our risk appetite framework;
- The monitoring and assessment of our capital adequacy based on internal policies and regulatory requirements;
- The oversight of our firm-wide risk identification, model risk governance, stress testing and Recovery and Resolution Plan programs; and
- The ongoing monitoring and review of risks undertaken within the businesses, and our senior management oversight and approval of risk strategies and tactics.

MRAC, is co-chaired by our CRO and CFO, who regularly present to the RC on developments in the risk environment and performance trends in our key business areas.

BCRC provides additional risk governance and leadership, by overseeing our business practices in terms of our compliance with laws, regulations and our standards of business conduct, our commitments to clients and others with whom we do business, and potential reputational risks. Management considers adherence to high ethical standards to be critical to the success of our business and to our reputation. The BCRC is co-chaired by our CAO and our Chief Legal Officer.

TORC oversees and assesses the effectiveness of corporate-wide technology and operational risk management programs, to manage and control technology and operational risk consistently across the organization. TORC is co-chaired by the CAO and the Chief Information Officer.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### **Risk Committees**

The following risk committees, under the oversight of the respective executive management committees, have focused responsibilities for oversight of specific areas of risk management:

#### *MRAC*

- ALCO is the senior corporate oversight and decision-making body for balance sheet strategy, Global Treasury business activities and risk management for interest rate risk, liquidity risk and non-trading market risk. ALCO's roles and responsibilities are designed to be complementary to, and in coordination with the MRAC, which approves the corporate risk appetite and associated balance sheet strategy.
- CRPC has primary responsibility for the oversight and review of credit and counterparty risk across business units, as well as oversight, review and approval of the credit risk policies and guidelines; the Committee consists of senior executives within ERM, and reviews policies and guidelines related to all aspects of our business which give rise to credit risk; our business units are also represented on the CRPC; credit risk policies and guidelines are reviewed periodically, but at least annually;
- TMRC reviews the effectiveness of, and approves, the market risk framework at least annually; it is the senior oversight and decision-making committee for risk management within our global markets businesses; the TMRC is responsible for the formulation of guidelines, strategies and workflows with respect to the measurement, monitoring and control of our trading market risk, and also approves market risk tolerance limits, collateral and margin policies, and trading authorities; the TMRC meets regularly to monitor the management of our trading market risk activities;
- BOC provides oversight and governance over Basel related regulatory requirements, assesses compliance with respect to Basel regulations and approves all material methodologies and changes, policies and reporting;
- The Recovery and Resolution Planning Executive Review Board oversees the development of recovery and resolution plans as required by banking regulators;
- MRC monitors the overall level of model risk and provides oversight of the model governance process pertaining to financial

models, including the validation of key models and the ongoing monitoring of model performance. The MRC may also, as appropriate, mandate remedial actions and compensating controls to be applied to models to address modeling deficiencies as well as other issues identified;

- The CCAR Steering Committee provides primary supervision of the stress tests performed in conformity with the Federal Reserve's CCAR process and the Dodd-Frank Act, and is responsible for the overall management, review, and approval of all material assumptions, methodologies, and results of each stress scenario;
- The SSGA Risk Committee is the most senior oversight and decision making committee for risk management within SSGA; the committee is responsible for overseeing the alignment of SSGA's strategy, and risk appetite, as well as alignment with State Street corporate-wide strategies and risk management standards; and
- The Country Risk Committee oversees the identification, assessment, monitoring, reporting and mitigation, where necessary, of country risks.

#### *BCRC*

- The Fiduciary Review Committee reviews and assesses the fiduciary risk management programs of those units in which we serve in a fiduciary capacity;
- The New Business and Product Approval Committee provides oversight of the evaluation of the risk inherent in proposed new products or services and new business, and extensions of existing products or services, evaluations including economic justification, material risk, compliance, regulatory and legal considerations, and capital and liquidity analyses;
- The Compliance and Ethics Committee provides review and oversight of our compliance programs, including its culture of compliance and high standards of ethical behavior; and
- The Legal Entity Oversight Committee establishes standards with respect to the governance of State Street legal entities, monitors adherence to those standards, and oversees the ongoing evaluation of our legal entity structure, including the formation, maintenance and dissolution of legal entities.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- The Conduct Standards Committee provides oversight of our enforcement of employee conduct standards.

### TORC

- The Operational Risk Committee, along with the support of regional business or entity-specific working groups and committees, is responsible for oversight of our operational risk programs, including determining that the implementation of those programs is designed to identify, manage, and control operational risk in an effective and consistent manner across the firm;
- The Technology Risk Governance Committee provides regular reporting to TORC and escalates technology risk issues to TORC, as appropriate;
- The Executive Continuity Steering Committee reviews overall business continuity program performance, provides for executive accountability for compliance with the business continuity program and standards, and reviews and approves major changes or exceptions to program policy and standards;
- The Executive Information Security Committee is responsible for managing the Enterprise Information Security posture and program, including cyber security protections, provides enterprise-wide oversight of the Information Security Program to provide that controls are measured and managed, and serves as an escalation point for issues identified during the execution of information technology activities and risk mitigation;
- The Third Party Risk Management Steering Committee provides oversight over the vendor management program, approves policies, and serves as an escalation path for program compliance exceptions;
- The Access Control Board establishes and provides appropriate governance and controls over our access control security framework;
- The Business Controls Steering Committee is responsible for overseeing and monitoring the execution and ongoing monitoring of our program of enhanced business controls practices across the organization;
- The Global Transitions Oversight Committee is responsible for establishing a framework to monitor and oversee transitions between and among State Street legal entities against State Street resolvability principles, to monitor compliance with that framework to support optimization of State Street's global

operating footprint through increased consistency, transparency and sharing of best practices among State Street legal entities, and to serve as a forum for review and discussion of issues impacting internal transitions among State Street legal entities; and

- The Data Governance Board is responsible for overseeing State Street's data governance vision, strategies and priorities and ensuring alignment of data governance policies and practices with corporate strategy and with State Street's obligations to comply with data-related regulations.

### Credit Risk Management

#### ***Core Policies and Principles***

We define credit risk as the risk of financial loss if a counterparty, borrower or obligor, collectively referred to as a counterparty, is either unable or unwilling to repay borrowings or settle a transaction in accordance with underlying contractual terms. We assume credit risk in our traditional non-trading lending activities, such as loans and contingent commitments, in our investment securities portfolio, where recourse to a counterparty exists, and in our direct and indirect trading activities, such as principal securities lending and foreign exchange and indemnified agency securities lending. We also assume credit risk in our day-to-day treasury and securities and other settlement operations, in the form of deposit placements and other cash balances, with central banks or private sector institutions.

We distinguish between three major types of credit risk:

- Default risk - the risk that a counterparty fails to meet its contractual payment obligations;
- Country risk - the risk that we may suffer a loss, in any given country, due to any of the following reasons: deterioration of economic conditions, political and social upheaval, nationalization and appropriation of assets, government repudiation of indebtedness, exchange controls, and disruptive currency depreciation or devaluation; and
- Settlement risk - the risk that the settlement or clearance of transactions will fail, which arises whenever the exchange of cash, securities and/or other assets is not simultaneous.

The acceptance of credit risk by State Street is governed by corporate policies and guidelines, which include standardized procedures applied across the entire organization. These policies and guidelines include specific requirements related to each counterparty's risk profile; the markets served;

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

counterparty, industry and country concentrations; and regulatory compliance. These policies and procedures also implement a number of core principles, which include the following:

- We measure and consolidate credit risks to each counterparty, or group of counterparties, in accordance with a "one-obligor" principle that aggregates risks across our business units;
- ERM reviews and approves all extensions of credit, or material changes to extensions of credit (such as changes in term, collateral structure or covenants), in accordance with assigned credit-approval authorities;
- Credit-approval authorities are assigned to individuals according to their qualifications, experience and training, and these authorities are periodically reviewed. Our largest exposures require approval by the Credit Committee, a sub-committee of the CRPC. With respect to small and low-risk extensions of credit to certain types of counterparties, approval authority is granted to individuals outside of ERM;
- We seek to avoid or limit undue concentrations of risk. Counterparty (or groups of counterparties), industry, country and product-specific concentrations of risk are subject to frequent review and approval in accordance with our risk appetite;
- We determine the creditworthiness of counterparties through a detailed risk assessment, including the use of comprehensive internal risk-rating methodologies;
- We review all extensions of credit and the creditworthiness of counterparties at least annually. The nature and extent of these reviews are determined by the size, nature and term of the extensions of credit and the creditworthiness of the counterparty; and
- We subject all corporate policies and guidelines to annual review as an integral part of our periodic assessment of our risk appetite.

Our corporate policies and guidelines require that the business units which engage in activities that give rise to credit and counterparty risk comply with procedures that promote the extension of credit for legitimate business purposes; are consistent with the maintenance of proper credit standards; limit credit-related losses; and are consistent with our goal of maintaining a strong financial condition.

### **Structure and Organization**

The Credit Risk group within ERM is responsible for the assessment, approval and monitoring of credit risk across State Street. The group is managed centrally, has dedicated teams in a number of locations worldwide across our businesses, and is responsible for related policies and procedures, and for our internal credit-rating systems and methodologies. In addition, the group, in conjunction with the business units, establishes appropriate measurements and limits to control the amount of credit risk accepted across its various business activities, both at the portfolio level and for each individual counterparty or group of counterparties, to individual industries, and also to counterparties by product and country of risk. These measurements and limits are reviewed periodically, but at least annually.

In conjunction with other groups in ERM, the Credit Risk group is jointly responsible for the design, implementation and oversight of our credit risk measurement and management systems, including data and assessment systems, quantification systems and the reporting framework.

Various key committees within State Street are responsible for the oversight of credit risk and associated credit risk policies, systems and models. All credit-related activities are governed by our risk appetite framework and our credit risk guidelines, which define our general philosophy with respect to credit risk and the manner in which we control, manage and monitor such risks.

The previously described CRPC (refer to "Risk Committees") has primary responsibility for the oversight, review and approval of the credit risk guidelines and policies. Credit risk guidelines and policies are reviewed periodically, but at least annually.

The Credit Committee, a sub-committee of the CRPC, has responsibility for assigning credit authority and approving the largest and higher-risk extensions of credit to individual counterparties or groups of counterparties.

CRPC provides periodic updates to MRAC and the Board's RC.

### **Credit Ratings**

We perform initial and ongoing reviews to exercise due diligence on the creditworthiness of our counterparties when conducting any business with them or approving any credit limits.

This due diligence process generally includes the assignment of an internal credit rating, which is determined by the use of internally developed and validated methodologies, scorecards and a 15-grade rating scale. This risk-rating process incorporates the

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

use of risk-rating tools in conjunction with management judgment; qualitative and quantitative inputs are captured in a replicable manner and, following a formal review and approval process, an internal credit rating based on our rating scale is assigned. Credit ratings are reviewed and approved by the Credit Risk group or designees within ERM. To facilitate comparability across the portfolio, counterparties within a given sector are rated using a risk-rating tool developed for that sector.

Our risk-rating methodologies are approved by the CRPC, after completion of internal model validation processes, and are subject to an annual review, including re-validation.

We generally rate our counterparties individually, although accounts defined by us as low-risk are rated on a pooled basis. We evaluate and rate the credit risk of our counterparties on an ongoing basis.

### **Risk Parameter Estimates**

Our internal risk-rating system promotes a clear and consistent approach to the determination of appropriate credit risk classifications for our credit counterparties and exposures, tracking the changes in risk associated with these counterparties and exposures over time. This capability enhances our ability to more accurately calculate both risk exposures and capital, enabling better strategic decision making across the organization.

We use credit risk parameter estimates for the following purposes:

- The assessment of the creditworthiness of new counterparties and, in conjunction with our risk appetite statement, the development of appropriate credit limits for our products and services, including loans, foreign exchange, securities finance, placements and repurchase agreements;
- The use of an automated process for limit approvals for certain low-risk counterparties, as defined in our credit risk guidelines, based on the counterparty's probability-of-default, or PD, rating class;
- The development of approval authority matrices based on PD; riskier counterparties with higher ratings require higher levels of approval for a comparable PD and limit size compared to less risky counterparties with lower ratings;
- The analysis of risk concentration trends using historical PD and exposure-at-default, or EAD, data;
- The standardization of rating integrity testing by GCR using rating parameters;
- The determination of the level of management review of short-duration

advances depending on PD; riskier counterparties with higher rating class values generally trigger higher levels of management escalation for comparable short-duration advances compared to less risky counterparties with lower rating-class values;

- The monitoring of credit facility utilization levels using EAD values and the identification of instances where counterparties have exceeded limits;
- The aggregation and comparison of counterparty exposures with risk appetite levels to determine if businesses are maintaining appropriate risk levels; and
- The determination of our regulatory capital requirements for the AIRB provided in the Basel framework.

### **Credit Risk Mitigation**

We seek to limit our credit exposure and reduce our potential credit losses through various types of risk mitigation. In our day-to-day management of credit risks, we utilize and recognize the following types of risk mitigation.

#### *Collateral*

In many parts of our business, we regularly require or agree for collateral to be received from or provided to clients and counterparties in connection with contracts that incur credit risk. In our trading businesses, this collateral is typically in the form of cash and highly-rated securities (government securities and other bonds or equity securities). Credit risks in our non-trading and securities finance businesses are also often secured by bonds and equity securities and by other types of assets. Collateral serves to reduce the risk of loss inherent in an exposure by improving the prospect of recovery in the event of a counterparty default. However, rapidly changing market values of the collateral we hold, unexpected increases in the credit exposure to a client or counterparty, reductions in the value or change in the type of securities held by us, as well as operational errors or errors in the manner in which we seek to exercise our rights, may reduce the risk mitigation effects of collateral or result in other security interests not being effective to reduce potential credit exposure. While collateral is often an alternative source of repayment, it generally does not replace the requirement within our policies and guidelines for high-quality underwriting standards. We also may choose to incur credit exposure without the benefit of collateral or other risk mitigating credits rights.

Our credit risk guidelines require that the collateral we accept for risk mitigation purposes is of high quality, can be reliably valued and can be

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

liquidated if or when required. Generally, when collateral is of lower quality, more difficult to value or more challenging to liquidate, higher discounts to market values are applied for the purposes of measuring credit risk. For certain less liquid collateral, longer liquidation periods are assumed when determining the credit exposure.

All types of collateral are assessed regularly by ERM, as is the basis on which the collateral is valued. Our assessment of collateral, including the ability to liquidate collateral in the event of a counterparty default, and also with regard to market values of collateral under a variety of hypothetical market conditions, is an integral component of our assessment of risk and approval of credit limits. We also seek to identify, limit and monitor instances of "wrong-way" risk, where a counterparty's risk of default is positively correlated with the risk of our collateral eroding in value.

We maintain policies and procedures requiring that documentation used to collateralize a transaction is legal, valid, binding and enforceable in the relevant jurisdictions. We also conduct legal reviews to assess whether our documentation meets these standards on an ongoing basis.

### *Netting*

Netting is a mechanism that allows institutions and counterparties to net offsetting exposures and payment obligations against one another through the use of qualifying master netting agreements. A master netting agreement allows the netting of rights and obligations arising under derivative or other transactions that have been entered into under such an agreement upon the counterparty's default, resulting in a single net claim owed by, or to, the counterparty. This is commonly referred to as "close-out netting," and is pursued wherever possible. We may also enter into master agreements that allow for the netting of amounts payable on a given day and in the same currency, reducing our settlement risk. This is commonly referred to as "payment netting," and is widely used in our foreign exchange activities.

As with collateral, we have policies and procedures in place to apply close-out and payment netting only to the extent that we have verified legal validity and enforceability of the master agreement. In the case of payment netting, operational constraints may preclude us from reducing settlement risk, notwithstanding the legal right to require the same under the master netting agreement.

### *Guarantees*

A guarantee is a financial instrument that results in credit support being provided by a third party, (i.e., the protection provider) to the underlying obligor (the beneficiary of the provided protection) on account of

an exposure owing by the obligor. The protection provider may support the underlying exposure either in whole or in part. Support of this kind may take different forms. Typical forms of guarantees provided to State Street include financial guarantees, letters of credit, bankers' acceptances, PUA contracts and insurance.

We have established a review process to evaluate guarantees under the applicable requirements of State Street policies and Basel III requirements. Governance for this evaluation is covered under policies and procedures that require regular reviews of documentation, jurisdictions, and credit quality of protection providers.

Pursuant to the Basel III final rule, we are permitted to reflect the application of credit risk mitigation which may include, for example, guarantees, collateral, netting, secured interests in non-financial assets and credit default swaps. State Street does not actively use credit default swaps as a risk mitigation tool, although it increasingly applies the recognition of guarantees, collateral and security over non-financial assets to mitigate overall risk within its counterparty credit portfolio.

### **Credit Limits**

Central to our philosophy for our management of credit risk is the approval and imposition of credit limits, against which we monitor the actual and potential future credit exposure arising from our business activities with counterparties or groups of counterparties. Credit limits are a reflection of our risk appetite, which may be determined by the creditworthiness of the counterparty, the nature of the risk inherent in the business undertaken with the counterparty, or a combination of relevant credit factors. Our risk appetite for certain sectors and certain countries and geographic regions may also influence the level of risk we are willing to assume to certain counterparties.

The analysis and approval of credit limits is undertaken in a consistent manner across our businesses, although the nature and extent of the analysis may vary, based on the type, term and magnitude of the risk being assumed. Credit limits and underlying exposures are assessed and measured on both a gross and net basis where appropriate, with net exposure determined by deducting the value of any collateral held. For certain types of risk being assumed, we will also assess and measure exposures under a variety of hypothetical market conditions. Credit limit approvals across State Street are undertaken by the Credit Risk group, by individuals to whom credit authority has been delegated, or by the Credit Committee.

Credit limits are re-evaluated annually, or more frequently as needed, and are revised periodically on

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

prevailing and anticipated market conditions, changes in counterparty or country-specific credit ratings and outlook, changes in State Street's risk appetite for certain counterparties, sectors or countries, and enhancements to the measurement of credit utilization.

### **Reporting**

Ongoing active monitoring and management of our credit risk is an integral part of our credit risk management framework. We maintain management information systems to identify, measure, monitor and report credit risk across businesses and legal entities, enabling ERM and our businesses to have timely access to accurate information on credit limits and exposures. Monitoring is performed along the dimensions of counterparty, industry, country and product-specific risks to facilitate the identification of concentrations of risk and emerging trends.

Key aspects of this credit risk reporting structure include governance and oversight groups, policies that define standards for the reporting of credit risk, data aggregation and sourcing systems, and separate testing of relevant risk reporting functions by Corporate Audit.

The Credit Portfolio Management group routinely assesses the composition of our overall credit risk portfolio for alignment with our stated risk appetite. This assessment includes routine analysis and reporting of the portfolio, monitoring of market-based indicators, the assessment of industry trends and developments, and regular reviews of concentrated risks. The Credit Portfolio Management group is also responsible, in conjunction with the business units, for defining the appetite for credit risk in the major sectors in which we have a concentration of business activities. These sector-level risk appetite statements, which include counterparty selection criteria and granular underwriting guidelines, are reviewed periodically and approved by the CRPC.

### **Monitoring**

Regular surveillance of credit and counterparty risks is undertaken by our business units, the Credit Risk group and designees with ERM, allowing for frequent and extensive oversight. This surveillance process includes, but is not limited to, the following components:

- **Annual Reviews.** A formal review of counterparties is conducted at least annually and includes a thorough review of operating performance, primary risk factors and our internal credit risk rating. This annual review also includes a review of current and proposed credit limits, an assessment of our ongoing risk appetite and verification that supporting legal documentation remains effective.

- **Interim Monitoring.** Periodic monitoring of our largest and riskiest counterparties is undertaken more frequently, utilizing financial information, market indicators and other relevant credit and performance measures. The nature and extent of this interim monitoring is individually tailored to certain counterparties and/or industry sectors to identify material changes to the risk profile of a counterparty (or group of counterparties) and assign an updated internal risk rating in a timely manner.

We maintain an active "watch list" for all counterparties where we have identified a concern that the actual or potential risk of default has increased. The watch list status denotes a concern with some aspect of a counterparty's risk profile that warrants closer monitoring of the counterparty's financial performance and related risk factors. Our ongoing monitoring processes are designed to facilitate the early identification of counterparties whose creditworthiness is deteriorating; any counterparty may be placed on the watch list by ERM at its sole discretion.

Counterparties that receive an internal risk rating within a certain range on our rating scale are eligible for watch list designation. These risk ratings generally correspond with the non-investment grade or near non-investment grade ratings established by the major independent credit-rating agencies, and also include the regulatory classifications of "Special Mention," "Substandard," "Doubtful" and "Loss." Counterparties whose internal ratings are outside this range may also be placed on the watch list.

The Credit Risk group maintains primary responsibility for our watch list processes, and generates a monthly report of all watch list counterparties. The watch list is formally reviewed at least on a quarterly basis, with participation from senior ERM staff, and representatives from the business units and our corporate finance and legal groups as appropriate. These meetings include a review of individual watch list counterparties, together with credit limits and prevailing exposures, and are focused on actions to contain, reduce or eliminate the risk of loss to State Street. Identified actions are documented and monitored.

### **Controls**

GCR provides a separate level of surveillance and oversight over the integrity of our credit risk management processes, including the internal risk-rating system. GCR reviews counterparty credit ratings for all identified sectors on an ongoing basis. GCR is subject to oversight by the CRPC, and provides periodic updates to the Board's RC.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Specific activities of GCR include the following:

- Separate and objective assessments of our credit and counterparty exposures to determine the nature and extent of risk undertaken by the business units;
- Periodic credit process and credit product reviews, focusing on and assessing credit analysis, policy compliance, prudent transaction structure and underwriting standards, administration and documentation, risk-rating integrity, and relevant trends;
- Identification and monitoring of developing counterparty, market and/or industry sector trends to limit risk of loss and protect capital;
- Regular and formal reporting of reviews, including findings and requisite actions to remedy identified deficiencies;
- Allocation of resources for specialized risk assessments (on an as-needed basis);
- Assessment of the level of the allowance for loan and lease losses and OTTI; and
- Liaison with auditors and regulatory personnel on matters relating to risk rating, reporting, and measurement.

### **Reserve for Credit Losses**

We maintain an allowance for loan and lease losses to support our on-balance sheet credit exposures. We also maintain a reserve for unfunded commitments and letters of credit to support our off-balance credit exposure. The two components together represent the reserve for credit losses. Review and evaluation of the adequacy of the reserve for credit losses is ongoing throughout the year, but occurs at least quarterly, and is based, among other factors, on our evaluation of the level of risk in the portfolio, the volume of adversely classified loans, previous loss experience, current trends, and economic conditions and their effect on our counterparties. Additional information about the allowance for loan and lease losses is provided in Note 4 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

### **Liquidity Risk Management**

Liquidity risk is defined as the potential that our financial condition or overall viability could be adversely affected by an actual or perceived inability to meet cash and collateral obligations. The goal of liquidity risk management is to maintain, even in the event of stress, our ability to meet our cash and collateral obligations.

Liquidity is managed to meet our financial obligations in a timely and cost-effective manner, as well as maintain sufficient flexibility to fund strategic corporate initiatives as they arise. Our effective

management of liquidity involves the assessment of the potential mismatch between the future cash demands of our clients and our available sources of cash under both normal and adverse economic and business conditions.

We manage our liquidity on a global, consolidated basis. We also manage liquidity on a stand-alone basis at the Parent Company and at State Street Bank, as well as at certain branches and subsidiaries of State Street Bank. State Street Bank generally has access to markets and funding sources limited to banks, such as the federal funds market and the Federal Reserve's discount window. Our Parent Company is managed to a more conservative liquidity profile, reflecting narrower market access. Our Parent Company typically maintains access to enough cash, primarily in the form of interest-bearing deposits or time deposits with its banking subsidiaries and access to borrowing from SSIF, to meet its current debt maturities and cash needs, as well as those projected over the next one-year period. As of December 31, 2017, the value of our Parent Company's net liquid assets totaled \$0.53 billion, compared with \$3.64 billion as of December 31, 2016, reflecting the contribution of liquid assets to SSIF in July 2017 in accordance with the support agreement. At December 31, 2017, the value of SSIF's net liquid assets totaled \$2.88 billion. As of December 31, 2017, our Parent Company has approximately \$1.4 billion of senior notes outstanding that will mature in the next twelve months.

Based on our level of consolidated liquid assets and our ability to access the capital markets for additional funding when necessary, including our ability to issue debt and equity securities under our current universal shelf registration, management considers our overall liquidity as of December 31, 2017 to be sufficient to meet its current commitments and business needs, including accommodating the transaction and cash management needs of its clients.

### **Governance**

Global Treasury is responsible for our management of liquidity. This includes the day-to-day management of our global liquidity position, the development and monitoring of early warning indicators, key liquidity risk metrics, the creation and execution of stress tests, the evaluation and implementation of regulatory requirements, the maintenance and execution of our liquidity guidelines and contingency funding plan, and routine management reporting to ALCO, MRAC and the Board's RC.

Global Treasury Risk Management, part of ERM, provides separate oversight over the identification, communication, and management of Global

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Treasury's risks in support of our business strategy. Global Treasury Risk Management reports to the CRO. Global Treasury Risk Management's responsibilities relative to liquidity risk management include the development and review of policies and guidelines; the monitoring of limits related to adherence to the liquidity risk guidelines and associated reporting.

### **Liquidity Framework**

Our liquidity framework contemplates areas of potential risk based on our activities, size, and other appropriate risk-related factors. In managing liquidity risk we employ limits, maintain established metrics and early warning indicators, and perform routine stress testing to identify potential liquidity needs. This process involves the evaluation of a combination of internal and external scenarios which assist us in measuring our liquidity position and in identifying potential increases in cash needs or decreases in available sources of cash, as well as the potential impairment of our ability to access the global capital markets.

We manage liquidity according to several principles that are equally important to our overall liquidity risk management framework:

- Structural liquidity management addresses liquidity by monitoring and directing the composition of our consolidated statement of condition. Structural liquidity is measured by metrics such as the percentage of total wholesale funds to consolidated total assets, and the percentage of non-government investment securities to client deposits. In addition, on a regular basis and as described below, our structural liquidity is evaluated under various stress scenarios.
- Tactical liquidity management addresses our day-to-day funding requirements and is largely driven by changes in our primary source of funding, which are client deposits. Fluctuations in client deposits may be supplemented with short-term borrowings, which generally include commercial paper and certificates of deposit.
- Stress testing and contingent funding planning are longer-term strategic liquidity risk management practices. Regular and ad hoc liquidity stress testing are performed under various severe but plausible scenarios at the consolidated level and at significant subsidiaries, including State Street Bank. These tests contemplate severe market and State Street-specific events under various time horizons and severities. Tests contemplate the impact of material changes in key funding sources, credit ratings,

additional collateral requirements, contingent uses of funding, systemic shocks to the financial markets, and operational failures based on market and State Street-specific assumptions. The stress tests evaluate the required level of funding versus available sources in an adverse environment. As stress testing contemplates potential forward-looking scenarios, results also serve as a trigger to activate specific liquidity stress levels and contingent funding actions.

CFPs are designed to assist senior management with decision-making associated with any contingency funding response to a possible or actual crisis scenario. The CFPs define roles, responsibilities and management actions to be taken in the event of deterioration of our liquidity profile caused by either a State Street-specific event or a broader disruption in the capital markets. Specific actions are linked to the level of stress indicated by these measures or by management judgment of market conditions.

### **Liquidity Risk Metrics**

In managing our liquidity, we employ early warning indicators and metrics. Early warning indicators are intended to detect situations which may result in a liquidity stress, including changes in our common stock price and the spread on our long-term debt. Additional metrics that are critical to the management of our consolidated statement of condition and monitored as part of our routine liquidity management include measures of our fungible cash position, purchased wholesale funds, unencumbered liquid assets, deposits, and the total of investment securities and loans as a percentage of total client deposits.

### **Asset Liquidity**

Central to the management of our liquidity is asset liquidity, which consists primarily of unencumbered highly liquid securities, cash and cash equivalents reported on our consolidated statement of condition. We restrict the eligibility of securities of asset liquidity to U.S. Government and federal agency securities (including MBS), selected non-U.S. Government and supranational securities as well as certain other high-quality securities which generally are more liquid than other types of assets even in times of stress. Our asset liquidity metric is similar to the HQLA under the U.S. LCR, and our HQLA, under the LCR final rule definition, were estimated to be \$65.35 billion and \$87.20 billion as of December 31, 2017 and December 31, 2016, respectively.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**TABLE 29: COMPONENTS OF AVERAGE HQLA BY TYPE OF ASSET**

(In millions)	December 31, 2017	December 31, 2016
Excess Central Bank Balances	\$ 33,584	\$ 48,407
U.S. Treasuries	10,278	17,770
Other Investment securities	13,422	15,442
Foreign government	8,064	5,585
<b>Total</b>	<b>\$ 65,348</b>	<b>\$ 87,204</b>

With respect to highly liquid short-term investments presented in the preceding table, due to the continued elevated level of client deposits as of December 31, 2017, we maintained cash balances in excess of regulatory requirements governing deposits with the Federal Reserve of approximately \$33.58 billion at the Federal Reserve, the ECB and other non-U.S. central banks, compared to \$48.40 billion as of December 31, 2016. The lower levels of deposits with central banks as of December 31, 2017 compared to December 31, 2016 was due to normal deposit volatility.

Liquid securities carried in our asset liquidity include securities pledged without corresponding advances from the FRBB, the FHLB, and other non-U.S. central banks. State Street Bank is a member of the FHLB. This membership allows for advances of liquidity in varying terms against high-quality collateral, which helps facilitate asset-and-liability management.

Access to primary, intra-day and contingent liquidity provided by these utilities is an important source of contingent liquidity with utilization subject to underlying conditions. As of December 31, 2017 and December 31, 2016, we had no outstanding primary credit borrowings from the FRBB discount window or any other central bank facility, and as of the same dates, no FHLB advances were outstanding.

In addition to the securities included in our asset liquidity, we have significant amounts of other unencumbered investment securities. The aggregate fair value of those securities was \$66.10 billion as of December 31, 2017, compared to \$54.40 billion as of December 31, 2016. These securities are available sources of liquidity, although not as rapidly deployed as those included in our asset liquidity.

Measures of liquidity include LCR, NSFR and TLAC which are described in "Supervision and Regulation" included under Item 1, Business, of this Form 10-K.

**Uses of Liquidity**

Significant uses of our liquidity could result from the following: withdrawals of client deposits; draw-downs of unfunded commitments to extend credit or to purchase securities, generally provided through lines of credit; and short-duration advance facilities. Such circumstances would generally arise under

stress conditions including deterioration in credit ratings. A recurring significant use of our liquidity involves our deployment of HQLA from our investment portfolio to post collateral to financial institutions and participants in our agency lending program serving as sources of securities under our enhanced custody program.

We had unfunded commitments to extend credit with gross contractual amounts totaling \$26.49 billion and \$26.99 billion as of December 31, 2017 and December 31, 2016, respectively. These amounts do not reflect the value of any collateral. As of December 31, 2017, approximately 72% of our unfunded commitments to extend credit expire within one year. Since many of our commitments are expected to expire or renew without being drawn upon, the gross contractual amounts do not necessarily represent our future cash requirements.

Information about our resolution planning and the impact actions under our resolution plans could have on our liquidity is provided in "Supervision and Regulation," included under Item 1. Business, of this Form 10-K.

**Funding**

*Deposits*

We provide products and services including custody, accounting, administration, daily pricing, foreign exchange services, cash management, financial asset management, securities finance and investment advisory services. As a provider of these products and services, we generate client deposits, which have generally provided a stable, low-cost source of funds. As a global custodian, clients place deposits with State Street entities in various currencies. As of December 31, 2017 and December 31, 2016, approximately 60% of our average client deposit balances were denominated in U.S. dollars, approximately 20% in EUR, 10% in GBP and 10% in all other currencies.

For the past several years, we have frequently experienced higher client deposit inflows toward the end of each fiscal quarter or the end of the fiscal year. As a result, we believe average client deposit balances are more reflective of ongoing funding than period-end balances.

**TABLE 30: TOTAL DEPOSITS**

(In millions)	December 31		Average Balance	
	2017	2016	Years Ended December 31,	2016
Client deposits	\$ 180,149	\$ 176,693	\$ 158,996	\$ 156,029
Wholesale CDs	4,747	10,470	4,812	14,456
<b>Total deposits</b>	<b>\$ 184,896</b>	<b>\$ 187,163</b>	<b>\$ 163,808</b>	<b>\$ 170,485</b>

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### *Short-Term Funding*

Our on-balance sheet liquid assets are also an integral component of our liquidity management strategy. These assets provide liquidity through maturities of the assets, but more importantly, they provide us with the ability to raise funds by pledging the securities as collateral for borrowings or through outright sales. In addition, our access to the global capital markets gives us the ability to source incremental funding at reasonable rates of interest from wholesale investors. As discussed earlier under "Asset Liquidity," State Street Bank's membership in the FHLB allows for advances of liquidity with varying terms against high-quality collateral.

Short-term secured funding also comes in the form of securities lent or sold under agreements to repurchase. These transactions are short-term in nature, generally overnight, and are collateralized by high-quality investment securities. These balances were \$2.84 billion and \$4.40 billion as of December 31, 2017 and December 31, 2016, respectively.

State Street Bank currently maintains a line of credit with a financial institution of CAD 1.40 billion, or approximately \$1.11 billion as of December 31, 2017, to support its Canadian securities processing operations. The line of credit has no stated termination date and is cancelable by either party with prior notice. As of December 31, 2017, there was no balance outstanding on this line of credit.

### *Long-Term Funding*

We have the ability to issue debt and equity securities under our current universal shelf registration to meet current commitments and business needs, including accommodating the transaction and cash management needs of our clients. In addition, State Street Bank, a wholly owned subsidiary of the Parent Company, also has authorization to issue up to \$5 billion in unsecured senior debt and an additional \$500 million of subordinated debt.

### **Agency Credit Ratings**

Our ability to maintain consistent access to liquidity is fostered by the maintenance of high investment-grade ratings as measured by the major independent credit rating agencies. Factors essential to maintaining high credit ratings include:

- diverse and stable core earnings;
- relative market position;

- strong risk management;
- strong capital ratios;
- diverse liquidity sources, including the global capital markets and client deposits;
- strong liquidity monitoring procedures; and
- preparedness for current or future regulatory developments.

High ratings limit borrowing costs and enhance our liquidity by:

- providing assurance for unsecured funding and depositors;
- increasing the potential market for our debt and improving our ability to offer products;
- serving markets; and
- engaging in transactions in which clients value high credit ratings.

A downgrade or reduction of our credit ratings could have a material adverse effect on our liquidity by restricting our ability to access the capital markets, which could increase the related cost of funds. In turn, this could cause the sudden and large-scale withdrawal of unsecured deposits by our clients, which could lead to draw-downs of unfunded commitments to extend credit or trigger requirements under securities purchase commitments; or require additional collateral or force terminations of certain trading derivative contracts.

A majority of our derivative contracts have been entered into under bilateral agreements with counterparties who may require us to post collateral or terminate the transactions based on changes in our credit ratings. We assess the impact of these arrangements by determining the collateral that would be required assuming a downgrade by all rating agencies. The additional collateral or termination payments related to our net derivative liabilities under these arrangements that could have been called by counterparties in the event of a downgrade in our credit ratings below levels specified in the agreements is disclosed in Note 10 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. Other funding sources, such as secured financing transactions and other margin requirements, for which there are no explicit triggers, could also be adversely affected.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**TABLE 31: CREDIT RATINGS**

	As of December 31, 2017		
	Standard & Poor's	Moody's Investors Service	Fitch
<b>State Street:</b>			
Senior debt	A	A1	AA-
Subordinated debt	A-	A2	A+
Junior subordinated debt	BBB	A3	BBB+
Preferred stock	BBB	Baa1	BBB
Outlook	Stable	Stable	Stable
<b>State Street Bank:</b>			
Short-term deposits	A-1+	P-1	F1+
Long-term deposits	AA-	Aa1	AA+
Senior debt/Long-term issuer	AA-	Aa3	AA
Subordinated debt	A	Aa3	A+
Outlook	Stable	Stable	Stable

**Contractual Cash Obligations and Other Commitments**

The long-term contractual cash obligations included within Table 32: Long-Term Contractual Cash Obligations were recorded in our consolidated statement of condition as of December 31, 2017, except for operating leases and the interest portions of long-term debt and capital leases.

**TABLE 32: LONG-TERM CONTRACTUAL CASH OBLIGATIONS**

December 31, 2017

(In millions)	PAYMENTS DUE BY PERIOD				
	Total	Less than 1 year	1-3 years	4-5 years	Over 5 years
Long-term debt <sup>(1)(2)</sup>	\$ 11,370	\$ 1,408	\$ 3,141	\$ 2,742	\$ 4,079
Operating leases	1,131	197	329	269	336
Capital lease obligations <sup>(2)</sup>	267	53	90	90	34
Total contractual cash obligations	<u>\$ 12,768</u>	<u>\$ 1,658</u>	<u>\$ 3,560</u>	<u>\$ 3,101</u>	<u>\$ 4,449</u>

<sup>(1)</sup> Long-term debt excludes capital lease obligations (presented as a separate line item) and the effect of interest-rate swaps. Interest payments were calculated at the stated rate with the exception of floating-rate debt, for which payments were calculated using the indexed rate in effect as of December 31, 2017.

<sup>(2)</sup> Additional information about contractual cash obligations related to long-term debt and operating and capital leases is provided in Notes 9 and 20 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. Our consolidated statement of cash flows, also included under Item 8 of this Form 10-K, provides additional liquidity information.

Total contractual cash obligations shown in Table 32: Long-Term Contractual Cash Obligations, do not include:

- Obligations which will be settled in cash, primarily in less than one year, such as client deposits, federal funds purchased, securities sold under repurchase agreements and other short-term borrowings. Additional information about deposits, federal funds purchased, securities sold under repurchase agreements and other short-term borrowings is provided in Note 8 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.
- Obligations related to derivative instruments because the derivative-related amounts

recorded in our consolidated statement of condition as of December 31, 2017 did not represent the amounts that may ultimately be paid under the contracts upon settlement. Additional information about our derivative instruments is provided in Note 10 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. We have obligations under pension and other post-retirement benefit plans, more fully described in Note 19 to the consolidated financial statements included under Item 8 of this Form 10-K, which are not included in Table 32: Long-Term Contractual Cash Obligations.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**TABLE 33: OTHER COMMERCIAL COMMITMENTS**

(In millions)	DURATION OF COMMITMENT AS OF DECEMBER 31, 2017				
	Total amounts committed <sup>(1)</sup>	Less than 1 year	1-3 years	4-5 years	Over 5 years
Indemnified securities financing	\$ 381,817	\$ 381,817	\$ —	\$ —	\$ —
Stable value protection <sup>(2)</sup>	26,653	26,653	—	—	—
Unfunded credit facilities	26,488	16,998	5,834	3,395	261
Standby letters of credit	3,158	1,596	1,424	138	—
Purchase obligations <sup>(3)</sup>	282	74	100	57	51
Total commercial commitments	<u>\$ 438,398</u>	<u>\$ 427,138</u>	<u>\$ 7,358</u>	<u>\$ 3,590</u>	<u>\$ 312</u>

<sup>(1)</sup> Total amounts committed reflect participations to independent third parties, if any.

<sup>(2)</sup> The stable value commitments do not have a contractual maturity date; however, the agreements may generally be terminated by State Street at any time upon settlement of any outstanding payment obligations. Refer to Note 12 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K for further information.

<sup>(3)</sup> Amounts represent obligations pursuant to legally binding agreements, where we have agreed to purchase products or services with a specific minimum quantity defined at a fixed, minimum or variable price over a specified period of time.

Additional information about the commitments presented in Table 33: Other Commercial Commitments, except for purchase obligations, is provided in Note 12 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**Operational Risk Management**

**Overview**

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Operational risk encompasses fiduciary risk and legal risk. Fiduciary risk is defined as the risk that State Street fails to properly exercise its fiduciary duties in its provision of products or services to clients. Legal risk is the risk of loss resulting from failure to comply with laws and contractual obligations as well as prudent ethical standards in business practices in addition to exposure to litigation from all aspects of State Street's activities.

Operational risk is inherent in the performance of investment servicing and investment management activities on behalf of our clients. Whether it be fiduciary risk, risk associated with execution and processing or other types of operational risk, a consistent, transparent and effective operational risk framework is key to identifying, monitoring and managing operational risk.

We have established an operational risk framework that is based on three major goals:

- Strong, active governance;
- Ownership and accountability; and
- Consistency and transparency.

**Governance**

Our Board is responsible for the approval and oversight of our overall operational risk framework. It does so through its RC, which reviews our

operational risk framework and approves our operational risk policy annually.

Our operational risk policy establishes our approach to our management of operational risk across State Street. The policy identifies the responsibilities of individuals and committees charged with oversight of the management of operational risk, and articulates a broad mandate that supports implementation of the operational risk framework.

ERM and other control groups provide the oversight, validation and verification of the management and measurement of operational risk.

Executive management actively manages and oversees our operational risk framework through membership on various risk management committees, including MRAC, the BCRC, TORC, the Operational Risk Committee, the Executive Information Security Committee, Business Controls Steering Committee, Compliance and Ethics Committee, and the Fiduciary Review Committee, all of which ultimately report to the appropriate committee of the Board.

The Operational Risk Committee, chaired by the global head of Operational Risk and co-chaired by the FLOD Head of Business Controls, provides cross-business oversight of operational risk, operational risk programs and their implementation to identify, measure, manage and control operational risk in an effective and consistent manner and reviews and approves operational risk guidelines intended to maintain a consistent implementation of our corporate operational risk policy and framework.

**Ownership and Accountability**

We have implemented our operational risk framework to support the broad mandate established by our operational risk policy. This framework represents an integrated set of processes and tools that assists us in the management and measurement of operational risk, including our calculation of required capital and RWA.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The framework takes a comprehensive view and integrates the methods and tools used to manage and measure operational risk. The framework utilizes aspects of the COSO framework and other industry leading practices, and is designed foremost to address State Street's risk management needs while complying with regulatory requirements. The operational risk framework is intended to provide a number of important benefits, including:

- A common understanding of operational risk management and its supporting processes;
- The clarification of responsibilities for the management of operational risk across State Street;
- The alignment of business priorities with risk management objectives;
- The active management of risk and early identification of emerging risks;
- The consistent application of policies and the collection of data for risk management and measurement; and
- The estimation of our operational risk capital requirement.

The operational risk framework employs a distributed risk management infrastructure executed by ERM groups aligned with the business units, which are responsible for the implementation of the operational risk framework at the business unit level.

As with other risks, senior business unit management is responsible for the day-to-day operational risk management of their respective businesses. It is business unit management's responsibility to provide oversight of the implementation and ongoing execution of the operational risk framework within their respective organizations, as well as coordination and communication with ERM.

### **Consistency and Transparency**

A number of corporate control functions are directly responsible for implementing and assessing various aspects of State Street's operational risk framework, with the overarching goal of consistency and transparency to meet the evolving needs of the business:

- The global head of Operational Risk, a member of the CRO's executive management team, leads ERM's corporate ORM group. ORM is responsible for the strategy, evolution and consistent implementation of our operational risk guidelines, framework and supporting tools across State Street. ORM reviews and analyzes operational key risk information, events, metrics and indicators at the business unit and corporate level for purposes of risk

management, reporting and escalation to the CRO, senior management and governance committees;

- ERM's Corporate Risk Analytics group develops and maintains operational risk capital estimation models, and ORM's Capital Analysis group calculates State Street's required capital for operational risk;
- ERM's MVG independently validates the quantitative models used to measure operational risk, and ORM performs validation checks on the output of the model;
- CIS establishes the framework, policies and related programs to measure, monitor and report on information security risks, including the effectiveness of cyber security program protections. CIS defines and manages the enterprise-wide information security program. CIS coordinates with Information Technology, control functions and business units to support the confidentiality, integrity and availability of corporate information assets. CIS identifies and employs a risk-based methodology consistent with applicable regulatory cyber security requirements and monitors the compliance of our systems with information security policies; and
- Corporate Audit performs separate reviews of the application of operational risk management practices and methodologies utilized across State Street.

Our operational risk framework consists of five components, each described below, which provide a working structure that integrates distinct risk programs into a continuous process focused on managing and measuring operational risk in a coordinated and consistent manner.

### **Risk Identification and Assessments**

The objective of risk identification and assessments is to understand business unit strategy, risk profile and potential exposures. It is achieved through a series of risk assessments across State Street using techniques for the identification, assessment and measurement of risk across a spectrum of potential frequency and severity combinations. Three primary risk assessment programs, which occur annually, augmented by other business-specific programs, are the core of this component:

- The RCSA program seeks to understand the risks associated with day-to-day activities, and the effectiveness of controls intended to manage potential exposures arising from these activities. These risks are typically frequent in nature but generally not severe in terms of exposure;

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

- The Material Risk Identification process utilizes a bottom-up approach to identify State Street's most significant risk exposures across all on- and off-balance sheet risk-taking activities. The program is specifically designed to consider risks that could have a material impact irrespective of their likelihood or frequency. This can include risks that may have an impact on longer-term business objectives, such as significant change management activities or long-term strategic initiatives;
- The Scenario Analysis program focuses on the set of risks with the highest severity and most relevance from a capital perspective. These are generally referred to as "tail risks," and serve as important benchmarks for our loss distribution approach model (see below); they also provide inputs into stress testing; and
- Business-specific programs to identify, assess and measure risk, including new business and product review and approval, new client screening, and, as deemed appropriate, targeted risk assessments.

### Capital Analysis

The primary measurement tool used is an internally developed loss distribution approach (LDA) model. We use the LDA model to quantify required operational risk capital, from which we calculate RWA related to operational risk. Such required capital and RWA totaled \$3.67 billion and \$45.82 billion, respectively, as of December 31, 2017, compared to \$3.57 billion and \$44.58 billion, respectively, as of December 31, 2016; refer to the "Capital" section in "Financial Condition," of this Management's Discussion and Analysis.

The LDA model incorporates the four required operational risk elements described below:

- Internal loss event data is collected from across State Street in conformity with our operating loss policy that establishes the requirements for collecting and reporting individual loss events. We categorize the data into seven Basel-defined event types and further subdivide the data by business unit, as deemed appropriate. Each of these loss events are represented in a UOM which is used to estimate a specific amount of capital required for the types of loss events that fall into each specific category. Some UOMs are measured at the corporate level because they are not "business specific," such as damage to physical assets, where the cause of an event is not primarily driven by the behavior of a single business unit.

Internal losses of \$500 or greater are captured, analyzed and included in the modeling approach. Loss event data is collected using a corporate-wide data collection tool, which stores the data in a Loss Event Data Repository, referred to as the LEDR, to support processes related to analysis, management reporting and the calculation of required capital. Internal loss event data provides State Street-specific frequency and severity information to our capital calculation process for historical loss events experienced by State Street. Internal loss event data may be incorporated into our LDA model in a future quarter following the realization of the losses, with the timing and categorization dependent on the processes for model updates and, if applicable, model revalidation and regulatory review and related supervisory processes. An individual loss event can have a significant effect on the output of our LDA model and our operational risk RWA under the advanced approaches depending on the severity of the loss event, its categorization among the seven Basel-defined UOMs and the stability of the distributional approach for a particular UOM.

- External loss event data provides information with respect to loss event severity from other financial institutions to inform our capital estimation process of events in similar business units at other banking organizations. This information supplements the data pool available for use in our LDA model. Assessments of the sufficiency of internal data and the relevance of external data are completed before pooling the two data sources for use in our LDA model.
- Scenario analysis workshops are conducted across State Street to inform management of the less frequent but most severe, or "tail," risks that the organization faces. The workshops are attended by senior business unit managers, other support and control partners and business-aligned risk management staff. The workshops are designed to capture information about the significant risks and to estimate potential exposures for individual risks should a loss event occur. The results of these workshops are used to make a comparison to our LDA model results to determine that our calculation of required capital considers relevant risk-related information.
- Business environment and internal control factors are gathered as part of our scenario analysis program to inform the scenario

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

analysis workshop participants of internal loss event data and business-relevant metrics, such as RCSA results, along with industry loss event data and case studies where appropriate. Business environment and internal control factors are those characteristics of a bank's internal and external operating environment that bear an exposure to operational risk. The use of this information indirectly influences our calculation of required capital by providing additional relevant data to workshop participants when reviewing specific UOM risks.

### **Monitoring, Reporting and Analytics**

The objective of risk monitoring is to proactively monitor the changing business environment and corresponding operational risk exposure. It is achieved through a series of quantitative and qualitative monitoring tools that are designed to allow us to understand changes in the business environment, internal control factors, risk metrics, risk assessments, exposures and operating effectiveness, as well as details of loss events and progress on risk initiatives implemented to mitigate potential risk exposures.

Operational risk reporting is intended to provide transparency, thereby enabling management to manage risk, provide oversight and escalate issues in a timely manner. It is designed to allow the business units, executive management, and the Board's control functions and committees to gain insight into activities that may result in risks and potential exposures. Reports are intended to identify business activities that are experiencing processing issues, whether or not they result in actual loss events. Reporting includes results of monitoring activities, internal and external examinations, regulatory reviews, and control assessments. These elements combine in a manner designed to provide a view of potential and emerging risks facing State Street and information that details its progress on managing risks.

### **Effectiveness and Testing**

The objective of effectiveness and testing is to verify that internal controls are designed appropriately, are consistent with corporate and regulatory standards, and are operating effectively. It is achieved through a series of assessments by both internal and external parties, including Corporate Audit, independent registered public accounting firms, business self-assessments and other control function reviews, such as a SOX testing program.

Consistent with our standard model validation process, the operational risk LDA model is subject to a detailed review, overseen by the MRC. In addition, the model is subject to a rigorous internal governance

process. All changes to the model or input parameters, and the deployment of model updates, are reviewed and approved by the Operational Risk Committee, which has oversight responsibility for the model, with technical input from the MRC.

### **Documentation and Guidelines**

Documentation and guidelines allow for consistency and repeatability of the various processes that support the operational risk framework across State Street.

Operational risk guidelines document our practices and describe the key elements in a business unit's operational risk management program. The purpose of the guidelines is to set forth and define key operational risk terms, provide further detail on State Street's operational risk programs, and detail the business units' responsibilities to identify, assess, measure, monitor and report operational risk. The guideline supports our operational risk policy.

Data standards have been established to maintain consistent data repositories and systems that are controlled, accurate and available on a timely basis to support operational risk management.

### **Information Technology Risk Management**

#### **Overview and Principles**

We define technology risk as the risk associated with the use, ownership, operation, involvement, influence and adoption of information technology. Technology risk includes risks potentially triggered by technology non-compliance with regulatory obligations, information security and privacy incidents, business disruption, technology internal control and process gaps, technology operational events, and adoption of new business technologies.

The principal technology risks within our technology risk policy and risk appetite framework include:

- Third party vendor risk
- Business disruption and technology resiliency risk
- Cyber and information security risk
- Technology asset and configuration risk
- Technology obsolescence risk

#### **Governance**

Our Board is responsible for the approval and oversight of our overall technology risk framework and program. It does so through its Technology Committee, which reviews and approves our technology risk policy and appetite framework annually.

Our technology risk policy establishes our approach to our management of technology risk across State Street. The policy identifies the responsibilities of individuals and committees charged with oversight of the management of technology risk

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

and articulates a broad mandate that supports implementation of the technology risk framework.

Risk control functions in the business are responsible for adopting and executing the Enterprise Technology Risk Management, or ETRM, technology risk framework and reporting requirements. They do this, in part, by developing and maintaining an inventory of critical applications and supporting infrastructure, as well as identifying, assessing and measuring technology risk utilizing the ETRM framework. They are also responsible for monitoring and evaluating risk on a continual basis using key risk indicators, risk reporting and adopting appropriate risk responses to risk issues.

The Chief Technology Risk Officer, a member of the CRO's executive management team, leads the ETRM. ETRM is the separate risk function responsible for the technology risk strategy and appetite, and technology risk framework development and execution. ETRM also performs overall technology risk monitoring and reporting to the Board, and provides a separate view of the technology risk posture to executive leadership.

We manage technology risks by:

- Coordinating various risk assessment and risk management activities, including ERM operational risk programs;
- Establishing, through TORC and the Technology Committee of the Board, the enterprise level technology risk and cyber risk appetite and limits;
- Producing enterprise level risk reporting, aggregation, dashboards, profiles and risk appetite statements;
- Validating appropriateness of reporting of information technology risks and risk acceptance to senior management risk committees and the Board;
- Promoting a strong technology risk culture through communication;
- Serving as an escalation and challenge point for technology risk policy guidance, expectations and clarifications;
- Assessing effectiveness of key enterprise information technology risk and internal control remediation programs; and
- Providing risk oversight, challenge and monitoring for the Global Continuity and Third Party Vendor Management Program, including the collection of risk appetite, metrics and KRIs, and reviewing issue management processes and consistent program adoption.

### Market Risk Management

Market risk is defined by U.S. banking regulators as the risk of loss that could result from broad market movements, such as changes in the general level of interest rates, credit spreads, foreign exchange rates or commodity prices. We are exposed to market risk in both our trading and certain of our non-trading, or asset-and-liability management, activities.

Information about the market risk associated with our trading activities is provided below under "Trading Activities." Information about the market risk associated with our non-trading activities, which consists primarily of interest-rate risk, is provided below under "Asset-and-Liability Management Activities."

#### Trading Activities

In the conduct of our trading activities, we assume market risk, the level of which is a function of our overall risk appetite, business objectives and liquidity needs, our clients' requirements and market volatility, and our execution against those factors.

We engage in trading activities primarily to support our clients' needs and to contribute to our overall corporate earnings and liquidity. In connection with certain of these trading activities, we enter into a variety of derivative financial instruments to support our clients' needs and to manage our interest-rate and currency risk. These activities are generally intended to generate trading services revenue and to manage potential earnings volatility. In addition, we provide services related to derivatives in our role as both a manager and a servicer of financial assets.

Our clients use derivatives to manage the financial risks associated with their investment goals and business activities. With the growth of cross-border investing, our clients often enter into foreign exchange forward contracts to convert currency for international investments and to manage the currency risk in their international investment portfolios. As an active participant in the foreign exchange markets, we provide foreign exchange forward and option contracts in support of these client needs, and also act as a dealer in the currency markets.

As part of our trading activities, we assume positions in the foreign exchange and interest-rate markets by buying and selling cash instruments and entering into derivative instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest-rate swaps, interest-rate forward contracts, and interest-rate futures. As of December 31, 2017, the notional amount of these derivative contracts was \$1.75 trillion, of which \$1.68 trillion was composed of foreign exchange forward, swap and spot contracts. We seek to match positions closely with the objective of minimizing related

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

currency and interest-rate risk. All foreign exchange contracts are valued daily at current market rates.

### **Governance**

Our assumption of market risk in our trading activities is an integral part of our corporate risk appetite. Our Board reviews and oversees our management of market risk, including the approval of key market risk policies and the receipt and review of regular market risk reporting, as well as periodic updates on selected market risk topics.

The previously described TMRC (refer to "Risk Committees") oversees all market risk-taking activities across State Street associated with trading. The TMRC, which reports to MRAC, is composed of members of ERM, our global markets business and our Global Treasury group, as well as our senior executives who manage our trading businesses and other members of management who possess specialized knowledge and expertise. The TMRC meets regularly to monitor the management of our trading market risk activities.

Our business units identify, actively manage and are responsible for the market risks inherent in their businesses. A dedicated market risk management group within ERM, and other groups within ERM, work with those business units to assist them in the identification, assessment, monitoring, management and control of market risk, and assist business unit managers with their market risk management and measurement activities. ERM provides an additional line of oversight, support and coordination designed to promote the consistent identification, measurement and management of market risk across business units, separate from those business units' discrete activities.

The ERM market risk management group is responsible for the management of corporate-wide market risk, the monitoring of key market risks and the development and maintenance of market risk management policies, guidelines, and standards aligned with our corporate risk appetite. This group also establishes and approves market risk tolerance limits and trading authorities based on, but not limited to, measures of notional amounts, sensitivity, VaR and stress. Such limits and authorities are specified in our trading and market risk guidelines which govern our management of trading market risk.

Corporate Audit separately assesses the design and operating effectiveness of the market risk controls within our business units and ERM. Other related responsibilities of Corporate Audit include the periodic review of ERM and business unit compliance with market risk policies, guidelines, and corporate standards, as well as relevant regulatory requirements. We are subject to regular monitoring, reviews and supervisory exams of our market risk

function by the Federal Reserve. In addition, we are regulated by, among others, the SEC, the Financial Industry Regulatory Authority and the U.S. Commodities Futures Trading Commission.

### **Risk Appetite**

Our corporate market risk appetite is specified in policy statements that outline the governance, responsibilities and requirements surrounding the identification, measurement, analysis, management and communication of market risk arising from our trading activities. These policy statements also set forth the market risk control framework to monitor, support, manage and control this portion of our risk appetite. All groups involved in the management and control of market risk associated with trading activities are required to comply with the qualitative and quantitative elements of these policy statements. Our trading market risk control framework is composed of the following components:

- A trading market risk management process led by ERM, separate from the business units' discrete activities;
- Clearly defined responsibilities and authorities for the primary groups involved in trading market risk management;
- A trading market risk measurement methodology that captures correlation effects and allows aggregation of market risk across risk types, markets and business lines;
- Daily monitoring, analysis, and reporting of market risk exposures associated with trading activities against market risk limits;
- A defined limit structure and escalation process in the event of a market risk limit excess;
- Use of VaR models to measure the one-day market risk exposure of trading positions;
- Use of VaR as a ten-day-based regulatory capital measure of the market risk exposure of trading positions;
- Use of non-VaR-based limits and other controls;
- Use of stressed-VaR models, stress-testing analysis and scenario analysis to support the trading market risk measurement and management process by assessing how portfolios and global business lines perform under extreme market conditions;
- Use of back-testing as a diagnostic tool to assess the accuracy of VaR models and other risk management techniques; and
- A new product approval process that requires market risk teams to assess trading-related market risks and apply risk tolerance limits to

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

proposed new products and business activities.

We use our CAP to assess our overall capital and liquidity in relation to our risk profile and provide a comprehensive strategy for maintaining appropriate capital and liquidity levels. With respect to market risk associated with trading activities, our risk management and our calculations of regulatory capital are based primarily on our internal VaR models and stress testing analysis. As discussed in detail under "Value-at-Risk" below, VaR is measured daily by ERM.

The TMRC oversees our market risk exposure in relation to limits established within our risk appetite framework. These limits define threshold levels for VaR- and stressed VaR-based measures and are applicable to all trading positions subject to regulatory capital requirements. These limits are designed to prevent any undue concentration of market risk exposure, in light of the primarily non-proprietary nature of our trading activities. The risk appetite framework and associated limits are reviewed and approved by the Board's RC.

### **Covered Positions**

Our trading positions are subject to regulatory market risk capital requirements if they meet the regulatory definition of a "covered position." A covered position is generally defined by U.S. banking regulators as an on- or off-balance sheet position associated with the organization's trading activities that is free of any restrictions on its tradability, but does not include intangible assets, certain credit derivatives recognized as guarantees and certain equity positions not publicly traded. All FX and commodity positions are considered covered positions, regardless of the accounting treatment they receive. The identification of covered positions for inclusion in our market risk capital framework is governed by our covered positions policy, which outlines the standards we use to determine whether a trading position is a covered position.

Our covered positions consist primarily of the trading portfolios held by our global markets business. They also arise from certain positions held by our Global Treasury group. These trading positions include products such as foreign exchange spot, foreign exchange forwards, non-deliverable forwards, foreign exchange options, foreign exchange funding swaps, currency futures, financial futures, and interest rate futures. New activities are analyzed to determine if the positions arising from such new activities meet the definition of a covered position and conform to our covered positions policy. This documented analysis, including any decisions with respect to market risk treatments, must receive approval from the TMRC.

We use spot rates, forward points, yield curves and discount factors imported from third-party sources to measure the value of our covered positions, and we use such values to mark our covered positions to market on a daily basis. These values are subject to separate validation by us in order to evaluate reasonableness and consistency with market experience. The mark-to-market gain or loss on spot transactions is calculated by applying the spot rate to the foreign currency principal and comparing the resultant base currency amount to the original transaction principal. The mark-to-market gain or loss on a forward foreign exchange contract or forward cash flow contract is determined as the difference between the life-to-date (historical) value of the cash flow and the value of the cash flow at the inception of the transaction. The mark-to-market gain or loss on interest-rate swaps is determined by discounting the future cash flows from each leg of the swap transaction.

### **Value-at-Risk, Stress Testing and Stressed VaR**

As noted above, we use a variety of risk measurement tools and methodologies, including VaR, which is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk measurement methodology to measure trading-related VaR daily. We have adopted standards for measuring trading-related VaR, and we maintain regulatory capital for market risk associated with our trading activities in conformity with currently applicable bank regulatory market risk requirements.

We utilize an internal VaR model to calculate our regulatory market risk capital requirements. We use a historical simulation model to calculate daily VaR- and stressed VaR-based measures for our covered positions in conformity with regulatory requirements. Our VaR model seeks to capture identified material risk factors associated with our covered positions, including risks arising from market movements such as changes in foreign exchange rates, interest rates and option-implied volatilities.

We have adopted standards and guidelines to value our covered positions which govern our VaR- and stressed VaR-based measures. Our regulatory VaR-based measure is calculated based on historical volatilities of market risk factors during a two-year observation period calibrated to a one-tail, 99% confidence interval and a ten-business-day holding period. We also use the same platform to calculate a one-tail, 99% confidence interval, one-business-day VaR for internal risk management purposes. A 99% one-tail confidence interval implies that daily trading losses are not expected to exceed the estimated VaR more than 1% of the time, or less than three business days out of a year.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Our market risk models, including our VaR model, are subject to change in connection with the governance, validation and back-testing processes described below. These models can change as a result of changes in our business activities, our historical experiences, market forces and events, regulations and regulatory interpretations and other factors. In addition, the models are subject to continuing regulatory review and approval. Changes in our models may result in changes in our measurements of our market risk exposures, including VaR, and related measures, including regulatory capital. These changes could result in material changes in those risk measurements and related measures as calculated and compared from period to period.

### *Value-at-Risk*

VaR measures are based on the most recent two years of historical price movements for instruments and related risk factors to which we have exposure. The instruments in question are limited to foreign exchange spot, forward and options contracts and interest-rate contracts, including futures and interest-rate swaps. Historically, these instruments have exhibited a higher degree of liquidity relative to other available capital markets instruments. As a result, the VaR measures shown reflect our ability to rapidly adjust exposures in highly dynamic markets. For this reason, risk inventory, in the form of net open positions, across all currencies is typically limited. In addition, long and short positions in major, as well as minor, currencies provide risk offsets that limit our potential downside exposure.

Our VaR methodology uses a historical simulation approach based on market-observed changes in foreign exchange rates, U.S. and non-U.S. interest rates and implied volatilities, and incorporates the resulting diversification benefits provided from the mix of our trading positions. Our VaR model incorporates approximately 5,000 risk factors and includes correlations among currency, interest rates, and other market rates.

All VaR measures are subject to limitations and must be interpreted accordingly. Some, but not all, of the limitations of our VaR methodology include the following:

- Compared to a shorter observation period, a two-year observation period is slower to reflect increases in market volatility (although temporary increases in market volatility will affect the calculation of VaR for a longer period); consequently, in periods of sudden increases in volatility or increasing volatility, in each case relative to the prior two-year period, the calculation of VaR may understate current risk;
- Compared to a longer observation period, a two-year observation period may not reflect as many past periods of volatility in the markets, because such past volatility is no longer in the observation period; consequently, historical market scenarios of high volatility, even if similar to current or likely future market circumstances, may fall outside the two-year observation period, resulting in a potential understatement of current risk;
- The VaR-based measure is calibrated to a specified level of confidence and does not indicate the potential magnitude of losses beyond this confidence level;
- In certain cases, VaR-based measures approximate the impact of changes in risk factors on the values of positions and portfolios; this may happen because the number of inputs included in the VaR model is necessarily limited; for example, yield curve risk factors do not exist for all future dates;
- The use of historical market information may not be predictive of future events, particularly those that are extreme in nature; this "backward-looking" limitation can cause VaR to understate or overstate risk;
- The effect of extreme and rare market movements is difficult to estimate; this may result from non-linear risk sensitivities as well as the potential for actual volatility and correlation levels to differ from assumptions implicit in the VaR calculations; and
- Intra-day risk is not captured.

### *Stress Testing and Stressed VaR*

We have a corporate-wide stress testing program in place that incorporates an array of techniques to measure the potential loss we could suffer in a hypothetical scenario of adverse economic and financial conditions. We also monitor concentrations of risk such as concentration by branch, risk component, and currency pairs. We conduct stress testing on a daily basis based on selected historical stress events that are relevant to our positions in order to estimate the potential impact to our current portfolio should similar market conditions recur, and we also perform stress testing as part of the Federal Reserve's CCAR process. Stress testing is conducted, analyzed and reported at the corporate, trading desk, division and risk-factor level (for example, exchange risk, interest-rate risk and volatility risk).

We calculate a stressed VaR-based measure using the same model we use to calculate VaR, but

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

with model inputs calibrated to historical data from a range of continuous twelve-month periods that reflect significant financial stress. The stressed VaR model identifies the second-worst outcome occurring in the worst continuous one-year rolling period since July 2007. This stressed VaR meets the regulatory requirement as the rolling ten-day period with an outcome that is worse than 99% of other outcomes during that twelve-month period of financial stress. For each portfolio, the stress period is determined algorithmically by seeking the one-year time horizon that produces the largest ten-business-day VaR from within the available historical data. This historical data set includes the financial crisis of 2008, the highly volatile period surrounding the Eurozone sovereign debt crisis and the Standard & Poor's downgrade of U.S. Treasury debt in August 2011. As the historical data set used to determine the stress period expands over time, future market stress events will be automatically incorporated.

We perform scenario analysis daily based on selected historical stress events that are relevant to our positions in order to estimate the potential impact to our current portfolio should similar market conditions recur. Relevant scenarios are chosen from an inventory of historical financial stresses and applied to our current portfolio. These historical event scenarios involve spot foreign exchange, credit, equity, unforeseen geo-political events and natural disasters, and government and central bank intervention scenarios. Examples of the specific historical scenarios we incorporate in our stress testing program may include the Asian financial crisis of 1997, the September 11, 2001 terrorist attacks in the U.S., and the 2008 financial crisis. We continue to update our inventory of historical stress scenarios as new stress conditions emerge in the financial markets.

As each of the historical stress events is associated with a different time horizon, we normalize results by scaling down the longer horizon events to a ten-day horizon and keeping the shorter horizon events (i.e., events that are shorter than ten days) at their original terms. We also conduct sensitivity analysis daily to calculate the impact of a large predefined shock in a specific risk factor or a group of risk factors on our current portfolio. These predefined shocks include parallel and non-parallel yield curve shifts and foreign exchange spot and volatility surface shifts. In a parallel shift scenario, we apply a constant factor shift across all yield curve tenors. In a non-parallel shift scenario, we apply different shock levels to different tenors of a yield curve, rather than shifting the entire curve by a constant amount. Non-parallel shifts include steepening, flattening and butterflies.

Stress testing results and limits are actively monitored on a daily basis by ERM and reported to the TMRC. Limit breaches are addressed by ERM risk managers in conjunction with the business units, escalated as appropriate, and reviewed by the TMRC if material. In addition, we have established several action triggers that prompt immediate review by management and the implementation of a remediation plan.

### **Validation and Back-Testing**

We perform frequent back-testing to assess the accuracy of our VaR-based model in estimating loss at the stated confidence level. This back-testing involves the comparison of estimated VaR model outputs to daily, actual profit-and-loss outcomes, or P&L, observed from daily market movements. We back-test our VaR model using "clean" P&L, which excludes non-trading revenue such as fees, commissions and NII, as well as estimated revenue from intra-day trading. Our VaR definition of trading losses excludes items that are not specific to the price movement of the trading assets and liabilities themselves, such as fees, commissions, changes to reserves and gains or losses from intra-day activity.

We experienced one back-testing exception in each of 2017, 2016 and 2015. In reference to the 2017 exception, the trading loss that day exceeded the VaR based on the prior day's closing positions, following the euro's forward point spike on short tenors driven by thinning liquidity and reduced volumes spurred by banks' year-end balance sheet preparations. In reference to the 2016 exception, the trading P&L that day exceeded the VaR based on the prior day's closing positions, following a large depreciation in the U.S. dollar against several major and emerging market currencies, primarily attributable to U.S. GDP growth rate being lower than expected and market reaction to Bank of Japan's decision to leave the interest rate unchanged. In reference to the 2015 exception, the trading P&L that day exceeded the VaR based on the prior day's closing positions, following a large depreciation in the U.S. dollar against several major and emerging market currencies, which depreciation can be attributed to a decision and related statements by the Federal Reserve's Federal Open Market Committee to hold interest rates at current levels.

Our model validation process also evaluates the integrity of our VaR models through the use of regular outcome analysis. This outcome analysis includes back-testing, which compares the VaR model's predictions to actual outcomes using out-of-sample information. MVG examined back testing results for the market risk regulatory capital model used for 2016. Consistent with regulatory guidance, the back-testing compared "clean" P&L, defined above, with

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

the one-day VaR produced by the model. The back-testing was performed for a time period not used for model development. The number of occurrences where "clean" trading-book P&L exceeded the one-day VaR was within our expected VaR tolerance level.

**Market Risk Reporting**

Our ERM market risk management group is responsible for market risk monitoring and reporting. We use a variety of systems and controlled market feeds from third-party services to compile data for several daily, weekly, and monthly management reports.

The following tables present VaR and stressed VaR associated with our trading activities for covered positions held during the quarters ended December 31, 2017 and 2016, respectively, as measured by our VaR methodology:

**TABLE 34: TEN-DAY VaR ASSOCIATED WITH TRADING ACTIVITIES FOR COVERED POSITIONS**

(In thousands)	Quarter Ended December 31, 2017			Quarter Ended December 31, 2016			As of December 31, 2017	As of December 31, 2016
	Average	Maximum	Minimum	Average	Maximum	Minimum	VaR	VaR
Global Markets	\$ 8,148	\$ 13,502	\$ 3,402	\$ 8,307	\$ 15,847	\$ 3,048	\$ 5,719	\$ 4,088
Global Treasury	650	1,767	126	527	756	333	1,346	756
Total VaR	\$ 8,123	\$ 13,306	\$ 3,410	\$ 8,285	\$ 15,723	\$ 2,970	\$ 5,562	\$ 3,938

**TABLE 35: TEN-DAY STRESSED VaR ASSOCIATED WITH TRADING ACTIVITIES FOR COVERED POSITIONS**

(In thousands)	Quarter Ended December 31, 2017			Quarter Ended December 31, 2016			As of December 31, 2017	As of December 31, 2016
	Average	Maximum	Minimum	Average	Maximum	Minimum	Stressed VaR	Stressed VaR
Global Markets	\$ 27,185	\$ 41,908	\$ 14,408	\$ 36,168	\$ 52,057	\$ 18,883	\$ 31,512	\$ 26,811
Global Treasury	8,761	17,460	2,560	10,275	13,868	7,030	12,042	11,342
Total Stressed VaR	\$ 27,789	\$ 42,527	\$ 14,320	\$ 38,645	\$ 55,899	\$ 20,646	\$ 29,649	\$ 28,624

The average of our stressed VaR-based measure was approximately \$28 million for the quarter ended December 31, 2017, compared to an average of approximately \$39 million for the quarter ended December 31, 2016.

The decrease in our stressed VaR based measure for the quarter ended December 31, 2017, compared to the quarter ended December 31, 2016, was mainly driven by lower end of day foreign exchange positions in Q4 2017 compared to Q4 2016.

The VaR-based measures presented in the preceding tables are primarily a reflection of the overall level of market volatility and our appetite for taking market risk in our trading activities. Overall levels of volatility have been low both on an absolute basis and relative to the historical information observed at the beginning of the period used for the calculations. Both the ten-day VaR-based measures and the stressed VaR-based measures are based on

historical changes observed during rolling ten-day periods for the portfolios as of the close of business each day over the past one-year period.

We may in the future modify and adjust our models and methodologies used to calculate VaR and stressed VaR, subject to regulatory review and approval, and these modifications and adjustments may result in changes in our VaR-based and stressed VaR-based measures.

The following tables present the VaR and stressed-VaR associated with our trading activities attributable to foreign exchange risk, interest-rate risk and volatility risk as of December 31, 2017 and 2016, respectively. The totals of the VaR-based and stressed VaR-based measures for the three attributes in total exceeded the related total VaR and total stressed VaR presented in the foregoing tables as of each period-end, primarily due to the benefits of diversification across risk types.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**TABLE 36: TEN-DAY VaR ASSOCIATED WITH TRADING ACTIVITIES BY RISK FACTOR<sup>(1)</sup>**

(In thousands)	As of December 31, 2017			As of December 31, 2016		
	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk
By component:						
Global Markets	\$ 6,149	\$ 5,546	\$ 3	\$ 3,279	\$ 3,281	\$ 102
Global Treasury	100	1,372	—	220	737	—
Total VaR	\$ 6,250	\$ 5,840	\$ 3	\$ 3,269	\$ 3,004	\$ 102

**TABLE 37: TEN-DAY STRESSED VaR ASSOCIATED WITH TRADING ACTIVITIES BY RISK FACTOR<sup>(1)</sup>**

(In thousands)	As of December 31, 2017			As of December 31, 2016		
	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk	Foreign Exchange Risk	Interest Rate Risk	Volatility Risk
By component:						
Global Markets	\$ 15,975	\$ 27,161	\$ 3	\$ 5,026	\$ 36,563	\$ 111
Global Treasury	153	12,192	—	258	11,597	—
Total Stressed VaR	\$ 16,105	\$ 25,177	\$ 3	\$ 5,056	\$ 36,592	\$ 111

<sup>(1)</sup> For purposes of risk attribution by component, foreign exchange refers only to the risk from market movements in period-end rates. Forwards, futures, options and swaps with maturities greater than period-end have embedded interest-rate risk that is captured by the measures used for interest-rate risk. Accordingly, the interest-rate risk embedded in these foreign exchange instruments is included in the interest-rate risk component.

### Asset and Liability Management Activities

The primary objective of asset and liability management is to provide sustainable NII under varying economic conditions, while protecting the economic value of the assets and liabilities carried in our consolidated statement of condition from the adverse effects of changes in interest rates. While many market factors affect the level of NII and the economic value of our assets and liabilities, one of the most significant factors is our exposure to movements in interest rates. Most of our NII is earned from the investment of client deposits generated by our businesses. We invest these client deposits in assets that conform generally to the characteristics of our balance sheet liabilities, including the currency composition of our significant non-U.S. dollar denominated client liabilities.

We manage interest rate risk on a consolidated basis using two different, but complementary approaches. NII sensitivity is a short-term, earnings-based simulation that measures re-pricing mismatches on the balance sheet. It compares our baseline view of NII over a twelve-month horizon, based on our internal forecast of interest rates, to a wide range of instantaneous and gradual rate shocks. The baseline NII forecast includes our expectations for new business growth, changes in balance sheet mix and investment portfolio positioning. While investment securities balances can fluctuate with the level of rates as prepayment assumptions change, our deposit balances remain consistent with the baseline. On the other hand, economic value of equity sensitivity is a discounted cash flow model designed to estimate the change in fair value of assets and liabilities under a series of immediate interest rate shocks over a long-term horizon. It measures the duration mismatch of the spot balance

sheet only and does not include the impact of new business.

While there are clear differences between NII and EVE sensitivity, there are several important similarities. First, both measures utilize consistent data and assumptions when modeling positions currently held on the balance sheet. Second, each approach assumes no management action is taken to mitigate the adverse effects of interest rate changes on our financial performance (and thus provides a conservative view of interest rate risk). NII and EVE sensitivity metrics are continuously monitored as market conditions change and managed within internally-approved risk limits and guidelines.

### Net Interest Income at Risk

In the table below, we report the expected change in NII over the next twelve months from +/-100 bps instantaneous and gradual parallel rate shocks. Note that in each scenario, all currencies are shifted higher or lower. For the two gradual parallel rate scenarios, or interest rate ramps, the change in rates is applied evenly throughout the horizon.

We also routinely measure NII sensitivity to non-parallel rate shocks to isolate the impact of short-term or long-term market rates. In the up 100 bps instantaneous shock, approximately 75% of the expected benefit stems from the short-end of the yield curve. Additionally, we quantify how much of the change is a result of shifts in U.S. and non-U.S. rates. In the up 100 bps instantaneous shock, approximately 50-60% of the benefit is driven by U.S. rates.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**TABLE 38: NII SENSITIVITY**

(In millions)	December 31, 2017		December 31, 2016	
	Benefit / (Exposure)			
Rate change:				
+100 bps shock	\$	435	\$	585
-100 bps shock		(294)		(265)
+100 bps ramp		177		284
-100 bps ramp		(122)		(161)

As of December 31, 2017, NII sensitivity remains positioned to benefit from rising interest rates. Compared to prior year-end, the decreased benefit to the up 100 bps instantaneous shock is driven by investment portfolio activity and higher forecasted short-end rates, which impacts the repricing characteristics of client deposits and other liabilities. The increased exposure to the down 100 bps instantaneous rate shock is driven by higher observed short-term interest rates relative to prior year-end. Gradual rate shocks have a similar asset sensitive positioning compared with instantaneous shocks, but are less impactful due to the severity of the rate shift.

*Economic Value of Equity*

The following table highlights our economic value of equity sensitivity to a +/-200 bps instantaneous rate shock, relative to spot interest rates. Management compares the change in EVE sensitivity against State Street's aggregate tier 1 and tier 2 risk-based capital, calculated in conformity with current applicable regulatory requirements.

**TABLE 39: EVE SENSITIVITY**

(In millions)	December 31, 2017		December 31, 2016	
	Benefit / (Exposure)			
Rate change:				
+200 bps shock	\$	(1,507)	\$	(1,092)
-200 bps shock		11		877

As of December 31, 2017, economic value of equity sensitivity remains exposed to upward shifts in interest rates. The change in each scenario is driven by investment portfolio repositioning and higher modeled client deposit duration. The -200 bps scenario is also impacted by the low level of rates, which can limit the size of the rate shock.

**Model Risk Management**

The use of models is widespread throughout the financial services industry, with large and complex organizations relying on sophisticated models to support numerous aspects of their financial decision making. The models contemporaneously represent both a significant advancement in financial management and a new source of risk. In large banking organizations like State Street, model results influence business decisions, and model failure could have a harmful effect on our financial performance.

As a result, the Model Risk Management Framework seeks to mitigate model risk at State Street.

Our model risk management program has three principal components:

- A model risk governance program that defines roles and responsibilities, including the authority to restrict model usage, provides policies and guidance, monitors compliance, and reports regularly to the Board on the overall degree of model risk across the corporation;
- A model development process that focuses on sound design and computational accuracy, and includes activities designed to test for robustness, stability, and sensitivity to assumptions; and
- An independent model validation function designed to verify that models are conceptually sound, computationally accurate, are performing as expected, and are in line with their design objectives.

**Governance**

Models used in the regulatory capital calculation can only be deployed for use after undergoing a model validation by ERM's Model Risk Management and receiving the result on the validation that allows for use.

ERM's Model Risk Management group is responsible for defining the corporate-wide model risk governance framework, and maintains policies that achieve the framework's objectives. The team is responsible for overall model risk governance capabilities, with particular emphasis in the areas of model validation, model risk reporting, model performance monitoring, tracking of new model development status, and committee-level review and challenge.

MRC, which is composed of senior staff with technical expertise, reports to MRAC, and provides guidance and oversight to the Model Risk Management function.

**Model Development and Usage**

Models are developed under standards governing data sourcing, methodology selection and model integrity testing. Model development includes a statement of purpose to align development with intended use. It also includes a comparison of alternative approaches to promote a sound modeling approach.

Model developers conduct an assessment of data quality and relevance. The development teams conduct a variety of tests of the accuracy, robustness and stability of each model.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Model owners submit models to the Model Validation Group for validation on a regular basis, as per existing policy.

### **Model Validation**

MVG is part of Model Risk Management within ERM and performs model validations. MVG is independent, as contemplated by applicable bank regulatory requirements, of both the developers and users of the models. MVG validates models through a review process that assesses the appropriateness, accuracy, and suitability of data inputs, methodologies, assumptions, and processing code. Model validation also encompasses an assessment of model performance, sensitivity, and robustness, as well as a model's potential limitations given its particular assumptions or deficiencies. Based on the results of its review, MVG issues a model use decision and may require remedial actions and compensating controls on model use. MVG also maintains a model risk-rating system, which assigns a risk rating to each model based on an assessment of a model's inherent and residual risks. These ratings aid in the understanding and reporting of model risk across the model portfolio, and enable the triaging of needs for remediation.

Although model validation is the primary method of subjecting models to independent review and challenge, in practice, a multi-step governance process provides the opportunity for challenge by multiple parties. First, MVG conducts model validation and issues a model use decision that may be accompanied by mandatory remedial actions and compensating controls. Second, these decisions are reviewed, challenged, and confirmed by the MRC. Finally, model use decisions, risk ratings, and overall levels of model risk are reported to and reviewed by MRAC. MRM also reports regularly on model risk issues to the Board.

### **Strategic Risk Management**

We define strategic risk as the current or prospective impact on earnings or capital arising from adverse business decisions, improper implementation of strategic initiatives, or lack of responsiveness to industry-wide changes. Strategic risks are influenced by changes in the competitive environment; decline in market performance or changes in our business activities; and the potential secondary impacts of reputational risks, not already captured as market, interest rate, credit, operational, model or liquidity risks. We incorporate strategic risk into our assessment of our business plans and risk and capital management processes. Active management of strategic risk is an integral component of all aspects of our business.

Separating the effects of a potential material adverse event into operational and strategic risk is

sometimes difficult. For instance, the direct financial impact of an unfavorable event in the form of fines or penalties would be classified as an operational risk loss, while the impact on our reputation and consequently the potential loss of clients and corresponding decline in revenue would be classified as a strategic risk loss. An additional example of strategic risk is the integration of a major acquisition. Failure to successfully integrate the operations of an acquired business, and the resultant inability to retain clients and the associated revenue, would be classified as a loss due to strategic risk.

Strategic risk is managed with a long-term focus. Techniques for its assessment and management include the development of business plans, which are subject to robust review and challenge from senior management and the Board of Directors, as well as a formal review and approval process for all new business and product proposals. The potential impact of the various elements of strategic risk is difficult to quantify with any degree of precision. We use a combination of historical earnings volatility, scenario analysis, stress-testing and management judgment to help assess the potential effect on State Street attributable to strategic risk. Management and control of strategic risks are generally the responsibility of the business units, with oversight from the control functions, as part of their overall strategic planning and internal risk management processes.

### **Capital**

Managing our capital involves evaluating whether our actual and projected levels of capital are commensurate with our risk profile, are in compliance with all applicable regulatory requirements, and are sufficient to provide us with the financial flexibility to undertake future strategic business initiatives. We assess capital adequacy based on relevant regulatory capital requirements, as well as our own internal capital goals, targets and other relevant metrics.

### **Framework**

Our objective with respect to management of our capital is to maintain a strong capital base in order to provide financial flexibility for our business needs, including funding corporate growth and supporting clients' cash management needs, and to provide protection against loss to depositors and creditors. We strive to maintain an appropriate level of capital, commensurate with our risk profile, on which an attractive return to shareholders is expected to be realized over both the short and long term, while protecting our obligations to depositors and creditors and complying with regulatory capital requirements.

Our capital management focuses on our risk exposures, the regulatory requirements applicable to us with respect to multiple capital measures, the

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

evaluations and resulting credit ratings of the major independent rating agencies, our return on capital at both the consolidated and line-of-business level, and our capital position relative to our peers.

Assessment of our overall capital adequacy includes the comparison of capital sources with capital uses, as well as the consideration of the quality and quantity of the various components of capital. The assessment seeks to determine the optimal level of capital and composition of capital instruments to satisfy all constituents of capital, with the lowest overall cost to shareholders. Other factors considered in our assessment of capital adequacy are strategic and contingency planning, stress testing and planned capital actions.

### **Capital Adequacy Process**

Our primary federal banking regulator is the Federal Reserve. Both State Street and State Street Bank are subject to the minimum regulatory capital requirements established by the Federal Reserve and defined in FDICIA. State Street Bank must exceed the regulatory capital thresholds for "well capitalized" in order for our Parent Company to maintain its status as a financial holding company. Accordingly, one of our primary goals with respect to capital management is to exceed all applicable minimum regulatory capital requirements and to be "well-capitalized" under the PCA guidelines established by the FDIC. Our capital management activities are conducted as part of our corporate-wide CAP and associated Capital Policy and guidelines.

We consider capital adequacy to be a key element of our financial well-being, which affects our ability to attract and maintain client relationships; operate effectively in the global capital markets; and satisfy regulatory, security holder and shareholder needs. Capital is one of several elements that affect our credit ratings and the ratings of our principal subsidiaries.

In conformity with our Capital Policy and guidelines, we strive to achieve and maintain specific internal capital levels, not just at a point in time, but over time and during periods of stress, to account for changes in our strategic direction, evolving economic conditions, and financial and market volatility. We have developed and implemented a corporate-wide CAP to assess our overall capital in relation to our risk profile and to provide a comprehensive strategy for maintaining appropriate capital levels. The CAP considers material risks under multiple scenarios, with an emphasis on stress scenarios, and encompasses existing processes and systems used to measure our capital adequacy.

### **Capital Contingency Planning**

Contingency planning is an integral component of capital management. The objective of contingency

planning is to monitor current and forecast levels of select capital, liquidity and other measures that serve as early indicators of a potentially adverse capital or liquidity adequacy situation. These measures are one of the inputs used to set our internal capital adequacy level. We review these measures annually for appropriateness and relevance in relation to our financial budget and capital plan.

### **Stress Testing**

We administer a robust State Street-wide stress-testing program that executes multiple stress tests each year to assess the institution's capital adequacy and/or future performance under adverse conditions. Our stress testing program is structured around what we determine to be the key risks incurred by State Street, as assessed through a recurring material risk identification process. The material risk identification process represents a bottom-up approach to identifying the institution's most significant risk exposures across all on- and off-balance sheet risk-taking activities, including credit, market, liquidity, interest rate, operational, fiduciary, business, reputation, and regulatory risks. These key risks serve as an organizing principle for much of our risk management framework, as well as reporting, including the "risk dashboard" provided to the Board. Over the past few years, stress scenarios have included a deep recession in the U.S., a break-up of the Eurozone, a severe recession in China and an oil shock precipitated by turmoil in the Middle East/North Africa region.

In connection with the focus on our key risks, each stress test incorporates idiosyncratic loss events tailored to State Street's unique risk profile and business activities. Due to the nature of our business model and our consolidated statement of condition, our risks differ from those of a traditional commercial bank.

The Federal Reserve requires bank holding companies with total consolidated assets of \$50 billion or more, which includes State Street, to submit a capital plan on an annual basis. The Federal Reserve uses its annual CCAR process, which incorporates hypothetical financial and economic stress scenarios, to review those capital plans and assess whether banking organizations have capital planning processes that account for idiosyncratic risks and provide for sufficient capital to continue operations throughout times of economic and financial stress. As part of its CCAR process, the Federal Reserve assesses each organization's capital adequacy, capital planning process, and plans to distribute capital, such as dividend payments or stock purchase programs. Management and Board risk committees review, challenge, and approve CCAR results and assumptions before submission to

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

the Federal Reserve.

Through the evaluation of State Street's capital adequacy and/or future performance under adverse conditions, the stress testing processes provide important insights for capital planning, risk management, and strategic decision-making at State Street.

### **Governance**

In order to support integrated decision making, we have identified three management elements to aid in the compatibility and coordination of our CAP:

- Risk Management - identification, measurement, monitoring and forecasting of different types of risk and their combined impact on capital adequacy;
- Capital Management - determination of optimal capital levels; and
- Business Management - strategic planning, budgeting, forecasting, and performance management.

We have a hierarchical structure supporting appropriate committee review of relevant risk and capital information. The ongoing responsibility for capital management rests with our Treasurer. The Capital Planning group within Global Treasury is responsible for the Capital Policy and guidelines, development of the Capital Plan, the management of global capital, capital optimization, and business unit capital management.

MRAC provides oversight of our capital management, our capital adequacy, our internal targets and the expectations of the major independent credit rating agencies. In addition, MRAC approves our balance sheet strategy and related activities. The Board's RC assists the Board in fulfilling its oversight responsibilities related to the assessment and management of risk and capital. Our Capital Policy is reviewed and approved annually by the Board's RC.

### **Global Systemically Important Bank**

We are one among a group of 30 institutions worldwide that have been identified by the FSB and the BCBS as G-SIBs. Our designation as a G-SIB requires us to maintain an additional capital buffer above the Basel III final rule minimum CET1 capital ratio of 4.5%, based on a number of factors, as evaluated by banking regulators.

We and our depository institution subsidiaries are subject to the current Basel III minimum risk-based capital and leverage ratio guidelines. The Basel III final rule incorporates several multi-year transition provisions for capital components and minimum ratio requirements for CET1 capital, tier 1 capital and total capital.

Additional information about G-SIBs is provided under "Regulatory Capital Adequacy and Liquidity Standards" in "Supervision and Regulation" under Item 1, Business, of this Form 10-K.

### **Regulatory Capital**

We and State Street Bank, as advanced approaches banking organizations, are subject to the current Basel III minimum risk-based capital and leverage ratio guidelines. The Basel III final rule incorporates several multi-year transition provisions for capital components and minimum ratio requirements for CET1 capital, tier 1 capital and total capital. The transition period started in January 2014 and will be completed by January 1, 2019, which is concurrent with the full implementation of the Basel III final rule in the U.S.

Among other things, the Basel III final rule introduced a minimum CET1 risk-based capital ratio of 4.5% and raises the minimum tier 1 risk-based capital ratio from 4% to 6%. In addition, for advanced approaches banking organizations such as State Street, the Basel III final rule imposes a minimum supplementary tier 1 leverage ratio of 3%, the numerator of which is tier 1 capital and the denominator of which includes both on-balance sheet assets and certain off-balance sheet exposures.

The Basel III final rule also introduced a capital conservation buffer and a countercyclical capital buffer that add to the minimum risk-based capital ratios. Specifically, the final rule limits a banking organization's ability to make capital distributions and discretionary bonus payments to executive officers if it fails to maintain a CET1 capital conservation buffer of more than 2.5% of total risk-weighted assets and, if deployed during periods of excessive credit growth, a CET1 countercyclical capital buffer of up to 2.5% of total risk-weighted assets, above each of the minimum CET1, and tier 1 and total risk-based capital ratios. The countercyclical capital buffer is currently set at zero by U.S. banking regulators.

To maintain the status of our Parent Company as a financial holding company, we and our insured depository institution subsidiaries are required to be "well-capitalized" by maintaining capital ratios above the minimum requirements. Effective on January 1, 2015, the "well-capitalized" standard for our banking subsidiaries was revised to reflect the higher capital requirements in the Basel III final rule.

In addition to introducing new capital ratios and buffers, the Basel III final rule revises the eligibility criteria for regulatory capital instruments and provides for the phase-out of existing capital instruments that do not satisfy the new criteria. For example, existing trust preferred capital securities were phased out from tier 1 capital over a two-year period that ended on January 1, 2016, and subsequently, the

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

qualification of these securities as tier 2 capital will be phased out over a multi-year transition period beginning on January 1, 2016 and ending on January 1, 2022. As of December 31, 2016, we retired the trusts related to our trust preferred securities and the underlying indentures do not qualify as tier 2 regulatory capital.

Under the Basel III final rule, certain new items are deducted from CET1 capital and certain regulatory capital deductions were modified as compared to the previously applicable capital regulations. Among other things, the final rule requires significant investments in the common stock of unconsolidated financial institutions, as defined, and certain deferred tax assets that exceed specified individual and aggregate thresholds to be deducted from CET1 capital. As an advanced approaches

banking organization, after-tax unrealized gains and losses on AFS investment securities flow through to and affect State Street's and State Street Bank's CET1 capital, subject to a phase-in schedule.

We are required to use the advanced approaches framework as provided in the Basel III final rule to determine our risk-based capital requirements. The Dodd-Frank Act applies a "capital floor" to advanced approaches banking organizations, such as State Street and State Street Bank. We are subject to the more stringent of the risk-based capital ratios calculated under the standardized approach and those calculated under the advanced approaches in the assessment of our capital adequacy under the PCA framework.

The following table sets forth the transition to full implementation and the minimum risk-based capital ratio requirements under the Basel III final rule.

**TABLE 40: BASEL III FINAL RULES TRANSITION ARRANGEMENTS AND MINIMUM RISK-BASED CAPITAL RATIOS<sup>(1)</sup>**

	2015	2016	2017	2018	2019
Capital conservation buffer (CET1)	—%	0.625%	1.250%	1.875%	2.500%
G-SIB surcharge (CET1) <sup>(2)</sup>	—	0.375	0.750	1.125	1.500
Minimum CET1 <sup>(3)</sup>	4.500	5.500	6.500	7.500	8.500
Minimum tier 1 capital <sup>(3)</sup>	6.000	7.000	8.000	9.000	10.000
Minimum total capital <sup>(3)</sup>	8.000	9.000	10.000	11.000	12.000

<sup>(1)</sup> Minimum ratios shown above do not reflect the countercyclical buffer, currently set at zero by U.S. banking regulators.

<sup>(2)</sup> As part of the G-SIB Surcharge final rule, the Federal Reserve published estimated G-SIB surcharges for the eight U.S. G-SIBs based on relevant data from 2012-2014 and the estimated resulting G-SIB surcharge for State Street is 1.5%. Including the 1.5% surcharge, State Street's minimum risk-based capital ratio requirements, as of January 1, 2019 would be 8.5% for CET1, 10.0% for tier 1 capital and 12.0% for total capital.

<sup>(3)</sup> Minimum CET1 capital, minimum tier 1 capital and minimum total capital presented include the transitional capital conservation buffer as well as the estimated transitional G-SIB surcharge being phased-in beginning January 1, 2016 through January 1, 2019 based on an estimated 1.5% surcharge in all periods.

The specific calculation of State Street's and State Street Bank's risk-based capital ratios will change as the provisions of the Basel III final rule related to the numerator (capital) and denominator (risk-weighted assets) are phased in, and as our risk-weighted assets calculated using the advanced approaches change due to potential changes in methodology. These ongoing methodological changes will result in differences in our reported capital ratios from one reporting period to the next that are independent of applicable changes to our capital base, our asset composition, our off-balance sheet exposures or our risk profile.

The following table presents the regulatory capital structure and related regulatory capital ratios for State Street and State Street Bank as of the dates indicated. We are subject to the more stringent of the risk-based capital ratios calculated under the standardized approach and those calculated under the advanced approaches in the assessment of our capital adequacy under applicable bank regulatory standards.

As a result of changes in the methodologies used to calculate our regulatory capital ratios from period to period, as the provisions of the Basel III final rule are phased in, the ratios presented in the table for each period are not directly comparable. Refer to the footnotes following the table.

<b>Capital Ratios<sup>(1)</sup>:</b>										
CET1 capital	6.5%	5.5%	12.3%	11.9%	11.7%	11.6%	17.2%	16.6%	16.6%	16.4%
Tier 1 capital	8.0	7.0	15.5	15.0	14.8	14.7	17.2	16.6	16.6	16.4
Total capital	10.0	9.0	16.5	16.0	16.0	16.0	18.2	17.6	17.8	17.7
Tier 1 leverage	4.0	4.0	7.3	7.3	6.5	6.5	8.0	8.0	7.1	7.1

<sup>(1)</sup> CET1 capital, tier 1 capital and total capital ratios as of December 31, 2017 and December 31, 2016 were calculated in conformity with the advanced approaches provisions of the Basel III final rule. Tier 1 leverage ratio as of December 31, 2017 and December 31, 2016 were calculated in conformity with the Basel III final rule.

<sup>(2)</sup> CET1 capital, tier 1 capital and total capital ratios as of December 31, 2017 and December 31, 2016 were calculated in conformity with the standardized approach provisions of the Basel III final rule. Tier 1 leverage ratio as of December 31, 2017 and December 31, 2016 were calculated in conformity with the Basel III final rule.

<sup>(3)</sup> Amounts for State Street and State Street Bank as of December 31, 2017 consisted of goodwill, net of associated deferred tax liabilities, and 80% of other intangible assets, net of associated deferred tax liabilities. Amounts for State Street and State Street Bank as of December 31, 2016 consisted of goodwill, net of deferred tax liabilities and 60% of other intangible assets, net of associated deferred tax liabilities. Intangible assets, net of associated deferred tax liabilities is phased in as a deduction from capital, in conformity with the Basel III final rule.

<sup>(4)</sup> Under the current advanced approaches rules and regulatory guidance concerning operational risk models, RWA attributable to operational risk can vary substantially from period-to-period, without direct correlation to the effects of a particular loss event on our results of operations and financial condition and impacting dates and periods that may differ from the dates and periods as of and during which the loss event is reflected in our financial statements, with the timing and categorization dependent on the processes for model updates and, if applicable, model revalidation and regulatory review and related supervisory processes. An individual loss event can have a significant effect on the output of our operational risk RWA under the advanced approaches depending on the severity of the loss event and its categorization among the seven Basel-defined UOMs.

<sup>(5)</sup> Market risk risk-weighted assets reported in conformity with the Basel III advanced approaches included a CVA which reflected the risk of potential fair value adjustments for credit risk reflected in our valuation of over-the-counter derivative contracts. The CVA was not provided for in the final market risk capital rule; however, it was required by the advanced approaches provisions of the Basel III final rule. We used a simple CVA approach in conformity with the Basel III advanced approaches.

<sup>(6)</sup> Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2017. See Table 36: Basel III Final Rules Transition Arrangements and Minimum Risk Based Capital Ratios.

<sup>(7)</sup> Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2016. See Table 36: Basel III Final Rules Transition Arrangements and Minimum Risk Based Capital Ratios.

<sup>NA</sup> Not applicable

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

As of January 1, 2015, we used the standardized provisions of the Basel III final rule in addition to the advanced approaches provisions which were previously implemented in the second quarter of 2014, and the lower of our regulatory capital ratios calculated under the advanced approaches and those ratios calculated under the standardized approach are applied in the assessment of our capital adequacy for regulatory capital purposes. Beginning in the second quarter of 2014, until January 1, 2015, we used the advanced approaches provisions in the Basel III final rule, and transitional provisions of the Basel III final rule, and the lower of our regulatory capital ratios calculated under the advanced approaches and those ratios calculated under the transitional provisions were applied in the assessment of our capital adequacy for regulatory capital purposes.

Our CET1 capital increased \$580 million as of December 31, 2017 compared to December 31, 2016 primarily due to net income of \$2.18 billion and an increase in accumulated other comprehensive income of \$964 million. The increases in CET1 capital were partially offset by capital distributions of \$2.23 billion from common stock purchases and dividends, the impact from the 2017 phase-in of the deduction of intangibles (80% in 2017 compared to 60% in 2016), and the impact from the TCJA in 2017. The TCJA resulted in one-time estimated net impact to capital attributable to a change in deferred tax liability on capital deductions of \$356 million which consisted of the \$270 million impact to net income and an additional \$86 million related to a net change in deductible deferred taxes. Actual effects of the TCJA may differ from these estimates, among other things, due to additional tax and regulatory guidance and change in State Street assumptions and interpretations.

In the same comparative period, our tier 1 capital increased \$665 million, due to the increase in CET1 capital. Total capital increased \$458 million under advanced approaches and increased \$468 million under standardized approach due to the changes to tier 1 capital. State Street Bank's tier 1 capital increased \$726 million, and total capital increased \$515 million and \$525 million under the advanced and standardized approaches, respectively, as of December 31, 2017, compared to December 31, 2016. The increase is a result of higher CET1.

The table below presents a roll-forward of CET1 capital, tier 1 capital and total capital for the years ended December 31, 2017 and 2016.

**TABLE 42: CAPITAL ROLL-FORWARD**

(In millions)	State Street			
	Basel III Advanced Approaches December 31, 2017	Basel III Standardized Approach December 31, 2017	Basel III Advanced Approaches December 31, 2016	Basel III Standardized Approach December 31, 2016
<b>CET1 capital:</b>				
CET1 capital balance, beginning of period	\$ 11,624	\$ 11,624	\$ 12,433	\$ 12,433

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

The following table presents a roll-forward of the Basel III advanced approaches risk-weighted assets for the years ended December 31, 2017 and 2016.

**TABLE 43: ADVANCED APPROACHES RWA ROLL-FORWARD**

(In millions)	State Street	
	December 31, 2017	December 31, 2016
Total risk-weighted assets, beginning of period	\$ 99,301	\$ 99,552
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities-wholesale	2,914	(1,027)
Net increase (decrease) in loans and leases	30	575
Net increase (decrease) in securitization exposures	(683)	(3,246)
Net increase (decrease) in repo-style transaction exposures	440	606
Net increase (decrease) in OTC derivatives exposures	(1,082)	1,812
Net increase (decrease) in all other <sup>(1)</sup>	(2,543)	447
Net increase (decrease) in credit risk-weighted assets	(924)	(833)
Net increase (decrease) in credit valuation adjustment	(47)	512
Net increase (decrease) in market risk-weighted assets	(417)	(627)
Net increase (decrease) in operational risk-weighted assets	1,243	697
Total risk-weighted assets, end of period	\$ 99,156	\$ 99,301

<sup>(1)</sup> Includes assets not in a definable category, cleared transactions, non-material portfolio, other wholesale, cash and due from, and interest-bearing deposits with banks, equity exposures, and 6% credit risk supervisory charge.

As of December 31, 2017, total advanced approaches risk-weighted assets decreased \$145 million compared to December 31, 2016, mainly due to a decrease in credit risk and market risk, partially offset by an increase in operational risk. The decrease in credit risk was mainly due to lower volatility in our FX derivative portfolio leading to a lower positive marked-to-market, a decrease in cash and redemptions of equity investments, offset by an increase in the investment portfolio driven by purchases of foreign sovereign bonds. Market risk reduction of \$417 million resulted from a lower stressed VaR. The decrease in credit valuation adjustment was also driven by the lower marked-to-market in our FX derivative portfolios. Operational risk increased approximately \$1.24 billion due to a recalibration of the Operational Risk Advanced Measurement Approach Capital model.

As of December 31, 2016, total advanced approaches risk-weighted assets decreased \$251 million compared to December 31, 2015, mainly due to a decrease in credit risk and market risk, partially offset by an increase in operational risk and credit valuation adjustment. The decrease in credit risk was mainly due to a decrease in securitization exposures

as a result of sell-offs and maturities as well as calls of agency debt securities within our wholesale investment portfolio, partially offset by an increase in derivatives exposure from marked-to-market FX contracts stemming from a stronger dollar and an increase in securities finance agency lending. The market risk decrease was a result of reduced end of day positions in FX and interest rate risk. Operational risk increased approximately \$700 million mainly due to an increase in loss event frequency. The increase in credit valuation adjustment was driven by an increase in the market valuation FX contracts.

The following table presents a roll-forward of the Basel III standardized approach risk-weighted assets for the years ended December 31, 2017 and 2016.

**TABLE 44: STANDARDIZED APPROACH RWA ROLL-FORWARD**

(In millions)	State Street	
	December 31, 2017	December 31, 2016
Total estimated risk-weighted assets, beginning of period <sup>(1)</sup>	\$ 99,876	\$ 95,883
Changes in credit risk-weighted assets:		
Net increase (decrease) in investment securities-wholesale	1,729	(1,471)
Net increase (decrease) in loans and leases	2,589	998
Net increase (decrease) in securitization exposures	(690)	(3,144)
Net increase (decrease) in repo-style transaction exposures	2,058	4,994
Net increase (decrease) in OTC derivatives exposures	(1,709)	3,462
Net increase (decrease) in all other <sup>(2)</sup>	(753)	(229)
Net increase (decrease) in credit risk-weighted assets	3,224	4,610
Net increase (decrease) in market risk-weighted assets	(417)	(627)
Total risk-weighted assets, end of period	\$ 102,683	\$ 99,876

<sup>(1)</sup> Standardized approach risk-weighted assets as of the periods noted above were calculated using State Street's estimates, based on our then current interpretation of the Basel III final rule.

<sup>(2)</sup> Includes assets not in a definable category, cleared transactions, other wholesale, cash and due from, and interest-bearing deposits with banks and equity exposures.

As of December 31, 2017, total standardized approach risk-weighted assets increased \$2.81 billion compared to December 31, 2016, primarily the result of an increase in credit risk partially offset by a decrease in market risk resulting from a lower stressed VaR. The main drivers of the credit risk change were an increase in loans, securities finance portfolio due to a mix shift to equities, corporate bonds and sovereigns, and an increase in the investment portfolio due to purchases, offset by a decrease in FX contracts due to a shift to counterparties with a lower weighted-average risk-weight.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As of December 31, 2016, total standardized approach risk-weighted assets increased \$3.98 billion compared to December 31, 2015, primarily the result of an increase in securities finance agency lending, an increase in market values of FX contracts, partially offset by a decrease in securitization exposures, wholesale investments and market risk. The decrease in securitization was due to sell-offs and maturities while the decrease in wholesale investments was due to calls of agency debt securities. Market risk reduction resulted from a lower stressed VaR.

The regulatory capital ratios as of December 31, 2017, presented in Table 41: Regulatory Capital Structure and Related Regulatory Capital Ratios, are calculated under the standardized approach and advanced approaches in conformity with the Basel III final rule. The advanced approaches-based ratios (actual and estimated pro forma) reflect calculations and determinations with respect to our capital and related matters as of December 31, 2017, based on State Street and external data, quantitative formulae, statistical models, historical correlations and assumptions, collectively referred to as "advanced systems," in effect and used by State Street for those purposes as of the time we first reported such ratios in a quarterly report on the Form 10-Q or an annual report on Form 10-K. Significant components of these advanced systems involve the exercise of judgment by us and our regulators, and our advanced systems may not, individually or collectively, precisely represent or calculate the scenarios, circumstances, outputs or other results for which they are designed or intended.

Our advanced systems are subject to update and periodic revalidation in response to changes in our business activities and our historical experiences, forces and events experienced by the market broadly or by individual financial institutions, changes in regulations and regulatory interpretations and other factors, and are also subject to continuing regulatory review and approval. For example, a significant operational loss experienced by another financial institution, even if we do not experience a related loss, could result in a material change in the output of our advanced systems and a corresponding material change in our risk exposures, our total risk-weighted assets and our capital ratios compared to prior periods. An operational loss that we experience could also result in a material change in our capital requirements for operational risk under the advanced approaches, depending on the severity of the loss event, its characterization among the seven Basel-defined UOMs, and the stability of the distributional approach for a particular UOM, and without direct correlation to the effects of the loss event, or the timing of such effects, on our results of operations.

Due to the influence of changes in these advanced systems, whether resulting from changes in data inputs, regulation or regulatory supervision or interpretation, State Street-specific or market activities or experiences or other updates or factors, we expect that our advanced systems and our capital ratios calculated in conformity with the Basel III final rule will change and may be volatile over time, and that those latter changes or volatility could be material as calculated and measured from period to period. Models implemented under the Basel III final rule, particularly those implementing the advanced approaches, remain subject to regulatory review and approval. The full effects of the Basel III final rule on State Street and State Street Bank are therefore subject to further evaluation and also to further regulatory guidance, action or rule-making.

<sup>(2)</sup> CET1 ratios were calculated in conformity with the provisions of the Basel III final rule; refer to Table 41: Regulatory Capital Structure and Related Regulatory Capital Ratios.

NA Not applicable

Fully phased-in pro-forma estimates of common shareholders' equity include 100% of AOCI, including AOCI attributable to AFS securities, cash flow hedges and defined benefit pension plans. Fully phased-in pro-forma estimates of CET1 capital reflect 100% of applicable deductions, including but not limited to, intangible assets net of deferred tax liabilities. Fully phased-in tier 1 capital reflects the transition of trust preferred capital securities from tier 1 capital to tier 2 capital. For both Basel III advanced and standardized approaches, fully phased-in pro-forma estimates of risk-weighted assets reflect the exclusion of intangible assets, offset by additions related to non-significant equity exposures and deferred tax assets related to temporary differences.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

**Supplementary Leverage Ratio**

In 2014, U.S. banking regulators issued final rules implementing an SLR, for certain bank holding companies, like State Street, and their insured depository institution subsidiaries, like State Street Bank, which we refer to as the SLR final rule. Upon implementation, the SLR final rule requires that, as of January 1, 2018, (i) State Street Bank maintain an SLR of at least 6% to be well capitalized under the U.S. banking regulators' PCA framework and (ii) State Street maintain an SLR of at least 5% to avoid

limitations on capital distributions and discretionary bonus payments. In addition to the SLR, State Street is subject to a minimum tier 1 leverage ratio of 4%, which differs from the SLR primarily in that the denominator of the tier 1 leverage ratio is only a quarterly average of on-balance sheet assets and does not include any off-balance sheet exposures. Beginning with reporting for March 31, 2015, State Street was required to include SLR disclosures, calculated on a transitional basis, with its other Basel disclosures.

Series G	5,352	1.32	27	3,626	0.90	18
Total			\$ 182			\$ 173

In February 2018, we declared dividends on our Series C, D, E, F and G preferred stock of approximately \$1,313, \$1,475, \$1,500, \$2,625 and \$1,338, respectively, per share, or approximately \$0.33, \$0.37, \$0.38, \$26.25, and \$0.33, respectively, per depository share. These dividends total approximately \$6 million, \$11 million, \$11 million, \$20 million and \$7 million on our Series C, D, E, F and G preferred stock, respectively, which will be paid in March 2018.

**Common Stock**

In June 2017, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2018 (the 2017 Program).

In June 2016, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2017 (the 2016 Program). The table below presents the activity under both the 2017 Program and 2016 Program during the year ended December 31, 2017:

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION  
AND RESULTS OF OPERATIONS**

Common Stock	\$ 1.60	\$ 596	\$ 1.44	\$ 559

Federal and state banking regulations place certain restrictions on dividends paid by subsidiary banks to the parent holding company. In addition, banking regulators have the authority to prohibit bank holding companies from paying dividends. For information concerning limitations on dividends from our subsidiary banks, refer to "Related Stockholder Matters" included under Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, and to Note 15 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K. Our common stock and preferred stock dividends, including the declaration, timing and amount thereof, are subject to consideration and approval by the Board at the relevant times.

Stock purchases may be made using various types of mechanisms, including open market purchases, accelerated share repurchases or transactions off market, and may be made under Rule 10b5-1 trading programs. The timing of stock purchases, types of transactions and number of shares purchased will depend on several factors, including, market conditions and State Street's capital positions, its financial performance and investment opportunities. The common stock purchase program does not have specific price targets and may be suspended at any time.

**OFF-BALANCE SHEET ARRANGEMENTS**

On behalf of clients enrolled in our securities lending program, we lend securities to banks, broker/dealers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. Though these transactions are collateralized, the substantial volume of these activities necessitates detailed credit-based underwriting and monitoring processes. The aggregate amount of indemnified securities on loan totaled \$381.82 billion as of December 31, 2017, compared to \$360.45 billion as of December 31, 2016. We require the borrower to provide collateral in an amount in excess of 100% of the fair market value of the securities borrowed. We hold the collateral received in connection with these securities lending services as agent, and the collateral is not recorded in our consolidated statement of condition. We revalue the securities on loan and the collateral daily to determine if additional collateral is necessary or if excess collateral is required to be returned to the borrower. We held, as agent, cash and securities totaling \$400.83 billion and \$377.92 billion as collateral for indemnified securities on loan as of December 31, 2017 and December 31, 2016, respectively.

The cash collateral held by us as agent is invested on behalf of our clients. In certain cases, the cash collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the counterparty to the indemnified repurchase agreement to provide collateral in an amount in excess of 100% of the amount of the repurchase agreement. In our role as agent, the indemnified repurchase agreements and the related collateral held by us are not recorded in our consolidated statement of condition. Of the collateral of \$400.83

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

billion and \$377.92 billion, referenced above, \$61.27 billion and \$60.00 billion was invested in indemnified repurchase agreements as of December 31, 2017 and December 31, 2016, respectively. We or our agents held \$65.27 billion and \$63.96 billion as collateral for indemnified investments in repurchase agreements as of December 31, 2017 and December 31, 2016, respectively.

Additional information about our securities finance activities and other off-balance sheet arrangements is provided in Notes 10, 12 and 14 to the consolidated financial statements included in this Form 10-K.

### SIGNIFICANT ACCOUNTING ESTIMATES

Our consolidated financial statements are prepared in conformity with U.S. GAAP, and we apply accounting policies that affect the determination of amounts reported in the consolidated financial statements. Additional information on our significant accounting policies, including references to applicable footnotes, is provided in Note 1 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

Certain of our accounting policies, by their nature, require management to make judgments, involving significant estimates and assumptions, about the effects of matters that are inherently uncertain. These estimates and assumptions are based on information available as of the date of the consolidated financial statements, and changes in this information over time could materially affect the amounts of assets, liabilities, equity, revenue and expenses reported in subsequent consolidated financial statements.

Based on the sensitivity of reported financial statement amounts to the underlying estimates and assumptions, the more significant accounting policies applied by State Street have been identified by management as those associated with recurring fair value measurements, OTTI of investment securities, impairment of goodwill and other intangible assets, and contingencies. These accounting policies require the most subjective or complex judgments, and underlying estimates and assumptions could be most subject to revision as new information becomes available. An understanding of the judgments, estimates and assumptions underlying these accounting policies is essential in order to understand our reported consolidated results of operations and financial condition.

The following is a discussion of the above-mentioned significant accounting estimates. Management has discussed these significant accounting estimates with the E&A Committee of the Board.

### *Fair Value Measurements*

We carry certain of our financial assets and liabilities at fair value in our consolidated financial statements on a recurring basis, including trading account assets, AFS investment securities and derivative instruments.

Changes in the fair value of these financial assets and liabilities are recorded either as components of our consolidated statement of income, or as components of other comprehensive income within shareholders' equity in our consolidated statement of condition. In addition to those financial assets and liabilities that we carry at fair value in our consolidated financial statements on a recurring basis, we estimate the fair values of other financial assets and liabilities that we carry at amortized cost in our consolidated statement of condition, and we disclose these fair value estimates in the notes to our consolidated financial statements. We estimate the fair values of these financial assets and liabilities using the definition of fair value described below. Additional information with respect to the assets and liabilities carried by us at fair value on a recurring basis is provided in Note 2 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

U.S. GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for an asset or liability in an orderly transaction between market participants on the measurement date. When we measure fair value for our financial assets and liabilities, we consider the principal or the most advantageous market in which we would transact; we also consider assumptions that market participants would use when pricing the asset or liability. When possible, we look to active and observable markets to measure the fair value of identical, or similar, financial assets and liabilities. When identical financial assets and liabilities are not traded in active markets, we look to market-observable data for similar assets and liabilities. In some instances, certain assets and liabilities are not actively traded in observable markets; as a result, we use alternate valuation techniques to measure their fair value.

We categorize the financial assets and liabilities that we carry at fair value in our consolidated statement of condition on a recurring basis based on U.S. GAAP's prescribed three-level valuation hierarchy. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to valuation methods using significant unobservable inputs (level 3).

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As of December 31, 2017, including the effect of netting, we categorized approximately 1% of our financial assets carried at fair value in level 1, approximately 96% of our financial assets carried at fair value in level 2, and approximately 3% of our financial assets carried at fair value in level 3 of the fair value hierarchy. As of December 31, 2016, including the effect of netting, we categorized approximately 6% of our financial assets carried at fair value in level 1, approximately 92% of our financial assets carried at fair value in level 2, and approximately 2% of our financial assets carried at fair value in level 3 of the fair value hierarchy.

As of December 31, 2017, on the same basis, we categorized less than 1% of our financial liabilities carried at fair value in level 1, approximately 99% of our financial liabilities carried at fair value in level 2, and less than 1% of our financial liabilities carried at fair value in level 3 of the fair value hierarchy. As of December 31, 2016, on the same basis, we categorized none of our financial liabilities carried at fair value in level 1, approximately 100% of our financial liabilities carried at fair value in level 2, and less than 1% of our financial liabilities carried at fair value in level 3 of the fair value hierarchy.

The assets categorized in level 1 were primarily U.S. Treasury obligations and trading account assets. Fair value for these securities was measured by management using unadjusted quoted prices in active markets for identical securities.

The assets categorized in level 2 were primarily AFS investment securities and derivative instruments. Fair value for the investment securities was measured by management primarily using information obtained from independent third parties. Information obtained from third parties is subject to review by management as part of a validation process. Management utilizes a process to verify the information provided, including an understanding of underlying assumptions and the level of market-participant information used to support those assumptions. In addition, management compares significant assumptions used by third parties to available market information. Such information may include known trades or, to the extent that trading activity is limited, comparisons to market research information pertaining to credit expectations, execution prices and the timing of cash flows and, where information is available, back-testing.

The derivative instruments categorized in level 2 primarily comprised of foreign exchange and interest-rate contracts used in our trading activities, for which fair value was measured by management using discounted cash flow techniques, with inputs consisting of observable spot and forward points, as well as observable interest rate curves.

The substantial majority of our financial assets categorized in level 3 were asset-backed AFS securities. Level-3 assets also included foreign exchange derivative contracts. The aggregate fair value of our financial assets and liabilities categorized in level 3 as of December 31, 2017 increased approximately 57% compared to 2016, primarily the result of purchases of asset-backed and non-U.S. debt securities.

With respect to derivative instruments, we evaluated the impact on valuation of the credit risk of our counterparties and of our own credit. We considered such factors as the market-based probability of default by us and our counterparties, and our current and expected potential future net exposures by remaining maturities, in determining the appropriate measurements of fair value. Valuation adjustments associated with derivative instruments were not significant to our consolidated financial results in 2017, 2016 or 2015.

### ***Other-Than-Temporary Impairment of Investment Securities***

Our portfolio of fixed-income investment securities constitutes a significant portion of the assets carried in our consolidated statement of condition. U.S. GAAP requires the use of expected future cash flows to evaluate OTTI of these investment securities. The amount and timing of these expected future cash flows are significant estimates used in our evaluation of OTTI. An OTTI is triggered if the intent is to sell the security or the security will more likely than not have to be sold before the amortized cost basis is recovered. Additional information with respect to management's assessment of OTTI is provided in Note 3 to the consolidated financial statements included under Item 8, Financial Statements, of this Form 10-K.

Expectations of defaults and prepayments are the most significant assumptions underlying our estimates of future cash flows. In determining these estimates, management relies on relevant and reliable information, including but not limited to deal structure, including optional and mandatory calls, market interest-rate curves, industry standard asset-class-specific prepayment models, recent prepayment history, independent credit ratings, and recent actual and projected credit losses. Management considers this information based on its relevance and uses its best judgment in order to determine its assumptions for underlying cash-flow expectations and resulting estimates. Management reviews its underlying assumptions and develops expected future cash-flow estimates at least quarterly. Additional detail with respect to the sensitivity of these default and prepayment assumptions is provided under "Investment Securities" in "Financial

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Condition" of this Management's Discussion and Analysis.

### ***Impairment of Goodwill and Other Intangible Assets***

Goodwill represents the excess of the cost of an acquisition over the fair value of the net tangible and other intangible assets acquired at the acquisition date. Other intangible assets represent purchased long-lived intangible assets, primarily client relationships and core deposit intangible assets, that can be distinguished from goodwill because of contractual rights or because the asset can be exchanged on its own or in combination with a related contract, asset or liability. Goodwill is not amortized, while other intangible assets are amortized over their estimated useful lives.

Goodwill is ultimately supported by earnings and cash flows from our Investment Servicing and Investment Management lines of business. A decline in earnings as a result of a lack of growth, or our inability to deliver cost-effective services over sustained periods, could lead to a perceived impairment of goodwill, which would be evaluated and, if necessary, be recorded as a write-down of the reported amount of goodwill through a charge to other expenses in our consolidated statement of income.

Management reviews goodwill for impairment annually or more frequently if circumstances arise or events occur that indicate an impairment of the carrying amount may exist. We begin our review by first assessing qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If we conclude from the qualitative assessment of goodwill impairment that it is more likely than not that a reporting unit's fair value is greater than its carrying amount, quantitative tests are not required. However, if we determine it is more likely than not that a reporting unit's fair value is less than its carrying amount, then we complete a quantitative assessment to determine if there is goodwill impairment.

The quantitative assessment involves using a two-step process. First, we compare the aggregate fair value of the reporting unit to its carrying amount, including goodwill. If the fair value exceeds the carrying amount, no impairment exists. If the carrying amount of the reporting unit exceeds the fair value, then we compare the "implied" fair value of the reporting unit's goodwill to its carrying amount. If the carrying amount of the goodwill exceeds the implied fair value, then goodwill impairment is recognized by writing the goodwill down to the implied fair value. The implied fair value of the goodwill is determined by allocating the fair value of the reporting unit to all of the assets and liabilities of that unit, as if the unit had

been acquired in a business combination and the overall fair value of the unit was the purchase price.

To determine the aggregate fair value of the reporting unit being evaluated for goodwill impairment, we use one of two principal methodologies: a market approach, based on a comparison of the reporting unit to publicly-traded companies in similar lines of business; or an income approach, based on the value of the cash flows that the business can be expected to generate in the future.

Events that may indicate impairment include significant or adverse changes in the business, economic or political climate; an adverse action or assessment by a regulator; unanticipated competition; and a more-likely-than-not expectation that we will sell or otherwise dispose of a business to which the goodwill or other intangible assets relate. Additional information about goodwill and other intangible assets, including information by line of business, is provided in Note 5 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary, of this Form 10-K.

During the third quarter of 2017, we assessed goodwill for impairment using a qualitative assessment. The qualitative assessment required management to make judgments and to evaluate several factors, which included, but were not limited to, significant or adverse changes in the business, firm and industry events, economic or political climate; an adverse action or assessment by a regulator; unanticipated competition; and a more-likely-than-not expectation that we will sell or otherwise dispose of a business to which the goodwill or other intangible assets relate. Based on our evaluation of these factors, we determined that it was more likely than not that the fair value of each of the reporting units exceeded its respective carrying amount.

Additional information about goodwill and other intangible assets, including information by line of business, is provided in Note 5 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

Intangible assets are supported by the future cash flows that are directly associated with and expected to arise as a direct result of the use of the intangible asset, less any costs associated with the intangible asset's eventual disposition. We evaluate other intangible assets for impairment at the lowest level for which there are identifiable cash flows that are largely independent of the cash flows from other groups of assets using a two-step process. First, if the intangible asset's estimated future net undiscounted cash flows are greater than the carrying

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

value, there is no indication of impairment, but if the intangible asset's net undiscounted cash flows are less than its carrying value, there is an indication that the intangible asset is not recoverable and we proceed to the second step of the impairment test. In the second step, if the fair value of the intangible asset is below the carrying value, an impairment is recognized by writing the intangible asset down to its fair value. We evaluate intangible assets for impairment on an annual basis, or more frequently if circumstances arise that may indicate an impairment of the carrying amount.

Our evaluation of goodwill and other intangible assets indicated that no significant impairment occurred in 2017, 2016 or 2015. Goodwill and other intangible assets recorded in our consolidated statement of condition as of December 31, 2017 totaled approximately \$6.02 billion and \$1.61 billion, respectively, compared to \$5.81 billion and \$1.75 billion, respectively, as of December 31, 2016.

### **Contingencies**

The significant estimates and judgments related with establishing litigation reserves are discussed in Note 13 of the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

### **RECENT ACCOUNTING DEVELOPMENTS**

Information with respect to recent accounting developments is provided in Note 1 to the consolidated financial statements included under Item 8, Financial Statements and Supplementary Data, of this Form 10-K.

**ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The information provided under "Market Risk Management" in "Financial Condition" included under Item 7, Management's Discussion and Analysis, of this Form 10-K, is incorporated by reference herein.

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA**

Additional information about restrictions on the transfer of funds from State Street Bank to the Parent Company is provided under "Related Stockholder Matters" included under Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities, and under "Capital" in "Financial Condition" under Item 7, Management's Discussion and Analysis, of this Form 10-K.

## Report of Independent Registered Public Accounting Firm

The Shareholders and Board of Directors of  
State Street Corporation

### Opinion on the Financial Statements

We have audited the accompanying consolidated statements of condition of State Street Corporation (the "Corporation") as of December 31, 2017 and 2016, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2017, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Corporation at December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the Corporation's internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 26, 2018 expressed an unqualified opinion thereon.

### Basis for Opinion

These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on the Corporation's consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Ernst & Young LLP

We have served as the Corporation's auditor since 1972.

Boston, Massachusetts  
February 26, 2018

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 1. Summary of Significant Accounting Policies*****Basis of Presentation***

The accounting and financial reporting policies of State Street Corporation conform to U.S. GAAP. State Street Corporation, the Parent Company, is a financial holding company headquartered in Boston, Massachusetts. Unless otherwise indicated or unless the context requires otherwise, all references in these notes to consolidated financial statements to "State Street," "we," "us," "our" or similar references mean State Street Corporation and its subsidiaries on a consolidated basis, including our principal banking subsidiary, State Street Bank.

We have two lines of business:

*Investment Servicing* provides products and services including: custody; product and participant level accounting; daily pricing and administration; master trust and master custody; depotbank services (a fund oversight role created by regulation); record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; performance, risk and compliance analytics; and financial data management to support institutional investors.

*Investment Management*, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR<sup>®</sup> ETF brand.

***Consolidation***

Our consolidated financial statements include the accounts of the Parent Company and its majority- and wholly-owned and otherwise controlled subsidiaries, including State Street Bank. All material inter-company transactions and balances have been eliminated. Certain previously reported amounts have been reclassified to conform to current-year presentation.

We consolidate subsidiaries in which we exercise control. Investments in unconsolidated subsidiaries, recorded in other assets, generally are accounted for under the equity method of accounting if we have the ability to exercise significant influence

over the operations of the investee. For investments accounted for under the equity method, our share of income or loss is recorded in processing fees and other revenue in our consolidated statement of income. Investments not meeting the criteria for equity-method treatment are accounted for under the cost method of accounting.

***Use of Estimates***

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions in the application of certain of our significant accounting policies that may materially affect the reported amounts of assets, liabilities, equity, revenue, and expenses. As a result of unanticipated events or circumstances, actual results could differ from those estimates.

***Foreign Currency Translation***

The assets and liabilities of our operations with functional currencies other than the U.S. dollar are translated at month-end exchange rates, and revenue and expenses are translated at rates that approximate average monthly exchange rates. Gains or losses from the translation of the net assets of subsidiaries with functional currencies other than the U.S. dollar, net of related taxes, are recorded in AOCI, a component of shareholders' equity.

***Cash and Cash Equivalents***

For purposes of the consolidated statement of cash flows, cash and cash equivalents are defined as cash and due from banks.

***Interest-Bearing Deposits with Banks***

Interest-bearing deposits with banks generally consist of highly liquid, short-term investments maintained at the Federal Reserve Bank and other non-U.S. central banks with original maturities at the time of purchase of one month or less.

***Securities Purchased Under Resale Agreements and Securities Sold Under Repurchase Agreements***

Securities purchased under resale agreements and sold under repurchase agreements are treated as collateralized financing transactions, and are recorded in our consolidated statement of condition at the amounts at which the securities will be subsequently resold or repurchased, plus accrued interest. Our policy is to take possession or control of securities underlying resale agreements either directly or through agent banks, allowing borrowers the right of collateral substitution and/or short-notice termination. We revalue these securities daily to determine if additional collateral is necessary from the borrower to protect us against credit exposure. We can use these securities as collateral for repurchase agreements.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

For securities sold under repurchase agreements collateralized by our investment securities portfolio, the dollar value of the securities remains in investment securities in our consolidated statement of condition. Where a master netting agreement exists or both parties are members of a common clearing organization, resale and repurchase agreements with the same counterparty or clearing house and maturity date are recorded on a net basis.

**Fee and Net Interest Income**

Fees from investment servicing, investment management, securities finance, trading services and certain types of processing fees and other revenue are recorded in our consolidated statement of income based on estimates or specific contractual terms, including mutually agreed changes to terms, as transactions occur or services are rendered, provided that persuasive evidence exists, the price to the client is fixed or determinable and collectability is reasonably assured. Amounts accrued at period-end are recorded in accrued interest and fees receivable in our consolidated statement of condition. Performance fees generated by our investment management activities are recorded when the performance period is complete, based on predetermined benchmarks associated with the applicable fund's performance.

Interest income on interest-earning assets and interest expense on interest-bearing liabilities are recorded in our consolidated statement of income as components of NII, and are generally based on the effective yield of the related financial asset or liability.

**Other Significant Policies**

The following table identifies our other significant accounting policies and the note and page where a detailed description of each policy can be found.

Fair Value	Note	2	Page	131

**Acquisitions and Dispositions**

In the first quarter of 2017, we completed the sale of our joint venture interest in IFDS U.K. for approximately \$175 million in cash and the exchange of our joint venture interest in BFDS stock for \$158 million in State Street's common stock. We recognized a pre-tax gain of \$30 million, in the aggregate, in the year ended December 31, 2017 on these dispositions. In the third quarter of 2017, we recognized a pre-tax gain of \$26 million on the sale of an alternative trading platform.

On July 1, 2016, we completed our acquisition of GE Asset Management (GEAM) from General Electric Company, with a total purchase price of approximately \$485 million.

We accounted for this acquisition as a business combination and, in accordance with ASC Topic 805, *Business Combinations*, we have recorded assets acquired and liabilities assumed at their respective fair values as of the acquisition date. Our consolidated financial statements include the operating results for the acquired business from the date of acquisition, July 1, 2016.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Recent Accounting Developments**

*Relevant standards that were recently issued but not yet adopted*

Standard	Description	Date of Adoption	Effects on the financial statements or other significant matters
ASU 2014-09, Revenue from Contracts with Customers (Topic 606)	The standard, and its related amendments, will replace existing revenue recognition standards and expand the disclosure requirements for revenue arrangements with customers. Under the new standard, revenue is recognized when a customer obtains control of promised goods or services and is recognized in an amount that reflects the consideration which the entity expects to receive in exchange for those goods or services. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (the modified retrospective method).	January 1, 2018	The timing and amount of our material revenue streams, including servicing fees, management fees, trading services, and securities finance, remain substantially unchanged as these revenues will continue to be recognized over time. Specifically, under the new standard we will recognize revenue related to these activities ratably over the term of the related agreements with customers as the customer simultaneously benefits from the services as they are performed. The standard does not apply to revenue associated with financial instruments, including loans and securities, or revenue recognized under other U.S. GAAP standards. Therefore NII, securities gains/ losses and revenue related to derivative instruments are not impacted by the standard. The new standard modified the principal and agent guidance requiring certain costs previously presented on a net basis to be presented on a gross basis, which we expect will increase 2018 revenue and expenses by an estimated \$225 million, the majority reflected in Investment Management. We have adopted the new standard as of January 1, 2018, using the modified retrospective method of adoption. No material adjustment to retained earnings was required.
ASU 2016-01, Financial Instruments-Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities	The standard makes limited amendments to the guidance on the classification and measurement of financial instruments. Under the new standard, all equity securities will be measured at fair value through earnings with certain exceptions, including investments accounted for under the equity method of accounting. In addition, the FASB clarified the guidance related to valuation allowance assessments when recognizing deferred tax assets on unrealized losses on available-for-sale debt securities. This standard must be applied on a retrospective basis.	January 1, 2018	Upon adoption of the standard on January 1, 2018, we reclassified approximately \$443 million of equity securities classified as available for sale to equity securities held at fair value through profit and loss. The cumulative-effect transition adjustment recognized in retained earnings on January 1, 2018 was immaterial to the financial statements.
ASU 2016-02, Leases (Topic 842)	The standard represents a wholesale change to lease accounting and requires all leases, other than short-term leases, to be reported on balance sheet through recognition of a right-of-use asset and a corresponding liability for future lease obligations. The standard also requires extensive disclosures for assets, expenses, and cash flows associated with leases, as well as a maturity analysis of lease liabilities.	January 1, 2019	We are currently assessing the impact of the standard on our consolidated financial statements, but we anticipate an increase in assets and liabilities due to the recognition of the required right-of-use asset and corresponding liability for all lease obligations that are currently classified as operating leases, primarily real estate leases for office space, as well as additional disclosure on all of our lease obligations.
ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments	The standard requires immediate recognition of expected credit losses for financial assets carried at amortized cost, including trade and other receivables, loans and commitments, held-to-maturity debt securities, and other financial assets, held at the reporting date to be measured based on historical experience, current conditions, and reasonable supportable forecasts. Credit losses on available for sale securities will be recorded as an allowance versus a write-down of the amortized cost basis of the security and will allow for a reversal of impairment loss when the credit of the issuer improves.	January 1, 2020	We are currently assessing the impact of the standard on our consolidated financial statements, and a significant implementation project is in place to ensure that expected credit losses are calculated in accordance with the standard. We have established a steering committee to provide cross-functional governance over the project plan and key decisions, and are currently developing key accounting policies, assessing existing credit loss models against the new guidance and processes and identifying a complete set of data requirements and sources. We have commenced the development of new or modified credit loss models and based on our analysis to date, we expect the timing of the allowance for credit losses to accelerate under the new standard. We are continuing to assess the extent of the impact on the allowance for credit losses.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

*Relevant standards that were recently issued but not yet adopted (continued)*

Standard	Description	Date of Adoption	Effects on the financial statements or other significant matters
ASU 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)	The standard amends the statement of cash flow guidance to address specific cash flow issues with the objective of reducing the existing diversity in practice.	January 1, 2018	Based on our current presentation there is no significant change to our presentation of the statement of cash flows.
ASU 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business	The standard incorporates gating criteria to determine when an integrated set of assets and activities is not a business. When substantially all the fair value of gross assets acquired (or group of similar identifiable assets) is concentrated in a single identifiable asset, it would not represent a business.	January 1, 2018, early adoption permitted	We have adopted this standard as of January 1, 2018 and will apply it prospectively to transactions occurring after adoption date, as applicable.
ASU 2017-04, Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment	The standard simplifies the subsequent measurement of goodwill by eliminating Step 2 from the goodwill impairment test. The ASU requires an entity to compare the fair value of a reporting unit with its carrying amount and recognize an impairment charge for the amount by which the carrying value exceeds the fair value of the reporting unit. Additionally, an entity should consider income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit when measuring the goodwill impairment loss.	January 1, 2020, early adoption permitted	We are evaluating the impacts of early adoption, and will apply this standard prospectively upon adoption.
ASU 2017-08, Receivables - Nonrefundable Fees and Other Costs (Subtopic 310-20): Premium Amortization on Purchased Callable Debt Securities	The standard shortens the amortization period for certain purchased callable debt securities to the earliest call date.	January 1, 2019, early adoption permitted	We are currently evaluating the impact of the new standard and the early adoption provisions.
ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities	The standard amends the hedge accounting model to better portray the economics of risk management activities in the financial statements and enhances the presentation of hedge results. The amendments also make targeted changes to simplify the application of hedge accounting in certain situations.	January 1, 2019, early adoption permitted	We are currently evaluating the impact of the new standard and the early adoption provisions.

*Relevant standards that were adopted during the year ended December 31, 2017*

We adopted ASU 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, effective January 1, 2017. Starting in the quarter ended March 31, 2017, we reclassified excess tax benefits related to stock-based compensation from financing activities to other operating activities on the consolidated statement of cash flows. We continued to present repurchases of common stock for employee tax withholding in financing activities in the consolidated statements of cash flows for all periods presented.

As required by the transition provisions of the standard, excess tax benefits previously recognized in surplus prior to January 1, 2017 remain in surplus, and excess tax benefits recognized after January 1, 2017 are included in income tax expense. In connection with this change, we recognized a tax benefit of \$24.8 million in the year ended December 31, 2017. We elected to make no changes to our current policy of estimating forfeitures or our tax withholding rates.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 2. Fair Value****Fair Value Measurements**

We carry trading account assets and liabilities, AFS investment securities and various types of derivative financial instruments at fair value in our consolidated statement of condition on a recurring basis. Changes in the fair values of these financial assets and liabilities are recorded either as components of our consolidated statement of income or as components of AOCI within shareholders' equity in our consolidated statement of condition.

We measure fair value for the above-described financial assets and liabilities in conformity with U.S. GAAP that governs the measurement of the fair value of financial instruments. Management believes that its valuation techniques and underlying assumptions used to measure fair value conform to the provisions of U.S. GAAP. We categorize the financial assets and liabilities that we carry at fair value based on a prescribed three-level valuation hierarchy. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (level 1) and the lowest priority to valuation methods using significant unobservable inputs (level 3). If the inputs used to measure a financial asset or liability cross different levels of the hierarchy, categorization is based on the lowest-level input that is significant to the fair-value measurement. Management's assessment of the significance of a particular input to the overall fair-value measurement of a financial asset or liability requires judgment, and considers factors specific to that asset or liability. The three levels of the valuation hierarchy are described below.

*Level 1. Financial assets and liabilities with values based on unadjusted quoted prices for identical assets or liabilities in an active market.* Our level 1 financial assets and liabilities primarily include positions in U.S. government securities and highly liquid U.S. and non-U.S. government fixed-income securities carried in trading account assets. We may carry U.S. government securities in our AFS portfolio in connection with our asset-and-liability management activities. Our level 1 financial assets also include active exchange-traded equity securities.

*Level 2. Financial assets and liabilities with values based on quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability.* Level 2 inputs include the following:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in non-active markets;

- Pricing models whose inputs are observable for substantially the full term of the asset or liability; and
- Pricing models whose inputs are derived principally from, or corroborated by, observable market information through correlation or other means for substantially the full term of the asset or liability.

Our level 2 financial assets and liabilities primarily include non-U.S. debt securities carried in trading account assets and various types of fixed-income investment securities available-for-sale, as well as various types of foreign exchange and interest-rate derivative instruments.

Fair value for our investment securities available-for-sale categorized in level 2 is measured primarily using information obtained from independent third parties. This third-party information is subject to review by management as part of a validation process, which includes obtaining an understanding of the underlying assumptions and the level of market participant information used to support those assumptions. In addition, management compares significant assumptions used by third parties to available market information. Such information may include known trades or, to the extent that trading activity is limited, comparisons to market research information pertaining to credit expectations, execution prices and the timing of cash flows and, where information is available, back-testing.

Derivative instruments categorized in level 2 predominantly represent foreign exchange contracts used in our trading activities, for which fair value is measured using discounted cash-flow techniques, with inputs consisting of observable spot and forward points, as well as observable interest-rate curves. With respect to derivative instruments, we evaluate the impact on valuation of the credit risk of our counterparties and our own credit risk. We consider factors such as the likelihood of default by us and our counterparties, our current and potential future net exposures and remaining maturities in determining the fair value. Valuation adjustments associated with derivative instruments were not material to those instruments for the years ended December 31, 2017 and 2016.

*Level 3. Financial assets and liabilities with values based on prices or valuation techniques that require inputs that are both unobservable in the market and significant to the overall measurement of fair value.* These inputs reflect management's judgment about the assumptions that a market participant would use in pricing the financial asset or liability, and are based on the best available information, some of which is internally developed. The following provides a more detailed discussion of

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

our financial assets and liabilities that we may categorize in level 3 and the related valuation methodology.

- The fair value of our investment securities categorized in level 3 is measured using information obtained from third-party sources, typically non-binding broker or dealer quotes, or through the use of internally-developed pricing models. Management has evaluated its methodologies used to measure fair value, but has considered the level of observable market information to be insufficient to categorize the securities in level 2.
- The fair value of certain foreign exchange contracts, primarily options, is measured using an option-pricing model. Because of a limited number of observable transactions, certain model inputs are not observable, such

as implied volatility surface, but are derived from observable market information.

Our level 3 financial assets and liabilities are similar in structure and profile to our level 1 and level 2 financial instruments, but they trade in less liquid markets, and the measurement of their fair value is inherently more difficult.

The following tables present information with respect to our financial assets and liabilities carried at fair value in our consolidated statement of condition on a recurring basis as of the dates indicated. During 2017, approximately \$9 million of assets were transferred between levels 1 and 2. No transfers of financial assets or liabilities between levels 1 and 2 occurred during 2016.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following tables present activity related to our level 3 financial assets during the years ended December 31, 2017 and 2016, respectively. Transfers into and out of level 3 are reported as of the beginning of the period presented. During the year ended December 31, 2017, transfers into level 3 were mainly related to certain ABS and MBS, including non-U.S. debt securities, and municipal loans for which fair value was measured using information obtained from third-party sources, including non-binding broker or dealer quotes. During the years ended December 31, 2017 and 2016, transfers out of level 3 were mainly related to certain MBS and ABS, including non-U.S. debt securities, for which fair value was measured using prices for which observable market information became available.

<sup>(1)</sup> Significant changes in these unobservable inputs would result in significant changes in fair value measurement.

STATE STREET CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

***Fair Value Estimates***

Estimates of fair value for financial instruments not carried at fair value on a recurring basis in our consolidated statement of condition are generally subjective in nature, and are determined as of a specific point in time based on the characteristics of the financial instruments and relevant market information. Disclosure of fair value estimates is not required by U.S. GAAP for certain items, such as lease financing, equity-method investments, obligations for pension and other post-retirement plans, premises and equipment, other intangible assets and income-tax assets and liabilities. Accordingly, aggregate fair-value estimates presented do not purport to represent, and should not be considered representative of, our underlying "market" or franchise value. In addition, because of potential differences in methodologies and assumptions used to estimate fair values, our estimates of fair value should not be compared to those of other financial institutions.

We use the following methods to estimate the fair values of our financial instruments:

- For financial instruments that have quoted market prices, those quoted prices are used to estimate fair value.
- For financial instruments that have no defined maturity, have a remaining maturity of 180 days or less, or reprice frequently to a market rate, we assume that the fair value of these instruments approximates their reported value, after taking into consideration any applicable credit risk.
- For financial instruments for which no quoted market prices are available, fair value is estimated using information obtained from independent third parties, or by discounting the expected cash flows using an estimated current market interest rate for the financial instrument.

The generally short duration of certain of our assets and liabilities results in a significant number of financial instruments for which fair value equals or closely approximates the amount recorded in our consolidated statement of condition. These financial instruments are reported in the following captions in our consolidated statement of condition: cash and due from banks; interest-bearing deposits with banks; securities purchased under resale agreements; accrued interest and fees receivable; deposits; securities sold under repurchase agreements; and other short-term borrowings.

In addition, due to the relatively short duration of certain of our loans, we consider fair value for these loans to approximate their reported value. The fair value of other types of loans, such as senior secured bank loans, commercial real estate loans, purchased receivables and municipal loans is estimated using information obtained from independent third parties or by discounting expected future cash flows using current rates at which similar loans would be made to borrowers with similar credit ratings for the same remaining maturities. Commitments to lend have no reported value because their terms are at prevailing market rates.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following tables present the reported amounts and estimated fair values of the financial assets and liabilities not carried at fair value on a recurring basis, as they would be categorized within the fair value hierarchy, as of the dates indicated.

STATE STREET CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

**Note 3. Investment Securities**

Investment securities held by us are classified as either trading, AFS, or HTM at the time of purchase and reassessed periodically, based on management's intent.

Generally, trading assets are debt and equity securities purchased in connection with our trading activities and, as such, are expected to be sold in the near term. Our trading activities typically involve active and frequent buying and selling with the objective of generating profits on short-term movements. AFS investment securities are those securities that we intend to hold for an indefinite period of time. AFS investment securities include securities utilized as part of our asset-and-liability management activities that may be sold in response to changes in interest rates, prepayment risk, liquidity needs or other factors. HTM securities are debt securities that management has the intent and the ability to hold to maturity.

Trading assets are carried at fair value. Both realized and unrealized gains and losses on trading assets are recorded in trading services revenue in our consolidated statement of income. Debt and marketable equity securities classified as AFS are carried at fair value, and after-tax net unrealized gains and losses are recorded in AOCI. Gains or losses realized on sales of AFS investment securities are computed using the specific identification method and are recorded in gains (losses) related to investment securities, net, in our consolidated statement of income. HTM investment securities are carried at cost, adjusted for amortization of premiums and accretion of discounts.

**STATE STREET CORPORATION**

<sup>(1)</sup> Primarily composed of securities guaranteed by the federal government with respect to at least 97% of defaulted principal and accrued interest on the underlying loans.

<sup>(2)</sup> As of December 31, 2017 and December 31, 2016, the fair value of other ABS was primarily composed of \$1,447 million and \$905 million, respectively, of CLOs.

<sup>(3)</sup> As of December 31, 2017 and December 31, 2016, the fair value of other non-U.S. debt securities was primarily composed of \$3,537 million and \$3,769 million, respectively, of covered bonds and \$1,885 million and \$988 million, as of December 31, 2017 and December 31, 2016, respectively, of corporate bonds.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Aggregate investment securities with carrying values of approximately \$48 billion and \$46 billion as of December 31, 2017 and December 31, 2016, respectively, were designated as pledged for public and trust deposits, short-term borrowings and for other purposes as provided by law.

In 2017, we sold \$12.2 billion of AFS, primarily Agency MBS and U.S. Treasury securities in our investment portfolio, to position for the then-existing interest rate environment resulting in a pre-tax loss of \$39 million.

In 2017, \$496 million of Agency MBS previously classified as AFS were transferred to HTM, and in 2016, \$4.9 billion, of Agency MBS and Student Loan ABS previously classified as AFS were transferred to HTM. Both transfers reflect our intent to hold these securities until their maturity. These securities were transferred at fair value, which included a net unrealized loss of \$2.8 million and a net unrealized gain of \$87 million as of December 31, 2017 and 2016, respectively, within accumulated other comprehensive loss which will be accreted into interest income over the remaining life of the transferred security (ranging from approximately 10 to 42 years).

The following tables present the aggregate fair values of investment securities that have been in a continuous unrealized loss position for less than 12 months, and those that have been in a continuous unrealized loss position for 12 months or longer, as of the dates indicated:

<b>Balance, end of period</b>	<b>\$ 64</b>	<b>\$ 66</b>	<b>\$ 92</b>

Interest income related to debt securities is recognized in our consolidated statement of income using the effective interest method, or on a basis approximating a level rate of return over the contractual or estimated life of the security. The level rate of return considers any non-refundable fees or costs, as well as purchase premiums or discounts, resulting in amortization or accretion, accordingly.

For certain debt securities acquired which are considered to be beneficial interests in securitized financial assets, the excess of our estimate of undiscounted future cash flows from these securities over their initial recorded investment is accreted into interest income on a level-yield basis over the securities' estimated remaining terms. Subsequent decreases in these securities' expected future cash flows are either recognized prospectively through an adjustment of the yields on the securities over their remaining terms, or are evaluated for OTTI.

Increases in expected future cash flows are recognized prospectively over the securities' estimated remaining terms through the recalculation of their yields.

**Impairment**

We conduct periodic reviews of individual securities to assess whether OTTI exists. Impairment exists when the current fair value of an individual security is below its amortized cost basis. For AFS and HTM debt securities, impairment is recorded in our consolidated statement of income when management intends to sell (or may be required to sell) the securities before they recover in value, or when management expects the present value of cash flows expected to be collected from the securities to be less than the amortized cost of the impaired security (a credit loss).

Our review of impaired securities generally includes:

- the identification and evaluation of securities that have indications of potential OTTI, such as issuer-specific concerns, including deteriorating financial condition or bankruptcy;
- the analysis of expected future cash flows of securities, based on quantitative and qualitative factors;
- the analysis of the collectability of those future cash flows, including information about past events, current conditions, and reasonable and supportable forecasts;
- the analysis of the underlying collateral for MBS and ABS;
- the analysis of individual impaired securities, including consideration of the length of time the security has been in an unrealized loss position, the anticipated recovery period, and the magnitude of the overall price decline;
- evaluation of factors or triggers that could cause individual securities to be deemed OTTI and those that would not support OTTI; and
- documentation of the results of these analyses.

Factors considered in determining whether impairment is other than temporary include:

- certain macroeconomic drivers;
- certain industry-specific drivers;
- the length of time the security has been impaired;
- the severity of the impairment;

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

- the cause of the impairment and the financial condition and near-term prospects of the issuer;
- activity in the market with respect to the issuer's securities, which may indicate adverse credit conditions; and
- our intention not to sell, and the likelihood that we will not be required to sell, the security for a period of time sufficient to allow for its recovery in value.

Substantially all of our investment securities portfolio is composed of debt securities. A critical component of our assessment of OTTI of these debt securities is the identification of credit-impaired securities for which management does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security.

Debt securities that are not deemed to be credit-impaired are subject to additional management analysis to assess whether management intends to sell, or, more likely than not, would be required to sell, the security before the expected recovery of its amortized cost basis.

The following provides a description of our process for the identification and assessment of OTTI, as well as information about OTTI recorded in 2017, 2016 and 2015 and changes in period-end unrealized losses, for major security types as of December 31, 2017.

#### *U.S. Agency Securities*

Our portfolio of U.S. agency direct obligations and MBS receives the implicit or explicit backing of the U.S. government in conjunction with specified financial support of the U.S. Treasury. We recorded no OTTI on these securities in 2017, 2016 or 2015. The overall increase in the unrealized losses on these securities as of December 31, 2017 was primarily attributable to interest rate increases in 2017.

#### *Asset-Backed Securities - Student Loans*

Asset-backed securities collateralized by student loans are primarily composed of securities collateralized by FFELP loans. FFELP loans benefit from a federal government guarantee of at least 97% of defaulted principal and accrued interest, with additional credit support provided to our securities in the form of over-collateralization, subordination and excess spread, which collectively total in excess of 100%. Accordingly, the vast majority of FFELP loan-backed securities are protected from traditional consumer credit risk.

We recorded no OTTI on these securities in 2017, 2016 or 2015. The improvement in the mark to market for our FFELP loan-backed securities portfolio as of December 31, 2017 was primarily attributable to the tightening FFELP spreads.

Our assessment of OTTI of these securities considers, among many other factors, the strength of the U.S. government guarantee, the performance of the underlying collateral, and the remaining average term of the FFELP loan-backed securities portfolio, which was approximately 4.6 years as of December 31, 2017.

In general, the rating agencies have largely completed their downgrade review of FFELP loan-backed securities due to potential extension of student loan repayments beyond the securities' legal final maturity dates. At this time, we do not expect a significant number of additional downgrades related to potential legal final maturity breaches. Based on the limited price impact on the overall FFELP loan-backed securities portfolio and recent remedial actions by issuers, including amending loan-backed securities' maturity dates and exercising cleanup calls, the credit quality of the FFELP loan-backed securities portfolio remains stable and we, as a bondholder, remain protected from principal loss as a result of the aforementioned federal government guarantee and over-collateralization. Downside risks remain should remedial actions fail to address the extension risks.

Our total exposure to private student loan-backed securities was less than \$70 million as of December 31, 2017. Our assessment of OTTI of private student loan-backed securities considers, among other factors, the impact of high unemployment rates on the collateral performance of private student loans. We recorded no OTTI on these securities in 2017, 2016 or 2015.

#### *Non-U.S. Mortgage- and Asset-Backed Securities*

Non-U.S. mortgage- and asset-backed securities are primarily composed of U.K., Australian and Dutch securities collateralized by residential mortgages and German and U.K. securities collateralized by automobile loans and leases. Our assessment of impairment with respect to these securities considers the location of the underlying collateral, collateral enhancement and structural features, expected credit losses under base-case and stressed conditions and the macroeconomic outlook for the country in which the collateral is located, including housing prices and unemployment. Where appropriate, any potential loss after consideration of the above-referenced factors is further evaluated to determine whether any OTTI exists.

We recorded OTTI of less than \$1 million, \$2 million and \$1 million in 2017, 2016 and 2015, respectively, on non-U.S. residential MBS, which resulted from adverse changes in the timing of expected future cash flows from the securities.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Our assessment of OTTI of these securities takes into account government intervention in the corresponding mortgage markets and assumes a baseline macroeconomic environment for this region, factoring in slower economic growth and continued government austerity measures. In addition, we perform stress testing and sensitivity analysis in order to understand the impact of more severe assumptions on potential OTTI.

*State and Political Subdivisions and Other U.S. Debt Securities*

Our municipal securities portfolio primarily includes securities issued by U.S. states and their municipalities. A portion of this portfolio is held in connection with our tax-exempt investment program, more fully described in Note 14. Our portfolio of other U.S. debt securities is primarily composed of securities issued by U.S. corporations.

Our assessment of OTTI of these portfolios considers, among other factors, adverse conditions specifically related to the industry, geographic area or financial condition of the issuer; the structure of the security, including collateral, if any, and payment schedule; rating agency changes to the security's credit rating; the volatility of the fair value changes; and our intent and ability to hold the security until its recovery in value. If the impairment of the security is credit-related, we estimate the future cash flows from the security, tailored to the security and considering the above-described factors, and any resulting impairment deemed to be other-than-temporary is recorded in our consolidated statement of income.

We recorded no OTTI on these securities in 2017, 2016 or 2015. The decline in the unrealized losses on these securities as of December 31, 2017 was primarily attributable to the narrowing of spreads and U.S. Treasury rates in 2017.

*U.S. Non-Agency Residential Mortgage-Backed Securities*

We assess OTTI of our portfolio of U.S. non-agency residential mortgage-backed securities using cash flow models, tailored for each security, that estimate the future cash flows from the underlying mortgages, using the security-specific collateral and transaction structure. Estimates of future cash flows are subject to management judgment. The future cash flows and performance of our portfolio of U.S. non-agency residential mortgage-backed securities are a function of a number of factors, including, but not limited to, the condition of the U.S. economy, the condition of the U.S. residential mortgage markets, and the level of loan defaults, prepayments and loss severities. Management's estimates of future losses for each security also consider the underwriting and historical performance of each specific security, the underlying collateral type, vintage, borrower profile,

third-party guarantees, current levels of subordination, geography and other factors.

We recorded no OTTI on these securities in 2017, 2016 or 2015.

*U.S. Non-Agency Commercial Mortgage-Backed Securities*

With respect to our portfolio of U.S. non-agency commercial mortgage-backed securities, OTTI is assessed by considering a number of factors, including, but not limited to, the condition of the U.S. economy and the condition of the U.S. commercial real estate market, as well as capitalization rates. Management estimates of future losses for each security also consider the underlying collateral type, property location, vintage, debt-service coverage ratios, expected property income, servicer advances and estimated property values, as well as current levels of subordination. We recorded no OTTI on these securities in 2017 and 2015. In 2016 we recorded \$1 million of OTTI on these securities, all associated with expected credit losses.

The estimates, assumptions and other risk factors utilized in our assessment of impairment as described above are used by management to identify securities which are subject to further analysis of potential credit losses. Additional analyses are performed using more stressful assumptions to further evaluate the sensitivity of losses relative to the above-described factors. However, since the assumptions are based on the unique characteristics of each security, management uses a range of estimates for prepayment speeds, default, and loss severity forecasts that reflect the collateral profile of the securities within each asset class. In addition, in measuring expected credit losses, the individual characteristics of each security are examined to determine whether any additional factors would increase or mitigate the expected loss. Once losses are determined, the timing of the loss will also affect the ultimate OTTI, since the loss is ultimately subject to a discount commensurate with the purchase yield of the security.

After a review of the investment portfolio, taking into consideration current economic conditions, adverse situations that might affect our ability to fully collect principal and interest, the timing of future payments, the credit quality and performance of the collateral underlying MBS and ABS and other relevant factors, management considers the aggregate decline in fair value of the investment securities portfolio and the resulting gross pre-tax unrealized losses of \$657 million related to 1,283 securities as of December 31, 2017 to be temporary, and not the result of any material changes in the credit characteristics of the securities.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 4. Loans and Leases**

Loans are generally recorded at their principal amount outstanding, net of the allowance for loan losses, unearned income, and any net unamortized deferred loan origination fees. Acquired loans have been initially recorded at fair value based on management's expectation with respect to future principal and interest collection as of the date of acquisition. Acquired loans are held for investment, and as such their initial fair value is not adjusted subsequent to acquisition. Loans that are classified as held-for-sale are measured at lower of cost or fair value on an individual basis.

Interest income related to loans is recognized in our consolidated statement of income using the interest method, or on a basis approximating a level rate of return over the term of the loan. Fees received for providing loan commitments and letters of credit that we anticipate will result in loans typically are deferred and amortized to interest income over the term of the related loan, beginning with the initial borrowing. Fees on commitments and letters of credit are amortized to processing fees and other revenue over the commitment period when funding is not known or expected.

Leveraged-lease investments are reported at the aggregate of lease payments receivable and estimated residual values, net of non-recourse debt and unearned income. Lease residual values are reviewed regularly for OTTI, with valuation adjustments recorded against processing fees and other revenue. Unearned income is recognized to yield a level rate of return on the net investment in the leases. Gains and losses on residual values of leased equipment sold are recorded in processing fees and other revenue.

The following table presents our recorded investment in loans and leases, by segment, as of the dates indicated:

(In millions)	December 31, 2017	December 31, 2016
<b>Domestic:</b>		
<b>Commercial and financial:</b>		
Loans to investment funds	\$ 13,618	\$ 11,734
Senior secured bank loans	2,923	3,256
Loans to municipalities	2,105	1,352
Other	50	70
Commercial real estate	98	27
Lease financing	267	338
Total domestic	19,061	16,777
<b>Non-U.S.:</b>		
<b>Commercial and financial:</b>		
Loans to investment funds	3,213	2,224
Senior secured bank loans	624	252
Lease financing	396	504
Total non-U.S.	4,233	2,980
Total loans and leases	23,294	19,757
Allowance for loan and lease losses	(54)	(53)
Loans and leases, net of allowance	\$ 23,240	\$ 19,704

We segregate our loans and leases into three segments: commercial and financial loans, commercial real estate loans, and lease financing. We further classify commercial and financial loans as loans to investment funds, senior secured bank loans, loans to municipalities, and other. These classifications reflect their risk characteristics, their initial measurement attributes and the methods we use to monitor and assess credit risk.

The commercial and financial segment is composed of primarily floating-rate loans to mutual fund clients, purchased senior secured bank loans, and loans to municipalities. Investment fund lending is composed of short-duration revolving credit lines providing liquidity to fund clients in support of their transaction flows associated with securities' settlement activities.

Certain loans are pledged as collateral for access to the Federal Reserve's discount window. As of December 31, 2017 and December 31, 2016, the loans pledged as collateral totaled \$1.9 billion and \$1.5 billion, respectively.

The lease financing segment includes our investment in leveraged lease financing. The components of our net investment in leveraged lease financing, included in the lease financing segment in the preceding table, were as follows as of December 31, 2017 and December 31, 2016:

(In millions)	2017	2016
Net rental income receivable	\$ 808	\$ 1,039
Estimated residual values	89	89
Unearned income	(234)	(286)
Investment in leveraged lease financing	663	842
Less related deferred income tax liabilities	(184)	(313)
Net investment in leveraged lease financing	\$ 479	\$ 529

Substandard <sup>(4)</sup>	15	—	—	15	
Total	\$ 18,888	\$ 27	\$ 842	\$ 19,757	

<sup>(1)</sup> Investment-grade loans and leases consist of counterparties with strong credit quality and low expected credit risk and probability of default. Ratings apply to counterparties with a strong capacity to support the timely repayment of any financial commitment.

<sup>(2)</sup> Speculative loans and leases consist of counterparties that face ongoing uncertainties or exposure to business, financial, or economic downturns. However, these counterparties may have financial flexibility or access to financial alternatives, which allow for financial commitments to be met.

<sup>(3)</sup> Special mention loans and leases consist of counterparties with potential weaknesses that, if uncorrected, may result in deterioration of repayment prospects.

<sup>(4)</sup> Substandard loans and leases consist of counterparties with well-defined weakness that jeopardizes repayment with the possibility we will sustain some loss

We use an internal risk-rating system to assess our risk of credit loss for each loan or lease. This risk-rating process incorporates the use of risk-rating tools in conjunction with management judgment. Qualitative and quantitative inputs are captured in a systematic manner, and following a formal review and approval process, an internal credit rating based on our credit scale is assigned.

In assessing the risk rating assigned to each individual loan or lease, among the factors considered are the borrower's debt capacity, collateral coverage, payment history and delinquency

experience, financial flexibility and earnings strength, the expected amounts and source of repayment, the level and nature of contingencies, if any, and the industry and geography in which the borrower operates. These factors are based on an evaluation of historical and current information, and involve subjective assessment and interpretation. Credit counterparties are evaluated and risk-rated on an individual basis at least annually. Management considers the ratings to be current as of December 31, 2017.

The following table presents our recorded investment in loans and leases, disaggregated based on our impairment methodology, as of the dates indicated:

(In millions)	December 31, 2017				December 31, 2016			
	Commercial and Financial	Commercial Real Estate	Lease Financing	Total Loans and Leases	Commercial and Financial	Commercial Real Estate	Lease Financing	Total Loans and Leases
<b>Loans and leases<sup>(1)</sup>:</b>								
Individually evaluated for impairment	\$ —	\$ —	\$ —	\$ —	\$ 15	\$ —	\$ —	\$ 15
Collectively evaluated for impairment	22,533	98	663	23,294	18,873	27	842	19,742
Total	\$ 22,533	\$ 98	\$ 663	\$ 23,294	\$ 18,888	\$ 27	\$ 842	\$ 19,757

<sup>(1)</sup> For those portfolios where there are a small number of loans each with a large balance, we review each loan annually for indicators of impairment. For those loans where no such indicators are identified, the loans are collectively evaluated for impairment. As of December 31, 2017, no loans were individually evaluated for impairment. As of December 31, 2016, \$195 thousand of the allowance for loan and lease loss related to commercial and financial loans were individually evaluated for impairment, and the remainder of the allowance related to commercial and financial loans collectively evaluated for impairment.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

As of December 31, 2017, we had no impaired loans and leases. As of December 31, 2016, we identified one commercial and financial loan as impaired, with both a recorded investment and unpaid principal balance of \$15 million. The impaired loan had zero related interest income and an associated allowance for loan losses of \$0.2 million.

In certain circumstances, we restructure troubled loans by granting concessions to borrowers experiencing financial difficulty. Once restructured, the loans are generally considered impaired until their maturity, regardless of whether the borrowers perform under the modified terms of the loans. No loans were modified in troubled debt restructurings during the years ended December 31, 2017 and December 31, 2016.

We generally place loans on non-accrual status once principal or interest payments are 90 days contractually past due, or earlier if management determines that full collection is not probable. Loans 90 days past due, but considered both well-secured and in the process of collection, may be excluded from non-accrual status. When we place a loan on non-accrual status, the accrual of interest is discontinued and previously recorded but unpaid interest is reversed and generally charged against interest income. For loans on non-accrual status, income is recognized on a cash basis after recovery of principal, if and when interest payments are received. Loans may be removed from non-accrual status when repayment is reasonably assured and performance under the terms of the loan has been demonstrated.

As of December 31, 2017, there were no loans or leases on non-accrual status. As of December 31, 2016, there was one commercial and financial loan on non-accrual status, and no CRE loans or leases were on non-accrual status. As of both December 31, 2017 and 2016 there were no loans or leases 90 days or more contractually past due.

**Allowance For Loan And Lease Losses**

The allowance for loan and lease losses, recorded as a reduction of loans and leases in our consolidated statement of condition, represents management's estimate of incurred credit losses in our loan and lease portfolio as of the balance sheet date. The allowance is evaluated on a regular basis by management. Factors considered in evaluating the appropriate level of the allowance for each segment of our loan-and-lease portfolio include loss experience, the probability of default reflected in our internal risk rating of the counterparty's creditworthiness, current economic conditions and adverse situations that may affect the borrower's ability to repay, the estimated value of the underlying collateral, if any, the performance of individual credits

in relation to contract terms, and other relevant factors.

Loans and leases are charged off to the allowance for loan and lease losses in the reporting period in which either an event occurs that confirms the existence of a loss on a loan or lease or a portion of a loan or lease is determined to be uncollectible. In addition, any impaired loan or lease that is determined to be collateral-dependent is reduced to an amount equal to the fair value of the collateral less costs to sell. A loan or lease is identified as collateral-dependent when management determines that it is probable that the underlying collateral will be the sole source of repayment. Recoveries are recorded on a cash basis as adjustments to the allowance.

The following table presents activity in the allowance for loan and lease losses for the periods indicated:

	Years Ended December 31,		
	2017	2016	2015
	Total Loans and Leases	Total Loans and Leases	Total Loans and Leases
<b>(In millions)</b>			
<b>Allowance for loan and lease losses<sup>(1)</sup>:</b>			
Beginning balance	\$ 53	\$ 46	\$ 38
Provision for loan and lease losses	2	10	12
Charge-offs	(1)	(3)	(4)
Ending balance	<u>\$ 54</u>	<u>\$ 53</u>	<u>\$ 46</u>

<sup>(1)</sup> The provisions and charge-offs for loans and leases were attributable to exposure to senior secured loans to non-investment grade borrowers, purchased in connection with our participation in syndicated loans.

Loans and leases are reviewed on a regular basis, and any provisions for loan and lease losses that are recorded reflect management's estimate of the amount necessary to maintain the allowance for loan and lease losses at a level considered appropriate to absorb estimated incurred losses in the loan and lease portfolio.

**Off-Balance Sheet Credit Exposures**

The reserve for off-balance sheet credit exposures, recorded in accrued expenses and other liabilities in our consolidated statement of condition, represents management's estimate of probable credit losses in outstanding letters and lines of credit and other credit-enhancement facilities provided to our clients and outstanding as of the balance sheet date.

The reserve is evaluated on a regular basis by management. Factors considered in evaluating the appropriate level of this reserve are similar to those considered with respect to the allowance for loan and lease losses. Provisions to maintain the reserve at a level considered by us to be appropriate to absorb estimated incurred credit losses in outstanding facilities are recorded in other expenses in our consolidated statement of income.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 5. Goodwill and Other Intangible Assets**

Goodwill represents the excess of the cost of an acquisition over the fair value of the net tangible and other intangible assets acquired. Other intangible assets represent purchased long-lived intangible assets, primarily client relationships and core deposit intangible assets, that can be distinguished from goodwill because of contractual rights or because the asset can be exchanged on its own or in combination with a related contract, asset or liability. Goodwill is not amortized, but is subject to at least annual evaluation for impairment. Other intangible assets, which are also subject to annual evaluation for impairment, are mainly related to client relationships, which are amortized on a straight-line basis over periods ranging from five to twenty years, and core deposit intangible assets, which are amortized on a straight-line basis over periods ranging from sixteen to

twenty-two years, with such amortization recorded in other expenses in our consolidated statement of income.

Impairment of goodwill is deemed to exist if the carrying value of a reporting unit, including its allocation of goodwill and other intangible assets, exceeds its estimated fair value. Impairment of other intangible assets is deemed to exist if the balance of the other intangible asset exceeds the cumulative expected net cash inflows related to the asset over its remaining estimated useful life. If these reviews determine that goodwill or other intangible assets are impaired, the value of the goodwill or the other intangible asset is written down through a charge to other expenses in our consolidated statement of income.

The following table presents changes in the carrying amount of goodwill during the periods indicated:

(In millions)	Investment Servicing	Investment Management	Total
<b>Goodwill:</b>			
<b>Ending balance December 31, 2015</b>	\$ 5,641	\$ 30	\$ 5,671

<b>Total</b>	<b>\$ 3,497</b>	<b>\$ (1,884)</b>	<b>\$ 1,613</b>	<b>\$ 3,413</b>	<b>\$ (1,663)</b>	<b>\$ 1,750</b>

Amortization expense related to other intangible assets was \$214 million, \$207 million and \$197 million in 2017, 2016 and 2015, respectively.

Expected future amortization expense for other intangible assets recorded as of December 31, 2017 is as follows:

(In millions)	Future Amortization	
Years Ending December 31,		
2018	\$	191
2019		174
2020		171
2021		166
2022		165

#### Note 7. Deposits

As of December 31, 2017, we had \$39.73 billion of time deposits outstanding, of which \$4.75 billion were wholesale CDs, \$34.73 billion were derived from client deposits (payable on demand to such clients) and held in a time deposit established by State Street as the agent, and \$252 million were non-U.S. and all of which are scheduled to mature in 2018. As of December 31, 2016, we had \$55.03 billion of time deposits outstanding, of which \$214 million were non-U.S. As of December 31, 2017 and 2016, substantially all U.S. and non-U.S. time deposits were in amounts of \$100,000 or more. Demand deposit overdrafts of \$3.24 billion and \$2.62 billion were included as loan balances at December 31, 2017 and 2016, respectively.

#### Note 6. Other Assets

The following table presents the components of other assets as of the dates indicated:

(In millions)	December 31, 2017	December 31, 2016
Receivable - securities lending <sup>(1)</sup>	\$ 19,404	\$ 21,204
Derivative instruments, net	4,013	7,321
Bank-owned life insurance	3,242	3,158
Investments in joint ventures and other unconsolidated entities	2,259	2,363
Collateral, net	473	2,236
Prepaid expenses	364	333
Accounts receivable	348	886
Receivable for securities settlement	188	40
Deposits with clearing organizations	120	132
Deferred tax assets, net of valuation allowance <sup>(2)</sup>	113	210
Income taxes receivable	97	106
Other <sup>(3)</sup>	397	339
<b>Total</b>	<b>\$ 31,018</b>	<b>\$ 38,328</b>

<sup>(1)</sup> Refer to Note 11 for further information on the impact of collateral on our financial statement presentation of securities borrowing transactions.

<sup>(2)</sup> Deferred tax assets and liabilities recorded in our consolidated statement of condition are netted within the same tax jurisdiction. Gross deferred tax assets and liabilities are presented in Note 22.

<sup>(3)</sup> In 2017, includes amounts held in escrow accounts at third parties related to the negotiated settlements in the transition management legal matter presented in Note 13.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 8. Short-Term Borrowings**

Our short-term borrowings include securities sold under repurchase agreements, federal funds purchased and other short-term borrowings; other short-term borrowings include borrowings associated with our tax-exempt investment program, more fully described in Note 14.

Collectively, short-term borrowings had weighted-average interest rates of 0.25% and 0.13% in 2017 and 2016, respectively.

The following tables present information with respect to the amounts outstanding and weighted-average interest rates of the primary components of our short-term borrowings as of and for the years ended December 31:

(Dollars in millions)	Securities Sold Under Repurchase Agreements			Federal Funds Purchased			Tax-Exempt Investment Program		
	2017	2016	2015	2017	2016	2015	2017	2016	2015
Balance as of December 31	\$ 2,842	\$ 4,400	\$ 4,499	\$ —	\$ —	\$ 6	\$ 1,078	\$ 1,158	\$ 1,748
Maximum outstanding as of any month-end	4,302	5,572	10,977	—	29	29	1,158	1,726	1,865
Average outstanding during the year	3,683	4,113	8,875	1	31	21	1,127	1,512	1,807
Weighted-average interest rate as of year-end	.03%	.04%	.02%	.00%	.00%	.03%	1.45%	.67%	.03%
Weighted-average interest rate during the year	.05	.02	.01	.00	.17	.01	.79	.36	.06

Obligations to repurchase securities sold are recorded as a liability in our consolidated statement of condition. U.S. government securities with a fair value of \$2.90 billion underlying the repurchase agreements remained in our investment securities portfolio as of December 31, 2017.

The following table presents information about these U.S. government securities and the carrying value of the related repurchase agreements, including accrued interest, as of December 31, 2017. The table excludes repurchase agreements collateralized by securities purchased under resale agreements and collateralized by trading account assets.

(In millions)	U.S. Government Securities Sold		Repurchase Agreements <sup>(1)</sup>
	Amortized Cost	Fair Value	Amortized Cost
Overnight maturity	\$ 2,928	\$ 2,899	\$ 2,842

<sup>(1)</sup> Collateralized by investment securities.

We maintain an agreement with a clearing organization that enables us to net all securities purchased under resale agreements and sold under repurchase agreements with counterparties that are also members of the clearing organization. As a result of this netting, the average balances of securities purchased under resale agreements and securities sold under repurchase agreements were reduced by \$31.15 billion in 2017 compared to \$30.86 billion in 2016.

State Street Bank currently maintains a line of credit of CAD 1.40 billion, or approximately \$1.11 billion as of December 31, 2017, to support its Canadian securities processing operations. The line of credit has no stated termination date and is cancelable by either party with prior notice. As of December 31, 2017 and 2016, there was no balance outstanding on this line of credit.

<sup>(1)</sup> We have entered into interest-rate swap agreements, recorded as fair value hedges, to modify our interest expense on these senior and subordinated notes from a fixed rate to a floating rate. As of December 31, 2017 and December 31, 2016, the carrying value of long-term debt associated with these fair value hedges decreased \$87 million and \$15 million, respectively. Refer to Note 10 for additional information about fair value hedges.

<sup>(2)</sup> The subordinated notes qualify for inclusion in tier 2 regulatory capital under current federal regulatory capital guidelines.

<sup>(3)</sup> We do not have the right to redeem the debenture prior to maturity other than upon the occurrence of specified events. Such redemption is subject to federal regulatory approval. The junior subordinated debentures qualify for inclusion in tier 2 regulatory capital under current federal regulatory capital guidelines.

<sup>(4)</sup> We may not redeem notes prior to their maturity.

**Parent Company**

As of December 31, 2017 and 2016, long-term capital leases included \$244 million and \$278 million, respectively, related to our One Lincoln Street headquarters building and related underground parking garage. Refer to Note 20 for additional information.

**Note 10. Derivative Financial Instruments**

A derivative financial instrument is a financial instrument or other contract which has one or more referenced indices and one or more notional amounts, either no initial net investment or a smaller initial net investment than would be expected for similar types of contracts, and which requires or permits net settlement.

We use derivative financial instruments to support our clients' needs and to manage our interest-rate and currency risk. In undertaking these activities, we assume positions in both the foreign

exchange and interest-rate markets by buying and selling cash instruments and using derivative financial instruments, including foreign exchange forward contracts, foreign exchange options and interest-rate contracts. Our derivative positions include derivative contracts held by a consolidated sponsored investment fund (refer to Note 14). We record derivatives in our consolidated statement of condition at their fair value on a recurring basis.

Interest rate contracts involve an agreement with a counterparty to exchange cash flows based on the movement of an underlying interest rate index. An interest rate swap agreement involves the exchange of a series of interest payments, at either a fixed or variable rate, based on the notional amount without the exchange of the underlying principal amount. An interest rate option contract provides the purchaser, for a premium, the right, but not the obligation, to receive an interest rate based upon a predetermined notional amount during a specified period. An interest

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

rate futures contract is a commitment to buy or sell, at a future date, a financial instrument at a contracted price; it may be settled in cash or through the delivery of the contracted instrument.

Foreign exchange contracts involve an agreement to exchange one currency for another currency at an agreed-upon rate and settlement date. Foreign exchange contracts generally consist of foreign exchange forward and spot contracts, option contracts and cross-currency swaps. Future cash requirements, if any, related to foreign exchange contracts are represented by the gross amount of currencies to be exchanged under each contract unless we and the counterparty have agreed to pay or to receive the net contractual settlement amount on the settlement date.

Derivative financial instruments involve the management of interest-rate and foreign currency risk, and involve, to varying degrees, market risk and credit and counterparty risk (risk related to repayment). Market risk is defined by U.S. banking regulators as the risk of loss that could result from broad market movements, such as changes in the general level of interest rates, credit spreads, foreign exchange rates or commodity prices. We use a variety of risk management tools and methodologies to measure, monitor and manage the market risk associated with our trading activities, which include our use of derivative financial instruments. One such risk-management measure is VaR. VaR is an estimate of potential loss for a given period within a stated statistical confidence interval. We use a risk measurement system to measure VaR daily. We have adopted standards for measuring VaR, and we maintain regulatory capital for market risk in accordance with currently applicable regulatory market risk requirements.

Derivative financial instruments are also subject to credit and counterparty risk, which we manage by performing credit reviews, maintaining individual counterparty limits, entering into netting arrangements and requiring the receipt of collateral. Cash collateral received from and provided to counterparties in connection with derivative financial instruments is recorded in accrued expenses and other liabilities and other assets, respectively, in our consolidated statement of condition. As of December 31, 2017 and 2016, we had recorded approximately \$2.55 billion and \$1.99 billion, respectively, of cash collateral received from counterparties and approximately \$869 million and \$4.39 billion, respectively, of cash collateral provided to counterparties in connection with derivative financial instruments in our consolidated statement of condition.

Certain of our derivative assets and liabilities as of December 31, 2017 and 2016 are subject to master netting agreements with our derivative counterparties. Certain of these agreements contain credit risk-related contingent features in which the counterparty has the right to declare us in default and accelerate cash settlement of our net derivative liabilities with the counterparty in the event that our credit rating falls below specified levels. The aggregate fair value of all derivative instruments with credit risk-related contingent features that were in a net liability position as of December 31, 2017 totaled approximately \$1.13 billion, against which we provided no underlying collateral. If our credit rating were downgraded below levels specified in the agreements, the maximum additional amount of payments related to termination events that could have been required pursuant to these contingent features, assuming no change in fair value, as of December 31, 2017 was approximately \$1.13 billion. Such accelerated settlement would be at fair value and therefore not affect our consolidated results of operations.

On the date a derivative contract is entered into, we designate the derivative as: (1) a hedge of the fair value of a recognized fixed-rate asset or liability or of an unrecognized firm commitment (a "fair value" hedge); (2) a hedge of a forecast transaction or of the variability of cash flows to be received or paid related to a recognized variable-rate asset or liability (a "cash flow" hedge); (3) a foreign currency fair value or cash flow hedge (a "foreign currency" hedge); (4) a hedge of a net investment in a non-U.S. operation; or (5) a derivative utilized in either our trading activities or in our asset-and-liability management activities that is not designated as a hedge of an asset or liability.

Unrealized gains and losses on foreign exchange and interest-rate contracts are reported at fair value in our consolidated statement of condition as a component of other assets and accrued expenses and other liabilities, respectively, on a gross basis, except where such gains and losses arise from contracts covered by qualifying master netting agreements.

***Derivatives Not Designated as Hedging Instruments***

In connection with our trading activities, we use derivative financial instruments in our role as a financial intermediary and as both a manager and servicer of financial assets, in order to accommodate our clients' investment and risk management needs. In addition, we use derivative financial instruments for risk management purposes as economic hedges, which are not formally designated as accounting hedges, in order to contribute to our overall corporate earnings and liquidity. These activities are designed

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

to generate trading services revenue and to manage volatility in our NII. The level of market risk that we assume is a function of our overall objectives and liquidity needs, our clients' requirements and market volatility.

With respect to cross-border investing, our clients often enter into foreign exchange forward contracts to convert currency for international investments and to manage the currency risk in their international investment portfolios. As an active participant in the foreign exchange markets, we provide foreign exchange forward contracts and options in support of these client needs, and also act as a dealer in the currency markets. As part of our trading activities, we assume positions in both the foreign exchange and interest-rate markets by buying and selling cash instruments and using derivative financial instruments, including foreign exchange forward contracts, foreign exchange and interest-rate options and interest rate swaps, interest rate forward contracts, and interest rate futures. In the aggregate, we seek to match positions closely with the objective of minimizing related currency and interest-rate risk. We also use foreign currency swap contracts to manage the foreign exchange risk associated with certain foreign currency-denominated liabilities. The foreign exchange swap contracts are entered into for periods generally consistent with foreign currency exposure of the underlying transactions.

The entire change in the fair value of the derivatives utilized in our trading activities are recorded in trading services revenue, and the entire change in fair value of derivatives utilized in our asset-and-liability management activities are recorded in processing fees and other revenue.

We offer products that provide book-value protection primarily to plan participants in stable value funds managed by non-affiliated investment managers of post-retirement defined contribution benefit plans, particularly 401(k) plans. We account for the associated contingencies, more fully described in Note 12, individually as derivative financial instruments. These contracts are valued quarterly and unrealized losses, if any, are recorded in other expenses in our consolidated statement of income.

We grant deferred cash awards to certain of our employees as part of our employee incentive compensation plans. We account for these awards as derivative financial instruments, as the underlying referenced shares are not equity instruments of State Street. The fair value of these derivatives is referenced to the value of units in State Street-sponsored investment funds or funds sponsored by other unrelated entities. We re-measure these derivatives to fair value quarterly, and record the change in value in compensation and employee

benefits expenses in our consolidated statement of income.

***Derivatives Designated as Hedging Instruments***

In connection with our asset-and-liability management activities, we use derivative financial instruments to manage our interest rate risk and foreign currency risk. Interest rate risk, defined as the sensitivity of income or financial condition to variations in interest rates, is a significant non-trading market risk to which our assets and liabilities are exposed. We manage our interest rate risk by identifying, quantifying and hedging our exposures, using fixed-rate portfolio securities and a variety of derivative financial instruments, most frequently interest-rate swaps. Interest rate swap agreements alter the interest-rate characteristics of specific balance sheet assets or liabilities. We use foreign exchange forward and swap contracts to hedge foreign exchange exposure to various foreign currencies with respect to certain assets and liabilities. Our hedging relationships are formally designated, and qualify for hedge accounting, as fair value, cash flow or net investment hedges.

At both the inception of the hedge and on an ongoing basis, we formally assess and document the effectiveness of a derivative designated in a hedging relationship and the likelihood that the derivative will be an effective hedge in future periods. We discontinue hedge accounting prospectively when we determine that the derivative is no longer highly effective in offsetting changes in fair value or cash flows of the underlying risk being hedged, the derivative expires, terminates or is sold, or management discontinues the hedge designation.

***Fair Value Hedges***

Derivatives designated as fair value hedges are utilized to mitigate the risk of changes in the fair values of recognized assets and liabilities. Differences between the gains and losses on the hedging derivative and the gains and losses on the hedged asset or liability attributable to the hedged risk represent hedge ineffectiveness. We use interest rate or foreign exchange contracts in this manner to manage our exposure to changes in the fair value of hedged items caused by changes in interest rates or foreign exchange rates. Changes in the fair value of a derivative that is highly effective, and that is designated and qualifies as a fair value hedge, are recorded in processing fees and other revenue, along with the changes in fair value of the hedged asset or liability attributable to the hedged risk.

We have entered into interest rate swap agreements to modify our interest income from certain AFS investment securities from a fixed rate to a floating rate. The hedged AFS investment securities included hedged trusts that had a

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

weighted-average life of approximately 4.6 years as of December 31, 2017, compared to 4.5 years as of December 31, 2016. These trusts are hedged with interest rate swap contracts of similar maturity, repricing frequency and fixed-rate coupons. The interest rate swap contracts convert the interest income from a fixed rate to a floating rate indexed to LIBOR, thereby mitigating our exposure to fluctuations in the fair value of the securities attributable to changes in the benchmark interest rate.

We have entered into interest rate swap agreements to modify our interest expense on eight senior notes and one subordinated note from fixed rates to floating rates. The senior and subordinated notes are hedged with interest rate swap contracts with notional amounts, maturities and fixed-rate coupon terms that effectively hedge the fixed-rate notes. The interest rate swap contracts convert the fixed-rate coupons to floating rates indexed to LIBOR, thereby mitigating our exposure to fluctuations in the fair values of the senior and subordinated notes stemming from changes in the benchmark interest rates. The table below summarizes the maturities and the paid fixed interest rates for the hedged senior and subordinated notes:

December 31, 2017	Maturity	Paid Fixed Interest Rate
<b>Senior Notes</b>		
	2020	2.55%
	2021	4.38
	2021	1.95
	2022	2.65
	2023	3.70
	2024	3.30
	2025	3.55
	2026	2.65
<b>Subordinated Notes</b>		
	2023	3.10

We have entered into foreign exchange swap contracts to hedge the change in fair value attributable to foreign exchange movements in our foreign currency denominated investment securities and deposits. These forward contracts convert the foreign currency risk to U.S. dollars, thereby mitigating our exposure to fluctuations in the fair value of the securities and deposits attributable to changes in foreign exchange rates. Generally, no ineffectiveness is recorded in earnings, since the notional amount of the hedging instruments is aligned with the carrying value of the hedged securities and deposits. The forward points on the hedging instruments are considered to be a hedging cost, and accordingly are excluded from the evaluation of hedge effectiveness and recorded in NII. Changes in the fair value of a derivative that are highly effective,

and that are designated and qualify as a foreign currency hedge, are recorded in processing fees and other revenue.

*Cash Flow Hedges*

Derivatives categorized as cash flow hedges are utilized to offset the variability of cash flows to be received from or paid on a floating-rate asset or liability. Ineffectiveness of cash flow hedges is defined as the extent to which the changes in fair value of the derivative exceed the changes in the present value of the forecasted cash flows attributable to the forecasted transaction.

We have entered into foreign exchange contracts to hedge the change in cash flows attributable to foreign exchange movements in foreign currency denominated investment securities. These foreign exchange contracts convert the foreign currency risk to U.S. dollars, thereby mitigating our exposure to fluctuations in the cash flows of the securities attributable to changes in foreign exchange rates. Generally, no ineffectiveness is recorded in earnings, since the critical terms of the hedging instruments and the hedged securities are aligned. Changes in the fair value of the derivative that are highly effective, and that are designated and qualify as a foreign currency hedge, are recorded in other comprehensive income.

We have entered into an interest rate swap agreement to hedge the forecasted cash flows associated with LIBOR-indexed floating-rate loans. The interest rate swaps synthetically convert the loan interest receipts from a variable-rate to a fixed-rate, thereby mitigating the risk attributable to changes in the LIBOR benchmark rate. As of December 31, 2017, the maximum maturity date of the underlying loans is approximately 4.9 years.

*Net Investment Hedges*

We have entered into foreign exchange contracts to protect the net investment in our foreign operations against adverse changes in exchange rates. These forward contracts convert the foreign currency risk to U.S. dollars, thereby mitigating our exposure to fluctuations in the fair value of our net investments in our foreign operations attributable to changes in foreign exchange rates. The changes in fair value of the foreign exchange forward contracts are recorded, net of taxes, in the foreign currency translation component of other comprehensive income.

Effectiveness of net investment hedges is based on the overall changes in the fair value of the forward contracts and we measure the ineffectiveness of net investment hedge based on changes in forward foreign currency rates. There was no ineffectiveness for our net investment hedge during 2017.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following table presents the aggregate contractual, or notional, amounts of derivative financial instruments entered into in connection with our trading and asset-and-liability management activities as of the dates indicated:

(In millions)	December 31, 2017	December 31, 2016
<b>Derivatives not designated as hedging instruments:</b>		
Interest-rate contracts:		
Futures	2,392	13,455
Foreign exchange contracts:		
Forward, swap and spot	1,679,976	1,414,765
Options purchased	350	337
Options written	302	202
Futures	50	—
Commodity and equity contracts:		
Commodity <sup>(1)</sup>	16	—
Equity <sup>(1)</sup>	50	—
Other:		
Stable value contracts	26,653	27,182
Deferred value awards <sup>(2)(3)</sup>	473	409
<b>Derivatives designated as hedging instruments:</b>		
Interest-rate contracts:		
Swap agreements	11,047	10,169
Foreign exchange contracts:		
Forward and swap	28,913	8,564

<sup>(1)</sup> Primarily composed of positions held by a consolidated sponsored investment fund, more fully described in Note 14.  
<sup>(2)</sup> Represents grants of deferred value awards to employees; refer to discussion in this note under "Derivatives Not Designated as Hedging Instruments."  
<sup>(3)</sup> Amount as of December 31, 2016 reflects \$249 million related to the acceleration of expense associated with certain cash settled deferred incentive compensation awards.

In connection with our asset-and-liability management activities, we have entered into interest-rate contracts designated as fair value and cash flow hedges to manage our interest rate risk. The following tables present the aggregate notional amounts of these interest rate contracts and the related assets or liabilities being hedged as of the dates indicated:

(In millions)	December 31, 2017		
	Fair Value Hedges	Cash Flow Hedges <sup>(1)</sup>	Total
Investment securities available for sale	\$ 1,254	\$ —	\$ 1,254
Long-term debt <sup>(2)</sup>	8,493	—	8,493
Floating rate loans	—	1,300	1,300
<b>Total</b>	<b>\$ 9,747</b>	<b>\$ 1,300</b>	<b>\$ 11,047</b>
(In millions)	December 31, 2016		
	Fair Value Hedges	Cash Flow Hedges	Total
Investment securities available for sale	\$ 1,444	\$ —	\$ 1,444
Long-term debt <sup>(2)</sup>	8,725	—	8,725
Floating rate loans	—	—	—
<b>Total</b>	<b>\$ 10,169</b>	<b>\$ —</b>	<b>\$ 10,169</b>

<sup>(1)</sup> In 2017, we entered into interest-rate contracts designated as cash flow hedges for floating rate loans.  
<sup>(2)</sup> As of December 31, 2017 and December 31, 2016, these fair value hedges decreased the carrying value of long-term debt presented in our consolidated statement of condition by \$87 million and \$15 million, respectively.

Notional amounts of derivative financial instruments are not recorded in the consolidated statement of condition. They are provided here as an indication of the volume of our derivative activity and do not represent a measure of our potential gains or losses. The notional amounts are not required to be exchanged for most of our derivative contracts and they generally serve as a reference to calculate the fair values of the derivatives.

The following table presents the contractual and weighted-average interest rates for long-term debt, which include the effects of the fair value hedges presented in the table above, for the periods indicated:

	Years Ended December 31,			
	2017		2016	
	Contractual Rates	Rate Including Impact of Hedges	Contractual Rates	Rate Including Impact of Hedges
Long-term debt	3.34%	2.66%	3.40%	2.29%

**STATE STREET CORPORATION**

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 11. Offsetting Arrangements**

We manage credit and counterparty risk by entering into enforceable netting agreements and other collateral arrangements with counterparties to derivative contracts and secured financing transactions, including resale and repurchase agreements, and principal securities borrowing and lending agreements. These netting agreements mitigate our counterparty credit risk by providing for a single net settlement with a counterparty of all financial transactions covered by the agreement in an event of default as defined under such agreement. In limited cases, a netting agreement may also provide for the periodic netting of settlement payments with respect to multiple different transaction types in the normal course of business. Certain of our derivative contracts are executed under either standardized netting agreements or, for exchange-traded derivatives, the relevant contracts for a particular exchange which contain enforceable netting provisions. In certain cases, we may have cross-product netting arrangements which allow for netting and set-off of a variety of types of derivatives with a single counterparty. A derivative netting arrangement creates an enforceable right of set-off that becomes effective, and effects the realization or settlement of individual financial assets and liabilities, only following a specified event of default. Collateral requirements associated with our derivative contracts are determined after a review of the creditworthiness of each counterparty, and the requirements are monitored and adjusted daily, typically based on net exposure by counterparty. Collateral is generally in the form of cash or highly liquid U.S. government securities.

In connection with secured financing transactions, we enter into netting agreements and other collateral arrangements with counterparties, which provide for the right to liquidate collateral in the event of default. Collateral is generally required in the form of cash, equity securities or fixed-income securities. Default events may include the failure to make payments or deliver securities timely, material adverse changes in financial condition or insolvency, the breach of minimum regulatory capital requirements, or loss of license, charter or other legal

authorization necessary to perform under the contract.

In order for an arrangement to be eligible for netting, we must have a reasonable basis to conclude that such netting arrangements are legally enforceable. The analysis of the legal enforceability of an arrangement differs by jurisdiction, depending on the laws of that jurisdiction. In many jurisdictions, specific legislation exists that provides for the enforceability in bankruptcy of close-out netting under a netting agreement, typically by way of specific exception from more general prohibitions on the exercise of creditor rights.

When we have a legally enforceable netting arrangement between us and the derivative counterparty and the relevant transaction is the type of transaction that is recorded in our consolidated statement of condition, we offset derivative assets and liabilities, and the related collateral received and provided, in our consolidated statement of condition. We also offset assets and liabilities related to secured financing transactions with the same counterparty or clearinghouse which have the same maturity date and are settled in the normal course of business on a net basis.

Collateral that we receive in the form of securities in connection with secured financing transactions and derivative contracts can be transferred or re-pledged as collateral in many instances to enter into repurchase agreements or securities finance or derivative transactions. The securities collateral received in connection with our securities finance activities is recorded at fair value in other assets in our consolidated statement of condition, with a related liability to return the collateral, if we have the right to transfer or re-pledge the collateral. As of December 31, 2017 and December 31, 2016, the fair value of securities received as collateral from third parties where we are permitted to transfer or re-pledge the securities totaled \$2.47 billion and \$1.77 billion, respectively, and the fair value of the portion that had been transferred or re-pledged as of the same dates was \$15 million and \$166 million, respectively.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The securities transferred under resale and repurchase agreements typically are U.S. Treasury, agency and agency MBS. In our principal securities borrowing and lending arrangements, the securities transferred are predominantly equity securities and some corporate debt securities. The fair value of the securities transferred may increase in value to an amount greater than the amount received under our repurchase and securities lending arrangements, which exposes the Company with counterparty risk. We require the review of the price of the underlying

securities in relation to the carrying value of the repurchase agreements and securities lending arrangements on a daily basis and when appropriate, adjust the cash or security to be obtained or returned to counterparties that is reflective of the required collateral levels.

The following tables summarize our repurchase agreements and securities lending transactions by category of collateral pledged and remaining maturity of these agreements as of the periods indicated:

(In millions)	Remaining Contractual Maturity of the Agreements			
	As of December 31, 2017

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 12. Commitments and Guarantees**

The following table presents the aggregate gross contractual amounts of our off-balance sheet commitments and off-balance sheet guarantees as of the dates indicated.

(In millions)	December 31, 2017	December 31, 2016
<b>Commitments:</b>		
Unfunded credit facilities	\$ 26,488	\$ 26,993
<b>Guarantees<sup>(1)</sup>:</b>		
Indemnified securities financing	\$ 381,817	\$ 360,452
Stable value protection	26,653	27,182
Standby letters of credit	3,158	3,459

<sup>(1)</sup> The potential losses associated with these guarantees equal the gross contractual amounts and do not consider the value of any collateral or reflect any participations to independent third parties.

*Unfunded Credit Facilities*

Unfunded credit facilities consist of liquidity facilities for our fund and municipal lending clients and undrawn lines of credit related to senior secured bank loans.

As of December 31, 2017, approximately 72% of our unfunded commitments to extend credit expire within one year. Since many of these commitments are expected to expire or renew without being drawn upon, the gross contractual amounts do not necessarily represent our future cash requirements.

*Indemnified Securities Financing*

On behalf of our clients, we lend their securities, as agent, to brokers and other institutions. In most circumstances, we indemnify our clients for the fair market value of those securities against a failure of the borrower to return such securities. We require the borrowers to maintain collateral in an amount in excess of 100% of the fair market value of the securities borrowed. Securities on loan and the collateral are revalued daily to determine if additional collateral is necessary or if excess collateral is required to be returned to the borrower. Collateral received in connection with our securities lending services is held by us as agent and is not recorded in our consolidated statement of condition.

The cash collateral held by us as agent is invested on behalf of our clients. In certain cases, the cash collateral is invested in third-party repurchase agreements, for which we indemnify the client against loss of the principal invested. We require the counterparty to the indemnified repurchase agreement to provide collateral in an amount in excess of 100% of the amount of the repurchase agreement. In our role as agent, the indemnified repurchase agreements and the related collateral

held by us are not recorded in our consolidated statement of condition.

The following table summarizes the aggregate fair values of indemnified securities financing and related collateral, as well as collateral invested in indemnified repurchase agreements, as of the dates indicated:

(In millions)	December 31, 2017	December 31, 2016
Fair value of indemnified securities financing	\$ 381,817	\$ 360,452
Fair value of cash and securities held by us, as agent, as collateral for indemnified securities financing	400,828	377,919
Fair value of collateral for indemnified securities financing invested in indemnified repurchase agreements	61,270	60,003
Fair value of cash and securities held by us or our agents as collateral for investments in indemnified repurchase agreements	65,272	63,959

In certain cases, we participate in securities finance transactions as a principal. As a principal, we borrow securities from the lending client and then lend such securities to the subsequent borrower, either a State Street client or a broker/dealer. Our right to receive and obligation to return collateral in connection with our securities lending transactions are recorded in other assets and other liabilities, respectively, in our consolidated statement of condition. As of December 31, 2017 and December 31, 2016, we had approximately \$19.40 billion and \$21.20 billion, respectively, of collateral provided and approximately \$3.85 billion and \$5.02 billion, respectively, of collateral received from clients in connection with our participation in principal securities finance transactions.

*Stable Value Protection*

In the normal course of our business, we offer products that provide book-value protection, primarily to plan participants in stable value funds managed by non-affiliated investment managers of post-retirement defined contribution benefit plans, particularly 401(k) plans. The book-value protection is provided on portfolios of intermediate investment grade fixed-income securities, and is intended to provide safety and stable growth of principal invested. The protection is intended to cover any shortfall in the event that a significant number of plan participants withdraw funds when book value exceeds market value and the liquidation of the assets is not sufficient to redeem the participants. The investment parameters of the underlying portfolios, combined with structural protections, are designed to provide cushion and guard against payments even under extreme stress scenarios.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

These contingencies are individually accounted for as derivative financial instruments. The notional amounts of the stable value contracts are presented as "derivatives not designated as hedging instruments" in the table of aggregate notional amounts of derivative financial instruments provided in Note 10. We have not made a payment under these contingencies that we consider material to our consolidated financial condition, and management believes that the probability of payment under these contingencies in the future, that we would consider material to our consolidated financial condition, is remote.

*Standby Letters of Credit*

Standby letters of credit provide credit enhancement to our municipal clients to support the issuance of capital markets financing.

**Note 13. Contingencies**

***Legal and Regulatory Matters***

In the ordinary course of business, we and our subsidiaries are involved in disputes, litigation, and governmental or regulatory inquiries and investigations, both pending and threatened. These matters, if resolved adversely against us or settled, may result in monetary damages, fines and penalties or require changes in our business practices. The resolution or settlement of these matters is inherently difficult to predict. Based on our assessment of these pending matters, we do not believe that the amount of any judgment, settlement or other action arising from any pending matter is likely to have a material adverse effect on our consolidated financial condition. However, an adverse outcome in certain of the matters described below could have a material adverse effect on our consolidated results of operations for the period in which such matter is resolved, or an accrual is determined to be required, on our consolidated financial condition, or on our reputation.

We evaluate our needs for accruals of loss contingencies related to legal and regulatory proceedings on a case-by-case basis. When we have a liability that we deem probable, and we deem the amount of such liability can be reasonably estimated as of the date of our consolidated financial statements, we accrue our estimate of the amount of loss. We also consider a loss probable and establish an accrual when we make, or intend to make, an offer of settlement. Once established, an accrual is subject to subsequent adjustment as a result of additional information. The resolution of legal and regulatory proceedings and the amount of reasonably estimable loss (or range thereof) are inherently difficult to predict, especially in the early stages of proceedings. Even if a loss is probable, an amount (or range) of

loss might not be reasonably estimated until the later stages of the proceeding due to many factors such as the presence of complex or novel legal theories, the discretion of governmental authorities in seeking sanctions or negotiating resolutions in civil and criminal matters, the pace and timing of discovery and other assessments of facts and the procedural posture of the matter (collectively, "factors influencing reasonable estimates").

As of December 31, 2017, our aggregate accruals for loss contingencies for legal and regulatory matters totaled approximately \$12 million. To the extent that we have established accruals in our consolidated statement of condition for probable loss contingencies, such accruals may not be sufficient to cover our ultimate financial exposure associated with any settlements or judgments. Any such ultimate financial exposure, or proceedings to which we may become subject in the future, could have a material adverse effect on our businesses, on our future consolidated financial statements or on our reputation. Except where otherwise noted below, we have not established significant accruals with respect to the claims discussed.

We have identified certain matters for which loss is reasonably possible (but not probable) in future periods, whether in excess of an accrued liability or where there is no accrued liability, and for which we are able to estimate a range of reasonably possible loss. As of December 31, 2017, our estimate of the range of reasonably possible loss for these matters is from zero to approximately \$15 million in the aggregate. Our estimate with respect to the aggregate range of reasonably possible loss is based upon currently available information and is subject to significant judgment and a variety of assumptions and known and unknown uncertainties. The matters underlying the estimated range will change from time to time, and actual results may vary significantly from the current estimate.

In certain other pending matters, including the invoicing matter, Federal Reserve/Massachusetts Division of Banks written agreement and shareholder litigation matters discussed below, it is not currently feasible to reasonably estimate the amount or a range of reasonably possible loss (including reasonably possible loss in excess of amounts accrued), and such losses, which may be significant, are not included in the estimate of reasonably possible loss discussed above. This is due to, among other factors, the factors influencing reasonable estimates described above. These factors are particularly prevalent in governmental and regulatory inquiries and investigations. As a result, reasonably possible loss estimates often are not feasible until the later stages of the inquiry or investigation or of any related legal or regulatory proceeding. An adverse

STATE STREET CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

outcome in one or more of the matters for which we have not estimated the amount or a range of reasonably possible loss, individually or in the aggregate, could have a material adverse effect on our businesses, on our future consolidated financial statements or on our reputation. Given that we cannot estimate reasonably possible loss for all legal and regulatory proceedings as to which we may be subject now or in the future, including matters that if adversely concluded may present material financial, regulatory and reputational risks, no conclusion as to the ultimate exposure from current pending or potential legal or regulatory proceedings should be drawn from the current estimate of reasonably possible loss.

The following discussion provides information with respect to significant legal, governmental and regulatory matters.

*Invoicing Matter*

In December 2015, we announced a review of the manner in which we invoiced certain expenses to some of our Investment Servicing clients, primarily in the United States, during an 18-year period going back to 1998, and our determination that we had incorrectly invoiced clients for certain expenses. We informed our clients in December 2015 that we will pay to them the amounts we concluded were incorrectly invoiced to them, plus interest. We are implementing enhancements to our billing processes, and we are reviewing the conduct of our employees and have taken appropriate steps to address conduct inconsistent with our standards, including, in some cases, termination of employment. In connection with our enhancements to our billing processes, we continue to review historical billing practices and may from time to time identify additional remediation. We currently expect the cumulative total of our payments to customers for these matters to be at least \$360 million.

We have received a purported class action demand letter alleging that our invoicing practices were unfair and deceptive under Massachusetts law. A class of customers, or particular customers, may assert that we have not paid to them all amounts incorrectly invoiced, and may seek double or treble damages under Massachusetts law. In addition, in March 2017, a purported class action was commenced against us alleging that our invoicing practices violated duties owed to retirement plan customers under ERISA.

We are also responding to requests for information from, and are cooperating with investigations by, governmental and regulatory authorities on these matters, including the civil and criminal divisions of the DOJ, the SEC, the DOL, the Massachusetts Attorney General, and the New

Hampshire Bureau of Securities Regulation, which could result in significant fines or other sanctions, civil and criminal, against us. If these governmental or regulatory authorities were to conclude that all or a portion of the billing errors merited civil or criminal sanctions, any fine or other penalty could be a significant percentage, or a multiple of, the portion of the overcharging serving as the basis of such a claim or of the full amount overcharged. The governmental and regulatory authorities have significant discretion in civil and criminal matters as to the fines and other penalties they may seek to impose. The severity of such fines or other penalties could take into account factors such as the amount and duration of our incorrect invoicing, the government's or regulator's assessment of the conduct of our employees, as well as prior conduct such as that which resulted in our January 2017 deferred prosecution agreement in connection with transition management services and our recent settlement of civil claims regarding our indirect foreign exchange business.

The outcome of any of these proceedings and, in particular, any criminal sanction could materially adversely affect our results of operations and could have significant collateral consequences for our business and reputation.

*Federal Reserve/Massachusetts Division of Banks Written Agreement*

On June 1, 2015, we entered into a written agreement with the Federal Reserve and the Massachusetts Division of Banks relating to deficiencies identified in our compliance programs with the requirements of the Bank Secrecy Act, AML regulations and U.S. economic sanctions regulations promulgated by OFAC. As part of this enforcement action, we have been required to, among other things, implement improvements to our compliance programs and to retain an independent firm to conduct a review of account and transaction activity to evaluate whether any suspicious activity was not previously reported. If we fail to comply with the terms of the written agreement, we may become subject to fines and other regulatory sanctions, which may have a material adverse effect on us.

*Shareholder Litigation*

A State Street shareholder has filed a purported class action complaint against the Company alleging that the Company's financial statements in its annual reports for the 2011-2014 period were misleading due to the inclusion of revenues associated with the invoicing matter referenced above and the facts surrounding our 2017 settlements with the U.S. government relating to our transition management business. In addition, a State Street shareholder has filed a derivative complaint against the Company's past and present officers and directors to recover

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

alleged losses incurred by the Company relating to the invoicing matter and to our Ohio public retirement plans matter.

**Income Taxes**

In determining our provision for income taxes, we make certain judgments and interpretations with respect to tax laws in jurisdictions in which we have business operations. Because of the complex nature of these laws, in the normal course of our business, we are subject to challenges from U.S. and non-U.S. income tax authorities regarding the amount of income taxes due. These challenges may result in adjustments to the timing or amount of taxable income or deductions or the allocation of taxable income among tax jurisdictions. We recognize a tax benefit when it is more likely than not that our position will result in a tax deduction or credit. Additional information with respect to our provision for income taxes and tax benefits, including unrecognized tax benefits, is provided in Note 22.

We are presently under audit by a number of tax authorities, and the Internal Revenue Service is currently reviewing our U.S. income tax returns for the tax years 2014 and 2015. The earliest tax year open to examination in jurisdictions where we have material operations is 2011. Management believes that we have sufficiently accrued liabilities as of December 31, 2017 for tax exposures.

**Note 14. Variable Interest Entities**

We are involved, in the normal course of our business, with various types of special purpose entities, some of which meet the definition of VIEs. When evaluating a VIE for consolidation, we must determine whether or not we have a variable interest in the entity. Variable interests are investments or other interests that absorb portions of an entity's expected losses or receive portions of the entity's expected returns. If it is determined that State Street does not have a variable interest in the VIE, no further analysis is required and State Street does not consolidate the VIE. If State Street holds a variable interest in a VIE, we are required by U.S. GAAP to consolidate that VIE when we have a controlling financial interest in the VIE and therefore are deemed to be the primary beneficiary. State Street is determined to have a controlling financial interest in a VIE when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to that VIE. This determination is evaluated periodically as facts and circumstances change.

**Asset-Backed Investment Securities**

We invest in various forms of ABS, which we

carry in our investment securities portfolio. These ABS meet the U.S. GAAP definition of asset securitization entities, which are considered to be VIEs. We are not considered to be the primary beneficiary of these VIEs since we do not have control over their activities. Additional information about our ABS is provided in Note 3.

**Tax-Exempt Investment Program**

In the normal course of our business, we structure and sell certificated interests in pools of tax-exempt investment-grade assets, principally to our mutual fund clients. We structure these pools as partnership trusts, and the assets and liabilities of the trusts are recorded in our consolidated statement of condition as AFS investment securities and other short-term borrowings. As of December 31, 2017 and December 31, 2016, we carried AFS investment securities, composed of securities related to state and political subdivisions, with a fair value of \$1.25 billion and \$1.35 billion, respectively, and other short-term borrowings of \$1.08 billion and \$1.16 billion, respectively, in our consolidated statement of condition in connection with these trusts. The interest income and interest expense generated by the investments and certificated interests, respectively, are recorded as components of NII when earned or incurred.

We transfer assets to the trusts from our investment securities portfolio at adjusted book value, and the trusts finance the acquisition of these assets by selling certificated interests issued by the trust to third-party investors and to State Street as residual holder. These transfers do not meet the de-recognition criteria defined by U.S. GAAP, and therefore, the assets continue to be recorded in our consolidated financial statements. The trusts had a weighted-average life of approximately 4.6 years as of December 31, 2017, compared to approximately 4.5 years as of December 31, 2016.

Under separate legal agreements, we provide liquidity facilities to these trusts and, with respect to certain securities, letters of credit. As of December 31, 2017, our commitments to the trusts under these liquidity facilities and letters of credit totaled \$1.10 billion and \$351 million, respectively, and none of the liquidity facilities or letters of credit, were utilized. In the event that our obligations under these liquidity facilities are triggered, no material impact to our consolidated results of operations or financial condition is expected to occur, because the securities are already recorded at fair value in our consolidated statement of condition. In addition, neither creditors or third-party investors in the trusts have any recourse to State Street's general credit other than through the liquidity facilities and letters of credit noted above.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Interests in Investment Funds**

In the normal course of business, we manage various types of investment funds through SSGA in which our clients are investors, including SSGA commingled investment vehicles and other similar investment structures. The majority of our AUM are contained within such funds. The services we provide to these funds generate management fee revenue. From time to time, we may invest cash in the funds in order for the funds to establish a performance history for newly-launched strategies, referred to as seed capital, or for other purposes.

With respect to our interests in funds that meet the definition of a VIE, a primary beneficiary assessment is performed to determine if we have a controlling financial interest. As part of our assessment, we consider all the facts and circumstances regarding the terms and characteristics of the variable interest(s), the design and characteristics of the fund and the other involvements of the enterprise with the fund. Upon consolidation of certain funds, we retain the specialized investment company accounting rules followed by the underlying funds.

All of the underlying investments held by such consolidated funds are carried at fair value, with corresponding changes in the investments' fair values reflected in trading services revenue in our consolidated statement of income. When we no longer control these funds due to a reduced ownership interest or other reasons, the funds are de-consolidated and accounted for under another accounting method if we continue to maintain investments in the funds.

As of December 31, 2017, the aggregate assets and liabilities of our consolidated sponsored investment funds totaled \$149 million and \$50 million, respectively. As of December 31, 2016, we had no

consolidated funds.

As of December 31, 2017, our potential maximum total exposure associated with the consolidated sponsored investment funds totaled \$100 million and represented the value of our economic ownership interest in the funds.

Our conclusion to consolidate a fund may vary from period to period, most commonly as a result of fluctuation in our ownership interest as a result of changes in the number of fund shares held by either us or by third parties. Given that the funds follow specialized investment company accounting rules which prescribe fair value, a de-consolidation generally would not result in gains or losses for us.

The net assets of any consolidated fund are solely available to settle the liabilities of the fund and to settle any investors' ownership redemption requests, including any seed capital invested in the fund by State Street. We are not contractually required to provide financial or any other support to any of our funds. In addition, neither creditors nor equity investors in the funds have any recourse to State Street's general credit.

As of December 31, 2017 and December 31, 2016, we managed certain funds, considered VIEs, in which we held a variable interest but for which we were not deemed to be the primary beneficiary. Our potential maximum loss exposure related to these unconsolidated funds totaled \$72 million and \$121 million as of December 31, 2017 and December 31, 2016, respectively, and represented the carrying value of our investments, which are recorded in either AFS investment securities or other assets in our consolidated statement of condition. The amount of loss we may recognize during any period is limited to the carrying amount of our investments in the unconsolidated funds.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 15. Shareholders' Equity**

**Preferred Stock**

The following table summarizes selected terms of each of the series of the preferred stock issued and outstanding as of December 31, 2017:

	Issuance Date	Depository Shares Issued	Ownership Interest Per Depository Share	Liquidation Preference Per Share	Liquidation Preference Per Depository Share	Net Proceeds of Offering (In millions)	Redemption Date <sup>(1)</sup>
<b>Preferred Stock<sup>(2)</sup>:</b>							
Series C	August 2012	20,000,000	1/4,000th	\$ 100,000	\$ 25	\$ 488	September 15, 2017
Series D	February 2014	30,000,000	1/4,000th	100,000	25	742	March 15, 2024
Series E	November 2014	30,000,000	1/4,000th	100,000	25	728	December 15, 2019
Series F	May 2015	750,000	1/100th	100,000	1,000	742	September 15, 2020
Series G	April 2016	20,000,000	1/4,000th	100,000	25	493	March 15, 2026

<sup>(1)</sup> On the redemption date, or any dividend declaration date thereafter, the preferred stock and corresponding depository shares may be redeemed by us, in whole or in part, at the liquidation price per share and liquidation price per depository share plus any declared and unpaid dividends, without accumulation of any undeclared dividends.

<sup>(2)</sup> The preferred stock and corresponding depository shares may be redeemed at our option in whole, but not in part, prior to the redemption date upon the occurrence of a regulatory capital treatment event, as defined in the certificate of designation, at a redemption price equal to the liquidation price per share and liquidation price per depository share plus any declared and unpaid dividends, without accumulation of any undeclared dividends.

The following table present the dividends declared for each of the series of preferred stock issued and outstanding for the periods indicated:

	Years Ended December 31,					
	2017			2016		
	Dividends Declared per Share	Dividends Declared per Depository Share	Total (In millions)	Dividends Declared per Share	Dividends Declared per Depository Share	Total (In millions)
<b>Preferred Stock:</b>						
Series C	\$ 5,250	\$ 1.32	\$ 26	\$ 5,250	\$ 1.32	\$ 26
Series D	5,900	1.48	44	5,900	1.48	44
Series E	6,000	1.52	45	6,000	1.52	45
Series F	5,250	52.50	40	5,250	52.50	40
Series G	5,352	1.32	27	3,626	0.90	18
Total			<u>\$ 182</u>			<u>\$ 173</u>

In February 2018, we declared dividends on our Series C, D, E, F and G preferred stock of approximately \$1,313, \$1,475, \$1,500, \$2,625 and \$1,338, respectively, per share, or approximately \$0.33, \$0.37, \$0.38, \$26.25 and \$0.33, respectively, per depository share. These dividends total approximately \$6 million, \$11 million, \$11 million, \$20 million and \$7 million on our Series C, D, E, F and G preferred stock, respectively, which will be paid in March 2018.

**Common Stock**

In June 2017, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2018 (the 2017 Program).

In June 2016, our Board approved a common stock purchase program authorizing the purchase of up to \$1.4 billion of our common stock through June 30, 2017 (the 2016 Program). The table below presents the activity under both the 2017 Program and 2016 Program during the year ended December 31, 2017:

	Shares Acquired (In millions)	Average Cost per Share	Total Acquired (In millions)
2016 Program <sup>(1)</sup>	9.4	\$ 79.93	\$ 750
2017 Program	7.4	94.54	700
Total	<u>16.8</u>	<u>\$ 86.37</u>	<u>\$ 1,450</u>

<sup>(1)</sup> Includes \$158 million relating to shares acquired in exchange for BFDS stock during the first quarter of 2017. Additional information about the exchange is provided in Note 1 to the consolidated financial statements included in this Form 10-K.

The following table presents after-tax reclassifications into earnings for the periods indicated:

(In millions)	Years Ended December 31,		Affected Line Item in Consolidated Statement of Income
	2017	2016	
	Amounts Reclassified into (out of) Earnings		
<b>Available-for-sale securities:</b>			
Net realized gains (losses) from sales of available-for-sale securities, net of related taxes of \$16 and (\$4), respectively	\$ (23)	\$ 6	Net gains (losses) from sales of available-for-sale securities
<b>Held-to-maturity securities:</b>			
Other-than-temporary impairment on held-to-maturity securities related to factors other than credit, net of related taxes of \$0 and \$1, respectively	—	(1)	Losses reclassified (from) to other comprehensive income
<b>Retirement plans:</b>			
Amortization of actuarial losses, net of related taxes of (\$8) and (\$1), respectively	24	(11)	Compensation and employee benefits expenses
<b>Foreign currency translation:</b>			
Sales of non-U.S. entities, net of related taxes of \$0 and (\$2), respectively	1	(3)	Processing fees and other revenue
Total reclassifications (out of) into AOCI	\$ 2	\$ (9)	

**Note 16. Regulatory Capital**

We are subject to various regulatory capital requirements administered by federal banking agencies. Failure to meet minimum regulatory capital requirements can initiate certain mandatory and discretionary actions by regulators that, if undertaken, could have a direct material effect on our consolidated financial condition. Under current regulatory capital adequacy guidelines, we must meet specified capital requirements that involve quantitative measures of our consolidated assets, liabilities and off-balance sheet exposures calculated in conformity with regulatory accounting practices. Our capital components and their classifications are subject to qualitative judgments by regulators about components, risk weightings and other factors.

As required by the Dodd-Frank Act, State Street and State Street Bank, as advanced approaches banking organizations, are subject to a permanent "capital floor" in the calculation and assessment of their regulatory capital adequacy by U.S. banking regulators. Beginning on January 1, 2015, we were required to calculate our risk-based capital ratios using both the advanced approaches and the standardized approach. As a result, from January 1, 2015 going forward, our risk-based capital ratios for regulatory assessment purposes are the lower of each ratio calculated under the standardized approach and the advanced approaches.

The methods for the calculation of our and State Street Bank's risk-based capital ratios will change as

the provisions of the Basel III final rule related to the numerator (capital) and denominator (risk-weighted assets) are phased in, and as we begin calculating our risk-weighted assets using the advanced approaches. These ongoing methodological changes will result in differences in our reported capital ratios from one reporting period to the next that are independent of applicable changes to our capital base, our asset composition, our off-balance sheet exposures or our risk profile.

As of December 31, 2017, State Street and State Street Bank exceeded all regulatory capital adequacy requirements to which they were subject. As of December 31, 2017, State Street Bank was categorized as "well capitalized" under the applicable regulatory capital adequacy framework, and exceeded all "well capitalized" ratio guidelines to which it was subject. Management believes that no conditions or events have occurred since December 31, 2017 that have changed the capital categorization of State Street Bank.

The following table presents the regulatory capital structure, total risk-weighted assets, related regulatory capital ratios and the minimum required regulatory capital ratios for State Street and State Street Bank as of the dates indicated. As a result of changes in the methodologies used to calculate our regulatory capital ratios from period to period as the provisions of the Basel III final rule are phased in, the ratios presented in the table for each period-end are not directly comparable. Refer to the footnotes following the table.

Total capital	10.0	9.0	16.5	16.0	16.0	16.0	18.2	17.6	17.7
Tier 1 leverage	4.0	4.0	7.3	7.3	6.5	6.5	8.0	8.0	7.1

<sup>(1)</sup> CET1 capital, tier 1 capital and total capital ratios as of December 31, 2017 and December 31, 2016 were calculated in conformity with the advanced approaches provisions of the Basel III final rule. Tier 1 leverage ratio as of December 31, 2017 and December 31, 2016 were calculated in conformity with the Basel III final rule.

<sup>(2)</sup> CET1 capital, tier 1 capital and total capital ratios as of December 31, 2017 and December 31, 2016 were calculated in conformity with the standardized approach provisions of the Basel III final rule. Tier 1 leverage ratio as of December 31, 2017 and December 31, 2016 were calculated in conformity with the Basel III final rule.

<sup>(3)</sup> Amounts for State Street and State Street Bank as of December 31, 2017 consisted of goodwill, net of associated deferred tax liabilities, and 80% of other intangible assets, net of associated deferred tax liabilities. Amounts for State Street and State Street Bank as of December 31, 2016 consisted of goodwill, net of deferred tax liabilities and 60% of other intangible assets, net of associated deferred tax liabilities. Intangible assets, net of associated deferred tax liabilities is phased in as a deduction from capital, in conformity with the Basel III final rule.

<sup>(4)</sup> Under the current advanced approaches rules and regulatory guidance concerning operational risk models, RWA attributable to operational risk can vary substantially from period-to-period, without direct correlation to the effects of a particular loss event on our results of operations and financial condition and impacting dates and periods that may differ from the dates and periods as of and during which the loss event is reflected in our financial statements, with the timing and categorization dependent on the processes for model updates and, if applicable, model revalidation and regulatory review and related supervisory processes. An individual loss event can have a significant effect on the output of our operational risk RWA under the advanced approaches depending on the severity of the loss event and its categorization among the seven Basel-defined UOMs.

<sup>(5)</sup> Market risk risk-weighted assets reported in conformity with the Basel III advanced approaches included a CVA which reflected the risk of potential fair value adjustments for credit risk reflected in our valuation of over-the-counter derivative contracts. The CVA was not provided for in the final market risk capital rule; however, it was required by the advanced approaches provisions of the Basel III final rule. We used a simple CVA approach in conformity with the Basel III advanced approaches.

<sup>(6)</sup> Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2017.

<sup>(7)</sup> Minimum requirements will be phased in up to full implementation beginning on January 1, 2019; minimum requirements listed are as of December 31, 2016.

<sup>(8)</sup> Not applicable

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 17. Net Interest Income**

The following table presents the components of interest income and interest expense, and related NII, for the periods indicated:

(In millions)	Years Ended December 31,		
	2017	2016	2015
<b>Interest income:</b>			
Deposits with banks	\$ 180	\$ 126	\$ 208

<b>Total interest expense</b>	<b>604</b>	<b>428</b>	<b>400</b>
<b>Net interest income</b>	<b>\$ 2,304</b>	<b>\$ 2,084</b>	<b>\$ 2,088</b>

**Note 18. Equity-Based Compensation**

We record compensation expense for equity-based awards, such as restricted stock, deferred stock and performance awards, based on the closing price of our common stock on the date of grant, adjusted if appropriate based on the award's eligibility to receive dividends. The fair value of stock appreciation rights are determined using the Black-Scholes valuation model.

Compensation expense related to equity-based awards with service-only conditions and terms that provide for a graded vesting schedule is recognized on a straight-line basis over the required service period for the entire award. Compensation expense related to equity-based awards with performance conditions and terms that provide for a graded vesting schedule is recognized over the requisite service period for each separately vesting tranche of the award, and is based on the probable outcome of the performance conditions at each reporting date. Compensation expense is adjusted for assumptions with respect to the estimated amount of awards that will be forfeited prior to vesting, and for employees who have met certain retirement eligibility criteria. Compensation expense for common stock awards granted to employees meeting early retirement eligibility criteria is fully expensed on the grant date.

Dividend equivalents for certain equity-based awards are paid on stock units on a current basis prior to vesting and distribution.

The 2017 Stock Incentive Plan, or 2017 Plan, was approved by shareholders in May 2017 for issuance of stock and stock based awards. Awards may be made under the 2017 Plan for (i) up to 8.3 million shares of common stock plus (ii) up to an additional 28.5 million shares that were available to be issued under the 2006 Equity Incentive Plan, or 2006 Plan, or may become available for issuance under the 2006 Plan due to expiration, termination, cancellation, forfeiture or repurchase of awards granted under the 2006 Plan. As of December 31, 2017, a total of 17.9 million shares from the 2006 Plan have been added to and may be issued from the 2017 Plan. As of December 31, 2017, a cumulative total of 0.4 million shares had been awarded under the 2017 Plan and 68.9 million had been awarded under the 2006 Plan. As of December 31, 2016 and 2015, we had cumulative totals of 65.7 million shares and 60.9 million shares, respectively, awarded under the 2006 Plan. The 2017 Plan allows for shares withheld in payment of the exercise price of an award or in satisfaction of tax withholding requirements, shares forfeited due to employee termination, shares expired under options awards, or shares not delivered when performance conditions have not been met, to be added back to the pool of shares available for issuance under the 2017 Plan. From inception to December 31, 2017, fewer than 1 million shares had been awarded under the 2017 Plan but not delivered, and have become available for reissue. As of December 31, 2017, a total of 25.9 million shares were available for future issuance under the 2017 Plan.

The exercise price of non-qualified and incentive stock options and stock appreciation rights may not be less than the fair value of such shares on the date of grant. Stock options and stock appreciation rights granted under the 1997 Equity Incentive Plan, or 1997 Plan, and the 2006 Plan, collectively the Plans, generally vest over four years and expire no later than ten years from the date of grant. No common stock options or stock appreciation rights have been granted since 2009. For restricted stock awards granted under the Plans, common stock is issued at the time of grant and recipients have dividend and voting rights. In general, these grants vest over three to four years. As of December 31, 2017 there are no outstanding stock options or restricted stock awards.

For deferred stock awards granted under the Plans, no common stock is issued at the time of grant and the award does not possess dividend and voting rights. Generally, these grants vest over one to four years. Performance awards granted are earned over a performance period based on the achievement of

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

defined goals, generally over three years. Payment for performance awards is made in shares of our common stock equal to its fair market value per share, based on the performance of certain financial ratios, after the conclusion of each performance period.

Beginning with 2012, malus-based forfeiture provisions were included in deferred stock awards granted to employees identified as “material risk-takers,” as defined by management. These malus-based forfeiture provisions provide for the reduction or cancellation of unvested deferred compensation, such as deferred stock awards and performance based awards, if it is determined that a material risk-taker made risk-based decisions that exposed State Street to inappropriate risks that resulted in a material unexpected loss at the business-unit, line-of-business or corporate level. In addition, awards granted to certain of our senior executives, as well as awards granted to individuals in certain jurisdictions, may be subject to recoupment after vesting (if applicable) and delivery to the individual in specified circumstances

generally relating to fraud or willful misconduct by the individual that results in material harm to us or a material financial restatement.

Compensation expense related to stock options, stock appreciation rights, restricted stock awards, deferred stock awards and performance awards, which we record as a component of compensation and employee benefits expense in our consolidated statement of income, was \$243 million, \$268 million and \$319 million for the years ended December 31, 2017, 2016 and 2015, respectively. Such expense for 2017, 2016 and 2015 excluded \$15 million, \$9 million and \$10 million, respectively, associated with acceleration of expense in connection with targeted staff reductions. This expense was included in the severance-related portion of the associated restructuring charges recorded in each respective year.

The following table presents information about the Plans as of December 31, 2017, and related activity during the years indicated:

	Shares (In thousands)	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (In years)	Total Intrinsic Value (In millions)
<b>Stock Appreciation Rights:</b>				
Outstanding as of December 31, 2015	1,206	\$ 76.29		
Exercised	(227)	70.59		
Forfeited or expired	(24)	81.71		
Outstanding as of December 31, 2016	955	77.52		
Exercised	(595)	81.71		
Forfeited or expired	(360)	70.59		
Outstanding and exercisable as of December 31, 2017 <sup>(1)</sup>	—	\$ —	0	\$ —

<sup>(1)</sup> There were no shares subject to stock options and no stock appreciation rights.

The total intrinsic value of stock appreciation rights exercised during the years ended December 31, 2017, 2016 and 2015 was \$5 million, \$1 million and \$5 million, respectively. As of December 31, 2017, there was no unrecognized compensation cost related to stock options and stock appreciation rights.

The total fair value of deferred stock awards vested for the years ended December 31, 2017, 2016 and 2015, based on the weighted average grant date fair value in each respective year, was \$232 million, \$275 million and \$340 million, respectively. As of December 31, 2017, total unrecognized compensation cost related to deferred stock awards, net of estimated forfeitures, was \$242 million, which is expected to be recognized over a weighted-average period of 2.5 years.

	Shares (In thousands)	Weighted-Average Grant Date Fair Value

Forfeited	—	—
Paid out	(233)	58.91
Outstanding as of December 31, 2017	1,548	\$ 66.09

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The total fair value of performance awards paid out for the years ended December 31, 2017, 2016 and 2015, based on the weighted average grant date fair value in each respective year, was \$14 million, \$21 million and \$39 million, respectively. As of December 31, 2017, total unrecognized compensation cost related to performance awards, net of estimated forfeitures, was \$16 million, which is expected to be recognized over a weighted-average period of 2.8 years.

We utilize either treasury shares or authorized but unissued shares to satisfy the issuance of common stock under our equity incentive plans. We do not have a specific policy concerning purchases of our common stock to satisfy stock issuances, including exercises of stock options. We have a general policy concerning purchases of our common stock to meet issuances under our employee benefit plans, including option exercises and other corporate purposes. Various factors determine the amount and timing of our purchases of our common stock, including regulatory reviews and approvals or non-objections, our regulatory capital requirements, the number of shares we expect to issue under employee benefit plans, market conditions (including the trading price of our common stock), and legal considerations. These factors can change at any time, and the number of shares of common stock we will purchase or when we will purchase them cannot be assured. See Note 15 for further information on our common stock purchase program.

**Note 19. Employee Benefits**

***Defined Benefit Pension and Other Post-Retirement Benefit Plans***

State Street Bank and certain of its U.S. subsidiaries participate in a non-contributory, tax-qualified defined benefit pension plan. The U.S. defined benefit pension plan was frozen as of December 31, 2007 and no new employees were eligible to participate after that date. State Street has agreed to contribute sufficient amounts as necessary to meet the benefits paid to plan participants and to fund the plan's service cost, plus interest. U.S. employee account balances earn annual interest credits until the employee begins receiving benefits. Non-U.S. employees participate in local defined benefit plans which are funded as required in each local jurisdiction. In addition to the defined benefit pension plans, we have non-qualified unfunded SERPs that provide certain officers with defined pension benefits in excess of allowable qualified plan limits. State Street Bank and certain of its U.S. subsidiaries also participate in a post-retirement plan that provides health care benefits for certain retired employees. The total expense for these tax-qualified

and non-qualified plans was \$15 million, \$16 million and \$46 million in 2017, 2016 and 2015, respectively.

We recognize the funded status of our defined benefit pension plans and other post-retirement benefit plans, measured as the difference between the fair value of the plan assets and the projected benefit obligation, in the consolidated statement of position. The assets held by the defined benefit pension plans are largely made up of common, collective funds that are liquid and invest principally in U.S. equities and high-quality fixed income investments. The majority of these assets fall within Level 2 of the fair value hierarchy. The benefit obligations associated with our primary U.S. and non-U.S. defined benefit plans, non-qualified unfunded supplemental retirement plans and post-retirement plans were \$1.32 billion, \$125 million and \$16 million, respectively, as of December 31, 2017 and \$1.23 billion, \$136 million and \$21 million, respectively, as of December 31, 2016. As the primary defined benefit plans are frozen, the benefit obligation will only vary over time as a result of changes in market interest rates, the life expectancy of the plan participants and payments made from the plans. The primary U.S. and non-U.S. defined benefit pension plans were underfunded by \$9 million and \$32 million as of December 31, 2017 and 2016, respectively. The non-qualified supplemental retirement plans were underfunded by \$125 million and \$136 million as of December 31, 2017 and 2016, respectively. The other post-retirement benefit plans were underfunded by \$16 million and \$21 million as of December 31, 2017 and 2016, respectively. The underfunded status is included in other liabilities.

***Defined Contribution Retirement Plans***

We contribute to employer-sponsored U.S. and non-U.S. defined contribution plans. Our contribution to these plans was \$146 million, \$132 million, and \$130 million in 2017, 2016 and 2015, respectively.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

**Note 20. Occupancy Expense and Information Systems and Communications Expense**

Occupancy expense and information systems and communications expense include depreciation of buildings, leasehold improvements, computer hardware and software, equipment, and furniture and fixtures. Total depreciation expense in 2017, 2016 and 2015 was \$526 million, \$472 million and \$443 million, respectively.

We lease 1,025,000 square feet at One Lincoln Street, our headquarters building located in Boston, Massachusetts, and a related underground parking garage, under 20-year, non-cancelable capital leases expiring in September 2023. A portion of the lease payments is offset by subleases for approximately 127,000 square feet of the building. As of December 31, 2017 and 2016, an aggregate net book value of \$159 million and \$194 million, respectively, related to the above-described capital leases was recorded in premises and equipment, with the related liability recorded in long-term debt, in our consolidated statement of condition.

Capital lease asset amortization is recorded in occupancy expense on a straight-line basis in our

The following table presents a summary of future minimum lease payments under non-cancelable capital and operating leases as of December 31, 2017. Aggregate future minimum rental commitments have been reduced by aggregate sublease rental commitments of \$41 million for capital leases and \$19 million for operating leases.

(In millions)	Capital Leases	Operating Leases	Total
2018	\$ 53	\$ 197	\$ 250
2019	45	175	220
2020	45	154	199
2021	45	144	189
2022	45	125	170
Thereafter	34	336	370
Total minimum lease payments	267	\$ 1,131	\$ 1,398
Less amount representing interest payments	(56)		
Present value of minimum lease payments	\$ 211		

consolidated statement of income over the respective lease term. Lease payments are recorded as a reduction of the liability, with a portion recorded as imputed interest expense. In 2017, 2016 and 2015, interest expense related to these capital lease obligations, reflected in NII, was \$20 million, \$22 million and \$32 million, respectively. As of December 31, 2017 and 2016, accumulated amortization of capital lease assets was \$401 million and \$365 million, respectively.

We have entered into non-cancelable operating leases for premises and equipment. Nearly all of these leases include renewal options. Costs related to operating leases for office space are recorded in occupancy expense. Costs related to operating leases for equipment are recorded in information systems and communications expense. Both are recorded on a straight-line basis.

Total rental expense net of sublease revenue in 2017, 2016 and 2015 amounted to \$229 million, \$194 million and \$190 million, respectively. Total rental expense was reduced by sublease revenue of \$5 million in 2017 and \$4 million in both 2016 and 2015.

**STATE STREET CORPORATION**

<b>Accrual Balance at December 31, 2017</b>	<b>\$ 166</b>	<b>\$ 32</b>	<b>\$ 3</b>	<b>\$ 201</b>

**Note 22. Income Taxes**

We use an asset-and-liability approach to account for income taxes. Our objective is to recognize the amount of taxes payable or refundable for the current year through charges or credits to the current tax provision, and to recognize deferred tax assets and liabilities for future tax consequences of temporary differences between amounts reported in our consolidated financial statements and their respective tax bases. The measurement of tax assets and liabilities is based on enacted tax laws and applicable tax rates. The effects of a tax position on our consolidated financial statements are recognized when we believe it is more likely than not that the position will be sustained. A valuation allowance is established if it is considered more likely than not that all or a portion of the deferred tax assets

will not be realized. Deferred tax assets and liabilities recorded in our consolidated statement of condition are netted within the same tax jurisdiction.

The following table presents the components of income tax expense (benefit) for the periods indicated:

(In millions)	Years Ended December 31,		
	2017	2016	2015
<b>Current:</b>			
Federal	\$ 229	\$ (14)	\$ 52
State	18	30	92
Non-U.S.	380	320	342
<b>Total current expense</b>	<b>627</b>	<b>336</b>	<b>486</b>
<b>Deferred:</b>			
Federal	49	(311)	(39)
State	65	38	40
Non-U.S.	(19)	(85)	(169)
<b>Total deferred expense (benefit)</b>	<b>95</b>	<b>(358)</b>	<b>(168)</b>
<b>Total income tax expense (benefit)</b>	<b>\$ 722</b>	<b>\$ (22)</b>	<b>\$ 318</b>

The following table presents a reconciliation of the U.S. statutory income tax rate to our effective tax rate based on income before income tax expense for the periods indicated:

	Years Ended December 31,		
	2017	2016	2015
U.S. federal income tax rate	35.0 %	35.0 %	35.0 %
Changes from statutory rate:			
State taxes, net of federal benefit	1.9	2.0	4.2
Tax-exempt income	(4.5)	(6.1)	(5.6)
Business tax credits <sup>(1)</sup>	(6.8)	(13.6)	(9.4)
Foreign tax differential	(7.4)	(7.7)	(9.6)
Transition tax	15.7	—	—
Deferred tax revaluation	(6.8)	—	—
Foreign designated earnings	(0.7)	(6.8)	—
Foreign capital transactions	—	(4.3)	—
Tax refund	—	—	(2.8)
Litigation expense	—	1.4	2.7
Other, net	(1.5)	(0.9)	(0.7)
<b>Effective tax rate</b>	<b>24.9 %</b>	<b>(1.0)%</b>	<b>13.8 %</b>

<sup>(1)</sup> Business tax credits include low-income housing, production and investment tax credits.

On December 22, 2017, the President signed into law the TCJA (H.R. 1), reducing the corporate income tax rate from 35% to 21% and enacting a one-time transition tax on unremitted earnings of foreign subsidiaries. Although we have not completed accounting for the tax effects of the TCJA, we included a provisional estimate for the impact to deferred tax balances and cost associated with the one-time transition tax.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

As a result of the reduction in the corporate income tax rate, certain U.S. deferred tax assets and liabilities were revalued resulting in a provisional estimated deferred tax benefit of \$197 million. Deferred tax assets and liabilities represent the future impact on income taxes resulting from temporary differences that exist as of the balance sheet date using enacted tax rates. Certain U.S. temporary differences are a provisional estimate based on information currently available. As additional information is made available, there may be adjustments to temporary differences that could increase or decrease the deferred tax balances. As such, the \$197 million benefit may be adjusted in future periods.

The one-time transition tax is measured on total post-1986 earnings and profits ("E&P") of foreign subsidiaries previously deferred from U.S. income taxes. Although we have not completed our analysis of cumulative E&P, we have included a provisional expense of \$454 million based on information available and our current interpretations of the newly enacted law. This amount is based on the amount of earnings held in cash and other specified assets. We understand that this amount will change as estimates of foreign E&P and foreign income taxes are refined and assumptions are modified from additional guidance on the TCJA.

The 2016 foreign designated earnings include the benefits attributable to the change in designation of certain of our foreign earnings as indefinitely invested overseas. The foreign capital transactions include the tax benefits from incremental foreign tax credits and a foreign affiliate tax loss. The increase in business tax credits is attributable to an increase in alternative energy investments.

In 2015 we recognized benefits associated with the reduction of an Italian deferred tax liability and the approval of a tax refund for prior years, partially offset by a change in New York tax law.

The following table presents significant components of our gross deferred tax assets and gross deferred tax liabilities as of the dates indicated:

(In millions)	December 31,	
	2017	2016
<b>Deferred tax assets:</b>		
Unrealized losses on investment securities, net	\$ 17	\$ 157
Deferred compensation	159	285
Defined benefit pension plan	82	116
Restructuring charges and other reserves	132	199
Foreign currency translation	18	225
General business credit	231	425
NOL and other carryforwards	101	73
Other	27	32
<b>Total deferred tax assets</b>	<b>767</b>	<b>1,512</b>
Valuation allowance for deferred tax assets	(88)	(66)
<b>Deferred tax assets, net of valuation allowance</b>	<b>\$ 679</b>	<b>\$ 1,446</b>
<b>Deferred tax liabilities:</b>		
Leveraged lease financing	\$ 184	\$ 313
Fixed and intangible assets	755	886
Non-U.S. earnings	6	164
Investment basis differences	158	120
<b>Total deferred tax liabilities</b>	<b>\$ 1,103</b>	<b>\$ 1,483</b>

The reduction in deferred tax assets and liabilities includes the provisional estimated impact of TCJA as well as current year activity such as the utilization of General Business Credits, additional investments in tax advantaged investments and changes in FX rates.

The table below summarizes the deferred tax assets and related valuation allowances recognized as of December 31, 2017:

(In millions)	Deferred Tax Asset	Valuation Allowance	Expiration
General business Credits	\$ 231	\$ —	2035-2037
NOLs - Non-U.S.	47	(35)	2018-2026 / None
Other Carryforwards	41	(41)	None
NOLs - State	13	(12)	2018-2036

Management considers the valuation allowance adequate to reduce the total deferred tax assets to an aggregate amount that will more likely than not be realized. Management has determined that a valuation allowance is not required for the remaining deferred tax assets because it is more likely than not that there is sufficient taxable income of the appropriate nature within the carryforward periods to realize these assets.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

At December 31, 2017, 2016 and 2015, the gross unrecognized tax benefits, excluding interest, were \$94 million, \$71 million, and \$63 million, respectively. Of this, the amounts that would reduce the effective tax rate, if recognized, are \$87 million, \$63 million and \$55 million, respectively. Unrecognized tax benefits do not include the benefit of the federal deduction for unrecognized state tax benefits which is included in the effective tax rate.

The following table presents activity related to unrecognized tax benefits as of the dates indicated:

(In millions)	December 31,		
	2017	2016	2015
Beginning balance	\$ 71	\$ 63	\$ 63
Decrease related to agreements with tax authorities	(14)	(13)	(122)
Increase related to tax positions taken during current year	26	7	8
Increase related to tax positions taken during prior years	11	14	14
Ending balance	<u>\$ 94</u>	<u>\$ 71</u>	<u>\$ 63</u>

It is reasonably possible that of the \$94 million of unrecognized tax benefits as of December 31, 2017, up to \$14 million could decrease within the next 12 months due to the resolution of various audits. Management believes that we have sufficient accrued liabilities as of December 31, 2017 for tax exposures and related interest expense.

Income tax expense included related interest and penalties of approximately \$3 million and \$2 million in 2017 and 2016, respectively. Total accrued interest and penalties are approximately \$8 million, \$5 million and \$3 million as of December 31, 2017, 2016 and 2015, respectively.

**Note 23. Earnings Per Common Share**

Basic EPS is calculated pursuant to the "two-class" method, by dividing net income available to common shareholders by the weighted-average common shares outstanding during the period. Diluted EPS is calculated pursuant to the two-class method, by dividing net income available to common shareholders by the total weighted-average number of common shares outstanding for the period plus the shares representing the dilutive effect of equity-based awards. The effect of equity-based awards is excluded from the calculation of diluted EPS in periods in which their effect would be anti-dilutive.

The two-class method requires the allocation of undistributed net income between common and participating shareholders. Net income available to common shareholders, presented separately in our consolidated statement of income, is the basis for the calculation of both basic and diluted EPS. Participating securities are composed of unvested and fully vested SERP shares and fully vested

deferred director stock awards, which are equity-based awards that contain non-forfeitable rights to dividends, and are considered to participate with the common stock in undistributed earnings.

The following table presents the computation of basic and diluted earnings per common share for the periods indicated:

(Dollars in millions, except per share amounts)	Years Ended December 31,		
	2017	2016	2015
Net income	\$ 2,177	\$ 2,143	\$ 1,980
Less:			
Preferred stock dividends	(182)	(173)	(130)
Dividends and undistributed earnings allocated to participating securities <sup>(1)</sup>	(2)	(2)	(2)
Net income available to common shareholders	<u>\$ 1,993</u>	<u>\$ 1,968</u>	<u>\$ 1,848</u>
<b>Average common shares outstanding (In thousands):</b>			
Basic average common shares	374,793	391,485	407,856
Effect of dilutive securities: equity-based awards	5,420	4,605	5,782
Diluted average common shares	<u>380,213</u>	<u>396,090</u>	<u>413,638</u>
Anti-dilutive securities <sup>(2)</sup>	188	2,143	661
<b>Earnings per Common Share:</b>			
Basic	\$ 5.32	\$ 5.03	\$ 4.53
Diluted <sup>(3)</sup>	<u>5.24</u>	<u>4.97</u>	<u>4.47</u>

<sup>(1)</sup> Represents the portion of net income available to common equity allocated to participating securities, composed of unvested and fully vested SERP shares and fully vested deferred director stock awards, which are equity-based awards that contain non-forfeitable rights to dividends, and are considered to participate with the common stock in undistributed earnings.

<sup>(2)</sup> Represents equity-based awards outstanding but not included in the computation of diluted average common shares, because their effect was anti-dilutive. Refer to Note 18 for additional information about equity-based awards.

<sup>(3)</sup> Calculations reflect allocation of earnings to participating securities using the two-class method, as this computation is more dilutive than the treasury stock method.

**Note 24. Line of Business Information**

Our operations are organized into two lines of business: Investment Servicing and Investment Management, which are defined based on products and services provided. The results of operations for these lines of business are not necessarily comparable with those of other companies, including companies in the financial services industry.

Investment Servicing provides services for U.S. mutual funds, collective investment funds and other investment pools, corporate and public retirement plans, insurance companies, foundations and endowments worldwide. Products include custody; product and participant level accounting; daily pricing and administration; master trust and master custody; depotbank services (a fund oversight role created by regulation); record-keeping; cash management; foreign exchange, brokerage and other trading services; securities finance; our enhanced custody product, which integrates principal securities lending

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

and custody; deposit and short-term investment facilities; loans and lease financing; investment manager and alternative investment manager operations outsourcing; performance, risk and compliance analytics; and financial data management to support institutional investors.

Investment Management, through SSGA, provides a broad array of investment management, investment research and investment advisory services to corporations, public funds and other sophisticated investors. SSGA offers passive and active asset management strategies across equity, fixed-income, alternative, multi-asset solutions (including OCIO) and cash asset classes. Products are distributed directly and through intermediaries using a variety of investment vehicles, including ETFs, such as the SPDR<sup>®</sup> ETF brand.

Our investment servicing strategy is to focus on total client relationships and the full integration of our products and services across our client base through cross-selling opportunities. In general, our clients will use a combination of services, depending on their needs, rather than one product or service. For instance, a custody client may purchase securities finance and cash management services from different business units. Products and services that we provide to our clients are parts of an integrated offering to these clients. We price our products and services on the basis of overall client relationships and other factors; as a result, revenue may not necessarily reflect the stand-alone market price of these products and services within the business lines in the same way it would for separate business entities.

Our servicing and management fee revenue from the Investment Servicing and Investment Management business lines, including trading services and securities finance activities, represents approximately 75% to 80% of our consolidated total revenue. The remaining 20% to 25% is composed of

processing fees and other revenue as well as NII, which is largely generated by our investment of client deposits, short-term borrowings and long-term debt in a variety of assets, and net gains (losses) related to investment securities. These other revenue types are generally fully allocated to, or reside in, Investment Servicing and Investment Management.

Revenue and expenses are directly charged or allocated to our lines of business through management information systems. Assets and liabilities are allocated according to policies that support management's strategic and tactical goals. Capital is allocated based on the relative risks and capital requirements inherent in each business line, along with management judgment. Capital allocations may not be representative of the capital that might be required if these lines of business were separate business entities.

The following is a summary of our line of business results for the periods indicated.

The "Other" column for the year ended December 31, 2017 included net acquisition and restructuring costs of \$266 million.

The "Other" column for the year ended December 31, 2016 included net costs of \$199 million composed of the following -

- Net acquisition and restructuring costs of \$209 million; and
- Net severance costs associated with staffing realignment of \$(10) million.

The "Other" column for the year ended December 31, 2015 included net costs of \$98 million composed of the following -

- Net acquisition and restructuring costs of \$25 million;
- Net severance costs associated with staffing realignment of \$73 million.

**STATE STREET CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

The following is a summary of our line of business results for the periods indicated. The amounts in the “Other” columns were not allocated to State Street’s business lines. Prior reported results reflect reclassifications, for comparative purposes, related to management changes in methodologies associated with allocations of revenue and expenses to lines of business in 2017.

(Dollars in millions)	Years Ended December 31,

**Note 25. Non-U.S. Activities**

We define our non-U.S. activities as those revenue-producing business activities that arise from clients which are generally serviced or managed outside the U.S. Due to the integrated nature of our business, precise segregation of our U.S. and non-U.S. activities is not possible.

Subjective estimates, assumptions and other judgments are applied to quantify the financial results

The following table presents our U.S. and non-U.S. financial results for the periods indicated:

(In millions)	2017			2016			2015		
	Non-U.S.	U.S.	Total	Non-U.S.	U.S.	Total	Non-U.S.	U.S.	Total
Total revenue	\$ 4,734	\$ 6,436	\$ 11,170	\$ 4,419	\$ 5,788	\$ 10,207	\$ 4,428	\$ 5,932	\$ 10,360
Income before income taxes	1,230	1,669	2,899	1,047	1,073	2,120	1,193	1,105	2,298

Non-U.S. assets were \$82.1 billion and \$79.1 billion as of December 31, 2017 and 2016, respectively.

<sup>(1)</sup> Fully taxable-equivalent revenue is a method of presentation in which the tax savings achieved by investing in tax-exempt investment securities and certain leases are included in interest income with a corresponding charge to income tax expense. This method facilitates the comparison of the performance of these assets. The adjustments are computed using a federal income tax rate of 35%, adjusted for applicable state income taxes, net of the related federal tax benefit. The fully taxable-equivalent adjustments included in interest income presented above were \$167 million, \$167 million and \$173 million for the years ended December 31, 2017, 2016 and 2015, respectively, and were substantially related to tax-exempt securities (state and political subdivisions).

<sup>(2)</sup> Non-U.S. non-interest-bearing deposits were \$762 million, \$337 million and \$95 million as of December 31, 2017, 2016 and 2015, respectively.

<sup>(3)</sup> NIM is calculated by dividing fully taxable-equivalent NII by average total interest-earning assets.

[Table of Contents](#)

The following table summarizes changes in fully taxable-equivalent interest income and interest expense due to changes in volume of interest-earning assets and interest-bearing liabilities, and due to changes in interest rates. Changes attributed to both volumes and rates have been allocated based on the proportion of change in each category.

Years Ended December 31, (In millions; fully taxable-equivalent basis)	2017 Compared to 2016			2016 Compared to 2015

## GLOSSARY

**Asset-backed securities:** A financial security backed by collateralized assets, other than real estate or mortgage backed securities.

**Assets under custody and administration:** Assets that we hold directly or indirectly on behalf of clients under a safekeeping or custody arrangement or for which we provide administrative services for clients. To the extent that we provide more than one AUCA service for a client's assets, the value of the asset is only counted once in the total amount of AUCA.

**Assets under management:** The total market value of client assets for which we provide investment management strategy services, advisory services and/or distribution services generating management fees based on a percentage of the assets' market values. These client assets are not included on our balance sheet.

**Beacon:** A multi-year program announced in October 2015, to create cost efficiencies through changes in our operational processes and to further digitize our processes and interfaces with our clients.

**Certificates of deposit:** A savings certificate with a fixed maturity date, specified fixed interest rate and can be issued in any denomination aside from minimum investment requirements. A CD restricts access to the funds until the maturity date of the investment.

**Collateralized loan obligations:** A security backed by a pool of debt, primarily senior secured leveraged loans. CLOs are similar to collateralized mortgage obligations, except for the different type of underlying loan. With a CLO, the investor receives scheduled debt payments from the underlying loans, assuming most of the risk in the event borrowers default, but is offered greater diversity and the potential for higher-than-average returns.

**Commercial real estate:** Property intended to generate profit from capital gains or rental income. Our CRE loans are primarily composed of loans acquired in 2008 pursuant to indemnified repurchase agreements with an affiliate of Lehman Brothers.

**Doubtful:** Loans and leases meet the same definition of substandard loans and leases (i.e., well-defined weaknesses that jeopardize repayment with the possibility that we will sustain some loss) with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable.

### Economic value of

**equity:** Long-term interest rate risk measure designed to estimate the fair value of assets, liabilities and off-balance sheet instruments based on a discounted cash flow model.

**Exchange-Traded Fund:** A type of exchange-traded investment product that offer investors a way to pool their money in a fund that makes investments in stocks, bonds, or other assets and, in return, to receive an interest in that investment pool. ETF shares are traded on a national stock exchange and at market prices that may or may not be the same as the net asset value.

**Exposure-at-default:** A parameter used in the calculation of regulatory capital under Basel III. It can be defined as the expected amount of loss a bank may be exposed to upon default of an obligor.

**Global systemically important bank:** A financial institution whose distress or disorderly failure, because of its size, complexity and systemic interconnectedness, would cause significant disruption to the wider financial system and economic activity, which will be subject to additional capital requirements.

**Held-to-maturity investment securities:** We classify investments in debt securities as held-to-maturity only if we have the positive intent and ability to hold those securities to maturity. Investments in debt securities classified as held-to-maturity are measured subsequently at amortized cost in the statement of financial position.

**High-quality liquid assets:** Cash or assets that can be converted into cash at little or no loss of value in private markets and are considered unencumbered.

**Investment-grade:** Loans and leases that consist of counterparties with strong credit quality and low expected credit risk and probability of default. Ratings apply to counterparties with a strong capacity to support the timely repayment of any financial commitment.

**Liquidity coverage ratio:** A Basel III framework requirement for banks and bank holding companies to measure liquidity. It is designed to ensure that certain banking institutions, including us, maintain a minimum amount of unencumbered HQLA sufficient to withstand the net cash outflow under a hypothetical standardized acute liquidity stress scenario for a 30-day stress period. The ratio of our encumbered high-quality liquid assets divided by our total net cash outflows over a 30-day stress period.

**Net asset value:** The amount of net assets attributable to each share of capital stock (other than senior securities, such as, preferred stock) outstanding at the close of the period.

**Net stable funding ratio:** The ratio of the amount of available stable funding relative to the amount of required stable funding. This ratio should be equal to at least 100% on an ongoing basis.

**Other-than-temporary-impairment:** Impairment charge taken on a security whose fair value has fallen below its carrying value on balance sheet and its value is not expected to recover through the holding period of the security.

**Probability-of-default:** An internal risk rating that indicates the likelihood that a credit obligor will enter into default status.

**Qualified financial contracts:** Securities contracts, commodity contracts, forward contracts, repurchase agreements, swap agreements and any other contract determined by the FDIC to be a qualified financial contract.

**Risk-weighted assets:** A measurement used to quantify risk inherent in our on and off-balance sheet assets by adjusting the asset value for risk. RWA is used in the calculation of our risk-based capital ratios.

**Special mention:** Loans and leases that consist of counterparties with potential weaknesses that, if uncorrected, may result in deterioration of repayment prospects.

**Speculative:** Loans and leases that consist of counterparties that face ongoing uncertainties or exposure to business, financial, or economic downturns. However, these counterparties may have financial flexibility or access to financial alternatives, which allow for financial commitments to be met.

**Substandard:** Loans and leases that consist of counterparties with well-defined weakness that jeopardizes repayment with the possibility we will sustain some loss.

**Supplementary leverage ratio:** The ratio of our tier 1 capital to our total leverage exposure, which measures our capital adequacy relative to our on and off-balance sheet assets.

**Total loss-absorbing capacity:** The sum of our tier 1 regulatory capital plus eligible external long-term debt issued by us.

**Value-at-Risk:** Statistical model used to measure the potential loss in value of a portfolio that could occur in normal markets condition, over a defined holding period, within a certain confidence level.

**Variable interest entity:** An entity that: (1) lacks enough equity investment at risk to permit the entity to finance its activities without additional financial support from other parties; (2) has equity owners that lack the right to make significant decisions affecting the entity's operations; and/or (3) has equity owners that do not have an obligation to absorb or the right to receive the entity's losses or return.

**ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE**

None.

**ITEM 9A. DISCLOSURE CONTROLS AND PROCEDURES; CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING**

State Street has established and maintains disclosure controls and procedures that are designed to ensure that material information related to State Street and its subsidiaries on a consolidated basis required to be disclosed in its reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to State Street's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. For the quarter ended December 31, 2017, State Street's management carried out an evaluation, with the participation of the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of State Street's disclosure controls and procedures. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that State Street's disclosure controls and procedures were effective as of December 31, 2017.

State Street has also established and maintains internal control over financial reporting as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in conformity with U.S. GAAP. In the ordinary course of business, State Street routinely enhances its internal controls and procedures for financial reporting by either upgrading its current systems or implementing new systems. Changes have been made and may be made to State Street's internal controls and procedures for financial reporting as a result of these efforts. During the quarter ended December 31, 2017, no change occurred in State Street's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, State Street's internal control over financial reporting.

## INTERNAL CONTROL OVER FINANCIAL REPORTING

### **Management's Report on Internal Control Over Financial Reporting**

The management of State Street is responsible for the preparation and fair presentation of the financial statements and other financial information contained in this Form 10-K. Management is also responsible for establishing and maintaining adequate internal control over financial reporting. Management has designed business processes and internal controls and has also established and is responsible for maintaining a business culture that fosters financial integrity and accurate reporting. To these ends, management maintains a comprehensive system of internal controls intended to provide reasonable assurances regarding the reliability of financial reporting and the preparation of the consolidated financial statements of State Street in conformity with U.S. GAAP. State Street's accounting policies and internal control over financial reporting, established and maintained by management, are under the general oversight of State Street's Board of Directors, including the Board's Examining and Audit Committee.

Management has made a comprehensive review, evaluation and assessment of State Street's internal control over financial reporting as of December 31, 2017. The standard measures adopted by management in making its evaluation are the measures in the Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria").

Based on its review and evaluation, management concluded that State Street's internal control over financial reporting was effective as of December 31, 2017, and that State Street's internal control over financial reporting as of that date had no material weaknesses.

Ernst & Young LLP, an independent registered public accounting firm, which has audited and reported on the consolidated financial statements contained in this Form 10-K, has issued its written attestation report on its assessment of State Street's internal control over financial reporting, which follows this report.

## Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of  
State Street Corporation

### Opinion on Internal Control over Financial Reporting

We have audited State Street Corporation's (the "Corporation") internal control over financial reporting as of December 31, 2017, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the "COSO criteria"). In our opinion, the Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2017, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the 2017 consolidated financial statements of the Corporation and our report dated February 26, 2018 expressed an unqualified opinion thereon.

### Basis for Opinion

The Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Corporation's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Corporation in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

### Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**RELATED STOCKHOLDER MATTERS**

The following table presents the number of outstanding common stock awards, options, warrants and rights granted by State Street to participants in our equity compensation plans, as well as the number of securities available for future issuance under these plans, as of December 31, 2017. The table provides this information separately for equity compensation plans that have and have not been approved by shareholders. Shares presented in the table and in the footnotes following the table are stated in thousands of shares.

(Shares in thousands)	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights <sup>(1)</sup>	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
<b>Plan category:</b>			
Equity compensation plans approved by shareholders	8,396 <sup>(2)</sup>	\$ —	25,884
Equity compensation plans not approved by shareholders	24 <sup>(3)</sup>	—	—
<b>Total</b>	<b>8,420</b>		<b>25,884</b>

<sup>(1)</sup> Excludes deferred stock awards and performance awards for which there is no exercise price.

<sup>(2)</sup> Consists of 6,848 shares subject to deferred stock awards, zero shares subject to stock options, zero stock appreciation rights and 1,548 shares subject to performance awards (assuming payout at 100% for all awards, including awards for which performance is uncertain).

<sup>(3)</sup> Consists of shares subject to deferred stock awards.

Individual directors who are not our employees have received stock awards and cash retainers, both of which may be deferred. Directors may elect to receive shares of our common stock in place of cash. If payment is in the form of common stock, the number of shares is determined by dividing the approved cash amount by the closing price on the date of the annual shareholders' meeting or date of grant, if different. All deferred shares, whether stock awards or common stock received in place of cash retainers, are increased to reflect dividends paid on the common stock and, for certain directors, may include share amounts in respect of an accrual under a terminated retirement plan. Directors may elect to defer 50% or 100% of cash or stock awards until a date that they specify, usually after termination of service on the Board. The deferral may also be paid in either a lump sum or in installments over a two- to ten-year period. Stock awards totaling 243,567 shares of common stock were outstanding as of December 31, 2017; awards made through June 30, 2003, totaling 23,606 shares outstanding as of December 31, 2017, have not been approved by shareholders. There are no other equity compensation plans under which our equity securities are authorized for issuance that have been adopted without shareholder approval. Awards of stock made or retainer shares paid to individual directors after June 30, 2003 have been or will be made under our 1997 or 2006 Equity Incentive Plan, both of which were approved by shareholders.

**ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE**

Information concerning certain relationships and related transactions and director independence will appear in our 2018 Proxy Statement under the caption “Corporate Governance at State Street.” Such information is incorporated herein by reference.

**ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES**

Information concerning principal accounting fees and services and the Examining and Audit Committee's pre-approval policies and procedures will appear in our 2018 Proxy Statement under the caption “Examining and Audit Committee Matters.” Such information is incorporated herein by reference.

**PART IV. OTHER INFORMATION**

**ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES**

(A)(1) FINANCIAL STATEMENTS

The following consolidated financial statements of State Street are included in Item 8 hereof:

Report of Independent Registered Public Accounting Firm

Consolidated Statement of Income - Years ended December 31, 2017, 2016 and 2015

Consolidated Statement of Comprehensive Income - Years ended December 31, 2017, 2016 and 2015

Consolidated Statement of Condition - As of December 31, 2017 and 2016

Consolidated Statement of Changes in Shareholders' Equity - Years ended December 31, 2017, 2016 and 2015

Consolidated Statement of Cash Flows - Years ended December 31, 2017, 2016 and 2015

Notes to Consolidated Financial Statements

(A)(2) FINANCIAL STATEMENT SCHEDULES

Certain schedules to the consolidated financial statements have been omitted if they were not required by Article 9 of Regulation S-X or if, under the related instructions, they were inapplicable, or the information was contained elsewhere herein.

(A)(3) EXHIBITS

The exhibits listed in the Exhibit Index preceding the signature page of this Form 10-K are filed herewith or are incorporated herein by reference to other SEC filings.

**ITEM 16. FORM 10-K SUMMARY**

Not applicable.

## Section 2: EX-10.13 (EXHIBIT 10.13)

**DESCRIPTION OF COMPENSATION ARRANGEMENTS  
FOR NON-EMPLOYEE DIRECTORS**

For the period between each annual meeting of shareholders, non-employee directors receive the following compensation:

- annual retainer - \$75,000, payable at the director's election in shares of State Street common stock or in cash;
- meeting fees - \$1,500 for each Board meeting attended, together with reimbursement of expenses incurred as a result of attending such meetings, payable in cash;
- meeting fees - \$1,500 for each committee meeting attended with the exception of the lead director, together with reimbursement of expenses incurred as a result of attending such meetings, payable in cash;
- an annual common stock award in an amount of shares equal to \$150,000 divided by the closing price of the stock on the date of the annual meeting that begins the period (with additional stock amounts to reflect dividends if the award is deferred);
- a pro-rated annual retainer and annual common stock award for any director joining the Board after the annual meeting that begins the period;
- an additional annual retainer for the Lead Director of \$150,000, payable at the director's election in shares of State Street common stock or in cash;
- an additional annual retainer for the Examining and Audit Committee Chair and for the Risk Committee Chair of \$25,000, payable at the director's election in shares of State Street common stock or in cash;
- an additional annual retainer for the Chair of the Executive Compensation Committee of \$20,000, payable at the director's election in shares of State Street common stock or in cash;
- an additional annual retainer for the Chair of the Nominating and Corporate Governance Committee and for the Technology Committee Chair of \$15,000, payable at the director's election in shares of State Street common stock or in cash; and
- an additional annual retainer for each member of the Examining and Audit Committee and for each non-employee member of the Risk Committee, other than the Chairs, of \$15,000, payable at the director's election in shares of State Street common stock or in cash.

Pursuant to State Street's Deferred Compensation Plan for Directors, directors may elect to defer the receipt of 0% or 100% of their (1) retainers, (2) meeting fees, or (3) annual award of shares of common stock. Directors also may elect to receive all of their retainers in cash or shares of common stock. Directors who elect to defer the

Information Classification: General

---

cash payment of their retainers or meeting fees may also make notional investment elections with respect to such deferrals, with a choice of four notional investment fund returns. Deferrals of shares of common stock are adjusted to reflect the hypothetical reinvestment in additional shares of common stock of any dividends or distributions on State Street common stock. Deferred amounts will be paid (a) as elected by the director, on either the date of the director's termination of service on the Board or on the earlier of such termination and a future date specified, and (b) in the form elected by the director as either a lump sum or in installments over a two- to five-year period.

## Section 3: EX-10.22 (EXHIBIT 10.22)

Exhibit 10.22

### RABBI TRUST AGREEMENT

State Street Corporation (the "Company"), U.S. Trust Company, National Association (the "Trustee") and Mercer Human Resource LLC (the "Consulting Firm") have, as of the Effective Date set forth in Section 17 below entered, into this grantor trust agreement (this "Agreement"), thereby amending and restating the trust agreement dated as of December 6, 1996 (with Wachovia Bank of North Carolina, N.A. as trustee) and the trust thereunder established with respect to the Company's nonqualified deferred compensation and/or severance or incentive plans and arrangements included in the list set forth in Exhibit A attached hereto (the "Plans").

WHEREAS the Company and certain of its direct and indirect subsidiaries (together, the "Employer") maintain the Plans for the benefit of employees and former employees of the Employer and their beneficiaries (each such subsidiary, to the extent of its employees participating in the Plans, being hereinafter referred to as a "Subsidiary"); and

WHEREAS the Company has previously established a revocable grantor trust to assist it and its Subsidiaries in meeting their obligations under the Plans; and

WHEREAS the Company desires to amend the trust agreement under which the aforesaid trust has been maintained and to replace the trustee thereunder with the Trustee first named above; and

WHEREAS it is the intention of the parties that the Trust as continued hereunder shall continue to constitute an unfunded arrangement for purposes of Title I of the Employee Retirement Income Security Act of 1974 ("ERISA");

NOW, THEREFORE, the parties do hereby continue the Trust and agree that the Trust shall be comprised, held and disposed of as follows:

#### Section 1. *Continuation of Trust*

- (a) The existing assets of the Trust, as the same may be augmented from time to time, shall constitute the assets of the Trust to be held, administered and disposed of by the Trustee as provided in this Agreement.
  - (b) The Trust hereby continued shall be revocable by the Company until the occurrence of a Change in Control (as defined in Section 13). Upon the occurrence of a Change in Control, the Trust shall be irrevocable except as provided herein.
  - (c) The Trust is intended to be a grantor trust within the meaning of subpart E, part I, subchapter J, chapter 1, subtitle A of the Internal Revenue Code of 1986, as amended (the "Code"), and shall be construed accordingly. Prior to
-

such time as the Trust becomes irrevocable, the Company shall be the grantor of the Trust. From and after such time as the Trust becomes irrevocable pursuant to subsection (b) above, it shall (unless the Company specifies otherwise) be deemed to consist of subtrusts, one for each employer's obligations under the Plans, which subtrusts together shall constitute the Trust (and all references herein to the Trust shall be deemed to include a reference to such subtrusts or to the relevant subtrust, as the context requires), and the Company and its Subsidiaries shall be deemed the grantors of the Trust, each in respect of its obligations under the Plans; *provided*, that at all times and notwithstanding any other provision of this Agreement, the Company shall be treated as a grantor with respect to so much of the assets of the Trust as consist of stock of the Company. The immediately preceding *proviso* shall be construed in a manner consistent with preserving the benefits described in IRS Notice 2000-56 (as the same may be modified, but only so long as such requirements, as originally set forth or as so modified, are in effect). The Company and its Subsidiaries, each to the extent treated as a grantor of the Trust maintained hereunder, are hereinafter referred to as the "Grantors."

- (d) The principal of the Trust, and any earnings thereon (the "Trust Fund") shall be held separate and apart from the Grantors' other funds and shall be used exclusively for the uses and purposes of Plan participants and the Grantors' general creditors as herein set forth. Plan participants and their beneficiaries shall have no preferred claim on, and no beneficial ownership interest in, any assets of the Trust. Any rights created under the Plans and this Agreement shall be mere unsecured contractual rights of Plan participants and their beneficiaries against the Company and its Subsidiaries in accordance with the Plans. Any assets held by the Trust will be subject to the claims of the Grantors' general creditors under federal and state law in the event the relevant Grantor is Insolvent, as defined in Section 3(a) herein.
- (e) The Company, in its sole discretion, may at any time and from time to time make or cause to be made additional deposits of cash or other property in trust with the Trustee to augment the principal to be held, administered and disposed of by the Trustee as provided in this Agreement. Neither the Trustee nor any Plan participant or beneficiary shall have any right or duty to compel such additional deposits or determine the sufficiency thereof.
- (f) The Company shall take reasonable steps to ensure that each Plan and this Trust shall have characteristics supporting a determination that they form an arrangement constituting an unfunded plan maintained for the purpose of providing deferred compensation to a select group of management or highly compensated employees for purposes of Title I of ERISA.

**Section 2. *Payments to Plan Participants and Their Beneficiaries***

- (a) Prior to a Change in Control the Company shall deliver to the Trustee a schedule (the "Payment Schedule") that indicates the amounts payable in respect of each Plan participant (and his or her beneficiaries) and that provides a formula or other instructions reasonably acceptable to the Trustee for determining the amounts so payable, the form in which such amounts are to be paid (as provided for or available under the Plan), and the time of commencement for the payment of such amounts. The Consulting Firm or, prior to a Change in Control, the Company, shall make such amendments to the Payment Schedule as may be necessary from time to time to ensure that it is complete and accurate; *provided*, that prior to a Change in Control such amendments shall be made only at such time or times as the Company in its discretion deems necessary or appropriate and following a Change in Control such amendments shall not be required to be made more frequently than quarterly; *and further provided*, that the Consulting Firm shall make such an amendment to update the Payment Schedule not more than thirty (30) days after receiving notice pursuant hereto that a Change in Control has occurred; *and further provided*, that the Consulting Firm's obligation to make any such amendment shall be subject to its having received the information it reasonably determines to be necessary to make such amendment. The Company shall provide the Consulting Firm with all information necessary to keep the Payment Schedule up to date on at least a quarterly basis, and in any event within five business days after the occurrence of a Change in Control. Upon application by a Plan participant or beneficiary for a benefit under the Plans, the Consulting Firm shall update the Payment Schedule with respect to the individual participant or beneficiary and notify the Trustee of the updated amount. Except as otherwise provided herein, the Trustee shall make payments to the Plan participants and their beneficiaries in accordance with such Payment Schedule. The Trustee or its agent shall not be required to make any determination for which the Company or the Consulting Firm has not provided payment information reasonably requested by the Trustee.
- (b) The Trustee shall make provision for the reporting and withholding of any federal taxes that may be required to be withheld with respect to the payment of benefits pursuant to the terms of the Plan and shall pay amounts withheld to the appropriate taxing authorities or determine that such amounts have been reported, withheld and paid by the Company. The Trustee shall make provision for the reporting and withholding of any state or local taxes that may be required with respect to the payment of benefits in accordance with such instructions as it shall receive from the Consulting Firm.
- (c) The Company shall from time to time pay taxes of any and all kinds whatsoever that at any time are lawfully levied or assessed upon or become payable in respect of the Trust Fund, the income or any property forming a

part thereof or any security transaction pertaining thereto. To the extent that any taxes lawfully levied or assessed upon the Trust Fund are not paid by the Company, the Trustee shall have the power to pay such taxes out of the Trust Fund and shall seek reimbursement from the Company. Prior to making any payment, the Trustee may require such releases or other documents from any lawful taxing authority as it shall deem necessary. The Trustee shall contest the validity of taxes in any manner deemed appropriate by the Company or its counsel, but at the Company's expense, and only if it has received an indemnity bond or other security satisfactory to it to pay any such expenses. The Trustee shall not be liable for any non-payment of tax when it distributes an interest hereunder on directions from the Company or the Consulting Firm.

- (d) The Company or its Subsidiaries may make payment of benefits directly to Plan participants or their beneficiaries as they become due under the terms of the Plan, subject to reimbursement in accordance with Section 4. The Company shall notify the Trustee of its decision to have benefits paid directly, prior to the time amounts are payable to participants or their beneficiaries. If the Company fails so to notify the Trustee, or if, at any time following a Change in Control, the Trustee receives notice from a Plan participant or beneficiary that the Company and its Subsidiaries have failed to make a payment when due, the Trustee shall promptly make payment (and any subsequent payments, if the missed payment was one of a series) in accordance with the Payment Schedule.

In addition, if the principal of the Trust, and any earnings thereon, are not sufficient to make payments of benefits in accordance with the terms of the Plan, the Company and its Subsidiaries shall make the balance of each such payment as it falls due. The Trustee shall notify the Company where principal and earnings are not sufficient.

- (e) Notwithstanding anything contained in this Agreement to the contrary, if at any time the Trust is finally determined by the Internal Revenue Service (the "IRS") not to be a "grantor trust" with the result that the income of the Trust Fund is not treated as income of the Company or its Subsidiaries pursuant to Sections 671 through 679 of the Code, or if a tax is finally determined by the IRS to be payable by one or more participants or beneficiaries with respect to any interest in the Plan or the Trust Fund prior to payment of such interest to such participant or beneficiary and by reason of the Trust, then the Trust shall immediately terminate. The Trustee shall immediately distribute such interest in a lump sum to each participant or beneficiary entitled thereto regardless of whether such participant's employment has terminated and regardless of form and time of payments specified in or pursuant to the Plan as directed by the Company. Any remaining assets (less any expenses or costs due under Section 9 of this Agreement) shall then be

paid by the Trustee to the Company in such amounts, and in the manner instructed by the Company.

**Section 3. Trustee Responsibility Regarding Payments to Trust Beneficiary When Grantor is Insolvent**

- (a) The Trustee shall cease payment of benefits to Plan participants and their beneficiaries if a Grantor is "Insolvent". A Grantor shall be considered "Insolvent" for purposes of this Agreement if (i) it is unable to pay its debts as they become due, or (ii) it is subject to a pending proceeding as a debtor under the United States Bankruptcy Code.
- (b) At all times during the continuance of this Trust, as provided in Section 1(d) hereof, the principal and income of the Trust shall be subject to claims of general creditors of the Grantors under federal and state law as set forth below.
- (1) Each Grantor shall have the duty to inform the Trustee in writing of its Insolvency. If a person claiming to be a creditor of a Grantor notifies the Trustee that the Grantor has become Insolvent, the Trustee shall provide the Grantor with a copy of such writing and absent the Grantor's provision of an independent expert's opinion satisfactory to the Trustee that the Grantor is not Insolvent, the Trustee shall discontinue payment of benefits to Plan participants or their beneficiaries as described at (3) below.
  - (2) Unless the Trustee has actual knowledge of a Grantor's Insolvency, or has received notice from the Grantor or a person claiming to be a creditor alleging that the Grantor is Insolvent, the Trustee shall have no duty to inquire whether the Grantor is Insolvent.
  - (3) If at any time the Trustee has received a written notice containing information or allegations described in Section 3(b)(1) that a Grantor with respect to any subtrust (or to the Trust, if no subtrusts exist) is Insolvent, the Trustee shall discontinue payments to Plan participants or their beneficiaries from such subtrust or Trust, as the case may be, and shall hold the assets of the subtrust or Trust, as the case may be, for the benefit of the Grantor's general creditors. Nothing in this Agreement shall in any way diminish any rights of Plan participants or their beneficiaries to pursue their rights as general creditors of a Grantor with respect to benefits due under the Plans or otherwise.
  - (4) The Trustee shall resume the payment of benefits to Plan participants or their beneficiaries in accordance with Section 2 of this Agreement only after it has been demonstrated to the Trustee's satisfaction that the Grantors are not Insolvent (or are no longer Insolvent).

- (c) Provided that there are sufficient assets, if the Trustee discontinues the payment of benefits from the Trust pursuant to Section 3(b) hereof and subsequently resumes such payments, the first payment following such discontinuance shall include the aggregate amount of all payments due to Plan participants or their beneficiaries under the terms of the Plan for the period of such discontinuance, less the aggregate amount of any payments made to Plan participants or their beneficiaries by the Company and its Subsidiaries in lieu of the payments provided for hereunder during any such period of discontinuance.

**Section 4. *Payments to the Company and its Subsidiaries.***

Except as provided in Section 3 hereof and this Section 4, following a Change in Control the Company shall have no right or power to direct the Trustee to return to the Company or its Subsidiaries or to divert to others any of the Trust assets before all payments of benefits have been made to Plan participants and their beneficiaries pursuant to the terms of the Plans. Notwithstanding the foregoing, (i) the Company may cause any or all of the assets of the Trust to be withdrawn prior to a Change in Control; (ii) following a Change in Control, upon presentation to the Trustee of evidence satisfactory to the Trustee that the Company or a Subsidiary has paid a benefit directly pursuant to Section 2(d), and upon request by the Company, the Trustee shall reimburse the Company or the Subsidiary for the amount of such payment out of available assets of the Trust; (iii) the Company may at any time substitute or cause to be substituted Trust assets for assets of equivalent value, subject, however, to the Trustee's consent in the case of any such substitution attempted after a Change in Control; and (iv) at any time from and after a Change in Control, the Company may withdraw or cause to be withdrawn assets of the Trust within the limits specified in Section 14.

**Section 5. *Investment Authority***

The Trustee shall have, without exclusion, all powers conferred on the Trustee by applicable law, unless expressly provided otherwise herein, and all rights associated with assets of the Trust shall be exercised by the Trustee, and shall in no event be exercisable by or rest with participants; *provided*, that the Company shall have the right (but not the obligation) to direct the manner in which the Trustee shall invest the Trust Fund by delivering to the Trustee, from time to time prior to a Change in Control, written investment guidelines, which the Trustee shall follow (to the extent consistent with its duties under applicable law) until such investment guidelines are revoked or modified by an instrument in writing delivered to the Trustee prior to a Change in Control. Subject to the foregoing, the Trustee shall have full power and authority to invest and reinvest the Trust Fund in any investment permitted by law, exercising the judgment and care that persons of prudence, discretion and intelligence would exercise under the circumstances then

prevailing considering the probable income and safety of their capital, including, without limiting the generality of the foregoing, the power:

- (a) To invest and reinvest the Trust Fund, together with the income therefrom, in common stock, preferred stock, mutual funds, bonds, mortgages, notes, time certificates of deposit, commercial paper and other evidences of indebtedness (including those issued by the Trustee or any of its affiliates), other securities, policies of life insurance, annuity contracts, options to buy or sell securities or other assets, and other property of any kind (personal, real or mixed, and tangible or intangible);
- (b) To deposit or invest all or any part of the assets of the Trust Fund in savings accounts or certificates of deposit or other deposits which bear a reasonable interest rate in a bank, including the commercial department of the Trustee, if such bank is supervised by the United States or any state;
- (c) To hold, manage, improve and control all property, real or personal, forming part of the Trust Fund and to sell, convey, transfer, exchange, partition, lease for any term, even extending beyond the duration of this Trust, and otherwise dispose of the same from time to time in such manner, for such consideration and upon such terms and conditions as the Trustee shall determine;
- (d) To have, respecting securities, all the rights, powers and privileges of an owner, including the power to give proxies, pay assessments and other sums deemed by the Trustee to be necessary for the protection of the Trust Fund, to vote any corporate stock either in person or by proxy, with or without power of substitution for any purpose; to participate in voting trusts, pooling agreements, foreclosures, reorganizations, consolidations, mergers and liquidations and, in connection therewith, to deposit securities with and transfer title to any protective or other committee under such terms as the Trustee may deem advisable; to exercise or sell stock subscriptions or conversion rights; and regardless of any limitation elsewhere in this document relative to investment by the Trustee, to accept and retain as an investment any securities or other property received through the exercise of any of the foregoing powers;
- (e) To hold in cash, without liability for interest, such portion of the Trust Fund which, in its discretionary determination, shall be reasonable under the circumstances, pending investments or payments of expenses, or the distribution of benefits;
- (f) To take such actions as may be necessary or desirable to protect the Trust Fund from loss due to the default on mortgages held in the Trust, including the appointment of agents or trustees in such other jurisdictions as may seem desirable, to transfer property to such agents or trustees, to grant such

powers as are necessary or desirable to protect the Trust or its assets, to direct such agents or trustees, or to delegate such power to direct and to remove such agents or trustees;

- (g) To employ such agents, including investment advisors, custodians, sub-custodians and counsel as may be reasonably necessary and to pay them reasonable compensation; to settle, compromise or abandon all claims and demands in favor of or against the Trust assets;
- (h) To cause title to property of the Trust to be issued, held or registered in the individual name of the Trustee or in the name of its nominee(s) or agents, or in such form that title will pass by delivery;
- (i) To exercise all of the further rights, powers, options and privileges granted, provided for or vested in trustees generally under the laws of the State of California, so that powers conferred upon the Trustee herein shall not be in limitation of any authority conferred by law, but shall be in addition thereto;
- (j) To borrow money from any source (including the Trustee) and to execute promissory notes, mortgages, or other obligations and to pledge or mortgage any Trust assets as security;
- (k) To lend certificates representing stocks, bonds, or other securities to any brokerage or other firm selected by the Trustee;
- (l) To institute, compromise and defend actions and proceedings; to pay or contest any claim; to settle a claim by or against the Trustee by compromise, arbitration, or otherwise to release, in whole or in part, any claim belonging to the Trust to the extent that the claim is uncollectible;
- (m) To use securities, depositories or custodians and to allow such securities as may be held by a depository or custodian to be registered in the name of such depository or its nominee or in the name of such custodian or its nominee;
- (n) To invest the Trust Fund from time to time in one or more investment funds, which funds shall be registered under the Investment Company Act of 1940 (including companies with respect to which the Trustee or an affiliate is the investment adviser or provides other services);
- (o) To invest in stock or other securities of the Company and to retain such stock to the extent consistent with such investment guidelines as the Company may deliver to the Trustee; *provided*, that with respect to any such investment the requirements of IRS Notice 2000-56 (as the same may be modified, but only so long as such requirements, as originally set forth or as so modified, are in effect) shall be satisfied; and

- (p) To do all other acts necessary or desirable for the proper administration of the Trust Fund, as if the Trustee were the absolute owner thereof. However, nothing in this section shall be construed to mean the Trustee assumes any responsibility for the performance of any investment made by the Trustee in its capacity as trustee under this Agreement. Notwithstanding any powers granted to the Trustee pursuant to this Agreement or applicable law, the Trustee shall not have any power that could give this Trust the objective of carrying on a business and dividing the gains therefrom within the meaning of Section 301.7701-2 of the Procedure and Administrative Regulations promulgated pursuant to the Code.

**Section 6. *Disposition of Income***

During the term of this Trust, all income received by the Trust, net of expenses and taxes, shall be accumulated and reinvested, except as the same may be disbursed in accordance with the terms of this Agreement.

**Section 7. *Accounting by the Trustee and the Consulting Firm, etc.***

- (a) The Trustee shall keep accurate and detailed records of all investments, receipts, disbursements, and all other transactions required to be made, including such specific records as shall be agreed upon in writing between the Company and the Trustee. Within 120 days following the close of each calendar year and within 120 days after the removal or resignation of the Trustee, the Trustee shall deliver to the Company a written account of its administration of the Trust during such year or during the period from the close of the last preceding year to the date of such removal or resignation, setting forth all investments, receipts, disbursements and other transactions effected by it, including a description of all securities and investments purchased and sold with the cost or net proceeds of such purchases or sales (accrued interest paid or receivable being shown separately), and showing all cash, securities and other property held in the Trust at the end of such year or as of the date of such removal or resignation, as the case may be.
- (b) The Company shall furnish the Consulting Firm and the Trustee with copies of the Plans and any and all amendments thereto. The Company shall promptly provide the Consulting Firm with any and all information that the Consulting Firm reasonably requests or that the Company believes would be useful to the Consulting Firm in carrying out its duties hereunder, and shall promptly update such information as and if it changes. The Company shall also use its reasonable best efforts to cause each Plan participant or beneficiary to provide the Consulting Firm with all information that it may reasonably request in order to determine the amount of any payments due to the participant or beneficiary under the Plan.

**Section 8. *Responsibility of the Trustee and the Consulting Firm.***

- (a) The Trustee shall act with the care, skill, prudence and diligence under the circumstances then prevailing that a prudent person acting in like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like aims.
- (b) It is intended by the parties hereto that the Consulting Firm shall not be a fiduciary with respect to the Trust or any Plan.
- (c) The Trustee and the Consulting Firm may consult with legal counsel (who may also, but need not, be counsel for the Company or its Subsidiaries) generally with respect to any of their duties or obligations hereunder, and the Trustee may hire agents, accountants, actuaries, investment advisors, financial consultants or other professionals to assist it in performing any of its duties or obligations hereunder. The Trustee and the Consulting Firm shall incur no liability to any person for acting or refraining from acting in accordance with the advice of any such counsel, agent, accountant, actuary, investment advisor, financial consultant or other professional reasonably consulted or hired in accordance with the foregoing.
- (d) If an insurance policy is held as an asset of the Trust, the Trustee shall have no power to name a beneficiary of the policy other than the Trust, to assign the policy (as distinct from conversion of the policy to a different form) other than to a successor Trustee, or to loan to any person the proceeds of any borrowing against such policy; *provided*, that nothing herein shall be construed as limiting the Trustee's ability to assign any such policy (or loan any borrowing thereunder) to, or to name as beneficiary under such policy, the Company or a Subsidiary in accordance with a transaction contemplated by Section 3 or Section 4. The Trustee shall not be liable for the failure or inability of an insurance company to pay the proceeds of any policy when due.
- (e) The Company shall indemnify and hold each of the Trustee and the Consulting Firm harmless from and against all loss or liability (including expenses and reasonable attorneys' fees), to which it may be subject by reason of its: (i) taking or refraining from taking any action under and in accordance with this Agreement, including, without limitation, the appointment of a successor Trustee by the Consulting Firm or the appointment of a successor Consulting Firm by the Trustee; (ii) relying upon a certification of an authorized representative of the Company, or (in the case of the Trustee) the Consulting Firm, with respect to any instruction, direction, written investment guidelines or approval of the Company, until a subsequent certification is filed with it; (iii) acting upon any instrument, certificate, or paper reasonably believed by it to be genuine and to be signed or presented by the proper person or persons (and neither the Trustee nor the Consulting Firm shall be under any duty to make any investigation or

inquiry as to any statement contained in any such writing but may accept the same as conclusive evidence of the truth and accuracy of the statements therein contained); and (iv) in the case of the Trustee, making distributions in accordance with the terms of this Agreement and information or directions furnished to the Trustee by Plan participants or beneficiaries, the Consulting Firm or the Company; provided, however that the foregoing indemnity shall not apply to claims or liabilities resulting from or arising out of the Trustee's or the Consulting Firm's (as the case may be) negligence or willful misconduct. In the event the Trustee or the Consulting Firm undertakes (with the consent of the Company, in the case of any actions taken prior to a Change in Control) or is a defendant in any litigation arising in connection with this Agreement, the Company shall indemnify it against its actual and prospective costs, expenses and liability, including reasonable attorney's fees which fees and expenses shall be paid monthly in arrears by the Company to or on behalf of the Trustee following the Company's receipt of notice of such legal expenses. Notwithstanding the foregoing, in the event that , liability, cost or expense incurred by the Trustee is determined to be attributable to the Trustee's negligence or willful misconduct in connection with its execution of its duties under the Trust Agreement, the Trustee will promptly reimburse the Company for the legal fees and expenses which have been previously paid on behalf of the Trustee by the Company.

- (f) The Company has represented to the Trustee that each Plan qualifies as either (i) an excess benefit plan within the meaning of Section 4(b) of ERISA or (ii) a "top-hat" plan maintained primarily for the purpose of providing deferred compensation for a select group of management or highly compensated employees, which is exempt from the provisions of Part 4 of Title I of ERISA (an "exempt plan"). The Trustee is entering into this Agreement in reliance upon the Company's representation. Accordingly, in the event that any Plan fails to qualify as an exempt plan, then notwithstanding any other provision of this Agreement to the contrary, the Company will indemnify and hold the Trustee harmless from all liabilities, damages, costs and expenses (including, without limitation, reasonable attorneys' fees and expenses) that the Trustee incurs as a result of a breach of fiduciary duty under ERISA arising from any action taken, or omitted to be taken, by the Trustee in good faith in accordance with this Agreement and in reasonable reliance on the Company's representation as to the exempt-plan status of the Plans, other than any such liability, damage, cost or expense that results from or arises out of the Trustee's negligence or willful misconduct.
- (g) All releases and indemnities provided in this Agreement shall survive the termination of this Agreement.

**Section 9. Compensation and Expenses of Trustee and Consulting Firm**

The Trustee and the Consulting Firm shall each be entitled to such reasonable compensation for its services as shall be agreed upon between the Company and the Trustee or the Consulting Firm, as the case may be. The Trustee and the Consulting Firm shall also be entitled to receive their reasonable expenses incurred in discharging their duties hereunder. Such compensation and expenses shall be paid by the Company or a Subsidiary, and if not so paid shall be paid by the Trustee from the assets of the Trust.

**Section 10. Resignation and Removal of Trustee**

- (a) The Trustee may resign at any time by written notice to the Company, which shall be effective sixty (60) days after receipt of such notice unless the Company and the Trustee agree otherwise.
- (b) The Trustee may be removed by the Company on sixty (60) days written notice or upon shorter written notice accepted by the Trustee.
- (c) Upon resignation or removal of the Trustee and appointment of a successor Trustee, all assets shall subsequently be transferred to the successor Trustee. The transfer shall be completed within 90 days after receipt of notice of successor trustee's acceptance of appointment.
- (d) If the Trustee resigns or is removed, another bank or trust company shall be appointed as successor trustee. Before a Change in Control such appointment shall be made by the Company. From and after a Change in Control any such appointment shall be made by the Consulting Firm, subject to the minimum standards set forth in Exhibit B hereto. The Company shall promptly notify the Consulting Firm of the name and address of a successor trustee appointed by it, and the Consulting Firm shall promptly notify Plan participants and beneficiaries of the name and address of every successor trustee appointed or otherwise serving following a Change in Control. Each appointment shall be effective when accepted in writing by the new trustee, who shall have all of the rights and powers of the former trustee, including ownership rights in the Trust assets upon transfer of same to the new trustee. The former trustee shall execute any instrument necessary or reasonably requested by the Company or the successor trustee to evidence the transfer. If no appointment of a successor trustee has been made pursuant to this subsection, the Trustee may apply to a court of competent jurisdiction for appointment of a successor or for instructions. All expenses of the Trustee in connection with the proceeding shall be allowed as administrative expenses of the Trust.
- (e) The successor trustee need not examine the records and acts of any prior trustee and may retain or dispose of existing Trust assets, subject to Sections 7 and 8 hereof. The successor trustee shall not be responsible for any claim or liability resulting from any action or inaction of any prior trustee or from

any other past event, or any condition existing at the time it becomes successor trustee.

**Section 11. Resignation and Removal of Consulting Firm**

- (a) The Consulting Firm may resign at any time by written notice to the Company, which shall be effective sixty (60) days after receipt of such notice unless the Company and the Consulting Firm agree otherwise.
- (b) The Consulting Firm may be removed by the Company at any time prior to a Change in Control on sixty (60) days written notice or upon shorter written notice accepted by the Consulting Firm.
- (c) Upon resignation or removal of the Consulting Firm in accordance with (a) or (b) above, a firm of compensation or retirement plan consultants or certified public accountants shall be appointed the successor Consulting Firm. Before a Change in Control, such appointment shall be made by the Company, and after a Change in Control it shall be made by the Trustee, subject to such minimum standards and guidelines as the Company shall have prescribed prior to the Change in Control. The Consulting Firm shall thereupon deliver to the successor Consulting Firm all records and documents in its possession as may be reasonably required to enable the successor Consulting Firm properly to carry out its duties under this Agreement. The Company and the Trustee shall each promptly notify the other of the name and address of a successor Consulting Firm appointed by it, and a successor Consulting Firm, if appointed or otherwise serving following a Change in Control, shall promptly notify the Plan participants and beneficiaries of its appointment, name and address.

**Section 12. Amendment or Termination**

- (a) This Agreement may be amended by a written instrument executed by the Trustee and the Company. Any such amendment that increases the obligations of or otherwise adversely affects the Consulting Firm shall not be effective unless the Consulting Firm consents in writing; *provided*, that the Company and the Trustee reserve the right, prior to a Change in Control and upon notice to the Consulting Firm, but without the consent of the Consulting Firm, to reduce or eliminate the Consulting Firm's role prospectively. From and after a Change in Control, (i) this Agreement may not be amended in any manner adverse to any Plan participant or beneficiary unless such participant or beneficiary gives his or her signed consent to the amendment; *provided*, that the following shall not be deemed adverse to any Plan participant or beneficiary for purposes of this clause (i): an amendment to combine or eliminate subtrusts or create new subtrusts within the Trust, and an amendment that is deemed necessary (as evidenced by the execution of any such amendment by the Company and the Trustee),

consistent with the irrevocable status of the Trust, to ensure insofar as is possible that neither the Trust nor any portion thereof constitutes a "funding" for tax or ERISA purposes; (ii) the Payment Schedule may not be amended except by the Consulting Firm in accordance with Section 2(a); and (iii) Exhibit A may not be amended unless such amendment is approved by a majority of all Plan participants (and beneficiaries of deceased participants), including in such majority Plan participants (and beneficiaries of deceased participants) with Plan benefits exceeding, in aggregate present value (as reasonably determined by the Consulting Firm), one half (50%) of the total present value of all benefits payable under the Plans. No amendment shall conflict with the terms of the Plan or shall make the Trust revocable after it has become irrevocable in accordance with Section 1(b) hereof.

- (b) The Company may revoke or terminate the Trust at any time prior to a Change in Control. From and after a Change in Control, the Trust shall not terminate until the date on which Plan participants and their beneficiaries are no longer entitled to benefits pursuant to the terms of the Plan. Upon termination of the Trust, any assets remaining in the Trust shall be returned to the Grantors; *provided*, that any stock of the Company then held in the Trust shall be returned to the Company. Such remaining assets shall be paid by the Trustee in such amounts and in the manner instructed by the Company, whereupon the Trustee shall be released and discharged from all obligations hereunder. From and after the date of termination, and until final distribution of the Trust Fund, the Trustee shall continue to have all of the powers provided herein as are necessary or expedient for the orderly liquidation and distribution of the Trust Fund.

### Section 13. *Definition of Change in Control*

As used herein, the term Change in Control shall mean the occurrence of any of the following:

- (i) The acquisition by any individual, entity or group (within the meaning of Section 13(d)(3) or 14(d)(2) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) (a "Person") of beneficial ownership (within the meaning of Rule 13d-3 promulgated under the Exchange Act) of 25% or more of either (i) the then outstanding shares of Stock (the "Outstanding Company Stock") or (ii) the combined voting power of the then outstanding voting securities of the Company entitled to "Outstanding Company Voting Securities"; *provided*, however, that for purposes of this subsection (i), the following acquisitions shall not constitute a Change of Control: (A) any acquisition directly from the Company, (B) any acquisition by the Company, (C) any acquisition by any employee benefit plan (or related trust) sponsored or maintained by the Company or any corporation controlled by the Company or (D) any acquisition by any corporation pursuant to a transaction which complies with clauses (A), (B) and (C) or subsection (iii) below; or

(ii) individuals who, as of the date hereof, constitute the Board (the "Incumbent Board") cease for any reason or constitute at least a majority of the Board; provided, however, that any individual becoming a director subsequent to the date hereof whose election, or nomination for election by the Company's shareholders, was approved by a vote of at least a majority of the directors then comprising the Incumbent Board shall be considered as though such individual were a member of the Incumbent Board, but excluding, for this purpose, any such individual whose initial assumption of office occurs as a result of an action or a threatened election contest with respect to the election or removal of directors or other actual or threatened solicitation of proxies or consents by or on behalf of a Person other than the Board; or

(iii) consummation of a reorganization, merger or consolidation or sale or other disposition of all or substantially all of the assets of the Company (a "Business Combination"), in each case, unless, following such Business Combination, (A) all or substantially all of the individuals and entities who were the beneficial owners of the Outstanding Company Stock and the Outstanding Company Voting Securities immediately prior to such Business Combination beneficially own, directly or indirectly, more than 50% of, respectively, the then outstanding shares of common stock and the combined voting power of the then outstanding voting securities entitled to vote generally in the election of directors, as the case may be, of the corporation resulting from such Business Combination (including, without limitation, a corporation which as a result of such transaction owns the Company or all or substantially all of the Company's assets either directly or through one or more subsidiaries) in substantially the same proportions as their ownership, immediately prior to such Business Combination of the Outstanding Company Stock and Outstanding Company Voting Securities, as the case may be, (B) no Person (excluding any corporation resulting from such Business Combination or any employee benefit plan (or related trust) of the Company or such corporation resulting from such Business Combination) beneficially owns, directly or indirectly, 25% or more of, respectively, the then outstanding shares of common stock of the corporation resulting from such Business Combination or the combined voting power of the then outstanding voting securities of such corporation except to the extent that such ownership existed prior to the Business Combination, and (C) at least a majority of the members of the board of directors of the corporation resulting from such Business Combination were members of the Incumbent Board at the time of the execution of the initial agreement, or of the action of the Board, providing for such Business Combination; or

(iv) approval by the shareholders of the Company of a complete liquidation or dissolution of the Company.

#### Section 14. *Change In Control Provisions*

The following provisions relating to a Change in Control shall apply notwithstanding any provision contained herein to the contrary:

- (a) The Company shall have the duty to notify the Trustee and the Consulting Firm whenever a Change in Control occurs; *provided*, that if a Change in Control has occurred, it shall be treated as having occurred for purposes of this Agreement notwithstanding any failure by the Company to give such notice. If, notwithstanding the absence of notice by the Company as described in the first sentence of this Section 14(a), the Trustee receives credible information (from Plan participants or beneficiaries or otherwise) that a Change in Control has occurred, the Trustee shall so notify the Company (including a copy contemporaneously delivered to the General Counsel of the Company) and the Consulting Firm stating that it has received such information and reciting the provisions of this Section 14(a). If the Company thereafter delivers to the Trustee and the Consulting Firm an opinion of independent legal counsel to the Company (which opinion may be based upon representations of fact, as long as counsel does not know that such representations are untrue) stating that a Change in Control has not occurred, no Change in Control will be deemed to have occurred for purposes of this Agreement; *provided*, that until the delivery of such an opinion, unless the Trustee shall have determined to its satisfaction that no Change in Control has occurred, the Company shall not be authorized to revoke the Trust or to take any action to recover assets therefrom to the extent such action would not have been permitted following a Change in Control.
- (b) Following the occurrence of a Change in Control, the Trustee shall determine in its sole and absolute discretion, and shall give the Company and the Consulting Firm notice of, the "Trust Asset Value" (as hereinafter defined) and the Consulting Firm shall determine, and give the Company and the Trustee notice of, the "Required Assets" (as hereinafter defined). Such determinations shall be made, in each case as of the most recent "Measurement Date" (as hereinafter defined), as soon as practical following, and in all events within thirty days following receipt of notice of, the date of the Change in Control, and thereafter not less frequently than annually. In the case of the computation of the Required Assets, such determinations shall be based upon the most recent information available to the Consulting Firm pursuant to Section 2(a).
- (c) Following the occurrence of a Change in Control, the Company shall contribute or cause to be contributed to the Trust, in cash, the excess (if any) of the Required Assets over the Trust Asset Value as of each Measurement Date beginning with the Change in Control, plus interest at the Applicable Federal Rate (as hereinafter defined) from such Measurement Date through the date of contribution, within three business days after receiving notice thereof.

- (d) The Company shall have the right to withdraw, or to cause to be withdrawn by itself or by one or more Subsidiaries, assets from the Trust in accordance with this Section 14(d). The Company may exercise this right of withdrawal by giving the Trustee and the Consulting Firm notice of its desire to do so and directing the Trustee to distribute to it and/or to one or more of its Subsidiaries all or any portion of the assets comprising the Trust Fund, and the Trustee shall so distribute such assets as promptly as practicable; *provided*, that no such distribution shall be made after a Change in Control (regardless of when the Company's notice of exercise is given) to the extent that the Trust Asset Value as of the most recent Measurement Date before such distribution is made, adjusted to reflect such distribution, would be less than 120 percent of the Required Assets determined as of such Measurement Date.
- (e) For purposes of this Agreement:
- (i) The "Applicable Federal Rate" as of any date means the applicable federal rate (as determined under Section 1274(d) of the Code) in effect on that date. Unless specified herein to the contrary, the applicable federal rate shall be the applicable long term federal rate as determined under Section 1274(d) of the Code.
  - (ii) The term "Measurement Date" means the last day of each calendar year or the date a Change in Control occurs;
  - (iii) The term "Required Assets" means the present value, as of the Measurement Date, of the sum of (x) the maximum aggregate amount that could become payable to participants and beneficiaries under the Plans if their employment terminated on the six-month anniversary of the Measurement Date, and (y) an estimate of the expenses reasonably likely to be incurred by the Trust from the Measurement Date through such six-month anniversary, including without limitation the Trustee's and Consulting Firm's fees as estimated by the Trustee and the Consulting Firm, respectively. In determining the present value of any benefit under a Plan, the Consulting Firm shall use the interest rate in effect for purposes of the Plan on the Measurement Date or, if it produces a larger present value, the interest rate that the Consulting Firm reasonably expects to be in effect on such six-month anniversary, based upon market conditions at the time the determination is being made; and
  - (iv) The term "Trust Asset Value" means the aggregate net fair market value of the assets of the Trust Fund as of the relevant Measurement Date.

#### Section 15. *Legal Defense Fund*

- (a) **The Trustee shall establish within the Trust Fund a separate fund, hereinafter referred to as a "Legal Defense Fund". The Legal Defense Fund shall consist of such portions of its contributions to its Trust as the Company shall specify in writing at the time of contribution, together with all income, gains and losses and proceeds from the investment, reinvestment and sale thereof, less all payments therefrom and expenses charged thereto in accordance with the provisions of this Agreement. Subject to Section 3, the Legal Defense Fund shall be held and administered by the Trustee for the purpose of defraying the costs and expenses incurred by participants and beneficiaries associated with the enforcement of their rights under the Plans by litigation or other legal action and the Trustee in performing its duties under this Section.**
- (b) **The Legal Defense Fund shall be maintained and administered as a separate segregated account, provided, however, that the assets of the Legal Defense Fund may be commingled with all other assets of the same Trust, and with the assets of any other Trust, solely for investment purposes.**
- (c) **If, at any time after a Change in Control, legal proceedings are brought against the Trustee by the Company or another party seeking to invalidate any of the provisions of this Agreement as they relate to the Trust, or seeking to enjoin the Trustee from paying any amounts from any Trust or from taking any other action otherwise required or permitted to be taken by the Trustee under this Agreement with respect to any Trust, the Trustee shall take all steps that may be necessary in such proceeding to uphold the validity and enforceability of the provisions of this Agreement as they relate to such Trust. The Trustee shall be empowered to retain counsel and other appropriate experts, including actuaries and accountants, to assist it in making any determination under this Section 15. All costs and expenses incurred by the Trustee in connection with any such proceeding (including, without limitation, the payment of reasonable fees, costs and disbursements of any counsel, actuaries, accountants or other experts retained by the Trustee in connection with such proceeding) shall be charged to and paid from the Legal Defense Fund. To the extent the Trustee's legal fees and expenses exceed the amount available in the Legal Defense Fund, such fees and expenses shall be paid by the Trustee from the assets of the Trust Fund.**
- (d) **If, at any time after a Change in Control, a participant or beneficiary notifies the Trustee in writing that the Company or any Subsidiary has refused to pay a claim asserted by such participant or beneficiary under any Plan, the participant or beneficiary ("Claimant") may demand payment from the Legal Defense Fund with respect to expenses incurred in connection with the initiation or defense of any litigation or other legal action by or against the Company or the Subsidiary. Such demand shall be made in writing by delivering to the Trustee within 90 days of the date the Claimant incurs such expenses (i) a certification signed by the Claimant that the Company or the Subsidiary is in default in paying its obligations under the Plan, and (ii)**

itemizing in reasonable detail in a form acceptable to the Trustee the expenses payable by the Legal Defense Fund. A participant's or beneficiary's right to claim against the Legal Defense Fund or to be reimbursed therefrom shall be subject to such additional limitations, conditions and preclusions, if any, as the Company may prescribe by notice to the Trustee prior to the Change in Control.

- (e) In the event that on the date a Claimant's expenses are to be paid from the Legal Defense Fund other expenses payable from such fund have been claimed but not yet paid and the aggregate amount of all claims exceeds the amount available in the Legal Defense Fund, the Company shall be obligated to make an additional contribution to the Legal Defense Fund. In the event the Company fails to make such additional contribution, the Trustee shall promptly advise the Claimant and shall only pay that portion of the amount of the claim which is determined by multiplying such Claimant's claim by a fraction, the numerator of which is the amount held in the Legal Defense Fund and the denominator of which is the aggregate of the claims made by all Claimants.
- (f) Notwithstanding any provision herein to the contrary, the Trustee shall be required to act under this Section only to the extent there are sufficient amounts available in the Legal Defense Fund to defray the costs and expenses the Trustee reasonably anticipates will be incurred in connection with such action.
- (g) The Company's Legal Defense Fund shall continue to be held and administered by the Trustee for the purposes described in Section 15 until such time as all benefits to which all participants are entitled under all Plans shall have been paid in full to such participants or their beneficiaries. Any balance then remaining in the Legal Defense Fund shall be distributed to the Company.

#### Section 16 *Miscellaneous*

- (a) Any provision of this Agreement prohibited by law shall be ineffective to the extent of any such prohibition, without invalidating the remaining provisions hereof.
- (b) Benefits payable to Plan participants and their beneficiaries under this Agreement may not be anticipated, assigned (either at law or in equity), alienated, pledged, encumbered or subjected to attachment, garnishment, levy, execution or other legal or equitable process.
- (c) This Agreement shall be governed by and construed in accordance with the laws of the State of California..

(d) This Agreement shall be binding on, and the powers granted to the Company, the Consulting Firm and the Trustee, respectively, shall be exercisable by the respective successors and assigns of the Company, the Consulting Firm and the Trustee. Any corporation that succeeds to substantially all of the business of the Trustee by merger, consolidation, purchase or otherwise shall upon succession and without appointment or other action by the Company be and become successor Trustee hereunder.

(e) Any communication to the Consulting Firm or the Trustee, including any notice, direction, designation, certification, order, instruction or objection, shall be in writing (including for this purpose e-mail, fax or similar paperless transmissions) and signed (including equivalent authentications used in connection with paperless transmissions) by the person authorized under the applicable Plan or the Agreement. Each of the Consulting Firm and the Trustee shall be fully protected and indemnified by the Company against any loss or liability incurred, other than as a result of its negligence or willful misconduct, in acting in accordance with such written communications. Any notice required or permitted to be given hereunder shall be deemed given if written and hand delivered, mailed, postage prepaid, certified mail, return receipt requested or transmitted by facsimile to the Company, the Consulting Firm or the Trustee at the following address or such other address as a party may specify:

(i) if to the Company:

State Street Corporation  
225 Franklin Street  
Boston, MA 02110  
Attention: General Counsel

Facsimile No. (617) 664-4006

(ii) If to the Consulting Firm:

Mercer Human Resource LLC  
2000 Clarendon Street  
Boston, MA 02116-5089

(iii) If to the Trustee:

U. S. Trust Company, N.A.  
515 S. Flower Street, Suite 2800  
Los Angeles, CA 90071-2291

Facsimile No. (213) 488-1366

Attention: Dennis Kunisaki

- (f) Any obligation of the Company and/or the Trust to pay the Trustee amounts pursuant to any provision of this Agreement shall survive any amendment or termination hereof or the Trustee's resignation or removal.

**Section 17. Effective Date.**

The effective date of this Agreement shall be June 1, 2002.

IN WITNESS WHEREOF the Company and the Trustee have signed this Agreement as of the date first written above.

State Street Corporation Supplemental Executive Retirement Plan (SERP)

State Street Corporation Supplemental Defined Benefit Pension Plan (SUPER SERP)

**EXHIBIT B**

**Minimum Standards for Successor Trustee**

1. **The successor trustee must not be affiliated with the Company or any company, entity or group that acquires the Company pursuant to a Change in Control.**
2. **The successor trustee must provide trust services to ten or more nonqualified trusts where the trust arrangement (commonly referred to as a "rabbi trust") does not affect the status of any underlying nonqualified plan as an unfunded plan maintained for the purpose of providing deferred compensation for select management and highly compensated employees for purposes of Title I of ERISA.**
3. **The successor trustee must have at least \$25 billion in assets under trustee custodianship.**
4. **The successor trustee must have at least \$5 billion in assets under discretionary investment management.**
5. **The successor trustee must have more than one investment product and several classes of assets under management.**
6. **The successor trustee's investment products must have competitive performance (net of fees), in the sole and absolute judgment of the Consulting Firm, relative to market and peer group indices.**
7. **The successor trustee must have been in the business of providing trust services to both nonqualified and qualified plans for a period of 10 years immediately prior to its selection.**

**Notwithstanding the seven minimum standards set forth in this Schedule B, the Consulting Firm may waive any one or more of these minimum standards if the Consulting Firm, in its sole and absolute discretion, determines that any such standard or standards can not reasonably be satisfied.**

AMENDMENT TO THE RABBI TRUST AGREEMENT FOR THE  
STATE STREET CORPORATION NONQUALIFIED DEFERRED COMPENSATION  
PLANS

The Rabbi Trust Agreement (the "Trust"), entered into as of June 1, 2002, between State Street Corporation, Evercore Trust Company, N.A., who succeeded U.S. Trust Company, National Association effective May 1, 2009, and Mercer Human Resource LLC, is hereby amended, effective as of January 1, 2013, as follows:

1. In accordance with Section 12(a) of the Trust, Exhibit A to the Trust is amended and restated to adopt additional Plans and to update the names of existing Plans as set forth in Exhibit A attached hereto.

IN WITNESS WHEREOF, the Company and Trustee have signed this amendment, effective as of January 1, 2013.

### EXHIBIT 31.1

#### RULE 13a-14(a)/15d-14(a) CERTIFICATION

I, Joseph L. Hooley, certify that:

- I have reviewed this Annual Report on Form 10-K of State Street Corporation;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- Based on my knowledge, the financial statements, and other financial information included in this report, fairly present, in all material respects, the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

- (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
- (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
