## Barings UK Unit Trusts

### Introduction

---

These Interim Reports and Unaudited Financial Statements cover the period to 29 February 2020 and review the performance and market outlook for seven of the unit trusts managed by Baring Fund Managers Limited (“the Manager”). These comprise the Barings Dynamic Capital Growth Fund, the Barings Eastern Trust, the Barings European Growth Trust, the Barings Europe Select Trust, the Barings German Growth Trust, the Barings Japan Growth Trust and the Barings Strategic Bond Fund (“the Trusts”).

The functional and presentational currency for all the Trusts is Sterling except for the Barings German Growth Trust where the functional and presentational currency is Euros.

This is the first Interim Report and Financial Statements for these Trusts since the financial year ends were aligned to 31 August.

As the investor in one of the Trusts, your money is pooled with that of other investors in the same Trust and invested by the Manager in line with the Investment Objective of the particular trust.

The Barings Dynamic Capital Growth Fund closed on 3 December 2019, therefore the financial statements for this Trust have been produced on a basis other than Going Concern for the current period. The financial statements for the other Trusts have been produced on a Going Concern basis.

For further information about the Trusts please visit the Barings website, [www.barings.com](http://www.barings.com).

### Funds Available in Hong Kong

**Warning:** In relation to the funds as set out in this interim financial report, only the following funds are authorised by the Securities and Futures Commission (“SFC”) pursuant to Section 104 of the Securities and Futures Ordinance of Hong Kong (“SFO”) and hence may be offered to the public of Hong Kong:-

- Barings Europe Select Trust
- Barings Eastern Trust
- Barings European Growth Trust
- Barings German Growth Trust

The SFC’s authorisation is not a recommendation or endorsement of a scheme nor does it guarantee the commercial merits of a scheme or its performance. It does not mean the scheme is suitable for all investors nor is it an endorsement of its suitability for any particular investor or class of investors.

Please note that this interim financial report is a global document and therefore also contains information of the following funds which are not authorized by the SFC in Hong Kong and not available to the public in Hong Kong.

- Barings Dynamic Capital Growth Fund
- Barings Japan Growth Trust
- Barings Strategic Bond Fund

No offer shall be made to the public of Hong Kong in respect of the above unauthorised funds and unauthorised collective investment schemes.

### COVID-19

The spread of COVID-19 around the world in the first quarter of 2020 has caused significant volatility in international markets. There is significant uncertainty around the breadth and duration of business disruptions related to COVID-19, as well as its impact on the international economies and, as such, the Manager is actively monitoring the extent of the impact to its operations, financial accounting and reporting. There was no impact to these financial statements as of 29 February 2020. Please refer to the Post balance sheet events on pages 25, 35, 49, 68, 79 and 90.

---

## Barings Dynamic Capital Growth Fund

### Investment Objective and Policy

---

#### Fund Closure

Following a review of the Fund, the Directors resolved on 22 May 2019 to terminate the Barings Dynamic Capital Growth Fund and unitholders were offered a Scheme of Election to switch their holding into the Barings Multi Asset Fund. Any units which were not switched were redeemed on 3 December 2019, the closing date of the Fund and proceeds were returned to the unitholders.

#### Investment objective and policy

The investment objective of Barings Dynamic Capital Growth Fund (the "Fund") was to achieve capital growth by investing globally.

In order to achieve this objective, the investment objective was to invest directly and indirectly across a range of asset classes, such as equities and equity-related securities, fixed income, currencies, deposits, cash and money market instruments. Exposure might be gained indirectly to alternative investments.

In order to implement the investment policy, the Fund gained exposure through transferable securities, or collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager). It also used derivatives including futures, options, warrants, swaps and forward contracts for efficient portfolio management and for investment purposes.

Please refer to the Prospectus for the full investment objective and policy.

#### Performance Assessment

The Fund was not managed to a benchmark, nor did the Manager use a benchmark in assessing the Fund's performance. Investors may however refer to the information in the Morningstar's GBP Flexible Allocation Category which presents data for a range of funds (including the Fund) which are grouped according to investment style, including performance information, and which enables investors to compare information across products.

#### How the Fund was managed

The Fund invested in a range of asset classes and markets, which were determined by the Manager's asset allocation analysis. The Manager used the ideas generated by Barings' Strategic Policy Group and the asset allocation team chose what it believed to be the best asset classes to achieve the investment objectives of the Fund. Based on this analysis, the Manager selected the markets and individual companies that looked most attractive in its view. The Manager aimed to access a variety of asset classes in a transparent and flexible manner, and gained exposure to asset classes directly and/or indirectly, such as through the use of investment funds including index tracking and exchange traded funds.

#### Risk profile

Please see detailed below the key risks applicable to the Fund:

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.
- The rating of a bond is subject to change. There is no guarantee that a bond issuer will pay the interest due or repay the loan, which would result in a loss of income to the Fund, along with its initial investment. Bond values are likely to fall if interest rates rise.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund's value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative, as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

## Barings Dynamic Capital Growth Fund

Report of the Investment Manager

---

### Performance

During the reporting period from 1 September 2019 to 3 December 2019 the Barings Dynamic Capital Growth Fund (the “Fund”) produced an absolute net return for Class I GBP Inc of -0.12% compared with a return of 2.85% for the performance comparator. The table below shows the net annualised returns for the Class I GBP Inc units until the closure of the Fund on the 3 December 2019 against the performance comparator over the same period.

	01/09/2019 to 03/12/2019	01/03/2019 to 03/12/2019	01/03/2017 to 03/12/2019	01/03/2015 to 03/12/2019
Barings Dynamic Capital Growth Fund	(0.12)	4.25	8.99	16.30
Morningstar GBP Flexible Allocation Category	2.85	6.96	11.17	19.43

\* The Fund performance figures are for the period ended 3 December 2019, the last date that the Fund was priced. The comparator figures are for the period ended 31 December 2019.

Given the strong performance from equities over the fourth quarter of 2019, the Fund saw positive contributions across its equity positions. A particular highlight was our mid-cap European equity position, which also gained as mid-caps outperformed large-caps. UK and US equities exposure also helped performance.

We spent much of 2019 talking to clients about our conviction in the economically sensitive fixed income portions of the portfolio. These are fixed income positions including high yield bonds (US and European) and Emerging Market hard currency debt and it was heartening to see positive returns here – particularly when conventional government bonds were selling off. Income as well as spreads tightening both ‘worked’ which offset any losses from an increase in the underlying government bond yields. The exception is for Emerging Market local currency debt, where the strength of sterling was detrimental to these positions.

Specialist investments are a small position in the Fund. Our positions here are focused in a range of vehicles including listed private equity, and catastrophic bonds. This has been one of the largest detractors from returns over the reporting period and performance was impacted the most during the fourth quarter of 2019 as some of these positions experienced negative company specific news. However, Specialist Investments have been accretive to the performance over a longer period.

### Market outlook

The continuous spread of the Coronavirus and the potential human and economic impact, both in terms of size and duration of impact, is an unknown, and the development of economic conditions will determine how the key drivers of risky asset classes will evolve. As the Coronavirus outbreak develops, it brings with it revived fears of a global growth slowdown. There has already been an impact on travel, businesses and supply chains. Companies have been cancelling events globally, are advising for only essential business travel and are encouraging the use of video and audio conferencing as an alternative to face to face meetings. An air of caution naturally remains given the likelihood of greater economic disruption as the number of infected cases rise and more restrictions are imposed on people and businesses. Governments around the world have confirmed that they will provide stimulus to boost economic activity. There may be some rallies in markets on news of slowing infection rates or news of a medical/treatment breakthrough but the uncertainty will prevail. We will be looking to reduce risk asset exposure and add to areas such as emerging market debt and types like high yield. In these type of markets, we stand by our process and principles and continue to monitor the situation as it develops.

Please note the Fund closed on 3 December 2019.

Clients of the Fund received a notification on the 10th of September 2019 regarding the Fund liquidation with the option to ‘switch’ to hold new shares in the Barings Multi Asset Fund (Elected Fund) upon Fund liquidation. The Fund liquidation and the “switch” took place on the 3rd of December 2019. This was not a merger.

### Baring Asset Management Limited

*Baring Asset Management Limited (the “Investment Manager”) gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

\*\* The accounting year end date was changed from 15 February to 31 August.

### Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a basis other than going concern following the Directors' resolution on 22 May 2019 to terminate the Barings Dynamic Capital Growth Fund (the "Fund"). Any additional costs in relation to the termination will be borne by the Manager.

In applying this basis of preparation, the assets and liabilities of the Fund continue to be stated at their fair values, which materially equate to their realisable values and fixed assets and long-term liabilities are reclassified as current assets and liabilities.

2	0.6034	0.7792	1.3826	3.8174

\* The accounting year end date was changed from 15 February to 31 August. As a result, during the period from 16 February 2019 to 31 August 2019, there was no interim distribution compared with one interim distribution in prior accounting year from 16 February 2018 to 15 February 2019.

---

## Barings Eastern Trust

### Investment Objective and Policy

---

The investment objective of Barings Eastern Trust (the “Trust”) is to achieve capital growth by investing in the Asia Pacific region excluding Japan.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in the Asia Pacific region excluding Japan, or quoted or traded on the stock exchanges in those countries, including developed and emerging markets.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity related securities of companies outside of the Asia Pacific region excluding Japan, as well as in fixed income and cash.

In order to implement the investment policy the Trust may gain indirect exposure through American depository receipts, global depository receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the MSCI AC Asia ex Japan (Total Gross Return) Index to assess the Trust’s performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of large and medium sized companies from developed and emerging Asian countries.

#### **How the Trust is managed**

The Trust is invested in the Asian equity markets, using a “bottom-up” investment approach. This means that the Manager focuses more on the individual merits of a specific company, rather than taking a stance on the outcome of a sector of the market or macroeconomic trends such as interest rate rises. Within this, the Trust is managed using a Growth at a Reasonable Price (“GARP”) approach. This means that when researching candidates for the portfolio, just as much emphasis is placed on the likely growth in corporate earnings at a company as is placed on the unit price valuation before deciding whether to invest or not. Our approach also emphasises quality criteria when looking at companies. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth and upside disciplines can allow us to identify attractively priced, long-term growth companies which will outperform the market.

#### **Risk profile**

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Regional Trusts have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust’s value rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

## Barings Eastern Trust

### Report of the Investment Manager

#### Performance

During the reporting period from 1 September 2019 to 29 February 2020 the Barings Eastern Trust (“the Trust”) produced an absolute net return for Class A GBP Acc of -1.04% compared with a return of 0.65% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A GBP Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Eastern Trust	(1.04)	7.52	23.53	53.99
MSCI AC Asia ex Japan (Total Gross Return) Index	0.65	4.55	19.09	49.78

During the time period under review, the Trust edged slightly lower and underperformed the performance comparator. Performance was challenged as we faced the Coronavirus pandemic. Holdings in the consumer discretionary sector have been impacted due to demand shock from the outbreak of Coronavirus. Notable detractors include our positions in Philippines-based AllHome, as the share price came under pressure on concerns over potential disruptions to its inventory sourcing, while the widespread Coronavirus also further weakened consumer sentiment. Thailand’s CP ALL was another notable drag to relative performance, largely due to softened sales growth in the fourth quarter of 2019 as well as management’s conservative guidance of the company for 2020 in light of the virus epidemic.

On the positive side, selective names in the information technology sector contributed to relative performance. Taiwan Semiconductor Manufacturing Co. (TSMC) was a key contributor to relative performance in light of positive expectations on the company’s earnings of the fourth quarter of 2019 alongside strong demand on 5G and smartphones in 2020. Chinese conglomerate Tencent also added value to the Trust, thanks to resilient user growth of the company’s mobile games during Chinese New Year as reported, while positive outlook on the development of its Fintech business also serves as another growth driver and supported the share price.

In terms of positioning and key trade activities, we maintain our positive bias towards information technology and increased exposure through names that are more resilient in the current market disposition such as SK Hynix and Samsung Electronics, while exited positions in Ramco Cements due to near-term economic slowdown pressure on construction needs.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £’000	Sales	Proceeds £’000
TAL Education Group	1,443	ICICI Prudential Life Insurance India	1,561
MediaTek	1,176	Infosys	1,387
SK Hynix	1,131	Shinhan Financial	1,230
AllHome	1,126	Ramco Cements	1,107
SBI Life Insurance	1,018	CapitaLand Commercial Trust	1,103
Kakao	953	Hong Kong Exchange	1,092
Meituan Dianping	768	Lenovo	1,060
Samsung Electronics	647	Hiwin Technologies	953
Alibaba Group	604	China Construction Bank	892
Hindustan Unilever	529	POSCO	889

## Barings Eastern Trust

Report of the Investment Manager (continued)

---

### Market outlook

We believe markets will endure bouts of volatility in the near-term as the Coronavirus epidemic continues in a dynamic fashion. While the world is grappling with the pandemic, disintegration of OPEC plus alliance in early March brought oil shock as the second blow to global sentiment. Logically speaking, Asia is net importer of crude oil and hence should benefit eventually if oil price stays low, but initial negative response is unavoidable. What we see is that technical factors have taken over fundamentals and clearly for long term investors this is a once in a decade opportunity. No one can clearly tell when the peak of the crisis will be reached, but substantial damage is already reflected in asset prices. We recognise that shapes of the global and Asian growth will be very different and recovery may not be very swift this time. We have been risk managing our positions and looking for quality opportunities with attractive fundamentals that have been over-sold due to the virus scare or weakened the first quarter of 2020 earnings expectation.

We continue to remain disciplined and anchored by our bottom-up investment process, as we believe in the attractive long-term fundamentals of the region despite near term growth concerns. We are using this opportunity to further strengthen our portfolio with superior franchises. We remain positive on the key growth themes embedded in the Trust, including changing and emerging consumption patterns in Asia, beneficiaries of the next secular growth areas in technology, and the rise of Asian brands in a global landscape.

\* The accounting interim period date was changed from 31 August to 29 February.

\*\* The accounting year end date was changed from 28 February to 31 August.

**Note to the financial statements**

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

**Post balance sheet events**

Subsequent to the period end, the price per unit of the A GBP Accumulation class has decreased from 1,049.00p to 1,046.00p as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact on the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

---

## Barings European Growth Trust

### Investment Objective and Policy

---

The investment objective of Barings European Growth Trust (the “Trust”) is to achieve capital growth by investing in Europe excluding the United Kingdom.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in Europe excluding the United Kingdom, or quoted or traded on the stock exchanges in Europe excluding the United Kingdom.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Europe (including in the United Kingdom) as well as in fixed income and cash.

In order to implement the investment policy, the Trust may gain indirect exposure through American depositary receipts, global depositary receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the MSCI Europe ex UK (Total Net Return) Index to assess the Trust’s performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of large and medium sized companies from developed and emerging European countries excluding the UK.

#### **How the Trust is managed**

At Barings, our equity investment teams share the philosophy of quality “Growth at a Reasonable Price” or GARP. We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth and upside disciplines can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises quality criteria when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models.

#### **Risk profile**

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- The Trust can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust’s value rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

---

## Barings European Growth Trust

Report of the Investment Manager

---

### Performance

During the reporting period from 1 September 2019 to 29 February 2020 the Barings European Growth Trust (“the Trust”) produced an absolute net return for Class A GBP Inc of -8.39% compared with a return of -5.12% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A GBP Inc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings European Growth Trust	(8.39)	0.24	6.87	29.85
MSCI Europe ex UK (Total Net Return) Index	(5.12)	6.08	13.71	34.95

Following a more positive start to the financial year, in which stock selection was the main driver of relative returns, in February equity markets became significantly impacted by fears related to the Coronavirus outbreak as the spread of Coronavirus outside of China increased concerns about the negative effect on the global economy and corporate earnings. This led to underperformance from a number of companies in the portfolio. For example, shares in airplane manufacturer Airbus sharply declined as investors feared that the travel industry would be negatively impacted by the Coronavirus outbreak.

Elsewhere, company specific newsflow did impact the share price of some companies in the portfolio over the period under review. Electronic payments company Wirecard continued to experience weak returns as the company has been slow to recover from negative reports alleging accounting fraud; Wirecard’s management team continue to refute the allegations and nothing has so far been proven. Military technology company Rheinmetall suffered profit-taking following previous strong performance, as management indicated caution in their outlook for 2020. On the positive side, Dutch Semiconductor Production Equipment manufacturer ASML performed well as demand for its new generation of lithography tools continued to grow against a supportive backdrop for leading edge semiconductor customers. Elsewhere a new product suite at Roche (particularly Ocrevus and Hemlibra) continued to outperform expectations whilst at the same time, biosimilar erosion no worse than expected so earnings expectations generally rose.

A number of transactions were made over the quarter. For example, we purchased shares in SGS, a global leader in the testing and inspection sector, an area we regard as relatively insulated from cyclical volatility, with demand driven more by tightening legislation in areas such as environmental and safety standards.

We sold shares in Ryanair. Whilst we continue to consider Ryanair one of the better operators in the airline industry, the stock was sold due to our view that the valuation was not fully reflecting the increasingly competitive environment within its “budget” sub-sector. Another negative factor was that the company had also encountered various issues with a number of its employee groups, which we felt would lead to not only higher costs going forward, but also damage to its brand.

## Barings European Growth Trust

Report of the Investment Manager (continued)

The top purchases and top ten sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
Cairn Homes	1,014	Ryanair	1,815
SGS	636	First Derivatives	1,725
Wirecard	365	ArcelorMittal	1,392
Fresenius	320	Wirecard	1,170
Temenos	205	ASML	1,152
ArcelorMittal	94	Hexagon Composites	766
		Natixis	495
		CRH	406
		Dalata Hotel	357
		Wendel	305

### Market outlook

The continuous spread of Coronavirus and the emergency represented by the growing number of fatalities has been a shock to the world. First, because of the sudden and unexpected loss of lives; second, because it forced multiple countries into lockdown. In many countries, activity has been completely stopped in some areas (such as entertainment) and severely disrupted in others (such as manufacturing).

European companies, like the rest of the world, have been hit hard by the pandemic. Perhaps unsurprisingly, those sectors which have traditionally been seen as more defensive in nature, such as Health Care and Utilities, have fared better than those more sensitive to economic conditions, such as Industrials and Consumer Discretionary.

Surveys of Business Confidence showed a widespread slump in optimism across Europe during March, reflecting lockdown conditions being imposed across a number of economies. Strategists' forecasts for European companies' earnings per share typically assume significant declines this year, but anticipate a partial to strong recovery in 2021. These ranges are similar across most developed equity markets outside North America. Our portfolio is well positioned to take advantage of a market recovery once the most severe headwinds from Coronavirus have passed. Meanwhile, we will continue to be proactive by seeking to acquire selective stocks at more attractive valuations than they were trading at prior to the market correction.

In this environment we will continue to be guided by our bottom-up investment process and look to identify attractive entry points in companies where the long-term earnings delivery potential remains intact despite the challenges posed by this outbreak. This will remain the case for all markets where over the medium to long run, we believe corporate earnings should drive equity prices.

### Baring Asset Management Limited

*Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

\* The accounting interim period date was changed from 31 October to 29 February.

\*\* The accounting year end date was changed from 28 February to 31 August.

## Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

### Post balance sheet events

Subsequent to the period end, the price per unit of the A GBP Income class has decreased from 1,276.00p to 1,153.00p as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact of the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

---

## Barings Europe Select Trust

### Investment Objective and Policy

---

The investment objective of Barings Europe Select Trust (the “Trust”) is to achieve capital growth by investing in Europe excluding the United Kingdom.

The Trust will seek to achieve its investment objective by investing at least 75% of its total assets directly and indirectly in equities and equity-related securities of smaller companies incorporated in, or exercising the predominant part of their economic activity in Europe excluding the United Kingdom, or quoted or traded on the stock exchanges in Europe excluding the United Kingdom.

Smaller European companies can be defined as those companies which are constituents of the bottom 30% of total market capitalisation of Europe’s listed companies (this excludes companies in the United Kingdom).

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Europe (including in the United Kingdom), as well as in larger companies, and in fixed income and cash.

In order to implement the investment policy, the Trust may gain indirect exposure through American depositary receipts, global depositary receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the EMIX Smaller European Companies Ex UK (Total Gross Return) Index to assess the Trust’s performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of small and medium sized companies from developed European countries excluding the UK.

#### **How the Trust is managed**

At Barings, our equity investment teams share the philosophy of quality “Growth at a Reasonable Price” or GARP. We believe that earnings growth is the principal driver of equity market performance over the medium to long term, and favour high-quality companies for their ability to outperform the market on a risk-adjusted basis. In particular, we believe that structured fundamental research and a disciplined investment process combining quality, growth and upside disciplines can allow us to identify attractively priced, long-term growth companies which will outperform the market. Our approach emphasises quality criteria when looking at companies and a three- to five-year time horizon when forecasting company earnings. In determining upside, we use consistent and transparent methods to place emphasis on discounted earnings models.

#### **Risk profile**

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- The Trust can hold smaller company shares, which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Regional Funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust’s value rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative, as a relatively small movement may have a larger impact on derivatives than the underlying assets.. Some derivative transactions may be entered into directly with an eligible person or institution (a “counterparty”). There is a risk that the counterparty may not meet its obligations or becomes insolvent, which could cause the Trust to incur a loss.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.

**Barings Europe Select Trust**  
Investment Objective and Policy (continued)

**Risk profile (continued)**

- Losses may occur if an organization through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

## Barings Europe Select Trust

Report of the Investment Manager

### Performance

During the reporting period from 1 September 2019 to 29 February 2020, the Barings Europe Select Trust (“the Trust”) produced an absolute net return for Class A GBP Inc of -5.55% compared with a return of -2.50% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A GBP Inc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Europe Select Trust	(5.55)	5.08	17.67	62.12
EMIX Smaller European Companies Ex UK (Total Gross Return) Index	(2.50)	6.17	15.66	60.59

This follows a strong end to the Trust’s last financial year, wherein positive stock selection led to the fund delivering greater than 2% outperformance against its comparator index (based on the A GBP Inc share class, net of fees, in the six months to 31 August 2019).

The underperformance experienced over the last six months occurred predominantly in the final quarter of 2019, when European Smaller Companies rebounded strongly from earlier weakness as markets became driven by hopes of an acceleration in global economic growth, rather than by fundamental company newsflow. This led to a recovery in shares that had seen significant negative earnings revisions earlier in the year. The Trust has limited exposure to companies with these characteristics given our Growth at a Reasonable Price investment approach, which led to underperformance relative to the benchmark.

Subsequently, in the first two months of 2020, equity markets broadly declined as the spread of Coronavirus outside of China increased concerns about the negative effect on the global economy and corporate earnings. The Trust proved more resilient than the performance comparator in this weaker market environment. This reflects the financial style characteristics of the portfolio: our active approach to bottom-up stock selection aims to identify attractive opportunities in high quality, sustainably growing companies, but also to avoid the weaker stocks that are more likely to succumb to short-term market weakness.

A number of transactions were made over the period. For example, we sold shares in German sportswear and athleisure company Puma following strong performance, as in our view the valuation fully incorporated the company’s growth prospects. We purchased shares in Interpump, an Italian industrial conglomerate with a robust balance sheet, which we believe will continue to demonstrate strong acquisitive growth while maintaining their high margin profile and ongoing focus on cost control.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £’000	Sales	Proceeds £’000
Prysmian	19,723	Swedish Match	21,824
Korian	18,771	Qiagen	16,965
JCDecaux	18,048	Wendel	16,180
Telenet	17,114	DNA	16,060
Dormakaba	14,804	FLSmidth & Co.	15,637
Interpump Group	12,698	Aalberts Industries	15,564
Just Eat Takeaway	11,805	Hugo Boss	14,713
SCOR	11,717	CIE Plastic Omnium	13,238
IPSOS	11,548	Elis	13,025
Anima	9,387	Puma	13,002

Report of the Investment Manager (continued)

---

### Market outlook

The continuous spread of Coronavirus and the emergency represented by the growing number of fatalities has been a shock to the world. European smaller companies, like the rest of the world, have been hit hard by the pandemic. A key challenge for equities going forward, particularly smaller companies, is that corporate earnings forecasts, and the analysts' forecasts that contribute to consensus expectations, were largely made prior to the Coronavirus crisis and collapse in oil prices. This means we are likely to see widespread downgrades to earnings forecasts in the coming months.

Strategists' forecasts for smaller companies' earnings per share typically assume declines of between 25% and 35% this year, but anticipate a partial to strong recovery in 2021, of between 15% and 25%. These ranges are similar across most developed equity markets outside North America. Smaller companies, in general, are seen as at greater risk of earnings contraction than larger companies, reflecting their weaker profitability development in the 2008-09 financial crisis, the recovery in smaller companies' profit margins over recent years, and the perception that smaller companies' access to financing from banks and equity markets is restricted relative to larger companies. While share prices have moved to discount some of this expected downgrade, how accurate these downgrades are remains to be seen. Additionally, information inefficiencies in the smaller companies asset class mean that earnings forecasts for smaller companies are typically adjusted more slowly compared to larger companies and are less likely to be accurate.

In line with our quality Growth at a Reasonable Price (GARP) investment approach, we continue to seek investment opportunities in companies which we believe will benefit from long-term, structural growth that is not necessarily dependent on economic growth; the ability to fund their own growth ambitions; and clear, open communication with stakeholders. We continue to avoid investments in highly cyclical companies, particularly those whose fortunes are tied to commodity price developments; balance sheet stressed companies; and companies that display poor corporate governance and shareholder rights protection.

### Baring Asset Management Limited

*Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

<b>Net assets attributable to unitholders</b>	<u>1,368,855</u>	<u>1,565,627</u>

\* The accounting interim period date was changed from 30 November to 29 February.

\*\* The accounting year end date was changed from 31 May to 31 August.

### Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

### Post balance sheet events

Subsequent to the period end, the price per unit of the A GBP Income class has decreased from 3,987.00p to 3,594.00p as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact on the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

## Barings German Growth Trust

### Investment Objective and Policy

---

The investment objective of Barings German Growth Trust (the “Trust”) is to achieve capital growth by investing in Germany.

The Trust will seek to achieve its investment objective by investing at least 75% of its total assets directly and indirectly in equities and equity related securities of companies incorporated in, or exercising the predominant part of their economic activity in Germany, or quoted or traded on the stock exchanges in Germany.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity related securities outside of Germany as well as in fixed income and cash.

In order to implement the investment policy, the Trust may gain exposure through American depositary receipts, global depositary receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments in collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the HDAX® (Total Return) Index to assess the Trust’s performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of the stock market index in Germany.

#### **How the Trust is managed**

The Investment Manager adopts a “bottom-up” approach to investing in the Trust. This means that the Investment Manager focuses more on the individual merits of a specific company, rather than taking a stance on the outcome of a sector of the market or macroeconomic trends such as interest rate rises. The Manager believes it is possible to find investment opportunities in German companies that, due to technological or market leadership, are growing rapidly, even though they operate in sectors that may not have a favourable outlook. The Manager also believes it is possible to find companies with excellent prospects in strong-performing areas of the market, which have been overlooked by the broader market. This is why the Manager believes it is important to focus on company fundamentals rather than macroeconomic trends.

#### **Risk profile**

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Country-specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust’s value rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

## Barings German Growth Trust

Report of the Investment Manager

---

### Performance

During the reporting period from 1 September 2019 to 29 February 2020, the Barings German Growth Trust (“the Trust”) produced an absolute net return for Class A EUR Acc of -4.10% compared with a return of -1.04% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A EUR Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings German Growth Trust	(4.10)	(2.39)	(3.93)	6.12
HDAX® (Total Return) Index	(1.04)	3.17	4.93	11.45

Following a positive start to the financial year, in which performance benefitted from positive stock selection, in February equity markets became significantly impacted by fears related to the Coronavirus outbreak as the spread of Coronavirus outside of China increased concerns about the negative effect on the global economy and corporate earnings. This led to underperformance from a number of companies in the portfolio, in particular those exposed to travel and tourism, and movement of goods. For example, shares in retail travel manufacturer TUI and aeroplane manufacturer Airbus sharply declined as investors feared that the travel industry would be negatively impacted by the Coronavirus outbreak. Shares in Deutsche Post, a package delivery company, also fell on concerns regarding the impact of Coronavirus on business operations.

Elsewhere, company specific newsflow did impact the share price of some companies in the portfolio over the period under review. Electronic payments company Wirecard continued to experience weak returns as the company has been slow to recover from negative reports alleging accounting fraud; Wirecard’s management team continue to refute the allegations and nothing has so far been proven. On the positive side, LPKF Laser experienced very strong share price returns as the company delivered a strong set of third quarter results in November and investors continue to appreciate its growth prospects, which are not economically sensitive in our view. Siltronic, a German silicon wafer supplier, also performed well following good results.

The key transactions in the period were to initiate a new position in Volkswagen on the basis of a market recovery in China which had already been through a 15 month sales recession and where VW has the largest exposure of any Western based manufacturer. Furthermore, with the new regulations regarding Co2 emissions, VW’s lead in this field will hold them in good stead in terms of sales in European markets going forwards. On the economically cyclical side of the portfolio, this was balanced by exits from both BASF and Heidelberg Cement where we were forecasting much more limited growth opportunities. Much later in the reporting period we initiated a position in Merck which alongside from being more immune from the Coronavirus issues with its Healthcare and Life Sciences divisions was also set to see an upturn in its Performance Materials division (which will now be somewhat delayed) and this was funded from the sale of Deutsche Telecom whose prospects appeared more muted given the expenditure required on the new 5G networks.

## Barings German Growth Trust

Report of the Investment Manager (continued)

The top ten purchases and sales during the period were as follows:

Purchases	Costs €'000	Sales	Proceeds €'000
Volkswagen	23,430	Deutsche Telekom	27,807
Merck	10,939	HeidelbergCement	13,174
Fresenius Medical Care	7,304	BASF	11,282
Siltronic	7,043	Infineon Technologies	10,533
TUI	4,331	Siemens	7,178
Wirecard	3,738	SAP	6,523
Hochtief	3,542	Stroeer	5,692
Lanxess	3,395	Rheinmetall	4,698
DWS Group GmbH & Co	2,778	Evotec	1,919
Hamburger Hafen und Logistik	2,107	Schaeffler	1,892

### Market outlook

As of the end of the reporting period, our initial thoughts were “forecasts of economic growth in the first quarter of this year were already being affected before the spread of Coronavirus outside China accelerated. Global growth forecast cuts initially reflected a shock to Chinese domestic demand and industrial production, and the likely disruption to global supply chains from power-downs and extended holidays in Chinese industry. As cases of infection outside China have multiplied, however, concerns are growing about the impact on consumer confidence in Europe, Japan and, potentially, the U.S.A. If Consumer Confidence indicators meaningfully deteriorate, the impacts on the global economy and corporate earnings are likely to be severe for developed equities. Reflecting these developments, the sectors negatively impacted are broad and selling has extended from the energy and industrial sectors to impact sectors such as travel, tourism, entertainment and retail, all of which are likely to be impacted in the near-term”, with an expectation that the Coronavirus outbreak will reflect the experience of SARS: if that assumption is correct the short term impact of the virus will ultimately have limited impact on longer-term economic or corporate earnings expectations, and will likely be treated as a one-off event with very limited impact on valuations.

Clearly, these initial thoughts were rather optimistic and with many countries in lock-down, and although an end to the initial wave of infections is in sight, it is impossible to assess how quickly economies will recover as much of this will be largely dependent on consumer behaviour. The key question is if consumers will remain cautious for many more months to come or is there now a lot of pent up demand which will ultimately see economies snap-back to normal much faster than expected. At the time of writing, our first insights come from China where lock-down restrictions have largely been removed, and in numerous sectors we have seen a surge in demand (e.g. cars and cosmetics) in the first full week after restrictions were lifted.

In this environment we will continue to be guided by our bottom-up investment process and look to identify attractive entry points in companies where the long-term earnings delivery potential remains intact despite the challenges posed by this outbreak. With cash availability in the fund around the market bottom in mid-March, we were able to take advantage of some exceptionally looking cheap equity prices for certain stocks that were significantly increased in portfolio size, which regardless of short term market sentiment will significantly add value over the longer term.

### Baring Asset Management Limited

*Baring Asset Management Limited (the “Investment Manager”) gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

\* The accounting interim period date was changed from 15 November to 29 February.

\*\* The accounting year end date was changed from 15 May to 31 August.

### Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

### Post balance sheet events

Subsequent to the period end, the price per unit of the A EUR Accumulation class has decreased from 866.40c to 762.70c as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact on the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

---

## Barings Japan Growth Trust

### Investment Objective and Policy

---

The investment objective of Barings Japan Growth Trust (the “Trust”) is to achieve capital growth by investing in Japan.

The Trust will seek to achieve its investment objective by investing at least 70% of its total assets directly and indirectly in equities and equity-related securities of companies incorporated in, or exercising the predominant part of their economic activity in Japan, or quoted or traded on the stock exchanges in Japan.

For the remainder of its total assets, the Trust may invest directly and indirectly in equities and equity-related securities outside of Japan as well as in fixed-income and cash.

In order to implement the investment policy, the Trust may gain exposure through American depositary receipts and other equity related securities including participation notes, structured notes, equity-linked notes and debt securities convertible into equities. The Trust may also obtain indirect exposure through investments collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also use derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management (including hedging).

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Comparator**

The Trust is not managed to a benchmark, however the Manager uses the Japan (TSE) First Section (Total Gross Return) Index to assess the Trust’s performance.

The Manager considers the performance comparator to be an appropriate assessment tool because it tracks the performance of the largest companies in the Japanese stock market.

#### **How the Trust is managed**

Baring Asset Management Limited’s (the “Investment Manager’s”) equity investment teams share the philosophy of quality Growth at a Reasonable Price (“GARP”). The Investment Manager considers that long-term earnings growth is the driver of stock market performance and that structured fundamental research and a disciplined investment process combining growth, upside/valuation and quality disciplines can identify attractively priced, growth companies. The Investment Manager also considers that the best way of finding unrecognised growth is to identify quality companies with visibility of earnings over a longer time period of three to five years, especially as market consensus data tends to be only available for shorter term periods. In determining upside, the Investment Manager uses consistent and transparent methods to place emphasis on discounted earnings models.

#### **Risk profile**

Please see detailed below the key risks applicable to the Trust:

- Changes in exchange rates between the currency of the Trust and the currencies in which the assets of the Trust are valued can have the effect of increasing or decreasing the value of the Trust and any income generated.
- Country-specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- The Trust can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently and in small volumes, so their share prices may fluctuate more than those of larger companies.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Trust’s value rises and falls and could expose the Trust to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

\*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Trust and unit class returns before operating charges.

\*\*High/low prices included in the table above for the current accounting period are from 1 September 2019 to 29 February 2020. For previous periods, they relate to the accounting period from 1 February 2019 to 31 August 2019 and 1 February 2018 to 31 January 2019 respectively.

## Barings Japan Growth Trust

Report of the Investment Manager

### Performance

During the reporting period from 1 September 2019 to 29 February 2020 the Barings Japan Growth Trust (“the Trust”) produced an absolute net return for Class A GBP Acc of -7.90% compared with a return of -5.14% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A GBP Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Japan Growth Trust	(7.90)	4.27	9.03	50.45
Japan (TSE) First Section (Total Gross Return) Index	(5.14)	3.55	6.41	48.26

In the six months to the end of February we saw the Japanese market making steady gains in late 2019 before a weak start to 2020 on growing economic concerns relating to the Coronavirus saw all these gains given up, for the market to close down for the period. The Trust slightly lagged the performance comparator during these six-months but remains well ahead over a year and longer time periods.

A number of stocks performed strongly to contribute positively to the fund. A number of our technology related holdings saw strong share price performance as confidence rose regarding the outlook for technology demand. Electronic component maker Murata benefitted from this as well as hopes that the expansion of 5G would prove a strong tailwind to demand. Semiconductor production equipment maker Tokyo Electron and silicon wafer maker Shin-Etsu Chemical also saw similar tailwinds. Elsewhere our holding in material handling equipment maker Daifuku gained on expectations for a rise in production and distribution automation, whilst energy related company Toshiba Plant’s share price rose sharply as it was acquired by its parent Toshiba.

Stocks detracting from performance in this period included online fashion retailer ZoZo as they failed to sustain the kind of subscriber growth we expected and bowling alley operator Round One struggled as their overseas growth strategy struggled to gain traction. Both have since exited the portfolio. We had one security, the oil distributor Idemitsu Kosan, which we entered during the period on the expectation that recent industry consolidation and company restructuring measures would raise returns but subsequently decided to exit following a very disappointing conversation with management and a deterioration in the external environment.

During the period we instigated a number of new investments in names such as Elecom, a provider of computer peripheral equipment which is set to benefit from ongoing market share gains based on considerable competitive advantages. Post entry it also became clear that the Coronavirus would also boost near term demand due to the need for greater work from home resources. We also entered Casio during the period on the belief that they can sustain the strong growth of the G Shock brand of watches in China. We also exited some names during the period such as shoe retailer ABC-Mart, where a share price rally pushed valuations higher than we thought appropriate.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
NEC	475	Yamaha Motor	465
Idemitsu Kosan	459	Rohm	419
Terumo	449	Idemitsu Kosan	398
ZoZo	402	Toshiba Plant Systems & Services	373
Nomura Research Institute	379	Ichikoh Industries	357
Sakai Moving Service	379	Softbank	357
Comsys	345	Nomura Research Institute	339
Giken	297	Shin-Etsu Chemical	309
Aica Kogyo	289	Insource	303
Japan Elevator Service	280	Premium	284

---

## Barings Japan Growth Trust

Report of the Investment Manager (continued)

---

### Market outlook

The Japanese economy was already struggling to overcome the consumption tax hike of late 2019 when the impact of the Coronavirus hit. Along with many other regions the Japanese economy is thus likely to be very weak in the first half of 2020 and we have to await the progress of attempts to mitigate the expansion of the virus to see when recovery can be expected. Although we expect earnings expectations to understandably decline we feel that the market could prove relatively resilient from the current lower levels as balance sheets are strong and valuations were already fairly attractive.

We believe that this current situation and the surrounding uncertainty should reward our focus on quality companies and we continually test these attributes of all our holdings and the impact of developments on their earnings. We particularly look for companies with growth opportunities that are less dependent on the wider economy and hence should be less impacted by the general slowdown. Currently we are finding exciting opportunities in areas such as outsourcing, 5G related development, system upgrades and innovative medicines which we expect to deliver strong investment returns to the trust going forward.

### Baring Asset Management Limited

*Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

\* The accounting interim period date was changed from 31 July to 29 February.

\*\* The accounting year end date was changed from 31 January to 31 August.

### Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

### Post balance sheet events

Subsequent to the period end, the price per unit of the A GBP Accumulation class has increased from 202.80p to 216.60p as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact on the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

---

## Barings Strategic Bond Fund

### Investment Objective and Policy

---

The investment objective of Barings Strategic Bond Fund (the “Fund”) is to achieve capital growth together with income by investing globally.

The Fund will seek to achieve its investment objective by investing directly and indirectly in fixed income securities globally, as well as cash, near cash and money market instruments.

The Fund may invest directly and indirectly in investment grade, sub-investment grade and unrated bonds issued by governments, sovereigns, supnationals and corporates in developed and emerging markets. The Investment Manager has the ability to invest directly or indirectly in debt securities of any maturity, duration or credit rating (including unrated).

In order to implement the investment policy, the Fund may gain indirect exposure through investments in collective investment schemes (including collective investment schemes which are managed by the Manager or an associate of the Manager) and other transferable securities. It may also obtain indirect exposure through derivatives including futures, options, swaps, warrants and forward contracts for efficient portfolio management and for investment purposes. Forward currency transactions will be used to gain exposure to currencies and may be used to manage currency risk when considered appropriate.

Please refer to the Prospectus for the full investment objective and policy.

#### **Performance Assessment**

The Fund is not managed to a benchmark, nor does the Manager use a benchmark in assessing the Fund’s performance, Investors may however refer to the information in Morningstar’s Global Bond Category, which presents data for a range of funds (including the Fund) which are grouped according to investment style, including performance information, and which enables investors to compare information across products.

#### **How the Fund is managed**

The Fund invests in corporate and government bond markets where it is believed that yields are likely to fall and avoids those which are more expensive. The overall duration, or interest rate sensitivity, of the Fund will fluctuate as expectations for economic developments change, relative to the market. The Manager will also look to add value through foreign exchange management, identifying those markets where currencies are attractive, for example, due to sound economic fundamentals or rising interest rates.

#### **Risk profile**

Please see detailed below the key risks applicable to the Fund:

- There is no guarantee that a bond issuer will pay the interest due or repay the loan. Bond values are likely to fall if interest rates rise.
- Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell fund investments at an anticipated price or in a timely manner. This could have a negative impact on the value of your investment. In extreme conditions, this could affect the Fund’s ability to meet investors’ redemption requests.
- Derivative instruments can make a profit or a loss and there is no guarantee that a financial derivative contract will achieve its intended outcome. The use of derivatives can increase the amount by which the Fund’s value rises and falls and could expose the Fund to losses that are significantly greater than the cost of the derivative as a relatively small movement may have a larger impact on derivatives than the underlying assets.
- Emerging market countries may have less developed regulation and face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- Losses may occur if an organisation through which we buy an asset (such as a bank) fails to meet its obligations.
- Liquidity risk exists when a particular security or instrument is difficult to purchase or sell. If the amount of a transaction is particularly large or if the relevant market is illiquid (as is the case with many privately negotiated derivatives, structured products, etc), it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price.

Please refer to the Prospectus for the full risk profile.

\*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Unitholders should note that there are other additional transaction costs such as dealing spread and underlying costs with regard to Investment Fund holdings which will also have reduced the Fund and unit class returns before operating charges.

\*\*High/low prices included in the table above are for the current accounting period from 1 September 2019 to 29 February 2020. For previous periods, they relate to the accounting period from 13 July 2017 to 12 July 2018 and 13 July 2018 to 31 August 2019 respectively.

## Barings Strategic Bond Fund

Report of the Investment Manager

### Performance

During the reporting period from 1 September 2019 to 29 February 2020 the Barings Strategic Bond Fund (“the Fund”) produced an absolute net return for Class A GBP Inc of 0.88% compared with a return of 1.74% for the performance comparator. The table below shows the 6 month, 1 year, 3 year and 5 year absolute net return for the Class A GBP Acc units against the performance comparator.

	6 months	1 year	3 years	5 years
Barings Strategic Bond Fund	0.88	5.36	7.45	6.73
Morningstar Global Bond Category	1.74	6.64	9.40	16.57

The Fund has been positioned for a slowing global economic growth environment, benign business and consumer sentiment coupled with slowing inflation and a persistence of low risk free rates in US and Europe. Such conditions favour income strategies. On premise, the Fund invested in relatively high yielding government bonds of Eurozone periphery countries (Italy, Portugal and Greece) and Emerging Market hard currency bonds (Brazil, Mexico and Egypt among others) and European banks’ perpetual bonds.

The end of February was particularly challenging following the spread of the Coronavirus around the globe. Our investments underperformed as investors’ risk appetite fell resulting in liquidations in emerging markets (where the Fund has currency exposure) and credit markets (both sovereign and credit). This has caused declines in the Fund’s performance. We have conviction in our investments and will continue to hold these on a 1-2yr horizon, hedging our risk as applicable.

Overall, the Fund is positioned with an income bias. It owns higher yielding cash investments in Eurozone peripheral government bonds, emerging hard currency sovereign bonds and high coupon perpetual bank bonds. Despite the market turmoil, rising credit downgrades and potential spike in default rates, we remain confident of our credit selection and that the Fund should continue to receive the coupon payments from these investments. On this premise, we are confident on the Fund meeting its income distribution target this year.

The top ten purchases and sales during the period were as follows:

Purchases	Costs £'000	Sales	Proceeds £'000
UK Treasury Bond 0.00% 27/01/2020	7,791	UK Treasury Bond 0.00% 27/01/2020	7,796

## Barings Strategic Bond Fund

Report of the Investment Manager (continued)

---

### Market outlook

We continue to assess the impact of the Coronavirus on global financial markets. The epidemic is by far the most important driver of financial markets at this juncture; less so fundamentals. Overall, the outlook is rapidly evolving and the investment environment highly uncertain. The disruption of economic activity which has caused shutdowns of major economic centres is likely to cause a technical recession in major economies. However, policymakers have reacted promptly and swiftly with large monetary and fiscal stimulus packages, which, for the US could include direct cash disbursements to households. Therefore, while an economic slowdown is now unavoidable, we also expect a stabilisation effect from the policy support. Markets have however remained very volatile, investors' risk appetite is very low, liquidity is extremely thin and investment conditions are quite challenging. We will use these opportunities to deploy cash into lucrative, but high quality opportunities such as investment grade sovereigns which have been indiscriminately sold in the ongoing market panic. The performance of the Fund will continue reflect the high market volatility, not seen since the Global Financial Crisis. The Fund Managers will continue to review exposures to ensure that we steer from potential default cases.

### Baring Asset Management Limited

*Baring Asset Management Limited (the "Investment Manager") gives its portfolio managers full authority to manage their funds as they see fit, within the established guidelines set down. This includes the views that managers may take of the markets and sectors they invest in, which may differ from the views of other Barings portfolio managers.*

\* The accounting year end date was changed from 12 July to 31 August.

\*\* The accounting interim period date was changed from 12 January to 29 February.

### Note to the financial statements

for the period ended 29 February 2020

The interim financial statements have been prepared on the same basis as the annual audited financial statements for the year ended 31 August 2019. They are in accordance with the historical cost convention, as modified by the revaluation of investments and the Statement of Recommended Practice for Authorised Funds issued by the Investment Association in May 2014 (the "IMA SORP 2014"). The financial statements have been prepared on a going-concern basis.

### Post balance sheet events

Subsequent to the period end, the price per unit of the A GBP Income class has decreased from 121.30p to 103.40p as at 17 April 2020. This movement takes into account routine transactions but also reflects the market movements including the impact of the financial markets from the increasing fears over the spread of Coronavirus. The Manager continues to monitor investment performance in line with investment objectives.

\* The Synthetic Risk and Reward Indicator ("SRRRI") is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time; the higher the number, the greater the price movement both up and down. It is based on historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is in line with the Key Investor Information Document ("KIID") at period-end, is not guaranteed, and may change over time. The risk categories are measured from 1 to 7 (1 measuring typically lower risk/rewards and 7 measuring typically higher risk/rewards). The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated due to past movements in the Fund's price. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest. The SRRRI figures for some share classes shown have changed during the period, while for some, these remain unchanged.

---

## Barings UK Unit Trusts

### Important Information

---

#### Constitution

The Trusts were constituted by a Trust Deed between Baring Fund Managers Limited (“the Manager”) and NatWest Trustee and Depositary Services Limited.

This document has been issued by the Manager, which is authorised by the Financial Conduct Authority.

The Trusts are authorised unit trust schemes as defined in section 243 of the Financial Services and Markets Act 2000 and have been established as Undertakings for Collective Investments in Transferable Securities (“UCITS”) schemes.

#### Performance

Past performance is no indication of current or future performance. Investment involves risk. The value of any investments and any income generated may go down as well as up and is not guaranteed. Any reference in the Investment Manager reports for any of the Trusts should not be read as recommendations to investors to buy or sell the same but are included as illustrations only.

#### Key changes during the period

##### Termination of Barings Dynamic Capital Growth

Following a review of the Fund, the Directors resolved to terminate the Barings Dynamic Capital Growth Fund and unitholders were offered a Scheme of Election to switch their holding into the Barings Multi Asset Fund. Any units which were not switched were redeemed on 3 December 2019, the closing date of the Fund and proceeds returned to the unitholders.

##### The trustee fees for the Barings Unit Trusts changed as at 1 January 2020 as follows:

	Old fees	New fees
<b>Strategic Bond Fund</b>		
First £200m	0.0175%	0.0175%
Next £200m	0.0150%	0.0150%
Next £800m	N/A	0.0100%
Thereafter	0.0100%	0.0050%
<b>Equity Funds</b>		
First £150m	0.0200%	N/A
First £200m	N/A	0.0175%
Next £200m	0.0175%	0.0150%
Next £800m	N/A	0.0100%
Thereafter	0.0100%	0.0050%

#### Market timing

Repeatedly purchasing and selling units in the Fund in response to short-term market fluctuations – known as ‘market timing’ – can disrupt the Manager’s investment strategy and increase the Fund’s expenses to the prejudice of all unitholders.

The Fund is not intended for market timing or excessive trading. To deter these activities, the Manager may refuse to accept an application for units from persons that it reasonably believes are engaged in market timing or are otherwise excessive or potentially disruptive to the Fund.

The Manager also reserves the right to redeem units which it reasonably believes have been purchased by unitholders engaged in market timing.

#### Publication of prices

The prices of units are published on the Barings website at [www.baring.com](http://www.baring.com). You can also obtain prices by telephone by calling +44 (0) 333 300 0372.

---

## Barings UK Unit Trusts

### Important Information (continued)

---

#### Dealing basis

The Manager's basis for dealing in purchases and sales of the Funds' units is "forward". This means that the price used for any deal will be calculated at the next valuation point following receipt of the investor's instruction.

#### Fees and expenses

The Manager's periodic charge is calculated on each business day, based on the value of the property of the Fund on the immediately preceding business day, and is paid to the Manager monthly, in arrears, on the first business day of the calendar month immediately following. The current annual management fees charged to the Fund are shown on pages 5, 16, 27, 37, 53, 70, and 81.

#### Revenue allocations and reports

Revenue allocations are made on 30 April (interim) and 31 October (final) of each year, where applicable, and forwarded to shareholders together with tax vouchers. The most recent annual report and audited financial statements and interim report and unaudited financial statements will be available on the Baring Asset Management Limited website at [www.barings.com](http://www.barings.com).

#### Prospectus and Manager's reports

Copies of the Prospectus, the Key Investor Information Document(s) ("KIID(s)"), and the most recent annual or interim report and financial statements are available to all persons free of charge from the Manager upon request. The annual or interim report and financial statements are also available in French, where applicable.

PricewaterhouseCoopers LLP (the "Independent Auditor") expresses its opinion on the English version of the annual report and financial statements, and accepts no responsibility for any translations of those financial statements.

#### Value Assessment

As part of the FCA's Asset Management Market Study, Authorised Fund Managers are now required to produce an annual Value Assessment for all UK authorised funds. The Manager will publish the first Value Assessment for the Barings funds as part of a broader composite report in the 4th Quarter 2020. This will be made available on the Barings website.

---

## Barings UK Unit Trusts

### Disclosure for Overseas Investors

---

#### **Special risks resulting from additional German tax publication requirements in Germany**

A foreign investment company such as Baring Fund Managers Limited (the "Manager") must provide documentation to the German fiscal authorities upon request, e.g. in order to verify the accuracy of the additional German published tax information. German investors will use this for their tax returns. The basis upon which such figures are calculated is open to interpretation and it cannot be guaranteed that the German fiscal authorities will accept the Manager's calculation methodology in every material respect. In addition, you should be aware that if it transpires that these publications are incorrect, any subsequent correction will, as a general rule, not have retrospective effect and will, as a general rule, only take effect during the current financial year. Consequently, the correction may positively or negatively affect the investors who receive a distribution or an attribution of deemed income distributions in the current financial period.

#### **Information for investors in Switzerland**

The Manager has appointed BNP Paribas Securities Services, Paris, Succursale de Zurich, Selnaustrasse 16, 8002 Zurich, Switzerland as representative and paying agent for Switzerland. Units are distributed in Switzerland by BNP Paribas (Switzerland) Limited at the above address. Investors can obtain free of charge the Prospectus, KIID(s), the latest annual and interim reports, copies of the Trust Deed (and any amendments thereto) as well as a list of the purchases and sales made on behalf of the Trust, in French, from the representative at the above address. Official publications for the relevant funds are found on the internet at [www.fundinfo.com](http://www.fundinfo.com). Unit prices (Net Asset Value with the words "plus commissions") are published daily on the internet at [www.fundinfo.com](http://www.fundinfo.com).

#### **Important information to the performance tables on page 99 to 101**

The value of an investment can fall as well as rise as a result of market fluctuations and investors may not get back the amount originally invested. Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units, nor the effect of the Manager's preliminary charge.

In conformity with a Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is providing the below additional information regarding performance.

#### **Total Expense Ratio ("TER")**

Following the Guideline of the Swiss Funds Association ("SFA") dated 16 May 2008, the Manager is required to publish a total expense ratio ("TER") for the Fund for the 6 months to 29 February 2020. The TER has been established by the Manager and draws upon the data contained in the "Statement of total return" (Manager's management fee, registration fees, trustee fees, safe custody charges, audit fees, Financial Conduct Authority ("FCA") and other regulatory fees and taxation fees as well as any further fees and costs listed in the "Statement of total return" account which do not form part of the aforementioned categories). It is calculated with reference to these numbers and in conformity with the above guideline.
