| Non-deductible equity portion on Kemper IGCC write-off | **5.3** | — | — |
| Tax Reform Legislation | **11.9** | — | — |
| Other | **—** | — | (2.9) |
| Effective income tax rate (benefit rate) | **(17.1)%** | (68.5)% | (92.5)% |

The decrease in the Company's 2017 effective tax rate (benefit rate), as compared to 2016, is primarily due to an increase in estimated losses associated with the Kemper IGCC, a decrease in non-taxable AFUDC equity, and a decrease due to the remeasurement of deferred income taxes resulting from Tax Reform Legislation. The decrease in the Company's 2016 effective tax rate (benefit rate), as compared to 2015, is primarily due to an increase in estimated losses associated with the Kemper IGCC and an increase in non-taxable AFUDC equity.

Tax Reform Legislation reduced the corporate income tax rate from 35% to 21% . As a result of implementation, the Company restated future tax benefits/deductions recorded as deferred tax assets/liabilities to reflect the new rate. The implementation resulted in a $372 million increase in tax expense and a $375 million increase in regulatory liabilities.

In March 2016, the FASB issued ASU 2016-09, which changed the accounting for income taxes for share-based payment award transactions. Entities are required to recognize all excess tax benefits and deficiencies related to the exercise or vesting of stock compensation as income tax expense or benefit in the income statement. The adoption of ASU 2016-09 did not have a material impact on the Company's overall effective tax rate. See Note 1 under "Recently Issued Accounting Standards" for additional information.

**Unrecognized Tax Benefits**

Changes during the year in unrecognized tax benefits were as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Unrecognized tax benefits at beginning of year | **$ 465** | $ 421 | $ 165 |
| Tax positions increase from current periods | **—** | 26 | 32 |
| Tax positions increase from prior periods | **2** | 18 | 224 |
| Tax positions decrease from prior periods | **(177)** | — | — |
| Reductions due to settlements | **(290)** | — | — |
| Balance at end of year | **$ —** | $ 465 | $ 421 |

The tax positions increases from current periods and prior periods for 2017, 2016 and 2015 relate to state tax benefits, deductions for R&E expenditures, and charitable contribution carryforwards that were impacted as a result of the settlement of R&E expenditures associated with the Kemper County energy facility, as well as federal income tax benefits from deferred ITCs. The tax positions decrease from prior periods and reductions due to settlements for 2017 relate primarily to the settlement of R&E expenditures associated with the Kemper County energy facility. See "Section 174 Research and Experimental Deduction" herein for additional information. These amounts are presented on a gross basis without considering the related federal or state income tax impact.

The impact on the Company's effective tax rate, if recognized, is as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Tax positions impacting the effective tax rate | **$ —** | $ 1 | $ (2) |
| Tax positions not impacting the effective tax rate | **—** | 464 | 423 |
| Balance of unrecognized tax benefits | **$ —** | $ 465 | $ 421 |

The tax positions not impacting the effective tax rate primarily relate to state tax benefits and charitable contribution carryforwards that were impacted as a result of the settlement of R&E expenditures associated with the Kemper County energy facility. See "Section 174 Research and Experimental Deduction" herein for additional information.

Accrued interest for unrecognized tax benefits was as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Interest accrued at beginning of year | **$ 28** | $ 13 | $ 3 |
| Interest accrued during the year | **(28)** | 15 | 10 |
| Balance at end of year | **$ —** | $ 28 | $ 13 |

The Company classifies interest on tax uncertainties as interest expense. The Company did not accrue any penalties on uncertain tax positions.

It is reasonably possible that the amount of the unrecognized tax benefits could change within 12 months . The settlement of federal and state audits could impact the balances significantly. At this time, an estimate of the range of reasonably possible outcomes cannot be determined.

The IRS has finalized its audits of Southern Company's consolidated federal income tax returns through 2016. Southern Company is a participant in the Compliance Assurance Process of the IRS. The audits for the Company's state income tax returns have either been concluded, or the statute of limitations has expired, for years prior to 2011.

***Section 174 Research and Experimental Deduction***

Southern Company, on behalf of the Company, has reflected deductions for R&E expenditures related to the Kemper County energy facility in its federal income tax calculations since 2013 and filed amended federal income tax returns for 2008 through 2013 to also include such deductions. In December 2016, Southern Company and the IRS reached a proposed settlement, which was approved on September 8, 2017 by the U.S. Congress Joint Committee on Taxation (JCT), resolving a methodology for these deductions. As a result of the JCT approval, Southern Company recognized $176 million of previously unrecognized tax benefits and reversed $36 million of associated accrued interest.

## 6. FINANCING

### Going Concern

The Company's financial statement presentation contemplates continuation of the Company as a going concern as a result of Southern Company's anticipated ongoing financial support of the Company. Specifically, the Company has been informed by Southern Company that in the event sufficient funds are not available from external sources, Southern Company intends to provide the Company with loans and/or equity to fund the remaining indebtedness to mature and other cash needs over the next 12 months. As of December 31, 2017, the Company's current liabilities exceeded current assets by approximately $911 million primarily due to a $900 million unsecured term loan that matures on March 31, 2018. The Company expects to refinance the unsecured term loan with external security issuances and/or borrowings from financial institutions or Southern Company. To fund the Company's capital needs over the next 12 months, the Company intends to utilize operating cash flows, external security issuances, lines of credit, bank term loans, equity contributions from Southern Company and, to the extent necessary, loans from Southern Company.

### Securities Due Within One Year

A summary of scheduled maturities and redemptions of securities due within one year at December 31, 2017 and 2016 was as follows:

| | **2017** | 2016 |
|---|---|---|
| | *(in millions)* | |
| Parent company loans | **$ —** | $ 551 |
| Senior notes | **—** | 35 |
| Bank term loans | **900** | — |
| Revenue bonds (*) | **90** | 40 |
| Capitalized leases | **—** | 3 |
| Unamortized debt issuance expense | **(1)** | — |
| **Outstanding at December 31** | **$ 989** | $ 629 |

(*) Includes $50 million in revenue bonds classified as short term at December 31, 2017 that were remarketed in an index rate mode subsequent to December 31, 2017. Also includes $40 million in pollution control revenue bonds classified as short term since they are variable rate demand obligations supported by short-term credit facilities; however, the final maturity dates range from 2020 to 2028.

Maturities through 2022 applicable to total long-term debt are as follows: $900 million in 2018, $125 million in 2019, and $270 million in 2021. For long-term debt, other than revenue bonds, there are no scheduled maturities for 2020 and 2022.

### Parent Company Loans and Equity Contributions

At December 31, 2016, the Company had $551 million of outstanding promissory notes to Southern Company.

In February 2017, the Company amended $551 million in promissory notes to Southern Company extending the maturity dates of the notes from December 1, 2017 to July 31, 2018. In the second quarter 2017, the Company borrowed an additional $40 million under a promissory note issued to Southern Company.

In June 2017, Southern Company made equity contributions totaling $1.0 billion to the Company. The Company used a portion of the proceeds to (i) prepay $300 million of the outstanding principal amount under its $1.2 billion unsecured term loan, which matures on March 30, 2018; (ii) repay all of the $591 million outstanding principal amount of promissory notes to Southern Company; and (iii) repay a $10 million short-term bank loan.

In September 2017, the Company issued a floating rate promissory note to Southern Company in an aggregate principal amount of up to $150 million bearing interest based on one-month LIBOR. The Company borrowed $109 million under this promissory note primarily to satisfy its federal income tax obligations for the quarter ending September 30, 2017 and subsequently repaid the promissory note upon receipt of its income tax refund from the U.S. federal government related to the settlement concerning deductible R&E expenditures. See Note 5 under "Section 174 Research and Experimental Deduction" for additional information. At December 31, 2017, the Company had no outstanding promissory notes to Southern Company.

### Bank Term Loans

In March 2017, the Company issued a $9 million short-term bank note bearing interest at 5% per annum, which was repaid in April 2017.

In June 2017, the Company used a portion of the proceeds from Southern Company equity contributions to prepay $300 million of the outstanding principal amount under its $1.2 billion unsecured term loan, which matures on March 30, 2018, and to repay $10 million of the outstanding principal amount of bank loans. See "Parent Company Loans and Equity Contributions" herein for more information.

This unsecured term loan has a covenant that limits debt levels to 65% of total capitalization, as defined in the agreement. For purposes of this definition, debt excludes any long-term debt payable to affiliated trusts and other hybrid securities. At December 31, 2017 , the Company was in compliance with its debt limit.

In August 2017, the Company repaid a $12.5 million short-term bank note.

At December 31, 2017 , the Company had a $900 million unsecured term loan outstanding, which was reflected in the statements of capitalization as securities due within one year. At December 31, 2016 , the Company had a $1.2 billion unsecured term loan outstanding, which was reflected in the statements of capitalization as long-term debt.

**Senior Notes**

At December 31, 2017 and 2016 , the Company had $755 million and $790 million of senior notes outstanding, respectively, which included senior notes due within one year . These senior notes are effectively subordinated to the secured debt of the Company. See "Plant Daniel Revenue Bonds" below for additional information regarding the Company's secured indebtedness.

**Plant Daniel Revenue Bonds**

In 2011, in connection with the Company's election under its operating lease of Plant Daniel Units 3 and 4 to purchase the assets, the Company assumed the obligations of the lessor related to $270 million aggregate principal amount of Mississippi Business Finance Corporation Taxable Revenue Bonds, 7.13% Series 1999A due October 20, 2021, issued for the benefit of the lessor. These bonds are secured by Plant Daniel Units 3 and 4 and certain related personal property. The bonds were recorded at fair value as of the date of assumption, or $346 million , reflecting a premium of $76 million . See "Assets Subject to Lien" herein for additional information.

**Pollution Control Revenue Bonds**

Pollution control obligations represent loans to the Company from public authorities of funds derived from sales by such authorities of pollution control revenue bonds issued to finance pollution control and solid waste disposal facilities. The Company is required to make payments sufficient for the authorities to meet principal and interest requirements of such bonds. The amount of tax-exempt pollution control revenue bonds outstanding at December 31, 2017 and 2016 was $83 million .

**Other Revenue Bonds**

Other revenue bond obligations represent loans to the Company from a public authority of funds derived from the sale by such authority of revenue bonds issued to finance a portion of the costs of constructing the Kemper County energy facility and related facilities.

The Company had $50 million of such obligations outstanding related to tax-exempt revenue bonds at December 31, 2017 and 2016 . Such amounts are reflected in the statements of capitalization as long-term debt.

**Capital Leases**

In 2013, the Company entered into an agreement to sell the air separation unit for the Kemper County energy facility and also entered into a 20 -year nitrogen supply agreement. The nitrogen supply agreement was determined to be a sale/leaseback agreement, which resulted in a capital lease obligation of $74 million at December 31, 2016. Following the suspension of the Kemper IGCC, the Company entered into an asset purchase and settlement agreement in December 2017 with the lessor, which terminated the capital lease obligation. There were no contingent rentals in the contract and a portion of the monthly payment specified in the agreement was related to executory costs for the operation and maintenance of the air separation unit and excluded from the minimum lease payments. The minimum lease payments for 2017 were $7 million . See Note 3 under "Kemper County Energy facility" for additional information.

**Assets Subject to Lien**

The revenue bonds assumed in conjunction with the purchase of Plant Daniel Units 3 and 4 are secured by Plant Daniel Units 3 and 4 and certain related personal property. There are no agreements or other arrangements among the Southern Company system companies under which the assets of one company have been pledged or otherwise made available to satisfy the obligations of Southern Company or another of its other subsidiaries. See "Plant Daniel Revenue Bonds" herein for additional information.

On October 4, 2017, the Company executed agreements with its largest retail customer, Chevron Products Company (Chevron), to continue providing retail service to the Chevron refinery in Pascagoula, Mississippi through 2038, subject to the approval of the Mississippi PSC. The agreements grant Chevron a security interest in its co-generation assets, with a net book value of approximately $93 million , located at Chevron's refinery that is exercisable upon the occurrence of (i) certain bankruptcy events or (ii) other events of default coupled with specific reductions in steam output at the facility and a downgrade of the Company's credit rating to below investment grade by two of the three rating agencies.

### Outstanding Classes of Capital Stock

The Company currently has preferred stock (including depositary shares which represent one-fourth of a share of preferred stock) and common stock authorized and outstanding. The preferred stock of the Company contains a feature that allows the holders to elect a majority of the Company's board of directors if preferred dividends are not paid for four consecutive quarters. Because such a potential redemption-triggering event is not solely within the control of the Company, this preferred stock is presented as "Cumulative Redeemable Preferred Stock" in a manner consistent with temporary equity under applicable accounting standards. The Company's preferred stock and depositary preferred stock, without preference between classes, rank senior to the Company's common stock with respect to payment of dividends and voluntary or involuntary dissolution. The preferred stock and depositary preferred stock is subject to redemption at the option of the Company at a redemption price equal to 100% of the liquidation amount of the stock. Information for each outstanding series is in the table below:

| Preferred Stock | Par Value/Stated Capital Per Share | Shares Outstanding | Redemption Price Per Share |
|---|---|---|---|
| 4.40% Preferred Stock | $ 100 | 8,867 | $ 104.32 |
| 4.60% Preferred Stock | $ 100 | 8,643 | $ 107.00 |
| 4.72% Preferred Stock | $ 100 | 16,700 | $ 102.25 |
| 5.25% Preferred Stock (*) | $ 100 | 300,000 | $ 100.00 |

(*) There are 1,200,000 outstanding depositary shares, each representing one-fourth of a share of the 5.25% preferred stock.

### Dividend Restrictions

The Company can only pay dividends to Southern Company out of retained earnings or paid-in-capital.

### Bank Credit Arrangements

At December 31, 2017 , committed credit arrangements with banks were as follows:

| Expires | | | Executable Term Loans | | Expires Within One Year | |
|---|---|---|---|---|---|---|
| 2018 | Total | Unused | One Year | Two Years | Term Out | No Term Out |
| *(in millions)* | *(in millions)* | | *(in millions)* | | *(in millions)* | |
| $100 | $100 | $100 | $— | $— | $— | $100 |

In November 2017, the Company amended certain of its one-year credit arrangements in an aggregate amount of $100 million to extend the maturity dates from 2017 to 2018.

Subject to applicable market conditions, the Company expects to renew its bank credit arrangements, as needed, prior to expiration. In connection therewith, the Company may extend the maturity dates and/or increase or decrease the lending commitments thereunder.

Most of these bank credit arrangements require payment of commitment fees based on the unused portions of the commitments or to maintain compensating balances with the banks. Commitment fees average less than 1/4 of 1% for the Company. Compensating balances are not legally restricted from withdrawal.

Most of these bank credit arrangements contain covenants that limit the Company's debt levels to 65% of total capitalization, as defined in the agreements. For purposes of these definitions, debt excludes certain hybrid securities.

A portion of the $100 million unused credit with banks is allocated to provide liquidity support to the Company's pollution control revenue bonds and its commercial paper borrowings. The amount of variable rate pollution control revenue bonds outstanding requiring liquidity support as of December 31, 2017 was $40 million . In addition, at December 31, 2017, the Company had approximately $50 million of fixed rate revenue bonds that were remarketed from a long-term interest rate mode to an index rate mode, subsequent to December 31, 2017 .

At December 31, 2017 and 2016 , there was no commercial paper debt outstanding.

At December 31, 2017 and 2016 , there was $4 million and $23 million , respectively, of short-term debt outstanding.

## 7. COMMITMENTS

### Fuel and Purchased Power Agreements

To supply a portion of the fuel requirements of its generating plants, the Company has entered into various long-term commitments for the procurement and delivery of fossil fuel which are not recognized on the balance sheets. In 2017 , 2016 , and 2015 , the Company incurred fuel expense of $395 million , $343 million , and $443 million , respectively, the majority of which was purchased under long-term commitments. The Company expects that a substantial amount of its future fuel needs will continue to be purchased under long-term commitments.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and all of the other traditional electric operating companies and Southern Power. Under these agreements, each of the traditional electric operating companies and Southern Power may be jointly and severally liable. Accordingly, Southern Company has entered into keep-well agreements with the Company and each of the other traditional electric operating companies to ensure the Company will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of Southern Power as a contracting party under these agreements.

In addition, the Company has entered into various long-term commitments for the purchase of energy through PPAs associated with solar facilities. The energy related costs associated with PPAs are recovered through the fuel cost recovery clause.

### Operating Leases

The Company has entered into operating leases with Southern Linc and third parties for the use of cellular tower space. These agreements have initial terms ranging from five to 10 years and renewal options of up to 20 years . The Company has other operating lease agreements with various terms and expiration dates. Total rent expense was $3 million , $3 million , and $5 million for 2017 , 2016 , and 2015 , respectively. The Company includes any step rents, fixed escalations, lease concessions, and reasonably assured renewal periods in its computation of minimum lease payments.

Estimated minimum lease payments under operating leases at December 31, 2017 were as follows:

| | Affiliate Operating Leases (a) | Non-Affiliate Operating Lease (b) | Total |
|---|---|---|---|
| | | *(in millions)* | |
| 2018 | $ 2 | $ 1 | $ 3 |
| 2019 | 2 | 1 | 3 |
| 2020 | 2 | 1 | 3 |
| 2021 | 2 | — | 2 |
| 2022 | 2 | — | 2 |
| 2023 and thereafter | 7 | — | 7 |
| Total | $ 17 | $ 3 | $ 20 |

(a) Includes operating leases with affiliates primarily related to cellular towers.

(b) Primarily includes railcar and fuel handling equipment leases for Plant Daniel.

In addition to the above rental commitments, the Company entered into operating lease agreements for aluminum railcars for the transportation of coal at Plant Daniel, which is jointly owned with Gulf Power. The Company has the option to purchase the railcars at the greater of lease termination value or fair market value or to renew the leases at the end of the lease term. The Company also has separate lease agreements for other railcars that do not contain a purchase option.

The Company's 50% share of the lease costs, charged to fuel stock and recovered through the fuel cost recovery clause, was $1 million in 2017 , $2 million in 2016 , and $2 million in 2015 .

In addition to railcar leases, the Company has other operating leases for fuel handling equipment at Plant Daniel. The Company's 50% share of the leases for fuel handling was charged to fuel handling expense annually from 2015 through 2017 ; however, those amounts were immaterial for the reporting period.

## 8. STOCK COMPENSATION

### Stock-Based Compensation

Stock-based compensation primarily in the form of Southern Company performance share units and restricted stock units may be granted through the Omnibus Incentive Compensation Plan to a large segment of the Company's employees ranging from line management to executives. In 2015 and 2016, stock-based compensation consisted exclusively of performance share units. Beginning in 2017, stock-based compensation granted to employees includes restricted stock units in addition to performance share units. Prior to 2015, stock-based compensation also included stock options. As of December 31, 2017 , there were 180 current and former employees participating in the stock option, performance share unit, and restricted stock unit programs.

### *Performance Share Units*

Performance share units granted to employees vest at the end of a three -year performance period. All unvested performance share units vest immediately upon a change in control where Southern Company is not the surviving corporation. Shares of Southern Company common stock are delivered to employees at the end of the performance period with the number of shares issued ranging from 0% to 200% of the target number of performance share units granted, based on achievement of the performance goals established by the Compensation Committee of the Southern Company Board of Directors.

Southern Company issues performance share units with performance goals based on three performance goals to employees. These include performance share units with performance goals based on the total shareholder return (TSR) for Southern Company common stock during the three -year performance period as compared to a group of industry peers, performance share units with performance goals based on Southern Company's cumulative earnings per share (EPS) over the performance period, and performance share units with performance goals based on Southern Company's equity-weighted ROE over the performance period.

In 2015 and 2016, the EPS-based and ROE-based awards each represented 25% of the total target grant date fair value of the performance share unit awards granted. The remaining 50% of the total target grant date fair value consisted of TSR-based awards. Beginning in 2017, the total target grant date fair value of the stock compensation awards granted was comprised 20% each of EPS-based awards and ROE-based awards and 30% each of TSR-based awards and restricted stock units.

The fair value of TSR-based performance share unit awards is determined as of the grant date using a Monte Carlo simulation model to estimate the TSR of Southern Company's common stock among the industry peers over the performance period. The Company recognizes compensation expense on a straight-line basis over the three -year performance period without remeasurement.

The fair values of the EPS-based awards and the ROE-based awards are based on the closing stock price of Southern Company common stock on the date of the grant. Compensation expense for the EPS-based and ROE-based awards is generally recognized ratably over the three -year performance period initially assuming a 100% payout at the end of the performance period. Employees become immediately vested in the TSR-based performance share units, along with the EPS-based and ROE-based awards, upon retirement. As a result, compensation expense for employees that are retirement eligible at the grant date is recognized immediately while compensation expense for employees that become retirement eligible during the vesting period is recognized over the period from grant date to the date of retirement eligibility. The expected payout related to the EPS-based and ROE-based awards is reevaluated annually with expense recognized to date increased or decreased based on the number of shares currently expected to be issued. Unlike the TSR-based awards, the compensation expense ultimately recognized for the EPS-based awards and the ROE-based awards will be based on the actual number of shares issued at the end of the performance period.

For the years ended December 31, 2017 , 2016 , and 2015 , employees of the Company were granted performance share units of 30,933 , 62,435 , and 53,909 , respectively. The weighted average grant-date fair value of TSR-based performance share units granted during 2017 , 2016 , and 2015 , determined using a Monte Carlo simulation model to estimate the TSR of Southern Company's stock among the industry peers over the performance period, was \$49.24 , \$45.17 , and \$46.41 , respectively. The weighted average grant-date fair value of both EPS-based and ROE-based performance share units granted during 2017, 2016, and 2015 was \$49.22 , \$48.84 , and \$47.77 , respectively.

For the years ended December 31, 2017 , 2016 , and 2015 , total compensation cost for performance share units recognized in income was \$2 million , \$4 million , and \$4 million , respectively, with the related tax benefit also recognized in income of \$1 million , \$1 million , and \$2 million , respectively. The compensation cost related to the grant of Southern Company performance share units to the Company's employees is recognized in the Company's financial statements with a corresponding credit to equity, representing a capital contribution from Southern Company. As of December 31, 2017 , total unrecognized compensation cost related to performance share award units was immaterial.

***Restricted Stock Units***

Beginning in 2017, stock-based compensation granted to employees included restricted stock units in addition to performance share units. One-third of the restricted stock units granted to employees vest each year throughout a three -year service period. All unvested restricted stock units vest immediately upon a change in control where Southern Company is not the surviving corporation. Shares of Southern Company common stock are delivered to employees at the end of the vesting period.

The fair value of restricted stock units is based on the closing stock price of Southern Company common stock on the date of the grant. Since one-third of the restricted stock units vest each year throughout a three -year service period, compensation expense for restricted stock unit awards is generally recognized over the corresponding one-, two-, or three-year period. Employees become immediately vested in the restricted stock units upon retirement. As a result, compensation expense for employees that are retirement eligible at the grant date is recognized immediately while compensation expense for employees that become retirement eligible during the vesting period is recognized over the period from grant date to the date of retirement eligibility.

For the year ended December 31, 2017 , employees of the Company were granted 13,260 restricted stock units. The weighted average grant-date fair value of restricted stock units granted during 2017 was $49.22 .

For the year ended December 31, 2017 , total compensation cost for restricted stock units and the related tax benefit also recognized in income was immaterial. As of December 31, 2017 , total unrecognized compensation cost related to restricted stock units was immaterial.

***Stock Options***

In 2015, Southern Company discontinued the granting of stock options. Stock options expire no later than 10 years after the grant date and the latest possible exercise will occur no later than November 2024.

The compensation cost related to the grant of Southern Company stock options to the Company's employees is recognized in the Company's financial statements with a corresponding credit to equity, representing a capital contribution from Southern Company. Compensation cost and related tax benefits recognized in the Company's financial statements were not material for any year presented. As of December 31, 2017 , all compensation cost related to stock option awards has been recognized.

The total intrinsic value of options exercised during the years ended December 31, 2017 , 2016 , and 2015 was $2 million , $4 million , and $3 million , respectively. No cash proceeds are received by the Company upon the exercise of stock options. The actual tax benefit realized by the Company for the tax deductions from stock option exercises totaled $1 million , $2 million , and $1 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively. Prior to the adoption of ASU 2016-09 in 2016, the excess tax benefits related to the exercise of stock options were recognized in the Company's financial statements with a credit to equity. Upon the adoption of ASU 2016-09, beginning in 2016, all tax benefits related to the exercise of stock options are recognized in income. As of December 31, 2017 , the aggregate intrinsic value for the options outstanding and exercisable was $4 million .

**9. FAIR VALUE MEASUREMENTS**

Fair value measurements are based on inputs of observable and unobservable market data that a market participant would use in pricing the asset or liability. The use of observable inputs is maximized where available and the use of unobservable inputs is minimized for fair value measurement and reflects a three-tier fair value hierarchy that prioritizes inputs to valuation techniques used for fair value measurement.

- Level 1 consists of observable market data in an active market for identical assets or liabilities.
- Level 2 consists of observable market data, other than that included in Level 1, that is either directly or indirectly observable.
- Level 3 consists of unobservable market data. The input may reflect the assumptions of the Company of what a market participant would use in pricing an asset or liability. If there is little available market data, then the Company's own assumptions are the best available information.

In the case of multiple inputs being used in a fair value measurement, the lowest level input that is significant to the fair value measurement represents the level in the fair value hierarchy in which the fair value measurement is reported.

As of December 31, 2017 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | |
|---|---|---|---|---|
| **As of December 31, 2017:** | **Quoted Prices in Active Markets for Identical Assets (Level 1)** | **Significant Other Observable Inputs (Level 2)** | **Significant Unobservable Inputs (Level 3)** | **Total** |
| | | *(in millions)* | | |
| Assets: | | | | |
| Energy-related derivatives | $ — | $ 2 | $ — | $ 2 |
| Interest rate derivatives | — | 1 | — | 1 |
| Cash equivalents | 224 | — | — | 224 |
| Total | $ 224 | $ 3 | $ — | $ 227 |
| Liabilities: | | | | |
| Energy-related derivatives | $ — | $ 9 | $ — | $ 9 |

As of December 31, 2016 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | |
|---|---|---|---|---|
| **As of December 31, 2016:** | **Quoted Prices in Active Markets for Identical Assets (Level 1)** | **Significant Other Observable Inputs (Level 2)** | **Significant Unobservable Inputs (Level 3)** | **Total** |
| | | *(in millions)* | | |
| Assets: | | | | |
| Energy-related derivatives | $ — | $ 3 | $ — | $ 3 |
| Interest rate derivatives | — | 3 | — | 3 |
| Cash equivalents | 206 | — | — | 206 |
| Total | $ 206 | $ 6 | $ — | $ 212 |
| Liabilities: | | | | |
| Energy-related derivatives | $ — | $ 10 | $ — | $ 10 |

**Valuation Methodologies**

The energy-related derivatives primarily consist of over-the-counter financial products for natural gas and physical power products, including, from time to time, basis swaps. These are standard products used within the energy industry and are valued using the market approach. The inputs used are mainly from observable market sources, such as forward natural gas prices, power prices, implied volatility, and overnight index swap interest rates. See Note 10 for additional information on how these derivatives are used.

As of December 31, 2017 and 2016 , other financial instruments for which the carrying amount did not equal fair value were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | *(in millions)* | |
| Long-term debt: | | |
| **2017** | **$ 2,086** | **$ 2,076** |
| 2016 | $ 2,979 | $ 2,922 |

The fair values are determined using Level 2 measurements and are based on quoted market prices for the same or similar issues or on the current rates offered to the Company.

## 10. DERIVATIVES

The Company is exposed to market risks, primarily commodity price risk and interest rate risk. To manage the volatility attributable to these exposures, the Company nets its exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and risk management practices. The Company's policy is that derivatives are to be used primarily for hedging purposes and mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis. Derivative instruments are recognized at fair value in the balance sheets as either assets or liabilities and are presented on a net basis. See Note 9 for additional information. In the statements of cash flows, the cash impacts of settled energy-related and interest rate derivatives are recorded as operating activities.

### Energy-Related Derivatives

The Company enters into energy-related derivatives to hedge exposures to electricity, gas, and other fuel price changes. However, due to cost-based rate regulations and other various cost recovery mechanisms, the Company has limited exposure to market volatility in energy-related commodity prices. The Company manages fuel-hedging programs, implemented per the guidelines of the Mississippi PSC, through the use of financial derivative contracts, which is expected to continue to mitigate price volatility.

Energy-related derivative contracts are accounted for under one of the following methods:

- *Regulatory Hedges* – Energy-related derivative contracts which are designated as regulatory hedges relate primarily to the Company's fuel-hedging programs, where gains and losses are initially recorded as regulatory liabilities and assets, respectively, and then are included in fuel expense as the underlying fuel is used in operations and ultimately recovered through the respective fuel cost recovery clauses.
- *Not Designated* – Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the statements of operations as incurred.

Some energy-related derivative contracts require physical delivery as opposed to financial settlement, and this type of derivative is both common and prevalent within the electric industry. When an energy-related derivative contract is settled physically, any cumulative unrealized gain or loss is reversed and the contract price is recognized in the respective line item representing the actual price of the underlying goods being delivered.

At December 31, 2017 , the net volume of energy-related derivative contracts for natural gas positions totaled 53 million mmBtu for the Company, with the longest hedge date of 2021 over which the Company is hedging its exposure to the variability in future cash flows for forecasted transactions.

In addition to the volume discussed above, the Company enters into physical natural gas supply contracts that provide the option to sell back excess gas due to operational constraints. The maximum expected volume of natural gas subject to such a feature is 4 million mmBtu.

### Interest Rate Derivatives

The Company may also enter into interest rate derivatives to hedge exposure to changes in interest rates. Derivatives related to existing variable rate securities or forecasted transactions are accounted for as cash flow hedges where the effective portion of the derivatives' fair value gains or losses is recorded in OCI and is reclassified into earnings at the same time the hedged transactions affect earnings. The derivatives employed as hedging instruments are structured to minimize ineffectiveness, which is recorded directly to income.

At December 31, 2017 , the following interest rate derivatives were outstanding:

| | Notional Amount | Interest Rate Received | Weighted Average Interest Rate Paid | Hedge Maturity Date | Fair Value Gain (Loss) December 31, 2017 |
|---|---|---|---|---|---|
| | *(in millions)* | | | | *(in millions)* |
| ***Cash Flow Hedges of Existing Debt*** | $ 900 | 1-month LIBOR | 0.79% | March 2018 | $ 1 |

The estimated pre-tax losses that will be reclassified from accumulated OCI to interest expense for the next 12-month period ending December 31, 2018 are $0.5 million . The Company has deferred gains and losses that are expected to be amortized into earnings through 2022 .

**Derivative Financial Statement Presentation and Amounts**

The Company enters into energy-related and interest rate derivative contracts that may contain certain provisions that permit intra-contract netting of derivative receivables and payables for routine billing and offsets related to events of default and settlements. Fair value amounts of derivative assets and liabilities on the balance sheets are presented net to the extent that there are netting arrangements or similar agreements with counterparties.

At December 31, 2017 and 2016 , the fair value of energy-related derivatives and interest rate derivatives was reflected on the balance sheets as follows:

| | **2017** | | 2016 | |
|---|---|---|---|---|
| **Derivative Category and Balance Sheet Location** | **Assets** | **Liabilities** | Assets | Liabilities |
| | | *(in millions)* | | |
| **Derivatives designated as hedging instruments for regulatory purposes** | | | | |
| Energy-related derivatives: | | | | |
| Other current assets/Other current liabilities | **$ 1** | **$ 6** | $ 2 | $ 6 |
| Other deferred charges and assets/Other deferred credits and liabilities | **1** | **3** | 2 | 5 |
| **Total derivatives designated as hedging instruments for regulatory purposes** | **$ 2** | **$ 9** | $ 4 | $ 11 |
| **Derivatives designated as hedging instruments in cash flow and fair value hedges** | | | | |
| Interest rate derivatives: | | | | |
| Other current assets/Other current liabilities | **$ 1** | **$ —** | $ 2 | $ — |
| Other deferred charges and assets/Other deferred credits and liabilities | **—** | **—** | 1 | — |
| **Total derivatives designated as hedging instruments in cash flow and fair value hedges** | **$ 1** | **$ —** | $ 3 | $ — |
| **Gross amounts recognized** | **$ 3** | **$ 9** | $ 7 | $ 11 |
| **Gross amounts offset** | **$ (2)** | **$ (2)** | $ (3) | $ (3) |
| **Net amounts recognized in the Balance Sheets** | **$ 1** | **$ 7** | $ 4 | $ 8 |

Energy-related derivatives not designated as hedging instruments were immaterial for 2017 and 2016 .

At December 31, 2017 and 2016 , the pre-tax effects of unrealized derivative gains (losses) arising from energy-related derivatives designated as regulatory hedging instruments and deferred were as follows:

| | Unrealized Losses | | | Unrealized Gains | | |
|---|---|---|---|---|---|---|
| **Derivative Category** | **Balance Sheet Location** | **2017** | 2016 | **Balance Sheet Location** | **2017** | 2016 |
| | | *(in millions)* | | | *(in millions)* | |
| Energy-related derivatives: | Other regulatory assets, current | **$ (5)** | $ (5) | Other current liabilities | **$ —** | $ 1 |
| | Other regulatory assets, deferred | **(2)** | (3) | Other regulatory liabilities, deferred | **—** | — |
| **Total energy-related derivative gains (losses)** | | **$ (7)** | $ (8) | | **$ —** | $ 1 |

For all years presented, the pre-tax effects of energy-related derivatives not designated as hedging instruments on the statements of operations were immaterial.

For the years ended December 31, 2017, 2016, and 2015, the pre-tax effects of derivatives designated as cash flow hedging instruments on the statements of operations were immaterial.

**Contingent Features**

The Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain derivatives that could require collateral, but not accelerated payment, in the event of various credit rating changes of certain affiliated companies. At December 31, 2017 , the Company had no collateral posted with its derivative counterparties.

At December 31, 2017 , the fair value of derivative liabilities with contingent features was $1 million . However, because of joint and several liability features underlying these derivatives, the maximum potential collateral requirements arising from the credit-risk-related contingent features, at a rating below BBB- and/or Baa3, were $12 million , and include certain agreements that could require collateral in the event that one or more Southern Company system power pool participants has a credit rating change to below investment grade.

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. If collateral is required, fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral are not offset against fair value amounts recognized for derivatives executed with the same counterparty.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company only enters into agreements and material transactions with counterparties that have investment grade credit ratings by Moody's and S&P or with counterparties who have posted collateral to cover potential credit exposure. The Company has also established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk. Therefore, the Company does not anticipate a material adverse effect on the financial statements as a result of counterparty nonperformance.

## 11. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2017 and 2016 is as follows:

| Quarter Ended | Operating Revenues | Operating Income (Loss) | Net Income (Loss) After Dividends on Preferred Stock |
|---|---|---|---|
| | | *(in millions)* | |
| **March 2017** | **$ 272** | **$ (62)** | **$ (20)** |
| **June 2017** | **303** | **(2,954)** | **(2,054)** |
| **September 2017** | **341** | **51** | **40** |
| **December 2017** | **271** | **(177)** | **(556)** |
| | | | |
| March 2016 | $ 257 | $ (10) | $ 11 |
| June 2016 | 277 | (28) | 2 |
| September 2016 | 352 | 9 | 26 |
| December 2016 | 277 | (166) | (89) |

As a result of the revisions to the cost estimate for the Kemper IGCC and its June 2017 suspension, the Company recorded total pre-tax charges to income related to the Kemper IGCC of $208 million ( $185 million after tax) in the fourth quarter 2017, $34 million ( $21 million after tax) in the third quarter 2017, $3.0 billion ( $2.1 billion after tax) in the second quarter 2017, $108 million ( $67 million after tax) in the first quarter 2017, $206 million ( $127 million after tax) in the fourth quarter 2016, $88 million ( $54 million after tax) in the third quarter 2016, $81 million ( $50 million after tax) in the second quarter 2016, and $53 million ( $33 million after tax) in the first quarter 2016. See Note 3 under "Kemper County Energy Facility" for additional information.

As a result of Tax Reform Legislation, the Company recorded total income tax expense of $372 million in the fourth quarter 2017. See Note 5 for additional information.

The Company's business is influenced by seasonal weather conditions.

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The management of Southern Power Company (the Company) is responsible for establishing and maintaining an adequate system of internal control over financial reporting as required by the Sarbanes-Oxley Act of 2002 and as defined in Exchange Act Rule 13a-15(f). A control system can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Under management's supervision, an evaluation of the design and effectiveness of the Company's internal control over financial reporting was conducted based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2017 .

February 20, 2018

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholder and the Board of Directors of Southern Power Company and Subsidiary Companies

**Opinion on the Financial Statements**

We have audited the accompanying consolidated balance sheets of Southern Power Company and Subsidiary Companies (the Company) (a wholly-owned subsidiary of The Southern Company) as of December 31, 2017 and 2016 , the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2017 , and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements (pages II-508 to II-542 ) present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016 , and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2017 , in conformity with accounting principles generally accepted in the United States of America.

**Basis for Opinion**

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

## OVERVIEW

### Business Activities

Southern Power Company and its subsidiaries (the Company) develop, construct, acquire, own, and manage power generation assets, including renewable energy projects, and sell electricity at market-based rates in the wholesale market. The Company continually seeks opportunities to execute its strategy to create value through various transactions including acquisitions and sales of assets, development and construction of new generating facilities, and entry into PPAs primarily with investor-owned utilities, independent power producers, municipalities, electric cooperatives, and other load-serving entities, as well as commercial and industrial customers. In general, the Company has committed to the construction or acquisition of new generating capacity only after entering into or assuming long-term PPAs for the new facilities.

During 2017 , the Company acquired or commenced construction of approximately 424 MWs of additional wind facilities and completed construction of, and placed in service, approximately 222 MWs of solar facilities. In addition, the Company continued development of its portfolio of wind projects and continued expansion of the 345-MW Mankato natural gas facility. Subsequent to December 31, 2017 , the Company acquired Gaskell West 1, which is an approximately 20-MW solar facility. See FUTURE EARNINGS POTENTIAL – "Acquisitions" and "Construction Projects" herein for additional information.

As of December 31, 2017 , the Company's generation fleet totaled 12,940 MWs of nameplate capacity in commercial operation (including 5,152 MWs owned by its subsidiaries). The average remaining duration of the Company's total portfolio of wholesale contracts is approximately 15 years, which reduces remarketing risk for the Company. With the inclusion of the PPAs and investments associated with renewable and natural gas facilities currently under construction and acquired subsequent to December 31, 2017 , the Company has an average investment coverage ratio of 91 % through 2022 and 89 % through 2027.

The Company is pursuing the sale of a 33% equity interest in a newly-formed holding company that owns substantially all of the Company's solar assets, which, if successful, is expected to close in the middle of 2018. The ultimate outcome of this matter cannot be determined at this time.

The Company's future earnings will depend on the parameters of the wholesale market and the efficient operation of its wholesale generating assets, as well as the Company's ability to execute its growth strategy and to develop and construct generating facilities. In addition, the Company's earnings may be impacted by the availability of federal and state solar ITCs and wind PTCs on its renewable energy projects, which could be impacted by current or future potential tax reform legislation. See FUTURE EARNINGS POTENTIAL – "Acquisitions," "Construction Projects," and "Income Tax Matters" herein for additional information.

Effective in December 2017, 538 employees transferred from SCS to the Company. The Company became obligated for related employee costs including pension, other postretirement benefits, and stock-based compensation and has recognized the respective balance sheet assets and liabilities, including AOCI impacts, in its balance sheet at December 31, 2017. Prior to the transfer of employees, the Company's agreements with SCS provided for employee services rendered at amounts in compliance with FERC regulations.

To evaluate operating results and to ensure the Company's ability to meet its contractual commitments to customers, the Company continues to focus on several key performance indicators, including, but not limited to, peak season equivalent forced outage rate, contract availability, and net income.

See RESULTS OF OPERATIONS herein for information on the Company's financial performance.

### Earnings

The Company's 2017 net income was $1.1 billion , a $733 million increase from 2016 , primarily attributable to $743 million related to the Tax Reform Legislation. Also contributing to the change were increases in operating expenses and interest expense related to the Company's growth strategy and continuous construction program, largely offset by increased renewable energy sales.

The Company's 2016 net income was $338 million , a $123 million, or 57%, increase from 2015 . The increase was primarily due to increased federal income tax benefits from solar ITCs and wind PTCs and increased renewable energy sales, partially offset by increases in depreciation, operations and maintenance expenses, and interest expense from debt issuances, primarily related to new solar and wind facilities.

Benefits from solar ITCs, related to the Company's acquisition and construction of new facilities, and wind PTCs, related to wind generation, significantly impacted the Company's net income in 2017 and 2016. The Company's net income in 2015 was also significantly impacted by solar ITCs. See Note 5 to the financial statements under "Effective Tax Rate" for additional information.

## RESULTS OF OPERATIONS

A condensed statement of income follows:

| | Amount | Increase (Decrease) from Prior Year | |
|---|---|---|---|
| | **2017** | **2017** | 2016 |
| | | *(in millions)* | |
| Operating revenues | **$ 2,075** | **$ 498** | $ 187 |
| Fuel | **621** | **165** | 15 |
| Purchased power | **149** | **47** | 9 |
| Other operations and maintenance | **386** | **32** | 94 |
| Depreciation and amortization | **503** | **151** | 104 |
| Taxes other than income taxes | **48** | **25** | 1 |
| Total operating expenses | **1,707** | **420** | 223 |
| Operating income | **368** | **78** | (36) |
| Interest expense, net of amounts capitalized | **191** | **74** | 40 |
| Other income (expense), net | **1** | **(5)** | 5 |
| Income taxes (benefit) | **(939)** | **(744)** | (216) |
| Net income | **1,117** | **743** | 145 |
| Less: Net income attributable to noncontrolling interests | **46** | **10** | 22 |
| Net income attributable to the Company | **$ 1,071** | **$ 733** | $ 123 |

### *Operating Revenues*

Total operating revenues include PPA capacity revenues, which are derived primarily from long-term contracts involving natural gas and biomass generating facilities, and PPA energy revenues from the Company's generation facilities. To the extent the Company has capacity not contracted under a PPA, it may sell power into the wholesale market and, to the extent the generation assets are part of the Intercompany Interchange Contract (IIC), as approved by the FERC, it may sell power into the power pool.

*Natural Gas and Biomass Capacity and Energy Revenue*

Capacity revenues generally represent the greatest contribution to net income and are designed to provide recovery of fixed costs plus a return on investment.

Energy is generally sold at variable cost or is indexed to published natural gas indices. Energy revenues will vary depending on the energy demand of the Company's customers and their generation capacity, as well as the market prices of wholesale energy compared to the cost of the Company's energy. Energy revenues also include fees for support services, fuel storage, and unit start charges. Increases and decreases in energy revenues under PPAs that are driven by fuel or purchased power prices are accompanied by an increase or decrease in fuel and purchased power costs and do not have a significant impact on net income.

*Solar and Wind Energy Revenue*

The Company's energy sales from solar and wind generating facilities are predominantly through long-term PPAs that do not have a capacity charge. Customers either purchase the energy output of a dedicated renewable facility through an energy charge or pay a fixed price related to the energy sold to the grid. As a result, the Company's ability to recover fixed and variable operations and maintenance expenses is dependent upon the level of energy generated from these facilities, which can be impacted by weather conditions, equipment performance, transmission constraints, and other factors.

See FUTURE EARNINGS POTENTIAL – "Power Sales Agreements" herein for additional information regarding the Company's PPAs.

Details of the Company's operating revenues were as follows:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| PPA capacity revenues | $ 599 | $ 541 | $ 569 |
| PPA energy revenues | 970 | 694 | 560 |
| Total PPA revenues | 1,569 | 1,235 | 1,129 |
| Non-PPA revenues | 494 | 330 | 252 |
| Other revenues | 12 | 12 | 9 |
| Total operating revenues | $ 2,075 | $ 1,577 | $ 1,390 |

Operating revenues for 2017 were $2.1 billion , reflecting a $498 million , or 32%, increase from 2016 . The increase in operating revenues was primarily due to the following:

- PPA capacity revenues increased $58 million, or 11%, primarily due to additional customer capacity requirements, and a new PPA related to the Mankato natural gas facility acquired in late 2016.
- PPA energy revenues increased $276 million, or 40%, primarily due to a $213 million increase in renewable energy sales arising from new solar and wind facilities and a $50 million increase in sales from existing natural gas PPAs primarily due to an $85 million increase in the average cost of fuel, partially offset by a $35 million decrease in the volume of KWHs sold primarily due to reduced customer load.
- Non-PPA revenues increased $164 million, or 50%, primarily due to a $156 million increase in the volume of KWHs sold primarily from uncovered natural gas capacity through short-term opportunity sales, as well as an $8 million increase in the price of energy in the wholesale markets.

Operating revenues for 2016 were $1.6 billion, reflecting a $187 million, or 13%, increase from 2015 . The increase in operating revenues was primarily due to the following:

- PPA capacity revenues decreased $28 million as a result of a $44 million decrease in non-affiliate capacity revenues primarily as a result of PPA expirations and subsequent generation capacity remarketing into the short-term markets, partially offset by a $16 million increase in affiliate capacity revenues due to new PPAs.
- PPA energy revenues increased $134 million primarily due to a $170 million increase in renewable energy sales arising from new solar and wind facilities, partially offset by a decrease of $36 million in fuel revenues related to natural gas PPAs. Overall, total KWH sales under PPAs increased 7% in 2016 when compared to 2015.
- Non-PPA revenues increased $78 million primarily due to a 23% increase in KWH sales. Underlying this increase was a $113 million increase in short-term sales to non-affiliates as a result of remarketing generation capacity from expired PPAs, partially offset by a $35 million decrease in power pool sales primarily associated with a reduction in capacity available for sale.

***Fuel and Purchased Power Expenses***

Fuel costs constitute one of the largest expenses for the Company. In addition, the Company purchases a portion of its electricity needs from the wholesale market including the power pool. Details of the Company's generation and purchased power were as follows:

| | Total KWHs | Total KWH % Change | Total KWHs | Total KWH % Change |
|---|---|---|---|---|
| | 2017 | | 2016 | |
| | | *(in billions of KWHs)* | | |
| Generation | 44 | | 37 | |
| Purchased power | 5 | | 3 | |
| Total generation and purchased power | 49 | 23% | 40 | 14% |
| Total generation and purchased power, excluding solar, wind, and tolling agreements | 28 | 22% | 23 | 10% |

**MANAGEMENT'S DISCUSSION AND ANALYSIS (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The Company's PPAs for natural gas and biomass generation generally provide that the purchasers are responsible for either procuring the fuel (tolling agreements) or reimbursing the Company for substantially all of the cost of fuel relating to the energy delivered under such PPAs. Consequently, changes in such fuel costs are generally accompanied by a corresponding change in related fuel revenues and do not have a significant impact on net income. The Company is responsible for the cost of fuel for generating units that are not covered under PPAs. Power from these generating units is sold into the wholesale market or into the power pool for capacity owned directly by the Company.

Purchased power expenses will vary depending on demand, availability, and the cost of generating resources throughout the Southern Company system and other contract resources. Load requirements are submitted to the power pool on an hourly basis and are fulfilled with the lowest cost alternative, whether that is generation owned by the Company, an affiliate company, or external parties. Such purchased power costs are generally recovered through PPA revenues.

Details of the Company's fuel and purchased power expenses were as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Fuel | **$ 621** | $ 456 | $ 441 |
| Purchased power | **149** | 102 | 93 |
| Total fuel and purchased power expenses | **$ 770** | $ 558 | $ 534 |

In 2017 , total fuel and purchased power expenses increased $212 million, or 38%, compared to 2016 . Fuel expense increased $165 million, or 36%, primarily due to an $83 million increase associated with the volume of KWHs generated and an $82 million increase associated with the average cost of natural gas per KWH generated. Purchased power expense increased $47 million, or 46%, primarily due to a $37 million increase associated with the volume of KWHs purchased and an $11 million increase associated with the average cost of purchased power.

In 2016 , total fuel and purchased power expenses increased $24 million, or 4%, compared to 2015 . Fuel expense increased $15 million, or 3%, primarily due to a $22 million increase associated with the volume of KWHs generated, partially offset by a $7 million decrease associated with the average cost of natural gas per KWH generated. Purchased power expense increased $9 million, or 10%, primarily due to a $53 million increase associated with the volume of KWHs purchased, partially offset by a $28 million decrease associated with the average cost of purchased power and a $16 million decrease associated with a PPA expiration.

***Other Operations and Maintenance Expenses***

In 2017 , other operations and maintenance expenses increased $32 million, or 9%, compared to 2016 . The increase was primarily due to increases of $56 million associated with new facilities, $21 million in business development and support expenses, and $6 million in employee compensation, all associated with the Company's overall growth. These increases were partially offset by decreases of $35 million associated with scheduled outage and maintenance expenses and $15 million in non-outage operations and maintenance expenses.

In 2016 , other operations and maintenance expenses increased $94 million, or 36%, compared to 2015 . The increase was primarily due to increases of $35 million associated with new plants placed in service in 2015 and 2016, $25 million associated with scheduled outage and maintenance expenses, and $21 million in business development and support expenses and $13 million in employee compensation all primarily associated with the Company's overall growth.

***Depreciation and Amortization***

In 2017 , depreciation and amortization increased $151 million, or 43%, compared to 2016 . In 2016 , depreciation and amortization increased $104 million, or 42%, compared to 2015 . These increases were primarily due to additional depreciation related to new solar, wind, and natural gas facilities placed in service. See Note 1 to the financial statements under "Depreciation" for additional information.

***Taxes Other Than Income Taxes***

In 2017 , taxes other than income taxes were $48 million compared to $23 million in 2016. In 2016 , taxes other than income taxes increased $1 million, or 5%, compared to 2015 . The increases were primarily due to additional property taxes due to new facilities.

***Interest Expense, Net of Amounts Capitalized***

In 2017 , interest expense, net of amounts capitalized increased $74 million, or 63%, compared to 2016 . The increase was primarily due to an increase of $44 million in interest expense related to an increase in average outstanding long-term debt, primarily to fund the Company's growth strategy and continuous construction program, as well as a $30 million decrease in capitalized interest associated with completing construction of and placing in service solar facilities.

In 2016 , interest expense, net of amounts capitalized increased $40 million, or 52%, compared to 2015 . The increase was primarily due to an increase of $66 million in interest expense related to additional debt issued during 2016 primarily to fund the Company's growth strategy and continuous construction program, partially offset by a $26 million increase in capitalized interest associated with the construction of solar facilities.

***Other Income (Expense), Net***

In 2017 , other income (expense), net decreased $5 million, or 83%, compared to 2016 . In 2016 , other income (expense), net increased $5 million compared to 2015 . For 2017, the amount includes $159 million from currency losses compared to $82 million from currency gains in 2016, arising from translation of €1.1 billion euro-denominated fixed-rate notes into U.S. dollars, each fully offset by an equal amount on the foreign currency hedges that were reclassified from accumulated OCI into earnings. See Note 9 to the financial statements under "Foreign Currency Derivatives" for additional information regarding hedging.

***Income Taxes (Benefit)***

In 2017 , income tax benefit was $939 million compared to $195 million for 2016 of which $743 million is related to the Tax Reform Legislation under which the Company remeasured its accumulated deferred income taxes based on the new federal income tax rates. The remaining increase in tax benefit was primarily due to an increase of $89 million in PTCs from wind generation in 2017 and other state income taxes, significantly offset by a decrease in tax benefits from lower ITCs from solar plants placed in service.

In 2016 , income tax benefit was $195 million compared to an expense of $21 million for 2015 . The $216 million change was primarily due to an increase of $180 million in federal income tax benefits related to ITCs for solar plants placed in service and PTCs from wind generation in 2016 and a $35 million decrease in tax expense related to lower pre-tax earnings in 2016 .

See FUTURE EARNINGS POTENTIAL – " Income Tax Matters – Federal Tax Reform Legislation " herein and Note 1 to the financial statements under "Income and Other Taxes" for information on how the Company recognizes the tax benefits related to federal ITCs and PTCs and Note 5 to the financial statements under "Effective Tax Rate" for additional information.

### Effects of Inflation

The Company is party to long-term contracts reflecting market-based rates, including inflation expectations. Any adverse effect of inflation on the Company's results of operations has not been substantial in recent years.

## FUTURE EARNINGS POTENTIAL

### General

The results of operations for the past three years are not necessarily indicative of the Company's future earnings potential. The level of the Company's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of the Company's competitive wholesale business. These factors include: the Company's ability to achieve sales growth while containing costs; regulatory matters; creditworthiness of customers; total generating capacity available in the Company's market areas; the successful remarketing of capacity as current contracts expire; the Company's ability to execute its growth strategy, including successful additional investments in renewable and other energy projects, and to develop and construct generating facilities.

On December 22, 2017, the Tax Reform Legislation was signed into law and became effective on January 1, 2018, which among other things, reduces the federal corporate income tax rate to 21% and changes rates of depreciation and the business interest deduction. See " Income Tax Matters " and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" herein and Note 5 to the financial statements for additional information.

In September 2017 , the Company began a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of the solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization is expected to be substantially completed in the first quarter 2018. The Company is pursuing the sale of a 33% equity interest in the newly-formed holding company owning these solar assets, which, if successful, is expected to close in the middle of 2018. The ultimate outcome of this matter cannot be determined at this time.

Demand for electricity is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, as well as renewable portfolio standards, which may impact future earnings. Other factors that could influence future earnings include weather, transmission constraints, cost of generation from units within the power pool, and operational limitations.

**Power Sales Agreements**

***General***

The Company has PPAs with some of Southern Company's traditional electric operating companies, other investor-owned utilities, independent power producers, municipalities, and other load-serving entities, as well as commercial and industrial customers. The PPAs are expected to provide the Company with a stable source of revenue during their respective terms.

Many of the Company's PPAs have provisions that require the Company or the counterparty to post collateral or an acceptable substitute guarantee in the event that S&P or Moody's downgrades the credit ratings of the respective company to an unacceptable credit rating or if the counterparty is not rated or fails to maintain a minimum coverage ratio. See FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" herein for additional information.

The Company is working to maintain and expand its share of the wholesale markets. The Company expects there to be new demand for capacity that will develop in the 2018-2020 timeframe. The size of available demand and timing will vary across the wholesale markets. The Company calculates an investment coverage ratio for its generating assets based on the ratio of investment under contract to total investment using the respective generation facilities' net book value (or expected in-service value for facilities under construction or being acquired) as the investment amount. With the inclusion of the PPAs and investments associated with the wind and natural gas facilities currently under construction and the Gaskell West 1 solar facility which was acquired subsequent to December 31, 2017 , as well as other capacity and energy contracts, the Company has an average investment coverage ratio of 91 % through 2022 and 89 % through 2027, with an average remaining contract duration of approximately 15 years. See "Acquisitions" and "Construction Projects" herein for additional information.

***Natural Gas and Biomass***

The Company's electricity sales from natural gas and biomass generating units are primarily through long-term PPAs that consist of two types of agreements. The first type, referred to as a unit or block sale, is a customer purchase from a dedicated generating unit where all or a portion of the generation from that unit is reserved for that customer. The Company typically has the ability to serve the unit or block sale customer from an alternate resource. The second type, referred to as requirements service, provides that the Company serve the customer's capacity and energy requirements from a combination of the customer's own generating units and from Company resources not dedicated to serve unit or block sales. The Company has rights to purchase power provided by the requirements customers' resources when economically viable.

As a general matter, substantially all of the PPAs provide that the purchasers are responsible for either procuring the fuel (tolling agreements) or reimbursing the Company for substantially all of the cost of fuel or purchased power relating to the energy delivered under such PPAs. To the extent a particular generating facility does not meet the operational requirements contemplated in the PPAs, the Company may be responsible for excess fuel costs. With respect to fuel transportation risk, most of the Company's PPAs provide that the counterparties are responsible for the availability of fuel transportation to the particular generating facility.

Capacity charges that form part of the PPA payments are designed to recover fixed and variable operation and maintenance costs based on dollars-per-kilowatt year. In general, to reduce the Company's exposure to certain operation and maintenance costs, the Company has LTSAs. See Note 1 to the financial statements under "Long-Term Service Agreements" for additional information.

***Solar and Wind***

The Company's electricity sales from solar and wind (renewables) generating facilities are also made pursuant to long-term PPAs; however, these solar and wind PPAs do not have a capacity charge and customers either purchase the energy output of a dedicated renewable facility through an energy charge or provide the Company a certain fixed price for the electricity sold to the grid. As a result, the Company's ability to recover fixed and variable operation and maintenance expenses is dependent upon the level of energy generated from these facilities, which can be impacted by weather conditions, equipment performance, transmission constraints, and other factors. Generally, under the solar and wind generation PPAs, the purchasing party retains the right to keep or resell the renewable energy credits.

**Environmental Matters**

The Company's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. The Company maintains a comprehensive environmental compliance strategy to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations may impact results of operations, cash flows, and financial condition. Compliance costs may result from the installation of additional environmental controls. The ultimate impact of the environmental laws and regulations discussed below will depend on various factors, such as state adoption and implementation of requirements, the availability and cost of any deployed control technology, and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of the Company's operations. The Company's PPAs generally contain provisions that permit charging the counterparty with some of the new costs incurred as a result of changes in environmental laws and regulations.

Since the Company's units are newer natural gas and renewable generating facilities, costs associated with environmental compliance for these facilities have been less significant than for similarly situated coal or older natural gas generating facilities. Environmental, natural resource, and land use concerns, including the applicability of air quality limitations, the potential presence of wetlands or threatened and endangered species, the availability of water withdrawal rights, uncertainties regarding aesthetic impacts such as increased light or noise, and concerns about potential adverse health impacts can, however, increase the cost of siting and operating any type of future electric generating facility. The impact of such laws and regulations on the Company and subsequent recovery through PPA provisions cannot be determined at this time.

***Environmental Laws and Regulations***

*Air Quality*

In 2011, the EPA finalized the Cross-State Air Pollution Rule (CSAPR) and its $NO_X$ annual, $NO_X$ seasonal, and $SO_2$ annual programs. CSAPR is an emissions trading program that addresses the impacts of the interstate transport of $SO_2$ and $NO_X$ emissions from fossil fuel-fired power plants located in upwind states in the eastern half of the U.S. on air quality in downwind states. The Company has fossil fuel-fired generation subject to these requirements. In October 2016, the EPA published a final rule that revised the CSAPR seasonal $NO_X$ program, establishing more stringent $NO_X$ emissions budgets in Alabama and Texas . The EPA also removed North Carolina from the CSAPR $NO_X$ seasonal program and completely removed Florida from all CSAPR programs. Georgia's seasonal $NO_X$ budget remains unchanged. Increases in either future fossil fuel-fired generation or the cost of CSAPR allowances could have a negative financial impact on results of operations for the Company .

In 2015, the EPA published a final rule requiring certain states (including Alabama, Florida, Georgia, North Carolina, and Texas) to revise or remove the provisions of their state implementation plans (SIP) regulating excess emissions at industrial facilities, including electric generating facilities, during periods of startup, shut-down, or malfunction (SSM). The state excess emission rules provide necessary operational flexibility to affected units during periods of SSM and, if removed, could affect unit availability and result in increased operations and maintenance costs for the Company.

*Water Quality*

In 2014, the EPA finalized requirements under Section 316(b) of the Clean Water Act (CWA) to regulate cooling water intake structures at existing power plants and manufacturing facilities in order to minimize their effects on fish and other aquatic life. The regulation requires plant-specific studies to determine applicable measures to protect organisms that either get caught on the intake screens (impingement) or are drawn into the cooling system (entrainment). The ultimate impact of this rule will depend on the outcome of these plant-specific studies and any additional protective measures required to be incorporated into each plant's National Pollutant Discharge Elimination System (NPDES) permit based on site-specific factors.

In 2015, the EPA finalized the steam electric effluent limitations guidelines (ELG) rule that set national standards for wastewater discharges from steam electric generating units. The rule prohibits effluent discharges of certain wastestreams and imposes stringent arsenic, mercury, selenium, and nitrate/nitrite limits on scrubber wastewater discharges. The revised technology-based limits and compliance dates may require extensive modifications to existing wastewater management systems or the installation and operation of new wastewater management systems. Compliance with the ELG rule is expected to require capital expenditures and increased operational costs. Compliance applicability dates range from November 1, 2018 to December 31, 2023 with state environmental agencies' incorporating specific applicability dates in the NPDES permitting process based on information provided for each waste stream. The EPA has committed to a new rulemaking that could potentially revise the limitations and applicability dates of the ELG rule. The EPA expects to finalize this rulemaking in 2020.

In 2015, the EPA and the U.S. Army Corps of Engineers (Corps) jointly published a final rule that revised the regulatory definition of waters of the United States (WOTUS) for all CWA programs. The rule significantly expanded the scope of federal jurisdiction over waterbodies (such as rivers, streams, and canals), which could impact new generation projects . On July 27, 2017, the EPA and the Corps proposed to rescind the 2015 WOTUS rule. The WOTUS rule has been stayed by the U.S. Court of Appeals for the Sixth Circuit since late 2015, but on January 22, 2018, the U.S. Supreme Court determined that federal district courts have jurisdiction over the pending challenges to the rule. On February 6, 2018, the EPA and the Corps published a final rule delaying implementation of the 2015 WOTUS rule to 2020.

***Global Climate Issues***

In 2015, the EPA published final rules limiting $CO_2$ emissions from new, modified, and reconstructed fossil fuel-fired electric generating units and guidelines for states to develop plans to meet EPA-mandated $CO_2$ emission performance standards for existing units (known as the Clean Power Plan or CPP). In February 2016, the U.S. Supreme Court granted a stay of the CPP, which will remain in effect through the resolution of litigation in the U.S. Court of Appeals for the District of Columbia challenging the legality of the CPP and any review by the U.S. Supreme Court. On March 28, 2017, the U.S. President signed an executive order directing agencies to review actions that potentially burden the development or use of domestically produced energy resources, including review of the CPP and other $CO_2$ emissions rules. On October 10, 2017, the EPA published a proposed rule to repeal the CPP and, on December 28, 2017, published an advanced notice of proposed rulemaking regarding a CPP replacement rule.

In 2015, parties to the United Nations Framework Convention on Climate Change, including the United States, adopted the Paris Agreement, which established a non-binding universal framework for addressing greenhouse gas (GHG) emissions based on nationally determined contributions. On June 1, 2017, the U.S. President announced that the United States would withdraw from the Paris Agreement and begin renegotiating its terms. The ultimate impact of this agreement or any renegotiated agreement depends on its implementation by participating countries.

The EPA's GHG reporting rule requires annual reporting of GHG emissions expressed in terms of metric tons of $CO_2$ equivalent emissions for a company's operational control of facilities. Based on ownership or financial control of facilities, the Company's 2016 GHG emissions were approximately 13 million metric tons of $CO_2$ equivalent. The preliminary estimate of the Company's 2017 GHG emissions on the same basis is approximately 13 million metric tons of $CO_2$ equivalent.

**Income Tax Matters**

***Consolidated Income Taxes***

On behalf of the Company, Southern Company files a consolidated federal income tax return and various state income tax returns, some of which are combined, unitary, or consolidated. Under a joint consolidated income tax allocation agreement, each Southern Company subsidiary's current and deferred tax expense is computed on a stand-alone basis and no subsidiary is allocated more current expense than would be paid if it filed a separate income tax return. In accordance with IRS regulations, each company is jointly and severally liable for the federal tax liability.

The impact of certain tax events at Southern Company and/or its other subsidiaries can, and does, affect the Company's ability to utilize certain tax credits. See "Tax Credits" and ACCOUNTING POLICIES – "Application of Critical Accounting Policies and Estimates" herein and Note 5 to the financial statements for additional information.

The Company currently has unutilized federal ITC and PTC carryforwards totaling approximately $2.0 billion , and thus anticipates utilizing third-party tax equity partnerships as one of the financing sources to fund its renewable growth strategy where the tax partner will take significantly all of the respective federal tax benefits. These tax equity partnerships are expected to be consolidated in the Company's financial statements using a hypothetical liquidation at book value (HLBV) methodology to allocate partnership gains and losses to the Company.

***Federal Tax Reform Legislation***

On December 22, 2017, the Tax Reform Legislation was signed into law and became effective on January 1, 2018. The Tax Reform Legislation, among other things, reduces the federal corporate income tax rate to 21%, retains normalization provisions for public utility property and existing renewable energy incentives, and repeals the corporate alternative minimum tax.

For businesses other than regulated utilities, the Tax Reform Legislation allows 100% bonus depreciation of qualified property acquired and placed in service between September 28, 2017 and January 1, 2023 and phases down 20% each year until it completely phases out for qualified property placed in service after December 31, 2027. Further, the business interest deduction is limited to 30% of taxable income excluding interest, net operating loss (NOL) carryforward, and depreciation and amortization through December 31, 2021 and thereafter to 30% of taxable income excluding interest and NOL carryforwards.

In addition, under the Tax Reform Legislation, NOLs generated after December 31, 2017 can no longer be carried back to previous tax years but can be carried forward indefinitely, with utilization limited to 80% of taxable income of the subsequent tax year. The projected reduction of Southern Company's consolidated income tax liability resulting from the tax rate reduction also delays the expected utilization of existing tax credit carryforwards.

For the year ended December 31, 2017, implementation of the Tax Reform Legislation resulted in an estimated net tax benefit of $743 million, primarily due to the impact of the reduction of the corporate income tax rate on deferred tax assets and liabilities .

The Tax Reform Legislation is subject to further interpretation and guidance from the IRS, as well as each respective state's adoption. In addition, the regulatory treatment of certain impacts of the Tax Reform Legislation is subject to the discretion of the FERC.

See FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" herein and Note 5 to the financial statements under "Current and Deferred Income Taxes" for additional information.

The ultimate outcome of these matters cannot be determined at this time.

***Tax Credits***

The Tax Reform Legislation retained the renewable energy incentives that were included in the Protecting Americans from Tax Hikes (PATH) Act. The PATH Act allows for 30% ITC for solar projects that commence construction by December 31, 2019; 26% ITC for solar projects that commence construction in 2020; 22% ITC for solar projects that commence construction in 2021; and a permanent 10% ITC for solar projects that commence construction on or after January 1, 2022. In addition, the PATH Act allows for 100% PTC for wind projects that commenced construction in 2016; 80% PTC for wind projects that commenced construction in 2017; 60% PTC for wind projects that commence construction in 2018; and 40% PTC for wind projects that commence construction in 2019. Wind projects commencing construction after 2019 will not be entitled to any PTCs. The Company has received ITCs related to its investment in new solar facilities acquired or constructed and receives PTCs related to the first 10 years of energy production from its wind facilities, which have had, and will continue to have, a material impact on the Company's cash flows and net income. At December 31, 2017, the Company had approximately $2.0 billion of unutilized ITCs and PTCs, which are currently expected to be fully utilized by 2027, but could be further delayed as a result of the Company's continued growth strategy, as well as the impacts from the Tax Reform Legislation. See Note 1 to the financial statements under "Income and Other Taxes" and Note 5 to the financial statements under "Current and Deferred Income Taxes – Tax Credit Carryforwards" and "Effective Tax Rate" for additional information regarding utilization and amortization of credits and the tax benefit related to basis differences.

***Bonus Depreciation***

Under the Tax Reform Legislation, projects with binding contracts prior to September 28, 2017 and placed in service after September 27, 2017 remain eligible for bonus depreciation under the PATH Act. The PATH Act allowed for 50% bonus depreciation for 2015 through 2017, 40% bonus depreciation for 2018, and 30% bonus depreciation for 2019 and certain long-lived assets placed in service in 2020. Based on provisional estimates, approximately $130 million of positive cash flows is expected to result from bonus depreciation for the 2017 tax year. Should Southern Company have a NOL in 2018, all of these cash flows may not be fully realized in 2018. In addition, any cash flows resulting from bonus depreciation will also be impacted by the Company's use of third-party tax equity arrangements. See Note 5 to the financial statements under "Current and Deferred Income Taxes" for additional information. The ultimate outcome of these matters cannot be determined at this time.

***Legal Entity Reorganization***

In September 2017 , the Company began a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of the solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization included the purchase of all of the redeemable noncontrolling interests, representing 10% of the membership interests, in Southern Turner Renewable Energy, LLC. The reorganization is expected to be substantially completed in the first quarter 2018 and is expected to result in estimated tax benefits totaling between $50 million and $55 million related to certain changes in state apportionment rates and net operating loss carryforward utilization that will be recorded in the first quarter 2018. The Company is pursuing the sale of a 33% equity interest in the newly-formed holding company owning these solar assets. The ultimate outcome of this matter cannot be determined at this time.

### Acquisitions

During 2017 and subsequent to December 31, 2017, in accordance with its overall growth strategy, the Company acquired the projects discussed below, as well as the Cactus Flats wind facility discussed under "Construction Projects" herein. See Note 11 to the financial statements for additional information.

| Project Facility | Resource | Seller, Acquisition Date | Approximate Nameplate Capacity ( *MW* ) | Location | Percentage Ownership | Actual/Expected COD | PPA Counterparties | PPA Contract Period |
|---|---|---|---|---|---|---|---|---|
| **Business Acquisitions During the Year Ended December 31, 2017** | | | | | | | | |
| Bethel | Wind | Invenergy Wind Global LLC, January 6, 2017 | 276 | Castro County, TX | 100% | January 2017 | Google Energy, LLC | 12 years |
| **Asset Acquisitions Subsequent to December 31, 2017** | | | | | | | | |
| Gaskell West 1 | Solar | Recurrent Energy Development Holdings, LLC , January 26, 2018 | 20 | Kern County, CA | 100% of Class B (*) | March 2018 | Southern California Edison | 20 years |

(*) The Company owns 100% of the class B membership interest under a tax equity partnership agreement.

### Construction Projects

#### *Construction Projects Completed and in Progress*

During 2017, in accordance with its overall growth strategy, the Company completed construction of and placed in service, or continued construction of, the projects set forth in the table below.

| Project Facility | Resource | Approximate Nameplate Capacity ( *MW* ) | Location | Ownership Percentage | Actual / Expected COD | PPA Counterparties | PPA Contract Period |
|---|---|---|---|---|---|---|---|
| **Construction Projects Completed During the Year Ended December 31, 2017** | | | | | | | |
| East Pecos | Solar | 120 | Pecos County, TX | 100% | March 2017 | Austin Energy | 15 years |
| Lamesa | Solar | 102 | Dawson County, TX | 100% | April 2017 | City of Garland, Texas | 15 years |
| **Projects Under Construction at December 31, 2017** | | | | | | | |
| Cactus Flats | Wind | 148 | Concho County, TX | 100% (*) | Third quarter 2018 | General Motors and General Mills | 12 years and 15 years |
| Mankato Expansion | Natural Gas | 345 | Mankato, MN | 100% | Second quarter 2019 | Northern States Power Company | 20 years |

(*) On July 31, 2017, the Company purchased 100% of the Cactus Flats facility and commenced construction. Upon placing the facility in service, the Company expects to close on a tax equity partnership agreement that has already been executed, subject to various customary conditions at closing, and will then own 100% of the class B membership interests.

Total aggregate construction costs for projects under construction at December 31, 2017, excluding acquisition costs and including construction costs to complete the subsequently-acquired Gaskell West 1 solar project, are expected to be between $385 million and $430 million . At December 31, 2017 , total costs of construction incurred for these projects was $188 million , all of which remained in CWIP.

#### *Development Projects*

During 2017, as part of the Company's renewable development strategy, the Company purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for various development and construction projects, up to 900 MWs in total. Once these wind projects reach commercial operations, which is expected in 2021, they are expected to qualify for 80% PTCs.

During 2016, the Company entered into a joint development agreement with Renewable Energy Systems Americas, Inc. to develop and construct approximately 3,000 MWs of wind projects expected to be placed in service between 2018 and 2020. In addition, in 2016, the Company purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for construction of the facilities. Once these wind projects reach commercial operations, they are expected to qualify for 100% PTCs.

The ultimate outcome of these matters cannot be determined at this time.

### FERC Matters

The Company has authority from the FERC to sell electricity at market-based rates. Since 2008, that authority, for certain balancing authority areas, has been conditioned on compliance with the requirements of an energy auction, which the FERC found to be tailored mitigation that addresses potential market power concerns. In accordance with FERC regulations governing such authority, the traditional electric operating companies and the Company filed a triennial market power analysis in 2014, which included continued reliance on the energy auction as tailored mitigation. In 2015, the FERC issued an order finding that the traditional electric operating companies' and the Company's existing tailored mitigation may not effectively mitigate the potential to exert market power in certain areas served by the traditional electric operating companies and in some adjacent areas. The FERC directed the traditional electric operating companies and the Company to show why market-based rate authority should not be revoked in these areas or to provide a mitigation plan to further address market power concerns. The traditional electric operating companies and the Company filed a request for rehearing and filed their response with the FERC in 2015.

In December 2016, the traditional electric operating companies and the Company filed an amendment to their market-based rate tariff that proposed certain changes to the energy auction, as well as several non-tariff changes. On February 2, 2017, the FERC issued an order accepting all such changes subject to an additional condition of cost-based price caps for certain sales outside of the energy auction, finding that all of these changes would provide adequate alternative mitigation for the traditional electric operating companies' and the Company's potential to exert market power in certain areas served by the traditional electric operating companies and in some adjacent areas. On May 17, 2017, the FERC accepted the traditional electric operating companies' and the Company's compliance filing accepting the terms of the order. While the FERC's February 2, 2017 order references the market power proceeding discussed above, it remains a separate, ongoing matter.

On October 25, 2017, the FERC issued an order in response to the traditional electric operating companies' and the Company's June 29, 2017 triennial updated market power analysis. The FERC directed the traditional electric operating companies and the Company to show cause within 60 days why market-based rate authority should not be revoked in certain areas adjacent to the area presently under mitigation in accordance with the February 2, 2017 order or to provide a mitigation plan to further address market power concerns. On November 10, 2017, the traditional electric operating companies and the Company responded to the FERC and proposed to resolve matters by applying the alternative mitigation authorized by the February 2, 2017 order to the adjacent areas made the subject of the October 25, 2017 order.

The ultimate outcome of these matters cannot be determined at this time.

### Other Matters

The Company is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, the Company is subject to certain claims and legal actions arising in the ordinary course of business. The Company's business activities are subject to extensive governmental regulation related to public health and the environment, such as regulation of air emissions and water discharges. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements, such as standards for air, water, land, and protection of other natural resources, has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by $CO_2$ and other emissions and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters.

The ultimate outcome of such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on the Company's financial statements.

During 2015, the Company indirectly acquired a 51% membership interest in RE Roserock LLC (Roserock), the owner of the Roserock facility in Pecos County, Texas, which was under construction by Recurrent Energy, LLC and was subsequently placed in service in November 2016. Prior to placing the facility in service, certain solar panels were damaged during installation. While the facility currently is generating energy consistent with operational expectations and PPA obligations, the Company is pursuing remedies under its insurance policies and other contracts to repair or replace these solar panels. In connection therewith, the Company is withholding payments of approximately $26 million from the construction contractor, who has placed a lien on the

Roserock facility for the same amount. The amounts withheld are included in other accounts payable and other current liabilities on the Company's consolidated balance sheets. On May 18, 2017, Roserock filed a lawsuit in the state district court in Pecos County, Texas, against XL Insurance America, Inc. (XL) and North American Elite Insurance Company (North American Elite) seeking recovery from an insurance policy for damages resulting from a hail storm and certain installation practices by the construction contractor, McCarthy Building Companies, Inc. (McCarthy). On May 19, 2017, Roserock filed a separate lawsuit against McCarthy in the state district court in Travis County, Texas alleging breach of contract and breach of warranty for the damages sustained at the Roserock facility, which has since been moved to the U.S. District Court for the Western District of Texas. On May 22, 2017, McCarthy filed a counter lawsuit against Roserock, Array Technologies, Inc., Canadian Solar (USA), Inc., XL, and North American Elite in the U.S. District Court for the Western District of Texas alleging, among other things, breach of contract, and requesting foreclosure of mechanic's liens against Roserock. On July 18, 2017, the U.S. District Court for the Western District of Texas consolidated the two pending lawsuits. On December 11, 2017, the U.S. District Court for the Western District of Texas dismissed McCarthy's claims against Canadian Solar (USA), Inc. and dismissed cross-claims that XL and North American Elite had sought to bring against Roserock. The Company intends to vigorously pursue and defend these matters, the ultimate outcome of which cannot be determined at this time.

## ACCOUNTING POLICIES

### Application of Critical Accounting Policies and Estimates

The Company prepares its consolidated financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has reviewed and discussed the following critical accounting policies and estimates with the Audit Committee of Southern Company's Board of Directors.

***Revenue Recognition***

The Company's revenue recognition depends on appropriate classification and documentation of transactions in accordance with GAAP. In general, the Company's power sale transactions, which include PPAs, can be classified in one of four categories: leases, non-derivatives or normal sale derivatives, derivatives designated as cash flow hedges, and derivatives not designated as hedges. For more information on derivative transactions, see FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" herein and Notes 1 and 9 to the financial statements. The Company's revenues are dependent upon significant judgments used to determine the appropriate transaction classification, which must be documented upon the inception of each contract.

*Lease Transactions*

The Company considers the following factors to determine whether the sales contract is a lease:

- Assessing whether specific property is explicitly or implicitly identified in the agreement;
- Determining whether the fulfillment of the arrangement is dependent on the use of the identified property; and
- Assessing whether the arrangement conveys to the purchaser the right to use the identified property.

If the contract meets the above criteria for a lease, the Company performs further analysis as to whether the lease is classified as operating, financing, or sales-type. All of the Company's power sales contracts that are determined to be leases are accounted for as operating leases and the capacity revenue is recognized on a straight-line basis over the term of the contract and is included in the Company's operating revenues. Energy revenues and other contingent revenues are recognized in the period the energy is delivered or the service is rendered.

*Non-Derivative and Normal Sale Derivative Transactions*

If the power sales contract is not classified as a lease, the Company further considers the following factors to determine proper classification:

- Assessing whether the contract meets the definition of a derivative;
- Assessing whether the contract meets the definition of a capacity contract;
- Assessing the probability at inception and throughout the term of the individual contract that the contract will result in physical delivery; and
- Ensuring that the contract quantities do not exceed available generating capacity (including purchased capacity).

Contracts that do not meet the definition of a derivative or are designated as normal sales (i.e. capacity contracts which provide for the sale of electricity that involve physical delivery in quantities within the Company's available generating capacity) are accounted for as executory contracts. The related capacity revenue, if any, is recognized on an accrual basis in amounts equal to the lesser of the cumulative levelized amount or the cumulative amount billable under the contract over the respective contract periods. Revenues related to energy and ancillary services are recognized in the period the energy is delivered or the service is rendered.

*Cash Flow Hedge Transactions*

The Company further considers the following in designating other derivative contracts for the sale of electricity as cash flow hedges of anticipated sale transactions:

- Identifying the hedging instrument, the forecasted hedged transaction, and the nature of the risk being hedged; and
- Assessing hedge effectiveness at inception and throughout the contract term.

These contracts are accounted for on a fair value basis and are recorded in AOCI over the life of the contract. Realized gains and losses are then recognized in operating revenues as incurred.

*Mark-to-Market Transactions*

Contracts for sales of electricity, which meet the definition of a derivative and that either do not qualify or are not designated as normal sales or as cash flow hedges, are accounted for on a fair value basis and are recorded in operating revenues.

***Impairment of Long-Lived Assets and Intangibles***

The Company's investments in long-lived assets are primarily generation assets, whether in service or under construction. The Company's intangible assets arise from certain acquisitions and consist of acquired PPAs, which are amortized to revenue over the term of the respective PPAs. The Company evaluates the carrying value of these assets whenever indicators of potential impairment exist. Examples of impairment indicators could include significant changes in construction schedules, current period losses combined with a history of losses or a projection of continuing losses, a significant decrease in market prices, and the inability to remarket generating capacity for an extended period. If an indicator exists, the asset is tested for recoverability by comparing the asset carrying value to the sum of the undiscounted expected future cash flows directly attributable to the asset. If the estimate of undiscounted future cash flows is less than the carrying value of the asset, the fair value of the asset is determined and a loss is recorded. A high degree of judgment is required in developing estimates related to these evaluations, which are based on projections of various factors, including the following:

- Future demand for electricity based on projections of economic growth and estimates of available generating capacity;
- Future power and natural gas prices, which have been quite volatile in recent years; and
- Future operating costs.

***Acquisition Accounting***

The Company may acquire generation assets as part of its overall growth strategy. At the time of an acquisition, the Company will assess if these assets and activities meet the definition of a business. For acquisitions that meet the definition of a business, the Company includes operating results from the date of acquisition in its consolidated financial statements. The purchase price, including any contingent consideration, is allocated based on the fair value of the identifiable assets acquired and liabilities assumed (including any intangible assets). Assets acquired that do not meet the definition of a business are accounted for as an asset acquisition.

The purchase price of each asset acquisition is allocated based on the relative fair value of assets acquired. Determining the fair value of assets acquired and liabilities assumed requires management judgment and the Company may engage independent valuation experts to assist in this process. Fair values are determined by using market participant assumptions, and typically include the timing and amounts of future cash flows, incurred construction costs, the nature of acquired contracts, discount rates, power market prices, and expected asset lives. Any due diligence or transition costs incurred by the Company for potential or successful acquisitions are expensed as incurred.

Contingent consideration primarily relates to fixed amounts due to the seller once the facility is placed in service. For contingent consideration with variable payments, the Company fair values the arrangement with any changes recorded in the consolidated statements of income. See Note 8 to the financial statements for additional fair value information.

***Accounting for Income Taxes***

The consolidated income tax provision and deferred income tax assets and liabilities, as well as any unrecognized tax benefits and valuation allowances, require significant judgment and estimates. These estimates are supported by historical tax return data, reasonable projections of taxable income, and interpretations of applicable tax laws and regulations across multiple taxing jurisdictions. The effective tax rate reflects the statutory tax rates and calculated apportionments for the various states in which the Company operates.

On behalf of the Company, Southern Company files a consolidated federal income tax return and various state income tax returns, some of which are combined or unitary. Under a joint consolidated income tax allocation agreement, each Southern Company subsidiary's current and deferred tax expense is computed on a stand-alone basis and no subsidiary is allocated more current expense than would be paid if it filed a separate income tax return. Certain deductions and credits can be limited at the consolidated or combined level resulting in NOL and tax credit carryforwards that would not otherwise result on a stand-alone basis. Utilization of NOL and tax credit carryforwards and the assessment of valuation allowances are based on significant judgment and extensive analysis of the Company's, as well as Southern Company's, current financial position and result of operations, including currently available information about future years, to estimate when future taxable income will be realized.

Current and deferred state income tax liabilities and assets are estimated based on laws of multiple states that determine the income to be apportioned to their jurisdictions. States utilize various formulas to calculate the apportionment of taxable income, primarily using sales, assets, or payroll within the jurisdiction compared to the consolidated totals. In addition, each state varies as to whether a stand-alone, combined, or unitary filing methodology is required. The calculation of deferred state taxes considers apportionment factors and filing methodologies that are expected to apply in future years. The apportionments and methodologies which are ultimately finalized in a manner inconsistent with expectations could have a material effect on the Company's financial statements.

Given the significant judgment involved in estimating NOL and tax credit carryforwards and multi-state apportionments for all subsidiaries, the Company considers state deferred income tax liabilities and assets to be critical accounting estimates.

***Federal Tax Reform Legislation***

Following the enactment of the Tax Reform Legislation, the SEC staff issued Staff Accounting Bulletin 118 – "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides for a measurement period of up to one year from the enactment date to complete accounting under GAAP for the tax effects of the legislation. Due to the complex and comprehensive nature of the enacted tax law changes, and their application under GAAP, the Company considers all amounts recorded in the financial statements as a result of the Tax Reform Legislation to be "provisional" as discussed in SAB 118 and subject to revision. The Company is awaiting additional guidance from industry and income tax authorities in order to finalize its accounting. The ultimate impact of the Tax Reform Legislation on deferred income tax assets and liabilities cannot be determined at this time. See FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Federal Tax Reform Legislation" herein and Note and 5 to the financial statements under "Current and Deferred Income Taxes" for additional information.

**Recently Issued Accounting Standards**

***Revenue***

In 2014, the FASB issued ASC 606, *Revenue from Contracts with Customers* (ASC 606), replacing the existing accounting standard and industry specific guidance for revenue recognition with a five-step model for recognizing and measuring revenue from contracts with customers. The underlying principle of the new standard is to recognize revenue to depict the transfer of goods or services to customers at the amount expected to be collected. The new standard also requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers.

The Company has completed the evaluation of all revenue streams and determined that the adoption of ASC 606 will not change the current timing or amounts of revenue recognized in the Company's financial statements. Some contractual arrangements, such as certain capacity and energy payments, are excluded from the scope of ASC 606 and included in the scope of the current leasing guidance or the current derivative guidance.

The new standard is effective for reporting periods beginning after December 15, 2017. The Company applied the modified retrospective method of adoption effective January 1, 2018. The Company also utilized practical expedients which allowed it to apply the standard to open contracts at the date of adoption and to reflect the aggregate effect of all modifications when identifying performance obligations and allocating the transaction price for contracts modified before the effective date. The adoption of ASC 606 did not result in a cumulative adjustment.

***Leases***

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (ASU 2016-02). ASU 2016-02 requires lessees to recognize on the balance sheet a lease liability and a right-of-use asset for all leases. ASU 2016-02 also changes the recognition, measurement, and presentation of expense associated with leases and provides clarification regarding the identification of certain components of contracts that would represent a lease. The accounting required by lessors is relatively unchanged . ASU 2016-02 is effective for fiscal years beginning after December 15, 2018 and the Company will adopt the new standard effective January 1, 2019.

The Company is currently implementing an information technology system along with the related changes to internal controls and accounting policies that will support the accounting for leases under ASU 2016-02. In addition, the Company has substantially completed a detailed inventory and analysis of its leases where the majority relate to land leases for its renewable generation facilities. While the Company has not yet determined the ultimate impact, adoption of ASU 2016-02 is expected to have a significant impact on the Company's balance sheet for lessee arrangements.

***Other***

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18). ASU 2016-18 eliminates the need to reflect transfers between cash and restricted cash in operating, investing, and financing activities in the statement of cash flows. Upon adoption, the net change in cash and cash equivalents during the period will include amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for fiscal years beginning after December 15, 2017, and will be applied retrospectively to each period presented. The Company adopted ASU 2016-18 effective January 1, 2018 with no material impact on its financial statements.

On March 10, 2017, the FASB issued ASU No. 2017-07, *Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* (ASU 2017-07). ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs and requires the other components of net periodic pension and postretirement benefit costs to be separately presented in other income (expense) in the income statement. Additionally, only the service cost component related to construction labor is eligible for capitalization, when applicable. The Company adopted ASU 2017-07 which is effective for periods beginning after December 15, 2017; however, since the Company only became a sponsor of a qualified pension plan and postretirement benefit plan in December 2017, no retrospective presentation of net periodic benefits costs for 2016 or 2017 is required. See Note 2 to the financial statements for additional information.

On August 28, 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12), amending the hedge accounting recognition and presentation requirements. ASU 2017-12 makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the related presentation and disclosure requirements, and simplifies hedge effectiveness assessment requirements. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company adopted ASU 2017-12 effective January 1, 2018 with no material impact on its financial statements.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

The Company's financial condition remained stable at December 31, 2017 . The Company's cash requirements primarily consist of funding ongoing business operations, common stock dividends, distributions to noncontrolling interests, capital expenditures, and debt maturities. Capital expenditures and other investing activities may include investments in acquisitions or new construction associated with the Company's overall growth strategy and to maintain the existing generation fleet's performance. Operating cash flows, which may include the utilization of tax credits, will only provide a portion of the Company's cash needs. For the three-year period from 2018 through 2020, the Company's projected dividends, capital expenditures, and debt maturities are expected to exceed operating cash flows. The Company plans to finance future cash needs in excess of its operating cash flows primarily through debt issuances, borrowings from financial institutions, and equity contributions from Southern Company. The Company intends to continue to monitor its access to short-term and long-term capital markets as well as bank credit agreements as needed to meet its future capital and liquidity needs. See "Sources of Capital" herein for additional information on lines of credit.

The Company also anticipates utilizing third-party tax equity partnerships as one of the financing sources to fund its renewable growth strategy where the tax partner will take significantly all of the federal tax benefits. These tax equity partnerships are expected to be consolidated in the Company's financial statements using a HLBV methodology to allocate partnership gains and losses to the Company. The Company recently secured third-party tax equity funding for the Cactus Flats project subject to achieving commercial operation and various other customary conditions to closing as well as for the Gaskell West 1 project. The ultimate outcome of these matters cannot be determined at this time.

In addition, the Company is pursuing the sale of a 33% equity interest in a newly-formed holding company that owns substantially all of the Company's solar assets, which, if successful, is expected to close in the middle of 2018. Proceeds from the sale may be used for debt redemptions, common stock dividends, working capital, and general corporate purposes as well to support the Company's continuing growth strategy.

Net cash provided from operating activities totaled $1.2 billion in 2017 , an increase of $816 million compared to 2016 . The increase in net cash provided from operating activities was primarily due to income tax refunds received and an increase in energy sales from new solar and wind facilities, partially offset by an increase in interest paid. As of December 31, 2017 , the Company had $2.0 billion of unutilized ITCs and PTCs which are not expected to be fully utilized until 2027. See FUTURE EARNINGS POTENTIAL – "Income Tax Matters – Tax Credits" herein for additional information. Net cash provided from operating activities totaled $339 million in 2016 , a decrease of $664 million compared to 2015 primarily due to an increase in unutilized ITCs and PTCs.

Net cash used for investing activities totaled $1.6 billion , $4.8 billion , and $2.5 billion in 2017 , 2016 , and 2015 , respectively, and was primarily due to acquisitions and the construction of renewable and natural gas facilities. See FUTURE EARNINGS POTENTIAL – "Acquisitions" and "Construction Projects" herein for additional information.

Net cash used for financing activities totaled $502 million in 2017 primarily due to payments of common stock dividends and distributions to noncontrolling interests. Net cash provided from financing activities totaled $4.7 billion in 2016 primarily due to the issuance of additional senior notes and capital contributions from Southern Company and noncontrolling interests. Net cash provided from financing activities totaled $2.3 billion in 2015 primarily due to the issuance of additional senior notes and a 13-month term loan.

Significant balance sheet changes include a $1.0 billion increase in plant in service primarily due to new solar and wind facilities being acquired or placed in service, a $284 million increase in deferred income taxes primarily due to additional unutilized PTCs, and a $113 million increase in CWIP primarily due to the construction of a new wind facility and the Mankato natural gas expansion project. In addition, ITC benefits that are deferred and amortized over the asset lives increased $45 million as a result of additional ITCs from new solar facilities being placed in service, offset by ongoing ITC amortization. Other significant changes include a $970 million decrease in cash and cash equivalents and a $456 million decrease in acquisitions payable.

**Sources of Capital**

The Company plans to obtain the funds required for acquisitions, construction, development, debt maturities, and other purposes from operating cash flows, external securities issuances, borrowings from financial institutions, tax equity partnership contributions, and equity contributions from Southern Company. The Company also plans to utilize funds resulting from any potential sale of a 33% equity interest in substantially all of its solar asset portfolio, if completed. However, the amount, type, and timing of any future financings, if needed, will depend upon prevailing market conditions, regulatory approval, and other factors. With respect to the public offering of securities, the Company (excluding its subsidiaries) issues and offers debt registered on registration statements filed with the SEC under the Securities Act of 1933, as amended.

At December 31, 2017, the Company's current liabilities exceeded current assets by $474 million due to long-term debt maturing in the next 12 months, the use of short-term debt as a funding source, and fluctuations in cash needs, due to both seasonality and the stage of acquisitions and construction projects. The Company believes the need for working capital can be adequately met by utilizing the commercial paper program, the Facility (as defined below), borrowings from financial institutions, the debt capital markets, the commercial paper program, and operating cash flows.

The Company obtains financing separately without credit support from any affiliate. To meet liquidity and capital resource requirements, the Company had cash and cash equivalents of approximately $129 million at December 31, 2017 .

The Company's commercial paper program is used to finance acquisition and construction costs related to electric generating facilities and for general corporate purposes, including maturing debt. The Company's subsidiaries are not issuers under the commercial paper program.

Details of commercial paper were as follows:

| | Commercial Paper at the End of the Period | | Commercial Paper During the Period (*) | | |
|---|---|---|---|---|---|
| | Amount Outstanding | Weighted Average Interest Rate | Average Amount Outstanding | Weighted Average Interest Rate | Maximum Amount Outstanding |
| | *(in millions)* | | *(in millions)* | | *(in millions)* |
| **December 31, 2017** | **$ 105** | **2.0%** | **$ 232** | **1.4%** | **$ 628** |
| December 31, 2016 | $ — | N/A | $ 56 | 0.8% | $ 310 |
| December 31, 2015 | $ — | N/A | $ 166 | 0.5% | $ 385 |

(*) Average and maximum amounts are based upon daily balances during the twelve-month periods ended December 31, 2017 , 2016 , and 2015 .

### *Company Credit Facilities*

At December 31, 2017 , the Company had a committed credit facility (Facility) of $ 750 million expiring in 2022, of which $ 22 million has been used for letters of credit and $ 728 million remains unused. In May 2017, the Company amended the Facility, which, among other things, extended the maturity date from 2020 to 2022 and increased the Company's borrowing ability under this Facility to $750 million from $600 million . The Company's subsidiaries are not borrowers under the Facility. Proceeds from the Facility may be used for working capital and general corporate purposes as well as liquidity support for the Company's commercial paper program. Subject to applicable market conditions, the Company expects to renew or replace the Facility, as needed, prior to expiration. In connection therewith, the Company may extend the maturity date and/or increase or decrease the lending commitment thereunder. See Note 6 to the financial statements under "Bank Credit Arrangements" for additional information.

The Facility, as well as the Company's term loan agreements, contains a covenant that limits the ratio of debt to capitalization (as defined in the Facility) to a maximum of 65% and contains a cross-default provision that is restricted only to indebtedness of the Company. For purposes of this definition, debt excludes any project debt incurred by certain subsidiaries of the Company to the extent such debt is non-recourse to the Company, and capitalization excludes the capital stock or other equity attributable to such subsidiary. The Company is currently in compliance with all covenants in the Facility.

The Company also has a $120 million continuing letter of credit facility expiring in 2019 for standby letters of credit. At December 31, 2017, $101 million has been used for letters of credit, primarily as credit support for PPA requirements, and $19 million remains unused. The Company's subsidiaries are not parties to this letter of credit facility.

In addition, at both December 31, 2017 and 2016, the Company had $113 million of cash collateral posted related to PPA requirements.

### *Subsidiary Project Credit Facilities*

In connection with the construction of solar facilities by RE Tranquillity LLC, RE Garland Holdings LLC, and RE Roserock LLC, indirect subsidiaries of the Company, each subsidiary had entered into separate credit agreements (Project Credit Facilities), which were non-recourse to the Company (other than the subsidiary party to the agreement). Each Project Credit Facility provided (a) a senior secured construction loan credit facility, (b) a senior secured bridge loan facility, and (c) a senior secured letter of credit facility that was secured by the membership interests of the respective project company, with proceeds directed to finance project costs related to the respective solar facilities. Each Project Credit Facility was secured by the assets of the applicable project subsidiary and membership interests of the applicable project subsidiary. The Tranquillity, Garland, and Roserock Project Credit Facilities were fully repaid on October 14, 2016, December 29, 2016, and January 31, 2017, respectively.

Furthermore, in connection with the acquisition of the Henrietta solar facility on July 1, 2016, a subsidiary of the Company assumed a $217 million construction loan, which was fully repaid in September 2016.

## Financing Activities

### *Senior Notes*

In November 2017, the Company issued $525 million aggregate principal amount of Series 2017A Floating Rate Senior Notes due December 20, 2020, which bear interest based on three-month LIBOR. The net proceeds were used to redeem all of the $500 million aggregate principal amount of Series 2015D 1.85% Senior Notes due December 1, 2017 and to repay a portion of the Company's outstanding short-term debt.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, the Company plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

***Other Debt***

In September 2017, the Company amended its $60 million aggregate principal amount floating rate term loan to, among other things, increase the aggregate principal amount to $100 million and extend the maturity date from September 2017 to October 2018. The additional $40 million of proceeds were used to repay existing indebtedness and for other general corporate purposes. At December 31, 2017 , this outstanding term loan was included in securities due within one year.

In addition, during 2017 , the Company issued a total of $21 million in letters of credit under the Company's credit facilities.

### Credit Rating Risk

The Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change to BBB and/or Baa2 or below. These contracts are for physical electricity purchases and sales, fuel transportation and storage, energy price risk management, and transmission.

The maximum potential collateral requirements under these contracts at December 31, 2017 were as follows:

| Credit Ratings | Maximum Potential Collateral Requirements |
|---|---|
| | *(in millions)* |
| At BBB and/or Baa2 | $ 39 |
| At BBB- and/or Baa3 | $ 415 |
| At BB+ and/or Ba1 (*) | $ 1,118 |

(*) Any additional credit rating downgrades at or below BB- and/or Ba3 could increase collateral requirements up to an additional $38 million .

Included in these amounts are certain agreements that could require collateral in the event that Alabama Power or Georgia Power has a credit rating change to below investment grade. Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of the Company to access capital markets and would be likely to impact the cost at which it does so.

In addition, the Company has a PPA that could require collateral, but not accelerated payment, in the event of a downgrade of the Company's credit. The PPA requires credit assurances without stating a specific credit rating. The amount of collateral required would depend upon actual losses resulting from a credit downgrade.

On March 24, 2017, S&P revised its consolidated credit rating outlook for Southern Company and its subsidiaries (including the Company) from stable to negative.

While it is unclear how the credit rating agencies may respond to the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including the Company, may be negatively impacted. Absent actions by the Company to mitigate the resulting impacts, which, among other alternatives, could include adjusting the Company's capital structure, the Company's credit ratings could be negatively affected.

### Market Price Risk

The Company is exposed to market risks, primarily commodity price risk, interest rate risk, and occasionally foreign currency exchange rate risk. To manage the volatility attributable to these exposures, the Company nets its exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and risk management practices. The Company's policy is that derivatives are to be used primarily for hedging purposes and mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis. Derivative instruments are recognized at fair value in the consolidated balance sheets as either assets or liabilities and are presented on a gross basis. In the statements of cash flows, the cash impacts of settled energy-related and interest rate derivatives are recorded as operating activities.

At December 31, 2017 , the Company had $945 million of long-term variable rate notes outstanding. If the Company sustained a 100 basis point change in interest rates for its variable interest rate exposure, the change would effect annualized interest expense by approximately $9 million at December 31, 2017. Since a significant portion of outstanding indebtedness bears interest at fixed rates, the Company is not aware of any facts or circumstances that would significantly affect exposure on existing indebtedness in the near term. However, the impact on future financing costs cannot be determined at this time.

The Company had foreign currency denominated debt of €1.1 billion at December 31, 2017. The Company has mitigated its exposure to foreign currency exchange rate risk through the use of foreign currency swaps converting all interest and principal payments to fixed-rate U.S. dollars.

Because energy from the Company's facilities is primarily sold under long-term PPAs with tolling agreements and provisions shifting substantially all of the responsibility for fuel cost to the counterparties, the Company's exposure to market volatility in commodity fuel prices and prices of electricity is generally limited. However, the Company has been and may continue to be exposed to market volatility in energy-related commodity prices as a result of uncontracted generating capacity.

For the years ended December 31, 2017 and 2016, the changes in fair value of energy-related derivative contracts associated with both power and natural gas positions were as follows:

| | **2017** | 2016 |
|---|---|---|
| | *(in millions)* | |
| Contracts outstanding at the beginning of period, assets (liabilities), net | **$ 16** | $ 1 |
| Contracts realized or settled | **(17)** | (3) |
| Current period changes (*) | **(9)** | 18 |
| Contracts outstanding at the end of period, assets (liabilities), net | **$ (10)** | $ 16 |

(*) Current period changes also include changes in the fair value of new contracts entered into during the period, if any.

For the years ending December 31, 2017 and 2016, the changes in contracts outstanding were attributable to both the volume and the prices of power and natural gas as follows:

| | **2017** | 2016 |
|---|---|---|
| **Power – net sold** | | |
| MWH (in millions) | **3.0** | 6.1 |
| Weighted average contract cost per MWH above (below) market prices (in dollars) | **$ (2.67)** | $ 1.45 |
| **Natural Gas – net purchased** | | |
| Commodity - mmBtu (in millions) | **14.4** | 27.1 |
| Commodity - weighted average contract cost per mmBtu above (below) market prices (in dollars) | **$ 0.12** | $ (0.27) |

Gains and losses on energy-related derivatives designated as cash flow hedges which are used by the Company to hedge anticipated purchases and sales are initially deferred in OCI before being recognized in income in the same period as the hedged transactions are reflected in earnings. Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the consolidated statements of income as incurred.

The Company uses over-the-counter contracts that are not exchange traded but are fair valued using prices which are market observable, and thus fall into Level 2 of the fair value hierarchy. See Note 8 to the financial statements for further discussion of fair value measurements. The energy-related derivative contracts outstanding at December 31, 2017 all mature in 2018.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company only enters into agreements and material transactions with counterparties that have investment grade credit ratings by S&P and Moody's or with counterparties who have posted collateral to cover potential credit exposure. The Company has also established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk. Therefore, the Company does not anticipate a material adverse effect on the financial statements as a result of counterparty nonperformance. See Note 1 to the financial statements under "Financial Instruments" and Note 9 to the financial statements for additional information.

### Capital Requirements and Contractual Obligations

The capital program of the Company is subject to periodic review and revision and is currently estimated to total $7.2 billion over the next five years through 2022. This includes approximately $0.9 billion in committed construction, capital improvements, and work to be performed under LTSAs, totaling approximately $400 million for 2018 and an average of approximately $137 million each year from 2019 through 2022. In addition, the capital program includes a further $6.3 billion in planned expenditures for plant acquisitions and placeholder growth, which averages approximately $1.3 billion per year. Planned expenditures for plant acquisitions and placeholder growth may vary materially due to market opportunities and the Company's ability to execute its growth strategy. Actual construction costs may vary from these estimates because of numerous factors such as: changes in business conditions; changes in the expected environmental compliance program; changes in environmental laws and regulations; the outcome of any legal challenges to the environmental rules; changes in FERC rules and regulations; changes in load projections; changes in legislation; the cost and efficiency of construction labor, equipment, and materials; project scope and design changes; and the cost of capital. See Note 11 to the financial statements for additional information.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt, as well as the related interest, leases, derivative obligations, other purchase commitments, and pension and other postretirement benefit plans are detailed in the contractual obligations table that follows. See Notes 1, 2, 5, 6, 7, and 9 to the financial statements for additional information.

**Contractual Obligations**

Contractual obligations at December 31, 2017 were as follows:

| | 2018 | 2019-2020 | 2021-2022 | After 2022 | Total |
|---|---|---|---|---|---|
| | | | *(in millions)* | | |
| Long-term debt [(a)] — | | | | | |
| Principal | $ 770 | $ 1,425 | $ 977 | $ 2,630 | $ 5,802 |
| Interest | 189 | 334 | 278 | 1,524 | 2,325 |
| Financial derivative obligations [(b)] | 13 | — | — | — | 13 |
| Operating leases [(c)] | 22 | 45 | 45 | 815 | 927 |
| Purchase commitments — | | | | | |
| Capital [(d)] | 1,099 | 3,661 | 1,750 | — | 6,510 |
| Fuel [(e)] | 453 | 555 | 327 | 56 | 1,391 |
| Purchased power [(f)] | 40 | 82 | 42 | — | 164 |
| Other [(g)] | 149 | 315 | 216 | 1,770 | 2,450 |
| Pension and other postretirement benefit plans [(h)] | — | 1 | — | — | 1 |
| Total | $ 2,735 | $ 6,418 | $ 3,635 | $ 6,795 | $ 19,583 |

(a) All amounts are reflected based on final maturity dates and include the effects of interest rate derivatives employed to manage interest rate risk and effects of foreign currency swaps employed to manage foreign currency exchange rate risk. Included in debt principal is a $77 million gain related to the foreign currency hedge of €1.1 billion. The Company plans to continue, when economically feasible, to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.
(b) For additional information, see Notes 1 and 9 to the financial statements.
(c) Operating lease commitments include certain land leases for solar and wind facilities that are subject to annual price escalation based on indices. See Note 7 to the financial statements under "Commitments" for additional information.
(d) The Company provides estimated capital expenditures for a five-year period, including capital expenditures associated with environmental regulations. Included in these amounts are planned expenditures for plant acquisitions and placeholder growth, which averages approximately $1.3 billion per year, and may vary materially each year due to market opportunities and the Company's ability to execute its growth strategy. Amounts represent current estimates of total expenditures, excluding capital expenditures covered under LTSAs which are reflected in "Other." See Note (g) below. At December 31, 2017, significant purchase commitments were outstanding in connection with the construction program.
(e) Primarily includes commitments to purchase, transport, and store natural gas. Amounts reflected are based on contracted cost and may contain provisions for price escalation. Amounts reflected for natural gas purchase commitments are based on various indices at the time of delivery and have been estimated based on the New York Mercantile Exchange future prices at December 31, 2017 .
(f) Purchased power commitments will be resold under a third party agreement at cost.
(g) Includes commitments related to LTSAs, operation and maintenance agreements, and transmission. LTSAs include price escalation based on inflation indices. Transmission commitments are based on the Southern Company system's current tariff rate for point-to-point transmission.
(h) The Company forecasts contributions to the pension and other postretirement benefit plans over a three-year period. The Company anticipates no mandatory contributions to the qualified pension plan during the next three years. Amounts presented represent estimated benefit payments for the nonqualified pension plans, estimated non-trust benefit payments for the other postretirement benefit plans, and estimated contributions to the other postretirement benefit plan trusts, all of which will be made from the Company's corporate assets. See Note 2 to the financial statements for additional information related to the pension and other postretirement benefit plans, including estimated benefit payments. Certain benefit payments will be made through the related benefit plans. Other benefit payments will be made from the Company's corporate assets.

**Cautionary Statement Regarding Forward-Looking Statements**

The Company's 2017 Annual Report contains forward-looking statements. Forward-looking statements include, among other things, statements concerning the strategic goals for the Company's business, economic conditions, fuel and environmental cost recovery , current and proposed environmental regulations and related compliance plans and estimated expenditures, pending or potential litigation matters, access to sources of capital, financing activities, estimated sales and purchases under power sale and purchase agreements, timing of expected future capacity need in existing markets, completion dates of construction projects, projections for the qualified pension plan and postretirement benefit plans contributions, filings with federal regulatory authorities, impacts of the Tax Reform Legislation, federal and state income tax benefits, and estimated construction and other plans and expenditures. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other similar terminology. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory changes, including environmental laws and regulations governing air, water, land, and protection of other natural resources , and also changes in tax and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- the uncertainty surrounding the recently enacted Tax Reform Legislation, including implementing regulations and IRS interpretations, actions that may be taken in response by regulatory authorities, and its impact, if any, on the credit ratings of the Company;
- current and future litigation or regulatory investigations, proceedings, or inquiries ;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- variations in demand for electricity, including those relating to weather, the general economy, population and business growth (and declines), the effects of energy conservation and efficiency measures, including from the development and deployment of alternative energy sources such as self-generation and distributed generation technologies, and any potential economic impacts resulting from federal fiscal decisions;
- available sources and costs of fuels;
- transmission constraints;
- effects of inflation;
- the ability to control costs and avoid cost overruns during the development and construction of generating facilities, to construct facilities in accordance with the requirements of permits and licenses , and to satisfy any environmental performance standards , including the requirements of tax credits and other incentives ;
- investment performance of the Company's employee and retiree benefit plans ;
- advances in technology;
- ongoing renewable energy partnerships and development agreements;
- state and federal rate regulations ;
- the ability to successfully operate generating facilities and the successful performance of necessary corporate functions;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, including the potential sale of a 33% equity interest in substantially all of the Company's solar assets, which cannot be assured to be completed or beneficial to the Company;
- the ability of counterparties of the Company to make payments as and when due and to perform as required;
- the ability to obtain new short- and long-term contracts with wholesale customers;
- the direct or indirect effect on the Company's business resulting from cyber intrusion or physical attack and the threat of physical attacks;
- interest rate fluctuations and financial market conditions and the results of financing efforts;
- changes in the Company's credit ratings, including impacts on interest rates, access to capital markets, and collateral requirements;
- the impacts of any sovereign financial issues, including impacts on interest rates, access to capital markets, impacts on foreign currency exchange rates, counterparty performance, and the economy in general ;

- the ability of the Company to obtain additional generating capacity (or sell excess generating capacity) at competitive prices;
- catastrophic events such as fires, earthquakes, explosions, floods, tornadoes, hurricanes and other storms, droughts, pandemic health events such as influenzas, or other similar occurrences;
- the direct or indirect effects on the Company's business resulting from incidents affecting the U.S. electric grid or operation of generating resources;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports filed by the Company from time to time with the SEC.

**The Company expressly disclaims any obligation to update any forward-looking statements.**

(a) Excludes redeemable noncontrolling interests. See Note 10 to the financial statements under "Noncontrolling Interests" for additional information.
(b) In connection with the Company becoming a participant to the Southern Company qualified pension plan and other postretirement benefit plan, $27 million of other comprehensive income, net of tax of $9 million, was transferred from SCS.

The accompanying notes are an integral part of these consolidated financial statements.

**NOTES TO FINANCIAL STATEMENTS**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

## Index to the Notes to Financial Statements

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

Southern Power Company is a wholly-owned subsidiary of Southern Company, which is also the parent company of four traditional electric operating companies, Southern Company Gas (as of July 1, 2016), SCS, and other direct and indirect subsidiaries. The traditional electric operating companies – Alabama Power, Georgia Power, Gulf Power, and Mississippi Power – are vertically integrated utilities providing electric service in four Southeastern states. Southern Power Company and its subsidiaries (the Company) develop, construct, acquire, own, and manage power generation assets, including renewable energy projects, and sell electricity at market-based rates in the wholesale market. Southern Company Gas distributes natural gas through utilities in seven states and is involved in several other complementary businesses including gas marketing services, wholesale gas services, and gas midstream operations. SCS, the system service company, provides, at cost, specialized services to Southern Company and its subsidiary companies.

Effective in December 2017, 538 employees transferred from SCS to the Company. The Company became obligated for related employee costs including pension, other postretirement benefits, and stock-based compensation and has recognized the respective balance sheet assets and liabilities, including AOCI impacts, in its balance sheet at December 31, 2017. Prior to the transfer of employees, the Company's agreements with SCS provided for employee services rendered at amounts in compliance with FERC regulations. The Company adopted the same compensation and benefits plans that SCS has and, therefore, future expenses are not expected to be materially different on a per employee basis.

The preparation of consolidated financial statements in conformity with GAAP requires the use of estimates, and the actual results may differ from those estimates. Certain prior years' data presented in the consolidated financial statements have been reclassified to conform to the current year presentation.

The consolidated financial statements include the accounts of Southern Power Company and its wholly-owned and majority-owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation.

### Recently Issued Accounting Standards

#### *Revenue*

In 2014, the FASB issued ASC 606, *Revenue from Contracts with Customers* (ASC 606), replacing the existing accounting standard and industry specific guidance for revenue recognition with a five-step model for recognizing and measuring revenue from contracts with customers. The underlying principle of the new standard is to recognize revenue to depict the transfer of goods or services to customers at the amount expected to be collected. The new standard also requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers.

The Company has completed the evaluation of all revenue streams and determined that the adoption of ASC 606 will not change the current timing or amounts of revenue recognized in the Company's financial statements. Some contractual arrangements, such as certain capacity and energy payments, are excluded from the scope of ASC 606 and included in the scope of the current leasing guidance or the current derivative guidance.

The new standard is effective for reporting periods beginning after December 15, 2017. The Company applied the modified retrospective method of adoption effective January 1, 2018. The Company also utilized practical expedients which allowed it to apply the standard to open contracts at the date of adoption and to reflect the aggregate effect of all modifications when identifying performance obligations and allocating the transaction price for contracts modified before the effective date. The adoption of ASC 606 did not result in a cumulative adjustment.

#### *Leases*

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (ASU 2016-02). ASU 2016-02 requires lessees to recognize on the balance sheet a lease liability and a right-of-use asset for all leases. ASU 2016-02 also changes the recognition, measurement, and presentation of expense associated with leases and provides clarification regarding the identification of certain components of contracts that would represent a lease. The accounting required by lessors is relatively unchanged . ASU 2016-02 is effective for fiscal years beginning after December 15, 2018 and the Company will adopt the new standard effective January 1, 2019.

The Company is currently implementing an information technology system along with the related changes to internal controls and accounting policies that will support the accounting for leases under ASU 2016-02. In addition, the Company has substantially completed a detailed inventory and analysis of its leases where the majority relate to land leases for its renewable generation facilities. While the Company has not yet determined the ultimate impact, adoption of ASU 2016-02 is expected to have a significant impact on the Company's balance sheet for lessee arrangements.

***Other***

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18). ASU 2016-18 eliminates the need to reflect transfers between cash and restricted cash in operating, investing, and financing activities in the statement of cash flows. Upon adoption, the net change in cash and cash equivalents during the period will include amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for fiscal years beginning after December 15, 2017, and will be applied retrospectively to each period presented. The Company adopted ASU 2016-18 effective January 1, 2018 with no material impact on its financial statements.

On March 10, 2017, the FASB issued ASU No. 2017-07, *Compensation - Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* (ASU 2017-07). ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs and requires the other components of net periodic pension and postretirement benefit costs to be separately presented in other income (expense) in the income statement. Additionally, only the service cost component related to construction labor is eligible for capitalization, when applicable. The Company adopted ASU 2017-07 which is effective for periods beginning after December 15, 2017; however, since the Company became a sponsor of a qualified pension plan and postretirement benefit plan in December 2017, no retrospective presentation of net periodic benefits costs for 2016 or 2017 is required. See Note 2 for additional information.

On August 28, 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12), amending the hedge accounting recognition and presentation requirements. ASU 2017-12 makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the related presentation and disclosure requirements, and simplifies hedge effectiveness assessment requirements. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company adopted ASU 2017-12 effective January 1, 2018 with no material impact on its financial statements.

**Affiliate Transactions**

Total revenues from all PPAs with affiliates, included in wholesale revenue affiliates on the consolidated statements of income, were $233 million , $258 million , and $219 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively. Included within these revenues were affiliate PPAs accounted for as operating leases, which totaled $81 million for the year ended December 31, 2017 and $109 million for each of the years ended December 31, 2016 and 2015 .

The Company has an agreement with SCS under which the following services are rendered to the Company at amounts in compliance with FERC regulation: general and design engineering, purchasing, accounting, finance and treasury, tax, information technology, marketing, auditing, insurance and pension administration, human resources, systems and procedures, digital wireless communications, labor, and other services with respect to business and operations, construction management, and transactions associated with the Southern Company system's fleet of generating units. Prior to December 2017, the Company did not have employees and thus all employee-related charges were rendered at amounts in compliance with FERC regulation under agreements with SCS. Costs for all of these services from SCS totaled $218 million , $193 million , and $146 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively. Of these costs, $192 million , $173 million , and $138 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively, were charged to other operations and maintenance expenses; the remainder was primarily capitalized to property, plant, and equipment. Cost allocation methodologies used by SCS prior to the repeal of the Public Utility Holding Company Act of 1935, as amended, were approved by the SEC. Subsequently, additional cost allocation methodologies have been reported to the FERC and management believes they are reasonable. The FERC permits services to be rendered at cost by system service companies.

Total power purchased from affiliates through the power pool, included in purchased power in the consolidated statements of income, totaled $27 million for the year ended December 31, 2017 and $21 million for each of the years ended December 31, 2016 and 2015.

The Company also has several agreements with SCS for transmission services. Transmission services purchased from SCS totaled $13 million for the year ended December 31, 2017 and $11 million for each of the years ended December 31, 2016 and 2015 and were charged to other operations and maintenance in the consolidated statements of income. All charges were billed to the Company based on the Southern Company Open Access Transmission Tariff as filed with the FERC.

Prior to Southern Company's acquisition of Southern Company Gas, SCS, as agent for the Company, had agreements with various subsidiaries of Southern Company Gas to purchase natural gas. Natural gas purchases made by the Company from Southern Company Gas' subsidiaries were $119 million for the year ended December 31, 2017 and $17 million for the period subsequent to

Southern Company's acquisition of Southern Company Gas through December 31, 2016, and are included in fuel expense on the consolidated statements of income.

On September 1, 2016, Southern Company Gas acquired a 50% equity interest in Southern Natural Gas Company, L.L.C. (SNG). Prior to completion of the acquisition, SCS, as agent for the Company, had entered into a long-term interstate natural gas transportation agreement with SNG. The interstate transportation service provided to the Company by SNG pursuant to this agreement is governed by the terms and conditions of SNG's natural gas tariff and is subject to FERC regulation. Transportation costs under this agreement were $25 million for the year ended December 31, 2017 and $7 million for the period subsequent to Southern Company Gas' investment in SNG through December 31, 2016.

The Company and the traditional electric operating companies may jointly enter into various types of wholesale energy, natural gas, and certain other contracts, either directly or through SCS as agent. Each participating company may be jointly and severally liable for the obligations incurred under these agreements. See "Revenues" herein for additional information. The Company and the traditional electric operating companies generally settle amounts related to the above transactions on a monthly basis in the month following the performance of such services or the purchase or sale of electricity.

**Acquisition Accounting**

The Company may acquire generation assets as part of its overall growth strategy. At the time of an acquisition, the Company will assess if these assets and activities meet the definition of a business. For acquisitions that meet the definition of a business, the Company includes operating results from the date of acquisition in its consolidated financial statements. The purchase price, including any contingent consideration, is allocated based on the fair value of the identifiable assets acquired and liabilities assumed (including any intangible assets). Assets acquired that do not meet the definition of a business are accounted for as an asset acquisition.

The purchase price of each asset acquisition is allocated based on the relative fair value of assets acquired. Determining the fair value of assets acquired and liabilities assumed requires management judgment and the Company may engage independent valuation experts to assist in this process. Fair values are determined by using market participant assumptions, and typically include the timing and amounts of future cash flows, incurred construction costs, the nature of acquired contracts, discount rates, power market prices, and expected asset lives. Any due diligence or transition costs incurred by the Company for potential or successful acquisitions are expensed as incurred.

Contingent consideration primarily relates to fixed amounts due to the seller once the facility is placed in service. For contingent consideration with variable payments, the Company fair values the arrangement with any changes recorded in the consolidated statements of income. See Note 8 for additional fair value information.

**Revenues**

The Company sells capacity at rates specified under contractual terms for long-term PPAs. These PPAs are generally accounted for as operating leases, non-derivatives, or normal sale derivatives. Capacity revenues from PPAs classified as operating leases are recognized on a straight-line basis over the term of the agreement. Capacity revenues from PPAs classified as non-derivatives or normal sales are recognized at the lesser of the levelized amount or the amount billable under the contract over the respective contract periods. When multiple contracts exist with the same counterparty, the revenues from each contract are accounted for as separate arrangements. All capacity revenues are included in wholesale revenues.

The Company may also enter into contracts to sell short-term capacity in the wholesale electricity markets. These sales are generally classified as mark-to-market derivatives and net unrealized gains (losses) on such contracts are recorded in wholesale revenues. See Note 9 for additional information.

Energy revenues and other contingent revenues are recognized in the period the energy is delivered or the service is rendered. Transmission revenues and other fees are recognized as earned as other operating revenues. See "Financial Instruments" herein for additional information.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

Significant portions of the Company's revenues have been derived from certain customers pursuant to PPAs. The following table shows the percentage of total revenues for the Company's top three customers for each of the years presented:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| Georgia Power | **11.3%** | 16.5% | 15.8% |
| Duke Energy Corporation | **6.7%** | 7.8% | 8.2% |
| Morgan Stanley Capital Group | **4.5%** | N/A | N/A |
| San Diego Gas & Electric Company | **N/A** | 5.7% | N/A |
| Florida Power & Light Company | **N/A** | N/A | 10.7% |

**Fuel Costs**

Fuel costs are expensed as the fuel is used. Fuel costs also include emissions allowances which are expensed as the emissions occur.

**Development Costs**

The Company capitalizes development costs once a project is probable of completion, primarily based on a review of its economics and operational feasibility, as well as status of power off-take agreements and regulatory approvals, if applicable. Capitalized development costs are included in construction work in progress on the consolidated balance sheets. All development costs incurred prior to the determination that a project is probable of completion are expensed as incurred and included in other operations and maintenance expense in the consolidated statements of income. If it is determined that a project is no longer probable of completion, any capitalized development costs are expensed and included in other operations and maintenance expense in the consolidated statements of income.

**Income and Other Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences.

Under current tax regulation, certain projects related to the construction of renewable facilities are eligible for federal ITCs. The Company estimates eligible costs which, as they relate to acquisitions, may not be finalized until the allocation of the purchase price to assets has been finalized. The Company applies the deferred method to ITCs as opposed to the flow-through method. Under the deferred method the ITCs are recorded as a deferred credit and amortized to income tax expense over the life of the respective asset. Furthermore, the tax basis of the asset is reduced by 50% of the ITCs received, resulting in a net deferred tax asset. The Company has elected to recognize the tax benefit of this basis difference as a reduction to income tax expense in the year in which the plant reaches commercial operation. In addition, certain projects are eligible for federal PTCs, which are recorded as an income tax benefit based on KWH production. Federal ITCs and PTCs available to reduce income taxes payable were not fully utilized during 2017 and will be carried forward and utilized in future years. The Company recognizes tax positions that are "more likely than not" of being sustained upon examination by the appropriate taxing authorities. See Note 5 for additional information.

**Property, Plant, and Equipment**

The Company's depreciable property, plant, and equipment consists primarily of generation assets.

Property, plant, and equipment is stated at original cost or acquired fair value. Original cost includes: materials, direct labor incurred by contractors and affiliated companies, and interest capitalized. Interest is capitalized on qualifying projects during the development and construction period. The cost to replace significant items of property defined as retirement units is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to other operations and maintenance expenses as incurred.

When depreciable property, plant, and equipment is retired, or otherwise disposed of in the normal course of business, the applicable cost and accumulated depreciation is removed and a gain or loss is recognized in the consolidated statements of income.

**Depreciation**

The Company applies component depreciation, where depreciation is computed principally by the straight-line method over the estimated useful life of the asset. Certain generation assets related to natural gas-fired facilities are depreciated on a units-of-production basis, using hours or starts, to better match outage and maintenance costs to the usage of, and revenues from, these assets.

The primary assets in property, plant, and equipment are generating facilities, which generally have estimated useful lives as follows:

| Generating facility | Useful life |
|---|---|
| Natural gas | Up to 45 years |
| Biomass | Up to 40 years |
| Solar | Up to 35 years |
| Wind | Up to 30 years |

The Company reviews its estimated useful lives and salvage values on an ongoing basis. The results of these reviews could result in changes which could have a material impact on net income in the near term.

**Asset Retirement Obligations**

Asset retirement obligations (ARO) are computed as the present value of the estimated ultimate costs for an asset's future retirement and are recorded in the period in which the liability is incurred. The costs are capitalized as part of the related long-lived asset and depreciated over the asset's useful life. In the absence of quoted market prices, AROs are estimated using present value techniques in which estimates of future cash outlays associated with the asset retirements are discounted using a credit-adjusted risk-free rate. Estimates of the timing and amounts of future cash outlays are based on projections of when and how the assets will be retired and the cost of future removal activities. The ARO liability primarily relates to the Company's solar and wind facilities, which are located on long-term land leases requiring the restoration of land at the end of the lease. See Note 11 for acquisitions during 2017 and 2016 which contributed to the increased liability.

Details of the AROs included on the consolidated balance sheets are as follows:

| | 2017 | 2016 |
|---|---|---|
| | *(in millions)* | |
| Balance at beginning of year | **$ 64** | $ 21 |
| Liabilities incurred | **6** | 42 |
| Accretion | **4** | 1 |
| Cash flow revisions | **4** | — |
| Balance at end of year | **$ 78** | $ 64 |

**Long-Term Service Agreements**

The Company has entered into LTSAs for the purpose of securing maintenance support for its natural gas-fired generating facilities. The LTSAs cover all planned inspections on the covered equipment, which generally includes the cost of all labor and materials. The LTSAs also obligate the counterparties to cover the costs of unplanned maintenance on the covered equipment subject to limits and scope specified in each contract.

Payments made under the LTSAs prior to the performance of any planned inspections or unplanned capital maintenance are recorded as a prepayment in other current assets and noncurrent assets on the consolidated balance sheets and are recorded as payments pursuant to LTSAs and for equipment not yet received in the statements of cash flows. At the time work is performed, which typically occurs during planned inspections, an appropriate amount is transferred from the prepayment to property, plant, and equipment or charged to expense. The receipt of major parts into materials and supplies inventory prior to planned inspections is treated as a noncash transaction for purposes of the consolidated statements of cash flows.

**Impairment of Long-Lived Assets and Intangibles**

The Company evaluates long-lived assets and finite-lived intangibles for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company's intangible assets consist primarily of certain PPAs acquired, which are amortized over the term of the PPAs, which have a weighted average term of 19 years . The determination of whether an impairment has occurred is based on an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If the estimate of undiscounted future cash flows is less than the carrying value of the asset, the fair value of the asset is determined and a loss is recorded.

Amortization expense for acquired PPAs was $25 million , $10 million , and $3 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively, and is recorded in operating revenues. The estimated annual amortization expense is $25 million for each of the next five years.

**Transmission Receivables/Prepayments**

As a result of the Company's growth from the acquisition and construction of generating facilities, the Company has transmission receivables and/or prepayments representing the portion of interconnection network and transmission upgrades that will be reimbursed to the Company. Upon completion of the related project, transmission costs are generally reimbursed by the interconnection provider within a five -year period and the receivable/prepayments are reduced as payments or services are received.

**Restricted Cash**

The Company has restricted cash primarily related to certain acquisitions and construction projects. The aggregate amount of restricted cash at December 31, 2017 and 2016 was $11 million and $13 million , respectively.

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Materials and Supplies**

Materials and supplies include the average cost of generating plant materials and are recorded as inventory when purchased and then expensed or capitalized to property, plant, and equipment, as appropriate, at weighted average cost when installed. In addition, certain major parts are recorded as inventory when acquired and then capitalized at cost when installed to property, plant, and equipment.

**Fuel Inventory**

Fuel inventory, which is included in other current assets, includes the cost of oil, natural gas, biomass, and emissions allowances. The Company maintains oil inventory for use at several natural gas generating units. The Company has contracts in place for natural gas storage to support normal operations of the Company's natural gas generating units. The Company also maintains biomass inventory for use at Plant Nacogdoches. Inventory is maintained using the weighted average cost method. Fuel inventory and emissions allowances are recorded at actual cost when purchased and then expensed at weighted average cost as used. Emissions allowances granted by the EPA are included at zero cost.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposure to fluctuations in interest rates, the prices of certain fuel purchases, electricity purchases and sales, and foreign currency exchange rates. All derivative financial instruments are recognized as either assets or liabilities on the consolidated balance sheets (included in "Other") and are measured at fair value. See Note 8 for additional information regarding fair value. Substantially all of the Company's bulk energy purchases and sales contracts that meet the definition of a derivative are excluded from fair value accounting requirements because they qualify for the "normal" scope exception, and are accounted for under the accrual method. Derivative contracts that qualify as cash flow hedges of anticipated transactions result in the deferral of related gains and losses in AOCI until the hedged transactions occur. Any ineffectiveness arising from cash flow hedges is recognized currently in net income. Other derivative contracts that qualify as fair value hedges are marked to market through current period income and are recorded in the financial statement line item where they will eventually settle. Cash flows from derivatives are classified on the statement of cash flows in the same category as the hedged item. See Note 9 for additional information regarding derivatives.

The Company offsets the fair value amounts recognized for multiple derivative instruments executed with the same counterparty under a netting arrangement. Additionally, the Company had no outstanding collateral repayment obligations or rights to reclaim collateral arising from derivative instruments recognized at December 31, 2017 or 2016.

The Company is exposed to potential losses related to financial instruments in the event of counterparties' nonperformance. The Company has established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

**Comprehensive Income**

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income, changes in the fair value of qualifying cash flow hedges, certain changes in pension and other postretirement benefit plans, and reclassifications of amounts included in net income.

Accumulated OCI (loss) balances, net of tax effects, were as follows:

| | Qualifying Hedges | Pension and Other Postretirement Benefit Plans | Accumulated Other Comprehensive Income (Loss) |
|---|---|---|---|
| | | *(in millions)* | |
| Balance at December 31, 2016 | $ 35 | $ — | $ 35 |
| Current period change | (10) | — | (10) |
| Other comprehensive income transfer from SCS (*) | — | (27) | (27) |
| Balance at December 31, 2017 | $ 25 | $ (27) | $ (2) |

(*) In connection with the Company becoming a participant to the Southern Company qualified pension plan and other postretirement benefit plan, $27 million of OCI, net of tax of $9 million , was transferred from SCS.

**Variable Interest Entities**

The primary beneficiary of a variable interest entity (VIE) is required to consolidate the VIE when it has both the power to direct the activities of the VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

The Company has certain wholly-owned subsidiaries that are determined to be VIEs. The Company is considered the primary beneficiary of these VIEs because it controls the most significant activities of the VIEs, including operating and maintaining the respective assets, and has the obligation to absorb expected losses of these VIEs to the extent of its equity interests.

## 2. RETIREMENT BENEFITS

Effective in December 2017, 538 employees transferred from SCS to the Company. Accordingly, the Company assumed various compensation and benefit plans including a defined benefit, trusteed, pension plan covering substantially all employees. The qualified pension plan is funded in accordance with requirements of the Employee Retirement Income Security Act of 1974, as amended (ERISA). With the transfer of employees, the Company assumed the related benefit obligations from SCS of $139 million for the qualified pension plan (along with trust assets of $138 million ) and $11 million for other postretirement benefit plans, together with $36 million in prior service costs and net gains/losses that are in OCI. In 2018, the Company will also begin providing certain defined benefits under a non-qualified pension plan for a select group of management and highly compensated employees. No obligation related to these benefits was assumed in the employee transfer; however, obligations under the non-qualified pension plan for future services rendered by employees will be recognized beginning in 2018 and ultimately funded on a cash basis. In addition, the Company provides certain medical care and life insurance benefits for retired employees through other postretirement benefit plans that are to be funded on a cash basis.

Prior to the transfer of employees in December 2017, substantially all expenses charged by SCS, including pension and other postretirement benefit costs, were recorded in other operations and maintenance expense. Beginning in 2018, in connection with the adoption of ASU 2017-07, the service cost component of pension and postretirement benefit costs will be recorded in other operations and maintenance expense while the non-service cost components of pension and postretirement benefit costs will be recorded in other income (expense). See Note 1 under "General" for additional information.

### Actuarial Assumptions

The weighted average rates assumed in the actuarial calculations used to determine the benefit obligations for the pension and other postretirement plans as of the December 31, 2017 measurement date are presented below.

| **Assumptions used to determine benefit obligations:** | **2017** |
|---|---|
| **Pension plans** | |
| Discount rate | **3.94%** |
| Annual salary increase | **4.46** |
| **Other postretirement benefit plans** | |
| Discount rate | **3.81%** |
| Annual salary increase | **4.46** |

In determining the amount of pension cost to be recognized in 2018, the Company estimates the expected rate of return on pension plan assets using a financial model to project the expected return on the current investment portfolio. The analysis projects an expected rate of return on each of the different asset classes in order to arrive at the expected return on the entire portfolio relying on the trust's target asset allocation and reasonable capital market assumptions. The financial model is based on four key inputs: anticipated returns by asset class (based in part on historical returns), the trust's target asset allocation, an anticipated inflation rate, and the projected impact of a periodic rebalancing of the trust's portfolio.

An additional assumption used in measuring the accumulated other postretirement benefit obligations (APBO) is a weighted average medical care cost trend rate. The weighted average medical care cost trend rates used in measuring the APBO as of December 31, 2017 were as follows:

| | **Initial Cost Trend Rate** | **Ultimate Cost Trend Rate** | **Year That Ultimate Rate is Reached** |
|---|---|---|---|
| Pre-65 | **6.50%** | **4.50%** | **2026** |
| Post-65 medical | **5.00** | **4.50** | **2026** |
| Post-65 prescription | **10.00** | **4.50** | **2026** |

An annual increase or decrease in the assumed medical care cost trend rate of 1% would have an immaterial effect on the APBO at December 31, 2017.

### Pension Plan

The total accumulated benefit obligation for the pension plan was $111 million at December 31, 2017 . The projected benefit obligation for the pension plan was $139 million and the fair value of plan assets was $138 million at December 31, 2017 .

Presented below are the amounts included in AOCI at December 31, 2017 related to the Company's pension plan that had not yet been recognized in net periodic pension cost, along with the estimated amortization of such amounts for 2018.

| | **2017** | **Estimated Amortization in 2018** |
|---|---|---|
| | *(in millions)* | |
| Prior service cost | **$ 1** | **$ —** |
| Net (gain) loss | **32** | **2** |
| AOCI | **$ 33** | |

Future benefit payments reflect expected future service and are estimated based on assumptions used to measure the projected benefit obligation for the pension plan. At December 31, 2017 , estimated benefit payments average approximately $4 million each year for the next five years, and for the five-year period from 2023 to 2027 estimated benefit payments are $27 million .

**Other Postretirement Benefits**

The APBO for the other postretirement benefit plan at December 31, 2017 is $11 million . Amounts recognized in the balance sheet at December 31, 2017 related to the Company's other postretirement benefit plan consist of the following:

| | 2017 |
|---|---|
| | *(in millions)* |
| Employee benefit obligations (included in other deferred credits and liabilities) | $ (11) |
| AOCI | 3 |

Presented below are the amounts included in AOCI at December 31, 2017 related to the other postretirement benefit plans that had not yet been recognized in net periodic other postretirement benefit cost along with the estimated amortization of such amounts for 2018.

| | 2017 | Estimated Amortization in 2018 |
|---|---|---|
| | *(in millions)* | |
| Net (gain) loss | $ 3 | $ — |
| AOCI | $ 3 | |

Future benefit payments, which include any prescription drug benefits, and any offset from drug subsidiary receipts, are immaterial for each of the years 2018-2027.

**Benefit Plan Assets**

Pension plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the Internal Revenue Code of 1986, as amended. The Company's investment policies for the pension plan cover a diversified mix of assets, including equity and fixed income securities, real estate, and private equity. Derivative instruments are used primarily to gain efficient exposure to the various asset classes and as hedging tools. The Company minimizes the risk of large losses primarily through diversification but also monitors and manages other aspects of risk.

The composition of the Company's pension plan assets as of December 31, 2017 , along with the targeted mix of assets for the plan, is presented below:

| | Target | 2017 |
|---|---|---|
| **Pension plan assets:** | | |
| Domestic equity | 26% | 31% |
| International equity | 25 | 25 |
| Fixed income | 23 | 24 |
| Special situations | 3 | 1 |
| Real estate investments | 14 | 13 |
| Private equity | 9 | 6 |
| Total | 100% | 100% |

The investment strategy for plan assets related to the Company's qualified pension plan is to be broadly diversified across major asset classes. The asset allocation is established after consideration of various factors that affect the assets and liabilities of the pension plan including, but not limited to, historical and expected returns and interest rates, volatility, correlations of asset classes, the current level of assets and liabilities, and the assumed growth in assets and liabilities. Because a significant portion of the liability of the pension plan is long-term in nature, the assets are invested consistent with long-term investment expectations for return and risk. To manage the actual asset class exposures relative to the target asset allocation, the Company employs a formal rebalancing program. As additional risk management, external investment managers and service providers are subject to written guidelines to ensure appropriate and prudent investment practices. Management believes the portfolio is well-diversified with no significant concentrations of risk.

***Investment Strategies***

Detailed below is a description of the investment strategies for each major asset category for the pension benefit plan disclosed above:

- ***Domestic equity.*** A mix of large and small capitalization stocks with generally an equal distribution of value and growth attributes, managed both actively and through passive index approaches.
- ***International equity.*** A mix of growth stocks and value stocks with both developed and emerging market exposure, managed both actively and through passive index approaches.
- ***Fixed income.*** A mix of domestic and international bonds.
- ***Special situations.*** Investments in opportunistic strategies with the objective of diversifying and enhancing returns and exploiting short-term inefficiencies as well as investments in promising new strategies of a longer-term nature.
- ***Real estate investments.*** Investments in traditional private market, equity-oriented investments in real properties (indirectly through pooled funds or partnerships) and in publicly traded real estate securities.
- ***Private equity.*** Investments in private partnerships that invest in private or public securities typically through privately-negotiated and/or structured transactions, including leveraged buyouts, venture capital, and distressed debt.

***Benefit Plan Asset Fair Values***

Following are the fair value measurements for the pension plan assets as of December 31, 2017 . The fair values presented are prepared in accordance with GAAP. For purposes of determining the fair value of the pension plan assets and the appropriate level designation, management relies on information provided by the plan's trustee. This information is reviewed and evaluated by management with changes made to the trustee information as appropriate.

Valuation methods of the primary fair value measurements disclosed in the following tables are as follows:

- ***Domestic and international equity.*** Investments in equity securities such as common stocks, American depositary receipts, and real estate investment trusts that trade on a public exchange are classified as Level 1 investments and are valued at the closing price in the active market. Equity investments with unpublished prices (i.e. pooled funds) are valued as Level 2, when the underlying holdings used to value the investment are comprised of Level 1 or Level 2 equity securities.
- ***Fixed income.*** Investments in fixed income securities are generally classified as Level 2 investments and are valued based on prices reported in the market place. Additionally, the value of fixed income securities takes into consideration certain items such as broker quotes, spreads, yield curves, interest rates, and discount rates that apply to the term of a specific instrument.
- ***Real estate investments, private equity, and special situations investments.*** Investments in real estate, private equity, and special situations are generally classified as Net Asset Value as a Practical Expedient, since the underlying assets typically do not have publicly available observable inputs. The fund manager values the assets using various inputs and techniques depending on the nature of the underlying investments. Techniques may include purchase multiples for comparable transactions, comparable public company trading multiples, discounted cash flow analysis, prevailing market capitalization rates, recent sales of comparable investments, and independent third-party appraisals. The fair value of partnerships is determined by aggregating the value of the underlying assets less liabilities.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The fair values of pension plan assets as of December 31, 2017 are presented below. These fair value measurements exclude cash, receivables related to investment income, pending investments sales, and payables related to pending investment purchases.

| | Fair Value Measurements Using | | | | |
|---|---|---|---|---|---|
| **As of December 31, 2017:** | **Quoted Prices in Active Markets for Identical Assets (Level 1)** | **Significant Other Observable Inputs (Level 2)** | **Significant Unobservable Inputs (Level 3)** | **Net Asset Value as a Practical Expedient (NAV)** | **Total** |
| | | | *(in millions)* | | |
| Assets: | | | | | |
| Domestic equity (*) | $ 28 | $ 13 | $ — | $ — | $ 41 |
| International equity (*) | 18 | 16 | — | — | 34 |
| Fixed income: | | | | | |
| U.S. Treasury, government, and agency bonds | — | 10 | — | — | 10 |
| Corporate bonds | — | 14 | — | — | 14 |
| Pooled funds | — | 8 | — | — | 8 |
| Cash equivalents and other | 2 | — | — | — | 2 |
| Real estate investments | 5 | — | — | 14 | 19 |
| Special situations | — | — | — | 2 | 2 |
| Private equity | — | — | — | 8 | 8 |
| Total | $ 53 | $ 61 | $ — | $ 24 | $ 138 |

(*) Level 1 securities consist of actively traded stocks while Level 2 securities consist of pooled funds.

## 3. CONTINGENCIES AND REGULATORY MATTERS

### General Litigation Matters

The Company is subject to certain claims and legal actions arising in the ordinary course of business. In addition, the Company's business activities are subject to extensive governmental regulation related to public health and the environment. Litigation over environmental issues and claims of various types, including property damage, personal injury, common law nuisance, and citizen enforcement of environmental requirements such as standards for air, water, land, and protection of other natural resources, has occurred throughout the U.S. This litigation has included claims for damages alleged to have been caused by $CO_2$ and other emissions and alleged exposure to hazardous materials, and/or requests for injunctive relief in connection with such matters. The ultimate outcome of such pending or potential litigation against the Company and its subsidiaries cannot be predicted at this time; however, for current proceedings not specifically reported herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on the Company's financial statements.

During 2015, the Company indirectly acquired a 51% membership interest in RE Roserock LLC (Roserock), the owner of the Roserock facility in Pecos County, Texas, which was under construction by Recurrent Energy, LLC and was subsequently placed in service in November 2016. Prior to placing the facility in service, certain solar panels were damaged during installation. While the facility currently is generating energy consistent with operational expectations and PPA obligations, the Company is pursuing remedies under its insurance policies and other contracts to repair or replace these solar panels. In connection therewith, the Company is withholding payments of approximately $26 million from the construction contractor, who has placed a lien on the Roserock facility for the same amount. The amounts withheld are included in other accounts payable and other current liabilities on the Company's consolidated balance sheets. On May 18, 2017, Roserock filed a lawsuit in the state district court in Pecos County, Texas, against XL Insurance America, Inc. (XL) and North American Elite Insurance Company (North American Elite) seeking recovery from an insurance policy for damages resulting from a hail storm and certain installation practices by the construction contractor, McCarthy Building Companies, Inc. (McCarthy). On May 19, 2017, Roserock filed a separate lawsuit against McCarthy in the state district court in Travis County, Texas alleging breach of contract and breach of warranty for the damages sustained at the Roserock facility, which has since been moved to the U.S. District Court for the Western District of Texas. On May 22, 2017, McCarthy filed a counter lawsuit against Roserock, Array Technologies, Inc., Canadian Solar (USA), Inc., XL, and North American Elite in the U.S. District Court for the Western District of Texas alleging, among other things, breach of contract, and requesting foreclosure of mechanic's liens against Roserock. On July 18, 2017, the U.S. District Court for the Western District of Texas consolidated the two pending lawsuits. On December 11, 2017, the U.S. District Court for the Western District of Texas dismissed McCarthy's claims against Canadian Solar (USA), Inc. and dismissed cross-claims that XL and North American Elite had sought to bring against Roserock. The Company intends to vigorously pursue and defend these matters, the ultimate outcome of which cannot be determined at this time.

### FERC Matters

The Company and certain of its generation subsidiaries are subject to regulation by the FERC. The Company has authority from the FERC to sell electricity at market-based rates. Since 2008, that authority, for certain balancing authority areas, has been conditioned on compliance with the requirements of an energy auction, which the FERC found to be tailored mitigation that addresses potential market power concerns. In accordance with FERC regulations governing such authority, the traditional electric operating companies and the Company filed a triennial market power analysis in 2014, which included continued reliance on the energy auction as tailored mitigation. In 2015, the FERC issued an order finding that the traditional electric operating companies' and the Company's existing tailored mitigation may not effectively mitigate the potential to exert market power in certain areas served by the traditional electric operating companies and in some adjacent areas. The FERC directed the traditional electric operating companies and the Company to show why market-based rate authority should not be revoked in these areas or to provide a mitigation plan to further address market power concerns. The traditional electric operating companies and the Company filed a request for rehearing and filed their response with the FERC in 2015.

In December 2016, the traditional electric operating companies and the Company filed an amendment to their market-based rate tariff that proposed certain changes to the energy auction, as well as several non-tariff changes. On February 2, 2017, the FERC issued an order accepting all such changes subject to an additional condition of cost-based price caps for certain sales outside of the energy auction, finding that all of these changes would provide adequate alternative mitigation for the traditional electric operating companies' and the Company's potential to exert market power in certain areas served by the traditional electric operating companies and in some adjacent areas. On May 17, 2017, the FERC accepted the traditional electric operating companies' and the Company's compliance filing accepting the terms of the order. While the FERC's February 2, 2017 order references the market power proceeding discussed above, it remains a separate, ongoing matter.

On October 25, 2017, the FERC issued an order in response to the traditional electric operating companies' and the Company's June 29, 2017 triennial updated market power analysis. The FERC directed the traditional electric operating companies and the Company to show cause within 60 days why market-based rate authority should not be revoked in certain areas adjacent to the area presently under mitigation in accordance with the February 2, 2017 order or to provide a mitigation plan to further address market power concerns. On November 10, 2017, the traditional electric operating companies and the Company responded to the FERC and proposed to resolve matters by applying the alternative mitigation authorized by the February 2, 2017 order to the adjacent areas made the subject of the October 25, 2017 order.

The ultimate outcome of these matters cannot be determined at this time.

## 4. JOINT OWNERSHIP AGREEMENTS

The Company is a 65% owner of Plant Stanton A, a natural gas-fired combined-cycle unit with a nameplate capacity of 659 MWs. The unit is co-owned by the Orlando Utilities Commission ( 28% ), the Florida Municipal Power Agency ( 3.5% ), and the Kissimmee Utility Authority ( 3.5% ). The Company has a service agreement with SCS whereby SCS is responsible for the operation and maintenance of Plant Stanton A. As of December 31, 2017 , $155 million was recorded in plant in service with associated accumulated depreciation of $55 million . These amounts represent the Company's share of total plant assets and each owner is responsible for providing its own financing. The Company's proportionate share of Plant Stanton A's operating expense is included in the corresponding operating expenses in the consolidated statements of income.

## 5. INCOME TAXES

On behalf of the Company, Southern Company files a consolidated federal income tax return and various state income tax returns, some of which are combined, unitary, or consolidated. Under a joint consolidated income tax allocation agreement, each Southern Company subsidiary's current and deferred tax expense is computed on a stand-alone basis and no subsidiary is allocated more current expense than would be paid if it filed a separate income tax return. In accordance with IRS regulations, each company is jointly and severally liable for the federal tax liability.

**Federal Tax Reform Legislation**

Following the enactment of the Tax Reform Legislation, the SEC staff issued Staff Accounting Bulletin 118 – "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides for a measurement period of up to one year from the enactment date to complete accounting under GAAP for the tax effects of the legislation. Due to the complex and comprehensive nature of the enacted tax law changes, and their application under GAAP, Southern Company considers all amounts recorded in the financial statements as a result of the Tax Reform Legislation to be "provisional" as discussed in SAB 118 and subject to revision. The Company is awaiting additional guidance from industry and income tax authorities in order to finalize its accounting. The ultimate impact of the Tax Reform Legislation on deferred income tax assets and liabilities cannot be determined at this time.

**Current and Deferred Income Taxes**

Details of income tax provisions are as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Federal — | | | |
| Current (*) | **$ (566)** | $ 928 | $ 12 |
| Deferred (*) | **(312)** | (1,098) | 10 |
| | **(878)** | (170) | 22 |
| State — | | | |
| Current | **(110)** | (60) | (32) |
| Deferred | **49** | 35 | 31 |
| | **(61)** | (25) | (1) |
| Total | **$ (939)** | $ (195) | $ 21 |

(*) ITCs and PTCs generated in the current tax year and carried forward from prior tax years that cannot be utilized in the current tax year are reclassified from current to deferred taxes in federal income tax expense above. ITCs and PTCs reclassified in this manner include $316 million for 2017 , $1.13 billion for 2016 , and $246 million for 2015. These ITCs and PTCs are included in the following table of temporary differences as unrealized tax credits.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | 2017 | 2016 |
|---|---|---|
| | *(in millions)* | |
| Deferred tax liabilities — | | |
| Accelerated depreciation and other property basis differences | **$ 1,922** | $ 2,440 |
| Levelized capacity revenues | **26** | 28 |
| Other | **6** | 27 |
| Total deferred income tax liabilities | **1,954** | 2,495 |
| Deferred tax assets — | | |
| Federal effect of state deferred taxes | **42** | 53 |
| Basis difference on ITCs | **184** | 292 |
| Alternative minimum tax carryforward | **21** | 15 |
| Unrealized tax credits | **2,002** | 1,685 |
| Federal net operating loss (NOL) | **333** | 808 |
| Deferred state tax assets | **77** | 60 |
| Other partnership basis differences | **24** | 16 |
| Other | **10** | 8 |
| Total deferred income tax assets | **2,693** | 2,937 |
| Valuation Allowance | **(13)** | — |
| Net deferred income tax assets | **2,680** | 2,937 |
| Total deferred income tax asset (liability) | **$ 726** | $ 442 |
| | | |
| Recognized in the consolidated balance sheets: | | |
| Accumulated deferred income taxes – assets | **$ 925** | $ 594 |
| Accumulated deferred income taxes – liability | **$ (199)** | $ (152) |

Deferred tax liabilities are primarily the result of property-related timing differences, which increased due to bonus depreciation. However, the implementation of the Tax Reform Legislation significantly reduced the amount of accumulated deferred income taxes at December 31, 2017.

Deferred tax assets consist primarily of timing differences related to the carryforward of unrealized federal ITCs, PTCs, net operating loss, and net basis differences on federal ITCs.

***Tax Credit Carryforwards***

At December 31, 2017, the Company had federal ITC and PTC carryforwards, which are expected to result in $2.0 billion of federal income tax benefits. The federal ITC carryforwards begin expiring in 2034 but are expected to be fully utilized by 2027. The PTC carryforwards begin expiring in 2036 but are also expected to be fully utilized by 2027. The acquisition of additional renewable projects could further delay the utilization of existing tax credit carryforwards. The ultimate outcome of these matters cannot be determined at this time.

***Net Operating Loss***

After carrying back portions of the federal NOL generated in 2016, Southern Company had a consolidated federal NOL carryforward of approximately $2.3 billion at December 31, 2017. The federal NOL will expire in 2037 but is expected to be fully utilized by 2019. The ultimate outcome of this matter cannot be determined at this time.

The Company had state NOL carryforwards of approximately $1.3 billion at December 31, 2017, which will expire from 2029 to 2035. These carryforwards resulted in deferred tax assets of approximately $61 million as of December 31, 2017. The state NOL carryforwards by state jurisdiction were as follows:

| Jurisdiction | Approximate NOL Carryforwards | Approximate Net State Income Tax Benefit | Tax Year NOL Expires |
|---|---|---|---|
| | *(in millions)* | | |
| Oklahoma | $ 978 | $ 46 | 2035 |
| Florida | 283 | 12 | 2033 |
| South Carolina | 48 | 2 | 2035 |
| Other states | 23 | 1 | 2029-2035 |
| Balance at year end | $ 1,332 | $ 61 | |

**Effective Tax Rate**

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

| | **2017** | 2016 | 2015 |
|---|---|---|---|
| Federal statutory rate | **35.0 %** | 35.0 % | 35.0 % |
| State income tax, net of federal deduction | **(22.2)** | (9.1) | (0.3) |
| Amortization of ITC | **(31.8)** | (20.6) | (5.0) |
| ITC basis difference | **(10.0)** | (89.0) | (21.5) |
| Production tax credits | **(72.5)** | (23.3) | (0.6) |
| Tax Reform Legislation | **(416.1)** | — | — |
| Noncontrolling interests | **(8.6)** | (6.2) | (1.7) |
| Other | **0.5** | 4.6 | 2.5 |
| Effective income tax rate (benefit) | **(525.7)%** | (108.6)% | 8.4 % |

The Company's effective tax rate decreased in 2017 primarily due to the Tax Reform Legislation. The decrease in 2016 was primarily due to changes in federal ITCs and PTCs.

The Company's deferred federal ITCs are amortized to income tax expense over the life of the respective asset. ITCs amortized in this manner amounted to $57 million in 2017, $37 million in 2016, and $19 million in 2015. Also, the Company received cash related to federal ITCs under the renewable energy incentives of $162 million for the year ended December 31, 2015. While no cash was received related to these incentives in 2017 or 2016, the Company recognized tax credits. Furthermore, the tax basis of the asset is reduced by 50% of the ITCs received, resulting in a net deferred tax asset. The Company has elected to recognize the tax benefit of this basis difference as a reduction to income tax expense in the year in which the plant reaches commercial operation. The tax benefit of the related basis differences reduced income tax expense by $18 million in 2017, $173 million in 2016, and $54 million in 2015. The tax benefit of PTCs reduced income tax expense by $129 million in 2017, $42 million in 2016 and $1 million in 2015. See "Unrecognized Tax Benefits" herein for further information.

**Legal Entity Reorganization**

In September 2017, Southern Power began a legal entity reorganization of various direct and indirect subsidiaries that own and operate substantially all of the solar facilities, including certain subsidiaries owned in partnership with various third parties. The reorganization included the purchase of all of the redeemable noncontrolling interests, representing 10% of the membership interests, in Southern Turner Renewable Energy, LLC. The reorganization is expected to be substantially completed in the first quarter 2018 and is expected to result in estimated tax benefits totaling between $50 million and $55 million related to certain changes in state apportionment rates and net operating loss carryforward utilization that will be recorded in the first quarter 2018. The ultimate outcome of this matter cannot be determined at this time.

### Unrecognized Tax Benefits

Changes during the year in unrecognized tax benefits were as follows:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Balance at beginning of year | **$ 17** | $ 8 | $ 5 |
| Tax positions increase from current periods | **—** | 17 | 9 |
| Tax positions decrease from prior periods | **(17)** | (8) | (6) |
| Balance at end of year | **$ —** | $ 17 | $ 8 |

The increase in unrecognized tax benefits from current periods for all years presented, and the decrease from prior periods for all years presented, primarily relate to federal income tax benefits from deferred ITCs and would all impact the Company's effective tax rate, if recognized. The impact on the effective tax rate is determined based on the amount of ITCs which are uncertain.

The Company classifies interest on tax uncertainties as interest expense. Accrued interest for unrecognized tax benefits was immaterial for all periods presented. The Company did no t accrue any penalties on uncertain tax positions.

It is reasonably possible that the amount of the unrecognized tax benefits could change within 12 months . The settlement of federal and state audits could impact the balances. At this time, an estimate of the range of reasonably possible outcomes cannot be determined.

The IRS has finalized its audits of Southern Company's consolidated federal income tax returns through 2016. Southern Company is a participant in the Compliance Assurance Process of the IRS. The audits for the Company's state income tax returns have either been concluded, or the statute of limitations has expired, for years prior to 2011.

## 6. FINANCING

Southern Power Company's senior notes, bank term loans, commercial paper, and Facility (as defined herein) are unsecured senior indebtedness, which rank equally with all other unsecured and unsubordinated debt of Southern Power Compan y. The Company's subsidiaries are not issuers, borrowers, or obligors, as applicable, under the senior notes, borrowings from financial institutions , commercial paper, or the Facility. The se nior notes, borrowings from financial institutions, commercial paper, and the Facility are effectively subordinated to any future secured debt of Southern Power Company and any potential claims of creditors of the Company's subsidiaries. As of December 31, 2017 , the Company had no secured debt .

### Securities Due Within One Year

At December 31, 2017 , the Company had $420 million in term loans and $350 million of senior notes due within one year. At December 31, 2016 , the Company had a $60 million term loan, $ 500 million of senior notes, and $1 million of long-term notes due within one year.

Maturities of long-term debt for the next five years are as follows:

| | December 31, 2017 |
|---|---|
| | *(in millions)* |
| 2018 | $ 770 |
| 2019 | 600 |
| 2020 | 825 |
| 2021 | 300 |
| 2022 (*) | 677 |

(*) Represents euro-denominated debt at the U.S. dollar denominated hedge settlement amount.

### Senior Notes

In November 2017, the Company issued $525 million aggregate principal amount of Series 2017A Floating Rate Senior Notes due December 20, 2020, which bear interest based on three-month LIBOR. The net proceeds were used to redeem all of the $500 million aggregate principal amount of Series 2015D 1.85% Senior Notes due December 1, 2017 and to repay a portion of the Company's outstanding short-term debt.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

At December 31, 2017 and 2016 , the Company had $5.5 billion and $5.3 billion of senior notes outstanding, respectively, which included senior notes due within one year.

**Other Long-Term Notes**

In September 2017, the Company amended its $60 million aggregate principal amount floating rate term loan to, among other things, increase the aggregate principal amount to $100 million and extend the maturity date from September 2017 to October 2018. The additional $40 million of proceeds were used to repay existing indebtedness and for other general corporate purposes.

At December 31, 2017 , outstanding term loans were included in securities due within one year.

The outstanding term loans as of December 31, 2017 have a covenant that limits debt levels to 65% of total capitalization, as defined in the agreements. For purposes of this definition, debt excludes any project debt incurred by certain subsidiaries of the company to the extent such debt is non-recourse to the company, and capitalization excludes the capital stock or other equity attributable to such subsidiary.

At December 31, 2017 , the Company was in compliance with its debt limits.

**Bank Credit Arrangements**

***Company Credit Facilities***

At December 31, 2017 , the Company had a committed credit facility (Facility) of $750 million expiring in 2022, of which $22 million has been used for letters of credit and $728 million remains unused. In May 2017, the Company amended the Facility, which, among other things, extended the maturity date from 2020 to 2022 and increased the Company's borrowing ability under the Facility to $750 million from $600 million . Proceeds from the Facility may be used for working capital and general corporate purposes as well as liquidity support for the Company's commercial paper program. As of December 31, 2016 , $78 million was used for letters of credit and $522 million remained unused. The Facility does not contain a material adverse change clause at the time of borrowing. Subject to applicable market conditions, the Company expects to renew or replace the Facility, as needed, prior to expiration. In connection therewith, the Company may extend the maturity date and/or increase or decrease the lending commitment thereunder. The Company's subsidiaries are not parties to the Facility.

The Company is required to pay a commitment fee on the unused balance of the Facility. This fee is less than 1/4 of 1%. The Facility contains a covenant that limits the ratio of debt to capitalization (each as defined in the Facility) to a maximum of 65% . For purposes of this definition, debt excludes any project debt incurred by certain subsidiaries of the Company to the extent such debt is non-recourse to the Company, and capitalization excludes the capital stock or other equity attributable to such subsidiary. At December 31, 2017 , the Company was in compliance with its debt limits.

The Company also has a $120 million continuing letter of credit facility expiring in 2019 for standby letters of credit. At December 31, 2017 , $101 million has been used for letters of credit, primarily as credit support for PPA requirements, and $19 million remains unused. At December 31, 2016, the total amount available under this facility was $82 million . The Company's subsidiaries are not parties to this letter of credit facility.

In addition, at both December 31, 2017 and 2016, the Company has $ 113 million of cash collateral posted related to PPA requirements, which is included in other deferred charges and assets in the consolidated balance sheets.

***Commercial Paper Program***

The Company's commercial paper program is used to finance acquisition and construction costs related to electric generating facilities and for general corporate purposes. The Company's subsidiaries are not parties to the commercial paper program. Commercial paper is included in notes payable in the consolidated balance sheets as noted below:

| | Commercial Paper at the End of the Period | |
|---|---|---|
| | **Amount Outstanding** | **Weighted Average Interest Rate** |
| | *(in millions)* | |
| **December 31, 2017** | **$ 105** | **2.0%** |
| December 31, 2016 | $ — | N/A |

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

***Subsidiary Project Credit Facilities***

In connection with the construction of solar facilities by RE Tranquillity LLC, RE Garland Holdings LLC, and RE Roserock LLC, indirect subsidiaries of the Company, each subsidiary had entered into separate credit agreements (Project Credit Facilities), which were non-recourse to the Company (other than the subsidiary party to the agreement). Each Project Credit Facility provided (a) a senior secured construction loan credit facility, (b) a senior secured bridge loan facility, and (c) a senior secured letter of credit facility that was secured by the membership interests of the respective project company, with proceeds directed to finance project costs related to the respective solar facilities. Each Project Credit Facility was secured by the assets of the applicable project subsidiary and membership interests of the applicable project subsidiary. The Tranquillity and Garland Project Credit Facilities were fully repaid on October 14, 2016 and December 29, 2016, respectively. The table below summarizes the Roserock Project Credit Facility as of December 31, 2016, which was extended to January 31, 2017 and fully repaid on January 17, 2017.

| | Construction Loan Facility | Bridge Loan Facility | Total Loan Facility | Loan Facility Undrawn | Letter of Credit Facility | Letter of Credit Facility Undrawn |
|---|---|---|---|---|---|---|
| | | | | *(in millions)* | | |
| December 31, 2016 | $ 63 | $ 180 | $ 243 | $ 34 | $ 23 | $ 16 |

The Project Credit Facilities had no amount outstanding at December 31, 2017 and $209 million outstanding with a weighted average interest rate of 2.1% as of December 31, 2016 .

**Assets Subject to Lien**

Under the terms of the PPA and the expansion PPA for the Mankato project, approximately $442 million of assets, primarily related to property, plant, and equipment, are subject to lien at December 31, 2017 . See Note 11 for additional information.

Roserock is in a litigation dispute with McCarthy regarding damage to certain solar panels during installation. In connection therewith, Roserock is withholding payments of approximately $26 million from McCarthy, and McCarthy has filed mechanic's liens on the Roserock facility for the same amount. See Note 3 for additional information.

**Dividend Restrictions**

The Company can only pay dividends to Southern Company out of retained earnings or paid-in-capital.

**7. COMMITMENTS**

**Fuel Agreements**

SCS, as agent for the Company and the traditional electric operating companies, has entered into various fuel transportation and procurement agreements to supply a portion of the fuel (primarily natural gas) requirements for the Company's generating facilities. These purchase obligations are not recognized on the Company's consolidated balance sheets. The Company incurred fuel expense of $621 million , $456 million , and $441 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively, the majority of which was purchased under long-term commitments. The Company expects that a substantial amount of its future fuel needs will continue to be purchased under long-term commitments.

SCS may enter into various types of wholesale energy and natural gas contracts acting as an agent for the Company and Southern Company's traditional electric operating companies. Under these agreements, each of the traditional electric operating companies and the Company may be jointly and severally liable. Southern Company has entered into keep-well agreements with each of the traditional electric operating companies to ensure they will not subsidize or be responsible for any costs, losses, liabilities, or damages resulting from the inclusion of the Company as a contracting party under these agreements.

**Operating Leases**

The Company has operating lease agreements with various terms and expiration dates. Total rent expense was $29 million , $22 million , and $7 million for the years ended December 31, 2017 , 2016 , and 2015 , respectively. These amounts include contingent rent expense related to land leases based on wind production and escalation in the Consumer Price Index for All Urban Consumers. The Company excludes contingent rent but includes step rents, fixed escalations, lease concessions, and lease extensions in its computation of minimum lease payments, which are recognized on a straight-line basis over the minimum lease term. As of December 31, 2017 , estimated minimum lease payments under operating leases were $22 million in each of 2018 , 2019 , and 2020 , $23 million in each of 2021 and 2022 , and $815 million in 2023 and thereafter. The majority of the committed future expenditures are related to land leases for solar and wind facilities.

**Redeemable Noncontrolling Interests**

See Note 10.

## 8. FAIR VALUE MEASUREMENTS

Fair value measurements are based on inputs of observable and unobservable market data that a market participant would use in pricing the asset or liability. The use of observable inputs is maximized where available and the use of unobservable inputs is minimized for fair value measurement and reflects a three-tier fair value hierarchy that prioritizes inputs to valuation techniques used for fair value measurement.

- Level 1 consists of observable market data in an active market for identical assets or liabilities.
- Level 2 consists of observable market data, other than that included in Level 1, that is either directly or indirectly observable.
- Level 3 consists of unobservable market data. The input may reflect the assumptions of the Company of what a market participant would use in pricing an asset or liability. If there is little available market data, then the Company's own assumptions are the best available information.

In the case of multiple inputs being used in a fair value measurement, the lowest level input that is significant to the fair value measurement represents the level in the fair value hierarchy in which the fair value measurement is reported.

As of December 31, 2017 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | |
|---|---|---|---|---|
| **As of December 31, 2017:** | **Quoted Prices in Active Markets for Identical Assets (Level 1)** | **Significant Other Observable Inputs (Level 2)** | **Significant Unobservable Inputs (Level 3)** | **Total** |
| | | *(in millions)* | | |
| Assets: | | | | |
| Energy-related derivatives | $ — | $ 3 | $ — | $ 3 |
| Foreign currency derivatives | — | 129 | — | 129 |
| Cash equivalents | 21 | — | — | 21 |
| Total | $ 21 | $ 132 | $ — | $ 153 |
| Liabilities: | | | | |
| Energy-related derivatives | $ — | $ 13 | $ — | $ 13 |
| Foreign currency derivatives | — | 23 | — | 23 |
| Contingent consideration | — | — | 22 | 22 |
| Total | $ — | $ 36 | $ 22 | $ 58 |

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

As of December 31, 2016 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | |
|---|---|---|---|---|
| As of December 31, 2016: | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Total |
| | | *(in millions)* | | |
| Assets: | | | | |
| Energy-related derivatives | $ — | $ 21 | $ — | $ 21 |
| Interest rate derivatives | — | 1 | — | 1 |
| Cash equivalents | 628 | — | — | 628 |
| Total | $ 628 | $ 22 | $ — | $ 650 |
| Liabilities: | | | | |
| Energy-related derivatives | $ — | $ 5 | $ — | $ 5 |
| Foreign currency derivatives | — | 58 | — | 58 |
| Contingent consideration | — | — | 18 | 18 |
| Total | $ — | $ 63 | $ 18 | $ 81 |

**Valuation Methodologies**

The energy-related derivatives primarily consist of over-the-counter financial products for natural gas and physical power products, including, from time to time, basis swaps. These are standard products used within the energy industry and are valued using the market approach. The inputs used are mainly from observable market sources, such as forward natural gas prices, power prices, implied volatility, and overnight index swap interest rates. Interest rate derivatives are also standard over-the-counter products that are valued using observable market data and assumptions commonly used by market participants. The fair value of interest rate derivatives reflects the net present value of expected payments and receipts under the swap agreement based on the market's expectation of future interest rates. Additional inputs to the net present value calculation may include the contract terms, counterparty credit risk, and occasionally, implied volatility of interest rate options. The fair value of cross-currency swaps reflects the net present value of expected payments and receipts under the swap agreement based on the market's expectation of future foreign currency exchange rates. Additional inputs to the net present value calculation may include the contract terms, counterparty credit risk, and discount rates. The interest rate derivatives and cross-currency swaps are categorized as Level 2 under Fair Value Measurements as these inputs are based on observable data and valuations of similar instruments. See Note 9 for additional information on how these derivatives are used.

The Company has contingent payment obligations related to certain acquisitions whereby the Company is primarily obligated to make generation-based payments to the seller commencing at the commercial operation date through 2026. The obligation is categorized as Level 3 under Fair Value Measurements as the fair value is determined using significant unobservable inputs for the forecasted facility generation in MW-hours, as well as other inputs such as a fixed dollar amount per MW-hour, and a discount rate, and is evaluated periodically. The fair value of contingent consideration reflects the net present value of expected payments and any periodic change arising from forecasted generation is expected to be immaterial.

As of December 31, 2017 and 2016 , other financial instruments for which the carrying amount did not equal fair value were as follows:

| | Carrying Amount | Fair Value |
|---|---|---|
| | *(in millions)* | |
| Long-term debt, including securities due within one year: | | |
| **2017** | **$ 5,841** | **$ 6,079** |
| 2016 | $ 5,628 | $ 5,691 |

The fair values are determined using Level 2 measurements and are based on quoted market prices for the same or similar issues or on the current rates available to the Company.

## 9. DERIVATIVES

The Company is exposed to market risks, primarily commodity price risk and interest rate risk, and occasionally foreign currency exchange rate risk. To manage the volatility attributable to these exposures, the Company nets its exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and risk management practices. The Company's policy is that derivatives are to be used primarily for hedging purposes and mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis. Derivative instruments are recognized at fair value in the consolidated balance sheets as either assets or liabilities and are presented on a net basis. See Note 8 for additional fair value information. In the statements of cash flows, the cash impacts of settled energy-related and interest rate derivatives are recorded as operating activities. The cash impacts of settled foreign currency derivatives are classified as operating or financing activities to correspond with classification of the hedged interest or principal, respectively. See Note 1 under "Financial Instruments" for additional information.

### Energy-Related Derivatives

The Company enters into energy-related derivatives to hedge exposures to electricity, natural gas, and other fuel price changes. The Company has limited exposure to market volatility in energy-related commodity prices because its long-term sales contracts shift substantially all fuel cost responsibility to the purchaser. However, the Company has been and may continue to be exposed to market volatility in energy-related commodity prices as a result of uncontracted generating capacity.

Energy-related derivative contracts are accounted for under one of two methods:

- *Cash Flow Hedges* – Gains and losses on energy-related derivatives designated as cash flow hedges which are used to hedge anticipated purchases and sales and are initially deferred in OCI before being recognized in the consolidated statements of income in the same period as the hedged transactions are reflected in earnings.
- *Not Designated* – Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the consolidated statements of income as incurred.

Some energy-related derivative contracts require physical delivery as opposed to financial settlement, and this type of derivative is both common and prevalent within the electric industry. When an energy-related derivative contract is settled physically, any cumulative unrealized gain or loss is reversed and the contract price is recognized in the respective line item representing the actual price of the underlying goods being delivered.

At December 31, 2017 , the net volume of energy-related derivative contracts for natural gas positions totaled 14 million mmBtu, all of which expire in 2018 . At December 31, 2017 , the net volume of energy-related derivative contracts for power positions was 3 million MWHs, all of which expire in 2018 .

In addition to the volume discussed above, the Company enters into physical natural gas supply contracts that provide the option to sell back excess natural gas due to operational constraints. The maximum expected volume of natural gas subject to such a feature is 10 million mmBtu.

For cash flow hedges, gains (losses) expected to be reclassified from accumulated OCI to earnings for the 12 -month period ending December 31, 2018 is $(7) million .

### Interest Rate Derivatives

The Company may also enter into interest rate derivatives to hedge exposure to changes in interest rates. Derivatives related to existing variable rate securities or forecasted transactions are accounted for as cash flow hedges where the effective portion of the derivatives' fair value gains or losses is recorded in OCI and is reclassified into earnings at the same time the hedged transactions affect earnings. The derivatives employed as hedging instruments are structured to minimize ineffectiveness, which is recorded directly to earnings. Fair value gains or losses on derivatives that are not designated or fail to qualify as hedges are recognized in the consolidated statements of income as incurred. At December 31, 2017 , the Company did not have any interest rate derivatives outstanding and does not have any deferred gains and losses in AOCI related to cash flow hedges that would be reclassified from AOCI to interest expense.

### Foreign Currency Derivatives

The Company may also enter into foreign currency derivatives to hedge exposure to changes in foreign currency exchange rates, such as that arising from the issuance of debt denominated in a currency other than U.S. dollars. Derivatives related to forecasted transactions are accounted for as cash flow hedges where the effective portion of the derivatives' fair value gains or losses is recorded in OCI and is reclassified into earnings at the same time that the hedged transactions affect earnings, including foreign currency gains or losses arising from changes in the U.S. currency exchange rates. Any ineffectiveness is recorded directly to earnings. The derivatives employed as hedging instruments are structured to minimize ineffectiveness.

At December 31, 2017 , the following foreign currency derivatives were outstanding:

| | Pay Notional | Pay Rate | Receive Notional | Receive Rate | Hedge Maturity Date | Fair Value Gain (Loss) at December 31, 2017 |
|---|---|---|---|---|---|---|
| | *(in millions)* | | *(in millions)* | | | *(in millions)* |
| ***Cash Flow Hedges of Existing Debt*** | | | | | | |
| | $ 677 | 2.95% | € 600 | 1.00% | June 2022 | $ 55 |
| | 564 | 3.78% | 500 | 1.85% | June 2026 | 51 |
| Total | $ 1,241 | | € 1,100 | | | $ 106 |

The estimated pre-tax gains (losses) related to foreign currency derivatives that will be reclassified from accumulated OCI to earnings for the next 12 -month period ending December 31, 2018 total $(23) million .

### Derivative Financial Statement Presentation and Amounts

The Company enters into energy-related and interest rate derivative contracts that may contain provisions that permit intra-contract netting of derivative receivables and payables for routine billing and offsets related to events of default and settlements. Fair value amounts of derivative assets and liabilities on the consolidated balance sheets are presented net to the extent that there are netting arrangements or similar agreements with counterparties.

At December 31, 2017 and 2016 , the fair value of energy-related, interest rate, and foreign currency derivatives reflected in the consolidated balance sheets is as follows:

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

| | 2017 | | 2016 | |
|---|---|---|---|---|
| **Derivative Category and Balance Sheet Location** | **Assets** | **Liabilities** | Assets | Liabilities |
| | | *(in millions)* | | |
| **Derivatives designated as hedging instruments in cash flow and fair value hedges** | | | | |
| Energy-related derivatives: | | | | |
| Other current assets/Other current liabilities | **$ 3** | **$ 11** | $ 18 | $ 4 |
| Foreign currency derivatives: | | | | |
| Other current assets/Other current liabilities | **—** | **23** | — | 25 |
| Other deferred charges and assets/Other deferred credits and liabilities | **129** | **—** | — | 33 |
| **Total derivatives designated as hedging instruments in cash flow and fair value hedges** | **$ 132** | **$ 34** | $ 18 | $ 62 |
| **Derivatives not designated as hedging instruments** | | | | |
| Energy-related derivatives: | | | | |
| Other current assets/Other current liabilities | **$ —** | **$ 2** | $ 3 | $ 1 |
| Interest rate derivatives: | | | | |
| Other current assets/Other current liabilities | **—** | **—** | 1 | — |
| **Total derivatives not designated as hedging instruments** | **$ —** | **$ 2** | $ 4 | $ 1 |
| **Gross amounts of recognized assets and liabilities** | **$ 132** | **$ 36** | $ 22 | $ 63 |
| **Gross amounts offset** | **$ (3)** | **$ (3)** | $ (5) | $ (5) |
| **Net amounts of assets and liabilities** | **$ 129** | **$ 33** | $ 17 | $ 58 |

For the years ended December 31, 2017 , 2016 , and 2015 , the pre-tax effects of energy-related, interest rate, and foreign currency derivatives designated as cash flow hedging instruments on the consolidated statements of income were as follows:

| Derivatives in Cash Flow Hedging Relationships | Gain (Loss) Recognized in OCI on Derivative (Effective Portion) | | | Gain (Loss) Reclassified from AOCI into Income (Effective Portion) | | | |
|---|---|---|---|---|---|---|---|
| **Derivative Category** | **2017** | 2016 | 2015 | **Statements of Income Location** | **2017** | 2016 | 2015 |
| | | *(in millions)* | | | | *(in millions)* | |
| Energy-related derivatives | **$ (38)** | $ 14 | $ — | Amortization | **$ (17)** | $ 2 | $ — |
| Interest rate derivatives | **—** | — | — | Interest expense, net of amounts capitalized | **—** | (1) | (1) |
| Foreign currency derivatives | **140** | (58) | — | Interest expense, net of amounts capitalized | **(23)** | (13) | — |
| | | | | Other income (expense), net | **159** | (82) | — |
| Total | **$ 102** | $ (44) | $ — | | **$ 119** | $ (94) | $ (1) |

There was no material ineffectiveness recorded in earnings for any period presented.

The pre-tax effects of energy-related derivatives and interest rate derivatives not designated as hedging instruments on the Company's consolidated statements of income were not material for any year presented.

**Contingent Features**

The Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain derivatives that could require collateral, but not accelerated payment, in the event of various credit rating changes of certain affiliated companies. At December 31, 2017 , there was no collateral posted with the Company's derivative counterparties.

At December 31, 2017 , the fair value of derivative liabilities with contingent features was $8 million . However, the fair value of derivative liabilities with contingent features, including certain agreements that could require collateral in the event that one or more Southern Company system power pool participants has a credit rating change to below investment grade because of joint and several liability features underlying these derivatives, was $12 million at December 31, 2017 .

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. If collateral is required, fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral are not offset against fair value amounts recognized for derivatives executed with the same counterparty.

The Company maintains accounts with certain regional transmission organizations to facilitate financial derivative transactions. Based on the value of the positions in these accounts and the associated margin requirements, the Company may be required to post collateral. At December 31, 2017 , cash collateral posted was immaterial.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company only enters into agreements and material transactions with counterparties that have investment grade credit ratings by Moody's and S&P or with counterparties who have posted collateral to cover potential credit exposure. The Company has also established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk. Therefore, the Company does not anticipate a material adverse effect on the financial statements as a result of counterparty nonperformance.

## 10. NONCONTROLLING INTERESTS

In April 2017, approximately $114 million was reclassified from redeemable noncontrolling interests to non-redeemable noncontrolling interests due to the expiration of an option allowing SunPower Corporation to require the Company to purchase its redeemable noncontrolling interest at fair market value. In addition, Turner Renewable Energy, LLC owned a 10% redeemable noncontrolling interest in certain of the Company's solar facilities. These noncontrolling interests were redeemed in October 2017 at fair market value pursuant to the partnership agreement. As of December 31, 2017 , there were no outstanding redeemable noncontrolling interests.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The following table presents the changes in redeemable noncontrolling interests for the years ended December 31:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Beginning balance | $ 164 | $ 43 | $ 39 |
| Net income attributable to redeemable noncontrolling interests | 2 | 4 | 2 |
| Distributions to redeemable noncontrolling interests | (2) | (1) | — |
| Capital contributions from redeemable noncontrolling interests | 2 | 118 | 2 |
| Redemption of redeemable noncontrolling interests | (59) | — | — |
| Reclassification to non-redeemable noncontrolling interests | (114) | — | — |
| Change in fair value of redeemable noncontrolling interests | 7 | — | — |
| Ending balance | $ — | $ 164 | $ 43 |

The following table presents the attribution of net income to the Company and the noncontrolling interests for the years ended December 31:

| | 2017 | 2016 | 2015 |
|---|---|---|---|
| | | *(in millions)* | |
| Net income | $ 1,117 | $ 374 | $ 229 |
| Less: Net income attributable to noncontrolling interests | 44 | 32 | 12 |
| Less: Net income attributable to redeemable noncontrolling interests | 2 | 4 | 2 |
| Net income attributable to the Company | $ 1,071 | $ 338 | $ 215 |

## 11. ACQUISITIONS

During 2017 and 2016 , in accordance with its overall growth strategy, the Company or one of its wholly-owned subsidiaries, acquired or contracted to acquire the projects discussed below. Also, in March 2016, the Company acquired an additional 15% interest in Desert Stateline, 51% of which was initially acquired in 2015. As a result, the Company and the class B member are now entitled to 66% and 34% , respectively, of all cash distributions from Desert Stateline. In addition, the Company will continue to be entitled to substantially all of the federal tax benefits with respect to the transaction. Acquisition-related costs were expensed as incurred and were not material for any of the years presented.

The following table presents the Company's acquisition activity for the year ended, and subsequent to, December 31, 2017.

| Project Facility | Resource | Seller, Acquisition Date | Approximate Nameplate Capacity ( *MW* ) | Location | Ownership Percentage | Actual / Expected COD | PPA Contract Period |
|---|---|---|---|---|---|---|---|
| **Business Acquisitions During the Year Ended December 31, 2017** | | | | | | | |
| Bethel | Wind | Invenergy Wind Global LLC, January 6, 2017 | 276 | Castro County, TX | 100% | January 2017 | 12 years |
| Cactus Flats [(a)] | Wind | RES America Developments, Inc., July 31, 2017 | 148 | Concho County, TX | 100% | Third quarter 2018 | 12 years and 15 years |
| **Asset Acquisitions Subsequent to December 31, 2017** | | | | | | | |
| Gaskell West 1 | Solar | Recurrent Energy Development Holdings, LLC, January 26, 2018 | 20 | Kern County, CA | 100% of Class B [(b)] | March 2018 | 20 years |

(a) On July 31, 2017, the Company purchased 100% of the Cactus Flats facility and commenced construction. Upon placing the facility in service, the Company expects to close on a tax equity partnership agreement that has already been executed, subject to various customary conditions at closing, and will then own 100% of the class B membership interests.

(b) The Company owns 100% of the class B membership interest under a tax equity partnership agreement.

**Business Acquisitions During the Year Ended December 31, 2017**

The Company's aggregate purchase price for acquisitions during the year ended December 31, 2017 was $539 million . The fair values of the assets acquired and liabilities assumed were finalized in 2017 and recorded as follows:

| | | 2017 |
|---|---|---|
| | | *(in millions)* |
| Restricted cash | $ | 16 |
| CWIP | | 534 |
| Other assets | | 5 |
| Accounts payable | | (16) |
| Total purchase price | $ | 539 |

In 2017, total revenues of $15 million and net income of $17 million , primarily as a result of PTCs, was recognized in the consolidated statements of income by the Company related to the 2017 acquisitions. The Bethel facility did not have operating revenues or activities prior to completion of construction and being placed in service, and the Cactus Flats facility is still under construction. Therefore, supplemental pro forma information as though the acquisitions occurred as of the beginning of 2017 and for the comparable 2016 period is not meaningful and has been omitted.

**Construction Projects in Progress**

During the year ended December 31, 2017 , in accordance with its overall growth strategy, the Company continued construction on the 345 -MW Mankato expansion project and commenced construction on the Cactus Flats facility. Total aggregate construction costs for these facilities, excluding acquisition costs and including construction costs to complete the subsequently-acquired Gaskell West 1 solar project, are expected to be between $385 million and $430 million . At December 31, 2017 , construction costs included in CWIP related to these projects totaled $188 million . The ultimate outcome of these matters cannot be determined at this time.

**Development Projects**

During 2017, as part of the Company's renewable development strategy, the Company purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for various development and construction projects, up to 900 MWs in total. Once these wind projects reach commercial operations, which is expected in 2021, they are expected to qualify for 80% PTCs.

During 2016, the Company entered into a joint development agreement with Renewable Energy Systems Americas, Inc. to develop and construct approximately 3,000 MWs of wind projects expected to be placed in service between 2018 and 2020. In addition, in 2016, the Company purchased wind turbine equipment from Siemens Wind Power, Inc. and Vestas-American Wind Technology, Inc. to be used for construction of the facilities. Once these wind projects reach commercial operations, they are expected to qualify for 100% PTCs.

The ultimate outcome of these matters cannot be determined at this time.

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

The following table presents the Company's acquisitions for the year ended December 31, 2016 .

| Project Facility | Resource | Seller, Acquisition Date | Approximate Nameplate Capacity ( *MW* ) | Location | Ownership Percentage | Actual COD | PPA Contract Period |
|---|---|---|---|---|---|---|---|
| **Acquisitions for the Year Ended December 31, 2016** | | | | | | | |
| Boulder 1 | Solar | SunPower Corporation, November 16, 2016 | 100 | Clark County, NV | 51% [(a)] | December 2016 | 20 years |
| Calipatria | Solar | Solar Frontier Americas Holding LLC, February 11, 2016 | 20 | Imperial County, CA | 100% [(b)] | February 2016 | 20 years |
| East Pecos | Solar | First Solar, Inc., March 4, 2016 | 120 | Pecos County, TX | 100% | March 2017 | 15 years |
| Grant Plains | Wind | Apex Clean Energy Holdings, LLC, August 26, 2016 | 147 | Grant County, OK | 100% | December 2016 | 20 years and 12 years [(c)] |
| Grant Wind | Wind | Apex Clean Energy Holdings, LLC, April 7, 2016 | 151 | Grant County, OK | 100% | April 2016 | 20 years |
| Henrietta | Solar | SunPower Corporation, July 1, 2016 | 102 | Kings County, CA | 51% [(a)] | July 2016 | 20 years |
| Lamesa | Solar | RES America Developments Inc., July 1, 2016 | 102 | Dawson County, TX | 100% | April 2017 | 15 years |
| Mankato [(d)] | Natural Gas | Calpine Corporation, October 26, 2016 | 375 | Mankato, MN | 100% | N/A [(e)] | 10 years |
| Passadumkeag | Wind | Quantum Utility Generation, LLC, June 30, 2016 | 42 | Penobscot County, ME | 100% | July 2016 | 15 years |
| Rutherford | Solar | Cypress Creek Renewables, LLC, July 1, 2016 | 74 | Rutherford County, NC | 100% [(b)] | December 2016 | 15 years |
| Salt Fork | Wind | EDF Renewable Energy, Inc., December 1, 2016 | 174 | Donley and Gray Counties, TX | 100% | December 2016 | 14 years and 12 years |
| Tyler Bluff | Wind | EDF Renewable Energy, Inc., December 21, 2016 | 125 | Cooke County, TX | 100% | December 2016 | 12 years |
| Wake Wind | Wind | Invenergy Wind Global LLC, October 26, 2016 | 257 | Floyd and Crosby Counties, TX | 90.1% [(f)] | October 2016 | 12 years |

(a) The Company owns 100% of the class A membership interests and a wholly-owned subsidiary of the seller owns 100% of the class B membership interests. The Company and the class B member are entitled to 51% and 49% , respectively, of all cash distributions from the project. In addition, the Company is entitled to substantially all of the federal tax benefits with respect to the transaction.
(b) The Company originally purchased 90% , with a minority owner owning 10% . During 2017, the Company acquired the remaining 10% ownership interest. See Note 10 for additional information.
(c) In addition to the 20 -year and 12 -year PPAs, the facility has a 10 -year contract with Allianz Risk Transfer (Bermuda) Ltd.
(d) Under the terms of the PPA and the expansion PPA, approximately $442 million of assets, primarily related to property, plant, and equipment, are subject to lien at December 31, 2017.
(e) The acquisition included a fully operational 375 -MW natural gas-fired combined-cycle facility.
(f) The Company owns 90.1% , with the minority owner, Invenergy Wind Global LLC, owning 9.9% .

**NOTES (continued)**
**Southern Power Company and Subsidiary Companies 2017 Annual Report**

**Acquisitions During the Year Ended December 31, 2016**

The Company's aggregate purchase price for acquisitions during the year ended December 31, 2016 was approximately $2.3 billion . The total aggregate purchase price including minority ownership contributions and the assumption of non-recourse construction debt to the Company was approximately $2.6 billion for these acquisitions. In connection with the Company's 2016 acquisitions, allocations of the purchase price to individual assets were finalized during the year ended December 31, 2017 with no changes to amounts originally reported for Boulder 1, Grant Plains, Grant Wind, Henrietta, Mankato, Passadumkeag, Salt Fork, Tyler Bluff, and Wake Wind. The fair values of the assets and liabilities acquired through the business combinations were recorded as follows:

| | 2016 | |
|---|---|---|
| | *(in millions)* | |
| CWIP | $ | 2,354 |
| Property, plant, and equipment | | 302 |
| Intangible assets [(a)] | | 128 |
| Other assets | | 52 |
| Accounts payable | | (16) |
| Debt | | (217) |
| Total purchase price | $ | 2,603 |
| | | |
| Funded by: | | |
| The Company [(b)] [(c)] | $ | 2,345 |
| Noncontrolling interests [(d)] [(e)] | | 258 |
| Total purchase price | $ | 2,603 |

(a) Intangible assets consist of acquired PPAs that will be amortized over 10 - and 20 -year terms. The estimated amortization for future periods is approximately $9 million per year. See Note 1 for additional information.
(b) At December 31, 2016, $461 million is included in acquisitions payable on the consolidated balance sheets.
(c) Includes approximately $281 million of contingent consideration, of which $29 million was payable at December 31, 2017.
(d) Includes approximately $51 million of non-cash contributions recorded as capital contributions from noncontrolling interests in the consolidated statements of stockholders' equity.
(e) Includes approximately $142 million of contingent consideration, all of which had been paid at December 31, 2016 by the noncontrolling interests.

## 12. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for 2017 and 2016 is as follows:

| Quarter Ended | Operating Revenues | Operating Income | Income Tax (Benefit) | Net Income Attributable to the Company |
|---|---|---|---|---|
| | | | *(in millions)* | |
| **March 2017** | **$ 450** | **$ 65** | **$ (52)** | **$ 70** |
| **June 2017** | **529** | **112** | **(38)** | **82** |
| **September 2017** | **618** | **159** | **(39)** | **124** |
| **December 2017** (*) | **478** | **32** | **(810)** | **795** |
| | | | | |
| March 2016 | $ 315 | $ 47 | $ (23) | $ 50 |
| June 2016 | 373 | 81 | (41) | 89 |
| September 2016 | 500 | 134 | (102) | 176 |
| December 2016 | 389 | 28 | (29) | 23 |

(*) As a result of the Tax Reform Legislation, the Company recorded an income tax benefit of $ 743 million in the fourth quarter 2017. See Note 5 for additional information.

The Company's business is influenced by seasonal weather conditions.

(a) As a result of the Tax Reform Legislation, the Company recorded an income tax benefit of $743 million in 2017.

(b) A reclassification of debt issuance costs from Total Assets to Long-term debt of $11 million and $12 million is reflected for years 2014 and 2013, respectively, in accordance with new accounting standards adopted in 2015 and applied retrospectively.

(c) A reclassification of deferred tax assets from Total Assets of $306 million and $- million is reflected for years 2014 and 2013, respectively, in accordance with new accounting standards adopted in 2015 and applied retrospectively.

(d) Prior to the employee transfer in December 2017, the Company had no employees, but was billed employee related costs from SCS.

# SOUTHERN COMPANY GAS

# FINANCIAL SECTION

**MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

The management of Southern Company Gas (the Company) is responsible for establishing and maintaining an adequate system of internal control over financial reporting as required by the Sarbanes-Oxley Act of 2002 and as defined in Exchange Act Rule 13a-15(f). A control system can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

Under management's supervision, an evaluation of the design and effectiveness of the Company's internal control over financial reporting was conducted based on the framework in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2017 .

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholder and the Board of Directors of Southern Company Gas and Subsidiary Companies

**Opinion on the Financial Statements**

We have audited the accompanying consolidated balance sheets and consolidated statements of capitalization of Southern Company Gas and Subsidiary Companies (the Company) (a wholly-owned subsidiary of The Southern Company) as of December 31, 2017 and 2016 , the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows for the year ended December 31, 2017 and the six month periods ended June 30, 2016 (Predecessor) and December 31, 2016 (Successor), and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements (pages II-593 to II-651 ) present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016 , and the results of its operations and its cash flows for the year ended December 31, 2017 and the six months ended June 30, 2016 (Predecessor) and December 31, 2016 (Successor), in conformity with accounting principles generally accepted in the United States of America.

**Basis for Opinion**

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We did not audit the financial statements of Southern Natural Gas Company, L.L.C. (SNG), the Company's investment in which is accounted for by the use of the equity method. The accompanying consolidated financial statements of the Company include its equity investment in SNG of $1,262 million and $1,394 million as of December 31, 2017 and December 31, 2016 , respectively, and its earnings from its equity method investment in SNG of $88 million and $56 million for the year ended December 31, 2017 and the six months ended December 31, 2016, respectively. Those statements were audited by other auditors whose report (which expresses an unqualified opinion on SNG's financial statements and contains an emphasis of matter paragraph concerning the extent of its operations and relationships with affiliated entities) have been furnished to us, and our opinion, insofar as it relates to the amounts included for SNG, is based solely on the report of the other auditors. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits and the report of the other auditors provide a reasonable basis for our opinion.

/s/ Deloitte & Touche LLP
Atlanta, Georgia
February 20, 2018

We have served as the Company's auditor since 2016.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholder and the Board of Directors of Southern Company Gas and Subsidiary Companies

In our opinion, the consolidated statement of income, comprehensive income, common stockholders' equity, and cash flows present fairly, in all material respects, the results of operations and cash flows of Southern Company Gas (formerly AGL Resources Inc.) and its subsidiaries for the year ended December 31, 2015, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule for the year ended December 31, 2015 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and the financial statement schedule based on our audit. We conducted our audit of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

## OVERVIEW

### Business Activities

Southern Company Gas is an energy services holding company whose primary business is the distribution of natural gas through utilities in seven states – Illinois, Georgia, Virginia, New Jersey, Florida, Tennessee, and Maryland. Southern Company Gas and its subsidiaries (the Company) are also involved in several other complementary businesses.

The Company has four reportable segments – gas distribution operations, gas marketing services, wholesale gas services, and gas midstream operations – and one non-reportable segment, all other. See Note 12 to the financial statements for additional information.

Many factors affect the opportunities, challenges, and risks of the Company's business. These factors include the ability to maintain safety, to maintain constructive regulatory environments, to maintain and grow natural gas sales and number of customers, and to effectively manage and secure timely recovery of costs. These costs include those related to projected long-term demand growth, environmental standards, reliability, natural gas, and capital expenditures, including updating and expanding the natural gas distribution systems. The natural gas distribution utilities have various regulatory mechanisms that operate to address cost recovery. Effectively operating pursuant to these regulatory mechanisms and appropriately balancing required costs and capital expenditures with customer prices will continue to challenge the Company for the foreseeable future.

### Merger, Acquisition, and Disposition Activities

On July 1, 2016, the Company completed the Merger, pursuant to which the Company became a wholly-owned subsidiary of Southern Company. Southern Company accounted for the Merger using the acquisition method of accounting whereby the assets acquired and liabilities assumed were recognized at fair value as of the acquisition date. Pushdown accounting was applied to create a new cost basis for the Company's assets, liabilities, and equity as of the acquisition date. Accordingly, the successor financial statements reflect the new basis of accounting, and successor and predecessor period financial results (separated by a heavy black line) are presented, but are not comparable. As a result of the application of acquisition accounting, certain discussions herein include disclosure of the predecessor and successor periods. See Note 11 to the financial statements under "Merger with Southern Company" for additional information.

In September 2016, the Company paid approximately $1.4 billion to acquire a 50% equity interest in SNG, which is the owner of a 7,000 -mile pipeline system connecting natural gas supply basins in Texas, Louisiana, Mississippi, and Alabama to markets in Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina, and Tennessee. The investment in SNG is accounted for using the equity method. On March 31, 2017, the Company made an additional $50 million contribution to maintain its 50% equity interest in SNG. See Note 4 to the financial statements under "Equity Method Investments – SNG" and Note 11 to the financial statements under "Investment in SNG" for additional information.

In October 2016, the Company completed its purchase of Piedmont's 15% interest in SouthStar for $160 million . See Note 4 to the financial statements under "Variable Interest Entities" for additional information.

On October 15, 2017, the Company's subsidiary, Pivotal Utility Holdings, entered into agreements for the sale of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. for a total cash purchase price of $1.7 billion. As of December 31, 2017, the net book value of the assets to be disposed of in the sale was approximately $1.3 billion, which includes approximately $0.5 billion of goodwill. The goodwill is not deductible for tax purposes and, as a result, a deferred tax liability has not yet been provided. Through the completion of the asset sales, the Company intends to invest less than $0.1 billion in capital additions required for ordinary business operations of these assets. The completion of each asset sale is subject to the satisfaction or waiver of certain conditions, including, among other customary closing conditions, the receipt of required regulatory approvals, including the FERC, the Federal Communications Commission, the New Jersey BPU, and, with respect to the sale of Elkton Gas, the Maryland PSC. The Company and South Jersey Industries, Inc. made joint filings on December 22, 2017 and January 16, 2018 with the New Jersey BPU and the Maryland PSC, respectively, requesting regulatory approval. The asset sales are expected to be completed by the end of the third quarter 2018.

The ultimate outcome of these matters cannot be determined at this time.

### Operating Metrics

The Company continues to focus on several operating metrics, including Heating Degree Days, customer count, and volumes of natural gas sold.

The Company measures weather and the effect on its business using Heating Degree Days. Generally, increased Heating Degree Days result in higher demand for natural gas on the Company's distribution system. With the exception of the Company's utilities in Illinois and Florida, the Company has various regulatory mechanisms, such as weather normalization and straight-fixed-variable rate design, which limit its exposure to weather changes within typical ranges in each of its utilities' respective service territory. However, the utility customers in Illinois and the gas marketing services customers primarily in Georgia, Illinois, and Ohio can be impacted by warmer- or colder-than-normal weather. The Company utilizes weather hedges to reduce negative earnings impact in the event of warmer-than-normal weather, while retaining most of the earnings upside for these businesses.

The number of customers served by gas distribution operations and gas marketing services can be impacted by natural gas prices, economic conditions, and competition from alternative fuels. Gas marketing services' customers are primarily located in Georgia, Illinois, and Ohio.

The Company's natural gas volume metrics for gas distribution operations and gas marketing services illustrate the effects of weather and customer demand for natural gas. Wholesale gas services' physical sales volumes represent the daily average natural gas volumes sold to its customers.

See RESULTS OF OPERATIONS herein for additional information on these operating metrics.

**Seasonality of Results**

During the Heating Season, natural gas usage and operating revenues are generally higher as more customers are connected to the gas distribution systems and natural gas usage is higher in periods of colder weather. Occasionally in the summer, wholesale gas services' operating revenues are impacted due to peak usage by power generators in response to summer energy demands. The Company's base operating expenses, excluding cost of natural gas, bad debt expense, and certain incentive compensation costs, are incurred relatively evenly throughout the year. Seasonality also affects the comparison of certain balance sheet items across quarters, including receivables, unbilled revenues, natural gas for sale, and notes payable. However, these items are comparable when reviewing the Company's annual results. Thus, the Company's operating results can vary significantly from quarter to quarter as a result of seasonality, which is illustrated in the table below.

| | Percent Generated During Heating Season | | |
|---|---|---|---|
| | **Operating Revenues** | **EBIT** | **Net Income** |
| **Successor - 2017** | 67.3% | 69.6% | 73.7% |
| Successor - July 1, 2016 through December 31, 2016 | 67.1% | 81.5% | 96.5% |
| Predecessor - January 1, 2016 through June 30, 2016 | 70.0% | 107.0% | 138.9% |
| Predecessor - 2015 | 68.1% | 77.3% | 85.0% |

**Earnings**

Net income attributable to the Company for the successor year ended December 31, 2017 was $243 million , which included net income of $53 million from the Company's investment in SNG (including $18 million related to a non-cash charge recorded by SNG to establish a regulatory liability associated with the Tax Reform Legislation) and $44 million generated from the Company's continued investment in infrastructure replacement programs and base rate increases at Atlanta Gas Light, Elizabethtown Gas, and Virginia Natural Gas, less the associated increases in depreciation. Net income also reflects $130 million of additional tax expense resulting from the revaluation of deferred tax assets of $93 million related to the Tax Reform Legislation and $37 million associated with State of Illinois income tax legislation enacted in the third quarter 2017 and new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings. Also included in net income was $17 million of additional expense resulting from the pushdown of acquisition accounting. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Notes 5 and 11 to the financial statements for additional information.

Net income attributable to the Company for the successor period of July 1, 2016 through December 31, 2016 was $114 million , which included $26 million in earnings from the SNG investment, net of related interest expense, partially offset by $12 million of additional expense resulting from the impact of the pushdown of acquisition accounting and $27 million of Merger-related expenses.

Net income attributable to the Company for the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were $131 million and $353 million , respectively, which included $41 million and $26 million , respectively, of Merger-related expenses, and $14 million and $20 million, respectively, of net income attributable to the SouthStar noncontrolling interest, which the Company purchased in October 2016. Net income for the predecessor periods reflected higher revenues from continued investment in infrastructure programs, partially offset by warm weather, net of hedging, and low earnings from wholesale gas services due to mark-to-market losses.

**RESULTS OF OPERATIONS**

**Operating Results**

A condensed income statement for the Company follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Operating revenues | **$ 3,920** | $ 1,652 | $ 1,905 | $ 3,941 |
| Cost of natural gas and other sales | **1,630** | 623 | 769 | 1,645 |
| Other operations and maintenance | **940** | 482 | 454 | 928 |
| Depreciation and amortization | **501** | 238 | 206 | 397 |
| Taxes other than income taxes | **184** | 71 | 99 | 181 |
| Merger-related expenses | **—** | 41 | 56 | 44 |
| Total operating expenses | **3,255** | 1,455 | 1,584 | 3,195 |
| Operating income | **665** | 197 | 321 | 746 |
| Earnings from equity method investments | **106** | 60 | 2 | 6 |
| Interest expense, net of amounts capitalized | **200** | 81 | 96 | 175 |
| Other income (expense), net | **39** | 14 | 5 | 9 |
| Earnings before income taxes | **610** | 190 | 232 | 586 |
| Income taxes | **367** | 76 | 87 | 213 |
| Net Income | **243** | 114 | 145 | 373 |
| Less: Net income attributable to noncontrolling interest | **—** | — | 14 | 20 |
| Net Income Attributable to Southern Company Gas | **$ 243** | $ 114 | $ 131 | $ 353 |

***Operating Revenues***

Operating revenues for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 were $3.9 billion and $1.7 billion , respectively. For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, operating revenues were $1.9 billion and $3.9 billion , respectively.

For the successor year ended December 31, 2017 , natural gas revenues included recovery of $1.6 billion in cost of natural gas and $6 million in net revenues from wholesale gas services, net of $21 million of amortization associated with assets established in the application of acquisition accounting. Also included in natural gas revenues for the successor year ended December 31, 2017 were $99 million in additional revenues generated from gas distribution operations as a result of continued investment in infrastructure replacement programs and increases in base rate revenues at Atlanta Gas Light, Elizabethtown Gas, and Virginia Natural Gas. Natural gas revenues were partially offset by a $13 million negative impact of warmer-than-normal weather, net of hedging.

For the successor period of July 1, 2016 through December 31, 2016, natural gas revenues included recovery of $613 million in cost of natural gas and $24 million in net revenues from wholesale gas services, net of $5 million of amortization associated with assets established in the application of acquisition accounting. Natural gas revenues were partially offset by a $5 million decrease attributable to warmer-than-normal weather, net of hedging.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, natural gas revenues included recovery of $755 million and $1.6 billion , respectively, in cost of natural gas, as well as $32 million in net losses and $202 million in net revenues, respectively, from wholesale gas services. For the predecessor period of January 1, 2016 through June 30, 2016, natural gas revenues included a negative impact of $7 million attributable to warmer-than-normal weather, net of hedging. For the predecessor year ended December 31, 2015, natural gas revenues included a positive impact of $2 million also attributable to warmer-than-normal weather, net of hedging.

See "Segment Information" herein for additional information on wholesale gas services' revenues and losses.

Natural gas distribution rates include provisions to adjust billings for fluctuations in natural gas costs. Therefore, gas costs recovered through natural gas revenues generally equal the amount expensed in cost of natural gas and do not affect net income from gas distribution operations. See "Cost of Natural Gas" herein for additional information. Revenue impacts from weather and customer growth are described further below.

During Heating Season, natural gas usage and operating revenues are generally higher. Weather typically does not have a significant net income impact during the non-Heating Season. The following table presents the Heating Degree Days information for Illinois and Georgia, the primary locations where the Company's operations are impacted by weather.

| | Years Ended December 31, | | | | 2017 vs. normal | 2017 vs. 2016 | 2016 vs. 2015 |
|---|---|---|---|---|---|---|---|
| | Normal [(a)] | **2017** | 2016 | 2015 | **(warmer)** | **colder (warmer)** | (warmer) |
| | | *(in thousands)* | | | | | |
| Illinois [(b)] | 5,869 | **5,246** | 5,243 | 5,433 | **(10.6)%** | **0.1 %** | (3.5)% |
| Georgia | 2,614 | **1,970** | 2,175 | 2,204 | **(24.6)%** | **(9.4)%** | (1.3)% |

(a) Normal represents the 10-year average from January 1, 2007 through December 31, 2016 for Illinois at Chicago Midway International Airport and for Georgia at Atlanta Hartsfield-Jackson International Airport, based on information obtained from the National Oceanic and Atmospheric Administration, National Climatic Data Center.

(b) The 10-year average Heating Degree Days established by the Illinois Commission in Nicor Gas' 2009 rate case is 5,600 annually from 1998 through 2007.

The Company hedged its exposure to warmer-than-normal weather at Nicor Gas in Illinois; therefore, the weather-related negative pre-tax income impact on gas distribution operations was limited to $4 million ($2 million after tax), $1 million ($1 million after tax), $7 million ($5 million after tax), and a positive impact of $2 million ($1 million after tax) for the successor year ended December 31, 2017, the successor period of July 1, 2016 through December 31, 2016, the predecessor period of January 1, 2016 through June 30, 2016, and the predecessor year ended December 31, 2015, respectively.

The Company also hedged its exposure to warmer-than-normal weather at gas marketing services in Georgia and Illinois; therefore, the weather-related negative pre-tax income impact on gas marketing services was limited to $9 million ($5 million after tax) and $4 million ($3 million after tax) for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016, respectively. There was no weather impact for the predecessor period of January 1, 2016 through June 30, 2016 or the predecessor year ended December 31, 2015.

The following table provides the number of customers served by the Company for the periods presented:

| | December 31, | | |
|---|---|---|---|
| | **2017** [(a)] | 2016 [(a)] | 2015 [(b)] |
| | *(in thousands, except market share %)* | | |
| Gas distribution operations | **4,623** | 4,586 | 4,526 |
| Gas marketing services | | | |
| Energy customers [(c)] | **774** | 656 | 645 |
| Market share of energy customers in Georgia | **29.2%** | 29.6% | 29.7% |
| Service contracts | **1,184** | 1,198 | 1,171 |

(a) Includes customer and contract counts at December 31, 2017 and 2016.
(b) Includes average customer and contract counts for the year ended December 31, 2015.
(c) Includes approximately 140,000 customers at December 31, 2017 that were contracted to serve beginning April 1, 2017.

The Company anticipates overall customer growth trends at gas distribution operations to continue as it expects continued improvement in the new housing market and low natural gas prices. The Company uses a variety of targeted marketing programs to attract new customers and to retain existing customers.

Gas marketing services' market share in Georgia decreased at December 31, 2017 compared to the two prior years as a result of a highly competitive marketing environment, which is expected to continue for the foreseeable future. The Company will continue efforts at gas marketing services to enter into targeted markets and expand its energy customers and service contracts.

### *Cost of Natural Gas and Other Sales*

Natural gas costs are the largest expense for the Company. Excluding Atlanta Gas Light, which does not sell natural gas to end-use customers, gas distribution operations charges its utility customers for natural gas consumed using natural gas cost recovery mechanisms set by the applicable state regulatory agencies. Under these mechanisms, all prudently-incurred natural gas costs are passed through to customers without markup, subject to regulatory review. Gas distribution operations defers or accrues the difference between the actual cost of natural gas and the amount of commodity revenue earned in a given period. The deferred or accrued amount is either billed or refunded to customers prospectively through adjustments to the commodity rate. Deferred natural gas costs are reflected as regulatory assets and accrued natural gas costs are reflected as regulatory liabilities. Therefore, gas costs recovered through natural gas revenues generally equal the amount expensed in cost of natural gas and do not affect net income from gas distribution operations. Cost of natural gas at gas distribution operations represented 79.6% of total cost of natural gas for 2017.

Gas marketing services customers are charged for actual or estimated natural gas consumed. Cost of natural gas includes the cost of fuel, lost and unaccounted for gas, adjustments to reduce the value of inventories to market value, and gains and losses associated with certain derivatives.

Cost of natural gas was $1.6 billion for the successor year ended December 31, 2017 , which reflected an increase in natural gas pricing of 26.3% during the year compared to 2016, partially offset by lower demand for natural gas.

For the successor period of July 1, 2016 through December 31, 2016 , cost of natural gas was $613 million and reflected low demand for natural gas driven by warm weather in the fourth quarter 2016.

Cost of natural gas was $755 million and $1.6 billion for the predecessor period of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, respectively, and reflected low demand for natural gas driven by warm weather during those periods.

The following table details the volumes of natural gas sold during all periods presented.

| | **Year Ended December 31,** | | | **2017 vs. 2016** | 2016 vs. 2015 |
|---|---|---|---|---|---|
| | **2017** | 2016 | 2015 | **% Change** | % Change |
| Gas distribution operations *(mmBtu in millions)* | | | | | |
| Firm | **667** | 670 | 695 | **(0.4)%** | (3.6)% |
| Interruptible | **95** | 96 | 99 | **(1.0)%** | (3.0)% |
| Total | **762** | 766 | 794 | **(0.5)%** | (3.5)% |
| Gas marketing services *(mmBtu in millions)* | | | | | |
| Firm: | | | | | |
| Georgia | **23** | 34 | 35 | **(32.4)%** | (2.9)% |
| Illinois | **8** | 12 | 13 | **(33.3)%** | (7.7)% |
| Other emerging markets | **15** | 12 | 11 | **25.0 %** | 9.1 % |
| Interruptible large commercial and industrial | **11** | 14 | 14 | **(21.4)%** | — % |
| Total | **57** | 72 | 73 | **(20.8)%** | (1.4)% |
| Wholesale gas services | | | | | |
| Daily physical sales *(mmBtu in millions/day)* | **6.4** | 7.4 | 6.8 | **(13.5)%** | 8.8 % |

### *Other Operations and Maintenance Expenses*

For the successor year ended December 31, 2017 , other operations and maintenance expenses were $940 million and primarily reflected compensation and benefit costs and professional services, including pipeline compliance and maintenance and legal services.

For the successor period of July 1, 2016 through December 31, 2016, other operations and maintenance expenses were $482 million and primarily reflected compensation and benefit costs and professional services, including pipeline compliance and maintenance and legal services.

For the predecessor period of January 1, 2016 through June 30, 2016 , other operations and maintenance expenses were $454 million consistent with the level of expenses in the corresponding period in 2015.

For the predecessor year ended December 31, 2015, other operations and maintenance expenses were $928 million and included pipeline compliance and maintenance costs, compensation and benefit costs, and a $14 million goodwill impairment charge. See ACCOUNTING POLICIES – "Assessment of Assets" herein and Note 1 to the financial statements under "Goodwill and Other Intangible Assets and Liabilities" for additional information on the goodwill impairment charge.

***Depreciation and Amortization***

For the successor year ended December 31, 2017 , depreciation and amortization was $501 million and included $38 million of additional amortization of intangible assets as a result of fair value adjustments in acquisition accounting, primarily at gas marketing services and $28 million in additional depreciation at gas distribution operations, primarily due to continued investment in infrastructure programs.

For the successor period of July 1, 2016 through December 31, 2016, depreciation and amortization was $238 million and included $23 million of additional amortization of intangible assets as a result of fair value adjustments in acquisition accounting, primarily at gas marketing services, as well as depreciation at gas distribution operations due to continued investment in infrastructure programs.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , depreciation and amortization was $206 million and $397 million , respectively, and reflected depreciation related to additional assets placed in service at gas distribution operations due to continued investment in infrastructure programs.

See Notes 3 and 11 to the financial statements under " Regulatory Matters – Regulatory Infrastructure Programs" and "Merger with Southern Company," respectively, for additional information on infrastructure programs and the application of acquisition accounting.

***Taxes Other Than Income Taxes***

For the successor year ended December 31, 2017 , taxes other than income taxes were $184 million , which consisted primarily of revenue tax expenses, property taxes, and payroll taxes.

For the successor period of July 1, 2016 through December 31, 2016 , taxes other than income taxes were $71 million , which consisted primarily of revenue tax expenses, property taxes, and payroll taxes.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , taxes other than income taxes were $99 million and $181 million , respectively, which consisted primarily of revenue tax expenses, property taxes, and payroll taxes.

***Merger-Related Expenses***

There were no Merger-related expenses in the successor year ended December 31, 2017 .

For the successor period of July 1, 2016 through December 31, 2016 , Merger-related expenses were $41 million , including $18 million in rate credits provided to the customers of Elizabethtown Gas and Elkton Gas as conditions of the Merger, $20 million for additional compensation-related expenses, and $3 million for financial advisory fees, legal expenses, and other Merger-related costs.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, Merger-related expenses were $56 million and $44 million , respectively, including $31 million and $20 million, respectively, for financial advisory fees, legal expenses, and other Merger-related costs, and $25 million and $24 million, respectively, for additional compensation-related expenses.

See Note 11 to the financial statements under "Merger with Southern Company" for additional information.

***Earnings from Equity Method Investments***

For the successor year ended December 31, 2017 , earnings from equity method investments were $106 million , reflecting $88 million in earnings from the Company's investment in SNG, including $33 million related to a non-cash charge recorded by SNG to establish a regulatory liability associated with the Tax Reform Legislation, and $18 million in earnings from all other investments.

For the successor period of July 1, 2016 through December 31, 2016 , earnings from equity method investments were $60 million , reflecting $56 million in earnings from the Company's investment in SNG and $4 million in earnings from all other investments.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, earnings from equity method investments were not material.

See Notes 4 and 11 to the financial statements under "Equity Method Investments" and "Investment in SNG," respectively, for additional information on the Company's investment in SNG.

***Interest Expense, Net of Amounts Capitalized***

For the successor year ended December 31, 2017 , interest expense, net of amounts capitalized was $200 million , which includes the $38 million fair value adjustment on long-term debt in acquisition accounting. Interest expense also reflects debt issuances and redemptions during the period and the recognition of previously deferred interest related to regulatory infrastructure programs.

For the successor period of July 1, 2016 through December 31, 2016 , interest expense, net of amounts capitalized was $81 million , which includes the $19 million fair value adjustment on long-term debt in acquisition accounting. Interest expense also reflects debt issuances and redemptions during the period and the recognition of previously deferred interest related to regulatory infrastructure programs.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, interest expense, net of amounts capitalized was $96 million and $175 million , respectively, reflecting debt issuances and redemptions during the period and the recognition of previously deferred interest related to regulatory infrastructure programs.

See FUTURE EARNINGS POTENTIAL – "Unrecognized Ratemaking Amounts" herein for additional information on the unrecognized costs related to the infrastructure programs. Also see FINANCIAL CONDITION AND LIQUIDITY – "Financing Activities" herein and Note 6 to the financial statements for additional information on outstanding debt.

***Other Income (Expense), Net***

For the successor year ended December 31, 2017 , other income (expense), net was $39 million and primarily related to a $20 million gain from the settlement of contractor litigation claims, tax gross-up on contributions in aid of construction, and AFUDC. See Note 3 to the financial statements under "Regulatory Matters – PRP Settlement" for additional information on contractor litigation claims.

For the successor period of July 1, 2016 through December 31, 2016 , other income (expense), net was $14 million and primarily related to the tax gross-up of contributions in aid of construction received from customers.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, other income (expense), net was not material.

***Income Taxes***

For the successor year ended December 31, 2017 , income taxes were $367 million . The effective tax rate in 2017 reflects additional expense from the revaluation of deferred tax assets of $93 million associated with the Tax Reform Legislation and $37 million associated with State of Illinois income tax legislation enacted in the third quarter 2017 and new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings.

For the successor period of July 1, 2016 through December 31, 2016 , income taxes were $76 million . The effective tax rate during this period reflects certain nondeductible Merger-related charges.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, income taxes were $87 million and $213 million , respectively. The effective tax rate in both periods reflects certain nondeductible Merger-related expenses and other charges.

The effective tax rate for each period presented is consistent when adjusted for the additional expense recorded from the revaluation of deferred tax assets associated with the Tax Reform Legislation, the State of Illinois income tax legislation enacted in the third quarter 2017, the allocation of new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings in 2017, and the nondeductible Merger-related charges for each period in 2017, 2016, and 2015.

See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information.

**Noncontrolling Interest**

Prior to the October 2016 acquisition of Piedmont's 15% interest in SouthStar, net income attributable to noncontrolling interest was recorded on the statements of income and totaled $14 million and $20 million in the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, respectively. See Note 4 to the financial statements under

"Variable Interest Entities" for additional information.

**Effects of Inflation**

The Company is subject to rate regulation that is generally based on the recovery of historical and projected costs. The effects of inflation can create an economic loss since the recovery of costs could be in dollars that have less purchasing power. Any adverse effect of inflation on the Company's results of operations has not been substantial in recent years.

**Performance and Non-GAAP Measures**

Prior to the Merger, the Company evaluated segment performance using EBIT, which includes operating income, earnings from equity method investments, and other income (expense), net. EBIT excludes interest expense, net of amounts capitalized and income taxes (benefit), which were evaluated on a consolidated basis for those periods. EBIT is used herein to discuss the results of the Company's segments for the predecessor periods, as EBIT was the primary measure of segment profit or loss for those periods. Subsequent to the Merger, the Company changed its segment performance measure from EBIT to net income to better align with the performance measure utilized by Southern Company. EBIT for the year ended December 31, 2017 and the period of July 1, 2016 through December 31, 2016 presented herein is considered a non-GAAP measure. The Company also discusses consolidated EBIT, which is considered a non-GAAP measure for all periods presented. The presentation of consolidated EBIT is believed to provide useful supplemental information regarding a consolidated measure of profit or loss. The Company further believes the presentation of segment EBIT for the year ended December 31, 2017 and the period of July 1, 2016 through December 31, 2016 is useful as it allows for a measure of comparability to other companies with different capital and legal structures, which accordingly may be subject to different interest rates and effective tax rates. The applicable reconciliations of net income to consolidated EBIT and segment EBIT are provided herein.

Adjusted operating margin is a non-GAAP measure that is calculated as operating revenues less cost of natural gas, cost of other sales, and revenue tax expense. Adjusted operating margin excludes other operations and maintenance expenses, depreciation and amortization, taxes other than income taxes, and Merger-related expenses, which are included in the calculation of operating income as calculated in accordance with GAAP and reflected in the statements of income. The presentation of adjusted operating margin is believed to provide useful information regarding the contribution resulting from customer growth at gas distribution operations since the cost of natural gas and revenue tax expense can vary significantly and are generally billed directly to customers. The Company further believes that utilizing adjusted operating margin at gas marketing services, wholesale gas services, and gas midstream operations allows it to focus on a direct measure of performance before overhead costs. The applicable reconciliation of operating income to adjusted operating margin is provided herein.

EBIT and adjusted operating margin should not be considered alternatives to, or more meaningful indicators of, the Company's operating performance than net income attributable to the Company or operating income as determined in accordance with GAAP. In addition, the Company's adjusted operating margin may not be comparable to similarly titled measures of other companies.

See RESULTS OF OPERATIONS herein for information on the Company's financial performance.

Reconciliations of operating income to adjusted operating margin and net income attributable to Southern Company Gas to EBIT are as follows:

***Gas Distribution Operations***

Gas distribution operations is the largest component of the Company's business and is subject to regulation and oversight by agencies in each of the states it serves. These agencies approve natural gas rates designed to provide the Company with the opportunity to generate revenues to recover the cost of natural gas delivered to its customers and its fixed and variable costs, including depreciation, interest, maintenance, taxes, and overhead costs, and to earn a reasonable return on its investments.

With the exception of Atlanta Gas Light, the Company's second largest utility that operates in a deregulated natural gas market and has a straight-fixed-variable rate design that minimizes the variability of its revenues based on consumption, the earnings of the natural gas distribution utilities can be affected by customer consumption patterns that are a function of weather conditions, price levels for natural gas, and general economic conditions that may impact customers' ability to pay for natural gas consumed. The Company has various weather mechanisms, such as weather normalization mechanisms and weather derivative instruments, that limit its exposure to weather changes within typical ranges in its natural gas distribution utilities' service territories.

*Successor Year Ended December 31, 2017*

Net income of $353 million includes $1.8 billion in adjusted operating margin, $1.2 billion in operating expenses, and $34 million in other income (expense), net, which resulted in EBIT of $684 million . Net income also includes $153 million in interest expense, net of amounts capitalized and $178 million in income tax expense. Adjusted operating margin reflects $99 million in additional revenue from continued investment in infrastructure replacement programs and base rate increases at Atlanta Gas Light, Elizabethtown Gas, and Virginia Natural Gas. Adjusted operating margin was also affected by increased customer growth, partially offset by the negative impact of warmer-than-normal weather, net of hedging. Operating expenses reflect a $28 million increase in depreciation associated with additional assets placed in service, as well as benefit and compensation costs, legal expenses, and pipeline compliance and maintenance expenses. Other income (expense), net reflects a $20 million gain from the settlement of contractor litigation claims. Interest expense reflects the impact of intercompany promissory notes executed in December 2016 and the issuance of first mortgage bonds at Nicor Gas on August 10, 2017 and November 1, 2017. Income tax expense includes a $22 million benefit as a result of the Tax Reform Legislation.

See Note 3 to the financial statements under "Regulatory Matters – PRP Settlement" for additional information on contractor litigation claims. See FINANCIAL CONDITION AND LIQUIDITY – "Financing Activities" herein and Note 6 to the financial statements for additional information on debt issuances. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information.

*Successor Period of July 1, 2016 through December 31, 2016*

Net income of $77 million includes $817 million in adjusted operating margin, $595 million in operating expenses, and $11 million in other income (expense), net, resulting in EBIT of $233 million . Net income also includes $105 million in interest expense, net of amounts capitalized and $51 million in income tax expense. Adjusted operating margin reflects revenue from continued investment in infrastructure replacement programs, partially offset by the impact of warm weather, net of hedging. Operating expenses reflect the depreciation associated with additional assets placed in service, the related expenses associated with pipeline compliance and maintenance activities, and $18 million of rate credits provided to the customers of Elizabethtown Gas and Elkton Gas as conditions of the Merger. See Note 11 to the financial statements under "Merger with Southern Company" for additional information.

*Predecessor Period of January 1, 2016 through June 30, 2016*

EBIT of $353 million includes $911 million in adjusted operating margin, $560 million in operating expense, and $2 million in other income (expense), net. Adjusted operating margin reflects increased revenue from continued investment in infrastructure replacement programs and the impact of customer usage and growth, partially offset by the impact of warm weather, net of hedging. Operating expenses reflect the depreciation associated with additional assets placed in service.

*Predecessor Year Ended December 31, 2015*

EBIT of $581 million includes $1.7 billion in adjusted operating margin, $1.1 billion in operating expense, and $10 million in other income (expense), net. Adjusted operating margin reflects revenue from the continued investment in infrastructure replacement programs, the impact of customer usage and growth, and the impact of warm weather, net of hedging. Operating expenses reflect the depreciation associated with additional assets placed in service, as well as benefits and compensation costs.

***Gas Marketing Services***

Gas marketing services consists of several businesses that provide energy-related products and services to natural gas markets, including warranty sales. Gas marketing services is weather sensitive and uses a variety of hedging strategies, such as weather derivative instruments and other risk management tools, to partially mitigate potential weather impacts. Operating expenses primarily reflect employee costs, marketing, customer care, and bad debt expenses.

*Successor Year Ended December 31, 2017*

Net income of $84 million includes $313 million in adjusted operating margin and $200 million in operating expenses, which resulted in EBIT of $113 million . Net income also includes $5 million in interest expense, net of amounts capitalized and $24 million in income tax expense. Adjusted operating margin reflects a $9 million negative impact of warmer-than-normal weather, net of hedging, and $4 million in unrealized hedge losses, net of recoveries. Operating expenses includes $40 million in additional amortization of intangible assets established in the application of acquisition accounting. Income tax expense includes a $19 million benefit as a result of the Tax Reform Legislation. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information.

*Successor Period of July 1, 2016 through December 31, 2016*

Net income of $19 million includes $139 million in adjusted operating margin and $112 million in operating expenses, resulting in EBIT of $27 million . Net income also includes $1 million in interest expense, net of amounts capitalized and $7 million in income tax expense. Adjusted operating margin reflects a reduction of $5 million due to fair value adjustments to certain assets and liabilities in the application of acquisition accounting. Also reflected in adjusted operating margin are unrealized hedge gains and LOCOM adjustments. Operating expenses reflect $23 million in additional amortization of intangible assets, partially offset by a $2 million reduction in operations and maintenance expense due to fair value adjustments to certain assets and liabilities in the application of acquisition accounting. See Note 1 to the financial statements under "Natural Gas for Sale" for additional information on LOCOM adjustments and Note 11 to the financial statements for additional information on the Merger.

*Predecessor Period of January 1, 2016 through June 30, 2016*

EBIT of $109 million includes $190 million in adjusted operating margin and $81 million in operating expenses. Adjusted operating margin reflects $9 million in unrealized hedge gains. Operating expenses reflect lower bad debt, marketing, and depreciation and amortization, compared to the same period in the prior year. Earnings also include $14 million attributable to noncontrolling interest.

*Predecessor Year Ended December 31, 2015*

EBIT of $152 million includes $317 million in adjusted operating margin and $165 million in operating expenses. Adjusted operating margin reflects revenue from gas marketing and warranty sales, which were partially offset by the impact of warm weather, net of hedging. Operating expenses primarily reflect compensation and benefits costs. Earnings also include $20 million attributable to noncontrolling interest.

***Wholesale Gas Services***

Wholesale gas services is involved in asset management and optimization, storage, transportation, producer and peaking services, natural gas supply, natural gas services, and wholesale gas marketing. The Company has positioned the business to generate positive economic earnings on an annual basis even under low volatility market conditions that can result from a number of factors. When market price volatility increases, wholesale gas services is well positioned to capture significant value and generate stronger results. Wholesale gas services generated positive economic results for the successor year ended December 31, 2017, primarily reflecting lower volatility market conditions throughout the majority of 2017 and higher volatility along with the widening of locational and transportation spreads in December 2017 due to colder weather, as well as higher natural gas storage value resulting from higher natural gas prices.

*Successor Year Ended December 31, 2017*

Net loss of $57 million includes $5 million in adjusted operating margin, $56 million in operating expenses, and $1 million in other income (expense), net, which resulted in a loss before interest and taxes of $50 million . Also included are $7 million in interest expense, net of amounts capitalized. Adjusted operating margin reflects a decrease of $21 million due to fair value adjustments to certain assets and liabilities in the application of acquisition accounting. Also reflected in adjusted operating margin is revenue from commercial activity partially offset by mark-to-market losses. Income tax expense includes $21 million resulting from the revaluation of deferred income tax assets associated with the Tax Reform Legislation. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information on income taxes.

*Successor Period of July 1, 2016 through December 31, 2016*

Net income includes $24 million in adjusted operating margin, $26 million in operating expenses, and $2 million in other income (expense), net, resulting in no EBIT. Also included are $3 million in interest expense, net of amounts capitalized and $3 million in income tax benefit. Adjusted operating margin reflects a decrease of $5 million due to fair value adjustments to certain assets and liabilities in the application of acquisition accounting. Also reflected in adjusted operating margin are mark-to-market gains due to changes in natural gas prices in the fourth quarter 2016 and losses from commercial activity due to low volatility in natural gas prices and warm weather. Operating expenses reflect low incentive compensation expense due to low earnings.

*Predecessor Period of January 1, 2016 through June 30, 2016*

Loss before interest and taxes of $68 million includes $(36) million in adjusted operating margin, $33 million in operating expense, and $1 million in other income (expense), net. Adjusted operating margin reflects mark-to-market losses and LOCOM adjustments as a result of changes in natural gas prices and revenues from commercial activity driven by changes in price volatility. Operating expenses reflect lower incentive compensation expense as compared to the same period in the prior year due to lower earnings.

*Predecessor Year Ended December 31, 2015*

EBIT of $110 million includes $183 million in adjusted operating margin, $71 million in operating expenses, and $(2) million in other income (expense), net. Adjusted operating margin reflects revenue from commercial activity driven by changes in price volatility, mark-to-market gains, and LOCOM adjustments as a result of changes in natural gas prices.

The following table illustrates the components of wholesale gas services' adjusted operating margin for the periods presented:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Commercial activity recognized | **$ 116** | $ (15) | $ 34 | $ 140 |
| Gain (loss) on storage derivatives | **23** | (20) | (38) | 45 |
| Gain (loss) on transportation and forward commodity derivatives | **(113)** | 64 | (31) | 11 |
| LOCOM adjustments, net of current period recoveries | **—** | — | (1) | (13) |
| Purchase accounting adjustments to fair value inventory and contracts | **(21)** | (5) | — | — |
| Adjusted operating margin | **$ 5** | $ 24 | $ (36) | $ 183 |

*Change in Commercial Activity*

The commercial activity at wholesale gas services includes recognition of storage and transportation values that were generated in prior periods, which reflect the impact of prior period hedge gains and losses as associated physical transactions occur. Warmer-than-normal weather during the 2016/2017 Heating Season, lower power generation volumes, and build-out of new U.S. pipeline infrastructure, along with increases in natural gas supply, caused low volatility and a tightening of locational or transportation spreads throughout the majority of 2017, negatively impacting the amount of commercial activity revenues generated relative to demand fees for contracted pipeline transportation and storage capacity, and minimum sharing under asset management agreements. However, during December 2017, significantly colder weather increased natural gas price volatility and transportation spreads widened, enabling wholesale gas services to capture higher commercial activity. Further, as natural gas prices and forward storage or time spreads increased, wholesale gas services was able to capture higher storage values that it expects to recognize as commercial activity revenues when natural gas is physically withdrawn from storage.

*Change in Storage and Transportation Derivatives*

Volatility in the natural gas market arises from a number of factors, such as weather fluctuations or changes in supply or demand for natural gas in different regions of the U.S. The volatility of natural gas commodity prices has a significant impact on the Company's customer rates, long-term competitive position against other energy sources, and the ability of wholesale gas services to capture value from locational and seasonal spreads. Transportation and forward commodity derivative losses are primarily the result of widening transportation spreads during the fourth quarter 2017 due to significantly colder weather in the Northeast and Midwest U.S., which impacted forward prices at natural gas receipt and delivery points. Additionally, during 2017, forward storage or time spreads applicable to the locations of wholesale gas services' specific storage positions resulted in storage derivative gains.

The natural gas that the Company purchases and injects into storage is accounted for at the LOCOM value utilizing gas daily or spot prices at the end of the year. Wholesale gas services recorded LOCOM adjustments of $19 million for the predecessor year ended December 31, 2015. LOCOM adjustments for all other periods presented were immaterial. See Note 1 to the financial statements under "Natural Gas for Sale" for additional information.

*Withdrawal Schedule and Physical Transportation Transactions*

The expected natural gas withdrawals from storage and expected offset to prior hedge losses/gains associated with the transportation portfolio of wholesale gas services are presented in the following table, along with the net operating revenues expected at the time of withdrawal from storage and the physical flow of natural gas between contracted transportation receipt and delivery points. Wholesale gas services' expected net operating revenues exclude storage and transportation demand charges, as well as other variable fuel, withdrawal, receipt, and delivery charges, but are net of the estimated impact of profit sharing under its asset management agreements. Further, the amounts that are realizable in future periods are based on the inventory withdrawal schedule, planned physical flow of natural gas between the transportation receipt and delivery points, and forward natural gas prices at December 31, 2017. A portion of wholesale gas services' storage inventory and transportation capacity is economically hedged with futures contracts, which results in the realization of substantially fixed net operating revenues.

| | Storage Withdrawal | | |
|---|---|---|---|
| | **Total storage** (WACOG $2.66) | **Expected net operating gains** (a) | **Physical Transportation Transactions – Expected Net Operating Gains** (b) |
| | *(in mmBtu in millions)* | *(in millions)* | *(in millions)* |
| 2018 | **55.2** | **$ 14** | **$ 70** |
| 2019 and thereafter | **2.3** | **1** | **43** |
| Total at December 31, 2017 | **57.5** | **$ 15** | **$ 113** |

(a) Represents expected operating gains from planned storage withdrawals associated with existing inventory positions and could change as wholesale gas services adjusts its daily injection and withdrawal plans in response to changes in future market conditions and forward NYMEX price fluctuations. Also includes the impact of purchase accounting adjustments to reflect natural gas storage inventory at market value. Excluding the impact of these adjustments, the expected net operating gains at December 31, 2017 would have been $22 million.

(b) Represents the periods associated with the transportation derivative (gains) and losses during which the derivatives will be settled and the physical transportation transactions will occur that offset the derivative losses that were previously recognized.

***Gas Midstream Operations***

Gas midstream operations consists primarily of gas pipeline investments, with storage and fuels also aggregated into this segment. Gas pipeline investments include SNG, Horizon Pipeline, Atlantic Coast Pipeline, PennEast Pipeline, Dalton Pipeline, and Magnolia Enterprise Holdings, Inc. See Note 4 to the financial statements under "Equity Method Investments" for additional information.

*Successor Year Ended December 31, 2017*

Net income of $3 million includes $42 million in adjusted operating margin, $52 million in operating expenses, $103 million in earnings from equity method investments, consisting primarily of the Company's equity interest in SNG, including $33 million related to a non-cash charge recorded by SNG to establish a regulatory liability associated with the Tax Reform Legislation, and $4 million in other income, which resulted in EBIT of $97 million . Also included in net income are $33 million in interest expense, net of amounts capitalized and $61 million in income tax expense. Income tax expense includes $27 million resulting from the revaluation of deferred income tax assets associated with the Tax Reform Legislation and $8 million related to the allocation of new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information on income taxes.

*Successor Period of July 1, 2016 through December 31, 2016*

Net income of $20 million includes $19 million in adjusted operating margin, $26 million in operating expenses, $58 million in earnings from equity method investments, consisting primarily of the Company's September 2016 acquired equity interest in SNG, and $1 million in other income, resulting in EBIT of $52 million. Also included in net income are $16 million in interest expense, net of amounts capitalized and $16 million in income tax expense.

*Predecessor Periods of January 1, 2016 through June 30, 2016 and the Year Ended December 31, 2015*

Loss before interest and taxes for the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were $6 million and $23 million , respectively, and reflected a $14 million goodwill impairment charge in 2015.

***All Other***

All other includes the Company's investment in Triton, AGL Services Company, and Southern Company Gas Capital, as well as various corporate operating expenses that are not allocated to the reportable segments and interest income (expense) associated with affiliate financing arrangements.

*Successor Year Ended December 31, 2017*

Net loss of $140 million includes $10 million in adjusted operating margin and $47 million in operating expenses. Operating expenses included $26 million of integration-related costs. Interest expense, net of amounts capitalized was $2 million due to the intercompany promissory notes that were executed in December 2016. Income tax expense was $104 million and includes $86 million resulting from the revaluation of deferred tax assets associated with the Tax Reform Legislation and $29 million associated with State of Illinois tax legislation enacted during the third quarter 2017 and new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings. See FINANCIAL CONDITION AND LIQUIDITY – "Financing Activities" herein for additional financing information and FUTURE EARNINGS POTENTIAL – " Income Tax Matters " herein and Note 5 to the financial statements for additional information on income taxes.

*Successor Period of July 1, 2016 through December 31, 2016*

Operating expenses included Merger-related expenses of $41 million primarily comprised of compensation-related expenses, financial advisory fees, legal expenses, and other Merger-related costs and $8 million in expenses associated with certain benefit arrangements.

*Predecessor Periods of January 1, 2016 through June 30, 2016 and the Year Ended December 31, 2015*

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015, operating expenses included Merger-related expenses of $56 million and $44 million , respectively. These expenses are primarily comprised of financial advisory and legal expenses as well as additional compensation-related expenses, including acceleration of share-based compensation expenses, and change-in-control compensation charges. See Note 11 to the financial statements under "Merger with Southern Company" for additional information.

**Segment Reconciliations**

Reconciliations of net income attributable to Southern Company Gas to EBIT for the year ended December 31, 2017 and the period of July 1, 2016 through December 31, 2016, and operating income to adjusted operating margin for all periods presented, are in the following tables. See Note 12 to the financial statements for additional segment information.

| | Successor | | | | | | |
|---|---|---|---|---|---|---|---|
| | Year Ended December 31, 2017 | | | | | | |
| | Gas Distribution Operations | Gas Marketing Services | Wholesale Gas Services | Gas Midstream Operations | All Other | Intercompany Elimination | Consolidated |
| | *(in millions)* | | | | | | |

(a) Includes other operations and maintenance, depreciation and amortization, taxes other than income taxes, goodwill impairment in 2015, and Merger-related expenses.

(b) Nicor Gas' revenue tax expenses, which are passed through directly to customers.

## FUTURE EARNINGS POTENTIAL

### General

The results of operations for the past three years are not necessarily indicative of future earnings potential. The level of the Company's future earnings depends on numerous factors that affect the opportunities, challenges, and risks of the Company's primary business of natural gas distribution and its complementary businesses in the gas marketing services, wholesale gas services, and gas midstream operations sectors. These factors include the Company's ability to maintain a constructive regulatory environment that allows for the timely recovery of prudently-incurred costs, the completion and subsequent operation of ongoing infrastructure and other construction projects, creditworthiness of customers, the Company's ability to optimize its transportation and storage positions, and its ability to re-contract storage rates at favorable prices.

Future earnings will be driven primarily by customer growth and are subject to a variety of other factors. These factors include weather, competition, new energy contracts with other utilities and other wholesale customers, energy conservation practiced by customers, the use of alternative energy sources by customers, the price of natural gas, the price elasticity of demand, and the rate of economic growth or decline in the Company's service territories. Demand for natural gas is primarily driven by the pace of economic growth that may be affected by changes in regional and global economic conditions, which may impact future earnings.

Volatility of natural gas prices has a significant impact on the Company's customer rates, long-term competitive position against other energy sources, and the ability of its gas marketing services and wholesale gas services segments to capture value from locational and seasonal spreads. Additionally, changes in commodity prices subject a significant portion of the Company's operations to earnings variability. Over the longer term, volatility is expected to be low to moderate and locational and/or transportation spreads are expected to decrease as new pipelines are built to reduce the existing supply constraints in the shale areas of the Northeast U.S. To the extent these pipelines are delayed or not built, volatility could increase. Additional economic factors may contribute to this environment, including a significant drop in oil and natural gas prices, which could lead to consolidation of natural gas producers or reduced levels of natural gas production. Further, if economic conditions continue to improve, including the new housing market, the demand for natural gas may increase, which may cause natural gas prices to rise and drive higher volatility in the natural gas markets on a longer-term basis.

On December 22, 2017, the Tax Reform Legislation was signed into law and became effective on January 1, 2018, which among other things, reduces the federal corporate income tax rate to 21% and changes rates of depreciation and the business interest deduction. On July 6, 2017, the State of Illinois enacted tax legislation that repealed its non-combination tax rule and increased the effective corporate income tax rate effective July 1, 2017. In addition, Southern Company calculated new apportionment factors in several states to include the Company in its consolidated tax filings. See " Income Tax Matters " and FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" herein and Notes 3 and 5 to the financial statements for additional information.

As part of its business strategy, the Company regularly considers and evaluates joint development arrangements as well as acquisitions and dispositions of businesses and assets. On October 15, 2017, the Company's subsidiary Pivotal Utility Holdings entered into agreements for the sale of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc.; the asset sales are expected to be completed by the end of the third quarter 2018. Net income attributable to Elizabethtown Gas and Elkton Gas for the year ended December 31, 2017 was $34 million. However, due to the seasonal nature of the natural gas business and other factors including, but not limited to, weather, regulation, competition, customer demand, and general economic conditions, the 2017 net income is not necessarily indicative of the results to be expected for any other period. See BUSINESS – "Seasonality" in Item 1, RISK FACTORS in Item 1A, and Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for additional information.

**Environmental Matters**

The Company's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. The Company maintains a comprehensive environmental compliance strategy to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations may impact future results of operations, cash flows, and financial condition. A major portion of these compliance costs are expected to be recovered through existing ratemaking provisions. The ultimate impact of the environmental laws and regulations discussed below will depend on various factors, such as state adoption and implementation of requirements and the outcome of pending and/or future legal challenges.

New or revised environmental laws and regulations could affect many areas of the Company's operations. The impact of any such changes cannot be determined at this time. Environmental compliance costs could affect earnings if such costs cannot continue to be fully recovered in rates on a timely basis . Further, increased costs that are recovered through regulated rates could contribute to reduced demand for natural gas , which could negatively affect results of operations, cash flows, and financial condition. Additionally, many commercial and industrial customers may also be affected by existing and future environmental requirements, which for some may have the potential to ultimately affect their demand for natural gas . See Note 3 to the financial statements under "Environmental Matters" for additional information.

***Environmental Remediation***

The Company is subject to environmental remediation liabilities associated with 46 former MGP sites in five different states. The Company conducts studies to determine the extent of any required cleanup and has recognized the costs to clean up known impacted sites in its financial statements. Accrued environmental remediation costs totaling $388 million were included in the balance sheets at December 31, 2017 , $46 million of which is expected to be incurred over the next 12 months. The natural gas distribution utilities in Illinois, New Jersey, Georgia, and Florida have all received authority from their respective state regulators to recover approved environmental compliance costs through regulatory mechanisms, which covers substantially all of the total accrued remediation costs. See FINANCIAL CONDITION AND LIQUIDITY – " Capital Requirements and Contractual Obligations " herein for additional information.

***Water Quality***

In 2015, the EPA and the U.S. Army Corps of Engineers (Corps) jointly published a final rule that revised the regulatory definition of waters of the United States (WOTUS) for all Clean Water Act programs. The rule significantly expanded the scope of federal jurisdiction over waterbodies (such as rivers, streams, and canals), which could impact permitting and reporting requirements associated with the installation, expansion, and maintenance of pipeline projects. On July 27, 2017, the EPA and the Corps proposed to rescind the 2015 WOTUS rule. The WOTUS rule has been stayed by the U.S. Court of Appeals for the Sixth Circuit since late 2015, but on January 22, 2018, the U.S. Supreme Court determined that federal district courts have jurisdiction over the pending challenges to the rule. On February 6, 2018, the EPA and the Corps published a final rule delaying implementation of the 2015 WOTUS rule to 2020.

**FERC Matters**

The Company is involved in two significant pipeline construction projects within gas midstream operations. These projects, along with the Company's existing pipelines, are intended to provide diverse sources of natural gas supplies to customers, resolve current and long-term supply planning for new capacity, enhance system reliability, and generate economic development in the areas served. The following table provides an overview of these pipeline projects.

| | Miles of Pipe | Capital Expenditures | Ownership Interest |
|---|---|---|---|
| | | *(in millions)* | |
| Atlantic Coast Pipeline [(a)(b)] | 594 | $ 310 | 5% |
| PennEast Pipeline [(a)(c)] | 118 | 276 | 20% |
| Total | 712 | $ 586 | |

(a) Represents the Company's expected capital expenditures and ownership interest, which may change.

(b) In 2014, the Company entered into a joint venture to construct and operate a natural gas pipeline that will run from West Virginia through Virginia and into eastern North Carolina to meet the region's growing demand for natural gas. The proposed pipeline project is expected to transport natural gas to customers in Virginia. On October 13, 2017, the Atlantic Coast Pipeline project received FERC approval. The joint venture continues to work with state and other federal agencies to obtain the required environmental permits to begin construction.

(c) In 2014, the Company entered into a joint venture to construct and operate a natural gas pipeline that will transport low-cost natural gas from the Marcellus Shale area to customers in New Jersey. The Company believes this will alleviate takeaway constraints in the Marcellus region and help mitigate some of the price volatility experienced during recent winters. On January 19, 2018, the PennEast Pipeline project received FERC approval. The joint venture continues to work with state and other federal agencies to obtain the required environmental permits to begin construction.

On August 1, 2017, the Dalton Pipeline, which serves as an extension of the Transco pipeline system and provides additional natural gas supply to customers in Georgia, was placed in service. The Company has a 50% ownership interest in the Dalton Pipeline. See Note 4 to the financial statements for additional information.

On January 16, 2018, the Georgia PSC approved SNG's purchase of Georgia Power Company's natural gas lateral pipeline serving Plant McDonough Units 4 through 6 at net book value. Pursuant to this approval, legal transfer of the lateral pipeline is expected to occur in the fourth quarter 2018 and payment of $142 million is expected to occur in the first quarter 2020. During this interim period, Georgia Power Company will receive a discounted shipping rate to reflect the delayed consideration. Completion of this sale is contingent on certain conditions being satisfied by SNG that include, among other things, expansion of the existing lateral pipeline. The Company's portion of the expected capital expenditures for this project is $120 million. On February 15, 2018, FERC approval was obtained. The ultimate outcome of this matter cannot be determined at this time.

**Regulatory Matters**

***Utility Regulation and Rate Design***

The natural gas distribution utilities are subject to regulations and oversight by their respective state regulatory agencies for the rates charged to their customers, maintenance of accounting records, and various service and safety matters. Rates charged to customers vary according to customer class (residential, commercial, or industrial) and rate jurisdiction. These agencies approve rates designed to provide the opportunity to generate revenues to recover all prudently-incurred costs, including a return on rate base sufficient to pay interest on debt and provide a reasonable ROE. Rate base generally consists of the original cost of the utility plant in service, working capital, and certain other assets, less accumulated depreciation on the utility plant in service and net deferred income tax liabilities, and may include certain other additions or deductions.

The natural gas market for Atlanta Gas Light was deregulated in 1997. Accordingly, Marketers, rather than a traditional utility, sell natural gas to end-use customers in Georgia and handle customer billing functions. The Marketers file their rates monthly with the Georgia PSC. As a result of operating in a deregulated environment, Atlanta Gas Light's role includes:

- distributing natural gas for Marketers;
- constructing, operating, and maintaining the gas system infrastructure, including responding to customer service calls and leaks;
- reading meters and maintaining underlying customer premise information for Marketers; and
- planning and contracting for capacity on interstate transportation and storage systems.

Atlanta Gas Light earns revenue by charging rates to its customers based primarily on monthly fixed charges that are set by the Georgia PSC and adjusted periodically. The Marketers add these fixed charges when billing customers. This mechanism, called a straight-fixed-variable rate design, minimizes the seasonality of Atlanta Gas Light's revenues since the monthly fixed charge is not volumetric or directly weather dependent.

With the exception of Atlanta Gas Light, the earnings of the natural gas distribution utilities can be affected by customer consumption patterns that are largely a function of weather conditions and price levels for natural gas. Specifically, customer demand substantially increases during the Heating Season when natural gas is used for heating purposes. The Company has various mechanisms, such as weather normalization mechanisms and weather derivative instruments, at most of its utilities that limit exposure to weather changes within typical ranges in these utilities' respective service territories.

With the exception of Atlanta Gas Light, the natural gas distribution utilities are authorized by the relevant regulatory agencies in the states in which they serve to use natural gas cost recovery mechanisms that adjust rates to reflect changes in the wholesale cost of natural gas and ensure recovery of all costs prudently incurred in purchasing natural gas for customers. Since Atlanta Gas Light does not sell natural gas directly to its end-use customers, it does not utilize a traditional natural gas cost recovery mechanism. However, Atlanta Gas Light does maintain natural gas inventory for the Marketers in Georgia and recovers the cost through recovery mechanisms approved by the Georgia PSC specific to Georgia's deregulated market. In addition to natural gas recovery mechanisms, there are other cost recovery mechanisms, such as regulatory riders, which vary by utility but allow recovery of certain costs, such as those related to infrastructure replacement programs as well as environmental remediation and energy efficiency plans. In traditional rate designs, utilities recover a significant portion of the fixed customer service and pipeline infrastructure costs based on assumed natural gas volumes used by customers. Three of the utilities have decoupled regulatory mechanisms that the Company believes encourage conservation by separating the recoverable amount of these fixed costs from the amounts of natural gas used by customers. Natural gas cost recovery revenues are adjusted for differences in actual recoverable natural gas costs and amounts billed in current regulated rates. Changes in the billing factor will not have a significant effect on the Company's revenues or net income, but will affect cash flows. See Note 3 to the financial statements under " Regulatory Matters " for additional information.

The following table provides regulatory information for the Company's six largest natural gas distribution utilities:

| | Nicor Gas | Atlanta Gas Light | Elizabethtown Gas | Virginia Natural Gas | Florida City Gas | Chattanooga Gas |
|---|---|---|---|---|---|---|
| Authorized ROE [(a)(b)] | 9.80% | 10.75% | 9.60% | 9.50% | 11.25% | 10.05% |
| Weather normalization [(c)] | | | ✓ | ✓ | | ✓ |
| Decoupled, including straight-fixed-variable rates [(d)] | | ✓ | | ✓ | | ✓ |
| Regulatory infrastructure program rates [(e)] | ✓ | | | ✓ | ✓ | |
| Bad debt rider [(f)] | ✓ | | | ✓ | | ✓ |
| Energy efficiency plan [(g)] | ✓ | | ✓ | ✓ | ✓ | ✓ |
| Last decision on change in rates [(h)] | 2018 | 2017 | 2017 | 2017 | 2004 | 2010 |

(a) Represents the authorized ROE, or the midpoint of the authorized ROE range, at December 31, 2017 , except Nicor Gas which represents the authorized ROE established in the January 31, 2018 order issued by the Illinois Commission. The authorized ROE of Nicor Gas at December 31, 2017 was 10.17%. See "Base Rate Cases" herein and Note 3 to the financial statements under "Regulatory Matters – Base Rate Cases" for additional information.

(b) The authorized ROE range for Atlanta Gas Light, Virginia Natural Gas, and Florida City Gas was 10.55% - 10.95%, 9.00% - 10.00%, and 10.25% - 12.25%, respectively, at December 31, 2017 .

(c) Regulatory mechanisms that allow recovery of costs in the event of unseasonal weather, but are not direct offsets to the potential impacts on earnings of weather and customer consumption. These mechanisms are designed to help stabilize operating results by increasing base rate amounts charged to customers when weather is warmer than normal and decreasing amounts charged when weather is colder than normal.

(d) Recovery of fixed customer service costs separately from assumed natural gas volumes used by customers.

(e) Programs that update or expand distribution systems and LNG facilities.

(f) The recovery (refund) of bad debt expense over (under) an established benchmark expense. Virginia Natural Gas and Chattanooga Gas recover the gas portion of bad debt expense through their purchased gas adjustment mechanisms.

(g) Recovery of costs associated with plans to achieve specified energy savings goals.

(h) See "Base Rate Cases" herein and Note 3 to the financial statements under "Regulatory Matters – Base Rate Cases" for additional information.

### *Infrastructure Replacement Programs and Capital Projects*

The Company continues to focus on capital discipline and cost control while pursuing projects and initiatives that are expected to have current and future benefits to customers, provide an appropriate return on invested capital, and help ensure the safety and reliability of the utility infrastructure. Total capital expenditures incurred during 2017 for gas distribution operations were $1.3 billion . The following table and discussions provide updates on the infrastructure replacement programs at the natural gas distribution utilities, which are designed to update or expand the Company's distribution systems to improve reliability and meet operational flexibility and growth. The anticipated expenditures for these programs in 2018 are quantified in the discussion below.

| Utility | Program | Program Details | Recovery | Expenditures in 2017 | Expenditures Since Project Inception | Miles of Pipe Installed Since Project Inception | Scope of Program | Program Duration | Last Year of Program |
|---|---|---|---|---|---|---|---|---|---|
| | | | | *(in millions)* | | | *(miles)* | *(years)* | |
| Nicor Gas | Investing in Illinois | (a)(b) | Rider | $ 336 | $ 907 | 516 | 800 | 9 | 2023 |
| Atlanta Gas Light | Integrated Vintage Plastic Replacement Program (i-VPR) | (c)(i) | Base Rates | 50 | 251 | 782 | 756 | 4 | 2017 |
| Atlanta Gas Light | Integrated System Reinforcement Program (i-SRP) | (g)(i) | Base Rates | 76 | 446 | n/a | n/a | 8 | 2017 |
| Atlanta Gas Light | Integrated Customer Growth Program (i-CGP) | (h)(i) | Base Rates | 18 | 89 | n/a | n/a | 8 | 2017 |
| Chattanooga Gas | Bare Steel & Cast Iron | (e) | Base Rates | 3 | 43 | 94 | 111 | 10 | 2020 |
| Florida City Gas | Safety, Access and Facility Enhancement Program (SAFE) | (d) | Rider | 10 | 21 | 64 | 250 | 10 | 2025 |
| Florida City Gas | Galvanized Replacement Program | (f) | Base Rates | — | 16 | 80 | 111 | 17 | 2017 |
| Virginia Natural Gas | Steps to Advance Virginia's Energy (SAVE and SAVE II) | (a) | Rider | 34 | 156 | 255 | 496 | 10 | 2021 |
| Elizabethtown Gas | Aging Infrastructure Replacement (AIR) | (e) | Base Rates | 16 | 115 | 96 | 130 | 4 | 2017 |
| Total | | | | $ 543 | $ 2,044 | 1,887 | 2,654 | | |

(a) Replacement of cast iron, bare steel, mid-vintage plastic, and risk-based materials.
(b) Represents expenditures on qualifying infrastructure placed into service after December 9, 2014.
(c) Replacement of early vintage plastic, risk-based mid-vintage plastic, and mid-vintage neighborhood convenience.
(d) Replacement of four-inch and smaller mains, associated service lines, and in some instances above-ground facilities associated with rear-lot easements.
(e) Replacement of cast iron and bare steel pipes.
(f) Replacement of galvanized and X-Tube steel pipes. Reflects expenditures and miles of pipe installed since the Company acquired Florida City Gas in 2004.
(g) Installation of large diameter pressure improvement and system reinforcement projects.
(h) Installation of new business construction and strategic line extension.
(i) Recovery of the related program costs was incorporated in Atlanta Gas Light's petition for GRAM, which the Georgia PSC approved on February 21, 2017. See "Base Rate Cases" herein and Note 3 to the financial statements under "Regulatory Matters – Base Rate Cases" for additional information.

*Nicor Gas*

In 2013, Illinois enacted legislation that allows Nicor Gas to provide more widespread safety and reliability enhancements to its distribution system. The legislation stipulates that rate increases to customers as a result of any infrastructure investments shall not exceed a cumulative annual average of 4.0% or, in any given year, 5.5% of base rate revenues. In 2014, the Illinois

Commission approved the nine-year regulatory infrastructure program, Investing in Illinois, under which Nicor Gas implemented rates that became effective in March 2015. Nicor Gas expects to place into service $350 million of qualifying projects under Investing in Illinois in 2018 .

Investing in Illinois is subject to annual review by the Illinois Commission. In conjunction with the base rate case order issued by the Illinois Commission on January 31, 2018, Nicor Gas is recovering the portion of these program costs incurred prior to December 31, 2017 through base rates. See "Base Rate Cases" herein for additional information.

*Atlanta Gas Light*

Atlanta Gas Light's STRIDE program, which was initially approved by the Georgia PSC in 2009, is comprised of i-SRP, i-CGP, and i-VPR, and consists of infrastructure development, enhancement, and replacement programs that are used to update and expand distribution systems and LNG facilities, improve system reliability, and meet operational flexibility and growth. For 2017 and subsequent years, the recovery of and return on current and future capital investments under the STRIDE program are included in the annual base rate revenue adjustment under GRAM.

The i-CGP program authorized Atlanta Gas Light to spend $91 million through 2017 on projects to extend its pipeline facilities to serve customers in areas without pipeline access and create new economic development opportunities in Georgia. This program ended in 2017 and was replaced with a tariff to provide up to $15 million annually for Atlanta Gas Light to commit to strategic economic development projects.

The i-SRP program authorized $445 million of capital spending through 2017 for projects to upgrade Atlanta Gas Light's distribution system and LNG facilities in Georgia, improve its peak-day system reliability and operational flexibility, and create a platform to meet long-term forecasted growth. In August 2016, Atlanta Gas Light filed a petition with the Georgia PSC for approval of a four-year extension of its i-SRP seeking approval to invest an additional $177 million to improve and upgrade its core gas distribution system in years 2017 through 2020.

The i-VPR program authorized Atlanta Gas Light to spend $275 million through 2017 to replace 756 miles of aging plastic pipe that was installed primarily in the mid-1960s to the early 1980s. Atlanta Gas Light has identified approximately 3,300 miles of vintage plastic mains in its system that should be considered for potential replacement.

See "Base Rate Cases" herein for additional information on GRAM.

*Elizabethtown Gas*

Elizabethtown Gas' 2013 extension of the AIR enhanced infrastructure program allowed for infrastructure investment of $115 million over four years and was focused on the replacement of aging cast iron in its pipeline system. Carrying charges on the additional capital spend are being accrued and deferred for regulatory purposes at a weighted average cost of capital of 6.65%. Effective July 1, 2017, investments under this program, which ended September 30, 2017, are being recovered through base rate revenues. See "Base Rate Cases" herein for additional information.

In 2015, Elizabethtown Gas filed the Safety, Modernization and Reliability Tariff plan with the New Jersey BPU seeking approval to invest more than $1.1 billion to replace 630 miles of vintage cast iron, steel, and copper pipeline, as well as 240 regulator stations. During the first quarter 2018, Elizabethtown Gas withdrew this filing in response to a proposed rule by the New Jersey BPU to incentivize utilities to accelerate investment in infrastructure replacement programs that enhance reliability, resiliency, and/or safety of the distribution system. Elizabethtown Gas expects to file a revised plan during the second half of 2018. The ultimate outcome of this matter cannot be determined at this time.

*Virginia Natural Gas*

In 2012, the Virginia Commission approved the SAVE program, an accelerated infrastructure replacement program, to be completed over a five -year period. This program included a maximum allowance for capital expenditures of $25 million per year, not to exceed $105 million in total.

In March 2016, the Virginia Commission approved an extension to the SAVE program for Virginia Natural Gas to replace more than 200 miles of aging pipeline infrastructure and invest up to $30 million in 2016 and up to $35 million annually through 2021. Virginia Natural Gas expects to invest $35 million under this program in 2018 .

The SAVE program is subject to annual review by the Virginia Commission. In conjunction with the base rate case order issued by the Virginia Commission on December 21, 2017, Virginia Natural Gas is recovering the portion of these program costs incurred prior to September 1, 2017 through base rates. See "Base Rate Cases" herein for additional information.

*Florida City Gas*

In 2015, the Florida PSC approved Florida City Gas' SAFE, under which costs incurred for replacing aging pipes are recovered through a rate rider with annual adjustments and true-ups. Under the program, Florida City Gas is authorized to spend $105 million over a 10-year period on infrastructure relocation and enhancement projects. Florida City Gas expects to invest $10 million under this program in 2018 .

***PRP Settlement***

In 2015, Atlanta Gas Light received a final order from the Georgia PSC for a rate true-up of allowed unrecovered revenue through 2014 related to its PRP. This order allows Atlanta Gas Light to recover $144 million of the $178 million previously unrecovered program revenue. The remaining $34 million requested related primarily to previously unrecognized ratemaking amounts and did not have a material impact on the Company's financial statements. The Company also recognized $1 million of interest expense and $5 million in operations and maintenance expense related to the PRP on the Company's statements of income for the predecessor year ended December 31, 2015. See "Unrecognized Ratemaking Amounts" herein for additional information.

As a result of the PRP settlement, Atlanta Gas Light began recovering incremental PRP surcharge amounts through three phased in increases in addition to its already existing PRP surcharge amount, which was established to address recovery of the unrecovered PRP balance of $144 million in 2015 and the estimated amounts to be earned under the program through 2025. The initial incremental surcharge of approximately $15 million annually was effective in October 2015, with additional annual increases of approximately $15 million in each of October 2016 and 2017. The final increase scheduled for October 2017 was included in the implementation of GRAM in March 2017. The under recovered balance is the result of the continued revenue requirement earned under the program offset by the existing and incremental PRP surcharges. The unrecovered balance at December 31, 2017 was $187 million, including $104 million of unrecognized equity return. The PRP surcharge will remain in effect until the earlier of the full recovery of the under recovered amount or December 31, 2025. See "Base Rate Cases" herein for additional information on GRAM.

One of the capital projects under the PRP experienced construction issues and Atlanta Gas Light was required to complete mitigation work prior to placing it in service. These mitigation costs will be included in future base rates in 2018. Provisions in the order resulted in the recognition of $5 million in operations and maintenance expense for the predecessor year ended December 31, 2015 on the Company's statements of income. In 2017, Atlanta Gas Light recovered $20 million from the settlement of contractor litigation claims and continues to pursue contractual and legal claims against a third-party contractor. Mitigation costs recovered through the legal process are retained by Atlanta Gas Light. The ultimate outcome of this matter cannot be determined at this time.

***Base Rate Cases***

*Settled Base Rate Cases*

On February 21, 2017, the Georgia PSC approved GRAM and a $20 million increase in annual base rate revenues for Atlanta Gas Light, effective March 1, 2017. GRAM adjusts base rates annually, up or down, using an earnings band based on the previously approved ROE of 10.75% and does not collect revenue through special riders and surcharges. Atlanta Gas Light adjusts rates up to the lower end of the band of 10.55% and adjusts rates down to the higher end of the band of 10.95%. Various infrastructure programs previously authorized by the Georgia PSC under Atlanta Gas Light's STRIDE program, which include i-VPR and i-SRP, will continue under GRAM and the recovery of and return on the infrastructure program investments will be included in annual base rate adjustments. The Georgia PSC will review Atlanta Gas Light's performance annually under GRAM.

Pursuant to the GRAM approval, Atlanta Gas Light and the staff of the Georgia PSC agreed to a variation to the i-CGP that was formerly part of Atlanta Gas Light's STRIDE program. As a result, a new tariff was created, effective October 10, 2017, to provide up to $15 million annually for Atlanta Gas Light to commit to strategic economic development projects. Projects under this tariff must be approved by the Georgia PSC.

Beginning with the next rate adjustment in June 2018, Atlanta Gas Light's recovery of the previously unrecovered Pipeline Replacement Program revenue through 2014, as well as the mitigation costs associated with the Pipeline Replacement Program that were not previously included in its rates, will also be included in GRAM. In connection with the GRAM approval, the last monthly Pipeline Replacement Program surcharge increase became effective March 1, 2017.

On June 30, 2017, the New Jersey BPU approved a settlement that provides for a $13 million increase in annual base rate revenues, effective July 1, 2017, based on a ROE of 9.6%. Also included in the settlement was a new composite depreciation rate that is expected to result in a $3 million annual reduction of depreciation. See Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for information on the proposed sale of Elizabethtown Gas.

On December 21, 2017, the Virginia Commission approved a settlement for a $34 million increase in annual base rate revenues, effective September 1, 2017, including $13 million related to the recovery of investments under the SAVE program. See "Infrastructure Replacement Programs and Capital Projects" herein for additional information. An authorized ROE range of 9.0% to 10.0% with a midpoint of 9.5% will be used to determine the revenue requirement in any filing, other than for a change in base rates.

On January 31, 2018, the Illinois Commission approved a $137 million increase in annual base rate revenues, including $93 million related to the recovery of investments under the Investing in Illinois program, effective February 8, 2018, based on a ROE of 9.8%.

*Pending Base Rate Cases*

On October 23, 2017, Florida City Gas filed a general base rate case with the Florida PSC requesting a $19 million increase in annual base rate revenues. On January 29, 2018, Florida City Gas filed an update to incorporate the effects of the Tax Reform Legislation that, if approved, would reduce the requested base rate revenues by $4 million. The requested increase is based on a 2018 projected test year and a ROE of 11.25%. The requested increase includes $3 million related to the recovery of investments under SAFE that are currently being recovered through a surcharge. Additionally, Florida City Gas requested an interim rate increase of $5 million annually that was approved and became effective January 12, 2018, subject to refund. The Florida PSC is expected to rule on the requested increase in mid-2018.

On December 1, 2017, Atlanta Gas Light filed its 2018 annual rate adjustment with the Georgia PSC. If approved, annual base rate revenues will increase by $22 million, effective June 1, 2018. Atlanta Gas Light will file a revised rate adjustment to incorporate the effects of the Tax Reform Legislation in the first quarter 2018. The Georgia PSC is expected to rule on the revised requested increase in the second quarter 2018.

On February 15, 2018, Chattanooga Gas filed a general base rate case with the Tennessee Public Utility Commission requesting a $7 million increase in annual base rate revenues. The requested increase, which incorporated the effects of the Tax Reform Legislation, was based on a projected test year ending June 30, 2019 and a ROE of 11.25%. The Tennessee Public Utility Commission is expected to rule on the requested increase in the third quarter 2018.

The ultimate outcome of these pending base rate cases cannot be determined at this time.

***Other***

The New Jersey BPU, Virginia Commission, Tennessee Public Utility Commission, and Maryland PSC each issued an order effective January 1, 2018 that requires utilities in their respective states to track as a regulatory liability the impact of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of excess deferred income taxes. The New Jersey BPU's order requires Elizabethtown Gas to file by March 2, 2018 proposed revised base rates with an April 1, 2018 interim effective date and a July 1, 2018 final effective date. Virginia Natural Gas will address the Virginia Commission's order in its Annual Information Filing, which will be filed by July 1, 2018. The Tennessee Public Utility Commission's order required Chattanooga Gas to file proposals to reduce rates or make other ratemaking adjustments to account for the impact of the Tax Reform Legislation. Chattanooga Gas made the required filing as part of its February 15, 2018 general base rate case filing. The Maryland PSC's order required Elkton Gas to file an explanation of the impact of the Tax Reform Legislation on its expenses and revenues, as well as when and how it expects to pass through to its customers those effects. Elkton Gas made the required filing on February 15, 2018 and will reduce annual base rates by $0.1 million effective April 1, 2018. Credits will be issued to customers for the impact of the Tax Reform Legislation from January 2018 through March 2018.

The Illinois Commission issued an order effective January 25, 2018 that requires utilities in the state to record the impacts of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of excess deferred income taxes, as a regulatory liability. On February 20, 2018, the Illinois Commission granted Nicor Gas' application for rehearing to file revised base rates and tariffs, which Nicor Gas expects to file by the end of the second quarter 2018.

The ultimate outcome of these matters cannot be determined at this time.

***Asset Management Agreements***

All of the natural gas distribution utilities except Nicor Gas use asset management agreements with the Company's wholly-owned subsidiary, Sequent, for the primary purpose of reducing utility customers' gas cost recovery rates through payments to the utilities by Sequent. For Atlanta Gas Light, these payments are controlled by the Georgia PSC and are utilized for infrastructure improvements and to fund heating assistance programs, rather than as a reduction to gas cost recovery rates. Under these asset management agreements, Sequent supplies natural gas to the utility and markets available pipeline and storage capacity to improve the overall cost of supplying gas to the utility customers. Currently, the Company's utilities primarily purchase their gas from Sequent. The purchase agreements require Sequent to provide firm gas to the natural gas distribution utilities, but these natural gas distribution utilities maintain the right and ability to make their own long-term supply arrangements if they believe it is in the best interest of their customers.

Each agreement provides for Sequent to make payments to the natural gas distribution utilities through either an annual minimum guarantee within a profit sharing structure, a profit sharing structure without an annual minimum guarantee, or a fixed fee. From the inception of these agreements in 2001 through December 31, 2017 , Sequent made sharing payments to the natural gas distribution utilities under these agreements totaling $390 million .

The following table provides payments made by Sequent to the natural gas distribution utilities under these agreements during the last three years:

| | Successor | | Predecessor | | |
|---|---|---|---|---|---|
| | Total Amount Received | | Total Amount Received | | |
| | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 | Expiration Date |
| | *(in millions)* | | *(in millions)* | | |
| Elizabethtown Gas | **$ 11** | $ 3 | $ 12 | $ 28 | March 2019 |
| Virginia Natural Gas | **6** | 2 | 9 | 15 | March 2019 |
| Atlanta Gas Light | **4** | 1 | 6 | 15 | March 2020 |
| Florida City Gas | **1** | — | 1 | 1 | (a) |
| Chattanooga Gas | **1** | — | 1 | 1 | March 2021 |
| Total (b) | **$ 23** | $ 6 | $ 29 | $ 60 | |

(a) The agreement renews automatically each year unless terminated by either party.

(b) Payments made to Elkton Gas were less than $1 million for each of the periods presented.

Upon consummation of the asset sales of Elizabethtown Gas and Elkton Gas, South Jersey Industries, Inc. will assume the asset management agreements of Elizabethtown Gas and Elkton Gas. See Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for additional information on these sales.

***energySMART***

In 2014, the Illinois Commission approved Nicor Gas' energySMART through 2017, which outlined energy efficiency program offerings and therm reduction goals, and subsequently extended the program to 2021. Through December 31, 2017, Nicor Gas spent $107 million of the initial authorized expenditure of $113 million . A new four-year program began on January 1, 2018, with an additional authorized expenditure of $160 million. Nicor Gas expects to invest $40 million under this program in 2018 .

***Unrecognized Ratemaking Amounts***

The following table illustrates the Company's authorized ratemaking amounts that are not recognized on its balance sheets. These amounts are primarily composed of an allowed equity rate of return on assets associated with certain of the Company's regulatory infrastructure programs. These amounts will be recognized as revenues in the Company's financial statements in the periods they are billable to customers, the majority of which will be recovered by 2025.

| | **December 31, 2017** | December 31, 2016 |
|---|---|---|
| | *(in millions)* | |
| Atlanta Gas Light | **$ 104** | $ 110 |
| Virginia Natural Gas | **11** | 11 |
| Elizabethtown Gas (*) | **8** | 6 |
| Nicor Gas | **2** | 2 |
| Total | **$ 125** | $ 129 |

(*) See Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for information on the pending asset sale.

## Income Tax Matters

### *Federal Tax Reform Legislation*

On December 22, 2017, the Tax Reform Legislation was signed into law and became effective on January 1, 2018. The Tax Reform Legislation, among other things, reduces the federal corporate income tax rate to 21%, retains normalization provisions for public utility property and existing renewable energy incentives, and repeals the corporate alternative minimum tax.

For businesses other than regulated utilities, the Tax Reform Legislation allows 100% bonus depreciation of qualified property acquired and placed in service between September 28, 2017 and January 1, 2023 and phases down by 20% each year until completely phased out for qualified property placed in service after December 31, 2027. Further, the business interest deduction is limited to 30% of taxable income excluding interest, net operating loss (NOL) carryforwards, and depreciation and amortization through December 31, 2021 and thereafter to 30% of taxable income excluding interest and NOL carryforwards.

Regulated utility businesses, including the natural gas distribution companies, can continue deducting all business interest expense and are not eligible for bonus depreciation on capital assets acquired and placed in service after September 27, 2017. Projects with binding contracts before September 28, 2017 and placed in service after September 27, 2017 remain eligible for bonus depreciation under the Protecting Americans from Tax Hikes (PATH) Act.

In addition, under the the Tax Reform Legislation, NOLs generated after December 31, 2017 can no longer be carried back to previous tax years but can be carried forward indefinitely, with utilization limited to 80% of taxable income of the subsequent tax year.

For the year ended December 31, 2017, implementation of the Tax Reform Legislation resulted in an estimated net tax expense of $93 million and a $777 million increase in regulatory liabilities, primarily due to the impact of the reduction of the corporate income tax rate on deferred tax assets and liabilities .

The Tax Reform Legislation is subject to further interpretation and guidance from the IRS, as well as each respective state's adoption. In addition, the regulatory treatment of certain impacts of Tax Reform Legislation is subject to the discretion of the FERC and the relevant state regulatory bodies as further described in Note 3 to the financial statements under "Base Rate Cases" and "Other" for additional information.

See FINANCIAL CONDITION AND LIQUIDITY – "Credit Rating Risk" herein and Note 5 to the financial statements under " Current and Deferred Income Taxes " for additional information.

The ultimate outcome of these matters cannot be determined at this time.

### *Bonus Depreciation*

Under the Tax Reform Legislation, projects with binding contracts prior to September 28, 2017 and placed in service after September 27, 2017 remain eligible for bonus depreciation under the PATH Act. The PATH Act allowed for 50% bonus depreciation for 2015 through 2017, 40% bonus depreciation for 2018, and 30% bonus depreciation for 2019 and certain long-lived assets placed in service in 2020. Based on provisional estimates, bonus depreciation is expected to result in positive cash flows of approximately $200 million for the 2017 tax year and approximately $60 million for the 2018 tax year. Should Southern Company have a NOL in 2018, all of these cash flows may not be fully realized in 2018 . See Note 5 to the financial statements under "Current and Deferred Income Taxes" for additional information. The ultimate outcome of this matter cannot be determined at this time.

### *State Tax Reform Legislation*

On July 6, 2017, the State of Illinois enacted tax legislation that repealed its non-combination tax rule and increased the effective corporate income tax rate from 5.25% to 7.0% (making the total corporate tax rate 9.5% when combined with the 2.5% personal property replacement tax) effective July 1, 2017. In addition to increasing taxes on future earnings, this legislation required the Company to increase accumulated deferred income tax liabilities by $24 million during the third quarter 2017 to reflect these changes, of which $15 million was expensed and $9 million was recorded as a regulatory asset.

### *Change in State Apportionment Factors*

Southern Company calculated new apportionment factors in several states to include the Company in its consolidated tax filings, which resulted in $22 million of additional deferred income tax expenses in the successor year ended December 31, 2017.

**Other Matters**

The Company is involved in various other matters being litigated and regulatory matters that could affect future earnings. In addition, the Company is subject to certain claims and legal actions arising in the ordinary course of business.

Nicor Gas and Nicor Energy Services Company, wholly-owned subsidiaries of the Company, and Nicor Inc. were defendants in a putative class action initially filed in 2011 in the state court in Cook County, Illinois. The plaintiffs purported to represent a class of the customers who purchased the Gas Line Comfort Guard product from Nicor Energy Services Company and variously alleged that the marketing, sale, and billing of the Gas Line Comfort Guard product violated the Illinois Consumer Fraud and Deceptive Business Practices Act, constituting common law fraud and resulting in unjust enrichment of these entities. The plaintiffs sought, on behalf of the classes they purported to represent, actual and punitive damages, interest, costs, attorney fees, and injunctive relief. On February 8, 2017, the judge denied the plaintiffs' motion for class certification and the Company's motion for summary judgment. On March 7, 2017, the parties reached a settlement, which was finalized and effective on April 3, 2017. The settlement did not have a material impact on the Company's financial statements.

The Company is assessing its alleged involvement in an incident that occurred in one of its service territories that resulted in several deaths, injuries, and property damage. One of the natural gas distribution utilities has been named as one of the defendants in several lawsuits related to this incident. The Company has insurance that provides full coverage of any financial exposure in excess of $11 million per incident. During the successor period ended December 31, 2016 and the predecessor period ended December 31, 2015, the Company recorded reserves for substantially all of its potential exposure from these cases.

The ultimate outcome of these matters and such pending or potential litigation or regulatory matters cannot be predicted at this time; however, for current proceedings not specifically reported herein or in Note 3 to the financial statements, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on the Company's financial statements. See Note 3 to the financial statements under "General Litigation Matters" for a discussion of various other contingencies, regulatory matters, and other matters being litigated which may affect future earnings potential.

The Company owns a 50% interest in a planned LNG liquefaction and storage facility in Jacksonville, Florida. Once construction is complete and the facility is operational, it will be outfitted with a 2.0 million gallon storage tank with the capacity to produce in excess of 120,000 gallons of LNG per day. It is expected to be operational in the first half of 2018. The ultimate outcome of this matter cannot be determined at this time.

A wholly-owned subsidiary of the Company owns and operates a natural gas storage facility consisting of two salt dome caverns in Louisiana. Periodic integrity tests are required in accordance with rules of the Louisiana Department of Natural Resources (DNR). In August 2017, in connection with an ongoing integrity project, updated seismic mapping indicated the proximity of one of the caverns to the edge of the salt dome may be less than the required minimum and could result in the Company retiring the cavern early. At December 31, 2017, the facility's property, plant, and equipment had a net book value of $112 million, of which the cavern itself represents approximately 20%. A potential early retirement of this cavern is dependent upon several factors including compliance with an order from the Louisiana DNR detailing the requirements to place the cavern back in service, which includes, among other things, obtaining core samples to determine the composition of the sheath surrounding the edge of the salt dome.

The cavern continues to maintain its pressures and overall structural integrity. The Company intends to monitor the cavern and comply with the Louisiana DNR order through 2020 and place the cavern back in service in 2021. These events were considered in connection with the Company's annual long-lived asset impairment analysis, which determined there was no impairment as of December 31, 2017. Any changes in results of monitoring activities, rates at which expiring capacity contracts are re-contracted, timing of placing the cavern back in service, or Louisiana DNR requirements could trigger impairment. Further, early retirement of the cavern could trigger impairment of other long-lived assets associated with the natural gas storage facility. The ultimate outcome of this matter cannot be determined at this time, but could have a material impact on the Company's financial statements.

Effective January 1, 2018, the Company conformed its paid time off policy to align with Southern Company. Under the new policy, paid time off days are vested by the employee on the first day of each year and will continue to be recovered through rates on an as-paid basis. As a result, the Company accrued $21 million as of January 1, 2018, of which $9 million was recorded as a regulatory asset.

**ACCOUNTING POLICIES**

**Application of Critical Accounting Policies and Estimates**

The Company prepares its financial statements in accordance with GAAP. Significant accounting policies are described in Note 1 to the financial statements. In the application of these policies, certain estimates are made that may have a material impact on the

Company's results of operations and related disclosures. Different assumptions and measurements could produce estimates that are significantly different from those recorded in the financial statements. Senior management has reviewed and discussed the following critical accounting policies and estimates with the Audit Committee of Southern Company's Board of Directors.

***Utility Regulation***

The natural gas distribution utilities comprised approximately 82% of the Company's total operating revenues for 2017 and are subject to rate regulation by their respective state regulatory agencies, which set the rates utilities are permitted to charge customers based on allowable costs, including a reasonable ROE. As a result, the natural gas distribution utilities apply accounting standards which require the financial statements to reflect the effects of rate regulation. Through the ratemaking process, the regulators may require the inclusion of costs or revenues in periods different than when they would be recognized by a non-regulated company. This treatment may result in the deferral of expenses and the recording of related regulatory assets based on anticipated future recovery through rates or the deferral of gains or creation of liabilities and the recording of related regulatory liabilities. The application of the accounting standards has a further effect on the Company's financial statements as a result of the estimates of allowable costs used in the ratemaking process. These estimates may differ from those actually incurred by the natural gas distribution utilities; therefore, the accounting estimates inherent in specific costs such as depreciation and pension and other postretirement benefits have less of a direct impact on the Company's results of operations and financial condition than they would on a non-regulated company.

As reflected in Note 1 to the financial statements, significant regulatory assets and liabilities have been recorded. Management reviews the ultimate recoverability of these regulatory assets and any requirement to refund these regulatory liabilities based on applicable regulatory guidelines and GAAP. However, adverse legislative, judicial, or regulatory actions could materially impact the amounts of such regulatory assets and liabilities and could adversely impact the Company's financial statements.

***Accounting for Income Taxes***

The consolidated income tax provision and deferred income tax assets and liabilities, as well as any unrecognized tax benefits and valuation allowances, require significant judgment and estimates. These estimates are supported by historical tax return data, reasonable projections of taxable income and interpretations of applicable tax laws and regulations across multiple taxing jurisdictions. The effective tax rate reflects the statutory tax rates and calculated apportionments for the many states in which the Company operates.

On behalf of the Company, Southern Company files a consolidated federal income tax return and various state income tax returns, some of which are combined or unitary. Under a joint consolidated income tax allocation agreement, each Southern Company subsidiary's current and deferred tax expense is computed on a stand-alone basis and no subsidiary is allocated more current expense than would be paid if it filed a separate income tax return. Certain deductions and credits can be limited at the consolidated or combined level resulting in NOL and tax credit carryforwards that would not otherwise result on a stand-alone basis. Utilization of NOL carryforwards and the assessment of valuation allowances are based on significant judgment and extensive analysis of the Company's, as well as Southern Company's, current financial position and result of operations, including currently available information about future years, to estimate when future taxable income will be realized.

Current and deferred state income tax liabilities and assets are estimated based on laws of multiple states that determine the income to be apportioned to their jurisdictions. States utilize various formulas to calculate the apportionment of taxable income, primarily using sales, assets or payroll within the jurisdiction compared to the consolidated totals. In addition, each state varies as to whether a stand-alone, combined or unitary filing methodology is required. The calculation of deferred state taxes considers apportionment factors and filing methodologies that are expected to apply in future years. The apportionments and methodologies which are ultimately finalized in a manner inconsistent with expectations could have a material effect on the Company's financial statements.

Given the significant judgment involved in estimating NOL carryforwards and tax credit carryforwards and multi-state apportionments, the Company considers state deferred income tax liabilities and assets to be critical accounting estimates.

***Federal Tax Reform Legislation***

Following the enactment of the Tax Reform Legislation, the SEC staff issued Staff Accounting Bulletin 118 – "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides for a measurement period of up to one year from the enactment date to complete accounting under GAAP for the tax effects of the legislation. Due to the complex and comprehensive nature of the enacted tax law changes, and their application under GAAP, the Company considers all amounts recorded in the financial statements as a result of the Tax Reform Legislation to be "provisional" as discussed in SAB 118 and subject to revision. The Company is awaiting additional guidance from industry and income tax authorities in order to finalize its accounting. The ultimate impact of the Tax Reform Legislation on deferred income tax assets and liabilities and the related regulatory liabilities cannot be determined at this time. See " Income Tax Matters – Federal Tax Reform Legislation " herein and Note 3 to the financial statements under "Base Rate Cases" and "Other" and Note 5 to the financial statements under "Current and Deferred Income Taxes" for additional information.

***Assessment of Assets***

*Goodwill*

The Company does not amortize its goodwill, but tests it annually for impairment at the reporting unit level during the fourth quarter or more frequently if impairment indicators arise. These indicators include, but are not limited to, a significant change in operating performance, the business climate, legal or regulatory factors, or a planned sale or disposition of a significant portion of the business. A reporting unit is the operating segment, or a business one level below the operating segment (a component), if discrete financial information is prepared and regularly reviewed by management. Components are aggregated if they have similar economic characteristics.

As part of the Company's impairment test, the Company may perform an initial qualitative Step 0 assessment to determine whether it is more likely than not that the fair value of each reporting unit is less than its carrying amount before applying the two-step, quantitative goodwill impairment test. If the Company elects to perform the qualitative assessment, it evaluates relevant events and circumstances, including but not limited to, macroeconomic conditions, industry and market conditions, cost factors, financial performance, entity specific events, and events specific to each reporting unit. If the Company determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, or it elects not to perform a qualitative assessment, it performs the two-step goodwill impairment test.

Step 1 of the two-step goodwill impairment test compares the fair value of the reporting unit to its carrying value. If the result of the Step 1 test reveals that the estimated fair value is below its carrying value, the Company proceeds with Step 2.

Step 2 of the two-step goodwill impairment test compares the implied fair value of goodwill, which is calculated as the residual amount from the reporting unit's overall fair value after assigning fair values to its assets and liabilities under a hypothetical purchase price allocation as if the reporting unit had been acquired in a business combination, to its carrying value. Based on the result of the Step 2 test, the Company records a goodwill impairment charge for any excess of carrying value over the implied fair value of goodwill.

For the 2017 annual impairment test, the Company performed Step 1 of the two-step impairment test, which resulted in the fair value of all of its reporting units that have goodwill exceeding their carrying value. For the 2016 and 2015 annual impairment tests, the Company performed the qualitative Step 0 assessment and determined that it was more likely than not that the fair value of all of its reporting units with goodwill exceeded their carrying amounts, and therefore no quantitative analysis was required. In the third quarter 2015, the Company identified potential impairment indicators and performed an interim impairment test for its storage and fuels reporting unit, which resulted in impairment of the full $14 million goodwill balance for that reporting unit.

As the determination of an asset's fair value and useful life involves management making certain estimates and because these estimates form the basis for the determination of whether or not an impairment charge should be recorded, the Company considers these estimates to be critical accounting estimates.

See "Recently Issued Accounting Standards – Other" herein for information on the Company's adoption of ASU No. 2017-04 effective January 1, 2018.

*Long-Lived Assets*

The Company depreciates or amortizes its long-lived and intangible assets over their estimated useful lives. The Company assesses its long-lived and intangible assets for impairment whenever events or changes in circumstances indicate that an asset's carrying amount may not be recoverable. When such events or circumstances are present, the Company assesses the recoverability of long-lived assets by determining whether the carrying value will be recovered through the expected future cash flows. Impairment is indicated if the carrying amount of a long-lived asset exceeds the sum of the undiscounted future cash flows expected to result from the use and eventual disposition of the asset. If impairment is indicated, the Company records an impairment loss equal to the difference between the carrying value and the fair value of the long-lived asset.

As the determination of the expected future cash flows generated from an asset, an asset's fair value, and useful life involves management making certain estimates and because these estimates form the basis for the determination of whether or not an impairment charge should be recorded, the Company considers these estimates to be critical accounting estimates.

***Derivatives and Hedging Activities***

Determining whether a contract meets the definition of a derivative instrument, contains an embedded derivative requiring bifurcation, or qualifies for hedge accounting treatment is voluminous and complex. The treatment of a single contract may vary from period to period depending upon accounting elections, changes in the Company's assessment of the likelihood of future hedged transactions, or new interpretations of accounting guidance. As a result, judgment is required in determining the appropriate accounting treatment. In addition, the estimated fair value of derivative instruments may change significantly from period to period depending upon market conditions, and changes in hedge effectiveness may impact the accounting treatment.

Derivative instruments (including certain derivative instruments embedded in other contracts) are recorded on the balance sheets as either assets or liabilities measured at their fair value. If the transaction qualifies for, and is designated as, a normal purchase or normal sale, it is exempted from fair value accounting treatment and is, instead, subject to traditional accrual accounting. The Company utilizes market data or assumptions that market participants would use in pricing the derivative asset or liability, including assumptions about risk and the risks inherent in the inputs of the valuation technique.

Changes in the derivatives' fair value are recognized concurrently in earnings unless specific hedge accounting criteria are met. If the derivatives meet those criteria, derivative gains and losses offset related results of the hedged item in the income statement in the case of a fair value hedge, or gains and losses are recorded in OCI on the balance sheets until the hedged transaction affects earnings in the case of a cash flow hedge. Additionally, a company is required to formally designate a derivative as a hedge as well as document and assess the effectiveness of derivatives associated with transactions that receive hedge accounting treatment.

Nicor Gas and Elizabethtown Gas utilize derivative instruments to hedge the price risk for the purchase of natural gas for customers. These derivatives are reflected at fair value and are not designated as accounting hedges. Realized gains or losses on such instruments are included in the cost of gas delivered and are passed through directly to customers, subject to review by the applicable state regulatory agencies, and therefore have no direct impact on earnings. Unrealized changes in the fair value of these derivative instruments are deferred as regulatory assets or liabilities.

The Company uses derivative instruments primarily to reduce the impact to its results of operations due to the risk of changes in the price of natural gas and to a lesser extent the Company hedges against warmer-than-normal weather and interest rates. The fair value of natural gas derivative instruments used to manage exposure to changing natural gas prices reflects the estimated amounts that the Company would receive or pay to terminate or close the contracts at the reporting date, taking into account the current unrealized gains or losses on open contracts. For derivatives utilized at gas marketing services and wholesale gas services that are not designated as accounting hedges, changes in fair value are reported as gains or losses in the Company's results of operations in the period of change. Gas marketing services records derivative gains or losses arising from cash flow hedges in OCI and reclassifies them into earnings in the same period that the underlying hedged item is recognized in earnings.

The Company classifies derivative assets and liabilities based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy. The determination of the fair value of the derivative instruments incorporates various required factors. These factors include:

- the creditworthiness of the counterparties involved and the impact of credit enhancements (such as cash deposits and letters of credit);
- events specific to a given counterparty; and
- the impact of the Company's nonperformance risk on its liabilities.

If there is a significant change in the underlying market prices or pricing assumptions the Company uses in pricing its derivative assets or liabilities, the Company may experience a significant impact on its financial position, results of operations, and cash flows. See Note 10 to the financial statements for additional information.

Given the assumptions used in pricing the derivative asset or liability, the Company considers the valuation of derivative assets and liabilities a critical accounting estimate. See FINANCIAL CONDITION AND LIQUIDITY – "Market Price Risk" herein for more information.

***Pension and Other Postretirement Benefits***

The Company's calculation of pension and other postretirement benefits expense is dependent on a number of assumptions. These assumptions include discount rates, healthcare cost trend rates, expected long-term return on plan assets, mortality rates, expected salary and wage increases, and other factors. Components of pension and other postretirement benefits expense include interest and service cost on the pension and other postretirement benefit plans, expected return on plan assets, and amortization of certain unrecognized costs and obligations. Actual results that differ from the assumptions utilized are accumulated and amortized over future periods and, therefore, generally affect recognized expense and the recorded obligation in future periods. While the Company believes that the assumptions used are appropriate, differences in actual experience or significant changes in assumptions would affect its pension and other postretirement benefits costs and obligations.

Key elements in determining the Company's pension and other postretirement benefit expense are the expected long-term return on plan assets and the discount rate used to measure the benefit plan obligations and the periodic benefit plan expense for future periods. The expected long-term return on pension and other postretirement benefit plan assets is based on the Company's investment strategy, historical experience, and expectations for long-term rates of return that consider external actuarial advice. The Company determines the long-term return on plan assets by applying the long-term rate of expected returns on various asset classes to the Company's target asset allocation. For purposes of determining its liability related to the pension and other postretirement benefit plans, the Company discounts the future related cash flows using a single-point discount rate developed from the weighted average of market-observed yields for high quality fixed income securities with maturities that correspond to expected benefit payments. Prior to 2016, the Company computed the interest cost component of its net periodic pension and other postretirement benefit plan expense using the same single-point discount rate. In 2016, the Company adopted a full yield curve approach for calculating the interest cost component whereby the discount rate for each year is applied to the liability for that specific year. As a result, the interest cost component of net periodic pension and other postretirement benefit plan expense decreased by approximately $ 7 million in 2016.

A 25 basis point change in any significant assumption (discount rate, salaries, or long-term return on plan assets) would result in a $2 million or less change in total annual benefit expense and a $42 million or less change in projected obligations.

See Note 2 to the financial statements for additional information regarding pension and other postretirement benefits.

***Contingent Obligations***

The Company is subject to a number of federal and state laws and regulations as well as other factors and conditions that subject it to environmental, litigation, and other risks. See FUTURE EARNINGS POTENTIAL herein and Note 3 to the financial statements for more information regarding certain of these contingencies. The Company periodically evaluates its exposure to such risks and records reserves for those matters where a non-tax-related loss is considered probable and reasonably estimable. The adequacy of reserves can be significantly affected by external events or conditions that can be unpredictable; thus, the ultimate outcome of such matters could materially affect the Company's results of operations, cash flows, or financial condition.

**Recently Issued Accounting Standards**

***Revenue***

In 2014, the FASB issued ASC 606, *Revenue from Contracts with Customers* (ASC 606), replacing the existing accounting standard and industry specific guidance for revenue recognition with a five-step model for recognizing and measuring revenue from contracts with customers. The underlying principle of the new standard is to recognize revenue to depict the transfer of goods or services to customers at the amount expected to be collected. The new standard also requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers.

Most of the Company's revenue, including energy provided to customers, is from tariff offerings that provide natural gas without a defined contractual term, as well as longer-term contractual agreements, including non-derivative natural gas asset management and optimization arrangements.

The Company has completed the evaluation of all revenue streams and determined that the adoption of ASC 606 will not change the current timing of revenue recognition for such transactions. Some revenue arrangements, such as energy-related derivatives and alternative revenue programs, are excluded from the scope of ASC 606 and, therefore, will be accounted for and disclosed or presented separately from revenues under ASC 606 on the Company's financial statements. The Company has concluded contributions in aid of construction are not in scope for ASC 606 and will continue to be accounted for as an offset to property, plant, and equipment.

The new standard is effective for reporting periods beginning after December 15, 2017. The Company applied the modified retrospective method of adoption effective January 1, 2018. The Company also utilized practical expedients which allowed it to apply the standard to open contracts at the date of adoption and to reflect the aggregate effect of all modifications when identifying performance obligations and allocating the transaction price for contracts modified before the effective date. Under the modified retrospective method of adoption, prior year reported results are not restated; however, a cumulative-effect adjustment to retained earnings at January 1, 2018 is recorded. In addition, quarterly disclosures will include comparative information on 2018 financial statement line items under current guidance. The adoption of ASC 606 did not result in a cumulative-effect adjustment .

***Leases***

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (ASU 2016-02). ASU 2016-02 requires lessees to recognize on the balance sheet a lease liability and a right-of-use asset for all leases. ASU 2016-02 also changes the recognition, measurement, and presentation of expense associated with leases and provides clarification regarding the identification of certain components of contracts that would represent a lease. The accounting required by lessors is relatively unchanged . ASU 2016-02 is effective for fiscal years beginning after December 15, 2018 and the Company will adopt the new standard effective January 1, 2019.

The Company is currently implementing an information technology system along with the related changes to internal controls and accounting policies that will support the accounting for leases under ASU 2016-02. In addition, the Company has substantially completed a detailed inventory and analysis of its leases. In terms of rental charges and duration of contracts, the most significant leases relate to real estate and fleet vehicles where the Company is the lessee and to natural gas home appliances where the Company is the lessor. While the Company has not yet determined the ultimate impact, adoption of ASU 2016-02 is expected to have a significant impact on the Company's balance sheet.

***Other***

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18). ASU 2016-18 eliminates the need to reflect transfers between cash and restricted cash in operating, investing, and financing activities in the statement of cash flows. Upon adoption, the net change in cash and cash equivalents during the period will include amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for fiscal years beginning after December 15, 2017, and will be applied retrospectively to each period presented. The Company adopted ASU 2016-18 effective January 1, 2018 with no material impact on its financial statements.

On January 26, 2017, the FASB issued ASU No. 2017-04, *Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* (ASU 2017-04). ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with the carrying amount as part of Step 2 of the goodwill impairment test. Under the new standard, the goodwill impairment loss will be measured as the excess of a reporting unit's carrying amount over its fair value, not exceeding the total amount of goodwill allocated to that reporting unit, which may increase the frequency of goodwill impairment charges if a future goodwill impairment test does not pass the Step 1 evaluation. ASU 2017-04 is effective prospectively for periods beginning on or after December 15, 2019, with early adoption permitted. The Company adopted ASU 2017-04 effective January 1, 2018 with no impact on its financial statements.

On March 10, 2017, the FASB issued ASU No. 2017-07, *Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* (ASU 2017-07). ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs and requires the other components of net periodic pension and postretirement benefit costs to be separately presented in the income statement outside of income from operations. Additionally, only the service cost component is eligible for capitalization, when applicable. However, all cost components remain eligible for capitalization under FERC regulations. ASU 2017-07 will be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension and postretirement benefit costs in the income statement. The capitalization of only the service cost component of net periodic pension and postretirement benefit costs in assets will be applied on a prospective basis. ASU 2017-07 is effective for periods beginning after December 15, 2017. The presentation changes required for net periodic pension and postretirement benefit costs will result in a decrease in the Company's operating income and an increase in other income for 2016 and 2017 and are expected to result in a decrease in operating income and an increase in other income for 2018. The Company adopted ASU 2017-07 effective January 1, 2018 with no material impact on its financial statements.

On August 28, 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12), amending the hedge accounting recognition and presentation requirements. ASU 2017-12 makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the related presentation and disclosure requirements, and simplifies hedge effectiveness assessment requirements. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company adopted ASU 2017-12 effective January 1, 2018 with no material impact on its financial statements.

## FINANCIAL CONDITION AND LIQUIDITY

### Overview

The Company's financial condition remained stable at December 31, 2017 . The Company's cash requirements primarily consist of funding ongoing operations, common stock dividends, capital expenditures, and debt maturities. Capital expenditures and other investing activities include investments to meet projected long-term demand requirements, to maintain existing natural gas distribution systems as well as to update and expand these systems, and to comply with environmental regulations. Operating cash flows provide a substantial portion of the Company's cash needs. For the three-year period from 2018 through 2020 , the Company's projected common stock dividends, capital expenditures, and debt maturities are expected to exceed operating cash flows. The Company plans to finance future cash needs in excess of its operating cash flows primarily through external securities issuances, equity contributions from Southern Company, and borrowings from financial institutions and with proceeds from the pending asset sales of Elizabethtown Gas and Elkton Gas. The Company plans to use commercial paper to manage seasonal variations in operating cash flows and other working capital needs. The Company intends to continue to monitor its access to short-term and long-term capital markets as well as its bank credit arrangements to meet future capital and liquidity needs. See " Sources of Capital ," " Financing Activities ," and " Capital Requirements and Contractual Obligations " herein for additional information.

By regulation, Nicor Gas is restricted, to the extent of its retained earnings balance, in the amount it can dividend or loan to affiliates and is not permitted to make money pool loans to affiliates. The New Jersey BPU restricts the amount Elizabethtown Gas can dividend to its parent company to 70% of its quarterly net income. Additionally, as stipulated in the New Jersey BPU's order approving the Merger, the Company is prohibited from paying dividends to its parent company, Southern Company, if the Company's senior unsecured debt rating falls below investment grade. At December 31, 2017 , the amount of subsidiary retained earnings and net income restricted to dividend totaled $719 million . These restrictions did not have any impact on the Company's ability to meet its cash obligations, nor does management expect such restrictions to materially impact the Company's ability to meet its currently anticipated cash obligations.

The Company's investments in the qualified pension plan increased in value at December 31, 2017 as compared to December 31, 2016 . There were no voluntary contributions to the qualified pension plan in 2017 and no mandatory contributions to its qualified pension plan are anticipated during 2018 . See Note 2 to the financial statements for additional information.

Net cash provided from operating activities totaled $883 million for 2017 , primarily due to earnings and the timing of cash receipts for the sale of natural gas inventory and vendor payments. Net cash used for operating activities was $328 million for the successor period of July 1, 2016 through December 31, 2016 , primarily due to a $125 million voluntary pension contribution, a $35 million payment for the settlement of an interest rate swap, and less cash due to the timing of collecting receivables and disbursing payables. Due to the seasonal nature of its business, the Company typically reports negative cash flows from operating activities in the second half of the year. Net cash provided from operating activities was $1.1 billion for the predecessor period of January 1, 2016 through June 30, 2016 , primarily due to low volumes of natural gas sales and changes in natural gas inventory as a result of warmer weather and the timing of recovery of related gas costs and weather normalization adjustments from customers. Net cash provided from operating activities was $1.4 billion for the predecessor year ended December 31, 2015 , primarily due to the timing of recovery of related gas costs from customers, cash provided from derivative financial instrument assets and liabilities, and a tax refund of $150 million related to the extension of bonus depreciation.

Net cash used for investing activities totaled $1.6 billion for 2017 , which reflected $1.5 billion in capital expenditures primarily due to gross property additions for infrastructure replacement programs at gas distribution operations and $145 million in capital contributions to equity method investments in pipeline projects, partially offset by $80 million in returned capital from equity method investments in pipeline projects. Net cash used for investing activities was $2.1 billion for the successor period of July 1, 2016 through December 31, 2016 , which reflected $1.4 billion primarily related to the Company's acquisition of the 50% interest in SNG, and $632 million in capital expenditures. Net cash used for investing activities was $559 million and $1.0 billion for the predecessor period of January 1, 2016 through June 30, 2016 and the predecessor year ended December 31, 2015 , respectively, which primarily related to capital expenditures. See Note 4 to the financial statements under "Equity Method Investments – SNG" and Note 11 to the financial statements under "Investment in SNG" for additional information.

Net cash provided from financing activities totaled $741 million for 2017 , primarily due to $850 million in debt issuances, $262 million in net additional commercial paper borrowings, and $103 million in capital contributions from Southern Company, partially offset by $443 million in common stock dividend payments to Southern Company and $22 million in repayment of long-term debt. Net cash provided from financing activities was $2.4 billion for the successor period of July 1, 2016 through December 31, 2016 , which reflected $1.1 billion of capital contributions from Southern Company, primarily used to fund the

Company's investment in SNG, $1.1 billion in net additional commercial paper borrowings, partially offset by $160 million for the purchase of the 15% noncontrolling ownership interest in SouthStar, and $900 million in proceeds from debt issuances, partially offset by $420 million in debt payments. Net cash used for financing activities was $558 million for the predecessor period of January 1, 2016 through June 30, 2016 , primarily due to $896 million in net repayment of commercial paper borrowings and $125 million in repayment of long-term debt, partially offset by $600 million in debt issuances. Net cash used for financing activities was $366 million for the predecessor year ended December 31, 2015 , primarily due to the net repayment of commercial paper borrowings, partially offset by the proceeds from debt issuances in excess of debt repayments. See Note 4 to the financial statements under "Variable Interest Entities" and "Equity Method Investments – SNG" and Note 11 to the financial statements under "Investment in SNG" for additional information.

Significant balance sheet changes at December 31, 2017 include an increase of $1.2 billion in total property, plant, and equipment primarily due to capital expenditures for infrastructure replacement programs, an increase of $1.0 billion in deferred credits related to income taxes primarily resulting from the impacts of the Tax Reform Legislation, a decrease of $886 million in accumulated deferred income tax liabilities primarily due to the change in the federal corporate income tax rate, partially offset by tax depreciation related to infrastructure assets placed in service as well as the impact of State of Illinois tax legislation, and an increase in long-term debt of $632 million , primarily due to $450 million of senior notes issued in May 2017 and $200 million of first mortgage bonds at Nicor Gas issued in each of August 2017 and November 2017. Other significant balance sheet changes include an increase of $261 million in notes payable primarily related to an increase in commercial paper borrowings of $510 million at Southern Company Gas Capital, partially offset by a decrease in commercial paper borrowings of $249 million at Nicor Gas. See FUTURE EARNINGS POTENTIAL – " Income Tax Matters " and FINANCIAL CONDITION AND LIQUIDITY – "Financing Activities" herein and Notes 5 and 6 to the financial statements for additional information.

**Sources of Capital**

The Company plans to obtain the funds to meet its future capital needs through operating cash flows, external securities issuances, borrowings from financial institutions, and equity contributions from Southern Company. In addition, the Company plans to utilize the proceeds from the pending asset sales of Elizabethtown Gas and Elkton Gas to pay the income taxes resulting from the sales, to retire existing debt, and for general corporate purposes. However, the amount, type, and timing of any future financings, if needed, depend upon prevailing market conditions, regulatory approval, and other factors. The issuance of securities by Nicor Gas is generally subject to the approval of the Illinois Commission.

The Southern Company system does not maintain a centralized cash or money pool. Therefore, except as described below, funds of the Company are not commingled with funds of any other company in the Southern Company system. The Company obtains financing separately without credit support from any affiliate in the Southern Company system. See Note 6 to the financial statements under " Bank Credit Arrangements " for additional information.

The Company maintains commercial paper programs at Southern Company Gas Capital and Nicor Gas that consist of short-term, unsecured promissory notes. Nicor Gas' commercial paper program supports its working capital needs as Nicor Gas is not permitted to make money pool loans to affiliates. All of the Company's other subsidiaries benefit from Southern Company Gas Capital's commercial paper program.

At December 31, 2017 , the Company's current liabilities exceeded current assets by $1.0 billion , primarily as a result of $1.5 billion in notes payable. The Company's current liabilities frequently exceed current assets because of commercial paper borrowings used to fund daily operations, scheduled maturities of long-term debt, and significant seasonal fluctuations in cash needs. The Company intends to utilize operating cash flows, external securities issuances, borrowings from financial institutions, equity contributions from Southern Company, and the proceeds from the pending asset sales of Elizabethtown Gas and Elkton Gas to fund short-term capital needs. The Company has substantial cash flow from operating activities and access to capital markets and financial institutions to meet liquidity needs.

At December 31, 2017 , the Company had $73 million of cash and cash equivalents. Committed credit arrangements with banks at December 31, 2017 were as follows:

| **Company** | **Expires 2022** | **Unused** |
|---|---|---|
| | *(millions)* | |
| Southern Company Gas Capital (*) | $ 1,400 | $ 1,390 |
| Nicor Gas | 500 | 500 |
| Total | $ 1,900 | $ 1,890 |

(*) The Company guarantees the obligations of Southern Company Gas Capital.

See Note 6 to the financial statements under " Bank Credit Arrangements " for additional information.

In May 2017, Southern Company Gas Capital and Nicor Gas terminated their existing credit arrangements for $1.3 billion and $700 million, respectively, which were to mature in 2017 and 2018, and entered into a new multi-year credit arrangement (Facility) currently allocated for $1.4 billion and $500 million , respectively, with a maturity date of 2022, as reflected in the table above. Pursuant to the Facility, the allocations between Southern Company Gas Capital and Nicor Gas may be adjusted.

The Facility contains a covenant that limits the ratio of debt to capitalization (as defined in each facility) to a maximum of 70% for each of the Company and Nicor Gas and contains a cross-acceleration provision to other indebtedness (including guarantee obligations) of the applicable company. Such cross-acceleration provision to other indebtedness would trigger an event of default of the applicable company if the Company or Nicor Gas defaulted on indebtedness, the payment of which was then accelerated. At December 31, 2017 , both companies were in compliance with such covenant. The Facility does not contain a material adverse change clause at the time of borrowings.

Subject to applicable market conditions, the applicable company expects to renew or replace the Facility as needed, prior to expiration. In connection therewith, the applicable company may extend the maturity dates and/or increase or decrease the lending commitments thereunder. A portion of unused credit with banks provides liquidity support to the Company.

The Company makes short-term borrowings primarily through commercial paper programs that have the liquidity support of the committed bank credit arrangements described above. Commercial paper borrowings are included in notes payable in the balance sheets.

Details of short-term borrowings were as follows:

| | Short-term Debt at the End of the Period | | Short-term Debt During the Period (*) | | |
|---|---|---|---|---|---|
| | Amount Outstanding | Weighted Average Interest Rate | Average Amount Outstanding | Weighted Average Interest Rate | Maximum Amount Outstanding |
| | *(in millions)* | | *(in millions)* | | *(in millions)* |
| **Successor – December 31, 2017:** | | | | | |
| Southern Company Gas Capital | **$ 1,243** | **1.73%** | **$ 723** | **1.40%** | **$ 1,243** |
| Nicor Gas | **275** | **1.83%** | **176** | **1.12%** | **525** |
| Total | **$ 1,518** | **1.75%** | **$ 899** | **1.35%** | |
| Successor – December 31, 2016: | | | | | |
| Southern Company Gas Capital | $ 733 | 1.09% | $ 461 | 0.79% | $ 770 |
| Nicor Gas | 524 | 0.95% | 309 | 0.67% | 587 |
| Total | $ 1,257 | 1.03% | $ 770 | 0.74% | |
| Predecessor – December 31, 2015: | | | | | |
| Southern Company Gas Capital | $ 471 | 0.71% | $ 382 | 0.49% | $ 787 |
| Nicor Gas | 539 | 0.52% | 349 | 0.38% | 585 |
| Total | $ 1,010 | 0.60% | $ 731 | 0.44% | |

(*) Average and maximum amounts are based upon daily balances during the 12-month periods.

The Company believes that the need for working capital can be adequately met by utilizing commercial paper programs, lines of credit, and operating cash flows.

Additionally, Pivotal Utility Holdings is party to a series of loan agreements with the New Jersey Economic Development Authority and Brevard County, Florida under which five series of gas facility revenue bonds totaling $200 million have been issued. The Elizabethtown Gas asset sale agreement requires that bonds representing $180 million of the total that are currently eligible for redemption at par be redeemed on or prior to consummation of the sale.

**Financing Activities**

The long-term debt on the Company's balance sheets includes both principal and non-principal components. As of December 31, 2017 , the non-principal components totaled $508 million , including the amount attributable to long-term debt due within one year, which consisted of the unamortized portions of the fair value adjustment recorded in purchase accounting, debt premiums, debt discounts, and debt issuance costs.

In December 2016, the Company executed intercompany promissory notes to further allocate interest expense to its reportable segments that previously remained in the "all other" segment. These intercompany promissory notes allow the Company to calculate net income, which is its performance measure subsequent to the Merger, at the segment level that incorporates the full impact of interest costs.

In May 2017, Southern Company Gas Capital issued $450 million aggregate principal amount of Series 2017A 4.40% Senior Notes due May 30, 2047. The proceeds were used to repay the Company's short-term indebtedness and for general corporate purposes.

In July 2017, Atlanta Gas Light repaid at maturity $22 million of Series C medium-term notes.

On August 10, 2017, Nicor Gas issued $100 million aggregate principal amount of First Mortgage Bonds 3.03% Series due August 10, 2027 and $100 million aggregate principal amount of First Mortgage Bonds 3.62% Series due August 10, 2037. On November 1, 2017, Nicor Gas issued $100 million aggregate principal amount of First Mortgage Bonds 3.85% Series due August 10, 2047 and $100 million aggregate principal amount of First Mortgage Bonds 4.00% Series due August 10, 2057. The proceeds were used to repay short-term indebtedness incurred under the Nicor Gas commercial paper program and for other working capital needs.

On January 4, 2018, the Company issued a floating rate promissory note to Southern Company, in an aggregate principal amount of $100 million due July 31, 2018 bearing interest based on one-month LIBOR, to support the current activities of wholesale gas services.

In addition to any financings that may be necessary to meet capital requirements and contractual obligations, the Company plans to continue, when economically feasible, a program to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit.

**Credit Rating Risk**

The Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade.

There are certain contracts that could require collateral, but not accelerated payment, in the event of a credit rating change below BBB- and/or Baa3. These contracts are for physical gas purchases and sales and energy price risk management. The maximum potential collateral requirement under these contracts at December 31, 2017 was $10 million .

Generally, collateral may be provided by a Southern Company guaranty, letter of credit, or cash. Additionally, a credit rating downgrade could impact the ability of the Company to access capital markets and would be likely to impact the cost at which it does so.

On March 24, 2017, S&P revised its consolidated credit rating outlook for Southern Company and its subsidiaries (including the Company, Southern Company Gas Capital, and Nicor Gas) from stable to negative.

While it is unclear how the credit rating agencies and the relevant state regulatory bodies may respond to the Tax Reform Legislation, certain financial metrics, such as the funds from operations to debt percentage, used by the credit rating agencies to assess Southern Company and its subsidiaries, including the Company, may be negatively impacted. Absent actions by Southern Company and its subsidiaries, including the Company, to mitigate the resulting impacts, which, among other alternatives, could include adjusting capital structure and/or monetizing regulatory assets, the Company's, Southern Company Gas Capital's, and Nicor Gas' credit ratings could be negatively affected. See Note 3 to the financial statements for additional information.

**Market Price Risk**

The Company is exposed to market risks, primarily commodity price risk, interest rate risk, and weather risk. Due to various cost recovery mechanisms, the natural gas distribution utilities of the Company that sell natural gas directly to end-use customers have limited exposure to market volatility of natural gas prices. To manage the volatility attributable to these exposures, the Company nets the exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and risk management practices. The Company uses derivatives to buy and sell natural gas as well as for hedging purposes and mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis.

To mitigate future exposure to changes in interest rates, the Company may enter into derivatives designated as hedges. The weighted average interest rate on $200 million of long-term variable interest rate exposure at December 31, 2017 was 1.71% . If the Company sustained a 100 basis point change in interest rates for all long-term variable interest rate exposure, the change would have an immaterial effect on annualized interest expense at December 31, 2017. See Note 1 to the financial statements under " Financial Instruments " and Note 10 to the financial statements for additional information.

Certain natural gas distribution utilities of the Company manage fuel-hedging programs implemented per the guidelines of their respective state regulatory agencies to hedge the impact of market fluctuations in natural gas prices for customers. For the weather risk associated with Nicor Gas, the Company has a corporate weather hedging program that utilizes weather derivatives to reduce the risk of lower adjusted operating margins potentially resulting from significantly warmer-than-normal weather. In addition, certain non-regulated operations routinely utilize various types of derivative instruments to economically hedge certain commodity price and weather risks inherent in the natural gas industry. These instruments include a variety of exchange-traded and over-the-counter (OTC) energy contracts, such as forward contracts, futures contracts, options contracts, and swap agreements. Gas marketing services and wholesale gas services also actively manage storage positions through a variety of hedging transactions for the purpose of managing exposures arising from changing natural gas prices. These hedging instruments are used to substantially protect economic margins (as spreads between wholesale and retail natural gas prices widen between periods) and thereby minimize exposure to declining operating margins. Some of these economic hedge activities may not qualify, or are not designated, for hedge accounting treatment. The Company had no material change in market risk exposure for the year ended December 31, 2017 when compared to the year ended December 31, 2016.

For the periods presented below, the changes in net fair value of derivative contracts were as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Contracts outstanding at beginning of period, assets (liabilities), net | **$ 8** | $ (54) | $ 75 | $ 61 |
| Contracts realized or otherwise settled | **(1)** | 18 | (77) | (17) |
| Current period changes [(a)] | **(113)** | 48 | (82) | 32 |
| Contracts outstanding at end of period, assets (liabilities), net | **(106)** | 12 | (84) | 76 |
| Netting of cash collateral | **193** | 62 | 120 | 96 |
| Cash collateral and net fair value of contracts outstanding at end of period [(b)] | **$ 87** | $ 74 | $ 36 | $ 172 |

(a) Current period changes also include the changes in fair value of new contracts entered into during the period, if any.

(b) Net fair value of derivative contracts outstanding excludes premium and intrinsic value associated with weather derivatives of $11 million at December 31, 2017 and includes premium and intrinsic value associated with weather derivatives of $4 million at December 31, 2016 , $5 million at June 30, 2016, and $10 million at December 31, 2015 .

The net hedge volume of energy-related derivative contracts for natural gas positions for the years ended December 31 were as follows:

| | **2017** | 2016 |
|---|---|---|
| | mmBtu Volume | |
| | *(in millions)* | |
| Commodity – Natural gas | **300** | 157 |
| Net Purchased/(Sold) Volume | **300** | 157 |

The Company's derivative contracts are comprised of both long and short natural gas positions. A long position is a contract to purchase natural gas, and a short position is a contract to sell natural gas. The volume presented above represents the net of long natural gas positions of 3.51 billion mmBtu and short natural gas positions of 3.21 billion mmBtu at December 31, 2017 and the net of long natural gas positions of 3.31 billion mmBtu and short natural gas positions of 3.16 billion mmBtu at December 31, 2016 .

Energy-related derivative contracts that are designated as regulatory hedges relate primarily to the Company's fuel-hedging programs. Therefore, gains and losses are initially recorded as regulatory liabilities and assets, respectively, and then are included in cost of natural gas as the underlying gas is used in operations and ultimately recovered through the respective cost recovery clause. Certain other gains and losses on energy-related derivatives, designated as cash flow hedges (which are mainly used to hedge anticipated purchases and sales), are initially deferred in OCI before being recognized in income in the same period as the hedged transaction. Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the statements of income as incurred.

Some energy-related derivative contracts require physical delivery as opposed to financial settlement, and this type of derivative is both common and prevalent within the natural gas industry. When an energy-related derivative contract is settled physically, any cumulative unrealized gain or loss is reversed and the contract price is recognized in the respective line item representing the actual price of the underlying goods being delivered.

The Company uses OTC contracts that are not exchange traded but are fair valued using prices which are market observable, and thus fall into Level 2 of the fair value hierarchy. See Note 9 to the financial statements for further discussion of fair value measurements.

The maturities of the energy-related derivative contracts at December 31, 2017 were as follows:

| | | Fair Value Measurements December 31, 2017 | | |
|---|---|---|---|---|
| | | Maturity | | |
| | **Total Fair Value** | **Year 1** | **Years 2 & 3** | **Years 4 & 5** |
| | | *(in millions)* | | |
| Level 1 [(a)] | **$ (148)** | **$ (71)** | **$ (59)** | **$ (18)** |
| Level 2 [(b)] | **42** | **10** | **30** | **2** |
| Fair value of contracts outstanding at end of period [(c)] | **$ (106)** | **$ (61)** | **$ (29)** | **$ (16)** |

(a) Valued using NYMEX futures prices.

(b) Valued using basis transactions that represent the cost to transport natural gas from a NYMEX delivery point to the contract delivery point. These transactions are based on quotes obtained either through electronic trading platforms or directly from brokers.

(c) Excludes cash collateral of $193 million as well as premium and associated intrinsic value associated with weather derivatives of $11 million at December 31, 2017 .

### *Value at Risk (VaR)*

VaR is the maximum potential loss in portfolio value over a specified time period that is not expected to be exceeded within a given degree of probability. The Company's VaR may not be comparable to that of other companies due to differences in the factors used to calculate VaR. The Company's VaR is determined on a 95% confidence interval and a one-day holding period, which means that 95% of the time, the risk of loss in a day from a portfolio of positions is expected to be less than or equal to the amount of VaR calculated. The open exposure of the Company is managed in accordance with established policies that limit market risk and require daily reporting of potential financial exposure to senior management. Because the Company generally manages physical gas assets and economically protects its positions by hedging in the futures markets, the Company's open exposure is generally mitigated. The Company employs daily risk testing, using both VaR and stress testing, to evaluate the risk of its positions.

The Company actively monitors open commodity positions and the resulting VaR and maintains a relatively small risk exposure as total buy volume is close to sell volume, with minimal open natural gas price risk. Based on a 95% confidence interval and employing a one-day holding period, SouthStar's portfolio of positions for all periods presented was immaterial.

For the periods presented below, wholesale gas services had the following VaRs:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Period end (*) | **$ 4.8** | $ 2.3 | $ 1.9 | $ 2.4 |
| Average | **2.0** | 2.0 | 2.0 | 3.0 |
| High (*) | **4.8** | 2.8 | 2.5 | 7.3 |
| Low | **1.0** | 1.4 | 1.6 | 1.6 |

(*) Increase in VaR at December 31, 2017 was driven by significant natural gas price increases in Sequent's key markets due to colder-than-normal weather. As weather moderated during January 2018, VaR reduced to a level consistent with prior periods.

**Credit Risk**

*Gas Distribution Operations*

Concentration of credit risk occurs at Atlanta Gas Light for amounts billed for services and other costs to its customers, which consist of 15 Marketers in Georgia. The credit risk exposure to Marketers varies seasonally, with the lowest exposure in the non-peak summer months and the highest exposure in the peak winter months. Marketers are responsible for the retail sale of natural gas to end-use customers in Georgia. The functions of the retail sale of gas include the purchase and sale of natural gas, customer service, billings, and collections. The provisions of Atlanta Gas Light's tariff allow Atlanta Gas Light to obtain credit security support in an amount equal to a minimum of two times a Marketer's highest month's estimated bill from Atlanta Gas Light. For 2017 , the four largest Marketers based on customer count accounted for 19% of the Company's adjusted operating margin and 22% of gas distribution operations' adjusted operating margin.

Several factors are designed to mitigate the Company's risks from the increased concentration of credit that has resulted from deregulation. In addition to the security support described above, Atlanta Gas Light bills intrastate delivery service to Marketers in advance rather than in arrears. Atlanta Gas Light accepts credit support in the form of cash deposits, letters of credit/surety bonds from acceptable issuers, and corporate guarantees from investment-grade entities. On a monthly basis, the Risk Management Committee reviews the adequacy of credit support coverage, credit rating profiles of credit support providers, and payment status of each Marketer. The Company believes that adequate policies and procedures are in place to properly quantify, manage, and report on Atlanta Gas Light's credit risk exposure to Marketers.

Atlanta Gas Light also faces potential credit risk in connection with assignments of interstate pipeline transportation and storage capacity to Marketers. Although Atlanta Gas Light assigns this capacity to Marketers, in the event that a Marketer fails to pay the interstate pipelines for the capacity, the interstate pipelines would likely seek repayment from Atlanta Gas Light.

*Gas Marketing Services*

The Company obtains credit scores for its firm residential and small commercial customers using a national credit reporting agency, enrolling only those customers that meet or exceed the Company's credit threshold. The Company considers potential interruptible and large commercial customers based on reviews of publicly available financial statements and commercially available credit reports. Prior to entering into a physical transaction, the Company also assigns physical wholesale counterparties an internal credit rating and credit limit based on the counterparties' Moody's, S&P, and Fitch ratings, commercially available credit reports, and audited financial statements.

*Wholesale Gas Services*

The Company has established credit policies to determine and monitor the creditworthiness of counterparties, as well as the quality of pledged collateral. The Company also utilizes master netting agreements whenever possible to mitigate exposure to counterparty credit risk. When the Company is engaged in more than one outstanding derivative transaction with the same counterparty and also has a legally enforceable netting agreement with that counterparty, the "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty and a reasonable measure of the Company's credit risk. The Company also uses other netting agreements with certain counterparties with whom it conducts significant transactions. Master netting agreements enable the Company to net certain assets and liabilities by counterparty. The Company also nets across product lines and against cash collateral, provided the master netting and cash collateral agreements include such provisions.

The Company may require counterparties to pledge additional collateral when deemed necessary. The Company conducts credit evaluations and obtains appropriate internal approvals for a counterparty's line of credit before any transaction with the counterparty is executed. In most cases, the counterparty must have an investment grade rating, which includes a minimum long-term debt rating of Baa3 from Moody's and BBB- from S&P. Generally, the Company requires credit enhancements by way of a guaranty, cash deposit, or letter of credit for transaction counterparties that do not have investment grade ratings.

Certain of the Company's derivative instruments contain credit-risk-related or other contingent features that could increase the payments for collateral it posts in the normal course of business when its financial instruments are in net liability positions. At December 31, 2017 , for agreements with such features, the Company's derivative instruments with liability fair values totaled $1 million for which the Company had no collateral posted with derivatives counterparties to satisfy these arrangements.

The Company has a concentration of credit risk as measured by its 30-day receivable exposure plus forward exposure. At December 31, 2017 , wholesale gas services' top 20 counterparties represented approximately 48% , or $203 million , of its total counterparty exposure and had a weighted average S&P equivalent credit rating of A-, all of which is consistent with the prior year. The S&P equivalent credit rating is determined by a process of converting the lower of the S&P or Moody's ratings to an internal rating ranging from 9 to 1, with 9 being equivalent to AAA/Aaa by S&P and Moody's, respectively, and 1 being D / Default by S&P and Moody's, respectively. A counterparty that does not have an external rating is assigned an internal rating based on the strength of the financial ratios of that counterparty. To arrive at the weighted average credit rating, each counterparty is assigned an internal ratio, which is multiplied by their credit exposure and summed for all counterparties. The sum is divided by the aggregate total counterparties' exposures, and this numeric value is then converted to an S&P equivalent.

The following table provides credit risk information related to the Company's third-party natural gas contracts receivable and payable positions at December 31:

| | Gross Receivables | | Gross Payables | |
|---|---|---|---|---|
| | **2017** | 2016 | **2017** | 2016 |
| | *(in millions)* | | *(in millions)* | |
| Netting agreements in place: | | | | |
| Counterparty is investment grade | **$ 342** | $ 375 | **$ 202** | $ 227 |
| Counterparty is non-investment grade | **20** | 14 | **25** | 31 |
| Counterparty has no external rating | **226** | 223 | **315** | 339 |
| No netting agreements in place: | | | | |
| Counterparty is investment grade | **19** | 11 | **4** | — |
| Amount recorded in balance sheets | **$ 607** | $ 623 | **$ 546** | $ 597 |

**Capital Requirements and Contractual Obligations**

The Company's capital investments are currently estimated to total $1.7 billion for 2018 , $1.7 billion for 2019 , $1.5 billion for 2020 , $1.2 billion for 2021 , and $1.4 billion for 2022 . The Company's capital investments include estimated capital expenditures related to Elizabethtown Gas and Elkton Gas of $123 million for 2018 , $125 million for 2019 , $124 million for 2020 , $126 million for 2021 , and $129 million for 2022 . See Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for additional information. The regulatory infrastructure programs and other construction programs are subject to periodic review and revision, and actual costs may vary from these estimates because of numerous factors. These factors include: changes in business conditions; changes in FERC rules and regulations; state regulatory agency approvals; changes in legislation; the cost and efficiency of labor, equipment, and materials; project scope and design changes; and the cost of capital. In addition, there can be no assurance that costs related to capital expenditures will be fully recovered.

In addition, as discussed in Note 2 to the financial statements, the Company provides postretirement benefits to certain eligible employees and funds trusts to the extent required by the applicable state regulatory agencies.

Other funding requirements related to obligations associated with scheduled maturities of long-term debt, including the related interest; pipeline charges, storage capacity, and gas supply; operating leases; asset management agreements; financial derivative obligations; pension and other postretirement benefit plans; and other purchase commitments, primarily related to environmental remediation liabilities, are detailed in the contractual obligations table that follows. See Notes 3 , 6 , 7 , and 11 to the financial statements for additional information.

**Contractual Obligations**

Contractual obligations at December 31, 2017 were as follows:

| | 2018 | 2019-2020 | 2021-2022 | After 2022 | Total |
|---|---|---|---|---|---|
| | | | *(in millions)* | | |
| Long-term debt [(a)] — | | | | | |
| Principal | $ 155 | $ 350 | $ 423 | $ 4,612 | $ 5,540 |
| Interest | 241 | 452 | 421 | 3,137 | 4,251 |
| Pipeline charges, storage capacity, and gas supply [(b)] | 813 | 968 | 714 | 2,294 | 4,789 |
| Operating leases [(c)] | 17 | 32 | 28 | 26 | 103 |
| Asset management agreements [(d)] | 9 | 6 | — | — | 15 |
| Financial derivative obligations [(e)] | 444 | 174 | 37 | 5 | 660 |
| Pension and other postretirement benefit plans [(f)] | 13 | 28 | — | — | 41 |
| Purchase commitments — | | | | | |
| Capital [(g)] | 1,821 | 2,979 | 2,662 | — | 7,462 |
| Other [(h)] | 31 | 7 | 2 | 1 | 41 |
| Total | $ 3,544 | $ 4,996 | $ 4,287 | $ 10,075 | $ 22,902 |

(a) Amounts are reflected based on final maturity dates. The Company plans to continue, when economically feasible, to retire higher-cost securities and replace these obligations with lower-cost capital if market conditions permit. Variable rate interest obligations are estimated based on rates at December 31, 2017, as reflected in the statements of capitalization.

(b) Includes charges recoverable through a natural gas cost recovery mechanism, or alternatively billed to Marketers, and demand charges associated with Sequent. The gas supply balance includes amounts for Nicor Gas and SouthStar gas commodity purchase commitments of 35 million mmBtu at floating gas prices calculated using forward natural gas prices at December 31, 2017 and valued at $101 million. The Company provides guarantees to certain gas suppliers for certain of its subsidiaries, including SouthStar, in support of payment obligations.

(c) Certain operating leases have provisions for step rent or escalation payments and certain lease concessions are accounted for by recognizing the future minimum lease payments on a straight-line basis over the respective minimum lease terms. However, this accounting treatment does not affect the future annual operating lease cash obligations as shown herein. In terms of rental charges and duration of contracts, the Company's most significant operating leases relate to real estate.

(d) Represent fixed-fee minimum payments for Sequent's affiliated asset management agreements.

(e) See Notes 1 and 10 to the financial statements for additional information.

(f) The Company forecasts contributions to the pension and other postretirement benefit plans over a three-year period. The Company anticipates no mandatory contributions to the qualified pension plan during the next three years. Amounts presented represent estimated benefit payments for the nonqualified pension plans, estimated non-trust benefit payments for the other postretirement benefit plans, and estimated contributions to the other postretirement benefit plan trusts, all of which will be made from the Company's corporate assets. See Note 2 to the financial statements for additional information related to the pension and other postretirement benefit plans, including estimated benefit payments. Certain benefit payments will be made through the related benefit plans. Other benefit payments will be made from the Company's corporate assets.

(g) Estimated capital expenditures are provided through 2022. Capital includes amounts related to Elizabethtown Gas and Elkton Gas, which represent $123 million in 2018, $249 million in 2019-2020, and $255 million in 2021-2022. See Note 11 to the financial statements under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for additional information. Capital also includes amounts related to the Company's pipeline investments that will be recorded at the joint venture level, which represent $64 million in 2018, $195 million in 2019-2020, and less than $1 million in capital expenditures in 2021-2022.

(h) Includes contractual environmental remediation liabilities that are generally recoverable through base rates or rate rider mechanisms and long-term service agreements.

**Cautionary Statement Regarding Forward-Looking Statements**

The Company's 2017 Annual Report contains forward-looking statements. Forward-looking statements include, among other things, statements concerning regulatory matters, the strategic goals for the Company, economic conditions, natural gas price volatility, derivative losses, regulatory and environmental cost recovery and other rate actions, current and proposed environmental regulations and related compliance plans and estimated expenditures, pending or potential litigation matters, access to sources of capital, projections for the qualified pension plan contributions, financing activities, completion dates of construction projects, completion of announced acquisitions or dispositions, filings with state and federal regulatory authorities, impacts of the Tax Reform Legislation, and estimated other plans and expenditures. In some cases, forward-looking statements can be identified by terminology such as "may," "will," "could," "should," "expects," "plans," "anticipates," "believes," "estimates," "projects," "predicts," "potential," or "continue" or the negative of these terms or other similar terminology. There are various factors that could cause actual results to differ materially from those suggested by the forward-looking statements; accordingly, there can be no assurance that such indicated results will be realized. These factors include:

- the impact of recent and future federal and state regulatory changes, including environmental laws and regulations governing air, water, land, and protection of other natural resources , and also changes in tax and other laws and regulations to which the Company is subject, as well as changes in application of existing laws and regulations;
- the uncertainty surrounding the recently enacted Tax Reform Legislation, including implementing regulations and IRS interpretations, actions that may be taken in response by regulatory authorities, and its impact, if any, on the credit ratings of the Company, Southern Company Gas Capital, and Nicor Gas;
- current and future litigation or regulatory investigations, proceedings, or inquiries ;
- the effects, extent, and timing of the entry of additional competition in the markets in which the Company operates;
- variations in demand for natural gas, including those relating to weather, the general economy, population and business growth (and declines), the effects of energy conservation and efficiency measures, including from the development and deployment of alternative energy sources, and any potential economic impacts resulting from federal fiscal decisions;
- available sources and costs of natural gas;
- limits on pipeline capacity;
- effects of inflation;
- the ability to control costs and avoid cost overruns during the development and construction of facilities;
- investment performance of the Company's employee and retiree benefit plans ;
- advances in technology;
- state and federal rate regulations and the impact of pending and future rate cases and negotiations, including rate actions relating to natural gas and other cost recovery mechanisms;
- the inherent risks involved in transporting and storing natural gas;
- the ability to successfully operate the natural gas distribution and storage facilities and the successful performance of necessary corporate functions;
- internal restructuring or other restructuring options that may be pursued;
- potential business strategies, including acquisitions or dispositions of assets or businesses, including the proposed disposition of Elizabethtown Gas and Elkton Gas, which cannot be assured to be completed or beneficial to the Company;
- the possibility that the anticipated benefits from the Merger cannot be fully realized or may take longer to realize than expected and the possibility that costs related to integration with Southern Company will be greater than expected;
- the ability of counterparties of the Company to make payments as and when due and to perform as required;
- the direct or indirect effect on the Company's business resulting from cyber intrusion or physical attack and the threat of physical attacks;
- interest rate fluctuations and financial market conditions and the results of financing efforts;
- changes in the Company's, Southern Company Gas Capital's, and Nicor Gas' credit ratings, including impacts on interest rates, access to capital markets, and collateral requirements;
- the impacts of any sovereign financial issues, including impacts on interest rates, access to capital markets, impacts on foreign currency exchange rates, counterparty performance, and the economy in general ;

- catastrophic events such as fires, earthquakes, explosions, floods, tornadoes, hurricanes and other storms, droughts, pandemic health events such as influenzas, or other similar occurrences;
- the direct or indirect effects on the Company's business resulting from incidents affecting the U.S. natural gas pipeline infrastructure or operation of storage resources;
- impairments of goodwill or long-lived assets;
- the effect of accounting pronouncements issued periodically by standard-setting bodies; and
- other factors discussed elsewhere herein and in other reports filed by the Company from time to time with the SEC.

**The Company expressly disclaims any obligation to update any forward-looking statements.**

**NOTES TO FINANCIAL STATEMENTS**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

**Index to the Notes to Financial Statements**

## 1 . SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### General

On July 1, 2016, Southern Company and Southern Company Gas (together with its subsidiaries, the Company) completed the Merger and Southern Company Gas became a wholly-owned, direct subsidiary of Southern Company. In addition to the Company, Southern Company is the parent company of four traditional electric operating companies, Southern Power, SCS, Southern Linc, Southern Holdings, Southern Nuclear, PowerSecure, Inc., and other direct and indirect subsidiaries. The Company is an energy services holding company whose primary business is the distribution of natural gas across seven states through its seven natural gas distribution utilities. The Company also is involved in several other businesses that are complementary to the distribution of natural gas. The traditional electric operating companies – Alabama Power Company, Georgia Power Company, Gulf Power Company, and Mississippi Power Company – are vertically integrated utilities providing electric service in four Southeastern states. Southern Power develops, constructs, acquires, owns, and manages power generation assets, including renewable energy projects, and sells electricity at market-based rates in the wholesale market. SCS, the system service company, provides, at cost, specialized services to Southern Company and its subsidiary companies. Southern Linc provides digital wireless communications for use by Southern Company and its subsidiary companies and also markets these services to the public and provides fiber optics services within the Southeast. Southern Holdings is an intermediate holding company subsidiary, primarily for Southern Company's investments in leveraged leases and for other electric services. Southern Nuclear operates and provides services to the Southern Company system's nuclear power plants. PowerSecure, Inc. is a provider of products and services in the areas of distributed generation, energy efficiency, and utility infrastructure.

The financial statements reflect the Company's investments in its subsidiaries on a consolidated basis. The equity method is used for subsidiaries in which the Company has significant influence but does not control and for VIEs where the Company has an equity investment, but is not the primary beneficiary. Intercompany transactions have been eliminated in consolidation.

The seven natural gas distribution utilities are subject to regulation by the regulatory agencies of each state in which they operate. As such, the Company's financial statements reflect the effects of rate regulation in accordance with GAAP and comply with the accounting policies and practices prescribed by its regulatory commissions. The preparation of financial statements in conformity with GAAP requires the use of estimates, and the actual results may differ from those estimates.

Pursuant to the Merger, Southern Company has pushed down the application of the acquisition method of accounting to the financial statements of the Company such that the assets and liabilities are recorded at their respective fair values, and goodwill has been established for the excess of the purchase price over the fair value of net identifiable assets. Accordingly, the financial statements of the Company for periods before and after July 1, 2016 (acquisition date) reflect different bases of accounting, and the financial positions and results of operations of those periods are not comparable. Throughout the financial statements and notes to the financial statements, periods prior to July 1, 2016 are identified as "predecessor," while periods after the acquisition date are identified as "successor."

Certain predecessor period data presented in the financial statements has been modified or reclassified to conform to the presentation used by the Company's new parent company, Southern Company. Changes to the statements of income include classifying operating revenues as natural gas revenues and other revenues as well as classifying cost of goods sold as cost of natural gas and cost of other sales, and presenting interest expense and AFUDC on a gross basis. Changes to the statements of cash flows include revised financial statement line item descriptions to align with the new balance sheet descriptions and expanded line items within each category of cash flow activity. Changes to the balance sheets include changing certain captions to conform to the presentation of Southern Company.

### Recently Issued Accounting Standards

#### *Revenue*

In 2014, the FASB issued ASC 606, *Revenue from Contracts with Customers* (ASC 606), replacing the existing accounting standard and industry specific guidance for revenue recognition with a five-step model for recognizing and measuring revenue from contracts with customers. The underlying principle of the new standard is to recognize revenue to depict the transfer of goods or services to customers at the amount expected to be collected. The new standard also requires enhanced disclosures regarding the nature, amount, timing, and uncertainty of revenue and the related cash flows arising from contracts with customers.

Most of the Company's revenue, including energy provided to customers, is from tariff offerings that provide natural gas without a defined contractual term, as well as longer-term contractual agreements, including non-derivative natural gas asset management and optimization arrangements.

The Company has completed the evaluation of all revenue streams and determined that the adoption of ASC 606 will not change the current timing of revenue recognition for such transactions. Some revenue arrangements, such as energy-related derivatives and alternative revenue programs, are excluded from the scope of ASC 606 and, therefore, will be accounted for and disclosed or presented separately from revenues under ASC 606 on the Company's financial statements. The Company has concluded contributions in aid of construction are not in scope for ASC 606 and will continue to be accounted for as an offset to property, plant, and equipment.

The new standard is effective for reporting periods beginning after December 15, 2017. The Company applied the modified retrospective method of adoption effective January 1, 2018. The Company also utilized practical expedients which allowed it to apply the standard to open contracts at the date of adoption and to reflect the aggregate effect of all modifications when identifying performance obligations and allocating the transaction price for contracts modified before the effective date. Under the modified retrospective method of adoption, prior year reported results are not restated; however, a cumulative-effect adjustment to retained earnings at January 1, 2018 is recorded. In addition, quarterly disclosures will include comparative information on 2018 financial statement line items under current guidance. The adoption of ASC 606 did not result in a cumulative-effect adjustment .

***Leases***

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (ASU 2016-02). ASU 2016-02 requires lessees to recognize on the balance sheet a lease liability and a right-of-use asset for all leases. ASU 2016-02 also changes the recognition, measurement, and presentation of expense associated with leases and provides clarification regarding the identification of certain components of contracts that would represent a lease. The accounting required by lessors is relatively unchanged . ASU 2016-02 is effective for fiscal years beginning after December 15, 2018 and the Company will adopt the new standard effective January 1, 2019.

The Company is currently implementing an information technology system along with the related changes to internal controls and accounting policies that will support the accounting for leases under ASU 2016-02. In addition, the Company has substantially completed a detailed inventory and analysis of its leases. In terms of rental charges and duration of contracts, the most significant leases relate to real estate and fleet vehicles where the Company is the lessee and to natural gas home appliances where the Company is the lessor. While the Company has not yet determined the ultimate impact, adoption of ASU 2016-02 is expected to have a significant impact on the Company's balance sheet.

***Other***

In March 2016, the FASB issued ASU No. 2016-09, *Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). ASU 2016-09 changes the accounting for income taxes and the cash flow presentation for share-based payment award transactions effective for fiscal years beginning after December 15, 2016. The new guidance requires all excess tax benefits and deficiencies related to the exercise or vesting of stock compensation to be recognized as income tax expense or benefit in the income statement. Previously, the Company recognized any excess tax benefits and deficiencies related to the exercise and vesting of stock compensation as additional paid-in capital. In addition, the new guidance requires excess tax benefits for share-based payments to be included in net cash provided from operating activities rather than net cash provided from financing activities on the statement of cash flows. The Company elected to adopt the guidance in 2016 and reflect the related adjustments as of January 1, 2016. Prior year's data presented in the financial statements has not been adjusted. The Company also elected to recognize forfeitures as they occur. The new guidance did not have a material impact on the results of operations, financial position, or cash flows of the Company. See Note 5 for the disclosure impacted by ASU 2016-09.

In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash* (ASU 2016-18). ASU 2016-18 eliminates the need to reflect transfers between cash and restricted cash in operating, investing, and financing activities in the statement of cash flows. Upon adoption, the net change in cash and cash equivalents during the period will include amounts generally described as restricted cash or restricted cash equivalents. ASU 2016-18 is effective for fiscal years beginning after December 15, 2017, and will be applied retrospectively to each period presented. The Company adopted ASU 2016-18 effective January 1, 2018 with no material impact on its financial statements.

On January 26, 2017, the FASB issued ASU No. 2017-04, *Intangibles – Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment* (ASU 2017-04). ASU 2017-04 removes the requirement to compare the implied fair value of goodwill with the carrying amount as part of Step 2 of the goodwill impairment test. Under the new standard, the goodwill impairment loss will be measured as the excess of a reporting unit's carrying amount over its fair value, not exceeding the total amount of goodwill allocated to that reporting unit, which may increase the frequency of goodwill impairment charges if a future goodwill impairment test does not pass the Step 1 evaluation. ASU 2017-04 is effective prospectively for periods beginning on or after December 15, 2019, with early adoption permitted. The Company adopted ASU 2017-04 effective January 1, 2018 with no impact on its financial statements.

On March 10, 2017, the FASB issued ASU No. 2017-07, *Compensation – Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost* (ASU 2017-07). ASU 2017-07 requires that an employer report the service cost component in the same line item or items as other compensation costs and requires the other components of net periodic pension and postretirement benefit costs to be separately presented in the income statement outside of income from operations. Additionally, only the service cost component is eligible for capitalization, when applicable. However, all cost components remain eligible for capitalization under FERC regulations. ASU 2017-07 will be applied retrospectively for the presentation of the service cost component and the other components of net periodic pension and postretirement benefit costs in the income statement. The capitalization of only the service cost component of net periodic pension and postretirement benefit costs in assets will be applied on a prospective basis. ASU 2017-07 is effective for periods beginning after December 15, 2017. The presentation changes required for net periodic pension and postretirement benefit costs will result in a decrease in the Company's operating income and an increase in other income for 2016 and 2017 and are expected to result in a decrease in operating income and an increase in other income for 2018. The Company adopted ASU 2017-07 effective January 1, 2018 with no material impact on its financial statements.

On August 28, 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12), amending the hedge accounting recognition and presentation requirements. ASU 2017-12 makes more financial and non-financial hedging strategies eligible for hedge accounting, amends the related presentation and disclosure requirements, and simplifies hedge effectiveness assessment requirements. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company adopted ASU 2017-12 effective January 1, 2018 with no material impact on its financial statements.

**Affiliate Transactions**

SCS, as agent for Alabama Power, Georgia Power, and Southern Power, and the Company have long-term interstate natural gas transportation agreements with SNG. The interstate transportation service provided to Alabama Power, Georgia Power, Southern Power, and the Company by SNG pursuant to these agreements is governed by the terms and conditions of SNG's natural gas tariff and is subject to FERC regulation. For the successor year ended December 31, 2017 , transportation revenue under these agreements from SCS and the Company were $136 million and $32 million , respectively. For the successor period of September 1, 2016 through December 31, 2016, transportation revenue under these agreements from SCS and the Company were $32 million and $15 million , respectively. See Note 4 under "Equity Method Investments – SNG" for additional information regarding the Company's investment in SNG.

The Company has an agreement with SCS under which the following services are currently being rendered to the Company as direct or allocated cost: accounting, finance and treasury, tax, information technology, auditing, insurance and pension administration, human resources, systems and procedures, purchasing, and other services. For the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 , costs for these services amounted to $63 million and $17 million , respectively. Cost allocation methodologies have been reported to the FERC and management believes they are reasonable. The FERC permits services to be rendered at cost by system service companies.

SCS, as agent for Alabama Power, Georgia Power, and Southern Power, has agreements with certain subsidiaries of the Company to purchase natural gas. For the successor year ended December 31, 2017 , natural gas purchases made by SCS from the Company's subsidiaries were $142 million . For the successor period of July 1, 2016 through December 31, 2016 , natural gas purchases made by SCS from the Company's subsidiaries were $27 million .

**Regulatory Assets and Liabilities**

The Company is subject to accounting requirements for the effects of rate regulation. Regulatory assets represent probable future revenues associated with certain costs that are expected to be recovered from customers through the ratemaking process. Regulatory liabilities represent probable future reductions in revenues associated with amounts that are expected to be credited to customers through the ratemaking process.

Regulatory assets and (liabilities) reflected in the balance sheets at December 31 relate to:

| | 2017 | 2016 | Note |
|---|---|---|---|
| | *(in millions)* | | |
| Environmental remediation | $ **410** | $ 411 | (a,b) |
| Retiree benefit plans | **270** | 325 | (a,c) |
| Long-term debt fair value adjustment | **138** | 154 | (d) |
| Under recovered regulatory clause revenues | **98** | 118 | (e) |
| Other regulatory assets | **79** | 58 | (f) |
| Other cost of removal obligations | **(1,646)** | (1,616) | (g) |
| Deferred income tax credits | **(1,063)** | (22) | (g,i) |
| Over recovered regulatory clause revenues | **(144)** | (104) | (e) |
| Other regulatory liabilities | **(21)** | (39) | (h) |
| Total regulatory assets (liabilities), net | $ **(1,879)** | $ (715) | |

Note: The recovery and amortization periods for these regulatory assets and (liabilities) are as follows:

(a) Not earning a return as offset in rate base by a corresponding asset or liability.

(b) Recovered through environmental cost recovery mechanisms when the remediation is performed or the work is performed.

(c) Recovered and amortized over the average remaining service period which range up to 15 years . See Note 2 for additional information.

(d) Recovered over the remaining life of the original debt issuances, which range up to 21 years .

(e) Recorded and recovered or amortized as approved or accepted by the appropriate state regulatory agencies over periods generally not exceeding eight years .

(f) Comprised of several components including unamortized loss on reacquired debt, weather normalization, franchise gas, deferred depreciation expense, and financial instrument-hedging assets, which are recovered or amortized as approved by the applicable state regulatory agencies over periods generally not exceeding 10 years , except for financial hedging-instruments. Financial instrument-hedging assets are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years . Upon final settlement, actual costs incurred are recovered, and actual income earned is refunded through the energy cost recovery clause.

(g) Other cost of removal obligations are recorded and deferred income tax liabilities are amortized over the related property lives, which may range up to 80 years . Cost of removal liabilities will be settled and trued up following completion of the related activities.

(h) Comprised of several components including energy efficiency programs, unamortized bond issuance costs and financial instrument-hedging liabilities which are recovered or amortized as approved by the applicable state regulatory agencies over periods generally not exceeding a range of four years to 20 years , except for financial hedging-instruments. Financial instrument-hedging liabilities are recorded over the life of the underlying hedged purchase contracts, which generally do not exceed two years . Upon final settlement, actual costs incurred are recovered, and actual income earned is refunded through the energy cost recovery clause.

(i) Includes excess deferred income tax liabilities not subject to normalization as a result of the Tax Reform Legislation, the recovery and amortization of which will be determined by the applicable state regulatory agencies. See Note 3 under "Regulatory Matters" and Note 5 for additional details.

In the event that a portion of a natural gas distribution utility's operations is no longer subject to applicable accounting rules for rate regulation, the Company would be required to write off to income related regulatory assets and liabilities that are not specifically recoverable through regulated rates. In addition, the natural gas distribution utility would be required to determine if any impairment to other assets, including plant, exists and write down the assets, if impaired, to their fair values. All regulatory assets and liabilities are to be reflected in rates. See Note 3 under "Regulatory Matters" for additional information.

**Revenues**

***Gas Distribution Operations***

The Company records revenues when goods or services are provided to customers. Those revenues are based on rates approved by the state regulatory agencies of the Company's utilities. As required by the Georgia PSC, Atlanta Gas Light bills Marketers in equal monthly installments for each residential, commercial, and industrial end-use customer's distribution costs as well as for capacity costs utilizing a seasonal rate design for the calculation of each residential end-use customer's annual straight-fixed-variable charge, which reflects the historic volumetric usage pattern for the entire residential class.

All of the natural gas distribution utilities, with the exception of Atlanta Gas Light, have rate structures that include volumetric rate designs that allow the opportunity to recover certain costs based on gas usage. Revenues from sales and transportation services are recognized in the same period in which the related volumes are delivered to customers. Revenues from residential and certain commercial and industrial customers are recognized on the basis of scheduled meter readings. Additionally, unbilled revenues are recognized for estimated deliveries of gas not yet billed to these customers, from the last bill date to the end of the accounting period. For other commercial and industrial customers and for all wholesale customers, revenues are based on actual deliveries to the end of the period.

The tariffs for several of the natural gas distribution utilities include provisions which allow for the recognition of certain revenues prior to the time such revenues are billed to customers. These provisions are referred to as alternative revenue programs and provide for the recognition of certain revenues prior to billing, so long as the amounts recognized will be collected from customers within 24 months of recognition. These programs are as follows:

- *Weather normalization adjustments* – reduce customer bills when winter weather is colder than normal and increase customer bills when weather is warmer than normal and are included in the tariffs for Virginia Natural Gas, Elizabethtown Gas, and Chattanooga Gas;
- *Revenue normalization mechanisms* – mitigate the impact of conservation and declining customer usage and are contained in the tariffs for Virginia Natural Gas, Chattanooga Gas, and Elkton Gas; and
- *Revenue true-up adjustment* – included within the provisions of the Georgia Rate Adjustment Mechanism (GRAM) program in which Atlanta Gas Light participates as a short-term alternative to formal rate case filings, the revenue true-up feature provides for a monthly positive (or negative) adjustment to record revenue in the amount of any variance to budgeted revenues, which are submitted and approved annually as a requirement of GRAM. Such adjustments are reflected in customer billings in a subsequent program year.

*Revenue Taxes*

The Company charges customers for gas revenue and gas use taxes imposed on the Company and remits amounts owed to various governmental authorities. Gas revenue taxes are recorded at the amount charged to customers, which may include a small administrative fee, as operating revenues, and the related taxes imposed on the Company are recorded as operating expenses on the statements of income. Gas use taxes are excluded from revenue and expense with the related administrative fee included in operating revenues when the tax is imposed on the customer. Revenue taxes included in operating expenses were $98 million and $31 million for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 , respectively, and $56 million and $101 million for the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , respectively.

***Gas Marketing Services***

The Company recognizes revenues from natural gas sales and transportation services in the same period in which the related volumes are delivered to customers and recognizes sales revenues from residential and certain commercial and industrial customers on the basis of scheduled meter readings. The Company also recognizes unbilled revenues for estimated deliveries of gas not yet billed to these customers from the most recent meter reading date to the end of the accounting period. For other commercial and industrial customers and for all wholesale customers, revenues are based on actual deliveries during the period.

The Company recognizes revenues on 12-month utility-bill management contracts as the lesser of cumulative earned or cumulative billed amounts. Revenues for warranty and repair contracts are recognized on a straight-line basis over the contract term while revenues for maintenance services are recognized at the time such services are performed.

***Wholesale Gas Services***

The Company nets revenues from energy and risk management activities with the associated costs. Profits from sales between segments are eliminated and are recognized as goods or services sold to end-use customers. The Company records transactions that qualify as derivatives at fair value with changes in fair value recognized in earnings in the period of change and characterized as unrealized gains or losses. Gains and losses on derivatives held for energy trading purposes are presented on a net basis in revenue.

***Concentration of Revenue***

The Company has a diversified base of customers. No single customer or industry comprises 10% or more of revenues. For all periods presented, uncollectible accounts averaged less than 1% of revenues.

**Cost of Natural Gas and Other Sales**

***Gas Distribution Operations***

Excluding Atlanta Gas Light, which does not sell natural gas to end-use customers, the Company charges its utility customers for natural gas consumed using natural gas cost recovery mechanisms set by the applicable state regulatory agencies. Under these mechanisms, all prudently-incurred natural gas costs are passed through to customers without markup, subject to regulatory review. The Company defers or accrues the difference between the actual cost of natural gas and the amount of commodity revenue earned in a given period such that no operating income is recognized related to these costs. The deferred or accrued amount is either billed or refunded to customers prospectively through adjustments to the commodity rate. Deferred and accrued natural gas costs are included in the balance sheets as regulatory assets and regulatory liabilities, respectively.

***Gas Marketing Services***

The Company's gas marketing services' customers are charged for actual or estimated natural gas consumed. Within cost of natural gas, the Company also includes costs of fuel and lost and unaccounted for gas, adjustments to reduce the value of inventories to market value, and gains and losses associated with certain derivatives. The Company records the costs to service its warranty and repair contract claims as cost of other sales.

**Income and Other Taxes**

The Company uses the liability method of accounting for deferred income taxes and provides deferred income taxes for all significant income tax temporary differences. Federal ITCs utilized are deferred and amortized to income over the average life of the related property. Taxes that are collected from customers on behalf of governmental agencies to be remitted to these agencies are presented on the balance sheet, excluding revenue taxes which are presented on the statements of income. See "Revenues – Gas Distribution Operations – Revenue Taxes" herein for additional information.

The Company recognizes tax positions that are "more likely than not" of being sustained upon examination by the appropriate taxing authorities. See Note 5 under "Unrecognized Tax Benefits" for additional information.

**Property, Plant, and Equipment**

Property, plant, and equipment is stated at original cost, or fair value at the effective date of the Merger as appropriate, less any regulatory disallowances and impairments. Original cost includes: materials; labor; minor items of property; appropriate administrative and general costs; payroll-related costs such as taxes, pensions, and other benefits; and the interest capitalized and cost of equity funds used during construction.

The Company's property, plant, and equipment in service consisted of the following at December 31:

| | **2017** | 2016 |
|---|---|---|
| | *(in millions)* | |
| Utility plant in service | **$ 13,079** | $ 11,996 |
| Information technology equipment and software | **366** | 324 |
| Storage facilities | **1,599** | 1,463 |
| Other | **789** | 725 |
| Total other plant in service | **2,754** | 2,512 |
| Total plant in service | **$ 15,833** | $ 14,508 |

The cost of replacements of property, exclusive of minor items of property, is capitalized. The cost of maintenance, repairs, and replacement of minor items of property is charged to other operations and maintenance expenses as incurred or performed. The portion of non-working gas used to maintain the structural integrity of the Company's natural gas storage facilities that is considered to be non-recoverable is recorded as depreciable property, plant, and equipment, while the recoverable or retained portion is recorded as non-depreciable property, plant, and equipment.

The amount of non-cash property additions recognized for the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were $135 million , $63 million , $41 million , and $48 million , respectively. These amounts are comprised of construction-related accounts payable outstanding at the end of each period.

**Depreciation and Amortization**

Depreciation of the original cost of utility plant in service is provided using composite straight-line rates, which approximated 2.9% in 2017 , 2.8% in 2016 , and 2.7% in 2015 . Depreciation studies are conducted periodically to update the composite rates that are approved by the respective state regulatory agency. When property subject to composite depreciation is retired or otherwise disposed of in the normal course of business, its original cost, together with the cost of removal, less salvage, is charged to accumulated depreciation. For other property dispositions, the applicable cost and accumulated depreciation are removed from the balance sheet accounts, and a gain or loss is recognized. Minor items of property included in the original cost of the asset are retired when the related property unit is retired.

Depreciation of the original cost of other plant in service is provided primarily on a straight-line basis over the following useful lives: five to 15 years for transportation equipment, 40 to 60 years for storage facilities, and up to 65 years for other assets.

**Allowance for Funds Used During Construction**

The Company records AFUDC for Atlanta Gas Light, Nicor Gas, Chattanooga Gas, and Elizabethtown Gas, which represents the estimated debt and equity costs of capital funds that are necessary to finance the construction of new regulated facilities. While cash is not realized currently, AFUDC increases the revenue requirement and is recovered over the service life of the asset through a higher rate base and higher depreciation. All current construction costs are included in rates. The capital expenditures of the other three natural gas utilities do not qualify for AFUDC treatment.

The Company's AFUDC composite rates are as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| Atlanta Gas Light | **8.10%** | 4.05% | 4.05% | 8.10% |
| Chattanooga Gas | **7.41** | 3.71 | 3.71 | 7.41 |
| Elizabethtown Gas (*) | **1.56** | 0.84 | 0.84 | 1.69 |
| Nicor Gas (*) | **1.22** | 1.50 | 1.50 | 0.82 |

(*) Variable rate is determined by the FERC method of AFUDC accounting.

Cash payments for interest during the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 totaled $223 million , $135 million , $119 million , and $181 million , respectively.

**Impairment of Long-Lived Assets**

The Company evaluates long-lived assets for impairment when events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The determination of whether an impairment has occurred is based on either a specific regulatory disallowance or an estimate of undiscounted future cash flows attributable to the assets, as compared with the carrying value of the assets. If an impairment has occurred, the amount of the impairment recognized is determined by either the amount of regulatory disallowance or by estimating the fair value of the assets and recording a loss if the carrying value is greater than the fair value. For assets identified as held for sale, the carrying value is compared to the estimated fair value less the cost to sell in order to determine if an impairment loss is required. Until the assets are disposed of, their estimated fair value is re-evaluated when circumstances or events change. See Note 3 under "Other Matters" for additional information.

**Goodwill and Other Intangible Assets and Liabilities**

Goodwill is not amortized, but is subject to an annual impairment test during the fourth quarter of each year, or more frequently if impairment indicators arise. In assessing goodwill for impairment, the Company has the option of first performing a qualitative assessment to determine that it is more likely than not that fair value of its reporting unit exceeds its carrying value (commonly referred to as Step 0). If the Company chooses not to perform a qualitative assessment, or the result of Step 0 indicates a probable decrease in fair value of its reporting unit below its carrying value, a quantitative two-step test is performed (commonly referred to as Step 1 and Step 2). Step 1 compares the fair value of the reporting unit to its carrying value including goodwill. If the carrying value exceeds the fair value, Step 2 is performed to allocate the fair value of the reporting unit to its assets and liabilities in order to determine the implied fair value of goodwill, which is compared to the carrying value of goodwill to calculate an impairment loss, if any.

For the 2017 annual impairment test, the Company performed Step 1 of the two-step impairment test, which resulted in the fair value of all its reporting units that have goodwill exceeding their carrying value. For the 2016 and 2015 annual impairment tests, the Company performed the qualitative Step 0 assessment and determined that it was more likely than not that the fair value of all its reporting units with goodwill exceeded their carrying values, and therefore no quantitative assessment was required. In the third quarter 2015, the Company identified potential impairment indicators and performed an interim impairment test for its storage and fuels reporting unit, which resulted in impairment of the full $14 million goodwill balance for that reporting unit.

Goodwill and other intangible assets consisted of the following:

| | | At December 31, 2017 | | |
|---|---|---|---|---|
| | Estimated Useful Life | Gross Carrying Amount | Accumulated Amortization | Other Intangible Assets, Net |
| | | | *(in millions)* | |
| **Other intangible assets subject to amortization:** | | | | |
| ***Gas marketing services*** | | | | |
| Customer relationships | 11-16 years | $ 221 | $ (77) | $ 144 |
| Trade names | 10-28 years | 115 | (9) | 106 |
| ***Wholesale gas services*** | | | | |
| Storage and transportation contracts | 1-5 years | 64 | (34) | 30 |
| Total intangible assets subject to amortization | | $ 400 | $ (120) | $ 280 |
| | | | | |
| **Goodwill:** | | | | |
| ***Gas distribution operations*** | | $ 4,702 | $ — | $ 4,702 |
| ***Gas marketing services*** | | 1,265 | — | 1,265 |
| Total goodwill | | $ 5,967 | $ — | $ 5,967 |

| | | At December 31, 2016 | | |
|---|---|---|---|---|
| | Estimated Useful Life | Gross Carrying Amount | Accumulated Amortization | Other Intangible Assets, Net |
| | | | *(in millions)* | |
| **Other intangible assets subject to amortization:** | | | | |
| ***Gas marketing services*** | | | | |
| Customer relationships | 11-16 years | $ 221 | $ (30) | $ 191 |
| Trade names | 10-28 years | 115 | (2) | 113 |
| ***Wholesale gas services*** | | | | |
| Storage and transportation contracts | 1-5 years | 64 | (2) | 62 |
| Total intangible assets subject to amortization | | $ 400 | $ (34) | $ 366 |
| | | | | |
| **Goodwill:** | | | | |
| ***Gas distribution operations*** | | $ 4,702 | $ — | $ 4,702 |
| ***Gas marketing services*** | | 1,265 | — | 1,265 |
| Total goodwill | | $ 5,967 | $ — | $ 5,967 |

Amortization associated with intangible assets for gas marketing services, included in depreciation and amortization, for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 was $54 million , $32 million , $8 million , and $18 million , respectively. Amortization of $32 million and $2 million for wholesale gas services was recorded as a reduction to operating revenues for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 , respectively.

As of December 31, 2017 , the estimated amortization associated with other intangible assets is as follows:

| | Amortization |
|---|---|
| | *(in millions)* |
| 2018 | $ 58 |
| 2019 | 40 |
| 2020 | 28 |
| 2021 | 21 |
| 2022 | 17 |

Included in other deferred credits and liabilities on the balance sheets is $91 million of intangible liabilities that were recorded during acquisition accounting for transportation contracts at wholesale gas services. At December 31, 2017 , the accumulated amortization of these intangible liabilities was $50 million . The estimated amortization associated with the intangible liabilities that will be recorded in natural gas revenues is as follows:

| | Amortization |
|---|---|
| | *(in millions)* |
| 2018 | $ 24 |
| 2019 | 17 |

**Cash and Cash Equivalents**

For purposes of the financial statements, temporary cash investments are considered cash equivalents. Temporary cash investments are securities with original maturities of 90 days or less.

**Energy Marketing Receivables and Payables**

Wholesale gas services provides services to retail gas marketers, wholesale gas marketers, utility companies, and industrial customers. These counterparties utilize netting agreements that enable wholesale gas services to net receivables and payables by counterparty upon settlement. Wholesale gas services also nets across product lines and against cash collateral, provided the master netting and cash collateral agreements include such provisions. While the amounts due from, or owed to, wholesale gas services' counterparties are settled net, they are recorded on a gross basis in the balance sheets as energy marketing receivables and energy marketing payables.

Wholesale gas services has trade and credit contracts that contain minimum credit rating requirements. These credit rating requirements typically give counterparties the right to suspend or terminate credit if the Company's credit ratings are downgraded to non-investment grade status. Under such circumstances, wholesale gas services would need to post collateral to continue transacting business with some of its counterparties. As of December 31, 2017 and 2016 , the required collateral in the event of a credit rating downgrade was $8 million and immaterial, respectively.

Wholesale gas services has a concentration of credit risk for services it provides to its counterparties. This credit risk is generally concentrated in 20 of its counterparties and is measured by 30-day receivable exposure plus forward exposure. Counterparty credit risk is evaluated using an S&P equivalent credit rating, which is determined by a process of converting the lower of the S&P or Moody's rating to an internal rating ranging from 9 to 1 , with 9 being equivalent to AAA/Aaa by S&P and Moody's, respectively, and 1 being equivalent to D/Default by S&P and Moody's, respectively. A counterparty that does not have an external rating is assigned an internal rating based on the strength of its financial ratios. As of December 31, 2017 , the top 20 counterparties represented 48% , or $203 million , of the total counterparty exposure and had a weighted average S&P equivalent rating of A-.

Credit policies were established to determine and monitor the creditworthiness of counterparties, including requirements to post collateral or other credit security, as well as the quality of pledged collateral. Collateral or credit security is most often in the form of cash or letters of credit from an investment-grade financial institution, but may also include cash or U.S. government securities held by a trustee. When wholesale gas services is engaged in more than one outstanding derivative transaction with the same counterparty and it also has a legally enforceable netting agreement with that counterparty, the "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty combined with a reasonable measure of the Company's credit risk. Wholesale gas services also uses other netting agreements with certain counterparties with whom it conducts significant transactions.

**Receivables and Provision for Uncollectible Accounts**

The Company's other trade receivables consist primarily of natural gas sales and transportation services billed to residential, commercial, industrial, and other customers. Customers are billed monthly and payment is due within 30 days. For the majority of receivables, a provision for uncollectible accounts is established based on historical collection experience and other factors. For the remaining receivables, if the Company is aware of a specific customer's inability to pay, a provision for uncollectible accounts is recorded to reduce the receivable balance to the amount the Company reasonably expects to collect. If circumstances change, the estimate of the recoverability of accounts receivable could change as well. Circumstances that could affect this estimate include, but are not limited to, customer credit issues, customer deposits, and general economic conditions. Customers' accounts are written off once they are deemed to be uncollectible.

***Nicor Gas***

Credit risk exposure at Nicor Gas is mitigated by a bad debt rider approved by the Illinois Commission. The bad debt rider provides for the recovery from (or refund to) customers of the difference between Nicor Gas' actual bad debt experience on an annual basis and the benchmark bad debt expense used to establish its base rates for the respective year.

***Atlanta Gas Light***

Concentration of credit risk occurs at Atlanta Gas Light for amounts billed for services and other costs to its customers, which consist of 15 Marketers in Georgia. The credit risk exposure to Marketers varies seasonally, with the lowest exposure in the non-peak summer months and the highest exposure in the peak winter months. Marketers are responsible for the retail sale of natural gas to end-use customers in Georgia. The functions of the retail sale of gas include the purchase and sale of natural gas, customer service, billings, and collections. The provisions of Atlanta Gas Light's tariff allow Atlanta Gas Light to obtain credit security support in an amount equal to a minimum of two times a Marketer's highest month's estimated bill from Atlanta Gas Light.

**Materials and Supplies**

Generally, materials and supplies include propane gas inventory, fleet fuel, and other materials and supplies. Materials are charged to inventory when purchased and then expensed or capitalized to plant, as appropriate, at weighted average cost when installed.

**Natural Gas for Sale**

The natural gas distribution utilities, with the exception of Nicor Gas, record natural gas inventories on a WACOG basis. In Georgia's competitive environment, Marketers sell natural gas to firm end-use customers at market-based prices. Part of the unbundling process, which resulted from deregulation and provides this competitive environment, is the assignment to Marketers of certain pipeline services that Atlanta Gas Light has under contract. On a monthly basis, Atlanta Gas Light assigns to Marketers the majority of the pipeline storage services that it has under contract, along with a corresponding amount of inventory. Atlanta Gas Light retains and manages a portion of its pipeline storage assets and related natural gas inventories for system balancing and to serve system demand.

Nicor Gas' inventory is carried at cost on a LIFO basis. Inventory decrements occurring during the year that are restored prior to year end are charged to cost of natural gas at the estimated annual replacement cost. Inventory decrements that are not restored prior to year end are charged to cost of natural gas at the actual LIFO cost of the inventory layers liquidated. The cost of gas, including inventory costs, is recovered from customers under a purchased gas recovery mechanism adjusted for differences between actual costs and amounts billed; therefore, LIFO liquidations have no impact on the Company's net income. At December 31, 2017 , the Nicor Gas LIFO inventory balance was $148 million . Based on the average cost of gas purchased in December 2017 , the estimated replacement cost of Nicor Gas' inventory at December 31, 2017 was $264 million . During 2017 , Nicor Gas did not liquidate any LIFO-based inventory.

The gas marketing services, wholesale gas services, and all other segments record inventory at LOCOM, with cost determined on a WACOG basis. For these segments, the Company evaluates the weighted average cost of its natural gas inventories against market prices to determine whether any declines in market prices below the WACOG are other than temporary. For any declines considered to be other than temporary, the Company recorded the following LOCOM adjustments to cost of natural gas to reduce the value of its natural gas inventories to market value.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **2017** | July 1, 2016 to December 31, 2016 | January 1, 2016 to June 30, 2016 | 2015 |
| | *(in millions)* | | *(in millions)* | |
| Gas marketing services | **$ —** | $ — | $ — | $ 3 |
| Wholesale gas services | **2** | 1 | 3 | 19 |
| All other | **—** | — | — | 1 |
| Total LOCOM adjustments | **$ 2** | $ 1 | $ 3 | $ 23 |

**Fair Value Measurements**

The Company has financial and nonfinancial assets and liabilities subject to fair value measurement. The financial assets and liabilities measured and carried at fair value include cash and cash equivalents and derivative instruments. The carrying values of receivables, short and long-term investments, accounts payable, short-term debt, other current assets and liabilities, and accrued interest approximate their respective fair value. The nonfinancial assets and liabilities include pension and other postretirement benefits. See Notes 2 and 9 for additional fair value disclosures.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The Company utilizes market data or assumptions that market participants would use in valuing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. The Company primarily applies the market approach for recurring fair value measurements to utilize the best available information. Accordingly, the Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Fair value balances are classified based on the observance of those inputs. The guidance establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The three levels of the fair value hierarchy defined by the guidance are as follows:

***Level 1***

Quoted prices in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. The Company's Level 1 items consist of exchange-traded derivatives, money market funds, and certain retirement plan assets.

***Level 2***

Pricing inputs are other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date. Level 2 includes those financial and commodity instruments that are valued using valuation methodologies. These methodologies are primarily industry-standard methodologies that consider various assumptions, including quoted forward prices for commodities, time value, volatility factors, and current market and contractual prices for the underlying instruments, as well as other relevant economic measures. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instrument, can be derived from observable data, or are supported by observable levels at which transactions are executed in the marketplace. Market price data is obtained from multiple sources in order to value certain Level 2 transactions and this data is representative of transactions that occurred in the marketplace. Level 2 instruments include shorter tenor exchange-traded and non-exchange-traded derivatives such as over-the-counter (OTC) forwards and options and certain retirement plan assets.

***Level 3***

Pricing inputs include significant unobservable inputs that may be used with internally developed methodologies to determine management's best estimate of fair value from the perspective of market participants. Level 3 instruments include those that may be more structured or otherwise tailored to customers' needs. Level 3 assets, liabilities, and any applicable transfers are primarily related to the Company's pension and other postretirement benefit plan assets as described in Note 2. Transfers into and out of Level 3 are determined using values at the end of the interim period in which the transfer occurred.

**Financial Instruments**

The Company uses derivative financial instruments to limit exposure to fluctuations in natural gas prices, weather, interest rates, and commodity prices. All derivative financial instruments are recognized as either assets or liabilities on the balance sheets (shown separately as "Risk Management Activities") and are measured at fair value. See Note 9 for additional information regarding fair value. Derivative contracts that qualify as cash flow hedges of anticipated transactions or are recoverable through the respective state regulatory agency approved fuel-hedging programs result in the deferral of related gains and losses in OCI or regulatory assets and liabilities, respectively, until the hedged transactions occur. Any ineffectiveness arising from cash flow hedges is recognized currently in net income. Cash flows from derivatives are classified on the statement of cash flows in the same category as the hedged item. See Note 10 for additional information regarding derivatives.

The Company offsets fair value amounts recognized for multiple derivative instruments executed with the same counterparty under a master netting arrangement. The Company had no outstanding collateral repayment obligations or rights to reclaim collateral arising from derivative instruments recognized at December 31, 2017 .

The Company enters into weather derivative contracts as economic hedges of natural gas revenues in the event of warmer-than-normal weather in the Heating Season. Exchange-traded options are carried at fair value, with changes reflected in natural gas revenues. Non-exchange-traded options are accounted for using the intrinsic value method. Changes in the intrinsic value for non-exchange-traded contracts are also reflected in natural gas revenues in the statements of income.

Wholesale gas services purchases natural gas for storage when the current market price paid to buy and transport natural gas plus the cost to store and finance the natural gas is less than the market price that can be received in the future, resulting in positive net natural gas revenues. NYMEX futures and OTC contracts are used to sell natural gas at that future price to substantially protect the natural gas revenues that will ultimately be realized when the stored natural gas is sold. The Company enters into transactions to secure transportation capacity between delivery points in order to serve its customers and various markets. NYMEX futures and OTC contracts are used to capture the price differential or spread between the locations served by the capacity in order to substantially protect the natural gas revenues that will ultimately be realized when the physical flow of natural gas between delivery points occurs. These contracts generally meet the definition of derivatives and are carried at fair value on the balance sheets, with changes in fair value recorded in natural gas revenues on the statements of income in the period of change. These contracts are not designated as hedges for accounting purposes.

The purchase, transportation, storage, and sale of natural gas are accounted for on a weighted average cost or accrual basis, as appropriate, rather than on the fair value basis utilized for the derivatives used to mitigate the natural gas price risk associated with the storage and transportation portfolio. Monthly demand charges are incurred for the contracted storage and transportation capacity and payments associated with asset management agreements, and these demand charges and payments are recognized on the statements of income in the period they are incurred. This difference in accounting methods can result in volatility in reported earnings, even though the economic margin is substantially unchanged from the dates the transactions were consummated.

The Company is exposed to potential losses related to financial instruments in the event of counterparties' nonperformance. The Company has established controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk.

### Comprehensive Income

The objective of comprehensive income is to report a measure of all changes in common stock equity of an enterprise that result from transactions and other economic events of the period other than transactions with owners. Comprehensive income consists of net income, changes in the fair value of qualifying cash flow hedges, certain changes in pension and other postretirement benefit plans, and reclassifications for amounts included in net income.

### Non-Wholly Owned Entities

The Company holds ownership interests in a number of business ventures with varying ownership structures and evaluates all of its partnership interests and other variable interests to determine if each entity is a VIE. If a venture is a VIE for which the Company is the primary beneficiary, the assets, liabilities, and results of operations of the entity are consolidated. The Company reassesses its conclusion as to whether an entity is a VIE upon certain occurrences, which are deemed reconsideration events under the guidance. See Note 4 under "Variable Interest Entities" for additional information.

For entities that are not determined to be VIEs, the Company evaluates whether it has control or significant influence over the investee to determine the appropriate consolidation and presentation. Generally, entities under the control of the Company are consolidated, and entities over which the Company can exert significant influence, but does not control, are accounted for under the equity method of accounting. However, the Company also invests in partnerships and limited liability companies that maintain separate ownership accounts. All such investments are required to be accounted for under the equity method unless the interest is so minor that there is virtually no influence over operating and financial policies, as are all investments in joint ventures.

Investments accounted for under the equity method are recorded within equity investments in unconsolidated subsidiaries within the other property and investments section in the balance sheets and the equity income is recorded within earnings from equity method investments within the other income (expense) section in the statements of income. See Note 4 under "Equity Method Investments" for additional information.

## 2 . RETIREMENT BENEFITS

The Company has a qualified defined benefit, trusteed, pension plan covering most eligible employees, which was closed in 2012 to new employees and reopened to all non-union employees on January 1, 2018. The qualified pension plan is funded in accordance with requirements of the Employee Retirement Income Security Act of 1974, as amended (ERISA). No contributions to the qualified pension plan were made for the year ended December 31, 2017 and no mandatory contributions to the qualified pension plan are anticipated for the year ending December 31, 2018 . The Company also provides certain non-qualified defined benefit and defined contribution pension plans for a selected group of management and highly compensated employees. Benefits under these non-qualified pension plans are funded on a cash basis. In addition, the Company provides certain medical care and life insurance benefits for eligible retired employees through a postretirement benefit plan. The Company also has a separate unfunded supplemental retirement health care plan that provides medical care and life insurance benefits to employees of discontinued businesses. For the year ending December 31, 2018 , no other postretirement trust contributions are expected.

In connection with the Merger, the Company performed updated valuations of its pension and other postretirement benefit plan assets and obligations to reflect actual census data at the new measurement date of July 1, 2016. This valuation resulted in increases to the projected benefit obligations for the pension and other postretirement benefit plans of approximately $177 million and $20 million , respectively, a decrease in the fair value of pension plan assets of $10 million , and an increase in the fair value of other postretirement benefit plan assets of $1 million . The Company also recorded a related regulatory asset of $437 million related to unrecognized prior service cost and actuarial gain/loss, as it is probable that this amount will be recovered through future rates for the natural gas distribution utilities. The previously unrecognized prior service cost and actuarial gain/loss related to non-utility subsidiaries were eliminated through purchase accounting adjustments.

### Actuarial Assumptions

The weighted average rates assumed in the actuarial calculations used to determine both the net periodic costs for the pension and other postretirement benefit plans for all periods presented and the benefit obligations as of the measurement date are presented below.

| | Successor | | Predecessor | |
|---|---|---|---|---|
| **Assumptions used to determine net periodic costs:** | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| **Pension plans** | | | | |
| Discount rate – interest costs [(a)] | **3.76%** | 3.21% | 4.00% | 4.20% |
| Discount rate – service costs [(a)] | **4.64** | 4.07 | 4.80 | 4.20 |
| Expected long-term return on plan assets | **7.60** | 7.75 | 7.80 | 7.80 |
| Annual salary increase | **3.50** | 3.50 | 3.70 | 3.70 |
| Pension band increase [(b)] | **N/A** | 2.00 | 2.00 | 2.00 |
| **Other postretirement benefit plans** | | | | |
| Discount rate – interest costs [(a)] | **3.40%** | 2.84% | 3.60% | 4.00% |
| Discount rate – service costs [(a)] | **4.55** | 3.96 | 4.70 | 4.00 |
| Expected long-term return on plan assets | **6.03** | 5.93 | 6.60 | 7.80 |
| Annual salary increase | **3.50** | 3.50 | 3.70 | 3.70 |

(a) Effective January 1, 2016, the Company uses a spot rate approach to estimate the service cost and interest cost components. Previously, the Company estimated these components using a single weighted average discount rate.

(b) Only applicable to Nicor Gas union employees. The pension bands for the former Nicor plan reflect the negotiated rates in accordance with the union agreements.

| Assumptions used to determine benefit obligations: | 2017 | 2016 |
|---|---|---|
| **Pension plans** | | |
| Discount rate | **3.74%** | 4.39% |
| Annual salary increase | **2.88** | 3.50 |
| Pension band increase (*) | **N/A** | 2.00 |
| **Other postretirement benefit plans** | | |
| Discount rate | **3.62%** | 4.15% |
| Annual salary increase | **2.56** | 3.50 |

(*) Only applicable to Nicor Gas union employees. The pension bands for the former Nicor plan reflect the negotiated rates in accordance with the union agreements.

The Company estimates the expected return on pension plan and other postretirement benefit plan assets by evaluating expected bond returns, equity risk premiums, asset allocations, the effects of active plan management, the impact of periodic plan asset rebalancing, and historical performance. The Company also considers guidance from its investment advisors in making a final determination of its expected rate of return on assets. To the extent the actual rate of return on assets realized over the course of a year is greater or less than the assumed rate, it does not affect that year's annual pension or other postretirement benefit plan cost; rather, this gain or loss reduces or increases future pension or other postretirement benefit plan costs.

An additional assumption used in measuring the accumulated other postretirement benefit obligations (APBO) was a weighted average medical care cost trend rate. The weighted average medical care cost trend rates used in measuring the APBO as of December 31, 2017 were as follows:

| | Initial Cost Trend Rate | Ultimate Cost Trend Rate | Year That Ultimate Rate is Reached |
|---|---|---|---|
| Pre-65 | 6.40% | 4.50% | 2038 |
| Post-65 medical | 7.80 | 4.50 | 2038 |
| Post-65 prescription | 7.80 | 4.50 | 2038 |

An annual increase or decrease in the assumed medical care cost trend rate of 1% would affect the APBO and the service and interest cost components at December 31, 2017 as follows:

| | 1 Percent Increase | 1 Percent Decrease |
|---|---|---|
| | *(in millions)* | |
| Benefit obligation | $ 11 | $ (10) |
| Service and interest costs | — | — |

**Pension Plans**

The total accumulated benefit obligation for the pension plans was $1.1 billion at December 31, 2017 and $1.1 billion at December 31, 2016 . Changes in the projected benefit obligations and the fair value of plan assets for all periods presented were as follows:

| | Successor | | Predecessor |
|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 |
| | *(in millions)* | | *(in millions)* |
| **Change in benefit obligation** | | | |
| Benefit obligation at beginning of period | **$ 1,133** | $ 1,244 ` | $ 1,067 |
| Service cost | **23** | 15 | 13 |
| Interest cost | **42** | 20 | 21 |
| Plan amendments | **(26)** | — | — |
| Benefits paid | **(91)** | (31) | (26) |
| Actuarial (gain) loss | **103** | (115) | 169 |
| Balance at end of period | **1,184** | 1,133 | 1,244 |
| **Change in plan assets** | | | |
| Fair value of plan assets at beginning of period | **983** | 837 ` | 847 |
| Actual return (loss) on plan assets | **175** | 48 | 15 |
| Employer contributions | **1** | 129 | 1 |
| Benefits paid | **(91)** | (31) | (26) |
| Fair value of plan assets at end of period | **1,068** | 983 | 837 |
| Accrued liability | **$ 116** | $ 150 | $ 407 |

At December 31, 2017 , the projected benefit obligations for the qualified and non-qualified pension plans were $1.1 billion and $44 million , respectively. All pension plan assets are related to the qualified pension plan.

Amounts recognized in the balance sheets at December 31, 2017 and 2016 related to the Company's pension plans consist of the following:

| | **2017** | 2016 |
|---|---|---|
| | *(in millions)* | |
| Other regulatory assets, deferred | **$ 217** | $ 267 |
| Other deferred charges and assets | **85** | 58 |
| Other current liabilities | **(3)** | (2) |
| Employee benefit obligations | **(198)** | (206) |

Presented below are the amounts included in accumulated OCI and regulatory assets at December 31, 2017 and 2016 related to the defined benefit pension plans that had not yet been recognized in net periodic pension cost along with the estimated amortization of such amounts for 2018 .

| | Regulatory Amortization | Prior Service Cost | Net (Gain) Loss |
|---|---|---|---|
| | | *(in millions)* | |
| **Balance at December 31, 2017:** | | | |
| Accumulated OCI | **$ —** | **$ —** | **$ (42)** |
| Regulatory assets (liabilities) | **40** | **(20)** | **197** |
| Total | **$ 40** | **$ (20)** | **$ 155** |
| **Balance at December 31, 2016:** | | | |
| Accumulated OCI | $ — | $ — | $ (43) |
| Regulatory assets (liabilities) | — | (2) | 269 |
| Total | $ — | $ (2) | $ 226 |
| **Estimated amortization in net periodic cost in 2018:** | | | |
| Regulatory assets (liabilities) | **$ 3** | **$ (2)** | **$ 16** |

The components of OCI and the changes in the balance of regulatory assets related to the defined benefit pension plans for all periods presented were as follows:

| | Accumulated OCI | Regulatory Assets |
|---|---|---|
| | *(in millions)* | |
| **Predecessor – Balance at December 31, 2015:** | $ 282 | $ 88 |
| Reclassification adjustments: | | |
| Amortization of prior service costs | 1 | — |
| Amortization of net loss | (9) | (4) |
| Total reclassification adjustments | (8) | (4) |
| Total change | (8) | (4) |
| **Predecessor – Balance at June 30, 2016:** | $ 274 | $ 84 |
| **Successor – Balance at July 1, 2016:** | $ — | $ 368 |
| Net (gain) loss | (43) | (87) |
| Reclassification adjustments: | | |
| Amortization of prior service costs | — | 1 |
| Amortization of net loss | — | (15) |
| Total reclassification adjustments | — | (14) |
| Total change | (43) | (101) |
| **Successor – Balance at December 31, 2016:** | $ (43) | $ 267 |
| Net (gain) loss | **1** | **(31)** |
| Reclassification adjustments: | | |
| Amortization of regulatory assets | **—** | **(1)** |
| Amortization of net loss | **—** | **(18)** |
| Total reclassification adjustments | **—** | **(19)** |
| Total change | **1** | **(50)** |
| **Successor – Balance at December 31, 2017:** | **$ (42)** | **$ 217** |

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

Components of net periodic pension costs for all periods presented were as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Service cost | **$ 23** | $ 15 | $ 13 | $ 28 |
| Interest cost | **42** | 20 | 21 | 45 |
| Expected return on plan assets | **(70)** | (35) | (33) | (65) |
| Amortization of regulatory assets | **1** | — | — | — |
| Amortization: | | | | |
| Prior service costs | **—** | (1) | (1) | (2) |
| Net (gain)/loss | **18** | 14 | 13 | 31 |
| Net periodic pension cost | **$ 14** | $ 13 | $ 13 | $ 37 |

Net periodic pension cost is the sum of service cost, interest cost, and other costs netted against the expected return on plan assets. The expected return on plan assets is determined by multiplying the expected rate of return on plan assets and the market-related value of plan assets.

Future benefit payments reflect expected future service and are estimated based on assumptions used to measure the projected benefit obligation for the pension plans. At December 31, 2017 , estimated benefit payments were as follows:

| | **Benefit Payments** |
|---|---|
| | *(in millions)* |
| 2018 | $ 100 |
| 2019 | 77 |
| 2020 | 79 |
| 2021 | 79 |
| 2022 | 80 |
| 2023 to 2027 | 392 |

**Other Postretirement Benefits**

Changes in the APBO and the fair value of plan assets for all periods presented were as follows:

| | Successor | | Predecessor |
|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 |
| | *(in millions)* | | *(in millions)* |
| **Change in benefit obligation** | | | |
| Benefit obligation at beginning of period | **$ 308** | $ 338 | $ 318 |
| Service cost | **2** | 1 | 1 |
| Interest cost | **10** | 5 | 5 |
| Benefits paid | **(19)** | (11) | (11) |
| Actuarial (gain) loss | **3** | (26) | 24 |
| Plan amendments | **3** | — | — |
| Employee contributions | **3** | 1 | 1 |
| Balance at end of period | **310** | 308 | 338 |
| **Change in plan assets** | | | |
| Fair value of plan assets at beginning of period | **105** | 100 | 99 |
| Actual return (loss) on plan assets | **20** | 4 | 1 |
| Employee contributions | **3** | 1 | 1 |
| Employer contributions | **17** | 11 | 10 |
| Benefits paid | **(20)** | (11) | (11) |
| Fair value of plan assets at end of year | **125** | 105 | 100 |
| Accrued liability | **$ 185** | $ 203 | $ 238 |

Amounts recognized in the balance sheets at December 31, 2017 and 2016 related to the Company's other postretirement benefit plans consist of the following:

| | **2017** | 2016 |
|---|---|---|
| | *(in millions)* | |
| Other regulatory assets, deferred | **$ 46** | $ 52 |
| Employee benefit obligations | **(185)** | (203) |

Presented below are the amounts included in accumulated OCI and regulatory assets at December 31, 2017 and 2016 related to the other postretirement benefit plans that had not yet been recognized in net periodic other postretirement benefit cost. The estimated amortization of such amounts for 2018 is immaterial.

| | **Regulatory Amortization** | **Prior Service Cost** | **Net (Gain) Loss** |
|---|---|---|---|
| | | *(in millions)* | |
| **Balance at December 31, 2017:** | | | |
| Accumulated OCI | **$ —** | **$ —** | **$ (3)** |
| Regulatory assets (liabilities) | **6** | **(7)** | **47** |
| Total | **$ 6** | **$ (7)** | **$ 44** |
| **Balance at December 31, 2016:** | | | |
| Accumulated OCI | $ — | $ — | $ (3) |
| Regulatory assets (liabilities) | — | (12) | 64 |
| Total | $ — | $ (12) | $ 61 |

The components of OCI, along with the changes in the balance of regulatory assets (liabilities), related to the other postretirement benefit plans for all periods presented were as follows:

| | Accumulated OCI | Regulatory Assets |
|---|---|---|
| | *(in millions)* | |
| **Predecessor – Balance at December 31, 2015:** | $ 36 | $ 30 |
| Net (gain) loss | — | — |
| Reclassification adjustments: | | |
| Amortization of prior service costs | — | 1 |
| Amortization of net loss | (1) | (1) |
| Total reclassification adjustments | (1) | — |
| Total change | (1) | — |
| **Predecessor – Balance at June 30, 2016:** | $ 35 | $ 30 |
| | | |
| **Successor – Balance at July 1, 2016:** | $ — | $ 77 |
| Net (gain) loss | (3) | (23) |
| Reclassification adjustments: | | |
| Amortization of prior service costs | — | 1 |
| Amortization of net loss | — | (3) |
| Total reclassification adjustments | — | (2) |
| Total change | (3) | (25) |
| **Successor – Balance at December 31, 2016:** | $ (3) | $ 52 |
| Net (gain) loss | **—** | **(5)** |
| Reclassification adjustments: | | |
| Amortization of prior service costs | **—** | **3** |
| Amortization of net loss | **—** | **(4)** |
| Total reclassification adjustments | **—** | **(1)** |
| Total change | **—** | **(6)** |
| **Successor – Balance at December 31, 2017:** | **$ (3)** | **$ 46** |

Components of the other postretirement benefit plans' net periodic cost for all periods presented were as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Service cost | **$ 2** | $ 1 | $ 1 | $ 2 |
| Interest cost | **10** | 5 | 5 | 13 |
| Expected return on plan assets | **(7)** | (3) | (3) | (7) |
| Amortization of regulatory assets | **—** | 2 | — | — |
| Amortization: | | | | |
| Prior service costs | **(3)** | — | (1) | (3) |
| Net (gain)/loss | **4** | — | 2 | 6 |
| Net periodic postretirement benefit cost | **$ 6** | $ 5 | $ 4 | $ 11 |

Future benefit payments, including prescription drug benefits, reflect expected future service and are estimated based on assumptions used to measure the APBO for the other postretirement benefit plans. At December 31, 2017 , estimated benefit payments were as follows:

| | Benefit Payments |
|---|---|
| | *(in millions)* |
| 2018 | $ 20 |
| 2019 | 20 |
| 2020 | 21 |
| 2021 | 21 |
| 2022 | 22 |
| 2023 to 2027 | 105 |

**Benefit Plan Assets**

Pension plan and other postretirement benefit plan assets are managed and invested in accordance with all applicable requirements, including ERISA and the Internal Revenue Code of 1986, as amended. The Company's investment policies for both the pension plan and the other postretirement benefit plans cover a diversified mix of assets, including equity and fixed income securities, real estate, and private equity. The Company minimizes the risk of large losses primarily through diversification but also monitors and manages other aspects of risk.

The composition of the Company's pension plan and other postretirement benefit plan assets as of December 31, 2017 and 2016 , along with the targets for each plan, is presented below:

| | Target | **2017** | 2016 |
|---|---|---|---|
| **Pension plan assets:** | | | |
| Equity | 53% | **65%** | 69% |
| Fixed Income | 15 | **19** | 20 |
| Cash | 2 | **6** | 1 |
| Other | 30 | **10** | 10 |
| Balance at end of period | 100% | **100%** | 100% |
| **Other postretirement benefit plan assets:** | | | |
| Equity | 72% | **76%** | 74% |
| Fixed Income | 24 | **20** | 23 |
| Cash | 1 | **2** | 1 |
| Other | 3 | **2** | 2 |
| Total | 100% | **100%** | 100% |

The investment strategy for plan assets related to the Company's qualified pension plan is to be broadly diversified across major asset classes. The asset allocation is established after consideration of various factors that affect the assets and liabilities of the pension plan including, but not limited to, historical and expected returns and interest rates, volatility, correlations of asset classes, the current level of assets and liabilities, and the assumed growth in assets and liabilities. Because a significant portion of the liability of the pension plan is long-term in nature, the assets are invested consistent with long-term investment expectations for return and risk. To manage the actual asset class exposures relative to the target asset allocation, the Company employs a formal rebalancing program for its pension plan assets. As additional risk management, external investment managers and service providers are subject to written guidelines to ensure appropriate and prudent investment practices. Management believes the portfolio is well-diversified with no significant concentrations of risk.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

***Investment Strategies***

Detailed below is a description of the investment strategies for the successor period for each major asset category for the pension and other postretirement benefit plans disclosed above:

- ***Domestic equity.*** A mix of large and small capitalization stocks with generally an equal distribution of value and growth attributes, managed both actively and through passive index approaches.
- ***International equity.*** A mix of growth stocks and value stocks with both developed and emerging market exposure, managed both actively and through passive index approaches.
- ***Fixed income.*** A mix of domestic and international bonds.
- ***Special situations.*** Investments in opportunistic strategies with the objective of diversifying and enhancing returns and exploiting short-term inefficiencies as well as investments in promising new strategies of a longer-term nature.
- ***Real estate investments.*** Investments in traditional private market, equity-oriented investments in real properties (indirectly through pooled funds or partnerships) and in publicly traded real estate securities.
- ***Private equity.*** Investments in private partnerships that invest in private or public securities typically through privately-negotiated and/or structured transactions, including leveraged buyouts, venture capital, and distressed debt.

The investment strategies for the predecessor periods followed a policy to preserve the plans' capital and maximize investment earnings in excess of inflation within acceptable levels of capital market volatility. To accomplish this goal, the plans' assets were managed to optimize long-term return while maintaining a high standard of portfolio quality and diversification. In developing the allocation policy for the assets of the pension and other postretirement benefit plans, the Company examined projections of asset returns and volatility over a long-term horizon. In connection with this analysis, the risk and return trade-offs of alternative asset classes and asset mixes were evaluated given long-term historical relationships as well as prospective capital market returns. The Company also conducted asset-liability studies to match projected asset growth with projected liability growth to determine whether there is sufficient liquidity for projected benefit payments. Asset mix guidelines were developed by incorporating the results of these analyses with an assessment of the Company's risk posture, and taking into account industry practices. The Company periodically evaluated its investment strategy to ensure that plan assets were sufficient to meet the benefit obligations of the plans. As part of the ongoing evaluation, the Company made changes to its targeted asset allocations and investment strategy.

***Benefit Plan Asset Fair Values***

Following are the fair value measurements for the pension plan and the other postretirement benefit plan assets as of December 31, 2017 and 2016 . The fair values presented are prepared in accordance with GAAP. For purposes of determining the fair value of the pension plan and other postretirement benefit plan assets and the appropriate level designation for the successor period, management relies on information provided by the plan's trustee. This information is reviewed and evaluated by management with changes made to the trustee information as appropriate. Management believes the portfolio is well-diversified with no significant concentrations of risk.

Valuation methods of the primary fair value measurements disclosed in the following tables are as follows:

- ***Domestic and international equity.*** Investments in equity securities such as common stocks, American depositary receipts, and real estate investment trusts that trade on a public exchange are classified as Level 1 investments and are valued at the closing price in the active market. Equity investments with unpublished prices (i.e. pooled funds) are valued as Level 2, when the underlying holdings used to value the investment are comprised of Level 1 or Level 2 equity securities.
- ***Fixed income.*** Investments in fixed income securities are generally classified as Level 2 investments and are valued based on prices reported in the market place. Additionally, the value of fixed income securities takes into consideration certain items such as broker quotes, spreads, yield curves, interest rates, and discount rates that apply to the term of a specific instrument.
- ***Real estate investments, private equity, and special situations investments.*** Investments in real estate, private equity, and special situations are generally classified as Net Asset Value as a Practical Expedient, since the underlying assets typically do not have publicly available observable inputs. The fund manager values the assets using various inputs and techniques depending on the nature of the underlying investments. Techniques may include purchase multiples for comparable transactions, comparable public company trading multiples, discounted cash flow analysis, prevailing market capitalization rates, recent sales of comparable investments, and independent third-party appraisals. The fair value of partnerships is determined by aggregating the value of the underlying assets less liabilities.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

The fair values of pension plan assets as of December 31, 2017 and 2016 are presented below. These fair value measurements exclude cash, receivables related to investment income, pending investments sales, and payables related to pending investment purchases. For 2017 and 2016 , special situations (absolute return and hedge funds) investment assets are presented in the table below based on the nature of the investment.

| | Fair Value Measurements Using | | | | |

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

The fair values of other postretirement benefit plan assets as of December 31, 2017 and 2016 are presented below. These fair value measurements exclude cash, receivables related to investment income, pending investments sales, and payables related to pending investment purchases. For 2017 and 2016 , special situations (absolute return and hedge funds) investment assets are presented in the table below based on the nature of the investment.

| As of December 31, 2017: | Fair Value Measurements Using: Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Net Asset Value as a Practical Expedient (NAV) | Total |

**Employee Savings Plan**

SCS sponsors 401(k) defined contribution plans covering certain eligible Southern Company Gas employees. Through December 31, 2017, the 401(k) plans provided matching contributions of either 65% on up to 8% of an employee's eligible compensation, or a 100% matching contribution on up to 3% of an employee's eligible compensation, followed by a 75% matching contribution on up to the next 3% of an employee's eligible compensation. Total matching contributions made to the 401(k) plans for the successor periods ended December 31, 2017 and 2016 were $17 million and $8 million , respectively, and for the predecessor periods ended June 30, 2016 and December 31, 2015 were $10 million and $16 million , respectively.

For employees not accruing a benefit under the pension plan, additional contributions made to the 401(k) plans for the successor period ended December 31, 2017 were $2 million , for the successor period ended December 31, 2016 were not material, and for the predecessor periods ended June 30, 2016 and December 31, 2015 were $2 million for each period.

Effective January 1, 2018, the 401(k) plans were merged into the Southern Company Employee Savings Plan, which is a defined contribution plan covering substantially all employees of the Company. Under this plan, the Company matches a portion of the first 6% of employee base salary contributions. The maximum Company match is 5.1% of an employee's base salary.

## 3 . CONTINGENCIES AND REGULATORY MATTERS

### General Litigation Matters

Nicor Gas and Nicor Energy Services Company, wholly-owned subsidiaries of the Company, and Nicor Inc. were defendants in a putative class action initially filed in 2011 in the state court in Cook County, Illinois. The plaintiffs purported to represent a class of the customers who purchased the Gas Line Comfort Guard product from Nicor Energy Services Company and variously alleged that the marketing, sale, and billing of the Gas Line Comfort Guard product violated the Illinois Consumer Fraud and Deceptive Business Practices Act, constituting common law fraud and resulting in unjust enrichment of these entities. The plaintiffs sought, on behalf of the classes they purported to represent, actual and punitive damages, interest, costs, attorney fees, and injunctive relief. On February 8, 2017, the judge denied the plaintiffs' motion for class certification and the Company's motion for summary judgment. On March 7, 2017, the parties reached a settlement, which was finalized and effective on April 3, 2017. The settlement did not have a material impact on the Company's financial statements.

The Company is assessing its alleged involvement in an incident that occurred in one of its service territories that resulted in several deaths, injuries, and property damage. One of the Company's utilities has been named as one of the defendants in several lawsuits related to this incident. The Company has insurance that provides full coverage of any financial exposure in excess of $11 million that is related to this incident. During the successor period ended December 31, 2016 and the predecessor period ended December 31, 2015 , the Company recorded reserves for substantially all of its potential exposure from these cases. The ultimate outcome of this matter cannot be determined at this time.

The Company is subject to certain claims and legal actions arising in the ordinary course of business. The ultimate outcome of these matters and such pending or potential litigation against the Company cannot be determined at this time; however, for current proceedings not specifically reported herein, management does not anticipate that the ultimate liabilities, if any, arising from such current proceedings would have a material effect on the Company's financial statements.

### Environmental Matters

The Company's operations are regulated by state and federal environmental agencies through a variety of laws and regulations governing air, water, land, and protection of other natural resources. The Company maintains a comprehensive environmental compliance strategy to assess upcoming requirements and compliance costs associated with these environmental laws and regulations. The costs, including capital expenditures and operations and maintenance costs, required to comply with environmental laws and regulations impact future results of operations, cash flows, and financial condition. Compliance costs may result from the installation of additional environmental controls. Compliance with these environmental requirements involves significant capital and operating costs to clean up affected sites. The Company conducts studies to determine the extent of any required clean up and has recognized in its financial statements the costs to clean up known impacted sites. The natural gas distribution utilities in Illinois, New Jersey, Georgia, and Florida have each received authority from their applicable state regulatory agencies to recover approved environmental compliance costs through regulatory mechanisms.

The Company is subject to environmental remediation liabilities associated with 46 former MGP sites in five different states. Accrued environmental remediation costs of $388 million and $426 million have been recorded in the balance sheets as of December 31, 2017 and 2016, respectively. These environmental remediation expenditures are recoverable from customers through rate mechanisms approved by the applicable state regulatory agencies, with the exception of one site representing $2 million of the accrued remediation costs.

In 2015, the EPA filed an administrative complaint and notice of opportunity for hearing against Nicor Gas. The complaint alleged violation of the regulatory requirements applicable to polychlorinated biphenyls in the Nicor Gas distribution system and the EPA sought a total civil penalty of $0.3 million . On January 26, 2017, the EPA notified Nicor Gas that it agreed to voluntarily dismiss its administrative complaint with prejudice and without payment of a civil penalty or other further obligation on the part of Nicor Gas.

The Company's ultimate environmental compliance strategy and future environmental capital expenditures will be affected by the final requirements of new or revised environmental regulations and the outcome of any legal challenges to the environmental rules. The ultimate outcome of these matters cannot be determined at this time.

### FERC Matters

At December 31, 2017 , gas midstream operations was involved in two gas pipeline construction projects. These projects, along with the Company's existing pipelines, are intended to provide diverse sources of natural gas supplies to customers, resolve current and long-term supply planning for new capacity, enhance system reliability, and generate economic development in the areas served. On October 13, 2017, the Atlantic Coast Pipeline project received FERC approval. On January 19, 2018, the PennEast Pipeline project received FERC approval.

Additionally, on August 1, 2017, the Dalton Pipeline was placed in service as authorized by the FERC and transportation service for customers commenced. See Note 4 for additional information.

**Regulatory Matters**

***Regulatory Infrastructure Programs***

The Company has infrastructure improvement programs at several of its utilities. Descriptions of these programs are as follows:

*Nicor Gas*

In 2013, Illinois enacted legislation that allows Nicor Gas to provide more widespread safety and reliability enhancements to its distribution system. The legislation stipulates that rate increases to customers as a result of any infrastructure investments shall not exceed a cumulative annual average of 4.0% or, in any given year, 5.5% , of base rate revenues. In 2014, the Illinois Commission approved the nine -year regulatory infrastructure program, Investing in Illinois, under which Nicor Gas implemented rates that became effective in March 2015.

Investing in Illinois is subject to annual review by the Illinois Commission. In conjunction with the base rate case order issued by the Illinois Commission on January 31, 2018, Nicor Gas is recovering the portion of these program costs incurred prior to December 31, 2017 through base rates. See "Base Rate Cases" herein for additional information.

*Atlanta Gas Light*

Atlanta Gas Light's STRIDE program, which was initially approved by the Georgia PSC in 2009, is comprised of the Integrated System Reinforcement Program (i-SRP), the Integrated Customer Growth Program (i-CGP), and the Integrated Vintage Plastic Replacement Program (i-VPR) and consists of infrastructure development, enhancement, and replacement programs that are used to update and expand distribution systems and LNG facilities, improve system reliability, and meet operational flexibility and growth. For 2017 and subsequent years, the recovery of and return on current and future capital investments under the STRIDE program are included in the annual base rate revenue adjustment under GRAM.

The i-CGP program authorized Atlanta Gas Light to spend $91 million through 2017 on projects to extend its pipeline facilities to serve customers in areas without pipeline access and create new economic development opportunities in Georgia. This program ended in 2017 and was replaced with a tariff to provide up to $15 million annually for Atlanta Gas Light to commit to strategic economic development projects.

The i-SRP program authorized $445 million of capital spending through 2017 for projects to upgrade Atlanta Gas Light's distribution system and LNG facilities in Georgia, improve its peak-day system reliability and operational flexibility, and create a platform to meet long-term forecasted growth. In August 2016, Atlanta Gas Light filed a petition with the Georgia PSC for approval of a four -year extension of its i-SRP seeking approval to invest an additional $177 million to improve and upgrade its core gas distribution system in years 2017 through 2020.

The i-VPR program authorized Atlanta Gas Light to spend $275 million through 2017 to replace 756 miles of aging plastic pipe that was installed primarily in the mid-1960s to the early 1980s. Atlanta Gas Light has identified approximately 3,300 miles of vintage plastic mains in its system that should be considered for potential replacement.

See "Base Rate Cases" herein for additional information.

The orders for the STRIDE programs provide for recovery of all prudent costs incurred in the performance of the program. Atlanta Gas Light will recover from end-use customers, through billings to Marketers, the costs related to the programs net of any cost savings from the programs. The regulatory asset represents recoverable incurred costs related to the programs that will be collected in future rates charged to customers through the rate riders. The future expected costs to be recovered through rates related to allowed, but not incurred costs, are recognized in an unrecognized ratemaking amount that is not reflected on the balance sheets. This allowed cost is primarily the equity return on the capital investment under the program. See "Unrecognized Ratemaking Amounts" herein for additional information.

Atlanta Gas Light capitalizes and depreciates the capital expenditure costs incurred from the STRIDE programs over the life of the assets. Operations and maintenance costs are expensed as incurred. Recoveries, which are recorded as revenue, are based on a formula that allows Atlanta Gas Light to recover operations and maintenance costs in excess of those included in its current base rates, depreciation, and an allowed rate of return on capital expenditures. However, Atlanta Gas Light is allowed the recovery of carrying costs on the under recovered balance resulting from the timing difference.

*Elizabethtown Gas*

Elizabethtown Gas' 2013 extension of the Aging Infrastructure Replacement (AIR) enhanced infrastructure program allowed for infrastructure investment of $115 million over four years and was focused on the replacement of aging cast iron in its pipeline system. Carrying charges on the additional capital spend are being accrued and deferred for regulatory purposes at a weighted average cost of capital of 6.65% . Effective July 1, 2017, investments under this program, which ended September 30, 2017, are being recovered through base rate revenues. See "Base Rate Cases" herein for additional information.

In 2015, Elizabethtown Gas filed the Safety, Modernization and Reliability Tariff plan with the New Jersey BPU seeking approval to invest more than $1.1 billion to replace 630 miles of vintage cast iron, steel, and copper pipeline, as well as 240 regulator stations. During the first quarter 2018, Elizabethtown Gas withdrew this filing in response to a proposed rule by the New Jersey BPU to incentivize utilities to accelerate investment in infrastructure replacement programs that enhance reliability, resiliency, and/or safety of the distribution system. The ultimate outcome of this matter cannot be determined at this time.

*Virginia Natural Gas*

In 2012, the Virginia Commission approved the Steps to Advance Virginia's Energy (SAVE) program, an accelerated infrastructure replacement program, to be completed over a five -year period. This program included a maximum allowance for capital expenditures of $25 million per year, not to exceed $105 million in total.

In March 2016, the Virginia Commission approved an extension to the SAVE program for Virginia Natural Gas to replace more than 200 miles of aging pipeline infrastructure and invest up to $30 million in 2016 and up to $35 million annually through 2021.

The SAVE program is subject to annual review by the Virginia Commission. In conjunction with the base rate case order issued by the Virginia Commission on December 21, 2017, Virginia Natural Gas is recovering the portion of these program costs incurred prior to September 1, 2017 through base rates. See "Base Rate Cases" herein for additional information.

*Florida City Gas*

In 2015, the Florida PSC approved Florida City Gas' Safety, Access, and Facility Enhancement program, under which costs incurred for replacing aging pipes are recovered through a rate rider with annual adjustments and true-ups. Under the program, Florida City Gas is authorized to spend $105 million over a 10 -year period on infrastructure relocation and enhancement projects.

***PRP Settlement***

In 2015, Atlanta Gas Light received a final order from the Georgia PSC for a rate true-up of allowed unrecovered revenue through 2014 related to its PRP. This order allows Atlanta Gas Light to recover $144 million of the $178 million previously unrecovered program revenue. The remaining $34 million requested related primarily to previously unrecognized ratemaking amounts and did not have a material impact on the Company's financial statements. The Company also recognized $1 million of interest expense and $5 million in operations and maintenance expense related to the PRP on the Company's statements of income for the predecessor year ended December 31, 2015. See "Unrecognized Ratemaking Amounts" herein for additional information.

As a result of the PRP settlement, Atlanta Gas Light began recovering incremental PRP surcharge amounts through three phased in increases in addition to its previously existing PRP surcharge amount, which was established to address recovery of the unrecovered PRP balance of $144 million in 2015 and the estimated amounts to be earned under the program through 2025. The initial incremental surcharge of approximately $15 million annually was effective in October 2015, with additional annual increases of approximately $15 million in each of October 2016 and 2017. The final increase scheduled for October 2017 was included in the implementation of GRAM in March 2017. The under recovered balance is the result of the continued revenue requirement earned under the program offset by the existing and incremental PRP surcharges. The unrecovered balance at December 31, 2017 was $187 million , including $104 million of unrecognized equity return. The PRP surcharge will remain in effect until the earlier of the full recovery of the under recovered amount or December 31, 2025. See "Base Rate Cases" herein for additional information on GRAM.

One of the capital projects under the PRP experienced construction issues and Atlanta Gas Light was required to complete mitigation work prior to placing it in service. These mitigation costs will be included in future base rates in 2018. Provisions in the order resulted in the recognition of $5 million in operations and maintenance expense for the predecessor year ended December 31, 2015 on the Company's statements of income. In 2017, Atlanta Gas Light recovered $20 million from the settlement of contractor litigation claims and continues to pursue contractual and legal claims against a third-party contractor. Mitigation costs recovered through the legal process are retained by Atlanta Gas Light. The ultimate outcome of this matter cannot be determined at this time.

***Base Rate Cases***

*Settled Base Rate Cases*

On February 21, 2017, the Georgia PSC approved GRAM and a $20 million increase in annual base rate revenues for Atlanta Gas Light, effective March 1, 2017. GRAM adjusts base rates annually, up or down, using an earnings band based on the previously approved ROE of 10.75% and does not collect revenue through special riders and surcharges. Atlanta Gas Light adjusts rates up to the lower end of the band of 10.55% and adjusts rates down to the higher end of the band of 10.95% . Various infrastructure programs previously authorized by the Georgia PSC under Atlanta Gas Light's STRIDE program, which include the i-VPR and i-SRP, will continue under GRAM and the recovery of and return on the infrastructure program investments will be included in annual base rate adjustments. The Georgia PSC will review Atlanta Gas Light's performance annually under GRAM.

Pursuant to the GRAM approval, Atlanta Gas Light and the staff of the Georgia PSC agreed to a variation to the i-CGP that was formerly part of Atlanta Gas Light's STRIDE program. As a result, a new tariff was created, effective October 10, 2017, to provide up to $15 million annually for Atlanta Gas Light to commit to strategic economic development projects. Projects under this tariff must be approved by the Georgia PSC.

Beginning with the next rate adjustment in June 2018, Atlanta Gas Light's recovery of the previously unrecovered Pipeline Replacement Program revenue through 2014, as well as the mitigation costs associated with the Pipeline Replacement Program that were not previously included in its rates, will also be included in GRAM. In connection with the GRAM approval, the last monthly Pipeline Replacement Program surcharge increase became effective March 1, 2017.

On June 30, 2017, the New Jersey BPU approved a settlement that provides for a $13 million increase in annual base rate revenues, effective July 1, 2017, based on a ROE of 9.6% . Also included in the settlement was a new composite depreciation rate that is expected to result in a $3 million annual reduction of depreciation. See Note 11 under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for information on the proposed sale of Elizabethtown Gas.

On December 21, 2017, the Virginia Commission approved a settlement for a $34 million increase in annual base rate revenues, effective September 1, 2017, including $13 million related to the recovery of investments under the SAVE program. See "Regulatory Infrastructure Programs" herein for additional information. An authorized ROE range of 9.0% to 10.0% with a midpoint of 9.5% will be used to determine the revenue requirement in any filing, other than for a change in base rates.

On January 31, 2018, the Illinois Commission approved a $137 million increase in annual base rate revenues, including $93 million related to the recovery of investments under the Investing in Illinois program, effective February 8, 2018, based on a ROE of 9.8% .

*Pending Base Rate Cases*

On October 23, 2017, Florida City Gas filed a general base rate case with the Florida PSC requesting a $19 million increase in annual base rate revenues. On January 29, 2018, Florida City Gas filed an update to incorporate the effects of the Tax Reform Legislation that, if approved, would reduce the requested base rate revenues by $4 million . The requested increase is based on a 2018 projected test year and a ROE of 11.25% . The requested increase includes $3 million related to the recovery of investments under SAFE that are currently being recovered through a surcharge. Additionally, Florida City Gas requested an interim rate increase of $5 million annually that was approved and became effective January 12, 2018, subject to refund. The Florida PSC is expected to rule on the requested increase in mid-2018.

On December 1, 2017, Atlanta Gas Light filed its 2018 annual rate adjustment with the Georgia PSC. If approved, annual base rate revenues will increase by $22 million , effective June 1, 2018. Atlanta Gas Light will file a revised rate adjustment to incorporate the effects of the Tax Reform Legislation in the first quarter 2018. The Georgia PSC is expected to rule on the revised requested increase in the second quarter 2018.

On February 15, 2018, Chattanooga Gas filed a general base rate case with the Tennessee Public Utility Commission requesting a $7 million increase in annual base rate revenues. The requested increase, which incorporated the effects of the Tax Reform Legislation, was based on a projected test year ending June 30, 2019 and a ROE of 11.25% . The Tennessee Public Utility Commission is expected to rule on the requested increase in the third quarter 2018.

The ultimate outcome of these pending base rate cases cannot be determined at this time.

***Other***

The New Jersey BPU, Virginia Commission, Tennessee Public Utility Commission, and Maryland PSC each issued an order effective January 1, 2018 that requires utilities in their respective states to track as a regulatory liability the impact of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of excess deferred income taxes. The New Jersey BPU's order requires Elizabethtown Gas to file by March 2, 2018 proposed revised base rates with an April 1, 2018 interim effective date and a July 1, 2018 final effective date. Virginia Natural Gas will address the Virginia Commission's order in its Annual Information Filing, which will be filed by July 1, 2018. The Tennessee Public Utility Commission's order required Chattanooga Gas to file proposals to reduce rates or make other ratemaking adjustments to account for the impact of the Tax Reform Legislation. Chattanooga Gas made the required filing as part of its February 15, 2018 general base rate case filing. The Maryland PSC's order required Elkton Gas to file an explanation of the impact of the Tax Reform Legislation on its expenses and revenues, as well as when and how it expects to pass through to its customers those effects. Elkton Gas made the required filing on February 15, 2018 and will reduce annual base rates by $0.1 million effective April 1, 2018. Credits will be issued to customers for the impact of the Tax Reform Legislation from January 2018 through March 2018.

The Illinois Commission issued an order effective January 25, 2018 that requires utilities in the state to record the impacts of the Tax Reform Legislation, including the reduction in the corporate income tax rate to 21% and the impact of excess deferred income taxes, as a regulatory liability. On February 20, 2018, the Illinois Commission granted Nicor Gas' application for rehearing to file revised base rates and tariffs, which Nicor Gas expects to file by the end of the second quarter 2018.

The ultimate outcome of these matters cannot be determined at this time.

***energySMART***

In 2014, the Illinois Commission approved Nicor Gas' energySMART through 2017, which outlined energy efficiency program offerings and therm reduction goals, and subsequently extended the program to 2021. Through December 31, 2017, Nicor Gas spent $107 million of the initial authorized expenditure of $113 million . A new four -year program began on January 1, 2018, with an additional authorized expenditure of $160 million .

***Unrecognized Ratemaking Amounts***

The following table illustrates the Company's authorized ratemaking amounts that are not recognized on its balance sheets. These amounts are primarily composed of an allowed equity rate of return on assets associated with certain of the Company's regulatory infrastructure programs. These amounts will be recognized as revenues in the Company's financial statements in the periods they are billable to customers, the majority of which will be recovered by 2025.

| | **December 31, 2017** | December 31, 2016 |
|---|---|---|
| | *(in millions)* | |
| Atlanta Gas Light | **$ 104** | $ 110 |
| Virginia Natural Gas | **11** | 11 |
| Elizabethtown Gas (*) | **8** | 6 |
| Nicor Gas | **2** | 2 |
| Total | **$ 125** | $ 129 |

(*) See Note 11 under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for information on the pending asset sale.

**Other Matters**

A wholly-owned subsidiary of the Company owns and operates a natural gas storage facility consisting of two salt dome caverns in Louisiana. Periodic integrity tests are required in accordance with rules of the Louisiana Department of Natural Resources (DNR). In August 2017, in connection with an ongoing integrity project, updated seismic mapping indicated the proximity of one of the caverns to the edge of the salt dome may be less than the required minimum and could result in the Company retiring the cavern early. At December 31, 2017, the facility's property, plant, and equipment had a net book value of $112 million , of which the cavern itself represents approximately 20% . A potential early retirement of this cavern is dependent upon several factors including compliance with an order from the Louisiana DNR detailing the requirements to place the cavern back in service, which includes, among other things, obtaining core samples to determine the composition of the sheath surrounding the edge of the salt dome.

The cavern continues to maintain its pressures and overall structural integrity. These events were considered in connection with the Company's annual long-lived asset impairment analysis, which determined there was no impairment as of December 31, 2017. Any changes in results of monitoring activities, rates at which expiring capacity contracts are re-contracted, timing of placing the cavern back in service, or Louisiana DNR requirements could trigger impairment. Further, early retirement of the cavern could trigger impairment of other long-lived assets associated with the natural gas storage facility. The ultimate outcome of this matter cannot be determined at this time, but could have a material impact on the Company's financial statements.

## 4 . JOINT OWNERSHIP AGREEMENTS

In 2014, the Company entered into a construction and ownership arrangement associated with the Dalton Pipeline through which the Company has a 50% undivided ownership interest jointly with The Williams Companies, Inc. in the 115 -mile Dalton Pipeline to serve as an extension of the Transco natural gas pipeline system into northwest Georgia. The Company also entered into an agreement to lease its 50% undivided ownership in the Dalton Pipeline that became effective when it was placed in service on August 1, 2017 . Under the lease, the Company will receive approximately $26 million annually for an initial term of 25 years . The lessee is responsible for maintaining the pipeline during the lease term and for providing service to transportation customers under its FERC-regulated tariff. At December 31, 2017 , the net book value of the Company's 50% share of the pipeline was $252 million and is reflected in total property, plant, and equipment in the balance sheet. At December 31, 2016, the net book value of the Company's 50% share of the pipeline was $124 million and is reflected in construction work in progress in the balance sheet.

### Variable Interest Entities

SouthStar, previously a joint venture owned 85% by the Company and 15% by Piedmont, was the only VIE for which the Company was the primary beneficiary, prior to October 2016 when the Company completed its purchase of Piedmont's remaining interest in SouthStar.

In 2015, Georgia Natural Gas Company (GNG), a 100% -owned, direct subsidiary of the Company, notified Piedmont of its election, pursuant to a change in control of SouthStar, to purchase Piedmont's 15% interest in SouthStar at fair market value. This purchase was contingent upon the closing of the merger between Piedmont and Duke Energy Corporation (Duke Energy). In October 2016, after Piedmont and Duke Energy completed their merger, GNG completed its purchase of Piedmont's interest in SouthStar and paid a purchase price of $160 million and $15 million for Piedmont's share of SouthStar's 2016 earnings through the date of acquisition.

At December 31, 2015, the Company presented the noncontrolling interest related to Piedmont's interest in SouthStar as a component in equity. During the first quarter 2016, the Company reclassified its noncontrolling interest, whose redemption was beyond the Company's control, as a contingently redeemable noncontrolling interest. Upon Piedmont and Duke Energy obtaining the necessary merger approval, the Company deemed this noncontrolling interest to be mandatorily redeemable and reclassified it to a current liability during the third quarter 2016. The roll-forwards of the redeemable noncontrolling interest for the successor period of July 1, 2016 through December 31, 2016 and the predecessor period of January 1, 2016 through June 30, 2016 are detailed below:

| **Predecessor –** | | *(in millions)* |
|---|---|---|
| Balance at December 31, 2015 | $ | — |
| Reclassification of noncontrolling interest to contingently redeemable noncontrolling interest | | 46 |
| Net income attributable to noncontrolling interest | | 14 |
| Distribution to noncontrolling interest | | (19) |
| Balance at June 30, 2016 | $ | 41 |
| **Successor –** | | *(in millions)* |
| Balance at July 1, 2016 | $ | 174 |
| Reclassification of contingently redeemable noncontrolling interest to mandatorily redeemable noncontrolling interest | | (174) |
| Balance at December 31, 2016 | $ | — |

The Company's cash flows used for financing activities included SouthStar's distribution to Piedmont for its portion of SouthStar's annual earnings from the previous year, which generally occurred in the first quarter of each year. For the successor period of July 1, 2016 through December 31, 2016 , SouthStar made a distribution of $15 million upon completion of the purchase of Piedmont's interest in SouthStar. For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , SouthStar distributed to Piedmont $19 million and $18 million , respectively.

**Equity Method Investments**

The carrying amounts of the Company's equity method investments as of December 31, 2017 and 2016 and related income from those investments for the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were as follows:

| **Balance Sheet Information** | **December 31, 2017** | December 31, 2016 |
|---|---|---|
| | *(in millions)* | |
| SNG (*) | **$ 1,262** | $ 1,394 |
| Triton | **42** | 44 |
| Horizon Pipeline | **30** | 30 |

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

***SNG***

In September 2016, the Company, through a wholly-owned, indirect subsidiary, acquired a 50% equity interest in SNG, which is accounted for as an equity method investment. See Note 11 under "Investment in SNG" for additional information. Selected financial information of SNG as of December 31, 2017 and 2016 and for the year ended December 31, 2017 and for the period September 1, 2016 through December 31, 2016 is as follows:

| | As of December 31, | |
|---|---|---|
| **Balance Sheet Information** | **2017** | 2016 |
| | *(in millions)* | |
| Current assets | **$ 82** | $ 95 |
| Property, plant, and equipment | **2,439** | 2,451 |
| Deferred charges and other assets | **121** | 129 |
| Total Assets | **$ 2,642** | $ 2,675 |
| | | |
| Current liabilities | **$ 110** | $ 588 |
| Long-term debt | **1,102** | 706 |
| Other deferred charges and other liabilities | **76** | 22 |
| Total Liabilities | **$ 1,288** | $ 1,316 |
| | | |
| Total Stockholders' Equity | **1,354** | 1,359 |
| Total Liabilities and Stockholders' Equity | **$ 2,642** | $ 2,675 |

| **Income Statement Information** | **Year ended December 31, 2017** | September 1, 2016 through December 31, 2016 |
|---|---|---|
| | *(in millions)* | |
| Revenues | **$ 544** | $ 230 |
| Operating income | **246** | 138 |
| Net income | **$ 175** | $ 115 |

**Other Investments**

***Triton***

The Company has an investment in Triton, a cargo container leasing company, which is aggregated into its all other segment. Container equipment that is acquired by Triton is accounted for in tranches as defined in Triton's operating agreement and investors make capital contributions to Triton to invest in each of the tranches. As of December 31, 2017 , the Company had invested in seven tranches established by Triton.

***Horizon Pipeline***

The Company owns an   interest in a joint venture with Natural Gas Pipeline Company of America that is regulated by the FERC. Horizon Pipeline operates a 70 -mile natural gas pipeline from Joliet, Illinois to near the Wisconsin/Illinois border. Nicor Gas typically contracts for 70% to 80% of the total annual capacity.

***PennEast Pipeline***

In 2014, the Company entered into a partnership in which it holds a 20% ownership interest in an interstate pipeline company formed to develop and operate a 118 -mile natural gas pipeline between New Jersey and Pennsylvania. The initial transportation capacity of 1.0 billion cubic feet (Bcf) per day, is under long-term contracts, mainly by public utilities and other market-serving entities, such as electric generation companies, in New Jersey, Pennsylvania, and New York. On January 19, 2018, the PennEast Pipeline project received FERC approval.

***Atlantic Coast Pipeline***

In 2014, the Company entered into a project in which it holds a 5% ownership interest in an interstate pipeline company formed to develop and operate a 594 -mile natural gas pipeline in North Carolina, Virginia, and West Virginia with initial transportation capacity of 1.5 Bcf per day. On October 13, 2017, the Atlantic Coast Pipeline project received FERC approval.

***Pivotal JAX LNG, LLC***

The Company owns a 50% interest in a planned LNG liquefaction and storage facility in Jacksonville, Florida. Once construction is complete and the facility is operational, it will be outfitted with a 2.0 million gallon storage tank with the capacity to produce in excess of 120,000 gallons of LNG per day.

## 5. INCOME TAXES

Subsequent to the Merger, Southern Company files a consolidated federal income tax return and various combined and separate state income tax returns on behalf of the Company. Under a joint consolidated income tax allocation agreement, each Southern Company subsidiary's current and deferred tax expense is computed on a stand-alone basis and no subsidiary is allocated more current expense than would be paid if it filed a separate income tax return. In accordance with IRS regulations, each company is jointly and severally liable for the federal tax liability. Prior to the Merger, the Company filed a U.S. federal consolidated income tax return and various state income tax returns.

### Federal Tax Reform Legislation

Following the enactment of the Tax Reform Legislation, the SEC staff issued Staff Accounting Bulletin 118 – "Income Tax Accounting Implications of the Tax Cuts and Jobs Act" (SAB 118), which provides for a measurement period of up to one year from the enactment date to complete accounting under GAAP for the tax effects of the legislation. Due to the complex and comprehensive nature of the enacted tax law changes, and their application under GAAP, the Company considers all amounts recorded in the financial statements as a result of the Tax Reform Legislation to be "provisional" as discussed in SAB 118 and subject to revision. The Company is awaiting additional guidance from industry and income tax authorities in order to finalize its accounting. The ultimate impact of the Tax Reform Legislation on deferred income tax assets and liabilities and the related regulatory assets and liabilities cannot be determined at this time.

### Current and Deferred Income Taxes

Details of income tax provisions are as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| | *(in millions)* | | *(in millions)* | |
| Federal — | | | | |
| Current | **$ 103** | $ — | $ 67 | $ (13) |
| Deferred | **170** | 65 | 8 | 198 |
| | **273** | 65 | 75 | 185 |
| State — | | | | |
| Current | **27** | (16) | 12 | 10 |
| Deferred | **67** | 27 | — | 18 |
| | **94** | 11 | 12 | 28 |
| Total | **$ 367** | $ 76 | $ 87 | $ 213 |

Net cash payments (refunds) for income taxes for the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were $72 million , $23 million , $(100) million , and $(26) million , respectively.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

The tax effects of temporary differences between the carrying amounts of assets and liabilities in the financial statements and their respective tax bases, which give rise to deferred tax assets and liabilities, are as follows:

| | 2017 | 2016 |
|---|---|---|
| | *(in millions)* | |
| Deferred tax liabilities — | | |
| Accelerated depreciation | **$ 1,436** | $ 1,954 |
| Property basis differences | **204** | 311 |
| Regulatory assets associated with employee benefit obligations | **79** | 125 |
| Other | **208** | 164 |
| Total | **1,927** | 2,554 |
| Deferred tax assets — | | |
| Federal net operating loss | **92** | 59 |
| Federal effect of state deferred taxes | **54** | 42 |
| Employee benefit obligations | **185** | 165 |
| Regulatory liability associated with the Tax Reform Legislation (not subject to normalization) | **295** | — |
| Other | **223** | 332 |
| Total | **849** | 598 |
| Less valuation allowances | **(11)** | (19) |
| Total, net of valuation allowances | **838** | 579 |
| Accumulated deferred income taxes, net | **$ 1,089** | $ 1,975 |

The implementation of the Tax Reform Legislation significantly reduced accumulated deferred income taxes, partially offset by bonus depreciation provisions in the Protecting Americans from Tax Hikes Act. The Tax Reform Legislation also significantly increased tax-related regulatory liabilities.

At December 31, 2017 , the tax-related regulatory liabilities to be credited to customers were $1.1 billion . These liabilities are primarily attributable to deferred taxes previously recognized at rates higher than the current enacted tax law and to unamortized ITCs.

Deferred federal and state ITCs are amortized over the average life of the related property with such amortization normally applied as a credit to reduce depreciation in the statements of income. Credits amortized in this manner amounted to $4 million and $1 million for the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and for the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , were $1 million and $2 million , respectively. At December 31, 2017 , all ITCs available to reduce federal income taxes payable had been utilized.

**Effective Tax Rate**

A reconciliation of the federal statutory income tax rate to the effective income tax rate is as follows:

| | Successor | | Predecessor | |
|---|---|---|---|---|
| | **Year ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year ended December 31, 2015 |
| Federal statutory rate | **35.0%** | 35.0% | 35.0% | 35.0% |
| State income tax, net of federal deduction | **4.0** | 4.0 | 3.5 | 3.4 |
| Tax Reform Legislation | **15.0** | — | — | — |
| State tax legislation and rate changes | **6.2** | — | — | — |
| Other | **—** | 1.0 | (0.9) | (2.0) |
| Effective income tax rate | **60.2%** | 40.0% | 37.6% | 36.4% |

The principal differences in the Company's effective tax rate from December 31, 2016 to December 31, 2017 include the impact of the Tax Reform Legislation, the Illinois income tax legislation enacted in the third quarter 2017, new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings, the disallowance of certain nondeductible Merger-related expenses associated with change-in-control compensation charges, and an increase in earnings before income taxes.

**Unrecognized Tax Benefits**

The Company has no unrecognized tax benefits for any period presented.

The Company classifies interest on tax uncertainties as interest expense; however, the Company had no accrued interest or penalties for unrecognized tax benefits for any period presented.

It is reasonably possible that the amount of the unrecognized tax benefits could change within 12 months. The settlement of federal and state audits could impact the balances. At this time, an estimate of the range of reasonably possible outcomes cannot be determined.

On July 1, 2016, the Company became a wholly-owned subsidiary of Southern Company, which is a participant in the Compliance Assurance Process of the IRS. The IRS has finalized its audits of Southern Company's consolidated federal tax returns through 2016. However, the pre-Merger Southern Company Gas 2014, 2015, and June 30, 2016 federal tax returns are currently under audit. The audits for the Company by any state have either concluded, or the statute of limitations has expired with respect to income tax examinations, for years prior to 2011.

## 6 . FINANCING

The Company's 100% -owned subsidiary, Southern Company Gas Capital, was established to provide for certain of the Company's ongoing financing needs through a commercial paper program, the issuance of various debt, hybrid securities, and other financing arrangements. Southern Company Gas fully and unconditionally guarantees all debt issued by Southern Company Gas Capital and the gas facility revenue bonds issued by Pivotal Utility Holdings. Additionally, substantially all of Nicor Gas' properties are subject to the lien of the indenture securing its first mortgage bonds. Nicor Gas is not permitted by regulation to make loans to affiliates or utilize Southern Company Gas Capital for its financing needs.

**Securities Due Within One Year**

The current portion of long-term debt is composed of the portion of its long-term debt due within the next 12 months. At December 31, 2017 , the Company had $157 million of senior notes due within one year, including the fair value adjustment attributable to the application of acquisition accounting. At December 31, 2016 , the Company had $22 million of medium-term notes due within one year.

**Long-Term Debt**

Long-term debt of the Company at December 31, 2017 and 2016 consisted of Series A, Series B, and Series C medium-term notes of Atlanta Gas Light; senior notes of Southern Company Gas Capital; first mortgage bonds of Nicor Gas; and gas facility revenue bonds of Pivotal Utility Holdings.

Maturities through 2022 applicable to total long-term debt are as follows: $155 million in 2018 ; $350 million in 2019 ; $330 million in 2021 ; $93 million in 2022 ; and $4.6 billion thereafter. There are no material scheduled maturities in 2020.

***Medium-Term Notes***

In July 2017, Atlanta Gas Light repaid at maturity $22 million of medium-term notes. The amount of medium-term notes outstanding at December 31, 2017 and 2016 was $159 million and $181 million , respectively, including securities due within one year.

***Senior Notes***

In May 2017, Southern Company Gas Capital issued $450 million aggregate principal amount of Series 2017A 4.40% Senior Notes due May 30, 2047. The proceeds were used to repay the Company's short-term indebtedness and for general corporate purposes. The amount of senior notes outstanding at December 31, 2017 and 2016 was $4.2 billion and $3.7 billion , respectively, including securities due within one year.

***First Mortgage Bonds***

Nicor Gas had $1.0 billion and $625 million of first mortgage bonds outstanding at December 31, 2017 and 2016 , respectively. These bonds have been issued with maturities ranging from 2019 to 2057.

On August 10, 2017, Nicor Gas issued $100 million aggregate principal amount of First Mortgage Bonds 3.03% Series due August 10, 2027 and $100 million aggregate principal amount of First Mortgage Bonds 3.62% Series due August 10, 2037. On November 1, 2017, Nicor Gas issued $100 million aggregate principal amount of First Mortgage Bonds 3.85% Series due August 10, 2047 and $100 million aggregate principal amount of First Mortgage Bonds 4.00% Series due August 10, 2057. The proceeds were used to repay short-term indebtedness incurred under the Nicor Gas commercial paper program and for other working capital needs.

***Gas Facility Revenue Bonds***

Pivotal Utility Holdings is party to a series of loan agreements with the New Jersey Economic Development Authority and Brevard County, Florida under which five series of gas facility revenue bonds have been issued with maturities ranging from 2022 to 2033. These revenue bonds are issued by state agencies or counties to investors, and proceeds from each issuance then are loaned to Pivotal Utility Holdings. The amount of gas facility revenue bonds outstanding at December 31, 2017 and 2016 was $200 million .

The Elizabethtown Gas asset sale agreement requires that bonds representing $180 million of the total that are currently eligible for redemption at par be redeemed on or prior to consummation of the sale. The ultimate outcome of this matter cannot be determined at this time. See Note 11 under "Proposed Sale of Elizabethtown Gas and Elkton Gas" for additional information.

**Parent Company Note**

On January 4, 2018, Southern Company Gas issued a floating rate promissory note to Southern Company in an aggregate principal amount of $100 million due July 31, 2018, bearing interest based on one-month LIBOR.

**Dividend Restrictions**

By regulation, Nicor Gas is restricted, to the extent of its retained earnings balance, in the amount it can dividend or loan to affiliates and is not permitted to make money pool loans to affiliates. The New Jersey BPU restricts the amount Elizabethtown Gas can dividend to its parent company to 70% of its quarterly net income. Additionally, as stipulated in the New Jersey BPU's order approving the Merger, the Company is prohibited from paying dividends to its parent company, Southern Company, if the Company's senior unsecured debt rating falls below investment grade. As of December 31, 2017 , the amount of subsidiary retained earnings restricted for dividend payment totaled $719 million .

**Bank Credit Arrangements**

***Credit Facilities***

At December 31, 2017 , committed credit arrangements with banks were as follows:

| Company | Expires 2022 | Unused |
|---|---|---|
| | *(in millions)* | |
| Southern Company Gas Capital | $ 1,400 | $ 1,390 |
| Nicor Gas | 500 | 500 |
| Total | $ 1,900 | $ 1,890 |

In May 2017, Southern Company Gas Capital and Nicor Gas terminated their existing credit arrangements for $1.3 billion and $700 million , respectively, which were to mature in 2017 and 2018, and entered into a new multi-year credit arrangement (Facility) currently allocated for $1.4 billion and $500 million , respectively, with a maturity date of 2022, as reflected in the table above. Pursuant to the Facility, the allocations between Southern Company Gas Capital and Nicor Gas may be adjusted.

The Facility contains a covenant that limits the ratio of debt to capitalization (as defined in each facility) to a maximum of 70% for each of the Company and Nicor Gas and contains a cross-acceleration provision to other indebtedness (including guarantee obligations) of the applicable company. Such cross-acceleration provision to other indebtedness would trigger an event of default of the applicable company if the Company or Nicor Gas defaulted on indebtedness, the payment of which was then accelerated. At December 31, 2017 , both companies were in compliance with such covenant. The Facility does not contain a material adverse change clause at the time of borrowings.

### *Commercial Paper Programs*

The Company maintains commercial paper programs at Southern Company Gas Capital and at Nicor Gas that consist of short-term, unsecured promissory notes. Nicor Gas' commercial paper program supports working capital needs at Nicor Gas as Nicor Gas is not permitted to make money pool loans to affiliates. All of the Company's other subsidiaries benefit from Southern Company Gas Capital's commercial paper program. Commercial paper is included in notes payable in the balance sheets.

Details of commercial paper borrowings outstanding were as follows:

| | Short-term Debt at the End of the Period | | |
|---|---|---|---|
| | Amount Outstanding | | Weighted Average Interest Rate |
| | *(in millions)* | | |
| **December 31, 2017:** | | | |
| Southern Company Gas Capital | **$** | **1,243** | **1.73%** |
| Nicor Gas | | **275** | **1.83** |
| Total | **$** | **1,518** | **1.75%** |
| **December 31, 2016:** | | | |
| Southern Company Gas Capital | $ | 733 | 1.09% |
| Nicor Gas | | 524 | 0.95 |
| Total | $ | 1,257 | 1.03% |

## 7 . COMMITMENTS

### Pipeline Charges, Storage Capacity, and Gas Supply

Pipeline charges, storage capacity, and gas supply include charges recoverable through a natural gas cost recovery mechanism, or alternatively, billed to Marketers and demand charges associated with Sequent. The gas supply balance includes amounts for Nicor Gas' and SouthStar's gas commodity purchase commitments of 35 million mmBtu at floating gas prices calculated using forward natural gas prices at December 31, 2017 and valued at $101 million . The Company provides guarantees to certain gas suppliers for certain of its subsidiaries in support of payment obligations.

Expected future contractual obligations for pipeline charges, storage capacity, and gas supply that are not recognized on the balance sheets as of December 31, 2017 were as follows:

| | Pipeline Charges, Storage Capacity, and Gas Supply | |
|---|---|---|
| | *(in millions)* | |
| 2018 | $ | 813 |
| 2019 | | 552 |
| 2020 | | 416 |
| 2021 | | 375 |
| 2022 | | 339 |
| 2023 and thereafter | | 2,294 |
| Total | $ | 4,789 |

### Operating Leases

The Company has operating lease agreements with various terms and expiration dates. Total rent expense was $15 million , $8 million , $6 million , and $12 million for the successor periods of the year ended December 31, 2017 and July 1, 2016 through December 31, 2016 and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , respectively. The Company includes any step rents, escalations, and lease concessions in its computation of minimum lease payments, which are recognized on a straight-line basis over the minimum lease terms.

As of December 31, 2017 , the Company's estimated minimum lease payments under operating leases were as follows:

| | Minimum Lease Payments | |
|---|---|---|
| | *(in millions)* | |
| 2018 | $ | 17 |
| 2019 | | 16 |
| 2020 | | 16 |
| 2021 | | 15 |
| 2022 | | 13 |
| 2023 and thereafter | | 26 |
| Total | $ | 103 |

**Financial Guarantees**

AGL Equipment Leasing Inc. (AEL), a wholly-owned subsidiary of the Company, holds the Company's interest in Triton and has an obligation to restore to zero any deficit in its equity account for income tax purposes in the unlikely event that Triton is liquidated and a deficit balance remains. This obligation continues for the life of the Triton partnerships. Any payment is effectively limited to the net assets of AEL, which were less than $1 million at December 31, 2017 . The Company believes the likelihood of any such payment by AEL is remote and, as such, no liability has been recorded for this obligation at December 31, 2017 .

## 8. STOCK COMPENSATION

### Successor

***Stock-Based Compensation***

Stock-based compensation primarily in the form of Southern Company performance share units and restricted stock units may be granted through the Omnibus Incentive Compensation Plan to certain levels of management within the Company. In 2017 , stock-based compensation granted to employees includes performance share units and restricted stock units. In 2016 , in conjunction with the Merger, stock-based compensation was granted to certain executives in the form of Southern Company restricted stock and performance share units. As of December 31, 2017 , there were 327 current and former employees participating in the performance share unit and restricted stock unit programs.

*Performance Share Units*

Performance share units granted to employees vest at the end of a three -year performance period. All unvested performance share units vest immediately upon a change in control where Southern Company is not the surviving corporation. Shares of Southern Company common stock are delivered to employees at the end of the performance period with the number of shares issued ranging from 0% to 200% of the target number of performance share units granted, based on achievement of the performance goals established by the Compensation Committee of the Southern Company Board of Directors.

Southern Company issues performance share units with performance goals based on three performance goals to employees. These include performance share units with performance goals based on the total shareholder return (TSR) for Southern Company common stock during the three-year performance period as compared to a group of industry peers, performance share units with performance goals based on Southern Company's cumulative earnings per share (EPS) over the performance period, and performance share units with performance goals based on Southern Company's equity-weighted ROE over the performance period.

The total target grant date fair value of the stock compensation awards granted was comprised 20% each of EPS-based awards and ROE-based awards and 30% each of TSR-based awards and restricted stock units.

The fair value of TSR-based performance share unit awards is determined as of the grant date using a Monte Carlo simulation model to estimate the TSR of Southern Company's common stock among the industry peers over the performance period. Southern Company recognizes compensation expense on a straight-line basis over the three -year performance period without remeasurement.

The fair values of the EPS-based awards and the ROE-based awards are based on the closing stock price of Southern Company common stock on the date of the grant. Compensation expense for the EPS-based and ROE-based awards is generally recognized ratably over the three-year performance period initially assuming a 100% payout at the end of the performance period. Employees become immediately vested in the TSR-based performance share units, along with the EPS-based and ROE-based awards, upon retirement. As a result, compensation expense for employees that are retirement eligible at the grant date is recognized immediately while compensation expense for employees that become retirement eligible during the vesting period is recognized over the period from grant date to the date of retirement eligibility. The expected payout related to the EPS-based and ROE-based awards is reevaluated annually with expense recognized to date increased or decreased based on the number of shares currently expected to be issued. Unlike the TSR-based awards, the compensation expense ultimately recognized for the EPS-based awards and the ROE-based awards will be based on the actual number of shares issued at the end of the performance period.

For the year ended December 31, 2017 , employees of the Company were granted 0.3 million performance share units. The weighted average grant-date fair value of TSR-based performance share units granted during 2017 , determined using a Monte Carlo simulation model to estimate the TSR of Southern Company's stock among the industry peers over the performance period, was $49.27 . The weighted average grant-date fair value of both EPS-based and ROE-based performance share units granted during 2017 was $49.22 .

For the year ended December 31, 2017 , total compensation cost for performance share units recognized in income was $8 million with the related tax benefit also recognized in income of $3 million . The compensation cost related to the grant of Southern Company performance share units to the Company's employees is recognized in the Company's financial statements with a corresponding credit to equity, representing a capital contribution from Southern Company. As of December 31, 2017 , $6 million of total unrecognized compensation cost related to performance share award units will be recognized over a weighted-average period of approximately 21 months.

*Restricted Stock Units*

Stock-based compensation granted to employees included restricted stock units in addition to performance share units. One-third of the restricted stock units granted to employees vest each year throughout a three -year service period. All unvested restricted stock units vest immediately upon a change in control where Southern Company is not the surviving corporation. Shares of Southern Company common stock are delivered to employees at the end of the vesting period.

The fair value of restricted stock units is based on the closing stock price of Southern Company common stock on the date of the grant. Since one-third of the restricted stock units vest each year throughout a three -year service period, compensation expense for restricted stock unit awards is generally recognized over the corresponding one -, two -, or three -year period. Employees become immediately vested in the restricted stock units upon retirement. As a result, compensation expense for employees that are retirement eligible at the grant date is recognized immediately while compensation expense for employees that become retirement eligible during the vesting period is recognized over the period from grant date to the date of retirement eligibility.

For the year ended December 31, 2017 , employees of the Company were granted 0.1 million restricted stock units. The weighted average grant-date fair value of restricted stock units granted during 2017 was $49.23 .

For the year ended December 31, 2017 , total compensation cost for restricted stock units recognized in income was $4 million with the related tax benefit also recognized in income of $2 million . The compensation cost related to the grant of Southern Company restricted stock units to the Company's employees is recognized in the Company's financial statements with a corresponding credit to equity, representing a capital contribution from Southern Company. As of December 31, 2017 , $1 million of total unrecognized compensation cost related to restricted stock units will be recognized over a weighted-average period of approximately 13 months.

***Merger Stock Compensation***

At the effective time of the Merger, each share of Southern Company Gas common stock, other than certain excluded shares, was converted into the right to receive $66 in cash, without interest. Also at the effective time of the Merger:

- Southern Company Gas' outstanding restricted stock units, restricted stock awards, and non-employee director stock awards were deemed fully vested and were canceled and converted into the right to receive an amount in cash equal to the product of (i) the total number of shares of Southern Company Gas' common stock subject to such award and (ii) the Merger consideration of $66 per share;
- Southern Company Gas' outstanding stock options, all of which were fully vested, were canceled and converted into the right to receive an amount in cash equal to the product of (i) the total number of shares of Southern Company Gas' common stock subject to such options and (ii) the excess of the Merger consideration of $66 per share over the applicable exercise price per share of such options; and
- each outstanding award of a performance share unit was converted into an award of Southern Company's restricted stock units (restricted stock awards).

In conjunction with the Merger, stock-based compensation, in the form of Southern Company restricted stock and performance share units, was granted to certain executives of the Company through the Southern Company Omnibus Incentive Compensation Plan.

*Southern Company Restricted Stock Awards*

Under the terms of the restricted stock awards, the employees received a specified number of restricted stock units that vest when the employees have satisfied the requisite service period(s) at which time the employee receives Southern Company common stock. The terms of the award require the employee to be continuously employed through the original three -year vesting schedule of the award being replaced.

For the successor period ended December 31, 2016 , employees of the Company were granted 0.7 million restricted stock units. The grant-date fair value of the restricted stock units granted was $53.83 , based on the closing stock price of Southern Company common stock on the date of the grant. As a portion of the fair value of the award related to pre-combination service, the grant date fair value was allocated to pre- or post-combination service and accounted for as Merger consideration or compensation cost, respectively. Approximately $13 million of the grant date fair value was allocated to Merger consideration. The remaining fair value of $12 million is being recognized as compensation expense on a straight-line basis over the remaining vesting period.

The compensation cost related to the grant of restricted stock units to the Company's employees are recognized in the Company's financial statements with a corresponding credit to equity, representing a capital contribution from Southern Company. For the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 , total compensation cost for restricted stock units recognized in income was $8 million and $13 million , respectively, with the related tax benefit also recognized in income of $4 million and $4 million , respectively. As of December 31, 2017 , $3 million of total unrecognized compensation cost related to restricted stock units will be recognized over a weighted-average period of approximately 12 months. See "Performance Share Unit Awards" herein for additional information.

*Change in Control Awards*

Southern Company awarded performance share units to certain employees remaining with the Company in lieu of certain change in control benefits the employee was entitled to receive following the Merger (change-in-control awards). Shares of Southern Company common stock and/or cash equal to the dollar value of the change-in-control benefit will vest and be issued one-third each year as long as the employee remains in service with the Company, or any of its affiliates, at each vest date. In addition to the change-in-control benefit, Southern Company common stock could be issued to the employees at the end of a performance period with the number of shares issued ranging from 0% to 100% of the target number of performance share units granted, based on achievement of certain Southern Company common stock price metrics, as well as performance goals established by the Compensation Committee of the Southern Company Board of Directors (achievement shares).

The change-in-control benefits are accounted for as a liability award with the fair value equal to the guaranteed dollar value of the change-in-control benefit. The grant-date fair value of the achievement portion of the award was determined using a Monte Carlo simulation model to estimate the number of achievement shares expected to vest based on the Southern Company common stock price. The expected payout is reevaluated annually with expense recognized to date increased or decreased proportionately based on the expected performance. The compensation expense ultimately recognized for the achievement shares will be based on the actual performance.

For the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 , total compensation cost for the change-in-control awards recognized in income was $12 million and $4 million , respectively, with $6 million and less than $1 million , respectively, of related tax benefit recognized in income. The compensation cost related to the grant of Southern Company change-in-control benefit and achievement shares to the Company's employees are recognized in the Company's financial statements with a corresponding credit to a liability or equity, representing a capital contribution from Southern Company, respectively. As of December 31, 2017 , $8 million of total unrecognized compensation cost related to change in control awards will be recognized over a weighted-average period of approximately 18 months .

**Predecessor**

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , the employees of Southern Company Gas and subsidiaries participated in the AGL Resources Inc. Omnibus Performance Incentive Plan, as amended and restated.

The AGL Resources Inc. Omnibus Performance Incentive Plan, as amended and restated, and the Long-Term Incentive Plan (1999) provided for the grant of incentive and nonqualified stock options, stock appreciation rights, shares of restricted stock, restricted stock units, performance cash awards, and other stock-based awards to officers and key employees. Effective July 1, 2016, all Southern Company Gas shares of stock were canceled and/or converted as a result of the Merger. No further grants will be made from the Long-Term Incentive Plan (1999) or the AGL Resources Inc. Omnibus Performance Incentive Plan, as amended and restated.

For the predecessor periods, the Company recognized stock-based compensation expense for its stock-based awards over the requisite service period based on the estimated fair value at the date of grant for its stock-based awards using the modified prospective method. These stock awards included: stock options, stock and restricted stock awards, and performance units (restricted stock units, performance share units, and performance cash units).

Performance-based stock awards and performance units contained market and performance conditions. Stock options, restricted stock awards, and performance units also contained a service condition. The Company estimated forfeitures over the requisite service period when recognizing compensation expense. These estimates were adjusted to the extent that actual forfeitures differ, or were expected to materially differ, from such estimates. Excess tax benefits were reported as a financing cash inflow. The difference between the proceeds from the exercise of the Company's stock-based awards and the par value of the stock was recorded within additional paid-in capital.

Southern Company Gas granted stock awards with a grant price that was equal to the fair market value on the date of the grant. Fair market value was defined under the terms of the applicable plans as the closing price per share of Southern Company Gas' common stock on the grant date. For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , total compensation cost for cash and stock-based awards recognized in income was $24 million and $40 million , respectively, with related tax benefits also recognized in income, which were immaterial.

### *Incentive and Nonqualified Stock Options*

The stock options that the Company granted prior to the Merger had a three -year vesting period and expired ten years after the date of grant. The exercise price for stock options granted equaled the stock price of Southern Company Gas common stock on the date of grant. Participants realized value from option grants only to the extent that the fair market value of the Company's common stock on the date of exercise of the option exceeded the fair market value of the common stock on the date of the grant. No stock options have been issued under the plan since 2009.

The Company measured compensation cost related to stock options based on the fair value of these awards at their date of grant using the Black-Scholes option-pricing model. For the predecessor year ended December 31, 2015 , the Company had no unrecognized compensation costs related to stock options. For the predecessor period ended June 30, 2016 and the year ended December 31, 2015 , cash received from stock option exercises and the related income tax benefits were immaterial.

For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , the total intrinsic value of options exercised was $3 million , and $13 million , respectively.

Effective July 1, 2016, all of the Company's outstanding stock options, all of which were fully vested, were canceled and converted into the right to receive an amount in cash equal to the product of (i) the total number of shares of Southern Company Gas' common stock subject to such options and (ii) the excess of the Merger consideration of $66 per share over the applicable exercise price per share of such options.

### *Restricted Stock Units*

A restricted stock unit is an award that represents the opportunity to receive a specified number of shares of the Company's common stock, subject to the achievement of certain pre-established performance criteria. For the predecessor period of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , the Company granted 25,166 and 47,546 , respectively, of restricted stock units (including dividends) to certain employees. At the effective time of the Merger, all restricted stock units outstanding were deemed fully vested and were canceled and converted into the right to receive an amount in cash equal to the product of (i) the total number of shares of Southern Company Gas' common stock subject to such award and (ii) the Merger consideration of $66 per share.

### *Performance Share Unit Awards*

A performance share unit award represented the opportunity to receive cash and shares subject to the achievement of certain pre-established performance criteria. For the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 , the Company granted performance share unit awards to certain officers. The Company's 2016 and 2015 performance share units had two performance measures. One measure, which accounted for 75% , related to the Company's total shareholder return relative to a group of peer companies. The second measure, which accounted for 25% , related to the Company's earnings per share, excluding wholesale gas services, over the three -year performance period.

At the effective time of the Merger, each outstanding performance share unit was converted into an award of Southern Company's restricted stock units. The conversion ratio was the product of (i) the greater of (a) 125% of the number of units underlying such award based on target level achievement of all relevant performance goals and (b) the number of units underlying such award based on the actual level of achievement of all relevant performance goals against target and (ii) an exchange ratio based on the Merger consideration of $66 per share as compared to the volume-weighted average price per share of Southern Company common stock. The resulting Southern Company restricted stock units will follow the vesting schedule and payment terms, and otherwise be issued on similar terms and conditions, as were applicable to such pre-Merger performance share unit awards, subject to certain exceptions. See "Southern Company Restricted Stock Awards" for additional information.

***Stock and Restricted Stock Awards***

The compensation cost of both stock awards and restricted stock awards was equal to the grant date fair value of the awards, recognized over the requisite service period. No other assumptions were used to value the awards. The Company referred to restricted stock as an award of Company common stock subject to time-based vesting or achievement of performance measures. Prior to vesting, restricted stock awards were subject to certain transfer restrictions and forfeiture upon termination of employment.

***Restricted Stock Awards — Employees***

Total unvested restricted stock awards outstanding as of December 31, 2015 totaled 0.4 million . During 2016, 0.3 million restricted stock awards were granted, 0.7 million restricted stock awards were vested or forfeited. At the effective time of the Merger, Southern Company Gas' outstanding restricted stock awards were deemed fully vested and were canceled and converted into the right to receive an amount in cash equal to the product of (i) the total number of shares of Southern Company Gas' common stock subject to such award and (ii) the Merger consideration of $66 per share.

## 9 . FAIR VALUE MEASUREMENTS

Fair value measurements are based on inputs of observable and unobservable market data that a market participant would use in pricing the asset or liability. The use of observable inputs is maximized where available and the use of unobservable inputs is minimized for fair value measurement and reflects a three-tier fair value hierarchy that prioritizes inputs to valuation techniques used for fair value measurement. See Note 1 under "Fair Value Measurements" for additional information on the fair value hierarchy.

As of December 31, 2017 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | | |
|---|---|---|---|---|---|
| **As of December 31, 2017:** | **Quoted Prices in Active Markets for Identical Assets (Level 1)** | **Significant Other Observable Inputs (Level 2)** | **Significant Unobservable Inputs (Level 3)** | **Net Asset Value as a Practical Expedient (NAV)** | **Total** |
| | | | *(in millions)* | | |
| Assets: | | | | | |
| Energy-related derivatives [(a)(b)] | $ 331 | $ 223 | $ — | $ — | $ 554 |
| Liabilities: | | | | | |
| Energy-related derivatives [(a)(b)] | $ 479 | $ 181 | $ — | $ — | $ 660 |

(a) Energy-related derivatives excludes $11 million associated with premiums and certain weather derivatives accounted for based on intrinsic value rather than fair value.

(b) Energy-related derivatives excludes cash collateral of $193 million .

As of December 31, 2016 , assets and liabilities measured at fair value on a recurring basis during the period, together with their associated level of the fair value hierarchy, were as follows:

| | Fair Value Measurements Using | | | | |
|---|---|---|---|---|---|
| As of December 31, 2016: | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Net Asset Value as a Practical Expedient (NAV) | Total |
| | | | *(in millions)* | | |
| Assets: | | | | | |
| Energy-related derivatives [(a)(b)] | $ 338 | $ 239 | $ — | $ — | $ 577 |
| Liabilities: | | | | | |
| Energy-related derivatives [(a)(b)] | $ 345 | $ 224 | $ — | $ — | $ 569 |

(a) Energy-related derivatives excludes $4 million associated with certain weather derivatives accounted for based on intrinsic value rather than fair value.

(b) Energy-related derivatives excludes cash collateral of $62 million .

**Valuation Methodologies**

The energy-related derivatives primarily consist of exchange-traded financial products for natural gas, including, from time to time, basis swaps. These are standard products used within the energy industry and are valued using the market approach. The inputs used are mainly from observable market sources, such as forward natural gas prices, implied volatility, and overnight index swap interest rates. Interest rate derivatives are also standard OTC products that are valued using observable market data and assumptions commonly used by market participants. See Note 10 for additional information on how these derivatives are used.

**Debt**

The Company's long-term debt is recorded at amortized cost, including the fair value adjustments at the effective date of the Merger. The Company amortizes the fair value adjustments over the lives of the respective bonds. The following table presents the carrying amount and fair value of the Company's long-term debt as of December 31:

| | Carrying Amount | Fair Value |
|---|---|---|
| | *(in millions)* | |
| Long-term debt, including securities due within one year: | | |
| **2017** | **$ 6,048** | **$ 6,471** |
| 2016 | $ 5,281 | $ 5,491 |

The fair values are determined using Level 2 measurements and are based on quoted market prices for the same or similar issues or on the current rates available to the Company.

**10 . DERIVATIVES**

The Company is exposed to market risks, primarily commodity price risk, interest rate risk, and weather risk. To manage the volatility attributable to these exposures, the Company nets its exposures, where possible, to take advantage of natural offsets and enters into various derivative transactions for the remaining exposures pursuant to the Company's policies in areas such as counterparty exposure and risk management practices. Wholesale gas operations use various contracts in its commercial activities that generally meet the definition of derivatives. For other businesses, the Company's policy is that derivatives are to be used primarily for hedging purposes. In both cases, the Company mandates strict adherence to all applicable risk management policies. Derivative positions are monitored using techniques including, but not limited to, market valuation, value at risk, stress testing, and sensitivity analysis. Derivative instruments are recognized at fair value in the balance sheets as either assets or liabilities and are presented on a net basis. See Note 9 for additional information. In the statements of cash flows, the cash impacts of settled energy-related and interest rate derivatives are recorded as operating activities.

**Energy-Related Derivatives**

The Company enters into energy-related derivatives to hedge exposures to natural gas price changes. However, due to cost-based rate regulations and other various cost recovery mechanisms, gas distribution operations has limited exposure to market volatility in prices of natural gas. The Company manages fuel-hedging programs, implemented per the guidelines of the natural gas distribution utilities' respective state regulatory agencies, through the use of financial derivative contracts, which is expected to continue to mitigate price volatility. However, the Company retains exposure to price changes that can, in a volatile energy market, be extremely material and can adversely affect the Company.

The Company also enters into weather derivative contracts as economic hedges of adjusted operating margins in the event of warmer-than-normal weather. Exchange-traded options are carried at fair value, with changes reflected in operating revenues. Non-exchange-traded options are accounted for using the intrinsic value method. Changes in the intrinsic value for non-exchange-traded contracts are reflected in the statements of income.

Energy-related derivative contracts are accounted for under one of three methods:

- *Regulatory Hedges* — Energy-related derivative contracts which are designated as regulatory hedges relate primarily to the natural gas distribution utilities' fuel-hedging programs, where gains and losses are initially recorded as regulatory liabilities and assets, respectively, and then are included in the cost of natural gas as the underlying natural gas is used in operations and ultimately recovered through the respective cost recovery clauses.
- *Cash Flow Hedges* — Gains and losses on energy-related derivatives designated as cash flow hedges (which are mainly used to hedge anticipated purchases and sales) are initially deferred in other OCI before being recognized in the statements of income in the same period as the hedged transactions are reflected in earnings.
- *Not Designated* — Gains and losses on energy-related derivative contracts that are not designated or fail to qualify as hedges are recognized in the statements of income in the period of change.

Some energy-related derivative contracts require physical delivery as opposed to financial settlement, and this type of derivative is both common and prevalent within the natural gas industry. When an energy-related derivative contract is settled physically, any cumulative unrealized gain or loss is reversed and the contract price is recognized in the respective line item representing the actual price of the underlying goods being delivered.

At December 31, 2017 , the net volume of energy-related derivative contracts for natural gas positions totaled 300 million mmBtu for the Company, together with the longest hedge date of 2020 over which the Company is hedging its exposure to the variability in future cash flows for forecasted transactions and the longest non-hedge date of 2026 for derivatives not designated as hedges.

For cash flow hedges, the estimated pre-tax losses that will be reclassified from accumulated OCI to earnings for the 12-month period ending December 31, 2018 are $4 million .

**Interest Rate Derivatives**

The Company may also enter into interest rate derivatives to hedge exposure to changes in interest rates. The derivatives employed as hedging instruments are structured to minimize ineffectiveness. Derivatives related to existing variable rate securities or forecasted transactions are accounted for as cash flow hedges where the effective portion of the derivatives' fair value gains or losses is recorded in OCI and is reclassified into earnings at the same time the hedged transactions affect earnings, with any ineffectiveness recorded directly to earnings. Derivatives related to existing fixed rate securities are accounted for as fair value hedges, where the derivatives' fair value gains or losses and hedged items' fair value gains or losses are both recorded directly to earnings, providing an offset, with any difference representing ineffectiveness. Fair value gains or losses on derivatives that are not designated or fail to qualify as hedges are recognized in the statements of income as incurred.

In 2015, the Company executed $800 million in notional value of 10 -year and 30 -year fixed-rate forward-starting interest rate swaps to hedge potential interest rate volatility designated as cash flow hedges of issuances of long-term debt in the fourth quarter 2015 and during 2016. The Company settled $200 million of these interest rate swaps in 2015 for an immaterial loss, $400 million in May 2016 at a loss of $26 million , and the remaining $200 million in September 2016 at a loss of $35 million . Due to the application of acquisition accounting, only $5 million of the pre-tax loss incurred and deferred in the successor period is being amortized to interest expense through 2046.

**Derivative Financial Statement Presentation and Amounts**

The derivative contracts of the Company are subject to master netting arrangements or similar agreements and are reported net in the financial statements. Some of these energy-related and interest rate derivative contracts may contain certain provisions that permit intra-contract netting of derivative receivables and payables for routine billing and offsets related to events of default and settlements.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

At December 31, 2017 and 2016 , the fair value of energy-related derivatives and interest rate derivatives was reflected in the balance sheets as follows:

| | 2017 | | 2016 | |
|---|---|---|---|---|
| **Derivative Category and Balance Sheet Location** | **Assets** | **Liabilities** | **Assets** | **Liabilities** |
| | *(in millions)* | | *(in millions)* | |
| **Derivatives designated as hedging instruments for regulatory purposes** | | | | |
| Energy-related derivatives: | | | | |
| Assets from risk management activities/Liabilities from risk management activities-current | **$ 5** | **$ 8** | $ 24 | $ 3 |
| Other deferred charges and assets/Other deferred credits and liabilities | — | — | 1 | — |
| **Total derivatives designated as hedging instruments for regulatory purposes** | **$ 5** | **$ 8** | $ 25 | $ 3 |
| **Derivatives designated as hedging instruments in cash flow and fair value hedges** | | | | |
| Energy-related derivatives: | | | | |
| Assets from risk management activities/Liabilities from risk management activities-current | **$ —** | **$ 3** | $ 4 | $ 3 |
| **Derivatives not designated as hedging instruments** | | | | |
| Energy-related derivatives: | | | | |
| Assets from risk management activities/Liabilities from risk management activities-current | **$ 379** | **$ 434** | $ 486 | $ 482 |
| Other deferred charges and assets/Other deferred credits and liabilities | **170** | **215** | 66 | 81 |
| **Total derivatives not designated as hedging instruments** | **$ 549** | **$ 649** | $ 552 | $ 563 |
| **Gross amounts recognized** | **$ 554** | **$ 660** | $ 581 | $ 569 |
| **Gross amounts offset** [(a)] | **$ (390)** | **$ (583)** | $ (435) | $ (497) |
| **Net amounts recognized in the Balance Sheets** [(b)] | **$ 164** | **$ 77** | $ 146 | $ 72 |

(a) Gross amounts offset include cash collateral held on deposit in broker margin accounts of $193 million and $62 million as of December 31, 2017 and 2016 , respectively.

(b) Net amount of derivative instruments outstanding excludes premiums and intrinsic value associated with weather derivatives of $11 million as of December 31, 2017 .

At December 31, 2017 and 2016 , the pre-tax effect of unrealized derivative gains (losses) arising from energy-related derivatives designated as regulatory hedging instruments and deferred were as follows:

| | | Unrealized Losses | | | Unrealized Gains | |
|---|---|---|---|---|---|---|
| **Derivative Category** | **Balance Sheet Location** | **2017** | 2016 | **Balance Sheet Location** | **2017** | 2016 |
| | | *(in millions)* | | | *(in millions)* | |
| Energy-related derivatives: | | | | | | |
| | Other regulatory assets, current | **$ (4)** | $ (1) | Other regulatory liabilities, current | **$ 7** | $ 17 |
| | Other regulatory assets, deferred | **—** | — | Other regulatory liabilities, deferred | **—** | 1 |
| **Total energy-related derivative gains (losses)** [(*)] | | **$ (4)** | $ (1) | | **$ 7** | $ 18 |

(*) Fair value gains and losses included in regulatory assets and liabilities include cash collateral held on deposit in broker margin accounts of $6 million as of December 31, 2017 and $8 million as of December 31, 2016 .

For all periods presented, the pre-tax effect of energy-related derivatives and interest rate derivatives designated as cash flow hedging instruments recognized in OCI and those reclassified from accumulated OCI into earnings were as follows:

| | Gain (Loss) Recognized in OCI on Derivative (Effective Portion) | | | Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion) |
|---|---|---|---|---|
| | Successor | | | Successor |
| **Derivatives in Cash Flow Hedging Relationships** | **2017** | **Statements of Income Location** | | **2017** |
| | *(in millions)* | | | *(in millions)* |
| Energy-related derivatives | **$ (9)** | Cost of natural gas | | **$ (2)** |

| **Total derivatives in cash flow hedging relationships** | $ (3) | $ (64) | | $ (1) | $ (1) |

| | Gain (Loss) Recognized in OCI on Derivative (Effective Portion) | | Gain (Loss) Reclassified from Accumulated OCI into Income (Effective Portion) |
|---|---|---|---|
| | Predecessor | | Predecessor |
| **Derivatives in Cash Flow Hedging Relationships** | 2015 | **Statements of Income Location** | 2015 |
| | *(in millions)* | | *(in millions)* |
| Energy-related derivatives | $ 3 | Cost of natural gas | $ (10) |
| | | Other operations and maintenance | (1) |
| Interest rate derivatives | — | Interest expense, net of amounts capitalized | 2 |
| **Total derivatives in cash flow hedging relationships** | $ 3 | | $ (9) |

There was no material ineffectiveness recorded in earnings for any period presented.

For all periods presented, the pre-tax effects of energy-related derivatives not designated as hedging instruments on the statements of income were as follows:

| | | Gain (Loss) | | | |
|---|---|---|---|---|---|
| | | Successor | | Predecessor | |
| **Derivatives in Non-Designated Hedging Relationships** | **Statements of Income Location** | **Year Ended December 31, 2017** | July 1, 2016 through December 31, 2016 | January 1, 2016 through June 30, 2016 | Year Ended December 31, 2015 |
| | | *(in millions)* | | *(in millions)* | |
| Energy-related derivatives | Natural gas revenues (*) | **$ (80)** | $ 33 | $ (1) | $ 56 |
| | Cost of natural gas | **(2)** | 3 | (62) | (6) |
| **Total derivatives in non-designated hedging relationships** | | **$ (82)** | $ 36 | $ (63) | $ 50 |

(*) Excludes the impact of weather derivatives recorded in natural gas revenues of $23 million for the successor year ended December 31, 2017 , $6 million for the successor period of July 1, 2016 through December 31, 2016 , $3 million for the predecessor period of January 1, 2016 through June 30, 2016 , and $12 million for the predecessor year ended December 31, 2015 .

**Contingent Features**

The Company does not have any credit arrangements that would require material changes in payment schedules or terminations as a result of a credit rating downgrade. There are certain derivatives that could require collateral, but not accelerated payment, in the event of a credit rating change below BBB- and/or Baa3. At December 31, 2017 , the Company had no collateral posted with derivative counterparties to satisfy these arrangements.

At December 31, 2017 , the fair value of derivative liabilities with contingent features was $3 million and the maximum potential collateral requirements arising from the credit-risk-related contingent features, at a rating below BBB- and/or Baa3, was $2 million .

Generally, collateral may be provided by a guaranty, letter of credit, or cash. If collateral is required, fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral are not offset against fair value amounts recognized for derivatives executed with the same counterparty.

The Company is exposed to losses related to financial instruments in the event of counterparties' nonperformance. The Company has established risk management policies and controls to determine and monitor the creditworthiness of counterparties in order to mitigate the Company's exposure to counterparty credit risk. Prior to entering into a physical transaction, the Company assigns physical wholesale counterparties an internal credit rating and credit limit based on the counterparties' Moody's, S&P, and Fitch ratings, commercially available credit reports, and audited financial statements. The Company may require counterparties to pledge additional collateral when deemed necessary. Credit evaluations are conducted and appropriate internal approvals are obtained for a counterparty's line of credit before any transaction with the counterparty is executed. In most cases, the counterparty must have an investment grade rating, which includes a minimum long-term debt rating of Baa3 from Moody's and BBB- from S&P. Generally, the Company requires credit enhancements by way of a guaranty, cash deposit, or letter of credit for transaction counterparties that do not have investment grade ratings.

The Company also utilizes master netting agreements whenever possible to mitigate exposure to counterparty credit risk. When the Company is engaged in more than one outstanding derivative transaction with the same counterparty and it also has a legally enforceable netting agreement with that counterparty, the "net" mark-to-market exposure represents the netting of the positive and negative exposures with that counterparty and a reasonable measure of the Company's credit risk. The Company also uses other netting agreements with certain counterparties with whom it conducts significant transactions. Master netting agreements enable the Company to net certain assets and liabilities by counterparty. The Company also nets across product lines and against cash collateral, provided the master netting and cash collateral agreements include such provisions. The Company may require counterparties to pledge additional collateral when deemed necessary. Therefore, the Company does not anticipate a material adverse effect on the financial statements as a result of counterparty nonperformance.

## 11 . MERGER, ACQUISITION, AND DISPOSITIONS

### Merger with Southern Company

On July 1, 2016, the Company completed the Merger with Southern Company. A wholly-owned, direct subsidiary of Southern Company merged with and into Southern Company Gas, with the Company surviving as a wholly-owned, direct subsidiary of Southern Company.

At the effective time of the Merger, each share of Southern Company Gas common stock, other than certain excluded shares, was converted into the right to receive $66 in cash, without interest. Also at the effective time of the Merger, all of the outstanding restricted stock units, restricted stock awards, non-employee director stock awards, stock options, and performance share units were either redeemed or converted into Southern Company's restricted stock units. See Note 8 for additional information.

The application of the acquisition method of accounting was pushed down to the Company. The excess of the purchase price over the fair values of the Company's assets and liabilities was recorded as goodwill, which represents a different basis of accounting from the historical basis prior to the Merger. The following table presents the final purchase price allocation:

| | Successor | Predecessor | |
|---|---|---|---|
| | New Basis | Old Basis | Change in Basis |
| | *(in millions)* | *(in millions)* | |
| Current assets | $ 1,557 | $ 1,474 | $ 83 |
| Property, plant, and equipment | 10,108 | 10,148 | (40) |
| Goodwill | 5,967 | 1,813 | 4,154 |
| Other intangible assets | 400 | 101 | 299 |
| Regulatory assets | 1,118 | 679 | 439 |
| Other assets | 229 | 273 | (44) |
| Current liabilities | (2,201) | (2,205) | 4 |
| Other liabilities | (4,742) | (4,600) | (142) |
| Long-term debt | (4,261) | (3,709) | (552) |
| Contingently redeemable noncontrolling interest | (174) | (41) | (133) |
| Total purchase price/equity | $ 8,001 | $ 3,933 | $ 4,068 |

Measurement period adjustments were recorded to the purchase price allocation during the fourth quarter 2016, which resulted in a net $30 million increase in goodwill to establish intangible liabilities for transportation contracts at wholesale services, partially offset by adjustments to deferred tax balances.

In determining the fair value of assets and liabilities subject to rate regulation that allows recovery of costs and/or a fair return on investments, historical cost was deemed to be a reasonable proxy for fair value, as it is included in rate base or otherwise specified in regulatory recovery mechanisms. Property, plant, and equipment subject to rate regulation was reflected based on the historical gross amount of assets in service and accumulated depreciation, as they are included in rate base. For certain assets and liabilities subject to rate regulation (such as debt instruments and employee benefit obligations), the fair value adjustment was applied to historical cost with a corresponding offset to regulatory asset or liability based on the assessment of probable future recovery in rates.

For unregulated assets and liabilities, fair value adjustments were applied to historical cost of natural gas for sale, property, plant, and equipment, debt instruments, and noncontrolling interest. The valuation of other intangible assets included customer relationships, trade names, and favorable/unfavorable contracts. The valuation of these assets and liabilities applied either the market approach or income approach. The market approach was utilized when prices and other relevant market information were available. The income approach, which is based on discounted cash flows, was primarily based on significant unobservable inputs (Level 3). Key estimates and inputs included forecasted profitability and cash flows, customer retention rates, royalty rates, and discount rates.

The estimated fair value of deferred income taxes was determined by applying the appropriate enacted statutory tax rate to the temporary differences that arose on the differences between the financial reporting value and tax basis of the assets acquired and liabilities assumed.

The excess of the purchase price over the estimated fair value of assets and liabilities of $6 billion was recognized as goodwill, which is primarily attributable to positioning Southern Company to provide natural gas infrastructure to meet customers' growing energy needs and to compete for growth across the energy value chain. The Company anticipates that the majority of the value assigned to goodwill will not be deductible for tax purposes.

The receipt of required regulatory approvals was conditioned upon certain terms and commitments. In connection with these regulatory approvals, certain regulatory agencies prohibited the Company from recovering goodwill and Merger-related expenses, required the Company to maintain a minimum number of employees for a set period of time to ensure that certain pipeline safety standards and the competence level of the employee workforce is not degraded, and/or required the Company to maintain its pre-Merger level of support for various social and charitable programs. The most notable terms and commitments with potential financial impacts included:

- rate credits of $18 million to be paid to customers in New Jersey and Maryland;
- sharing of Merger savings with customers in Georgia starting in 2020;
- phasing-out the use of the Nicor name or logo by certain of the Company's gas marketing services subsidiaries in conducting non-utility business in Illinois;
- reaffirming that Elizabethtown Gas would file a base rate case no later than September 1, 2016, with another base rate case no later than three years after the 2016 rate case; and
- requiring Elkton Gas to file a base rate case within two years of closing the Merger.

There is no restriction on the Company's other utilities' ability to file future rate cases. The rate credits to customers in New Jersey and Maryland were paid during the third and fourth quarters of 2016, respectively. The use of the Nicor name and logo was phased out, effective November 1, 2017, by certain of the Company's gas marketing services subsidiaries in conducting non-utility business in Illinois. Elizabethtown Gas filed a base rate case with the New Jersey BPU on September 1, 2016. See Note 3 under "Base Rate Cases" for additional information. Upon completion of the Merger, the Company amended and restated its Bylaws and Articles of Incorporation, under which it now has the authority to issue no more than 110 million shares of stock consisting of (i) 100 million shares of common stock and (ii) 10 million shares of preferred stock, both categories of which have a par value of $0.01 per share. The amended and restated Articles of Incorporation do not allow any treasury shares to be held.

**Investment in SNG**

In September 2016, the Company, through a wholly-owned, indirect subsidiary, acquired a 50% equity interest in SNG pursuant to a definitive agreement between Southern Company and Kinder Morgan, Inc. in July 2016, to which Southern Company assigned all rights and obligations to the Company in August 2016. SNG owns a 7,000 -mile pipeline system connecting natural gas supply basins in Texas, Louisiana, Mississippi, and Alabama to markets in Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina, and Tennessee. The purchase price of $1.4 billion was financed by a $1.05 billion equity contribution from Southern Company and $360 million of cash paid by the Company, which was financed by a promissory note from Southern Company repaid with a portion of the proceeds from senior notes issued in September 2016. The purchase price of the 50% equity interest exceeded the underlying ownership interest in the net assets of SNG by approximately $700 million . This basis difference is attributable to goodwill and deferred tax assets. While the deferred tax assets will be amortized through deferred tax expense, the goodwill will not be amortized and is not required to be tested for impairment on an annual basis. The Company's investment in SNG decreased by $104 million related to the impact of the Tax Reform Legislation and new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings.

On March 31, 2017, the Company made an additional $50 million contribution to maintain its 50% equity interest in SNG. See Note 4 under "Equity Method Investments" for additional information on this investment.

**Proposed Sale of Elizabethtown Gas and Elkton Gas**

On October 15, 2017, the Company's subsidiary, Pivotal Utility Holdings, entered into agreements for the sale of the assets of two of its natural gas distribution utilities, Elizabethtown Gas and Elkton Gas, to South Jersey Industries, Inc. for a total cash purchase price of $1.7 billion . The completion of each asset sale is subject to the satisfaction or waiver of certain conditions, including, among other customary closing conditions, the receipt of required regulatory approvals, including the FERC, the Federal Communications Commission, the New Jersey BPU, and, with respect to the sale of Elkton Gas, the Maryland PSC. The Company and South Jersey Industries, Inc. made joint filings on December 22, 2017 and January 16, 2018 with the New Jersey BPU and the Maryland PSC, respectively, requesting regulatory approval. The asset sales are expected to be completed by the end of the third quarter 2018.

The ultimate outcome of these matters cannot be determined at this time.

## 12 . SEGMENT AND RELATED INFORMATION

The Company manages its business through four reportable segments - gas distribution operations, gas marketing services, wholesale gas services, and gas midstream operations. The non-reportable segments are combined and presented as all other. In conjunction with the Merger, the Company changed the names of certain reportable segments to better align with its new parent company.

Gas distribution operations is the largest component of the Company's business and includes natural gas local distribution utilities that construct, manage, and maintain intrastate natural gas pipelines and gas distribution facilities in seven states. Gas marketing services includes natural gas marketing to end-use customers primarily in Georgia and Illinois. Additionally, gas marketing services provides home equipment protection products and services. Wholesale gas services provides natural gas asset management and/or related logistics services for each of the Company's utilities except Nicor Gas as well as for non-affiliated companies. Additionally, wholesale gas services segment engages in natural gas storage and gas pipeline arbitrage and related activities. Since the acquisition of the Company's 50% interest in SNG, gas midstream operations primarily consists of the Company's gas pipeline investments, with storage and fuel operations also aggregated into this segment. The all other column includes segments below the quantitative threshold for separate disclosure, including the subsidiaries that fall below the quantitative threshold for separate disclosure.

After the Merger, the Company changed the segment performance measure to net income, which is utilized by its parent company. In order to properly assess net income by segment, the Company executed various intercompany note agreements to revise interest charges to its segments. Since such agreements did not exist in the predecessor periods, the Company is unable to provide the comparable net income for those periods.

**NOTES (continued)**
**Southern Company Gas and Subsidiary Companies 2017 Annual Report**

Financial data for business segments for the successor year ended December 31, 2017 , the successor period of July 1, 2016 through December 31, 2016 , and the predecessor periods of January 1, 2016 through June 30, 2016 and the year ended December 31, 2015 were as follows:

| | Gas Distribution Operations | Gas Marketing Services | Wholesale Gas Services [(a)] | Gas Midstream Operations | Total | All Other | Eliminations | Consolidated |
|---|---|---|---|---|---|---|---|---|
| | | | | *(in millions)* | | | | |

| Predecessor – Year Ended December 31, 2015 | 6,286 | 408 | 6,694 | 6,492 | 202 |

(b) Includes the impact of the Tax Reform Legislation and new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings.

## 13. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Summarized quarterly financial information for the successor year ended December 31, 2017 and the successor period of July 1, 2016 through December 31, 2016 and for the predecessor period of January 1, 2016 through June 30, 2016 are as follows:

| Quarter Ended | Operating Revenues | Operating Income (Loss) | EBIT | Net Income (Loss) Attributable to Southern Company Gas |
|---|---|---|---|---|
| | | | *(in millions)* | |
| **Successor - 2017** | | | | |
| **March 2017** | **$ 1,560** | **$ 391** | **$ 435** | **$ 239** |
| **June 2017** | **716** | **96** | **128** | **49** |
| **September 2017** [(a)] | **565** | **68** | **118** | **15** |
| **December 2017** [(a)(b)] | **1,079** | **110** | **129** | **(60)** |
| Predecessor - January 1, 2016 through June 30, 2016 | | | *(in millions)* | |
| March 2016 | $ 1,334 | $ 348 | $ 351 | $ 182 |
| June 2016 | 571 | (27) | (23) | (51) |
| Successor - July 1, 2016 through December 31, 2016 | | | *(in millions)* | |
| September 2016 | $ 543 | $ 12 | $ 50 | $ 4 |
| December 2016 | 1,109 | 185 | 221 | 110 |

(a) Net income (loss) attributable to Southern Company Gas includes the impact of new income tax apportionment factors in several states resulting from the Company's inclusion in the consolidated Southern Company state tax filings.

(b) Net loss attributable to Southern Company Gas includes the impact of the Tax Reform Legislation.

The Company's business is influenced by seasonal weather conditions.

See Note 11 under "Merger with Southern Company" for information on the Merger.

Items 10 (other than the information under "Code of Ethics" below), 11, 12, 13, and 14 for Alabama Power and Mississippi Power are incorporated by reference to the Definitive Information Statements of Alabama Power and Mississippi Power relating to each of their respective 2018 Annual Meetings of Shareholders. Specifically, reference is made to "Nominees for Election as Directors," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance" for Item 10, "Executive Compensation," "Compensation Committee Interlocks and Insider Participation," "Director Compensation," "Director Deferred Compensation Plan," and "Director Compensation Table" for Item 11, "Stock Ownership Table" and "Executive Compensation" for Item 12, "Certain Relationships and Related Transactions" and "Director Independence" for Item 13, and "Principal Independent Registered Public Accounting Firm Fees" for Item 14.

Items 10, 11, 12, and 13 for each of Georgia Power, Gulf Power, Southern Power, and Southern Company Gas are omitted pursuant to General Instruction I(2)(c) of Form 10-K. Item 14 for each of Georgia Power, Gulf Power, Southern Power, and Southern Company Gas is contained herein.

## ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

***Code of Ethics***

The registrants collectively have adopted a code of business conduct and ethics (Code of Ethics) that applies to each director, officer, and employee of the registrants and their subsidiaries. The Code of Ethics can be found on Southern Company's website located at www.southerncompany.com . The Code of Ethics is also available free of charge in print to any shareholder by requesting a copy from Myra C. Bierria, Corporate Secretary, Southern Company, 30 Ivan Allen Jr. Boulevard NW, Atlanta, Georgia 30308. Any amendment to or waiver from the Code of Ethics that applies to executive officers and directors will be posted on the website.

**ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES**

The following represents the fees billed to Georgia Power, Gulf Power, and Southern Power for the last two fiscal years by Deloitte & Touche LLP, each company's principal public accountant for 2017 and 2016 :

| | 2017 | 2016 |
|---|---|---|
| | *(in thousands)* | |
| **Georgia Power** | | |
| Audit Fees (1) | $ 3,247 | $ 3,154 |
| Audit-Related Fees (2) | 96 | 30 |
| Tax Fees | — | — |
| All Other Fees (3) | 1 | 15 |
| Total | $ 3,344 | $ 3,199 |
| **Gulf Power** | | |
| Audit Fees (1) | $ 1,442 | $ 1,346 |
| Audit-Related Fees | 3 | 3 |
| Tax Fees | — | — |
| All Other Fees (3) | — | 2 |
| Total | $ 1,445 | $ 1,351 |
| **Southern Power** | | |
| Audit Fees (1) | $ 1,778 | $ 1,817 |
| Audit-Related Fees | 439 | 372 |
| Tax Fees | — | — |
| All Other Fees (3) | 8 | 6 |
| Total | $ 2,225 | $ 2,195 |

(1) Includes services performed in connection with financing transactions.

(2) Includes both audit and non-statutory audit services in 2017 and non-statutory audit services in 2016.

(3) Represents registration fees for attendance at Deloitte & Touche LLP-sponsored education seminars.

The following represents the fees billed to Southern Company G as for the last two fiscal years by PricewaterhouseCoopers LLP, Southern Company Gas' principal public accountant through February 11, 2016, and Deloitte & Touche LLP, Southern Company Gas' principal public accountant since February 11, 2016:

| | 2017 | 2016 |
|---|---|---|
| | *(in thousands)* | |
| **Southern Company Gas** | | |
| Audit Fees (1) | $ 4,449 | $ 5,131 |
| Audit-Related Fees (2) | 579 | 59 |
| Tax Fees (3) | — | 65 |
| All Other Fees (4) | 8 | 7 |
| Total | $ 5,036 | $ 5,262 |

(1) Includes Deloitte & Touche LLP fees in connection with financing transactions and PricewaterhouseCoopers LLP and Deloitte & Touche LLP fees in connection with audits of several subsidiaries in addition to the consolidated audit.

(2) Represents fees for non-statutory audit services in 2017 and a review report on internal controls provided to third parties billed by Deloitte & Touche LLP in 2017 and 2016.

(3) Represents fees billed by Deloitte & Touche LLP for tax compliance services.

(4) Represents registration fees for attendance at Deloitte & Touche LLP-sponsored education seminars and subscription fees for Deloitte & Touche LLP's technical accounting research tool.

The Southern Company Audit Committee (on behalf of Southern Company and its subsidiaries) adopted a Policy of Engagement of the Independent Auditor for Audit and Non-Audit Services that includes requirements for such Audit Committee to pre-approve audit and non-audit services provided by Deloitte & Touche LLP. All of the audit services provided by Deloitte & Touche LLP in fiscal years 2017 and 2016 (described in the footnotes to the table above) and related fees were approved in advance by the Southern Company Audit Committee.

Prior to the closing of the Merger, the Southern Company Gas Audit Committee had responsibility for appointing, setting compensation, and overseeing the work of Southern Company Gas' independent registered public accounting firm. In recognition of this responsibility, Southern Company Gas' Audit Committee adopted a policy that required specific Audit Committee approval before any services were provided by the independent registered public accounting firm. All of the audit services provided by PricewaterhouseCoopers LLP and Deloitte & Touche LLP in fiscal year 2016 (described in the footnotes to the table above) prior to the closing of the Merger and related fees were approved in advance by the Southern Company Gas Audit Committee.

# PART IV

## Item 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as a part of this report on Form 10-K:

(1) Financial Statements and Financial Statement Schedules:

Management's Report on Internal Control Over Financial Reporting for Southern Company and Subsidiary Companies is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Alabama Power is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Georgia Power is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Gulf Power is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Mississippi Power is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Southern Power and Subsidiary Companies is listed under Item 8 herein.

Management's Report on Internal Control Over Financial Reporting for Southern Company Gas and Subsidiary Companies is listed under Item 8 herein.

Reports of Independent Registered Public Accounting Firm on the financial statements and financial statement schedules for Southern Company and Subsidiary Companies, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, and Southern Company Gas and Subsidiary Companies, as well as the Report of Independent Registered Public Accounting Firm on the financial statements of Southern Power and Subsidiary Companies are listed under Item 8 herein.

(2) Exhibits:

Exhibits for Southern Company, Alabama Power, Georgia Power, Gulf Power, Mississippi Power, Southern Power, and Southern Company Gas are listed in the Exhibit Index at page E-1.

## Item 16. FORM 10-K SUMMARY

None.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholders and the Board of Directors of The Southern Company and Subsidiary Companies

**Opinion on the Financial Statement Schedule**

We have audited the consolidated financial statements of Southern Company and Subsidiary Companies (the Company) as of December 31, 2017 and 2016 , and for each of the three years in the period ended December 31, 2017 , and the Company's internal control over financial reporting as of December 31, 2017 , and have issued our report thereon dated February 20, 2018 ; such report is included elsewhere in this Form 10-K. Our audits also included the consolidated financial statement schedule of the Company (page S-2) listed in the Index at Item 15. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

/s/ Deloitte & Touche LLP

February 20, 2018

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholders and the Board of Directors of Mississippi Power Company

**Opinion on the Financial Statement Schedule**

We have audited the financial statements of Mississippi Power Company (the Company) (a wholly-owned subsidiary of The Southern Company) as of December 31, 2017 and 2016 , and for each of the three years in the period ended December 31, 2017 , and have issued our report thereon dated February 20, 2018 ; such report is included elsewhere in this Form 10-K. Our audits also included the financial statement schedule of the Company (Page S-6) listed in the Index at Item 15. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such financial statement schedule, when considered in relation to the financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

February 20, 2018

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the stockholder and the Board of Directors of Southern Company Gas and Subsidiary Companies

**Opinion on the Financial Statement Schedule**

We have audited the consolidated financial statements of Southern Company Gas and Subsidiary Companies (the Company) (a wholly-owned subsidiary of The Southern Company) as of December 31, 2017 and 2016 , and the related consolidated statements of income, comprehensive income, stockholders' equity, and cash flows, for the year ended December 31, 2017 and the six-month periods ended June 30, 2016 (Predecessor) and December 31, 2016 (Successor), and have issued our report thereon dated February 20, 2018 ; such report is included elsewhere in this Form 10-K. As indicated in that report, we did not audit the financial statements of Southern Natural Gas Company, L.L.C. (SNG), the Company's investment in which is accounted for by the use of the equity method. The Company's consolidated financial statements include its equity investment in SNG of $1,262 million and $1,394 million as of December 31, 2017 and December 31, 2016 , respectively, and its earnings from its equity method investment in SNG of $88 million and $56 million for the year ended December 31, 2017 and the six months ended December 31, 2016, respectively. Those statements were audited by other auditors whose report (which expresses an unqualified opinion on SNG's financial statements and contains an emphasis of matter paragraph concerning the extent of its operations and relationships with affiliated entities) have been furnished to us, and our opinion, insofar as it relates to the amounts included for SNG, is based solely on the report of the other auditors. Our audits also included the consolidated financial statement schedule of the Company (Page S-7) listed in the Index at Item 15. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

| 2016 | 2,147 | 14,476 | — | 13,787 | 2,836 |
| 2015 | 6,076 | 16,862 | — | 20,791 | 2,147 |

(Note) *Represents write-off of accounts considered to be uncollectible, less recoveries of amounts previously written off.*

**GULF POWER COMPANY**
**SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS**
**FOR THE YEARS ENDED DECEMBER 31, 2017 , 2016 , AND 2015**
*(Stated in Thousands of Dollars)*

| Description | Balance at Beginning of Period | Additions: Charged to Income | Additions: Charged to Other Accounts | Deductions (Note) | Balance at End of Period |
|---|---|---|---|---|---|
| Provision for uncollectible accounts | | | | | |
| 2017 | $ 732 | $ 2,859 | $ — | $ 2,846 | $ 745 |
| 2016 | 775 | 2,946 | — | 2,989 | 732 |
| 2015 | 2,087 | 2,041 | — | 3,353 | 775 |

(Note) *Represents write-off of accounts considered to be uncollectible, less recoveries of amounts previously written off.*

**MISSISSIPPI POWER COMPANY**
**SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS**
**FOR THE YEARS ENDED DECEMBER 31, 2017 , 2016 , AND 2015**
*(Stated in Thousands of Dollars)*

| Description | Balance at Beginning of Period | Additions: Charged to Income | Additions: Charged to Other Accounts | Deductions (Note) | Balance at End of Period |
|---|---|---|---|---|---|
| Provision for uncollectible accounts | | | | | |
| 2017 | $ 494 | $ 1,377 | $ — | $ 1,279 | $ 592 |
| 2016 | 287 | 1,295 | — | 1,088 | 494 |
| 2015(*) | 825 | (1,994) | — | (1,456) | 287 |

(Note) *Represents write-off of accounts considered to be uncollectible, less recoveries of amounts previously written off.*

(*) The refund ordered by the Mississippi PSC pursuant to the 2015 Mississippi Supreme Court decision relative to a regulatory liability used by Mississippi Power to record financing costs associated with construction of the Kemper County energy facility involved refunding all billed amounts to all historical customers and included an interest component. The refund of approximately $371 million in 2015 was of sufficient magnitude to resolve most past due amounts beyond 30 days aged receivables, accounting for the negative provision of $(2.0) million where risk of collectibility was offset by applying the refund to past due amounts. It was also of sufficient size to offset amounts previously written off in the 2012-2015 time frame, accounting for the net recoveries of $1.5 million .

**SOUTHERN COMPANY GAS AND SUBSIDIARY COMPANIES**
**SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS**
**FOR THE SUCCESSOR PERIODS OF JULY 1, 2016 THROUGH DECEMBER 31, 2016**
**AND THE YEAR ENDED DECEMBER 31, 2017**
**AND THE PREDECESSOR PERIODS OF JANUARY 1, 2016 THROUGH JUNE 30, 2016**
**AND THE YEAR ENDED DECEMBER 31, 2015**
*(Stated in Thousands of Dollars)*

| | | Additions | | | |
|---|---|---|---|---|---|
| Description | Balance at Beginning of Period | Charged to Income | Charged to Other Accounts | Deductions (Note) | Balance at End of Period |
| **Successor – December 31, 2017** | | | | | |
| Provision for uncollectible accounts | $ 27,316 | $ 28,022 | $ (248) | $ 27,286 | $ 27,804 |
| Income tax valuation | 19,182 | — | — | 7,910 | 11,272 |
| **Successor – December 31, 2016** | | | | | |
| Provision for uncollectible accounts | $ 37,663 | $ 9,500 | $ (1,257) | $ 18,590 | $ 27,316 |
| Income tax valuation | 19,182 | — | — | — | 19,182 |
| **Predecessor – June 30, 2016** | | | | | |

---

**SEVENTEENTH SUPPLEMENTAL INDENTURE**

**DATED AS OF NOVEMBER 20, 2017**

---

SERIES 2017A FLOATING RATE SENIOR NOTES

DUE DECEMBER 20, 2020

TABLE OF CONTENTS [1]

[1] This Table of Contents does not constitute part of the Indenture or have any bearing upon the interpretation of any of its terms and provisions.

THIS SEVENTEENTH SUPPLEMENTAL INDENTURE is made as of the 20 th day of November, 2017, by and between SOUTHERN POWER COMPANY, a Delaware corporation having its principal place of business at 30 Ivan Allen Jr. Blvd., N.W., Atlanta, Georgia 30308 (the “Company”), and WELLS FARGO BANK, NATIONAL ASSOCIATION, a national banking association, 150 East 42 nd Street, 40 th Floor, New York, New York 10017 (the “Trustee”).

W I T N E S S E T H:

WHEREAS, the Company has heretofore entered into a Senior Note Indenture, dated as of June 1, 2002 (the “Original Indenture”), with Wells Fargo Bank, National Association (as successor to The Bank of New York Mellon (formerly known as The Bank of New York)), as heretofore amended and supplemented;

WHEREAS, the Original Indenture is incorporated herein by this reference and the Original Indenture, as heretofore amended and supplemented and as further supplemented by this Seventeenth Supplemental Indenture, is herein called the “Indenture”;

WHEREAS, under the Original Indenture, a new series of unsecured senior debentures or notes or other evidence of indebtedness (the “Senior Notes”) may at any time be established by the Board of Directors of the Company in accordance with the provisions of the Original Indenture and the terms of such series may be described by a supplemental indenture executed by the Company and the Trustee;

WHEREAS, the Company proposes to create under the Indenture a new series of Senior Notes;

WHEREAS, additional Senior Notes of other series hereafter established, except as may be limited in the Original Indenture as at the time supplemented and modified, may be issued from time to time pursuant to the Indenture as at the time supplemented and modified; and

WHEREAS, all conditions necessary to authorize the execution and delivery of this Seventeenth Supplemental Indenture and to make it a valid and binding obligation of the Company have been done or performed.

NOW, THEREFORE, in consideration of the agreements and obligations set forth herein and for other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree as follows:

## ARTICLE 1

## SERIES 2017A SENIOR NOTES

SECTION 101. Establishment . There is hereby established a new series of Senior Notes to be issued under the Indenture, to be designated as the Company’s Series 2017A Floating Rate Senior Notes due December 20, 2020 (the “Series 2017A Notes”).

There are to be authenticated and delivered \$525,000,000 principal amount of Series 2017A Notes, and such principal amount of the Series 2017A Notes may be increased from time to time pursuant to Section 301 of the Original Indenture. All Series 2017A Notes need not be issued at the same time and such series may be reopened at any time, without the consent of any Holder, for issuances of additional Series 2017A Notes. Any such additional Series 2017A Notes will have the same interest rate, maturity and other terms as those initially issued (except for the public offering price and issue date and the initial interest accrual date and initial Interest Payment Date (as defined below), if applicable). No Series 2017A Notes shall be authenticated and delivered in excess of the principal amount as so increased except as provided by Sections 203, 303, 304, 907 or 1107 of the Original Indenture. The Series 2017A Notes shall be issued in fully registered form.

The Series 2017A Notes shall be issued in the form of one or more Global Securities in substantially the form set out in Exhibit A hereto. The Depositary with respect to the Series 2017A Notes shall be The Depository Trust Company.

The form of the Trustee's Certificate of Authentication for the Series 2017A Notes shall be in substantially the form set forth in Exhibit B hereto.

Each Series 2017A Note shall be dated the date of authentication thereof and shall bear interest from the date of original issuance thereof or from the most recent Interest Payment Date to which interest has been paid or duly provided for.

SECTION 102. Definitions . The following defined terms used herein shall, unless the context otherwise requires, have the meanings specified below. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Original Indenture.

"1933 Act" has the meaning set forth in Section 106 of this Seventeenth Supplemental Indenture.

"Calculation Agent" means Wells Fargo Bank, National Association, or its successor appointed by the Company, acting as calculation agent.

"Distribution Compliance Period" has the meaning set forth in Section 107 of this Seventeenth Supplemental Indenture.

"Interest Determination Date" means the second London Business Day immediately preceding the first day of the relevant Interest Period.

"Interest Payment Dates" means the 20th day of March, June, September and December, commencing December 20, 2017; provided, however, in the event that any Interest Payment Date (other than the Interest Payment Date that is the Stated Maturity) would otherwise be a day that is not a Business Day, the Interest Payment Date will be the next succeeding Business Day.

"Interest Period" means the period commencing on an Interest Payment Date (or, with respect to the initial Interest Period only, commencing on the Original Issue Date) and ending on the day before the next succeeding Interest Payment Date.

"London Business Day" means a day that is a Business Day and a day on which dealings in deposits in U.S. dollars are transacted, or with respect to any future date are expected to be transacted, in the London interbank market.

"One-Month LIBOR" means, with respect to the initial Interest Period, the rate (expressed as a percentage per annum) for deposits in U.S. dollars having an index maturity of one month that appears on Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for the initial Interest Period. If such rate does not appear on the Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for the initial Interest Period, One-Month LIBOR will be determined on the basis of the rates at which deposits in U.S. dollars for the initial Interest Period and in a principal amount of not less than $1,000,000 are offered to prime banks in the London interbank market by four major banks in the London interbank market (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., London time, on the Interest Determination Date for the initial Interest Period. The Calculation Agent will request the principal London office of each such bank to provide a quotation of its rate. If at least two such quotations are provided, One-Month LIBOR with respect to the initial Interest Period will be the arithmetic mean of such quotations. If fewer than two quotations are provided, One-Month LIBOR with respect to the initial Interest Period will be the arithmetic mean of the rates quoted by three major banks in New York City (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., New York City time, on the Interest Determination Date for the initial Interest Period for loans in U.S. dollars to leading European banks for the initial Interest Period and in a principal amount of not less than $1,000,000.

"Original Issue Date" means November 20, 2017.

"Regular Record Date" means, with respect to each Interest Payment Date, the 15th calendar day preceding such Interest Payment Date (whether or not a Business Day).

"Regulation S Global Note" has the meaning set forth in Section 106 of this Seventeenth Supplemental Indenture.

"Regulation S Legend" has the meaning set forth in Section 106 of this Seventeenth Supplemental Indenture.

"Reuters LIBOR01 Page" means the display designated as Reuters LIBOR01 on the Reuters service (or such other page as may replace the Reuters LIBOR01 Page on that service, or such other service as may be nominated as the information vendor, for the purpose of displaying rates or prices comparable to the London Interbank Offered rate for U.S. dollar deposits).

"Rule 144A Global Note" has the meaning set forth in Section 106 of this Seventeenth Supplemental Indenture.

"Rule 144A Legend" has the meaning set forth in Section 106 of this Seventeenth Supplemental Indenture.

“Stated Maturity” means December 20, 2020; provided that if the Stated Maturity is not a Business Day, the principal and interest due on that date will be payable on the next succeeding Business Day, and no interest shall accrue for the intervening period; provided further that if such next succeeding Business Day is in the next succeeding calendar year, such payment will be made on the immediately preceding Business Day.

“Three-Month LIBOR” means, with respect to any Interest Period, the rate (expressed as a percentage per annum) for deposits in U.S. dollars having an index maturity of three months that appears on Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for that Interest Period. If such rate does not appear on the Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for that Interest Period, Three-Month LIBOR will be determined on the basis of the rates at which deposits in U.S. dollars for the Interest Period and in a principal amount of not less than $1,000,000 are offered to prime banks in the London interbank market by four major banks in the London interbank market (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., London time, on the Interest Determination Date for that Interest Period. The Calculation Agent will request the principal London office of each such bank to provide a quotation of its rate. If at least two such quotations are provided, Three-Month LIBOR with respect to that Interest Period will be the arithmetic mean of such quotations. If fewer than two quotations are provided, Three-Month LIBOR with respect to that Interest Period will be the arithmetic mean of the rates quoted by three major banks in New York City (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., New York City time, on the Interest Determination Date for that Interest Period for loans in U.S. dollars to leading European banks for that Interest Period and in a principal amount of not less than $1,000,000. However, if fewer than three banks selected by the Company to provide quotations are quoting as described above, Three-Month LIBOR for that Interest Period will be the same as the rate determined for the previous Interest Period.

SECTION 103. Payment of Principal and Interest . The principal of the Series 2017A Notes shall be due at Stated Maturity (unless earlier redeemed). The unpaid principal amount of the Series 2017A Notes shall bear interest at the rates set quarterly pursuant to Section 104 hereof until paid or duly provided for. Interest shall be paid quarterly in arrears on each Interest Payment Date to the Person in whose name the Series 2017A Notes are registered at the close of business on the Regular Record Date for such Interest Payment Date, *provided* that interest payable at the Stated Maturity or on a Redemption Date as provided herein will be paid to the Person to whom principal is payable. Any such interest that is not so punctually paid or duly provided for will forthwith cease to be payable to the Holders on such Regular Record Date and may either be paid to the Person or Persons in whose name the Series 2017A Notes are registered at the close of business on a Special Record Date for the payment of such defaulted interest to be fixed by the Trustee, notice whereof shall be given to Holders of the Series 2017A Notes not less than ten (10) days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Series 2017A Notes shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Original Indenture.

Payments of interest on the Series 2017A Notes will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for the Series 2017A Notes shall be computed and paid on the basis of the actual number of days elapsed over a 360-day year.

Payment of the principal and interest due at the Stated Maturity or earlier redemption of the Series 2017A Notes shall be made upon surrender of the Series 2017A Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series 2017A Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payments of interest (including interest on any Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least sixteen (16) days prior to the date for payment by the Person entitled thereto.

SECTION 104. Determination of Interest. The Series 2017A Notes will bear interest for each Interest Period at a per annum rate determined by the Calculation Agent, subject to the maximum interest rate permitted by New York or other applicable state law, as such law may be modified by United States law of general application. The interest rate applicable during each Interest Period (other than the initial Interest Period) will be equal to Three-Month LIBOR on the Interest Determination Date for such Interest Period plus 0.55%. The interest rate applicable during the initial Interest Period will be equal to One-Month LIBOR on the Interest Determination Date for the initial Interest Period (the second London Business Day prior to the Original Issue Date) plus 0.55%. In no event shall the applicable interest rate be less than 0% for any Interest Period. Promptly upon such determination, the Calculation Agent will notify the Company and the Trustee, if the Trustee is not then serving as the Calculation Agent, of the interest rate for the new Interest Period. The interest rate determined by the Calculation Agent, absent manifest error, shall be binding and conclusive upon the beneficial owners and Holders of the Series 2017A Notes, the Company and the Trustee.

Upon the request of a Holder of the Series 2017A Notes, the Calculation Agent will provide to such Holder the interest rate in effect on the date of such request and, if determined, the interest rate for the next Interest Period.

SECTION 105. Denominations. The Series 2017A Notes may be issued in denominations of $2,000 and integral multiples of $1,000 in excess thereof.

SECTION 106. Global Securities. The Series 2017A Notes will be issued in the form of one or more Global Securities registered in the name of the Depositary (which shall be The Depository Trust Company) or its nominee. The Series 2017A Notes will be initially issued pursuant to an exemption or exemptions from the registration requirements of the Securities Act of 1933, as amended (the “1933 Act”). Beneficial interests in the Series 2017A Notes offered and sold to “qualified institutional buyers” (as defined in Rule 144A under the 1933 Act) in reliance upon Rule

144A under the 1933 Act shall be represented by one or more separate Global Securities (each, a "Rule 144A Global Note"). Each Rule 144A Global Note shall bear the Rule 144A legend in substantially the form set forth in Exhibit A hereto (the "Rule 144A Legend"). Beneficial interests in the Series 2017A Notes offered and sold to purchasers outside of the United States pursuant to Regulation S under the 1933 Act shall be represented by one or more separate Global Securities (each, a "Regulation S Global Note") and shall bear the Regulation S legend in substantially the form set forth in Exhibit A hereto (the "Regulation S Legend").

Except under the limited circumstances described below, Series 2017A Notes represented by one or more Global Securities will not be exchangeable for, and will not otherwise be issuable as, Series 2017A Notes in definitive form. The Global Securities described above may not be transferred except by the Depositary to a nominee of the Depositary or by a nominee of the Depositary to the Depositary or another nominee of the Depositary or to a successor Depositary or its nominee.

Owners of beneficial interests in such a Global Security will not be considered the Holders thereof for any purpose under the Indenture, and no Global Security representing a Series 2017A Note shall be exchangeable, except for another Global Security of like denomination and tenor to be registered in the name of the Depositary or its nominee or to a successor Depositary or its nominee. The rights of Holders of such Global Security shall be exercised only through the Depositary.

Subject to the procedures of the Depositary, a Global Security shall be exchangeable for Series 2017A Notes registered in the names of persons other than the Depositary or its nominee only if (i) the Depositary notifies the Company that it is unwilling or unable to continue as a Depositary for such Global Security and no successor Depositary shall have been appointed by the Company, or if at any time the Depositary ceases to be a clearing agency registered under the Securities Exchange Act of 1934, as amended, at a time when the Depositary is required to be so registered to act as such Depositary and no successor Depositary shall have been appointed by the Company, in each case within 90 days after the Company receives such notice or becomes aware of such cessation, (ii) the Company in its sole discretion determines that such Global Security shall be so exchangeable, or (iii) there shall have occurred an Event of Default with respect to the Series 2017A Notes. Any Global Security that is exchangeable pursuant to the preceding sentence shall be exchangeable for Series 2017A Notes registered in such names as the Depositary shall direct.

Neither the Company, the Trustee nor any agent of the Company or the Trustee shall have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in a Global Security or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

SECTION 107. Transfer. A Rule 144A Global Note may not be transferred on the Security Register except in compliance with the restrictions on transfer contained in the Rule 144A Legend and upon receipt by the Security Registrar of a completed and executed Transfer Certificate in the form contained in Exhibit A hereto. Prior to the expiration of 40 days beginning on and including the later of (i) the day on which the offering of the Series 2017A Notes commences and (ii) the Original Issue Date (the "Distribution Compliance Period"), a Regulation S Global Note may not be transferred on the Security Register except in compliance with the restrictions on transfer contained in the Regulation S Legend and upon receipt by the Security Registrar of a completed and executed Transfer Certificate in the form contained in Exhibit A hereto. No service charge will be made for any transfer or exchange of Series 2017A Notes, but payment will be required of a sum sufficient to cover any tax or other governmental charge that may be imposed in connection therewith.

The transfer and exchange of beneficial interests in the Global Securities shall be effected through the Depositary, in accordance with this Seventeenth Supplemental Indenture (including applicable restrictions on transfer set forth herein, if any) and the procedures of the Depositary therefor.

Until the expiration of the Distribution Compliance Period, transfers by an owner of a beneficial interest in a Regulation S Global Note to a transferee who takes delivery of such interest through a Rule 144A Global Note will be made only upon receipt by the Trustee of a completed and executed Transfer Certificate in the form contained in Exhibit A hereto from the transferor of the beneficial interest to the effect that such transfer is being made to a person whom the transferor reasonably believes is a qualified institutional buyer (as defined in Rule 144A under the Securities Act) in a transaction meeting the requirements of Rule 144A and the requirements of applicable securities laws of any state of the United States or any other jurisdiction.

Transfers by an owner of a beneficial interest in the Rule 144A Global Note to a transferee who takes delivery through the Regulation S Global Note, whether before or after the expiration of the Distribution Compliance Period, will be made only upon receipt by the Trustee of a Transfer Certificate in the form contained in Exhibit A hereto from the transferor to the effect that such transfer is being made in accordance with Regulation S or Rule 144 under the Securities Act and that, if such transfer is being made prior to the expiration of the Distribution Compliance Period, the interest transferred will be held immediately thereafter through Euroclear Bank S.A./N.V., as operator of the Euroclear System or Clearstream Banking, société anonyme, Luxembourg.

Any beneficial interest in one of the Global Securities that is transferred to a person who takes delivery in the form of an interest in another Global Security will, upon transfer, cease to be an interest in the initial Global Security and will become an interest in the other Global Security and, accordingly, will thereafter be subject to all transfer restrictions, if any, and other procedures applicable to beneficial interests in such other Global Security for as long as it remains such an interest.

Transfers of beneficial interests between a Rule 144A Global Note and a Regulation S Global Note, and other transfers relating to beneficial interests in the Global Securities, shall be reflected by endorsements of the Trustee, as custodian for The Depository Trust Company, on the schedules attached to such Rule 144A Global Note and Regulation S Global Note.

Neither the Trustee, the Security Registrar nor any transfer agent shall have any obligation or duty to monitor, determine or inquire as to compliance with any restrictions on transfer imposed under the Indenture or under applicable law with respect to any transfer of any interest in any Series 2017A Note (including any transfers between or among Depositary participants, members or beneficial owners in any Global Security) other than to require delivery of such certificates and other documentation or evidence as are expressly required by, and to do so if and when expressly required by, the terms of the Indenture, and to examine the same to determine substantial compliance as to form with the express requirements hereof.

Neither the Company nor the Trustee shall have any liability for acts or omissions of the Depositary, for the Depositary records of beneficial interest, for any transactions between the Depositary, any participant member of the Depositary and/or beneficial owner of any interest in any Series 2017A Notes, or in respect of any transfers effected by the Depositary or by any participant member of the Depositary or any beneficial owner of any interest in any Series 2017A Notes held through any such participant member of the Depositary.

The Company shall not be required (a) to issue, register the transfer of or exchange any Series 2017A Notes during a period beginning at the opening of business fifteen (15) days before the date of the mailing of a notice pursuant to Section 1104 of the Original Indenture identifying the serial numbers of the Series 2017A Notes to be called for redemption, and ending at the close of business on the date of the mailing, or (b) to register the transfer of or exchange any Series 2017A Notes theretofore selected for redemption in whole or in part, except the unredeemed portion of any Series 2017A Notes redeemed in part.

SECTION 108. Redemption at the Company's Option. At any time and from time to time on or after December 20, 2018, the Series 2017A Notes will be subject to redemption, at the option of the Company, in whole or in part, upon not less than 15 nor more than 60 days' notice, at a redemption price equal to 100% of the principal amount of the Series 2017A Notes being redeemed plus accrued and unpaid interest on the Series 2017A Notes being redeemed to the Redemption Date.

If the Redemption Date is not a Business Day, the principal and interest due on that date will be payable on the next succeeding Business Day, and no interest shall accrue for the intervening period; provided, however, that if such next succeeding Business Day is in the next succeeding calendar year, such payment will be made on the immediately preceding Business Day.

In the event of redemption of the Series 2017A Notes in part only, a new Series 2017A Note or Notes for the unredeemed portion will be issued in the name or names of the Holders thereof upon the surrender thereof.

The Series 2017A Notes will not have a sinking fund.

Except as otherwise provided herein, notice of redemption shall be given as provided in Section 1104 of the Original Indenture.

Any redemption of less than all of the Series 2017A Notes shall, with respect to the principal thereof, be divisible by $1,000.

SECTION 109. Information to Holders. Upon the request of any Holder, any holder of a beneficial interest in the Series 2017A Notes, or the Trustee (on behalf of a Holder or a holder of a beneficial interest in the Series 2017A Notes), the Company will furnish such information as is specified in paragraph (d)(4) of Rule 144A promulgated under the 1933 Act to Holders (and to holders of beneficial interests in the Series 2017A Notes), to prospective purchasers of the Series 2017A Notes (and of beneficial interests in the Series 2017A Notes) who are qualified institutional buyers or to the Trustee for delivery to such Holder or prospective purchasers of the Series 2017A Notes or beneficial interests therein, as the case may be, unless, at the time of such request, the Company is subject to the reporting requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended.

Delivery of information to the Trustee pursuant to this Section 109 is for informational purposes only and the Trustee's receipt of such shall not constitute constructive notice of any information contained therein or determinable from information contained therein, including the Company's compliance with any of its covenants under the Indenture.

## ARTICLE 2

## MISCELLANEOUS PROVISIONS

SECTION 201. Recitals by Company. The recitals in this Seventeenth Supplemental Indenture are made by the Company only and not by the Trustee, and all of the provisions contained in the Original Indenture in respect of the rights, privileges, immunities, powers and duties of the Trustee shall be applicable in respect of Series 2017A Notes and of this Seventeenth Supplemental Indenture as fully and with like effect as if set forth herein in full.

SECTION 202. Ratification and Incorporation of Original Indenture. As supplemented hereby, the Original Indenture is in all respects ratified and confirmed, and the Original Indenture as supplemented by this Seventeenth Supplemental Indenture shall be read, taken and construed as one and the same instrument.

SECTION 203. Executed in Counterparts. This Seventeenth Supplemental Indenture may be simultaneously executed in several counterparts, each of which shall be deemed to be an original, and such counterparts shall together constitute but one and the same instrument.

SECTION 204. Legends. Except as determined by the Company in accordance with applicable law, each Series 2017A Note shall bear the applicable legends relating to restrictions on transfer pursuant to the securities laws in substantially the form set forth on Exhibit A hereto.

IN WITNESS WHEREOF, each party hereto has caused this instrument to be signed in its name and behalf by its duly authorized officer, all as of the day and year first above written.

FORM OF SERIES 2017A NOTE

[RULE 144A LEGEND FOR USE WITH RULE 144A GLOBAL NOTES]

NEITHER THIS NOTE NOR ANY BENEFICIAL INTEREST HEREIN HAS BEEN REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE “1933 ACT”). EACH HOLDER HEREOF, AND EACH OWNER OF A BENEFICIAL INTEREST HEREIN, BY PURCHASING THIS NOTE, AGREES FOR THE BENEFIT OF SOUTHERN POWER COMPANY (THE “COMPANY”) THAT THIS NOTE MAY NOT BE RESOLD, PLEDGED OR OTHERWISE TRANSFERRED PRIOR TO THE DATE WHICH IS SIX MONTHS (IF ALL APPLICABLE CONDITIONS TO SUCH RESALE UNDER RULE 144 UNDER THE 1933 ACT (OR ANY SUCCESSOR PROVISION THEREOF) ARE SATISFIED) AFTER THE LATER OF THE ORIGINAL ISSUANCE DATE THEREOF, THE ISSUANCE DATE OF ANY SUBSEQUENT ISSUANCE OF ADDITIONAL NOTES OF THE SAME SERIES AND THE LAST DATE ON WHICH THE COMPANY OR ANY AFFILIATE THEREOF WAS THE OWNER OF THIS NOTE OR THE EXPIRATION OF SUCH SHORTER PERIOD AS MAY BE PRESCRIBED BY SUCH RULE 144 (OR SUCH SUCCESSOR PROVISION) PERMITTING RESALES OF THIS NOTE WITHOUT ANY CONDITIONS (THE “RESALE RESTRICTION TERMINATION DATE”) OTHER THAN (A)(1) TO THE COMPANY, (2) IN A TRANSACTION ENTITLED TO AN EXEMPTION FROM REGISTRATION PROVIDED BY RULE 144 UNDER THE 1933 ACT (IF AVAILABLE), (3) SO LONG AS THIS NOTE IS ELIGIBLE FOR RESALE PURSUANT TO RULE 144A UNDER THE 1933 ACT (“RULE 144A”), TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER WITHIN THE MEANING OF RULE 144A PURCHASING FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER TO WHOM NOTICE IS GIVEN THAT THE RESALE, PLEDGE OR OTHER TRANSFER IS BEING MADE IN RELIANCE ON RULE 144A UNDER THE 1933 ACT (AS INDICATED BY THE BOX CHECKED BY THE TRANSFEROR ON THE CERTIFICATE OF TRANSFER ATTACHED TO THIS NOTE), (4) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR 904 OF REGULATION S UNDER THE 1933 ACT (AS INDICATED BY THE BOX CHECKED BY THE TRANSFEROR ON THE CERTIFICATE OF TRANSFER ATTACHED TO THIS NOTE), (5) IN ACCORDANCE WITH ANOTHER APPLICABLE EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE 1933 ACT (AND BASED UPON AN OPINION OF COUNSEL ACCEPTABLE TO THE COMPANY), OR (6) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE 1933 ACT AND (B) IN EACH CASE IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES. THE FOREGOING RESTRICTIONS ON RESALE WILL NOT APPLY SUBSEQUENT TO THE RESALE RESTRICTION TERMINATION DATE. THE HOLDER HEREOF, BY PURCHASING THIS NOTE, REPRESENTS AND AGREES FOR THE BENEFIT OF THE COMPANY THAT IT IS (i) A QUALIFIED INSTITUTIONAL BUYER WITHIN THE MEANING OF RULE 144A UNDER THE 1933 ACT OR (ii) A NON-U.S. PERSON OUTSIDE THE UNITED STATES WITHIN THE MEANING OF, OR AN ACCOUNT SATISFYING THE

REQUIREMENTS OF, PARAGRAPH (k)(2) OF RULE 902 UNDER REGULATION S UNDER THE 1933 ACT. THE HOLDER OF THIS NOTE ACKNOWLEDGES THAT THE COMPANY OR THE TRUSTEE RESERVES THE RIGHT PRIOR TO ANY OFFER, SALE OR OTHER TRANSFER (1) PURSUANT TO CLAUSE (A)(2) PRIOR TO THE RESALE RESTRICTION TERMINATION DATE TO REQUIRE THE DELIVERY OF AN OPINION OF COUNSEL, CERTIFICATIONS OR OTHER INFORMATION SATISFACTORY TO THE COMPANY AND THE TRUSTEE AND (2) IN EACH OF THE FOREGOING CASES, TO REQUIRE THAT A CERTIFICATE AS TO COMPLIANCE WITH CERTAIN CONDITIONS TO TRANSFER IS COMPLETED AND DELIVERED BY THE TRANSFEROR TO THE COMPANY AND THE TRUSTEE.

[REGULATION S LEGEND FOR USE WITH REGULATION S GLOBAL NOTES]

THE SECURITIES COVERED HEREBY HAVE NOT BEEN REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE “1933 ACT”), AND MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS (I) AS PART OF THEIR DISTRIBUTION AT ANY TIME OR (II) OTHERWISE UNTIL 40 DAYS AFTER THE LATER OF THE DATE OF THE COMMENCEMENT OF THE OFFERING OF THE SECURITIES AND THE DATE OF ORIGINAL ISSUANCE OF THE SECURITIES, EXCEPT IN EITHER CASE IN ACCORDANCE WITH REGULATION S OR RULE 144A UNDER THE 1933 ACT OR ANY OTHER AVAILABLE EXEMPTION FROM REGISTRATION UNDER THE 1933 ACT. TERMS USED ABOVE HAVE THE MEANINGS GIVEN TO THEM BY REGULATION S.

DUE DECEMBER 20, 2020

| | |
|---|---|
| Initial Principal Amount: | $_____________ |
| Regular Record Date: | 15th calendar day prior to the applicable Interest Payment Date (whether or not a Business Day) |
| Original Issue Date: | November 20, 2017 |
| Stated Maturity: | December 20, 2020; provided that if the Stated Maturity is not a Business Day, the principal and interest due on that date will be payable on the next succeeding Business Day, and no interest shall accrue for the intervening period; provided further that if such next succeeding Business Day is in the next succeeding calendar year, such payment will be made on the immediately preceding Business Day. |
| Interest Payment Dates: | 20 th day of March, June, September and December; provided, however, in the event that any Interest Payment Date (other than the Interest Payment Date that is the Stated Maturity) would otherwise be a day that is not a Business Day, the Interest Payment Date will be the next succeeding Business Day |
| Interest Rate: | One-Month LIBOR (for the initial Interest Period) and Three-Month LIBOR (for subsequent Interest Periods), in each case plus 0.55% per annum and as set on each Interest Determination Date |
| Authorized Denominations: | $2,000 or any integral multiple of $1,000 in excess thereof |

Southern Power Company, a Delaware corporation (the "Company," which term includes any successor corporation under the Indenture referred to on the reverse hereof), for value received, hereby promises to pay to ___________________________________, or registered assigns, the principal sum of _______________________________ DOLLARS ($__________), or such other amount as indicated on the Schedule of Increases or Decreases in Global Security attached hereto as Schedule I, on the Stated Maturity shown above (or upon earlier redemption), and to pay interest thereon from the Original Issue Date shown above, or from the most recent Interest Payment Date to which interest has been paid or duly provided for, quarterly in arrears on each Interest Payment Date as specified above, commencing on December 20, 2017 and on the Stated Maturity (or upon earlier redemption) at the rates per annum determined in accordance with the provisions specified below until the principal hereof is paid or made available for payment and at such rates on any overdue principal and on any overdue installment of interest. The interest so payable, and punctually paid or duly provided for, on any Interest Payment Date (other than an Interest Payment Date that is the Stated Maturity or on a Redemption Date) will, as provided in such Indenture, be paid to the Person in whose name this Note (the "Note") is registered at the close of business on the Regular Record Date as specified above next preceding such Interest Payment Date, provided that any interest payable at the Stated Maturity or on any Redemption Date will be paid to the Person to whom principal is payable. Except as otherwise provided in the Indenture, any such interest not so punctually paid or duly provided for will forthwith cease to be payable to the Holder on such Regular Record Date and may either be paid to the Person in whose name this Note is registered at the close of business on a Special Record Date for the payment of such defaulted interest to be fixed by the Trustee, notice whereof shall be given to Holders of Notes of this series not less than 10 days prior to such Special Record Date, or be paid at any time in any other lawful manner not inconsistent with the requirements of any securities exchange, if any, on which the Notes of this series shall be listed, and upon such notice as may be required by any such exchange, all as more fully provided in the Indenture.

The Series 2017A Notes (as defined on the reverse hereof) will bear interest for each Interest Period at a per annum rate determined by the Calculation Agent, subject to the maximum interest rate permitted by New York or other applicable state law, as such law may be modified by United States law of general application. The interest rate applicable during each Interest Period (other than the initial Interest Period) will be equal to Three-Month LIBOR on the Interest Determination Date for such Interest Period plus 0.55%. The interest rate applicable during the initial Interest Period will be equal to One-Month LIBOR on the Interest Determination Date for the initial Interest Period (the second London Business Day prior to the Original Issue Date) plus 0.55%. In no event shall the applicable interest rate be less than 0% for any Interest Period. Promptly upon such determination, the Calculation Agent will notify the Company and the Trustee, if the Trustee is not then serving as the Calculation Agent, of the interest rate for the new Interest Period. The interest rate determined by the Calculation Agent, absent manifest error, shall be binding and conclusive upon the beneficial owners and Holders of the Series 2017A Notes, the Company and the Trustee.

"Calculation Agent" means The Wells Fargo Bank, National Association, or its successor appointed by the Company, acting as calculation agent.

"Interest Determination Date" means the second London Business Day immediately preceding the first day of the relevant Interest Period.

"Interest Period" means the period commencing on an Interest Payment Date (or, with respect to the initial Interest Period only, commencing on the Original Issue Date) and ending on the day before the next succeeding Interest Payment Date.

"London Business Day" means a day that is a Business Day and a day on which dealings in deposits in U.S. dollars are transacted, or with respect to any future date are expected to be transacted, in the London interbank market.

"One-Month LIBOR" means, with respect to the initial Interest Period, the rate (expressed as a percentage per annum) for deposits in U.S. dollars having an index maturity of one month that appears on Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for the initial Interest Period. If such rate does not appear on the Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for the initial Interest Period, One-Month LIBOR will be determined on the basis of the rates at which deposits in U.S. dollars for the initial Interest Period and in a principal amount of not less than $1,000,000 are offered to prime banks in the London interbank market by four major banks in the London interbank market (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., London time, on the Interest Determination Date for the initial Interest Period. The Calculation Agent will request the principal London office of each such bank to provide a quotation of its rate. If at least two such quotations are provided, One-Month LIBOR with respect to the initial Interest Period will be the arithmetic mean of such quotations. If fewer than two quotations are provided, One-Month LIBOR with respect to the initial Interest Period will be the arithmetic mean of the rates quoted by three major banks in New York City (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., New York City time, on the Interest Determination Date for the initial Interest Period for loans in U.S. dollars to leading European banks for the initial Interest Period and in a principal amount of not less than $1,000,000.

"Reuters LIBOR01 Page" means the display designated as Reuters LIBOR01 on the Reuters service (or such other page as may replace the Reuters LIBOR01 Page on that service, or such other service as may be nominated as the information vendor, for the purpose of displaying rates or prices comparable to the London Interbank Offered rate for U.S. dollar deposits).

"Three-Month LIBOR" means, with respect to any Interest Period, the rate (expressed as a percentage per annum) for deposits in U.S. dollars having an index maturity of three months that appears on Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for that Interest Period. If such rate does not appear on the Reuters LIBOR01 Page as of 11:00 a.m. (London time) on the Interest Determination Date for that Interest Period, Three-Month LIBOR will be determined on the basis of the rates at which deposits in U.S. dollars for the Interest Period and in a principal amount of not less than $1,000,000 are offered to prime banks in the London interbank market by four major banks in the London interbank market (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., London time, on the Interest Determination Date for that Interest Period. The Calculation Agent will request the principal London office of each such bank to provide a quotation of its rate. If at least two such quotations are provided, Three-Month LIBOR with respect to that Interest Period will be the arithmetic mean of such quotations. If fewer than two quotations are provided, Three-Month LIBOR with respect to that Interest Period will be the arithmetic mean of the rates quoted by three major banks in New York City (which may include affiliates of one or more of the underwriters of the Series 2017A Notes) selected by the Company, at approximately 11:00 a.m., New York City time, on the Interest Determination Date for that Interest Period for loans in U.S. dollars to leading European banks for that Interest Period and in a principal amount of not less than $1,000,000. However, if fewer than three banks selected by the Company to provide quotations are quoting as described above, Three-Month LIBOR for that Interest Period will be the same as the rate determined for the previous Interest Period.

Payments of interest on this Note will include interest accrued to but excluding the respective Interest Payment Dates. Interest payments for this Note shall be computed and paid on the basis of the actual number of days elapsed over a 360-day year. A “Business Day” shall mean any day other than a Saturday or a Sunday or a day on which banking institutions in New York City are authorized or required by law or executive order to remain closed or a day on which the Corporate Trust Office of the Trustee is closed for business.

Payment of the principal of and interest due at the Stated Maturity or earlier redemption of the Series 2017A Notes shall be made upon surrender of the Series 2017A Notes at the Corporate Trust Office of the Trustee. The principal of and interest on the Series 2017A Notes shall be paid in such coin or currency of the United States of America as at the time of payment is legal tender for payment of public and private debts. Payment of interest (including interest on an Interest Payment Date) will be made, subject to such surrender where applicable, at the option of the Company, (i) by check mailed to the address of the Person entitled thereto as such address shall appear in the Security Register or (ii) by wire transfer or other electronic transfer at such place and to such account at a banking institution in the United States as may be designated in writing to the Trustee at least 16 days prior to the date for payment by the Person entitled thereto.

REFERENCE IS HEREBY MADE TO THE FURTHER PROVISIONS OF THIS NOTE SET FORTH ON THE REVERSE HEREOF, WHICH FURTHER PROVISIONS SHALL FOR ALL PURPOSES HAVE THE SAME EFFECT AS IF SET FORTH AT THIS PLACE.

Unless the certificate of authentication hereon has been executed by the Trustee by manual signature, this Note shall not be entitled to any benefit under the Indenture or be valid or obligatory for any purpose.

IN WITNESS WHEREOF, the Company has caused this instrument to be duly executed under its corporate seal.

CERTIFICATE OF AUTHENTICATION

This is one of the Senior Notes referred to in the within-mentioned Indenture.

WELLS FARGO BANK, NATIONAL
ASSOCIATION, as Trustee

Dated: By: ______________________________

Authorized Signatory

(Reverse Side of Note)

This Note is one of a duly authorized issue of Senior Notes of the Company (the "Notes"), issued and issuable in one or more series under a Senior Note Indenture (the "Original Indenture"), dated as of June 1, 2002, as amended and supplemented, including by a Seventeenth Supplemental Indenture dated as of November 20, 2017 (the "Indenture"), between the Company and Wells Fargo Bank, National Association (as successor to The Bank of New York Mellon (formerly known as The Bank of New York)), as Trustee (the "Trustee," which term includes any successor trustee under the Indenture), to which Indenture and all indentures incidental thereto reference is hereby made for a statement of the respective rights, limitation of rights, duties and immunities thereunder of the Company, the Trustee and the Holders of the Notes issued thereunder and of the terms upon which said Notes are, and are to be, authenticated and delivered. This Note is one of the series designated on the face hereof as Series 2017A Floating Rate Senior Notes due December 20, 2020 (the "Series 2017A Notes") which is unlimited in aggregate principal amount. Capitalized terms used herein for which no definition is provided herein shall have the meanings set forth in the Indenture.

At any time and from time to time on or after December 20, 2018, the Series 2017A Notes will be subject to redemption, at the option of the Company, in whole or in part, upon not less than 15 nor more than 60 days' notice, at a redemption price equal to 100% of the principal amount of the Series 2017A Notes being redeemed plus accrued and unpaid interest on the Series 2017A Notes being redeemed to the Redemption Date.

If the Redemption Date is not a Business Day, the principal and interest due on that date will be payable on the next succeeding Business Day, and no interest shall accrue for the intervening period; provided, however, that if such next succeeding Business Day is in the next succeeding calendar year, such payment will be made on the immediately preceding Business Day.

In the event of redemption of this Note in part only, a new Note or Notes of this series for the unredeemed portion hereof will be issued in the name of the Holder hereof upon the surrender hereof. The Series 2017A Notes will not have a sinking fund.

If an Event of Default with respect to the Notes of this series shall occur and be continuing, the principal of the Notes of this series may be declared due and payable in the manner, with the effect and subject to the conditions provided in the Indenture.

The Indenture permits, with certain exceptions as therein provided, the amendment thereof and the modification of the rights and obligations of the Company and the rights of the Holders of the Notes of each series to be affected under the Indenture at any time by the Company and the Trustee with the consent of the Holders of not less than a majority in principal amount of the Notes at the time Outstanding of each series to be affected. The Indenture also contains provisions permitting the Holders of specified percentages in principal amount of the Notes of each series at the time Outstanding, on behalf of the Holders of all Notes of such series, to waive compliance by the Company with certain provisions of the Indenture and certain past defaults under the Indenture and their consequences. Any such consent or waiver by the Holder of this Note shall be conclusive and binding upon such Holder and upon all future Holders of this Note and of any Note issued upon the registration of transfer hereof or in exchange hereof or in lieu hereof, whether or not notation of such consent or waiver is made upon this Note.

No reference herein to the Indenture and no provision of this Note or of the Indenture shall alter or impair the obligation of the Company, which is absolute and unconditional, to pay the principal of and interest on this Note at the times, place and rates, and in the coin or currency, herein prescribed.

As provided in the Indenture and subject to certain limitations therein set forth, the transfer of this Note is registrable in the Security Register, upon surrender of this Note for registration of transfer at the office or agency of the Company for such purpose, duly endorsed by, or accompanied by a written instrument of transfer in form satisfactory to the Company and the Security Registrar and duly executed by, the Holder hereof or his attorney duly authorized in writing, together with the completed and executed Transfer Certificate attached hereto (as applicable), and thereupon one or more new Notes of this series, of authorized denominations and of like tenor and for the same aggregate principal amount, will be issued to the designated transferee or transferees. No service charge shall be made for any such registration of transfer or exchange, but the Company may require payment of a sum sufficient to cover any tax or other governmental charge payable in connection therewith.

Prior to due presentment of this Note for registration of transfer, the Company, the Trustee and any agent of the Company or the Trustee may treat the Person in whose name this Note is registered as the owner hereof for all purposes, whether or not this Note be overdue, and neither the Company, the Trustee nor any such agent shall be affected by notice to the contrary.

The Notes of this series are issuable only in registered form without coupons in denominations of $2,000 and any integral multiple of $1,000 in excess thereof. As provided in the Indenture and subject to certain limitations therein set forth, Notes of this series are exchangeable for a like aggregate principal amount of Notes of this series of a different authorized denomination, as requested by the Holder surrendering the same upon surrender of the Note or Notes to be exchanged at the office or agency of the Company.

This Note shall be governed by, and construed in accordance with, the internal laws of the State of New York.

**ABBREVIATIONS**

The following abbreviations, when used in the inscription on the face of this instrument, shall be construed as though they were written out in full according to applicable laws or regulations:

TRANSFER CERTIFICATE

In connection with any transfer of any of the Series 2017A Notes evidenced by this certificate [prior to the expiration of the Distribution Compliance Period] [2], the undersigned confirms that such Series 2017A Notes are being:

CHECK ONE BOX BELOW

(1) ☐ exchanged for the undersigned’s own account without transfer; or

(2) ☐ transferred to the Company; or

(3) ☐ transferred to a person whom the undersigned reasonably believes is a “qualified institutional buyer” within the meaning of Rule 144A under the Securities Act of 1933, as amended (the “1933 Act”), purchasing for its own account or for the account of a “qualified institutional buyer” to whom notice is given that the resale, pledge or other transfer is being made in reliance on Rule 144A under the 1933 Act; or

(4) ☐ transferred pursuant to an exemption under Rule 144 under the 1933 Act; or

(5) ☐ transferred in an offshore transaction in accordance with Rule 903 or Rule 904 of Regulation S under the 1933 Act; or

(6) ☐ transferred pursuant to another available exemption from the registration requirements of the 1933 Act; or

(7) ☐ transferred pursuant to an effective registration statement under the 1933 Act.

Unless one of the boxes is checked, the Trustee will refuse to register any of the Series 2017A Notes evidenced by this certificate in the name of any person other than the registered Holder thereof; provided, however, that if box (4) or (6) is checked, the Company may require, prior to registering any such transfer of the Series 2017A Notes, such legal opinions, certifications and other information as the Company has reasonably requested to confirm that such transfer is being made pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the 1933 Act, such as the exemption provided by Rule 144 under the 1933 Act; provided, further, that if box (3) is checked, the transferee must certify that it is a qualified institutional buyer as defined in Rule 144A.

THIS SUPPLEMENTAL INDENTURE, made as of July 27, 2017 and effective August 10, 2017, between NORTHERN ILLINOIS GAS COMPANY, a corporation organized and existing under the laws of the State of Illinois (hereinafter called the " **Company** "), and THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A. (hereinafter called the " **Trustee** "), as successor Trustee under an Indenture dated as of January 1, 1954, as modified by the Indenture of Adoption, dated February 9, 1954 and the Indenture of Release, dated February 9, 1954, and as supplemented by Supplemental Indentures dated (or made effective) April 1, 1956, June 1, 1959, July 1, 1960, June 1, 1963, July 1, 1963, August 1, 1964, August 1, 1965, May 1, 1966, August 1, 1966, July 1, 1967, June 1, 1968, December 1, 1969, August 1, 1970, June 1, 1971, July 1, 1972, July 1, 1973, April 1, 1975, April 30, 1976 (two Supplemental Indentures bearing that date), July 1, 1976, August 1, 1976, December 1, 1977, January 15, 1979, December 1, 1981, March 1, 1983, October 1, 1984, December 1, 1986, March 15, 1988, July 1, 1988, July 1, 1989, July 15, 1990, August 15, 1991, July 15, 1992, February 1, 1993, March 15, 1993, May 1, 1993, July 1, 1993, August 15, 1994, October 15, 1995, May 10, 1996, August 1, 1996, June 1, 1997, October 15, 1997, February 15, 1998, June 1, 1998, February 1, 1999, February 1, 2001, May 15, 2001, August 15, 2001, December 15, 2001, December 1, 2003 (three Supplemental Indentures bearing that date), December 15, 2006, August 15, 2008, July 30, 2009, February 1, 2011, October 26, 2012 and June 23, 2016, such Indenture dated as of January 1, 1954, as so modified and supplemented, being hereinafter called the " **Indenture** ."

WITNESSETH:

WHEREAS, the Indenture provides for the issuance from time to time thereunder, in series, of bonds of the Company for the purposes and subject to the limitations therein specified; and

WHEREAS, the Company desires, by this Supplemental Indenture, to create four additional series of bonds to be issuable under the Indenture, such bonds to be designated, respectively, (a) "First Mortgage Bonds 3.03% Series due August 10, 2027" (hereinafter called the " **2027 Series** "), (b) "First Mortgage Bonds 3.62% Series due August 10, 2037" (hereinafter called the " **2037 Series** "), (c) "First Mortgage Bonds 3.85% due August 10, 2047" (hereinafter called the " **2047 Series** "), and (d) "First Mortgage Bonds 4.00% due August 10, 2057" (hereinafter called the " **2057 Series** " the 2027 Series, the 2037 Series, the 2047 Series and the 2057 Series, hereinafter called, collectively, the " **bonds of this Supplemental Indenture** "), and the terms and provisions to be contained in the bonds of this Supplemental Indenture or to be otherwise applicable thereto to be as set forth in this Supplemental Indenture; and

WHEREAS, the forms, respectively, of the bonds of this Supplemental Indenture, and the Trustee's certificate to be endorsed on all bonds of this Supplemental Indenture, are to be substantially as follows:

[Remainder of Page Intentionally Left Blank]

(FORM OF FACE OF BOND OF 2027 SERIES)

NO. RU-2017-A-__ $________

Ill. Commerce Commission No. 6727 and 6728 CUSIP No. 665228 D@8

**NORTHERN ILLINOIS GAS COMPANY**

**First Mortgage Bond 3.03% Series due August 10, 2027**

NORTHERN ILLINOIS GAS COMPANY, an Illinois corporation (hereinafter called the " **Company** "), for value received, hereby promises to pay to or registered assigns, the sum of Dollars, on August 10, 2027, and to pay to the registered owner hereof interest on said sum from the date hereof until said sum shall be paid, at the rate of 3.03% per annum, payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning on February 10, 2018. Both the principal of and the interest on this bond shall be payable at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of the registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, in any coin or currency of the United States of America which at the time of payment is legal tender for the payment of public and private debts. Any installment of interest on this bond may, at the Company's option, be paid by mailing checks for such interest payable to or upon the written order of the person entitled thereto to the address of such person as it appears on the registration books.

So long as there is no existing default in the payment of interest on this bond, the interest so payable on any interest payment date will be paid to the person in whose name this bond is registered on January 26 or July 26 (whether or not a business day), as the case may be, next preceding such interest payment date. If and to the extent that the Company shall default in the payment of interest due on such interest payment date, such defaulted interest shall be paid to the person in whose name this bond is registered on the record date fixed, in advance, by the Company for the payment of such defaulted interest.

Additional provisions of this bond are set forth on the reverse hereof.

This bond shall not be entitled to any security or benefit under the Indenture or be valid or become obligatory for any purpose unless and until it shall have been authenticated by the execution by the Trustee, or its successor in trust under the Indenture, of the certificate endorsed hereon.

IN WITNESS WHEREOF, Northern Illinois Gas Company has caused this bond to be executed in its name by its , manually or by facsimile signature, and has caused its corporate seal to be impressed hereon or a facsimile thereof to be imprinted hereon and to be attested by its , manually or by facsimile signature.

Dated: August 10, 2017

**NORTHERN ILLINOIS GAS COMPANY**

ATTEST:

______________________________________

(FORM OF TRUSTEE'S CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds of the 2027 Series designated therein, referred to and described in the within-mentioned Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017.

**THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A.,**
**TRUSTEE**

By:________________________________________

*Authorized Officer*

Dated: August 10, 2017

(FORM OF REVERSE SIDE OF BOND OF 2027 SERIES)

This bond is one, of the series hereinafter specified, of the bonds issued and to be issued in series from time to time under and in accordance with and secured by an Indenture dated as of January 1, 1954, to The Bank of New York Mellon Trust Company, N.A., as Trustee, as supplemented by certain indentures supplemental thereto, executed and delivered to the Trustee; and this bond is one of a series of such bonds, designated "Northern Illinois Gas Company First Mortgage Bond 3.03% Series due August 10, 2027" (herein called " **bonds of this Series** "), the issuance of which is provided for by a Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017 (hereinafter called the " **Supplemental Indenture** "), executed and delivered by the Company to the Trustee. The term " **Indenture** ", as hereinafter used, means said Indenture dated as of January 1, 1954, and all indentures supplemental thereto (including, without limitation, the Supplemental Indenture) from time to time in effect. Reference is made to the Indenture for a description of the property mortgaged and pledged, the nature and extent of the security, the rights of the holders and registered owners of said bonds, of the Company and of the Trustee in respect of the security, and the terms and conditions governing the issuance and security of said bonds.

Any transferee, by its acceptance of a bond registered in its name (or the name of its nominee), shall be deemed to have made the representation set forth in Section 6.2 of the Bond Purchase Agreement dated as of July 27, 2017 among the Company and the purchasers listed on Schedule A attached thereto, as amended, restated, supplemented or otherwise modified from time to time.

With the consent of the Company and to the extent permitted by and as provided in the Indenture, modifications or alterations of the Indenture or of any supplemental indenture and of the rights and obligations of the Company and of the holders and registered owners of the bonds may be made, and compliance with any provision of the Indenture or of any supplemental indenture may be waived, by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds then outstanding under the Indenture, and by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds of any series then outstanding under the Indenture and affected by such modification or alteration, in case one or more but less than all of the series of bonds then outstanding under the Indenture are so affected, but in any case excluding bonds disqualified from voting by reason of the Company's interest therein as provided in the Indenture; subject, however, to the condition, among other conditions stated in the Indenture, that no such modification or alteration shall be made which, among other things, will permit the extension of the time or times of payment of the principal of or the interest or the premium, if any, on this bond, or the reduction in the principal amount hereof or in the rate of interest or the amount of any premium hereon, or any other modification in the terms of payment of such principal, interest or premium, which terms of payment are unconditional, or, otherwise than as permitted by the Indenture, the creation of any lien ranking prior to or on a parity with the lien of the Indenture with respect to any of the mortgaged property, all as more fully provided in the Indenture.

The bonds of this Series may be called for redemption by the Company, as a whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the bonds of this Series to be redeemed plus accrued and unpaid interest on the principal amount being redeemed to the date of redemption and the Make-Whole Amount (as defined in the Supplemental Indenture) applicable thereto.

Notice of each redemption shall be mailed to all registered owners not less than thirty nor more than forty-five days before the redemption date.

In case of certain completed defaults specified in the Indenture, the principal of this bond may be declared or may become due and payable in the manner and with the effect provided in the Indenture.

No recourse shall be had for the payment of the principal of or the interest or the premium, if any, on this bond, or for any claim based hereon, or otherwise in respect hereof or of the Indenture, to or against any incorporator, stockholder, officer or director, past, present or future, of the Company or of any predecessor or successor corporation, either directly or through the Company or such predecessor or successor corporation, under any constitution or statute or rule of law, or by the enforcement of any assessment or penalty, or otherwise, all such liability of incorporators, stockholders, directors and officers being waived and released by the registered owner hereof by the acceptance of this bond and being likewise waived and released by the terms of the Indenture, all as more fully provided therein.

This bond is transferable by the registered owner hereof, in person or by duly authorized attorney, at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, upon surrender and cancellation of this bond; and thereupon a new registered bond or bonds without coupons of the same aggregate principal amount and series will, upon the payment of any transfer tax or taxes payable, be issued to the transferee in exchange herefor. The Company shall not be required to exchange or transfer this bond if this bond or a portion hereof has been selected for redemption.

The security represented by this certificate has not been registered under the Securities Act of 1933, as amended (the " **Securities Act** "), or qualified under any state securities laws and may not be transferred, sold or otherwise disposed of except while a registration statement is in effect or pursuant to an available exemption from registration under the Securities Act and applicable state securities laws.

NO. RU-2017-B-__ $________

Ill. Commerce Commission No. 6727 and 6728 CUSIP No. 665228 D#6

**NORTHERN ILLINOIS GAS COMPANY**

**First Mortgage Bond 3.62% Series due August 10, 2037**

NORTHERN ILLINOIS GAS COMPANY, an Illinois corporation (hereinafter called the " **Company** "), for value received, hereby promises to pay to or registered assigns, the sum of Dollars, on August 10, 2037, and to pay to the registered owner hereof interest on said sum from the date hereof until said sum shall be paid, at the rate of 3.62% per annum, payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning on February 10, 2018. Both the principal of and the interest on this bond shall be payable at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of the registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, in any coin or currency of the United States of America which at the time of payment is legal tender for the payment of public and private debts. Any installment of interest on this bond may, at the Company's option, be paid by mailing checks for such interest payable to or upon the written order of the person entitled thereto to the address of such person as it appears on the registration books.

So long as there is no existing default in the payment of interest on this bond, the interest so payable on any interest payment date will be paid to the person in whose name this bond is registered on January 26 or July 26 (whether or not a business day), as the case may be, next preceding such interest payment date. If and to the extent that the Company shall default in the payment of interest due on such interest payment date, such defaulted interest shall be paid to the person in whose name this bond is registered on the record date fixed, in advance, by the Company for the payment of such defaulted interest.

Additional provisions of this bond are set forth on the reverse hereof.

This bond shall not be entitled to any security or benefit under the Indenture or be valid or become obligatory for any purpose unless and until it shall have been authenticated by the execution by the Trustee, or its successor in trust under the Indenture, of the certificate endorsed hereon.

IN WITNESS WHEREOF, Northern Illinois Gas Company has caused this bond to be executed in its name by its , manually or by facsimile signature, and has caused its corporate seal to be impressed hereon or a facsimile thereof to be imprinted hereon and to be attested by its , manually or by facsimile signature.

(FORM OF TRUSTEE'S CERTIFICATE OF AUTHENTICATION)

This bond is one of the bonds of the 2037 Series designated therein, referred to and described in the within-mentioned Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017.

**THE BANK OF NEW YORK MELLON TRUST COMPANY, N.A.,**
**TRUSTEE**

By:________________________________________
*Authorized Officer*

Dated: August 10, 2017

(FORM OF REVERSE SIDE OF BOND OF 2037 SERIES)

This bond is one, of the series hereinafter specified, of the bonds issued and to be issued in series from time to time under and in accordance with and secured by an Indenture dated as of January 1, 1954, to The Bank of New York Mellon Trust Company, N.A., as Trustee, as supplemented by certain indentures supplemental thereto, executed and delivered to the Trustee; and this bond is one of a series of such bonds, designated “Northern Illinois Gas Company First Mortgage Bond 3.62% Series due August 10, 2037” (herein called “ **bonds of this Series** ”), the issuance of which is provided for by a Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017 (hereinafter called the “ **Supplemental Indenture** ”), executed and delivered by the Company to the Trustee. The term “ **Indenture** ”, as hereinafter used, means said Indenture dated as of January 1, 1954, and all indentures supplemental thereto (including, without limitation, the Supplemental Indenture) from time to time in effect. Reference is made to the Indenture for a description of the property mortgaged and pledged, the nature and extent of the security, the rights of the holders and registered owners of said bonds, of the Company and of the Trustee in respect of the security, and the terms and conditions governing the issuance and security of said bonds.

Any transferee, by its acceptance of a bond registered in its name (or the name of its nominee), shall be deemed to have made the representation set forth in Section 6.2 of the Bond Purchase Agreement dated as of July 27, 2017 among the Company and the purchasers listed on Schedule A attached thereto, as amended, restated, supplemented or otherwise modified from time to time.

With the consent of the Company and to the extent permitted by and as provided in the Indenture, modifications or alterations of the Indenture or of any supplemental indenture and of the rights and obligations of the Company and of the holders and registered owners of the bonds may be made, and compliance with any provision of the Indenture or of any supplemental indenture may be waived, by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds then outstanding under the Indenture, and by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds of any series then outstanding under the Indenture and affected by such modification or alteration, in case one or more but less than all of the series of bonds then outstanding under the Indenture are so affected, but in any case excluding bonds disqualified from voting by reason of the Company’s interest therein as provided in the Indenture; subject, however, to the condition, among other conditions stated in the Indenture, that no such modification or alteration shall be made which, among other things, will permit the extension of the time or times of payment of the principal of or the interest or the premium, if any, on this bond, or the reduction in the principal amount hereof or in the rate of interest or the amount of any premium hereon, or any other modification in the terms of payment of such principal, interest or premium, which terms of payment are unconditional, or, otherwise than as permitted by the Indenture, the creation of any lien ranking prior to or on a parity with the lien of the Indenture with respect to any of the mortgaged property, all as more fully provided in the Indenture.

The bonds of this Series may be called for redemption by the Company, as a whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the bonds of this Series to be redeemed plus accrued and unpaid interest on the principal amount being redeemed to the date of redemption and the Make-Whole Amount (as defined in the Supplemental Indenture) applicable thereto.

Notice of each redemption shall be mailed to all registered owners not less than thirty nor more than forty-five days before the redemption date.

In case of certain completed defaults specified in the Indenture, the principal of this bond may be declared or may become due and payable in the manner and with the effect provided in the Indenture.

No recourse shall be had for the payment of the principal of or the interest or the premium, if any, on this bond, or for any claim based hereon, or otherwise in respect hereof or of the Indenture, to or against any incorporator, stockholder, officer or director, past, present or future, of the Company or of any predecessor or successor corporation, either directly or through the Company or such predecessor or successor corporation, under any constitution or statute or rule of law, or by the enforcement of any assessment or penalty, or otherwise, all such liability of incorporators, stockholders, directors and officers being waived and released by the registered owner hereof by the acceptance of this bond and being likewise waived and released by the terms of the Indenture, all as more fully provided therein.

This bond is transferable by the registered owner hereof, in person or by duly authorized attorney, at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, upon surrender and cancellation of this bond; and thereupon a new registered bond or bonds without coupons of the same aggregate principal amount and series will, upon the payment of any transfer tax or taxes payable, be issued to the transferee in exchange herefor. The Company shall not be required to exchange or transfer this bond if this bond or a portion hereof has been selected for redemption.

The security represented by this certificate has not been registered under the Securities Act of 1933, as amended (the " **Securities Act** "), or qualified under any state securities laws and may not be transferred, sold or otherwise disposed of except while a registration statement is in effect or pursuant to an available exemption from registration under the Securities Act and applicable state securities laws.

Dated: November 1, 2017

(FORM OF REVERSE SIDE OF BOND OF 2047 SERIES)

This bond is one, of the series hereinafter specified, of the bonds issued and to be issued in series from time to time under and in accordance with and secured by an Indenture dated as of January 1, 1954, to The Bank of New York Mellon Trust Company, N.A., as Trustee, as supplemented by certain indentures supplemental thereto, executed and delivered to the Trustee; and this bond is one of a series of such bonds, designated "Northern Illinois Gas Company First Mortgage Bond 3.85% Series due August 10, 2047" (herein called " **bonds of this Series** "), the issuance of which is provided for by a Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017 (hereinafter called the " **Supplemental Indenture** "), executed and delivered by the Company to the Trustee. The term " **Indenture** ", as hereinafter used, means said Indenture dated as of January 1, 1954, and all indentures supplemental thereto (including, without limitation, the Supplemental Indenture) from time to time in effect. Reference is made to the Indenture for a description of the property mortgaged and pledged, the nature and extent of the security, the rights of the holders and registered owners of said bonds, of the Company and of the Trustee in respect of the security, and the terms and conditions governing the issuance and security of said bonds.

Any transferee, by its acceptance of a bond registered in its name (or the name of its nominee), shall be deemed to have made the representation set forth in Section 6.2 of the Bond Purchase Agreement dated as of July 27, 2017 among the Company and the purchasers listed on Schedule A attached thereto, as amended, restated, supplemented or otherwise modified from time to time.

With the consent of the Company and to the extent permitted by and as provided in the Indenture, modifications or alterations of the Indenture or of any supplemental indenture and of the rights and obligations of the Company and of the holders and registered owners of the bonds may be made, and compliance with any provision of the Indenture or of any supplemental indenture may be waived, by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds then outstanding under the Indenture, and by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds of any series then outstanding under the Indenture and affected by such modification or alteration, in case one or more but less than all of the series of bonds then outstanding under the Indenture are so affected, but in any case excluding bonds disqualified from voting by reason of the Company's interest therein as provided in the Indenture; subject, however, to the condition, among other conditions stated in the Indenture, that no such modification or alteration shall be made which, among other things, will permit the extension of the time or times of payment of the principal of or the interest or the premium, if any, on this bond, or the reduction in the principal amount hereof or in the rate of interest or the amount of any premium hereon, or any other modification in the terms of payment of such principal, interest or premium, which terms of payment are unconditional, or, otherwise than as permitted by the Indenture, the creation of any lien ranking prior to or on a parity with the lien of the Indenture with respect to any of the mortgaged property, all as more fully provided in the Indenture.

The bonds of this Series may be called for redemption by the Company, as a whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the bonds of this Series to be redeemed plus accrued and unpaid interest on the principal amount being redeemed to the date of redemption and the Make-Whole Amount (as defined in the Supplemental Indenture) applicable thereto.

Notice of each redemption shall be mailed to all registered owners not less than thirty nor more than forty-five days before the redemption date.

In case of certain completed defaults specified in the Indenture, the principal of this bond may be declared or may become due and payable in the manner and with the effect provided in the Indenture.

No recourse shall be had for the payment of the principal of or the interest or the premium, if any, on this bond, or for any claim based hereon, or otherwise in respect hereof or of the Indenture, to or against any incorporator, stockholder, officer or director, past, present or future, of the Company or of any predecessor or successor corporation, either directly or through the Company or such predecessor or successor corporation, under any constitution or statute or rule of law, or by the enforcement of any assessment or penalty, or otherwise, all such liability of incorporators, stockholders, directors and officers being waived and released by the registered owner hereof by the acceptance of this bond and being likewise waived and released by the terms of the Indenture, all as more fully provided therein.

This bond is transferable by the registered owner hereof, in person or by duly authorized attorney, at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, upon surrender and cancellation of this bond; and thereupon a new registered bond or bonds without coupons of the same aggregate principal amount and series will, upon the payment of any transfer tax or taxes payable, be issued to the transferee in exchange herefor. The Company shall not be required to exchange or transfer this bond if this bond or a portion hereof has been selected for redemption.

The security represented by this certificate has not been registered under the Securities Act of 1933, as amended (the " **Securities Act** "), or qualified under any state securities laws and may not be transferred, sold or otherwise disposed of except while a registration statement is in effect or pursuant to an available exemption from registration under the Securities Act and applicable state securities laws.

Dated: November 1, 2017

(FORM OF REVERSE SIDE OF BOND OF 2057 SERIES)

This bond is one, of the series hereinafter specified, of the bonds issued and to be issued in series from time to time under and in accordance with and secured by an Indenture dated as of January 1, 1954, to The Bank of New York Mellon Trust Company, N.A., as Trustee, as supplemented by certain indentures supplemental thereto, executed and delivered to the Trustee; and this bond is one of a series of such bonds, designated “Northern Illinois Gas Company First Mortgage Bond 4.00% Series due August 10, 2057” (herein called “ **bonds of this Series** ”), the issuance of which is provided for by a Supplemental Indenture dated as of July 27, 2017, effective August 10, 2017 (hereinafter called the “ **Supplemental Indenture** ”), executed and delivered by the Company to the Trustee. The term “ **Indenture** ”, as hereinafter used, means said Indenture dated as of January 1, 1954, and all indentures supplemental thereto (including, without limitation, the Supplemental Indenture) from time to time in effect. Reference is made to the Indenture for a description of the property mortgaged and pledged, the nature and extent of the security, the rights of the holders and registered owners of said bonds, of the Company and of the Trustee in respect of the security, and the terms and conditions governing the issuance and security of said bonds.

Any transferee, by its acceptance of a bond registered in its name (or the name of its nominee), shall be deemed to have made the representation set forth in Section 6.2 of the Bond Purchase Agreement dated as of July 27, 2017 among the Company and the purchasers listed on Schedule A attached thereto, as amended, restated, supplemented or otherwise modified from time to time.

With the consent of the Company and to the extent permitted by and as provided in the Indenture, modifications or alterations of the Indenture or of any supplemental indenture and of the rights and obligations of the Company and of the holders and registered owners of the bonds may be made, and compliance with any provision of the Indenture or of any supplemental indenture may be waived, by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds then outstanding under the Indenture, and by the affirmative vote of the holders and registered owners of not less than sixty-six and two-thirds per centum (66 2/3%) in principal amount of the bonds of any series then outstanding under the Indenture and affected by such modification or alteration, in case one or more but less than all of the series of bonds then outstanding under the Indenture are so affected, but in any case excluding bonds disqualified from voting by reason of the Company’s interest therein as provided in the Indenture; subject, however, to the condition, among other conditions stated in the Indenture, that no such modification or alteration shall be made which, among other things, will permit the extension of the time or times of payment of the principal of or the interest or the premium, if any, on this bond, or the reduction in the principal amount hereof or in the rate of interest or the amount of any premium hereon, or any other modification in the terms of payment of such principal, interest or premium, which terms of payment are unconditional, or, otherwise than as permitted by the Indenture, the creation of any lien ranking prior to or on a parity with the lien of the Indenture with respect to any of the mortgaged property, all as more fully provided in the Indenture.

The bonds of this Series may be called for redemption by the Company, as a whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the bonds of this Series to be redeemed plus accrued and unpaid interest on the principal amount being redeemed to the date of redemption and the Make-Whole Amount (as defined in the Supplemental Indenture) applicable thereto.

Notice of each redemption shall be mailed to all registered owners not less than thirty nor more than forty-five days before the redemption date.

In case of certain completed defaults specified in the Indenture, the principal of this bond may be declared or may become due and payable in the manner and with the effect provided in the Indenture.

No recourse shall be had for the payment of the principal of or the interest or the premium, if any, on this bond, or for any claim based hereon, or otherwise in respect hereof or of the Indenture, to or against any incorporator, stockholder, officer or director, past, present or future, of the Company or of any predecessor or successor corporation, either directly or through the Company or such predecessor or successor corporation, under any constitution or statute or rule of law, or by the enforcement of any assessment or penalty, or otherwise, all such liability of incorporators, stockholders, directors and officers being waived and released by the registered owner hereof by the acceptance of this bond and being likewise waived and released by the terms of the Indenture, all as more fully provided therein.

This bond is transferable by the registered owner hereof, in person or by duly authorized attorney, at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York, upon surrender and cancellation of this bond; and thereupon a new registered bond or bonds without coupons of the same aggregate principal amount and series will, upon the payment of any transfer tax or taxes payable, be issued to the transferee in exchange herefor. The Company shall not be required to exchange or transfer this bond if this bond or a portion hereof has been selected for redemption.

The security represented by this certificate has not been registered under the Securities Act of 1933, as amended (the " **Securities Act** "), or qualified under any state securities laws and may not be transferred, sold or otherwise disposed of except while a registration statement is in effect or pursuant to an available exemption from registration under the Securities Act and applicable state securities laws.

(END OF FORM OF BOND OF 2057 SERIES)

and

WHEREAS, all acts and things necessary to make this Supplemental Indenture, when duly executed and delivered, a valid, binding and legal instrument in accordance with its terms, and for the purposes herein expressed, have been done and performed, and the execution and delivery of this Supplemental Indenture have in all respects been duly authorized;

NOW THEREFORE, in consideration of the premises and of the sum of one dollar paid by the Trustee to the Company, and for other good and valuable consideration, the receipt of which is hereby acknowledged, for the purpose of securing the due and punctual payment of the principal of and the interest and premium, if any, on all bonds which shall be issued under the Indenture, and for the purpose of securing the faithful performance and observance of all the covenants and conditions set forth in the Indenture and in all indentures supplemental thereto, the Company by these presents does grant, bargain, sell, transfer, assign, pledge, mortgage, warrant and convey unto The Bank of New York Mellon Trust Company, N.A., as Trustee, and its successor or successors in the trust hereby created, all property, real and personal (other than property expressly excepted from the lien and operation of the Indenture), which, at the actual date of execution and delivery of this Supplemental Indenture, is solely used or held for use in the operation by the Company of its gas utility system and in the conduct of its gas utility business and all property, real and personal, used or useful in the gas utility business (other than property expressly excepted from the lien and operation of the Indenture) acquired by the Company after the actual date of execution and delivery of this Supplemental Indenture or (subject to the provisions of Section 16.03 of the Indenture) by any successor corporation after such execution and delivery, and it is further agreed by and between the Company and the Trustee as follows:

## ARTICLE I

## BONDS OF THIS SUPPLEMENTAL INDENTURE

Section 1. The bonds of this Supplemental Indenture shall, as hereinbefore recited, be designated as the Company's (a) "First Mortgage Bonds 3.03% Series due August 10, 2027", (b) "First Mortgage Bonds 3.62% Series due August 10, 2037", (c) "First Mortgage Bonds 3.85% Series due August 10, 2047", and (d) "First Mortgage Bonds 4.00% Series due August 10, 2057", as applicable. The bonds of the 2027 Series which may be issued and outstanding shall not exceed $100,000,000 in aggregate principal amount, exclusive of bonds of such series authenticated and delivered pursuant to Section 4.12 of the Indenture. The bonds of the 2037 Series which may be issued and outstanding shall not exceed $100,000,000 in aggregate principal amount, exclusive of bonds of such series authenticated and delivered pursuant to Section 4.12 of the Indenture. The bonds of the 2047 Series which may be issued and outstanding shall not exceed $100,000,000 in aggregate principal amount, exclusive of bonds of such series authenticated and delivered pursuant to Section 4.12 of the Indenture. The bonds of the 2057 Series which may be issued and outstanding shall not exceed $100,000,000 in aggregate principal amount, exclusive of bonds of such series authenticated and delivered pursuant to Section 4.12 of the Indenture.

Section 2. The bonds of this Supplemental Indenture shall be registered bonds without coupons, and the form of each series of such bonds, and of the Trustee's certificate of authentication to be endorsed on all bonds of this Supplemental Indenture, shall be substantially as hereinbefore recited, respectively.

Section 3. The bonds of this Supplemental Indenture shall be issued in the denomination of $500,000 each and in such integral multiple or multiples thereof as shall be determined and authorized by the Board of Directors of the Company or by any officer of the Company authorized by the Board of Directors to make such determination, the authorization of the denomination of any bond to be conclusively evidenced by the execution thereof on behalf of the Company. The bonds of the 2027 Series shall be numbered RU-2017-A-1 and consecutively upwards, or in such other appropriate manner as shall be determined and authorized by the Board of Directors of the Company. The bonds of the 2037 Series shall be numbered RU-2017-B-1 and consecutively upwards, or in such other appropriate manner as shall be determined and authorized by the Board of Directors of the Company. The bonds of the 2047 Series shall be numbered RU-2017-C-1 and consecutively upwards, or in such other appropriate manner as shall be determined and authorized by the Board of Directors of the Company. The bonds of the 2057 Series shall be numbered RU-2017-D-1 and consecutively upwards, or in such other appropriate manner as shall be determined and authorized by the Board of Directors of the Company.

The bonds of the 2027 Series and the 2037 Series shall be dated August 10, 2017, except that each bond issued on or after the first payment of interest thereon shall be dated as of the date of the interest payment date thereof to which interest shall have been paid on the bonds of its series next preceding the date of issue, unless issued on an interest payment date to which interest shall have been so paid, in which event such bonds shall be dated as of the date of issue; *provided* , *however* , that bonds issued on or after January 26 and before the next succeeding February 10 or on or after July 26 and before the next succeeding August 10 shall be dated the next succeeding interest payment date if interest shall have been paid to such date. The bonds of the 2047 Series and the 2057 Series shall be dated November 1, 2017, except that each bond issued on or after the respective first payment of interest thereon shall be dated as of the date of the interest payment date thereof to which interest shall have been paid on the bonds of such series next preceding the date of issue, unless issued on an interest payment date to which interest shall have been so paid, in which event such bonds shall be dated as of the date of issue; *provided* , *however* , that bonds issued on or after January 26 and before the next succeeding February 10 or on or after July 26 and before the next succeeding August 10 shall be dated the next succeeding interest payment date if interest shall have been paid to such date. The bonds of the 2027 Series shall mature on August 10, 2027 and shall bear interest at the rate of 3.03% per annum until the principal thereof shall be paid. The bonds of the 2037 Series shall mature on August 10, 2037 and shall bear interest at the rate of 3.62% per annum until the principal thereof shall be paid. The bonds of the 2047 Series shall mature on August 10, 2047 and shall bear interest at the rate of 3.85% per annum until the principal thereof shall be paid. The bonds of the 2057 Series shall mature on August 10, 2057 and shall bear interest at the rate of 4.00% per annum until the principal thereof shall be paid. Interest on the bonds of this Supplemental Indenture shall be calculated on the basis of a 360-day year consisting of twelve 30-day months. Interest on the bonds of the 2027 Series shall be payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning February 10, 2018. Interest on the bonds of the 2037 Series shall be payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning February 10, 2018. Interest on the bonds of the 2047 Series shall be payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning February 10, 2018. Interest on the bonds of the 2057 Series shall be payable semi-annually on the tenth day of February and the tenth day of August in each year, beginning February 10, 2018. So long as there is no existing default in the payment of interest on the bonds of this Supplemental Indenture, such interest shall be payable to the person in whose name each such bond is registered on the respective record date (whether or not a business day), as the case may be, next preceding the respective interest payment dates; *provided* , *however* , if and to the extent that the Company shall default in the payment of interest due on such interest payment date, such defaulted interest shall be paid to the person in whose name each such bond is registered on the record date fixed, in advance, by the Company for the payment of such defaulted interest. Interest will accrue on overdue interest installments at the rate of (i) 3.03% per annum, with respect to the bonds of the 2027 Series, (ii) 3.62% per annum, with respect to the bonds of the 2037 Series, (iii) 3.85% per annum, with respect to the bonds of the 2047 Series, and (iv) 4.00% per annum, with respect to the bonds of the 2057 Series.

The principal of and interest and premium, if any, on the bonds of this Supplemental Indenture shall be payable in any coin or currency of the United States of America which at the time of payment is legal tender for the payment of public and private debts, and shall be payable at the office or agency of the Company in the City of Chicago, State of Illinois, or, at the option of the registered owner, at the office or agency of the Company in the Borough of Manhattan, The City and State of New York. Any installment of interest on the bonds of this Supplemental Indenture may, at the Company’s option, be paid by mailing checks for such interest payable to or upon the written order of the person entitled thereto to the address of such person as it appears on the registration books. The bonds of this Supplemental Indenture shall be registrable, transferable and exchangeable in the manner provided in Sections 4.08 and 4.09 of the Indenture, at either of such offices or agencies.

**Section 4.** The bonds of this Supplemental Indenture, upon the mailing of notice and in the manner provided in Section 7.01 of the Indenture (except that no published notice shall be required for the bonds of this Supplemental Indenture) and with the effect provided in Section 7.02 thereof, shall be redeemable at the option of the Company, as a whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the bonds of this Supplemental Indenture to be redeemed plus accrued and unpaid interest of the principal amount being redeemed to the date of redemption plus the Make-Whole Amount applicable thereto. **“Make-Whole Amount”** means, with respect to any bond of this Supplemental Indenture, an amount equal to the excess, if any, of the Discounted Value of the Remaining Scheduled Payments with respect to the Called Principal of such bond of this Supplemental Indenture over the amount of such Called Principal, *provided* that the Make-Whole Amount may in no event be less than zero. For the purposes of determining the Make-Whole Amount, the following terms have the following meanings:

**“Called Principal”** means, with respect to any bond of this Supplemental Indenture, the principal of such bond of this Supplemental Indenture that is to be redeemed.

**“Discounted Value”** means, with respect to the Called Principal of any bond of this Supplemental Indenture, the amount obtained by discounting all Remaining Scheduled Payments with respect to such Called Principal from their respective scheduled due dates to the Settlement Date with respect to such Called Principal, in accordance with accepted financial practice and at a discount factor (applied on the same periodic basis as that on which interest on the bond of this Supplemental Indenture is payable) equal to the Reinvestment Yield with respect to such Called Principal.

**"Reinvestment Yield"** means, with respect to the Called Principal of any bond of this Supplemental Indenture, the sum of (x) 0.50% plus (y) the yield to maturity implied by the "Ask Yield(s)" reported as of 10:00 a.m. (New York City time) on the second Business Day preceding the Settlement Date with respect to such Called Principal, on the display designated as "Page PX1" (or such other display as may replace Page PX1) on Bloomberg Financial Markets for the most recently issued actively traded on-the-run U.S. Treasury securities (" **Reported** ") having a maturity equal to the Remaining Average Life of such Called Principal as of such Settlement Date. If there are no such U.S. Treasury securities Reported having a maturity equal to such Remaining Average Life, then such implied yield to maturity will be determined by (a) converting U.S. Treasury bill quotations to bond equivalent yields in accordance with accepted financial practice and (b) interpolating linearly between the "Ask Yields" Reported for the applicable most recently issued actively traded on-the-run U.S. Treasury securities with the maturities (1) closest to and greater than such Remaining Average Life and (2) closest to and less than such Remaining Average Life. The Reinvestment Yield shall be rounded to the number of decimal places as appears in the interest rate of the applicable bond.

If such yields are not Reported or the yields Reported as of such time are not ascertainable (including by way of interpolation), then "Reinvestment Yield" means, with respect to the Called Principal of any bond of this Supplemental Indenture, the sum of (x) 0.50% plus (y) the yield to maturity implied by the U.S. Treasury constant maturity yields reported, for the latest day for which such yields have been so reported as of the second Business Day preceding the Settlement Date with respect to such Called Principal, in Federal Reserve Statistical Release H.15 (or any comparable successor publication) for the U.S. Treasury constant maturity having a term equal to the Remaining Average Life of such Called Principal as of such Settlement Date. If there is no such U.S. Treasury constant maturity having a term equal to such Remaining Average Life, such implied yield to maturity will be determined by interpolating linearly between (1) the U.S. Treasury constant maturity so reported with the term closest to and greater than such Remaining Average Life and (2) the U.S. Treasury constant maturity so reported with the term closest to and less than such Remaining Average Life. The Reinvestment Yield shall be rounded to the number of decimal places as appears in the interest rate of the applicable bond.

**"Remaining Average Life"** means, with respect to any Called Principal, the number of years obtained by dividing (a) such Called Principal into (b) the sum of the products obtained by multiplying (1) the principal component of each Remaining Scheduled Payment with respect to such Called Principal by (2) the number of years, computed on the basis of a 360-day year comprised of twelve 30-day months and calculated to the nearest two decimal places, that will elapse between the Settlement Date with respect to such Called Principal and the scheduled due date of such Remaining Scheduled Payment.

**"Remaining Scheduled Payments"** means, with respect to the Called Principal of any bond of this Supplemental Indenture, all payments of such Called Principal and interest thereon that would be due after the Settlement Date with respect to such Called Principal if no payment of such Called Principal were made prior to its scheduled due date, *provided* that if such Settlement Date is not a date on which interest payments are due to be made under the terms of the bond of this Supplemental Indenture, then the amount of the next succeeding scheduled interest payment will be reduced by the amount of interest accrued to such Settlement Date and required to be paid on such Settlement Date pursuant to the terms of this Supplemental Indenture.

**"Settlement Date"** means, with respect to the Called Principal of any bond of this Supplemental Indenture, the date on which such Called Principal is to be redeemed.

Section 5. No sinking fund is to be provided for the bonds of this Supplemental Indenture.

ARTICLE II

MISCELLANEOUS PROVISIONS

Section 1. This Supplemental Indenture is executed by the Company and the Trustee pursuant to provisions of Section 4.02 of the Indenture and the terms and conditions hereof shall be deemed to be a part of the terms and conditions of the Indenture for any and all purposes. The Indenture, as heretofore modified and supplemented and as supplemented by this Supplemental Indenture, is in all respects ratified and confirmed.

Section 2. This Supplemental Indenture shall bind and, subject to the provisions of Article XVI of the Indenture, inure to the benefit of the respective successors and assigns of the parties hereto.

Section 3. Although this Supplemental Indenture is made as of July 27, 2017, effective August 10, 2017, it shall be effective only from and after the actual time of its execution and delivery by the Company and the Trustee on the date indicated by their respective acknowledgements hereto.

Section 4. This Supplemental Indenture may be simultaneously executed in any number of counterparts, and all such counterparts executed and delivered, each as an original, shall constitute but one and the same instrument.

Section 5. The recitals herein are deemed to be those of the Company and not of the Trustee. The Trustee makes no representations as to the validity or sufficiency of this Supplemental Indenture.

IN WITNESS WHEREOF, Northern Illinois Gas Company has caused this Supplemental Indenture to be executed in its name by its Executive Vice President, Chief Financial Officer and Treasurer and its corporate seal to be hereunto affixed and attested by its Corporate Secretary, and The Bank of New York Mellon Trust Company, N.A., as Trustee under the Indenture, has caused this Supplemental Indenture to be executed in its name by one of its Vice Presidents, and its seal to be hereunto affixed and attested by one of its Vice Presidents, all as of the day and year first above written.

# SOUTHERN COMPANY
# DEFERRED COMPENSATION PLAN

Amended and Restated as of January 1, 2018

**SOUTHERN COMPANY**
**DEFERRED COMPENSATION PLAN**

**TABLE OF CONTENTS**

**SOUTHERN COMPANY**
**DEFERRED COMPENSATION PLAN**

ARTICLE I

Purpose and Adoption of Plan

1.1 Adoption : Southern Company Services, Inc. and the other Employing Companies established the Deferred Compensation Plan for The Southern Electric System effective October 1, 1988. The Plan has been amended from time to time including the good faith amendment and restatement effective January 1, 2005 and then again effective January 1, 2009, both of which were adopted to comply with Code Section 409A, including the proposed, temporary, or final regulations, or other guidance issued by the Secretary of Treasury and the Internal Revenue Service with respect thereto (collectively “409A Guidance”). This amendment and restatement effective January 1, 2018 was adopted to add Deemed Investment Options which align with the investment options offered under the Company’s qualified defined contribution plan, to provide that an employee of a Southern Company Gas affiliated company who had an account under the AGL Resources Inc. Nonqualified Savings Plan on December 31, 2017 is eligible to participate in the Plan effective January 1, 2018, and to make other design changes, as authorized by the Company. Except as otherwise provided herein and consistent with Section 1.3, the terms of the Plan as in effect prior to January 1, 2005 shall continue to be applicable to deferrals made pursuant to the Plan prior to such January 1, 2005.

1.2 Purpose : This Southern Company Deferred Compensation Plan is designed to permit a select group of management or highly compensated employees (“Top-Hat Employees”) within the meaning of Title I of the Employee Retirement Income Security Act of 1974, as amended (“ERISA”) to elect to defer a portion of their regular compensation during each payroll period and to defer all or a portion of certain short-term incentive payments until a specified date or until their death, retirement, or other Separation from Service with an Employing Company. Effective January 1, 2010, the Plan was also designed to accept matching contributions made by employing companies based on a set percentage multiplied by the Compensation deferred by a Participant into the Plan. The Plan is intended to constitute a non-qualified deferred compensation plan that complies with the provisions of Code Section 409A and an unfunded deferred compensation arrangement for Top-Hat Employees governed by ERISA whose benefits shall be paid solely from the general assets of the Employing Companies.

1.3 Schedule of Provisions for Pre-2005 Deferrals : The attached Schedule sets forth the operative provisions of the Plan applicable to “grandfathered” deferrals of Compensation and Incentive Pay made by Participants which are treated by the Employing Companies as not subject to Section 409A of the Code. The Account balance (plus earnings thereon) of the grandfathered deferrals shall only be subject to the provisions set forth in the Schedule. In accordance with transition rules under the 409A Guidance, these provisions are only intended to preserve the rights and features of the “grandfathered” deferrals and are, therefore, not intended to “materially modify” any aspect of such rights and features. Provisions of the Schedule should be so construed whenever necessary or appropriate. Provisions in the Schedule shall only be amended in accordance with the Schedule’s terms.

1.4 409A Transition Elections : At a time and in a manner determined by the Committee, Participants shall make timely elections to conform to the Plan’s terms effective on and after January 1, 2005. Where a Participant fails to make such elections required by the Committee, with regard to the form of distribution ( *i.e.* , lump sum or installment), the Committee shall establish a default distribution form based on the following hierarchy: first, the most current distribution form in effect applicable to the Account balance governed by the Schedule of

Provisions for Pre-2005 Deferrals; if none, lump sum. Such elections are intended to meet the transition requirements of Section 409A of the Code and Internal Revenue Service Notice 2005-1.

ARTICLE II

Definitions

For purposes of the Plan, the following terms shall have the following meanings unless a different meaning is plainly required by the context:

2.1 "Account" shall mean the account or accounts established and maintained by an Employing Company to reflect the interest of a Participant in the Plan resulting from a Participant's deferral of Compensation (plus Employer Matching Contributions made thereon, if any) and/or Incentive Pay each year and adjustments thereto to reflect income, gains, losses, and other credits or charges. Charges to a Participant's Account for distributions shall be posted as of the date the Account is valued in accordance with Section 7.1(a).

2.2 "Board of Directors" shall mean the Board of Directors of the Company.

2.3 "Change in Control Benefits Protection Plan" shall mean the Change in Control Benefits Protection Plan, as approved by the Southern Board, as it may be amended from time to time in accordance with the provisions therein.

2.4 "Closing Price" shall mean the closing price on any trading day of a share of Common Stock based on consolidated trading as defined by the Consolidated Tape Association and reported as part of the consolidated trading prices of New York Stock Exchange listed securities.

2.5 "Code" shall mean the Internal Revenue Code of 1986, as amended from time to time.

2.6 “Committee” shall mean the committee referred to in Section 3.1 hereof.

2.7 “Common Stock” shall mean the common stock of Southern.

2.8 “Company” shall mean Southern Company Services, Inc.

2.9 “Compensation” shall mean, for any year, an Employee’s base wages or salary paid by any Employing Company to an Employee, including amounts contributed by an Employing Company to the Employee Savings Plan as Elective Employer Contributions, as said term is defined in the Employee Savings Plan, pursuant to the Employee’s exercise of his or her deferral option made in accordance with Section 401(k) of the Code, amounts contributed by an Employing Company to the Employee Savings Plan as catch-up contributions pursuant to the Employee’s exercise of his deferral option made thereunder in accordance with the requirements of Section 414(v) of the Code, and amounts contributed by an Employing Company to The Southern Company Flexible Benefits Plan on behalf of the Employee pursuant to his or her salary reduction election under such plan; but disregarding overtime and any reimbursements to an Employee paid by any Employing Company including, but not limited to, reimbursements for such items as moving expenses, automobile expenses, tax preparation expenses, travel and entertainment expenses, and health and life insurance premiums.

2.10 “Deemed Investment Option” shall mean a notional investment option, rather than an actual investment option. A Participant’s account will be hypothetically invested for purposes of determining the earnings or losses to be credited. Deemed Investment Options will be determined by the Committee, and may change from time to time. Any changes to the Deemed Investment Options will be communicated to Participants in a timely manner.

2.11 “Deferral Election” shall mean the Participant’s election to defer a portion of his or her Compensation and/or Incentive Pay pursuant to Article V hereof.

2.12 “Distribution Election” shall mean the election under Article VII hereof, pursuant to which a Participant elects the distribution of his or her Account.

2.13 “Effective Date” of this amendment and restatement shall mean January 1, 2018.

2.14 “Employee” shall mean any person who is currently employed by an Employing Company.

2.15 “Employee Savings Plan” shall mean The Southern Company Employee Savings Plan, as amended from time to time.

2.16 “Employee Stock Ownership Plan” shall mean The Southern Company Employee Stock Ownership Plan, as amended from time to time until merged into the Employee Savings Plan effective December 20, 2006.

2.17 “Employer Matching Contribution” shall mean the matching contribution described in Section 5.1(b).

2.18 “Employing Company” shall mean the Company, or any affiliate or subsidiary (direct or indirect) of The Southern Company, which the Board of Directors may from time to time determine to bring under the Plan and which shall adopt the Plan, and any successor of any of them. The Employing Companies are set forth in Appendix A of the Plan, as may be amended from time to time.

2.19 “Enrollment Date” shall mean January 1 of each Plan Year, and such other dates permitted by the terms of the Plan or as may be determined from time to time by the Committee. No enrollment date shall violate Code Section 409A.

2.20 “ERISA” shall mean the Employee Retirement Income Security Act of 1974, as amended.

2.21 “Exchange Act” shall mean the Securities Exchange Act of 1934, as amended.

2.22 "Incentive Pay" shall mean such short-term incentive pay as the Committee shall permit to be deferred under this Plan for any Plan Year and in all events includes retention compensation where the written retention agreement expressly provides that the retention compensation is to be treated as "incentive pay" which is deferrable under this Plan.

2.23 "Investment Election" shall mean the Participant's election to have his or her deferred Compensation (plus Employer Matching Contributions made thereon, if any) or Incentive Pay notionally invested pursuant to Section 6.2 or Section 6.3 hereof.

2.24 "Key Employee" shall have the meaning ascribed to the term "specified employee" under Code Section 409A(a)(2)(B)(i) and the regulations promulgated thereunder as it applies to a Participant. The Committee shall establish the time period required to determine key employee status.

2.25 "Key-Employee Delay" shall mean the six (6) month delay in the commencement of benefits applicable to Key Employees pursuant to the requirements of Code Section 409A(a)(2)(B)(i) and the regulations promulgated thereunder.

2.26 "Modification Delay" shall mean the requirements permitting a change in time or form of payment as allowed under Code Section 409A(a)(4)(C) and the regulations promulgated thereunder.

2.27 "Non-adopting Company" shall mean any subsidiary or affiliate of Southern which is not an Employing Company.

2.28 "Participant" shall mean an Employee or former employee of an Employing Company who is eligible to and defers Compensation and/or Incentive Pay under the Plan or who was so eligible and had an unpaid Account balance upon his or her death, retirement, or other Separation from Service with an Employing Company. An Employee who had an account under the AGL Resources Inc. Nonqualified Savings Plan as of December 31, 2017 and who is an Employee on January 1, 2018 shall be eligible to participate in this Plan on that date.

2.29 "Pension Plan" shall mean The Southern Company Pension Plan, as amended from time to time.

2.30 "Plan" shall mean the Southern Company Deferred Compensation Plan, amended and restated as of January 1, 2018, as further amended from time to time.

2.31 "Plan Year" shall mean the calendar year.

2.32 "Retirement Income" shall have the same meaning as set forth in the Pension Plan.

2.33 "Separation from Service" shall have the meaning ascribed to this term under Code Section 409A(a)(2)(A)(i) and the regulations promulgated thereunder. For this purpose, Separation from Service shall include a permanent decrease in the level of bona fide services performed by the Participant after a certain date to a level that is twenty percent (20%) or less of the average level of bona fide services performed by the Participant over the immediately preceding thirty-six (36) month period.

2.34 "Southern" shall mean Southern Company, its successors and assigns.

2.35 "Southern Board" shall mean the board of directors of Southern.

2.36 "Total Disability" shall mean a total disability as determined by the Social Security Administration and meeting the requirements of Code Section 409A(a)(2).

2.37 " Trust" shall mean the Southern Company Deferred Compensation Trust.

2.38 "Trustee" shall mean the entity designated as such in the Trust.

2.39 "Unforeseeable Emergency" shall mean a severe financial hardship meeting the requirements of Code Section 409A(a)(2)(B)(ii).

2.40 “Valuation Date” shall mean each trading day of the New York Stock Exchange, or any successor national exchange on which the Common Stock is traded and with respect to which a Closing Price may be determined.

Where the context requires, the definitions of all terms set forth in the Pension Plan, the Employee Savings Plan, and the Employee Stock Ownership Plan shall apply with equal force and effect for purposes of interpretation and administration of the Plan, unless said terms are otherwise specifically defined in the Plan. Words in the masculine gender shall include the feminine and neuter genders, words in the singular shall include the plural, and words in the plural shall include the singular.

## ARTICLE III

## Administration of Plan

3.1 Effective May 31, 2007, the general administration of the Plan shall be placed in the “Committee” which shall consist of the Benefits Administration Committee, the members of which shall be appointed from time to time by the Fiduciary Oversight Committee of the Board of Directors. The Committee shall govern itself in accordance with the terms of the Charter for the Benefits Administration Committee approved by the Fiduciary Oversight Committee of the Board of Directors.

3.2 No member of the Committee shall receive any compensation from the Plan for his or her service.

3.3 (a) The Committee shall administer the Plan in accordance with its terms and shall have all powers necessary to carry out the provisions of the Plan as may be more particularly set forth herein. The Committee shall interpret the Plan and shall determine all questions arising in the administration, interpretation, and application of the Plan. Any such determination by the Committee shall be conclusive and binding on all persons. The Committee shall be the Plan's agent for service of process.

(b) If a claim for benefits under the Plan is denied, in whole or in part, the Committee will provide a written notice of the denial within a reasonable period of time, but not later than 90 days after the claim is received. If special circumstances require more time to process the claim, the Committee will issue a written explanation of the special circumstances prior to the end of the 90 day period and a decision will be made as soon as possible, but not later than 180 days after the claim is received.

The written notice of claim denial will include:

- Specific reasons why the claim was denied;
- Specific references to applicable provisions of the Plan document or other relevant records or papers on which the denial is based, and information about where a Participant or his or her beneficiary may see them;
- A description of any additional material or information needed to process the claim, and an explanation of why such material or information is necessary;
- An explanation of the claims review procedure, including the time limits applicable to such procedure, as well as a statement notifying the Participant or his or her beneficiary of their right to file suit if the claim for benefits is denied, in whole or in part, on review.

Upon request, a Participant or his or her beneficiary will be provided without charge, reasonable access to, and copies of, all non-confidential documents that are relevant to any denial of benefits. A claimant has 60 days from the day he or she receives the original denial to request a review. Such request must be made in writing and sent to the Committee. The request should state the reasons why the claim should be reviewed and may also include evidence or documentation to support the claimant's position.

The Committee will reconsider the claimant's claim, taking into account all evidence, documentation, and other information related to the claim and submitted on the claimant's behalf, regardless of whether such information was submitted or considered in the initial denial of the claim. The Committee will make a decision within 60 days. If special circumstances require more time for this process, the claimant will receive written explanation of the special circumstances prior to the end of the initial 60 day period and a decision will be sent as soon as possible, but not later than 120 days after the Committee receives the request.

No legal action to recover benefits or enforce or clarify rights under a Plan can be commenced until the Participant or his or her beneficiary has first exhausted the claims and review procedures provided under the Plan.

3.4 The Committee may adopt such regulations as it deems desirable for the conduct of its affairs and may appoint such accountants, counsel, actuaries, specialists, and other persons as it deems necessary or desirable in connection with the administration of this Plan.

3.5 The Committee shall be reimbursed by the Employing Companies for all reasonable expenses incurred by it in the fulfillment of its duties, including, but not limited to, fees of accountants, counsel, actuaries, and other specialists, and other costs of administering the Plan.

3.6 (a) The Committee is responsible for the daily administration of the Plan and may appoint other persons or entities to perform any of its fiduciary functions. The Committee and any such appointee may employ advisors and other persons necessary or convenient to help the Committee carry out its duties, including its fiduciary duties. The Committee shall review the work and performance of each such appointee, and shall have the right to remove any such appointee from his or her position. Any person, group of persons, or entity may serve in more than one fiduciary capacity.

(b) The Committee shall maintain accurate and detailed records and accounts of Participants and of their rights under the Plan and of all receipts, disbursements, transfers, and other transactions concerning the Plan. Such accounts, books, and records relating thereto shall be open at all reasonable times to inspection and audit by the Board of Directors and by any persons designated thereby.

(c) The Committee shall take all steps necessary to ensure that the Plan complies with the law at all times. These steps shall include such items as the preparation and filing of all documents and forms required by any governmental agency; maintaining of adequate Participants' records; recording and transmission of all notices required to be given to Participants and their beneficiaries; the receipt and dissemination, if required, of all reports and information received from an Employing Company; securing of such fidelity bonds as may be required by law; and doing such other acts necessary for the proper administration of the Plan. The Committee shall keep a record of all of its proceedings and acts, and shall keep all such books of account, records, and other data as may be necessary for proper administration of the Plan. The Committee shall notify the Employing Companies upon their request of any action taken by the Committee, and when required, shall notify any other interested person or persons.

# ARTICLE IV

## Eligibility

4.1 Any Employee who is determined eligible to participate in accordance with Section 2.28 or 4.2 of the Plan and whose base compensation and salary grade level equals or exceeds such minimum threshold as may be established by the Committee from time to time may elect to participate in the Plan beginning on any Enrollment Date by electing to have his or her Compensation and/or Incentive Pay reduced and such amounts contributed to the Plan in accordance with Article V hereof, and directing the investment of such contributions in accordance with Article VI hereof. An Employee who is eligible to participate and elects to defer Compensation and/or Incentive Pay shall be a Participant in the Plan. The Committee shall be authorized to establish the minimum base compensation and the salary grade level required for eligibility to participate in the Plan, to be effective as of the first day of the next succeeding Plan Year. Notwithstanding the foregoing, any Employee eligible to participate in any similar group employee deferred compensation plan maintained by an Employing Company or maintained by a Non-adopting Company shall be ineligible to defer Compensation or Incentive Pay under this Plan, unless the Committee in its sole discretion shall determine otherwise.

4.2 The Committee shall determine which Employees are eligible to participate in the Plan. Additionally, the Committee shall be authorized to modify the minimum base compensation and the salary grade threshold described in Section 4.1 of the Plan and to rescind the eligibility of any Participant to continue deferrals if this is necessary or advisable to ensure that the Plan is maintained primarily for the purpose of providing deferred compensation to a select group of management or highly compensated employees, as such terms are defined by the ERISA. A Participant whose eligibility is rescinded or who loses eligibility for any reason shall not be eligible to defer Compensation or Incentive Pay until eligibility is restored in accordance with the guidelines established by the Committee.

4.3 The Committee shall have the authority to permit, if it deems appropriate, separate Deferral Elections under Article V hereof, Investment Elections under Article VI hereof, and Distribution Elections under Article VII hereof for Compensation and/or Incentive Pay, respectively. Employer Matching Contributions will be governed by Deferral Elections, Investment Elections, and Distribution Elections as contemplated in the preceding sentence in the same manner as Compensation.

ARTICLE V

Deferral Election

5.1 (a) A Participant may elect to defer payment of a portion of his or her Compensation otherwise payable to him by his or her Employing Company during each payroll period of the next succeeding Plan Year by any whole percentage not to exceed fifty percent (50%) of his or her Compensation, or such greater or lesser amount as shall be determined by the Committee from time to time. A Participant may also elect to defer payment of up to one hundred percent (100%), by whole percentages, of any Incentive Pay otherwise payable to him or her by his or her Employing Company.

(b) With respect to a Participant who elects to defer payment of a portion of his or her Compensation in accordance with (a) above, an Employing Company shall match any such deferred amount at five and one-tenths percent (5.1%) at the time such Compensation is deferred in accordance with Article V.

5.2 The Deferral Election shall be made in a manner prescribed by the Committee and shall state as follows:

(a) That the Participant wishes to make an election to defer the receipt of a portion of his or her Compensation and/or all or a portion of his or her Incentive Pay;

(b) The whole percentage of his or her Compensation and/or Incentive Pay which the Participant elects to defer; and

(c) The Distribution Election under Article VII hereof.

5.3 The Deferral Election of a Participant shall be made by the Participant in a manner prescribed by the Committee and delivered by the date established by the Committee and shall be effective on the first day of the Plan Year immediately following the date of the Deferral Election. A Deferral Election with respect to the deferral of future Compensation and/or Incentive Pay shall be an annual election for each Plan Year; except that, with respect to certain Incentive Pay that is retention compensation, the deferral of such compensation may be set forth in writing in the retention arrangement at the time such arrangement is established. The termination of a Participant's participation in the Plan shall not affect the Participant's Compensation (plus Employer Matching Contributions made thereon, if any) or Incentive Pay previously deferred under the Plan, which shall be invested and distributed in accordance with the Participant's elections and the terms and conditions of the Plan. Such terminated Participant shall become an inactive Participant with respect to eligibility to make future deferrals under this Plan.

5.4 The Committee may cancel the Deferral Election of a Participant who incurs a disability. Any cancellation under this section must occur by the later of the end of the calendar year in which the Participant incurs the disability or the 15$^{th}$ day of the third month after the date the Participant incurs the disability. For purposes of this section, "disability" shall have the meaning set forth in Treasury Regulation Section 1.409A-3(j)(4)(xii).

ARTICLE VI

Participants' Accounts

6.1 Upon the Committee's receipt of a Participant's valid Deferral Election under Article V hereof, beginning as of the Enrollment Date, the designated portion of Compensation (plus Employer Matching Contributions made thereon, if any) and/or Incentive Pay shall be credited to the Participant's Account in accordance with the provisions of this Article VI.

6.2 On the last business day of each month, the Account of each Participant electing in a manner prescribed by the Committee to invest his or her deferred Compensation (plus Employer Matching Contributions made thereon, if any) and/or Incentive Pay for a Plan Year in accordance with this Section 6.2 shall be credited by the Employing Company with a deemed amount equal to the monthly equivalent of the per annum prime rate of interest as published by the Wall Street Journal as the base rate on corporate loans posted as of the last business day of each month by at least seventy five (75%) percent of the United States' largest banks, compounded monthly on any Account balance so invested until such balance is fully distributed.

6.3 The designated portion of the Account of each Participant electing in a manner prescribed by the Committee to invest his or her deferred Compensation (plus Employer Matching Contributions made thereon, if any) and/or Incentive Pay for a Plan Year in accordance with this Section 6.3 shall be credited on the effective date of investment with the deemed number of shares (including fractional shares) of Common Stock which could have been purchased on such date with the dollar amount of such deferral, based upon the Common Stock's Closing Price on the Valuation Date coincident with the date of investment. As of the date on which occurs the payment of dividends on the Common Stock, if any, there shall be credited with respect to the deemed number of shares of Common Stock in the Participant's Account on the applicable dividend record date such additional deemed shares (including fractional shares) of Common Stock as follows:

(a) In the case of cash dividends, such additional deemed shares as could be purchased at the Closing Price on the Valuation Date coincident with the dividend payment date with the dividends which would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date;

(b) In the case of dividends payable in property other than cash or Common Stock, such additional deemed shares as could be purchased at the Closing Price on the Valuation Date coincident with the dividend payment date with the fair market value of the property which would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date; or

(c) In the case of dividends payable in Common Stock, such additional deemed shares as would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date.

6.4 The designated portion of the Account of each Participant electing in a manner prescribed by the Committee to invest his or her deferred Compensation (plus Employer Matching Contributions made thereon, if any) and/or Incentive Pay for a Plan Year in accordance with this Section 6.4 shall be credited on the effective date of investment with the Deemed Investment Option for purposes of determine the earnings or losses to be credited.

6.5 (a) The initial Investment Election by a Participant with respect to deferrals into, Employer Matching Contributions (if any) and earnings on his or her Account shall be made in a manner prescribed by the Committee. Such Investment Elections shall be delivered in accordance with such instructions and shall be effective on the first day of such succeeding Plan Year.

(b) The Participant may transfer in accordance with procedures prescribed by the Committee all or a portion of his Account between investment options. Any such transfer shall constitute an Investment Election as to the amount transferred and shall be effective immediately upon transfer. The timing of transfers between investment options, the procedures for transfer and the valuation of transferred Accounts or portions of Accounts shall be determined by the Committee. In any event, any Participant who is required to file reports pursuant to Section 16(a) of the Exchange Act with respect to equity securities of Southern shall not be permitted to transfer between investment options during any restricted period as determined by the Committee in its sole discretion.

6.6 The Committee shall issue a report at least annually to each Participant holding an Account, setting forth at least the following:

(a) with respect to amounts invested under Section 6.2 and 6.4 hereof, as of the last day of the Plan Year, the Account Balance, the dollar amount of deferrals, Employer Matching Contributions (if any), and earnings thereon, and

(b) with respect to amounts invested under Section 6.3 hereof, the Closing Price of shares of Common Stock credited to each Participant's Account as of the Valuation Date coincident with the last business day of the Plan Year, the total number of deemed shares of Common Stock (and fractions thereof), and the total value of the Participant's deemed investment in Common Stock as of such Valuation Date.

ARTICLE VII

Account Distribution

7.1 (a) When a Participant Separates from Service with an Employing Company or otherwise becomes entitled to commence the distribution of all or a portion of his or her Account, he or she shall be entitled to receive in cash an amount equal to the dollar amount of any deferrals, any Employer Matching Contributions, and any amounts in lieu of interest thereon credited to his or her Account under Section 6.2 hereof, and the dollar value of the product of the Closing Price multiplied by the number of deemed shares of Common Stock (and fractions thereof) credited to his or her Account in accordance Section 6.3 hereof, determined as of the date the Account is valued for distribution. If such date is a non-business day, the Account shall be valued as of the next business day. Such amounts shall be paid in accordance with the Participant's Distribution Elections made in accordance with Section 7.4. No portion of a Participant's Account shall be distributed in Common Stock.

(b) The transfer by a Participant between subsidiaries or affiliates of Southern shall not be deemed to be a termination of employment with an Employing Company for purposes of the Plan.

7.2 In the event that a Participant has made or is deemed to have made a Distribution Election to receive a lump sum distribution of his or her Account, the dollar amount determined under Section 7.1 hereof shall be paid to the Participant as soon as practicable but not later than seventy-five (75) days following the date on which the Participant's Separation from Service occurs or such specified date, if any, elected by the Participant in accordance with Section 7.6. Notwithstanding the foregoing, if a Participant is a Key Employee, such Participant shall be subject to the Key-Employee Delay and the payment of the lump sum following Separation from Service shall be as of the beginning of the seventh full calendar month. Such delay shall not apply to a Participant's election under Section 7.6.

7.3 In the event that a Participant has made a Distribution Election to receive the distribution of his or her Account in annual installments, the first payment shall be made as soon as practicable but not later than seventy-five (75) days following the date on which the Participant's Separation from Service occurs and shall be in an amount equal to the dollar balance in the Participant's Account determined under Section 7.1 hereof, divided by the number of annual installments elected. Subsequent annual installments shall be in an amount equal to the dollar value of the Participant's Account determined under Section 7.1 hereof divided by the number of the remaining annual payments, and shall be paid as of each anniversary of the initial payment date (or what would have been the initial payment date but for the Key-Employee Delay) until the balance of the Participant's Account is paid in full. For purposes of Section 409A of the Code, installments shall be treated as a single payment. Notwithstanding the foregoing, if a Participant is a Key Employee, such Participant shall be subject to the Key-Employee Delay and the first installment payment following Separation from Service shall be as of the beginning of the seventh full calendar month. Upon the death of a Participant prior to the complete distribution of his or her Account in annual installments, the unpaid Account balance shall be paid in accordance with the Distribution Election made by such Participant to the Participant's designated beneficiary. In the event a beneficiary designation is not on file or the designated beneficiary is deceased or cannot be located, payment will be made to the Participant's estate.

7.4 When a Participant makes a Deferral Election, he or she shall make a Distribution Election in a manner prescribed by the Committee. Such Distribution Election shall apply only to the amounts attributable to that specified Deferral Election (including any Employer Matching Contribution made on a deferral of Compensation) and may not be subsequently revoked, except that one or more Distribution Elections may be modified by a Participant but only if such modification meets the requirements of a Modification Delay. Each year's Deferral Election is allowed a one-time re-deferral in which the time and/or form of payment can be modified. In accordance with Section 409A of the Code, any changes to time and/or form of payment, must be made at least 12 months before the originally scheduled commencement date, and result in a delay of at least five years from the originally scheduled commencement date. If disability, death, or a Separation of Service occur within 12 months after the re-deferral election and cause the distribution to be made less than 12 months before the originally scheduled commencement date, the original Deferral Election shall apply and the re-deferral election shall be revoked.

7.5 Upon the death of a Participant prior to Separation from Service, the Account balance shall be paid to the Participant's designated beneficiary determined pursuant to Section 7.9 in the form of a lump sum as soon as practicable but not more than seventy-five (75) days following the date of the Participant's death.

7.6 In addition to distributions commencing upon a Separation from Service, Participants may elect in a manner prescribed by the Committee to commence payment of all or a portion of his or her Deferral Election as of a specified date. Distributions that commence prior to Separation from Service must be paid in a lump sum.

7.7 Upon the Total Disability of a Participant, the balance of his or her Account shall be paid in accordance with Participant's Deferral Election commencing as of such Participant's Separation from Service and, if applicable, as of any date specified by the Participant pursuant to an election under Section 7.6.

7.8 Upon the occurrence of an Unforeseeable Emergency and an application made by a Participant or his or her beneficiary, the Committee may in its sole discretion determine to make a lump-sum payment up to the amount in the Participant's Account in accordance with the requirements of Code Section 409A to satisfy such Unforeseeable Emergency. Such lump-sum payment shall reduce pro rata the amount attributable to each annual Deferral Election made by the Participant.

7.9 Beneficiary designations may be made or changed by the Participants in a manner prescribed by the Committee at any time without the consent of any prior beneficiary. In the event a beneficiary designation is not on file or the designated beneficiary is deceased or cannot be located following the death of the Participant, payment will be made to the Participant's estate.

7.10 In the event a Participant who is employed on or after January 1, 1999 with an "Employing Company" (as defined in the Change in Control Benefits Protection Plan) disputes the calculation of his Account or payment of amounts due under the terms of the Plan, such Participant has recourse against the Company, the Employing Company by which Participant is employed, if different, the Plan, and the Trust for the payment of benefits to the extent the Trust so provides.

7.11 The provisions of the Change in Control Benefits Protection Plan are incorporated herein by reference to determine the occurrence of a change in control or preliminary change in control of Southern or an Employing Company, the benefits to be provided hereunder, and the funding of the Trust in the event of such a change in control. Any modifications to the Change in Control Benefits Protection Plan are likewise incorporated herein and are otherwise intended to comply with 409A of the Code.

## ARTICLE VIII

### Miscellaneous Provisions

8.1 Neither the Participant, his or her beneficiary, nor his or her legal representative shall have any rights to commute, sell, assign, transfer, or otherwise convey the right to receive any payments hereunder, which payments and the rights thereto are expressly declared to be non-assignable and nontransferable. Any attempt to assign or transfer the right to payments of this Plan shall be void and have no effect.

8.2 Except as expressly limited under the terms of the Trust, an Employing Company maintaining an Account for the benefit of a Participant shall neither reserve nor specifically set aside funds for the payment of its obligations under the Plan. In any event, such obligations shall be paid or deemed to be paid solely from the general assets of the Employing Companies. Participants shall only have the status of a general, unsecured creditor of the Employing Company(ies). Notwithstanding that a Participant shall be entitled to receive the balance of his or her Account under the Plan, the assets from which such amount may be paid shall at all times be subject to the claims of the creditors of the Participants' Employing Companies.

8.3 Except for the provisions of Section 7.10 hereof, which may not be amended following a "Southern Change in Control" or "Subsidiary Change in Control" (as defined in the Change in Control Benefits Protection Plan), the Plan may be amended, modified, or terminated by the Board of Directors in its sole discretion at any time and from time to time; provided, however, that no such amendment, modification, or termination shall impair any rights to any amounts which have been earned or deferred under the Plan prior to such amendment, modification, or termination. Effective March 1, 2006, the Plan may also be amended by the Committee (a) if such amendment does not involve a substantial increase in cost to any

Employing Company, or (b) as may be necessary, proper, or desirable in order to comply with laws or regulations enacted or promulgated by any federal or state governmental authority.

8.4 It is expressly understood and agreed that the payments made in accordance with the Plan are in addition to any other benefits or compensation to which a Participant may be entitled or for which he or she may be eligible, whether funded or unfunded, by reason of his or her employment with any Employing Company.

8.5 There may be deducted from any payment under the Plan in accordance with the requirements of 409A of the Code the amount of any tax owed by the Participant required by any governmental authority to be withheld and paid over by an Employing Company to such governmental authority for the account of the person entitled to such distribution. The Employing Company may also seek payment for tax owed by the Participant directly from such Participant or may withhold such tax from compensation otherwise paid to such Participant.

8.6 Any Compensation or Incentive Pay deferred by a Participant while employed by an Employing Company and any Transferred Amounts shall not be considered “compensation,” as the term is defined in the Employee Savings Plan, the Employee Stock Ownership Plan, or the Pension Plan unless any one or all of those plans expressly provides otherwise. Distributions from a Participant’s Account shall not be considered wages, salaries, or compensation under any other employee benefit plan.

8.7 No provision of this Plan shall be construed to affect in any manner the existing rights of an Employing Company to suspend, terminate, alter, modify, whether or not for cause, the employment relationship of the Participant and his or her Employing Company.

8.8 For the avoidance of doubt, the provisions of the Plan effective in the Plan’s amendment and restatement dated January 1, 2004 (“2004 Plan”) concerning Mirant Shares were applied through the liquidation of Mirant Shares as a form of investment in the Plan as of June 30, 2006. Although these provisions concerning Mirant Shares are not restated in this amendment and restatement, a Participant's rights concerning Mirant Shares are as set forth in such 2004 Plan. To this limited extent, the provisions in the 2004 Plan concerning Mirant Shares are incorporated herein.

8.9 This Plan, and all rights under it, shall be governed by and construed in accordance with the laws of the State of Georgia without regard to conflict of laws principles to the extent not preempted by ERISA.

IN WITNESS WHEREOF, the amended and restated Plan has been executed by duly authorized officers of Southern Company Services, Inc. pursuant to resolutions of the Board of Directors and the Committee, this 12th day of December, 2017.

**SCHEDULE OF PROVISIONS**
**FOR PRE-2005 DEFERRALS**

ARTICLE I

Purpose

1.1 Schedule of Provisions for Pre-2005 Deferrals : This Schedule sets forth the operative provisions of the Plan applicable to “grandfathered” deferrals of Compensation and Incentive Pay made by Participants which are treated by the Employing Companies as not subject to Section 409A of the Code. The Account balance (plus earnings thereon) of the grandfathered deferrals shall only be subject to the provisions set forth in this Schedule. In accordance with the 409A Guidance, these provisions are only intended to preserve the rights and features of the “grandfathered” deferrals and are, therefore, not intended to “materially modify” any aspect of such rights and features. Provisions of this Schedule should be so construed whenever necessary or appropriate. Provisions in this Schedule shall only be amended in accordance with this Schedule’s terms.

ARTICLE II

Definitions

For purposes of this Schedule, the following terms shall have the following meanings unless a different meaning is plainly required by the context:

2.1 “Account” shall mean the account or accounts established and maintained by an Employing Company to reflect the interest of a Participant in the Plan solely pursuant to the terms of this Schedule resulting from a Participant’s deferral of Compensation and/or Incentive Pay and adjustments thereto to reflect income, gains, losses, and other credits or charges. The Account amount is attributable to those deferrals which are not subject to Section 409A of the

Code. Charges to Participant's Accounts for distributions shall be posted as of the date the Account is valued for distribution.

2.2 "Change in Control Benefits Protection Plan" shall mean the Change in Control Benefits Protection Plan, as approved by the board of directors of Southern, as it may be amended from time to time in accordance with the provisions therein.

2.3 "Closing Price" shall mean the closing price on any trading day of a share of the Common Stock based on consolidated trading as defined by the Consolidated Tape Association and reported as part of the consolidated trading prices of New York Stock Exchange listed securities.

2.4 "Committee" shall mean the committee referred to in Section 3.1 of this Schedule.

2.5 "Common Stock" shall mean the common stock of Southern.

2.6 "Company" shall mean Southern Company Services, Inc.

2.7 "Compensation" shall mean the rate of an Employee's base wages or salary paid by any Employing Company to an Employee, including amounts contributed by an Employing Company to the Employee Savings Plan as Elective Employer Contributions, as said term is defined in the Employee Savings Plan, pursuant to the Employee's exercise of his or her deferral option made in accordance with Section 401(k) of the Code, amounts contributed by an Employing Company to the Employee Savings Plan as catch-up contributions pursuant to the Employee's exercise of his deferral option made thereunder in accordance with the requirements of Section 414(v) of the Code, and amounts contributed by an Employing Company to The Southern Company Flexible Benefits Plan on behalf of the Employee pursuant to his or her salary reduction election under such plan; but disregarding overtime and any reimbursements to an Employee paid by any Employing Company including, but not limited to, reimbursements for such items as moving expenses, automobile expenses, tax preparation expenses, travel and entertainment expenses, and health and life insurance premiums.

2.8 “Deferral Election” shall mean the Participant’s election to defer a portion of his or her Compensation and/or Incentive Pay pursuant to Article V of the main body of the Plan.

2.9 “Distribution Election” shall mean the election under Article VII of this Schedule, pursuant to which a Participant elects the distribution of the balance of his or her Account to be made in either a lump sum or in up to ten (10) annual installments following the Participant’s death, disability, retirement, or other termination of Employment with an Employing Company.

2.10 “Employee Savings Plan” shall mean The Southern Company Employee Savings Plan, as amended from time to time.

2.11 “Employee Stock Ownership Plan” shall mean The Southern Company Employee Stock Ownership Plan, as amended from time to time.

2.12 “Employing Company” shall mean the Company, or any affiliate or subsidiary (direct or indirect) of Southern Company, which the board of directors of the Company may from time to time determine to bring under the Plan and which shall adopt the Plan, and any successor of any of them. The Employing Companies are set forth in Appendix A of the Plan, as may be amended from time to time.

2.13 “Exchange Act” shall mean the Securities Exchange Act of 1934, as amended.

2.14 “Incentive Pay” shall mean such short-term incentive pay as the Committee shall permit to be deferred under the Plan for any Plan Year.

2.15 “Investment Election” shall mean the Participant’s election to have his or her deferred Compensation or Incentive Pay invested pursuant to Section 6.1 or Section 6.2 of this Schedule.

2.16 “Participant” shall mean for purposes of this Schedule an Employee or former employee of an Employing Company who has an unpaid Account balance governed by the terms of this Schedule upon his or her death, disability, retirement, or other termination of employment with an Employing Company.

2.17 “Plan” shall mean the Southern Company Deferred Compensation Plan, amended and restated as of January 1, 2018 which includes this Schedule, as may be further amended from time to time.

2.18 “Plan Year” shall mean the calendar year.

2.19 “Southern” shall mean Southern Company, its successors and assigns.

2.20 “Trust” shall mean the Southern Company Deferred Compensation Trust.

2.21 “Valuation Date” shall mean each trading day of the New York Stock Exchange, or any successor national exchange on which the Common Stock is traded and with respect to which a Closing Price may be determined.

Where the context requires, the definitions of all terms set forth in the Pension Plan, the Employee Savings Plan, and the Employee Stock Ownership Plan shall apply with equal force and effect for purposes of interpretation and administration of the Plan, unless said terms are otherwise specifically defined in the Plan. Words in the masculine gender shall include the feminine and neuter genders, words in the singular shall include the plural, and words in the plural shall include the singular.

ARTICLE III

Administration of Schedule

3.1 Article III of the main body of the Plan is herein incorporated into this Schedule by reference. Any amendment to Article III of the main body of the Plan shall operate as amendment to this Article III of the Schedule.

ARTICLE IV

Eligibility

4.1 For so long as an Employee has an Account balance governed by this Schedule, he or she shall be a Participant in the Plan for purposes of this Schedule, and such Account balance shall be maintained and administered solely in accordance with the terms of this Schedule.

ARTICLE V

Deferral Election

5.1 No new deferral elections may be made which are subject to this Schedule.

ARTICLE VI

Participants' Accounts

6.1 On the last business day of each month, the Account of each Participant electing in a manner prescribed by the Committee to invest his or her deferred Compensation and/or Incentive Pay for a Plan Year in accordance with this Section 6.1 shall be credited by the Employing Company with a deemed amount equal to the monthly equivalent of the per annum prime rate of interest as published by the Wall Street Journal as the base rate on corporate loans posted as of the last business day of each month by at least seventy five (75%) percent of the

United States' largest banks, compounded monthly on any Account balance so invested until such balance is fully distributed.

6.2 The designated portion of the Account of each Participant electing in a manner prescribed by the Committee to invest his or her deferred Compensation and/or Incentive Pay for a Plan Year in accordance with this Section 6.2 shall be credited on the effective date of investment with the deemed number of shares (including fractional shares) of Common Stock which could have been purchased on such date with the dollar amount of such deferral, based upon the Common Stock's Closing Price on the Valuation Date coincident with the date of investment. As of the date on which occurs the payment of dividends on the Common Stock, if any, there shall be credited with respect to the deemed number of shares of Common Stock in the Participant's Account on the applicable dividend record date such additional deemed shares (including fractional shares) of Common Stock as follows:

(a) In the case of cash dividends, such additional deemed shares as could be purchased at the Closing Price on the Valuation Date coincident with the dividend payment date with the dividends which would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date;

(b) In the case of dividends payable in property other than cash or Common Stock, such additional deemed shares as could be purchased at the Closing Price on the Valuation Date coincident with the dividend payment date with the fair market value of the property which would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date; or

(c) In the case of dividends payable in Common Stock, such additional deemed shares as would have been payable on the deemed number of shares previously credited to the Participant's Account as of the dividend record date.

6.3 The Participant may transfer in accordance with procedures prescribed by the Committee all or a portion of his Account between investment options. Any such transfer shall constitute an Investment Election as to the amount transferred and shall be effective immediately upon transfer. The timing of transfers between investment options, the procedures for transfer, and the valuation of transferred Accounts or portions of Accounts shall be determined by the Committee.

6.4 The Committee shall issue a report at least annually to each Participant holding an Account, setting forth at least the following:

(a) with respect to amounts invested under Section 6.1 hereof, as of the last day of the Plan Year, the Account Balance, the dollar amount of deferrals, and earnings thereon, and

(b) with respect to amounts invested under Section 6.2 hereof, the Closing Price of shares of Common Stock credited to each Participant's Account as of the Valuation Date coincident with the last business day of the Plan Year, the total number of deemed shares of Common Stock (and fractions thereof), and the total value of the Participant's deemed investment in Common Stock as of such Valuation Date.

ARTICLE VII

Account Distribution

7.1 (a) When a Participant retires or terminates his or her employment with an Employing Company, he or she shall be entitled to receive in cash an amount equal to the dollar amount of any deferrals and any amounts in lieu of interest thereon credited to his or her

Account under Section 6.1 hereof, and the dollar value of the product of the Closing Price multiplied by the number of deemed shares of Common Stock (and fractions thereof) credited to his or her Account in accordance Section 6.2 hereof, determined as of the date the Account is valued for distribution. If such date is a non-business day, the Account shall be valued as of the next business day. Such amounts shall be paid in accordance with the Participant's most recent Distribution Election effective in accordance with Section 7.4. No portion of a Participant's Account shall be distributed in Common Stock.

(b) The transfer by a Participant between subsidiaries or affiliates of Southern shall not be deemed to be a termination of employment with an Employing Company for purposes of the Plan.

7.2 In the event that a Participant's most recent Distribution Election effective in accordance with Section 7.4 is to receive a lump-sum distribution of his or her Account, the dollar amount determined under Section 7.1 hereof shall be paid to the Participant not later than sixty (60) days following the date on which the Participant's termination of employment occurs, or as soon as reasonably practicable thereafter.

7.3 In the event that a Participant's most recent Distribution Election effective in accordance with Section 7.4 is to receive the distribution of his or her Account in annual installments, the first payment shall be made not later than sixty (60) days following the date on which the Participant's termination of employment occurs, or as soon as reasonably practicable thereafter, and shall be in an amount equal to the dollar balance in the Participant's Account determined under Section 7.1 hereof, divided by the number of annual installments elected. Subsequent annual installments shall be in an amount equal to the dollar value of the Participant's Account determined under Section 7.1 hereof divided by the number of the remaining annual payments, and shall be paid as soon as practicable following each anniversary of the initial payment date until the balance of the Participant's Account is paid in full.

7.4 The Participants' initial Distribution Elections may not be revoked and shall govern the distribution of the Participants' Accounts. Notwithstanding the foregoing, and except as otherwise provided herein, the Committee may, in its sole discretion, upon application by a Participant, accept an amended Distribution Election from a Participant provided the election is made not later than the 366th day prior to a distribution of such Participant's Account in accordance with the terms of the Plan; provided further, however, that any Participant who is required to file reports pursuant to Section 16(a) of the Securities and Exchange Act of 1934, as amended, with respect to equity securities of Southern shall not be permitted to amend his or her Distribution Election during any time period for which such Participant is required to file any such reports with respect to the portion of his or her Account invested in accordance with the provisions of Section 6.2 of this Schedule, unless the Committee in its sole discretion shall determine otherwise.

7.5 Upon the death of a Participant prior to the complete distribution of his or her Account, the unpaid Account balance shall be paid in the sole discretion of the Committee (a) in a lump sum to the Participant's designated beneficiary within sixty (60) days following the date on which the Committee is provided evidence of the Participant's death (or as soon as reasonably practicable thereafter) or (b) in accordance with the Distribution Election made by such Participant. In the event a beneficiary designation is not on file or the designated beneficiary is deceased or cannot be located, payment will be made to the Participant's estate.

7.6 Beneficiary designations may be changed by the Participants at any time without the consent of any prior beneficiary.

7.7 Upon the total disability of a Participant, as determined by the Social Security Administration, prior to the complete distribution of his or her Account, the unpaid balance of his or her Account shall be paid in the sole discretion of the Committee (a) in a lump sum to the Participant or his or her legal representative within sixty (60) days following the date on which the Committee receives notification of the determination of disability by the Social Security Administration (or as soon as reasonable practicable thereafter) or (b) in accordance with the Participant's Deferral Election.

7.8 Upon application made by a Participant, his or her designated beneficiary, or an authorized legal representative, the Committee may in its sole discretion determine to accelerate payments or, in the event of death or total disability (as determined by Social Security Administration), may extend or otherwise make payments in a manner different from the manner in which such payment would otherwise be made under the Participant's Deferral Election in the absence of such determination.

7.9 In the event a Participant who is employed on or after January 1, 1999 with an "Employing Company" (as defined in the Change in Control Benefits Protection Plan) disputes the calculation of his Account or payment of amounts due under the terms of this Plan, such Participant has recourse against the Company, the Employing Company by which Participant is employed, if different, the Plan, and the Trust for the payment of benefits to the extent the Trust so provides.

7.10 The provisions of the Change in Control Benefit Benefits Protection Plan are incorporated herein by reference to determine the occurrence of a change in control or preliminary change in control of Southern or an Employing Company, the benefits to be provided hereunder, and the funding of the Trust in the event of such a change in control. Any modifications to the Change in Control Benefits Protection Plan are likewise incorporated herein.

ARTICLE VIII

Miscellaneous Provisions

8.1 Except for Section 8.3 of the main body of the Plan, Article VIII is hereby incorporated by reference into this Schedule. Any amendment to Article VIII of the main body of the Plan shall operate as an amendment to this Article VIII of the Schedule except that Section 8.2 below shall set forth the sole method for amending and/or terminating this Schedule.

8.2 This Schedule may be amended, modified, or terminated by the Board of Directors in its sole discretion at any time and from time to time by resolution expressly modifying this Schedule; provided, however, that (a) Section 7.10 of this Schedule may not be amended following a “Southern Change in Control” or “Subsidiary Change in Control” (as defined in the Change in Control Benefits Protection Plan), (b) no such amendment, modification, or termination shall impair any rights to any amounts which have been earned or deferred under the Plan prior to such amendment, modification, or termination and/or (c) Article III and Section 8.1 of this Schedule may be amended in accordance with their terms. Payment in full in cash of the amount credited to a Participant’s Account governed by this Schedule as of the date of any amendment, modification, or termination of the Plan shall not be deemed to be an impairment of the Participant’s rights under the Plan. It is the Company’s intent that any modification to this Schedule shall not constitute nor shall it be interpreted to be a “material modification” of any right or feature of this Schedule as such term is defined under the 409A Guidance.

Exhibit 10(a)16

**SECOND AMENDMENT TO THE SOUTHERN COMPANY**
**SUPPLEMENTAL EXECUTIVE RETIREMENT PLAN**

**WHEREAS,** the Board of Directors of Southern Company Services, Inc. (the "Company") heretofore established and adopted the Southern Company Supplemental Executive Retirement Plan, as amended and restated effective June 30, 2016 (the "Plan"); and

**WHEREAS,** the Company desires to amend the Plan to add "Southern Power Company" as an Affiliated Employer; and

**WHEREAS,** Section 6.2 of the Plan provides in relevant part that the Plan may be amended or modified at any time by the Company.

**NOW, THEREFORE,** effective as the date set forth below, the Company hereby amends the Plan as follows:

**1.**

Effective January 1, 2018, Appendix A of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

**APPENDIX A**

**THE SOUTHERN COMPANY SUPPLEMENTAL**
**EXECUTIVE RETIREMENT PLAN**

**AFFILIATED EMPLOYERS AS OF JANUARY 1, 2018**

Alabama Power Company
Georgia Power Company
Gulf Power Company
Mississippi Power Company
Southern Communications Services, Inc.
Southern Company Energy Solutions, LLC
Southern Company Services, Inc.
Southern Nuclear Operating Company, Inc.
Southern Power Company

**2.**

Except as amended herein by this Second Amendment, the Plan shall remain in full force and effect.

**[SIGNATURE ON FOLLOWING PAGE]**

IN WITNESS WHEREOF, the Company, through its duly authorized officer, has adopted this Second Amendment to the Southern Company Supplemental Executive Retirement Plan, as amended and restated as of June 30, 2016 this 29th day of November, 2017.

**SOUTHERN COMPANY SERVICES, INC.**

By: /s/Nancy E. Sykes

Name: Nancy E. Sykes

Exhibit 10(a)17

**SECOND AMENDMENT TO THE SOUTHERN COMPANY SUPPLEMENTAL BENEFIT PLAN**

**WHEREAS,** the Board of Directors of Southern Company Services, Inc. (the "Company") heretofore established and adopted the Southern Company Supplemental Benefit Plan, as amended and restated effective June 30, 2016 (the "Plan"); and

**WHEREAS,** the Company desires to amend the Plan to implement changes to (i) the calculation of the Single-Sum Amount for a Participant who first participates in the Plan on or after January 1, 2018 or who is rehired on or after January 1, 2018, (ii) change the eligibility requirements effective January 1, 2018, (iii) add "Southern Power Company" and "Southern Company Gas' affiliated companies" as Employing Companies, and (iv) provide for the merger of the AGL Resources Inc. Excess Benefit Plan with and into the Plan, and special rules associated with the transferred benefits; and

**WHEREAS,** Section 6.2 of the Plan provides in relevant part that the Plan may be amended or modified at any time by the Company.

**NOW, THEREFORE,** effective as the date set forth below, the Company hereby amends the Plan as follows:

**1.**

Section 2.11 of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

2.11 "Discount Rate" shall mean:

(a) For a Participant who first participates in the Plan before January 1, 2018 and is not rehired on or after January 1, 2018. The thirty (30) year Treasury yield as published by the Department of Treasury for purposes of compliance with Code Section 417(e) determined for September of the calendar year prior to the calendar year in which a Participant Separates from Service provided that the maximum rate shall not exceed six percent (6%).

(b) For a Participant who first participates in the Plan on or after January 1, 2018 or is rehired on or after January 1, 2018. The "Applicable Interest Rate" defined by Code Section 417(e)(3) and determined for September of the calendar year prior to the calendar year in which a Participant Separates from Service.

**2.**

Section 2.34 of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

2.34 "Single-Sum Amount" shall mean:

(a) For a Participant who first participates in the Plan before

January 1, 2018 and is not rehired on or after January 1, 2018. The discounted value of the Pension Benefit based on a single life annuity form of benefit payable for an Expected Average Lifetime calculated using the Discount Rate. This Single-Sum Amount calculation shall be determined effective as of the first installment to be made under Section 5.2 (ignoring for this purpose any Key-Employee Delay) taking into account the following: (a) no reductions are applied for the Death Benefit Charge-Basic or the Death Benefit Charge-Enhanced for pre-retirement death benefit coverage under the Pension Plan; and (b) the Pension Benefit and Expected Average Lifetime shall be based on the Participant's age as of such first installment date.

(b) For a Participant who first participates in the Plan on or after January 1, 2018 or is rehired on or after January 1, 2018.

(1) *Participant retires under the terms of the Pension Plan at Separation from Service* . The actuarial present value of the Pension Benefit payable as a single life annuity calculated using the Discount Rate and the "Applicable Mortality Table" within the meaning of Code Section 417(e)(3) described by the Secretary of the Treasury for the calendar year in which the Participant Separates from Service. This Single-Sum Amount calculation shall be determined effective as of the first installment to be made under Section 5.2 (ignoring for this purpose any Key-Employee Delay) taking into account the following: (a) no reductions are applied for the Death Benefit Charge-Basic or the Death Benefit Charge-Enhanced for pre-retirement death benefit coverage under the Pension Plan; and (b) the actuarial present value calculation reflects an immediate factor; and (c) the Pension Benefit is payable as of the first installment to be made under Section 5.2 (ignoring for this purpose any Key-Employee Delay).

(2) *Participant is not eligible to retire under the terms of the Pension Plan at Separation from Service* . The actuarial present value of the Pension Benefit payable as a single life annuity calculated using the Discount Rate and the "Applicable Mortality Table" within the meaning of Code Section 417(e)(3) described by the Secretary of the Treasury for the calendar year in which the Participant Separates from Service. This Single-Sum Amount calculation shall be determined effective as of September 1 of the calendar year following the calendar year of Separation from Service taking into account the following: (a) no reductions are applied for the Death Benefit Charge-Basic or the Death Benefit Charge-Enhanced for pre-retirement death benefit coverage under the Pension Plan; and (b) the actuarial present value calculation reflects a deferred to Normal Retirement Date factor; and (c) the Pension Benefit is payable at the Participant's Normal Retirement Date.

**3.**

Section 4.2 of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

(b) Determination of Eligibility . Effective beginning January 1, 2018, Employees are determined to be eligible to participate in the Plan if they meet one or more of the criteria outlined under Section 4.1. For the avoidance of doubt, eligibility beginning January 1, 2018, is based on an Employee meeting one or more of the criteria in 2018 and later Plan Years. Prior to January 1, 2018, the Administrative Committee determined which Employees were eligible to participate in the Plan. Employees who were determined to be eligible to participate by the Administrative Committee prior to January 1, 2018, will continue to participate in the Plan on and after January 1, 2018. Upon becoming a Participant, an Employee shall be deemed to have assented to the Plan and to any amendments hereafter adopted. The Administrative Committee shall be authorized to rescind the eligibility of any Participant if necessary to ensure that the Plan is maintained primarily for the purpose of providing deferred compensation to a select group of management or highly compensated employees under the Employee Retirement Income Security Act of 1974, as amended. In addition, a Participant shall not be eligible for a Pension Benefit under the Plan unless such Participant shall be entitled to a vested benefit under the Pension Plan. If an Employee who was employed by Mirant Corporation (f/k/a Southern Energy, Inc.) ("Mirant") or an affiliate thereof on or after April 2, 2001 is thereafter employed by an Employing Company, he shall be treated the same as a new hire and none of his service with Mirant shall be considered as Accredited Service under Section 5.1. Effective beginning January 1, 2018, a Participant's "earnings" that are defined under the Pension Plan shall not include commissions earned by any commissioned Employee for purposes of determining eligibility for the Plan.

**4.**

Section 5.1(b) of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

(b) For purposes of this Section 5.1, the Pension Benefit of a Participant shall be calculated based on the Participant's "earnings" that are defined under the Pension Plan, as modified below, without regard to the limitations of Section 401(a)(17) of the Code. For purposes of determining such "earnings," all incentive pay earned while he is an Employee under any annual group incentive plans, as defined in Section 4.2 of the Pension Plan, shall be considered, provided such incentive award was earned on or after January 1, 1994. However, incentive pay shall only be included in a Pre-2016 Participant's "earnings" for purposes of calculating such Pre-2016 Participant's Pension Benefit using the 1.25% formula described in Section 4.2 of the Pension Plan. Effective beginning January 1, 2018, a Participant's "earnings" shall not include commissions earned by any commissioned Employee for purposes of determining the Pension Benefit calculated under the Plan.

**5.**

Section 5.2(e) of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

(e) Participants Who Terminate with Vested Benefits.

(1) *General Rule* . With respect to a Participant who Separates from Service on or after March 1, 2007, who is not eligible to retire under Sections 4.1(a), 4.1(b) or 4.1(c) of the Pension Plan, but who is vested in his Retirement Income under Section 4.1(d) of the Pension Plan, notwithstanding anything to the contrary, such Participant shall receive a Pension Benefit in the form of a single payment made as of September 1 of the calendar year following the calendar year of termination from employment.

(2) *For a Participant who first participates in the Plan before January 1, 2018 and is not rehired on or after January 1, 2018* . The single payment is equal to (A) divided by (B) below:

(A) The Single-Sum Amount determined as if the Participant's first installment date was to be coincident with his Normal Retirement Date.

(B) The sum of one (1) plus the Discount Rate raised to a power equal to the number of years and months between the Participant's Normal Retirement Date and the September 1 of the calendar year following the calendar year of termination from employment.

(3) *For a Participant who first participates in the Plan on or after January 1, 2018 or is rehired on or after January 1, 2018* . The single payment is equal to the Single-Sum Amount described in Section 2.34(b)(2).

For the avoidance of doubt, the Discount Rate used for the calculations in Section 5.2(e)(2) and 5.2(e)(3) above is to be the Discount Rate applicable for the calendar year the Participant Separates from Service.

(4) *Death Benefits* . With respect to a Participant who first participates in the Plan before January 1, 2018 and is not rehired on or after January 1, 2018, to which this Section 5.2(e) applies, if such a Participant dies after Separation from Service but prior to payment in accordance with Section 5.2(e)(1) above and prior to July 1, 2017, the Provisional Payee, if any, shall receive the single payment provided in Section 5.2(e)(2) above at the same time the Participant would have received such payment if he had not died.

If a Participant dies on or after July 1, 2017, refer to Section 5.2(f).

(5) *Total Disability.* The determination of whether of Participant has a Separation from Service by reason of a Total Disability will be made in accordance with Code Section 409A and such Participant shall receive a Pension Benefit in the form of a single payment made as of September 1 of the calendar year following the calendar year in which the Separation from Service occurs.

**6.**

Section 5.2(f) of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

(f) Designated Beneficiary Death Benefit on and after July 1, 2017.

(1) If a Participant dies on or after July 1, 2017, while in active service or after Separation from Service with a vested Pension Benefit in this Plan, and

(A) If such Participant is a Pre-2016 Participant, and (i) he has elected his Spouse as his sole Designated Beneficiary, such Spouse shall receive 100% of the Single-Sum Amount, or (ii) he has elected a Designated Beneficiary(ies) which is not his Spouse, such Designated Beneficiary(ies) shall receive 50% of the Single-Sum Amount with an equal portion of such Single-Sum Amount payable to each such living Designated Beneficiary, or

(B) If such Participant is a 2016 Participant, the Designated Beneficiary(ies) (whether or not the Spouse) shall receive 50% of the Single-Sum Amount with an equal portion of such Single-Sum Amount payable to each such living Designated Beneficiary.

(2) The Single-Sum Amount described in Section 5.2(f)(1) above is payable to the Designated Beneficiary(ies) on the first of the month following the date of the Pre-2016 Participant's or the 2016 Participant's death. The benefit will be payable as soon as administratively feasible after the Designated Beneficiary(ies) have been confirmed and located.

(3) If a Pre-2016 Participant or a 2016 Participant who first participates in the Plan before January 1, 2018 and is not rehired on or after January 1, 2018, dies while in active service and prior to age 50, the Single-Sum Amount described in Section 5.2(f)(1) above is calculated as (A) divided by (B) below:

(A) The Single-Sum Amount determined as if the Participant survived to his fiftieth ($50^{th}$) birthday and Separated from Service.

(B) The sum of one (1) plus the Discount Rate raised to a power equal to the number of years and months between the first of the second month following the Participant's 50 th birthday and the first of the month following the Participant's date of death.

(4) If a Pre-2016 Participant or a 2016 Participant who first participates in the Plan on or after January 1, 2018 or is rehired on or after January 1, 2018, dies while in active service and prior to age 50, the Single-Sum Amount described in Section 5.2(f)(1) above is calculated as the actuarial present value of the Pension Benefit payable as a single life annuity calculated using the Discount Rate and the "Applicable Mortality Table" within the meaning of Code Section 417(e)(3) described by the Secretary of the Treasury for the calendar year in which the Participant Separates from Service. This Single-Sum Amount calculation shall be determined as of the first of the month following the Participant's date of death taking into account the following: (a) no reductions are applied for the Death Benefit Charge-Basic or the Death Benefit Charge-Enhanced for preretirement death benefit coverage under the Pension Plan; and (b) the actuarial present value calculation reflects a deferred factor to the first of the month coincident with or following the Participant's age 50; and (c) the Pension Benefit is payable at the first of the month coincident with or following the Participant's age 50.

(5) If a Pre-2016 Participant or a 2016 Participant who first participates in the Plan on or after January 1, 2018 or is rehired on or after January 1, 2018, dies while in active service at age 50 or later, the Single-Sum Amount described in Section 5.2(f)(1) above is calculated as the Single-Sum Amount described in Section 2.34(b)(1).

(6) If a Pre-2016 Participant or a 2016 Participant who first participates in the Plan before January 1, 2018 and is not rehired on or after January 1, 2018, dies after Separation from Service but prior to payment in accordance with Section 5.2(e)(1) above, the Single-Sum Amount described in Section 5.2(f)(1) above is calculated as (A) divided by (B) below:

(A) The Single-Sum Amount determined as if the Participant's first installment date was to be coincident with his Normal Retirement Date.

(B) The sum of one (1) plus the Discount Rate raised to a power equal to the number of years and months between the Participant's Normal Retirement Date and the first of the month following the Participant's date of death.

(7) If a Pre-2016 Participant or a 2016 Participant who first participates in the Plan after January 1, 2018 or is rehired on or after January 1, 2018, dies after Separation from Service but prior to payment in accordance with Section 5.2(e)(1) above, the Single-Sum Amount described in Section 5.2(f)(1) above is calculated as the actuarial present value of the Pension Benefit payable as a single life annuity calculated using the Discount Rate and the "Applicable

Mortality Table" within the meaning of Code Section 417(e)(3) described by the Secretary of the Treasury for the calendar year in which the Participant Separates from Service. This Single-Sum Amount calculation shall be determined as of the first of the month following the Participant's date of death taking into account the following: (a) no reductions are applied for the Death Benefit Charge-Basic or the Death Benefit Charge-Enhanced for preretirement death benefit coverage under the Pension Plan; and (b) the actuarial present value calculation reflects a deferred to Normal Retirement Date factor; and (c) the Pension Benefit is payable at the Participant's Normal Retirement Date.

With respect to Section 5.2(f)(1) above, for the avoidance of doubt, the Participant may either elect his Spouse as his sole Designated Beneficiary or may elect Designated Beneficiary(ies) none of which is the Spouse.

**7.**

The Plan is hereby amended by adding a new Section 5.11, to read as follows:

5.11 Provisions Related to the AGL Resources Inc. Excess Plan

(a) Merger. Effective January 1, 2018, the AGL Resources Inc. Excess Plan (the "Gas Excess Plan") will be merged with and into the Plan. Except as otherwise provided in this Section, the benefits transferred from the Gas Excess Plan to the Plan will be considered Pension Benefits hereunder and will be subject to all of the provisions of the Plan related to Pension Benefits.

(b) Eligibility. Each individual who had an accrued benefit under the Gas Excess Plan as of December 31, 2017, will become a Participant in the Plan effective January 1, 2018, with respect to such accrued benefit. However, such individual's eligibility to actively participate in the Plan on and after January 1, 2018, will be determined by the eligibility provisions of the Plan.

(c) Distributions. The payment of benefits for any Participant who had an accrued benefit under the Gas Excess Plan as of December 31, 2017, will be governed by the payment provisions of the Gas Excess Plan, including but not limited to (i) provisions regarding the timing and form of payment following separation from service, (ii) the definition of separation from service, (iii) application of the 6-month delay to key employees, (iv) mandatory cashouts, and(v) preretirement survivor benefits. Provisions in the Plan related to payment timing upon a change in control will not apply to such Participants.

**8.**

Appendix A of the Plan is hereby amended by deleting it in its entirety and replacing it with the following:

**APPENDIX A**

**THE SOUTHERN COMPANY SUPPLEMENTAL BENEFIT PLAN**
**EMPLOYING COMPANIES AS OF JANUARY 1, 2018**

Alabama Power Company
Georgia Power Company
Gulf Power Company
Mississippi Power Company
Southern Communications Services, Inc.
Southern Company Energy Solutions, LLC
Southern Company Gas and its affiliated companies
Southern Company Services, Inc.
Southern Nuclear Operating Company, Inc.
Southern Power Company

**9.**

Except as amended herein by this Second Amendment, the Plan shall remain in full force and effect.

IN WITNESS WHEREOF, the Company, through its duly authorized officer, has adopted this Second Amendment to the Southern Company Supplemental Benefit Plan, as amended and restated as of June 30, 2016, this 12th day of December, 2017.

**AND**

**BECHTEL POWER CORPORATION**

**DATED AS OF OCTOBER 23, 2017**

**TABLE OF CONTENTS**

## EXHIBITS

# CONSTRUCTION COMPLETION AGREEMENT

This CONSTRUCTION COMPLETION AGREEMENT ("Agreement") is entered into as of the 23 rd day of October, 2017 ("Effective Date"), by and between GEORGIA POWER COMPANY, a Georgia corporation ("GPC"), acting for itself and as agent for OGLETHORPE POWER CORPORATION (AN ELECTRIC MEMBERSHIP CORPORATION), an electric membership corporation formed under the laws of the State of Georgia, MUNICIPAL ELECTRIC AUTHORITY OF GEORGIA, a public body corporate and politic and an instrumentality of the State of Georgia, MEAG POWER SPVJ, LLC, MEAG POWER SPVM, LLC, MEAG POWER SPVP, LLC, each a Georgia limited liability company, and THE CITY OF DALTON, GEORGIA, an incorporated municipality in the State of Georgia acting by and through its Board of Water, Light and Sinking Fund Commissioners (collectively, the "Owners"); and BECHTEL POWER CORPORATION, a Nevada corporation ("Contractor"). Owners and Contractor may be referred to individually as a "Party" and collectively as the "Parties".

## RECITALS

WHEREAS, Owners are presently developing and constructing two new nuclear plant units and related facilities, structures and improvements at the Vogtle plant site in Georgia, which units are designated as Vogtle Units 3 and 4;

WHEREAS, Contractor is engaged in the business of providing services for the construction of power generation facilities;

WHEREAS, Owners and Contractor desire to enter into this Agreement in order for Contractor to provide certain services in order for Owners to complete the construction of the Vogtle Units 3 and 4, pursuant to the terms and conditions set forth herein.

NOW, THEREFORE, in consideration of the recitals, the mutual promises herein and other good and valuable consideration, the receipt and sufficiency of which the Parties acknowledge, the Parties, intending to be legally bound, stipulate and agree as follows:

1.1 Defined Terms . For purposes of this Agreement, the following words and expressions shall have the meanings hereby assigned to them, except where the context clearly indicates a different meaning is intended.

" Abandon " or " Abandonment " means conduct by Contractor inconsistent with continued performance of Contractor's obligations under this Agreement from which it would be reasonable to conclude that Contractor has decided to discontinue indefinitely performance of the Work, provided that Abandon shall not include stopping or suspending performance of the Work where: (i) continued performance of the Work is prevented by a Force Majeure Event, or (ii) Contractor is otherwise entitled to suspend performance of the Work under this Agreement.

" Adjustment Event " means each of the following, but (except with respect to subpart (xiv) below) only to the extent not attributable to the acts or omissions of Contractor, any of its Subcontractors, any Contractor-Managed Subcontractor or their respective Personnel, or breach of this Agreement by Contractor or any Subcontractor, and only to the extent material:

(i) An Owner Directed Change

(ii) Provision of an Issued for Construction Document to Contractor or a Contractor-Managed Subcontractor later than the later of: (a) the date (if any) indicated in the Baseline Schedule for provision of such Issued for Construction Document and (b) the time required to support Contractor's performance of the Work or the Contractor-Managed Subcontractor's performance of its work, in accordance with the Baseline Schedule;

(iii) Provision of an Issued for Construction Document to Contractor or a Contractor-Managed Subcontractor (or a change, modification or revision thereto) which necessitates (x) change(s) to Contractor's planned sequence of construction activities as shown in the Baseline Schedule or (y) change(s) to Contractor's planned construction methodology as documented by previous Monthly Status Reports or similar reports previously provided by Contractor to Owners (e.g., required use of additional large crane) or (z) rework of construction work previously performed;

(iv) The provision of Plant Equipment and Materials to Contractor or a Contractor-Managed Subcontractor later than the later of: (a) the date (if any) indicated in the Baseline Schedule for provision of such Plant Equipment and Materials, and (b) the date required to support Contractor's performance of the Work or the Contractor-Managed Subcontractor's performance of its work, in accordance with the Baseline Schedule;

(v) Delay or failure by Owners to perform their obligations under this Agreement by the later of: (a) the dates indicated in the Baseline Schedule, and (b) the date required to support Contractor's performance of the Work or a Contractor-Managed Subcontractor' performance of its work, in accordance with the Baseline Schedule;

(vi) Delay by Owner-Managed Subcontractors (but not delays by Contractor-Managed Subcontractors) or delay by other contractors or suppliers for which Owners are responsible (but not delays by Contractor-Managed Subcontractors), in each case beyond the applicable date(s) required to support the Baseline Schedule;

(vii) A change in Site Rules, policies, procedures or other Site-related requirements that materially impact or affect the Work, which are issued by or on behalf of Owners after the Effective Date;

(viii) A Force Majeure Event;

(ix) Subject to Section 12.1.1, a Change in Law to the extent that Contractor or a Contractor-Managed Subcontractor is legally obliged to comply with such change;

(x) A deviation from a Target Assumption set forth in Exhibit B;

(xi) Suspension of performance of the Work pursuant to Section 2.13.5, Section 8.6 or Section 21.1;

(xii) Defects in work performed by others prior to the Effective Date that are discovered following the Effective Date; provided that such an Adjustment Event shall not result in an adjustment to the Target Construction Cost and the costs resulting from such an Adjustment Event shall be treated as Excluded Costs;

(xiii) The denial by Owners of a requested deviation requiring the use of Contingency funds under Section 2.21.2(iii), unless Contractor proceeds with implementation of the deviation notwithstanding Owners' denial; and

(xiv) The incurrence of costs by Contractor pursuant to Section 10.4.2 or Section 11.4.2 in order to mitigate the effects of an Adjustment Event set forth in subparts (i) through (xiii) above).

" AEA " means the Atomic Energy Act of 1954, 42 U.S.C. § 2011 et seq.

" Affected Party " has the meaning set forth in Section 13.1.

" Affiliate " means, with respect to any Party, any other Person that, as of the Effective Date or at any time thereafter, (a) owns or controls, directly or indirectly, the Party, (b) is owned or controlled by the Party, or (c) is under common ownership or control with the Party, where "own" means ownership of fifty percent (50%) or more of the equity interests or rights to distributions on account of equity of the Party and "control" means the power to direct the management or policies of the Party, whether through the ownership of voting securities, by contract, or otherwise.

" Affiliate Subcontractor " means a Subcontractor that is an Affiliate of Contractor, including Richmond, BEO and Custom Arc Services, Inc.

" Affiliate Subcontractor Claim " means a Claim made by an Affiliate Subcontractor and all damages, liabilities, losses, penalties, costs and expenses (including attorneys' fees) related thereto.

" Agreement " has the meaning set forth in the first paragraph above and shall include all Exhibits and amendments hereto, including Change Orders.

" Agency Agreements " means: (i) the Ownership Agreement, (ii) that certain letter dated July 28, 2006 entitled "Designation of Southern Nuclear Operating Company, Inc. as Agent for Georgia Power Company Under the Vogtle Additional Units Development Agreement," as amended by any amendments that are provided to Contractor; and (iii) that certain July 30, 2008 letter entitled

"Designation of Southern Nuclear Operating Company, Inc. ("Southern Nuclear" or "SNC"), as Agent for Georgia Power Company ("Georgia Power" or "GPC") under the Vogtle Additional Units Ownership Agreement for Contract Management and Construction Services," as amended by any amendments that are provided to Contractor.

" Amended and Restated Staff Augmentation Agreement " means the staff augmentation agreement signed by the Parties as of the Effective Date.

" Applicable Law Compliant " has the meaning set forth in Section 12.1.2.

" ASME " means the American Society of Mechanical Engineers.

" Base Fee " has the meaning set forth in Section 7.2.

" Baseline Schedule " means the Primavera P6 file set forth in Exhibit C, as it may be modified pursuant to this Agreement.

" BEO " has the meaning set forth in Section 2.17.2.

" Branch Technical Position " means a final report prepared by NRC staff setting forth recommendations or a method the staff considers acceptable for performing analyses, calculations, or other technical evaluations that are used to satisfy or to evaluate or demonstrate compliance with NRC regulatory requirements. Each Branch Technical Position purports to be a Branch Technical Position on its face or is identified by a number that includes the designator BTP (e.g., BTP 8-n).

" Bulletin " means a final document produced by the NRC that (i) requests licensee actions and/or information to address significant issues regarding matters of safety, security, safeguards, or environmental significance that have great urgency, and (ii) requires a written response. Each Bulletin is identified by a number that includes the designator BL and a reference to the year of issuance (e.g., BL-15-nn).

" Business Day " means every Day other than Saturday, Sunday or a legal holiday recognized by the State of Georgia.

" CAS " means Custom Arc Services, Inc.

" Cash Security " means cash security, free and clear of any adverse Lien or interest, provided pursuant to a pledge agreement and a control agreement, each in a form and substance acceptable to the Party to whom such security is being provided.

" Change Order " means a change to the scope of Work or the terms of this Agreement (including an adjustment to the Target Construction Cost or Target Completion Dates) agreed upon and executed in writing by the Parties.

" Change in Law " means (a) the adoption or change, after the Effective Date, of or in the judicial or administrative interpretation of any Laws (excluding any Laws relating to net income Taxes), which is inconsistent or at variance with any Laws in effect prior to the Effective Date, (b) the imposition after the Effective Date of any requirement for a new Government Approval, or (c) the imposition by a Government Authority after the Effective Date of any condition or requirement (except to the extent that any conditions or requirements result from the acts or omissions of Contractor or a Subcontractor) not required as of the Effective Date on or with respect to the issuance, renewal or extension of a Government Approval. Notwithstanding the foregoing definition of "Change in Law," (i) where the NRC is the involved Government Authority, only (A) statutes that are duly enacted and (B) final and official versions of NRC Regulations, Regulatory Guides, NUREGs, Branch Technical Positions, Standard Review Plans, Interim Staff Guidance, Bulletins, Orders, and written directives, and revisions thereto, in which NRC acknowledges a new regulatory requirement or a change in an existing requirement, and that are officially promulgated or issued subsequent to the Effective Date, shall be considered a "Change in Law" under this Agreement and shall be specifically referred to herein as an "NRC Change in Law"; and (ii) any change in Law that occurs before the Effective Date but which goes into force and effect after the Effective Date will not be a Change in Law.

" Claim " means a claim, demand, cause of action of any kind and character, and all damages, liabilities, losses, penalties, costs and expenses (including attorneys' fees) related thereto.

" Combined Construction Costs " means the sum of:

(i) all Reimbursable Costs paid by Owners on or after the Effective Date until Final Completion, except for: (a) costs relating to Commissioning and Startup Support, (b) Excluded Costs as identified on Exhibit M, and (c) costs disputed by Owners that are refunded by Contractor or which are withheld by Owners; plus

(ii) all amounts paid to Contractor-Managed Subcontractors with respect to work accomplished following the Effective Date until Final Completion, excluding (a) Excluded Costs as identified on Exhibit M, and (b) amounts recovered by Owners from Contractor-Managed Subcontractors.

" Commercial Operation Date " means, with respect to a given Unit, the Day on which Owners' testing and commissioning of such Unit are complete and Owners have declared that such Unit is ready for commercial operations.

" Commissioning and Startup Support" has the meaning set forth in Section 2.10.

" Contingency " means the amount included within the Target Construction Cost set forth in Exhibit M and which is indicated as contingency.

" Construction Equipment " means equipment, machinery, temporary facilities and/or test equipment used in the performance of the Work and which will not become a permanent part of the Facility.

" Construction Materials " means construction materials, tools and consumable items used in the performance of the Work and which will not become a permanent part of the Facility.

" Construction Site " means the areas where the Work will be performed at the Vogtle Electric Generation Plant and construction laydown areas, all as described in Exhibit D. The term "Construction Site" shall not include those areas dedicated solely to VEGP Units 1 and 2, except to the extent such portions are needed for access, ingress, egress, or will otherwise be impacted by the construction or operation of the Facility.

" Contract Claim " has the meaning set forth in Section 38.1.

" Contractor " has the meaning set forth in the opening paragraph of this Agreement.

" Contractor Event of Default " has the meaning set forth in Section 21.2.1.

" Contractor Guarantor " shall have the meaning set forth in Section 19.1.1.

" Contractor Interests " means Contractor and its Affiliates (including Richmond) and their respective directors, officers, employees, agents, shareholders and members (provided with respect to Williams Plant Services, LLC, the term "member" refers to and is limited to its ownership interest in Richmond).

" Contractor-Managed Subcontract " means those subcontracts entered into by Owners (or assigned to and accepted by Owners) that correspond to Contractor-Managed Subcontract Scope as identified in Exhibit E and which are to be managed and administered by Contractor as described in Section 3.3.

" Contractor-Managed Subcontractor " means a subcontractor under a Contractor-Managed Subcontract.

" Contractor-Managed Subcontract Scope " means the construction-related scope (including scopes of supply) as identified in Exhibit E, to be performed under Contractor-Managed Subcontracts, subject to a Contractor determination, in consultation with Owners as part of the Subcontract Scope Alignment Process, to perform such scope in another manner.

" Contractor's Authorized Representative " means the Person whom Contractor designates in writing to act on behalf of Contractor under this Agreement.

" Contractor's Government Approvals " means the construction license(s) and any other Government Approval required to be obtained by Contractor to perform the Work.

" Contractor's Quality Assurance Program " has the meaning set forth in Section 5.1.1.

" Contractor Trend Program " has the meaning set forth in Section 2.21.1.

" Core Scope " has the meaning set forth in Exhibit A.

" Cost Earned Fee " has the meaning set forth in Section 7.2(iv).

" Cumulative Final Completion Percentage " means, as of a given date, the combined cumulative construction completion percentage of the Work and Contractor-Managed Subcontractor work tied to achievement of Final Completion that has been completed under this Agreement as of such date, as determined by reference to the percentage completion methodology agreed by the Parties.

" Cumulative Mechanical Completion Percentage " means, as of a given date with respect to a given Unit, the combined cumulative construction completion percentage of the Work and Contractor-Managed Subcontract work tied to achievement of Mechanical Completion for such Unit that has been completed under this Agreement as of such date, as determined by reference to the percentage completion methodology agreed by the Parties.

" Dalton Utilities " has the meaning set forth in Section 18.3.1.

" Dalton Utilities Assets " has the meaning set forth in Section 18.3.1.

" Day " means a calendar day.

" Days Away From Work Rate " has the meaning set forth in Section 2.17.4.

" Deadband Amount " has the meaning set forth in Section 7.4.1.

" Defects Subcap " has the meaning set forth in Section 15.6.

" Design Authority " means the organization having responsibility for maintaining the Design Basis and ensuring that design output documents accurately reflect the Design Basis. Unless Owners otherwise notify Contractor in writing, Design Authority as used herein refers to Westinghouse.

" Design Basis " shall have the meaning ascribed to it in 10 C.F.R. § 50.2.

" Designated Persons " has the meaning set forth in Section 4.2.1.

" Development Agreement " means that certain Plant Vogtle Owners Agreement between the Owners dated May 31, 2008 authorizing development, construction, licensing and operation of additional generating units.

" DOE " means the U.S. Department of Energy.

" DOR " means the division of responsibilities between Owners and Contractor as set forth in Exhibit A.

" DRB " has the meaning set forth in Section 38.2.

" DRB Procedures " means the procedures set forth in Exhibit U.

" Early Completion Targets " has the meaning set forth in Section 9.1.

" Earned Fee " has the meaning set forth in Section 7.2.

" Effective Date " has the meaning set forth in the first paragraph of this Agreement.

" Eligible Letter of Credit " means one or more irrevocable standby letters of credit in substantially the form of Exhibit F (for the Repayment Letter of Credit) or Exhibit F (for an Owner Letter of Credit) (or such other form of irrevocable standby letter of credit as may reasonably acceptable to the Party to whom such letter of credit is required to be provided under this Agreement), issued by: (i) a U.S. commercial bank or U.S. branch of a major foreign bank, in each case who has and maintains bank assets of at least Ten Billion Dollars ($10,000,000,000) and at all times having a senior unsecured rating of A minus or higher by Moody's and A minus or higher by S&P; or (ii) in the case of OPC as the Party providing an Eligible Letter of Credit, CoBank, ACB, in each case in an amount required by the terms of this Agreement.

" Environmental Laws " means any and all statutes, laws, treaties, decrees, executive orders, rules, regulatory orders, directives, judgments, writs, approvals, ordinances, policies, regulations, interpretations and permits or other similar legal requirements as in effect, and as may be amended during the term of this Agreement, of a court, arbitrator, or governmental or political agency, body, or instrumentality with jurisdiction over a Party, the Facility or any Hazardous Materials connected with the Work, relating or applicable to pollution, protection of the environment, and health and safety issues, and including Releases or threatened Releases of Hazardous Materials, Remediation due to Hazardous Materials, the manufacturing, generation, use, processing, treatment, recycling, storage, handling and disposal of Hazardous Materials, human or natural exposure to Hazardous Materials, and interference with the use of property caused by or resulting from Hazardous Materials. Environmental Laws include without limitation the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. Section 9601 et seq.; the Federal Insecticide, Fungicide and Rodenticide Act, 7 U.S.C. Section 136 et seq.; the Resource Conservation and Recovery Act, 42 U.S.C. Section 6901, et seq.; the Toxic Substances Control Act, 15 U.S.C. Section 2601 et seq.; the Clean Air Act, 42 U.S.C. Section 7401 et seq.; the Federal Water Pollution Control Act, 33 U.S.C. Section 1251 et seq.; the Oil Pollution Act, 33 U.S.C. Section 2701 et seq.; the Endangered Species Act, 16 U.S.C. Section 1531 et seq.; the National Environmental Policy Act, 42 U.S.C. Section 4321, et seq.; the Occupational Safety and Health Act, 29 U.S.C. Section 651 et seq. (to the extent relating to human exposure to Hazardous Materials); the Homeland Security Appropriations Act of 2007, 109 P.L. 295; 120 Stat. 1355 (to the extent relating to the security of Hazardous Materials); the Hazardous Materials Transportation Act, 49 U.S.C. Section 1801, et seq., the Safe Drinking Water Act, 42 U.S.C. Section 300f et seq.; Emergency Planning and Community Right- to-Know Act, 42 U.S.C. Section 11001 et seq.; Atomic Energy Act, 42 U.S.C. Section 2014 et seq.; Nuclear Waste Policy Act, 42 U.S.C. Section 10101 et seq.; and their state, tribal and local counterparts or equivalents and regulations issued pursuant to any of those statutes.

" EPA Identification Number " means the identification number from the U.S. Environmental Protection Agency after notification to EPA from a hazardous waste generator by EPA Form 8700-12.

" Excluded Costs " has the meaning set forth in Exhibit M.

" Exhibit " means each one of the documents Exhibits A through V annexed to this Agreement, which are hereby incorporated into and made a part of this Agreement.

"Experience Modification Ratio" has the meaning set forth in Section 2.17.4.

"FFD" has the meaning set forth in Section 30.1.

"Facility" means Unit 3, Unit 4 and the Shared Facilities.

"Fee" means Two Hundred Forty Million Dollars ($240,000,000), subject to adjustment as provided in Section 3.2.3 and otherwise as provided in this Agreement.

"Final Completion" means both Units have achieved Mechanical Completion and all of the Work (other than Commissioning and Startup Support) is otherwise complete.

"Final Payment Invoice" has the meaning set forth in Section 8.8.1.

"Financing Parties" means the lenders and financing institutions providing construction, interim and/or long-term financing for the Facility or any portion thereof, including any financing in the form of a synthetic lease or leveraged lease, and their assigns and a trustee or agent acting on behalf of the lenders or financing institutions. DOE, in its capacity as a guarantor of any indebtedness issued by any Owner, and any trustee or agent acting on behalf of the DOE, shall be deemed "Financing Parties."

"Fitch Ratings" means Fitch Ratings Ltd.

"Force Majeure Event" has the meaning set forth in Article 13.

"Georgia PSC" means the Georgia Public Service Commission.

"GPC" has the meaning set forth in the opening paragraph of this Agreement.

"Government Approval" means an authorization, consent, approval, clearance, license, ruling, permit, tariff, certification, exemption, filing, variance, order, judgment, no-action or no- objection certificate, certificate, decree, decision, declaration or publication of, notices to, confirmation or exemption from, or registration by or with a Government Authority relating to the design, engineering, procurement, installation, construction, testing, start-up, financing, completion, ownership, operation or maintenance of the Facility.

"Government Authority" means a federal, state, county, city, local, municipal, foreign or other government or quasi-government authority or a department, agency, subdivision, court or other tribunal of any of the foregoing that has jurisdiction over Owners, Contractor, the Facility or the activities that are the subject of this Agreement.

"Hazardous Materials" means any and all chemicals, constituents, contaminants, pollutants, materials (including but not limited to petroleum or petroleum products), and wastes and any other carcinogenic, corrosive, ignitable, radioactive, reactive, toxic or otherwise hazardous substances, mixtures (whether solids, liquids, gases), daughter or degradation products or any similar substances now or at any time subject to regulation, control, remediation or otherwise addressed under Environmental Laws or considered to be hazardous or otherwise harmful to human health or the environment under such Environmental Laws and shall include those substances defined as a "source", "special nuclear" or "by-product" material pursuant to Section 10 of the AEA (42 U.S.C. § 2014 et seq .) and those substances defined as "residual radioactive material" in Section 101 of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. §§ 7901 et seq .).

" Increase Trigger Amount " has the meaning set forth in Section 7.4.2.

" Independent Engineer " means, if required by the Georgia PSC, Financing Parties or otherwise, a nationally recognized independent engineering firm(s), that is not an Affiliate of Owners or Contractor or a competitor of Owners or Contractor in the nuclear power plant market. As of the Effective Date, an Independent Engineer has been designated by the Georgia PSC. Any other Independent Engineer designated by the Financing Parties or otherwise, as applicable, shall be reasonably acceptable to Owners and Contractor.

" Initial Funding Request " has the meaning set forth in Section 8.2.1.

" Insolvent " means, with respect to a Person, that such Person shall have commenced a voluntary bankruptcy proceeding, or an involuntary bankruptcy proceeding shall have been commenced against such Person and an order for relief shall have been entered as to such involuntary bankruptcy, or there shall have been appointed a trustee or receiver for such Person or for all or a substantial part of its property, or a case or proceeding shall have been commenced by or on behalf of such Person seeking reorganization, liquidation, dissolution, winding-up or other such relief in respect of such Person under a bankruptcy, insolvency or other similar act or law of any jurisdiction.

" Interest Rate " means the Prime Rate plus two percent (2%).

" Interim Staff Guidance " means a document issued by the NRC to clarify or to address issues not discussed in a Standard Review Plan. Each Interim Staff Guidance is identified by a number including the designator ISG (e.g., DC/COL-ISG-nn).

" Invitees " means, with respect to a Person, such Personnel or other Persons as have been permitted entry onto the Construction Site by such Person.

" Issued for Construction Documents " means the detailed drawings and specifications setting forth in detail the requirements for the construction of the Facility.

" ITAAC " means the NRC inspections, tests and analyses and their associated acceptance criteria which are approved and issued for the Facility as contained in Appendix C of the COL.

" Key Personnel " has the meaning set forth in Section 2.7.1.

" Law " means (a) a constitution, statute, law, rule, regulation, code, treaty, ordinance, judgment, decree, writ, order, concession, grant, franchise, license, agreement, directive, guideline, policy, requirement, including without limitation Environmental Laws, or other governmental restriction or any similar form of decision of or determination by, or any binding interpretation or administration of any of the foregoing by, a Government Authority, whether now or hereafter in effect, (b) requirements or conditions on or with respect to the issuance, maintenance or renewal of a Government Approval or applications therefor, whether now or hereafter in effect, to the extent relevant to the Work, and (c) the Licensing Basis.

" Licensed Operator " has the meaning set forth in Section 4.1.1.

" Licensing Basis " means the ITAAC, combined licenses for each of Unit 3 and Unit 4 (NRC License Nos. NPF-91 and NPF-92, collectively referred to as "COL"), and other NRC rules, regulations, and requirements applicable to the Facility, including without limitation the current version of the Updated Final Safety Analysis Report as maintained by Owners pursuant to 10 C.F.R. § 50.71 and other Law ("UFSAR"), licensee's written commitments for ensuring compliance with and operation within applicable NRC requirements and the Facility-specific Design Bases (including without limitation all modifications and additions to such commitments that are docketed and in effect over the term of the COL).

" Lien " means a lien, mortgage, pledge, encumbrance, charge, security interest, option, right of first refusal, other defect in title or other restriction of any kind or nature.

" Loan Guaranty Agreements " means the respective Loan Guarantee Agreements between the U.S. Department of Energy, as guarantor, and MEAG, OPC, and GPC, respecting the Facility.

" Material Safety Data Sheets " are those sheets described in Section 2.13.1.

" MEAG " means the Municipal Electric Authority of Georgia.

" Mechanical Completion " has the meaning set forth in Exhibit G.

" Mechanical Completion Date " means, with respect to a given Unit, the Day on which such Unit achieves Mechanical Completion.

" Monthly Funding Period " has the meaning set forth in Section 8.2.1.

" Monthly Funding Request " has the meaning set forth in Section 8.2.1.

" Monthly Status Report " has the meaning set forth in Section 2.3.1.

" Moody's " means Moody's Investor Services, Inc.

" Non-Core Scope " means all portions of the Work that are not Core Scope.

" Non-Reimbursable Costs " has the meaning set forth in Section 7.1.2.

" NRC " means the U.S. Nuclear Regulatory Commission and its staff.

" NRC Change in Law " shall have the meaning set forth in the definition of "Change in Law."

" NRC Regulations " means those regulations promulgated by the NRC appearing in Title 10 of the Code of Federal Regulations.

“ Nuclear Incident ” means any occurrence that causes bodily injury, sickness, disease or death, or loss of or damage to property, or loss of use of property, arising out of or resulting from the radioactive, toxic, explosive, or other hazardous properties of source material, special nuclear material, or by-product material which is used in connection with the operation of the Facility. “Source material”, “special nuclear material”, and “by-product material”, as applicable to this Agreement shall have those meanings assigned by the AEA.

“ NUREG ” means reports or brochures, produced by the NRC, on regulatory decisions, results of research, results of incident investigations, and other technical and administrative information. Each NUREG is identified by a number including the designator NUREG (e.g., NUREG-nnnn).

“ OPC ” means Oglethorpe Power Corporation (An Electric Membership Corporation).

“ Orde r” means a document issued by the NRC, which is styled as or purports to be an “Order” on its face and satisfies one or more of the following: (i) is published or noticed in the Federal Register; (ii) is issued by the NRC Commission, including identification by a number with the designator CLI (e.g., CLI-15-nn); (iii) is issued by an NRC Atomic Safety and Licensing Board, including identification by a number with the designator LBP (e.g., LBP-15-nn), as part of an adjudicatory proceeding; or (iii) is issued pursuant to the NRC’s enforcement authority, including identification by a number with the designator EA (e.g., EA-15-nnn).

“ OSHA ” means the Occupation Safety and Health Administration.

“ Other Lead Personnel ” has the meaning set forth in Section 2.7.2.

“ Owner Controlled Insurance Program ” or “ OCIP ” has the meaning set forth in Section 17.1.3.

“ Owner Directed Change ” has the meaning set forth in Section 12.1.

“ Owner-Managed Subcontracts ” has the meaning set forth in Section 3.1.

“ Owner-Managed Subcontractors ” has the meaning set forth in Section 3.1.

“ Owners ” means all of GPC, Oglethorpe Power Corporation (An Electric Membership Corporation), the Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and Dalton Utilities; provided that GPC has been appointed as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), the Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and Dalton Utilities as set forth in Section 18.3.1.

“ Owner ” means any one of the Owners individually.

“ Owner Security ” has the meaning set forth in Section 19.2.1.

“ Owner Security Amount ” means [***].

“ Owners’ Authorized Representative ” has the meaning set forth in Section 4.1.2.

" Owners Event of Default " has the meaning set forth in Section 21.5.1.

" Owners' Government Approvals " means the Government Approvals required to be obtained by Owners with respect to the Facility.

" Owners' Interests " means Owners and their respective members and Affiliates, and their respective directors, officers, shareholders, employees, agents and lenders.

" Ownership Agreement " means that certain Plant Alvin W. Vogtle Additional Units Ownership Participation Agreement among the Owners, dated as of April 21, 2006, as amended by that certain Amendment No. 1 and Amendment No. 2 to such agreement, and any subsequent amendments that are provided to Contractor.

" Ownership Interest " means the respective percentage ownership interest of an Owner in the Facility as determined from time to time pursuant to the Ownership Agreement, provided that any changes to such ownership interests after the Effective Date will have no effect for the purposes of this Agreement until notice of such change is given to Contractor.

" Parent Company Guarantee " has the meaning set forth in Section 19.1.1.

" Party " and " Parties " has the meaning set forth in the opening paragraph of this Agreement.

" Performance Standards " has the meaning set forth in Section 2.6.

" Permitted Purpose " has the meaning set forth in Section 22.2.2.

" Person " means an individual, corporation, company, partnership, joint venture, association, trust, unincorporated organization or Government Authority.

" Personnel " means, with respect to a Person, such Person's employees, officers, directors, agents, personnel, and representatives, excluding personnel seconded by a Party to a Party.

" Plant Equipment and Materials " means all materials, supplies, apparatus, devices, machinery, vehicles, equipment, parts, components, instruments, appliances, computer hardware and associated software and appurtenances thereto and items of any kind that are or will be permanently incorporated into the Facility.

" Power Revenue Bond Resolution " means the Power Revenue Bond Resolution adopted by the Municipal Electric Authority of Georgia on August 30, 1976 that, as amended, restated and supplemented, authorizes the issuance of both senior lien bonds and subordinated lien bonds for the purpose of financing the Municipal Electric Authority of Georgia's "Project One" facilities.

" Prime Rate " means, as of a particular date, the prime rate of interest as published on that date in The Wall Street Journal, and generally defined therein as "the base rate on corporate loans posted by at least 75% of the nation's 30 largest banks." If The Wall Street Journal is not published on a date for which the interest rate must be determined, the prime interest rate shall be the prime rate published in The Wall Street Journal on the nearest-preceding date on which The Wall Street Journal was published. If The Wall Street Journal discontinues publishing a prime rate, the prime interest rate shall be the prime rate announced publicly from time to time by Bank of America, N.A. or its successor.

"Project Corrective Action Program" or "Project CAP" means measures established by Owners to assure that conditions adverse to quality, including, failures, malfunctions, deficiencies, deviations, defective Plant Equipment and Materials, and non-conformances are promptly identified and corrected. The measures shall assure that the cause of the condition is determined and corrective action taken to preclude repetition.

"Project Cost Forecast" means, at any given time, the then-current projection of total Combined Construction Costs provided by Contractor, which has been evaluated and reported by Owners' project control program.

"Project Employee Concerns Program" or "Project ECP" has the meaning set forth in Section 31.3.

"Project Schedule" means the working schedule utilized by the Parties for the performance of the Work and for the Owner activities required to support performance of the Work, as described in Article 9. The version of the Project Schedule in effect as of the Effective Date is the Baseline Schedule.

"Promptly" has the meaning set forth in Section 15.2.3.

"Property Tax" has the meaning set forth in Section 37.2.1.

"Protected Information" has the meaning set forth in Section 22.1.

"Prudent Practices" means the standards, practices and methods conforming to Law and that degree of skill and diligence that would reasonably be expected from a skilled and experienced contractor, as the case may be, engaged in the construction of nuclear power plants, and other large industrial construction projects in the United States. Prudent Practices are not limited to optimum practices or methods to the exclusion of others, but rather refer to a reasonable range of commonly used and reasonable practices and methods.

"Punch List" has the meaning set forth in Section 14.3.

"Ready for Fuel Load Date" means, with respect to a Unit, the date on which Owners have received all Government Approvals required, and have determined that all regulatory, safety and technical requirements have been satisfied, in order to commence the loading of nuclear fuel into such Unit.

"Recordable Case Incidence Rate" has the meaning set forth in Section 2.17.4.

"Reduction Trigger Amount" has the meaning set forth in Section 7.4.1.

"Regulatory Guide" means a document produced by the NRC that provides guidance to licensees and applicants on implementing specific parts of the NRC's regulations, techniques used by the NRC staff in evaluating specific problems or postulated accidents, and data needed by the NRC staff in its review of applications for permits or licenses. Each Regulatory Guide is identified by a number composed of the regulatory guide designator (RG), followed by a division number, a period, and a sequential guide number (e.g., RG 1.25).

" Release " means spilling, leaking, pumping, pouring, emitting, discharging, injecting, escaping, leaching, dumping, exacerbating, aggravating, abandoning or disposing into or migration within the environment.

" Reimbursable Costs " has the meaning set forth in Section 7.1.1.

" Remediation " means the investigation, removal, remediation and cleanup of, and other corrective action for, Hazardous Materials and/or damage to the environment caused by Hazardous Materials, including a Release thereof.

" Repayment Letter of Credit " has the meaning set forth in Section 8.7.5.

" Richmond " has the meaning set forth in Section 2.17.1.

" Safety Manual " has the meaning set forth in Section 2.15.2.

" S&P " means Standard and Poor's Rating Group.

" Sales Tax " means sales, use or similar transactional tax imposed by any Taxing Authority on Contractor, a Subcontractor, or Owners with respect to the transfer of tangible personal property or the provision of services pursuant to the Work.

" SCWE " has the meaning set forth in Section 31.2.

" Schedule Contingency " has the meaning set forth in Section 9.1.

" Schedule Earned Fee " has the meaning set forth in Section 7.2(iii).

" Section 12.1.2 Notice " has the meaning set forth in Section 12.1.2.

" Security Posting Condition " means a condition whereby the credit rating of (A) the senior unsecured debt (or issuer rating in the absence of a senior unsecured debt rating) of GPC, (B) the senior unenhanced debt of Dalton Utilities, (C) the senior unenhanced secured debt of Oglethorpe Power Corporation or (D) the senior unenhanced global scale rating to municipal obligations or equivalent rating scale of the Municipal Electric Authority of Georgia issued with respect to the Power Revenue Bond Resolution falls below any two of the following (or, if only rated by two of the following, falls below either, or, if only rated by one of the following, falls below such rating) or in the event that such Owner no longer has a credit rating from any of the following: (x) Baa3 by Moody's (if rated by Moody's), (y) BBB minus by S&P (if rated by S&P) or (z) BBB minus by Fitch Ratings (if rated by Fitch Ratings).

" Shared Facilities " means those systems, structures and components that will be utilized by both Units.

"Significant Construction Defect" means a construction defect meeting each of the following requirements:

(a) a defect in Work performed by Contractor or its Subcontractors, including Richmond, but not a defect in work performed by Contractor-Managed Subcontractors;

(b) the defect involves a situation where the physical construction deviates from the Performance Standards;

(c) the defect resulted from a programmatic failure by Contractor or its Subcontractor to comply with project processes and procedures in the performance of the Work. The foregoing is not intended to include a one-time or an isolated non-compliance or consequence, such as an instance of human error, which may result in a requirement for Contractor or its Subcontractor to remedy a defect. The foregoing is intended to include instances where multiple barriers or controls are not properly implemented or followed by Contractor or its Subcontractor, resulting in a defect which is required to be remedied; and

(d) the cumulative aggregate of costs to remedy the defect exceeds [***] .

"Site" means the premises on which the Vogtle Nuclear Generating Plant is located, including Unit Nos. 1 and 2, Unit 3 and Unit 4, including the Construction Site.

"Site Rules" has the meaning set forth in Section 28.1.

"Southern Nuclear" or "SNC" means Southern Nuclear Operating Company; provided, however, that the term "Southern Nuclear" shall also refer to any entity that is appointed by the Owners by written notice to Contractor to succeed Southern Nuclear in the performance of its functions under this Agreement.

"SNC Quality Assurance Program" has the meaning set forth in Section 5.1.3.

"Specifications" means the design and procurement specifications and drawings, and changes thereto for the design, engineering, procurement, installation and construction of the Facility.

"Standard Review Plan" means a document produced by the NRC that provides guidance to the NRC staff for reviewing an application to obtain an NRC license to construct or operate a nuclear facility or to possess or use nuclear materials.

"Subcontract" means a contract, purchase order or other writing between Contractor (or one of its Subcontractors) and a Subcontractor under which the Subcontractor performs or provides a portion of the Work.

"Subcontractor" means a Person other than Contractor performing or providing any portion of the Work on the Construction Site, hired either directly by Contractor or by a Person hired by Contractor and including every tier of subcontractors, sub-subcontractors and so forth.

" Subcontract Scope Alignment Process " means the process described in Section 3.2.2, Section 3.2.3 and Exhibit E.

" Supporting Documentation " shall have the meaning set forth in Section 8.10.

" Target Completion Date " means: (i) with respect to Unit 3, May 31, 2020; and (ii) with respect to Unit 4, May 31, 2021, in each case as such dates may be adjusted pursuant to this Agreement.

" Target Construction Cost " has the meaning set forth in Exhibit M, subject to modification as provided in this Agreement.

" Tax " or " Taxes " means all federal, state, provincial, territorial, municipal, local or foreign income, profits, franchise, gross receipts, environmental, customs, duties, net worth, sales, use, goods and services, withholding, value added, ad valorem, employment, social security, disability, occupation, pension, real property, personal property (tangible and intangible), stamp, transfer, conveyance, severance, production, excise and other taxes, withholdings, duties, levies, imposts and other similar charges and assessments (including without limitation fines, penalties and additions attributable to or otherwise imposed on or with respect to any such taxes, charges, fees, levies or other assessments, and interest thereon) imposed by or on behalf of a Taxing Authority.

" Taxing Authority " means a Government Authority exercising authority to impose, regulate, levy, assess or administer the imposition of a Tax.

" Third Party " means a Person other than Owners, Contractor and their respective Affiliates; Third Parties shall include Owners', Contractor's, and their Affiliates' respective employees, agents and personnel as well as Owners', Contractor's and their Affiliates' subcontractors and vendors of any tier.

" Third Party Claim " means a Claim made by a Third Party and all damages, liabilities, losses, penalties, costs and expenses (including attorneys' fees) related thereto.

" Trigger Date " means the Unit 3 Trigger Date or the Unit 4 Trigger Date, as determined in Section 7.3.1 and Section 7.3.3.

" Turnover Packages " means the complete work and quality control documentation in content reasonably acceptable to Owners, submitted by Contractor to Owners pursuant to Section 2.14, which demonstrates that specified Work has been sufficiently completed in accordance with this Agreement to allow turnover over to Owners and closure of related ITAACs, subject to Punch List items that Owners agree may be completed following such turnover.

" Undisputed Amount " means, with respect to a Party, either (i) an amount in respect of which such Party has not given notice to the other Party that such amount is disputed; or (ii) an amount which was so disputed by such Party but which is determined in accordance with Article 38 to be an amount that is owed to the other Party.

" Unit " means each of the nuclear plant units being constructed on the Construction Site as of the Effective Date, designated as Vogtle Electric Generating Plant Unit Nos. 3 and 4. " Unit 3 " refers to the first such Unit to achieve Mechanical Completion and " Unit 4 " refers to the second such Unit to achieve Mechanical Completion regardless of whether such Units have different numerical designations.

" Units " means both Unit 3 and Unit 4.

" Unit 3 " has the meaning set forth in the definition of "Unit" in this Article 1.

" Unit 3 Trigger Date " has the meaning set forth in Section 7.3.1.

" Unit 4 " has the meaning set forth in the definition of "Unit" in this Article 1.

" Unit 4 Trigger Date " has the meaning set forth in Section 7.3.3.

" VEGP Units 1 and 2 " means the existing Vogtle Electric Generating Plant located in Waynesboro, Georgia, designated as Units 1 and 2 as described in Nuclear Regulatory Commission License Nos. NPF-68 and NPF-81, respectively.

" Warranties " has the meaning set forth in Section 15.1.2.

" Warranty Issue " has the meaning set forth in Section 15.2.1

" Warranty Period " has the meaning set forth in Section 15.3.

" Westinghouse " means Westinghouse Electric Company, LLC.

" Westinghouse Protected Information " has the meaning set forth in Section 22.3.

" Work " has the meaning set forth in Section 2.1.1.

" Work Package " means an assembly of documentation which describes a specific scope of construction work to be performed.

" Work Schedule " means the schedule of working hours approved by Owners of fifty (50) hours per week per shift, and sixty (60) hours per week per shift for the nine (9) months leading up to cold hydrostatic testing for each Unit.

1.2 Interpretation .

1.2.1 Titles, headings, and subheadings of the various articles and sections of this Agreement are used for convenience only and shall not be deemed to be a part thereof or be taken into consideration in the interpretation or construction of this Agreement.

1.2.2 Words importing the singular only shall also include the plural and vice versa where the context requires. Words in the masculine gender shall be deemed to include the feminine gender and vice versa. Words closely related to a defined term herein shall be interpreted consistent with the defined term (e.g., "Defect" and "Defective," "Notify" and "Notified").

1.2.3 Unless the context otherwise requires, any reference to a document shall mean such document as amended, supplemented or otherwise modified and in effect from time to time.

1.2.4 Unless otherwise stated, any reference to a Party shall include its successors and permitted assigns, and any reference to a Government Authority shall include an entity succeeding to its functions.

1.2.5 Wherever a provision is made in this Agreement for the giving of notice, recommendation, consent or approval by a person, such notice, recommendation, consent or approval shall be in writing, and the word “notify” shall be construed accordingly.

1.2.6 This Agreement and the documentation to be supplied hereunder shall be in the English language.

1.2.7 All monetary amounts contained in this Agreement refer to the currency of the United States unless otherwise specifically provided.

1.2.8 A reference contained herein to this Agreement or another agreement shall mean this Agreement or such other agreement, as they may be amended or supplemented, unless otherwise stated.

1.2.9 Words and abbreviations not otherwise defined in this Agreement which have well-known nuclear industry meanings in the United States are used in this Agreement in accordance with those recognized meanings.

1.2.10 Neither Contractor nor Owners shall assert or claim a presumption disfavoring the other by virtue of the fact that this Agreement was drafted primarily by the other, and this Agreement shall be construed as if drafted jointly by Owners and Contractor. No presumption or burden of proof will arise favoring or disfavoring a Party by virtue of the authorship of any of the provisions of this Agreement.

1.2.11 The words “hereby,” “herein,” “hereunder” or any other word of similar meaning refers to the entire document in which it is contained.

1.2.12 A reference to an Article includes all Sections and Subsections contained in such Article, and a reference to a Section or Subsection includes all subsections of such Section or Subsection.

1.2.13 The words “include,” “includes,” and “including” when used in this Agreement shall be deemed to be followed by the words “without limitation,” unless otherwise specified.

1.2.14 All exhibits referred to in, and attached to, this Agreement are hereby incorporated herein in full by this reference.

1.3 DOE Consent/Approval. The Contractor acknowledges that the Owners (other than Dalton Utilities) (together, the "DOE Borrowers") are required to obtain approval of this Agreement from DOE in order to satisfy certain conditions in the Loan Guaranty Agreements of each DOE Borrower. Owners and the Contractor shall use commercially reasonable efforts to cooperate with the efforts of the DOE Borrowers in obtaining such approval and in facilitating DOE's review of this Agreement, including the consideration of changes to this Agreement that may be requested by DOE. In the event that DOE does not provide such approval, then Owners reserve the right to terminate this Agreement under Section 21.3.

## ARTICLE 2

## CONTRACTOR RESPONSIBILITIES

2.1 Description of Work; Qualifications.

2.1.1 Except as otherwise expressly set forth in this Agreement as being the responsibility of the Owners, Contractor shall perform or provide or cause to be performed or provided: (i) the services, work, obligations and other activities as set forth in Exhibit A; provided that Contractor understands and agrees that the Work must conform to every detail reasonably inferable from Exhibit A as being necessary to produce the intended results as specified in this Agreement applying Prudent Practices, notwithstanding the fact that every detail is not specifically referenced in Exhibit A; (ii) all of Contractor's other obligations set forth in the provisions of this Agreement, in each case in accordance with the requirements of this Agreement (all of the foregoing obligations of the Contractor, including all of such obligations performed or to be performed by Subcontractors, being collectively referred to as the "Work"). Notwithstanding the foregoing, the provision of secondees by Bechtel Power Corporation pursuant to the Amended and Restated Staff Augmentation Agreement shall not be considered part of the Work.

2.1.2 All Contractor and Subcontractor Personnel shall have the necessary experience, qualifications and be properly trained and equipped to perform the Work in accordance with this Agreement. Contractor and Subcontractors shall be properly licensed to perform the Work and authorized and qualified to do business in all governmental jurisdictions in which the Work is to be performed, and will maintain such licenses and qualifications throughout the performance of Work under this Agreement. Upon reasonable advance written request of Owners, Contractor shall furnish to Owners such evidence as Owners may reasonably require relating to the qualifications and ability of Personnel of Contractor and Subcontractor to perform fully in accordance with this Agreement. Owners shall have the right to require the removal from the Site of any Personnel of Contractor or Subcontractor that Owners deem unacceptable.

2.2 Transition of Responsibilities to Contractor. Immediately following the Effective Date, the transitioning of responsibilities for the Work to Contractor and its Subcontractors shall commence and be completed as expeditiously as practicable, in accordance with Exhibit A.

2.3 Monthly Status Reports; Access to Information.

2.3.1 On or before the fifteenth (15th) Day of each month (unless some other frequency is agreed upon by the Parties), Contractor shall submit to Owners, for Owners' review and comment, a written status report covering the prior month (a "Monthly Status Report"). The report shall be prepared in an electronic format reasonably acceptable to Owners and substantially in the form of Exhibit H.

2.3.2 In addition to Monthly Status Reports under Section 2.3.1, promptly upon request by Owners, Contractor shall provide Owners the following information (or reasonable access to such information):

(i) Then-current information of the type that is required to be contained in the form of Monthly Status Report, regardless of whether such information has been or will be later contained within a Monthly Status Report;

(ii) All information that will assist Owners in monitoring the activities comprising the Work and the progress of Work, including all schedule information;

(iii) All information that will assist Owners in monitoring and forecasting costs and expenses in connection with the Work, including Reimbursable Costs and Combined Construction Costs paid and expended.

(iv) All information of a technical nature that pertains to the Work; and

(v) All other information requested by Owners that pertains to Contractor's and its Subcontractors' performance of Work under this Agreement.

2.3.3 Contractor shall, and shall cause its Subcontractors to, participate in the Owners' project information management system for the Facility and the Construction Site, as designed and implemented by the Owners. Contractor and its Subcontractors shall timely provide all information required by this Agreement in a manner required by such project information system.

2.4 Status Meetings. Contractor shall attend and participate in regular meetings with Owners which shall occur monthly (or upon such other interval as the Parties agree) for the purpose of discussing the relevant Monthly Status Report (if applicable) and anticipating and resolving problems. Such meetings may be held by conference call or video conference. Contractor shall prepare and promptly deliver to Owners written minutes of each meeting, to which Owners may respond should they have comments. In addition, Contractor shall attend and participate in weekly (or upon such other interval as the Parties agree) meetings with Owners for the purpose of discussing the status and progress of the Work.

2.5 Embedded Owner Oversight Personnel.

2.5.1 To the extent determined by Owners, Owners may assign Southern Nuclear personnel to specific Contractor functional areas (e.g., project controls, quality control) who will be co-located with Contractor personnel, given full access to Contractor offices at the Construction Site and on-site facilities and IT infrastructure, and who may participate in functional area meetings.

2.5.2 Such Southern Nuclear personnel are provided for Owners oversight and consultation purposes only, are not authorized to give direction to Contractor employees, Subcontractors, or Contractor-Managed Subcontractors, and are not authorized to provide any consents or approvals on behalf of Owners. Contractor will include appropriate provisions in its Subcontracts in order to facilitate similar access by Southern Nuclear personnel consistent with this Section 2.5.

2.6 Performance Standards. All Work performed under this Agreement shall be performed: (i) in a professional, prudent, workmanlike manner by qualified persons using competent, professional knowledge and judgment at the degree of skill and care customary to the nuclear power industry in the United States; (ii) in accordance with applicable Law; (iii) in accordance with the most recently issued Issued for Construction Documents; (iv) in accordance with the requirements of this Agreement; and (v) in accordance with Prudent Practices (collectively, the "Performance Standards"), provided that, notwithstanding anything to the contrary in this Agreement, Contractor shall not be found to have failed to comply with the Licensing Basis if such failure to comply with the Licensing Basis is due to the failure of the most recently Issued for Construction Documents to comply with the Licensing Basis.

2.7 Key Personnel and Labor.

2.7.1 Exhibit I identifies those positions that are designated as "key" management positions (the "Key Personnel"). Individuals so designated as Key Personnel shall be subject to approval by Owners. Contractor shall not remove or replace such individual from such position for at least two (2) years without Owners' prior written consent. If at any time during the performance of the Work any of the Key Personnel should no longer be available to perform services in connection with the Work notwithstanding the commercially reasonable efforts of Contractor, then Contractor will replace such individual with an individual acceptable to Owners. With respect to any replacement of Key Personnel proposed by Contractor, Contractor shall provide the resume of the proposed replacement to Owners for prior approval. Owners will review the resume of such proposed replacement and provide Contractor with comments, approval and/or disapproval within thirty (30) Days from the date of submission of such resume to Owners. If Owner disapproves any individual(s) for a Key Personnel position, then Contractor shall not fill such position with such individual(s). Replacement Key Personnel shall not be removed or replaced from such position until at least the earlier of (i) Mechanical Completion of both Units; or (ii) two (2) years, without Owners' prior written consent.

2.7.2 Exhibit I identifies other lead personnel positions for the performance of the Work ("Other Lead Personnel"). Contractor shall not assign any person to such a position, or remove or replace any person from such a position, without giving notification to Owners of the person to be assigned, removed and/or replaced.

2.7.3 If at any time during the performance of the Work, any of Contractor's or Affiliated Subcontractor's Personnel becomes, for any reason, unacceptable to Owners, then, upon notice from Owners, Contractor will ensure the removal of such unacceptable individual from the Site.

2.8 Independent Contractor.

2.8.1 In its performance under this Agreement, Contractor is and will at all times act as an independent contractor. Subject to the terms and conditions of this Agreement, Contractor will be free to perform the obligations of this Agreement by such methods and in such manner as Contractor may choose, furnishing all labor, tools, Construction Equipment and Construction Materials (in each case to the extent required to be provided in this Agreement), and doing everything else necessary to perform the Work properly and safely, having supervision over and responsibility for the safety and health of Personnel of Contractor, its Subcontractors, and Contractor-Managed Subcontractors while on the Construction Site, and Contractor shall employ all reasonable measures to ensure the safety and health of all such Personnel while on the Construction Site. Unless otherwise specifically directed by Owners, Contractor shall maintain control over and responsibility for its tools, Construction Equipment and Construction Materials. No partnership, joint venture, agency or employment relationship is created by this Agreement or any activity hereunder, and Contractor is not and will not act as an agent or employee of Owners except that Contractor will be permitted to act as Owners' authorized representative with respect to Contractor-Managed Subcontractors in accordance with Section 3.3.1.

2.8.2 Contractor Personnel have no right to participate in any of Owners' employee benefit plans, including the provision of health insurance under the Patient Protection and Affordable Care Act of 2010 ("ACA"), as a result of providing the Work. Contractor shall be solely responsible for (i) payment of all compensation to its employees, (ii) the withholding of federal, state, and local Taxes from such compensation and the payment of all such withheld amounts to the appropriate agencies or authorities, (iii) payment to the appropriate agencies or authorities of state unemployment insurance, federal unemployment insurance, FICA and state disability insurance, and (iv) providing its employees with all necessary and appropriate benefits including any health and welfare coverage required under applicable Law, including, without limitation, the Health Insurance Portability and Accountability Act of 1996, as amended or revised ("HIPAA") or the Patient Protection and Affordable Care Act of 2010 ("ACA") or other applicable Federal and State health care requirements.

2.8.3 Owners have the right to have its Personnel or other authorized representatives inspect the Work pursuant to the applicable provisions of this Agreement, not for the purpose of controlling the methods and manner of the performance of the Work by Contractor under the Agreement, but in order to review whether the Work complies with the requirements of the Agreement and also to review the rate of performance of the Work.

2.9 Inspection.

2.9.1 Inspection Responsibilities. Contractor will perform all inspections appropriate for the performance of the Work as set forth in Exhibit A and the Performance Standards, and such other inspections of the Work as reasonably requested by Owners. Contractor's responsibilities under this Section shall include inspecting the Work in progress at intervals appropriate to the stage of construction as necessary to ensure that such Work is proceeding in accordance with this Agreement and the Baseline Schedule and to protect Owners against defects and deficiencies in such Work.

2.9.2 Owners' Right to be Present. Contractor will keep the Owners fully informed at all times of planned dates, changes to planned dates, proposed test or inspection procedures, and test and inspection results for any testing to or inspections of the Work by or on behalf of Contractor or its Subcontractors or Contractor-Managed Subcontractors. Owners, its designees, and the Independent Engineer shall each have the option of being present at all such scheduled tests and inspections. In the event that the quality of the Work is not in accordance with this Agreement, in addition to any other remedies available under this Agreement, Owners shall be entitled to make recommendations to Contractor for the purpose of remedying such deficiencies. No inspection nor observance of any inspection or testing performed or failed to be performed by Owners, its designees or the Independent Engineer, or any of their respective representatives, shall reduce or waive any of Contractor's obligations under this Agreement or be construed as an approval or acceptance of any Work.

2.10 Testing, Start-Up and Initial Operation. The Work shall include providing craft labor and craft labor supervision (collectively "CSS Personnel") in support of Owners for construction and installation testing by Owners during and after construction, for hot functional testing, for other preoperational testing, and for start-up and performance testing of each Unit and its systems and components (collectively "Commissioning and Startup Support"). Such Commissioning and Startup Support shall be provided in the quantities of CSS Personnel requested in writing by Owners, and such CSS Personnel shall work under the direction of Owners for such periods up through completion of performance testing of both Units as Owners may require. Owners shall indemnify, defend and hold harmless Contractor and Contractor Interests from and against any and all liability, damage, cost, expense and loss arising out of any act or omission of CSS Personnel while acting under and pursuant to the direction of Owners. Costs associated with Commissioning and Startup Support is not part of Combined Construction Costs or the Target Construction Cost, and may be required both before and after Mechanical Completion.

2.11 Clean-Up and Waste Disposal. During the performance of the Work, Contractor shall keep the Construction Site and any other area utilized by Contractor, Subcontractors or Contractor-Managed Subcontractors during construction clean and free from accumulations of waste materials, (other than Hazardous Materials, which are addressed in Section 2.13) rubbish, surplus materials and other debris resulting from the Work. As part of the Work, in accordance with Owners' Site Rules, Contractor will remove such rubbish, surplus materials, waste materials and other debris on a regular basis, or as may otherwise reasonably be required by Owners, and dispose of the same in accordance with this Agreement and applicable Laws.

2.12 Plant Equipment and Materials Storage. Until Final Completion, Contractor shall receive, unload, warehouse or otherwise store appropriately on the Construction Site, in accordance with manufacturers' recommendations, the Plant Equipment and Materials delivered by Owners to Contractor for installation. Contractor shall be responsible for compliance with the receipt, and storage provisions specified in the quality assurance program as described in NQA-1, including NQA-1 Section 13S-1 and other applicable requirements of Owners with respect to storage facilities, for all Plant Equipment and Materials delivered after the Effective Date or on the Construction Site as of the Effective Date. Such appropriate storage shall include implementation of applicable portions of Owners' preventative maintenance program.

2.13 Hazardous Materials.

2.13.1 Material Safety Data Sheets. To the extent required by applicable Law, Contractor shall provide to Owners the "Material Safety Data Sheets" covering Hazardous Materials to be furnished, used, applied or stored by Contractor, its Subcontractors, or Contractor-Managed Subcontractors at the Construction Site in connection with the Work. Contractor shall coordinate with Owners' Authorized Representative to provide a listing of such Hazardous Materials and their quantities at the Construction Site for purposes of chemical inventory reporting pursuant to 40 C.F.R. Part 370 and similar state regulations. Unless authorized in writing by Owners in advance, neither Contractor, its Subcontractors, nor Contractor-Managed Subcontractors shall bring to or use asbestos in the Facility.

2.13.2 Preventative Measures. Contractor shall take measures necessary to prevent the Release by Contractor, its Subcontractors, Contractor-Managed Subcontractors, or by the Personnel or Invitees of any of them, of Hazardous Materials at the Facility or adjacent areas. When the use or storage of explosives or other Hazardous Materials or equipment is necessary for the performance of the Work, Contractor shall exercise the utmost care and shall carry on its activities under the supervision of properly qualified personnel in accordance with applicable Laws. Under no circumstances shall Contractor allow explosives or blasting on the Construction Site without the specific written consent in each instance of Owners. Contractor shall provide not less than three (3) Business Days' notice of each proposed use of explosives or blasting, and each such use shall require a separate specific written acceptance by the Owners. In addition, Contractor shall, no less than one hour prior to each blasting or explosive event, notify the Site Operations Control Center as designated by Owners and confirm that Southern Nuclear has communicated with VEGP Units 1 and 2 prior to commencing blasting or an explosive event. Before Mechanical Completion of Unit 4, Contractor shall remove from the Construction Site and surrounding area in accordance with applicable Laws explosives and other Hazardous Materials supplied or generated by Contractor, Subcontractors or their respective Personnel, unless the same have been permanently incorporated into the Facility; provided that, if any such explosives and other Hazardous Materials are necessary for completion of the Work, Contractor shall be permitted to retain such explosives and other Hazardous Materials at the Construction Site but only if, and to the extent, in compliance with applicable Laws and only until completion of the Work.

2.13.3 Notice Requirements. Contractor shall immediately notify Owners of: (A) any Releases of Hazardous Materials in violation of Law by Contractor, Subcontractors, Contractor-Managed Subcontractors, or by the Personnel or Invitees of any of them, that occur in connection with the performance of the Work; (B) material violations and investigations, actions, Claims, suits, notices of violation, fines, penalties, orders, and other proceedings related to material violations or alleged material violations of Environmental Laws, including, but not limited to, Government Approvals issued thereunder, which are asserted against Contractor, its Subcontractors, Contractor-Managed Subcontractors, or the Personnel or Invitees of any of them, in connection with the Work or their activities on or in connection with the Facility and/or Construction Site; (C) Contractor's discovery of any Hazardous Materials at the Construction Site or adjacent areas; and (D) material developments with respect to Sections 2.13.3(A), 2.13.3(B) or 2.13.3(C). Contractor shall also notify the applicable Government Authorities as required by applicable Law following a Release by Contractor, its Subcontractors, a Contractor-Managed Subcontractor, or the Personnel or Invitees of any of them, of Hazardous Materials in connection with the Work, and shall promptly provide Owners with a copy of such notification(s).

2.13.4 Contractor Releases; Removal Obligations . Prior to Mechanical Completion of a Unit, Contractor will be responsible for the proper handling, collection, containerizing, storage, removing from such Unit and areas adjacent thereto, transportation and for properly disposing of, at treatment, storage and disposal facilities approved by Owners and otherwise in a manner acceptable to Owners and in compliance with this Agreement and applicable Law, all Hazardous Materials generated or Released by Contractor or any Subcontractor or Contractor-Managed Subcontractor, or the Personnel or Invitees of any of them, in the course of performing the Work on such Unit on or after the Effective Date. Except as provided under Section 2.13.5, Contractor shall be the generator of record for such Hazardous Materials and shall obtain a site-specific EPA Identification Number which will be used to identify itself as such on all manifests, hazardous waste reports, and other relevant documents.

2.13.5 Pre-Existing Hazardous Materials . In the event Contractor encounters on the Construction Site material reasonably believed to be Hazardous Material that existed on the Construction Site prior to the Effective Date, then Contractor will immediately suspend performance of Work in the area affected and report the condition to Owners in writing. As between Contractor and Owners, but without affecting any rights or remedies Owners may have against any Third Party, Owners shall be responsible for the remediation of the area affected. Contractor will not thereafter resume performance of the Work in the affected area except with the prior written permission of Owners after the remediation has been completed.

2.14 Turnover Packages . Contractor shall create, maintain, update and compile Turnover Packages during the course of the Work and will deliver to Owners such Turnover Packages prior to, and as a condition of, Mechanical Completion or Final Completion as applicable.

2.15 Safety Program .

2.15.1 Contractor Responsibility . Contractor shall be responsible for the safety of Contractor, its Subcontractors, Contractor-Managed Subcontractors, and the Personnel and Invitees of any of them, Owners' Interests, and the public, in each case to the extent affected by the performance of the Work.

2.15.2 Safety Manual . Contractor shall develop a comprehensive safety program that governs all of Contractor's, Subcontractors' and Contractor-Managed Subcontractors' activities at the Construction Site in connection with its performance of the Work. The safety program shall be reflected in writing in the form of a written project safety manual and provided to Owners no later than thirty (30) Days after the Effective Date (the "Safety Manual"). Contractor's Safety Manual shall, at a minimum, (a) meet the standards and requirements contained in Contractor's generic project safety manual that has been provided to Owners; (b) incorporate and comply with the safety requirements for VEGP Unit 1 and 2 as identified pursuant to that certain Potential Impact Determination on Operating Plans Due to Construction Activities (ND-CS-VNP-005, version 7.0, and any revisions thereto that may be provided by Owners), (c) meet the standard of care for such programs as established by nationally recognized firms which provide goods and services in connection with nuclear construction projects or other large industrial construction projects in the United States, (d) comply with the applicable requirements in the VEGP Units 1 and 2 license, as notified by the Owners, and applicable Laws, and (e) provide other reasonable protection to prevent harm, damage, injury or loss (including ecological harm or nuisance resulting from contamination, noise or other causes arising from the performance of the Work). If Owners reasonably believe that the Safety Manual does not meet the foregoing standards, they shall notify Contractor of such deficiencies in writing and Contractor shall promptly correct such deficiencies in the Safety Manual and implement the corrections into the performance of the Work. Subject to Section 2.13.5, Contractor and its Personnel shall take reasonable precautions for the safety of, and shall provide reasonable protection to prevent damage, injury or loss to Persons and property resulting from the Work, including:

(i) Contractor or any Subcontractor or Contractor-Managed Subcontractor employees and other Persons performing the Work and Persons who may be affected by the performance of the Work;

(ii) any Plant Equipment and Materials to be incorporated into the Facility, whether in storage on or off the Construction Site, under the care, custody or control of Contractor or its Personnel; and

(iii) all materials and equipment and other real and personal property at or adjacent to the Construction Site or in the vicinity thereof, including without limitation VEGP Units 1 and 2 and structures, equipment, facilities, trees, shrubs, lawns, walks, pavements, roadways and utilities.

2.15.3 Safety Measures . Contractor and its Personnel shall erect, maintain or undertake, as required by existing conditions and the performance of this Agreement, reasonable safeguards for the safety and protection of Persons and property who or which may be affected by the Work, including posting danger signs and other warnings against hazards, promulgating safety regulations, and notifying Owners and users of adjacent sites and utilities. Owners shall provide security services as described in NEI 09-01, include providing security guards.

2.15.4 Failure to Take Sufficient Precautions . Whenever, in the reasonable opinion of Owners, Contractor or any Subcontractor or Contractor-Managed Subcontractor have failed to take sufficient precautions for the safety of Contractor, Subcontractors, Contractor-Managed Subcontractors, or the Personnel and Invitees of any of them, Owners' Interests, or the public or the protection of the Construction Site or of structures or property on or adjacent to the Construction Site or on the VEGP Units 1 and 2 site, creating, in the reasonable opinion of Owners, a situation requiring immediate action, then Owners shall be entitled to require that the Work cease immediately, and Owners may cause such sufficient precautions to be taken or provide such protection. The taking of such precautions or protection by Owners or its agents or representatives will not relieve Contractor of any obligations under this Agreement or applicable Laws.

2.15.5 Protection of Units 1 and 2 . No activity of Contractor shall interfere with the operation of VEGP Units 1 and 2. Accordingly, Contractor shall comply with the site restrictions respecting operation of VEGP Units 1 and 2 as identified pursuant to that certain Potential Impact Determination on Operating Plans Due to Construction Activities (ND-CS-VNP-005, version 7.0, and any revisions thereto that may be provided by Owners). For example, offsite power feeds to VEGP Units 1 and 2 shall not be interrupted without the written consent of Owners.

2.15.6 Emergencies . Contractor, Subcontractors, Contractor-Managed Subcontractors and all of their Personnel shall comply with all Site emergency procedures of

Owners, including ensuring capability to respond to a radiological event at VEGP Units 1 and 2. In the event of an emergency endangering or potentially endangering life or property, Contractor shall take such actions as may be reasonable and necessary to prevent, avoid or mitigate injury, damage or loss and shall promptly report each such emergency, and Contractor's responses thereto, to Owners. Contractor agrees to provide to Owners the name, title and phone number of its emergency contact person prior to the commencement of the Work.

2.16 Compliance of Issued For Construction Documents with Laws; Modifications.

2.16.1 As between the Parties, Owners are responsible for the compliance of Issued for Construction Documents with all applicable Laws and Contractor shall not have any obligation to check the Issued for Construction Documents for such compliance. However, in the event Contractor discovers any discrepancy or conflict between any Issued for Construction Documents and applicable Laws, Contractor shall promptly report the same in writing to Owner's Authorized Representative.

2.16.2 In the event that Contractor seeks any modification, change or revision to an Issued for Construction Document, or determines that Work already performed by Contractor does not strictly comply with the Issued for Construction Documents, Contractor is responsible for assessing such modification, change, revision, or Work and determining whether resolution from the Design Authority and/or Owners, as applicable, is required.

2.17 Subcontracting.

2.17.1 Richmond County Constructors LLC. Owners have approved Contractor's use of Richmond County Constructors, LLC ("Richmond") as the principal construction execution Subcontractor for the Facility, subject to the conditions and requirements herein. As of the Effective Date, Contractor represents that Bechtel Power Corporation holds a 75% ownership interest in Richmond, and Williams Plant Services, LLC holds a 25% ownership interest in Richmond. Contractor covenants that:

(i) Bechtel Power Corporation will continue to hold an ownership interest in Richmond of at least 75% through Final Completion;

(ii) no additional Persons shall hold an ownership interest in Richmond or contribute labor or supervision resources to Richmond absent the advance written consent of Owners; and

(iii) no costs asserted as Reimbursable Costs under this Agreement shall include any fee payable to Richmond.

2.17.2 Other Affiliate Subcontractors.

2.17.2.1 Owners additionally approve Bechtel Equipment Operations, Inc. ("BEO") as a Subcontractor for performance of the Work, at BEO's current rental rates at the time of subcontracting to BEO, provided that such rental rates are consistent with prevailing market rates and no markup shall be applied to such rates.

2.17.2.2 Owners additionally approve CAS as a Subcontractor for performance of the Work, at a compensation determined pursuant to Section 7.1.1 and without fee or markup.

2.17.3 Failure to Satisfy Covenants. If the covenants and conditions applicable to any approved Affiliate Subcontractor are not satisfied at any time, such Subcontractor shall no longer be approved to perform Work.

2.17.4 Additional Subcontractors. In the event that Contractor desires to use any additional Subcontractor for Work, Contractor shall notify Owners and, within ten (10) Business Days of such notice, Owners shall notify Contractor if such proposed Subcontractor is not acceptable to Owners. Owners shall have the right to require removal from the Construction Site of any Subcontractor or Subcontractor Personnel deemed unacceptable to Owners. Unless otherwise agreed to by Owners in writing, Contractor shall not use any Subcontractor that has (w) an Experience Modification Ratio (as calculated in accordance with the definition of the National Council on Compensation Insurance, Inc.) of 1.0 or greater within the previous three years; (x) a Recordable Case Incidence Rate (as calculated in accordance with 29 C.F.R. Section 1904.4) of 3.0 or greater within the previous three years; (y) a Days Away From Work Rate (previously known as the Lost Time Incidence Rate, and as calculated in accordance with 29 C.F.R. § 1904.7) of 1.5 or greater within the previous three years; or (z) one or more fatalities during the last three years.

2.17.5 Owners Not Responsible. Notwithstanding any agreement with Subcontractors, Contractor shall be solely responsible for the Work. Unless and until a Subcontract is assigned to the Owners pursuant to this Agreement, Owners shall not be deemed to have any contractual obligation or relationship with any Subcontractor. Contractor shall be as fully responsible for the acts, performance, and omissions of its Subcontractors and of the Personnel either directly or indirectly employed by its Subcontractors as Contractor is for its own acts, performance and omissions. Contractor shall be solely responsible for timely paying each Subcontractor for services, Construction Materials and Construction Equipment, provided in connection with the Work.

2.17.6 Flow-Down Clauses. Contractor shall include in its Subcontracts provisions which impose obligations on Subcontractors that are consistent with the obligations imposed on Contractor in the provisions of this Agreement listed in Exhibit K as those terms are applicable to the Work being performed by the Subcontractor.

2.17.7 Termination for Convenience. Subcontracts must be terminable for convenience, and related termination expenses thereunder must be commercially reasonable in light of the value of the services and other items provided at the time when the termination occurs. In no event shall any termination fees include payment for any types of costs, losses, damages, injuries or claims that would not be payable to Contractor in the event of termination of this Agreement for convenience.

2.17.8 Subcontractor Warranties. Contractor shall cause all warranties and related rights under all Subcontracts to be assignable to Owners without any additional consent or approval from the applicable Subcontractor or other conditions to such assignment. Contractor shall provide Owners a full and complete copy of all such warranties and related rights, and duly executed copies of all contracts with Subcontractors containing such warranties and related rights promptly upon execution thereof. In the event of termination of this Agreement, Contractor shall assign such warranties and related rights to Owners. In addition, as a condition of Mechanical Completion, Contractor shall assign to Owners its rights under such Subcontractor warranties that continue past the end of the Warranty Period, with such assignment to be effective as of the end of the Warranty Period. Contractor shall execute such additional documents as may be reasonably requested by Owner to effect any assignment under this Section 2.17.8. Contractor shall not be relieved of responsibility for any of its obligations, warranties or related rights set forth in this Agreement by reason of any such assignment. Contractor shall not, and Contractor shall take commercially reasonable actions to ensure that Contractor's Subcontractors do not, take any action which could release, void, impair or waive any Subcontractor warranties.

2.17.9 Assignment of Subcontracts. Except with respect to Subcontracts with Affiliates of Contractor, Contractor shall obtain the agreement of all Subcontractors in the terms of each Subcontract that Contractor's rights under the Subcontract may be, at Owners' option, and without requiring the further consent of the relevant Subcontractor, in whole or in part, assigned and delegated by Contractor to Owners. Each such Subcontract shall provide that, upon notification to the Subcontractor (and Contractor) from Owners that (A) this Agreement has been terminated, (B) Contractor's right to proceed with the Work has been terminated pursuant to this Agreement, and (C) Owners will thereafter be assuming Contractor's obligations under such Subcontract related to the Work, such Subcontractor shall continue to perform the portion of its responsibilities under such Subcontract related to the Work for the benefit of Owners and shall recognize Owners as being vested with all the rights and responsibilities of Contractor under such portion of such Subcontract related to the Work. Notwithstanding the foregoing, it is specifically understood and agreed (and each Subcontract shall clarify) that no Subcontractor shall have any right to look to Owners for the performance of any portion of Contractor's obligations under any Subcontract related to the Work, and Owners are not a party to any Subcontract, unless and until Owners have assumed such performance obligations in writing.

2.17.10 Copies of Subcontracts. Contractor shall provide Owners with complete and accurate copies of all Subcontracts, including all amendments, modifications, supplements, and purchase orders thereunder, promptly after the same are in the possession of Contractor.

2.17.11 Transparency of Subcontract Matters. It is the understanding and intent of the Parties that Contractor shall keep Owners informed regarding all significant matters pertaining to its Subcontractors and all Contractor-Managed Subcontractors. Without limiting the generality of the foregoing, after the Effective Date, Contractor shall:

(i) provide the Owners prior notice and reasonable opportunity to attend and participate in all negotiations with Subcontractors and Contractor-Managed Subcontractors, including those relating to amendments and change orders;

(ii) provide Owners the opportunity to attend all regular and special meetings with Subcontractors and Contractor-Managed Subcontractors, with prior notification to Owners of the subject matter of such meetings (to the extent known);

(iii) provide Owners reasonable opportunity to review and provide comments on all Subcontracts, including amendments and change orders thereto, prior to execution of the same;

(iv) keep Owners informed, and provide Owners the opportunity to participate in discussions with Subcontractors and Contractor-Managed Subcontractors regarding actual or potential disputes; and

(v) promptly upon request by Owners, provide Owners information regarding actual and projected costs under the Subcontracts and Contractor-Managed Subcontracts, including for purposes of Owner's budgeting and forecast of Reimbursable Costs and Combined Construction Costs under this Agreement.

2.18 Contractor's Government Approvals. Contractor shall be responsible for obtaining, maintaining and paying for Contractor's Government Approvals as necessary to support the performance of the Work in accordance with the Baseline Schedule. Owners shall provide Contractor reasonable cooperation and assistance in obtaining and maintaining Contractor's Government Approvals.

2.19 ITAACs. Work Packages for Work which has been completed, as delivered by Contractor to Owners, shall include completed documentation of all tests, inspections and analyses associated with any ITAACs applicable to the Work Package. Without assuming any responsibility for correcting any omissions or deficiencies identified, Owners shall be responsible for review of Contractor's Work Packages and for closure of ITAACs. The Parties shall coordinate with each other with respect to those ITAACs associated with the Work. For some or all ITAACs associated with the Work, Owners may specify the methodology to be used in the completion of the tests, inspections and analyses, and Owners shall ensure that such methodology is compliant with Law and adequate for the closure of the ITAAC. Contractor shall perform the Work required by the DOR in accordance with the methodology specified by Owners.

2.20 Support for Government Approvals and Requests. Contractor shall provide support to Owners in connection with Owners' Government Approvals and any requests from Government Authorities, including to the extent appropriate making Personnel available to testify as factual witnesses at formal and informal government proceedings, and providing the documents and information requested by Owners in order to comply with requests of Government Authorities (including to address formal NRC licensing questions and requests of the Georgia PSC), including review and comment to sections prepared by others, and amendments thereto, all on a schedule that supports the Project Schedule in accordance with Owners' reasonable request.

2.21 Control Program.

2.21.1 Contractor shall implement a process for identifying trends in the schedule and costs associated with the Work, in accordance with Exhibit L and Section 2.21.2 ("Contractor Trend Program"). The Contractor Trend Program shall interface with the Owners' overall change control program for the construction of the Facility as described below. All trends identified by the Contractor Trend Program shall be jointly reviewed by the Parties on a weekly basis, and presented to the Owners' change control board for the Facility on a monthly basis.

2.21.2 The Contractor Trend Program shall be implemented to incorporate the following:

(i) Each Monthly Status Report submitted by Contractor shall include: (a) the amount of Contingency that has been used in the performance of the Work and for each trend resolved in accordance with Contractor's Trend Program, both on a cumulative basis and for the previous month; and (b) a forecast of the amount of Contingency needed through Final Completion.

(ii) Upon the expenditure of twenty five percent (25%), fifty percent (50%), seventy five percent (75%), and one hundred percent (100%) of Contingency, Contractor shall notify Owners, and within five (5) Business Days after such notice is provided, the Parties shall attend a meeting for the specific purpose of: (a) reviewing the details of the cumulative expenditure of Contingency; and (b) reviewing the current forecast of Contingency needed through Final Completion.

(iii) Resource curves for labor headcount of Contractor and Richmond Personnel (which curves for field non-manual personnel are set forth in Exhibit M-1, and which curves for craft and indirect craft will be developed during the Baseline Schedule process set forth in Article 9) (which resource curves may be adjusted by mutual agreement of the Parties based on the results of the Subcontract Scope Alignment Process). In the event that the performance of the Work will result in a deviation from any of such resource curves by more than five percent (5%), Contractor shall notify Owners of such deviation. Furthermore, if such deviation will require use of Contingency funds, the deviation will not be permitted without Owners' prior approval. In the event that Contractor proceeds with implementation of the deviation without Owners' prior approval where required, the associated costs of the additional resources related to implementation of the deviation shall be Non-Reimbursable Costs.

(iv) In the event that any trend indicates that the performance of the Work will result in Combined Construction Costs that exceed [***] of the Target Construction Cost, Contractor shall notify Owners of the trend and request Owner's approval of the exceedance before proceeding with implementation of such trend.

(v) The Contractor Trend Program shall incorporate the requirements in Section 3.3 with respect to Contractor-Managed Subcontracts.

2.22 No Waiver of Access Rights. No provision in this Agreement shall be construed as a waiver by Owners of any rights to Contractor's technical, financial or other information that Owners would otherwise have pursuant to legal process in any judicial or administrative proceeding.

## ARTICLE 3

## CONTRACTOR-MANAGED AND OWNER-MANAGED SUBCONTRACTS

3.1 Owner-Managed Subcontracts. "Owner-Managed Subcontracts" refers to subcontracts entered into by Owners (or assigned to and accepted by Owners) with subcontractor entities ("Owner-Managed Subcontractors") to perform construction work and/or services at the Facility, where the responsibilities for administering and managing such subcontractors remain with the Owners. The Owner-Managed Subcontractors and Owner-Managed Subcontracts include those subcontractors and subcontracts designated in Exhibit E as Owner-Managed Subcontractors and Owner-Managed Subcontracts. As between the Parties, Owners are responsible for Owner-Managed Subcontractors' compliance with the Safety Manual. Contractor shall cooperate with Owner-Managed Subcontractors to provide reasonable access to the Construction Site and the opportunity to conduct scheduled work in their respective work areas without interference, and Contractor acknowledges that Owner-Managed Subcontractors will in many cases be conducting such ongoing work in close proximity to Contractor's Work. Owners and Contractor shall coordinate the needs of ongoing work of Owner-Managed Subcontractors with the Work of Contractor as may be required, consistent with their scheduled activities as contained in the Project Schedule.

3.2 Contractor-Managed Subcontract Scope.

3.2.1 The items of scope which are Contractor-Managed Subcontract Scope, and the corresponding Contractor-Managed Subcontracts (as of the Effective Date), are listed in Exhibit E. Unless otherwise agreed by the Parties, the Contractor-Managed Subcontract Scope will be: (i) implemented through Contractor-Managed Subcontracts; (ii) performed directly by Contractor; or (iii) performed via an additional Subcontract (including a Subcontract with Richmond), as determined in the Subcontract Scope Alignment Process in consultation with the Owners.

3.2.2 In the Subcontract Scope Alignment Process, Contractor, in consultation with Owners, will complete its due diligence (including commercial evaluation) related to the Contractor-Managed Subcontract Scope and the related existing subcontractors and subcontracts. The Subcontract Scope Alignment Process is further described in Exhibit E. During the Subcontract Scope Alignment Process, Contractor may, in consultation with Owners:

(i) determine to continue an existing subcontract as a Contractor-Managed Subcontract;

(ii) determine that an existing subcontract needs to be revised, replaced or renegotiated, which as so altered will become a Contractor-Managed Subcontract; and/or

(iii) determine to execute certain Contractor-Managed Subcontract Scope as part of the Work, other than through a Contractor-Managed Subcontract, such as self-performance or performance through Richmond or another Subcontractor.

3.2.3 The Subcontract Scope Alignment Process will be completed in stages on a progressive basis. Completion of each stage will be confirmed by agreement of the Parties in a Change Order, including the appropriate adjustments to the Target Construction Cost, to the Earned Fee, and if needed, to the Target Completion Dates, based upon the results of such stage. Specifically:

(i) The Target Construction Cost shall be increased in accordance with the methodology set forth in Exhibit M, based upon the value of the Contractor-Managed Subcontract Scope that was evaluated in such stage;

(ii) The Earned Fee shall be increased by the amount of [***] of the increase in Target Construction Cost determined in accordance with (i) above;

(iii) If the Contractor-Managed Subcontract Scope evaluated in the Subcontract Scope Alignment Process reveals a material adverse impact on the critical path to achievement of the Baseline Schedule (a "Subcontract Scope Schedule Impact"), then the Baseline Schedule and/or the Target Completion Dates shall be adjusted in accordance with the process described in Section 9.3.

3.2.4 The Subcontract Scope Alignment Process, including all related adjustments to the Target Construction Cost and Earned Fee and identification of Subcontract Scope Schedule Impacts, is to be completed by February 28, 2018. In the event that any such adjustments and identification of Subcontract Scope Schedule Impacts (provided that adjustment to the Baseline Schedule as a result of such impacts shall be made under the process in Section 9.3) are not agreed upon by the Parties by such dates, then, with respect to any Contractor-Managed Subcontract Scope that is a source of disagreement between the Parties regarding an adjustment to the Earned Fee or Target Construction Cost or identification of Subcontract Scope Schedule Impacts, Owners may elect to remove such scope from Contractor-Managed Subcontract Scope by notice in writing to Contractor. If Owners so elect, then: (i) such removed scope shall not be within the Contractor-Managed Subcontract Scope under this Agreement; (ii) Owners shall be responsible for managing and administering such scope either directly or through an Owner-Managed Subcontract(s); (iii) neither the Target Construction Cost nor the Earned Fee shall be adjusted as a result of such removed scope; and (iv) the previously identified Subcontract Scope Schedule Impact with respect to such removed scope shall not be considered under Section 9.3. In the event that the Parties disagree with respect to any proposed adjustments to Target Construction Cost or Earned Fee or identification of a Subcontract Scope Schedule Impact as a result of Contractor-Managed Subcontract Scope that is not so removed by the Owners, then the disagreement may be referred by either Party to the dispute resolution provisions in Article 38 of this Agreement. Any such dispute shall be subject the expedited hearing procedure referenced in the DRB Procedures.

3.3 Contractor Authority and Responsibilities with respect to Contractor-Managed Subcontractors .

3.3.1 Commencing on the Effective Date, Contractor (but not its Subcontractors) shall administer and manage the Contracted-Managed Subcontracts in accordance with the terms and conditions of this Agreement; provided that any schedule or cost impacts identified during the Subcontract Scope Alignment Process will be addressed as part of the Subcontract Scope Alignment Process and in the adjustments to be made pursuant to Section 3.2.3 and Section 9.3. Contractor (but none of its Subcontractors) shall be granted full authority to exercise the rights of, and act as the authorized representative of, the Owners under Contractor-Managed Subcontracts, provided that Contractor shall obtain Owners' written approval prior to taking the following actions under Contractor-Managed Subcontracts:

(i) agreement to an amendment to a Contractor-Managed Subcontract (other than an administrative amendment that does not have any cost or schedule impacts, or violate any of the requirements in subparts (ii) through (vi) below);

(ii) agreement to a change order under a Contractor-Managed Subcontract directing the performance of additional work having a value of over [***] of the baseline value (less applicable contingency) of such Contractor-Managed Subcontract included in the Target Construction Cost (as agreed pursuant to Section 3.2.3) or otherwise creating an obligation of Owners under such Contractor-Managed Subcontract in excess of such [***] threshold amount. Change orders may not be subdivided to avoid this requirement; amounts relating to a single change will be aggregated to determine applicability of this requirement.

(iii) agree upon any modification to or waiver of any provisions of the Contractor-Managed Subcontract relating to warranty, indemnity, limitations of liability or costs to terminate a Contractor-Managed Subcontract;

(iv) agreeing to waive any right that Owners may have under any Contractor-Managed Subcontract, or settling or compromising any dispute or liability under a Contractor-Managed Subcontract;

(v) terminating or suspending any Contractor-Managed Subcontract, other than suspension in an emergency situation; or

(vi) agreeing or committing to do any of the foregoing.

3.3.2 Contractor's management and administration of the Contractor-Managed Subcontracts will be in compliance with Owners' obligations thereunder, including by giving all notices required by each Contractor-Managed Subcontract in order for the Owners to be in compliance with such subcontracts and to protect and preserve the rights of Owners under such subcontract.

3.3.3 Contractor shall be responsible for advising and making a specific action recommendation in writing to Owners, at least 20 Days in advance of: (i) any date when action by Owners is required to be taken under Section 3.3.1 with respect to a Contractor-Managed Subcontract; and (ii) the date that payment is due to be made with respect to a Contractor-Managed Subcontract, including Contractor's recommendation for any withholding of any payments to such subcontractor.

3.3.4 Contractor shall directly perform its obligation to manage Contractor-Managed Subcontracts pursuant to this Agreement. In no event shall Contractor perform such management obligations by or through any of its Subcontractors (including Richmond).

3.3.5 Owners shall retain responsibility for making all payments required under Contractor-Managed Subcontracts; provided, however, that Contractor shall use commercially reasonable efforts to obtain and provide to Owners, all Lien waivers and releases under Contractor-Managed Subcontracts with respect to all work and activities completed under such subcontracts, in a manner consistent with Section 8.11.1(i) and (ii).

## ARTICLE 4

## OWNERS' RESPONSIBILITIES AND RIGHTS

4.1 Owners' Responsibilities. Owners shall perform the responsibilities set forth in this Article and elsewhere in this Agreement at its own expense.

4.1.1 Appointment of Agents. Owners have appointed GPC as their agent in order to execute this Agreement on their behalf and for all purposes under this Agreement pursuant to the Ownership Agreement, with the power and authority to bind Owners to their obligations herein. Except as provided in Sections 8.1 and 19.2, all obligations required under this Agreement to be fulfilled by the Owners will be performed by or at the direction of GPC, as agent for the Owners. Upon notice to Contractor, the Owners may designate another agent to replace GPC to act as their agent under this Agreement. GPC, acting for itself and as agent for the other Owners, has appointed Southern Nuclear as agent for the implementation and administration of this Agreement (provided that upon notice to Contractor, GPC may designate another agent to replace Southern Nuclear as agent for the implementation and administration of this Agreement). Southern Nuclear is the exclusive licensed operator of VEGP Units 1 and 2 and will be the licensed operator ("Licensed Operator") of the Facility having exclusive control over licensed activities at the Facility. GPC represents that: (i) to the extent provided in the Agency Agreements, Southern Nuclear is empowered to exercise Owners' rights under this Agreement; (ii) communications, including notices, decisions and approvals, issued by Southern Nuclear in connection with this Agreement shall be treated as issued by the Owners; and (iii) communications, including notices, sent to Southern Nuclear under this Agreement shall treated as received by the Owners.

4.1.2 Owners' Authorized Representative. By notice to Contractor on or before the Effective Date, Owners shall appoint one or more Persons who shall be entitled to act as an authorized representative of Owner (and shall have the right to appoint a successor or replacement of such authorized representative by notice to Contractor) with whom Contractor may consult at all reasonable times and whose written instructions, requests and decisions shall be binding upon Owners as to all matters pertaining to this Agreement ("Owners' Authorized Representative"). Contractor shall have the right to rely upon a communication from Owners' Authorized Representative as a communication on behalf of all of the Owners, and shall not rely upon or be obliged to comply with any instruction or direction issued by any other representatives of Owners.

Owners' Authorized Representative shall not have any authority to amend this Agreement except in compliance with the provisions of Article 40.4.

4.1.3 Access. Owners shall provide Contractor rights of access to the Construction Site and to other portions of the Site as Contractor may reasonably require for the Work. Owners shall cooperate with Contractor so as to minimize disruption by Owners of Contractor's performance of the Work, and Contractor shall cooperate with Owners so as to avoid disruption by Contractor, Subcontractors, Contractor-Managed Subcontractors or the Personnel of any them of operation of the existing VEGP Units 1 and 2.

4.1.4 Job Site Rules. Subject to the requirements of the operating licenses for VEGP Units 1 and 2, to the extent applicable, Owners shall and shall require Owner-Managed Subcontractors, and their respective representatives and agents, to abide by the Safety Manual.

4.1.5 Owners' Government Approvals. Owners shall be responsible for obtaining, maintaining and paying for Owners' Government Approvals and for the communications with any Government Authorities regarding such Government Approvals. Owners shall provide as much advance notice as practical of the need for the testimony of Contractor's Personnel at proceedings before Government Authorities.

4.1.6 Issued for Construction Documents. As between the Parties, Owners shall be responsible for providing Issued for Construction Documents to Contractor and (as applicable) Contractor-Managed Subcontractors, and for ensuring that such Issued for Construction Documents contain the necessary amount of information to allow Contractor to perform the Work with respect to such Issued for Construction Documents in accordance with this Agreement and to allow the Contractor-Managed Subcontractors to perform their work with respect to such Issued for Construction Documents in accordance with their subcontracts.

4.1.7 Design Authority. By a separate agreement, Owners have contracted with Westinghouse to act as the Design Authority for Units 3 and 4. Pursuant to that agreement, Westinghouse is authorized by Owners to perform the following Owners responsibilities: provide Issued for Construction Documents to Contractor and Contractor-Managed Subcontractors; approve, reject, or make changes, modifications, and revisions to Issued for Construction Documents; and provide interpretations of the design or Issued for Construction Documents. Owners will promptly provide notice to Contractor of the Westinghouse personnel authorized to provide Issued for Construction Documents and communicate design information and shall promptly notify Contractor of any changes in such authorized personnel.

4.1.8 Plant Equipment and Materials. Owners shall be responsible for providing Plant Equipment and Materials to Contractor and to Contractor-Managed Subcontractors and for the quality of such Plant Equipment and Materials, including conformance of such Plant Equipment and Materials with the Issued for Construction Documents.

4.1.9 Construction Equipment. Owners shall be responsible for providing the Construction Equipment located on the Construction Site as of the Effective Date to support the performance of the Work and Contractor-Managed Subcontractor work, and such Construction Equipment shall be provided and maintained by Owners in good working condition. As the Work progresses, the Parties will coordinate a transition such that Contractor, its Subcontractors and/or

Contractor-Managed Subcontractors will provide Construction Equipment for the performance of the Work.

4.2 Owners' Right to Inspect, Stop and Re-Perform Work.

4.2.1 Owners' Right to Inspect. Each Owner shall have the right to have its inspectors, engineers or other designees and representatives of such Owner authorized to do so (the "Designated Persons") or the Independent Engineer inspect the Work at any time and from time to time in order to assure that the Work complies with the requirements of this Agreement, including Contractor's Quality Assurance Program, and to review the rate at which Work is being prosecuted.

(i) The Designated Persons shall be permitted to: (A) follow the progress of the Work and identify defective or nonconforming materials or equipment at source of supply, in process of manufacture, or at point of delivery and (B) monitor actions taken in accordance with Section 4.2.2. The Owners' Authorized Representative shall have the right to stop Work in accordance with Section 4.2.3. Inspection by the Designated Persons shall not be deemed to (A) be supervision by Owners of Contractor and (B) shall not relieve Contractor of any responsibility for performing the Work in accordance with this Agreement. Designated Persons shall not have authority to give direction to Contractor or any Subcontractor or any Contractor-Managed Subcontractor or any of the Personnel of the foregoing. Any acceptance or approval by the Designated Persons shall in no event be deemed to constitute acceptance of same by Owners, but shall be only for the purpose of confirming that the Work appears to comply with this Agreement. Owners may report to Contractor any unsafe or improper conditions or practices observed for action by Contractor in correction or enforcement.

(ii) Without limiting Owners' rights under Article 5, the Designated Persons and the Independent Engineer shall have access to the Work and to applicable parts of Contractor's (or its Subcontractors') work areas on the Construction Site at reasonable times and subject to the reasonable requirements of Contractor or its Subcontractors. Contractor shall not require the Designated Persons or the Independent Engineer to execute documents, releases or waivers purporting to release Contractor from liability for any bodily injury and Contractor shall obtain agreement from its Subcontractors that they will not require such releases from the Designated Persons or Independent Engineer when at the Subcontractors' work areas. Contractor (or its Subcontractors) shall afford the Designated Persons and/or the Independent Engineer such reasonable and safe facilities at Contractor's work areas (or those of its Subcontractors) as are appropriate to conveniently observe and inspect the Work in progress and have such other conveniences as would normally accompany such inspection.

4.2.2 Defective Work. If Owners', the Designated Persons' or the Independent Engineer's inspection reveals any non-compliance or any other defects in any portion of Work, then Contractor shall, promptly upon its receipt of notice from Owners, evaluate such defect or non-compliance in accordance with the Project Corrective Action Program and shall promptly take such actions as are required to correct such defect or non-compliance, as well as its cause, in accordance with the Project Corrective Action Program. Contractor shall not receive any adjustment to the Target Completion Dates or Target Construction Cost or Baseline Schedule for such correction. Contractor shall comply with the requirements of 10 C.F.R. Part 21 and 10 C.F.R. § 50.55(e), as appropriate. A copy of Contractor and Subcontractor notifications relative to this Agreement to the Nuclear Regulatory Commission (NRC) pursuant to 10 C.F.R. Part 21 or § 50.55(e), if any, shall be transmitted to the Owners. Contractor will notify the Owners of any nonconformance reportable to the NRC as well as nonconformances judged not reportable to the NRC but which are considered significant enough to warrant Contractor management action.

4.2.3 Right to Stop Work. Without limiting the right of Owners to suspend performance of the Work under other provisions of this Agreement, if Contractor fails to perform the evaluation required under Section 4.2.2 or fails to promptly take corrective action for any defect or non-compliance in Work as required under Section 4.2.2 or if Contractor fails to identify the root cause of such defect or non-compliance (if root cause is applicable to such non-compliance) within a reasonable period of time consistent with the Project Corrective Action Program, then Owners, by a written order signed by Owners' Authorized Representative, may order Contractor to stop performance of the portion of the Work affected thereby, until the cause of such order has been eliminated; provided, however, that this right of Owners to stop Contractor's performance will not give rise to a duty on the part of Owners to exercise this right for the benefit of Contractor or any other person or entity. In addition, Owners, by written order signed by Owners' Authorized Representative, may order Contractor to stop performance if the activities or past practices of Contractor or its Personnel or Invitees at the Site reasonably appear to Owners to cause or threaten to cause personal injuries or damage to property. In the event of a stop Work order issued by Owners in accordance with this Section 4.2.3, Contractor shall not be entitled to an adjustment to the Target Completion Dates or the Target Construction Cost or the Baseline Schedule. Owners' right to stop Work under this Section 4.2.3 will be without prejudice to any other right or remedy Owners may have hereunder.

## ARTICLE 5

## QUALITY ASSURANCE

5.1 Quality Assurance Programs.

5.1.1 Contractor Quality Assurance Program. Contractor currently has a quality assurance program(s), which will be used in the performance of Work under this Agreement where (a) Contractor is performing the Work itself, (b) a Subcontractor of Contractor is performing Work and Subcontractor does not have an approved quality assurance program, and (c) the Work is performed pursuant to a Contractor-Managed Subcontract and the Contractor-Managed Subcontract includes provisions requiring compliance with Contractor's Quality Assurance Program. Contractor's quality assurance program has been accepted by the NRC ("Contractor's Quality Assurance Program"). Contractor will maintain the Contractor's Quality Assurance Program and any changes thereto shall meet the requirements of 10 C.F.R. Part 50, Appendix B and ASME NQA-1 - 1994. Any changes to Contractor's Quality Assurance Program shall be submitted to and, if necessary, accepted by the NRC consistent with 10 C.F.R. § 50.54(a) and accepted by Owners.

5.1.2 Control of Sub-tier Subcontracting. Contractor shall be responsible for assuring that all its sub-tier Subcontractors that are performing Work are working to Contractor's Quality Assurance Program or to the sub-tier's own quality assurance program that has been approved by Contractor. Contractor shall provide appropriate verification of quality for all sub-tier subcontractors. A sub-tier subcontractor quality assurance program and any changes thereto shall meet the requirements of 10 C.F.R. Part 50, Appendix B and ASME NQA-1 - 1994; provided however that compliance with ASME NQA-1 - 2008, including NQA-1a-2009 Addenda will be considered to be compliant with ASME NQA-1 - 1994.

5.1.3 SNC Quality Assurance Program. For certain Contractor-Managed Subcontracts, subcontractors may perform Work pursuant to the applicable SNC quality assurance program. SNC's quality assurance program has been accepted by the NRC ("SNC Quality Assurance Program"). As delegated through the SNC Quality Assurance Program, Contractor may perform certain Work associated with Quality Assurance for those Contractor-Managed Subcontracts. After completion of the Subcontract Scope Alignment Process, Contractor and Owners will meet and determine which Contractor-Managed Subcontracts shall retain such requirements for compliance with the SNC Quality Assurance Program.

5.2 Transition to Contractor's Quality Assurance Program.

5.2.1 Contractor and Contractor's sub-tier Subcontractors that are working to Contractor's Quality Assurance Program as identified in 5.1.2 will perform Work in accordance with the existing quality assurance programs of Westinghouse Electric Co. LLC and WECTEC Global Project Services Inc., as applicable, until Owners notify Contractor to transition to the Contractor's Quality Assurance Program. The Parties acknowledge that an interface document describing the interface between SNC and Contractor Quality Assurance programs is a prerequisite for the transition to the Contractor's Quality Assurance Program, and, to the extent such interface document is not in force as of the Effective Date, Contractor will provide any support requested by Owners to complete the interface document.

5.2.2 By virtue of a separate services agreement between Owners and Westinghouse Electric Co. LLC and WECTEC Global Project Services Inc., Westinghouse and WECTEC have provided Owners with the documentation regarding their existing ASME QA programs and ASME N-stamp certificates as referenced in NDAQAM, in accordance with ASME requirements. Westinghouse and WECTEC further agreed that they will maintain those programs and certificates. Pursuant to ASME requirements, certain Work performed by Contractor will be governed by such Westinghouse and/or WECTEC ASME QA programs unless and until Owners notify Contractor to transition to the Contractor's ASME Quality Assurance Program.

5.3 Owners Access. Owners shall be given free access to Contractor's facilities and records for inspection and audit of the Contractor's Quality Assurance Program. Provisions will also be made by Contractor, in all Subcontracts, for access by Owners or their representative(s) to Subcontractors' and vendors' facilities and records for similar inspection and audit.

## ARTICLE 6

## SECONDMENT OF EMPLOYEES

The secondment of personnel from Bechtel Power Corporation to Owners and/or Southern Nuclear and from Owners and/or Southern Nuclear to Bechtel Power Corporation will be governed solely by the terms and conditions of the Amended and Restated Staff Augmentation Agreement.

## ARTICLE 7

## COMPENSATION

7.1 Reimbursable Costs .

7.1.1 Except for Non-Reimbursable Costs, costs and expenses incurred by Contractor in performing the Work (including, to the extent provided herein, services that are required in support of the Work) ("Reimbursable Costs") will be payable to Contractor as follows:

(i) Costs actually incurred by Contractor and Contractor's Affiliates Richmond, BEO and CAS, for salaries, wages and standard payroll additives of their non-manual personnel engaged in the performance of the Work, for all the hours of such personnel spent in the performance of the Work in accordance with the Work Schedule as well as any overtime beyond the Work Schedule pursuant to (ii) below; provided that such salaries and wages shall be within the ranges for the applicable grades in accordance with Contractor's then current employment salary and wage policies; provided further that Contractor will provide prior notice to Owners and obtain Owners' prior approval (not to be unreasonably withheld) of any changes to such policies before including requests for compensation of costs based on such changed policies. The rates to be applied for such standard payroll additives as of the Effective Date are set forth in Exhibit N. The rates to be applied for such standard payroll additives will be verified annually by independent audit and subject to adjustment as of the first Day of each calendar year in accordance with any revised legal requirements, insurance rates or changes in Contractor corporate policies.

(ii) Hours worked in excess of 40 hours per week shall be considered overtime hours and such overtime hours shall be compensated in accordance with Contractor's and the applicable Affiliate's overtime policy. For overtime beyond the Work Schedule, Contractor will provide written notification of anticipated additional overtime to Owners in advance, including reasonable details on whether and how any such additional overtime will impact schedule, as well as a proposed breakdown of such anticipated overtime costs; provided further , that Owners shall have the right to instruct Contractor not to incur such additional overtime costs and, in such event, if Owner's denial of or delay in approving of such additional overtime labor impacts achievement of the Baseline Schedule, the Parties will work together in good faith to mitigate such schedule impacts.

(iii) A multiplier for indirect costs in the following percentages: (a) [***] of the non-manual personnel costs described in Section 7.1.1(i) above as they apply to such non-personnel personnel who are assigned to Contractor's home office (e.g., non-manual personnel engaged in required support services); and (b) [***] of the non-manual personnel costs described in Section 7.1.1(i) above as they apply to such non-personnel who are assigned to the Construction Site, in each case of (a) and (b) excluding any premium portion of overtime costs; provided that the foregoing rates of this Section 7.1.1(iii) are intended to cover the indirect costs to Contractor associated with maintaining and establishing offices and field offices, respectively, and such costs shall not be charged as direct costs for the Work and shall not duplicate such direct costs.

(iv) Actual costs of travel, relocation, and personnel assignment to the extent directly related to the performance of the Work, without markup, all of which shall be in accordance with Contractor's then current policies; provided that Contractor will provide prior notice to Owners and obtain Owners' prior approval (not to be unreasonably withheld) of any changes to such policies before including requests for compensation of costs based on such changed policies.

(v) Actual costs of craft labor directly engaged in the performance of the Work, including wages, fringe benefits/taxes, per diems, incentives, pension costs and/or liabilities and other actual craft costs without markup; provided , however , that Contractor will review with Owners any proposals to pay per diems or other incentives to craft labor and will secure Owners' approval for payment of any such amounts in advance of implementing such payments, except that Owners' approval will not be required for the payment of per diems or other incentives to welders so long as the aggregate amount of such per diems or other incentives to welders under this Agreement does not exceed [***] ; provided that, for the avoidance of doubt, all per diems and other incentives for craft labor (except for per diems and other incentives payable to welders) have been excluded from the Target Construction Cost and will be excluded from the calculation of Combined Construction Costs.

(vi) Actual costs relating to craft labor payroll processing and craft labor administration for craft labor directly engaged in the performance of Work.

(vii) Actual costs of Contractor IT support and use of Contractor standard applications determined by utilizing unit rates set forth in Exhibit N.

(viii) Actual costs of construction incurred in the performance of the Work such as costs of Construction Equipment, IT and communications hardware, and Construction Materials.

(ix) Actual amounts paid under Subcontracts entered into by Contractor in order to perform the Work, without markup, subject to the Owner's approval of the applicable Subcontractor as required pursuant to Section 2.17.4.

(x) Actual costs incurred by Contractor in providing support to the Owners related to DOE loan guarantees and providing support to the Owners in connection with dealing with Government Authorities, including as provided in Section 2.20.

(xi) Actual costs of financial securities (including any sales tax bond required by the State of Georgia but excluding the Repayment Letter of Credit as described below), insurances (including DIC insurance relating to the OCIP and other insurances required in the performance of the Work).

(xii) Actual costs of Taxes, licenses and permits directly incurred in the performance of the Work by Contractor or its Subcontractors except for (a) Taxes levied directly on or measured by Contractor's, Subcontractors' and their respective Personnel's income, (b) licenses and permits (other than any sales tax bond required by the State of Georgia) required by Government Authorities in order for Contractor and its Subcontractors to carry on business in the jurisdiction where the Work is performed, and (c) all Taxes covered under any other provision of this Section 7.1.1 as Reimbursable Costs; provided that as between Contractor and Owners, Contractor will be responsible for the payment of all income taxes imposed on it, Contractor's Subcontractors or Contractor Personnel.

(xiii) Other actual costs incurred for the performance of the Work at the Construction Site, without markup.

(xiv) Reimbursable Costs on behalf of Richmond or BEO shall not include any costs that would not be Reimbursable Costs if incurred by Contractor.

Reimbursable Costs previously paid by Owners shall be subject to retroactive adjustment based on the results of audits under Article 36, and any amounts owed by Contractor to Owners pursuant to such audits may be offset by Owners from any amounts otherwise payable to Contractor at any time.

With respect to Excluded Costs that are also Reimbursable Costs, Contractor shall implement a system to track and record such Excluded Costs distinct from other Reimbursable Costs.

7.1.2 Non-Reimbursable Costs means the following:

(i) Salaries and other compensation of Contractor's and Contractor's Affiliates' Personnel not assigned to the Construction Site, except to the extent such Personnel are engaged in performing services in support of the Work, or as expressly approved by Owners.

(ii) Costs and expenses of Contractor's home or branch offices or other offices not at the Construction Site, other than the amounts payable as Reimbursable Costs under Section 7.1.1(iii).

(iii) Any portion of Contractor's or any Person's capital costs or expenses, including interest on capital employed for the Work, subject to Section 8.6 regarding payment of interest in case of late payment.

(iv) Overhead and general costs or expenses of any kind, except as payable as a Reimbursable Cost under Section 7.1.1.

(v) Costs and fees of attorneys, accountants or other consultants, except as expressly authorized by Owners in writing.

(vi) Costs and expenses associated with the Repayment Letter of Credit.

(vii) Other costs or expenses identified as Non-Reimbursable Costs in this Agreement.

7.2 Base Fee and Earned Fee . In addition to Reimbursable Costs, Owners shall pay the Fee to Contractor as and to the extent provided herein. The Fee is comprised of the “Base Fee” and the “Earned Fee,” as follows:

(i) The Base Fee shall be equal to One Hundred Twenty Million Dollars ($120,000,000) and shall be paid in installments as set forth in Section 8.4 and the other provisions of this Agreement pertaining to the payment of Base Fee, subject to Section 21.2.2.

(ii) The Earned Fee shall be equal to the aggregate of (i) One Hundred Twenty Million Dollars ($120,000,000) and (ii) the adjustments in Earned Fee set forth in Change Orders pursuant to the Subcontract Scope Alignment Process in Section 3.2.3. The Earned Fee is comprised of: (a) the “Schedule Earned Fee” for each Unit; and (b) the “Cost Earned Fee.”

(iii) The Schedule Earned Fee for each Unit is equal to twenty-five percent (25%) of the Earned Fee; provided, however, that the Schedule Earned Fee for each Unit shall be subject to increase or reduction as set forth in Section 7.3. Provisional payments of the Schedule Earned Fee shall be made as set forth in Section 8.5, subject to repayment as provided herein.

(iv) The Cost Earned Fee is equal to fifty percent (50%) of the Earned Fee; provided, however, that the Cost Earned Fee shall be subject to increase or reduction as set forth in Section 7.4. Provisional payments of the Cost Earned Fee shall be made as set forth in Section 8.5, subject to repayment as provided herein.

7.3 Modification of Schedule Earned Fee . The Schedule Earned Fee for each Unit shall be subject to either a reduction or increase as follows ***:***

7.3.1 In the event that Mechanical Completion of Unit 3 is not achieved by the date that is ninety (90) Days after the Target Completion Date for such Unit (such date being the “Unit 3 Trigger Date”), then the Schedule Earned Fee for such Unit shall be decreased as follows:

(i) For each of the first thirty (30) Days after the Unit 3 Trigger Date that Unit 3 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day;

(ii) After such thirty (30) Day period under Section 7.3.1(i), for each of the next thirty (30) Days that Unit 3 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day; and

(iii) After such thirty (30) Day period under Section 7.3.1(ii), for each additional Day that Unit 3 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day until the Schedule Earned Fee for such Unit is reduced to Zero Dollars ($0.00).

7.3.2 In the event that Mechanical Completion of Unit 3 is achieved prior to the Target Completion Date for such Unit, then the Schedule Earned Fee for such Unit shall be increased as follows:

(i) For each of the first (30) Days prior to the Target Completion Date for Unit 3 that Unit 3 has achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be increased by [***] per Day; and

(ii) If Unit 3 has achieved Mechanical Completion more than thirty (30) Days prior to the Target Completion Date for Unit 3, for each additional Day prior to such Target Completion Date that such Unit has achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be increased by [***] per Day; provided, however, that the total increase of the Schedule Earned Fee for Unit 3 shall be subject to a cap in an amount equal to twenty five percent (25%) of the Earned Fee, as calculated prior to any adjustment under this Section 7.3.2.

7.3.3 In the event that Mechanical Completion of Unit 4 is not achieved by the date that is sixty (60) Days after the Target Completion Date for such Unit (such date being the "Unit 4 Trigger Date"), then the Schedule Earned Fee for such Unit shall be decreased as follows:

(i) For each of the first thirty (30) Days after the Unit 4 Trigger Date that Unit 4 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day;

(ii) After such thirty (30) Day period under Section 7.3.3(i), for each of the next forty-five (45) Days that Unit 4 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day; and

(iii) After such forty-five (45) Day period under Section 7.3.3(ii), for each additional Day that Unit 4 has not achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be reduced by [***] per Day until the Schedule Earned Fee for such Unit is reduced to Zero Dollars ($0.00).

7.3.4 In the event that Mechanical Completion of Unit 4 is achieved prior to the Target Completion Date for such Unit, then the Schedule Earned Fee for such Unit shall be increased as follows:

(i) For each of the first thirty (30) Days prior to the Target Completion Date for Unit 4 that such Unit has achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be increased by [***] per Day;

(ii) If Unit 4 has achieved Mechanical Completion more than thirty (30) Days prior to the Target Completion Date for Unit 4, for each of the next forty (45) Days prior to such Target Completion Date that Unit 4 has achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be increased by [***] per Day; and

(iii) If Unit 4 has achieved Mechanical Completion more than seventy-five (75) Days prior to the Target Completion Date for Unit 4, for each additional Day prior to such Target Completion Date that such Unit has achieved Mechanical Completion, the Schedule Earned Fee for such Unit shall be increased by [***] per Day; provided, however, that the total increase of the Schedule Earned Fee for Unit 4 shall be subject to a cap in an amount equal to twenty five percent (25%) of the Earned Fee, as calculated prior to any adjustment under this Section 7.3.4.

7.4 <u>Modification of Cost Earned Fee</u> . The Cost Earned Fee shall be subject to either a reduction or increase as follows:

7.4.1 If the Combined Construction Costs are greater than the sum of: (i) the Target Construction Cost; plus (ii) [***] of the Target Construction Cost (“Deadband Amount”) (such sum of the Target Construction Cost and the Deadband Amount being the “Reduction Trigger Amount;” i.e., [***] of the Target Construction Cost), then and in such event the Cost Earned Fee shall be reduced as follows:

(i) For the first [***] of Combined Construction Costs that exceed the Reduction Trigger Amount, the Cost Earned Fee shall be reduced by [***] of such excess/overrun;

(ii) If the Combined Construction Costs exceed the Reduction Trigger Amount by more than [***] , the Cost Earned Fee shall be reduced by [***] of the excess/overrun for the next [***] of such excess/overrun; and

(iii) If the Combined Construction Costs exceed the Reduction Trigger Amount by more than [***] , the Cost Earned Fee shall be reduced by [***] of the excess/overrun for any additional excess/overrun until the Cost Earned Fee is reduced to Zero Dollars ($0.00).

7.4.2 If the Combined Construction Costs are less than the Target Construction Cost reduced by the Deadband Amount (such amount being the "Increase Trigger Amount;" i.e., [***] of the Target Construction Cost), then and in such event the Cost Earned Fee shall be increased as follows:

(i) For the first [***] by which the Combined Construction Costs are less than the Increase Trigger Amount, the Cost Earned Fee shall be increased by [***] of such underrun;

(ii) If the Combined Construction Costs are less than the Increase Trigger Amount by more than [***] , then the Cost Earned Fee shall be increased by [***] of the underrun for the next [***] of such underrun; and

(iii) If the Combined Construction Costs are less than the Increase Trigger Amount by more than [***] , then the Cost Earned Fee shall be increased by [***] of such additional underrun amount; provided, however, that the total of any such increase of the Cost Earned Fee shall be subject to a cap in an amount equal to fifty percent (50%) of the Earned Fee as calculated prior to any adjustment under this Section 7.4.2.

7.5 <u>Adjustments of Reduction and Increase Amounts and Percentages</u> . After the adjustments to the Earned Fee for all stages of the Subcontract Scope Alignment Process have been made pursuant to Section 3.2.3, a one-time adjustment will be made as necessary to the rates of reduction of Schedule Earned Fee stated in Section 7.3.1 and Section 7.3.3 and to the rates of reduction of Cost Earned Fee stated in Section 7.4 so as to preserve the following (provided that corresponding modifications to the rates of increase shall also be made):

(a) for the Schedule Earned Fee for Unit 3, a three (3) month period beyond the Unit 3 Trigger Date over which the Schedule Earned Fee for Unit 3 is reduced to zero at rates that are proportionate to the rates set forth in Section 7.3.1;

(b) for the Schedule Earned Fee for Unit 4, a four (4) month period beyond the Unit 4 Trigger Date over which the Schedule Earned Fee for Unit 4 is reduced to zero at rates that are proportionate to the rates set forth in Section 7.3.3; and

(c) reduction of the Cost Earned Fee to zero when the Combined Construction Costs exceed thirteen percent (13%) of the Target Construction Cost, and such reduction shall be made at rates that are proportionate to the rates set forth in Section 7.4.

7.6 Determination of Final Earned Fee .

7.6.1 The Parties shall cooperate in good faith to seek to agree upon the final amount of Schedule Earned Fee for each Unit within 30 Days of the Mechanical Completion Date of such Unit.

7.6.2 Within 30 Days of Final Completion, Contractor shall submit a proposed final statement of Combined Construction Costs to Owners. Owners shall promptly review such statement and may conduct an audit thereof in accordance with Section 36.4. The Parties agree to utilize their best efforts to agree upon the final amount of Cost Earned Fee within 60 Days following Contractor's submission.

7.6.3 To the extent that the Parties disagree on the amount of the Scheduled Earned Fee and/or the Cost Earned Fee, Contractor shall be entitled to invoice Owners for and Owners shall pay within thirty (30) Days after such invoice any applicable Undisputed Amount pending resulting of the disagreement.

7.7 Sole Liability . NOTWITHSTANDING ANYTHING IN THIS AGREEMENT TO THE CONTRARY, CONTRACTOR'S SOLE LIABILITY FOR SCHEDULE DELAYS AND COST OVERRUNS ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT SHALL BE THE REDUCTION OF EACH SCHEDULE EARNED FEE IN ACCORDANCE WITH SECTION 7.3 AND THE REDUCTION OF THE COST EARNED FEE IN ACCORDANCE WITH SECTION 7.4; PROVIDED, HOWEVER, THAT THE FOREGOING SHALL NOT BE CONSTRUED TO LIMIT: (I) ANY OF CONTRACTOR'S OBLIGATIONS UNDER THIS AGREEMENT THAT REQUIRE CONTRACTOR TO OBTAIN OWNERS' APPROVAL FOR CERTAIN COSTS OR THAT REQUIRE CONTRACTOR TO PERFORM AN OBLIGATION IN A SPECIFIC TIME PERIOD; (II) CONTRACTOR'S OBLIGATIONS UNDER SECTION 2.21 AND SECTION 3.3.1; (III) THE PROVISIONS THAT PERTAIN TO REIMBURSABLE COSTS UNDER SECTION 7.1.1; AND (IV) OWNERS' RIGHTS TO TERMINATE THIS AGREEMENT AND THE RIGHTS AND REMEDIES OF OWNERS AS A RESULT OF SUCH TERMINATION AS PROVIDED IN ARTICLE 21.

## ARTICLE 8

## BILLING AND PAYMENTS

8.1 Respective Payment Responsibility . Owners shall be severally, not jointly, liable for the payments due hereunder; provided, however, that GPC shall act on behalf of all Owners for purposes of the receipt of invoices and aggregating the payments received from the Owners prior to making payment in accordance with the provisions of this Agreement. Each individual Owner is responsible for that percentage of the amounts payable to Contractor hereunder that is equivalent to such individual Owner's respective Ownership Interest at the time such payment obligation accrues. In the event that an Owner does not pay in full the amount that is due from such Owner, and another Owner does not make such payment on behalf of such non-paying Owner, GPC shall notify Contractor no later than the due date for the payment of the identity of the Owner(s) that did not pay in full and the amount of such shortfall in payment from such Owner(s).

8.2 Monthly Payment for Estimated Reimbursable Costs .

8.2.1 Prior to the Effective Date, Contractor has provided Owners with a funding request for the estimated Reimbursable Costs for the balance of October 2017 and for the entire calendar month of November 2017 (the "Initial Funding Request"). Owners will make payment of the funds requested in the Initial Funding Request no later than two (2) Days after the Effective Date. Thereafter and beginning with the calendar month following the Effective Date, on or before the tenth (10 th ) Day of each calendar month, Contractor shall provide Owners with a monthly funding request in the format set forth in Exhibit O ("Monthly Funding Request") that sets forth Contractor's good faith estimate of Reimbursable Costs expected to be incurred during the immediately following calendar month (each such period being referred to as a "Monthly Funding Period"). Each Monthly Funding Request shall include a statement certifying that the request includes only Reimbursable Costs that are estimated to be incurred during the next Monthly Funding Period. An example of the process for Monthly Funding Requests, the payment thereof, and the reconciliation and invoicing under Section 8.3, is included in Exhibit O.

8.2.2 Subject to the right of Owners to dispute a Monthly Funding Request to the extent that the funds requested materially differ from the amounts previously indicated by Contractor pursuant to Section 8.2.3 below or do not comply with the terms and conditions of this Agreement, the amount of Reimbursable Costs set forth in each Monthly Funding Request shall be due from Owners within fifteen (15) Days following receipt of the request.

8.2.3 With each Monthly Funding Request issued pursuant to Section 8.2.1, Contractor shall also provide to Owners a good faith estimate of expected Reimbursable Costs for each of the three (3) Monthly Funding Periods following the Monthly Funding Period for which such Monthly Funding Request applies, in the same format as the Monthly Funding Request.

8.2.4 An expected funding profile for the funding of estimated Reimbursable Costs and Fee payments for each year, through the Target Completion Date for each Unit (as of the Effective Date) will be provided by Contractor within thirty (30) Days after the Effective Date. Such expected funding profile will be jointly reviewed by the Parties on an annual basis and adjustments to such funding profile shall be made accordingly based on progress made in performance of the Work and projected Reimbursable Costs and Fee payments.

8.2.5 Contractor will be responsible for making timely recommendations to Owner as to the amounts that should be paid to (or as appropriate withheld from) Contractor-Managed Subcontractors at least twenty (20) Days in advance of payment due dates under the relevant Contractor-Managed Subcontracts, so as to permit Owners to arrange timely payment. Owners will be responsible for making payment to Contractor-Managed Subcontractors by way of direct payment to such subcontractors.

8.3 Monthly Invoices .

8.3.1 With each Monthly Funding Request under Section 8.2.1, commencing with the second Monthly Funding Request, Contractor shall submit the following to Owners:

(i) a statement of Reimbursable Costs incurred for the preceding calendar month (or, in the case of the Initial Funding Request, for the period covered by the Initial Funding Request), including: (a) a reconciliation of such statement of Reimbursable Costs against the funds previously provided by the Owners for such period; and (b) identification of the amount to be paid by the Owners or credited to the Owners based on such reconciliation; and

(ii) an invoice for the monthly installment of the Base Fee to be paid as set forth in Section 8.4 below;

(iii) a separate invoice for:

(a) as applicable, the quarterly amount of each Schedule Earned Fee to be paid as set forth in Section 8.5 below; and

(b) as applicable, the quarterly amount of the Cost Earned Fee to be paid as set forth in Section 8.5 below.

8.3.2 Except for amounts that are disputed by Owners under Section 8.9, the amounts set forth in each invoice under this Section 8.3 shall be due from Owners within fifteen (15) Days following receipt of the invoice.

8.4 Payment of Base Fee . The Base Fee shall be paid to Contractor by Owners each month until the month following achievement of Final Completion in monthly installments. Each monthly installment of the Base Fee shall be equal to a portion of the Base Fee such that, after such installment is paid, Owners shall have paid to Contractor a total portion of Base Fee that is equal to the product of: (i) the Cumulative Final Completion Percentage as of end of the month prior to the invoice date; multiplied by (ii) the total Base Fee.

8.5 Provisional Payments of Schedule Earned Fee and Cost Earned Fee . Owners shall pay to Contractor the Schedule Earned Fee for each Unit and the Cost Earned Fee on a provisional basis, in quarterly installments as provided below. The fourth (4th) calendar quarter of 2017 shall be the first quarter for which such provisional installment shall be paid, which shall be invoiced by Contractor with the Monthly Funding Request issued in January of 2018. Each quarterly installment shall be invoiced by Contractor to Owners with the first Monthly Funding Request in each calendar quarter under Section 8.3.1. Each such quarterly installment shall be determined as follows:

(i) Each quarterly installment of the Schedule Earned Fee for each Unit shall be equal to a portion of the Schedule Earned Fee for such Unit such that, after such installment is paid, Owners shall have paid to Contractor a total portion of Schedule Earned Fee for such Unit that is equal to the product of: (i) the Cumulative Mechanical Completion

Percentage for such Unit as of the end of the previous calendar quarter; multiplied by (ii) the total amount of the Schedule Earned Fee for such Unit (excluding any adjustments to the Schedule Earned Fee under Section 7.3). If the Project Schedule shows that Mechanical Completion of a Unit will not be achieved by the Trigger Date for that Unit, then the amount of the quarterly payment of Schedule Earned Fee for that Unit will be reduced to an amount consistent with the reduced Schedule Earned Fee expected to be earned by Contractor, and future quarterly payments of Schedule Earned Fee for that Unit will similarly be reduced, provided that if a later forecast shows that Mechanical Completion of such Unit will be achieved by the Trigger Date then (i) Contractor will be paid an amount corresponding to the reduced portions of prior quarterly payments of Schedule Earned Fee for that Unit and (ii) future quarterly payments of Schedule Earned Fee for that Unit will be paid without such reduction, unless a future forecast shows that Mechanical Completion of a Unit will not be achieved by the Trigger Date for that Unit.

(ii) Each quarterly installment of the Cost Earned Fee shall be equal to a portion of the Cost Earned Fee such that, after such installment is paid, Owners shall have paid to Contractor a total portion of Cost Earned Fee that is equal to the product of: (i) the Cumulative Final Completion Percentage as of the end of the previous calendar quarter; multiplied by (ii) the total amount of the Cost Earned Fee (excluding any adjustments to the Cost Earned Fee under Section 7.4). If the Project Cost Forecast shows that the Combined Construction Costs will exceed the Reduction Trigger Amount, then the amount of the quarterly payment of Cost Earned Fee will be reduced to an amount consistent with the reduced Cost Earned Fee expected to be earned by Contractor based on the Project Cost Forecast, and future quarterly payments of Cost Earned Fee will similarly be reduced, provided that if a later Project Cost Forecast shows that the Combined Construction Costs will not exceed the Reduction Trigger Amount then (i) Contractor will be paid an amount corresponding to the reduced portions of prior quarterly payments and (ii) future quarterly payments of Cost Earned Fee will be paid without reduction, unless a future forecast shows that the Combined Construction Costs will exceed the Reduction Trigger Amount.

8.6 Late Payment. If for any reason Owners fail to pay Contractor for any sums due and owing by the due date, Contractor will be entitled to interest thereon at the Interest Rate, calculated from the date payment was due. If Owners fail to make payment of an Undisputed Amount on the due date and thereafter such amount continues to be unpaid for fourteen (14) Days after Contractor provides notice to Owners, Contractor shall have the right to suspend performance of the Work until such time as such payment is made. For the avoidance of doubt, if any Owner fails to make payment of its portion of an Undisputed Amount within such fourteen (14) Day period, and another Owner does not make payment of such amount not paid within such fourteen (14) Day period, Contractor shall be entitled to exercise the foregoing rights even if the other Owner(s) make payment of the amounts for which they are responsible.

8.7 Reconciliation of Schedule Earned Fee and Cost Earned Fee.

8.7.1 After the amount of the Schedule Earned Fee for a Unit is finally determined per Section 7.6, to the extent that the aggregate of the installments of the Schedule Earned Fee for such Unit provisionally paid by the Owners under Section 8.5 is more than the amount of the Schedule Earned Fee for such Unit so determined to have been earned by Contractor pursuant to

Section 7.3, then Contractor shall within 30 Days thereafter refund the difference to Owners, with interest at the Interest Rate. Owners may alternatively withhold such difference from any amount payable to Contractor.

8.7.2 After the amount of the Schedule Earned Fee for a Unit is finally determined per Section 7.6, to the extent that the aggregate of the installments of the Schedule Earned Fee for such Unit provisionally paid by the Owners under Section 8.5 is less than the amount of the Schedule Earned Fee for such Unit so determined to have been earned by Contractor pursuant to Section 7.3, then within thirty (30) Days thereafter, Owners shall make payment of the difference to Contractor (including any increased amount of Schedule Earned Fee to which Contractor is entitled under Section 7.3).

8.7.3 After the amount of the Cost Earned Fee is finally determined after Final Completion per Section 7.6, to the extent that the aggregate of the installments of the Cost Earned Fee provisionally paid by the Owners under Section 8.5 is more than the amount of the Cost Earned Fee so determined to have been earned by Contractor pursuant to Section 7.4, then Contractor shall within 30 Days thereafter refund the difference to Owners, with interest determined in accordance with Section 8.6. Owners may alternatively withhold such difference from any amount payable to Contractor.

8.7.4 After the amount of the Cost Earned Fee is finally determined after Final Completion per Section 7.6, to the extent that the aggregate of the installments of the Cost Earned Fee provisionally paid by the Owners under Section 8.5 is less than the amount of the Cost Earned Fee so determined to have been earned by Contractor pursuant to Section 7.4, then within thirty (30) Days thereafter, Owners shall make payment of the difference to Contractor (including any increased amount of Cost Earned Fee to which Contractor is entitled under Section 7.4).

8.7.5 In order to secure the potential repayment under this Section 8.7 of the Schedule Earned Fee for each Unit and/or the Cost Earned Fee, Contractor shall provide an Eligible Letter of Credit to Owners and maintain such Eligible Letter of Credit to secure such potential repayment (the "Repayment Letter of Credit") until the amount of the Cost Earned Fee and the amount of the Schedule Earned Fee for each Unit are finally determined and such repayment (if required) is made. The Repayment Letter of Credit shall initially be in the amount of the aggregate of the Schedule Earned Fee payments and the Cost Earned Fee payments expected to be paid to Contractor in the first twelve (12) months after the Effective Date. The amount of the Repayment Letter of Credit shall thereafter be adjusted annually, such that the adjusted value reflects the aggregate of the amounts of the Earned Fee theretofore paid to Contractor and thereafter expected to be paid to Contractor in the following twelve (12) months.

8.7.6 Owners shall only be permitted to draw upon the Repayment Letter of Credit as follows:

(i) Should Contractor fail to pay the refund amount(s) and applicable interest as determined in accordance with Section 8.7.1 and/or Section 8.7.3, Owners will be entitled to draw on the Repayment Letter of Credit for the amount of the repayment owed by Contractor pursuant to Section 8.7.1 and/or Section 8.7.3.

(ii) If at any time the Repayment Letter of Credit is within sixty (60) Days of expiry, expiration or termination (such sixtieth (60th) Day being the "Renewal Date") and a Repayment Letter of Credit is still required to be maintained under Section 8.7.5, and a substitute or replacement Repayment Letter of Credit that satisfies the requirements of this Agreement as to form, issuer and amount has not been provided by the Day that is fourteen (14) Days after the Renewal Date, Owners shall be entitled to draw upon the full amount of the Repayment Letter of Credit.

8.7.7 Owners may draw upon the Repayment Letter of Credit as provided in Section 8.7.6 regardless of whether a Contractor Event of Default has been declared.

8.8 Final Payment.

8.8.1 Following the later of (i) the conclusion of Commissioning and Startup Support as confirmed by Owners in writing, and (ii) achievement of Final Completion, Contractor shall submit to Owners an invoice for the final payments due under this Agreement (the "Final Payment Invoice"), which shall set forth the remaining amounts due to it pursuant to this Agreement.

8.8.2 When submitting the Final Payment Invoice, Contractor shall: (i) submit a written discharge, in form and substance reasonably satisfactory to both Parties, confirming that the total of such invoice represents full and final settlement of the monies due to Contractor for the applicable Work under this Agreement, except with respect to amounts in dispute that are identified in such discharge, and (ii) include the lien waivers, releases and Contractor's affidavit required by Section 8.11(ii) conditioned on Contractor receiving payment pursuant to such invoice.

8.8.3 Payment of the Undisputed Amount portions of the Final Payment Invoice shall be due from Owners within thirty (30) Days following receipt of the invoice. Contractor's acceptance of payment of such invoice will constitute a waiver of all Claims by Contractor for payment for the applicable Work against Owners (both existing at time of acceptance and arising thereafter), except those previously made in writing and identified by Contactor as unsettled at the time of final payment.

8.9 Payment Disputes.

8.9.1 In the event that Owners dispute any Monthly Funding Request submitted by Contractor under this Agreement, or contend that such Monthly Funding Request is otherwise not in accordance with this Agreement, Owners shall provide notice to Contractor within ten (10) Days after submission to Owners that provides an explanation of the basis for such dispute or contention; provided, however, that the failure of Owners to provide such notice within such time period shall not waive Owners' right to later dispute the amounts set forth in such Monthly Funding Request, and shall in no way limit Owners' rights under this Agreement to later audit any Reimbursable Costs and require adjustments to such Reimbursable Costs or amounts paid based on the results and findings of such audit.

8.9.2 Owners may withhold payment of any disputed amount until the dispute is resolved by agreement of the Parties or pursuant to the dispute resolution provisions contained in

Article 38 of this Agreement; provided, however, that payment shall not waive Owners' right to dispute the payment of Reimbursable Costs or invoiced amounts for any reason in accordance with this Agreement. In the event that Owners dispute only a portion of any Monthly Funding Request or invoice submitted by Contractor under this Agreement, Owners shall make payment of the undisputed portion by the payment due date. Notwithstanding Owners' dispute of a Monthly Funding Request or invoice (or any portion thereof) pursuant to this Section 8.9, Contractor shall continue the performance of the Work pursuant to this Agreement. Within ten (10) Business Days after: (i) an agreement of the Parties resolving a dispute is reached; or (ii) resolution of such dispute under Article 38, Contractor shall refund any amount by which it was overpaid (or Owners may elect to offset or recoup such amount against any amounts owed to Contractor) or Owners shall pay any additional amounts due Contractor, as applicable, to the extent provided for in such agreement or dispute resolution determination. All such payments, offset or recoupment shall include the payment of interest at the Interest Rate. For refunds owed by Contractor to Owners, interest shall accrue from the date Owners made the underlying payment to Contractor to the date Contractor refunds such amount to Owners (or such amount is offset or recouped by Owners). For all other amounts owed, interest shall accrue from the date the payment was originally due until the date the payment is made.

8.10 Supporting Documentation. Contractor shall submit statements and invoices under Section 8.3 in the format set forth in Exhibit P. With each such statement and invoice, Contractor shall provide to Owners copies of all Supporting Documentation, as defined herein, in Excel format and all source documentation in a PDF format, and such additional documentation and materials as Owners may reasonably require to substantiate such statement and invoice. "Supporting Documentation" means, with respect to any statement and invoice, all information in detail sufficient to substantiate and justify the amounts set forth in such statement and invoice, including:

(i) employee time sheets, including employee name, employee ID number, employee title, actual salaries and wages as applicable, appropriate WBS cost code indicating work area and hours worked;

(ii) detail for Contractor-supplied Construction Equipment charges, including equipment type, equipment ID number and applicable cost or rental rate; and

(iii) vendor invoices for material purchases, including material description per item, quantities per item, freight, and sales taxes.

8.11 Conditions of Payments.

8.11.1 Required Submittals. Owners shall not be required to make any payment to Contractor pursuant to this Article 8 if Contractor has not provided the submittals described in this Section:

(i) Interim Lien Waivers and Releases. In order to be valid, each invoice submitted by Contractor must be accompanied by interim lien waivers and releases, in the form and substance as set forth in Exhibit Q, executed by Contractor and Subcontractors having subcontracts exceeding [***], with respect to the Work completed prior to the date of such invoice;

(ii) Final Lien Release; Contractor's Affidavit . In order to be valid, Contractor's invoice for any final payment from Owners under the Agreement must be accompanied by (A) lien releases and waivers executed by Contractor, and all Subcontractors having subcontracts exceeding [***] in the form and substance as set forth in Exhibit Q and (B) Contractor's affidavit in the form and substance as set forth in Exhibit Q executed by Contractor.

8.11.2 Withholding to Protect Owners from Loss . Owners may, without prejudice to any other rights Owners may have, withhold all or any portion of any payment to such extent as may be necessary in Owners' reasonable opinion to protect Owners from loss due to Liens filed by Contractor, any of its Subcontractors, or any of their Personnel against either the Facility, the Site, Construction Site or any other property of Owners other than Liens filed as a result of Owners' breach of their obligations to make payments to Contractor hereunder. When Contractor has remedied the cause for withholding any payment and has furnished evidence of such remedy that is satisfactory to Owners, Owners will make the payment so withheld to Contractor within thirty (30) Days following Owners' receipt of such evidence. If Contractor, after receipt of notice from Owners, fails or refuses to remedy the cause for withholding such payment within the time specified in the notice, then Owners may, without prejudice to any other rights Owners may have, remedy it and charge Contractor for the cost of such remedy including Owners' expenses, such as attorneys' fees and other legal fees and disbursements. Such action by Owners will not be or be considered to be a waiver of any default by Contractor under this Agreement.

8.11.3 Lien Bonds . Owners shall release any payments withheld due to any Lien if Contractor provides to Owners at Contractor's sole expense (i) a lien bond which is (A) issued by a surety company reasonably acceptable to Owners, (B) in form and substance satisfactory to Owners, and (C) in an amount not less than [***] of such Lien Claim or (ii) cash or a letter of credit or other security in form and substance satisfactory to Owners in an amount not less than [***] of such Lien Claim. By posting a lien bond, however, Contractor shall not be relieved of any obligations (including its indemnity obligations) under this Agreement.

8.11.4 Set Off . Owners may set off any sums due and payable by Contractor to Owners under this Agreement against any payments due to Contractor under this Agreement.

8.11.5 Effect of Payment . Owner's payment of an invoice, Monthly Funding Request or any portion thereof shall not constitute an acceptance of any of the Work furnished by Contractor, shall not constitute approval or acceptance of any item or cost in such invoice or Monthly Funding Request, nor shall it shall relieve Contractor of any of its obligations or liabilities under this Agreement. No such payment will constitute a waiver of any Claim which Owners may have against Contractor, including a Claim for defective or non-conforming Work (whether existing at the time of the payment or arising thereafter), regardless of whether the facts of such Claim were known to Owners at the time payment was made.

## ARTICLE 9

## PROJECT SCHEDULE

9.1 Baseline Schedule . Notwithstanding the Unit 3 and Unit 4 Target Completion Dates, the Parties agree to utilize an "early target" as the Baseline Schedule, which as of the Effective Date is premised upon Mechanical Completion for each of Unit 3 and Unit 4 being achieved two (2) months earlier than the respective Target Completion Date for each of Unit 3 and Unit 4 ("Early Completion Targets") (each such two month period is referred to herein as "Schedule Contingency"). For purposes of this Agreement, Schedule Contingency is considered to be for the exclusive use and benefit of Contractor.

9.2 Baseline Schedule Revision .

9.2.1 Contractor acknowledges and agrees that it has reviewed the Baseline Schedule as of the Effective Date, and:

(a) represents and warrants that as of the Effective Date, such Baseline Schedule (including the schedule, sequence and duration of all testing, start-up and commissioning activities) supports the Contractor's performance of Work on a schedule for each Unit to achieve Mechanical Completion by the Early Completion Targets, provided that all of the engineering deliverables and procurement activities (which excludes testing, start-up and commissioning activities) ("Owner E&P Activities") are provided in a timeframe that supports such schedule.

(b) acknowledges and agrees that certain Owner E&P Activities either have not been incorporated into the Baseline Schedule as of the Effective Date or, as currently scheduled, may not support the Contractor's performance of Work on a schedule for each Unit to achieve Mechanical Completion by the Early Completion Targets.

Accordingly, during a period of no more than one hundred eighty (180) Days after the Effective Date, in consultation with Contractor, Owners agree to use commercially reasonable efforts to add and/or revise Owner E&P Activities within the Baseline Schedule in a manner that supports Contractor's performance of the Work on a schedule for each Unit to achieve Mechanical Completion by the Early Completion Targets. Contractor shall cooperate in this process and reasonably accommodate related adjustments in Contractor activities in the Baseline Schedule to support achieving this objective. Owners shall notify Contractor when the above process under this Section 9.2.1 is completed and provide Contractor the proposed revised Baseline Schedule that includes the Owner E&P Activities as added and/or revised under this Section 9.2.1.

9.2.2 For purposes hereof, the "Baseline Schedule Revision Period" shall mean the period of time from the Effective Date until the later of: (i) the Day on which Contractor notifies Owners under Section 9.3.2 that the proposed revised Baseline Schedule provided by Owners under Section 9.2.1 is acceptable, or (ii) if Contractor notifies Owners under Section 9.3.2 that the proposed revised Baseline Schedule is not acceptable, the conclusion of the process set forth in Section 9.3 and establishment of a revised Baseline Schedule pursuant to such provisions.

9.2.3 Without prejudice to Contractor's right to claim an Adjustment Event under Section 9.5 following the Baseline Schedule Revision Period, Contractor agrees that during the Baseline Schedule Revision Period, it shall not assert that any Adjustment Event occurring during the Baseline Schedule Revision Period should adjust the Target Completion Dates, the Target Construction Cost or the Baseline Schedule; provided that during the Baseline Schedule Revision Period, Contractor shall provide notice to Owners of any circumstances or events that Contractor believes may constitute Adjustment Events to be considered under Section 10.4 or 11.4 (except that Contractor shall not be required to provide the information required under Section 10.4.3 or Section 11.4.3 until after the Baseline Schedule Revision Period).

9.3 Requirements and Process for Revised Baseline Schedule Adjustments .

9.3.1 Contractor shall be entitled to an equitable adjustment of the proposed revised Baseline Schedule to the extent that Contractor is able to demonstrate that the aggregate effect of the Owner E&P Activities within the revised Baseline Schedule provided by Owners under Section 9.2.1 and/or any Subcontract Scope Schedule Impacts under Section 3.2.3 and Section 3.2.4:

(a) will have a material adverse impact on Contractor's ability to perform the Work, or any Contractor-Managed Subcontractor's ability to perform its work, on a schedule for a Unit to achieve Mechanical Completion by its Early Completion Target, and

(b) results in a delay to the critical path for a Unit to achieve Mechanical Completion by its Early Completion Target (a "Revised Baseline Schedule Impact").

For the avoidance of doubt, Contractor shall not be entitled to any such adjustment of the proposed revised Baseline Schedule, and no Revised Baseline Schedule Impact shall occur, to the extent that (i) Contractor's representation set forth in Section 9.2.1(a) is found to be incorrect or (ii) Contractor requests changes in writing to the proposed revised Baseline Schedule during the process described in Section 9.2.1.

9.3.2 Within twenty-one (21) Days after Owners provide notice and the proposed revised Baseline Schedule under Section 9.2.1, Contractor shall provide written notice to Owners that either: (i) Contractor accepts such proposed revised Baseline Schedule, in which case such proposed revised Baseline Schedule shall become the Baseline Schedule under this Agreement, or (ii) Contractor does not accept such proposed revised Baseline Schedule, in which event the remainder of this Section 9.3 shall apply, and the revised Baseline Schedule that results from the application of Section 9.3.4 or Section 9.3.5 shall become the Baseline Schedule under this Agreement. If Contractor does not accept the proposed revised Baseline Schedule, then concurrently with such notice, Contractor shall provide Owners a detailed description of: (i) each asserted Revised Baseline Schedule Impact and the resulting asserted adjustment required to the proposed revised Baseline Schedule; (ii) the specific reasons why each asserted Revised Baseline Schedule Impact has or will impact Contractor's ability to perform Work in accordance with a schedule to achieve Mechanical Completion of the Units by the Early Completion Targets, with particular focus on the specific activities on the critical path adversely affected; and (iii) other information reasonably requested by Owners.

9.3.3 As promptly as possible following notice (if any) under Section 9.3.2 that Contractor does not accept the proposed revised Baseline Schedule provided by Owners under Section 9.2.1, Contractor and Owners shall confer with respect to potential measures to mitigate or avoid adverse effects from the asserted Revised Baseline Schedule Impacts, including added cost and delay tradeoffs to minimize the effects on Contractor's ongoing and planned activities. Contractor shall implement reasonable measures for mitigating the effects of any Revised Baseline Schedule Impacts, including (in consultation with Owners) mitigation measures that may involve significant added expenditures in order to avoid or minimize critical path delays. To the extent that Contractor demonstrates that such mitigation measures will result in a material increase to the Combined Construction Costs, Contractor shall be entitled to an equitable increase of the Target Construction Cost pursuant to Section 9.4.

9.3.4 Owners and Contractor agree to cooperate in good faith to resolve any disagreement regarding adjustments to the proposed revised Baseline Schedule as a result of asserted Revised Baseline Schedule Impacts as promptly as practicable, considering the complexity of the events involved. If there has been no resolution of such disagreement within thirty (30) Days after Contractor's notice under Section 9.3.2, then either Party may at any point thereafter initiate the expedited hearing procedure under the DRB Procedures with respect to the disagreement. During the pendency of such disagreement until final resolution, Contractor shall not suspend or slow performance of any Work, or the work of any Contractor-Managed Subcontractor, on account of the disagreement unless directed to do so by Owners pursuant to Section 21.1.

9.3.5 With respect to any asserted Revised Baseline Schedule Impacts that are the subject of an agreed resolution, a DRB determination, or an arbitration award, such resolution, determination or award shall have effect as of the date agreed or rendered. All adjustments to the Baseline Schedule as a result of such resolution shall be set forth in a Change Order signed by the Parties, but noting, to the extent that adjustments are the result of DRB determination(s), that the adjustments remain subject to arbitration as provided in Article 38.

9.3.6 In the event that the Baseline Schedule is revised pursuant to this Section 9.3 as a result of an asserted Revised Baseline Schedule Impact, and as a result the schedule for Mechanical Completion of a Unit under such revised Baseline Schedule is delayed until after the Early Completion Target for such Unit, then the Target Completion Date for such Unit shall be extended for a period equal to such delay, provided that no extension shall be due to the extent that (i) the Project Schedule as of the date of Contractor's notice under Section 9.3.2 projects Mechanical Completion of such Unit being delayed to a date after the Early Completion Target for such Unit and (ii) such delay is attributable to a delay in performance of the Work which is not attributable to an Adjustment Event.

9.4 Adjustment of Target Construction Cost . To the extent that Contractor demonstrates that: (i) the revised Baseline Schedule under this Agreement (as determined pursuant to the first sentence of Section 9.3.2) will result in a material increase to the Combined Construction Costs, (ii) Contractor's accommodation of adjustments in Contractor activities pursuant to Section 9.2.1, or (iii) Contractor's implementation of measures for mitigating the effects of any Applicable Baseline Schedule Impacts under Section 9.3.3 will result in a material increase to the Combined Construction Costs, then Contractor shall be entitled to an equitable increase of the Target Construction Cost. In such event, an Adjustment Event shall be deemed to have occurred and Contractor may proceed under Section 11.4.

9.5 Adjustment Events. Upon the conclusion of the Baseline Schedule Revision Period (including, if applicable, adjustments made per Section 9.3), to the extent that Contractor believes that any Adjustment Events occurred during the Baseline Schedule Revision Period (other than an Adjustment Event under Section 9.4, which shall be dealt with under Section 9.4), Contractor may proceed under Sections 10.3 and 10.4 and/or Sections 11.3 and 11.4, as applicable.

9.6 Project Schedule Management.

9.6.1 Following the Effective Date, the Project Schedule shall be updated at least monthly to reflect progress. The Level 3 versions of the Project Schedule shall be consistent with the Level 2 version at all times. Owners shall be responsible for management and maintenance of the Level 1 and Level 2 versions of the Project Schedule, including data inputs and schedule modifications, and at Owners' election may utilize a separate contractor to provide such services.

9.6.2 Contractor shall be responsible for management and maintenance of the Level 3 version of the Project Schedule with respect to the Work, and any more detailed working-level schedules. Contractor may revise activities, activity durations and sequences in the Level 3 version as such activities pertain to the Work, as needed to reflect its current construction plans and expectations without the consent of Owners, so long as such revisions do not affect the Level 2 Project Schedule. Owners shall have responsibility for the management and maintenance of the Level 3 Project Schedule as it pertains to Owner E&P Activities, and Contractor shall not revise any activity, activity durations or sequences in the Level 3 schedule that are outside of its scope of Work.

9.7 Revisions to Baseline Schedule. The Baseline Schedule shall be modified in order to reflect:

(i) adjustments to the Baseline Schedule as a result of Adjustment Events pursuant to Article 10, and

(ii) adjustments to the Baseline Schedule made pursuant to Section 9.3.

No other revisions to the Baseline Schedule may be made except as mutually agreed by the Parties or made pursuant to Article 38.

Additionally, to the extent that an adjustment of the Baseline Schedule is made by agreement (and not due to the application of Section 9.7(i) or (ii) or as a result of Article 38), no adjustment to either Target Completion Date will be made except as mutually agreed by the Parties. An adjustment to the Baseline Schedule made in accordance with this Section shall not imply or require an adjustment to either Target Completion Date, except to the extent that the standard for adjustment of a Target Completion Date as set forth in Section 9.3 or 10.3 is met.

Baseline Schedule adjustments as determined by the DRB or modified in arbitration per

Article 38, shall be promptly reflected in the Baseline Schedule following such agreement or determination.

9.8 Schedule Recovery Plans .

9.8.1 If, during the performance of the Work, Contractor is delayed such that Mechanical Completion of a Unit is projected to be achieved after the Target Completion Date for such Unit (as indicated in the current Project Schedule) Owners may require Contractor to prepare a proposed plan that feasibly explains how Contractor will improve schedule progress to achieve Mechanical Completion for such Unit by its Target Completion Date (each such plan a "Recovery Plan"), and Contractor will participate in such meetings as Owners may reasonably require in connection with the preparation and implementation of such Recovery Plan.

9.8.2 Contractor will submit its proposed Recovery Plan to Owners within a reasonable period of time (considering the complexity of the issues involved) after Owners provide notice to Contractor's Authorized Representative, but not more than thirty (30) Days after notification by Owners of such request for a Recovery Plan; provided that in the event Contractor does not submit a Recovery Plan within thirty (30) Days of Owners' request, Owners shall be entitled to withhold future provisional payments of the portion of the Schedule Earned Fee with respect to the Unit in question until a Recovery Plan is approved (approval not to be unreasonably withheld). Upon receipt of such proposed Recovery Plan, Owners will review and comment upon the same within ten (10) Days. Contractor will accept and incorporate Owners' reasonable comments and resubmit, within ten (10) Days of receiving such comments, the proposed Recovery Plan to Owners. Contractor will implement the approved Recovery Plan, and will use commercially reasonable efforts to adhere to such Recovery Plan in order to achieve Mechanical Completion of such Unit by the Target Completion Date for such Unit. Owners' approval of the Recovery Plan will not relieve Contractor of any of its obligations under this Agreement. Additional costs associated with implementing an approved Recovery Plan shall be Reimbursable Costs, and any schedule revisions set forth in an approved Recovery Plan shall be promptly incorporated into the Project Schedule.

9.8.3 Owners may request that Contractor accelerate any aspect of the Work. Contractor shall use commercially reasonable efforts to meet Owners' request.

## ARTICLE 10

## TARGET COMPLETION DATES AND GROUNDS FOR ADJUSTMENTS

10.1 Target Completion Dates. Subject to adjustment as provided in this Article, the Target Completion Date for Unit 3 shall be May 31, 2020, and the Target Completion Date for Unit 4 shall be May 31, 2021.

10.2 Adjustments to Target Completion Dates. The Target Completion Dates shall be subject to adjustment only as follows:

(i) adjustments made in accordance with Section 9.3; and

(ii) adjustments made for Adjustment Events in accordance with the procedure and applicable standards set forth in Section 10.4.

10.3 Adjustment Events. In the event of occurrence of an Adjustment Event, that Contractor demonstrates: (i) has a material adverse impact on Contractor's ability to perform the Work or on a Contractor-Managed Subcontractor's ability to perform its work in accordance with the Project Schedule in effect as of the Adjustment Event; and (ii) causes a delay to the critical path in the Project Schedule for achievement of either or both Unit Mechanical Completion Dates, Contractor shall be entitled to equitable adjustment of the Target Completion Dates and the Baseline Schedule to the extent of such critical path impact. Provided, however, to the extent a delay due to an Adjustment Event runs concurrently with a delay not due to an Adjustment Event, Contractor shall not be entitled to such an adjustment or time-related cost adjustment for the period of such concurrent delay. In addition, for the avoidance of doubt, in the event of a concurrent delay resulting from two or more Adjustment Events, Contractor is only entitled to such an adjustment to the extent of the impact to the critical path, without duplication.

10.4 Requirements and Process for Target Completion Date Adjustments.

10.4.1 Notice. Contractor shall provide written notice to Owners of the occurrence of an event that Contractor considers an Adjustment Event as promptly following such event as practicable, but in any case within twenty-one (21) Days of when Contractor became aware of such event and that it was likely to have a material impact.

10.4.2 Consultation and Mitigation. As promptly as possible following any such notice, Contractor and Owners shall confer with respect to potential measures to mitigate or avoid adverse effects from the asserted Adjustment Event, including added cost and delay tradeoffs to minimize the effects on Contractor's ongoing and planned activities. Contractor is responsible for implementing all reasonable measures for mitigating the effects of any Adjustment Event, including (in consultation with Owners) mitigation measures that may involve significant added expenditures in order to avoid or minimize critical path delays.

10.4.3 Request Submission. As promptly as practicable following such notice, but in any case within thirty (30) days after such notice unless otherwise agreed by Owners, Contractor shall provide Owners its request for adjustment with respect to any asserted Adjustment Event, to include: (i) a detailed description of the asserted Adjustment Event, (ii) the specific reasons why the asserted Adjustment Event has or will impact Contractor's performance, with particular focus on the specific activities on the critical path adversely affected; (iii) a schedule analysis based on the Project Schedule identifying the specific critical path activity impact(s) asserted and their extent; (iv) the asserted adjustment required to the Baseline Schedule and the Target Completion Date(s); (v) an explanation of Contractor's mitigation efforts and strategy to minimize the impact of the asserted Adjustment Event; and (vi) relevant documentation supporting Contractor's factual assertions.

10.4.4 Review by Owners. Owners shall promptly review Contractor's submission in accordance with Section 10.4.3, and may request additional information or conduct its own independent review or analysis of the asserted Adjustment Event and its impact. Any adjustment to which the Contractor may be entitled for an Adjustment Event shall not include a time extension to the extent Contractor failed to implement reasonable mitigation measures to mitigate the effects of the Adjustment Event.

10.4.5 Prompt Resolution. Owners and Contractor agree to cooperate in good faith to reach agreed resolution of any adjustment(s) for asserted Adjustment Events as promptly as practicable, considering the complexity of the events involved. If there has been no resolution of such adjustments 60 days after submission of the information required by Section 10.4.3, Contractor may at any point thereafter initiate the expedited hearing procedure under the DRB Procedure with respect to the asserted adjustment. During the pendency of any asserted adjustment until final resolution, Contractor shall not suspend or slow performance of any Work on account of the dispute related to the asserted Adjustment Event unless directed to do so by Owners pursuant to Section 21.1.

10.4.6 Effective Date of Adjustments. With respect to any asserted Adjustment Event that is the subject of an agreed resolution, a DRB determination (pursuant to either the expedited or regular hearing procedures under the DRB Procedure), or an arbitration award, which affects the Target Completion Date(s), or the Baseline Schedule, such resolution, determination or award shall have effect as of the date agreed or rendered. All adjustments shall be set forth in a Change Order signed by the Parties, but noting, to the extent that adjustments are the result of DRB determination(s), that the adjustments remain subject to arbitration as provided in Article 38.

## ARTICLE 11

## TARGET CONSTRUCTION COST AND ADJUSTMENTS

11.1 Target Construction Cost. Exhibit M sets forth: (i) the amounts that comprise each category of Target Construction Cost; and (ii) Excluded Costs.

11.2 Adjustments to Target Construction Cost. The Target Construction Cost shall be subject to adjustment only as follows:

(i) adjustments made in accordance with the Subcontract Scope Alignment Process set forth in Section 3.2.3;

(ii) adjustments made for Adjustment Events in accordance with the procedure and applicable standards set forth in Section 11.4 (including as a result of the application of Section 9.4); and

(iii) the Target Construction Cost shall be decreased or increased (as applicable) to reflect the addition or reduction of personnel after the Effective Date that are seconded to Contractor under the Amended and Restated Staff Augmentation Agreement, in an amount determined consistent with the basis used to determine the costs included in the initial Target Construction Cost set forth in Exhibit M. In the case of Fluor personnel who are seconded to Southern Nuclear under a separate agreement and in turn seconded to Contractor pursuant to the Amended and Restated Staff Augmentation Agreement, the Target Construction Cost will only be adjusted to account for Fluor personnel who are seconded to Contractor beyond November 7, 2017.

11.3 Adjustment Events. In the event of occurrence of an Adjustment Event that Contractor demonstrates will result in a material increase to the Combined Construction Costs, Contractor shall be entitled to an equitable increase of the Target Construction Cost to that extent. In the event of occurrence of an Adjustment Event that Owners demonstrate will result in a material decrease in the Combined Construction Costs, Owners shall be entitled to an equitable decrease of the Target Construction Cost to that extent; provided that Adjustment Events that may result in a decrease in the Combined Construction Costs are limited to those set forth in subparts (i), (ix) and (x) of the definition of Adjustment Event in Article 1. For the purposes of this Agreement, Contingency is considered to be for the exclusive use and benefit of Contractor.

11.4 Requirements and Process for Target Construction Cost Adjustments.

11.4.1 Notice. Contractor shall provide written notice to Owners of the occurrence of an event that Contractor considers an Adjustment Event as promptly following such event as practicable, but in any case within twenty-one (21) Days of when Contractor became aware of such event and that it was likely to have a material impact. Owners shall provide written notice to Contractor of the occurrence of an event that Owners consider an Adjustment Event as promptly following such event as practicable, but in any case within twenty-one (21) Days of when Owner became aware of such event and that it was likely to have a material impact.

11.4.2 Consultation and Mitigation. As promptly as possible following any such notice, Contractor and Owners shall confer with respect to potential measures to mitigate or avoid adverse effects from the asserted Adjustment Event, including added cost and delay tradeoffs to minimize the effects on Contractor's ongoing and planned activities. Contractor is responsible for implementing all reasonable measures for mitigating the adverse effects of any Adjustment Event.

11.4.3 Request Submission. As promptly as practicable following such notice, but in any case within thirty (30) days after such notice unless otherwise agreed by the other Party, Contractor shall provide Owners, or Owners shall provide Contractor, its request for adjustment with respect to any asserted Adjustment Event, to include: (i) a detailed description of the asserted Adjustment Event, (ii) the specific reasons why the asserted Adjustment Event has or will impact Contractor's performance, with particular focus on the cost elements affected; (iii) the projected impact on Combined Construction Costs associated with the Adjustment Event, with specific cost breakdown; (iv) the proposed adjustment in the Target Construction Cost, after incorporating any related savings; (v) an explanation of Contractor's mitigation efforts and strategy to minimize the impact of the asserted Adjustment Event; and (vi) relevant documentation supporting Contractor's or Owners' factual assertions. The other Party shall promptly review such submission made in accordance with Section 11.4.3, and may request additional information or conduct its own independent review or analysis of the asserted Adjustment Event and its impact. Any adjustment to which the Contractor may be entitled for an Adjustment Event shall not include additional costs to the extent Contractor failed to implement reasonable mitigation measures to mitigate the adverse effects of the Adjustment Event.

11.4.4 Prompt Resolution. Owners and Contractor agree to cooperate in good faith to reach agreed resolution of any adjustment(s) for asserted Adjustment Events as promptly as practicable, considering the complexity of the events involved. If there has been no resolution of such adjustments 60 days after submission of the information required by Section 10.4.3, the Party claiming an adjustment may at any point thereafter initiate the expedited hearing procedure under the DRB Procedure with respect to the asserted adjustment. During the pendency of any asserted adjustment until final resolution, Contractor shall not suspend or slow performance of any Work on account of the dispute related to the asserted Adjustment Event unless directed to do so by Owners pursuant to Section 21.1.

11.4.5 Effective Date of Adjustments. With respect to any asserted Adjustment Event that is the subject of an agreed resolution, a DRB determination (pursuant to either the expedited or regular hearing process), or an arbitration award, which affects the Target Construction Cost such resolution, determination or award shall have effect as of the date agreed or rendered. All adjustments shall be set forth in a Change Order signed by the Parties, but noting, to the extent that adjustments are the result of DRB determination(s), that the adjustments remain subject to arbitration as provided in Article 38.

## ARTICLE 12

## OWNER DIRECTED CHANGES

12.1 Right to Direct Changes. Subject to the limitation in Section 12.2, Owners may at any time direct an addition to or deletion from or other change in the general scope of Work to be performed by Contractor hereunder (an "Owner Directed Change"), provided that any change to the DOR is subject to the written agreement of both Parties. Additional costs associated with the Work as changed shall be Reimbursable Costs to the extent consistent with Section 7.1.1. Contractor shall proceed with the Work as changed without interruption or slowdown, except that where Contractor notifies Owners within five (5) Business Days of its receipt of the change direction that such change would adversely impact safety or materially impair Contractor's compliance with applicable Laws, Contractor shall not be obliged to proceed with the change. In no event shall Contractor be obligated to proceed with any change that requires Contractor to violate an obligation imposed by Law, provided that any disputes regarding the applicability and requirements of Law in such situations shall be resolved by the expedited hearing procedure in the DRB Procedures.

12.1.1 NRC Change in Law. If either Party becomes aware of an NRC Change in Law impacting the Work performed under this Agreement, it will give notice to the other Party within thirty (30) Days of becoming aware. Owners may decide to take any of the following actions in order to address such NRC Change in Law: (a) Owners may issue an Owner Directed Change directing changes to the impacted Work, (b) Owners may issue a request for proposal to Contractor with respect to the impacted Work pursuant to Section 12.5 which Owners may accept at their sole discretion, or (c) Owners may notify Contractor that the work required by the NRC Change in Law will not be included in the scope of the Work; provided that a notification under (c) will be treated as an Owner Directed Change if it results in an addition to or deletion from or other change in the general scope of Work to be performed by Contractor per Section 12.1.

12.1.2 Compliance with Law. In the event that there is a disagreement between Owners and Contractor regarding whether Work that has been, is in the process of being, or will be performed is compliant with applicable Law ("Applicable Law Compliant"), Owners may issue a notice to Contractor under this Section (a "Section 12.1.2 Notice") to communicate a determination that, in Owners' opinion, the Work is not or will not be Applicable Law Compliant and to notify Contractor to proceed with such Work (or re-Work) in accordance with Owners' determination so as to ensure, in Owners' opinion, that such Work will be Applicable Law Compliant. Contractor shall continue with such Work (or re-Work) in accordance with the Section 12.1.2 Notice, but without prejudice to any contention by Contractor that the Section 12.1.2 Notice constitutes an Owner-Directed Change. In no event shall Contractor be entitled to discontinue, suspend or interrupt Work due to a Section 12.1.2 Notice. Contractor shall be entitled to make a claim pursuant to Article 38 that its Work absent Owners' determination was or would have been Applicable Law Compliant and, if it is determined in accordance with Article 38 or otherwise agreed that the Work in question was or would have been Applicable Law Compliant, Owners' Section 12.1.2 Notice pursuant to this Section 12.1.2 shall be treated as an Owner-Directed Change. To the extent that the issue as to whether or not Contractor's Work was or would have been Applicable Law Compliant is incapable of determination under Article 38, Owners' Section 12.1.2 Notice shall not be treated as an Owner-Directed Change.

12.2 Limitation Respecting Core Scope. An Owner Directed Change that deletes an item of Work that is within the Core Scope may be made only in circumstances where: (a) Contractor has materially failed to perform such item of Work in accordance with the requirements of this Agreement, and has failed to correct such failure within the timeframe provided in Section 21.2.1(i) following notice of such failure; or (b) there is no longer a need for such item of Work (e.g., in the case of a decision by the Owners to discontinue the completion of a Unit). The limitation of this Section does not affect Owner Directed Changes that delete Non-Core Scope, which are not limited.

12.3 Adjustment to Target Construction Cost and/or Target Completion Date(s). Should Contractor or Owners consider that any Owner Directed Change will require an adjustment to the Target Construction Costs and/or the Target Completion Date(s), such Party shall give the other Party written notice to that effect as provided in Section 10.4.1 or Section 11.4.1, and shall proceed in accordance with Sections 10.4 and 11.4, as applicable, to determine such adjustment.

12.4 Fee Adjustment .

12.4.1 In the event of an Owner Directed Change that either reduces or increases the Work, no adjustment will be made to the Fee except as follows:

(a) where the value of the increase in Work (calculated on the basis of the value of such increased scope including escalation and contingency) exceeds a threshold of [***] , the Fee will be increased in an amount equal to [***] of such scope increase value. Changes will be evaluated against this threshold individually, and unrelated changes will not be considered as a group in order to affect meeting this threshold; and

(b) where the value of the reduction in Work (calculated on the basis of the value of such reduced scope remaining to be performed, using the estimate which formed the basis for the Target Construction Cost as of the Effective Date) exceeds a threshold of [***] , the Fee will be reduced in an amount equal to [***] of such scope reduction value. Changes will be evaluated against this threshold individually, and unrelated changes will not be considered as a group in order to affect meeting this threshold.

12.4.2 Where an adjustment to the Fee is made pursuant to Section 12.4.1, such adjustment value shall be allocated to the Base Fee and Earned Fee in the same proportion as the split between Base Fee and Earned Fee determined after the adjustments to the Earned Fee for all stages of the Subcontract Scope Alignment Process have been made pursuant to Section 3.2.3.

12.5 Proposed Changes . At any time, Owner may request that Contractor provide a proposal, to include a detailed breakdown of estimated added cost or savings and any impact on the Baseline Schedule, Target Completion Date(s) or Target Construction Costs, with respect to a contemplated Owner Directed Change. Such proposals shall be provided within 14 days following Owners request or such other period as the Parties may agree. Such a proposal request does not constitute an Owner Directed Change and does not authorize Contractor to commence performance of the contemplated change, until such time as separately directed by the Owners in writing in accordance with Section 12.1. Owners shall pay to Contractor the Reimbursable Costs associated with compliance with this Section 12.5.

12.6 Change Orders Final . Each Owner Directed Change shall be set forth in a Change Order signed by the Parties that memorializes the nature of the change and any adjustments to the Target Completion Date(s) and/or Target Construction Cost agreed, or that confirm no such adjustments are required. Executed Change Orders are the final agreement of the Parties on the subject and may not be reopened for any reason, unless the Change Order states that it is based on a determination of the DRB that is subject to later arbitration per Article 38.

12.7 NRC Submittals Requested by Contractor . In the event that Contractor's failure to comply with the Performance Standards or any other provision of this Agreement causes the Work or planned Work to be noncompliant, or where Contractor desires to modify the Work for its own convenience, Owners and Contractor may agree that Owners should process an NRC submittal to address the noncompliance or allow for Contractor's desired modification. In the event that Owners and Contractor agree that Owners will process such a submittal, Owners shall be entitled to a set-off against amounts due pursuant to this Agreement for Owners' costs associated with such submittal. Owners shall have no liability for, and there shall be no Owner-directed Change, Change in Law, or NRC Change in Law, to the extent arising from delay in or an unfavorable result from any such submittal agreed upon by the Parties. Nothing in this Section 12.7 shall obligate Owners to process an NRC submittal.

## ARTICLE 13

## FORCE MAJEURE EVENTS

13.1 Force Majeure Event . As used in this Agreement, a "Force Majeure Event" means any event or circumstance to the extent that it: (a) prevents or materially delays the affected Party (the "Affected Party") in performing its obligations under this Agreement; and (b) is beyond the reasonable control of and not the result of the fault or negligence of the Affected Party or such Affected Party's Personnel; and (c) could not have been prevented by the Affected Party's or its Personnel's exercise of reasonable diligence. To the extent that the preceding conditions are satisfied, Force Majeure Events include the following events or circumstances:

(i) war, civil insurrection, riots, sabotage or acts of terrorism;

(ii) acts of God, including flash floods, hurricanes, tornadoes, typhoons, lightning strikes, earthquakes and the like;

(iii) epidemics, quarantines, embargoes or blockades;

(iv) delay by a Government Authority that amounts to a refusal to act or delay that is substantially more significant than the period that would be reasonably expected for the applicable Governmental Authority action, except to the extent attributable to any act or omission of Contractor, Subcontractor or any Contractor-Managed Subcontractor; and

(v) delay experienced by a Subcontractor or Contractor-Managed Subcontractor to the extent such delay is caused by an event that would constitute a Force Majeure Event if such event were experienced directly by Contractor.

Notwithstanding anything in this Section 13.1 to the contrary, in no instance will the following constitute a Force Majeure Event: (a) equipment failure, except when such failure is caused by a separate Force Majeure Event; (b) an act or omission of a Subcontractor or Contractor-Managed Subcontractor, except to the extent such act or omission is caused by an event that would constitute an Force Majeure Event if such event were experienced directly by Contractor; (c) changes in market conditions, including price fluctuations with respect to materials, labor, supplies or components of equipment; (d) economic hardship; (e) labor strikes or other labor actions that are directed at Contractor, a Subcontractor or Contractor-Managed Subcontractor; (f) normal climatic conditions (based upon a fifteen (15) year average) at the Construction Site; (g) changes in Laws; (h) delay by a Government Authority that does not amount to a refusal to act or is not substantially more significant than the period that would be reasonably expected for the applicable Governmental Authority action.

13.2 Burden of Proof. The burden of proof as to whether an Force Majeure Event has occurred shall be upon the Party claiming an Force Majeure Event.

13.3 Excused Performance. To the extent that the Affected Party is rendered wholly or partly unable to perform its obligations under this Agreement because of a Force Majeure Event:

(i) the Affected Party's performance of such obligations (except for its payment obligations) shall be excused;

(ii) the Affected Party shall give written notice to the other Party describing the particulars of the occurrence as soon as reasonably practicable under the circumstances after the Affected Party becomes aware of the Force Majeure Event;

(iii) the suspension of performance resulting from such Force Majeure Event shall be of no greater scope and of no longer duration than is reasonably required by the Force Majeure Event;

(iv) no obligations of either Party which arose before the occurrence causing the suspension of performance are excused as a result of the occurrence, except to the extent the occurrence prevents their completion;

(v) the Affected Party must continue to perform its obligations under this Agreement to the extent commercially reasonable, and the Affected Party must use commercially reasonable efforts to overcome, cure, remove, otherwise correct, minimize and contain costs and expenses and mitigate and remedy the damages, delays and effects of the Force Majeure Event and its inability to perform its obligations under this Agreement as a result thereof; and

(vi) when the Affected Party is able to resume performance of its obligations hereunder, that Party shall give the other Party written notice to that effect and shall promptly resume such performance.

13.4 Payment. Contractor will continue to receive payment of Reimbursable Costs incurred, notwithstanding the occurrence of a Force Majeure Event.

## ARTICLE 14

## MECHANICAL COMPLETION AND FINAL COMPLETION

14.1 Mechanical Completion. For all Work performed or provided by Contractor, Contractor will notify Owners' Authorized Representative in writing when it believes Mechanical Completion of a Unit has been achieved. Within thirty (30) Days after such notification, Owners will inspect the Work and either (i) confirm that Mechanical Completion has been achieved or (ii) set forth to Contractor the reasons that preclude acknowledgement of Mechanical Completion (which may take the form of a list of items of Work that Owners believe remain to be completed in order for Mechanical Completion to be achieved). This process will be repeated as may be required until Owners confirm that Mechanical Completion has been achieved.

14.2 Unit Mechanical Completion Requirements. The requirements for achieving Mechanical Completion for each Unit are set forth in Exhibit G. For purposes of determining both Mechanical Completion and Punch List items, Shared Facilities shall be considered part of Unit 3.

14.3 Punch List. Prior to Mechanical Completion of a Unit, Contractor shall submit to Owners for their review and approval a comprehensive list of remaining Work, limited to items of a minor nature, that Contractor proposes will not prevent the Unit from achieving Mechanical Completion (the "Punch List"). Owners will review the Punch List and provide Contractor with comments and additions thereto within thirty (30) Days from the date of submission of the Punch List to Owners, provided that Punch List items may continue to be added through the date of confirmation of Mechanical Completion per Section 14.2, and after Mechanical Completion for both Units with respect to Work Packages not required for Mechanical Completion and not complete as of Mechanical Completion.

14.4 Final Completion. Contractor shall diligently complete all remaining Work (including all Work Packages not required to attain Mechanical Completion) and the Punch List items to the reasonable satisfaction of Owners, provided that Contractor will coordinate its remaining Work and work on Punch List items so as not to interfere with Owners commissioning and startup activities. Final Completion will be achieved after the Punch List items have been fully completed and all other remaining Work (other than Commissioning and Startup Support per Section 2.10) has been completed.

## ARTICLE 15

## WARRANTY

15.1 Warranty Provided.

15.1.1 Contractor warrants during the Warranty Period for a Unit that the Work performed by Contractor and its Subcontractors with respect to such Unit shall:

(i) comply with the Issued For Construction Documents;

(ii) conform to the requirements of this Agreement, including the Performance Standards; and

(iii) comply with applicable Laws.

15.1.2 The warranties set forth in this Section 15.1 are collectively referred to as the "Warranties."

15.2 Remedy.

15.2.1 Upon being notified during the Warranty Period for a Unit that any portion of the Work performed by Contractor and its Subcontractors for such Unit fails to comply with the

Warranties (a "Warranty Issue"), Contractor shall remedy such Warranty Issue at its sole cost and expense, as follows:

(i) Contractor shall Promptly either re-perform, repair or replace the non-complying Work;

(ii) Such remedy shall include all disassembly and reassembly of components and systems of the Facility, and the removal and reinstallation of Facility components, that may be required in order to re-perform, repair or replace the non-complying Work; and

(iii) Such remedy shall include performing such tests as are reasonably necessary to demonstrate the adequacy and effectiveness of the remedy.

15.2.2 If Contractor, after receiving notice from Owners of a Warranty Issue during the Warranty Period, fails to Promptly remedy any noncomplying Work in accordance with this Article, then Owners may remedy such Warranty Issue, or have such Warranty Issue remedied by others, and Contractor agrees to promptly reimburse Owners for all reasonable expenses incurred to remedy such Warranty Issue.

15.2.3 For purposes of this Article, "Promptly" means, when the applicable Unit is not in an outage state, the commencement of reperformance, repair or replacement within thirty (30) Days after receiving notice of the non-compliance from Owners, and diligent pursuit to full completion thereafter; provided that:

(i) a Warranty Issue resulting in a Unit outage shall be corrected on an emergency, as soon as physically feasible basis;

(ii) Contractor shall use reasonable efforts to remedy Warranty Issues at a time responsive to and consistent with the Owners' requirements for the safe, reliable and efficient operation of the Facility in accordance with Owners' operational requirements and needs; and

(iii) at Owners' option, the remedy of a Warranty Issue may be deferred until the time of the Unit's next regularly scheduled refueling outage, notwithstanding that such outage occurs after the end of the Warranty Period; provided that the opportunity to remedy the Warranty Issue during the next outage is provided no later than twenty-one (21) months following the end of the Warranty Period.

15.3 Warranty Period. The "Warranty Period" with respect to each Unit will commence upon the Ready for Fuel Load Date of such Unit and will expire on the later of: (i) the date that is twenty-four (24) months after such Ready for Fuel Load Date; or (ii) twelve (12) months after the Commercial Operation Date of such Unit; provided, however, that the Warranty Period with respect to a Unit shall in any event expire on the date that is thirty-six (36) months after the Ready for Fuel Load Date for such Unit.

15.4 Warranty Period Extension. Any Work re-performed, repaired or replaced in satisfaction of Contractor's obligations in connection with the Warranty will be re-warranted by Contractor pursuant to the same Warranties set forth in Section 15.1, and Contractor will have the same obligations in relation thereto as set forth in Section 15.2.1, for a period equal to the longer of: (i) one (1) year from the date such re-performance, rework, repair or replacement is completed; and (ii) the remaining period under the original Warranty Period; provided that such re-warranty shall not in any event extend beyond thirty-six (36) months after the Ready for Fuel Load Date of the applicable Unit.

15.5 Significant Construction Defects Prior to Warranty Period. Costs incurred for the correction of defects or deficiencies in the Work prior to the commencement of the Warranty Period for either Unit shall be Reimbursable Costs, except that costs incurred by Contractor and/or its Subcontractors for the correction of Significant Construction Defects prior to the commencement of the Warranty Period for either Unit shall be Non-Reimbursable Costs, subject to the limitations herein:

(i) Owners will notify Contractor promptly after becoming aware of a construction defect that Owners consider is or is likely to be a Significant Construction Defect; and

(ii) The Non-Reimbursable Costs to be borne by Contractor and Affiliate Subcontractors on account of the correction of a Significant Construction Defect will be limited to an amount of [***] per Significant Construction Defect; and

(iii) The Non-Reimbursable Costs to be borne by Contractor and Affiliate Subcontractors on account of the correction of Significant Construction Defects will be subject to the Defects Subcap limitation set forth in Section 15.6.1.

15.6 Liability Limitations Relating to Warranties and Defects.

15.6.1 CONTRACTOR'S CUMULATIVE AGGREGATE LIABILITY FOR THE FAILURE OF THE WORK TO COMPLY WITH THE WARRANTIES SET FORTH IN SECTION 15.1 AND FOR THE COST OF CORRECTION OF SIGNIFICANT CONSTRUCTION DEFECTS PURSUANT TO SECTION 15.5 SHALL NOT EXCEED [***] (the "DEFECTS SUBCAP"). To the extent that Contractor incurs (or is charged by Owners per Section 15.2.2) costs in excess of the Defects Subcap in performing its remedy obligations under Section 15.2, such costs shall be treated as Reimbursable Costs, but shall not entitle Contractor to any adjustment in the Fee.

15.6.2 For purposes of determining whether the Defects Subcap has been reached, the following amounts shall be excluded:

(i) amounts received by Contractor from any Third Party in the form of damages paid or otherwise in connection with any Warranty Issue;

(ii) proceeds received by Contractor or any Subcontractor from any insurance coverage required by this Agreement with respect to any Warranty Issue;

(iii) costs to remedy any Warranty Issue or Significant Construction Defects that were borne by Subcontractors, other than Affiliate Subcontractors; and

(iv) costs to remedy any Warranty Issue to the extent such Warranty Issue results from the Willful Misconduct of Contractor, provided that Contractor's liability for such costs shall in any event be subject to Section 18.2 and the other liability protections set forth in this Agreement. For the purpose hereof, "Willful Misconduct" means an act or failure to act on the part of Contractor which evidences either an intent to cause the loss or damage resulting therefrom or such conscious recklessness as to the harmful consequences of such act or failure to act that such conduct amounts to intentional misconduct.

15.6.3 THE WARRANTIES SET FORTH IN THIS AGREEMENT ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, FOR PERFORMANCE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE. THERE ARE NO OTHER WARRANTIES, AGREEMENTS, ORAL OR WRITTEN, OR UNDERSTANDINGS WHICH EXTEND BEYOND THOSE SET FORTH IN THIS AGREEMENT.

15.6.4 CONTRACTOR SHALL NOT HAVE ANY LIABILITY FOR ANY DEFECT THAT PERTAINS TO ANY ASPECT OF THE FACILITY THAT IS OUTSIDE THE CONTRACTOR'S SCOPE OF WORK REQUIRED TO BE PERFORMED UNDER THIS AGREEMENT. SPECIFICALLY, CONTRACTOR SHALL NOT HAVE ANY LIABILITY RELATED TO THE DESIGN OR THE ENGINEERING OF THE FACILITY, PLANT EQUIPMENT OR MATERIALS SUPPLIED BY OR ON BEHALF OF OWNERS, WORK PERFORMED BY OTHER CONTRACTORS (OTHER THAN CONTRACTOR OR ITS SUBCONTRACTORS), OR WORK COMPLETED PRIOR TO THE EFFECTIVE DATE.

15.6.5 WITHOUT LIMITING ANY OTHER CONTRACTOR LIABILITIES UNDER THIS AGREEMENT, CONTRACTOR'S SOLE LIABILITY RELATED TO DEFECTS IN THE WORK SHALL BE LIMITED TO CONTRACTOR'S LIABILITIES PURSUANT TO SECTIONS 15.2, 15.4 AND 15.5.

## ARTICLE 16

## INDEMNITY

16.1 Third Party Claims .

16.1.1 Except with respect to a Nuclear Incident, and without regard to any insurance proceeds actually received, Contractor shall indemnify, defend and hold harmless Owners and Owners' Interests from and against any and all Third Party Claims and Affiliate Subcontractor Claims arising or resulting from:

(i) any injury of or death to natural persons or damage to or destruction of Third Party or Affiliate Subcontractor property to the extent arising or resulting from the fault, negligent acts or negligent omissions or willful misconduct of Contractor or its Subcontractors or any Personnel of the foregoing;

(ii) fines, penalties or other similar amounts required to be paid to Government Authorities to the extent resulting from any violation of Law by Contractor or its Subcontractors, whether caused by the acts or omissions of Contractor, any of its Subcontractors, or their respective Personnel; or

(iii) (a) the Release on or from the Site or any other location of any Hazardous Materials brought onto the Site by Contractor or its Subcontractors to the extent caused by the fault or the negligent acts or negligent omissions or willful misconduct of Contractor, its Subcontractors, or any Personnel of the foregoing, (b) the Release on or from the Site of any Hazardous Materials brought onto the Site by Owners for the Work to the extent such Release is caused by the fault or the negligent acts or omissions or willful misconduct of Contractor, its Subcontractors, or any Personnel of the foregoing or (c) contamination of the environment or injury to natural resources resulting from Hazardous Materials brought onto the Site by Contractor or its Subcontractors or brought onto the Site by Owners for the Work to the extent caused by the negligent acts or negligent omissions or willful misconduct of Contractor, its Subcontractors, or any Personnel of the foregoing.

16.1.2 Except with respect to a Nuclear Incident, Owners shall indemnify, defend and hold harmless Contractor and Contractor Interests from and against any and all Third Party Claims associated with any injury of or death to natural persons or damage to or destruction of Third Party property, other than Contractor-provided Construction Equipment and any other property belonging to or leased by Contractor, its Subcontractors or the Personnel or Invitees of any of them, to the extent arising or resulting from the fault or the negligent acts or negligent omissions or willful misconduct of Owners or its Personnel (other than Contractor or its Personnel) or the employees or agents of the foregoing.

16.1.3 Owners shall indemnify, defend and hold harmless Contractor and Contractor Interests from and against any and all liability, damage, cost, expense and loss (including reasonable attorneys' fees, expenses and court costs), attributable or relating to any employment-related claim that arose or accrued at the Site prior to the Effective Date. “Employment related claims” for purposes of this provision include any and all breach of contract claims, tort claims, constitutional claims, equitable claims, harassment, discrimination, or retaliation claims, grievances under any collective bargaining agreement or national labor agreement, claims of wrongful or constructive discharge, claims for breach of an express or implied employment contract, defamation claims (including libel and slander), wage claims, claims under Title VII of the Civil Rights Act, 42 U.S.C. § 1981, the Equal Pay Act, the Energy Reorganization Act, the Davis-Bacon Act, the False Claims Act, the Rehabilitation Act, the Americans with Disabilities Act, the Family and Medical Leave Act, the Age Discrimination in Employment Act, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, the Fair Labor Standards Act, the Sarbanes Oxley Act, Consolidated Omnibus Budget Reconciliation Act, Immigration Reform and Control Act, any state’s human rights Law, any state's labor Law, the non-discrimination and/or retaliation provisions of any state workers' compensation Law and any and all other applicable local, state, and federal common law claim, statute, regulation or public policy relating to employment.

16.2 Limitation of Liability for Damage to Property . OWNERS HEREBY RELEASE AND SHALL INDEMNIFY, DEFEND AND HOLD HARMLESS CONTRACTOR AND CONTRACTOR INTERESTS FROM AND AGAINST ANY CLAIMS, DAMAGES AND LIABILITIES ASSOCIATED WITH DAMAGE TO OR AND DESTRUCTION OF THE FACILITY OR PLANT EQUIPMENT AND MATERIALS INTENDED FOR INCORPORATION IN THE FACILITY OR VEGP UNITS 1 AND 2, EXCEPT THAT TO THE EXTENT THAT CONTRACTOR, ITS SUBCONTRACTORS, OR THEIR RESPECTIVE PERSONNEL, AS A RESULT OF THEIR FAULT, NEGLIGENCE, OR WILLFUL MISCONDUCT, CAUSE ANY DAMAGE TO ANY PROPERTY OF THE OWNERS (INCLUDING VEGP UNITS 1 AND 2 AND THE UNITS) THAT DOES NOT ARISE OUT OF OR RESULT FROM A NUCLEAR INCIDENT, CONTRACTOR SHALL BE SOLELY RESPONSIBLE FOR AND SHALL PAY FOR SUCH LOSS OR DAMAGE UP TO [***] PER OCCURRENCE. THE PARTIES DO NOT INTEND SUCH PROVISIONS TO BE FOR THE BENEFIT OF ANY THIRD PARTY, INCLUDING ANY INSURER.

16.3 Intellectual Property Indemnity . Contractor shall indemnify, defend and hold harmless Owners and Owners' Interests and any of their respective Personnel against any Third Party Claim and Affiliate Subcontractor Claim to the extent based on a Claim that any Work constitutes an infringement or misappropriation of any intellectual property rights of any Third Party or any Affiliate Subcontractor including, any U.S. patents, copyrights, trade secrets, trademark rights, confidentiality rights or other intellectual property rights and, if timely notified in writing and given authority and reasonable assistance for the defense of same, Contractor shall pay the damages, liabilities, costs, losses and expenses (including attorneys' fees) awarded therein against Owners. If a Claim of infringement is made, Contractor may, or if the use of the item is enjoined, Contractor shall, at its expense and option, (a) procure for Owners the right to continue using such item, (b) replace such item with a non-infringing item that meets the requirements of this Agreement, or (c) modify such item such that it becomes non-infringing while still meeting the requirements of this Agreement. These provisions do not apply to the extent the infringement or misappropriation is the result of items (including engineering deliverables and Plant Equipment and Materials) furnished to Contractor hereunder or to the extent that the infringement or misappropriation is the result of any Work performed hereunder being modified or combined with items not furnished by Contractor or its Subcontractors. If a suit or proceeding is brought against Contractor or any of its Subcontractors in respect of any alleged infringement or misappropriation described in the preceding sentence, Owners shall protect Contractor and its Subcontractors to the same extent that Contractor has agreed to protect Owners in this Section 16.3.

16.4 Nuclear Indemnity and Insurance . Owners shall obtain and maintain "financial protection" and an "indemnification agreement" for protection against liability for Nuclear Incidents (including master worker coverage), both in such form and amount as shall satisfy the requirements of Section 170 of the Atomic Energy Act of 1954, as amended. In the event that the nuclear liability protection contemplated by Section 170 of the Atomic Energy Act of 1954, as amended, is repealed, changed, or is not renewed, Owners shall maintain in effect liability protections through governmental indemnity, limitation of liability and/or insurance of comparable coverage which shall not result in a material impairment of the protection afforded to Contractor by such nuclear liability protection which is in effect as of the Effective Date. Other than the foregoing, in no event shall Owners have any liability or obligation to Contractor or Contractor Interests with respect to off-site liability resulting from a Nuclear Incident.

16.5 Indemnity Procedures .

16.5.1 The indemnifying Party under this Article 16 or any other indemnity provision of this Agreement shall have the right to conduct and control, through counsel of its own choosing, reasonably acceptable to the indemnified Party, the defense of any Claim for which it has an indemnity obligation hereunder. The indemnifying Party shall keep the indemnified Party fully informed in the conduct of the proceeding.

16.5.2 The indemnified Party may, at its election, participate in the defense thereof at its sole cost and expense; provided, however, that if (i) the indemnifying Party shall fail to defend any Claim for which it has an indemnity obligation hereunder, (ii) the Parties mutually agree in writing to allow the indemnified Party to assume the defense of such Claim and forego any indemnity claimed under this Article, (iii) in the reasonable opinion of legal counsel for the indemnified Party, such Claim involves the potential imposition of a criminal liability on the indemnified Party, its directors, officers, employees or agents, or (iv) in the reasonable opinion of legal counsel for the indemnified Party, an actual or potential conflict of interest exists where it is advisable for such indemnified Party to be represented by separate counsel, then the indemnified Party shall be entitled to control and assume responsibility for the defense of such Claim, at the cost and expense of the indemnifying Party. The indemnifying Party may, in any event, participate in such proceedings at its own cost and expense. The indemnified Party shall not have the right to settle without the written consent of the indemnifying Party (which consent shall not be unreasonably withheld).

16.5.3 The indemnifying Party, in the defense of any such litigation, other proceeding or other Claim, shall have the right in its sole discretion to settle a Claim for which it has an indemnity obligation hereunder only if (i) settlement involves only the payment of money and execution of appropriate releases of the indemnified Party, (ii) there is no finding or admission of any violation of Law or violation of the rights of the indemnified Party, and (iii) the indemnified Party will have no liability with respect to such compromise or settlement. Otherwise, no such Claim shall be settled or agreed to without the prior written consent of the indemnified Party, which shall not be unreasonably withheld.

16.5.4 The indemnified Party and the indemnifying Party (i) shall fully cooperate in good faith in connection with such defense and shall cause their legal counsel and accountants to do the same, (ii) shall make available to the other Party the relevant books, records, and information (in such Party’s control) during normal business hours, and (iii) shall furnish to each other, at the indemnifying Party’s expense, such other assistance as the other Party may reasonably require in connection with such defense, including making employees of the indemnified Party available to testify and assist others in testifying in any such proceedings.

16.6 Survival of Indemnity Obligations . This Article 16 and the indemnity obligations set forth in the other provisions of this Agreement shall survive the completion of the Work and the termination of this Agreement. For purposes of clarification hereunder, without limiting the other rights granted hereunder to either Party, a Party may enforce the indemnity provisions hereunder without having to declare a Contractor Event of Default or an Owner Event of Default (as applicable).

## ARTICLE 17

## INSURANCE

17.1 Owners Insurance Obligations .

17.1.1 The Owners will procure and maintain the following insurances:

(i) Builder's Risk Insurance with total limits of [***], subject to applicable sublimits, including coverage for resultant damage due to any defects in equipment and/or material and/or faulty workmanship, and maintenance coverage for duration of the Warranty Period unless otherwise insured by Owners' Operating Property coverages; subject to customary or industry standard exceptions and exclusions;

(ii) Commercial General Liability with combined single limit of [***] each occurrence, [***] aggregate including broad form contractual liability, independent contractors, personal injury, incidental medical malpractice, and products and completed operations for at least eight (8) years following final acceptance of the Work;

(iii) Contractors Pollution Liability Insurance with limits of [***] each occurrence, and [***] aggregate on a project basis, and occurrence form, that provides appropriate coverage, including coverage for the following: (i) bodily injury, sickness, disease, mental anguish or shock sustained by any person, including death; (ii) property damage including physical injury to or destruction of tangible property including the resulting loss of use thereof, clean-up costs, and the loss of use of tangible property that has not been physically injured or destroyed; (iii) defense costs including costs, charges and expenses incurred in the investigation, adjustment or defense of claims for such compensatory damages, and (iv) contractual liability third-party coverage for bodily injury, property damage, defense, and cleanup, whether sudden/accidental and/or gradual arising from activities performed by Contractor, and/or Contractor Interests. Such coverage shall continue for a period to be agreed by Owner and Contractor after the termination of this Agreement.

(iv) Workers' Compensation Insurance with limits and coverage as required by any applicable law or regulation both State and/or Federal including U.S.L. & H.W. Compensation Act.

(v) Employer's Liability Insurance, including "all States" endorsement and when required Marine Employer's Liability and Jones Act coverage, of not less than [***] each accident for bodily injury by accident; [***] each employee for bodily injury by disease; and [***] bodily injury by disease policy limit.

(vi) Excess Liability on a follow form basis including products and completed operations with a coverage limit of [***];

(vii) Nuclear and Non-Nuclear Property Insurance;

(viii) Open Cargo Insurance protecting materials and equipment during transit and while stored away or on the project site; and

(ix) Commercial Automobile Liability Insurance shall be obtained, including owned, hired, and non-owned automotive equipment in connection with the insureds operation with an insured combined single limit for bodily injury and property damage of [***] each occurrence.

17.1.2 The insurances 17.1.1 (i) through 17.1.1 (viii) shall include Contractor, Contractor Interests and Subcontractors as additional insureds, be primary and non-contributory and include an insurer's waiver of subrogation.

17.1.3 It is understood that Owners sponsor an Owner Controlled Insurance Program ("OCIP"), as the mechanism for providing Commercial General Liability, Statutory Workers Compensation including Employers Liability insurance covering activities of Contractor and Contractor Interests and Subcontractors in performance of the Work including Site, declared off-site locations, incidental off-site activities, including travel between covered sites and/or travel in conjunction to Work activities, and/or conducted in fulfillment of the Work by Contractor and Contractor Interests and Subcontractors. The OCIP insurances are provided at no cost to Contractor and/or Contractor Interests and Subcontractors, including deductibles and/or contribution to self-insured retentions. If, and for any reason, Owners' are unable to furnish any of the OCIP coverages, and or coverage 17.1.1(iii), (vi) and or (viii), or elects to discontinue the aforementioned insurances, modifies the limits of liability provided, or coverage limits are found inadequate due to claim erosion, or Owner and or Insurers request that Contractor or any of Contractor Interests or Subcontractors withdraw from the insurances, Contractor or any of its enrolled Subcontractors will obtain at Owners' expense and thereafter maintain, at Owners' expense such insurances.

17.1.4 With respect to insurances 17.1.1 (i), (ii), (iii), (iv), (v), (vi) and (viii) Contractor will be allowed to participate in the claims reporting, management and claim cost analysis, including the provision of regular detailed loss information and will take part in insurer claim reviews, and will be consulted regarding the selection of counsel with respect to claims and litigation.

17.2 Contractor's Insurance Obligations .

17.2.1. Contractor will provide the following insurance coverages:

(i) Commercial General Liability with minimum combined single limit of [***] each occurrence, [***] aggregate including broad form contractual liability, independent contractors, personal injury, arising from activities unrelated to the Work;

(ii) Workers' Compensation Insurance with limits and coverage as required by any applicable law or regulation both State and/or Federal including U.S.L. & H.W. Compensation arising from activities unrelated to the Work;

(iii) Employer's Liability Insurance, including "all States" endorsement and when required Marine Employer's Liability and Jones Act coverage, of not less than [***] each accident for bodily injury by accident; [***] each employee for bodily injury by disease; and [***] bodily injury by disease policy limit., arising from activities unrelated to the Work;

(iv) Commercial Automobile Liability Insurance shall be obtained, including owned, hired, and non-owned automotive equipment in connection with the insureds operation with an insured combined single limit for bodily injury and property damage of [***] each occurrence;

(v) Excess Liability with a limit of [***] per occurrence and in the aggregate, arising from activities unrelated to the Work, in the excess of the limits of the underlying Commercial General Liability, Commercial Automobile Liability, and Employer's Liability insurance policies. The required limits may be satisfied by a combination of a primary policy and an excess or umbrella policy;

(vi) Contractor's Equipment Coverage in the amount of the value of the equipment through insurance or self-insurance; and

(vii) Employment Practices Liability with a coverage limit of [***] per occurrence and in the aggregate on a project basis.

17.2.2. Contractor shall name Owners, as additional insureds (except for Workers' Compensation and Employment Practices Liability) but only for their vicarious liability arising from Contractor's negligent operations, and provide a waiver of subrogation on all policies.

17.2.3. Contractor will enroll, and will support enrollment of Contractor Interests and Subcontractors in the OCIP and observe to extent possible requirements outlined in the OCIP manual, including monthly payroll reporting.

17.2.4. In addition to OCIP enrollment obligation, Contractor will require Subcontractors to maintain the insurances listed in this Section 17.2 as applicable.

a. Mutual Coverage Obligations .

17.3.1. Within ten (10) Days after the Effective Date and prior to the commencement of any Work, each Party shall have on file with the other Party the applicable insurance certificate(s). The Parties shall provide thirty (30) days written notice to the other Party prior to any material change or cancellation of the insurance.

17.3.2. All insurance shall be placed with insurers rated by A.M. Best Company no less than A-VII and authorized to do business in the state where the Work is to be performed, unless Owner and Contractor mutually agreed otherwise.

## ARTICLE 18

## LIMITATIONS OF LIABILITY

18.1 No Consequential Damages . IN NO EVENT SHALL CONTRACTOR OR CONTRACTOR INTERESTS OR OWNERS OR OWNERS' INTERESTS BE LIABLE, WHETHER BASED ON CONTRACT (INCLUDING BREACH, WARRANTY, INDEMNITY, ETC.) OR TORT (INCLUDING FAULT, NEGLIGENCE AND STRICT LIABILITY), OR OTHERWISE, UNDER ANY WARRANTY OR OTHERWISE, RELATING TO OR ARISING OUT OF THE WORK OR THIS AGREEMENT, FOR ANY CONSEQUENTIAL, INDIRECT, SPECIAL, PUNITIVE, OR INCIDENTAL LOSS, DAMAGE OR INJURY, INCLUDING ANY SUCH DAMAGES WHICH RESULT FROM LOSS OF USE OF PROPERTY, EQUIPMENT OR SYSTEMS, LOSS BY REASON OF FACILITY SHUTDOWN OR SERVICE INTERRUPTION, COSTS OF CAPITAL OR EXPENSES THEREOF, LOSS OF PROFITS OR REVENUES OR THE LOSS OF USE THEREOF, LOST BUSINESS OPPORTUNITY, OR COST OF PURCHASED OR REPLACEMENT POWER (INCLUDING ADDITIONAL EXPENSES INCURRED IN USING EXISTING POWER FACILITIES) OR FROM CLAIMS OF CUSTOMERS. The limitation of liability under this Section 18.1 shall not apply to: (i) amounts Claimed by Third Parties or Affiliate Subcontractors which are subject to the indemnification obligations under this Agreement; or (ii) any loss or damages to the extent insurance proceeds are received from the insurance required under this Agreement, it being the Parties specific intent that the limitations of liability hereunder shall not relieve the insurers' obligations for such insured risks; or (iii) amounts expressly payable to Contractor under Article 7, Article 8, or Article 21 of this Agreement; and (iv) amounts expressly payable by Contractor under Article 8, Section 15.2.2, Article 20, or Article 21 of this Agreement.

18.2 Maximum Total Liability . NOTWITHSTANDING ANY OTHER PROVISION TO THE CONTRARY, CONTRACTOR'S AND CONTRACTOR INTERESTS' CUMULATIVE AGGREGATE LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE WORK OR THIS AGREEMENT, WHETHER BASED ON CONTRACT (INCLUDING BREACH, WARRANTY, INDEMNITY, ETC.), TORT (INCLUDING FAULT, NEGLIGENCE OR STRICT LIABILITY) OR OTHERWISE TO OWNERS SHALL NOT EXCEED AN AMOUNT EQUAL TO [***]. The limitation of liability under this Section 18.2 shall not apply to: (i) amounts Claimed by Third

Parties or Affiliate Subcontractors which are subject to Contractor's indemnification obligations under this Agreement; or (ii) any loss or damages to the extent insurance proceeds are received from the insurance required to be obtained by Contractor or its Subcontractors under this Agreement, it being the Parties specific intent that the limitations of liability hereunder shall not relieve the insurers' obligations for such insured risks.

18.3 Dalton .

18.3.1 For all purposes of this Agreement:

(i) the term "Dalton Utilities" shall mean only the utility company, property and assets operated by the Board of Water, Light and Sinking Fund Commissioners of the City of Dalton, Georgia d/b/a Dalton Utilities, its successors, successors-in-title or assigns, including without limitation any successors to the business of Dalton Utilities; and

(ii) the term "Dalton Utilities Assets" shall mean collectively (A) all property or assets of Dalton Utilities, including without limitation all electric power generation, transmission and distribution assets owned or operated by the City of Dalton and contract rights and receivables related thereto, which now or at any time in the future are owned, used or operated by Dalton Utilities, and such property and assets shall include without limitation any sale, insurance, condemnation or other proceeds with respect to such property and assets; and (B) all accounts receivable, debts, income or other amounts owed to Dalton Utilities.

18.3.2 Notwithstanding any other term or provision of this Agreement to the contrary, the Parties hereby agree that:

(i) if any Party obtains any money judgment against Dalton Utilities because of Dalton Utilities' default under this Agreement or breach by Dalton Utilities of any representation or warranty under this Agreement, such Party's sole remedy to satisfy the judgment shall be to levy against and sell, and/or garnish or otherwise realize upon, any and all of the Dalton Utilities Assets;

(ii) payments of all amounts of any kind or nature whatsoever that may at any time be due and owing by Dalton Utilities pursuant to the terms of, or resulting from, this Agreement shall be payable solely out of the Dalton Utilities Assets and shall not be payable from any other source, including without limitation the "General Fund" of the City of Dalton;

(iii) no such payments shall be, or be deemed to be, a debt of the City of Dalton under any circumstance or for any purpose whatsoever, nor shall this Agreement constitute a pledge of the full faith and credit of the City of Dalton, nor shall the City of Dalton appropriate or be required to appropriate funds to pay for any amounts due under this Agreement;

(iv) no Party will ever have the right to compel the exercise of any taxing power of the City of Dalton to pay any amount due from Dalton Utilities under this Agreement, nor to enforce payment thereof against any property of the City of Dalton other than the Dalton Utilities Assets;

(v) no Party shall have any recourse for payment hereunder against any source of funds of the City of Dalton other than the Dalton Utilities Assets, and each Party hereby irrevocably and unconditionally waives any recourse or claim it may or could otherwise have or allege to have against any payment source of the City of Dalton other than the Dalton Utilities Assets; and

(vi) no provision of this Agreement is intended to, nor shall any such provision in any way (A) grant, convey or otherwise extend to any Party any lien, encumbrance or other charge against the Dalton Utilities Assets, or (B) modify, impair, subordinate or otherwise affect the rights, obligations and privileges of Dalton Utilities arising under the City of Dalton, Georgia Combined Utilities Revenue Bonds, Series 2017, or any other obligation of Dalton Utilities, it being understood and agreed that the revenues of Dalton Utilities and all funds created and maintained pursuant to any ordinance enacted for the purpose of issuance of any such bonds are subject to a prior and superior lien to secure such bonds, and shall not be subject to levy, seizure or other adverse action as may constitute a default with respect to such bonds.

## ARTICLE 19

## PERFORMANCE SECURITY

19.1 Contractor Parent Guarantee .

19.1.1 Simultaneously with the execution of this Agreement, Contractor shall furnish (and thereafter maintain) a parent company guarantee substantially in the form attached as Exhibit R, whereby Bechtel Nuclear, Security & Environmental, Inc. (“Contractor Guarantor”) guarantees the payment obligations of Contractor under this Agreement, as the same may be amended, supplemented or otherwise changed in accordance with the provisions of this Agreement (“Parent Company Guarantee”).

19.1.2 Owners shall be entitled to make a demand against the security provided by Contractor under Section 19.1.1 in the event that Contractor has failed to make a payment when due pursuant to the provisions of this Agreement or in order to recover any damages to which Owners are otherwise entitled under this Agreement as a result of Contractor’s failure to satisfy any of its obligations under this Agreement, whether or not a Contractor Event of Default has been declared.

19.2 Owner Performance Security .

19.2.1 In the event that an Owner experiences a Security Posting Condition, the Owner experiencing such Security Posting Condition shall, within ten (10) Business Days thereafter, provide to Contractor and maintain an Eligible Letter of Credit or Cash Security in an amount equal to the product of: (i) such Owner's Ownership Interest; and (ii) the Owner Security Amount ("Owner Security"). The Owner providing the security shall have the right to select whether it will post Cash Security or an Eligible Letter of Credit. If at any time Owner Security held by Contractor exceeds the amount required hereunder, Contractor shall refund the excess Cash Security held or permit the applicable Owner to replace or amend the Eligible Letter of Credit so that the amount of the Owner Security held by Contractor is equal to the amount required by the provisions of this Section 19.2.1

19.2.2 Within three (3) Business Days after the cessation of a Security Posting Condition with respect to an Owner and Owner's notification to Contractor thereof, or upon such Owner's satisfaction of all of its payment obligations under this Agreement, Contractor shall return to such Owner Security previously provided to Contractor.

19.2.3 Contractor shall only be permitted to draw upon or utilize Owner Security as follows:

(i) Contractor may draw upon or utilize Owner Security provided by an Owner in the event that such Owner has failed to make a payment when due pursuant to the provisions of this Agreement.

(ii) If at any time an Eligible Letter of Credit provided by an Owner is within sixty (60) Days of expiration or termination (such sixtieth ($60^{th}$) Day being the "Renewal Date") and such Owner is still required to provide Owner Security under Section 19.2.1, and a substitute or replacement Owner Security that satisfies the requirements of this Agreement has not been provided by the Day that is fourteen (14) Days after the Renewal Date, Contractor shall be entitled to draw upon the full amount of the Eligible Letter of Credit.

19.2.4 Contractor may draw upon Owner Security as provided in Section 19.2.3 regardless of whether Owner Event of Default has been declared.

## ARTICLE 20

## LIENS

20.1 Liens. Contractor shall keep the Facility, the Plant Equipment and Materials and the Site free from Liens of Contractor, its Subcontractors and any of their Personnel (other than Liens arising from acts of Owners or Owners' breach of its obligation hereunder to make payments to Contractor), and shall promptly notify Owners of any such Liens against the Facility, the Plant Equipment and Materials or the Site and any structures comprising the Facility or located on the Site filed by Contractor or a Subcontractor or any of their respective Personnel. Contractor shall indemnify, defend and hold harmless Owners from any Lien placed against Owners' property by any Subcontractor or their Personnel including those arising from nonpayment to any Subcontractor or their Personnel in connection with the Work; provided that such Lien is not the result of Owners' breach of their payment obligations under this Agreement.

20.2 Discharge or Bond . Contractor shall take prompt steps to discharge or bond any Lien filed against the Facility, the Plant Equipment and Materials, the Site and any structures comprising the Facility or located on the Site by any Subcontractor or its Personnel (other than Liens arising from acts of Owners or Owners' breach of its obligation hereunder to make payments to Contractor). If Contractor fails to discharge or promptly bond any Lien, in addition to any other rights of Owners under this Agreement, Owners shall have the right, upon notifying Contractor in writing and providing Contractor reasonable time to indemnify, discharge or bond the Lien, to take reasonable actions and steps to satisfy, defend, settle or otherwise remove the Lien at Contractor's expense, including reasonable attorneys' fees, costs and expenses. Owners shall have the right to recover these expenses from Contractor. Contractor shall have the right to contest any Lien, provided it first provides to the lien holder, a court or other third Person, as applicable, a bond or other assurances of payment necessary to remove the Lien related to the Work from the Site and the Facility in accordance with the Laws of the State of Georgia.

## ARTICLE 21

## SUSPENSION AND TERMINATION

21.1 Suspension by the Owners for Convenience .

21.1.1 On giving reasonable prior notice, Owners may, without cause and for any reason, order Contractor in writing to suspend (including delay or interrupt) the Work in whole or in part without terminating the Agreement and for such period of time as the Owners may determine ("Suspension Order"). Upon receipt of a Suspension Order, Contractor shall promptly suspend its performance of the Work as directed by Owner but shall take reasonable precautions to protect, store and secure the Plant Equipment and Materials on the Construction Site against deterioration, loss or damage. Contractor shall resume promptly any suspended Work following receipt of a written notice from Owners to do so.

21.1.2 During any period of suspension, delay or interruption ordered by Owners under Section 21.1.1, Contractor will use commercially reasonable efforts to mitigate Reimbursable Costs to the extent that performance of Work is suspended, delayed or interrupted; provided that Contractor will continue to receive payment of Reimbursable Costs incurred during such period.

21.1.3 In the event that (i) any period of suspension, delay or interruption of the Work ordered by Owners under Section 21.1.1 continues for a consecutive period of one hundred eighty (180) Days; or (ii) any period of suspension, delay or interruption under Section 21.1.1 when combined with other period(s) of suspension, delay or interruption under Section 21.1.1 exceeds a cumulative aggregate of one two hundred seventy (270) Days, then Contractor shall thereafter be entitled to terminate this Agreement by providing notice to the Owners for so long as such suspension, delay or interruption is continuing. Such termination shall be treated as a termination for convenience by Owners under Section 21.3.

21.2 Contractor Event of Default .

21.2.1 Owners may declare a Contractor Event of Default upon notice to Contractor of the occurrence of any of the following (each a "Contractor Event of Default"):

(i) Contractor is in breach of a material provision of this Agreement (other than the matters addressed in the other subsections of this Section 21.2.1) and fails to cure the breach within thirty (30) Days following notice of such breach or, if such breach is not capable of being cured within such thirty (30) Day period, such longer period as is reasonably necessary but in no event longer than ninety (90) Days following notice of such breach so long as Contractor has commenced the cure within such thirty (30) Day period and thereafter diligently pursues the cure;

(ii) Contractor has Abandoned the Work and Owners have provided Contractor notice that Contractor has Abandoned the Work;

(iii) Contractor or Contractor Guarantor is Insolvent;

(iv) Contractor fails to comply with the requirements of Section 19.1 or Contractor Guarantor breaches any of its obligations under the Parent Company Guarantee or if any representation or warranty made by Contractor Guarantor in the Parent Company Guarantee shall prove to be incorrect in any material respect when made, unless any of the foregoing is cured by the end of the second Business Day following receipt of a written notice from Owners of a failure under this Section 21.2.1(iv);

(v) Contractor fails to provide a Repayment Letter of Credit as required under this Agreement unless such failure is cured by the end of the seventh ($7^{th}$) Business Day following receipt of a written notice from owners of a failure under this Section 21.2.1(v); or

(vi) Any representation or warranty made by Contractor in Section 23.1 proves to be incorrect in any material respect when made and such breach of representation or warranty has a material adverse effect on Owners, unless Contractor promptly commences and diligently pursues action to cause such representation or warranty to become true in all material respects and does so within thirty (30) Days after written notice thereof has been given to Contractor by Owners (unless such cure is not capable of being effected within such thirty (30) Day period in which case Contractor shall have such longer period as is reasonably necessary to effect the cure but in no event longer than ninety (90) Days following Owners' notice and so long as Contractor has commenced the cure within such thirty (30) Day period and thereafter diligently pursues the cure) and such cure removes any material adverse effect on Owners of such representation or warranty having been incorrect.

21.2.2 Upon a Contractor Event of Default pursuant to this Section 21.2, in addition to any remedy available at Law, which is subject to the provisions of this Agreement limiting Contractor's liability, Owners may at their option elect to immediately terminate this Agreement by providing notice to Contractor. In the event of such termination:

(i) Contractor shall be liable to Owners and shall pay to Owners all costs and expenses incurred by Owners in transitioning the Work either to another contractor(s) and/or to Owners if Owners will perform any of the Work;

(ii) Contractor shall assist and cooperate in such transition as reasonably requested by Owners for a period of up to one hundred and eighty (180) Days, and the costs incurred by Contractor in providing such assistance and cooperation shall be treated as Non-Reimbursable Costs (such assistance and cooperation to include Contractor maintaining a number of field non-manual personnel at the Construction Site as necessary to support an orderly transition of the Work, taking such actions that are necessary or directed by the Owners for the protection and preservation of the Work, providing all records with respect to the Work performed, bearing all costs associated with Contractor's compliance with the WARN Act, and at Owners' direction actively supporting Owners' transition of the Work);

(iii) In the event: (i) such termination results in Owners permanently discontinuing the construction of the Facility; or (ii) such termination results from Contractor's Abandonment of the Work, then in either case of (i) or (ii), Contractor shall be liable to Owners and shall pay to Owners an amount equal to [***] of the Base Fee payments previously paid to Contractor by Owners prior to such termination;

(iv) Contractor shall be liable to Owners and shall pay to Owners an amount equal to [***] of the Earned Fee payments provisionally paid to Contractor by Owners, except to the extent that the Schedule Earned Fee for a Unit(s) and/or the Cost Earned Fee have previously been earned and determined to be due to Contractor pursuant to Section 8.7;

(v) Contractor shall be liable to Owners and shall pay to Owners all amounts then owed by Contractor to Owners under this Agreement but not paid pursuant to the terms of this Agreement;

(vi) Contractor shall be liable to Owners and shall pay to Owners all amounts paid by Owners for Reimbursable Costs pursuant to Monthly Funding Requests for Work which has not been performed as of the termination of this Agreement; and

(vii) Owners shall make payment to Contractor of all Reimbursable Costs for Work performed under this Agreement prior to termination of this Agreement and, subject to (iii) above, Owner shall make payment to Contractor of Base Fee payments related to the period prior to termination of this Agreement, which amounts may be offset by the amounts required to be paid by Contractor to Owners under subparts (i) through (v) above or any other provisions of this Agreement.

In the event of termination pursuant to this Section 21.2, Owners may, at their option, finish the Work by whatever method Owners may deem appropriate or expedient.

Owners shall use commercially reasonable efforts to mitigate costs required to be paid by Contractor under Section 21.2.2.

21.3 Termination by Owners for Convenience .

21.3.1 Owners may, at any time, terminate the Agreement for Owners' convenience and without cause and for any reason by providing at least ten (10) Days' notice to Contractor.

21.3.2 In the event of termination for Owners' convenience, Owners shall be liable for and shall pay to Contractor, to the extent not previously paid, the following:

(i) all Reimbursable Costs for the Work performed prior to the effective date of termination of this Agreement under Section 21.3.1;

(ii) all Base Fee payments related to the period prior to the effective date of termination of this Agreement;

(iii) costs of cancellation of Subcontracts and purchase orders to the extent that such Subcontracts and/or purchase orders are not assigned to and assumed by Owners;

(iv) costs incurred by Contractor during a period of no more than ninety (90) Days following the effective date of termination to bring Work on the Construction Site to an orderly conclusion including costs to demobilize Personnel and equipment, provided that such costs are substantiated by documentation reasonably satisfactory to Owners and subject to audit and verification pursuant to Section 36.4;

(v) costs incurred pursuant to the WARN Act, provided that Contractor provides prompt notice under the WARN Act after termination;

(vi) other costs incurred by Contractor and its Subcontractors in complying with Section 21.6; and

(vii) all amounts then owed by Owners to Contractor under this Agreement but not paid pursuant to the terms of this Agreement.

21.3.3 In the event of termination for Owners' convenience, Earned Fee payments received by Contractor prior to the effective date of termination will be deemed to have been earned by Contractor and will not be subject to repayment to Owners. Owners shall promptly return and release the Repayment Letter of Credit following notice of termination pursuant to Section 21.3.1.

21.3.4 In addition to the other payments to be made to Contractor pursuant to this Section 21.3:

21.3.4.1 if (i) the Cumulative Mechanical Completion Percentage for a Unit at the time of the notice of termination under this Section 21.3 (or, as applicable, the notice of termination under Section 21.1, 21.4 or 21.5) is [***] or greater; and (ii) the Project Schedule at such time indicates that Mechanical Completion of such Unit will be achieved on or before the Target Completion Date for such Unit, Owners shall be liable for and shall pay to Contractor the Schedule Earned Fee amounts expected to be earned by Contractor pursuant to Section 7.3 based on such projected Mechanical Completion date, to the extent such amounts have not been provisionally paid to Contractor (including any increased amount of Schedule Earned Fee expected to be earned pursuant to Section 7.3); and

21.3.4.2 if (i) the Cumulative Final Completion Percentage at the time of the notice of termination under this Section 21.3 (or, as applicable, the notice of termination under Section 21.1, 21.4 or 21.5) is [***] or greater; and (ii) the Project Cost Forecast at such time indicates that the Combined Construction Costs will be equal to or less than the Target Construction Cost, Owners shall be liable for and shall pay to Contractor the Cost Earned Fee amounts expected to be earned by Contractor pursuant to Section 7.4 based on such projected Combined Construction Costs, to the extent such amounts have not been provisionally paid to Contractor (including any increased amount of Cost Earned Fee expected to be earned pursuant to Section 7.4).

21.3.5 In the event of a termination for convenience under this Section 21.3, Contractor shall be liable to Owners and shall pay to Owners: (i) all amounts paid by Owners for Reimbursable Costs pursuant to Monthly Funding Requests for Work which has not been performed as of the termination of this Agreement; and (ii) all amounts then owed by Contractor to Owners under this Agreement but not paid pursuant to the terms of this Agreement.

21.3.6 In the event of a termination for convenience under this Section 21.3, Contractor shall use commercially reasonable efforts to mitigate Reimbursable Costs and other costs required to be paid by Owners under Section 21.3.2.

21.3.7 Upon such termination and after all payments required by this Section 21.3 have been paid, the Parties shall have no further liability to one another other than any liability that arose prior to the termination of this Agreement pursuant to this Section 21.3 or those which survive termination.

21.4 Termination Because of Extended Force Majeure Event.

21.4.1 Either Party may terminate this Agreement in the event that (i) a Force Majeure Event or a combination of Force Majeure Events is continuing to prevent the performance of the other Party under this Agreement for a consecutive period of more than one hundred eighty (180) Days; or (ii) a Force Majeure Event or a combination of Force Majeure Events is continuing to prevent the performance of the other Party under this Agreement and the period of the prevention of performance as a result of such Force Majeure Event(s), when combined with other period(s) of prevention resulting from other previous Force Majeure Event(s), exceeds a cumulative aggregate of two hundred seventy (270) Days.

21.4.2 In the event that a Party provides notice of termination under this Section 21.4, such termination shall be treated as a termination for convenience by Owners under Section 21.3; provided, however, that Section 21.3.4 shall not apply if Contractor is the Party that provides such notice of termination under this Section 21.4.

21.5 Owners Event of Default .

21.5.1 Contractor may declare an Owners Event of Default upon notice to Owners of the occurrence of any of the following (each an “Owners Event of Default”):

(i) Owners are in breach of a material provision of this Agreement (other than the matters addressed in the other subsections of this Section 21.5.1) and fail to cure the breach within thirty (30) Days following notice of such breach or, if such breach is not capable of being cured within such thirty (30) Day period, such longer period as is reasonably necessary but in no event longer than ninety (90) Days following written notice of such breach so long as Owners have commenced the cure within such thirty (30) Day period and thereafter diligently pursue the cure;

(ii) One or more of the Owners is Insolvent unless the other Owners have provided security for payments that would be due from such Insolvent Owner(s) that is reasonably acceptable to Contractor, and no other changes to this Agreement have resulted from proceedings involving the Insolvent Owner;

(iii) One or more Owners fail to comply with the requirements of Section 19.2 unless cured by the end of the seventh (7th) Business Day following receipt of a written notice from Contractor of a failure under this Section 21.5.1(iii), which cure may include one or more of the other Owners providing collateral security that satisfies the requirements of Section 19.2 on behalf of one or more Owners who fail to provide the required security.

(iv) Owners fail to make payment of any Undisputed Amount required to be made under this Agreement and Owners shall have failed to cure such failure within thirty (30) Days after notice from Contractor; for the avoidance of doubt, Contractor shall be entitled to declare an Owners Event of Default pursuant to this Section 21.5.1(iv) if any Owner fails to make payment of its portion of any such Undisputed Amount within such thirty (30) Day period and no other Owner(s) makes payment of such amount to Contractor on behalf of the non-paying Owner within such thirty (30) Day period, even if the other Owner(s) make payment of the amounts for which they are responsible; or

(v) Any representation or warranty made by Owners in Section 23.2 proves to be incorrect in any material respect when made and such breach of representation or warranty has a material adverse effect on Contractor, unless Owners promptly commence and diligently pursue action to cause such representation or warranty to become true in all material respects and does so within thirty (30) Days after written notice thereof has been given to Owners by Contractor (unless such cure is not capable of being effected within such thirty (30) Day period in which case Owners shall have such longer period as is reasonably necessary to effect the cure but in no event longer than ninety (90) Days following Contractor's notice and so long as Owners have commenced the cure within such thirty (30) Day period and thereafter diligently pursue the cure) and such cure removes any material adverse effect on Contractor of such representation or warranty having been incorrect.

21.5.2 Upon an Owners Event of Default, in addition to any remedy available at Law, which is subject to the provisions of this Agreement limiting Owners' liability, Contractor may at its option elect to immediately terminate this Agreement by providing notice to Owners. In the event that Contractor provides notice of termination under this Section 21.5, such termination shall be treated as a termination for convenience by Owners under Section 21.3. Upon such termination and after all payments required by Section 21.3 have been paid, the Parties shall have no further liability to one another other than any liability that arose prior to the termination of this Agreement pursuant to this Section 21.5 or which survive such termination as provided in this Agreement.

21.6 Further Obligations Upon Termination .

21.6.1 In the event that this Agreement is terminated under this Article 21, Contractor shall:

(i) in an orderly manner and consistent with safety considerations, cease the Work and leave the Construction Site as directed by Owners;

(ii) take such actions necessary, or that Owners may otherwise direct, for the protection and preservation of the Work (wherever located);

(iii) except for Work directed to be performed in connection with such termination as stated in the notice, enter into no further contracts, purchase orders or change orders;

(iv) remove all the Contractor-provided Construction Equipment, the waste and rubbish generated by Contractor's activities on Construction Site and the Hazardous Materials brought onto the Construction Site by Contractor;

(v) promptly assign to Owners or its designee any contract rights (including warranties, licenses, patents and copyrights) that it has to any or all the Work, including contracts with Subcontractors pursuant to Section 2.17 except with respect to Subcontracts with Affiliates of Contractor, and Contractor shall execute such documents as may be reasonably requested by Owner to evidence such assignment;

(vi) promptly provide to Owners all records of the Work performed by Contractor in connection with this Agreement and the Work; and

(vii) take such other actions as may be reasonably required hereunder in order for Owners or their designee to continue and transition the performance of the Work upon termination of this Agreement.

21.6.2 All amounts required to be paid by a Party under Sections 21.2, 21.3, 21.4 and 21.5 (as applicable) shall be paid by the Party required to pay such amounts within thirty (30) Days after receipt of an invoice(s) from the other Party.

21.6.3 Notwithstanding the termination of this Agreement under this Article 21 and the payment of amounts required to be paid under this Article 21, upon any such termination, neither Party shall be relieved of, and no part of the payments required to be paid under this Article 21 shall constitute compensation for the following (and all of which obligations shall survive the termination of this Agreement):

(i) liabilities and obligations of each Party resulting, arising or accruing prior to such termination;

(ii) each Party's indemnification obligations under this Agreement (including under Article 16); or

(iii) any loss or damages to the extent insurance proceeds are received from the insurance required under this Agreement (it being the Parties specific intent that insurers' obligations shall not be relieved for insured risks).

## ARTICLE 22

## PROTECTED INFORMATION

22.1 Definition of Protected Information. "Protected Information" means the terms of this Agreement and any and all information, data, software, matter or thing of a secret, confidential or private nature identified as "confidential", "proprietary" or the like by the Party which claims the information to be proprietary, relating to the business of the disclosing Party or its Affiliates, including matters of a technical nature (such as know-how, processes, data and techniques), matters of a business nature (such as information about schedules, costs, profits, markets, sales, customers, suppliers, the Parties' contractual dealings with each other and the projects that are the subject-matter thereof), matters of a proprietary nature (such as information about patents, patent applications, copyrights, trade secrets and trademarks), other information of a similar nature, and any other information which has been derived from the foregoing information by the receiving Party; provided, however, that Protected Information shall not include information which: (a) is legally in possession of a receiving Party prior to receipt thereof from the other Party; (b) a receiving Party can show by reasonable evidence to have been independently developed by the receiving Party or its employees, consultants, Affiliates or agents; (c) enters the public domain through no fault of a receiving Party or others within its control; or (d) is disclosed to a receiving Party by a third party, without restriction or breach of an obligation of confidentiality to the disclosing Party.

22.2 Use and Protection of Protected Information .

22.2.1 Each party acknowledges that, during the term of the Agreement, it may have access to Protected Information of the other Party and its Affiliates, including Protected Information of a third party, which Protected Information represents a substantial investment. Unless the disclosing Party agrees otherwise in advance and in writing, and subject to the requirements specified in Section 22.3 below, the receiving Party agrees that it will limit access to such Protected Information to its Personnel, Affiliates, and members and their respective subcontractors and other representatives and bulk power purchasers, who require the information in connection with activities under this Agreement; provided that such Personnel, Affiliates, subcontractors and other representatives and bulk power purchasers shall be required to keep Protected Information confidential.

22.2.2 Each Party agrees that any Protected Information that is disclosed to it or its Personnel, Affiliates, and members and their respective subcontractors and other representatives and bulk power purchasers will be used solely for the purpose of performing its obligations and exercising its rights under this Agreement or otherwise in connection with the Facility, including for purposes of construction, testing, completion and defense of ITAACs, startup, trouble-shooting, response to plant events, inspection, evaluation of system or component performance, scheduling, investigations, operation, maintenance, training, repair, licensing, modification, decommissioning and compliance with Laws or the requirements of governmental authorities ("Permitted Purpose"). Each Party agrees that any Protected Information that is disclosed to it will be used solely for the purpose such information is intended.

22.2.3 Each receiving Party agrees to exercise efforts consistent with the efforts that its exercises to protect information of its own that it regards as confidential, but no less than reasonable efforts, to keep such Protected Information in confidence and not to copy (except in connection with the Permitted Purpose) or permit others to copy or access the information or disclose, redistribute, or publish the same to unauthorized persons, or use or modify for use, directly or indirectly in any way for anyone any item of such Protected Information at any time during the term of the Agreement or after its expiration for any purpose other than the Permitted Purpose.

22.2.4 To the extent required to ensure compliance with applicable Laws, each receiving Party agrees that disclosing Party's Protected Information will exclusively be stored, processed accessed and/or viewed in or from United States data centers and receiving Party will not export any such Protected Information nor allow access by any foreign national contrary to the Laws of the United States or otherwise perform any such processing or access outside of the United States without prior written approval from the disclosing Party.

22.2.5 Each receiving Party acknowledges and agrees that any disclosure or use of the disclosing Party's Protected Information, except as otherwise authorized herein or by disclosing Party in writing, would be wrongful and cause immediate and irreparable injury to disclosing Party or to any third party owner whose Protected Information is under disclosing Party's care and custody and agrees to cooperate with disclosing Party in obtaining an injunction if necessary to prevent further disclosure thereof.

22.2.6 In the event that receiving Party is mandated by applicable Law, including any subpoena or other similar form of process, to disclose any of disclosing Party's Protected Information, receiving Party, to the extent legally permissible, must provide disclosing Party with written notice before making any such disclosure so as to afford disclosing Party with an adequate opportunity either (i) to seek a protective order or other appropriate relief and/or (ii) to waive the requirement that receiving Party not disclose the Protected Information. In the event that any disclosure is required, receiving Party may disclose such information but must furnish only that portion of the Protected Information that is legally required and must exercise its reasonable efforts to obtain a reliable assurance that confidential treatment will be accorded the Protected Information that is disclosed. Contractor agrees that Owners may disclose, without further approval, this Agreement and any amendments hereto in any filing made with the Securities Exchange Commission, Department of Energy, and Georgia Public Service Commission for purposes of satisfying Owners' regulatory disclosure obligations. Prior to any such disclosure, Owners shall give written notice to Contractor. In connection with any such filing of this Agreement and any amendments hereto, Owners will seek to obtain confidential treatment with respect to such portions of the Agreement as the Owners shall reasonably determine may be permitted by law, after consultation in good faith with Contractor.

22.2.7 Disclosing Party is not obligated under this Article to reveal proprietary information to receiving Party. Receiving Party shall indemnify and hold the Owners' Interests or Contractors' Interests, as the case may be, harmless from any and all Third Party Claims, actions, suits, judgments, and expenses (including attorney's fees) resulting from receiving Party's breach of its obligations in this Article concerning the proprietary information of the disclosing Party.

22.2.8 Each receiving Party agrees to cooperate with disclosing Party's reasonable confidentiality requirements that may be established from time to time, including the signing of a separate confidentiality or non-disclosure agreement, and immediately notify disclosing Party of any unauthorized disclosure or use or any such Protected Information of which receiving Party becomes aware.

22.3 Westinghouse Protected Information .

22.3.1 Contractor acknowledges that Owners will provide Contractor with certain AP1000 design information and other Protected Information that is owned by Westinghouse or its affiliates and that Owners are obligated to maintain the confidentiality of such Protected Information in connection with Contractor's use thereof ("Westinghouse Protected Information"). Notwithstanding anything to the contrary herein, Contractor shall not disclose Westinghouse Protected Information received from Owners to any Third Party, including its subcontractors, consultants, or other agents, until such recipient has executed a confidentiality agreement substantially in the form attached hereto as Exhibit S; provided, however, that any recipient that previously executed a confidentiality agreement or acknowledgement in a form attached to the Engineering Procurement and Construction Agreement between Westinghouse and Owners, dated April 8, 2008, shall not be required to execute a new confidentiality agreement in the form of Exhibit S, it being agreed by the Parties that the confidentiality agreement signed by such recipient, while it remains in effect, shall satisfy the requirements of this Article 22. Contractor may only disclose Westinghouse Protected Information to an Affiliate if such Affiliate is subject to a confidentiality obligation consistent with the protections provided in Exhibit S. Prior to disclosing Westinghouse Protected Information to any Third Party or any Affiliate other than the Affiliate Subcontractors listed herein, Contractor shall obtain Owners' approval and shall cooperate with any efforts undertaken by Owners to determine whether Westinghouse approval is required for such disclosure and, if necessary, to obtain Westinghouse's approval. Should either Party discover a breach of the terms and conditions of any such confidentiality agreement by counterparty thereto, such Party will promptly notify the other Party of such breach and provide to such other Party necessary information and support pertaining to any suit or proceeding contemplated or brought by the original disclosing Party against such counterparty for such breach.

22.3.2 Nothing herein grants the right to a receiving Party (or implies a license under any patent) to sell, license, lease, or cause to have sold any Protected Information supplied by the disclosing Party under this Agreement. Neither Party shall, at any time file, cause or authorize the filing of any patent application in any country in respect of any invention derived from the Protected Information supplied hereunder. As between Owners and Contractor, title to Protected Information provided by one Party to the other Party and all copies made by or for the receiving Party in whole or in part from such Protected Information remains with the disclosing Party.

22.3.3 Except where necessary in connection with the Permitted Purpose, the receiving Party shall not make any copy or in any way reproduce or excerpt Protected Information. Any such copies or excerpts shall include all confidential or proprietary notices and designations. Upon the written request of the disclosing Party, the Protected Information provided hereunder and any such copies or excerpts thereof shall be returned to the disclosing Party, or, at the sole option and request of the disclosing Party, the receiving Party shall destroy such information and any such copies and/or excerpts and certify in writing to the disclosing Party that such information has in fact been destroyed.

22.3.4 Disclosing Party shall not be responsible to receiving Party for the consequence of the use of Protected Information by receiving Party for any purpose other than the Permitted Purpose.

22.3.5 Disclosing Party must not arbitrarily mark documents as proprietary or confidential and will limit such designations to what disclosing Party believes has a sufficient factual and/or legal basis to be genuinely protectable proprietary information. Receiving Party's acceptance of transmittal of documents marked as disclosing Party's Protected Information will not constitute any acquiescence or admission by receiving Party that such documents are indeed genuinely protectable proprietary information so long as receiving Party timely raise any objections to disclosing Party's marking of information as Protected Information.

22.3.7 Receiving Party acknowledges and agrees that disclosing Party shall not be liable to any third party to whom receiving Party provides any Protected Information based on its use or reliance on such deliverables, such liability, if any, being assumed by receiving Party and addressed in receiving Party's contracts with such third party.

22.4 <u>Export Control</u> .

22.4.1 Each Party agrees not to disclose, directly or indirectly transfer, export, or re-export any Protected Information, or any direct or indirect products or technical data resulting therefrom to any country, natural person or entity, except in accordance with applicable export control Law.

22.4.2 To assure compliance with the export control Laws and regulations of the United States government, specifically the U. S. Department of Energy export regulations of nuclear technology under 10 C.F.R. Part 810, the U.S. Nuclear Regulatory Commission export and import regulations related to nuclear equipment and material under 10 C.F.R. Part 110, and the U.S. Department of Commerce export regulations of commercial or dual-use technology under 15 C.F.R. Part 730 et seq. concerning the export of technical data or similar information to specific countries, locations, or entities, a Party shall not disclose or permit the disclosure, transfer or re-export, directly or indirectly, of any Protected Information it receives hereunder that a receiving Party considers to be potentially subject to U.S. export control, or any product or technical data derived from such Protected Information, except in compliance with such export control Laws, which may be contingent on additional United States Governmental Approvals.

22.4.3 Each Party shall cooperate in good faith with the reasonable requests of the other Party made for purposes of either Party's compliance with such Laws and regulations. Contractor acknowledges that Protected Information which is subject to U.S. export control is contained within databases and/or servers located at the Site. Contractor shall ensure that all Contractor personnel granted access to the Site shall (a) not be included in any published lists maintained by the U.S. government of persons and entities whose export or import privileges have been denied or restricted and (b) either be a U.S. Person (defined as a U.S. citizen, lawful permanent resident, or protected individual under the Immigration and Naturalization Act of 8 U.S.C. § 1324b(a)(3)), person from a "generally authorized" country, the recipient of a "deemed export" authorization, or a person acting under continuance activities per the savings clause provision of 10 C.F.R. § 810.16(b), and Contractor shall be required to maintain with Owner or obtain such authorizations as needed and comply with any and all corresponding reporting obligations. Nothing in this Section 22.4.3 shall limit Owners' right to deny access to the Site to any Contractor personnel where Owners determine that granting access would not comply with applicable Law.

22.4.4 Notwithstanding any other provisions in this Agreement, the obligations set forth in this Section 22.4 shall be binding on the Parties so long as the relevant United States export control Laws and regulations are in effect.

## ARTICLE 23

## REPRESENTATIONS AND WARRANTIES

23.1 Representations and Warranties of Contractor. Contractor hereby represents and warrants to Owners as of the Effective Date as follows:

(i) Due Organization Contractor. Contractor is duly organized, validly existing and in good standing under the Laws of the State of Nevada. Contractor has the requisite power and authority to own and operate its business and properties and to carry on its business as such business is now being conducted and is duly qualified to do business in the State of Georgia and in any other jurisdiction in which the transaction of its business makes such qualification necessary.

(ii) Due Authorization; Binding Obligation. Contractor has full power and authority to execute and deliver this Agreement and to perform its obligations hereunder, and the execution, delivery and performance of this Agreement by Contractor has been duly authorized by the necessary action on the part of Contractor; this Agreement has been duly executed and delivered by Contractor and is the valid and binding obligation of Contractor enforceable in accordance with its terms except as limited by applicable bankruptcy, insolvency, reorganization, moratorium or other Laws affecting the rights of creditors generally and by general principles of equity.

(iii) Non-Contravention. The execution, delivery and performance of this Agreement by Contractor and the consummation of the transactions contemplated hereby do not and will not contravene the organizational documents of Contractor and do not and will not conflict with or result in a breach of or default under any indenture, mortgage, lease, agreement, instrument, judgment, decree, order or ruling to which Contractor is a party or by which it or any of its properties is bound or affected.

(iv) Approvals. There are no approvals or consents of Governmental Authorities or other Persons not yet obtained, the absence of which would materially impair Contractor's ability to execute, deliver and perform its obligations under this Agreement.

23.2 Representations and Warranties of Owners. Each Owner hereby represents, warrants and covenants to Contractor as of the Effective Date as follows (it being acknowledged that, in light of the provisions of Sections 18.3.1 and 18.3.2 with respect to Dalton Utilities, the representations, warranties and covenants of Dalton Utilities pertain only to that separate and distinct part of the City of Dalton that constitutes Dalton Utilities):

(i) Due Organization of Owner. Owner is duly organized, validly existing and in good standing under the Laws of the State of Georgia and has the requisite power and authority to own and operate its business and properties and to carry on its business as such business is now being conducted and is duly qualified to do business in State of Georgia and in any other jurisdiction in which the transaction of its business makes such qualification necessary.

(ii) Due Authorization of Owner; Binding Obligation. The execution, delivery and performance of this Agreement by Owner have been duly and effectively authorized by the requisite action on the part of such Owner's governing board. This Agreement constitutes the legal, valid and binding obligations of such Owner, enforceable against such Owner in accordance with its terms, except as limited by applicable bankruptcy, insolvency, reorganization, moratorium or other Laws affecting the rights of creditors generally and by general principles of equity.

(iii) Non-Contravention. The execution, delivery and performance of this Agreement by Owner and the consummation of the transactions contemplated hereby do not and will not contravene the organizational documents of such Owner and do not and will not conflict with or result in a breach of or default under any indenture, mortgage, lease, agreement, instrument, judgment, decree, order or ruling to which such Owner is a party or by which it or any of its properties is bound or affected.

(iv) Approvals. There are no approvals or consents of Governmental Authorities or other Persons not yet obtained, the absence of which would materially impair such Owner's ability to execute, deliver and perform its obligations under this Agreement. Contractor acknowledges and agrees that, as of the Effective Date, Owners have not obtained approval of the Georgia PSC or other required approval to continue with the construction of the Facility, and although the failure to obtain such approval would not impair Owner's ability to execute, deliver or perform its obligations under this Agreement, such failure would impact Owners' decision of whether to continue with the construction of the Facility.

(v) VEGP Units 1 and 2 . The Owners are the owners of VEGP Units 1 and 2.

23.3 Representations and Warranties of GPC . GPC hereby represents, warrants and covenants to Contractor that it has all full power and authority to execute and deliver this Agreement on behalf of itself and the other Owners and that all actions taken and decisions made by GPC (or by Southern Nuclear on GPC's behalf) under and in connection with this Agreement are binding on itself and the other Owners.

## ARTICLE 24

## TITLE; RISK OF LOSS

24.1 Transfer of Title; Intellectual Property .

24.1.1 Except as otherwise expressly provided in this Agreement, title to any materials and supplies used in connection with the Work and which become a part of the Facility or which are otherwise provided to Owners shall vest in Owners upon Owners' payment therefore.

24.1.2 Subject to the license granted herein, Contractor shall retain ownership of all intellectual property rights in any items provided by Contractor or its Subcontractors for use in performing the Work and in any discoveries and inventions (patentable or unpatentable) and copyrightable material that Contractor or any of its Subcontractors makes, creates, develops, discovers or produces in connection with the performance of the Work; provided, however, that Contractor hereby grants to Owners and their Affiliates a royalty-free, fully paid up, irrevocable, worldwide, fully sublicensable, nonexclusive license to use the deliverables required to be delivered by Contractor as part of the Work in connection with the operation, modification and maintenance of the Facility. Notwithstanding the foregoing, nothing in this Section 24.1.2 is intended to provide or transfer to Contractor ownership of any intellectual property rights in any Issued for Construction Documents, Specifications, or any of Westinghouse's, Owners', or their Affiliates' intellectual property or proprietary information (including revisions or derivative works thereto, even where such revisions or derivative works may be the product of or include Contractor's Work).

24.1.3 Both Parties shall ensure that the other Party and its subcontractors are, to the extent required in connection with the Work or the Project, granted appropriate rights to use documents previously prepared or used by third parties, including Westinghouse Electric Company LLC and its Affiliates and the subcontractors of the foregoing in the construction of the Facility.

24.2 Risk of Loss. Contractor shall be responsible for the care, custody, and control of, and shall bear the complete risk of loss, destruction, or damage of, the materials, supplies, Construction Materials, Construction Equipment and other equipment, machines and structures that will not become a permanent part of the Facility and which in each case are provided by Contractor, its Subcontractors, or the Personnel or Invitees of any of them to perform the Work.

## ARTICLE 25

## APPLICABLE LAWS AND REGULATIONS

25.1 Compliance with Applicable Laws. Contractor represents that in performing the obligations of this Agreement, all applicable Laws have been and will be complied with by Contractor and its Personnel and Subcontractors.

25.2 Specific Applicable Law Requirements. Contractor will adhere to applicable Laws including for example: (i) all labor laws and regulations including the use of U.S. citizens or properly documented alien workers under the Immigration Act of 1990 and the Immigration and Nationality Act of 1952, as amended; (ii) all applicable safety and health standards required by the Nuclear Regulatory Commission as well as all applicable safety and health standards promulgated under the Occupational Safety and Health Act of 1970, as amended, including but not limited to OSHA General Industry Regulations 1910.269 and 1926 Subpart V and all applicable state or local health or safety authority with jurisdiction over the work or services performed or to be performed under this Contract; (iii) the Department of Homeland Security's E-Verify requirements as well as applicable State immigration laws; (iv) the Foreign Corrupt Practices Act, 15 U.S.C. §§ 78dd-1, *et seq*. (as that Act may be amended from time to time); (v) the requirements and prohibitions of 10 C.F.R. Part 810, as well as all applicable laws and regulations identified in this Agreement.

25.3 Conflict Minerals. In accordance with the provisions of § 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act involving disclosures relating to "Conflict Minerals" originating in the Democratic Republic of the Congo or an adjoining country, Contractor represents that it has not recommended or included in any drawings, designs or specifications any products or materials which contain any "Conflict Minerals" which originate from the Democratic Republic of the Congo or neighboring countries.

25.4 OFAC. Contractor hereby represents and warrants as follows at all times during the term of this Contract: (i) neither it, nor any of its employees, authorized agents, subcontractors, principals or beneficial owners, is a Specially Designated National ("SDN") as defined by U.S. Department of the Treasury Office of Foreign Asset Control ("OFAC"); (ii) neither it, nor any of its employees, authorized agents, subcontractors, principals or beneficial owners, is a citizen of a country subject to an OFAC Country Sanction; (iii) it, and all of its employees, authorized agents, subcontractors, principals or beneficial owners, are in compliance with any and all applicable Laws and regulations relating to the prevention of money laundering and the financing of terrorism to which they are expressly subject.

25.5 Government Submittals. When applicable and appropriate, Contractor will promptly furnish Owners with a copy of all evaluations or notifications concerning the Work submitted to Governmental authorities (including the NRC) by Contractor or its Subcontractors.

25.6 Federal Acquisition Regulations. Certain Owners are government contractors under an Area Wide Public Utilities Contract with the General Services Administration of the United States Government or pursuant to one or more other agreements. Contractor agrees that each of the Clauses contained in the Federal Acquisition Regulations referred to below, shall, as if set forth herein in full text, be incorporated into and form a part of the Agreement, and Contractor shall comply therewith, if and to the extent applicable:

| | | |
|---|---|---|
| (1) | 52.203-3 | Gratuities (APR 1984); |
| (2) | 52.203-6 | Restrictions on Subcontractor Sales to the Government (SEP 2006); |
| (3) | 52.203-7 | Anti-Kickback Procedures (MAY 2014); |
| (4) | 52.219-8 | Utilization of Small Business Concerns (OCT 2014); |
| (5) | 52.219-9 | Small Business Subcontracting Plan (OCT 2014); |
| (6) | 52.222-21 | Prohibition of Segregated Facilities (FEB 1999); |
| (7) | 52.222-26 | Equal Opportunity (MAR 2007); |
| (8) | 52.222-37 | Employment Reports on Veterans (JUL 2014) |
| (9) | 52.222-40 | Notification of Employee Rights under the National Labor Relations Act (DEC 2010) |
| (10) | 52.222-50 | Combating Trafficking in Persons (FEB 2009) |
| (11) | 52.222-54 | Employment Eligibility Verification (AUG 2013) |
| (12) | 52.225-13 | Restrictions on Certain Foreign Purchases (JUN 2008) |

Upon written request, Owner will provide the full text of any of the above clauses incorporated herein by reference.

25.7 Subcontracting Plan. If Contractor is subject to the requirements set forth in Federal Acquisition Regulations 52.219-9, Contractor will (i) adopt a subcontracting plan ("Plan") that complies with the requirements of 52.219-9; (ii) provide a written copy of the Plan to Owners, and (iii) upon written request, provide timely periodic reports to the Owners that reflect the amounts paid to subcontractors who are a small business concern, veteran owned small business concern, service-disabled veteran-owned small business concern, HUBZone small business concern, small disadvantaged business concern, or women-owned small business concern.

25.8 Debarment. Debarment and Suspension (see 31 U.S.C. § 6101, Executive Orders 12549 and 12689, 7 C.F.R. 1726.16) - the federal law which prohibits Owner from knowingly purchasing goods or services from persons who are debarred, suspended, proposed for debarment, declared ineligible or voluntarily excluded from participating in transactions with the Federal Government or transactions with participants in programs funded in whole or in part by Federal grants, loans or loan guarantees. Contractor certifies at all times while Contractor is performing services under this Contract that neither it nor its principals is debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency of the government of the United States of America. Contractor shall provide immediate written notice to Owner if Contractor learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances. Contractor agrees it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated, and shall obtain a certification that the counterparty if any lower tier covered transaction for services under this Contract is not debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency of the government of the United States of America.

25.9 BAA. Buy-American (see 7 U.S.C. § 903, 7 C.F.R. 1726.15) - the federal law which requires the use of only such unmanufactured materials as have been mined or produced in the United States of America or any "eligible" (as defined in the statute) country and only such manufactured materials as have been manufactured in the United States or any eligible country substantially all (50% or more) from items mined, produced or manufactured in the United States or America or any eligible country, subject to certain exemptions. Contractor shall provide to Owner such information, documents, and certificates as may be requested by Owner or the Administrator of the Rural Utilities Service from time to time with respect to any articles, materials or supplies provided by Contractor in connection with this Contract.

25.10 Lobbying. Lobbying (see 7 C.F.R. 418) - the federal law which prohibits funds appropriated by the government of the United States of America from being used to pay any person for influencing or attempting to influence certain federal officers or agents in connection with the making of a federal loan. Contractor has delivered a signed certification in the form shown attached and incorporated herein as Exhibit T. Contractor has read and understood Exhibit T, will sign and deliver additional counterparts of such certification whenever requested by Owner, and will perform all of the requirements set forth in the certification.

25.11 Davis-Bacon Act Required Contract Clauses.

(i) The contract clauses contained under the heading "Davis-Bacon Act Required Provisions" in Exhibit J (Davis-Bacon Act Required Provisions) to this Agreement shall, as if set forth herein in full text, be incorporated into and form a part of this Agreement, and Contractor shall comply therewith where applicable.

(a) The Parties will cooperate in seeking appropriate exemptions from disclosure under the Freedom of Information Act, 5 U.S.C. § 552, and associated regulations for certified payroll data provided to federal agencies in the course of compliance with the Davis-Bacon Act and the Davis-Bacon Act regulations.

(b) Where necessary and required by law, Contractor will support Owners with the maintenance of the DAVIS-BACON AND RELATED ACTS COMPLIANCE PROGRAM FOR VOGTLE UNITS 3&4 PROJECT.

(ii) The wage determinations set forth in Exhibit J are applicable to Work provided under this Agreement.

## ARTICLE 26

## EQUAL EMPLOYMENT OPPORTUNITY

26.1 Owners' Equal Employment Opportunity Compliance. Owners comply with all applicable federal and state fair employment laws, including, without limitation, Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, the Americans with Disabilities Act of 1990, all provisions of Executive Order 11246 as amended, 41 C.F.R. § 60-1, and all of the rules, regulations and relevant orders of the Secretary of Labor. Owners prohibit any acts of discrimination, or harassment including offensive words or conduct, on the basis of race, color, religion, age, disability, veteran status, gender, sex, sexual orientation, gender identity, national origin or any other basis prohibited by law. Owners' work environment must remain free from distractions caused by negative words or actions. Owners are committed to taking affirmative action as required by law and to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, gender, color, religion, age, national origin, disability, veteran status, or any classification protected by federal, state or local law. Such action includes but is not limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Owners post in conspicuous places, available to employees and applicants for employment, notices to which state that all qualified applicants will receive consideration for employment without regard to race, gender, color, religion, age, national origin, sexual orientation, physical handicap, or veteran status.

26.2 Contractor's Equal Employment Opportunity Compliance. Contractor will comply with all applicable federal and state fair employment laws, including, without limitation, Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967 and the Americans with Disabilities Act of 1990, and all provisions of Executive Order 11246 as amended, 41 C.F.R. § 60-1, and all of the rules, regulations and relevant orders of the Secretary of Labor. Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, age, disability, veteran status, genetic information, gender, sex, sexual orientation, gender identity, national origin, or any classification protected by federal, state or local law. Contractor shall take affirmative action as required by law and to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, gender, color, religion, age, national origin, disability, veteran status, or any classification protected by federal, state or local law. Such action will include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. Contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices which state that all qualified applicants will receive consideration for employment without regard to race, gender, color, religion, age, national origin, disability, or veteran status.

26.3 VEVRAA. In accordance with the U.S. Department of Labor's regulations implementing the Vietnam Era Veterans Readjustment Assistance Act (VEVRAA, as amended) at 41 C.F.R. Part 60-300, Owners and Contractor shall abide by the requirements of 41 C.F.R. § 60-300.5(a). **This regulation prohibits discrimination against qualified protected veterans, and requires affirmative action by covered prime contractors and subcontractors to employ and advance in employment qualified protected veterans.**

26.4 Rehabilitation Act. In accordance with the U.S. Department of Labor's regulations implementing Section 503 of the Rehabilitation Act of 1973, as amended (Section 503) at 41 C.F.R. Part 60-741, Owners and Contractor shall abide by the requirements of 41 C.F.R. § 60-741.5(a). **This regulation prohibits discrimination against qualified individuals on the basis of disability, and requires affirmative action by covered prime contractors and subcontractors to employ and advance in employment qualified individuals with disabilities.**

## ARTICLE 27

## CYBER SECURITY PROGRAM REQUIREMENTS

27.1 Protection of Digital Computer and Communication Systems and Networks. Contractor understands that Owners are required under 10 C.F.R. § 73.54 to assure all Work performed related to digital computer and communication systems and networks are adequately protected against cyber-attacks, including the design basis threat described in 10 U.S.C. § 73.1, or Work associated with (i) safety-related and important-to-safety functions, (ii) security functions, (iii) emergency preparedness functions, (iv) and support systems and equipment which if compromised, would adversely impact safety, security, or emergency preparedness functions. Contractor agrees that all related Work performed by Contractor will be performed in compliance with Owners' cyber security plan. As part of Contractors obligations under this provision, Contractor agrees to the following:

(i) Right of Access. Owners, its agents or assignees, shall have the right to evaluate applicable areas of Contractor or sub-tier provider facilities and activities at a mutually agreed time during the procurement process to ensure compliance with agreed cyber security protocols. Such evaluation performed by Owners or its agents shall in no way relieve Contractor or its sub-tiers of any responsibilities under this Agreement.

(ii) Control of Sub-tier Subcontracting. Subject to Article 5, Contractor shall be responsible for assuring that all Subcontractors are working to Contractor's Quality Assurance Program or to the Subcontractors' own quality assurance program that has been approved by Contractor. Contractor shall provide appropriate verification of quality for all Subcontractors.

(iii) Records Retention. Contractor will retain records pertaining to the Work consistent with Contractor's corporate record retention policies.

27.2 Contractor Worker Network Access Compliance.

27.2.1 Owners are committed to maintaining a drug-free and alcohol-free workplace and requires that anyone having access to Owners' electronic systems and network and/or performing services that directly impact Owners' personnel, systems, networks, facilities, equipment, or operations: (i) is free from the effects of drugs or alcohol that may impair work performance; and (ii) meets trustworthiness and behavioral standards. Contractor must maintain and enforce a drug-free and alcohol-free workplace policy which is applicable to those of its employees working under this Agreement throughout this Agreement's term. These requirements apply to Contractor and all its representatives, including its Subcontractors of any tier, which have access to Owners' electronic systems and network. Contractor will require that all of its representatives who have access to Owners' electronic systems and network will abide by Contractor's Code of Conduct and Business Ethics and will have the legal right to work in the United States.

27.2.2 All Contractor and Subcontractor Personnel representatives who will have access to Owners' electronic systems and network will be subject to a background investigation, at Owners' expense, conducted by Employment Screening Services ("ESS" or "Provider"), or other vendor identified by Owners to provide background screenings for contract workers (provided that, in each case, Contractor is reasonably satisfied that such Provider or such other company will maintain the confidentiality of such information). Contractor will obtain from Owners a Southern Company Consent form entitled Consent to Release Information for Background Investigation. Contractor will complete the form and contact the Provider at 1-866-859-0143 and request a Southern Company background investigation for each such Contractor representative. Any of Contractor's representatives who do not meet the investigation requirements will not be granted system access, will be dismissed from the Construction Site, and will be barred from other Owners' sites. In the future, an on-line request option will become available, and either Employment Screening Services or Owners will notify Contractor of the availability of the on-line request option and provide the link to the website, which Contractor may then use in lieu of the telephone option above.

27.2.3 Before each background investigation is conducted, each Contractor representative who will have access to Owners' electronic systems and network must sign a consent form authorizing the background check (to the extent consistent with applicable federal, state or and local laws) and releasing all background investigation results to his/her employer and, if necessary, to Owners. Failure to provide such consent will result in the individual not having access Owners' electronic systems and network. Based on the investigation results, Provider will judge the background investigation results and notify Owners as to whether each of the screened employees is "Compliant" or "Non-Compliant." An individual is "Non-Compliant" and disqualified if the background investigation reveals any of the following:

- Felony conviction;
- Conviction for certain misdemeanors;
- DUI/DWI convictions (two in past five years);
- Pending charges that, if resulting in a conviction, would disqualify for one of the preceding reasons;
- Currently on probation for charges related to one of the preceding reasons;
- Pattern of behavior in the past that may not have resulted in a conviction, but that indicates involvement in criminal activity;
- Incident of workplace violence;
- Willful omission, misrepresentation, or falsification of personal data provided for background investigation purposes;
- Not authorized to work in the United States;
- Currently prohibited from performing work for, or for any contractor on behalf of, any affiliate of SNC; or
- Suspended or revoked driver's license (for any position that requires driving).

27.2.4 Owners may conduct audits during this Agreement's term to verify compliance with this Section. Neither reservation, nor exercise, of these rights relieves Contractor from compliance nor constitutes exercise of control over manner or means of implementing this Section. No act or omission of SNC waives SNC's right to enforce, or Contractor's duty to comply with, the requirements of this Article. SNC also may change the foregoing network access requirements at any time, with the revisions becoming effective upon notice to Contractor; provided that Contractor is given a reasonable opportunity to comply with and implement any such changes. In addition to this Agreement's general indemnity provisions, Contractor must indemnify Owners' Interests against a Third Party Claim arising out of or resulting from Contractor's non-compliance with this Article. This indemnity obligation will survive Agreement termination, cancellation, expiration, or completion.

27.2.5 A Background Investigation Toolkit is available upon request from Southern Nuclear. Contractor may contact the Provider of the Background Investigation at the following website: www.es2.com.

27.3 Procurement of Services . If and to the extent that Contractor provides cyber security related Work or any Work on critical digital assets (hardware, firmware, operating systems, or application software) at Owners' facilities, such Work will be subject to the controls of SNC's Quality Assurance Program, and Contractor agrees to abide by SNC's Quality Assurance Program, including as follows (provided that in the event of a conflict, SNC's Quality Assurance Program requirements will control):

(i) Contractor, before beginning permitted access to SNC's network, will be made aware of SNC's Quality Assurance Program and must agree to abide by the relevant policies; and Contractor will at all times remain responsible for the compliance of its authorized Personnel and sub-tier contractors.

(ii) Contractor will participate in SNC's cyber security training programs or equivalent qualification from Contractor, subject to SNC's approval of such qualification.

(iii) Contractor will require:

(a) Configuration management of the Contractor's computers, hardware or other equipment to include virus protection, patch management, authentication requirements and secure internet connections.

(b) The maintenance and secure transfer and storage of information and code while off-site to include appropriate encryption, security and deletion protocols.

(c) A duty to protect confidentiality.

(d) Software quality assurance ("SQA") procedures.

(e) Approved and disapproved software requirements tabulation.

(f) Processes and procedures for background investigations.

(g) SNC's right to audit or access to Contractor's cyber security program and quality assurance program. Contractor shall have no responsibility to update any deliverables or work products delivered as part of any cyber security services in light of future events or circumstances, unless Contractor specifically agrees to do so. Contractor shall be entitled to state in its deliverables and work products disclaimers and liability limitations consistent with the foregoing.

27.4 Construction. This Section contains numerous references to statutes, regulations, SNC and Contractor programs, policies and procedures ("Source Documents"); in each instance, such references and all definitions used in this Section derived from the Source Documents are intended to (and shall be deemed to) include all future revisions, amendments and modifications implemented from time to time to the Source Documents and the definitions derived from the Source Documents. Furthermore, to the extent any statute, regulation, SNC or Contractor program, policy or procedure is enacted in the future and reasonably would be expected to relate to the subject matter hereof, the parties shall negotiate in good faith to revise this Section to address such items as deemed reasonably appropriate by the parties.

## ARTICLE 28

## SITE AND SECURITY RULES AND POLICIES

28.1 Site Rules. Contractor represents and warrants that it will ensure that its Personnel shall comply with, all applicable rules, regulations, policies, programs, procedures and other requirements of the Owners or Southern Nuclear, including, but not limited to, the subparts below as well as those applicable requirements relating to site, security, fitness for duty quality concerns, quality control, quality assurance, safety, radiation protection and control, environmental compliance and regulatory compliance, and electronic communications (collectively, "Site Rules"), provided that in each case copies of such Site Rules have previously been provided to Contractor's Authorized Representative. If at any time during the term of this Agreement, Contractor or its Personnel fail to comply with the Site Rules, Owners reserve the right to exercise all its legal remedies under this Agreement including the right to refuse site entry to or have removed from the site Contractor or its Personnel. It is Owners' expectation that these site requirements be communicated by Contractor to its Personnel before they arrive at any of Owners' locations.

28.2 Asbestos Responsibility. Certain areas and components of the nuclear plant for which Contractor has contracted to perform work may contain asbestos. As used in this Section, the term "asbestos" includes "asbestos-containing material" and "presumed asbestos-containing material", as these terms are defined in 29 C.F.R. § 1926.1101 and 29 C.F.R. § 1910.1001. Areas within the plant which are known by SNC to contain asbestos are posted. Material Safety Data Sheets which set forth the quantity in each of the types of asbestos known to be present at the plant are available from the SNC's employee responsible for coordinating the performance of the task that Contractor has been contracted to perform ("SNC's cognizant individual") for inspection. However, it is Contractor's responsibility as a Contractor to exercise caution while at the Site in light of the potential that the area in which Contractor is working may contain asbestos. Contractor shall take the following precautions, unless advised otherwise in writing by SNC's cognizant individual: (1) Contractor must check for postings in the area and contact SNC's cognizant individual to determine whether SNC is aware of any asbestos in the area or components in which Contractor will be working, and (2) even if SNC's cognizant individual is not aware of asbestos in the area or component, Contractor must be sensitive to the potential that asbestos might exist. If Contractor determines that there is a potential that asbestos exists in the work area or component, Contractor shall stop work and notify SNC to investigate the potential asbestos-containing material to determine if in fact the material contains asbestos. If the material is found to be asbestos, Contractor must coordinate any related Work with SNC. Under no circumstances shall work continue when asbestos is discovered without the specific approval of SNC.

28.3 Lifetime Exposure Records. Southern Nuclear policy (applicable after fuel received on Site) administratively limits annual radiation exposure to 2000 millirem, and lifetime radiation exposure to less than the worker's age in rem or 50 rem (whichever is more restrictive), without obtaining special approvals. In order to maintain exposures below these limits, the Contractor is requested to contact the on-call site health physics managers prior to furnishing any worker on site with an exposure level which exceeds, or is projected to exceed, these limits.

28.4 Required Instruction. Contractor acknowledges that its Personnel may be required to complete successfully indoctrination classes and similar instructional classes concerning the Site Rules before admission to, or the performance of Work on, the Site. Owners will not be liable for and will not be required to compensate or reimburse Contractor for any demobilization costs associated with any Personnel who fails to comply with the Site Rules or who terminates employment or has employment terminated in connection with the Site Rules, regardless of the length of employment of or amount of services performed by such Personnel.

28.5 Zero Tolerance Policy on Firearms. Owners have a zero tolerance policy on firearms being brought onto Owners' property. Under no circumstance is a Contractor's employee, agent, or representative to bring firearms, explosives, or any other incendiary devices onto any property owned or operated by Owners. This prohibition includes leaving such items in a vehicle that is parked in Owners' parking lot. Violation of this policy could result in Contractor or its Personnel being barred from all property owned or operated by Owners or its Affiliates.

28.6 Safety. Contractor will be solely responsible for conforming to safety practices dictated by the nature and condition of the Work while at the Site including compliance with OSHA.

28.7 Reporting of Accidents and Noncompliance with Safety Requirements. Contractor will promptly report to Owners, on such form and in such detail prescribed below, all accidents causing personal injury or property damage, and other unsafe acts or conditions, arising from or otherwise connected with performance of the Work. In the event Owners provide written notification to Contractor of any noncompliance with the provisions of this Section, and Contractor fails or refuses to take corrective action promptly in a manner acceptable to Owners, in Owners' sole discretion, such failure or refusal will constitute a material breach of the Agreement. Owners will not be obligated to identify, and notify Contractor of, noncompliance with Section, and any failure by Owners to identify, and notify Contractor of, such noncompliance (including, without limitation, patent noncompliance) will not relieve Contractor of any obligation or liability under the Agreement.

28.8 Medical/Injuries Reporting. First aid will be provided at an on-site medical facility to be staffed and managed by a Contractor-Managed Subcontractor. Injuries that require treatment beyond first aid will follow Site specific emergency response procedures. Contractor shall immediately notify the Owners' Authorized Representative of any recordable injury, serious incident, occupational illness or potential serious hazard to personnel on the Construction Site. Contractor shall submit a detailed, written report to Southern Nuclear within 48 hours of the recordable injury, serious incident, or occupational illness. The injury report will contain the following information:

- Name of injured person and employee identification number
- Date/Time of injury
- Names of any witnesses and employee identification numbers
- Accident description
- Cause of accident
- Action taken to prevent re-occurrence
- Nature/Extent of injury
- Name of Doctor contacted

28.9 Drug Screening. All Contractor Personnel requiring medical attention on Site or as a result of or relating to the Work performed on Site may be drug screened by Owners in accordance with applicable Law and Owners' Fitness for Duty Program.

28.10 OSHA 300 Log. Contractor shall post and keep current their OSHA 300 Log at its on-site office while Contractor is performing Work for Owners. A copy of this OSHA 300 Log will be provided to Owners' representatives upon request.

28.11 Injury Reporting. Contractor's Authorized Representative is responsible for reporting all serious incidents, injuries, and occupational illnesses per Section 28.8. Contractor shall perform an investigation, and an Owner representative may participate in the investigation as determined by Owners and Contractor. The investigation results and corrective actions must be provided to Owners and Owners reserve the right to require additional corrective measures.

28.12 Reporting Applicability. For clarity, the above reporting obligation and other requirements in this Article 28 shall only arise in connection with the performance of Work at or on Owners' property.

## ARTICLE 29

## UNESCORTED ACCESS REQUIREMENTS

29.1 Unescorted Access Requirements. The provisions in this Article 29 shall apply only to personnel who are applying for or have been granted unescorted access to VEGP Units 1 and 2, to Unit 3 after Owners have notified Contractor that the requirements of 10 C.F.R. § 73.56 apply to Unit 3, or to Unit 4 after Owners have notified Contractor that the requirements of 10 C.F.R. § 73.56 apply to Unit 4. All personnel granted unescorted access must be screened in accordance with the requirements of 10 C.F.R. § 73.56, 10 C.F.R. § 73.57, 10 C.F.R. § 26, and guidance of NEI 03.01 latest revision, Nuclear Energy Institute Nuclear Power Plant Access

Authorization Program. Suitability for unescorted access will be based on the results of this screening and must show that the individual is trustworthy and reliable and will not pose a risk to the health and safety of other workers or the public. Contractor is responsible for providing a list of its Personnel that will be visiting the Site at least twenty-four (24) hours prior to its Personnel reporting to the jobsite. The list shall include the last four digits of the employees' social security numbers and shall be submitted to Southern Nuclear's service administrator / cognizant individual named in the applicable blanket order release.

29.2 Procedures for Obtaining Access .

29.2.1 Contractor must have its Personnel screened by Southern Nuclear before unescorted access can be granted. To initiate the screening process, access application forms for the Contractor and its Personnel must be completed and mailed to the address listed below as soon as possible before access is required. Allow a minimum of two (2) weeks for processing applications requiring for background investigations. Application forms and additional information may be obtained by writing or calling:

Southern Nuclear Operating Company, Inc.
Attn: Nuclear Fleet Security Department Bin B017
P.O. Box 1295
Birmingham, AL 35201
Telephone: 800-273-8158

29.2.2 The access screening and qualification process for unescorted access authorization includes: (a) verified identity of individual, (b) employment history with suitable inquiry (includes education in lieu of employment and military service as employment), (c) a credit history review, (d) character and reputation determination, (e) a psychological assessment, (f) FBI criminal history review, (g) pre-access drug/alcohol testing and (h) plant training. The individual shall be subject to SNC's approved behavior observation program immediately following authorizing Unescorted Access Authorization/Unescorted Access (UAA/UA). Background investigations will be processed by the SNC's Nuclear Fleet Security Department in Birmingham, Alabama and will be initiated upon receipt of properly completed application forms from Contractor. The remainder of the access process will normally be conducted at the nuclear plant and should be coordinated through Contractor's contact point at the Plant or the Plant Security Access Coordinator.

29.2.3 Contractor is responsible for assuring that its Personnel arrive at the time and location scheduled for access processing at the Plant.

29.2.4 Contractor and its Personnel that have successfully completed all of the required access elements which were reviewed by a reviewing official who then made an access determination relative to the individual's trustworthiness, reliability and fitness for duty, will be issued a badge for unescorted access. Contractor and its Personnel that do not successfully complete all requirements will be informed of the reasons for denial of access and be given the opportunity to request a review of those access denial decisions that are based on background investigation, criminal history, psychological assessment or fitness for duty.

29.3 Procedures for Terminating Access/Legal Action Reporting .

29.3.1 Contractor is responsible for ensuring that its Personnel report all legal actions to which they are subject and that occur after they are granted access to the Plant. A report of legal action must be made immediately on arrival for work on the first day or first shift following the legal action. The report must be made before the worker enters a nuclear site Protected Area. If the worker's immediate supervisor is not available, the report should be made to the next level of supervision in the work group.

(i) The term "legal action" is defined as a formal action taken by a law enforcement authority or court of law, including being held, detained, take into custody, charged, arrested, indicted, fined, forfeited bond, cited, or convicted for a violation of any law, regulation, or ordinance. It includes felony, misdemeanor, serious traffic offenses, serious civil charges, or military charges.

(ii) A serious civil charge includes, but is not limited to, the following: a civil judgment, tax lien, civil restraining order, breach of peace, fraud, malicious conduct or gross negligence.

(iii) Legal action reporting does not include minor misdemeanors such as parking tickets or minor traffic violations such as moving violations when the individual was not physically taken into custody. It does not include minor civil actions such as zoning violations.

(iv) Any additional legal action occurring while the individual is in the judicial process - and until the matter is fully dispositioned - must be reported to supervision. For example, if an individual's case is continued or postponed until a future court date that status must be reported to supervision. Personnel are also required to report the final disposition to supervision.

(v) Legal action reporting also includes the mandated implementation of a plan for treatment or mitigation in order to avoid a permanent record of an arrest or conviction in response to the following activities:

(a) The use, sale or possession of illegal drugs;

(b) The abuse of legal drugs or alcohol; or

(c) The refusal to take a drug or alcohol test (administered by a law enforcement authority or under direction of a court of law).

29.3.2 Contractor is responsible for notifying plant security to terminate its employee's badge and access authorization within 24 hours following the last shift that the individual is scheduled to work at the Site, or in the event an individual is terminated for cause, the notification to Southern Nuclear security representatives will be made simultaneous of such termination.

29.4 Representatives' Access . All Personnel who require access to the vital areas of the Site are required to pass the general employee training (G.E.T.), fitness for duty and background screening before being granted unescorted access. Southern Nuclear will not reimburse to Contractor any cost incurred by Contractor (e.g., wages, per diem, travel expense) for Personnel who fail to report to work after completion of all test requirements, choose not to complete, or fail to pass the above prequalification.

## ARTICLE 30

## FITNESS FOR DUTY

30.1 Southern Nuclear Fitness for Duty Program . The Nuclear Regulatory Commission's ("NRC") Fitness For Duty ("FFD") regulatory requirements, codified in 10 C.F.R. § 26, and effective on April 30, 2008, require licensees authorized to construct and operate nuclear power reactors to implement an FFD program that includes contract personnel such as Contractor and its Personnel. Contractor Personnel will be evaluated and tested under Southern Nuclear's program, and Southern Nuclear will cover Contractor Personnel under Southern Nuclear's program including, as applicable, a behavioral observation program. Contractor agrees that Contractor accepts and shall strictly adhere to the following requirements:

(i) That Contractor will adhere to Southern Nuclear's Fitness for Duty policy.

(ii) That Contractor supervisory representatives, to the extent that they are covered by 10 C.F.R. Part 26, will be trained in techniques and procedures for initiating appropriate corrective action.

(iii) That Southern Nuclear is responsible to the NRC for maintaining an effective FFD program and that duly authorized representatives of the NRC may inspect, copy or take away copies of reports related to the implementation of Southern Nuclear's FFD program under scope of contracted activities.

(iv) That Contractor shall ensure Contractor Personnel reporting to work at Southern Nuclear's facilities are fit for duty within the scope of 10 C.F.R. Part 26 and able to fully perform the assigned work activities.

(v) Contractor shall ensure that all its Personnel comply with Owners' behavioral observation requirements including, but not limited to, reporting any observation of impairment or unfitness regardless of cause.

(vi) That all Contractor Personnel report to work physically fit to perform all their job duties and that the Contractor shall consider the scope of work required for each contract employee and the physical and mental requirements for each job (e.g., ladder climbing; work at elevations; working in extreme temperatures; heavy lifting, prolonged walking/standing, cognitive ability). Prior to an assignment under this Agreement, the Contractor shall exercise due diligence to ensure that its Personnel who have pre-existing medical conditions that might contraindicate their work in these environments are appropriately evaluated prior to assignment at Owners' nuclear facilities.

(vii) When Owners notify Contractor when the requirements of 10 C.F.R. § 73.56 are expected to apply to Unit 3 and/or Unit 4, Owners will also notify Contractor that the requirements of this Section 30.1(vii) apply. Contractor shall comply with 10 C.F.R. § 26, subpart I, managing fatigue, effective as March 31, 2008 and implemented by Southern Nuclear as of September 30, 2009. Contractor shall ensure that its Personnel performing covered work on-Site shall comply with the work hour rules and effectively manage fatigue per the requirements of subpart I. Compliance with the work hour controls include, but are not limited to, ensuring that Contractor Personnel report to work free of fatigue and have had a minimum 34-hour break in the 9-day calendar period prior to assignment to perform covered work. That the Contractor shall also track work hours of all Contractor Personnel performing covered work on-site to ensure compliance with the subpart I work hour controls and provide annual work hour reports to Southern Nuclear Safety & Health Department, FFD program manager by February 1 of the current year for the prior year.

(viii) To the extent required by 10 C.F.R. § 26.35, Contractor will have or cause its Subcontractors to have, a compliant Employee Assistance Program.

30.2 FFD Access Requirements . The provisions of this Section 30.2 only apply to those individuals not covered by the unescorted access provisions in Article 29. When Owners notify Contractor when the requirements of 10 C.F.R. § 73.56 are expected to apply to Unit 3 and/or Unit 4, Owners will also notify Contractor of the date when FFD access per this Section 30.2 is no longer applicable. All personnel granted FFD access must be screened in accordance with the requirements of 10 C.F.R. Part 26, 10 C.F.R. § 73.56 and NEI 06-06. Suitability for FFD access will be based on the results of this screening and must show that the individual is trustworthy and reliable and will not pose a risk to the health and safety of other workers or the public.

30.3 Scheduling of Work . This Section 30.3 only applies to Personnel who have been granted unescorted access pursuant to Article 29. Contractor shall provide work schedules of Personnel with unescorted nuclear access pursuant to Article 29 who are performing risk significant (covered) work to Owners' designated FFD representative a minimum of 24 hours in advance of arrival to designated work site for review and approval by Southern Nuclear to ensure the work schedules for such Personnel are in compliance with 10 C.F.R. § 26, subpart I, "Managing Fatigue." Risk significant (covered) work will be determined by Southern Nuclear. Contractor shall obtain written approval from Southern Nuclear of such proposed work schedule. At a minimum, such proposed schedule shall include names of all Contractor Personnel, number of shifts per day, hours per shift, and number of days per week and meet the minimum days off per subpart I. Contractor shall strictly adhere to such approved work schedules and work scope. A representative of SNC shall be on site while Contractor is performing work at SNC's nuclear facilities. Contractor shall obtain approval from SNC prior to any work being performed outside of such approved work schedule, out-of-shift, on holidays, or weekends.

30.4 Work Hour Controls/Limitations per 10 C.F.R. § 26, subpart I, "Managing Fatigue" . This Section 30.4 only applies to Personnel who have been granted unescorted access pursuant to Article 29. Contractor shall ensure that all of its Personnel with unescorted nuclear access comply with 10 C.F.R. § 26, subpart I work hour controls and limits; while performing covered work inside the Owner controlled and protected areas of the licensee facility. 10 C.F.R. § 26 subpart I and applicable Southern Nuclear procedures limit work hours and requires minimum days off for Personnel with unescorted access; while inside the Owner controlled area performing risk significant (covered) work. Risk significant (covered) work will be determined by Southern Nuclear. Without prior documented approval of SNC, no individual shall work more than 16 hours in any 24-hour period, more than hours in any 48-hour period, more than 72 hours in any 7-day period, including within shift breaks, and are required 34 hours off in any 9-day period. Contractor shall:

(i) Monitor the work hours of Contractor's Personnel,

(ii) Provide documented actual work hours, including start and stop times,

(iii) Obtain appropriate approval from SNC prior to any worker exceeding the limitations set forth in 10 C.F.R. § 26, subpart I; and

(iv) Ensure fatigue assessments are conducted on Contractor's Personnel under the following conditions:

(a) For Cause - if an observed condition of impaired individual alertness creating a reasonable suspicion that an individual is not fit to safely and competently perform his or her duties;

(b) Self-Declaration - Conducted in response to an individual's self-declaration to his or her supervisor that he or she is not fit to safely and competently perform his or her duties;

(c) Post-Event - Conducted in response to events requiring post-event drug and alcohol testing as specified in 10 C.F.R. § 26.31(c); and,

(d) Follow-Up - If a fatigue assessment was conducted after for cause or in response to a self-declaration, and the Contractor returns the individual to duty following a break of less than ten (v) hours in duration, Contractor shall reassess the individual for fatigue as well as the need to implement controls and conditions before permitting the individual to resume performing any duties.

30.5 Personnel Denied Access to Nuclear Facility. Contractor is responsible for assuring that any of its Personnel who have been denied access at a nuclear plant or removed from activities covered under the scope of 10 C.F.R. § 73.56, 10 C.F.R. § 73.57, NEI 03-01 latest revision, or 10 C.F.R. § 26 at any other nuclear plant are not assigned to SNC's nuclear plant and do not perform any Work covered by this Agreement without the knowledge and consent of SNC.

## ARTICLE 31

## FREE FLOW OF INFORMATION

31.1 Free Flow of Information Compliance . Contractor agrees to conduct its activities, and to ensure that its Personnel conduct activities, in full compliance with the requirements of

Section 211 of the Energy Reorganization Act of 1974, as amended (the "ERA") and 10 C.F.R. § 50.7.

31.2 Work Environment. Contractor will foster a safety conscious work environment ("SCWE") in which its employees feel free to raise concerns without fear of harassment, intimidation, retaliation or discrimination.

31.3 Project ECP and CAP. Contractor and its Subcontractors and their respective Personnel will be subject to SNC's project-specific employee concerns and corrective action programs and procedures at all locations where Work under this Agreement is being performed and will advise their personnel that they are entitled and encouraged to raise safety concerns to the Contractor's management, to Owners, and to the NRC without fear of discharge or other discrimination. SNC's programs to which Contractor and its subcontractors and their respective employees, agents, and personnel are subject will include a Project Employee Concerns Program (Project ECP) and a Project Corrective Action Program (Project CAP). The Project ECP and Project CAP will be reflected in written policies and procedures, to be provided by Owners to Contractor, that employees may use to raise their concerns, and availability of the Project ECP and Project CAP will be broadly communicated by the Owners to the Contractor and its Subcontractors, and their respective Personnel. To the extent allowed by law and by Owners' obligations to protect and maintain confidentiality of Project ECP information, Owners will make a good faith effort to: (i) promptly notify Contractor of any ECP-related concern, allegation of harassment or intimidation, or nuclear safety or quality concern it receives related to Contractor's or any of its Subcontractors' performance of the Work or to any work performed by any of the Contractor-Managed Subcontractors; (ii) on a periodic basis, but no less than monthly, provide Contractor with an update on the status of any investigation being conducted pursuant to the Project ECP related to Contractor's or any of its Subcontractors' performance of the Work or to any work performed by any of the Contractor-Managed Subcontractors; (iii) within one month after completion of any investigation being conducted pursuant to the Project ECP related to Contractor's or any of its Subcontractors' performance of the Work or to any work performed by any of the Contractor-Managed Subcontractors, provide Contractor with an executive summary of such investigation; and (iv) as such reports are finalized by Project ECP personnel and shared with Owners, but no less than Quarterly, provide Contractor with trends and metrics of Project ECP issues related to Contractor's and its Subcontractors' performance of the Work and to any work performed by the Contractor-Managed Subcontractors.

31.4 Free Flow of Information Training. As part of applicable employee training programs, Contractor will familiarize its employees and require each Subcontractor to familiarize its employees with the requirements of Section 211 of the ERA, 10 C.F.R. § 50.7, and NRC's Form 3. Employee training must also include information on Nuclear Safety Culture and SCWE.

31.5 Contractor's Employment Decisions. All employment decisions for Contractor's employees will be made by Contractor and all employment decisions for a Subcontractor's employees will be made by such Subcontractor. Owners are not a joint employer with Contractor or its Subcontractors and shall not direct or control Contractor's employees or a Subcontractor's employees. Contractor will conduct a SCWE review of any adverse employment action in coordination with Owners. Contractor will ensure its activities are in full compliance with the ERA and 10 C.F.R. § 50.7.

31.6 Notification of Harassment or Intimidation Allegation. Contractor will promptly notify Owners of any allegation or complaint of harassment or intimidation in connection with the Work under Section 211 of the ERA and 10 C.F.R. § 50.7. Contractor will inform Owners of any proceeding relating to such allegation or complaint, and will inform Owners promptly of any enforcement action or adverse employment action which it plans to take with respect to an employee who has made such an allegation or complaint to the extent it arises out of performance of the Work. For allegations or complaints of harassment or intimidation against Contractor received by Owners, Owners will provide notice to Contractor in accordance with Section 31.3.

31.7 Adjudicatory Documents. Contractor will promptly furnish Owners' Project ECP representative at the Site with copies of all adjudicatory documents relating to a proceeding involving allegations of harassment or intimidation under Section 211 of the ERA or 10 C.F.R. § 50.7 to the extent these proceedings arise out of performance of the Work. These documents include complaints, hearing requests, notices, pleadings, discovery requests, briefs, orders, decisions and appeals.

31.8 Nuclear Safety or Quality Concern. Within two Business Days of Contractor's receipt of a nuclear safety or quality concern relating to the Work, Contractor will provide notice of such concern to Owners' Project ECP representative at the Site. Contractor will also ensure associated records and reports are maintained in accordance with applicable retention policies as specified by NRC regulations, and provide a copy of such records at the request of Owners' Project ECP representative. Upon Owners' receipt of a nuclear safety or quality concern relating to Contractor arising out of performance of the Work, Owners will provide notice to Contractor in accordance with Section 31.3.

31.9 Auditing of Whistleblower Policies and Investigations. Owners reserve the right to review and audit the effectiveness of Contractor's policies and procedures, to review any investigation performed by Contractor of an allegation of harassment or intimidation related to the Work, to conduct its own investigation into any such allegation, and to request remedial action. Contractor agrees to cooperate with such investigations.

31.10 Termination for Free Flow of Information Violation. Contractor agrees that (i) any actions it takes with respect to its employees in connection with the Work, which Owners, the NRC or the Department of Labor determines is in violation of Section 211 of the ERA or 10 C.F.R. § 50.7, or (ii) any material breach of this Section will constitute a breach of a material provision of this Agreement for the purposes of Section 21.2.

31.11 Indemnification for Free Flow of Information Claims. Contractor agrees to indemnify and hold harmless Owners from any Claims by Contractor's employees and associated costs (including costs of defense, attorney's fees and court costs), expenses, fines, penalties or other liability to the extent such arises from conduct of Contractor which violates Section 211 of the ERA or 10 C.F.R. § 50.7.

31.12 Communication with NRC. In accordance with 10 C.F.R. § 50.7, this Agreement does not in any way prohibit or restrict or otherwise discourage the free flow of information from Contractor to the NRC. Further, any associated subcontract affecting the terms, compensation, conditions and privileges of employment will not contain any provision which prohibits, restricts or otherwise discourages the free flow of information to the NRC.

## ARTICLE 32

## NO TOLERATION OF UNACCEPTABLE BEHAVIORS BY CONTRACTOR

32.1 Behavior Standards . Contractor and its Personnel shall at all times conduct their business activities pursuant to this Agreement in a highly ethical manner and in compliance with all applicable laws and regulations. Personnel shall not, at any time, exhibit the following behaviors:

- Harassment or unlawful discrimination of any kind or character, including but not limited to conduct or language derogatory to any individual, race, color, religion, age, disability, veteran status, genetic information, gender, sex, sexual orientation, gender identity, national origin, or any classification protected by federal, state or local law, that creates an intimidating, hostile, or offensive working environment. Specific examples include, but are not limited to jokes, pranks, epithets, written or graphic material, or hostility or aversion toward an individual or group on the basis of a legally protected status.
- Any conduct or acts such as threats or violence that creates a hostile, abusive, or intimidating work environment. Examples of such inappropriate behaviors include, but are not limited to fighting, abusive language, inappropriate signage, use or possession of firearms on Owners' property, and destruction of Owners or Owners' employee property at the worksite or the threat of any of the foregoing.
- Work practices that are unsafe or harmful to the natural environment.
- Use of Owners' computers, email, telephone or voice-mail system that in any way involves material that is obscene, pornographic, sexually oriented, threatening, or otherwise derogatory or offensive to any individual, race, color, religion, age, disability, veteran status, genetic information, gender, sex, sexual orientation, gender identity, national origin, or any classification protected by federal, state or local law.
- The use of, being under the influence of, or possession of alcoholic beverages or unlawful drugs on Owners' property.
- Engagement in any activity that creates a conflict of interest or appearance of the same, or that jeopardizes the integrity of Owners or Contractor (including but not limited to providing gifts and gratuities to Owners' employees).

- Posting in any social media forum (Facebook, Twitter, blogs, etc.) or communicating in any other public setting in a manner that does not constitute protected speech and violates any of the provisions of this Agreement, regardless of whether those postings or communication are made using Owners resources, Contractor resources, or any Personnel's resources, during or outside of work hours. Examples include, but are not limited to, divulging Protected Information or making harassing or discriminating statements about, or directed at, employees or customers of Owners or its Affiliates. No Personnel will imply or in any way indicate that he/she speaks on behalf of Owners or its Affiliates in any social media forum or any other public setting. Owners reserve the right to monitor all communication made by Contractor's Personnel on Owners' equipment, including laptops, cellular telephones, and portable computing devices (e.g., Blackberry, Smart Phones) and Contractor's Personnel have no reasonable expectation of privacy in such communications. Owners' right to monitor includes, but is not limited to, the right to archive, store, and forensically recover electronic communications on Owners' equipment.

32.2 Compliance with Required Behavior Standards. Contractor shall communicate these required behavior standards to its Personnel and Subcontractors and their Personnel and shall promptly dismiss, or cause its Subcontractors to dismiss, any individual who has violated these standards. Contractor and its Subcontractors shall inform their Personnel that they will maintain a "no tolerance" policy for violation of the required behavior standards. In the event that a Subcontractor or its Personnel violates these behavior standards, Contractor shall require such Subcontractor to promptly institute an educational program designed to raise awareness of and conformity to these behavior standards. In the event that a Subcontractor fails to institute the educational program within thirty (30) Days of notice from Contractor, or there are repeated violations of these standards by such Subcontractor or its Personnel, at Owners' request, Contractor will take prompt action to terminate the applicable Subcontract. If Contractor or any of its Personnel observes an employee of Owners or any of their Affiliates doing, or is ever asked by such an employee to do, something considered to be unethical, illegal, or in violation of these behavior standards, Contractor shall notify Owners' management immediately or call Workplace Ethics at (1-800-754-9452) or such other number as directed by Owners.

## ARTICLE 33

## NON-ENGLISH SPEAKING CONTRACTOR WORKERS

33.1 Provision of English Speaking Personnel. Contractor shall at all times assure that an English speaking representative of Contractor is provided for non-English speaking Personnel and Subcontractors. The English speaking representative must have the ability to communicate with and translate the foreign language of all non-English speaking Personnel and Subcontractors to assure that the ability to communicate vital information is readily available. If the non-English speaking Personnel or Subcontractors are divided into work groups, it shall remain the responsibility of the Contractor that an English speaking representative of Contractor is provided so as to assure that the ability to communicate vital information is still readily available to all non-English speaking Personnel and Subcontractors.

33.2 Translations. Contractor represents and warrants that it has communicated and translated to its non-English speaking Personnel and Subcontractors including all information and training required by applicable Law and all other safety and health requirements, in addition to all job related duties. These requirements include but are not limited to OSHA, the Contractor’s safety program, the contract documents including contract safety requirements, any relevant manufacturer’s information such as Material Safety Data Sheets, and the specific project safety plan for the work to be performed for Owners, in addition to any relevant hazards and special site conditions that Owners have notified Contractor may be encountered by Contractor and or its Personnel or Subcontractors.

33.3 Notice. In the event that Contractor or a Subcontractor will cause Non-English Speaking Personnel or Subcontractors to be engaged in Work at the Site subject to Owners’ Part 26 Fitness for Duty program, Contractor shall provide written notice to Owners at least thirty (30) days prior to the arrival of the Non-English Speaking Personnel or Subcontractors at the Site.

33.4 Limitations for Certain Access and Screening Requirements. This Section 33.4 applies only to personnel for whom Contractor requests screening pursuant to Article 29 or to whom 10 C.F.R. Part 26 Subparts A through H, N, and O would apply in the performance of their duties. Certain aspects of the screening process required by applicable Law are only available in English as of the Effective Date. Nothing in this Article 33 limits Owners’ rights pursuant to Articles 29 and 30 with respect to any access or fitness for duty determination.

## ARTICLE 34

## BENEFITED PARTIES

Contractor understands and agrees that GPC is entering into this Agreement not only for its own benefit but also and equally for the direct benefit of Owners. By agreement, SNC has the right and obligation to construct, operate and maintain generating plants, which are owned jointly by GPC and the other Owners, and SNC has the right to enter into agreements for exercising said rights and performing said obligations. As their interests appear, it is further agreed that each and every right, benefit and remedy accruing to GPC likewise accrues to the Owners including but not limited to the right to enforce this Agreement in their own name or names. Notwithstanding the foregoing, as between GPC, Owners, and Contractor, GPC shall remit (on behalf of Owners) all payments to Contractor hereunder, and Contractor shall submit all invoices to GPC for payment. Owners represent that Owners are the sole present owners (subject to mortgage indentures) of the Facility to which the Work relates and that GPC is authorized to bind, and does bind, all present Owners to the terms of this Agreement including the limitations of liability set forth in this Agreement. In the event that any other entity obtains any ownership interest in a facility for which the Work is performed, then Owners agree to bind such entity to such limitations of liability.

## ARTICLE 35

## QUALIFICATIONS AND PROTECTION OF ASSIGNED PERSONNEL

35.1 Contractor's Personnel . Contractor shall comply with applicable labor and immigration Laws that may impact Contractor's Work under this Agreement, including the Immigration Reform and Control Act of 1986 and Form I-9 requirements, by performing the required employment eligibility and verification checks and maintaining the required employment records as included therein. By providing an employee of Contractor or a Subcontractor to engage in any portion of the Work under this Agreement, Contractor warrants and represents that it has completed the screening measures described in this Section 35.1 with respect to such employee, if applicable, and that such screening measures did not reveal any information that could adversely affect such employee's suitability for employment or engagement by Contractor or Subcontractor or competence or ability to perform duties under this Agreement. If in doubt as to whether a suitability, competence or ability concern exists, Contractor shall discuss with Owners the relevant facts of such situation and Owners will determine, in their sole discretion, whether such Person should be allowed to perform any of the Work. Owners, in their sole discretion, shall have the option of barring from the Site any Person whom Owners determine does not meet the qualification requirements set forth above. In all circumstances, Contractor shall ensure that the substance and manner of any and all screening measures performed by Contractor pursuant to this Section conform to applicable Law. Owners shall have the right to bar from the Site any Person employed or engaged by Contractor, its Personnel or an Invitee who engages in misconduct or is incompetent or negligent in the Owners' sole judgment while on the Site or while performing Work, or whom Owners have previously terminated for cause or otherwise dismissed or barred from the Site. Upon request of Owners, Contractor shall immediately remove those Persons to whom Owners object from the Site and shall not allow the further performance of Work by those Persons. In addition, in the event that Contractor learns of any such misconduct, incompetence or negligence independent of Owners' objection, Contractor shall remove such Persons from the Site, shall not allow any further performance of Work by such Persons and shall promptly notify Owners of such misconduct, incompetence or negligence and the actions taken by Contractor as a result thereof. Any cost for replacement of such Persons removed by Contractor pursuant to the preceding sentence shall be at Contractor's expense.

35.2 Respirator Protection . For any Work at the Site that may expose any of Contractor's Personnel or Invitees to sources of radiation or require them to wear respiratory protection, Contractor shall require each of these Persons, prior to entering any radiation area or wearing respiratory protection, to undergo a physical examination to determine if occupational radiation exposure or the wearing of respiratory protection should be avoided because of any medical condition or other circumstance, and in addition, to undergo such physical examination as may be required by applicable Law or by a Government Authority having jurisdiction. Contractor shall keep a record of such physical examinations available for inspection by Owners as permitted under applicable Law. Owners will assist Contractor in defining the applicable requirements, if requested.

## ARTICLE 36

## RECORDS AND AUDIT

36.1 Technical Documentation. Except to the extent applicable Laws require a longer retention, Contractor shall maintain and shall cause its Subcontractors to maintain Work records for a period of three (3) years after Final Completion or such longer period as required by applicable Laws.

36.2 Accounting Records. Except to the extent applicable Laws require a longer retention, Contractor shall maintain and shall cause its Subcontractors to maintain complete accounting records relating to the Work performed or provided under this Agreement including all Reimbursable Costs in accordance with generally accepted accounting principles in the United States, as set forth in pronouncements of the Financial Accounting Standards Board (and its predecessors) and the American Institute of Certified Public Accountants, for a period of seven (7) years after Final Completion or such longer period as required by Law, except that records relating to Sales Taxes for such items must be retained for seven (7) years as specified in Section 36.5.

36.3 Maintenance of Records Generally. Notwithstanding anything in Section 36.1 or 36.2 to the contrary, Contractor shall ensure to the extent required that its maintenance of records complies with the applicable provisions of 10 C.F.R. § 50.71 and other applicable Laws, including, but not limited to, NRC regulations, until such time Contractor delivers such records to Owners in accordance with this Agreement.

36.4 Right to Audit. If Owners request verification of Reimbursable Costs or any other amounts payable or invoiced under this Agreement, Owners or Owners' independent auditor shall be entitled to examine and audit Contractor's records and books related to such amounts and provide a report to Owners. Such audit will be conducted during business hours and provide each Owner with a reasonable opportunity to verify that all costs and charges have been properly invoiced and requested in accordance with the terms of this Agreement. Notwithstanding anything in this Agreement to the contrary, Owners shall not be entitled to audit any information that would enable Owners to determine the make-up of any lump sum, or any fixed or established amounts, rates or multipliers permitted under this Agreement (other than escalation indices). If an audit by the auditor demonstrates that amounts paid by Owners to Contractor were incorrectly charged, then Owners shall be entitled upon demand to a refund from Contractor of such over-charges plus interest since the date of payment of the over-charges at a rate equal to the Prime Rate plus two percent (2%). Any such refunds owed by Contractor to the Owners may be offset by the Owners from any amounts otherwise payable to Contractor at any time.

36.5 NRC. Notwithstanding anything in this Agreement to the contrary, Owners shall not be restricted from any audit rights that they are required to have in order to comply with applicable Laws, including without limitation the requirements of the NRC.

36.6 Sales Tax Records. Contractor shall fully cooperate with Owners in connection with the reporting of (a) any Sales Taxes payable with respect to the Work and (b) any assessment, refund, Claim or proceeding relating to Sales Taxes payable with respect to the Work. Contractor shall use commercially reasonable efforts to require its Subcontractors to provide to Contractor the information and data Contractor may reasonably request for purposes of complying with this Section and otherwise fully cooperate with Owners. Contractor shall retain, and shall require its Subcontractors to retain, copies of such documentation and the documentation concerning purchases relating to the Work or the payment of Sales Taxes, if any, for a period of not less than seven (7) years. Contractor shall use commercially reasonable efforts to ensure that its contracts with Subcontractors effectuate the provisions of this Section. Contractor's obligations under this Section shall survive the termination, cancellation or expiration of this Agreement for any reason and shall last so long as is necessary to resolve matters regarding Taxes attributable to the Work. The costs incurred in complying with this Section shall be Reimbursable Costs.

36.7 Acknowledgement of Owners' Co-ownership Agreements . Contractor acknowledges that pursuant to the Ownership Agreement and the Development Agreement, each of the Owners has informational and audit rights relating to the development, planning, design, licensing, acquisition, construction, completion, startup and commissioning of the Units and the associated costs to be shared among the Owners. Those rights include audits of the performance of Georgia Power Company, as agent for the other Owners, the provision of relevant information to the Owners relating to the development, planning, design, licensing, acquisition, construction, completion, startup and commissioning of the Units, and audits of Georgia Power Company or Southern Nuclear of the costs associated with the Units which are charged to or paid by the Owners. Contractor shall cooperate with Southern Nuclear, Georgia Power Company and the other Owners and their representatives in connection with these informational and audit rights, and will upon request by Georgia Power Company or Southern Nuclear provide information relating to this Agreement and Contractor's performance hereunder, to the extent that Owners are entitled to such information pursuant to the other provisions of this Agreement.

## ARTICLE 37

## TAXES

37.1 Sales Tax .

37.1.1 Contractor and Subcontractor expenses to comply with nonresident contractor sales tax bond and nonresident subcontractor bonds prescribed by Ga. Code Ann. § 48-13-31 and Ga. Code Ann. § 48-8-63 shall be reimbursed by Owners. Expenses include, but are not limited to application fees, annual surety bond costs, and bond termination fees.

37.1.2 For the avoidance of doubt, Taxes, including Sales Tax on Plant Equipment and Materials procured by Owners and provided to Contractor and its Subcontractors for incorporation into the Facility are for the account of Owners. Taxes, including Sales Tax, on Contractor (and its subcontractors) Construction Equipment, Construction Materials and indirect materials are payable by Contractor (and its subcontractors), and shall be reimbursed by Owners pursuant to Section 7.1.1(vi).

37.2 Property Tax .

37.2.1 Property Tax shall mean ad valorem taxes imposed on real and business personal property, and construction work in process.

37.2.2 Property Tax assessments of Contractor and its Subcontractors as they pertain to the Work shall be reimbursed by Owners to Contractor.

37.3 Cooperation and Audit .

37.3.1 Owners and Contractor shall, and Contractor shall cause each Subcontractor to cooperate in good faith with each other, and use their commercially reasonably efforts to minimize sales or use relating to this Agreement and the Work, including taking advantage of applicable exemptions and consulting and cooperating in good faith with each other in order to effectively handle and contest any audit, examination, investigation, or administrative, court or other proceeding. In connection therewith, Contractor shall, and shall cause its Subcontractors to, assign to Owners its rights to any refund of Sales Tax, Property Tax, or other Taxes which have been paid or reimbursed by Owners in order to enable Owners to contest the determination of taxability and recover any overpayment of such Taxes. Contractor shall grant or cause to be granted to, and shall cause its Affiliates and Subcontractors to grant to, Owners or Owners' representatives (subject to appropriate non-disclosure agreements being signed) access at all reasonable times during the course of the Work and thereafter until the later of thirty days following the expiration of the applicable statute of limitations or the resolution of any Claim in respect of Sales Tax and Property Tax to all of the information, books, and records relating to Sales Tax and Property Tax matters pertaining to the Work within their respective possession or control, and shall make their respective employees and agents available on a mutually convenient basis in order to answer questions regarding such books and records. Contractor shall also furnish or cause to be furnished to Owners or Owners' representatives the assistance and cooperation of personnel of Contractor, its Affiliates, and Subcontractors, as Owners may reasonably request in connection with such Tax matters.

37.3.2 Provided that Owners have timely performed their obligations under this Article, Contractor shall defend, indemnify and hold harmless the Owners and Owners' Interests from and against any liabilities arising or resulting from Contractor's or any Subcontractor's failure to (a) make any payment of Sales Tax, Property Tax, or other Taxes, interest or penalties when due, (b) comply with reporting or return filing obligations, and/or (c) provide or obtain the necessary information or exemption forms to or from its or their respective Subcontractors, or otherwise comply with the requirements of any applicable exemption from Taxes.

37.3.3 Owners shall be responsible for and shall indemnify, defend and hold harmless Contractor and Contractor Interests from and against any Taxes, interest or penalties imposed on any of the foregoing and that arise as a result of inaccuracies or omissions from executing Owners' tax minimization strategy.

37.3.4 Owners shall reimburse Contractor with respect to the defense of any Claim or assessment related to Sales Tax, Property Tax, or other Taxes for which Owner is liable hereunder in respect of the Work. Consistent with other notice provisions in this Agreement, Contractor shall notify Owner in writing of any audit or assessment of Contractor by a Taxing Authority covering Sales Tax, Property Tax, or other Taxes where Contractor has the right to be indemnified.

## ARTICLE 38

## DISPUTE RESOLUTION

38.1 Definition of Claim . A "Contract Claim" is a written demand or assertion by one of the Parties submitted to the other Party seeking, as a matter of right, adjustment or interpretation of Agreement terms, payment of money, adjustment to the Target Completion Date(s), adjustment to the Target Construction Cost, or other relief with respect to the terms of this Agreement. The term “Contract Claim” also includes other disputes and matters in question between Owners and Contractor arising out of or relating to this Agreement (including the breach, termination or validity thereof, and whether arising out of tort or contract).

38.2 Pre-DRB Process. Prior to submitting any Contract Claim for dispute resolution, the Parties will exchange written positions regarding the dispute and senior officers shall meet in person or telephonically to attempt to resolve the dispute. Upon mutual agreement, the Parties will submit disputes to non-binding mediation prior to initiating the dispute resolution board (“DRB”) process set forth in this Article. Pending a determination from the DRB as provided below, Contractor shall proceed diligently with the performance or provision of the work that is the subject of the Contract Claim and all of its other duties and obligations under this Agreement.

38.3 Submittal to DRB. All Contract Claims not resolved by the Parties per Section 38.2 shall be submitted to and decided by the three-member DRB established pursuant to the DRB procedures set forth in Exhibit U. The DRB members shall each be mutually agreeable to the Parties. Upon any vacancy on the DRB, the Parties shall endeavor to agree on a replacement member promptly in accordance with the DRB procedures, notwithstanding whether any Contract Claim then is pending.

38.4 Commencing Dispute Resolution. Either Party may commence the DRB hearing process by providing written notice of the dispute to the other and to the members of the DRB, as provided in the DRB procedures. The initiating Party shall indicate whether the Regular Hearing or Expedited Hearing process is requested. The other Party shall note any objection to the requested process in writing within 5 Business Days of receiving such notice. Any disagreement as to whether the Regular or Expedited Hearing process is applicable to the dispute shall then be determined within 10 Days by the DRB Chair, in accordance with the terms of this Agreement.

38.5 Initial DRB Conference. Within the applicable period set forth in the DRB procedures, the DRB shall hold a telephone conference with the Parties to discuss the Contract Claim and to agree on the hearing date, duration, and the applicable pre-hearing deadlines. The DRB may establish additional procedures and otherwise conduct the dispute resolution process in such manner as it deems appropriate to assure an expeditious and fair resolution of the Contract Claim.

38.6 DRB Hearing Location. Unless otherwise agreed by the Parties, the DRB shall convene all hearings either at the Site or in Atlanta, Georgia.

38.7 Effect of DRB Determination. The written determination of the DRB is binding on the Parties to the extent provided herein, and any remedy contained in such determination shall be implemented and paid within 45 Days of such determination, without prejudice to subsequent arbitration as provided herein. An arbitration solely to compel a Party to comply with the determination of the DRB may be commenced any time after such 45 Day period. The DRB determination itself is subject to further challenge via arbitration which may be initiated by either Party following a determination of the DRB, but only in accordance with the requirements set forth below.

38.7.1 Where either (a) the Contract Claim(s) relate to the withholding or non-payment of Reimbursable Costs (whether such Contract Claim(s) are related or not) and the cumulative value of Reimbursable Costs in dispute exceeds [***], or (b) one or more Contract Claims relating to a single or closely-related series of events or contractual interpretation disagreement involve an aggregate amount in dispute exceeding [***], the Parties may initiate arbitration seeking to overturn the DRB's determination within 45 Days from the date of such determination.

38.7.2 In all other cases (including a dispute within Section 38.7.1 as to which no arbitration is initiated per that Section), the Parties may only initiate arbitration to challenge the DRB's determination within the 60 Day period following achievement of Mechanical Completion of Unit 4. For DRB determinations rendered after such Mechanical Completion date, any arbitration to challenge the DRB's determination must be initiated within 60 Days following such determination.

38.7.3 If no arbitration has been initiated with respect to a Contract Claim within the applicable time periods set forth above, the DRB's determination shall be final and binding in all respects. Judgment thereon may be entered by any court having jurisdiction thereof, and such DRB determination shall be entitled to treatment as a final award rendered in a duly constituted and conducted arbitration in accordance with the provisions of the U.S. Arbitration Act, 9 U.S.C. Section 1, et seq.

38.7.4 For purposes of determining the aggregate amount in dispute as specified in Section 38.7.1(b), the amount associated with all Contract Claims stemming from a single or closely-related series of events or contractual interpretation disagreement shall be added together, but unrelated Contract Claims may not be added together so as to exceed the threshold amount set forth in Section 38.7.1(b). As a special case, it is agreed that all Contract Claims relating to the Subcontract Scope Alignment Process will be considered as stemming from a single or closely-related series of events. If the Parties do not agree on the aggregate amount in dispute for these purposes, the determination of the DRB regarding the aggregate amount in dispute will be final and binding on the Parties.

38.7.5 Pending a final arbitration award overturning or modifying a DRB determination, all DRB determinations will be binding on the Parties and implemented in all respects in good faith.

38.8 Arbitration. Subject to the provisions and time limits of Section 38.7, any dispute arising out of or relating to this Agreement, including the breach, termination or validity thereof, shall be finally resolved by arbitration in accordance with the International Institute for Conflict Prevention and Resolution Rules for Non-Administered Arbitration by three arbitrators, of whom each Party shall designate one in accordance with Rule 5.1. The arbitration shall be governed by the Federal Arbitration Act, 9 U.S.C. §§ 1 et seq., and judgment upon the award rendered by the arbitrator(s) may be entered by any court having jurisdiction thereof. The place of the arbitration shall be Atlanta, Georgia. The arbitration shall consider the Contract Claim(s) involved de novo, provided that the applicable DRB Determination(s) respecting such Contract Claim(s) shall be admissible in evidence and given such weight as the arbitrators may determine.

38.9 Court Proceedings . Notwithstanding anything in this Article to the contrary, a Party may file a complaint, exclusively, in the U.S. District Court for the Southern District of Georgia for the limited purpose of seeking enforcement of the agreement to arbitrate set forth in this Article, or non-exclusively, for the purpose of seeking a judgment upon or enforcement of an arbitration award.

## ARTICLE 40

## MISCELLANEOUS

40.1 Assignment. Contractor shall not assign this Agreement in whole or in part without the prior written consent of Owners, which consent shall not be unreasonably withheld. Owners shall not assign this Agreement in whole or in part without the prior written consent of Contractor, which consent shall not be unreasonably withheld; provided, however, that (i) this Agreement may, upon prior written notice to Contractor, be assigned in whole by the Owners to the DOE without the prior consent of Contractor; and (ii) this Agreement may, upon prior written notice to Contractor, be assigned by the Owners to the Financing Parties for collateral purposes without the prior consent of Contractor. Except as set forth in this Section 40.1, any assignment of this Agreement by either Party, either by operation of law, order of any court, or pursuant to any plan of merger, consolidation or liquidation, shall be deemed an assignment by such Party for which prior consent is required, and any assignment made without any such consent shall be void and of no effect as between the Parties.

40.2 Non Waiver. The failure of either Party to enforce at any time any of the provisions of this Agreement shall neither be construed as a waiver of such provision nor in any way affect the validity of this Agreement or the right of either Party to enforce each and every provision.

40.3 No Implied Waiver. Unless otherwise expressly provided herein, no waiver by either Party of any provision hereof shall be deemed to have been made unless expressed in writing and signed by such Party.

40.4 Amendments. No waiver, modification, or amendment of any of the provisions of this Agreement shall be binding unless it is in writing and signed by duly authorized officer of each Party.

40.5 Survival. All provisions of this Agreement that expressly or by implication come into or continue in force and effect following expiration or termination of this Agreement shall remain in effect and be enforceable following such expiration or termination, including all provisions of this Agreement that much survive in order to give force and effect to the rights and obligations of the Parties under this Agreement.

40.6 Governing Law. The validity, construction, and performance of this Agreement shall be governed by and interpreted in accordance with the Laws of the State of Georgia, without giving effect to the principles thereof relating to conflicts of Laws.

40.7 Waiver of Jury Trial. EACH PARTY HEREBY IRREVOCABLY WAIVES ALL RIGHT TO TRIAL BY JURY IN ANY ACTION, PROCEEDING OR COUNTERCLAIM (WHETHER BASED ON CONTRACT, TORT OR OTHERWISE) ARISING OUT OF OR RELATING TO THIS AGREEMENT.

40.8 Independent Contractor. Contractor is an independent contractor and nothing contained herein shall be construed as creating (a) any relationship between Owners and Contractor other than that of owners and independent contractor, (b) any relationship whatsoever between Owners and Contractor's Personnel or (c) a fiduciary relationship between Contractor and Owners. Neither Contractor, nor any of its Personnel, are or shall be deemed to be employees of Owners.

40.9 Third Party Beneficiaries. Except as expressly set forth in this Agreement, the provisions of this Agreement are intended for the sole benefit of Owners and Contractor, and the Parties do not intend to create any other third party beneficiaries or otherwise create privity of contract with any other Person.

40.10 Rights Exclusive. The rights and remedies of Owners or Contractor as set forth in this Agreement shall be the exclusive rights or remedies of the Parties. The limitations of liability, indemnities, extension of insurance coverages and other liability protection provided herein for the benefit of Contractor and Owners shall also apply for the benefit of Contractor Interests and Owner Interests and shall apply to the maximum extent permitted by Law, irrespective of the basis of such claim, whether arising at contract (including breach warranty, indemnity, etc.), tort or otherwise, and regardless of the fault, negligence or strict liability.

40.11 Severability. If any provision of this Agreement or the application of this Agreement to any Person or circumstance shall to any extent be held invalid or unenforceable by a court of competent jurisdiction or arbitrators under Article 38, then (i) the remainder of this Agreement and the application of that provision to Persons or circumstances other than those as to which it is specifically held invalid or unenforceable shall not be affected, and every remaining provision of this Agreement shall be valid and binding to the fullest extent permitted by Laws, and (ii) a suitable and equitable provision shall be substituted for such invalid or unenforceable provision in order to carry out, so far as may be valid and enforceable, the intent and purpose of such invalid or unenforceable provision.

40.12 Entire Agreement. This Agreement contains the entire agreement and understanding between the Parties as to the subject matter hereof, and merges and supersedes all prior agreements, commitments, representations, writings and discussions between them with respect to the subject matter hereof. Except as provided in this Section 40.12, neither of the Parties will be bound by any prior obligations, conditions, warranties, or representations with respect to the subject matter hereof.

40.13 Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

40.14 Further Assurances. The Parties will execute and deliver such other instruments and documents, and take such other actions, as either Party reasonably requests to evidence or effect the transactions contemplated by this Agreement.

40.15 External Communications. Prior to issuing any external communications regarding the Facility, Contractor shall obtain Owners' prior written approval (approval not to be unreasonably withheld or delayed). Prior to issuing any external communications regarding the Facility which mention Contractor or any of its Subcontractors, Owners shall obtain Contractor's prior written approval (approval not to be unreasonably withheld or delayed).

## ARTICLE 41

## EXECUTIVE OVERSIGHT

41.1 Establishment of Committee. Within thirty (30) Days of the Effective Date, Owners and Contractor shall establish an executive oversight committee (the "Executive Oversight Committee"). The Executive Oversight Committee is not intended to be an approval body or a decision-making body but is intended to facilitate executive-level oversight of the performance of the Work and to provide a forum for discussion of significant issues and/or concerns which may arise in connection with the construction and completion of the Facility.

41.2 Appointment of Executive Sponsors.

41.2.1 The Executive Oversight Committee will be comprised of four (4) members ("Executive Sponsors"), two (2) of whom shall be appointed by Owners and two (2) of whom shall be appointed by Contractor. Each Party shall appoint its Executive Sponsors within fourteen (14) Days of the Effective Date, by giving written notice to the other Party. Each Party may replace either or both of its Executive Sponsors at any time by giving written notice to the other Party.

41.2.2 Unless otherwise agreed by Contractor, the Executive Sponsors appointed by Owners shall occupy board-level positions in GPC's organization. Unless otherwise agreed by Owners, the Executive Sponsors appointed by Contractor shall occupy board level positions in the organization of Contractor or Guarantor. No person shall be appointed as an Executive Sponsor if such person is involved in the day-to-day management of the Vogtle Units 3 and 4 project or any part thereof.

41.3 Meetings. The Executive Oversight Committee shall meet (either in person or by telephone) on a regular basis (no less frequently than quarterly), provided that any Executive Sponsor may request a meeting of the Executive Oversight Committee at any time to discuss a matter requiring urgent attention and the other Executive Sponsors shall make good faith efforts to participate in such meetings as requested.

**Exhibit A – Scope of Work / Division of Responsibilities**

Table of Contents

**Exhibit A – Scope of Work / Division of Responsibilities**

## 1. DEFINITIONS

" Core Scope " means each of the following scope items for each Unit:

(a) Containment building, shield building, auxiliary building, annex building, and turbine building;

(b) Each item of Contractor-Managed Subcontract Scope associated with the buildings listed in (a); and

(c) The provision of distributable services to support construction activities associated with the buildings listed in (a).

" Non-Core Scope " – means scope items not falling within the definition of Core Scope.

" Work Package " – means an assembly of documentation which describes a specific scope of Work and provides Construction Supervision with a concise package of information to accomplish that scope.

## 2. SCOPE OF WORK

### 2.1 Contractor's Scope of Work

Except as otherwise provided in the Agreement, Contractor's overall scope of Work is to complete the construction of Vogtle Units 3 and 4 which are two electric generating plants using the Westinghouse AP1000 design as described in the Owners' Updated Final Safety Analysis Report (UFSAR) as of September 30, 2017. Each Unit includes the following buildings and equipment:

- Containment building
- Shield building
- Auxiliary building
- Annex building
- Turbine building
- Diesel generator building
- Radwaste building
- Major equipment including the steam generators, reactor vessel, reactor vessel head, control rod drive mechanisms, main turbine, main turbine generator, turbine deaerator, reactor coolant pumps, containment vessel, cooling towers, main turbine condenser, reactor internals, main step-up transformers, pressurizer, diesel generators, feedwater pumps, circulating water pumps, polar crane, core makeup tanks, moisture separator reheaters, and other equipment and components
- Other balance of plant and yard buildings, equipment, and components

**Exhibit A – Scope of Work / Division of Responsibilities**

The scope of Work to be performed by Contractor and/or its Subcontractors will comprise the following activities:

a. All management of construction on the site and supporting offsite locations (e.g., warehouses), including Contractor's Project Manager, Site Manager, Construction Managers, Area/Building Managers, and Superintendents.

b. Engagement and management of all craft workers on the site.

c. Management of the Contractor-Managed Subcontract Scope.

d. Support of Work Package planning and scoping, preparation of Work Packages, and closeout of Work Packages as described in Section 4.1 below.

e. Field Procurement management for construction materials and equipment.

f. Management of Plant Equipment and Materials at the site including receipt and inspection, warehouse management (onsite and offsite facilities), material coordination/issuance, preventive maintenance, and asset preservation.

g. Management of the use of Owner-provided Construction Equipment and provision of new Construction Equipment as required by Section 4.1.8 of the Agreement.

h. Management of the use of construction utilities (power, water, etc.) provided by the Owners.

i. Quality Control for construction activities for which Contractor is responsible.

j. Construction Testing for which Contractor is responsible, as identified as Contractor's responsibility in Table 2 of Exhibit G, "Mechanical Completion."

k. Quality Assurance (QA) for Contractor's work activities including implementation of the Contractor's Quality Assurance Program which will use and take credit for the Owners' existing quality programs to the extent possible.

l. Develop program and plan for ASME NA and NPT certifications for performing activities governed by ASME Section III which will be integrated with the existing site ASME approach and implement the plan as directed by Owners.

m. Construction training for Contractor and Subcontractor personnel.

n. Site-wide construction safety program.

o. Management of facilities in support of construction as identified in Exhibit D, "Construction Site".

p. Document Control in support of Contractor's construction activities using the existing site systems.

q. Project Controls related to Contractor's Construction and other work activities, including planning and prioritization of Work activities.

r. Contract administration and support services as described in Section 13 below.

s. Transition activities as described in Section 3 below.

### 2.2 Not Included in Contractor's Scope of Work

The following construction-related scope does not form part of the Work:

a. Any Work performed under (1) "Legacy Work Packages" as of the Effective Date (as identified in Table 1 of Exhibit V, "Work Packages") or, (2) "Completed and Voided Work Packages" as of the Effective Date (as identified in Table 2 of Exhibit V);

b. Any Work performed before the Effective Date as part of work pursuant to "In-Progress Work Packages" (as identified in Table 3 of Exhibit V), or;

c. Any work performed or to be performed under Owner-Managed Subcontracts or the management or administration of such Owner-Managed Subcontracts.

## 3. TRANSITION ACTIVITIES

### 3.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Complete the transition of craft personnel with a target completion date of [***] Business Days after the Effective Date.

b. Complete the transition of field non-manual personnel with a target completion date of [***] Business Days after the Effective Date.

c. Complete the preparation and transition to interim programs, plans, manuals, and procedures for Construction; Quality Assurance; Quality Control; Welding; Environmental, Safety, & Health; Procurement & Subcontracts; Project Controls; Project Administration; and Information Technology with a target completion date of [***] Business Days after the Effective Date.

d. Complete the preparation and transition to full programs, plans, manuals, and procedures for Construction; Quality Assurance; Quality Control; Welding; Environmental, Safety, & Health; Procurement & Subcontracts; Project Controls; Project Administration; and Information Technology with a target completion date of [***] Business Days after the Effective Date.

e. Complete the preparation and transition of construction software tools with a target completion date of [***]Business Days after the Effective Date.

f. Complete the preparation of the program and plan for ASME NA and NPT certifications with a target completion date of [***] Business Days after the Effective Date.

### 3.2 Owners' Responsibilities

Owners' responsibilities include:

a. Ensure all necessary arrangements are in place to allow Contractor to operate under existing programs, plans, manuals, and procedures until completion of Contractor's transition activities identified above.

b. Support Contractor's transition activities identified above.

c. Review Contractor's programs, plans, and procedures, as applicable.

## 4. CONSTRUCTION

### 4.1 Work Packages

The division of responsibility between Owners and Contractor for Work Packages is provided in Table 1 (located on page 7).

### 4.2 Construction Management and Building/Area Management

#### 4.2.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Manage site-wide construction for the completion of Units 3 and 4, including the containment buildings, shield buildings, auxiliary buildings, annex buildings, diesel generator buildings, radwaste buildings, turbine buildings, balance of plant, and construction support.

b. Manage (and overall authority for) the development and execution of the field non-manual staffing plan, subcontracting plan for Contractor-Managed Subcontracts, labor strategy, construction execution plan, and jobsite work rules.

c. Implement and manage the Contractor's Environmental, Safety, & Health program as described in Section 6 below.

d. Lead interfaces with the building trades including jobsite labor relations and coordination with appropriate business agents.

e. Control jobsite expenditures for labor, construction, materials, and construction services.

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 1. Work Package Division of Responsibility | |
|---|---|
| **Responsibility** | **Description** |
| **1. Work Package Scoping and Planning** | |
| Owners | • Perform Work Package scoping and planning to support the Construction schedule, with support from Contractor, including:<br>- Define scope<br>- Identify design requirements and ITAAC<br>- Assemble Owners' Issued for Construction Documents (drawings, installation specifications, weld data sheets, etc.), Verification/Inspection Data Sheets, etc.<br>- Evaluate status of Plant Equipment and Materials, prepare material take-offs/material requests for Plant Equipment and Materials, clear material holds, and prepare Material Requisitions to ensure availability of material for Work Package execution.<br>• Prepare Work Package Scoping Document, issue for Contractor review, resolve Contractor's comments, issue final Work Package Scoping Document. |
| Contractor | • Support Work Package scoping and planning performed by Owners.<br>• Review Issued for Construction Documents focusing on constructability, perform constructability walkdowns, resolve comments with Owners.<br>• Review material take-offs, material requests, and Material Requisitions prepared by Owners for Plant Equipment and Materials and provide feedback on missing items, material holds, etc.<br>• Review Work Package Scoping Document prepared by Owners.<br>• Evaluate status of non-permanent plant materials and, as appropriate, prepare Material Requisitions to ensure availability of material for Work Package execution. |
| **2. Work Package Preparation** | |
| Contractor | • Based on the Work Package Scoping Document, prepare Work Package including construction work steps and sequencing, issue for Owners review, resolve Owners' comments, issue final Work Package. |
| Owners | • Review Work Package prepared by Contractor. |
| **3. Work Package Execution** | |
| Contractor | • Manage/control Work Package during installation.<br>• Perform inspections and signoffs in accordance with the requirements in the Work Package (i.e., Field Engineering inspections).<br>• Confirm that all work steps are completed and signed-off in the Work Package. |
| Owners | • Perform any inspections and signoffs identified for Owners in the Work Package.<br>• Provide support to Contractor as requested including review and approval of changes requested to Owners' Issued for Construction Documents. |
| **4. Work Package Closure** | |
| Contractor | • Close Work Package and enter into Owners' records management system. |
| **5. Owners' Oversight and Staffing** | |
| Owners | • Perform Owners' oversight of Contractor's Work Package activities. |
| Owners and Contractor | • Perform joint resource review on a quarterly basis and adjust planning resources based on the mutually agreeable results of the review. |

f. Establish and implement construction policies and procedures as appropriate.

g. Develop craft skills training and any testing as required (Section 4.7 below).

h. Coordinate jobsite activities in support of construction including actions of Contractor's personnel, subcontractors, suppliers, clients, and their representatives.

i. Establish and implement construction schedules, methods, manning charts, and construction material and equipment requirements.

j. Develop plans and establish procedures to support meeting engineering designs and specifications set forth in Owners' Issued for Construction Documents.

k. Establish project field procedures and objectives within policies and procedures as necessitated by site conditions.

**4.2.2 Owners' Responsibilities**

Owners' responsibilities include:

a. Manage (and overall authority for) procurement of Plant Equipment and Materials, modules, and equipment in support of Construction.

b. Commercial administration of Contractor-Managed Subcontracts.

**4.3 Craft and Craft Supervision**

**4.3.1 Contractor's Responsibilities**

Contractor's responsibilities include:

a. Engage craft personnel in the appropriate discipline/trades to execute the planned work.

b. Implement screening to support the hiring of qualified individuals; check qualifications currently held; and provide the appropriate qualification/indoctrination/training to prepare each new employee for work assignment.

c. Review as part of the selection process qualifications and required leadership skills for the assignment of General Foreman/Foreman.

d. Provide craft supervision (superintendents) to lead the craft during field execution of the work with the following responsibilities:

  – Coordinate and interface with Field Engineering, Quality Control, Quality Assurance, Construction Area Managers, and others (as required) to support proper interface for activities that could affect construction.

- Provide leadership and day-to-day direction to support the completion of work activities in accordance with approved Work Packages, procedures, budgets, and schedules.
- Provide resource loading needs by discipline, plan field work based on scheduled activities (manpower, materials, equipment, tools, etc.).
- Communicate applicable plan-of-the day and schedule information to General Foreman.
- Perform constructability reviews.
- Review Work Packages to check required sign offs are up to date with status of work.
- Manage productivity and performance in assigned area, communicate issues preventing/hampering work progress to the Area Manager, and mentor General Foreman and Foreman on the correct manner of work execution and leadership in the field.

#### 4.3.2 Owners' Responsibilities

Owners' responsibilities include:

a. Engage craft labor and craft supervision for any work performed under Owner-Managed Subcontracts.

### 4.4 Quality Control

#### 4.4.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Provide leadership and direction of the Quality Control organization consistent with Construction provided schedules and priorities.

b. Implement and maintain the Contractor's Quality Control program providing independent verification of safety-related and augmented quality structures, systems, and components (SSCs).

c. Administer the nonconforming item control system.

d. Perform inspections, witness testing activities, and provide surveillance of onsite installations and fabrications.

e. Perform surveillance and inspections of housekeeping and material storage and handling.

f. Perform independent first line inspection of Contractor's work and surveillance of work performed by Subcontractors with an approved Quality Assurance (QA) program.

g. Perform material receiving inspection of safety-related and augmented quality SSCs.

h. Administer the program for control and issue of Measuring & Testing Equipment.

i. Review and approve Work Packages prior to implementation for compliance with the Quality Control program, identification of witness and hold points, and inclusion of proper quality documentation.

j. Perform closure reviews of Work Packages for completion of all required quality verifications.

l. Coordinate daily with Construction Management, Field Supervision, Field Engineering, and Procurement and Subcontracts to provide Quality Control support where needed.

m. Initiate stop work orders for activities not properly controlled in accordance with Contractor's QA Program. Escalate unresolved quality issues to Contractor's Quality Assurance group.

#### 4.4.2 Owners' Responsibilities

Owners' responsibilities include:

a. Identify Owners' witness/hold points and required inspections (see Section 4.1 above for Field Engineering-Work Packages).

b. Overall project Quality Assurance responsibility including oversight, audits, surveillances, etc.

c. Perform Owners' oversight of Contractor's Quality Control activities.

### 4.5 Construction Material, Tools, Equipment, and Consumables

#### 4.5.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Generate material requests (for Plant Equipment and Materials) and field procurement requests (for non-permanent plant material, consumables) in support of the construction execution schedule as appropriate.

b. Prepare material requisitions (Store Room Requests) to initiate material issuance to Construction.

c. Obtain materials from the warehouse and/or arrange for delivery to designated staging locations.

d. Coordinate and control construction material laydown and/or temporary storage locations.

e. Plan, coordinate, withdraw, control/maintain tools (including measurement & test equipment) and equipment required for construction execution.

f. Manage and operate all large common use Construction Equipment (e.g., cranes, heavy haul equipment, large trucks, etc.) to facilitate construction evolutions (to be managed by the Construction Support Group, see Section 4.6 below).

g. Implement and maintain a preventive maintenance program and asset preservation program, in conjunction with the Owners, and in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners. For ASME Section III items, turnover to the Owners is accomplished upon transition from ASME Section III to ASME Section XI programs.

h. Provide craft supervision and craft personnel to support the preventive maintenance program and asset preservation program until care, custody, and control has been turned over to the Owners.

### 4.5.2 Owners' Responsibilities

Owners' responsibilities include:

a. Generate requisitions for Plant Equipment and Materials.

b. Commercially administer all Owner-Managed Subcontracts for subcontractor supplied material, tools and equipment.

c. Commercially administer all Owner-Managed purchase orders for leased material, tools, and equipment.

d. Payment under all Contractor-Managed Subcontracts.

e. Provide the processes, tools, and personnel to implement the preventive maintenance program and asset preservation program in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners.

f. Establish, implement, and maintain the preventive maintenance program and asset preservation program for all Plant Equipment and Materials after care, custody, and control has been turned over to the Owners.

g. Provide Construction Equipment in good working condition.

## 4.6 Construction Support and Fabrication

### 4.6.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Manage all construction support resources and facilities including cranes and other common use Construction equipment, survey services, scaffold, construction support facilities, and the batch plant.

b. Except for Owner-Managed Subcontractors, manage all fabrication facilities (fabrication shops, module assembly building, satellite fabrication areas); provide craft and supervision and/or manage Contractor-Managed fabrication subcontractors, as applicable.

c. Determine and manage priorities associated with the deployment of construction support resources.

d. Implement and maintain a preventive maintenance program and asset preservation program, in conjunction with the Owners, and in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners. For ASME Section III items, turnover to the Owners is accomplished upon transition from ASME Section III to ASME Section XI programs.

e. Provide craft supervision and craft personnel to support the preventive maintenance program and asset preservation program until care, custody, and control has been turned over to the Owners.

### 4.6.2 Owners' Responsibilities

Owners' responsibilities include:

a. All work performed under Owner-Managed Subcontracts.

b. Provide the processes, tools, and personnel to implement the preventive maintenance program and asset preservation program in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners.

c. Establish, implement, and maintain the preventive maintenance program and asset preservation program for all Plant Equipment and Materials after care, custody, and control has been turned over to the Owners.

d. Manage facilities identified as Owners' scope in Exhibit D, "Construction Site".

e. Provision of construction utilities (power, water, etc.).

### 4.7 Construction Training

#### 4.7.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Perform all craft indoctrination training on Contractor's Environmental, Safety, and Health processes.

b. Perform all craft skill/proficiency training.

c. Coordinate in-processing needs and timing with Owner.

#### 4.7.2 Owners' Responsibilities

Owners' responsibilities include:

a. Perform all in-processing and site security, including fitness for duty.

b. Perform all Owner required training for access to the Vogtle site.

### 4.8 Construction Completion

#### 4.8.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Establish and manage a Construction Completion Group which will facilitate and coordinate completion of physical construction and construction testing required for turnover from Construction to Owner Startup/Commissioning. Contractor's Construction Contractor's construction testing responsibilities are identified in Table 2 of Exhibit G, "Mechanical Completion."

b. Oversee turnover of systems/subsystems/components from Construction to Owners' Startup/Commissioning.

c. Serve as the interface between Scheduling, Design Engineering, Construction, Planning, Closeout, and other organizations.

#### 4.8.2 Owners' Responsibilities

Owners' responsibilities include:

a. Coordinate with Contractor's Construction Completion Group to support turnover of systems/subsystems/components from Construction to Owners' Startup/Commissioning.

b. Review and closeout of "Legacy Work Packages."

c. Perform Construction Testing identified as Owners' responsibility in Table 2 of Exhibit G, "Mechanical Completion."

### 4.9 Other Construction Work Activities

#### 4.9.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Manage the construction scope of Contractor-Managed Subcontracts using Contractor Subcontract Technical Representatives as described in Section 8 below.

#### 4.9.2 Owners' Responsibilities

## 5. QUALITY

None.

### 5.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Implement Contractor's Nuclear QA program to cover Contractor's Construction activities integrated with Owners' overall QA program to the extent possible.

b. Develop and maintain a Contractor project quality oversight plan to facilitate QA oversight.

c. Plan and conduct QA audits and surveillances of Contractor's Construction activities to review effectiveness and implementation of Contractor's QA Program. Participate in joint Owner-Contractor audits where possible.

d. Identify quality problems, initiate documented action leading to solutions, and review implementation of solutions.

e. Qualify and certify Contractor's QA lead auditors, auditors, and technical specialists participating in Contractor's QA audit and surveillance program.

f. Upon approval to proceed, acquire and maintain Vogtle Units 3 & 4 site extensions of Contractor's corporate ASME NA and NPT-Certificates of Authorization.

g. Upon approval to proceed, obtain Authorized Inspection Agency services for ASME Section III-related activities.

h. Qualify and certify Contractor's Supplier Quality lead auditors, auditors, and inspection personnel participating in Contractor's supplier qualification activities.

i. Implement Owners' Corrective Action Program (CAP) for Contractor's Construction activities and incorporate Owners' CAP into the Contractor's Quality program.

j. Implement Contractor's People-Based Quality Program.

k. Assist Owners' QA with regulatory interface, as required.

l. Take stop work action when warranted.

m. Incorporate Owners' processes and procedures into Contractor's QA program as directed by Owners for common site-wide project work processes (e.g., CAP, as noted above; control of site-wide procedures; records retention using Owners' document management system; and others at Owners' discretion).

### 5.2 Owners' Responsibilities

Owners' responsibilities include:

a. Overall project QA responsibility including oversight, audits, surveillances, etc.

b. Qualification of Contractor as an approved supplier to Owners.

c. Regulatory interface.

d. Overall project CAP for site issue management.

e. Notify Contractor of quality issues identified by Owners related to Contractor's Construction activities.

f. Delegation of work to Contractor for performance under Contractor's QA program.

g. Identification of other common, site-wide Owner processes and procedures for incorporation into Contractor's QA program.

## 6. ENVIRONMENTAL, SAFETY, & HEALTH

### 6.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Implement an Environmental, Safety, & Health (ES&H) program, including a site-wide Safety program, which will include plans/procedures for safe, healthy, and environmentally sound work execution.

b. Manage ES&H rewards and recognition program.

c. Manage medical services subcontractor and medical facilities (onsite and offsite).

d. Manage work related illness/injuries of Contractor personnel, craft personnel, and Contractor-Managed Subcontractor personnel.

e. Manage Emergency Response Team (full-time subcontractor and/or volunteer craft supervision/nonmanual/craft team) including training and equipment purchase and upkeep.

f. Monitor and audit safety and health vendors and subcontractors.

g. Perform assessments and audits.

h. Perform ES&H related regulatory, leadership, and orientation training.

i. Perform Industrial Hygiene services, subcontract specialty services as appropriate, and monitor subcontractor adherence to industrial hygiene scope-specific procedure(s).

j. Coordinate with the Owners' Environmental program for the performance of delegated environmental field compliance inspections, maintenance of environmental compliance logs (e.g., waste, spill/release, combustion equipment), sampling efforts (air, water, waste), safety data sheet (SDS) review and control, management of waste generated by the Contractor and Contractor subcontractors, and coordinate data and reports necessary for regulatory reporting by the Owners per Table 2 (located on page 25).

k. Collaborate with the Owners concerning revisions to the Environmental plans and procedures.

l. Prepare weekly and monthly ES&H statistical reports.

m. Manage aspects of the work permit process (e.g., confined space) and audit permits managed by Construction.

n. Facilitate and manage the ES&H incident investigation process.

o. Facilitate safety committees, including the People Based Safety team.

p. Facilitate Construction/ES&H activity planning meetings.

q. Facilitate and manage open ES&H action reports/logs (input to closure).

r. Coordinate daily with Construction and Procurement and Subcontracts to provide ES&H support where needed.

s. Perform ES&H in-processing and any additional ES&H training as appropriate.

### 6.2 Owners' Responsibilities

Owners' responsibilities include:

a. Manage the Owner Controlled Insurance Program (OCIP).

b. Manage Environmental permitting, compliance, and related activities and perform Owners' environmental compliance activities identified in Table 2.

c. Manage work related injury/illnesses of Owners and Owner-Managed Subcontractors.

d. Support Occupational Health Plan implementation including coordination with OCIP, providing wellness resources, and providing lessons learned.

e. Review safety weekly and monthly statistical reports.

f. Monitor and audit Owner-Managed Subcontractors for compliance.

g. Participate, as appropriate, in Emergency Response team (e.g., office wardens, member of Incident Management Team, etc.).

h. Participate in ES&H activity planning meetings.

i. Participate, as appropriate, in safety committees, incident investigations, and rewards and recognition program.

j. Manage environmental permits and matrix, monitor and inspect environmental controls as appropriate.

k. Implement an ES&H program for areas and facilities controlled by the Owners and Owner-Managed Subcontractors as identified in Exhibit D, "Construction Site".

l. Perform Owners' oversight of Contractor's ES&H activities.

## 7. PROJECT CONTROLS

### 7.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Develop and manage Level 3 construction cost, schedule, and performance baselines which is part of the Project Integrated Level 3 Schedule.

b. Resource load the Level 3 Construction activities with craft resources (jobhours) to establish the Construction earnings plan.

c. Develop staffing plans for craft and field non-manual personnel based on schedule and performance baselines for Owner approval.

d. Develop commodity installation curves based on Level 2 schedule requirements and density restrictions for Owner approval.

e. Provide input to the Owners to establish performance measurement tools including rules of credit.

f. Input actual installation progress into EcoSys Quantity Unit Rate Report (QURR) performance measurement tools.

g. Audit timesheets for accuracy and make corrections where necessary.

h. Develop, manage, and maintain the Level 3 Project Schedule for construction activities in accordance with mutually-agreed Owners' construction scheduling guidelines.

i. Develop, manage, and maintain lower level schedules for construction activities as needed.

j. Incorporate schedules for Contractor-Managed Subcontracts into the Level 3 construction Project Schedule.

k. Identify construction need dates in the Level 3 construction Project Schedule for Owners' scope items including engineering, licensing, supply of Plant Equipment and Materials, etc.

l. Work with Owners to identify Work Package schedule information in the Level 3 construction Project Schedule as needed to support Work Package development and system turnover.

m. Resolve impacts in Level 3 construction critical paths and update Level 3 schedule.

n. Produce weekly and monthly reports and metrics for progress and performance including:

- Scorecard reflecting weekly production, productivity, and schedule performance at the unit/building/commodity level of detail.
- QURR reflecting detailed production and productivity at the cost account level.
- Provide input to Owners' bulk commodity curves installed versus plan.
- Provide input to Owners' schedule variance reporting.
- Provide input to Owners' schedule adherence reporting.
- Absenteeism and attrition.

o. Produce metrics for indirect craft versus budgeted staffing plans.

p. Produce metrics for non-manual actual versus budgeted plan.

q. Provide cost tracking for Construction Work including direct and indirect craft and field non-manual personnel.

r. Maintain a cost & commitment report for procurements and Contractor-Managed Subcontracts.

s. Forecast monthly expenditures.

t. Perform material/commodity quantification.

u. Recommend reporting requirements for Contractor-Managed Subcontracts for Owners' approval.

v. Assist in establishing scope, manhour, and cost estimates for Contractor-Managed Subcontracts.

w. Propose criteria for calculating construction percent complete for Owners' approval.

x. Identify construction trends and change management issues, and participate in the Owners' change control program.

y. Provide input to the Owner-maintained construction risk register.

z. Provide information to assist Owners in responding to requests from the Public Service Commission.

### 7.2 Owners' Responsibilities

Owners' responsibilities include:

a. Oversee overall project cost and schedule reporting.

b. Work with Contractor to develop mutually-agreeable construction scheduling guidelines.

c. Develop and maintain scheduling guidelines for other functions (e.g., engineering, licensing, etc.).

d. Review overall project controls guidelines for effectiveness and completeness.

e. Ownership of the integration of the Level 1, 2, and 3 Project Schedule.

f. Develop, manage, and maintain the Level 1 and Level 2 Project Schedule.

g. Develop, manage, and maintain the Level 3 Project Schedule for non-construction activities (e.g., engineering, licensing, ITAAC, startup, etc.).

h. Develop and issue 8-week lookahead Project Schedule with input from Contractor for the construction schedule.

i. Analyze impacts to Project Schedule from construction Level 3.

j. Review changes to the overall project cost and schedule.

k. Audit performance measurement reporting for accuracy.

l. Review risk and change process and register.

m. Prepare reports and respond to requests for information from the Public Service Commission.

n. Produce project reports and cost and schedule metrics including variance analysis, risk analysis, float management, schedule fidelity, earned value, and critical path.

o. Establish performance measurement tools with input from the Contractor and other functions on rules of credit.

p. Develop and maintain performance measurement reporting (cost and schedule).

## 8. FIELD PROCUREMENT AND SUBCONTRACTS

### 8.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Provide leadership and direction of the Field Procurement and Subcontracts organization consistent with Construction provided schedules and priorities.

b. Support the Subcontract Scope Alignment Process as a joint Contractor and Owner effort (see Article 3.2 and Exhibit E, "Subcontract Alignment Process and Managed Subcontracts").

c. Manage Contractor-Managed Subcontracts using Owners' procedures, processes, and tools and as appropriate obtain Owners' approval at pre-agreed levels for change orders.

d. For agreed to subcontracts, provide invoice review of Contractor-Managed Subcontracts or payment of Contractor issued Field Procurements.

e. Manage Plant Equipment and Materials both onsite and offsite, including receipt and inspection, warehouse/laydown yard management, material coordination/issuance; identify and segregate startup and operational spares and notify Owners for transfer.

f. Implement and maintain the Material Coordination Management/Process including setting priorities for purchases and field deliveries, coordinating with warehouse and Construction personnel to resolve material delay/issues, using the project schedule to identify material requirements and potential restraints, elevating critical issues to Construction and Project Management, and overseeing material staging areas within the construction area(s).

g. Implement and maintain a preventive maintenance program and asset preservation program, in conjunction with the Owners, and in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners. For ASME Section III items, turnover to the Owners is accomplished upon transition from ASME Section III to ASME Section XI programs.

h. Provide craft supervision and craft personnel to support the preventive maintenance program and asset preservation program until care, custody, and control has been turned over to the Owners.

### 8.2 Owners' Responsibilities

Owners' responsibilities include:

a. Procure all Plant Equipment and Materials.

b. Manage all Owner-Managed Subcontracts.

c. Support the Subcontract Scope Alignment Process as a joint Contractor and Owner effort (see Article 3.2 and Exhibit E, "Subcontract Alignment Process and Managed Subcontracts").

d. Payment under all Contractor-Managed Subcontracts.

e. Provide the processes, tools, and personnel to implement the preventive maintenance program and asset preservation program in accordance with Contractor's Quality Assurance Program and the site ASME Certificate Holder's Quality Assurance Program for all Plant Equipment and Materials stored onsite and in offsite warehouses until care, custody, and control has been turned over to the Owners.

f. Establish, implement, and maintain the preventive maintenance program and asset preservation program for all Plant Equipment and Materials after care, custody, and control has been turned over to the Owners.

g. Perform Owners' oversight of Contractor's Procurement and Subcontracts activities.

## 9. ENGINEERING

### 9.1 Contractor's Responsibilities

a. Review Issued for Construction documents received from Owners for constructability; seek to resolve constructability issues with Owners.

### 9.2 Owners' Responsibilities

Owners' responsibilities include:

a. Perform all Design Engineering and Resident Engineering.

b. Provide Issued for Construction Documents to Contractor.

## 10. PROJECT ADMINISTRATION

### 10.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Provide leadership and manage Work Package configuration including daily maintenance through final closeout to Owners consistent with the requirements of the Contractor's quality program.

b. Capture and manage records for Contractor's work activities through turnover to Owners using Owners' document management system, and related Owner processes and procedures incorporated into Contractor's QA program.

c. Coordinate and issue training records for all Contractor field non-manual personnel, manage completed training records and turnover to Owners.

### 10.2 Owners' Responsibilities

Owners' responsibilities include:

a. Maintain overall records management software to be used by the project.

b. Manage all records for Owners' work activities.

c. Perform Owners' oversight of Contractor's Document Control activities.

## 11. HUMAN RESOURCES

### 11.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Manage the Human Resources function.

b. Develop and maintain the Human Resources program and implementing policies and procedures.

c. Produce weekly and monthly metrics on standard Human Resources performance and measures such as retention, involuntary terminations, headcount, and time-to-fill positions.

d. Develop and manage a recruitment plan.

e. Provide on-boarding support including relocation, E-verify, and project security requirements.

f. Facilitate employee relations including the investigation and resolution of employee relations issues.

g. As requested by Owners, support Owners' investigations of employee concerns that are raised through the Owners' Employee Concerns program and fall within Contractor's scope of work.

h. Develop a discipline/termination policy for manual and non-manual employees to review the consistency of disciplinary actions which aligns with the policies and regulatory requirements of the Owners' program.

i. Identify programs and tools to develop, attract, and retain project talent.

j. Respond to regulatory agency requests and audits.

k. Develop a project Affirmative Action Plan and meet annual reporting requirements.

l. Provide new hire orientation to new project hires and transfers.

m. Coordinate a performance management program that includes goal setting, performance feedback, and compensation planning.

**11.2 Owners' Responsibilities**

Owners' responsibilities include:

a. Establish and maintain an Employee Concerns program.

b. Collaborate on the joint resolution of Human Resources issues that cut across company lines.

c. Notify Contractor of issues raised through the Employee Concerns program associated with Contractor's scope of work.

d. Perform Owners' oversight of Contractor's Human Resources activities.

## 12. INFORMATION, SYSTEMS, & TECHNOLOGY

### 12.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Implement and maintain Contractor's software tools used in support of the project.

b. Install and maintain Contractor's computers and related hardware at the site.

### 12.2 Owners' Responsibilities

Owners' responsibilities include:

a. Provide computers to Contractor personnel and continued access to the site software tools.

b. Provide Internet access for Contractor personnel to access Contractor's software tools.

c. Provide desk phones.

d. Provide printing and plotting hardware.

## 13. CONTRACT ADMINISTRATION AND SUPPORT SERVICES

### 13.1 Contractor's Responsibilities

Contractor's responsibilities include:

a. Provide Contractor's point of contact for Agreement administration and support Owners' project leadership.

b. Administer the Agreement with Owners.

c. Prepare and submit reports to Owners as required by the Agreement.

d. Prepare and submit invoices to Owners.

### 13.2 Owners' Responsibilities

Owners' responsibilities include:

a. Provide Owners' point of contact for Agreement administration.

b. Administer the Agreement with Contractor.

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| **1. ENVIRONMENTAL PROGRAM MANAGEMENT** | | | | |
| Environmental Management Plan | The environmental management plan describes the environmental program implementation strategy. | Primary | Support | Initial update upon contract execution and as needed thereafter |
| ND-EV-VNP-012 (Environmental Governance and Oversight of Construction Activities) | This document outlines the governance related to the Owners' oversight process to ensure the environmental program is implemented in compliance with the existing permits, rules and regulations. | Primary | None | |
| Program Specific Governance | Procedures and/or work instructions providing clear, concise instructions to the construction organization. Currently procedures are in place which may not be available for project use. | Primary | Support | Initial update upon contract execution and as needed thereafter |
| | | | | |
| **1.1 Title V Air Permit # 4911-33-0030-V-03-1** | | | | |
| Emission Source Installation Notification | EPD Notification for startup of each piece of permanent equipment regulated by Owners' Title V Air Permit # 4911-33-0030-V-03-1.7. Submitted within 120 days of startup. | Support | Primary | Upon installation of permitted source |
| Ultra-Low Sulfur Fuel Certifications from fuel suppliers *for Owners Title V* Air Permit # 4911-33-0030-V-03-1 *Permit* | Report provided by the fuel supplier(s) on company letterhead certifying fuel provided to the project contains less than 15ppm sulfur content. Certification is a permit condition requirement. Send report to Owners. | Support | Primary | Semi-Annual (Jan10 & Jul 10) |
| Equipment Preservation Check Record (EPCR) for Owners' Title V Air Permit # 4911-33-0030-V-03-1 [Preventative Maintenance activities on permanent plant equipment] | Inspection and Test of permanent emission sources. For certified engines, startup performance testing is not required. The Permittee shall not discharge or cause the discharge into the atmosphere from any gases which exhibit opacity equal to or greater than 40 percent. The PM Group maintains the engine & records the run time hours in log books. As each piece of equipment is added, coordination will be required to ensure compliance. | Support | Primary | Upon request |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| Title V Emissions Inventory for Owners Title V Air Permit # 4911-33-0030-V-03-1 | Log for every piece of permanent equipment regulated by Owners' Title V Air Permit # 4911-33-0030-V-03-1. The PM Group maintains the engine & records the run time hours in log books. As each piece of equipment is added, coordination will be required to ensure compliance. Submit monthly to VEGP 1&2 Environmental Specialist. | Support | Primary | Upon Install / Performance Testing |
| Fuel Burning Equipment | The Permittee shall not cause, let, suffer, permit, or allow the emission from any fuel burning emissions the opacity of which is equal to or greater than twenty (20) percent except for one six-minute period per hour of not more than twenty-seven (27) percent opacity. [391-31-.02(2) (d)] | Support | Primary | Upon Install / Performance Testing |
| Visible Emissions | The Permittee shall not cause, let, suffer, permit or allow emissions from any source the opacity of which is equal to or greater than forty (40) percent opacity (6-minute average). [391-3-1-.02(2)(b )1] | Support | Primary | As Needed |
| | | | | |
| | | | | |
| **1.2 SIP Air Permit # 1629-033-0039-S-02-0** | | | | |
| Visible Emissions | The Permittee shall not cause, let, suffer, permit or allow emissions from any source the opacity of which is equal to or greater than forty (40) percent opacity (6-minute average). [391-3-1-.02(2)(b )1] | Support | Primary | As Need/Upon Install |
| Concrete Crusher Daily Operations Log Checklist Inspection if on-site for | Daily operations checklist inspection of concrete crushers in accordance with Permit Conditions (as needed – during concrete crushing activities) | Support | Primary | Daily Log |
| Construction Air Quality Permit Emissions Calculations | Tracking permit conditions and limitations (see Equipment run hour report and the NOx emissions calculation spreadsheet). Monthly NOx emission limit is 8.33 tons. | Support | Primary | Monthly, Permit Record & Georgia EPD (upon request) |
| Concrete Batch Plant Compliance Record Keeping | Ensure regulatory obligations related to the Concrete Batch Plant records are being maintained in accordance with Permit Sections 4.2 and 5.4 These are records are prepared and maintained by the Concrete Batch Plant. | Support | Primary | Monthly, Permit Record & Georgia EPD (upon request) |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| Concrete Batch Plant Operations Report ( *this report is a normal monthly production report & is not a separate report for environmental reporting purposes)* | Tracking of Batch Plant Operations (Batch Plant Manager emails this report monthly). | Support | Primary | Monthly |
| Construction Air Quality Permit Quarterly Report | Permit Condition 7.2 requires a quarterly report summarizing engine runtimes, concrete throughput and NOx emissions. | Support | Primary | Quarterly (30th) |
| Ultra-Low Sulfur Fuel Certifications from fuel suppliers | Report provided by the fuel supplier(s) on company letterhead certifying fuel provided to the project contains less than 15ppm sulfur content. Certification is a permit condition requirement. Send report to Owners. | Support | Primary | Semi-Annual (Jan10 & Jul 10) |
| Annual Air Emissions Fee | Air emission fees required for the operation of stationary construction equipment. Owners pay the required fees. | Support | Primary | Annual (Sept 1st) |
| Concrete Crusher Performance Test for *SIP* | Permit Condition 6.1 requires a performance test conducted in accordance with USEPA Method 9 for concrete crushing equipment. (test and submit to EPD if using different crusher) | Support | Primary | Upon Install / Performance Testing |
| | | | | |
| | | | | |
| **1.3 General Air Regulatory Obligations** | | | | |
| Greenhouse Gas Report | Greenhouse gas reporting required when threshold of 25,000 tons of GHG is exceeded annually. Send the project's estimated GHG emissions to Owners. (Owners have .xls) | Support | Primary | Annual (Jan 10) |
| CFC Equipment Registrations and Inventory (40 CFR 82 – Protection of Stratospheric Ozone) | Document CFC equipment registrations, employee certifications, equipment inventories, and maintenance and handling records, provide Owners with list of equipment during building turnover. | Support | Primary | Each |
| SF6 Reporting | SF6 is a HAP ->Track -> used for fire suppression in instrument panels in turbine bldg. Provide annual inventory for Owners. | Support | Primary | Annual |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| **2. WATER QUALITY COMPLIANCE** | | | | |
| **2.1 General Permit No. GAR 100001 - Stormwater Discharges Associated with Construction Activity (19 Active Owners' NOIs)** | | | | |
| Construction Stormwater General Permit Notices of Intent/Notices of Termination | Prepare, maintain and submit the per the Construction Storm Water General Permit. | Primary | Support | As needed. Next major submittal will be the renewal of open NOIs upon issuance of the new general permit. |
| Erosion, Sediment Pollution Control and Prevention Plans | Prepare, maintain and revise the ES&PC Plan per the Construction Storm Water General Permit. This includes preparation of redline plans and periodic design professional review for changes to hydraulic components. | Primary | Support (prepare redlines) | Maintain Redlines following inspections. Submit ES&PC Plan as required by the permit. |
| Turbidity Sampling | Collect storm water samples per the permit requirements if a qualifying rain event occurs. Rainfall shall exceed 0.5 inches between the hours of 8 am to 5 pm for the event to be considered a qualifying event. Owners' Site Personnel perform Turbidity analysis. | Primary (shared) | Primary (shared) | Collect samples as required during each qualifying rain event. |
| Erosion & Sediment Control Inspections | Inspections per the Construction Storm Water General Permit. (CSI 3-20 and HB Sequence Inspection Program) | Support | Primary | Daily, Weekly, Monthly, and End-of-Storm Events |
| Daily Rainfall Measurements | Record & document daily rainfall per construction storm water permit requirements. (Weather Station & Software) | Support | Primary | Daily |
| Consolidated (includes active NOIs only) Monthly Construction Storm Water Monitoring Report | Prepare and submit the required monthly report if a qualifying rain event occurred during the month. If a qualifying event did not occur, documentation shall be placed in the administrative record. | Support | Primary | Monthly (per event) |
| | | | | |
| | | | | |
| **2.2 Owners' Permit to Operate Potable Water System PG 0330056** | | | | |
| Vogtle Units 3 & 4 Potable Water System (Temporary and Permanent) | Potable Water System tracking summary for water usage and free chlorine in accordance with Permit. | Primary | None | Daily |
| Lead and Copper Sampling and VOC | Lead and Copper sampling per Georgia Rule for Safe | Primary | None | Annual |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| Sampling. | Drinking Water. | | | |
| Total Coliform Sampling. | Coliform sampling per Georgia Rule for Safe Drinking Water. | Primary | None | Monthly |
| TTHM / HAA5 Sampling | TTHM / HAA5 sampling per Georgia Rule for Safe Drinking Water. | Primary | None | Annual |
| Nitrate and Nitrite Sampling | Nitrate and Nitrite sampling per Georgia Rule for Safe Drinking Water. | Primary | None | Annual |
| Potable Waterline Disinfection | Water Line Repairs/New potable water line installations require disinfection and recording in accordance with AWWA standards. Owners will operate and maintain lines within the Auxiliary Pump house. Lines outside the Auxiliary Pump house are the responsibility of Contractor. | Support | Primary | Each |
| Back Flow Preventer Testing | Annual requirement to test back flow preventers on an annual basis. Currently there are 16 backflow preventers that were tested in 2016. Additional backflow preventers that require testing are present at facilities operated by Owners and will be tested under separate contract by the Owners' Maintenance organization. | Primary | Support | Annual |
| | | | | |
| | | | | |
| **2.3 Owners' Permit to Withdraw Groundwater # 017-003 (MU3 and MU4)** | | | | |
| Groundwater Withdrawal from Multiple Aquifers | Support Owners' Ops Readiness collection of data for Permit# -017-003. | Primary | None | Daily & Monthly |
| Measure Water Levels | Vogtle 1&2 Environmental Specialist coordinates with Vogtle 3&4 Chemistry during the performance of drawdown tests, and the collection of raw water samples under Permit # 017-003. Measure the static and pumping levels in each aquifer utilized and the date the water levels were measured. (391-3-2-.08) | Primary | None | Semi-Annual |
| Temperature and Specific Conductance Monitoring Owners' Permit to | Vogtle 1&2 Environmental Specialist coordinates with Vogtle 3&4 Chemistry during the performance of | Primary | None | Annual |

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| Groundwater Withdrawal Permit Makeup Wells (MU 3 and MU 4) | drawdown tests, and the collection of raw water samples under Permit # 017-003. | | | |
| | | | | |
| **2.4 Dewatering Wells – Owners' Permit to Withdraw Groundwater # 017-006** | | | | |
| Groundwater Withdrawal from Multiple Aquifers | Provide groundwater withdrawal totals | Support | Primary | Daily & Monthly |
| Dewatering Permit - Temperature and Conductivity Sampling | Annually sample and analyze one raw water sample for Temperature and Specific Conductance Conductivity sample for every five permitted wells. | Support | Primary | Annual |
| | | | | |
| | | | | |
| **2.5 Concrete Batch Plant Permit NPDES #GA0039276** | | | | |
| NPDES Discharge Monitoring Report | Provide a summary of waste water discharges under the NPDES Wastewater Discharge Permit for the Batch Plant Facility. The facility has never had a discharge. Water is used for dust suppression by Morgan. Contingency frac tanks are in place for water storage. | Support | Primary | Monthly |
| Approved Water Containers for Beneficial Reuse | Beneficial reuse of wastewater is authorized by Georgia EPD. This Form provides a list of containers that are authorized to distribute wastewater for beneficial reuse. | Support | Primary | Each |
| Beneficial Reuse Water Log | Provides a log of beneficially reused wastewater. | Support | Primary | Each |
| | | | | |
| | | | | |
| **2.6 Vogtle 3 & 4 Industrial Permit NPDES #GA0039420** | | | | |
| NPDES Discharge Monitoring Report | Provide a summary of waste water discharges under the NPDES Wastewater Discharge Permit. | Support | Primary | Monthly |
| Requirements Applicable to Cooling Water Intake Structures for New Facilities Under 316(b) | There permitee will demonstrate compliance with 316(b) through monitoring and reporting in accordance with Parts 125.87 and 125.88 of the rule. | Support | Primary | As required with annual reporting |

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| CORMIX Mixing Zone Model (Part III A. Special Requirements 13) | The permittee shall perform an instream temperature study in the vicinity of outfall number 001 to demonstrate the results of the CORMIX mixing zone model with the first two years of operation of Vogtle Unit 4 and while all four units (Vogtle 1-4) are operational. | Primary | None | One Event |
| Support Chemistry and ITP during start-up to ensure compliance samples are collected as required. | Provide peer review support and coordinate start up sampling in accordance with Procedure B-ADM-PLMC-012. | Primary | None | As Needed Per System |
| | | | | |
| **2.7 Vogtle 3 & 4 Surface Water Withdrawal Permit #017-0191-11** | | | | |
| Monitoring Report | Provide a summary of water withdrawals under the Permit. | Primary | None | Monthly |
| Dissolved Oxygen Conditions | The permittee agrees to cause the construction and installation of an oxygen injection system, such as a Speece Cone, capable of injecting up 4,000 pounds of oxygen per day. | Primary | None | System Operational by Unit 3 COD, injection performed between April 15 and November 15 |
| | | | | |
| | | | | |
| **2.8 General Water Quality Data Collection** | | | | |
| Storm Water No Exposure Exclusion Certification (NEE). Storm Water No Exposure Exclusion Certification - Waynesboro, GA Warehouse | Ensure materials and activities are not exposed to storm water run-off according to the NEE. | Support | Primary | Quarterly |
| Oil Water Separator Waste Samples (Oil and Grease) | Collect sample from discharge line connected to the Sanitary Sewer to ensure compliance with Vogtle 1&2 NDPES Permit Requirements. | Support | Primary | Semiannual |
| Sanitary Sewer Flow Rates | Measure flow at the 500A outfall to facilitate notification to the Vogtle 3&4 Chemistry Team when flow exceeds 20,000 gallons per day. | Support | Primary | Daily |

## Exhibit A – Scope of Work / Division of Responsibilities

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| | | | | |
| **3. SPILL PREVENTION CONTROL & COUNTERMEASURES (SPCC)** | | | | |
| SPCC Plan (Revisions / Updates) | Site wide plan for the implementation of 40 CFR 112. | Primary (shared) | Primary (shared) | Initial Revision following transition will be prepared by Owners. Revise and Certify SPCC Plan within 6 months of first technical change. |
| Spill Response/Chemical Spill / Release Reports | Clean up and Report all chemical spills / releases per SPCC plan requirements. | Support | Primary | Each Spill / Release |
| Agency Notification Spill Report Form | Report chemical spills / releases that exceed reportable quantities requiring regulatory agency notification per the SPCC Plan / 40 CFR 112 regulations. | Support | Primary | Each |
| Weekly SPCC Facility Inspection | Utilized during routine SPCC facility inspections per SPCC Plan requirements. | Support | Primary | Weekly |
| Annual SPCC Facility Inspection | Utilized during annual SPCC facility inspections per SPCC Plan requirements. | Support | Primary | Annual |
| Spill Response Equipment Inventory | Utilized to ensure that the minimum required spill equipment and spill kits are maintained in-stock on the project site per SPCC Plan requirements. | Support | Primary | Weekly |
| Secondary Containment or Diked Area Drainage Form | Completed anytime a secondary containment or diked area is drained to an area that has access to an open watercourse. | Support | Primary | Each Event |
| SPCC Training | Train Oil Handling Personnel at least once per year per the SPCC Plan and OPA/SPCC regulations in 40 CFR 112 | Support | Primary | Annual |
| | | | | |
| **4. WASTE MANAGEMENT COMPLIANCE** | | | | |
| Weekly Universal Waste Inspections. | Provide record of Universal Waste collection area inspections. | Support | Primary | Weekly |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| Weekly Satellite Accumulation Area Inspections. Owners' USEPA Hazardous Waste Generator ID# GAR000075085 . | Provide record of Satellite Accumulation Area inspections. | Support | Primary | Weekly |
| Weekly 90/270 Day Area Hazardous Waste Inspections. Owners' USEPA Hazardous Waste Generator ID# GAR000075085 . | Provide record of Hazardous Waste collection area inspections. | Support | Primary | Weekly |
| Hazardous Waste Generation Summary. Owners' USEPA Hazardous Waste Generator ID# GAR000075085 . | Provides a summary of hazardous waste generated on the project on a monthly basis. | Support | Primary | Monthly |
| Hazardous Waste Determination. Owners' USEPA Hazardous Waste Generator ID# GAR000075085 . | Waste profiles are performed per 40 CFR 261 for each waste stream. | Support | Primary | Each Waste Stream |
| Waste Manifests. Owners' USEPA Hazardous Waste Generator ID# GAR000075085 | Provide waste manifest, chain-of-custody, bill of laden, recycle certifications, etc. to demonstrate cradle to grave for each waste stream. | Support | Primary | Each Item |
| Hazardous Waste Reduction Plan. Owners' USEPA Hazardous Waste Generator ID# GAR000075085. | Documents Owners' plan to minimize the generation of hazardous waste. Document was prepared due to being a LQG in 2016. | Primary | Support | As Needed |
| Hazardous Waste Contingency Plan. Owners' USEPA Hazardous Waste Generator ID# GAR000075085. | Owners' plan to protect the safety and welfare of employees and to comply with federal and state laws pertaining to hazardous waste generators with respect to preparedness and prevention for emergency events. | Primary | Support | As Needed |
| Solid Waste Management | | | | |
| Excess Concrete Management | Perform oversight of and support disposal. Costs by others. | Primary | Support | As Needed |
| Scrap Metal Recycling | Perform oversight of and support disposal. Costs by others. | Primary | Support | As Needed |
| Solid Waste | Perform oversight of and support disposal. Costs by others. | Primary | Support | As Needed |
| Hazardous Secondary Materials Management | Support profile development, oversight, and recycling of HSM. | Support | Primary | As Needed |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| Universal Waste | Provide oversight of, perform records management, and disposal of Universal Waste. | Support | Primary | As Needed |
| Used Oil | Provide oversight of, perform records management, and disposal of Used Oil. | Support | Primary | As Needed |
| Oily Debris | Provide oversight of, perform records management, and disposal of Oily Debris. | Support | Primary | As Needed |
| Manage Impacted Water (SPCC Containments, etc.) | Collect impacted water (from containments, etc.) provide oversight of, perform records management, and disposal of impacted water. | Support | Primary | As Needed |
| | | | | |
| | | | | |
| **5. HAZCOM/HAZMAT / SARA / EPCRA** | | | | |
| Chemical Control | All chemical products must be approved prior to purchase and require an “Approved Use Sticker” unless otherwise exempted. | Support | Primary | As Needed |
| Chemical Database Management/SDS Compliance | Support Safety and Health as needed. | Support | Primary | As Needed |
| Haz Com Plan Maintenance | Support Safety and Health as needed. | Support | Primary | As Needed |
| Chemical Cabinet Compliance | Ensure compliance with site procedure requirements to chemical cabinets (Currently ~400 cabinets. | Support | Primary | Weekly |
| Chemical Inventory Data for Owners' EPCRA / SARA Tier II Report | Used to identify and track Tier II and TRI reportable chemicals and quantities (CMS requirement and used to support Tier II Report). | Support | Primary | Monthly |
| Welding Rod Usage Log for Owners' TRI Report. | Track welding rod usage for Toxic Release Inventory Reporting To demonstrate that NESHAP is not applicable. | Support | Primary | Monthly |
| | | | | |
| **6. ECOLOGICAL / WILDLIFE** | | | | |
| Migratory Bird Treaty Act MBTA – Georgia Power's USFWS Permit | Provide protection of nesting birds and their eggs during construction activities. Provide records of related | Support | Primary | As Required |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |
| MB745135-1 | activities. | | | |
| Feral Hog Management | Support USDA during activities to capture and remove feral hogs. Coordination required with site Safety and Security. | Primary | Support | As Required |
| Endangered Species / Nuisance Wildlife and Domestic Animal Protection / Relocation | Protect wildlife, site personnel and relocate animals. Provide records of related activities. | Support | Primary | As Required |
| | | | | |
| **7. OTHER REGULATORY OBLIGATIONS** | | | | |
| Noise | Perform monitoring to document compliance with the FEIS and SFEIS. | Primary | None | As Required |
| Environmental Protection Plan (COL Appendix B) - EIE for non-evaluated environmental impacts or changes to evaluated impacts | Perform notifications and prepare environmental impact evaluations to support compliance. | Primary | Support | As Required |
| Department of Army Permit SAS-2007-01837 | Support compliance with permit obligations. | Support | Primary | As Required |
| PaTON | Observe and support required signs. Sign replacement as required. | Support | Primary | |
| NHPA | Ensure compliance with NHPA requirements prior to any new land disturbing activities and support new discovery (if applicable)] | Primary | Support | As Required |
| Bulk Gas Impact | Perform Periodic Monitoring of Bulk Gas Shipments, storage locations, and management to comply with obligations for Vogtle 1&2. | Primary | Support | As Required |
| Federal Aviation Administration (FAA) Determinations. Various contractors and Owners make notifications. | Ensure applicable structures have determinations and are lit accordingly. Report lighting outages to the FAA as required. | Support | Primary | As Required |
| | | | | |

**Exhibit A – Scope of Work / Division of Responsibilities**

| Table 2. Environmental Compliance Division of Responsibility (Notes 1, 2) | | | | |
|---|---|---|---|---|
| **Title** | **Purpose** | **Owners Responsibility** | **Contractor Responsibility** | **Agency/Frequency/Dates** |
| | | | | |

Notes
1. Owners are responsible for Governance and Oversight for all items.
2. Definitions:
- **Governance** – Is the accountability to establish the standards, methods, and expectations for a Functional Area. These standards include management controls (policies, programs, processes, and implementing tools) and performance standards (definition of best practices and development of goals) that drive excellence in the function.
- **Oversight** – Is the accountability to critically monitor, assess, and evaluate the performance of the Functional Area throughout the fleet to provide assurance that standards are being met. Oversight includes the responsibility to recommend appropriate intervention and elevation/escalation of management attention as necessary when standards are NOT being met.
- **Support** – The accountability to arrange for supplemental resources or specialized skills to the performing organization on an as-needed basis. Support resources may provide technical guidance or specific work products; however, the performing organization retains ultimate accountability for the results and delivering on the work product.
- **Primary** – Is the accountability to deliver expected results/work products in accordance with the agreed upon fleet standards, methods, and expectations. The performing organization/Individual has the primary accountability for behaviors and execution.

**Exhibit B - Target Assumptions**

1. It is assumed that the bulk quantities to be installed as part of the Work are as stated in Tables 1 through 11 ("To-Go Quantities").

2. It is assumed that the number of mechanical and electrical components to be installed as part of the Work is as set forth in the document titled "Vogtle ETC Summary Working File Appendices provided to Bechtel Team.pdf." as uploaded on May 19, 2017 by Terry Takats to the SNC SharePoint site - "Vogtle 3&4 Project Controls".

3. It is assumed that, except for adjustment for escalation, the craft wages and/or benefits to be paid to craft labor engaged in performance of the Work are as stated in the Project Labor Agreement and wage bulletins provided in the following documents:

   - Document titled "Construction Labor Agreement.pdf." as uploaded on May 19, 2017 by Terry Takats to the SNC SharePoint site – "Vogtle 3&4 Project Controls."
   - Document titled "Craft Current Wages and Benefits.pdf." uploaded on May 25, 2017 by Terry Takats to the SNC SharePoint site – "Vogtle 3&4 Project Controls."
   - Document titled "BL0033 Effective 05.22.17.pdf" uploaded on May 26, 2017 by Terry Takats to the SNC SharePoint site – "Vogtle 3&4 Project Controls."

4. It is assumed that qualified craft labor will be available to support the performance of the Work in accordance with the resource curves for direct craft labor and indirect craft labor as set forth in Exhibit M-1.

   With respect to this Target Assumption:

   (a) Craft labor unavailability must be demonstrated by providing evidence for a defined craft labor group that issued craft requisitions have remained unfilled for 30 or more days for the lesser of a) [***] positions or b) [***] of the planned resource level for that craft labor group.

   (b) In the event that craft labor unavailability is demonstrated as provided in (a) above, the Parties will engage in consultation with the applicable craft labor union representatives, and, after such consultation, Contractor will make recommendations to the Owners as to proposed mitigation measures to address the craft labor unavailability. Such mitigation measures may include the proposed payment of per diems or provision of other incentives or benefits to the craft labor. As a part of any such recommendation, Contractor will provide data to support its recommendation, including, to the extent available, craft labor survey(s) or other data which indicate that the proposed mitigation measures would positively address the craft labor unavailability issue.

**Exhibit B - Target Assumptions**

(c) If Owners do not agree to implementation of a recommendation made by Contractor as provided in (b) above within 15 days of receipt of Contractor's recommendation, then Contractor may give notice of an Adjustment Event under the Agreement.

5. It is assumed that Contractor and its Subcontractors will be permitted to work on the Construction Site in accordance with the Work Schedule.

6. It is assumed that escalation on each cost category forming part of the Target Construction Cost, including craft labor costs, non-manual personnel costs, and construction material costs, will not exceed an annual average of [***] per year.

**Exhibit B - Target Assumptions**

| Table 1. To-Go Cast in Place Concrete Quantities (cubic yards) | | | |

Notes

1. Owners will maintain Building/Facilities. Contractor controls office layout and personnel movement.
2. Shared asset with Facilities for storage and distribution of facilities materials. Owners will maintain the building.
3. Contractor will control facility maintenance. Owners Controls South End Offices.

**Exhibit E – Subcontract Alignment Process and Managed Subcontracts**

The Subcontract Scope Alignment Process means the process for the Contractor's evaluation of Contractor-Managed Subcontract Scope as described in this Exhibit.

Table 1 (located on page 4) provides a list of subcontract scope items for the Facility identified as either "Managed by Owner" or "Managed by Contractor" (i.e., Contractor-Managed Subcontract Scope).

The Subcontract Scope Alignment Process will be performed by Contractor, in consultation with Owners. The following items will be evaluated for each element of Contractor-Managed Subcontract Scope:

- Scope of work/technical services remaining to be performed to support Final Completion including identification of potential scope gaps and unidentified scope
- Schedule to complete
- Cost estimate to complete (for scope remaining to be completed as of the Effective Date)
- Allowance for growth in scope, if applicable
- Appropriate contingency
- Resources and capabilities of incumbent subcontractor
- Safety requirements and provisions
- Risk assessment
- Existing commercial arrangement with incumbent subcontractor (both with respect to the identity of the subcontractor and the terms of the subcontract) including general and special conditions, reporting requirements, financial capabilities, etc.

For each scope item, access to the following information will be provided by the Owners on a timely basis to perform the evaluation:

- Current subcontract for the scope including terms and conditions (general conditions, special conditions) and referenced attachments
- Scope of work/technical services (if separate from the existing subcontract)
- Estimate to complete data with supporting details to enable review/validation of values
- Payment status (paid to date, outstanding, Owners and/or subcontractor assessment of percent complete)
- Technical documents (e.g., Technical Documents List, Schedule of Required Vendor Data, etc.).

Discussions with each subcontractor are anticipated as part of the evaluation as well as participation in subcontract renegotiations. Owners assistance will be needed to facilitate these discussions.

The evaluation of each item of Contractor-Managed Subcontract Scope will be performed in three phases:

**Exhibit E – Subcontract Alignment Process and Managed Subcontracts**

- **Phase 1 – Review Existing Subcontract/Scope to Assess Current Estimate to Complete**

  In Phase 1, each element of Contractor-Managed Subcontract Scope and related subcontract (if any) will be reviewed to enable an assessment of Owners' current estimate to complete. A Review Package will be prepared for each element of Contractor-Managed Subcontract Scope that will include the following information:

1. Executive Summary
2. Scope of Work/Technical Services Remaining

   2.1 Scope Definition
   2.2 Work Included
   2.3 Work Not Included
   2.4 Potential Gaps
   2.5 Alternative Execution Approaches

3. Resources and Capabilities
4. Safety Requirements and Provisions
5. Risk Assessment

   5.1 Cost Risk
   5.2 Schedule Risk

6. Existing Commercial Arrangement/Proposal Evaluation

   6.1 General Conditions
   6.2 Special Conditions
   6.3 Reporting Requirements
   6.4 Financial Terms and Financial Condition of Incumbent Subcontractor
   6.5 Potential Gaps in Terms and Conditions
   6.6 Schedule Review

7. Schedule to Complete Defined Scope

   7.1 Impact to Baseline Schedule and Target Completion Date(s)

   The potential that items of Contractor-Managed Subcontract Scope could impact the Baseline Schedule will be evaluated.

**Exhibit E – Subcontract Alignment Process and Managed Subcontracts**

7.2 Contingency Assessment

All items of Contractor-Managed Subcontract Scope will be scheduled as necessary to support the Baseline Schedule.

7.3 Adjustment to Baseline Schedule and Target Completion Dates:

An adjustment to the Baseline Schedule and Target Completion Dates will be identified if the scope item will not support the current Baseline Schedule.

8. Cost Estimate to Complete

8.1 Cost Assessment

Contractor will assess the estimated cost to complete the scope item in question for scope remaining to be completed as of the Effective Date.

8.2 Allowance for Growth in Scope

The cost estimate will include an allowance for growth in scope, if applicable, based on Contractor's standard estimating processes.

8.3 Contingency Assessment

An appropriate amount for contingency will be included in the cost estimate to complete to achieve a confidence level of no less than 80% (using @Risk or similar software using Monte Carlo risk simulation).

8.4 Allowance for Escalation

An appropriate allowance for escalation, if applicable, will be included in the cost estimate to complete based on Contractor's assessment of escalation for the scope item in question.

8.5Adjustment to Target Construction Cost that include items 8.1 through 8.4

An adjustment to the Target Construction Cost will be identified based on the results of the evaluation, including items 8.1 through 8.4.

**Exhibit E – Subcontract Alignment Process and Managed Subcontracts**

- **Phase 2 – Review Re-Bid/Negotiation of Subcontract Scope to Assess Current Estimate to Complete**

  In Phase 2, the information received as part of the re-bid/negotiation of each subcontract will be reviewed to complete or identify any adjustments. The Phase 1 Review Package will be updated with the results of Phase 2.

- **Phase 3 – Agreement with Owners on Adjustment Needed to Target Construction Cost and Target Completion Date(s) (if any)**

  Multiple elements of Contractor-Managed Subcontract Scope may be reasonably considered as a group for these purposes, where mutually agreed.

Notes
1. This table will be updated to include all relevant purchase orders for Construction Materials required in the performance of the Work.
2. Contractor’s responsibility is limited to managing the onsite construction activities related to the CB&I subcontracts. Owners will remain responsible to manage all offsite fabrication, engineering, and other activities as may be specified and, for the foregoing purposes, the CB&I subcontracts will be treated as “Owner-Managed Subcontracts”.

**Exhibit F - Form of Letters of Credit**

**Form of Repayment Letter of Credit**

BANK

Date: ________
Letter of Credit Number: __

Beneficiary:
*Georgia Power Company, acting for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners*
*(address)*
*(Attn:)*

Applicant:
*Bechtel Power Corporation*
*(address)*

We, *Bank Name* , hereby establish in favor of Georgia Power Company, acting for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners ("Beneficiary" or "you" or "your"), at the request of and for the account of Bechtel Power Corporation ("Applicant") our Irrevocable Standby Letter of Credit No. ______ ("Letter of Credit") in the amount of [USD $ ] ( *Insert Amount in Words* ) (the "Available Amount").

We are advised that this Letter of Credit is issued with respect to that certain Construction Completion Agreement dated as of ____________, 2017 between Beneficiary and Applicant, including without limitation the Exhibits attached thereto (as amended, extended, supplemented, or restated from time to time, the "Agreement").

The Available Amount of this Letter of Credit is available to you against your executed written Drawing Certificate/Demand(s) in the form attached as Annex I hereto, with appropriate insertions (including relevant wiring instructions), presented to us. Multiple, partial demands may be made hereunder. The Available Amount of this Letter of Credit will be reduced if and as partial demands are honored; however, payments shall not in the aggregate exceed the original Available Amount (as may be increased by amendment as referenced herein).

Presentation of any such Drawing Certificate/Demand may be made on any day on or before the Expiration Date (defined below) on which we are open for business at our office located at ______________________________ ("Business Day"), Attn: _______________. Drawing Certificates/Demands under this Letter of Credit may be presented by telecopy

**Exhibit F - Form of Letters of Credit**

(“fax”) to fax number (__) ________ (after notifying us in advance by telephone at _______________) followed by the original of such Drawing Certificate/Demand, along with a copy of this Letter of Credit, dispatched by certified or registered mail, hand delivery or overnight courier service to our address above; provided it is understood that any such fax presentation shall be considered the operative presentation.

This Letter of Credit expires at the close of business at our office on ___________ (as may be extended as set forth below, the “Expiration Date”). It is a condition of this Letter of Credit that it and the Expiration Date will be deemed automatically extended without amendment for successive periods of one year each from the present or any future Expiration Date, unless we send notice to you, in writing, by certified or registered mail or courier service at your address above not less than sixty (60) days prior to any such Expiration Date, that we have elected not to extend such Expiration Date for such additional period. This Letter of Credit will be considered as null and void after the Expiration Date even if the original Letter of Credit is not returned to us, or upon return to us by Beneficiary of this Letter of Credit for cancellation prior to the Expiration Date.

This Letter of Credit sets forth in full the terms of our undertaking, and such undertaking shall not be modified, annulled or amplified by reference to the Agreement or any other agreement referred to herein or in which this Letter of Credit is referred or to which this Letter of Credit relates, and any such reference shall not be deemed to incorporate herein by reference the Agreement or any other agreement. Our obligations hereunder are primary obligations that shall not be affected by the performance or non-performance by Applicant or you of any obligations under the Agreement or under any other agreement between Applicant and Beneficiary or between Applicant and us or between Applicant and its agents.

Our obligation under this Letter of Credit is our individual obligation and is in no way contingent upon reimbursement with respect thereto.

The Available Amount under this Letter of Credit may be increased by means of an amendment only or decreased by means of (i) an amendment or (ii) payment demands honored hereunder.

All fees associated with this Letter of Credit (other than transfer charges and fees as described below) are for Applicant’s account.

We will honor in our own funds each Drawing Certificate/Demand presented to us in compliance with the terms of this Letter of Credit within three (3) Business Days after presentation.

This Letter of Credit is transferrable, but only in its entirety, and may be successively transferred. Transfer of this Letter of Credit shall be effected by us upon your submission of this original Letter of Credit, including all amendments, if any, accompanied by a duly completed and signed Transfer Request Form in the form of Annex II, with the signature thereon authenticated by your bank. In any event, this Letter of Credit may not be transferred to any person or entity listed in or otherwise subject to, any sanction or embargo under any applicable restrictions. Charges and fees related to such transfer will be for the account of the Beneficiary.

We are subject to various laws, regulations and executive and judicial orders (including economic sanctions, embargoes, anti-boycott, anti-money laundering, anti-terrorism, and

**Exhibit F - Form of Letters of Credit**

anti-drug trafficking laws and regulations) of the U.S. and other countries that are enforceable under applicable law. We will not be liable for our failure to make, or our delay in making, payment under this Letter of Credit or for any other action we take or do not take, or any disclosure we make, under or in connection with this Letter of Credit (including, without limitation, any refusal to transfer this Letter of Credit) that is required by such laws, regulations, or orders.

To the extent not contrary to the express terms hereof, this Letter of Credit is subject to the International Standby Practices (ISP98), International Chamber of Commerce Publication No. 590, and, as to matters not governed by ISP98, this Letter of Credit shall be governed by, and construed in accordance with, the laws of the State of New York, without regard to principles of conflict of laws.

[Bank Seal, Insert day, month, year]

## ANNEX I

## DRAWING CERTIFICATE/DEMAND

To: [BANK NAME AND ADDRESS]

RE: Irrevocable Standby Letter of Credit No. ________________ dated ________ ____, _____

Reference is made to that certain Irrevocable Standby Letter of Credit No. _______________ ("Letter of Credit") issued by [ *Issuing Bank* ] (the "Bank") in favor of Georgia Power Company, acting for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners ("Beneficiary").

Reference also is made to the Construction Completion Agreement dated _______________ __, 2017 by and between Beneficiary and Bechtel Power Corporation ("Applicant"), including without limitation the Exhibits attached thereto (as amended, extended, supplemented, or restated from time to time, the "Agreement"). The Beneficiary hereby certifies to Bank that [ *insert one of the following sentences* ]:

> Applicant has failed to make payment of amount(s) and applicable interest totaling not less than the Demanded Amount (defined below) as and when required under the Agreement.

or

> Applicant is required to maintain a letter of credit under the Agreement and the Expiration Date of the Letter of Credit is forty-six (46) or fewer days from the date hereof and a substitute or replacement letter of credit that satisfies the requirements of the Agreement as to form, issuer and amount has not been provided to Beneficiary.

Beneficiary demands payment of $_________ (the "Demanded Amount") under the Letter of Credit in immediately available funds by wire transfer to the following account:

[Account Information]

**TRANSFER REQUEST FORM**

(COMPANY LETTERHEAD)

TO: [Bank Name and Address]

DATE: _________________

RE: Your Irrevocable Standby Letter of Credit No. ____________issued on _______________ in favor of the undersigned.

Gentlemen:

For value received, the undersigned Beneficiary hereby irrevocably transfers, in its entirety, all rights to draw under the above referenced Irrevocable Standby Letter of Credit to:

______________________________
The "Transferee"

______________________________
Address
______________________________
______________________________

All rights of the Beneficiary in the Irrevocable Standby Letter of Credit, are transferred to the above Transferee, who shall hereafter be the Beneficiary for all purposes and the Beneficiary shall have no further rights thereunder, including rights relating to any amendments of the stated amount of the Irrevocable Standby Letter of Credit or to the expiry date or other amendments, and whether now existing or hereafter made. All amendments are to be advised directly to the Transferee without necessity of any consent of or notice to the Beneficiary.

The original Irrevocable Standby Letter of Credit is returned herewith, and the Beneficiary hereby requests the authorized Bank to endorse the transfer on the reverse thereof and forward it directly to the Transferee with the Issuing Bank's customary notice of transfer.

(together with your request for transfer, please enclose your check for $700.00, unless otherwise arranged)

Very Truly Yours

Date: ________
Letter of Credit Number: __

Beneficiary:
*Bechtel Power Corporation*
*(address)*

Applicant:
[ *Owner* ]
[ *Address* ]

We, *Bank Name* , hereby establish in favor of Bechtel Power Corporation (“Beneficiary” or “you” or “your”), at the request of and for the account of [ *Owner* ] (“Applicant”) our Irrevocable Standby Letter of Credit No. ______ (“Letter of Credit”) in the amount of [USD $ ] ( *Insert Amount in Words* ) (the “Available Amount”).

We are advised that this Letter of Credit is issued with respect to that certain Construction Completion Agreement dated as of ____________, 2017 between Georgia Power Company, acting for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners, and Beneficiary, including without limitation the Exhibits attached thereto (as amended, extended, supplemented, or restated from time to time, the “Agreement”).

The Available Amount of this Letter of Credit is available to you against your executed written Drawing Certificate/Demand(s) in the form attached as Annex I hereto, with appropriate insertions (including relevant wiring instructions), presented to us. Multiple, partial demands may be made hereunder. The Available Amount of this Letter of Credit will be reduced if and as partial demands are honored; however, payments shall not in the aggregate exceed the original Available Amount (as may be increased by amendment as referenced herein).

Presentation of any such Drawing Certificate/Demand may be made on any day on or before the Expiration Date (defined below) on which we are open for business at our office located at ______________________________ (“Business Day”), Attn: _______________. Drawing Certificates/Demands under this Letter of Credit may be presented by telecopy (“fax”) to fax number (__) ________ (after notifying us in advance by telephone at _______________) followed by the original of such Drawing Certificate/Demand, along with a copy of this Letter of Credit, dispatched by certified or registered mail, hand delivery or overnight courier service to our address above; provided it is understood that any such fax presentation shall be considered the operative presentation.

This Letter of Credit expires at the close of business at our office on ___________ (as may be extended as set forth below, the “Expiration Date”). It is a condition of this Letter of

Credit that it and the Expiration Date will be deemed automatically extended without amendment for successive periods of one year each from the present or any future Expiration Date, unless we send notice to you, in writing, by certified or registered mail or courier service, at your address above not less than sixty (60) days prior to any such Expiration Date, that we have elected not to extend such Expiration Date for such additional period. This Letter of Credit will be considered as null and void after the Expiration Date even if the original Letter of Credit is not returned to us, or upon return to us by Beneficiary of this Letter of Credit for cancellation prior to the Expiration Date.

This Letter of Credit sets forth in full the terms of our undertaking, and such undertaking shall not be modified, annulled or amplified by reference to the Agreement or any other agreement referred to herein or in which this Letter of Credit is referred or to which this Letter of Credit relates, and any such reference shall not be deemed to incorporate herein by reference the Agreement or any other agreement. Our obligations hereunder are primary obligations that shall not be affected by the performance or non-performance by Applicant or you of any obligations under the Agreement or under any other agreement between Applicant and you or between Applicant and us or between Applicant and its agents.

Our obligation under this Letter of Credit is our individual obligation and is in no way contingent upon reimbursement with respect thereto.

The Available Amount under this Letter of Credit may be increased by means of an amendment only or decreased by means of (i) an amendment or (ii) payment demands honored hereunder.

All fees associated with this Letter of Credit (other than transfer charges and fees as described below) are for Applicant's account.

We will honor in our own funds each Drawing Certificate/Demand presented to us in compliance with the terms of this Letter of Credit within three (3) Business Days after presentation.

This Letter of Credit is transferrable, but only in its entirety, and may be successively transferred. Transfer of this Letter of Credit shall be effected by us upon your submission of this original Letter of Credit, including all amendments, if any, accompanied by a duly completed and signed Transfer Request Form in the form reasonably requested by us, with the signature thereon authenticated by your bank. In any event, this Letter of Credit may not be transferred to any person or entity listed in or otherwise subject to, any sanction or embargo under any applicable restrictions. Charges and fees related to such transfer will be for the account of the Beneficiary.

We are subject to various laws, regulations and executive and judicial orders (including economic sanctions, embargoes, anti-boycott, anti-money laundering, anti-terrorism, and anti-drug trafficking laws and regulations) of the U.S. and other countries that are enforceable under applicable law. We will not be liable for our failure to make, or our delay in making, payment under this Letter of Credit or for any other action we take or do not take, or any disclosure we make, under or in connection with this Letter of Credit (including, without limitation, any refusal to transfer this Letter of Credit) that is required by such laws, regulations, or orders.

**Exhibit F - Form of Letters of Credit**

To the extent not contrary to the express terms hereof, this Letter of Credit is subject to the International Standby Practices (ISP98), International Chamber of Commerce Publication No. 590, and, as to matters not governed by ISP98, this Letter of Credit shall be governed by, and construed in accordance with, the laws of the State of New York, without regard to principles of conflict of laws.

[Bank Seal, Insert day, month, year]

**Exhibit F - Form of Letters of Credit**

**ANNEX I**

**DRAWING CERTIFICATE/DEMAND**

To: [BANK NAME AND ADDRESS]

RE: Irrevocable Standby Letter of Credit No. ________________ dated ________ ____, _____

Reference is made to that certain Irrevocable Standby Letter of Credit No. _______________ ("Letter of Credit") issued by [ *Issuing Bank* ] (the "Bank") in favor of Bechtel Power Corporation ("Beneficiary") upon the application of [ *Owner* ] ("Applicant").

Reference also is made to the Construction Completion Agreement dated _______________ __, 2017 by and between Georgia Power Company, acting for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners, and Beneficiary, including without limitation the Exhibits attached thereto (as amended, extended, supplemented, or restated from time to time, the "Agreement"). The Beneficiary hereby certifies to Bank that [ *insert one of the following sentences* ]:

> Applicant has failed to make payment of amount(s) totaling not less than the Demanded Amount (defined below) as and when due pursuant to the Agreement.

or

> The Expiration Date of the Letter of Credit is forty-six (46) or fewer days from the date hereof, Applicant is required to maintain a letter of credit under the Agreement, and Beneficiary has received neither cash security nor a substitute or replacement letter of credit that satisfies the requirements of the Agreement as to form, issuer and amount.

Beneficiary demands payment of $_________ (the "Demanded Amount") under the Letter of Credit in immediately available funds by wire transfer to the following account:

[Account Information]

**Exhibit F - Form of Letters of Credit**

In witness whereof, the Beneficiary has executed and delivered this Drawing Certificate/Demand as of this ____ day of __________, 20__.

**BENEFICIARY**

Bechtel Power Corporation

# Exhibit G – Mechanical Completion

Mechanical Completion is defined as the state of construction completion of a Unit such that the Unit is ready for Hot Functional Testing (HFT). Specifically, subject to Punch List items, Mechanical Completion shall be achieved upon completion of Contractor's physical construction and/or installation activities and Contractor's construction testing activities (to the extent identified as Contractor's responsibility in Table 2 below) for those systems, sub-systems, equipment, and components of a Unit that are within the boundaries of those Boundary Identification Packages (BIPs) needed to support HFT of the Unit.

Table 1 identifies those BIPs that are needed to support HFT such that the Unit is ready for HFT and those that are not. Table 2 identifies the division of responsibility for construction testing activities.

**Table 1. Boundary Identification Packages as of September 2017 (Unit 3 and Unit 4 Identical)**

| System Designator | System | BIPs Needed to Support Hot Functional Testing | BIPs Not Needed to Support Hot Functional Testing |
|---|---|---|---|
| ASS | Auxiliary Steam Supply System | ASS-01, ASS-02 | None |
| BDS | Steam Generator Blowdown System | BDS-01, BDS-02, BDS-03, BDS-04 | None |
| BIS | Business Infrastructure System | (Note 2) | BIS-01, BIS-02, BIS-03, BIS-04, BIS-05 |
| CAS | Compressed and Instrument Air Systems | CAS-01, CAS-02, CAS-03, CAS-04, CAS-05, CAS-06, CAS-07, CAS-08, CAS-09, CAS-10, CAS-11, CAS-12, CAS-13, CAS-14, CAS-15, CAS-16 | None |
| CCS | Component Cooling Water System | CCS-01, CCS-02, CCS-03 | None |
| CDS | Condensate System | CDS-01, CDS-02, CDS-03, CDS-04 | None |
| CES | Condenser Tube Cleaning System | CES-01 | None |
| CFS | Turbine Island Chemical Feed System | CFS-01, CFS-02, CFS-03, CFS-04, CFS-05, CFS-06, CFS-07, CFS-08, CFS-09 | None |
| CMS | Condenser Air Removal System | CMS-01 | None |
| CNS | Containment System | None required for HFT. | CNS-01 |
| CPS | Condensate Polishing System | CPS-01 | None |
| CVS | Chemical and Volume Control System | CVS-01, CVS-02, CVS-03, CVS-04 | None |
| CWS | Circulating Water System | CWS-01, CWS-02, CWS-03 | None |
| CYS | Cyber Security System | (Note 2) | (Note 2) |
| | | | |

**Exhibit G – Mechanical Completion**

**Table 1. Boundary Identification Packages as of September 2017 (Unit 3 and Unit 4 Identical)**

| System Designator | System | BIPs Needed to Support Hot Functional Testing | BIPs Not Needed to Support Hot Functional Testing |
|---|---|---|---|
| DAS | Diverse Actuation System | DAS-01 | None |
| DDS | Data Display and Processing System | DDS-01, DDS-02, DDS-03, DDS-04, DDS-05, DDS-06, DDS-07, DDS-08, DDS-09, DDS-10, DDS-11, DDS-12 | None |
| DOS | Standby Diesel Fuel Oil System | DOS-01, DOS-02, DOS-03 | None |
| DRS | Storm Drain System | None required for HFT. | DRS-01 |
| DTS | Demineralized Water Treatment System | DTS-01 | None |
| DWS | Demineralized Water Transfer and Storage System | DWS-01, DWS-02, DWS-03, DWS-04, DWS-05 | None |
| ECS | Main ac Power System | ECS-01, ECS-02, ECS-03, ECS-04, ECS-05, ECS-06, ECS-07, ECS-08, ECS-09, ECS-10, ECS-11, ECS-12, ECS-13, ECS-14, ECS-15, ECS-16, ECS-17, ECS-18, ECS-19, ECS-20 | None |

Notes

1. Turnover for this BIP has already been completed as part of the Building 315 turnover and is not Contractor scope.
2. The portions of this system needed for HFT have not yet been determined.
3. This system is Owners' scope.

**Exhibit G – Mechanical Completion**

| Table 2. Construction Testing Division of Responsibility | | | |
|---|---|---|---|
| **Item** | **Test Description** | **Contractor Responsibility** | **Owner Responsibility** |
| 1 | Perform non-destructive testing (e.g., RT, UT, PT)<br>(via Contractor-Managed Subcontract) | X | |
| 2 | Remove construction blinds | X | |
| 3 | Clean and inspect piping and equipment | X | |
| 4 | Perform pipe line specification flushing and cleanliness verification | X | |
| 5 | Perform pipe line pressure testing | X | |
| 6 | Inspect and stroke manual valves | X | |
| 7 | Release piping hangers and heat exchanger expansion bolts | X | |
| 8 | Perform initial set of spring type pipe hangers | X | |
| 9 | Perform ASME code pressure tests | X | |
| 10 | Perform process fluid system flushing (e.g., turbine lube oil flushes, chemical and volume control system flushing, reactor coolant system flushing) | | X |
| 11 | Perform reactor coolant system and steam generator system hydrostatic testing | | X |
| 12 | Inspect and close-up vessels | X | |
| 13 | Perform rotating equipment alignment | X | |
| 14 | Service, adjust, lubricate, maintain equipment<br>(prior to Contractor turnover to Owner) | X | |
| 15 | Inspect wiring, cable runs, and accessories | X | |
| 16 | Perform high potential, megger, and cable continuity testing of cables and equipment | X | |
| 17 | Inspect switchgear and mechanical interlocks | X | |
| 18 | Install and service batteries | X | |
| 19 | Calibrate instruments and sensors | | X |
| 20 | Service and fill transformers | | X |
| 21 | Perform electrical checks and calibrations | | X |
| 22 | Perform energized component, loop, and system tests | | X |

**Exhibit H – Form of Monthly Status Report**

The table of contents for Contractor's Monthly Status Report is provided below. Changes to the table of contents will be mutually agreed by the Parties.

1. Executive Summary

    - Progress Summary
    - Critical Issues Summary
    - Overall Staffing Summary

2. Safety Status

3. Quality Status

4. Construction Progress (Overall and By Area)

    - Overall Construction Summary
    - Key Milestones Achieved/Work in Progress
    - Key Work Planned to Start Next Month
    - Construction Equipment Summary (Needs/Concerns)
    - System Turnover (Future)

5. Schedule Performance (Overall and By Area)

    - Construction Forecast Summary
    - Percent Complete Analysis/Summary
    - Critical Path Analysis/Summary
    - Key Schedule Issues/Concerns

6. Cost Performance

    - Construction Forecast Summary
    - Trend/Change Order Summary
        - Approved Trends this Month
        - Key Potential Pending Trends/Changes
    - Cost Expenditure Summary and Analysis
    - Field Procurement and Subcontracts
    - Contingency Summary
    - Invoice and Payment Status

7. Managed-Subcontracts Status

    - Overall Summary
    - Cost Summary and Analysis
    - Schedule Summary and Analysis

8. Issues and Concerns

**Exhibit H – Form of Monthly Status Report**

**EXHIBIT J-1**

**DAVIS-BACON ACT REQUIRED PROVISIONS**

**ARTICLE 34. SECTION (a) MINIMUM WAGES, ETC.**

**(1) Minimum wages.**

(i) All laborers and mechanics employed or working upon the site of the work (or under the United States Housing Act of 1937 or under the Housing Act of 1949 in the construction or development of the project), will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act (29 CFR part 3)), the full amount of wages and bona fide fringe benefits (or cash equivalents thereof) due at time of payment computed at rates not less than those contained in the wage determination of the Secretary of Labor which is attached hereto and made a part hereof, regardless of any contractual relationship which may be alleged to exist between the contractor and such laborers and mechanics.

Contributions made or costs reasonably anticipated for bona fide fringe benefits under section 1 (b)(2) of the Davis-Bacon Act on behalf of laborers or mechanics are considered wages paid to such laborers or mechanics, subject to the provisions of paragraph (a)(l)(iv) of this section; also, regular contributions made or costs incurred for more than a weekly period (but not less often than quarterly) under plans, funds, or programs which cover the particular weekly period, are deemed to be constructively made or incurred during such weekly period. Such laborers and mechanics shall be paid the appropriate wage rate and fringe benefits on the wage determination for the classification of work actually performed, without regard to skill, except as provided in Sec. 5.5(a)(4) [paragraph (a)(4) below]. Laborers or mechanics performing work in more than one classification may be compensated at the rate specified for each classification for the time actually worked therein: Provided, That the employer's payroll records accurately set forth the time spent in each classification in which work is performed. The wage determination (including any additional classification and wage rates conformed under paragraph (a)(l)(ii) of this section) and the Davis-Bacon poster (WH-1321) shall be posted at all times by the contractor and its subcontractors at the site of the work in a prominent and accessible place where it can be easily seen by the workers.

(ii)(A) The contracting officer shall require that any class of laborers or mechanics, including helpers, which is not listed in the wage determination and which is to be employed under the contract shall be classified in conformance with the wage determination. The contracting officer shall approve an additional classification and wage rate and fringe benefits therefore only when the following criteria have been met:

(1) The work to be performed by the classification requested is not performed by a classification in the wage determination; and

(2) The classification is utilized in the area by the construction industry; and
(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(ii)(B) If the contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the contracting officer agree on the classification and wage rate (including the amount designated for fringe benefits where appropriate), a report of the action taken shall be sent by the contracting officer to the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Washington, DC 20210. The Administrator, or an authorized representative, will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(ii)(C) In the event the contractor, the laborers or mechanics to be employed in the classification or their representatives, and the contracting officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the contracting officer shall refer the questions, including the views of all interested parties and the recommendation of the contracting officer, to the Administrator for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the contracting officer or will notify the contracting officer within the 30-day period that additional time is necessary.

(ii)(D) The wage rate (including fringe benefits where appropriate) determined pursuant to paragraphs (a)(1)(ii) (B) or (C) of this section, shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(iii) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.

(iv) If the contractor does not make payments to a trustee or other third person, the contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program, Provided, That the Secretary of Labor has found, upon the written request of the contractor, that the applicable standards of the Davis-Bacon Act have been met. The Secretary of Labor may require the contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

**(2) Withholding.**

The Department of Energy ("DOE") shall upon its own action or upon written request of an authorized representative of the Department of Labor withhold or cause to be withheld

from the contractor under this contract or any other Federal contract with the same prime contractor, or any other federally-assisted contract subject to Davis-Bacon prevailing wage requirements, which is held by the same prime contractor, so much of the accrued payments or advances as may be considered necessary to pay laborers and mechanics, including apprentices, trainees, and helpers, employed by the contractor or any
subcontractor the full amount of wages required by the contract. In the event of failure to pay any laborer or mechanic, including any apprentice, trainee, or helper, employed or working on the site of the work (or under the United States Housing Act of 1937 or under the Housing Act of 1949 in the construction or development of the project), all or part of the wages required by the contract, DOE may, after written notice to the contractor, sponsor, applicant, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds until such violations have ceased.

**(3) Payrolls and basic records.**

(i) Payrolls and basic records relating thereto shall be maintained by the contractor during the course of the work and preserved for a period of three years thereafter for all laborers and mechanics working at the site of the work (or under the United States Housing Act of 1937, or under the Housing Act of 1949, in the construction or development of the project). Such records shall contain the name, address, and social security number of each such worker, his or her correct classification, hourly rates of wages paid (including rates of contributions or costs anticipated for bona fide fringe benefits or cash equivalents thereof of the types described in section 1(b)(2)(B) of the Davis-Bacon Act), daily and weekly number of hours worked, deductions made and actual wages paid. Whenever the Secretary of Labor has found under 29 CFR 5.5(a)(1)(iv) that the wages of any laborer or mechanic include the amount of any costs reasonably anticipated in providing benefits under a plan or program described in section 1(b)(2)(B) of the Davis-Bacon Act, the contractor shall maintain records which show that the commitment to provide such benefits is enforceable, that the plan or program is financially responsible, and that the plan or program has been communicated in writing to the laborers or mechanics affected, and records which show the costs anticipated or the actual cost incurred in providing such benefits. Contractors employing apprentices or trainees under approved programs shall maintain written evidence of the registration of apprenticeship programs and certification of trainee programs, the registration of the apprentices and trainees, and the ratios and wage rates prescribed in the applicable programs.

(ii)(A) The contractor shall submit weekly for each week in which any contract work is performed a copy of all payrolls to the DOE) if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit the payrolls to the applicant, sponsor, or owner, as the case may be, for transmission to DOE. The payrolls submitted shall set out accurately and completely all of the information required to be maintained under 29 CFR 5.5(a)(3)(i), except that full social security numbers and home addresses shall not be included on weekly transmittals. Instead the payrolls shall only need to include an individually identifying number for each employee (e.g., the last four digits of the employee's social security number). The required weekly payroll information may be submitted in any form desired. Optional Form WH-347 is available for this purpose from the Wage and Hour Division Web site at http://www.dol.gov/esa/whd/forms/wh347instr.htm or its successor site. The prime contractor is responsible for the submission of copies of payrolls by all subcontractors. Contractors and subcontractors shall maintain the full social security number and current address of each covered worker, and shall provide them upon request to DOE if the agency is a party to the contract, but if the agency is not such a party, the contractor will submit them to the applicant, sponsor, or owner, as the case may be, for transmission to DOE, the contractor, or the Wage and Hour Division of the Department of Labor for purposes of an investigation or audit of compliance with prevailing wage requirements. It is not a violation of this section for a prime contractor to require a subcontractor to provide addresses and social security numbers to the prime contractor for its own records, without weekly submission to the sponsoring government agency (or the applicant, sponsor, or owner).

(ii)(B) Each payroll submitted shall be accompanied by a "Statement of Compliance," signed by the contractor or subcontractor or his or her agent who pays or supervises the payment of the persons employed under the contract and shall certify the following:

(1) That the payroll for the payroll period contains the information required to be provided under Sec. 5.5 (a)(3)(ii) of Regulations, 29 CFR part 5, the appropriate information is being maintained under Sec. 5.5 (a)(3)(i) of Regulations, 29 CFR part 5, and that such information is correct and complete;
(2) That each laborer or mechanic (including each helper, apprentice, and trainee) employed on the contract during the payroll period has been paid the full weekly wages earned, without rebate, either directly or indirectly, and that no deductions have been made either directly or indirectly from the full wages earned, other than permissible deductions as set forth in Regulations, 29 CFR part 3;
(3) That each laborer or mechanic has been paid not less than the applicable wage rates and fringe benefits or cash equivalents for the classification of work performed, as specified in the applicable wage determination incorporated into the contract.

(ii)(C) The weekly submission of a properly executed certification set forth on the reverse side of Optional Form WH-347 shall satisfy the requirement for submission of the "Statement of Compliance" required by paragraph (a)(3)(ii)(B) of this section.

(ii)(D) The falsification of any of the above certifications may subject the contractor or subcontractor to civil or criminal prosecution under section 1001 of title 18 and section 231 of title 31 of the United States Code.

(iii) The contractor or subcontractor shall make the records required under paragraph (a)(3)(i) of this section available for inspection, copying, or transcription by authorized representatives of DOE or the Department of Labor, and shall permit such representatives to interview employees during working hours on the job. If the contractor or subcontractor fails to submit the required records or to make them available, the Federal agency may, after written notice to the contractor, sponsor, applicant, or owner, take such action as may be necessary to cause the suspension of any further payment, advance, or guarantee of funds. Furthermore, failure to submit the required records upon request or to make such records available may be grounds for debarment action pursuant to 29 CFR 5.12.

**(4) Apprentices and trainees**

(i) Apprentices. Apprentices will be permitted to work at less than the predetermined rate for the work they performed when they are employed pursuant to and individually registered in a bona fide apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Office of Apprenticeship Training, Employer and Labor Services, or with a State Apprenticeship Agency recognized by the Office, or if a person is employed in his or her first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Office of Apprenticeship Training, Employer and Labor Services or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice. The allowable ratio of apprentices to journeymen on the job site in any craft classification shall not be greater than the ratio permitted to the contractor as to the entire work force under the registered program. Any worker listed on a payroll at an apprentice wage rate, who is not registered or otherwise employed as stated above, shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any apprentice performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. Where a contractor is performing construction on a project in a locality other than that in which its program is registered, the ratios and wage rates (expressed in percentages of the journeyman's hourly rate) specified in the contractor's or subcontractor's registered program shall be observed. Every apprentice must be paid at not less than the rate specified in the registered program for the apprentice's level of progress, expressed as a percentage of the journeymen hourly rate specified in the applicable wage determination. Apprentices shall be paid fringe benefits in accordance with the provisions of the apprenticeship program. If the apprenticeship program does not specify fringe benefits, apprentices must be paid the full amount of fringe benefits listed on the wage determination for the applicable classification. If the Administrator determines that a different practice prevails for the applicable apprentice classification, fringes shall be paid in accordance with that determination. In the event the Office of Apprenticeship Training, Employer and Labor Services, or a State Apprenticeship Agency recognized by the Office, withdraws approval of an apprenticeship program, the contractor will no longer be permitted to utilize apprentices at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(ii) Trainees. Except as provided in 29 CFR 5.16, trainees will not be permitted to work at less than the predetermined rate for the work performed unless they are employed pursuant to and individually registered in a program which has received prior approval, evidenced by formal certification by the U.S. Department of Labor, Employment and Training Administration. The ratio of trainees to journeymen on the job site shall not be greater than permitted under the plan approved by the Employment and Training Administration. Every trainee must be paid at not less than the rate specified in the approved program for the trainee's level of progress, expressed as a percentage of the journeyman hourly rate specified in the applicable wage determination. Trainees shall be paid fringe benefits in accordance with the provisions of the trainee program. If the trainee program does not mention fringe benefits, trainees shall be paid the full amount of fringe benefits listed on the wage determination unless the Administrator of the Wage and Hour Division determines that there is an apprenticeship program associated with the corresponding journeyman wage rate on the wage determination which provides for less than full fringe benefits for apprentices. Any employee listed on the payroll at a trainee rate who is not registered and participating in a training plan approved by the Employment and Training Administration shall be paid not less than the applicable wage rate on the wage determination for the classification of work actually performed. In addition, any trainee performing work on the job site in excess of the ratio permitted under the registered program shall be paid not less than the applicable wage rate on the wage determination for the work actually performed. In the event the Employment and Training Administration withdraws approval of a training program, the contractor will no longer be permitted to utilize trainees at less than the applicable predetermined rate for the work performed until an acceptable program is approved.

(iii) Equal employment opportunity. The utilization of apprentices, trainees and journeymen under this part shall be in conformity with the equal employment opportunity requirements of Executive Order 11246, as amended, and 29 CFR part 30.

**(5) Compliance with Copeland Act requirements.**

The contractor shall comply with the requirements of 29 CFR part 3, which are incorporated by reference in this contract.

**(6) Subcontracts.**

The contractor or subcontractor shall insert in any subcontracts the clauses contained in 29 CFR 5.5(a)(1) through (10) and such other clauses as DOE may by appropriate instructions require, and also a clause requiring the subcontractors to include these clauses in any lower tier subcontracts. The prime contractor shall be responsible for the compliance by any subcontractor or lower tier subcontractor with all the contract clauses in 29 CFR 5.5.

**(7) Contract termination: debarment.**

A breach of the contract clauses in 29 CFR 5.5 may be grounds for termination of the contract, and for debarment as a contractor and a subcontractor as provided in 29 CFR 5.12.

**(8) Compliance with Davis-Bacon and Related Acts requirements.**

All rulings and interpretations of the Davis-Bacon and Related Acts contained in 29 CFR parts 1, 3, and 5 are herein incorporated by reference in this contract.

**(9) Disputes concerning labor standards.**

Disputes arising out of the labor standards provisions of this contract shall not be subject to the general disputes clause of this contract. Such disputes shall be resolved in accordance with the procedures of the Department of Labor set forth in 29 CFR parts 5, 6, and 7. Disputes within the meaning of this clause include disputes between the contractor (or any of its subcontractors) and the contracting agency, the U.S. Department of Labor, or the employees or their representatives.

**(1) Certification of eligibility.**

(i) By entering into this contract, the contractor certifies that neither it (nor he or she) nor any person or firm who has an interest in the contractor's firm is a person or firm ineligible to be awarded Government contracts by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1).

(ii) No part of this contract shall be subcontracted to any person or firm ineligible for award of a Government contract by virtue of section 3(a) of the Davis-Bacon Act or 29 CFR 5.12(a)(1).

(iii) The penalty for making false statements is prescribed in the U.S. Criminal Code, 18 U.S.C. 1001.

## DAVIS-BACON ACT WAGE DETERMINATION(S)

1. For all construction (as defined in DOL regulations at 29 CFR 5.2 to include installation where appropriate, hereinafter "construction") under this Agreement and subcontracts hereunder, incorporate the following "Heavy" wage determination schedule and conformances: GA90 Modification 0 (1/03/14), found at: http://www.wdol.gov/wdol/scafiles/davisbacon/GA90.dvb, and attached hereto as Exhibit J-3 .

2. For all construction under this Agreement and subcontracts hereunder, on sheltered enclosures with walk-in access for the purpose of housing persons, machinery, equipment, incorporate the following "Building" wage determination schedule: GA126 Modification 1 (1/17/14) found at http://www.wdol.gov/wdol/scafiles/davisbacon/GA126.dvb, and attached hereto as Exhibit J-4 .

3. For all construction under this Agreement and subcontracts hereunder, on paved roads and other paved surfaces, please use GA7 Modification 0 (1/3/14) "Highway" schedule found at http://www.wdol.gov/wdol/scafiles/davisbacon/GA7.dvb, and attached hereto as Exhibit J-5 .

---

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

---

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of “identifiers” that indicate whether the particular rate is union or non-union.

Union Identifiers

An identifier enclosed in dotted lines beginning with characters other than “SU” denotes that the union classification and rate have found to be prevailing for that classification. Example: PLUM0198-005 07/01/2011. The first four letters , PLUM, indicate the international union and the four-digit number, 0198, that follows indicates the local union number or district council number where applicable , i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2011, following these characters is the effective date of the most current negotiated rate/collective bargaining agreement which would be July 1, 2011 in the above example.

Union prevailing wage rates will be updated to reflect any changes in the collective bargaining agreements governing the rates.

0000/9999: weighted union wage rates will be published annually each January.

Non-Union Identifiers

Classifications listed under an “SU” identifier were derived from survey data by computing average rates and are not union rates; however, the data used in computing these rates may include both union and non-union data. Example: SULA2004-007 5/13/2010. SU indicates the rates are not union majority rates, LA indicates the State of Louisiana; 2004 is the year of the survey; and 007 is an internal number used in producing the wage determination. A 1993 or later date, 5/13/2010, indicates the classifications and rates under that identifier were issued as a General Wage Determination on that date.

Survey wage rates will remain in effect and will not change until a new survey is conducted.

---

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

an existing published wage determination

a survey underlying a wage determination

a Wage and Hour Division letter setting forth a position on a wage determination matter a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

*4.)* All decisions by the Administrative Review Board are final.

---

*END OF GENERAL DECISION*

Exhibit J-3

U.S. Department of Labor

Wage and Hour Division
Washington, D.C. 20210

JUN 2 2014

Ms. Nikky Ude
Department of Energy
1000 Independence Avenue, SW
Washington, DC 20585
Nikky.Ude@hq.doe.gov

RE: Project No.: Units 3 and 4 of Vogtle Electric Plant
Wage Decision No.: GA140090 Mod. 0
Location: Burke County, GA
WHD Number: 4790

Dear Ms. Ude:
This is in response to your request proposing the additional classifications and wage rates to the above wage decision in accordance with 29 CFR 5.5(a)(1)(ii).

| PROPOSED CLASSIFCATIONS | PROPOSED HOURLY RATE | FRINGE BENEFITS |
|---|---|---|
| Asbestos Worker/Insulator | $23.92 | $12.04 |
| Millwright | $26.95 | $11.55 |
| Sprinkler Fitter | $25.99 | $15.87 |
| Mechanic Services | $18.21 | $12.35 |
| Machinist | $26.95 | $11.55 |
| Well Driller | $24.55 | $12.35 |

The request for Mechanic Services is not approved because the work to be performed by this classification may be performed by a classification already included in the wage decision [see 29 C.F.R., section 5.5(a)(1)(ii)(A)(1)]. The appropriate classification is Mechanic at a rate of $24.55 per hour plus $12.30 in fringe benefits and shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed.

The Machinist is not subject as the Davis-Bacon Act provides that prevailing wages are to be paid to all mechanics and laborers employed directly upon the site of work. The regulations [see 29 C.F.R., section 5.2(1)] define the site of work as limited to the physical place or places where the construction called for in the contract will remain when work on it is completed and other adjacent or nearby property used in the construction.

The remaining classifications and wage rates are approved and the wage rates proposed must be paid to all workers performing work within the classifications under this contract from the first day work is performed.

**CONFIDENTIAL& PROPRIETARY**
**CONFIDENTIAL TRADE SECRET INFORMATION**

Your request has been conformed consistent with All Agency Memorandum 213 ( http://www.wdol.gov/aam/aam213.pdf) which describes the conformance process in detail and the basis on which your proposed rate was denied. Any requests for appeal of the conformance decision must be made within thirty (30) days from the date of this letter. If you have any questions or concerns regarding this conformance decision, please contact the undersigned at the telephone or email address listed below.

Sincerely,

/s/ T. Holmes for

Kenneth Reinshuttle

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of "identifiers" that indicate whether the particular rate is union or non-union.

Union Identifiers

An identifier enclosed in dotted lines beginning with characters other than "SU" denotes that the union classification and rate have found to be prevailing for that classification. Example: PLUM0198-005 07/01/2011. The first four letters , PLUM, indicate the international union and the four-digit number, 0198, that follows indicates the local union number or district council number where applicable , i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2011, following these characters is the effective date of the most current negotiated rate/collective bargaining agreement which would be July 1, 2011 in the above example.

Union prevailing wage rates will be updated to reflect any changes in the collective bargaining agreements governing the rates.

0000/9999: weighted union wage rates will be published annually each January.

Non-Union Identifiers

Classifications listed under an “SU” identifier were derived from survey data by computing average rates and are not union rates; however, the data used in computing these rates may include both union and non-union data. Example: SULA2004-007 5/13/2010. SU indicates the rates are not union majority rates, LA indicates the State of Louisiana; 2004 is the year of the survey; and 007 is an internal number used in producing the wage determination. A 1993 or later date, 5/13/2010, indicates the classifications and rates under that identifier were issued as a General Wage Determination on that date.

Survey wage rates will remain in effect and will not change until a new survey is conducted.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

an existing published wage determination

a survey underlying a wage determination

a Wage and Hour Division letter setting forth a position on a wage determination matter

a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations
Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.

Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION

**EXHIBIT J-5**

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of “identifiers” that indicate whether the particular rate is union or non-union.

Union Identifiers

An identifier enclosed in dotted lines beginning with characters other than “SU” denotes that the union classification and rate have found to be prevailing for that classification. Example: PLUM0198-005 07/01/2011. The first four letters , PLUM, indicate the international union and the four-digit number, 0198, that follows indicates the local union number or district council number where applicable , i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. The date, 07/01/2011, following these characters is the effective date of the most current negotiated rate/collective bargaining agreement which would be July 1, 2011 in the above example.

Union prevailing wage rates will be updated to reflect any changes in the collective bargaining agreements governing the rates.

0000/9999: weighted union wage rates will be published annually each January.

Non-Union Identifiers

Classifications listed under an "SU" identifier were derived from survey data by computing average rates and are not union rates; however, the data used in computing these rates may include both union and non-union data. Example: SULA2004-007 5/13/2010. SU indicates the rates are not union majority rates, LA indicates the State of Louisiana; 2004 is the year of the survey; and 007 is an internal number used in producing the wage determination. A 1993 or later date, 5/13/2010, indicates the classifications and rates under that identifier were issued as a General Wage Determination on that date.

Survey wage rates will remain in effect and will not change until a new survey is conducted.

WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

an existing published wage determination

a survey underlying a wage determination

a Wage and Hour Division letter setting forth a position on a wage determination matter

a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour Regional Office for the area in which the survey was conducted because those Regional Offices have responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to: Branch of Construction Wage Determinations

Wage and Hour Division
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

**CONFIDENTIAL TRADE SECRET INFORMATION**

Wage and Hour Administrator
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board
U.S. Department of Labor
200 Constitution Avenue, N.W.
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION

**Exhibit K – Flow Down Clauses**

| Section and Title | Limitations |
|---|---|
| 2.3.3 Project Information Management Systems | None. |
| 2.5.2 Access for Southern Nuclear Co-Located Personnel | None. |
| 2.6 Performance Standards | None. |
| 2.11 Clean-up and Waste Disposal | Flow-down is limited to on-Site Subcontractors. |
| 2.13 Hazardous Materials | Flow-down is limited to on-Site Subcontractors. |
| 2.15 Safety Program | The flow-down is compliance with Contractor's Project Safety Manual (i.e., not provision of a manual) and compliance with the provisions of 2.15 that apply to Subcontractors and on-Site Personnel. |
| 2.17.5 through 2.17.10 Subcontracting | None. |
| 2.19 Documentation Necessary for ITAACs | Flow-down is limited to Subcontractors and Vendors whose work involves ITAACs. |
| 2.20 Support for Government Approvals and Requests | None. |
| 4.2 Owners' Right to Inspect, Stop and Re- perform Work | None. |
| 5.1 Quality Assurance | None. |
| 5.3 Access for Inspection and Audit | None. |
| Article 17 Insurance | To the extent an OCIP is not in place, Subcontractors will be required to meet the insurance requirements imposed on Contractor under Article 16 as appropriate to the Subcontractor's scope of work. |
| Article 22 Protected Information and Export Control | Flow-down for Protected Information is limited to Vendors or Subcontractors to which Confidential and Proprietary Information is disclosed. |

**Exhibit K – Flow Down Clauses**

| Section and Title | Limitations |
|---|---|
| 24.1 Transfer of Title | Flow-down is limited to ensuring that passage of title conforms to Contractor's obligation under this section. |
| 24.1.2 – 24.1.3 Intellectual Property | None |
| Article 25 Applicable Laws and Regulations | None. |
| Article 26 Equal Employment Opportunity | None. |
| Article 28 Site and Security Rules and Policies | Flow-down is limited to Subcontractors performing Work on-Site. |
| Article 29 Unescorted Access | Flow-down is limited to Subcontractors whose personnel will apply for or have been granted unescorted access to VEGP Units 1 and 2 or Unit 3 or Unit 4. |
| Article 30 Fitness for Duty | None. |
| Article 31 Free Flow of Information | None. |
| Article 32 No Toleration of Unacceptable Behaviors | None. |
| Article 33 Non-English Speaking Workers | Flow-down is limited to Subcontractors performing Work on-Site. |
| Article 35 Qualifications and Protection of Assigned Personnel | None. |
| 36.1 Technical Documentation | None. |
| 36.2 Accounting Records | None. |
| 36.3 Maintenance of Records Generally | Flow-down is limited to Subcontractors and Vendors subject to 10 C.F.R. § 50.71 and other applicable Laws. |
| 36.4 Right to Audit | None. |
| 36.6 Sales Tax Records | None. |
| 37.3 Cooperation and Audit | None. |

# Exhibit L – Trend Program

Contractor will implement a robust Trend Program for the Vogtle Units 3 & 4 Construction Completion project. The Contractor Trend Program will provide input to and inform the Owner change control program for the overall Project.

Program Structure

The Contractor Trend Program will be structured such that the process and outputs will inform Contractor Project Management as to the running status of change and its cumulative effect on available contingencies. The actual process of change identification, quantification, and acceptance (or resolution) will be set out in a project procedure, providing standard terminology, responsibilities, accountabilities, cycle times, and deliverables, such that the Bechtel project team has the rules of the road for managing change as it happens.

The Contractor Trend Program has 3 main objectives:

- Provide a platform for engaging project leadership in the management of the contract cost and schedule baselines and their defined contingencies.
- Provide a transparent process for the identification, quantification, and resolution of cost and/or schedule changes within the Contractor scope of Work as they occur. Such cost and schedule changes may include trends potentially impacting Target Construction Cost and/or Target Completion Date(s).
- Provide information on the nature of change and the rate at which change is occurring and its influence on established contingencies, as well as inform the overarching Owner change control program.

Scope and Engagement

The Contractor Trend Program will envelope the scope of work under contract and will be owned by the Contractor Project Manager. As the senior leader, setting change management as a priority drives behavior and participation. While Contractor Project Controls may ‘keep the books’, the Contractor Project Manager sets the tone, and holds the project team accountable for promoting a cost and schedule conscious attitude. With the leadership protocol set, identification of change is open to everyone on the project. In the end, driving for wide understanding of ‘what’s in the budget’ and empowering everyone to raise a hand when they encounter something different, is the lifeblood of the program.

Administering the Program

The Contractor Trend Program will be administered on three fronts: (1) daily handling of individual trends in a consistent manner, (2) weekly meetings to review and adjudicate trends, and (3) monthly reporting of overall status of the program (metric-based information) including contingency balance.

# Exhibit L – Trend Program

The basic process will be as follows:

1. Trends are identified, entered into the Trend Log, and initially classified as "Potential."
2. Information is gathered, studies performed, etc. as required to substantiate and capture the extent of condition and an estimated value (order of magnitude hours and dollars) for each Trend. A determination is also made as to whether the Trend relates to in-scope or out-of-scope work.
3. Each Trend is presented in the Bechtel Trend Meeting, and if accepted, is classified as "Resolved." If not accepted and follow up actions are requested, the Trend is classified as "Unresolved" and will be revisited in a later Bechtel Trend Meeting.
4. Each month, in-scope trends that have been "Resolved" are summarized and an offset to available contingency is recorded (either positive or negative). Out-of-Scope Trends or Trends that adjust the project Target Assumptions that have been "Resolved" are forwarded to contract administration.
5. A Monthly Trend Report is prepared, including the full Trend Log, and a summary report showing the activity for the month and status of available contingency.

Integration of the Contractor Trend Program with Owner Change Control

The Contractor Trend Program will work within the broader Owner change control program for the Project. The overarching Owner change control program will encompass all the engineering, procurement, construction, and other aspects of the project. The Contractor Trend Program will include identified interaction points and information exchange needed to support the Owner change control program.

A Monthly Trend Report will be prepared that will include the status of individual trends, metrics on Trends at the major status points (Potential, Unresolved, and Resolved), as well as a presentation of how Resolved Trends have influenced the available contingency balance both for the month and since the baseline was established. The Monthly Trend Report will also include information on Out-of-Scope Trends or Trends that adjust the Target Assumptions, which would be initial inputs to the Owner change control program.

The Monthly Trend Report will be included in Contractor's overall monthly report to Owners for the Project.

**Exhibit M – Target Construction Cost and List of Excluded Costs**

| Target Construction Cost Summary | | |
|---|---|---|
| **Cost Category** | **Hours (in 1,000s)** | **Estimated Cost (in millions)** |
| Direct Craft Labor | [***] | [***] |
| Field Indirects | [***] | [***] |
| Field Non-Manual Services | [***] | [***] |
| Home Office Services | [***] | [***] |
| | **Subtotal** | [***] |
| Escalation | | [***] |
| Craft Processing Related Costs (DIC insurance and others) | | [***] |
| Construction Contingency | | [***] |
| Welder Incentives | | [***] |
| **Target Construction Cost** | | [***] |

Excluded Costs

The following costs are "Excluded Costs" and will not be included in the calculation of Combined Construction Costs:

(a) any per diems or other incentives paid to craft labor engaged in performance of the Work (except for such payments to welders);
(b) any Taxes paid in connection with the Work or Taxes included in payments to Contractor-Managed Subcontractors;
(c) costs paid in connection with any non-resident sales tax bond required to be provided by Contractor;
(d) amounts paid to Bechtel Power Corporation under the Amended and Restated Staff Augmentation Agreement;
(e) amounts incurred by Southern Nuclear or any of the Owners with respect to secondees provided to Bechtel Power Corporation under the Amended and Restated Staff Augmentation Agreement;
(f) amounts paid by Owners to Contractor-Managed Subcontractors with respect to work performed by them prior to the Effective Date;
(g) amounts paid by Owners to Contractor-Managed Subcontractors to the extent that such amounts paid exceed the amounts recommended for payment by Contractor pursuant to Section 3.3.3, but only to the extent that such amounts are never required to be paid to such subcontractors;
(h) amounts paid by Owners to Contractor-Managed Subcontractors with respect to work performed by them for work scope that is not related to the achievement of Final Completion;

(i) amounts paid by Owners to Contractor with respect to support provided to the Owners in connection with DOE loan guarantees and/or dealing with Government Authorities in accordance with Section 2.20 of the Agreement;

(j) amounts paid by Owners to Contractor or Contractor-Managed Subcontractors in order to complete or reperform work performed prior to the Effective Date, including work identified in the Legacy Work Packages and the Completed Work Packages listed in Exhibit V, and that portion of work performed prior to the Effective Date and included in the Work in Progress Work Packages listed in Exhibit V.

**[INSERT DATE]**

The undersigned ________________________, ________________________ of Bechtel Power Corporation ("Contractor") does hereby certify and warrant as follows:

1. All Parties Paid. Pursuant to the terms of the Construction Completion Agreement between Contractor and Georgia Power Company ("GPC"), for itself and as agent for Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners (collectively, "Owners"), dated as of _____________, 2017 (the "Agreement"), Contractor represent that, upon Contractor's receipt of the final payment in the amount of $[______________], invoiced to Owners on [______________], (i) Contractor will have received full, complete, and final payment for any and all materials, equipment, services and labor furnished by Contractor to or for the benefit of the Vogtle Project (the "Work"), and (ii) Subcontractors supplying labor or materials to Contractor in connection with the Work and the Vogtle Project have been paid in full, or will be paid in full promptly from the proceeds of this payment pursuant to the terms of those parties' respective agreements with Contractor for labor, services, equipment or materials furnished in relation to the Work and the Vogtle Project.

2. Waiver of Lien Claims. Upon Contractor's receipt of the final payment in the amount of $[______________], invoiced to Owners on [______________], Contractor waives any and all liens, and releases and forever discharges Owners, any construction lender, each and all of their respective directors, officers, principals, partners, employees, agents, subsidiaries, parent and related firms, successors, insurers, lenders, sureties, and assigns from any and all actions, causes of action, liens, bond rights, stop notices, debts, dues, accounts, covenants, agreements, judgments, claims, and demands of whatsoever nature or character for nonpayment for the Work for which payment is owed and is being made pursuant to the Agreement.

3. Representations. Contractor represents that with regard to each Subcontract with a total current value in excess of $150,000.00, Contractor has secured from such Subcontractor a waiver of lien rights in the form attached to the Agreement as Exhibit ___, with respect to services, labor, materials and/or equipment supplied to or for the benefit of Owners and/or the Vogtle Project for which proper and acceptable invoices have been received from such Subcontractor and processed by Contractor.

4. Authorization. Contractor warrants that it is the sole owner of any and all lien claims related to the Work for which the subject payment is owed, that it has not sold, assigned or conveyed such lien claims to any other party, and that the individual whose signature appears below has personal knowledge of these matters and is fully authorized and qualified to make these representations on behalf of Contractor.

**Exhibit Q – Lien Waivers**

5. Scope of Lien Release . The representations and lien release contained herein are independent covenants and operate, and are effective with respect to, labor, services, materials, or equipment provided to the Project or the Property by or through Contractor, under the Agreement, whether modified orally or in writing, and whether extra or additional to the Agreement.

**Exhibit R - Parent Company Guarantee**

# GUARANTEE

THIS Guarantee ("Guarantee"), dated and effective as of ________ 2017, is made and entered into by BECHTEL NUCLEAR, SECURITY & ENVIRONMENTAL, INC., a Delaware corporation (the "Guarantor"), in favor of GEORGIA POWER COMPANY, a Georgia corporation, OGLETHORPE POWER CORPORATION (AN ELECTRIC MEMBERSHIP CORPORATION), an electric membership corporation formed under the laws of the State of Georgia, MUNICIPAL ELECTRIC AUTHORITY OF GEORGIA, a public body corporate and politic and an instrumentality of the State of Georgia, MEAG POWER SPVJ, LLC, MEAG POWER SPVM, LLC, MEAG POWER SPVP, LLC, each a Georgia limited liability company, and THE CITY OF DALTON, GEORGIA, an incorporated municipality in the State of Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners (collectively, the "Beneficiary"). Individually, the Guarantor and Beneficiary may be referred to as a "Party" and together the "Parties."

**WHEREAS** , Georgia Power Company, for itself and as agent for Oglethorpe Power Corporation (An Electric Membership Corporation), Municipal Electric Authority of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, and The City of Dalton, Georgia, acting by and through its Board of Water, Light and Sinking Fund Commissioners , on the one hand, and Bechtel Power Corporation, a subsidiary of the Guarantor ("Contractor"), on the other hand, have entered into that certain Construction Completion Agreement with respect to the completion of construction of Units 3 & 4 at the Vogtle plant site, dated as of _____________, 2017, including without limitation the Exhibits attached thereto (as may be amended, extended, supplemented, or restated, the "Agreement");

**WHEREAS** , the Agreement requires the Guarantor to deliver this Guarantee to the Beneficiary; and

**WHEREAS** , the Guarantor expects to derive substantial direct and indirect benefit from the transactions contemplated by the Agreement.

**NOW, THEREFORE** , for and in consideration of the foregoing premises, the mutual agreements contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Guarantor agrees as follows:

## ARTICLE 1 - RESERVED

## ARTICLE 2 - GUARANTEE

2.1 *Guarantee.* Guarantor hereby unconditionally and irrevocably guarantees to the Beneficiary and its successors and permitted assigns, upon the terms and conditions herein, the prompt and full payment, when due and owing, of all amounts now and/or hereafter due to be paid by the Contractor under the Agreement, including without limitation payment of all damages arising from any breach by Contractor of its obligations under the Agreement, all with such interest as may accrue under the Agreement (collectively, whether now or hereafter existing or arising, the "Guaranteed Obligations"). If Contractor fails to pay any Guaranteed Obligations when due, then

**Exhibit R - Parent Company Guarantee**

Guarantor will immediately pay such Guaranteed Obligations following written notice in accordance with this Guarantee and subject to the terms and conditions provided herein.

2.2 *Guarantee Absolute.* (a) Guarantor absolutely guarantees that the Guaranteed Obligations will be paid strictly in accordance with the terms of the Agreement, regardless of any law, rule or regulation now or hereafter in effect in any jurisdiction affecting any of such terms or the obligations of Contractor or any rights of the Beneficiary with respect thereto, including, without limitation any bankruptcy, restructuring, insolvency or reorganization laws, rules or regulations. Without limiting the foregoing, any bankruptcy or insolvency or related discharge or release of Contractor shall not affect the Guarantor's obligations hereunder. This Guarantee constitutes a guarantee of payment and not of collection. The obligations of the Guarantor hereunder are several from the Contractor or any other person and are primary obligations concerning which the Guarantor is the principal obligor. The liability of Guarantor under this Guarantee shall be direct and immediate and not conditional or contingent upon the pursuit of any rights or remedies against the Contractor or any other person, but subject to Section 2.3(e) hereof, or against securities or liens available to the Beneficiary or its successors or permitted assigns.

(b) Notwithstanding anything to the contrary herein, as a condition to enforcement of this Guarantee against Guarantor, Beneficiary shall be required to show: (i) a copy of the written notice sent by Beneficiary or its authorized representative to the Contractor before making the claim under this Guarantee, specifying the amount of the payment (including without limitation any damages) not paid by Contractor and requesting the Contractor to pay the same (except that no such notice to the Contractor shall be required as a condition to enforcement of this Guarantee against Guarantor if the Contractor and/or its assets are the subject of a bankruptcy, insolvency or similar proceeding); and (ii) a letter signed by Beneficiary's authorized representative certifying that the Contractor has failed to remedy the non-payment within any applicable cure period set forth in the Agreement.

(c) The liability of the Guarantor under this Guarantee shall, subject to Section 2.2(b) and Section 2.3(e) hereof, be irrevocable, absolute and unconditional irrespective of, and the Guarantor hereby irrevocably waives any defenses and/or rights of discharge it may now have or hereafter acquire in any way relating to, any or all of:

> (i) any change in the time, manner or place of payment of, or in any other term of, all or any of the Agreement (including any of the Guaranteed Obligations), or any other amendment, extension, supplement, restatement, modification or waiver of, or any renewal, discharge, release, compromise, subordination or consent to departure from, the terms of such Agreement (including any of the Guaranteed Obligations);
>
> (ii) any change, restructuring or termination of the corporate structure or existence of Guarantor, the Contractor or any of their respective subsidiaries;
>
> (iii) any lack of validity or enforceability of the Agreement (including any of the Guaranteed Obligations) or any agreement or instrument relating thereto;

**Exhibit R - Parent Company Guarantee**

(iv) any failure of the Beneficiary to disclose to either the Contractor or the Guarantor any information relating to the business, condition (financial or otherwise), operations, performance, properties or prospects of either the Contractor or any of its subsidiaries now or hereafter known to the Beneficiary (the Guarantor waiving any duty on the part of the Beneficiary to disclose such information);

(v) any taking or failure to take any action (including, without limitation, any lack of due diligence) by the Beneficiary in the collection or protection of or realization upon or otherwise in respect of any collateral securing the Agreement (including any of the Guaranteed Obligations);

(vi) any circumstance whatsoever or any act of the Beneficiary or any existence of or reliance on any representation by the Beneficiary that might otherwise constitute a legal or equitable defense available to, or a discharge of, the Guarantor; or

(vii) any waiver or release or exercise or refrain from exercising any rights or remedies against Contractor,

provided that Guarantor does not waive, and shall have the benefit of and reserves the right to assert, any defenses and/or rights of discharge available to the Contractor to the extent that any claims by Owners (as defined in the Agreement) against Contractor are released and/or otherwise compromised pursuant to a written agreement between authorized representatives of Contractor and Owners (as defined in the Agreement).

(d) This Guarantee shall continue to be effective or be reinstated, as the case may be, if at any time any payment of any of the Guaranteed Obligations is voided, rescinded or must otherwise be returned by the Beneficiary or any other person as a preference or fraudulent transfer or otherwise for any reason, including, without limitation, upon or after the insolvency, bankruptcy, or reorganization of the Contractor, all as though such payment had not been made. This Guarantee shall continue to be effective if Contractor or Guarantor merges or consolidates with or into another entity, loses its separate legal identity or if Contractor ceases to exist.

No action which the Beneficiary shall take or fail to take in connection with the Guaranteed Obligations, or any security for the payment or performance of any of the Guaranteed Obligations, nor any course of dealing with the Contractor or any other person, shall release Guarantor's obligations hereunder, affect this Guarantee in any way, or afford Guarantor any recourse against the Beneficiary.

(e) In the case of an event of default under the Agreement which has not been cured during any applicable cure period set forth in the Agreement, or with regard to the non-payment of any of the Guaranteed Obligations, Guarantor hereby consents and agrees that the Beneficiary shall have the right to enforce its rights, powers, and remedies thereunder or hereunder or under any other instrument now or hereafter evidencing, securing, or otherwise relating to the Guaranteed Obligations, and apply any payments or credits received from the Contractor or Guarantor or realized from any security, in any manner and in any order as the Beneficiary, in its sole discretion, shall see fit, and all rights, powers, and remedies available to the Beneficiary in such event shall be nonexclusive and cumulative of all other rights, powers, and remedies provided thereunder or hereunder or by law or in equity. If the Guaranteed Obligations are partially paid by reason of the election of the Beneficiary, its successors or permitted assigns, to pursue any of the remedies available to the Beneficiary, or if the Guaranteed Obligations are otherwise partially paid, this Guarantee shall nevertheless remain in full force and effect less any such amounts indefeasibly paid to the Beneficiary in permanent reduction of the Guaranteed Obligations, and Guarantor shall remain liable for the remaining balance of the Guaranteed Obligations even though any rights which Guarantor may have against the Contractor may be destroyed or diminished by the exercise of any such remedy.

*2.3 Waivers and Acknowledgments* . (a) Without prejudice to the requirement for notice set forth in Section 2.1 hereof and the requirements set forth in Section 2.2(b) hereof, Guarantor hereby waives promptness, diligence, presentment, demand of payment, acceptance, notice of acceptance, suretyship defenses, protest, notice of protest, notice of dishonor or default, notice of any sale of any collateral or security, notice of the release or discharge of any person or collateral and any other notices with respect to the Agreement (including any of the Guaranteed Obligations) and/or this Guarantee.

(b) The Guarantor hereby unconditionally and irrevocably waives all defenses based on suretyship.

(c) The Guarantor hereby unconditionally and irrevocably waives all rights to require Beneficiary to commence any action to collect any or all of the Guaranteed Obligations from the Contractor or any other person before demanding payment under this Guarantee, including, without limitation, all of its rights under the provisions of O.C.G.A. Section 10-7-24, as amended.

(d) The Guarantor hereby unconditionally and irrevocably waives any right to revoke this Guarantee and acknowledges that this Guarantee is continuing in nature and applies to all Guaranteed Obligations, whether existing now or in the future. The provisions of this Guarantee shall extend and be applicable to all renewals, amendments, extensions, restatements, consolidations, and modifications of the Agreement (including any of the Guaranteed Obligations).

(e) The Guarantor hereby unconditionally and irrevocably waives any defense based on any right of offset, set-off or counterclaim against or in respect of the obligations of the Guarantor hereunder; *provided* , *however* , notwithstanding anything to the contrary herein, (i) the liability of Guarantor shall be subject to the same limitations of liability and other liability protections applicable to the Contractor's obligations and liabilities under the express terms of the Agreement, and (ii) Guarantor shall have the full benefit of, and reserves the right to assert, any and all defenses, counterclaims, and set-off rights available to the Contractor with respect to any obligations and liabilities arising under the Agreement, except for defenses, counterclaims, and setoff rights (x) waived elsewhere in this Guarantee, (y) arising out of or related to bankruptcy, insolvency, reorganization, dissolution or liquidation of the Contractor or the power or authority of Contractor to enter into the Agreement or to perform its obligations thereunder, or (z) related to any lack of validity or enforceability of the Agreement, any Guaranteed Obligations or any other documents executed in connection with the Agreement (including any of the Guaranteed Obligations).

**Exhibit R - Parent Company Guarantee**

*2.4 Subrogation* . Notwithstanding any payment or payments or performance made by the Guarantor hereunder, the Guarantor hereby irrevocably waives any and all rights of subrogation to the rights of the Beneficiary against the Contractor and any and all rights of reimbursement, assignment, indemnification or implied contract or any similar rights (including without limitation any statutory rights of subrogation under Section 509 of the Bankruptcy Code, 11 U.S.C. § 509) against the Contractor until such time as all of the Guaranteed Obligations have been indefeasibly paid in full. If, notwithstanding the foregoing, any amount shall be paid to the Guarantor on account of such subrogation or similar rights at any time when all of the Guaranteed Obligations shall not have been indefeasibly paid in full, such amount shall be held by the Guarantor in trust for the Beneficiary and shall be turned over to the Beneficiary in the exact form received by the Guarantor, to be applied against the Guaranteed Obligations in such order as the Beneficiary may determine in its sole discretion.

2.5 *Payments Free and Clear* . (a) All payments under this Guarantee shall be made in immediately available U.S. Dollars and without any deduction or withholding for or on account of any tax imposed upon Beneficiary or the Guarantor unless such deduction or withholding is required by any applicable law, as modified by the practice of any relevant governmental revenue authority, then in effect. If the Guarantor is so required to deduct or withhold, then the Guarantor will (i) pay to the relevant authorities the full amount required to be deducted or withheld (including the full amount of tax required to be deducted or withheld from any additional amount paid by the Guarantor to the Beneficiary under this Section 2.5) promptly upon the earlier of determining that such deduction or withholding is required or receiving notice that such an amount has been assessed against the Beneficiary, and in any event before penalties attach thereto or interest accrues thereon, (ii) promptly forward to the Beneficiary an official receipt (or certified copy), or other documentation reasonably acceptable to the Beneficiary, evidencing such payment to such authorities and, (iii) in addition to the payment which the Beneficiary is otherwise entitled under this Guarantee, if such withholding is on account of any tax imposed upon Guarantor, pay to the Beneficiary such additional amount as is necessary to ensure that the net amount actually received by the Beneficiary (free and clear of taxes assessed against the Guarantor) will equal the full amount the Beneficiary would have received had no such deduction or withholding been required.

(b) If (i) the Guarantor is required to make any deduction or withholding on account of any tax from any payment made by it under this Guarantee, (ii) the Guarantor does not make the deduction or withholding, and (iii) a liability for or on account of the tax is therefore assessed directly against the Beneficiary, the Guarantor shall pay to the Beneficiary, promptly after demand, the amount of the liability (including any related liability for interest or penalties).

## ARTICLE 3 - REPRESENTATIONS AND WARRANTIES

The Guarantor hereby represents and warrants to Beneficiary as of the effective date of this Guarantee as follows:

**Exhibit R - Parent Company Guarantee**

3.1 *Organization* . The Guarantor is a corporation duly organized, validly existing and in good standing under the laws of Delaware.

3.2 *Authorization; No Conflict* . The execution and delivery by the Guarantor of this Guarantee and the performance by the Guarantor of its obligations hereunder (i) are within the Guarantor's corporate powers, (ii) have been duly authorized by all necessary corporate action, do not contravene its organizational documents or any agreement, law or regulation applicable to or binding on the Guarantor or any of its properties, (iii) do not require any filings be made or notices be given which have not been made or given, and (iv) do not require the consent or approval of any person which has not already been obtained or the satisfaction or waiver of any conditions precedent to the effectiveness of this Guarantee that have not been satisfied or waived.

3.3 *Enforceability* . This Guarantee constitutes the legal, valid and binding obligation of the Guarantor enforceable against the Guarantor in accordance with its terms, except to the extent that such enforceability may be limited by applicable bankruptcy, insolvency, dissolution, reorganization, moratorium, liquidation or other similar laws affecting creditors' rights generally and by general principles of equity (regardless of whether enforcement is sought in a proceeding in equity or at law).

3.4 *No Bankruptcy Proceedings* . There are no bankruptcy proceedings pending or being contemplated by Guarantor or, to its knowledge, threatened against it.

3.5 *No Legal Proceedings* . There are no legal proceedings that would be reasonably likely to materially adversely affect Guarantor's ability to perform this Guarantee.

3.6 *Subsidiary.* Contractor is a direct or indirect subsidiary of Guarantor.

3.7 *Execution.* The person executing this Guarantee below on behalf of Guarantor is duly authorized and empowered to execute and deliver this Guarantee on behalf of Guarantor.

ARTICLE 4 - MISCELLANEOUS

4.1 *Continuing Guarantee; Assignment* . This Guarantee is a continuing Guarantee and shall (i) remain in full force and effect until all of the Guaranteed Obligations, whenever arising, have been indefeasibly paid and satisfied in full, (ii) consistent with the terms hereof, apply to all Guaranteed Obligations whenever arising, (iii) be binding upon the Guarantor and its successors and assigns, and (iv) inure to the benefit of, and be enforceable by, the Beneficiary and its permitted assigns hereunder; provided that (A) no permitted assignment or other transfer by, through or under the Beneficiary shall operate to increase Guarantor's obligations hereunder, and (B) Guarantor shall receive full credit for any final, indefeasible payments made by it to the Beneficiary, its successors and permitted assigns with respect to the Guaranteed Obligations prior to the time Guarantor receives written notice of such assignment or succession. The Beneficiary may assign its rights or obligations under this Guarantee to any person to whom the benefit of the Agreement is assigned, without the prior written consent of the Guarantor. The Guarantor may not assign or delegate its rights or obligations under this Guarantee without (x) the prior written consent of the Beneficiary, which consent may be withheld in the Beneficiary's sole discretion, and (y) a written assignment and assumption agreement in form and substance reasonably acceptable to the Beneficiary.

4.2 *Survival.* Without prejudice to the survival of any of the other agreements of the Guarantor under this Guarantee, the agreements and obligations of the Guarantor contained in Sections 2.2(d), 2.5 and 4.5 shall survive the final, indefeasible payment in full of the Guaranteed Obligations and all of the other amounts payable under this Guarantee.

4.3 *Notices* . All notices, requests, demands and other communications which are required or may be given under this Guarantee shall be in writing and shall be deemed to have been duly given when actually received if (a) personally delivered; (b) transmitted by facsimile, electronic or digital transmission method; or (c) if sent by certified or registered mail, return receipt requested. In each case notice shall be sent:

(i) if to the Beneficiary:

Georgia Power Company
[ ]
Attention: [ ]

(ii) if to the Guarantor:

Bechtel Nuclear, Security & Environmental, Inc.
[ ]
Attention: [ ]

4.4 *Delay and Waiver* . No failure on the part of the Beneficiary to exercise, and no delay in exercising, any right hereunder shall operate as a waiver thereof; nor shall any single or partial exercise of any right hereunder preclude any other or further exercise thereof or the exercise of any other right. The remedies herein provided are cumulative and not exclusive of any remedies provided by law.

4.5 *Expenses* . Guarantor agrees to pay or reimburse the Beneficiary and any permitted assigns of the Beneficiary for its reasonable costs, charges and expenses (including reasonable fees and expenses of counsel) incurred in connection with and to the extent of the proper enforcement and/or collection of this Guarantee or occasioned by any non-payment of the Guaranteed Obligations or other breach by the Guarantor of any of its obligations under this Guarantee. The Beneficiary agrees to pay or reimburse Guarantor for its reasonable costs, charges and expenses (including reasonable fees and expenses of counsel) incurred in connection with defending legal proceedings brought by the Beneficiary to enforce this Guarantee if Guarantor prevails in such legal proceedings.

**Exhibit R - Parent Company Guarantee**

4.6 *Entire Agreement; Amendments* . This Guarantee and any agreement, document or instrument attached hereto or referred to herein integrate all the terms and conditions mentioned herein or incidental hereto and supersede all oral negotiations and prior writings in respect to the subject matter hereof. In the event of any conflict between the terms, conditions and provisions of this Guarantee and any such agreement, document or instrument, the terms, conditions and provisions of this Guarantee shall prevail. This Guarantee may only be amended or modified by an instrument in writing specifically referencing this Guarantee signed by each of the Guarantor and the Beneficiary and any permitted assigns of the Beneficiary.

4.7 *Headings* . The headings of the various Sections of this Guarantee are for convenience of reference only and shall not modify, define or limit any of the terms or provisions hereof.

4.8 *Governing Law* . This Guarantee shall be construed and interpreted, and the rights of the Parties determined, in accordance with the law of the State of Georgia without giving effect to principles of conflicts of law that would require the application of the laws of another jurisdiction.

4.9 *Disputes.*

(a) Waiver of Right to Trial by Jury . Each Party irrevocably waives any and all rights to trial by jury with respect to any and all disputes arising out of or in connection with this Guarantee, including disputes regarding the interpretation, scope or validity of this Guarantee or any alleged breach of any provision contained herein or any money owed hereunder (a “Dispute”).

(b) Consent to Jurisdiction and Service of Process . All judicial proceedings brought against Guarantor arising out of or relating to this Guarantee may be brought in the U.S. District Court for the Southern District of Georgia (or if such court does not have jurisdiction, the nearest court of the State of Georgia thereto with appropriate jurisdiction). By executing and delivering this Guarantee, Guarantor irrevocably (i) accepts generally and unconditionally the non-exclusive jurisdiction and venue of such court; (ii) waives any defense of *forum non conveniens* ; (iii) agrees that service of all process in any such proceeding in such court may be made by registered or certified mail, return receipt requested, to the Guarantor at its address for notices provided herein; (iv) agrees that Beneficiary retains the right to serve process in any other manner permitted by law or to bring proceedings against Guarantor in the courts of any other jurisdiction as may be permitted by law; and (v) without limiting the foregoing, also appoints and shall maintain Contractor as its agent for service of process.

4.10 *Severability* . Any provision of this Guarantee that shall be prohibited or unenforceable shall be ineffective to the extent of such prohibition or unenforceability without invalidating the remaining provisions hereof.

IN WITNESS WHEREOF, the Guarantor has caused this Guarantee to be duly executed and delivered by its duly authorized representative as of the day and year first above written.

**Exhibit S - Form of Confidentiality Agreement**

## CONFIDENTIALITY AGREEMENT

THIS CONFIDENTIALITY AGREEMENT (this "Agreement") is made as of the ___ day of _____________, 20__, by and between ___________________ (the "Disclosing Party') and ________________ (the "Recipient").

**WHEREAS** , the Disclosing Party is a party to the Construction Completion Agreement, dated as of _____________, between Georgia Power Company for itself and as agent for the Vogtle Owners (collectively "Owners") and Bechtel Power Corporation ("Bechtel") under which Bechtel will perform certain agreed-to services for Owners for the completion of the Vogtle 3 & 4 project ("Construction Completion Agreement"); and

**WHEREAS** , the Disclosing Party desires to disclose to Recipient certain confidential and/or proprietary information which is either marked as being confidential at the time of disclosure, or of a nature that the Recipient can reasonably be expected to ascertain the confidential nature of such information at the time of receipt (in either case, "Confidential and Proprietary Information") of Disclosing Party, Bechtel, Owners, Westinghouse Electric Company, LLC ("Westinghouse"), WECTEC Global Project Services Inc. ("WECTEC"), and/or another third party, as the case may be; and

**WHEREAS** , under the terms of the Construction Completion Agreement, the Disclosing Party and the Recipient are required to enter into this Agreement as a condition to disclosure of such Confidential and Proprietary Information to the Recipient.

**NOW THEREFORE** , for and in consideration of the premises and the mutual promises hereinafter set forth and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto hereby agree as follows:

1. Recipient shall maintain the confidentiality of all Confidential and Proprietary Information disclosed to it hereunder, and shall not use such Confidential and Proprietary Information for any purpose other than the purposes of construction, testing, completion and defense of ITAACs, startup, trouble-shooting, response to plant events, inspection, evaluation of system or component performance, scheduling, investigations, operation, maintenance, training, repair, licensing, modification, decommissioning and compliance with laws or the requirements of governmental authorities, in each case as it relates to the Vogtle 3&4 project (the "Purpose").

---

[2] Owners are defined as Georgia Power Company, a Georgia Corporation, Oglethorpe Power Corporation (An Electric Membership Corporation), an electric membership corporation formed under the laws of the State of Georgia, Municipal Electric Authority of Georgia, a public body corporate and politic and an instrumentality of the State of Georgia, MEAG Power SPVJ, LLC, MEAG Power SPVM, LLC, MEAG Power SPVP, LLC, each a Georgia limited liability company, and The City of Dalton, Georgia, an incorporated municipality in the State of Georgia acting by and through its Board of Water, Light and Sinking Fund Commissioners. Southern Nuclear Operating Company, Inc. ("SNC") is the licensed operator of Vogtle 3 and 4 and is Owners' agent for the purposes of implementation and administration of the Construction Completion Agreement.

**Exhibit S - Form of Confidentiality Agreement**

2. Recipient shall not transmit or further disclose such Confidential and Proprietary Information to any third party, including, without limitation, parent organizations of Recipient, sister organizations of Recipient, subsidiaries of Recipient, consultants of Recipient or subcontractors of Recipient, unless such third party has entered into a confidentiality agreement with Disclosing Party substantially in the form of this Agreement.

3. In the event that the Recipient or any of its representatives are requested or required in any proceeding or by any governmental authority to disclose any of the Confidential and Proprietary Information, the Recipient shall provide the Disclosing Party with prompt written notice of such request or requirement so that the Disclosing Party may seek a protective order or other appropriate remedy and/or waive compliance with the provisions of this Agreement. If, in the absence of a protective order or other remedy or the receipt of a waiver from the Disclosing Party, the Recipient or any of its representatives are nonetheless, in the written opinion of their counsel, legally compelled to disclose such information, it or its representatives may, without liability hereunder, disclose only that portion of the Confidential and Proprietary Information which such counsel advises the Recipient is legally required to be disclosed, provided that the Recipient exercises its reasonable efforts to preserve the confidentiality of the Confidential and Proprietary Information, including, without limitation, by cooperating with the Disclosing Party to obtain an appropriate protective order or other reliable assurance that confidential treatment will be accorded the Confidential and Proprietary Information.

4. Except where necessary in furtherance of the Purpose, Recipient shall not make any copy or in any way reproduce or excerpt such Confidential and Proprietary Information except as authorized by the Disclosing Party in writing prior to such reproduction or excerption. Any such copies or excerpts shall include all proprietary notices and designations. Upon the written request of the Disclosing Party, the Confidential and Proprietary Information provided hereunder and any such copies or excerpts thereof shall be returned to the Disclosing Party, or, at the sole option and request of the Disclosing Party, Recipient shall destroy such information and any such copies and/or excerpts and certify in writing to the Disclosing Party that such information has in fact been destroyed (but for a single copy retained for legal archival purposes, which shall continue to be subject to the provisions of this Agreement).

5. Nothing herein shall apply to any information which is:

(a) now generally known or readily available to the trade or public or which becomes so known or readily available without fault of the Recipient; or

(b) rightfully possessed by the Recipient without restriction prior to its disclosure hereunder by the Disclosing Party; or

(c) acquired from a third party without restriction, provided that the Recipient does not know, or have reason to know, or is not informed subsequent to disclosure by such third party and prior to disclosure by the Recipient that such information was acquired under an obligation of confidentiality.

**Exhibit S - Form of Confidentiality Agreement**

6. It is mutually understood that nothing herein shall be construed as granting or implying any right under any letters patent, or to use any Confidential and Proprietary Information claimed therein, or as permitting Recipient to unfairly obtain the right to use Confidential and Proprietary Information which becomes publicly known through an improper act or omission on its part.

7. Neither Owners, Bechtel, Westinghouse, WECTEC, nor their affiliates make any warranty or representation whatsoever to the Recipient as to the sufficiency or accuracy of the Confidential and Proprietary Information provided hereunder, the ability of Recipient to use the Confidential and Proprietary Information for its intended purpose, or as to the result to be obtained therefrom.

8. Neither Owners, Bechtel, Westinghouse, WECTEC, nor their affiliates, suppliers, or subcontractors of any tier shall be liable with respect to or resulting from the use (or the results of such use) or misuse of any Confidential and Proprietary Information furnished hereunder.

9. Nothing in this Agreement shall obligate the Disclosing Party to provide any specific information that it otherwise desires to withhold.

10. Recipient agrees to fully comply with all laws and regulations with regard to the Confidential and Proprietary Information transmitted hereunder.

11. Recipient shall not, at any time file, cause or authorize the filing of any patent application in any country in respect of any invention derived from the Confidential and Proprietary Information supplied hereunder.

12. Recipient shall not assign this Agreement. This Agreement shall be binding upon the Recipient and its successors and shall benefit and be enforceable by Owners, Bechtel, Westinghouse, or WECTEC and each of their respective successors and assigns.

13. If any of the terms of this Agreement are violated by Recipient, the Owners, Bechtel, Westinghouse, or WECTEC, as the case may be, shall be entitled to an injunction to be issued by any court of competent jurisdiction, enjoining and restraining the Recipient from such violation.

14. If any provision of this Agreement is held invalid in any respect, it shall not affect the validity of any other provision of this Agreement. If any provision of this Agreement is held to be unreasonable as to the time, scope or otherwise, it shall be construed by limiting and reducing it so as to be enforceable under then applicable law.

15. This Agreement shall be governed in accordance with the laws of the State of Georgia without giving effect to any choice of law, provision, or rule (whether of Georgia or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than Georgia.

**Exhibit S - Form of Confidentiality Agreement**

**IN WITNESS WHEREOF** , the parties have hereto set their respective signatures to this Agreement.

**Exhibit T - Lobbying Certificate**

**Certification for Contracts, Grants, Loans, and Cooperative Agreements**

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

# Exhibit U - Dispute Resolution Procedures

## Article 1. GENERAL

1.1. These Dispute Resolution Board Procedures ("DRB Procedures") specify the requirements for the DRB pursuant to Article 38 of the Construction Completion Agreement.

1.2. These DRB Procedures encompass: 1) general DRB requirements and authority; 2) regular meetings of the DRB with the Parties; 3) regular DRB hearings and determinations; 4) expedited DRB hearings and determinations; and 5) informal advisory DRB opinions. The Owners and the Contractor shall diligently cooperate with each other and with the DRB and shall perform such acts as may be necessary to obtain prompt, informed, cost-effective and expeditious resolution of any Contract Claim. These DRB Procedures do not modify the respective rights and duties of the Owners or the Contractor per the Construction Completion Agreement except as specifically provided herein.

1.3. Capitalized terms used herein are used as defined in the Construction Completion Agreement unless specifically indicated otherwise.

1.4. In the event that the Parties fail to resolve a Contract Claim, as determined by the Party asserting the Contract Claim, a Party may submit such Contract Claim to the DRB (as described in more detail below), with a copy to the other Parties.

1.5. Each Party agrees that its compliance with Article 38 and these DRB Procedures with regard to a Contract Claim is a condition precedent to such Party's commencing or pursuing any arbitration with respect to such Contract Claim.

1.6. To the extent a Party fails to submit to the authority of the DRB or fails to comply with these DRB Procedures, any such failure may be properly considered by the DRB as evidence that such Party's Contract Claim/position is not adequately supported.

1.7. "DRB Members" are the three members of the DRB, each of whom is a signatory to the DRB Member Agreement, as jointly selected by the Owners and the Contractor as provided herein, and any replacements of such DRB Members.

1.8. "DRB Member Agreement" is an agreement to which the individual DRB Members, the Owners, and the Contractor are parties, which establishes the DRB consistent with the requirements of these DRB Procedures.

1.9. "DRB Determination" means a written decision issued by the DRB on a Contract Claim submitted to it, either as a result of the Regular or Expedited hearing process. DRB Determinations shall be admissible in subsequent arbitration or other dispute resolution proceedings.

1.10. "DRB Proceeding" means the process that is commenced by submission of a Contract Claim to the DRB and that results in the issuance of a DRB Determination.

1.11. "Financial Interest" means any direct or indirect ownership interest, loans, receivables, or payables, except for holdings in mutual funds or exchange traded funds.

**Exhibit U - Dispute Resolution Procedures**

1.12. “Additional Project Parties” means past or present consultants, subconsultants, subcontractors and suppliers of all tiers engaged in connection with the Vogtle Units 3&4 project.

1.13. “Other Parties” means entities and individuals who have been engaged by any of the Owners or the Contractor in any capacity within the 10 years prior to September 30, 2017.

1.14. “Potential Conflict Parties” means, collectively, the Parties, the Additional Project Parties, the Other Parties, and the key individuals employed by each, as identified in a list compiled for this purpose by the Owners and Contractor.

1.15. Where applicable, the definition of “Contract Claim” as used in these DRB Procedures includes any related counterclaim that is asserted in accordance with these DRB Procedures.

Article 2. REQUIREMENTS FOR DRB MEMBERSHIP

2.1. Each prospective DRB Member shall individually represent that he/she is qualified and able to perform independently and impartially the duties set forth in Article 38 of the Construction Completion Agreement, these DRB Procedures and the DRB Member Agreement. It is imperative that DRB Members show no partiality to either the Contractor or the Owners, or have any conflict of interest. The DRB Members shall agree to abide by the Code of Ethics recommended by the Dispute Resolution Board Foundation.

2.2. Each DRB Member shall have the following professional experience and qualifications:

2.2.1 Experience with the interpretation and implementation of complex construction contracts and associated documents;

2.2.2 Experience in construction matters and the resolution of design and construction disputes relevant to the scope of work under the Construction Completion Agreement, and

2.2.3 Prior experience as a mediator or arbitrator with respect to complex construction disputes is preferred, but not required.

2.3. The DRB Chair shall also have administrative and dispute resolution experience and the ability to facilitate the DRB’s proceedings. It is also desirable for the DRB Chair to have substantial experience in construction dispute resolution, adjudication or arbitration, the interpretation of construction contract documents, and the analysis and resolution of construction disputes.

2.4. It is imperative that all members of the DRB be neutral, act impartially, and be free from any conflict of interest. The avoidance of an actual or perceived conflict of interest and/or bias is central to the effectiveness of the DRB. Consequently, the DRB Members shall meet the following criteria and limitations for membership:

**Exhibit U - Dispute Resolution Procedures**

2.4.1 Direct Employment: Individuals who are current or former employees of any of the Parties, or any of the Additional Project Parties that are currently engaged as to any aspect of the Vogtle Units 3&4 project, may not serve as DRB Members. Prospective DRB Members who are current or former employees of any of the Potential Conflict Parties must disclose that employment information in writing.

2.4.2 Attorney-Client Relationships: Attorneys who have been involved in the representation of any of the Parties, or Additional Project Parties in relation to the Vogtle Units 3&4 project, may not serve as DRB Members. Any past or present involvement in the representation of any of the Parties or Potential Conflict Parties must be disclosed in writing, along with any past or present representation of any of the Potential Conflict Parties by the prospective DRB Member's law firm.

2.4.3 Close Personal or Professional Relationships: Individuals with a close personal or professional relationship with a key individual of any of the Parties may not serve as DRB Members. All relationships with any individuals listed as Potential Conflict Parties or otherwise known to be associated with any of the Potential Conflicts Parties must be disclosed in writing.

2.4.4 Service on Other Mediation/Arbitration: All past and current service as a mediator or as an arbitrator on projects involving any of the Parties or Additional Project Parties must be disclosed in writing.

2.4.5 Prior Involvement: No DRB Member shall have had substantial prior involvement in the Vogtle Units 3&4 project, as determined by the Owners and the Contractor, except that prior service on a DRB relating to the Vogtle Units 3&4 project is not objectionable.

2.4.6 Financial Interest: No Member shall have any Financial Interest in any Party or any Financial Interest in the Construction Completion Agreement except for payment of its fees and expenses as provided herein or in the DRB Member Agreement. Prospective DRB Members with a Financial Interest in any of the Potential Conflict Parties, or a prior Financial Interest in any of the Project Parties or Additional Project Parties, must disclose those Financial Interests in writing.

2.4.7 Consultant: No DRB Member shall have been, nor for the duration of the DRB be, employed as a consultant or otherwise by any Party or its Personnel or, including as a representative for purposes of negotiations, unless any such relationship has been disclosed in writing to and approved by all Parties.

2.4.8 Advice: No DRB Member shall give advice to any Party or its Personnel concerning the conduct of the Construction Completion Agreement, other than in accordance with these DRB Procedures.

2.4.9 Ex-parte Communication: No DRB Member shall have any ex-parte communications with any Party at any time after their becoming a DRB Member, except as permitted otherwise by these DRB Procedures.

**Exhibit U - Dispute Resolution Procedures**

2.4.10 Confidentiality: Each DRB Member shall treat the details of the Construction Completion Agreement, all matters discussed with the DRB, and all the DRB's activities and DRB Hearings as private and confidential, and shall not publish, comment on or disclose them without the prior written consent of the Parties.

2.5. While serving as a DRB Member, no DRB Member shall participate in any discussion contemplating the creation of an agreement or making an agreement with any of the Parties, their Personnel or any current Additional Project Party regarding present or future employment or fee-based consulting services, or any other business arrangement after ceasing to act as a DRB Member or after the Construction Completion Agreement is completed.

2.6. Except for their respective participation in any DRB proceeding, none of the Parties shall solicit advice or consultation from the DRB Members, and the DRB Members shall refrain from offering or providing such advice or consultation.

Article 3. ESTABLISHMENT OF THE DRB

3.1. The Owners and the Contractor shall meet to exchange lists of the Additional Project Parties, Other Parties, and their key personnel.

3.2. The Owners and the Contractor shall discuss and establish the qualifications upon which prospective DRB Members are to be evaluated and to jointly agree on three or more prospective DRB Members. Upon agreement on a list of prospective DRB Members, such prospective DRB Members will be jointly contacted by the Parties, provided with a copy of these DRB Procedures including Attachment 1 hereto, and the list of Potential Conflict Parties, and invited to submit the following information for further consideration by the Owners and Contractor:

3.2.1 Resume showing experience and qualifications as required by these DRB Procedures.

3.2.2 Identification of past and current experience as a member of an arbitral or mediation panel. Each such assignment shall be listed separately, indicating the name and location of the project, dates of service, name of owner, name of contractor, contract value, name of nominating party, if applicable, and names of the other members.

3.2.3 Disclosure statement describing past, present, and anticipated relationships, including indirect relationships through the prospective DRB Member's employer, if any, respecting all Potential Conflict Parties and otherwise in accordance with the requirements of Article 2 above.

3.3. Disclosure is a continuing obligation of all DRB Members throughout the life of the DRB.

3.4. The Owners and the Contractor shall meet again within fifteen (15) Days of the receipt of this information to review and mutually agree on the final selection of all three DRB Members. In the event that all three DRB Members were not selected from the initial pool of candidates, the process shall be repeated as necessary.

**Exhibit U - Dispute Resolution Procedures**

3.5. Within fifteen (15) Days of completion of the selection process, the DRB Member Agreement shall be executed among the three DRB Members, the Owners, and the Contractor. The DRB Member Agreement sets forth the terms and conditions that apply to the services to be provided by the DRB Members and, if the composition of the DRB changes, shall be amended to reflect such changes. The DRB shall be deemed constituted when the DRB Member Agreement is fully executed by all signatories.

3.6. The three DRB Members shall designate the DRB chair and, in writing, notify the Owners and the Contractor of the identity of the DRB chair.

3.7. In the event any DRB Member resigns, becomes incapacitated, dies or is otherwise incapable of serving as a member of the DRB, then a replacement member shall be selected in accordance with this Section 3.7. In the event of a vacancy on the DRB, the Parties shall engage in good faith discussions to agree on a replacement DRB Member and fill the vacancy as quickly as practicable. If the vacancy has existed for thirty (30) Days and the Parties have not agreed on a replacement, the Contractor shall offer the names of two prospective replacement DRB Members and the Owners shall collectively offer two names. The information described in Section 3.2 shall be assembled for the four candidates. The four names, along with the assembled information, shall be provided to the remaining members of the DRB in alphabetical order, without any information identifying which candidates were suggested by each Party. The remaining DRB Members shall select a replacement DRB Member from the four names on the list. If two vacancies exist at the same time, the same process shall be used except the one remaining DRB Member shall select two replacement DRB Members from the four names on the list in the event the Parties are unable to fill the vacancies.

Article 4. TERMS AND TERMINATION OF THE DRB

4.1. Each DRB Member shall be appointed for the life of the Construction Completion Agreement but not beyond the dissolution of the DRB as provided in Section 4.4 below. The services of a DRB Member may be terminated without cause only by mutual agreement of the Parties. In such event, written notice of the termination, signed by the Parties, will be provided to the DRB Members, and the termination will be effective upon the date the notice is signed by the Parties. The Parties will thereafter fill the vacancy in accordance with the terms of these DRB Procedures.

4.2. The services of a DRB Member may be terminated for cause only as follows:

4.2.1 Any Party may seek removal of a DRB Member for demonstrated bias, partiality or lack of independence, inability or refusal to perform his or her duties with diligence and in good faith or other improper conduct or any other grounds for disqualification provided by applicable law.

4.2.2 If a Party becomes aware of a conflict of interest for a DRB Member, it may, by written notice copied to the other Parties and all DRB Members, request that the DRB Member with such alleged conflict explain, remedy or remove the alleged conflict. If the alleged conflict is not remedied or removed within twenty-one (21) Days of notice, then the Party may seek to terminate the DRB Member.

**Exhibit U - Dispute Resolution Procedures**

4.3. Any Party seeking to terminate a DRB Member for cause shall first confer with the other Party to determine if the other Party agrees with the termination. If there is failure to reach agreement, the Party seeking termination shall have the right to proceed to a court of competent jurisdiction as identified in the DRB Member Agreement to effect the termination.

4.4. The DRB shall be dissolved upon completion of its deliberations and delivery of a DRB Determination on any Contract Claims pending at Final Completion of Unit 4; except that if the Construction Completion Agreement is terminated, the DRB shall immediately be dissolved, except to the extent, and for the purpose of resolving, any unresolved Contract Claims previously submitted to the DRB. After the DRB is dissolved as provided herein, it shall have no further authority to consider Contract Claims.

4.5. DRB Members' Compensation

DRB Members shall be compensated in accordance with the DRB Member Agreement.

Article 5. DRB MEETINGS

5.1. The DRB will visit the Site and meet with representatives of the Parties at periodic intervals and at additional times so requested by the Parties. The DRB Chair shall schedule the regular meetings on a quarterly basis unless the Owner, Contractor and DRB agree that more frequent or less frequent meetings are appropriate given the scope, duration and current status of the Vogtle Units 3&4 project. Under no circumstances, however, shall the frequency of regular DRB meetings be less than two times per year.

5.2. As requested by the DRB, the Contractor shall provide the DRB and Owners with a current list of pending or unresolved change orders and claimed and open adjustments to the Target Completion Dates or Target Construction Cost, as well any other information, schedule, or status reports, in advance of each DRB Meeting.

5.3. Each meeting shall consist of an informal discussion and a field observation of the Work in progress. The DRB may issue verbal, non-binding advisory opinions as to current items discussed at the meeting pursuant to Article 9 below. The discussion and field observation shall be attended by personnel of the Owners and Contractor. Individual discussion or consultation with DRB Members without both Parties present is strictly prohibited

Article 6. DRB DISPUTE PROCEEDINGS - GENERAL

6.1. DRB Rules of Operation

The DRB shall formulate its own rules of operation, consistent with these procedures. The DRB need not adopt hard and fast rules for every aspect of its operation; the procedures may be kept flexible to adapt to the needs of particular situations. The DRB rules of operations shall be subject to the approval of the Parties prior to implementation, and modifications of such rules shall similarly be subject to approval by the Parties. The DRB Chair may make procedural decisions, and provide direction on other issues as provided by Article 38 or these procedures.

**Exhibit U - Dispute Resolution Procedures**

6.2. DRB Determinations

DRB Determinations shall be consistent with the Construction Completion Agreement and appropriate legal precedents. The DRB shall not supplant or otherwise interfere with the respective rights, authorities, duties, and obligations of the Owners and the Contractor as defined in the Construction Completion Agreement. In rendering DRB Determinations and providing advisory opinions, the DRB shall acknowledge the centrality of the Construction Completion Agreement and shall not make a DRB Determination or provide an advisory opinion that ignores, disregards, or undermines the intention, requirements, economic allocation of risk, or Work specified in the Construction Completion Agreement.

6.3. Date, Time and Place of DRB Hearings

The DRB shall set the date, time, and place for each DRB Hearing, provided that Hearings shall take place at the Site or in Atlanta, GA, unless otherwise agreed by the Parties.

6.4. Contract Claim and Defense Statements

All summaries of Contract Claims, defenses and arguments shall include, at minimum, a statement of the Party's position with regard to both entitlement and amount of the Contract Claim and an explanation of the basis and justification for such position with reference to relevant Construction Completion Agreement language and the supporting documentation for each element of the Contract Claim.

6.5. Production of Information

(a) *Authority of DRB* . The DRB shall have access to all such information from any Party as it deems necessary to carry out its function. A Party that is requested by the DRB to provide information and/or documents relating to the subject matter of any Contract Claim submitted to the DRB shall promptly provide such information and/or documents to the DRB, with a copy to the other Party. The DRB shall manage any necessary exchange of information among the Parties with a view to achieving an efficient and economical resolution of the Contract Claim. The DRB may request production of additional information and/or documents from any Party at any time.

(b) A Party intending to offer an outside expert's analysis at a DRB Hearing shall disclose such intention in writing to the other Party and to the DRB within the time period established by the DRB at the initial conference. The expert's name and a statement of the specific aspect of the Contract Claim that will be covered by his or her testimony shall be included in the disclosure. Upon receipt of the above disclosure, the other Party shall have the opportunity to identify an outside expert to address or respond to those issues, who shall be similarly disclosed.

6.6. General Powers of the DRB

The DRB shall have the authority to issue any additional directions needed to achieve a fair, efficient and economical DRB Determination of the Contract Claim.

**Exhibit U - Dispute Resolution Procedures**

6.7. Attendance at DRB Hearings

(a) The Parties shall limit attendance at the Hearing to individuals directly involved in the dispute or having management responsibilities with respect to the dispute or its resolution. Prior to the Hearing, each Party shall submit a list of its proposed attendees to the DRB and the other Party. Any disagreements as to proposed attendees shall be resolved by the DRB. As a matter of right, attorneys for each Party may attend as observers but not participate in the Hearing, except as provided in these procedures.

(b) Subcontractor personnel may attend Hearings involving pass-through Contract Claims by such Subcontractor, or where reasonably required due to their involvement in relevant events. The Contractor shall require that each Subcontractor involved in a dispute have present an authorized representative and personnel with actual knowledge of the underlying events.

(c) The DRB shall maintain the privacy of DRB proceedings. The DRB shall have the power to require the exclusion of any witness, other than a Party representative or other essential person, during the testimony of any other witness. It shall be discretionary with the DRB to determine the propriety of the attendance of any person other than a Party and its representative.

6.8. Transcription

No transcript of a DRB Hearing is generally contemplated. Each DRB Member may keep his/her own notes. In special cases, upon request of a Party, the DRB may allow transcription by a court reporter at the expense of the requesting Party, who shall provide copies of the transcript to the DRB and the other Party at no charge. Audio or video recordings are not permitted.

6.9. Postponements of DRB Hearings

The DRB for good cause shown may postpone any DRB Hearing or interim deadline upon agreement of the Parties, upon request of a Party, or upon the DRB's own initiative.

6.10. Conduct of Hearings

(a) Each Party to a DRB Proceeding shall have the right to present witnesses and documents as reasonably necessary to achieve full and true disclosure of the facts. The DRB has the discretion to vary the Hearing procedure, provided that the Parties are treated with equality and that each Party has the right to be heard and is given a fair opportunity to present its position on the Contract Claim, through successive rebuttals as reasonably needed until, in the DRB's opinion, all aspects of the dispute have been fully and fairly covered.

(b) The DRB, exercising its discretion, shall conduct the proceedings with a view toward expediting the resolution of the Contract Claim and may direct the order of proceeding, bifurcate proceedings, and direct the Parties to focus their presentations on issues most significant to determination of all or substantial part of the Contract Claim.

**Exhibit U - Dispute Resolution Procedures**

Either Party may request that the DRB direct a question to or clarification from the other Party, which will be granted at the discretion of the DRB. In general, the DRB will not allow one Party to be questioned directly by the other Party at Hearings conducted without attorney representation.

(c) In addressing each Contract Claim, the DRB shall (i) be neutral and act fairly and impartially as between Owners and Contractor, (ii) give each Party a reasonable opportunity to present its position regarding the Contract Claim, through witnesses, documents and arguments to support its position, and to respond to the other Party's position, (iii) adopt procedures suitable to such Contract Claim, and (iv) follow the Construction Completion Agreement and applicable Law.

(d) The DRB shall not accept evidence that is covered by the attorney-client privilege or that constitutes attorney work product. The rules of evidence in a court proceeding otherwise do not apply.

(e) In the event that any Party fails to comply with the pre-Hearing deadlines established by the DRB, the DRB shall, in its discretion, determine whether the DRB Hearing shall proceed as originally scheduled, or whether additional time shall be provided and a new date established. On the final date and time established for the DRB Hearing, the DRB shall proceed with the DRB Hearing and rendering its DRB Determination, utilizing the information that has been submitted, including if a Party fails to appear.

6.11. Site Inspections

If the DRB finds it necessary or useful to make a site inspection in connection with a DRB proceeding, the DRB shall, subject to the agreement of the Parties, set the date and time for such inspection. Absent agreement of the Parties, the DRB shall not undertake a site inspection unless both Parties are present.

6.12. Interim Measures

(a) The DRB may direct whatever interim measures it deems necessary, including ordering injunctive relief and measures for the protection or conservation of property.

(b) A request for interim measures addressed by a Party to a judicial authority shall not be deemed incompatible with the agreement for a DRB Proceeding or a waiver of the right to a DRB Proceeding.

6.13. Closing of DRB Hearing

(a) If further documents or responses are to be provided following the Hearing, the DRB Hearing shall be closed as of the final due date set by the DRB for the receipt of such documents or responses. Otherwise, the DRB Hearing will be closed as of the conclusion of the DRB Hearing.

**Exhibit U - Dispute Resolution Procedures**

(b) The time within which the DRB is required to make the DRB Determination commences upon the closing of the DRB Hearing. The DRB may extend the time limit for the rendering of the DRB Determination only in unusual and extreme circumstances.

6.14. Expenses

All DRB expenses incurred in relation to a DRB proceeding, including required travel and other expenses of the DRB Members, shall be borne equally by the Parties.

6.15. Submissions to DRB

Unless otherwise instructed by the DRB, any documents submitted by any Party to the DRB shall simultaneously be provided to the other Party.

6.16. Scope of DRB Determination

(a) The DRB may grant any remedy or relief that the DRB deems just and equitable and within the scope of the agreement of the Parties, including, but not limited to, monetary and/or equitable relief.

(b) In addition to the final DRB Determination, the DRB may make other decisions, including interim, interlocutory, or partial rulings, orders, and partial DRB Determinations, as reasonably required.

(c) The DRB Determination may include interest as provided in the Construction Completion Agreement from such date as the DRB may deem appropriate; and

(d) The effectiveness and finality of a DRB Determination shall be as provided in Article 38 of the Construction Completion Agreement.

6.17. Form of DRB Determination

A DRB Determination shall be in writing, include an explanation of the reasoning for the decisions reached, and be signed by at least a majority of the DRB Members. However, the DRB shall make every effort to reach unanimous DRB Determination. The DRB Determination shall provide a breakdown of any monetary components included in the DRB Determination, and a line item disposition of any non-monetary Contract Claim items.

6.18. Acceptance of DRB Determination

Within twenty-one (21) Days of receipt of the DRB Determination (unless extended by a request for clarification or reconsideration), each Party shall determine whether or not it will accept or reject the DRB Determination. If the Parties are able to resolve the dispute with the aid of the DRB Determination, their agreement shall be promptly reflected in an executed Change Order.

**Exhibit U - Dispute Resolution Procedures**

6.19. Court or Arbitration Proceedings

Neither the DRB nor any DRB Member is a necessary or proper party in any judicial or arbitration proceedings relating to a DRB Proceeding or DRB Determination.

Article 7. REGULAR HEARING PROCEDURE

7.1. Applicability of Regular Hearing Procedure

Unless the Parties agree, or if unable to agree, the DRB determines that the Construction Completion Agreement specifies use of the Expedited Hearing procedure, the Regular Hearing procedure shall apply to Contract Claims to be heard by the DRB.

7.2. Initial Statements of Contract Claim and Defense

(a) Within ten (10) Days after a Contract Claim is submitted to the DRB pursuant to the Regular procedure (or it is determined that the Regular procedure applies to the Contract Claim), the claiming Party shall provide the DRB and the other Party a summary of its Contract Claim including a statement of the amounts in dispute.

(b) Within twenty (20) Days after receipt of such statement, the Party against whom the Contract Claim is asserted shall submit a summary of its defenses and arguments with respect to the Contract Claim and its position with respect to the amounts in dispute, along with any counterclaim respecting the subject of the Contract Claim.

7.3. Initial Telephone Conference

Within fifteen (15) Days of submission of the responsive summary, the DRB will convene a preliminary conference via conference call to establish the Hearing date(s), location and all appropriate pre-Hearing deadlines. If requested by the DRB, the Parties shall provide more detailed statements of their respective positions at a date in advance of the pre-Hearing submission.

7.4. Pre-Hearing Submission

(a) The Owners and the Contractor shall each prepare a preHearing submission and transmit it to the DRB at least thirty (30) Days before the date of the DRB Hearing. The pre-Hearing submission, comprising a position paper with such backup data as is referenced in the position paper, shall be tabbed, indexed, and the pages consecutively numbered. When the scope of the DRB Hearing includes Target Completion Date extension requests by the Contractor, each Party’s submission shall include a CPM delay analysis utilizing the appropriate update of the Project Schedule, and considering potential concurrent causes of delay. When the scope of the DRB Hearing includes Target Construction Cost increases or decreases, the claiming Party shall provide full actual cost details.

(b) Any expert reports shall be included in the pre-Hearing submissions.

**Exhibit U - Dispute Resolution Procedures**

7.5. At least fifteen (15) Days before the date of the Hearing, the Parties shall exchange copies of all exhibits, affidavits and any other information they intend to submit at the DRB Hearing not included in the pre-Hearing submissions, and identify all witnesses they intend to present at the DRB Hearing.

7.6. Use of Legal Counsel

While it is generally contemplated that attorneys for the Parties will not participate in the Hearing (but may attend the Hearing as observers), in particularly large or complex disputes the DRB is authorized, upon request of a Party or in its own discretion, to permit legal counsel representation of the Parties at the Hearing. Any such requests must be raised in advance of the initial conference. Where permitted, both Parties must be so represented, and the DRB may vary its otherwise applicable rules of procedure to reflect such representation, such as by permitting reasonable cross-examination of witnesses and opening statements or closing arguments. In no event shall the rules of evidence applicable in a court proceeding be applied.

7.7. Additional Hearings

In difficult or complex Contract Claims, additional DRB Hearings may be necessary to facilitate full consideration and understanding of the Contract Claim. In the discretion of the DRB such additional Hearing time may be allowed as determined by the DRB.

7.8. Time for DRB Determination

The Regular Hearing is intended to be an expedited process designed to achieve disposition of Contract Claims within four (4) to six (6) months of instituting the process. The DRB Determination shall be made promptly by the DRB and, unless otherwise agreed by the Parties, no later than thirty (30) Days from closing the Hearing.

7.9. Clarification and Reconsideration

(a) Either Party may request clarification of a DRB Determination within ten (10) Days following its receipt. As expeditiously as practicable, the DRB shall provide written clarification to both Parties. Only one request for clarification per Contract Claim from each Party will be allowed.

(b) Either Party may request reconsideration of a DRB Determination within ten (10) Days following its receipt, but such requests shall be based upon new information obtained or developed after the Hearing, or when in the Party's opinion the DRB misunderstood or failed to consider critical facts respecting the Contract Claim. The DRB will not entertain requests that amount to a renewal of prior arguments or additional arguments based on facts available at the time of the Hearing, and only one request for reconsideration per Contract Claim from each Party will be allowed.

**Exhibit U - Dispute Resolution Procedures**

Article 8. EXPEDITED HEARING PROCEDURE

8.1. Applicability

The Expedited Hearing Procedure applies when so provided in the Construction Completion Agreement, or otherwise agreed by the Parties.

8.2. Initial Statements of Contract Claim and Defense

(a) At the time of submission or within (5) Days after a Contract Claim is submitted to the DRB pursuant to the Expedited procedure (or it is determined that the Expedited procedure applies to the Contract Claim), the claiming Party shall provide the DRB and the other Party a summary of its Contract Claim including a statement of the amounts in dispute.

(b) Within ten (10) Days after receipt of such statement, the Party against whom the Contract Claim is asserted shall submit a summary of its defenses and arguments with respect to the Contract Claim and its position with respect to the amounts in dispute, along with any counterclaim respecting the subject of the Contract Claim.

8.3. Initial Telephone Conference

Within five (5) Days of submission of the responsive summary, the DRB will convene a preliminary conference via conference call to establish the Hearing date(s), location and all appropriate pre-Hearing deadlines.

8.4. Pre-Hearing Submission

(a) The Owners and the Contractor shall each prepare a preHearing submission and transmit it to the DRB at least fifteen (15) Days before the date of the DRB Hearing. The pre-Hearing submission, comprising a position paper with such backup data as is referenced in the position paper, shall be tabbed, indexed, and the pages consecutively numbered. When the scope of the DRB Hearing includes Target Completion Date extension requests by the Contractor, each Party’s submission shall include a CPM delay analysis utilizing the appropriate update of the Project Schedule, and considering potential concurrent causes of delay. When the scope of the DRB Hearing includes Target Construction Cost increases or decreases, the claiming Party shall provide full actual cost details.

(b) Any expert reports shall be included in the pre-Hearing submissions.

8.5. At least ten (10) Days before the date of the Hearing, the Parties shall exchange copies of all exhibits, affidavits and any other information they intend to submit at the DRB Hearing not included in the pre-Hearing submissions, and identify all witnesses they intend to present at the DRB Hearing.

8.6. Use of Legal Counsel

Attorney representation may not be used for Expedited Hearings.

8.7. Time for DRB Determination

The Expedited Hearing is intended to be a more expedited process designed to achieve disposition of Contract Claims within no more than sixty (60) Days after the date a Contract Claim is submitted to the DRB, and more rapidly when practicable. It is normally to be expected that the Hearing shall be closed no later than forty-six (46) Days after the date the Contract Claim is submitted to the DRB, unless all Parties and the DRB agree otherwise, or the DRB extends this time in extraordinary cases when the demands of justice require it. The DRB Determination shall be made promptly by the DRB and, unless otherwise agreed by the Parties, no later than fourteen (14) Days from closing the Hearing.

8.8. Clarification

Either Party may request clarification of a DRB Determination within five (5) Days following its receipt. As expeditiously as practicable, the DRB shall provide written clarification to both Parties. Only one request for clarification per Contract Claim from each Party will be allowed. No request for reconsideration will be entertained by the DRB in the Expedited Hearing process absent the most compelling circumstances.

Article 9. ADVISORY OPINIONS

9.1. An advisory opinion serves as a method for potentially avoiding a DRB Hearing. It is not intended to replace the Hearing processes described herein, but may be implemented as part of the good-faith negotiation conducted between the Parties. An advisory opinion is not a DRB Determination.

9.2. When mutually agreed by the Owners and the Contractor, the DRB may provide an advisory opinion on any issue, whether or not the subject of a Contract Claim. Advisory opinions are generally rendered in connection with regular DRB meetings, but may be the subject of a special meeting if so agreed by the Parties.

9.3. A written submittal from each Party respecting the issue submitted for an advisory opinion shall normally be required, subject to any limitations established by the DRB, that defines the issue(s) to be considered and sets out the submitting Party's position and supporting rationale. The Parties shall submit and exchange their submittals by e-mail a minimum of five Days prior to the meeting at which the Parties desire to obtain the advisory opinion.

9.4. The Parties may make such oral presentations of their positions as the DRB determines appropriate to the issue, followed by discussion and DRB questions as needed to help ensure that the advisory opinion is suitable and appropriate for the issue presented.

9.5. The DRB Members will caucus privately prior to presenting their oral advisory opinion. Opinions will not be reduced to writing unless agreed by the Parties and the DRB.

**Exhibit U - Dispute Resolution Procedures**

9.6. The DRB in its discretion may decline to provide an advisory opinion when deemed inappropriate, in its discretion.

## Exhibit V – Legacy, WIP, and Completed Work Packages

Table 1 lists 425 Legacy Work Packages where the field work and inspections have been completed, but the Work Package has not been closed as of October 17, 2017.

Table 2 lists 1,147 Completed and Voided Work Packages which are complete and closed as of October 17, 2017.

Table 3 lists 4,614 In-Progress Work Packages which have been partially implemented as of October 17, 2017.

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 1. Legacy Work Packages (as of October 17, 2017) | | |
|---|---|---|
| No. | Work Package Number | Title |
| 55 | SV3-CA01-S4W-CV2556 | CA01-18 SUBMODULE ERECTION |
| 56 | SV3-CA01-S4W-CV2557 | CA01 SM 19 INSTALLATION |
| 57 | SV3-CA01-S4W-CV4217 | CA01 -21 SUPPOT LEG INSTALLATION (SA5) |
| 58 | SV3-CA01-S5W-CV2083 | CA01-32 FINISH PRE-FABRICATION, |
| 59 | SV3-CA01-S5W-CV2326 | CA01-07 REPAIRS |
| 60 | SV3-CA01-S5W-CV2707 | CA01-17 UNSAT IR AND N&D REPAIR |
| 61 | SV3-CA01-S5W-CV2844 | CA01-29 JOINING OF SECTION 100 AND 200 |
| 62 | SV3-CA01-S5W-CV3133 | CA01-39 UNSAT IRS AND N&DS - STRUCTURE REPAIRS |
| 63 | SV3-CA01-S5W-CV3325 | CA01-13 PERFORM N&D & INSPECTION REPORT (IR) S561-004-14-0451 REWORK AND REPAIRS |
| 64 | SV3-CA20-S4W-CV0428 | CA20 SA2 EL. 82FT-6IN FLOOR INSTALLATION |
| 65 | SV3-CA20-S4W-CV0437 | CA20 SA4 Wall Submodule Assembly (Includes CA20- 26, 27, 28, 29, 30, 71, 72, 73) |
| 66 | SV3-CA20-S4W-CV1406 | CA20 SA3 WALL SUBMODULE ASSEMBLY (18, 19, 20, 21, 22, 23, 24, 25 ) |
| 67 | SV3-CA20-S5W-CV1422 | CA20-05 LINER PLATE WELD MODIFICATION |
| 68 | SV3-CA20-S5W-CV1673 | CA20 SA3 MISCELLANEOUS REWORK FOR CLOSURE OF ND'S. |
| 69 | SV3-CA20-V2W-CV1727 | INSTALL CA20 LIFT LUGS 162 AND 163 |
| 70 | SV3-2020-MEW-ME1598 | Unit 3 Condenser A Flashbox Installation |
| 71 | SV3-1220-CPW-CV0950 | Unit 3 Auxilary Building Precast Concrete Floors El.82'-6" |
| 72 | SV3-2020-MEW-ME1599 | UNIT 3 CONDENSER C FLASHBOX INSTALLATION |
| 73 | SV3-KB27-KBW-ME2204 | Installation of KB27 Components |
| 74 | SV4-CA20-S5W-CV5600 | CA20-20 UNSAT IR - STUDS (LOOSE PARTS), |
| 75 | SV4-CA20-S4W-CV5608 | INSTALLATION OF SUBMODULE CA20-21 |
| 76 | SV3-CA01-S5W-CV3315 | CA01-04 PERFORM N&D & INSPECTION REPORT (IR) S540-004-14-0043 REWORK AND REPAIRS. |
| 77 | SV3-CA01-MHW-CV2162 | LIFTING FRAMES AND BRACING SUBMODULES 05 THRU 10 |
| 78 | SV4-CA05-S5W-CV6049 | CA05-08 UNSAT IRS & N&DS - STRUCTURAL, |
| 79 | SV3-CA01-S5W-CV5780 | SUBASSEMBLY 7 BASEMAT FABRICATION |
| 80 | SV4-CA05-S5W-CV6044 | CA05-07 UNSATISFACTORY IRs AND N&D REPAIRS - STUDS |
| 81 | SV4-CA20-S4W-CV5748 | INSTALLATION OF SUB MODULE CA20-28 |
| 82 | SV4-CA05-S4W-CV6030 | CA05-04 SUBMODULE INSTALLATION |
| 83 | SV4-CA05-S4W-CV6034 | CA05-05 SUBMODULE INSTALLATION |
| 84 | SV4-CA05-S4W-CV6018 | CA05-01 Upending/Submodule Installation |
| 85 | SV4-CA20-S4W-CV5753 | INSTALLATION OF SUB MODULE CA20-29 |
| 86 | SV4-CA05-S4W-CV6038 | CA05-06 UPENDING / SUB MODULE INSTALLATION ON PLATEN. |
| 87 | SV4-CA20-S5W-CV7374 | SA4-LEAK CHASE FABRICATION |

# Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 1. Legacy Work Packages (as of October 17, 2017) | | |
|---|---|---|
| **No.** | **Work Package Number** | **Title** |
| 88 | SV4-CA20-S4W-CV5773 | PRE-USE INSPECTION OF SUPER LIFT LUGS |
| 89 | SV3-CA01-S5W-CV4138 | CA01-28 UNSAT STRUCTURAL IR & N&D REPAIR |
| 90 | SV3-CA01-S5W-CV4215 | CA01-14 PERFORM STRUCTURAL N&D & INSPECTION REPORT (IR) S561-004-14-0453 REWORK AND REPAIRS. |
| 91 | SV4-CA05-S4W-CV6022 | CA05-02 UPENDING / SUB MODULE INSTALLATION |
| 92 | SV4-2040-CEW-CV5841 | 120' ELEV, STUD WELDS/SUPPORTS |
| 93 | SV4-CA05-S5W-CV6028 | CA05-03 UNSATISFACTORY IRS AND N&D REPAIRS, E&DCRS AND LOOSE PARTS - STUDS |
| 94 | SV4-CA05-S4W-CV6027 | (DESIGN SOUTH ELEV.) OLP'S AND WELDED ATTACHEMNTS INSTALLATION |

| 96 | SV4-CA05-S5W-CV6036 | CA05-05 UNSATISFACTORY IRS AND N&D REPAIRS, E&DCRS AND LOOSE PARTS - STUDS |
| 97 | SV4-CA05-S4W-CV6019 | (DESIGN NORTH ELEV.) OLP'S AND WELDED ATTACHMENTS INSTALLATION |
| 98 | SV3-CA20-S4W-CV1757 | INSTALLATION OF CA20 WALL 3 EMBED PLATES |
| 99 | SV3-CA20-S4W-CV2626 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00119, WB-W00120, WB-W00121, WB-W00122, WB-W00123, WB-W00124, WB-W00125, WB-W00126 & WB-W00128 |
| 100 | SV3-CA20-S4W-CV2627 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS |
| 101 | SV3-CA20-S4W-CV2629 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00168, WB-W00170, WB-W00171, WB-W00172, WB-W00267, WB-W00268, WB-W00269, WB-W00271, WB-W00272 & WB-W00273 |
| 102 | SV3-CA20-S4W-CV2630 | CA20 SUB ASSEMBLY 3 WORK LIST ITEMS WB-W00173, WB-W00174, WB-W00175, WB-W00176, WB-W00177, WB-W00178, WB-W00179, WB-W000-180, WB-W00181, WB-W00182, WB-W00183, WB-W00184, WB-W00264 & WB-W00270 |
| 103 | SV3-CA20-S4W-CV2201 | Unit 3 Nuclear Island - Torquing and Welding CA20 Module Basemat Attachment Brackets |
| 104 | SV4-CA05-S4W-CV6023 | DESIGN EAST ELEV OLPs AND WELDED ATTACHMENTS INSTALLATION |
| 105 | SV3-CA20-S5W-CV5114 | INSTALLATION OF OUTSTANDING CA20 MODULE COUPLER ASSEMBLIES |
| 106 | SV4-R106-R1W-ME8128 | Installation of R106 Module |
| 107 | SV4-CA20-V2W-CV7513 | INSTALL SUPER LIFT LUG AT CA20-10 |
| 108 | SV4-CA01-S5W-CV6410 | CA01-14 UNSAT IRs/N&Ds/E&DCRs/LOOSE PARTS - STRUCTURAL |
| 109 | SV3-PXS-PHW-ME5534 | FABRICATION/INSTALLATION OF PIPE SUPPORT FOR ISOMETRIC DRAWING SV3-PXS-PLW-293 |
| 110 | SV4-CA20-S5W-CV5611 | CA20-22 AND CA20-25 INSTALL ADDITONAL BRACING AND INSTALL PENETRATION HOLES |
| 111 | SV3-CA03-S4W-CV2257 | CA03 SUBMODULE WALL ASSEMBLY (15, 16, 17) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 1. Legacy Work Packages (as of October 17, 2017) | | |
|---|---|---|
| **No.** | **Work Package Number** | **Title** |
| 112 | SV3-PXS-PHW-ME5535 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-294 |
| 113 | SV3-PXS-PHW-ME5536 | FABRICATION/INSTALLATION OF PIPE SUPPORT FOR ISOMETRIC DRAWING SV3-PXS-PLW-295 |
| 114 | SV3-WRS-PLW-ME5776 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-660, 664, 665) |
| 115 | SV4-SFS-P0W-ME5408 | INSTALLATION OF KB12 PIPING ISOMETRIC SV4-SFS-PLW-088 |
| 116 | SV4-SFS-P0W-ME5411 | INSTALLATION OF KB12 PIPING ISOMETRIC SV4-SFS-PLW-60B |
| 117 | SV3-WLS-PLW-ME0897 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-57A, B, C, and D |
| 118 | SV3-WLS-PLW-ME0896 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-57E |
| 119 | SV3-WLS-PLW-ME0895 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-57T and 57U |
| 120 | SV3-WLS-PLW-ME0534 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-931) |
| 121 | SV4-CA20-V2W-CV7515 | INSTALL SUPER LIFT LUG AT CA20-18 |
| 122 | SV3-CA20-S4W-CV0440 | CA20 SA4 EL 81'-0" Floor Installation (CA20-31) |
| 123 | SV4-CA05-S8W-CV8006 | CA05 LIFT LUGS INSTALLAITON |
| 124 | SV3-CA20-S4W-CV2582 | CA20 SUB ASSEMBLY 3 & 4 WORK LIST ITEMS WB-W00011, WB-W00012, WB-W00013, WB-W00014, WB-W00015 & WB-W00016 |
| 125 | SV4-CA20-V2W-CV7514 | INSTALL SUPER LIFT LUG AT CA20-21/22 |
| 126 | SV4-CA20-V2W-CV7517 | INSTALL SUPER LIFT LUG AT CA20-26 |
| 127 | SV4-CA20-V2W-CV7516 | INSTALL SUPER LIFT LUG AT CA20-29/30 |
| 128 | SV3-CA20-S4W-CV5101 | UNIT 3 CA20 CLEAN-OUT PORT INSTALLATION |
| 129 | SV3-SFS-P0W-ME6690 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-SFS-PLW-782 (LINE NUMBER SFS-PL-L121) |
| 130 | SV4-CA01-S5W-CV6425 | CA01-18 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS - STUDS |
| 131 | SV3-KB13-KBW-ME2464 | FABRICATION OF KB13 SUMP COVER |
| 132 | SV4-CA04-S4W-CV2448 | STUD AND REBAR COUPLER INSTALLATION FOR UNIT 4 CA04 |
| 133 | SV3-WLS-PHW-ME0768 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-93C, -445, -940 |
| 134 | SV4-CA04-S4W-CV2328 | CA04 WALL SUBMODULE ASSEMBLY |
| 135 | SV4-CA05-S4W-CV7026 | CA05-02 Temporary Attachments |
| 136 | SV3-CA01-S4W-CV2225 | CA01-37 FINAL INSTALLATION |
| 137 | SV3-CA02-S4W-CV2565 | CA02 BASEMAT INSTALLATION |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 1. Legacy Work Packages (as of October 17, 2017) | | |
|---|---|---|
| **No.** | **Work Package Number** | **Title** |
| 396 | SV3-CA01-S4W-CV2227 | CA01 SM 23 INSTALLATION |
| 397 | SV3-CA01-S4W-CV2558 | CA01-20 SUBMODULE INSTALLATION |
| 398 | SV3-CA01-S5W-CV2207 | CA01 SM 02 N&D REWORK & REPAIR |
| 399 | SV3-CA01-S5W-CV2278 | CA01-22 INSTALLATION OF STUDS, ANGLES, REBAR AND N&D REWORK |
| 400 | SV3-CA01-S5W-CV2376 | CA01-23 & CA01-24 N&D REWORK & REPAIRS |
| 401 | SV3-CA01-S5W-CV3027 | CA01-29 INTERNAL FABRICATION |
| 402 | SV3-CA01-S5W-CV3109 | CA01-19 PERFORM N&D & INSPECTION REPORT (IR) S540-001-14-0032 REWORK AND REPAIRS. |
| 403 | SV3-CA01-S5W-CV4140 | CA01-30 UNSAT IRS AND N&DS - STRUCTURE REPAIRS |
| 404 | SV3-CA01-S5W-CV5516 | SUBASSEMBLY 1: BASEMAT FABRICATION |
| 405 | SV3-CA01-S5W-CV5578 | SUBASSEMBLY 5: BASEMAT FABRICATION |
| 406 | SV3-CA01-S5W-CV5781 | SUBASSEBMLY 8 BASEMAT FABRICATION |
| 407 | SV3-CA01-V2W-CV4738 | PREP AND INSPECT SUPER LIFT LUGS |
| 408 | SV3-CA02-S4W-CV2563 | INSTALL CA02-01 PERMANENT WELDED ATTACHMENTS |
| 409 | SV3-CA02-S4W-CV3297 | CA02-04 SUB MODULE INSTALLATION |
| 410 | SV3-CA02-S4W-CV5778 | INSTALL CA02-02 PERMANENT WELDED ATTACHMENTS |
| 411 | SV3-CA02-S5W-CV5512 | CA02-05 Unsat IRs and N&D's - Studs |
| 412 | SV3-CA02-S5W-CV5574 | CA02-02 UNSAT IR AND N&D REPAIRS |
| 413 | SV3-CA02-S5W-CV5675 | CA02-04 STUCTURAL UNSAT IR'S AND N&D'S |
| 414 | SV3-CA02-S5W-CV5926 | CA02-01 STRUCTURAL UNSAT IR'S AND N&D'S |
| 415 | SV3-CA02-S5W-CV6185 | CA02 OVERLAY PLATE FABRICATION |
| 416 | SV3-CA01-S5W-CV3241 | CA01-31 UNSAT IR AND N&D REPAIRS |
| 417 | SV3-CA20-S4W-CV2488 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00088, WB-W00099, WB-W00100, WB-W00101, WB-W00106, WB-W00107 & WB-W00108 |
| 418 | SV3-CA20-S4W-CV2628 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00200,WB-W00201, WB-W00202, WB-W00203, WB-W00204, WB-W00205, WB-W00206, WB-W00207, WB-W00208, WB-W00209, WB-W00210, WB-W00211, WB-W00212, WB-W00213, WB-W00214, WB-W00215, WB-W00216, WB-W00217, WB-W00218, WB-W00219, |
| 419 | SV3-CA20-V2W-CV1848 | INSTALL STRUCTURAL BOLTING FOR CA20 LIFTING LUGS |
| 420 | SV3-WLS-PLW-ME0890 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-57O, P, Q, R, and S |
| 421 | SV3-WLS-PLW-ME0893 | Fabricate and Install WLS Embedded Piping ISO SV3-WLS-PLW-567, 568, 57F, G, and H |
| 422 | VNC-YARD-MIS-002 | INSTALL TEN 6" WELLS ONLY FOR HEAVE AND SETTLEMENT MONITORING SYSTEM |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 1. Legacy Work Packages (as of October 17, 2017) | | |
|---|---|---|
| **No.** | **Work Package Number** | **Title** |
| 423 | SV4-KB20-KBW-863104 | INSTALLATION OF KB20 |
| 424 | SV0-RWS-EWW-862861 | CABLE PULL AND TERMINATIONS FOR RWS PERMANENT WELL PUMPS 3 AND 4 |
| 425 | SV3-SFS-P0W-ME3853 | FABRICATION/INSTALLATION OF PIPING FOR ISO SV3-SFS-PLW-431 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

**Table 2. Completed and Voided Work Packages (as of October 17, 2017)**

| No. | Work Package Number | Title |
|---|---|---|
| 1 | SV3-2131-CSW-CV0217 | Turbine Building 1st Bay Stairs |
| 2 | SV3-2161-AGW-CV0218 | Turbine Building 1st Bay Roofing |
| 3 | SV3-2131-ADW-CV0215 | Turbine Building 1st Bay Doors |
| 4 | SV3-2161-SUW-CV0216 | Turbine Building 1st Helb Blowout Panels |
| 5 | SV3-2101-CCW-CV0214 | Turbine Building 1st Bay Walls |
| 6 | SV3-2131-SUW-CV0186 | Turbine Building 1st Bay Structural Steel |
| 7 | SV4-CA20-S5W-CV6856 | CA20-41 Unsat IRs & N&Ds - Structural |
| 8 | SV3-PXS-P0W-ME6982 | INSTALLATION OF SMALL BORE CA03 PXS PIPING (INCLUDES ISOMETRIC SV3-PXS-PLW-651) |
| 9 | SV3-PXS-PHW-ME6988 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-651 |
| 10 | SV0-SES-ERW-EL2298 | SV0-INSTALL SES PLANT SECURITY DUCT BANKS/EAST OF ANNEX - PHASE 6 |
| 11 | SV4-1208-SCW-CV7000 | Course 7 Unit 3 Shield Building |
| 12 | SV4-1208-SCW-CV7002 | Course 9 Unit 4 Shield Building |
| 13 | SV4-1208-SCW-CV7003 | Course 10 Unit 4 Shield Building |
| 14 | SV4-1208-SCW-CV7004 | Course 11 Unit 4 Shield Building |
| 15 | SV4-1208-SCW-CV7005 | Course 12 Unit 4 Shield Building |
| 16 | SV4-1208-SCW-CV7006 | Course 13 Unit 4 Shield Building |
| 17 | SV4-1208-SCW-CV7008 | Course 15 Unit 4 Shield Building |
| 18 | SV4-1208-SCW-CV7009 | Course 16 Unit 4 Shield Building |
| 19 | SV0-PWS-PLW-TP1259 | Fabricate & Install PWS Piping from Rest Room Trailer 205 to Rest Room Trailer on the North East Side of Turbine Conex |
| 20 | SV0-0000-M0W-MU0623 | Mock Up NI Basemat Mechanical Component Installation |
| 21 | SV0-6500-ETW-EL0881 | Install Temporary Power For The Administration Building 301 Construction |
| 22 | SV0-PWS-PPW-ME0347 | Stainless Steel Replacement of PWS piping at Tank Farm |
| 23 | SV0-892-PPW-ME0112 | Weld Test Building |
| 24 | SV0-874-PLW-TP0867 | Fabricate and Install Supports for One Fly Ash Pipe and One Cement Pipe at Batch Plant N0. 2 |
| 25 | SV0-841-EWW-EL0175 | Installation of Electrical Power to Carpenter and Sheet Metal Fab Shop (Building 133.) |
| 26 | SV0-0000-XEW-CV0020 | Install Erosion Control Measures per NOI 25 |
| 27 | SV0-851-PPW-ME0370 | Fabricate and Install Tie Ends to Craft Toilet Trailer # 128 |
| 28 | SV0-867-EWW-EL0158 | Electrical Service to Guard House at Gate 18 |
| 29 | SV0-8000-AYW-CV0166 | Install Decks, Canopies and Exterior Finishes for Temporary Construction Facilities Contract 1409 |
| 30 | SV3-CA20-S5W-CV4741 | CA20 OVERLAY PLATE REPAIR |
| 31 | SV0-892-CCW-CV0080 | Install Foundation for Weld Test Shop (Bldg. 134) |
| 32 | SV0-0000-CCW-CV0135 | Temporary Water Supply Foundations |
| 33 | SV3-RCS-PHW-ME0288 | ASME Demo Pipe Support |
| 34 | SV3-WLS-P0W-ME5927 | PERFORM REWORK OF FLOOR DRAIN SV3-WLS-PY-D08 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 35 | SV3-PY05-PYW-ME1528 | Installation of CWS Backwash Strainers (SV3-CWS-PY-S01A,B,C) |
| 36 | SV0-842-PPW-ME0114 | Pipe Fitting Shop |
| 37 | SV3-CA20-S5W-CV1459 | CA20-12 Liner Plate Weld Modification |
| 38 | SV3-WWS-PLW-ME0333 | Auxilary Building Embedded Piping |
| 39 | WCD 08-1246058001-1275-C-ERC-006 | Erosion Control - Diversion Ditch |
| 40 | SV0-0000-EWW-EL0137 | Relocation of Security Post No. 1 at the Main Entrance |
| 41 | SV0-854-EWW-EL0248 | Installation of Electrical Power to Craft Shelter - Insulation Fab Shop |
| 42 | SV3-CA20-MHW-CV0453 | Installation of Submodule Vertical Lifting Attachments (CA20-02, 06, 07A, & 07B) |
| 43 | SV0-8200-PLW-ME0313 | MAB Compressed Air & Bulk Gas Distribution |
| 44 | VNC-ED829-EL-MSC-026 | Relocation of 13.8 KV Overhead Lines at 108 |
| 45 | SV0-0000-CCW-CV0299 | Handicap Concrete Pad for Fire Training Facility |
| 46 | SV0-0000-XQW-CV0741 | Replacement Grating for Bridge Over 100 Year Ditch |
| 47 | SV0-G100-XEW-CV0404 | Nuclear Island Simulated Horizontal Waterproofing Membrane Testing |
| 48 | SV0-PWS-CCW-CV0003 | Potable Water System (PWS) Storage Tank (2) Common Foundation |
| 49 | SV3-2020-EGW-EL0401 | Electrical Grounding Installation for Turbine Building at Elevation 82'-9" |
| 50 | SV0-0000-XSW-CV0028 | River Road Improvements and Plant Entrance Roads (NOI 8) |
| 51 | SV3-KB10-KBW-ME0337 | KB10 Sump |
| 52 | SV3-PL03-PLW-ME1048 | Grit/Bristle Blasting of WRS & WWS Piping |
| 53 | SV3-WWS-PLW-ME0332 | Auxilary Building Embedded Piping |
| 54 | SV4-1200-CCW-CV1862 | UNIT 4 NUCLEAR ISLAND PLACEMENT OF CONCRETE PEDESTAL UNDER CVBH UP TO ELEV 71'-6" |
| 55 | VNC-230KV-ECW-003 | Erosion Control - NOI 13 |
| 56 | SV0-YFS-PLW-ME0043 | Fabrication and Installation of Trench 4 HDPE Yard Fire System |
| 57 | SV3-CA01-S5W-CV4150 | CA01-46 UNSAT IRs AND N&Ds - STRUCTURE REPAIRS |
| 58 | WCD 09-1246058001-1275-C-TEST-024 | Isopac Testing - Soil Isopac |
| 59 | WCD 08-1246058001-1275-C-ERC-009 | Install the Erosion Control Measures for NOI 9 |
| 60 | WCD 08-1246058001-1275-C-ERC-007 | Erosion Control - NOI 7 |
| 61 | SV0-846-EWW-EL0176 | Installation of Electrical Power to Rebar Module Pad (Building 102.) |
| 62 | SV0-832-EWW-TP0545 | Praxair Mobile Filling Station Electrical Installation |
| 63 | SV0-838-EWW-EL0261 | Electrical Installation for Material Issue Building (Bldg 122.) |
| 64 | SV0-838-PPW-ME0111 | Material Issue Building |
| 65 | SV3-1000-CEW-CV0296 | Unit Three Nuclear Island Basemat Embedded Steel Plates |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 66 | SV3-CA20-S5W-CV0900 | CA20-01 C6X13 Flange Repair |
| 67 | SV4-1000-CRW-CV1272 | Fabrication of Unit A Nuclear Island Basemat Construction Aids, Embeds and Anchor Bolts |
| 68 | SV4-1000-GCW-CV1423 | UNIT 4 NUCLEAR ISLAND TEMPORARY CONSTRUCTION STAIR CASES |
| 69 | VNC-CFA-ME-SDS-009 | Installation of Undergound Piping for the Sanitary Drainage System |
| 70 | VN3-NIA-CV-MSC-024 | Unit 3 Nulcear Island MSE Wall |
| 71 | SV3-1000-CEW-CV1063 | Replacement of Threaded No. 9 Rebar on CA20 Embed Plates |
| 72 | SV4-G100-CCW-CV0064 | Unit 4 Nuclear Island Mud Mat |
| 73 | SV0-PWS-PLW-ME0304 | Install Valve to Trench #1 |
| 74 | SV0-YFS-CCW-CV0002 | Yard Fire Protection (YFS) Storage Tank Ring Foundations |
| 75 | VN4-NIA-CV-MSC-025 | Unit 4 Nuclear Island MSE Wall |
| 76 | SV0-0000-PPW-ME0631 | Pipe Casings For Construction Support Gas/Air Lines |
| 77 | SV0-PWS-MTW-ME0036 | Potable Water System Tank Installation at Pumphouse #315 |
| 78 | SV3-WGS-THW-ME2706 | HYDROSTATIC TESTING OF KB04 WGS PIPING |
| 79 | SV0-DRS-XDW-CV0018 | Storm Drainage Plan River Road |
| 80 | SV0-YFS-PLW-ME1567 | Repair Yard Fire System (YFS) |
| 81 | WCD 08-1246058001-1275-C-ERC-023 | Erosion Control for NOI 23 |
| 82 | SV3-2020-CCW-CV0121 | U3 Turbine Bldg. Basemat EL 202'-9" (82'-9") Northwest Quad |
| 83 | SV0-1000-E0W-EL0397 | Electrical Work Package |
| 84 | SV3-1210-EGW-EL0355 | Electrical Grounding Installation for Areas 4, 5, 6 in Auxiliary Building at Elevation 66' 6" |
| 85 | VNC-CFA-CV-DRS-002 | Installation of the Storm Drainage Plan for NOI-7 |
| 86 | SV3-FWS-PLW-ME1405 | Unit 3 Turbine Building EL 100'-0' Insulation of Embedded FWS Piping |
| 87 | SV3-1210-EGW-EL0354 | Electrical Grounding Installation for Areas 1, 2, & 3 in Auxiliary Building at Elevation 66' 6" |
| 88 | SV3-CWS-PLW-ME0050 | Install PCP Piping for CWS Unit 3 Phase 2 Return Line |
| 89 | SV3-G100-CCW-CV0063 | Unit 3 Nuclear Island Mud Mat |
| 90 | SV3-CWS-PLW-ME0027 | Install PCP Piping for CWS Unit 3 Phase 1 Return Line |
| 91 | SV4-1110-CCW-CV1981 | Unit 4 Nuclear Island Placement of Grout Under CVBH - Rev. 0 |
| 92 | SV0-G100-XEW-CV0378 | Nuclear Island In-Situ Hortizontal Waterproofing Membrane Testing |
| 93 | VNC-CFA-ME-YFS-007 | Install Underground Piping for Yard Fire System |
| 94 | SV3-WRS-PLW-ME0325 | Auxilary Building Embedded Piping |
| 95 | VNC-NIA-CV-MSC-018 | Unit 3 & 4 Nuclear Island Blue Bluff Marl |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 96 | SV3-ME71-CCW-CV0093 | Unit 3 Cooling Tower Ring Beam Grading and Backfill |
| 97 | SV3-WLS-PLW-ME0684 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-756 |
| 98 | SV0-YFS-MTW-ME0031 | Yard Fire System Tank Istallation |
| 99 | VNC-CFA-ME-YFS-003 | Installation of Yard Fire System NOI 7 |
| 100 | SV3-WRS-PLW-ME0622 | Welding of WRS Piping Drain Hubs |
| 101 | SV3-CA01-S5W-CV4137 | CA01-28 UNSATISFACTORY IRS AND N&DS REPAIRS - STUDS |
| 102 | WCD 08-1246058001-1275-C-024 | Site Road Extension |
| 103 | SV3-CA20-S4W-ME4593 | REPAIR WORK OF SV3-CA20-GNR-000569 |
| 104 | VNC-COMM-SWS-007 | Temporary Pond for NOI 5 |
| 105 | SV0-CA20-VWW-CV0014 | CA20 Mockup Welding Package |
| 106 | SV0-MH90-MHW-RI0547 | For HLD Machinery Deck |
| 107 | SV3-RCS-PLW-ME0287 | ASME Demo Piping |
| 108 | VNC-CFA-ME-SDS-005 | Fabrication and Installation of Sanitary Drainage System in NOI 7 |
| 109 | SV0-SDS-PLW-ME0010 | Sanitary Drainage System Piping for Trench 6 |
| 110 | SV0-CA20-SPW-CV0038 | Setup/Disassemble of CA20 Module Mockup Platen |
| 111 | SV0-892-PPW-ME0208 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Weld Test, Building 134 |
| 112 | SV0-MH90-MHW-RI0716 | Tension tie column Installation |
| 113 | SV0-0000-CCW-CV0302 | Install Foundation for (CR10) Pad 139 |
| 114 | VNC-COMM-CVW-008 | Installation of Heavy Haul Ramp |
| 115 | SV0-SAS-PLW-TP0965 | Fabricate and Install SAS Piping and a Drain line for CBI Fabrication Area |
| 116 | SV0-SDS-PLW-ME0249 | Remove Abandoned Underground Utilities (Trench 6) |
| 117 | SV0-0000-XEW-CV0019 | Erosion Control Measures for NOI 8 |
| 118 | SV0-0000-GCW-CV0283 | Demolition of Existing Warehouse |
| 119 | SV0-851-PPW-ME0278 | Fabrication and Installation of Temorary Piping PWS and SDS to craft toilet trailer #2 Bldg #125 |
| 120 | SV0-817-PPW-ME0279 | Fabrication and Installation of Temorary Piping PWS and SDS to FFD building #162 |
| 121 | SV0-854-PPW-ME0209 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Craft Shelf Outer Module Fab. Area, Building 156 |
| 122 | SV0-0000-ERW-EL0066 | Electrical Race Way Installation for Temporary Construction Facilities |
| 123 | SV0-819-EWW-EL0282 | Electrical Power Installation to BLDG. 154 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 124 | SV0-PWS-CCW-CV0047 | Make up Well 3&4 Concrete Foundation |
| 125 | SV0-MH90-MHW-RI0339 | Pre-Assembly of Bigge Boom Selections |
| 126 | SV0-MH90-MHW-RI0981 | HLD Updates 505435-BIG-SCI-343L |
| 127 | SV0-802-PPW-ME0202 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Truck Wash Facility, Building 136/146 |
| 128 | SV0-833-PPW-ME0212 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Warehouse, Building 104 |
| 129 | SV0-804-CCW-CV0088 | Install Foundation for Air Compressor Station (Bldg. 141) |
| 130 | SV0-881-CCW-CV0016 | Installtion of the Containment Vessel Assembly Area Foundation Area 108 |
| 131 | SV4-1000-SYW-CV0411 | Welding of Steel Test Weights for Waterproofing Membrane Testing |
| 132 | SV0-891-CCW-CV0087 | Install Foundation for Material Testing Lab (Bldg. 112) |
| 133 | SV0-832-XEW-CV0714 | Excavate and Backfill for Potable Water Installation to Praxair Facility |
| 134 | SV0-841-CCW-CV0074 | Install Foundation for Carpenter Shop (Bldg. 133) |
| 135 | SV0-811-EWW-EL0168 | Electrical Feeder Installation for Time Office (Building 117) |
| 136 | SV0-MH90-MHW-RI0420 | HLD Tension Tie Column Universal Joint Installation |
| 137 | SV3-CWS-PLW-ME0026 | Install PCP Piping for CWS Unit 3 Phase 1 Supply Line |
| 138 | SV4-MG01-MGW-ME8793 | Installation of¿HSS Starter Cabinet(HSS-MP-02) |
| 139 | SV4-MG01-MGW-ME8794 | Installation of¿Generator Seal Oil Unit(HSS-MS-01) |
| 140 | SV3-1000-CRW-CV0629 | Unit 3 Nuclear Island Boot-Cleaning Station |
| 141 | SV0-0000-ELW-EL0032 | Installation of High Mast Lighting |
| 142 | SV0-8000-EWW-EL0345 | Power to New Survey Offices, Building 158, and GPS Base Tower |
| 143 | SV0-2020-PHW-ME0403 | Turbine Building Embedded Piping Support |

| 204 | SV3-2161-CRW-CV8677 | Unit 3, Turbine Building, First Bay Elev. Roof Slab – Embeds / Anchor Bolts |
| 205 | SV3-2161-CRW-CV8678 | Unit 3, Turbine Building, First Bay Elev. Roof Slab - Formwork |
| 206 | VNC-COMM-CVW-003 | Nuclear Island Units 3 & 4 Excavation "Big Dig" |
| 207 | SV3-CA20-S5W-CV1983 | PERFORM ADDITIONAL MISC WORK ON CA20-26/30 |
| 208 | SV0-RWS-MTW-ME0030 | Raw Water System Tank Installation |
| 209 | SV0-ER02-ERW-EL0358 | Electrical Feeder to Morgan's Pig Container |
| 210 | SV3-WRS-P0W-ME3650 | SV3-WRS-GNR-000058 REPAIR WORK FOR SV3-WRS-PLW-81G |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 211 | SV3-CA20-S4W-CV0883 | Installation of VAS-MS-06A/B Support Steel |
| 212 | SV3-WLS-PLW-ME0856 | Fabricate and Install WLS Embedded Piping shown on Isometric Drawing SV3-WLS-PLW-751 |
| 213 | SV3-ME71-CCW-CV0367 | Unit 3 Micropile Installation |
| 214 | VNC-COMM-CVW-004 | Geotechnical Borings for Balance of Plant Structures (3 Books) |
| 215 | SV3-CA20-S4W-CV1882 | CA20 WALL N OVERLAY PLATES INSTALLATION |
| 216 | SV3-CA20-S4W-CV2486 | CA20 SUB ASSEMBLT 2 WORK LIST ITEMS WB-W00002, WB-W00005 & WB-W00006 |
| 217 | SV3-CA20-S4W-CV1836 | FABRICATION OF CA20 OVERLAY PLATE |
| 218 | SV0-867-EWW-EL0251 | Installation of Electrical Power to Guard Shack & Non Manual Turnstiles |
| 219 | SV3-CA01-S5W-CV3310 | CA01-10 UNSATISFACTORY IRs AND N&D REPAIRS-STRUCTURAL REPAIRS |
| 220 | SV0-MH90-EGW-EL0236 | Electrical Grounding for the Heavy Lift Derrick |
| 221 | SV0-1000-EWW-TP0970 | Temp Power Feeder to Material Assembly Center |
| 222 | SV0-8000-EWW-TP0971 | Temporary Power to N.O.I.G 6 Mock Up Pad |
| 223 | SV4-WWS-PLW-ME0982 | Turbine Building WWS 82'-9" Elevation Embedde Piping Package 1 |
| 224 | SV0-SDS-PLW-ME0133 | INSTALLATION OF THE TRENCH #4 SANITARY DRAINAGE SYSTEM GRINDER PUMPS |
| 225 | VNC-CFA-ME-PWS-008 | Installation Of Underground Piping for the Potable Water System |
| 226 | SV3-WLS-PLW-ME0686 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-759 |
| 227 | SV3-2030-CCW-CV0132 | 100' EL Slab Mud Mat (Includes 1st Bay) |
| 228 | SV0-0000-CCW-CV0005 | Install Chemical Skid and Tanks Foundation |
| 229 | SV0-862-EWW-EL0254 | Electrical Feeder Installation to Safety, Medical, & Fire Facility (Building 142) |
| 230 | SV0-843-PPW-ME0104 | FABRICATION AND INSTALLATION OF THE TEMPORARY PIPING (BELOW SLAB) FOR THE ELECTRICAL SHOP |
| 231 | VNC-CFA-CV-MSC-010 | QORE CONCRETE |
| 232 | SV4-1210-EGW-EL0356 | Electrical Grounding Installation for Areas 1, 2, & 3 in Auxiliary Building at Elevation 66' 6" |
| 233 | SV0-652-E0W-EL0398 | Control Room Simulator Assembly |
| 234 | SV0-SDS-PLW-ME0048 | INSTALLATION OF GRINDER PUMP STATIONS FOR TRENCH 2&3 |
| 235 | VNC-09-COMM-WW-ME-000-0001 | WELL WATER FILL STATION FOR DUST CONTROL |
| 236 | WP 09-124658001-1275-M-DEMO-002 | NEW TITLE |
| 237 | VNC-COMM-CVW-009 | Installation of Erosion Control Measures for NOI 18 |
| 238 | SV0-0000-CCW-MU0632 | Nuclear Island Concrete Mock-up |

## Exhibit V – Legacy, WIP, and Completed Work Packages

**Table 2. Completed and Voided Work Packages (as of October 17, 2017)**

| | | |
|---|---|---|
| 239 | SV0-SDS-PPW-ME0259 | FIELD ROUTE SDS FROM BLDG. #121 AND 165 TO GRINDER PUMP 601A |
| 240 | SV0-0000-EKW-860957 | REPLACE TRIP LEVERS FOR LOAD CENTERS SV0-ZRS-EK-21 & 22 AT 315 BLDG |
| 241 | VNC-COMM-WWS-001 | INSTALLATION OF Y-DRAINAGE PIPE IN LAYDOWN AREA (NOI-7) |
| 242 | SV3-PGS-THW-ME3964 | HYDRO TESTING OF R161 MODULE PGS PIPING |
| 243 | VNC-YARD-MIS-002A | VNC-YARD-MIS-002A |
| 244 | WCD 09-1246058001-1275-C-YARD-025 | Top Soil Removal |
| 245 | SV0-846-PPW-ME0203 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Rebar Fab. Shop, Building 102 |
| 246 | VNC-CFA-ME-RWS-001 | Installation of the Raw Water System in NOI 6 & 7 |
| 247 | SV3-CA01-S4W-CV2240 | CA01-30 SUBMODULE ERECTION |
| 248 | SV3-CWS-CCW-CV0155 | Install temporary pipi restraints on the Phase 1 CWS piping 90 degree elbow. |
| 249 | SV4-ME71-CCW-CV0321 | Installation of the Hot Water Inlet Tunnel (Unit 4) |
| 250 | VNC-CFA-ME-SDS-001 | Sanitary Drainage System Installation |
| 251 | WCD 09-1246058001-1270-M-PWS-001 | WORK CONTROL DOCUMENT - POTABLE WATER SYSTEM (PWS) |
| 252 | WCD 08-1246058001-1275-C-ERC-010 | The purpose of this Work Control Document is to document the installation of a portion of the Erosion Control Measures designated as NOI 10. The work plan is broken into 3 stages. |
| 253 | SV0-867-EWW-TP1054 | D&R AND INSTALLATION OF TEMPORARY POWER TO POST 8B SECURITY BOOTH |
| 254 | SV0-0000-CCW-CV0091 | Soil Screening Equipment Foundations |
| 255 | SV3-KB16-KBW-ME3710 | KB16-TEMPORARY REMOVAL AND RE-ATTACHMENT OF MODULE ASSEMBLY LIFTING LUG |
| 256 | SV3-KB04-KBW-ME3671 | SITE COMPLETION OF KB04 STRUCTURAL STEEL |
| 257 | SV0-YFS-EWW-EL0303 | Temporary Electrical Service To YFS |
| 258 | SV0-SDS-EWW-EL0300 | Electrical Installation of SDS Grinder Pumps MS-600G and MS-602C |
| 259 | SV0-SDS-EWW-EL0269 | ELECTRICAL INSTALLATION OF SDS GRINDER PUMPS MS-601A AND MS-600C |
| 260 | VNC-CFA-ME-CAS-010 | Installation of Piping for the Compressed Air System |
| 261 | WCD 08-1246058001-1275-C-ERC-004 | Erosion Control - NOI 4 |
| 262 | SV0-EFS-EFW-EL0139 | Installation of Generator at Building 147 |
| 263 | WCD 08-1246058001-1275-C-ERC-06A | Erosion Control - NOI 6A |
| 264 | SV0-EFS-EFW-EL0044 | Telecommunications for Construction City |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| | | |
|---|---|---|
| **Table 2. Completed and Voided Work Packages (as of October 17, 2017)** | | |
| 265 | SV4-WGS-MVW-ME6121 | Installation of KB04 / WGS Mechanical Equipment |
| 266 | SV0-804-PPW-ME0311 | Piping and Components for Air Compressor House |
| 267 | SV0-CA20-SPW-CV0065 | Installation of CA20 Platen in MAB |
| 268 | SV0-SDS-EWW-EL0314 | ELECTRICAL INSTALLATION OF SDS GRINDER PUMPS MS-600B, MS-602A & MS-602B |
| 269 | VNC-JE01-EL-MSC-029 | Temporary Water Solution for the Concrete Batch Plant and Dust Control |
| 270 | SV4-EZ80-EWW-EL0144 | Installation of Temporary 13.8 kV Cable to Facilitate Installation of CWS Piping |
| 271 | VNC-ED829-EL-MSC-028 | Temporary Power to 108 (CB&I Containment Vessel Assembly Area) |
| 272 | SV0-821-SSW-CV0263 | Installation of CA01 Platen in MAB |
| 273 | SV0-802-EWW-EL0252 | Installation of Electrical Power to Vehicle Repair Shop |
| 274 | SV3-CA20-S4W-CV2295 | REMOVAL OF CA20 LIFTING LUGS 168 AND 169 |
| 275 | SV0-8000-EWW-TP0763 | Electrical Installation to Form Fabrication Area |
| 276 | SV0-SDS-EWW-EL0250 | Electrical Installation of SDS Grinder Pump MS-601B and SDS Sewage Lift Station MS-503 |
| 277 | SV0-MH90-EWW-TP0624 | Electrical Power Installation to HLD area |
| 278 | SV3-2020-MEW-ME0947 | Assemble Condenser C Flash Box |
| 279 | SV0-8000-EWW-TP0446 | Temporary power installtion to MAB mini mobiles and itaac trailer |
| 280 | SV3-CAS-THW-ME4413 | HYDROSTATIC TESTING OF KB15 MODULE CAS PIPING |
| 281 | SV4-KB10-KBW-ME0962 | KB10 Sump (WWS-MT-06) Installation - Including Legs & Portion 1 only |
| 282 | SV3-CA20-S5W-CV1353 | CA20-01 Liner Plate Weld Rework |
| 283 | SV3-WWS-PLW-ME0334 | Embedded Pipe Installation |
| 284 | SV3-CA20-S5W-CV1420 | CA20-05 Submodule Stud Welding, Rebar Modifications and Misc. Rework/Repairs |
| 285 | SV3-WWS-PLW-ME0409 | Turbine Building WWS 82'9 Elevation Embedded Piping Package 3 |
| 286 | SV4-2020-CCW-CV0381 | U4 Turbine Building Condenser Pedestals |
| 287 | SV3-CA20-S5W-CV1460 | CA20-14 Liner Plate Weld Modification |
| 288 | SV3-WLS-PLW-ME0681 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-753 |
| 289 | SV3-KB04-KBW-ME2478 | SITE COMPLETION OF MODULE KB04 |
| 290 | SV3-MS12-MSW-ME0884 | Installation of VAS-MS-06A/B |
| 291 | SV0-RWS-CCW-CV0001 | Raw Water System (RWS) Storage Tank Ring Foundation |
| 292 | SV4-1000-CRW-CV1265 | INSTALLATION OF UNIT4 NUCLEAR ISLAND BASE MAT REINFORCING STEEL |
| 293 | VN4-XC10-CV-MSC-016 | Safety Related Backfill for Nuclear Island Unit 4 (18 Books) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| | | |
|---|---|---|
| **Table 2. Completed and Voided Work Packages (as of October 17, 2017)** | | |
| 294 | SV0-0000-ERW-EL0007 | Installation of Electrical Wmbeds Through the Module Assembly Building's (BLDG. #150) foundation. The electrical embeds will accomodate the future electrical service to BLDG. #150 |
| 295 | SV0-8700-PLW-ME0069 | Installation of Ive Plant piping and piping components |
| 296 | SV0-8200-MHW-CV0145 | OVERHEAD CRANE INSTALLATION IN THE MODULE ASSEMBLY BUILDING |
| 297 | SV0-8200-SSW-CV0090 | Module Assembly Building Crane Rail Installation |
| 298 | VNC-NIA-CV-MSC-027 | Category 1 & 2 Screening Operation |
| 299 | SV0-817-EWW-EL0344 | Temporary Power to Office Trailers for River Water Intake Contractor |
| 300 | SV4-CWS-XEW-CV0151 | Excavate and Backfill (Bedding) for CWS Piping (Phase 2 Supply and return lines) |
| 301 | SV0-0000-PLW-ME0025 | Installation of CAS Underground Piping for Trench 5 |
| 302 | VNC-CFA-ME-PWS-001 | INSTALLATION OF THE POTABLE WATER SYSTEEM IN NOI 6 & 7 |
| 303 | SV0-SM01-CSW-MU0898 | Fabrication and Field Erection(Except Concrete Placement) for the AP1000 Shield Building RS/SC Connection Zone and Air Inlet/Tension Ring |
| 304 | SV0-846-PPW-ME0106 | REBAR FAB SHOP |
| 305 | SV0-817-EWW-EL0410 | Power and Data Installation to Field Offices for Turbine and Reactor Buildings |
| 306 | SV0-804-PPW-ME0281 | The installation of the floor drain piping for the Air Compressor building #141 |
| 307 | VNC-CFA-EL-MSC-003 | EXCAVATION |
| 308 | SV4-CWS-CCW-CV0154 | Install Temporary Pipe Restaints for Supply/Return Elbows |
| 309 | SV0-874-PLW-ME0691 | Fabricate and Install Sprinkler Piping and Sprinklers for the the Batch Plant |
| 310 | SV0-0000-CCW-CV0117 | Bridge Slope Repairs |
| 311 | SV0-0000-PLW-TP1053 | Installation of Piping & Components to Temporary Toilet Trailer East of Units 3 Nuclear Island |
| 312 | SV0-812-CCW-CV0084 | Install Foundation for Dynamic Learning Center (Bldg. 154) |
| 313 | SV0-PWS-PPW-ME0256 | Flush and Chlorinate Potable Water Header in Building 120 |
| 314 | SV0-MH90-EWW-TP0448 | Assemble and Install Electrical Systems and Components for the Bigge 125 D Heavy Lift Derrick |
| 315 | SV0-8800-E0W-EL0293 | Electrical Service Installation for CB&I Office Trailers |
| 316 | SV0-843-PPW-ME0201 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Electrical Shop, Building 132 |
| 317 | SV0-821-EWW-EL0262 | Electrical Power Installation to Welders in MAB building (Bldg 150.) |
| 318 | SV0-PWS-PLW-TP1127 | Fabricate and Install Potable Water from Building 156 to AMEC Trailer on East Side of Roadway |
| 319 | SV0-010-EWW-TP0625 | Electrical Power Installation to 111 pad |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 320 | SV0-854-CCW-CV0086 | Install Foundation for Craft Shelter (Bldg. 156) |
| 321 | SV0-853-CCW-CV0081 | Install Foundation for Craft Change Facility (Bldg. 124) |
| 322 | SV0-0000-PLW-TP1106 | Tie-In of Potable Water (PWS) and Sanitary Drains (SDS) Piping to Temporary Trailer 117 Annex |
| 323 | SV0-853-CCW-CV0082 | Install Foundation for Craft Change Facility (Bldg. 130) |
| 324 | SV3-2020-MEW-ME0948 | Area 111 Satellite: Condensers A & C Flash Box Temporary Supports |
| 325 | SV0-838-CCW-CV0085 | Install Foundation for Material Issue Warehouse (Bldg. 122) |
| 326 | SV3-CA20-ERW-EL1047 | Conduit Rework |
| 327 | SV0-0000-CCW-CV0046 | High Mast Lighting Concrete Foundation |
| 328 | SV0-833-CCW-CV0073 | Construction Warehouse Foundation |
| 329 | SV0-0000-CCW-CV0139 | Construction and Erection of Soil Screening in NOI-25 and NOI-28 |
| 330 | SV0-852-EWW-EL0298 | 120V/208V Electrical Service at Ice House |
| 331 | SV3-CA20-MHW-CV0923 | Installation of CA20-03 Vertical Lift Attachment Stiffeners |
| 332 | SV0-0000-ELW-TP0412 | Lighting for Gate 18 Heavy Haul Road |
| 333 | WCD 08-1246058001-1275-C-ERC-005 | Erosion Control - NOI 5 |
| 334 | SV0-MH90-VWW-CV0371 | Thermite Welding & Installation of HLD Crane Rail |
| 335 | SV0-0000-C0W-CV0359 | SCBA - Hazmat Training System |
| 336 | SV0-ME71-CCW-CV1031 | Testing of Lenton Position P9 Mechanical Rebar Splice for Cooling Tower Foundations |
| 337 | SV0-MH90-CCW-CV0292 | Installation of the HLD Ring Foundation and Associated Work Activities |
| 338 | SV3-1000-CRW-CV1017 | MECHANICAL COUPLER POST INSTALLATION THREAD INSPECTION |
| 339 | SV0-851-PPW-ME0554 | Construction Toilet Trailer 129 PWS, SDS, Piping from the Trailer to Tie-In Point |
| 340 | SV0-MH90-MHW-RI0350 | Assembly of the Bigge HLD Lower Slew Carriage |
| 341 | SV0-833-EWW-TP0978 | Building 104 Level C Storage Lighting |
| 342 | SV0-MH90-MHW-RI0859 | Receiving of the HLD |
| 343 | SV0-PWS-PLW-ME0029 | Fabrication and Installation of Temporary Piping for Batch Plant Operation |
| 344 | SV0-843-EWW-EL0170 | Installation of Electric Power to Electrical Shop (Building 132) |
| 345 | SV0-804-PPW-TP0418 | Assemble and Install Piping Supports for Air Compressor Piping, Bldg. 141 |
| 346 | VNC-COMM-CVW-005 | Erosion and Sediment Control Plan for NOI 11 |
| 347 | SV0-0000-ETW-EL0017 | Construction Temporary Power for Building 315 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 348 | SV0-851-PPW-ME0273 | Fabrication and Installation of Temp Piping (for PWS and SDS) between toilet trailer 127 and tie-in point |
| 349 | SV0-0000-PLW-ME0377 | Installation of Piping and Components to Bath Room Trailer |
| 350 | SV0-851-PPW-ME0272 | Fabrication and Installation of Temp Piping (for PWS and SDS) between toilet trailer 126 and tie-in point |
| 351 | SV0-MH90-MHW-RI0967 | Load Test of HLD |
| 352 | SV0-841-PPW-ME0108 | Carpenter Shop |
| 353 | SV0-EFS-EFW-EL0189 | Interchange of UPS at Building 147 |
| 354 | SV0-804-PPW-ME0396 | Install Air Compressor Equipment at Building 141 |
| 355 | SV0-874-PLW-ME0673 | Rotate One Fly Ash Pipe and One Cement Pipe 90 degrees West from Present Location at Batch Plant 2 |
| 356 | SV0-829-EWW-EL0160 | Electrical Installation for 30 Ton and 50 Ton Overhead Cranes at Modular Assembly Building |
| 357 | SV0-CA20-MHW-RI1909 | CONSTRUCTING HAMMERHEAD FOR TESTING CA20 LIFTING LUG ATTACHMENTS |
| 358 | SV0-8800-EWW-TP0414 | Temporary Power to CBI Trailors and Thomarios Trailors |
| 359 | SV0-851-PPW-ME0271 | Fabrication and Installation of Temp Piping (for PWS and SDS) between toilet trailer 119 and tie-in point |
| 360 | WCD 08-1246058001-1275-C-ERC-003 | Erosion Control - NOI 3 |
| 361 | SV0-853-EWW-EL0169 | Installation of Electric Power to Craft Change House No. 2 (Building 130) |
| 362 | SV0-832-PPW-TP0667 | Provide Potable Water to Praxair Facility |
| 363 | SV0-RWS-PLW-ME0634 | Fabricate and Install an Alternate Raw Water Supply to the Batch Plant |
| 364 | SV3-CA20-MHW-CV0765 | Installation of Submodule CA20-01 Vertical Lifting Attachments |
| 365 | SV0-851-PPW-TP0766 | InstallRestroom Trailer (PWS & SDS Piping) on South East Side Of Unit3 |
| 366 | SV0-853-PPW-ME0206 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Craft Change #1, Building 124 |
| 367 | SV4-1000-VTW-CV0150 | Perform Shear Wave Velocity Testing of Nuclear Island Backfill |
| 368 | SV0-832-PPW-TP0703 | Fabricate and Install Compressed Gas Piping/Supports for Weld Test Bldg 134 |
| 369 | SV0-0000-XEW-CV0342 | Area 111 Excavation Preparation |
| 370 | SV0-833-PPW-ME0116 | Fabrication and Installation of the Temporary Piping (Below Slab) for the Warehouse |
| 371 | SV0-832-PPW-TP0882 | Provde compressed air service to buliding 136- |
| 372 | SV0-832-PPW-TP0704 | Install Compressed Air and Welding Gases to the 131 Bldg (Pipe Shop) |
| 373 | SV0-0000-CBW-CV0213 | Prefabricated CJ Bulkhead Panels for the Turbine Building |
| 374 | SV0-804-PPW-TP1094 | Route Condensate Drain from BLDG. 141 to Sanitary Sewer |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 375 | SV0-843-CCW-CV0079 | Install Foundation for Electrical I&C Shop (Bldg. 132) |
| 376 | SV0-834-CCW-CV0076 | Install Foundation for Bottle Gas Storage (Bldg. 135) |
| 377 | SV0-853-EWW-EL0174 | Installation of Electrical Power to Craft Change House No. 1 (Building 124.) |
| 378 | SV0-891-PPW-ME0253 | Fabrication and Installation of Temp. Piping Below Slab and to tie-in points) for the Test Slab |
| 379 | SV0-853-PPW-ME0110 | Craft Change #1 |
| 380 | SV0-8000-EWW-EL0242 | Installation of Electrical Power to Weld Test Shop and Gas Bottle Storage Building (Buildings 134 & 135.) |
| 381 | SV0-802-PPW-ME0105 | Truck Washing Facility |
| 382 | SV0-0000-CRW-MU0619 | Mock Up Basemat |
| 383 | SV0-852-PPW-ME0406 | Fabrication and Installation PWS & SDS Piping to Ice House Buildings No.144 |
| 384 | SV0-817-PPW-ME0109 | Dynamic Learning Center |
| 385 | SV0-8200-EWW-EL0067 | Electrical Installation for Modular Assembly Building (BLDG. 150) |
| 386 | SV4-2020-CEW-CV0968 | Unit 4 Turbine Building Construction Aids |
| 387 | SV0-0000-CCW-CV0617 | "Mock Up" Basemat Mudat |
| 388 | SV0-841-PPW-ME0205 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Carpenter Shop, Building 133 |
| 389 | SV0-DRS-XDW-CV0011 | Install Storm Drainage System in NOI-10 Area (Construction Parking lot) |
| 390 | SV3-WRS-PLW-ME0328 | Auxilary Building Embedded Piping |
| 391 | SV3-PXS-THW-ME6275 | HYDROSTATIC TESTING OF KQ10 PXS PIPE |
| 392 | SV4-KB13-KBW-ME0963 | KB13 Sump (WRS-MT-01) Installation - Including Legs & Portion 1 only |
| 393 | SV3-1210-EGW-EL1065 | Unit 3 Auxillary Bldg EL.66'-6" Grounding Work Package for Walls 1, 2 |
| 394 | SV3-DWS-THW-ME3442 | HYDROSTATIC TESTING OF KB12 DWS PIPING |
| 395 | SV3-G100-XEW-CV0246 | Unit 3 Nuclear Island Horizontal Waterproof Membrane |
| 396 | SV3-CA01-S5W-CV3321 | CA01-05 UNSAT IRS AND N&DS REPAIRS - STRUCTURAL REPAIRS |
| 397 | SV4-WGS-PHW-ME6123 | INSTALL KB04 WGS PIPE SUPPORTS |
| 398 | SV3-WLS-P0W-ME2769 | KB16-INSTALLATION OF SMALL BORE SEAL WATER PIPING (ISOMETRICS SV3-WLS-PLW-110 & 113) |
| 399 | SV3-WWS-PLW-ME0408 | Turbine Building WWS 82'9 Elevation Embedded Piping Package 2 |
| 400 | SV0-813-EWW-EL0171 | Installation of Power to Communication Rooms in Building 120. |
| 401 | SV0-0000-XSW-CV0395 | Asphalt Repairs for the Existing Roadway into Units 1 & 2. |
| 402 | SV0-853-PPW-ME0211 | Construction Craft Change #2 Building above slab piping and fixtures. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 403 | SV0-RWS-PLW-ME0291 | Water Supply from Shaw's Raw Water System (RWS) Tank to Morgan's Dust Control. |
| 404 | SV0-8700-PLW-ME0034 | TEMPORARY PIPING FOR BATCH PLANT |
| 405 | SV0-835-PPW-ME0204 | Construction Tool Room & Rigging Loft above slab piping and fixtures |
| 406 | SV0-0000-JTW-IC8995 | INSTALL REMAINING TUBING RUNS AT THE 315 BUILDING |
| 407 | SV3-CA20-S4W-CV2322 | CA20 SUB ASSEMBLY 1 PUNCH LIST ITEMS WB-W00064 |
| 408 | SV0-PWS-PLW-ME0305 | Install PVC water line and faucet from PWS outside of building #150 |
| 409 | SV0-DRS-XDW-CV0138 | Installation of 15" HDPE Storm Drain Pipe in Existing Concrete Ditch |
| 410 | VNC-PL87-ME-SDS-032 | Fabrication and Installation of the Sanitary Drainage System in NOI 12 |
| 411 | SV0-8200-SSW-RI0172 | Functional Testing, 125% Load Testing of the 30 Ton, 50 Ton Northern and 50 Ton Southern Overhead Cranes (MAB) |
| 412 | SV0-MH90-CCW-CV0164 | Installation of the HLD Counterweight Mudmat and Associated Work Activities |
| 413 | SV3-CWS-XEW-CV0055 | Excavate and Backfill (Bedding) for CWS Piping (Phase 2 Supply and Return Lines) |
| 414 | SV0-842-CCW-RI0268 | Installation of the 15 Ton Overhead Cran Hoist in Building 131 |
| 415 | SV0-RWS-CCW-CV0238 | Raw Water System- Pipe Stanchion Support Foundations |
| 416 | SV0-SDS-PLW-ME0023 | The Installation of the Sanitary Drainage System HDPE Piping for Trench 5 |
| 417 | SV0-8700-GCW-CV0040 | Installation of Temporary Concrete Batch Plant Structures. |
| 418 | SV3-WRS-PLW-ME0327 | Auxilary Building Embedded Piping |
| 419 | SV3-WRS-PLW-ME0329 | Auxilary Building Embedded Piping |
| 420 | SV3-WRS-PLW-ME0977 | Installation of Large Bore WRS Piping to KB13 |
| 421 | VN3-XC10-CV-MSC-015 | NUCLEAR ISLAND BACKFILL UNIT 3 |
| 422 | VNC-CFA-EL-MSC-002 | Temporary Power for the Unit #4 Makeup Well. |
| 423 | SV0-835-PPW-ME0107 | Construction Tool Room, M&TE, and Rigging Loft below slab and embedded piping. |
| 424 | SV0-YFS-CCW-CV0237 | Yard Fire System - Pipe Stanchion Support Foundations |
| 425 | SV0-RWS-PLW-ME0260 | Well water supply to Auger Cast Drilling Subcontractor area NOI-6 for Support of Construction for Cooling Towers Units 3 & 4 |
| 426 | SV0-851-PPW-ME0324 | Fabricate and install the temporary potable water and sanitary drainage piping for Construction City Trailers #101 and #115 for Construction City |
| 427 | SV0-8000-EWW-EL0264 | Electrical Service Installation for Morgan's Pug Mill. |
| 428 | SV0-854-PPW-ME0113 | Construction Craft Shelter/Insulation Fab Shop below slab and embedded piping. |
| 429 | SV0-8000-EWW-EL0255 | Electrical Service Installation for Morgan's Repair Shop and Cooling Tower Subcontractor |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 430 | SV0-CWS-PLW-ME0290 | CWS Rework Activities |
| 431 | SV3-RNS-MPW-ME1193 | Disassembly of Residual Heat Removal Pump A (SV3-RNS-MP-01A) |
| 432 | SV0-ME71-EWW-EL0317 | Temporary Power for Cooling Tower Subcontractor |
| 433 | SV4-CWS-PLW-ME0187 | Unit 4 CWS Phase 2 Supply Line |
| 434 | SV0-CWS-PLW-ME0369 | Miscellaneous Items for CWS |
| 435 | SV3-1000-VTW-CV0149 | Shear Wave Testing of NI Backfill |
| 436 | SV0-010-EWW-EL0136 | Electrical Installation for Pumphouse Switchgear Building |
| 437 | SV0-8000-EWW-TP1093 | Temporary Power to N.O.I. 7 South Subcontractor Complex |
| 438 | SV0-8700-GCW-CV0041 | Installation and erection of Ice Plant (all equipment and components) |
| 439 | SV0-YFS-PPW-ME0284 | Start-up and Flush the Yard Fire Water System for Construction City. The Yard Fire Water System Motor Driven Electrical Fire Pump start-up will be performed by the vendor. |
| 440 | SV4-WRS-PLW-ME0951 | Auxilary Building Embedded Piping |
| 441 | SV4-WRS-PLW-ME0952 | Unit 4 Condenser A: Installation of Hotwell Piping |
| 442 | SV4-WRS-PLW-ME0953 | Auxilary Building Embedded Piping |
| 443 | SV4-WRS-PLW-ME0954 | Auxilary Building Embedded Piping |
| 444 | SV4-WRS-PLW-ME0955 | Auxilary Building Embedded Piping |
| 445 | SV4-WRS-PLW-ME0956 | Installation of WRS Embedded Drain Piping and Drain Hubs |
| 446 | SV4-WRS-PLW-ME0957 | Auxilary Building Embedded Piping |
| 447 | SV4-WRS-PLW-ME0958 | Auxilary Building Embedded Piping |
| 448 | SV3-CA20-S4W-CV2165 | CA20 SUB ASSEMBLY 1 PUNCH LIST ITEMS WB-W00047 & WB-W00048 |
| 449 | SV3-ML05-MLW-ME1519 | Attachment of Welded Nelson Studs to Embedded Piping Penetrations 66'-6"-82'-6" Walls only |
| 450 | SV3-CA04-S5W-CV1550 | Fabrication of Submodule CA04-05 |
| 451 | SV3-RNS-MPW-ME1743 | Disassembly of Residual Heat Removal Pump B (SV3-RNS-MP-01B) |
| 452 | SV4-RWS-PLW-ME0070 | Miscellaneous Work on Makeup Well #4 |
| 453 | SV4-2020-CCW-CV0379 | U4 Turbine Building Condensate Pump Pit and WWS Sump |
| 454 | SV3-WRS-PLW-ME0330 | Auxilary Building Embedded Piping |
| 455 | SV4-2020-EGW-EL0402 | ELECTRICAL GROUNDING INSTALLATION FOR TURBINE BUILDING AT ELEVATION 82'9" |
| 456 | SV3-WLS-THW-ME6276 | HYDROSTATIC TESTING OF KQ10 WLS PIPE |
| 457 | VNC-PL87-ME-YFS-030 | Fabrication and Installation of the Yard Fire Water System for NOI 12 |
| 458 | SV4-CWS-CYW-CV0153 | Phase 1 Joint Grouting and Flowable Fill |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 459 | SV3-WLS-PHW-ME2221 | INSTALLATION OF PIPE SUPPORTS ON KB12 (FOR ISOMETRICS SV3-WLS-PLW-60A, 60M, 608) |
| 460 | SV3-WLS-THW-ME7062 | HYDROSTATIC TESTING OF KB15 WLS PIPING |
| 461 | SV3-CA20-S8W-CV1847 | Temporary Bracing for CA20 Lift |
| 462 | SV3-KQ11-KQW-ME6222 | KQ11 - WELDED TUBE FITTINGS AT COVER |
| 463 | SV0-0000-CCW-CV0148 | Concrete Repair of flume in 100 year ditch. |
| 464 | SV3-CA04-S5W-CV1549 | Fabrication of Submodule CA04-04 |
| 465 | VNC-CC00-CV-CCW-033 | Replacement of Concrete Liner for the 100 Year Ditch |
| 466 | SV0-PWS-PLW-ME0022 | Installation of PWS Underground Piping for Trench 5 |
| 467 | SV3-CA20-S5W-CV1393 | CA20-03 LINER PLATE WELD MODIFICATION |
| 468 | SV3-CA20-V0W-CV1852 | Unit 3 CA20 Installation of Alignment/Guide Pins |
| 469 | SV3-CA20-S5W-CV1436 | CA20-10 Liner Plate Weld Modification |
| 470 | SV3-CA02-S4W-CV5918 | CA02- LEAK CHASE FABRICATION |
| 471 | SV3-CA04-S5W-CV1547 | Fabrication of Submodule CA04-02 |
| 472 | SV3-WLS-PHW-ME2224 | INSTALLATION OF PIPE SUPPORTS ON KB12 (FOR ISOMETRICS SV3-WLS-PLW-60D, 672) |
| 473 | SV4-ME71-CCW-CV0098 | Unit 4 Cooling Tower Drilled Shaft Foundations |
| 474 | SV3-CWS-EQW-EL0062 | Electrical Continuity Installation for CWS-Phase 1 &2 |
| 475 | SV3-CA20-S4W-CV2292 | REMOVAL OF CA20 LIFTING LUGS 162 AND 163 |
| 476 | SV3-CA20-S4W-CV2294 | REMOVAL OF CA20 LIFTING LUGS 166 AND 167 |
| 477 | SV3-CA20-S4W-CV5148 | INSTALLATION OF REMAINING COUPLERS IN UNIT 3 CA20 MODULE |
| 478 | SV3-CA05-S5W-CV2211 | CA05 MILL OUT FILLET WELDS CA05-01 & CA05-06 PER E&DCR APP-CA05-GEF-055 |
| 479 | SV3-CA01-S4W-CV2094 | CA01-36 ERECTION |
| 480 | SV3-VWS-PHW-ME3158 | FABRICATE/INSTALL VWS PIPE SUPPORTS IN MODULE KB16 |
| 481 | SV3-SFS-P0W-ME2131 | INSTALLATION OF SMALL BORE KB12SFS PIPING (INCLUDING ISOMETRICS SV3-SFS-PLW-086,087,088,089) |
| 482 | SV0-1220-CPW-MU1652 | Fabrication of Auxiliary Bldg. Precast Concrete Panel Mockup Elevation 82ft 6in |
| 483 | SV3-1230-CYW-850000 | GROUT 100' ELEV., BEAM GAPS |
| 484 | SV3-4032-SHW-EL4036 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40326 SOUTH WEST |
| 485 | SV3-WLS-PHW-ME5869 | Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-WLS-PLW-450. |
| 486 | SV3-4032-SHW-EL4037 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40326 SOUTH EAST |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 487 | SV3-4032-SHW-EL4038 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40326 NORTH EAST AREA |
| 488 | SV3-4032-SHW-EL4035 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40350 |
| 489 | SV3-WLS-PHW-ME5870 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-451 |
| 490 | SV3-MSS-P0W-800000 | U3 INSTALL MAIN STEAM SYSTEM (MSS) PIPING FROM AUX BLDG TO HP TURBINE |
| 491 | SV3-WLS-THW-ME2433 | HYDROSTATIC TESTING OF KB11 WLS PIPING |
| 492 | SV3-4032-SHW-EL5580 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ELEV 100' ADDED SUPPORTS |
| 493 | SV3-WLS-THW-ME3954 | HYDROSTATIC TESTING OF CLASS E WLS PIPING IN MODULE KB38 |
| 494 | SV4-2101-CCW-CV0390 | UNIT 4, TURBINE BUILDING FIRST BAY WALLS, CONCRETE UP TO 122', POUR 1W |
| 495 | SV3-CA05-S5W-CV3400 | CA05 - OUT OF PLANE SHEAR REBAR #4 INSTALLATION |
| 496 | SV3-CA20-S4W-CV0425 | Installation of CA20 SA1 EL 100'-0" Floor Submodules (Submods 52 & 53)- RESERVED FOR RUSSELL FINDLEY |
| 497 | SV3-CA01-S5W-CV3311 | CA01-06 UNSATISFACTORY IRs AND N&D REPAIRS - STUDS |
| 498 | SV0-0000-XSW-CV0141 | Installation of Access Roads |
| 499 | SV3-CA01-S4W-CV2080 | CA01-21 SUBMODULE ERECTION |
| 500 | SV3-1200-CRW-CV1410 | UNIT 3 AUXILIARY BUILDING EL.66-6 "TO 82'-6" REBAR FOR WALLS,5,2,6 |
| 501 | SV3-CA01-S5W-CV3322 | CA01-10 UNSATISFACTORY IRs AND N&D REPAIRS-STUDS |
| 502 | SV4-WRS-PLW-ME1685 | Installation of Large Bore WRS Piping to KB13 |
| 503 | SV0-691-CRW-850000 | BUILDING 305, COMMUNICATION SUPPORT CENTER REBAR FABRICATION |
| 504 | SV4-WLS-THW-ME5555 | HYDROSTATIC TESTING OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-67W |
| 505 | SV3-WLS-PLW-ME0680 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-752 |
| 506 | SV3-WRS-PLW-ME0331 | Auxilary Building Embedded Piping |
| 507 | SV3-1208-SCW-CV2709 | ADMINISTRATION WORK PACKAGE FOR TRIAL FIT-UP OF UNIT 3 SHIELD WALL PANELS PRIOR TO INSTALLATION |
| 508 | SV3-CA20-S4W-CV0319 | Installation of CA20 SA1 EL 66'-6" Floor Submodules (Submods 64, 65) |
| 509 | SV0-842-CCW-RI0258 | Installation of the 15 Ton Overhead Crane, Girders, and Rails in Building 131 |
| 510 | SV3-CA01-S5W-CV3307 | CA01-11 UNSAT IR & N&D STRUCTURE REPAIRS |
| 511 | SV4-WGS-PHW-ME7492 | INSTALLATION OF KB16 WGS PIPE SUPPORTS |
| 512 | SV3-WWS-PLW-ME0612 | Installation of Large Bore WWS Piping |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 513 | SV3-CA04-S5W-CV1548 | Fabrication of Submodule CA04-03 |
| 514 | SV4-1210-EGW-EL0357 | Electrical Grounding Installation for Areas 4, 5, 6 in Auxiliary Building at Elevation 66' 6" |
| 515 | SV3-CA20-S4W-CV2167 | CA20-SUB ASSEMBLY 1 PUNCH LIST ITEMS WB-W00049, WB-W00050, WB-W00051, WB-W00052, WB-W00053 |
| 516 | SV3-KQ10-KQW-ME4602 | SITE COMPLETION OF MODULE KQ10 |
| 517 | SV0-PWS-THW-TP1708 | Hydro Test Potable Water System (PWS) From Bldg 146 to BLdgs 184 & 181 |
| 518 | SV0-ZRS-EWW-TP1158 | Temp Power Feed to River Intake |
| 519 | SV3-CPS-PLW-ME1216 | Unit 3 Turbine Building EL 100'-0" Embedded CPS Piping |
| 520 | SV4-WWS-PLW-ME1649 | UNIT 4 TURBINE BUILDING EL 100'-0": EMBEDDED WWS PIPING PACKAGE #4 |
| 521 | SV3-CA01-S4W-CV2085 | CA01-07 SUBMODULE ERECTION |
| 522 | SV4-WLS-THW-ME5551 | HYDROSTATIC TESTING OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-660 & -661 |
| 523 | SV3-1110-CCW-CV1482 | Grouting Under CVBH |
| 524 | SV4-WLS-THW-ME5552 | HYDROSTATIC TESTING OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-60K, -60L, -602, -603, -604, -605, -606, -607, -609, -676, -678, -679, -67D, -67E, -67F, -67G, -67H, -67K, -67L, -67N, -67P, -67U, -682, -684, -685, -687, -688, -68D, & -68E |

|---|---|---|
| 538 | SV3-2000-X4W-CV0857 | Unit 3 Turbine Building Survey Verification |
| 539 | SV4-1200-CEW-CV1472 | Unit 4 Auxiliary Building Embedded Steel Survey Verification |
| 540 | SV3-2040-MLW-ME2938 | INSTALLATION OF EMBEDDED PIPING PENETRATION FLOOR SLEEVES (SLAB 3) |
| 541 | SV4-2000-X4W-CV1214 | Unit 4 Turbine Building Survey Verification |
| 542 | SV3-CA20-S5W-CV1018 | CA20-04 Stud Welding |
| 543 | SV3-WRS-PLW-ME0326 | Auxilary Building Embedded Piping |
| 544 | SV0-8000-EWW-TP1080 | Dismantle and Remove Electrical and Fiber Optic Components for the Amec Complex |
| 545 | SV3-1200-CRW-CV1408 | UNIT 3 AUXILIARY BUILDING WALLS EL.66'-6 "TO 82'-6" REINFORCING STEEL FOR WALLS,1,4,25 |
| 546 | SV4-WWS-PLW-ME0960 | Auxilary Building Embedded Piping |
| 547 | SV3-KB16-KBW-ME3058 | KB16 - INSTALLATION OF DEGASIFIER VACUUM PUMPS WLS-MP-03A & WLS-MP-03B |
| 548 | SV3-CA01-S5W-CV4222 | CA01-36 UNSATISFACTORY IRs AND N&D REPAIRS-STUDS |
| 549 | SV3-2060-MLW-ME3175 | TURBINE-GENERATOR DECK PIPE SLEEVE PENETRATIONS |
| 550 | SV3-2020-MEW-ME0946 | ASSEMBLE CONDENSER A FLASH BOX |
| 551 | SV3-1200-CRW-CV1412 | UNIT 3 AUXILIARY BUILDING EL.66-6 "TO 82'-6" REBAR FOR WALLS,3,7,15 |
| 552 | SV0-DRS-XDW-CV0045 | Storm Water Drainage System (DRS) Installation in NOI-7 Area |
| 553 | VNC-PL87-ME-PWS-031 | Fabrication and Installation of the Potable Water System for NOI 12 |
| 554 | SV3-2020-CCW-CV0120 | U3 Turbine Bldg. Basemat EL 202'-9" (82'-9") Southwest Quad |
| 555 | SV3-2020-CCW-CV0125 | Turbine Building 89’-2" to 100’ Walls |
| 556 | SV3-2020-CCW-CV0122 | Turbine Building Condenser Piers 82’-9" |
| 557 | SV3-WRS-PLW-ME0596 | Installation of Large Bore WRS Piping |
| 558 | SV0-838-PPW-ME0207 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Material Issue, Building 122 |
| 559 | SV3-ME01-PLW-ME1001 | INSTALLATION OF REHEATER A & B EMERGENCY VENT PIPING (1ST AND 2ND REHEATERS) FOR UNIT 3 CONDENSER A |
| 560 | SV3-ML05-PNW-ME3173 | INSTALL INSULATION OF PENETRATIONS 11504-ML-P04 & P05 IN CA01 |
| 561 | SV3-CA01-S5W-CV4225 | CA01-38 UNSAT IRs AND N&Ds - STUD REPAIRS |
| 562 | SV3-MG01-MEW-ME4878 | FRONT AND MID STANDARD (F-STD & M-STD) SOLE PLATE INSTALLATION |
| 563 | SV3-KB10-MEW-ME2495 | Fabrication/Installation of North Sump Pumps WWS-MP-02A and WWS-MP-02B and associated equipment |
| 564 | SV3-CA20-S4W-CV2489 | CA20 SUB ASSEMBLY 3 & 4 WORK LIST ITEMS WB-W00037, WB-W00223, WB-W00224, WB-W00225, & WB-W00226 |
| 565 | SV3-CA01-S4W-CV2061 | FABRICATE LEAK CHASE PLUG BARS AND END CAPS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 566 | SV4-1200-CRW-CV1740 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING-INSTALLATION OF REINFORCING STEEL ON EXTERIOR WALLS UP TO ELEVATION 82"-6" (WALL PLACEMENTS 1 THRU 8) |
| 567 | SV4-WLS-P0W-ME5415 | INSTALLATION OF KB12 PIPING ISOMETRIC SV4-WLS-PLW-68A |
| 568 | SV4-WLS-P0W-ME5414 | INSTALLATION OF KB12 PIPING ISOMETRIC SV4-WLS-PLW-67X |
| 569 | SV3-WLS-PHW-ME2223 | INSTALLATION OF PIPE SUPPORTS ON KB12 (FOR ISOMETRICS SV3-WLS-PLW-60B, 60H, 60J) |
| 570 | SV3-ML05-MLW-ME3412 | INSTALLATION OF CA03 PENETRATION |
| 571 | SV4-PL03-THW-ME1502 | Pressure Testing of WRS and WWS in the Unit 4 Auxiliary Building |
| 572 | SV3-CA01-S5W-CV4219 | CA01-33 IR STRUCTURAL AND N&D'S |
| 573 | SV3-2020-MEW-ME0740 | Assemble Condenser A Upper Shell Upper Truss |
| 574 | SV3-MG01-MEW-ME4879 | LOW PRESSURE TURBINES A, B, C AND TURNING GEAR SOEL PLATE INSTALLATION |
| 575 | SV3-1120-CYW-850000 | GROUT, REACTOR VESSEL SUPPORTS |
| 576 | SV0-RWS-JEW-861612 | INSTALL PRESSURE GAUGES AT WELL WATER PUMP 4 |
| 577 | SV3-CA01-S4W-CV2239 | CA01-29 SUBMODULE ERECTION |
| 578 | SV3-2020-MEW-ME0847 | Install Condenser B Upper Shell Heater Truss |
| 579 | SV3-CA01-S5W-CV3314 | CA01-48 UNSAT IRs AND N&Ds |
| 580 | SV3-CA01-S4W-CV2084 | CA01-06 Submodule Erection |
| 581 | SV3-WGS-THW-ME3960 | HYDRO TESTING OF R155 MODULE WGS PIPING |
| 582 | SV0-PWS-MTW-861924 | REMOVE AND RE-INSTALL THE PWS TANKS AT THE 315 BUILDING |
| 583 | SV0-0000-JEW-IC8994 | INSTALL REMAINING INSTRUMENTS AT THE 315 BUILDING |
| 584 | SV4-WRS-P0W-861251 | INSTALLATION OF WRS PIPING ON MODULE R104 |
| 585 | SV3-2060-MEW-ME3176 | TURBINE/GENERATOR DECK FIXATOR INSTALLATION |
| 586 | SV3-ML05-MLW-ME1499 | INSTALLATION OF EMBEDDED PIPING PENETRATIONS 66'-6"-82'-6" WALLS ONLY |
| 587 | SV4-1210-EGW-EL1811 | UNIT 4 GROUNDING SHIELD BUILDING WALL EL 66-6" TO 82'-6" |
| 588 | SV3-ML05-MLW-ME4926 | INSTALLATION OF CA01 PENETRATION 11502-ML-P03 |
| 589 | SV3-ML05-MLW-ME4912 | INSTALLATION OF CA01 WALL PENETRATION FOR ROOM 11206/11202 |
| 590 | SV0-ZRS-SSW-862411 | FABRICATE BASEPLATE ANS INSTALL ANCHOR BOLTS FOR DIESEL GENERATOR HVAC SUPPORTS |
| 591 | SV3-WWS-PHW-ME0784 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-313, 31C, 31D) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 592 | SV3-ML05-MLW-ME5526 | Installation of CA03 Penetration |
| 593 | SV0-RWS-MPW-ME1404 | Install Raw Water Pumps in Building 315 |
| 594 | SV0-YFS-P0W-862359 | REMOVE EXISTING ACTUATORS AND INSTALL NEW AUMA ACTUATORS ON SV0-YFS-PL-V003A & V003B |
| 595 | SV3-DWS-THW-ME3422 | HYDRO TESTING OF DWS PIPING IN MODULE R151 - ISO SV3-DWS-PLW-621 |
| 596 | SV3-ML05-MLW-ME6177 | Installation of Temp-Mat Wrap for Penetrations 11209-ML-P09, P12, P13 & P14 |
| 597 | SV3-WGS-P0W-ME2721 | Installation of Small Bore WGS Piping (Includes SV3-WGS-PLW-050, 101, 103, 105, 107) |
| 598 | SV0-YFS-THW-ME8750 | HYDROTEST YFS AT BLDG 315 |
| 599 | SV3-DWS-THW-ME3956 | HYDRO TESTING OF R155 MODULE DWS PIPING |
| 600 | SV0-YFS-P0W-ME9000 | YFS PIPING INSTALLATION AT BLDG 315 |
| 601 | SV3-ML05-MLW-ME7580 | INSTALLATION OF HALF-COUPLINGS AND THERMOWELLS PXS-JE-TE041/042/043/044 |
| 602 | SV3-1208-SCW-CV3087 | COURSE 3 UNIT 3 SHIELD BUILDING |
| 603 | SV0-RWS-P0W-ME6002 | FABRICATE AND INSTALL THE RWS WELL WATER TRANSFER PUMPS EQUIPMENT DRAINS |
| 604 | SV0-PWS-MPW-ME1403 | INSTALL POTABLE WATER PUMPS, HYPOCHLORITE SKID AND THE HYPOCHLORITE TANKS IN BUILDING 315 |
| 605 | SV0-YFS-PLW-ME0071 | YFS- Tank Area Installation- Balance of Plant Components Supporting Temporary Supply |
| 606 | SV0-ZRS-PLW-ME0919 | FABRICATE AND INSTALL DIESEL FUEL OIL LINES FOR BUILDING 315 |
| 607 | SV3-WLS-THW-ME3947 | HYDRO TESTING OF KB15 MODULE WLS PIPING |
| 608 | SV4-WGS-P0W-861305 | INSTALLATION OF WGS PIPING ON MODULE R161 |
| 609 | SV4-1110-CRW-CV1853 | CONTAINMENT CONCRETE REINFORCEMENT - EL. 71'-6" |
| 610 | SV3-CA20-S4W-CV2168 | CA20 Sub Assembly 1 Punch List Items WB-W00062, WB-W00063, & WB-W00065 |
| 611 | SV3-WLS-THW-ME3952 | HYDRO TESTING OF KB37 MODULE WLS CLASS D PIPING |
| 612 | SV3-WLS-THW-ME6277 | Hydro Testing of R216 WLS Piping |
| 613 | SV3-VWS-PHW-ME3155 | INSTALL VWS PIPE SUPPORTS ON R161 MODULE |
| 614 | SV3-FPS-THW-ME3957 | HYDRO TESTING OF R155 MODULE FPS PIPING |
| 615 | SV3-CA05-S8W-CV1871 | CA05 LIFT LUGS INSTALLATION |
| 616 | SV3-CA04-S5W-CV1546 | Fabrication of Submodule CA04-01 |
| 617 | SV0-EDS-EWW-EL3564 | 315 BLDG CBL. PULLING & TERMINATIONS FOR EDS/EDS9 SYSTEM |
| 618 | SV0-EHS-EWW-EL7450 | HEAT TRACE SYSTEM @ 315 BUILDING |
| 619 | SV0-846-CCW-CV0077 | Install Foundation for Rebar Fab Shop (Bldg. 102) |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 620 | SV0-PWS-M0W-862038 | INSTALL SUN SCREEN OVER THE PWS CHEMICAL INJECTION SKID |
| 621 | SV0-ZRS-ERW-EL2746 | FABRICATE SUPPORTS AND INSTALL OUTSIDE CABLE TRAY NXT004BB FROM LOAD BANK SV0-ZRS-LB-001 BACK TOWARDS 315 BLDG. |
| 622 | SV0-ZRS-EWW-860203 | INSTALL CABLE FROM SWITCHGEAR EK21 GATEWAY TO PLC MODBUS INTERFACE |
| 623 | SV3-VWS-P0W-ME2971 | FABRICATE AND INSTALL VWS PIPING FOR MODULE R161 (INCLUDES DRAWINGS SV3-VWS-PLW-320, SV3-VWS-PLW-350, SV3-VWS-PLW-420 & SV3-VWS-PLW-450) |
| 624 | SV3-CA01-S5W-CV4144 | CA01-39 UNSATISFACTORY IRS AND N&D REPAIRS-STUDS |
| 625 | SV4-WLS-P0W-861249 | INSATLLATION OF WLS PIPING ON MODULE R104 |
| 626 | SV0-YFS-PHW-ME9001 | YFS SUPPORT INSTALLATION OF BLDG 315 |
| 627 | SV0-EDS9-DCW-862001 | SV0-EDS9-DC-02 BATTERY CHARGER #2 |
| 628 | SV0-ZRS-PHW-ME5486 | INSTALL PIPE SUPPORTS ON THE DIESEL FUEL OIL LINES FOR BUILDING 315 |
| 629 | SV0-YFS-PHW-ME0926 | FABRICATE AND INSTALL PIPE SUPPORTS ON THE YARD FIRE WATER LINES FOR BUILDING 315 |
| 630 | SV0-PWS-P0W-861445 | FABRICATE AND INSTALL THE CPVC AND OTHER PLASTIC PIPING SYSTEMS ASSOCIATED WITH THE POTABLE WATER SYSTEM (PWS) AT 315 BUILDING |
| 631 | SV3-CA01-S4W-CV2148 | CA01-10 SUBMODULE ERECTION |
| 632 | SV3-WGS-PHW-ME2985 | INSTALLATION OF WGS PIPING SUPPORTS IN MODULE R151 |
| 633 | SV0-RWS-PHW-ME0925 | Install Pipe Supports on Raw Water lines for Building #315 |
| 634 | SV3-WLS-MVW-ME2559 | Installation of KB11/WLS Mechanical Equipment |
| 635 | SV3-R104-R1W-ME0722 | INSTALLATION OF R104 MODULE |
| 636 | SV0-ZRS-PHW-ME8799 | Fabricate and Install Pipe Supports on the Diesel Fuel Oil Lines for Building 315 |
| 637 | SV3-WRS-P0W-ME2189 | UNIT 3 KB13: INSTALLATION OF LARGE BORE PIPING TO WRS-MP-01A (INCLUDES ISOMETRICS SV3-WRS-PLW-550 & 552) |
| 638 | SV4-ML05-MLW-ME6235 | Install CA05 Penetration SV4-11209-ML-I18 |
| 639 | SV3-WRS-P0W-ME2190 | UNIT 3 KB13: INSTALLATION OF LARGE BORE PIPING TO WRS-MP-01B (INCLUDES ISOMETRICS SV3-WRS-PLW-553, 557 & 55E) |
| 640 | SV3-WLS-PLW-ME0523 | INSTALLATION OF SMALL BORE WLS PIPING. (INCLUDES: SV3-WLS-PLW-720) |
| 641 | SV4-ML05-MLW-ME7960 | INSTALL SV4 CA01 PENETRATION SV4-11300-ML-P53 & SV4-11300-ML-P54 |
| 642 | SV3-CA01-S4W-CV2553 | INSTALLATION OF CA01-15 |
| 643 | SV0-SDS-PLW-TP0870 | Installation of SDS Cleanouts for Temporary Building |

## Exhibit V – Legacy, WIP, and Completed Work Packages

|---|---|---|
| **Table 2. Completed and Voided Work Packages (as of October 17, 2017)** | | |
| 644 | SV3-WGS-P0W-ME2770 | KB16 - INSTALL MISCELLANEOUS SMALL BORE PIPING (ISOMETRICS SV3-WGS-PLW-010, & 543) |
| 645 | SV3-1208-CCW-CV8408 | CONCRETE IN COURSE 2 SHIELD BUILDING PANELS |
| 646 | SV3-KB16-KBW-ME2759 | KB16 - INSTALLATION OF LIQUID SEAL WATER HEAT EXCHANGER |
| 647 | SV3-WRS-P0W-ME2192 | UNIT 3 KB13: INSTALLATION OF SMALL BORE PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-551, 554, 555, 55F & 55G) |
| 648 | SV4-WLS-P0W-ME5413 | INSTALLATION OF KB12 PIPING ISOMETRICS SV4-WLS-PLW-60B, 60H, 60J |
| 649 | SV4-WLS-P0W-ME5412 | INSTALLATION OF KB12 PIPING ISOMETRICS SV4-WLS-PLW-60A, -60M, -608 |
| 650 | SV3-CA05-S4W-CV1873 | CA05 ANGLE SEATS |
| 651 | SV3-WLS-P0W-ME2134 | INSTALLATION OF SMALL BORE KB12 WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-60E, 60F & 60G) |
| 652 | SV3-CA01-S5W-CV4214 | PERFORM REWORK ON IDENTIFIED STUD RELATED DEFICIENCIES FROM INSPECTION REPORT (IR) S540-001-14-0061 FOR CA01-14, ALSO PERFORM N&D REWORK AND REPAIRS AS INDICATED IN THE APPROVED DISPOSITIONS |
| 653 | SV3-CA01-V2W-CV2104 | CA01 INSTALL AND TEST LUG AT SM19 |
| 654 | SV0-RWS-PLW-ME0163 | Fabrication and Installation of the Trench #7 Raw Water System Piping |
| 655 | SV3-CA01-S5W-CV2475 | CA01-08 UNSAT IR REPAIR |
| 656 | SV3-KB16-KBW-ME2761 | KB16 - INSTALLATION OF DEGASIFIER SEPARATOR PUMP WLS-MP-05B |
| 657 | SV4-KB04-KBW-ME6120 | FABRICATION OF KB04 MECHANICAL EQUIPMENT MODULE |
| 658 | SV0-0000-XGW-CV0663 | Pumphouse Switchgear Building #315 Grade for BLDG. Slab |
| 659 | SV0-0000-PLW-ME2477 | INSTALL PIPING AND PUMP FOR BATCH PLANT CHILLER CONDENSATE |
| 660 | SV3-WLS-THW-ME2432 | HYDROSTATIC TESTING OF KB12 WLS PIPING |
| 661 | SV0-RWS-PVW-862686 | CORRECT VALVE POSITION INDICATOR AND ROTATE VALVE 90 DEGREES BETWEEN PIPING FLANGES ON RWS VALVE #SV0-RWS-V012B IN ACCORDANCE WITH N&D SV0-RWS-GNR-000071 |
| 662 | SV0-YFS-EWW-EL3562 | 315 BLDG CBL PULLING & TERMINATIONS FOR YFS SYSTEM |
| 663 | SV3-CA01-S4W-CV4207 | CA01-02 Support Leg Installation (SA4) |
| 664 | SV3-WGS-PHW-ME3154 | INSTALL WGS PIPE SUPPORTS ON R161 MODULE |
| 665 | SV3-PGS-THW-ME3958 | HYDRO TESTING OF R155 MODULE PGS PIPING |
| 666 | SV3-CA20-S4W-CV2625 | CA20 SUB ASSEMBLY 2 WORK LIST ITEMS WB-W00117 & WB-W00118 |
| 667 | SV3-CA01-S4W-CV3800 | CA01-43 SUBMODULE INSTALLATION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 668 | SV3-WLS-THW-ME3035 | KB16 - HYDROSTATIC TESTING OF WLS PIPING |
| 669 | SV0-010-CYW-CV5566 | Install Drywell Sump for Building 315. |
| 670 | SV0-PWS-PHW-861572 | FABRICATE AND INSTALL THE PIPE SUPPORTS AND BASEPLATES ASSOCIATED WITH ISOMETRICS SV0-PWS-PLW-980 |
| 671 | SV3-WLS-P0W-ME2144 | INSTALLATION OF SMALL BORE KB11 WLS PIPING (INCLUDING SV3-WLS-PLW-660, 661, 676, 67K, 67U, 684, 685, 687, & 68E) |
| 672 | SV3-WGS-P0W-ME2676 | Fabrication/Installation of WGS Piping Module KB14(Isometrics SV3-WGS-PLW-02A,04A,06A,07A,8A,9A,10E,030, 110 AND 130) |
| 673 | SV0-YFS-PLW-ME0024 | Installation of YFS Underground Piping for Trench 5 |
| 674 | SV3-CA01-V2W-CV2097 | CA01 INSTALL AND TEST LUG AT SM 04 |
| 675 | SV0-RWS-EWW-EL0943 | PUMPHOUSE SWITCHGEAR BLDG 315 CABLE PULLING AND TERMINATIONS - RWS |
| 676 | SV0-YFS-PVW-862706 | TROUBLESHOOT/ADJUST TRAVEL STOPS ON YSF VALVES # SV0-YFS-V008, AND SVO-YFS-PVW-V010 |
| 677 | SV3-WRS-P0W-ME2191 | UNIT 3 KB13: INSTALLATION OF LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-WES-PLW-556 & 559) |
| 678 | SV3-WGS-P0W-ME2722 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-051, 061, 071, 081, 091) |
| 679 | SV4-VWS-PHW-861285 | INSTALLATION OF VWS PIPE SUPPORTS ON MODULE R155 |
| 680 | SV4-DWS-P0W-861299 | INSTALLATION OF DWS PIPING ON MODULE R151 |
| 681 | SV4-CAS-P0W-861267 | INSTALLATION OF CAS PIPING ON MODULE R151 |
| 682 | SV3-R161-R1W-ME0726 | Installation of R161 Commodity Module |
| 683 | SV3-FPS-PHW-ME2977 | INSTALLATION OF FPS PIPING SUPPORTS IN MODULE R151 |
| 684 | SV3-KB38-KBW-ME2346 | INSTALLATION OF KB38 COMPONENTS |
| 685 | SV4-WLS-PHW-861250 | INSTALLATION OF WLS PIPIPE SUPPORTS ON MODULE R104 |
| 686 | SV4-DWS-PHW-861300 | INSTALLATION OF DWS PIPE SUPPORT ON MODULE R161 |
| 687 | SV3-DWS-P0W-ME2978 | INSTALLATION OF DWS PIPING IN MODULE R151 ISO SV3-DWS-PLW-621 |
| 688 | SV3-CCS-PHW-ME0801 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-522, 540 |
| 689 | SV3-CA20-S5W-CV1752 | PERFORM MISC REWORK/REPAIRS ON FLOOR MODULES FOR CA20 |
| 690 | SV0-010-PHW-ME9016 | Install Baseplates and Anchor Bolts for the Potable Water System (PWS) System at the 315 Building |
| 691 | SV0-RWS-P0W-862358 | FABRICATION & INSTALLATION OF THE #4 WELL PIPING TO THE RWS STORAGE TANK |
| 692 | SV3-KB13-KBW-ME7437 | Installation of Radioactive Drain Sump Pump Cover |
| 693 | SV4-CA20-CAW-850001 | CA20 SHIMS AND GUIDE PINS |

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 694 | SV3-CA01-V2W-CV2103 | CA01 INSTALL AND TEST LUG AT SM 18 |
| 695 | SV3-ME71-CCW-CV0092 | Unit 3 Cooling Tower Drilled Shaft Foundations |
| 696 | SV0-YFS-PLW-ME1198 | RELOCATE THE ELECTRIC FIRE WATER PUMP SKID TO THE 315 PUMP HOUSE |
| 697 | SV3-ML05-MLW-ME7638 | 100' SHIELD BUILDING FLOOR PENETRATIONS |
| 698 | SV0-817-EWW-TP1394 | TEMPORARY POWER FOR CONSTRUCTION STARTUP BUILDING 207 |
| 699 | SV0-ZRS-MGW-EL5569 | INSTALL AND ANCHOR THE DIESEL GENERATOR SV0-ZRS-MGW-001 AND ASSOCIATED COMPONENTS IN BUILDING 315 |
| 700 | SV0-ZRS-P0W-ME8858 | Fabricate and Install Piping for the above ground Diesel Fuel Oil Lines for Building 315 |
| 701 | SV4-KQ11-KQW-ME8910 | FABRICATION OF KQ11 LID |
| 702 | SV4-2020-CCW-CV0380 | U4 Turbine Building Condenser Bay 82’-9" Slab |
| 703 | SV0-ZRS-MTW-ME5567 | INSTALL DIESEL FUEL OIL TANK AND PUMP SKID @ BUILDING 315 |
| 704 | SV0-CWS-VRW-ME0053 | Rework Damaged Circulation Water System (CWS) (PCCP) Pipe Fittings |
| 705 | SV3-PY05-PYW-ME1462 | Installation of SWS In-Line Automatic Backwash Strainers in the Unit 3 Turbine Building El. 82'-9" (SWS-PY-S06A&SWS-PY-S06B) |
| 706 | SV3-VWS-P0W-ME2765 | KB16 - INSTALLATION OF SMALL BORE CHILLED WATER PIPING (ISOMETRIC SV3-VWS-PLW-385 &485) |
| 707 | SV3-ML05-MLW-ME1500 | Attachment of welded couplings to embedded piping penetrations 66'-6"-82'-6" Walls only |
| 708 | SV3-1000-CRW-CV0295 | Unit 3 Nuclear Island Reinforcing Steel |
| 709 | SV3-CA01-V2W-CV2102 | CA01 INSTALL AND TEST LUG AT SM17 |
| 710 | SV3-WLS-THW-ME3949 | HYDRO TESTING OF KB22 MODULE WLS PIPING |
| 711 | SV3-WLS-THW-ME3953 | HYDROSTATIC TESTING OF CLASS D WLS PIPING IN MODULE KB38 |
| 712 | SV3-WLS-THW-ME3950 | Hydro Testing of KB27 Module WLS Piping |
| 713 | SV3-WGS-THW-ME3966 | HYDROSTATIC TESTING OF WGS PIPING ON MODULE R161 |
| 714 | SV0-YFS-PLW-ME0918 | Fabricate and Install Yard Fire Water Lines for Building 315 |
| 715 | SV0-ZRS-EKW-EL2745 | INSTALL ELECTRICAL EQUIPMENT LOAD BANK SV0-ZRS-LB-001 AT PUMPHOUSE SWITCHGEAR BLDG. 315 |
| 716 | SV0-ZRS-THW-ME6273 | PERFORM HYDROSTATIC/PNEUMATIC TESTING ON THE DIESEL FUEL OIL LINES @ BUILDING 315 |
| 717 | SV0-PWS-P0W-862331 | SUPPORT FLUSH PLAN SV0-PWS-TFP-401 FLUSH PLAN |
| 718 | SV3-R155-KBW-ME3672 | SITE COMPLETION OF R155 SRUCTURAL STEEL |
| 719 | SV0-YFS-CCW-CV5434 | GROUT FOR ELECTRIC YARD FIRE WATER PUMP |
| 720 | SV0-PWS-EWW-EL3561 | 315 BLDG CBL PULLING & TERMINATIONS FOR PWS SYSTEM |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 721 | SV0-ZRS-EKW-EL5901 | INSTALLATION OF FLEXI-BAR BUS CONNECTIONS FOR LOAD CENTERS SV0-ZRS-EK-21 & 22 AT 315 BLDG |
| 722 | SV0-RWS-P0W-861787 | SUPPORT FLUSH PLAN SV0-14-RWS-001 FOR BUILDING 315 PIPING |
| 723 | SV3-SFS-THW-ME2431 | HYDROSTATIC TESTING OF KB12 SFS PIPING |
| 724 | SV3-CA05-S4W-CV1874 | CA05 NORTH SIDE WALL OVERLAY PLATES AND BEAM SEATS INSTALLATION |
| 725 | SV3-VWS-THW-ME4460 | HYDROSTATIC TESTING OF R161 VWS PIPING (CLASS E) |
| 726 | SV4-KB16-KBW-ME7487 | INSTALLATION OF KB16 DEGASIFIER VACUUM PUMPS |
| 727 | SV3-DWS-THW-ME3963 | HYDRO TESTING OF R161 MODULE DWS PIPING |
| 728 | SV3-VWS-THW-ME3959 | HYDRO TESTING OF R155 MODULE VWS PIPING |
| 729 | SV3-CCS-THW-ME3962 | HYDRO TESTING OF R161 MODULE CCS PIPING |
| 730 | SV3-ML05-MLW-ME4821 | INSTALLATION OF PENETRATION 1120-ML-P03 |
| 731 | SV4-CAS-PHW-861296 | INSTALLATION OF CAS PIPE SUPPORTS ON MODULE R161 |
| 732 | SV4-WWS-PLW-ME0959 | Installation of WWS Embedded Drain Piping and Drain Hubs |
| 733 | SV3-KB13-MEW-ME2462 | INSTALLATION OF KB13 SUMP PUMPS WRS-MP-01A & 01B |
| 734 | SV3-CWS-PLW-ME0049 | Unit 3 Circulating Water System (CWS) Phase 2 Supply Lines. |
| 735 | SV3-CA01-V2W-CV2099 | CA01 INSTALL AND TEST LUG SM12 |
| 736 | SV3-VWS-THW-ME3965 | HYDROSTATIC TESTING OF VWS PIPING ON MODULE R161 |
| 737 | SV3-CA01-V2W-CV2098 | CA01 INSTALL AND TEST LUG AT SM 11 |
| 738 | SV3-SFS-MTW-ME2202 | INSTALLATION OF KB12 DEMINERALIZER TANKS (SFS-MV-01A & SFS-MV-01B) |
| 739 | SV3-CA01-S4W-CV2060 | FABRICATE LEAK CHASE PLUG BARS AND END CAPS SUBASSEMBLY 06 |
| 740 | SV3-WGS-P0W-ME2984 | Installation of WGS Piping in Module R151 Per ISO SV3-WGS-PLW-541 |
| 741 | SV3-SFS-PHW-ME7022 | FABRICATION/INSTALLATION OF CA03 CLASS D PIPE SUPPORTS SV3-SFS-PH-11R2024; SV3-SFS-PH-11R2025; & SV3-SFS-PH-11R2026 |
| 742 | SV3-WGS-P0W-ME2972 | FABRICATE AND INSTALL WGS PIPING FOR MODULE R161 (INCLUDES DRAWING SV3-WGS-PLW-540) |
| 743 | SV0-0000-SSW-CV7453 | MISCELLANEOUS STRUCTURAL STEEL |
| 744 | SV0-PWS-CCW-CV0415 | Pipe Support Level Foundations |
| 745 | SV3-CA01-V2W-CV2100 | CA01 INSTALL AND TEST LUG AT SM13 |
| 746 | SV3-WWS-P0W-ME2701 | WWS EMBEDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-310, 31E, 319, & 31A) |
| 747 | SV4-KB16-KBW-ME7485 | INSTALLATION OF LIQUID SEAL HEAT EXCHANGER SV4-WLS-ME-03 |
| 748 | SV3-CA01-S4W-CV2241 | CA01-31 SUBMODULE ERECTION |
| 749 | SV3-CA01-S4W-CV2552 | INSTALLATION OF CA01-14 |
| 750 | SV3-CA01-V2W-CV2101 | CA01 Install and Test Lug at SM 16 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

**Table 2. Completed and Voided Work Packages (as of October 17, 2017)**

| | | |
|---|---|---|
| 751 | SV4-CWS-PLW-ME0198 | Unit 4 CWS Phase 1 Supply Line |
| 752 | SV0-PWS-PVW-862469 | DISASSEMBLE/TROUBLESHOOT, PWS VALVE #SV0-PWS-V591B, AND GEAR BOX |
| 753 | SV3-WLS-PLW-ME0903 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-562, 566, 573, 574, and 575 |
| 754 | SV4-WGS-PHW-861287 | INSTALLATION OF WGS PIPE SUPPORTS ON MODULE R155 |
| 755 | SV3-WLS-PLW-ME0904 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-564, 565, 570, 571, and 572 |
| 756 | SV0-RWS-PHW-861105 | FABRICATE AND INSTALL RWS SUPPORTS SV0-RWS-PH-00R0185 & SV0-RWS-PH-00R0189 @ BLDG 315 |
| 757 | SV0-RWS-EKW-EL0679 | Installation of Electric Load Centers and Misc. Equipment Commodities for the RWS and Tank Farm Pump House Switchgear Bldg. 315 |
| 758 | SV0-PWS-PHW-861991 | FABRICATE AND INSTALL THE PIPE SUPPORTS AND BASEPLATES ASSOCIATED WITH ISOMETRIC SV0-PWS-PLW-981 |
| 759 | SV0-RWS-PHW-ME8406 | Fabricate and Install the RWS Pipe Supports On the RWS Transfer Pumps |
| 760 | SV4-KB15-KBW-ME7476 | INSTALLATION OF KB15 COMPONENTS |
| 761 | SV4-FPS-PHW-861258 | INSTALLATION OF FPS PIPE SUPPORTS ON MODULE R151 |
| 762 | SV0-0000-CCW-CV1583 | Construction of Concrete Transformer Foundations and Other Appurtenant Concrete for the 300 Series Buildings |
| 763 | SV0-0000-CCW-860201 | MISCELLANEOUS CONCRETE FOUNDATIONS FOR THE 315 BUILDING |
| 764 | SV3-CA01-S4W-CV2206 | CA01 SM 02 INSTALLATION |
| 765 | SV3-CA01-S4W-CV2147 | CA01-9 Submodule Erection |
| 766 | SV3-1208-SCW-CV3034 | COURSE 2 UNIT 3 SHIELD BUILDING |
| 767 | SV4-KB16-KBW-ME7486 | INSTALLATION OF KB16 DEGASIFIER SEPARATOR PUMPS |
| 768 | SV3-CA01-S5W-CV4226 | CA01-38 UNSAT IRS AND N&DS- STRUCTURE REPAIRS |
| 769 | SV3-CA05-S4W-CV1877 | CA05 EMBED PLATES AND BEAM SEATS WEST SIDE |
| 770 | SV3-CA01-S4W-CV2081 | FABRICATE LEAK CHASE PLUG BARS AND WELD END CAPS FOR LEAK CHASE FOR CA01 SUB ASSEMBLY 5 |
| 771 | SV3-CA01-S5W-CV3319 | CA01-27 UNSAT IRS AND N&DS - STRUCTURE REPAIRS |
| 772 | SV3-CA01-S4W-CV2096 | CA01-33 SUBMODULE ERECTION |
| 773 | SV4-R161-MDW-861307 | INSTALLATION OF DUCTWORK AND SUPPORTS ON MODULE R161 |
| 774 | SV4-CAS-P0W-861276 | INSTALLATION OF CAS PIPING ON MODULE R155 |
| 775 | SV0-ZRS-EWW-EL3563 | 315 BLDG CBL PULLING & TERMINATIONS FOR ZRS SYSTEM |
| 776 | SV3-CA01-S4W-CV2226 | CA01 SM24 INSTALLATION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 777 | SV3-KB11-KBW-ME2284 | FABRICATION OF KB11 MECHANICAL EQUIPMENT MODULE |
| 778 | SV4-R151-MDW-861269 | INSTALLATION OF HVAC DUCTWORK AND SUPPORTS ON MODULE R151 |
| 779 | SV3-CA01-S5W-CV2817 | CA01-47 REPAIR WORK |
| 780 | SV3-CA20-V2W-CV1728 | INSTALL CA20 LIFT LUGS 164 AND 165 |
| 781 | SV0-ZRS-MTW-ME8969 | Install Diesel Generator's Day Tank--SV0-ZRS-MT-002 @ Bldg 315 |
| 782 | SV4-FPS-P0W-861257 | INSTALLATION OF FPS PIPING ON MODULE R151 |
| 783 | SV4-PGS-PHW-861302 | INSTALLATION OF PGS PIPE SUPPORTS ON MODULE R161 |
| 784 | SV4-PGS-P0W-861282 | INSTALLATION OF PGS PIPING ON MODULE R155 |
| 785 | SV0-PWS-P0W-ME8001 | FABRICATE AND INSTALL THE PWS DISCHARGE PIPING FROM THE PWS PUMP SKID TO THE EXISTING UNDERGROUND PIPE FLANGE @ BLDG. 315 |
| 786 | SV4-CAS-PHW-861277 | INSTALLATION OF CAS PIPE SUPPORTS ON MODULE R155 |
| 787 | SV3-KB10-KBW-ME2469 | Fabrication/Installation of KB10/WWS sump pit and drain structure and pipe supports |
| 788 | SV4-PGS-PHW-861283 | INSTALLATION OF PGS PIPE SUPPORTS ON MODULE R155 |
| 789 | SV4-FPS-P0W-861280 | INSTALLATION FPS PIPING ON MODULE R155 |
| 790 | SV3-4032-CCW-CV1886 | Unit 3 Annex Area 2 East SUmp and Elevator Pit Installation |
| 791 | SV3-CA01-S4W-CV2377 | CA01-07-CORRECT UNSAT IR AND N&Ds |
| 792 | SV3-CA20-S4W-CV2210 | Unit 3 CA20 Coupler Installation at Weld Seams |
| 793 | SV3-EDS-DBW-EL3129 | INSTALL ANNEX BLDG EDS02-DB1 BATTERY RACKS, ROOM 40309 |
| 794 | SV4-0000-CRW-CV8074 | UNIT 4 TRANSFORMER REINFORCEMENT (PLACEMENT 2) |
| 795 | SV3-KQ11-KQW-ME0566 | Install Module KQ11 Portion 1 |
| 796 | SV4-FPS-PHW-861281 | INSTALLATION OF FPE PIPE SUPPORTS ON MODULE R155 |
| 797 | SV4-SDS-PLW-ME1266 | INSTALL SANITARY DRAIN LIFT STATION MS-500 |
| 798 | SV4-ML05-MLW-ME1746 | Attachment of Welded Nelson Studs to Embedded Piping Penetrations 66'-6"-82'-6" Walls Only |
| 799 | SV4-WGS-PHW-861266 | INSTALLATION OF PIPE SUPPORTS OF MODULE R151 |
| 800 | SV3-ME01-PLW-ME0913 | Condenser A Turbine Bypass Piping & Supports |
| 801 | SV4-KB04-KBW-ME5676 | Installation of Module KB04 |
| 802 | SV4-CA20-P0W-860236 | INSPECTION/ VERIFICATION OF CA20 EMBEDDED PIPING |
| 803 | SV3-CA03-S4W-CV2266 | CA03 INSTALL LIFTING LUGS FOR NI SET |
| 804 | SV4-0000-CRW-CV8076 | UNIT 4 TRANSFORMER REPLACEMENT (PLACEMENT 4) |
| 805 | SV4-WGS-PHW-861306 | INSTALLATION OF WGS PIPE SUPPORTS ON MODULE R161 |
| 806 | SV3-CA01-S4W-CV2064 | CA01-37 PRELIMINARY SUB-MODULE FIT-UP |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 807 | SV3-CA01-S5W-CV4213 | CA01-15, PERFORM STRUCTURAL N&D & INSPECTION REPORT (IR) S561-004-14-0467 REWORK AND REPAIRS |
| 808 | SV3-DWS-PHW-ME2979 | INSTALLATION OF DWS PIPING SUPPORTS IN MODULE R151 |
| 809 | SV4-WLS-P0W-ME5395 | INSTALLATION OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-660 & -661 |
| 810 | SV3-1208-CCW-CV8997 | CONCRETE IN COURSE 3 SHIELD BUILDING PANELS |
| 811 | SV3-CA05-S5W-CV2230 | CA05-PAPERCLIP REBAR REMOVAL AND RE-INSTALLATION |
| 812 | SV3-CA05-S5W-CV1869 | CA05 WORK N&Ds FROM SUPPLIER |
| 813 | SV3-WLS-PLW-ME0683 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-755 |
| 814 | SV3-KB12-KBW-ME2258 | Installation of KB12 Structural Steel |
| 815 | SV3-RNS-P0W-861215 | REMOVE MODULE Q240 VALVE OPERATORS |
| 816 | SV3-KB10-KBW-ME2129 | INSTALLATION OF WWS PIPING - MODULE KB10 (ISOMETRICS: WWS-PLW-010, 011, 017, 01G) |
| 817 | SV3-ML05-MLW-850000 | INSTALLATION OF SV3-11206-ML-P01 PENETRATION |
| 818 | SV4-CAS-PHW-861268 | INSTALLATION OF CAS PIPE SUPPORTS ON MODULE R151 |
| 819 | SV0-PWS-PHW-ME0924 | INSTALL PIPE SUPPORTS ON THE POTABLE WATER LINES FOR BUILDING 315 |
| 820 | SV4-CCS-PHW-861298 | INSTALLATION OF CCS PIPE SUPPORTS ON MODULE R161 |
| 821 | SV4-VWS-P0W-861263 | INSTALLATION OF VWS-PIPING ON MODULE R151 |
| 822 | SV3-CA01-S5W-CV2082 | CA01-32 FABRICATION & ASSEMBLY |
| 823 | SV3-CA01-S4W-CV3799 | CA01-42 SUBMODULE INSTALLATION |
| 824 | SV4-VWS-PHW-861264 | INSTALLATION OF VWS PIPE SUPPORTS ON MODULE R151 |
| 825 | SV4-WGS-P0W-861286 | INSTALLATION OF WGS PIPING ON MODULE R155 |
| 826 | SV3-CA01-S4W-CV4145 | CA01-39 SUBMODULE ERECTION |
| 827 | SV3-WLS-PHW-ME2481 | FABRICATION/INSTALLATION OF KB11/WLS TUBING SUPPORTS(GR.35) |
| 828 | SV4-VWS-PHW-861304 | INSTALLATION OF VWS PIPE SUPPORTS ON MODULE R161 |
| 829 | SV4-CA20-S5W-CV4001 | CA20-01 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS - STUDS |
| 830 | SV4-KB14-KBW-ME7083 | INSTALLATION OF THE KB14 MODULE |
| 831 | SV3-CA03-S4W-CV2261 | CA03 TOP WALKWAY SUPPORT STEEL |
| 832 | SV4-PGS-P0W-861301 | INSTALLATION OF PGS-PIPING ON MODULE R161 |
| 833 | SV4-KB14-KBW-ME8945 | KB14 STRUCTURAL FRAME REWORK |
| 834 | SV4-KQ11-KQW-ME1684 | INSTALL MECHANICAL EQUIPMENT MODULE KQ11 (MT-02) - PORTION 1 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 835 | SV3-CA01-S5W-CV4221 | CA01-35 UNSAT IR'S AND N&D'S REWORK AND REPAIRS |
| 836 | SV4-CAS-P0W-861295 | INSTALLATION OF CAS PIPING ON MODULE R161 |
| 837 | SV3-KB10-KBW-ME2130 | INSTALLATION OF WWS PIPING - MODULE KB10 (ISOMETRICS: WWS-PLW-012, 013, 015, 016) |
| 838 | SV3-CA01-S5W-CV4148 | CA01-41 UNSAT IRs AND N&Ds - STRUCTURE REPAIRS |
| 839 | SV3-WLS-P0W-ME4603 | INSTALLATION OF WLS PIPING IN R216 MODULE |
| 840 | SV3-CA02-S5W-CV2564 | CA02-05 Unsatisfactory IRs and N&D Repairs - Structual Repairs |
| 841 | SV0-PWS-PVW-862794 | PULSATION DAMPENER 0-PWS-Y50A IS LEAKING AND NOT HOLDING AIR CHARGE ABOVE ZERO PSIG ON AIR SIDE OF DAMPENER |
| 842 | SV3-CA01-S5W-CV3042 | CA01-12 UNSAT IR AND N&D REPAIRS |
| 843 | SV3-CA20-S5W-CV1433 | Miscellaneous Rework for Closure of N&D's |
| 844 | SV4-WWS-PHW-ME5003 | Installation of Large Bore WWS Piping Supports (Includes Isometrics: SV4-WWS-PLW-31C, 31D, 313) |
| 845 | SV3-CA01-S5W-CV3308 | CA01-09 UNSATISFACTORY IRS AND N&D REPAIRS - STUDS |
| 846 | SV3-CA20-S5W-CV1904 | CA20-30 INSTALLATION OF ADDITIONAL REBAR COUPLERS AND REPLACEMENT OF REBAR COUPLERS RLREADY INSTALLED |
| 847 | SV0-0000-CCW-CV5528 | MISCELLANEOUS GROUTING IN 300 SERIES BUILDINGS/YARD |
| 848 | SV3-WLS-PHW-ME2222 | INSTALLATION OF PIPE SUPPORTS ON KB12 (FOR ISOMETRICS SV3-WLS-PLW-67X,68A) |
| 849 | SV3-VCS-MXW-CT8035 | U3 VCS Ductwork Coatings Rework |
| 850 | SV3-WLS-PHW-ME2219 | INSTALLATION OF PIPE SUPPORTS ON KB12 (FOR ISOMETRICS SV3-WLS-PLW-60C, 60N, 686) |
| 851 | SV0-0000-MEW-ME0715 | CONDENSER FABRICATION AREA PREPARATION (111 SATELLITE) |
| 852 | SV3-WLS-PHW-ME2368 | FABRICATION/INSTALLATION OF KB11/WLS PIPING SUPPORTS (SV3-WLS-PH-12R0443, 12R0450, 12R0459, 12R0466, 12R0478, 12R0777, 12R0778, 12R0779, 12R0781, & 12R0782) |
| 853 | SV3-CA03-S5W-CV2932 | CA03 REWORK UNSAT ITEMS- SUBMODULES 03 THRU 06 |
| 854 | SV3-CA20-S4W-CV0858 | Installation of CA20 SA1 EL. 107'-2" Floor Submodules (Submodules 52 & 53) |
| 855 | SV4-CA20-S4W-CV3262 | CA20-01 SUB-MODULE ERECTION |
| 856 | SV4-DWS-P0W-861259 | INSTALLATION OF DWS PIPING ON MODULE R151 |
| 857 | SV3-CA02-S4W-CV5779 | INSTALL CA02-03 PERMANENT WELDED ATTACHMENTS |
| 858 | SV4-CCS-P0W-861297 | INSTALLATION OF CCS PIPING ON MODULE R161 |
| 859 | SV3-VWS-P0W-ME2982 | Installation of VWS Piping in Module R151 Per ISO SV3-VWS-PLW-381, & 481 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 860 | SV3-WLS-PHW-ME2372 | FABRICATION/INSTALLATION OF KB11/WLS PIPING SUPPORTS (SV3-WLS-PH-12R0002, 12R0439, 12R0467, 12R0480, 12R0481, 12R0486, 12R0488, 12R0490, & 12R0491) |
| 861 | SV4-PGS-P0W-861261 | INSTALLATION OF PGS PIPING ON MODULE R151 |
| 862 | SV3-1000-CPW-CV5117 | CUTTING OF SOUTH SIDE UNIT 3 NUCLEAR ISLAND MSE WALL PANEL |
| 863 | SV3-CA03-S5W-CV2933 | CA03 RE-WORK UNSAT IR'S AND N&D FOR SUBMODULES 12 THRU 17 |
| 864 | SV0-CA01-SSW-CV4231 | CA01 PLATEN MODIFICATIONS FOR SUPPORT LEGS BELOW CA01-01 AND CA01-21 |
| 865 | SV3-2020-MEW-ME0845 | Attach Condenser A Upper Shell to Upper Tube Bundle RESERVED FOR Oran Poe |
| 866 | SV3-WLS-PHW-ME5371 | INSTALLATION OF WLS PIPE SUPPORTS IN R216 MODULE |
| 867 | SV0-YFS-JEW-863014 | DISSEMBLE/REMOVE/REPLACE WITH NEW, TRANSMITTER WSV0-YFS-JE-TT002A |
| 868 | SV0-ZRS-PVW-863155 | rOTATE SV0-ZRS-PL-V002 90 DEGREES (UP-RIGHT POSITION), BETWEEN PIPING FLANGES. |
| 869 | SV3-2030-M6W-ME1704 | INSTALL PIPING SUPPORTS FOR "A" TO "B" CONDENSER CROSSOVER PIPING |
| 870 | SV3-CA01-S4W-CV2228 | CA01 SM 22 INSTALLATION |
| 871 | SV4-4033-CRW-CV8103 | (BLANK) |
| 872 | SV3-2020-MEW-ME0739 | Install Condenser A Upper Shell Heater Truss |
| 873 | SV3-VCS-MXW-CT7413 | U3 CONTAINMENT BUILDING MD01 VCS DAMPERS COATINGS REWORK |
| 874 | SV3-CA03-S4W-CV2256 | CA03 SUBMODULE WALL ASSEMBLY (01, 02, 03) |
| 875 | SV3-CA20-S4W-CV0429 | Installation of CA20 SA2 EL 92'-6" Floor Submodules (Submods 43, 44, 45, 46) |
| 876 | SV3-ME01-PLW-ME1003 | Unit 3 Condenser A: Installation of MSR A&B Shell Drains |
| 877 | SV3-CA01-S4W-CV2551 | CA01-12 SUBMODULE INSTALLATION |
| 878 | SV3-CA20-V2W-CV1729 | INSTALL CA20 LIFT LUGS 166 AND 167 |
| 879 | SV3-CA01-S5W-CV3055 | CA01-12 UNSAT IR & N&D STUD REPAIRS |

| 886 | SV3-KB15-KBW-ME2344 | INSTALLATION OF KB15 COMPONENTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 887 | SV4-DWS-PHW-861279 | INSTALLATION OF DWS PIPE SUPPORTS ON MODULE R155 |
| 888 | SV3-CA01-S4W-CV2238 | CA01-28 SUBMODULE ERECTION |
| 889 | SV4-WRS-PHW-861252 | INSTALLATION OF WRS PIPE SUPPORTS ON MODULE R104 |
| 890 | SV3-CA02-MHW-CV2561 | CA02 LIFTING FRAMES AND BRACING |
| 891 | SV3-CAS-P0W-ME2986 | INSTALLATION OF CAS PIPING IN MODULE R151 PER ISO SV3-CAS-P0W-421, & 321 |
| 892 | SV3-KB22-KBW-ME2203 | INSTALLATION OF KB22 COMPONENTS |
| 893 | SV3-2020-MEW-ME0852 | Install Condenser C Upper Shell to Upper Truss RESERVED FOR Oran Poe |
| 894 | SV4-CA20-CAW-850000 | CA20 MODULE INSTALLATION |
| 895 | SV3-PXS-PHW-ME7021 | FABRICATION/INSTALLATION OF CA03 CLASS E PIPE SUPPORT SV3-PXS-PH-11R0573 |
| 896 | SV3-MG20-MEW-ME4880 | Main Generator Sole Plate Installation |
| 897 | SV3-ML05-MLW-ME3413 | INSTALLATION OF CA03 PENETRATION |
| 898 | SV3-CA03-S4W-CV2265 | CA03 INSTALLATION OF LIFT LUGS (SUB-MODULE CA03-01 THRU CA03-17) |
| 899 | SV4-WLS-P0W-ME5400 | INSTALLATION OF KB11 PIPING ISOMETRIC SV4-WLS-PLW-683 |
| 900 | SV4-WLS-P0W-ME5397 | INSTALLATION OF KB11 PIPING ISOMETRIC SV4-WLS-PLW-67C |
| 901 | SV3-2030-M6W-ME1702 | INSTALL CWS CROSSOVER PIING FROM "A" TO "B" CONDENSER |
| 902 | SV3-CA20-S4W-CV2323 | CA20 SUB ASSEMBLY 1 WORK LIST ITEMS WB-W00054, WB-W00055, WB-W00077, WB-W00080, WB-W00081, WB-W00085 & WB-W00116 |
| 903 | SV4-0000-CRW-CV8073 | UNIT 4 TRANSFORMER REINFORCEMEN (PLACEMENT 1) |
| 904 | SV3-CA05-S4W-CV1875 | CA05 EAST SIDE WALL OVERLAY PLATES AND BEAM SEATS INSTALLATION |
| 905 | SV4-WLS-P0W-ME5398 | INSTALLATION OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-67Q & -67S |
| 906 | SV4-WLS-P0W-ME5399 | INSTALLATION OF KB11 PIPING ISOMETRIC SV4-WLS-PLW-67W |
| 907 | SV3-KB20-KBW-ME1675 | Installation of Module KB20 (WLS Chemical Waste Pump) |
| 908 | SV3-WLS-P0W-ME2760 | KB16-Install Bore Separator Pump Suction Piping (Isometric SV3-WLS-PLW-120) |
| 909 | SV3-SFS-P0W-ME2132 | Installation of Large Bore KB12 SFS Piping (Including Isometrics SV3-SFS-PLW-60A, 60B) |
| 910 | SV3-WLS-P0W-ME2766 | KB16 - INSTALLATION OF SMALL BORE CONDENSER PIPING (ISOMETRICS SV3-WLS-PLW-102, 103, 104, 105, 106, & 107) |
| 911 | SV3-2020-MEW-ME0555 | Unit 3 Condenser A Hot Well Assembly |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 912 | SV0-RWS-PHW-ME9004 | FABRICATE AND INSTALL THE RAW WATER PIPE SUPPORTS ON ISOMETRIC SV0-RWS-PLW-500, 502, 512, 524, 525, 737 & 738 |
| 913 | SV0-RWS-PLW-ME0917 | Install Raw Water Lines for Building 315 |
| 914 | SV3-CA01-S5W-CV4211 | CA01-16 IR STRUCTURAL AND N&DS |
| 915 | SV4-2020-MEW-TP1407 | Unit 4 Condenser Upper Shell Construction Aid Support Platform |
| 916 | SV4-CA01-S5W-CV6458 | CA01-27 UNSAT IRs/N&Ds/E&DCRs/LOOSE PARTS - STRUCTURAL |
| 917 | SV3-2040-MLW-ME2937 | INSTALLATION OF EMBEDDED PIPING PENETRATION FLOOR SLEEVES (SLABS 1 AND 6). |
| 918 | SV3-PGS-PHW-ME2981 | INSTALLATION OF PGS PIPING SUPPORTS IN MODULE R151 |
| 919 | SV4-CA20-S5W-CV5294 | CA20-12 UNSATISFACTORY IRs/N&DS/E&DCRs AND LOOSE PARTS - STUDS |
| 920 | SV3-KB22-KBW-ME1667 | Installation of Module KB22-WLS Effluent Holdup Pump B |
| 921 | SV0-RWS-THW-ME8937 | PERFORM HYDROSTATIC TESTING ON THE RAW WATER LINES @ BUILDING 315 |
| 922 | SV4-CA20-S5W-CV5766 | CA20-72 UNSAT IR# & N&D STRUCTURAL REPAIRS |
| 923 | SV4-CA20-S5W-CV5285 | CA20-10 UNSAT IR, N&D AND SHIP LOOSE MATERIAL STRUCTURAL REPAIRS |
| 924 | SV3-1208-ITW-CV4392 | PRE-ITAAC MEASUREMENTS |
| 925 | SV4-WLS-P0W-ME5394 | INSTALLATION OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-602, -603, -604, -605, -606, -607, -609, -60K, & -60L |
| 926 | SV3-CA20-S4W-CV2487 | CA20 SUB ASSEMBLY 3 WORK LIST ITEMS WB-W00019, WB-W00024, WB-W00025, WB-W00026, WB-W00027 & WB-W00028 |
| 927 | SV0-RWS-CWS-CV6291 | RAW WATER INTAKE FOUNDATION(S) |
| 928 | SV3-2030-M6W-ME1703 | INSTALL CWS CROSSOVER PIPING FROM "B" TO "C" CONDENSER |
| 929 | SV3-CA20-S4W-CV2609 | FABRICATION OF ADDITIONAL CA20 OVERLAY PLATES |
| 930 | SV3-WGS-THW-ME3037 | KB16-HYDROSTATIC TESTING OF WGS PIPING |
| 931 | SV3-CA01-S4W-CV2384 | CA01-08 SUBMODULE PRE-ASSEMBLY FABRICATION |
| 932 | SV0-PWS-THW-ME2702 | HYDRO TEST THE POTABLE WATER SYSTEM (PWS) AT BUILDING 315 |
| 933 | SV4-ML05-MLW-ME7941 | INSTALL CA01 PROCESS PIPE PENETRATIONS SV4-11501-ML-P03, SV4-11501-ML-P04, & SV4-11502-ML-P03 |
| 934 | SV3-CA05-S5W-CV1870 | MODIFY CA05-02 AND CA05-03 PER EDCR APP-CA05-GEF-068 |

| 1037 | SV0-812-EWW-EL0270 | Electrical Feeder Installation to New Hire Office (Bldg 118.) |
| 1038 | SV4-12171-CYW-800000 | Room 12171 Grout, WLS Waste Effluent Holdup Tank A (WLS-MT-05A) |
| 1039 | SV4-KB15-KBW-ME5677 | INSTALLATION OF MODULE KB15 (DEGASIFIER DISCHARGE PUMP) |
| 1040 | SV3-2050-MLW-ME6294 | INSTALLATION OF MECHANICAL PIPE SLEEVES FOR SLAB(S) 2 & 3 ELEVATION 140' |
| 1041 | SV3-VAS-MHW-ME2989 | INSTALLATION OF STRUCTURAL FRAMES AROUND HVAC DUCT IN MODULE R151 |
| 1042 | SV0-842-PPW-ME0210 | Fabrication and Installation of the Tempoary Piping PWS & SDS (above slab) and Fixtures for the Piping Fitting Shop, Building 131 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1043 | SV0-YFS-CCW-CV0005 | Install Yard Fire System (YFS) Diesel Pumphouse Building Foundation |
| 1044 | SV0-ZRS-EWW-EL0243 | Installation of 1000 kVA transformer and ZRS tie-into the north loop |
| 1045 | SV3-CA20-S4W-CV2166 | CA20 SUB ASSEMBLY 1 PUNCH LIST ITEMS WB-W00042, WB-W00057, WB-W00058, WB-W00060, WB-W00073, WB-W000872, WB-W00084, WB-W00087 |
| 1046 | SV3-CA20-MHW-CV1388 | Installation of Submodule CA20-26,27,28,29,30,71,72,73 Vertical Lifting Attachments |
| 1047 | SV0-MH90-MHW-RI0558 | Assembly of the HLD Boom and Mast |
| 1048 | SV3-KB27-KBW-ME1665 | INSTALLATION OF KB27 MECHANICAL MODULE |
| 1049 | SV4-SFS-P0W-ME5410 | INSTALLATION OF KB12 PIPING ISOMETRIC SV4-SFS-PLW-60A |
| 1050 | SV4-CA05-S4W-CV7028 | CA05-04 Temporary Attachments |
| 1051 | SV3-KB28-KBW-ME1666 | INSTALLATION OF MODULE KB28-WLS WASTE HOLDUP PUMP B |
| 1052 | SV3-2060-MLW-ME8894 | INSTALLATION OF MECHANICAL PIPE PENETRATIONS ELEVATION 170' SLAB(S) 3 & 4 |
| 1053 | SV4-KB04-MXW-CT7675 | COATINGS - U4 KB04 MODULE |
| 1054 | SV3-KB28-KBW-ME2205 | INSTALLATION OF KB28 COMPONENTS |
| 1055 | SV0-039-CCW-CV0309 | Installation of Foundation for Gas Storage Modules Bldgs 131 and 150 |
| 1056 | SV0-829-CCW-CV0179 | Area 111 CH80 and CH82 Module Fabrication Pads |
| 1057 | SV4-CA20-S5W-CV5615 | CA20-23 UNSAT IR - STUDS & LOOSE PARTS, |
| 1058 | SV0-MH90-CCW-CV0142 | Installation of the Heavy Lift Derrick Counterweight and Ring Foundation |
| 1059 | SV3-ME71-CCW-CV0320 | Installation fo the Hot Water Inlet Tunnel (Unit 3) |
| 1060 | SV0-PWS-PLW-ME0916 | Install Potable Water LInes for Building 315 |
| 1061 | SV3-CA03-S4W-CV2263 | CA03 WALL LEAK CHASE ASSEMBLY |
| 1062 | SV3-2020-MEW-ME0732 | Install Condenser A Lower Tube Bundle |
| 1063 | SV3-ME01-MEW-ME1290 | Condensers A,B & C: Addition of Omitted Welds on Upper Shell Baffle Plates and Turbine Bypass Piping |
| 1064 | SV4-12172-CYW-800000 | Room 12172 Grout, WLS Waste Effluent Holdup Tank B (WLS-MT-05B) |
| 1065 | SV4-CA20-S4W-CV3269 | CA20-08 SUB-MODULE ERECTION |
| 1066 | SV3-CA01-S5W-CV2496 | CA01-20 & CA01-21 INSTALLATION OF PAPER CLIP REBARS PER N&D AND E&DCR'S |
| 1067 | SV3-CA02-S5W-CV5573 | CA02-02-UNSAT IRS AND N&Ds - STUDS |
| 1068 | SV3-WLS-PLW-ME0892 | Fabricate and Install WLS Embedded Piping ISO SV3-WLS-PLW-642, 643, 644, 645, and 646 |
| 1069 | SV3-CA01-S4W-CV2065 | SUBMODULE CA01-25, CA01-47, AND CA01-48 ERECTION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1070 | SV3-WLS-PLW-ME0902 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-577, 578 |
| 1071 | SV4-2020-SSW-CV1824 | TURBINE BUILDING CONDENSERS TEMPORARY HYDRO SUPPORT |
| 1072 | SV0-RWS-PVW-863439 | TROUBLESHOOT/REPLACE LEAKING PIPING FLANGE GASKET ON SV0-RWS-PL-V027A |
| 1073 | SV4-CA20-V2W-CV7510 | INSTALL SUPER LIFT LUG AT CA20-04/05 |
| 1074 | SV3-CA01-S5W-CV2277 | CA01-22 FABRICATION COMPLETION |
| 1075 | SV4-CA20-S4W-CV5628 | INSTALLATION OF SUB-MODULE CA20-25 |
| 1076 | SV4-CA20-S4W-CV5738 | INSTALLATION OF SUB-MODULE CA20-26 |
| 1077 | SV3-MV50-MLW-850000 | CONTAINMENT VESSEL-FUEL TRANSFER TUBE: INSTALLATION OF GUARD PIPE ANNULAR RING |
| 1078 | SV3-WLS-PLW-ME0887 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-647, 648, 649, and 64A |
| 1079 | SV3-CA01-S5W-CV2832 | CA01-29 UNSAT AND N&D REWORK |
| 1080 | SV4-WLS-PHW-ME5401 | INSTALLATION OF KB11 PIPE STRAPS |
| 1081 | SV4-CA01-S5W-CV6535 | SA3 LEAK CHASE FABRICATION |
| 1082 | SV3-CA02-S5W-CV6055 | SUBMODULE CA02-03 STUD UNSAT IR AND N&D REPAIR |
| 1083 | SV4-WLS-PHW-ME7489 | INSTALLATION OF KB16 WLS PIPE SUPPORTS |
| 1084 | SV3-CA01-S4W-CV2146 | CA01-08 SUBMODULE ERECTION |
| 1085 | SV3-R161-KBW-ME3696 | SITE COMPLETION OF R161 STRUCTURAL STEEL |
| 1086 | SV4-1208-SCW-CV6994 | COURSE 1 UNIT 4 SHIELD BUILDING |
| 1087 | SV4-WLS-P0W-ME5396 | INSTALLATION OF KB11 PIPING ISOMETRICS SV4-WLS-PLW-676, -678, -679, -67D, -67E, -67F, -67G, -67H, -67K, -67L, -67N, -67P, -67U, -682, -684, -685, -687, -688, -68D, & -68E |
| 1088 | SV3-CA01-S5W-CV2091 | CA01-32 UNSAT IR AND N&D REPAIRS |
| 1089 | SV4-CA20-V2W-CV7512 | INSTALL SUPER LIFT LUG AT CA20-13/14 |
| 1090 | SV4-SFS-PHW-ME5416 | INSTALLATION OF KB12 PIPE STRAPS |
| 1091 | SV3-CA03-S4W-CV2254 | CA03 SUBMODULE WALL ASSEMBLY (03, 04, 05, 06, 07) |
| 1092 | SV3-CA03-S4W-CV2255 | CA03 SUBMODULE WALL ASSEMBLY (11, 12, 13, 14, 15) |
| 1093 | SV3-CA01-S5W-CV3225 | CA01-31 SUBMODULE ASSEMBLY |
| 1094 | SV3-CA01-S5W-CV4141 | CA01-30 Unstatisfactory IRs and N&D Repairs - Studs |
| 1095 | SV3-CA01-S5W-CV3305 | CA01 SM 11 N&D AND INSPECTION REPORT STUD REWORK |
| 1096 | SV3-2020-MEW-ME0738 | UNIT 3 CONDENSER A UPPER SHELL EXTERIOR SHELL ASSEMBLY |
| 1097 | SV3-CA01-S5W-CV4210 | PERFORM N&D REWORK AND REPAIRS PER (IR) S540-001-14-0066 |
| 1098 | SV3-1208-SCW-CV4387 | COURSE 4 UNIT 3 SHIELD BUILDING |
| 1099 | SV3-CA20-S4W-CV0427 | CA20 Wall J1 Overlay Plates Installation |
| 1100 | SV0-8100-EWW-EL0060 | Temporary Power to Construction Office Trailers (Bldg:150 & Bldg:120) |
| 1101 | VNC-CFA-ME-PWS-004 | Potable Water System Installation |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1102 | VNC-EL861-EL-MSC-006 | New Security Entrance Roadway Lighting. |
| 1103 | VNC-EW87-EL-MSC-005 | Electrical Service to the Concrete Batch Plant |
| 1104 | VNC-CFA-ME-CAS-006 | Fabrication and Installation of Compressed Air System in NOI 7 |
| 1105 | SV0-8000-EWW-TP0636 | Electirical Power FEED to FFD Complex |
| 1106 | SV0-MH90-EWW-TP0668 | Installation of Electrical Power Feeder to HLD |
| 1107 | SV0-832-PLW-TP0546 | Install Praxair Bulk Storage Tanks & Associated Piping |
| 1108 | SV3-RNS-PVW-862966 | RE4-INSTALLATION OF Q240 VALVE ACTUATORS |
| 1109 | SV3-WLS-THW-ME3951 | HYDRO TESTING OF KB28 MODULE WLS PIPING |
| 1110 | SV0-853-PPW-ME0115 | Construction Craft Change House #2 below slab and embedded piping |
| 1111 | SV3-CA01-S4W-CV0549 | CA01 SM 03 INSTALLATION |
| 1112 | SV4-DWS-PHW-ME7498 | INSTALLATION OF KB16 DWS PIPE SUPPORTS |
| 1113 | SV4-RWS-JEW-863156 | REPLACE LEVEL TRANSMITTER SV4-RWS-JE-LT007B |
| 1114 | SV4-WRS-P0W-ME5337 | FABRICATION/INSTALLATION OF SMALL BORE WRS LEAK CHASE PIPING INCLUDING SV4-WRS-PLW-80L |
| 1115 | SV0-SDS-PLW-ME0039 | Trench #4 Sanitary Drainage System |
| 1116 | SV0-RWS-PLW-ME0072 | RWS- Tank Area Installation- Balance of Plant Components Supporting Temporary Supply |
| 1117 | SV3-WLS-PHW-ME2764 | KB16 - INSTALLATION OF PIPE SUPPORTS |
| 1118 | SV4-CA01-S5W-CV6368 | CA01-04 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS - STUDS |
| 1119 | SV3-CA01-S5W-CV4149 | CA01-46 UNSATISFACTORY IRS AND N&DS REPAIR - STUDS |
| 1120 | SV3-CA02-S8W-CV2566 | INSTALL LIFTING LUGS FOR NI SET |
| 1121 | SV4-CA20-S5W-CV4013 | UNSAT IR# & N&D STUD REPAIRS, |
| 1122 | SV3-2050-MLW-ME6297 | INSTALLATION OF MECHANICAL PIPE SLEEVES FOR SLAB(S) 5 & 6 ELEVATION 140' |
| 1123 | SV4-CA20-S5W-CV4009 | UNSAT IR# & N&D STUD REPAIRS, |
| 1124 | SV4-CA20-S5W-CV4005 | CA20-02 UNSAT IR# & N&D STUD REPAIRS |
| 1125 | SV3-2020-MEW-ME0848 | Install Condenser B Upper Shell to Upper Truss |
| 1126 | SV3-ML05-MLW-ME4605 | INSTALLATION OF CA02/CA05 PENETRATION SV3-11305-ML-P01 |
| 1127 | SV3-2050-MLW-ME6298 | INSTALLATION OF MECHANICAL PIPE SLEEVES FOR SLAB(S) 7A & 7B ELEVATION 156' |
| 1128 | SV4-CA01-S5W-CV6537 | SA5 LEAK CHASE FABRICATION |
| 1129 | SV4-CA20-S4W-CV3264 | CA20-03 SUB-MODULE ERECTION |
| 1130 | SV3-WGS-PHW-ME2833 | FABRICATION/INSTALLATION OF KB14 WGS PIPING SUPPORTS |
| 1131 | SV3-EDS-DBW-EL3130 | INSTALL ANNEX BLDG EDS4-DB1 BATTERY RACKS, ROOM 40309 |
| 1132 | SV4-CA01-S4W-CV6412 | CA01-15 SUBMODULE INSTALLATION |
| 1133 | SV0-ZRS-JCW-862066 | MAIN PANEL #SV0-ZRS-JD-MCP001 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 2. Completed and Voided Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1134 | SV3-KB13-KBW-ME2465 | INSTALLATION OF STRUCTURAL STEEL PIPE AND INSTRUMENT SUPPORTS AND LIFTING LUGS ON KB13 SUMP COVER |
| 1135 | SV3-2030-CEW-CV0131 | Unit 3 Turbine Building Construction Aides for EL. 100'-0" |
| 1136 | SV4-CA01-S5W-CV6534 | SA2 LEAK CHASE FABRICATION |
| 1137 | SV3-VWS-THW-ME3036 | KB16-HYDROSTATIC TESTING OF VWS PIPING |
| 1138 | SV3-CA20-S4W-CV2293 | REMOVAL OF CA20 LIFTING LUGS 164 AND 165 |
| 1139 | SV3-CA01-S5W-CV3335 | CA01 SUBASSEMBLY 02 LEAK CHASE FABRICATION |
| 1140 | SV3-CA01-S4W-CV2555 | CA01-17 SUBMODULE ERECTION |
| 1141 | SV3-CA01-S5W-CV3312 | CA01-06 UNSAT IR & N&D STRUCTURE REPAIRS |
| 1142 | SV4-CA20-S4W-CV5292 | INSTALLATION OF SUB MODULE CA20-11 |
| 1143 | SV4-CA01-S4W-CV6420 | SUBMODULE CA01-17 INSTALLATION |
| 1144 | SV4-WGS-THW-ME6274 | HYDRO TESTING OF KB04 WGS PIPING |
| 1145 | SV3-WLS-THW-ME4482 | HYDRO TESTING OF KB37 MODULE WLS PIPING (CLASSE E) |
| 1146 | SV0-SDS-PLW-ME0143 | Installation of Trench 6 Grinder Pumps, Lift Stations, and Manholes |
| 1147 | SV0-835-EWW-EL0167 | Electrical Installation for Tool Room, M&TE, Rigging Loft (Bldg 143) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| **No.** | **Work Package Number** | **Title** |
| 1 | SV3-RNS-P0W-ME0539 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-211) |
| 2 | SV3-PGS-PHW-ME0798 | FABRICATION/INSTALLATION OF PGS PIPE SUPPORTS (ISO SV3-PGS-PLW-124, 129) |
| 3 | SV3-CAS-PHW-ME0789 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-330) |
| 4 | SV3-CAS-PLW-ME0457 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES ISOMETRICS: SV3-CAS-PLW-375, 424, 42A, & 42B) |
| 5 | SV3-2070-SUW-CV0195 | TURBINE BUILDING STRUCTURAL STEEL FRAMING SEQUENCE 14 |
| 6 | SV3-2070-SUW-CV0197 | TURBINE BUILDING STRUCTURAL STEEL FRAMING SEQUENCE 16 |
| 7 | SV3-CAS-PLW-ME0459 | INSTALLATION OF SMALL BORE CAS PIPING ( INCLUDES ISOMETRICS: SV3-CAS-PLW-330 ) |
| 8 | SV3-VWS-PHW-ME0814 | INSTALLATION OF SMALL BORE VWS PIPING SUPPORTS FROM ISOMETRIC SV3-VWS-PLW-386 AND SV3-VWS-PLW-486. |
| 9 | SV3-DWS-PHW-ME0785 | FABRICATION/INSTALLATION OF DWS PIPE SUPPORTS (ISO SV3-DWS-PLW-60D, 624, 625) |
| 10 | SV3-DWS-PHW-ME0786 | FABRICATION/INSTALLATION OF DWS PIPE SUPPORTS (ISO SV3-DWS-PLW-627) |
| 11 | SV3-2060-SUW-CV0194 | Turbine Building Structural Steel Framing Sequence 13 |
| 12 | SV3-WLS-PHW-ME0773 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-230, -390, -460, -710 |
| 13 | SV3-WLS-PHW-ME1038 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-041 |
| 14 | SV4-ME01-PLW-ME1016 | UNIT 4 CONDENSER A: INSTALLATION OF CASING DRAIN PIPING |
| 15 | SV4-ME01-PLW-ME1008 | UNIT 4 CONDENSERS C: INSTALLATION OF UPPER SHELL NOZZLES |
| 16 | SV4-ME01-PLW-ME1014 | Unit 4 Condenser A: Installation of Water Curtain Spray Piping |
| 17 | SV4-ME01-PLW-ME1025 | Condenser A: Installation of Vacuum Piping |
| 18 | SV4-ME01-PLW-ME1452 | Unit 4 Condenser B: Fabrication & Installation of Casing Drain Piping |
| 19 | SV4-ME01-PLW-ME1453 | UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF CASING DRAIN PIPING |
| 20 | SV3-ME3C-MEW-ME1461 | INSTALLATION OF TCS HEAT EXCHANGERS (TCS-ME-01A, -01B, & -01C) |
| 21 | SV3-ASS-PHW-ME1522 | Fabricate/Install of Auxiliary Steam (ASS) Supports (Portion 3) for Isometric # SV3-ASS-PLW-02H,022,02S, & 02E |
| 22 | SV4-ME01-PLW-ME1539 | UNIT 4 CONDENSER B: INSTALLATION OF WATER CURTAIN SPRAY PIPING |
| 23 | SV4-ME01-PLW-ME1540 | UNIT 4 CONDENSER C: INSTALLATION OF WATER CURTAIN SPRAY PIPING |
| 24 | VN3-XC10-CV-MSC-019 | Unit 3 Backfill from Elevation 180 feet to Grade |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 25 | SV3-DOS-P0W-ME2470 | FABRICATE AND INSTALL DIESEL FUEL OIL PIPING UNDER THE DIESEL BUILDING SLAB |
| 26 | SV3-CDS-PLW-ME2308 | INSTALLATION OF CDS PIPING FOR ISOMETRIC SV3-CDS-PLW-71A, SV3-CDS-PLW-711, SV3-CDS-PLW-712, SV3-CDS-PLW-713, SV3-CDS-PLW-714,SV3-CDS-PLW-715, SV3-CDS-PLW-716, |
| 27 | SV3-VWS-PLW-ME2794 | INSTALLATION OF VWS PIPING FOR ISOMETRICS SV3-VWS-PLW-10N, SV3-VWS-PLW-10P, SV3-VWS-PLW-10Q. |
| 28 | SV3-DWS-PHW-ME3096 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-DWS-PLW-756 |
| 29 | SV3-PXS-P0W-ME3237 | ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-024 (LINE NUMBERS PXS-PL-L025B, L027B, L054B) |
| 30 | SV3-PXS-P0W-ME3235 | ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETIC# SV3-PXS-PLW-021 (LINE NUMBERS PXS-PL-L015B,L059B) |

| 55 | SV3-CVS-P0W-ME2653 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS SV3-CVS-PLW-04J) |
| 56 | SV3-CVS-P0W-ME2651 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-04F) |
| 57 | SV3-CAS-P0W-ME2120 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING #SV3-CAS-PLW-863, SV3-CAS-PLW-86C, SV3-CAS-PLW-86D, AND SV3-CAS-PLW-86H |
| 58 | SV3-CVS-P0W-ME2649 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-04D) |
| 59 | SV3-4033-CRW-CV2839 | U3 ANNEX AREA 3 CONCRETE REINFORCEMENT ELEVATION 100'-0" TO 107'2" |
| 60 | SV3-WLS-PHW-ME0826 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-590 |
| 61 | SV3-WLS-P0W-ME3499 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-235, -245) |
| 62 | SV3-CVS-PHW-ME4188 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-524, 533, 560 |
| 63 | SV3-WWS-ERW-EL0744 | INSTALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (WWS) WASTE WATER SYSTEM. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 64 | SV3-1210-EGW-EL1070 | U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR WALLS 21, 22, 23 AND 24 EL 66'6" TO 82'-6" |
| 65 | SV0-ZFS-ERW-EL2716 | INSTALL ZFS DUCTBANK-PHASE 5 TO PHASE 4 |
| 66 | SV0-SES-ERW-EL2689 | SV0-INSTALL SES PLANT SECURITY DUCT BANKS-PHASE 5 |
| 67 | SV3-4030-EGW-EL1855 | UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE ANNEX BLDG., AREA 2, ELEV. 100' TO 107' |
| 68 | SV0-SES-ERW-EL2274 | SES DUCTBANK FROM NORTHEAST OF DIESEL @ MANHOLE TO NORTH OF TRANSFORMER AREA (PHASE 2) |
| 69 | SV3-2040-EGW-EL1457 | ELECTRICAL GROUNDING INSTALLATION FOR THE TURBINE BUILDING AT ELEVATIONS 117'-6" AND 120'-6" |
| 70 | SV3-0000-EGW-EL1895 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV3-SITE STATION GROUNDING GRID) FOR GROUND GRID AREAS L1300, L1400 AND M1400 IN SUPPORT OF ANNEX PHASE 1 WORK |
| 71 | SV0-ZFS-ERW-EL2427 | INSTALL ZFS DUCTBANK NORTH OF TURBINE BLDG. - PHASE 2 |
| 72 | SV0-ZFS-ERW-EL2663 | INSTALL ZFS DUCTBANK - PHASE 7 TO PHASE 3 |
| 73 | SV3-R104-ERW-EL4154 | INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R104 |
| 74 | SV3-1120-ERW-EL2350 | FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS FOR ROOM 11201 EL. 84'6" THROUGH 107'-2" |
| 75 | SV4-CA20-S4W-CV5609 | CA20-21 MAP OUT TEMPORARY ATTACHMENTS |
| 76 | SV0-ZRS-EWW-EL1582 | Power Loop and Service Feeders for Buildings 301,302,303,304,305,306,307,321,322, and 324 |
| 77 | SV4-ML10-MLW-ME5900 | PLACEMENT OF CONTAINMENT PENETRATIONS P19, P20, P22 |
| 78 | SV3-1212-ERW-EL1618 | INSTALL DESIGN ROUTED RACEWAY AND SUPPORTS FOR DIVISION "A" BATTERY ROOM EL. 66'6" |
| 79 | SV3-1212-ERW-EL1622 | INSTALL DESIGN ROUTED RACEWAY AND SUPPORTS FOR SPARE BATTERY ROOM 3L. 66'-6" |
| 80 | SV3-2040-SSW-CV3301 | UNIT 3 TURBINE BUILDING SEQUENCE 10 HANDRAIL & STAIRS |
| 81 | SV3-2000-T2W-CV0618 | HSB ASSEMBLY & INSTALLER QUALIFICATION FOR TURBINE BUILDING |
| 82 | SV3-2020-SUW-CV0182 | TURBINE BUILDING SET MODULES CH80, CH81A, CH81B, CH81C, & CH82 |
| 83 | SV3-2040-SUW-CV1186 | TURBINE BUILDING STRUCTURAL STEEL SEQUENCE 8 |
| 84 | SV3-2040-SUW-CV1189 | Turbine Building Structural Steel Framing Sequence 11 |
| 85 | SV3-2000-SUW-CV1391 | RE-WORK OF CH80 STRUCTURAL STEEL |
| 86 | SV3-CVS-PLW-CV0560 | Installation of Large Bore FPS Piping (Includes Isometrics SV3-CVS-PLW-561, SV3-CVS-PLW-562) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 87 | SV3-WWS-PHW-ME4634 | INSTALLATION OF TURBINE BUILDING WWS PIPING SUPPORTS FOR SLAB 1 ON 120'-6" |
| 88 | SV3-SDS-PLW-ME1267 | INSTALL SANITARY DRAIN LIFT STATION MS-501. |
| 89 | SV3-SWS-PLW-ME1357 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-030, 031, 034, 035, 065, 066, 06A, 06B) |
| 90 | SV3-ASS-PHW-ME1520 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 2) FOR ISOMETRIC# SV3-ASS-PLW-02L, 02D, 029, 025, & 026 |
| 91 | SV0-PWS-PLW-ME1085 | FABRICATE AND INSTALL POTABLE WATER PIPING BETWEEN BUILDINGS 302 AND 303 TO BUILDING 307 |
| 92 | SV3-PY85-PYW-ME1920 | INSTALLATION OF WWS COLLECTION BASIN SV3-WWS-PY-D501 |
| 93 | SV3-CES-PHW-ME1851 | FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR (ISO SV3-CES-PLW-700, 711, 720, 730, 731, 732, 733, 734, 735, 736, 780) |
| 94 | SV3-2050-MEW-ME1900 | Unit 3 Turbine/Generator Deck Spring Support Foundation Installation |
| 95 | SV3-SDS-PLW-ME1656 | FABRICATE AND INSTALL SANITARY DRAIN PIPING FROM THE STANDARD PLANT TIE-INS @ THE ANNEX BLDG TO LIFT STATION MS-501 |
| 96 | SV4-WLS-P0W-ME2909 | FABRICATE AND INSTALL UNIT 4 WLS PIPING FROM RADWASTE BUILDING THROUGH PHASE 5 |
| 97 | SV3-WLS-PLW-ME0586 | INSTALLATION OF WLS LARGE BORE PIPING (INCLUDING ISOMETRICS SV3-WLS-PLW-362) |
| 98 | SV3-TCS-PHW-ME2390 | Installation Of TCS Piping Supports For Piping Included In The SV3-TCS-PLW-ME2389 Work Package |
| 99 | SV3-CDS-PHW-ME3712 | INSTALLATION OF CDS PIPING SUPPORTS ON 100' ELEVATION |
| 100 | SV3-CES-PHW-ME1750 | Fabrication and Installation of Pipe Supports for (ISO SV3-CES-PLW-740, 751, 760, 770, 771, 772, 773, 774, 775, 776, 777, 790) |
| 101 | SV3-WWS-PHW-ME2046 | UNIT 3 TURBINE BUILDING EL 82FT.-9IN. WWS PIPING SUPPORTS |
| 102 | SV0-SES-ERW-EL4203 | INSTALL CONDUIT IN SES DUCT BANK BETWEEN UNIT 3 AND UNIT 4 (FROM MANHOLE NXM689-NXM688 AND EVERYTHING BETWEEN) |
| 103 | SV0-SES-ERW-EL4204 | INSTALL CONDUIT IN SES DUCT BANK BETWEEN UNIT 3 AND UNIT 4 (FROM MANHOLE NXM688-NXM685 AND EVERYTHING BETWEEN) |
| 104 | SV0-2000-EWW-TP0878 | TEMPORARY POWER FOR TURBINE BUILDING |
| 105 | SV3-2040-SUW-CV1185 | Turbine Building Structural Steel Framing Sequence 7 |
| 106 | SV3-2000-SUW-CV0180 | Assembly and erection of CH80 module in Area 111 |
| 107 | SV3-2030-SUW-CV0190 | Structural Steel Framing (El. 100") |
| 108 | SV3-2000-SUW-CV0183 | Assembly and Erection of CH81A, B & C Module in Area 111 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 109 | SV4-VWS-P0W-ME4484 | ASME SECTION III - FABRICATION / INSTALLATION OF ISOMETRIC# SV4-VWS-PLW-910 (LINE# VWS-PL-L032) |
| 110 | SV3-MS21-MEW-001 | INSTALLATION OF SSS CONDENSER HOTWELL PUMPS (SSS-MS-01A/B/C) |
| 111 | SV3-2101-MLW-ME3349 | INSTALLATION OF EMBEDDED PIPING PENETRATION WALL SLEEVES (SLAB1) |
| 112 | SV3-WWS-PLW-ME0911 | Unit 3 Turbine Building, EL 100'-0" Bay 1 Embedded WWS Piping Package #2 |
| 113 | SV3-WWS-PLW-ME1101 | UNIT 3 TURBINE BUILDING EL 100FT.-0IN. EMBEDDED WWS PIPING PACKAGE # 3 |
| 114 | SV0-1000-EWW-TP1689 | CONSTRUCTION POWER RE-ROUTE AT NUCLEAR ISLAND UNIT 3 |
| 115 | SV3-1210-EGW-EL1069 | U3-Aux Bldg. Grounding and Conduit Sleeves/Penetrations for Wall Pours 13,14,15,19,20,20B and Hall 12111 Header |
| 116 | SV3-CB65-S4WP-CV1663 | CB65 ASSEMBLY |
| 117 | SV3-1210-EGW-EL1066 | Unit 3 Auxillary Bldg EL.66'-6" Grounding Work Package for Wall 3 |
| 118 | SV3-2060-CCW-CV0130 | INSTALL REBAR, EMBEDDED ITEMS, AND CONCRETE UNIT 3 TURBINE TABLE TOP (CA81) |
| 119 | SV3-2040-CCW-CV0124 | 120'-6" Elevated Slabs Unit 3 Turbine |
| 120 | SV3-ASS-PHW-ME1428 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 1) FOR ISOMETRIC# SV3-ASS-PLW-016, 01U, 1E, & 01F |
| 121 | SV3-2131-CCW-CV0185 | Unit 3 Turbine Building First Bay 100' Slab and Equipment Pads |
| 122 | SV3-ASS-PLW-ME1474 | FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 2 FOR 82-9 |
| 123 | SV3-CDS-THW-ME1204 | PERFORM PRESSURE TEST ON UNIT 3 CONDENSATE PIPING FROM CONDENSER TO PUMPS |
| 124 | SV3-2040-SSW-CV3298 | UNIT 3 TURNINBE BULDING SEQUENCE 7 HANDRAIL & STARIS |
| 125 | SV3-WLS-PHW-ME0834 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRICS SV3-WLS-PLW-35M, -355, -357 |
| 126 | SV3-WRS-PLW-ME0604 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-57A, 570, 57G AND 57H) |
| 127 | SV3-2030-CWS-ME1354 | Installation of (2) 120" CWS Butterfly Valves (Condenser Supply) Piping and Components to Condenser A |
| 128 | SV3-WRS-PLW-ME0598 | Installation of CR-10 Piping |
| 129 | SV3-WRS-P0W-ME2260 | ANNEX BUILDING - EMBEDDED WRS PIPING PACKAGE #2 |
| 130 | SV3-CWS-PLW-ME2521 | INSTALLATION OF CWS PIPING |
| 131 | SV3-2020-SSW-CV1075 | TURBINE BUILDING CONDENSERS TEMPORARY HYDRO SUPPORT |
| 132 | SV3-DWS-P0W-ME6674 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRICS SV3-DWS-PLW-140, 141) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 133 | SV3-1230-CCW-CV2445 | AUX BUILDING MISCELLANEOUS WALLS (49, 50, 51, 52 & 53) UP TO EL 100'-0" |
| 134 | SV3-1230-CCW-CV2446 | AUX BUILDING MISCELLANEOUS WALLS (54, 55, 56 & 57) UP TO EL 100'-0" |
| 135 | SV3-1200-T2W-CV3353 | HSB Assembly & Installer Qualification for U3 Auxiliary Building |
| 136 | SV4-1220-CCW-CV4323 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREAS 3 THROUGH 6 CONCRETE PLACEMENTS FOR INTERIOR WALLS FROM ELEVATION 82'-6" TO 100'-0" |
| 137 | SV4-1220-CEW-CV3879 | AUXILIARY BUILDING: AREAS 1 & 2, ELEVATION 82' 6" FLOOR SLAB EMBEDMENT, BLOCKOUTS & FORM WORK" |
| 138 | SV4-1220-CEW-CV3880 | AUXILIARY BUILDING: AREAS 3 & 4, ELEVATION 82' 6" FLOOR SLAB EMBEDMENT, BLOCKOUTS & FORM WORK" |
| 139 | SV3-1220-CSW-CV2468 | Auxiliary Building S02 Stair Tower Elevation 66'-6" to 100'-0"" |
| 140 | SV3-1160-SSW-CV3060 | C8 Circular Trunk SPL25, 26, 27 |
| 141 | SV3-1172-SSW-CV4544 | Polar Crane Platforms SPL35, SPL36 SPL37 |
| 142 | SV3-1132-SSW-CV6256 | SPL11 INSTALLATION |
| 143 | SV3-1120-ERW-EL2742 | INSTALLATION OF CONDUIT SUPPORTS IN ROOM 11202 EL 84'-6" THROUGH 107'-2" |
| 144 | SV3-1120-ERW-EL2820 | Installation of Conduit Supports in Room 11202 EL 84'-6" through 107'-2"" |
| 145 | SV3-1120-ERW-EL2821 | Installation of Conduit Supports in Room 11202 EL 84'-6" through 107'-2"" |
| 146 | SV3-1120-ERW-EL3521 | Fabrication and Installation of Design Routed Conduit Supports in Room 11204 at Elevation 84' 6"" |
| 147 | SV3-1120-ERW-EL3523 | Fabrication and Installation of Design Routed Conduit Supports in Room 11204 at Elevation 84' 6"" |
| 148 | SV3-1210-ERW-EL1625 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 5, INSTALL DESIGNED CABLE TRAYS AND SUPPORTS |
| 149 | SV3-1210-ERW-EL3162 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 6, INSTALL DESIGNED RACEWAYS AND SUPPORTS." |
| 150 | SV3-1210-ERW-EL3673 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C13 FOR AUX BUILDING (AREAS 1 & 2) EL 66'-6" TO 82'-6" |
| 151 | SV3-1210-ERW-EL3674 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C14 FOR AUX BUILDING (AREAS 1 & 2) EL 66'-6" TO 82'-6" |
| 152 | SV3-1210-ERW-EL3675 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C15 FOR AUX BUILDING (AREAS 1 & 2) EL 66'-6" TO 82'-6" |
| 153 | SV3-1210-ERW-EL3676 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C29 FOR AUX BUILDING (AREAS 1 & 2) EL 66'-6" TO 82'-6" |
| 154 | SV3-1210-ERW-EL3677 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C31 FOR AUX BUILDING (AREAS 1 & 2) EL 66'-6" TO 82'-6" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 155 | SV3-1213-ERW-EL3682 | Fabricate and Install Field Routed Typical Conduit Support C31 for AUX Building (Areas 3 & 4) EL 66'-6" to 82'-6"" |
| 156 | SV3-1214-ERW-EL3167 | Auxiliary Building Unit 3, El 66'-6", Area 4, Install Scheduled Conduits and Scheduled Pull Boxes. |
| 157 | SV3-CA20-SHW-EL5045 | Field routed typical conduit support C13 for CA20 module, Elev. 66'-6" to 135'-0" |
| 158 | SV3-1212-ERW-EL3164 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, INSTALL SCHEDULED CONDUITS AND SCHEDULED PULL BOX" |
| 159 | SV3-1215-ERW-EL1628 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 5, INSTALL SCHEDULED CONDUITS " |
| 160 | SV3-1231-EGW-EL6064 | U3 -AUXILIARY BUILDING Install Grounding For Walls EL 100' 0" To 117' 6", to include pigtails for extensions to Elev. 135'-3" Areas 1 & 2" |
| 161 | SV0-DOS-ERW-EL2747 | Install Electrical Duct Bank SV0-0000-ER-NXD0701 from Pumphouse Switchgear 315 Bldg. to Main Diesel Fuel Pump Pad |
| 162 | SV0-SES-ERW-EL4609 | Install Conduit in SES Duct Bank Between Unit 3 and Unit 4 (From Manhole NXM685-NXM657 and everything between) |
| 163 | SV3-1233-EGW-EL6065 | Install ground cables and wall plates for walls from Elev. 100'-0" - 117'-6" to include pigtails for extensions to Elev. 135'-3" Areas 3 & 4" |
| 164 | SV3-1235-EGW-EL6066 | Install ground cables and wall plates for walls from Elev. 100'-0" - 117'-6" to include pigtails for extensions to Elev. 135'-3" Areas 5 & 6" |
| 165 | SV3-ME01-PHW-ME1274 | UNIT 3 CONDENSER A: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING SUPPORTS |
| 166 | SV3-CAS-P0W-ME4474 | Fabricate and Install Annex Compressed and Instrument Air System (CAS) piping IAW (Isometrics SV3-CAS-PLW-25H, -25T -25W, -25X, -253, -254) |
| 167 | SV3-ML05-MLW-ME4937 | INSTALLATION OF 100' FLOOR PIPING PENETRATIONS |
| 168 | SV3-PXS-P0W-ME2996 | ASME Section III - Fabrication/Installation of Isometric# SV3-PXS-PLW-620 (Line Numbers PXS-PL-L032B) |
| 169 | SV3-PXS-P0W-ME2997 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-640 (LINE NUMBERS PXS-PL-L032A), , |
| 170 | SV3-PXS-P0W-ME2999 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-680 (LINE NUMBERS PXS-PL-L035A), , |
| 171 | SV3-PXS-P0W-ME3001 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-700 (LINE NUMBERS PXS-PL-L038A), , |
| 172 | SV3-PXS-P0W-ME3003 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-731 (LINE NUMBERS PXS-PL-L053A), , |
| 173 | SV3-PXS-P0W-ME3004 | ASME Section III - Fabrication/Installation of Isometric# SV3-PXS-PLW-740 (Line Numbers PXS-PL-L031B) |
| 174 | SV3-PXS-P0W-ME3005 | ASME Section III - Fabrication/Installation of Isometric# SV3-PXS-PLW-750 (Line Numbers PXS-PL-L031A) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 175 | SV3-PXS-P0W-ME3006 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-761 (LINE NUMBERS PXS-PL-L052A), , |
| 176 | SV3-PXS-P0W-ME3373 | ASME Section III - Fabrication/Installation of Isometric# SV3-PXS-PLW-02B, -02C, -090 (Line Numbers PXS-PL-L100, L101, L106, L113B, L131B) |
| 177 | SV3-RCS-P0W-ME8613 | ASME SECTION III - FABRICATION/INSTALLATION OF PIPE FOR ISOMETRIC SV3-RCS-PLW-840 |
| 178 | SV3-RCS-P0W-ME8614 | ASME SECTION III - FABRICATION/INSTALLATION OF PIPE FOR ISOMETRIC SV3-RCS-PLW-841 |
| 179 | SV3-RNS-P0W-ME5059 | ASME Section III - Fabrication/Installation of Isometric SV3-RNS-PLW-390 (Line Number RNS-PL-L044) |
| 180 | SV3-RNS-P0W-ME5060 | ASME Section III - Fabrication/Installation of Isometric SV3-RNS-PLW-402 (Line Number RNS-PL-L041) |
| 181 | SV3-RNS-P0W-ME5061 | ASME Section III - Fabrication/Installation of Isometric SV3-RNS-PLW-411 (Line Number RNS-PL-L043) |
| 182 | SV3-RNS-P0W-ME5062 | ASME Section III - Fabrication/Installation of Isometric SV3-RNS-PLW-422 (Line Number RNS-PL-L042) |
| 183 | SV3-RNS-P0W-ME5501 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-190 (LINE NUMBER RNS-PL-L018B), |
| 184 | SV3-2101-MLW-ME3350 | INSTALLATION OF TURBINE BUILDING 1ST BAY EMBEDDED PIPING PENETRATION WALL SLEEVES (PLACEMENT 2). |
| 185 | SV3-2101-MLW-ME3351 | INSTALLATION OF TURBINE BUILDING 1ST BAY EMBEDDED PIPING PENETRATION WALL SLEEVES (PLACEMENT 3 & 4). |
| 186 | SV3-CAS-P0W-ME3432 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-319, 41B, 41H, 417) |
| 187 | SV3-CVS-P0W-ME2654 | Installation of Small Bore CVS Piping (Includes Isometrics: SV3-CVS-PLW-06G, 06H) |
| 188 | SV3-DWS-P0W-ME3927 | Installation of Large Bore DWS Piping Including Isometrics SV3-DWS-PLW-61E |
| 189 | SV3-DWS-P0W-ME4320 | Installation of Small Bore DWS Piping Including Isometrics SV3-DWS-PLW-61J |
| 190 | SV3-DWS-PHW-ME4599 | Fabrication/Installation of Small Bore DWS Pipe Supports for Isometric Drawing SV3-DWS-PLW-61J |
| 191 | SV3-FPS-P0W-ME4183 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-71B, -71C, -71D) |
| 192 | SV3-FPS-P0W-ME4184 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-735, -73A, -71A) |
| 193 | SV3-PWS-P0W-ME4168 | Installation of Small Bore PWS Piping (Includes Isometric SV3-PWS-PLW-300, 305) |
| 194 | SV3-PWS-PHW-ME5276 | Fabrication/Installation of Small Bore PWS Piping Supports for Isometric Drawing SV3-PWS-PLW-300 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 195 | SV3-PWS-PHW-ME5277 | FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWING SV3-PWS-PLW-912, 922, 940, 941, 948 |
| 196 | SV3-PWS-PHW-ME5282 | FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWING SV3-PWS-PLW-921 |
| 197 | SV3-SFS-P0W-ME4350 | INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES SV3-SFS-PLW-410, 420, 430) |
| 198 | SV3-WLS-P0W-ME3480 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-64L) |
| 199 | SV3-WLS-P0W-ME3481 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-64M) |
| 200 | SV3-WLS-P0W-ME3482 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-64N) |
| 201 | SV3-WLS-P0W-ME3483 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-64O) |
| 202 | SV3-WLS-P0W-ME3504 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-415, SV3-WLS-PLW-421, SV3-WLS-PLW-440, SV3-WLS-PLW-441) |
| 203 | SV3-WLS-P0W-ME3728 | Installation of Small Bore WLS Piping (Isometric SV3-WLS-PLW-550,-551,-560,-56A |
| 204 | SV3-WLS-P0W-ME3732 | Installation of Small Bore WLS Piping (Isometric SV3-WLS-PLW-610, 61A, 620, 62A) |
| 205 | SV3-WLS-P0W-ME3735 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-933, 960, 970) |
| 206 | SV3-WLS-PHW-ME4875 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-61A, 62A, 610, 620 |
| 207 | SV3-WRS-P0W-ME3796 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES SV3-WRS-PLW-65M, 65N, 65P, 65R, 651) |
| 208 | SV3-WSS-PHW-ME4398 | FABRICATION/INSTALLATION OF SMALL BORE WSS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WSS-PLW-513, 514, 600, 601) |
| 209 | SV3-WWS-P0W-ME3445 | INSTALLATION OF 82'6" WWS PIPING ( SV3-WWS-PLW-01C, 323, 325) |
| 210 | SV3-WWS-PHW-ME5520 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WWS-PLW-31F |
| 211 | SV4-CCS-P0W-ME4818 | INSTALLATION OF LARGE BORE CCS PIPING (ISOMETRIC SV4-CCS-PLW-130) |
| 212 | SV4-KQ11-KQW-ME5029 | INSTALL MECHANICAL EQUIPMENT MODULE KQ11(MP-02A, MP-02B) - PORTION 2 |
| 213 | SV4-WWS-PHW-ME5521 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV4-WWS-PLW-31F |
| 214 | SV3-CAS-PHW-ME6003 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-413, 414) |
| 215 | SV3-DWS-PHW-ME6280 | Fabrication/Installation of Small Bore DWS Pipe Supports for Isometric Drawing SV3-DWS-PLW-61E |
| 216 | SV3-SFS-P0W-ME4351 | Installation of Large Bore SFS Piping (SV3-SFS-PLW-450) |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 217 | SV3-SFS-P0W-ME4352 | INSTALLATION OF LARGE BORE SFS PIPING (SV3-SFS-PLW-470, 490, 532, 539) |
| 218 | SV3-SFS-P0W-ME4353 | INSTALLATION OF LARGE BORE SFS PIPING (SV3-SFS-PLW-53A, 53B, 53C, 53D, 53E) |
| 219 | SV3-WLS-P0W-ME3501 | Installation of Small Bore WLS Piping (Isometrics SV3-WLS-PLW-318, 319, 320) |
| 220 | SV4-FPS-P0W-ME1941 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS: SV4-FPS-PLW-810, 815) |
| 221 | SV4-VCS-P0W-ME6175 | INSTALLATION OF SMALL BORE VCS PIPING SHOWN ON ISOMETRIC: SV4-VCS-PLW-010. |
| 222 | SV4-MT6F-MEW-ME5674 | Installation of the Main Feedwater Pump Seal Water Drain Collector Tank |
| 223 | SV3-KB25-KBW-ME4600 | SITE COMPLETION OF KB25 MODULE |
| 224 | SV3-KB26-KBW-ME4601 | SITE COMPLETION OF KB26 MODULE |
| 225 | SV4-WLS-THW-ME2911 | Hydro Test the Unit 4 Liquid Radwaste System Piping Phase 5 |
| 226 | SV3-TCS-PHW-ME2398 | INSTALLATION OF TCS SUPPORTS FOR ISOMETRICS SV3-TCS-PLW-820, SV3-TCS-PLW-821, SV3-TCS-PLW-822, SV3-TCS-PLW-823, SV3-TCS-PLW-824, SV3-TCS-PLW-825, SV3-TCS-PLW-826. |
| 227 | SV3-CAS-P0W-ME3428 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-312, 332, 335, 415, 894) |
| 228 | SV3-CCS-P0W-ME4090 | INSTALLATION OF SMALL BORE CCS PIPING INCLUDING ISOMETRICS SV3-CCS-PLW-318 , -328 |
| 229 | SV3-CPS-P0W-ME3589 | INSTALLATION OF CPS PIPING |
| 230 | SV3-CVS-P0W-ME3897 | INSTALLATION OF LARGE BORE PIPING (ISOMETRIC SV3-CVS-PLW-57J AND 507) |
| 231 | SV3-CVS-P0W-ME3899 | INSTALLATION OF LARGE BORE PIPING (ISOMETRIC SV3-CVS-PLW-57N AND 50A) |
| 232 | SV3-CVS-P0W-ME3920 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-810, -830) |
| 233 | SV3-CVS-PHW-ME4189 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-563, 564, 566, 567, 568 |
| 234 | SV3-DWS-P0W-ME3923 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-60E , -614 |
| 235 | SV3-DWS-P0W-ME3924 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-617 |
| 236 | SV3-DWS-P0W-ME3925 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-61A |
| 237 | SV3-DWS-P0W-ME3926 | INSTALLATION OF LARGE BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-61C |
| 238 | SV3-DWS-P0W-ME4314 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-618 |
| 239 | SV3-DWS-P0W-ME4316 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-61D |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 240 | SV3-DWS-P0W-ME4317 | INSTALLATION OF SMALL BORE DWS PIPING INCLUDING ISOMETRICS SV3-DWS-PLW-61G |
| 241 | SV3-FPS-P0W-ME4179 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-70J, -70P, -70S) |
| 242 | SV3-FPS-P0W-ME4180 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-70V, -70W, -70Y, -70Z) |
| 243 | SV3-FPS-P0W-ME4181 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-712, -713) |
| 244 | SV3-ME01-PHW-ME1278 | UNIT 3 CONDENSER B: FABRICATION OF 2ND EXTRACTION STEAM PIPING SUPPORTS |
| 245 | SV3-PGS-P0W-ME4165 | INSTALLATION OF SMALL BORE PGS PIPING (ISOMETRIC SV3-PGS-PLW-104) |
| 246 | SV3-PWS-P0W-ME4942 | INITIAL ENERGIZATION - INSTALLATION OF ANNEX POTABLE WATER SYSTEM (PWS) PIPING INCLUDING ISOMETRICS: SV3-PWS-PLW-180, -181, -182, -411, -413, & 419 |
| 247 | SV3-PWS-PHW-ME4943 | INITIAL ENERGIZATION - INSTALLATION OF ANNEX POTABLE WATER SYSTEM (PWS) PIPING SUPPORTS FOR WP (SV3-PWS-P0W-ME4942) |
| 248 | SV3-VAS-P0W-ME4958 | Installation of Large Bore VAS Piping (Isometric SV3-VAS-PLW-320) |
| 249 | SV3-VAS-PHW-ME4959 | Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-VAS-PLW-320 |
| 250 | SV3-VWS-P0W-ME4882 | FABRICATION/INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-313 , -314 , -315) |
| 251 | SV3-VWS-P0W-ME4883 | FABRICATION/INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-343 , -344 , -345) |
| 252 | SV3-VWS-P0W-ME4884 | FABRICATION/INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-413 , -414 , -415) |
| 253 | SV3-VWS-P0W-ME4885 | FABRICATION/INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-443 , -444 , -445) |
| 254 | SV3-VWS-PHW-ME5326 | ANNEX - Initial Energization Supports - Iso 171, 180, 181, 190, 191, & 197 |
| 255 | SV3-WLS-P0W-ME3734 | INSTALLATION OF LARGE BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-780, 800, 860) |
| 256 | SV3-WLS-PHW-ME3860 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRICS SV3-WLS-PLW-261, -271, -281 |
| 257 | SV3-WLS-PHW-ME4200 | Fabrication/Installation of Small Bore WLS Piping Supports for Isometrics SV3-WLS-PLW-933 |
| 258 | SV3-WLS-PHW-ME5861 | Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-WLS-PLW-33P. |
| 259 | SV3-WLS-PHW-ME5862 | Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-WLS-PLW-333. |
| 260 | SV3-WLS-PHW-ME5865 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-420. |
| 261 | SV3-WLS-PHW-ME5866 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-421. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 262 | SV3-WLS-PHW-ME5867 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-440. |
| 263 | SV3-WLS-PHW-ME5868 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-441. |
| 264 | SV3-WLS-PHW-ME5871 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-452. |
| 265 | SV3-WRS-PHW-ME3076 | ANNEX BUILDING - ELEV 100 WRS SUPPORT PACKAGE (FOR WP SV3-WRS-P0W-ME2347) |
| 266 | SV3-WWS-PHW-ME4635 | INSTALLATION OF TURBINE BUILDING WWS PIPING SUPPORTS FOR SLAB'S 4, 5, 6 ON 120'-6" ELEVATION" |
| 267 | SV4-R104-R1W-ME5678 | INSTALLATION OF R104 MODULE |
| 268 | SV4-R155-R1W-ME5679 | INSTALLATION OF R155 MODULE |
| 269 | SV3-CAS-P0W-ME6050 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-41D) |
| 270 | SV3-CAS-P0W-ME6052 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-317) |
| 271 | SV3-CAS-P0W-ME6053 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-314) |
| 272 | SV3-SFS-THW-ME6286 | HYDRO TESTING OF KB25 SFS PIPING |
| 273 | SV3-SFS-THW-ME6287 | HYDRO TESTING OF KB26 SFS PIPING |
| 274 | SV3-WWS-P0W-ME6195 | ANNEX UNIT 3 - WWS PIPING (ISOMETRICS 484 & 485) |
| 275 | SV3-WWS-PHW-ME6196 | ANNEX UNIT 3 - WWS SUPPORTS (ISOMETRICS 484 & 485) |
| 276 | SV3-1220-CCW-CV1486 | BATTERY RACK WALLS UP TO ELEV. 82'-6" |
| 277 | SV3-CB65-S5W-CV1681 | CB65 OVERLAY PLATE (OLP) INSTALLATION |
| 278 | SV3-CA05-S8W-CV2680 | FINAL INSTALLATION OF CA05 MODULE |
| 279 | SV3-1000-CCW-TP1037 | UNIT 3 NUCLEAR ISLAND TEMPORARY CONSTRUCTION AND FORMWORK |
| 280 | SV0-SM01-CSW-MU1077 | CONCRETE PLACEMENT FOR MODULE PROTOTYPE MOCKUPS: CA20; L, TRANSITION, T; TROUGH; AND COLUMNS. |
| 281 | SV3-2030-CWS-ME1201 | Install Pipe Supports for the CWS from the Turbine Building Penetrations to the Heat Exchangers and Backwash Strainers |
| 282 | SV3-2030-CWS-ME1200 | Installation of the CWS Piping System At Elevation 82'-9" of the Turbine Building; Tie-Ins at Wall Penetrations to Heat Exchangers (SV3-TCS-ME01A,B,C) and Back-Wash Strainers (SV3-CWS-PY-S01A,B&C |
| 283 | SV3-ASS-PHW-ME1427 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 1) FOR ISOMETRIC# SV3-ASS-PLW-01J, 01K, & 01H |
| 284 | SV3-ASS-PHW-ME1426 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 1) FOR ISOMETRIC# SV3-ASS-PLW-019, 018, & 01C |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 285 | SV3-RNS-P0W-ME5056 | ASME Section III - Fabrication/Installation of Isometrics# SV3-RNS-PLW-183 & SV3-RNS-PLW-18C (Line Number RNS-PL-L020,-L018A, -L066A) |
| 286 | SV3-1110-CRW-CV0665 | Unit 3 Containment Concrete Reinforcement up to Elevation 71'6 |
| 287 | SV3-CA04-CEW-CV1686 | CA04 LANDING PLATES POST-INSTALLATION DELIVERABLES |
| 288 | SV3-CA05-S4W-CV1866 | CA05 WALL TEMPORARY ATTACHMENTS |
| 289 | SV3-CAS-PLW-ME0455 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES ISOMETRICS: SV3-CAS-PLW-326, 327 & 360) |
| 290 | SV3-PXS-P0W-ME6161 | FABRICATION AND INSTALLATION OF CA03 LARGE BORE PIPING SHOWN ON ISOMETRIC SV3-PXS-PLW-221. |
| 291 | SV4-WLS-P0W-ME5970 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64M) |
| 292 | SV4-WLS-P0W-ME5971 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64N) |
| 293 | SV4-WLS-P0W-ME5969 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64L) |
| 294 | SV4-WLS-P0W-ME5972 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64O) |
| 295 | SV4-WLS-P0W-ME5974 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64Q) |
| 296 | SV4-WLS-P0W-ME2023 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES SV4-WLS-PLW-265, SV4-WLS-PLW-275) |
| 297 | SV3-SFS-P0W-ME5381 | Fabrication/Installation of Isometric SV3-SFS-PLW-757 (Line Numbers SFS-PL-L033) |
| 298 | SV3-SFS-P0W-ME5382 | ASME SECTION III Fabrication/Installation of Isometrics SV3-SFS-PLW-788 & SV3-SFS-PLW-78B (Line Numbers SFS-PL-L035, -L037, -L038, -L098) |
| 299 | SV3-RNS-P0W-ME5494 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-013 (LINE NUMBER RNS-PL-L001), , |
| 300 | SV3-RNS-P0W-ME5495 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-015 (LINE NUMBERS RNS-PL-L005, -L029, -L080), |
| 301 | SV3-RNS-P0W-ME5496 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRICS SV3-RNS-PLW-018 & -019 (LINE NUMBER RNS-PL-L001), |
| 302 | SV3-RNS-P0W-ME5502 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-191 (LINE NUMBER RNS-PL-L018B), |
| 303 | SV3-RNS-P0W-ME5505 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-198 (LINE NUMBERS RNS-PL-L018B, -L066B), |
| 304 | SV3-PXS-P0W-ME2952 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-430 (LINE NUMBERS PXS-PL-L122A), , |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 305 | SV4-WLS-P0W-ME5973 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-64P) |
| 306 | SV0-RWS-ERW-EL0633 | Installation of Electrical Underground Commodities for the (RWS) Raw Water System and the Tank Farm Pumphouse Bldg 315 |
| 307 | SV0-RWS-ERW-EL0678 | Installation of Electrical Commodities Cable Tray and Raceway (Conduit) for the RWS and Tank Farm Pump House Switchgear Bldg. 315 |
| 308 | SV0-ZBS-ERW-EL2419 | INSTALL ZBS DUCT BANKS NORTH OF TURBINE BLDG. - PHASE 2 |
| 309 | SV4-ME01-PLW-ME1181 | CONDENSER C-3RD EXTRACTION PIPING (EXTRACTION STEAM) |
| 310 | SV0-YFS-PLW-ME1090 | Fabricate and Install the Yard Fire Water line East & North of Building 307, West of Building 322 to trench 6 |
| 311 | SV3-2040-SSW-CV3299 | UNIT 3 TURBINE BUILDING SEQUENCE 8 HANDRAIL & STAIRS |
| 312 | SV3-2040-SSW-CV3300 | UNIT 3 TURBINE BUILDING SEQUENCE 9 HANDRAIL & STAIRS |
| 313 | SV3-PWS-PHW-ME4951 | ANNEX - PWS Piping Support - Iso 114, 134, 135, 192, 439, & 442 |
| 314 | SV4-CA20-S4W-CV6821 | CA20-32/33/74 INSTALLATION |
| 315 | SV4-CA20-S4W-CV6823 | CA20-33 TEMP. ATT. & CA20-32,33,74A,74B LEDGER ANGLES TEMP. ATT. |
| 316 | SV4-CA20-S4W-CV6830 | CA20-35 UNSATISFACTORY IRS/ N&DS/ E&DCRS AND LOOSE PARTS - STRUCTURAL |
| 317 | SV4-CA20-S4W-CV6961 | CA20-74A/74B TEMPORARY ATTACHMENTS - FLOOR |
| 318 | SV4-CA20-S5W-CV6896 | CA20-51 Unsat IRs/N&Ds/E&DCRs and LOOSE PARTS - Structural |
| 319 | SV4-CA20-S5W-CV6897 | CA20-51 Unsat IRs & N&Ds - Studs |
| 320 | SV3-PWS-P0W-ME6978 | INSTALLATION OF ANNEX BLDG PWS PIPING (ISOMETRICS SV3-PWS-PLW-150, 156, 157, 159, 179, 448, 454, 455, & 471) |
| 321 | SV3-PWS-PHW-ME6980 | Installation of Annex Bldg PWS Pipe Supports (Isometrics SV3-PWS-PLW-159, 179, 448). |
| 322 | SV0-MH90-MHW-RI1213 | HLD Block and Hook Temporary Support Frame |
| 323 | SV0-0000-XRW-CV0068 | Railroad Extension and Spur |
| 324 | SV4-1210-CCW-CV1814 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING CONCRETE PLACEMENT FOR EXERIOR WALLS FORM ELEVATION 66'-6" TO 82'-6" (WALL PLACEMENTS 1 THRU 8) |
| 325 | SV3-PXS-P0W-ME8638 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRICS# SV3-PXS-PLW-791 & 796 (LINE NUMBER PXS-PL-L161A, L161C & L164C) |
| 326 | SV3-CAS-PHW-ME6016 | INSTALLATION OF ANNEX BLDG CAS PIPE SUPPORTS (ISO SV3-CAS-PLW-20J, 20K, 20L, & 20M) |
| 327 | SV4-WLS-P0W-ME5975 | INSTALLATION OF SMALL BORE CA01 WLS PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-851, & -852 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 328 | SV4-WLS-P0W-ME6135 | INSTALLATION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57B, 57C, & 57D) |
| 329 | SV3-4041-CRW-CV3184 | U3 ANNEX BUILDING AREA 1 CONCRETE REINFORCEMENT ELEVATION 100'-0" TO ELEVATION 117'-6" |
| 330 | SV0-0000-XCW-CV0413 | Settlement Monitoring of Nuclear Island |
| 331 | SV0-0000-XEW-CV0021 | Erosion Control for NOI 28 |
| 332 | SV0-0000-XGW-CV0368 | NOI 5 Excavation North & East of Nulcear Island #3 |
| 333 | SV3-1000-CCW-CV0297 | NUCLEAR ISLAND 3 CONCRETE |
| 334 | SV3-1200-MLW-CV1468 | CIVIL BLOCK-OUTS FOR MECHANICAL AND ELECTRICAL PENETRATIONS IN UNIT 3 AUX. BLDG. WALLS TO 82'-6" |
| 335 | SV3-4002-SSW-CV3906 | ANNEX BUILDING AREA 2 METAL DECKING AND GRATING INSTALLATION |
| 336 | SV3-CWS-XEW-CV0054 | GROUTING OF PHASE 1 CWS PIPE JOINTS (PCCP) AND FLOWABLE FILL PLACEMENT |
| 337 | SV4-CWS-CYW-CV0152 | PHASE 2 JOINT GROUTING AND FLOWABLE FILL |
| 338 | WCD 08-1246058001-1275-C-ERC-012 | Erosion Control - NOI 12 |
| 339 | SV3-4042-CEW-CV3180 | U3 ANNEX BUILDING AREA EMBEDDED ITEMS FROM ELEVATION 100'-0" TO 117'-6" |
| 340 | SV3-1220-CEW-CV1610 | AUXILIARY BUILDING, ELEVATION 82' 6" - 100' 0", CIVIL/ELECTRICAL/MECHANICAL BLOCK OUTS AND ASSOCIATED EMBEDMENT |
| 341 | SV3-1220-CRW-CV1701 | UNIT 3 AUXILIARY BUILDING REINFORCING STEEL FOR FLOORS AT EL. 82'-6" |
| 342 | SV3-CWS-PHW-ME2423 | FABRICATION AND INSTALLATION OF CWS PIPING SUPPORTS IN TURBINE ROOM 20309 FROM CWS HEADER TO CMS-ME-01A/B/C/D (ELEVATION 90FT TO 101FT) |
| 343 | SV3-DWS-P0W-ME6989 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRIC SV3-DWS-PLW-203, -204, -237, -238) |
| 344 | SV0-MG01-MEW-ME6219 | CONSTRUCTION AIDES FOR TURBINE/GENERATOR ERECTION |
| 345 | SV4-PWS-P0W-ME2004 | INSTALLATION OF SMALL BORE PWS PIPNG (INCLUDES ISOMETRIC SV4-PWS-PLW-921, 924) |
| 346 | SV4-WLS-P0W-ME5976 | INSTALLATION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-57A) |
| 347 | SV3-WWS-P0W-ME6805 | INSTALLATION OF LARGE BORE WWS PIPING (INCLUDES SV3-WWS-PLW-326, 327) |
| 348 | SV3-PXS-P0W-ME2954 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-450 (LINE NUMBERS PXS-PL-L126A) |
| 349 | SV3-PXS-P0W-ME2962 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01A (LINE NUMBERS PXS-PL-L113A) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 350 | SV0-0000-EGW-EL3915 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV0 SITE STATION GROUNDING GRID) FOR GROUND GRID AREA K1100 |
| 351 | SV3-WLS-PHW-ME5874 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-511. |
| 352 | SV3-WLS-PHW-ME5873 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WLS-PLW-510. |
| 353 | SV3-1220-CEW-CV1609 | U3 Auxiliary Building Embed Plates-Area 5 & 6 -EL 82'-6" Walls |
| 354 | SV4-WRS-P0W-ME1968 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-59J, 59K, 59N, 59Q, 59U) |
| 355 | SV4-VCS-PHW-ME6183 | INSTALLATION OF VCS PIPING SUPPORTS SHOWN ON ISOMETRIC SV4-VCS-PLW-010. |
| 356 | SV3-VWS-P0W-ME4476 | FABRICATE AND INSTALL ANNEX CENTRAL CHILLED WATER (VWS) PIPING IAW (ISOMETRICS SV3-VWS-PLW-121, -122 -123, -131, -132, -133, -144, -147, -148) |
| 357 | SV3-RNS-P0W-ME5498 | Fabrication/Installation of Isometric SV3-RNS-PLW-182 (Line Numbers RNS-PL-L017 – L018B) |
| 358 | SV3-RNS-P0W-ME5503 | Fabrication/Installation of Isometric SV3-RNS-PLW-192 (Line Numbers RNS-PL-L018B, -L019B, -L067B) |
| 359 | SV4-1208-SCW-CV6996 | Course 3 Unit 4 Shield Building |
| 360 | SV3-0000-SSW-CV2420 | UNIT 3 TRANSFORMER FOUNDATION STRUCTURAL STEEL |
| 361 | SV4-ECS-CCW-CV6767 | UNIT 4 ECS DUCTBANK |
| 362 | SV3-1215-ERW-EL3169 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 5, FABRICATE AND INSTALL TYPICAL CONDUIT SUPPORTS. |
| 363 | SV3-1240-EGW-EL6062 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 117'-6" SLAB AREAS 1, 2 & 3 |
| 364 | SV3-2000-PHW-ME6770 | INSTALLATION OF SUPPORTS FOR TEMPORARY FIRE PROTECTION SYSTEM STANDPIPE |
| 365 | SV3-PWS-P0W-ME4950 | ANNEX - PWS PIPING - ISO 114, 134, 135, 192, 439, & 442 |
| 366 | SV4-WLS-P0W-ME6144 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57Z, & -64R) |
| 367 | SV3-PWS-PHW-ME5278 | FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWING SV3-PWS-PLW-954, 955, 956, 957 |
| 368 | SV3-CAS-PHW-ME0764 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-375, 42A, 42B) |
| 369 | SV0-YFS-PLW-ME1088 | FABRICATE AND INSTALL THE YARD FIRE WATER LINE FROM BUILDING 304 TO BUILDING 302 AND HYDRANT H-27. |
| 370 | SV0-PWS-PLW-ME1083 | FABRICATE AND INSTALL POTABLE WATER PIPING BETWEEN BUILDING 304 AND BUILDINGS 302 AND 303. |
| 371 | SV0-YFS-PLW-ME1089 | FABRICATE AND INSTALL THE YARD FIRE WATER LINE FROM BUILDING 302 TO BUILDINGS 303, 305 AND 307. |
| 372 | SV4-1208-SCW-CV6998 | Course 5 Unit 3 Shield Building |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 373 | SV4-1208-SCW-CV6999 | Course 6 Unit 3 Shield Building |
| 374 | SV4-1208-SCW-CV7001 | Course 8 Unit 3 Shield Building |
| 375 | SV4-1208-SCW-CV7007 | Course 14 Unit 3 Shield Building |
| 376 | SV0-RWS-CCW-CV0718 | Install RWS Manholes and Ductbank |
| 377 | SV3-1010-CRW-CV0630 | INSTALLATION OF NUCLEAR ISLAND BASEMAT REINFORCEMENT BELOW CONTAINMENT VESSEL |
| 378 | SV3-2000-SUW-CV0181 | Assembly and erection of CH82 module in Area 111 |
| 379 | SV3-RNS-P0W-ME5497 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-021 (LINE NUMBERS RNS-PL-L040, -L061, -L062), |
| 380 | SV3-2040-SUW-CV1187 | Turbine Building Structural Steel Sequence 9 |
| 381 | SV3-2030-CWS-ME1355 | Installation of (2) 120" CWS Butterfly Valves (Condenser Return) Piping and Components from Condenser C |
| 382 | SV3-RNS-P0W-ME5499 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-184 (LINE NUMBERS RNS-PL-L019A, - L067A) |
| 383 | SV3-RNS-P0W-ME5500 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC SV3-RNS-PLW-186 (LINE NUMBERS RNS-PL-L020, - L068) |
| 384 | SV4-WLS-P0W-ME6139 | INSTALLATION OF SMALL BORE CA02 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57L, -57M, -57N, & -569) |
| 385 | SV4-WLS-P0W-ME6142 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57V, -57W, & -57X) |
| 386 | SV3-DWS-PHW-ME6354 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-245 & -246) |
| 387 | SV3-1120-ERW-EL3371 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11201 AT ELEVATION 84'-6" |
| 388 | SV3-1120-ERW-EL3370 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11201 AT ELEVATION 84'-6" |
| 389 | SV3-1120-ERW-EL3369 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11201 AT ELEVATION 84'-6" |
| 390 | SV3-1120-ERW-EL2741 | FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS IN ROOM 11204 AT ELEVATION 84'-6" TO 107'2" |
| 391 | SV3-1120-ERW-EL2847 | FABRICATION AND INSTALLATION OF CABLE TRAY SUPPORTS IN ROOM 11204 AT ELEVATION 84'6" TO 107'2" |
| 392 | SV3-1120-ERW-EL3522 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11204 AT ELEVATION 84' 6" |
| 393 | SV3-2040-SUW-CV1188 | Turbine Building Structural Steel Framing Sequence 10 |
| 394 | SV3-4034-CRW-CV2622 | ANNEX AREA 4 FOUNDATION REINFORCEMENT |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 395 | SV3-1220-CCW-CV3385 | UNIT 3 AUXILIARY BUILDING FLOORS AREAS 1 AND 2- CONCRETE PLACEMENT AT ELEV. 82' 6"(SLAB PLACEMENT #1 THRU #7 |
| 396 | SV3-2040-SSW-CV3302 | UNIT 3 TURBINE BUILDING SEQUENCE 11 HANDRAIL & STAIRS |
| 397 | SV0-ZFS-CCW-CV2057 | ZFS DUCTBANK |
| 398 | SV0-SES-CCW-CV2055 | SES Ductbank |
| 399 | SV3-WRS-P0W-ME2347 | ANNEX BUILDING - ELEV 100 WRS PIPING PACKAGE #1 |
| 400 | SV3-WWS-P0W-ME6696 | FABRICATION AND INSTALLATION OF WWS PIPE & DRAIN HUBS ELEVATION 140' |
| 401 | SV0-869-XVW-CV7066 | West Vehicle Barrier Ditch |
| 402 | SV4-2040-SSW-CV1827 | TURBINE BUILDING STRUCTURAL STEEL SEQUENCE 8 |
| 403 | SV3-1130-SLW-CV7077 | Upender Pit |
| 404 | SV3-PXS-P0W-ME6163 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRICS #SV3-PXS-PLW-300 (LINE NUMBER PXS-PL-L153) |
| 405 | SV3-1213-ERW-EL3678 | FABRICATE AND INSTALL FIELD ROUTE TYPICAL CONDUIT SUPPORT C13 FOR AUX BUILDING (AREAS 3 & 4) EL 66'6" TO 82'-6" |
| 406 | SV3-1213-ERW-EL3679 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C14 FOR AUX BUILDING (AREAS 3 & 4) EL 66'-6" TO 82'-6" |
| 407 | SV3-1215-ERW-EL3687 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C31 FOR AUX BUILDING (AREAS 5 &6) EL 66'-6" TO 82'-6" |
| 408 | SV4-2040-SSW-CV3971 | UNIT 4 TURBINE BUILDING SEQUENCE 8 HANDRAIL & STAIRS |
| 409 | SV4-2040-SSW-CV3973 | UNIT 4 TURBINE BUILDING SEQUENCE 9 HANDRAIL & STAIRS |
| 410 | SV3-PXS-P0W-ME2965 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-01D (LINE NUMBERS PXS-PL-L113A) |
| 411 | SV3-1213-ERW-EL1627 | AUXILIARY BUILDING UNIT 3, EL 66'-6", AREA 3, INSTALL SCHEDULED CONDUITS AND SCHEDULED PULL BOXES. |
| 412 | SV3-PXS-P0W-ME2969 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-01Z (LINE NUMBERS PXS-PL-L108, L115, L119, L113A) |
| 413 | SV3-PXS-P0W-ME2964 | SV3-PXS-P0W-ME2964 |
| 414 | SV3-PXS-P0W-ME3236 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-023 (LINE NUMBERS PXS-PL-L029B) |
| 415 | SV3-PXS-P0W-ME2950 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-330 (LINE NUMBERS PXS-PL-L057A) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 416 | SV3-PXS-P0W-ME2949 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-320 (LINE NUMBERS PXS-PL-L056A) |
| 417 | SV4-2040-SSW-CV1828 | TURBINE BUILDING STRUCTURAL STEEL SEQUENCE 9 |
| 418 | SV3-1220-CEW-CV1603 | AUXILIARY BUILDING EMBEDS AND ANCHOR BOLTS - ELEVATION 82 FT - 6 IN SLAB - AREAS 1 AND 2 |
| 419 | SV3-2050-CCW-CV0126 | 141'-3" to 158'-7" Elevated Slabs Unit 3 Turbine |
| 420 | SV3-WWS-THW-ME7172 | Hydro Test Unit 3 Waste Water System Steel Piping |
| 421 | SV4-WLS-P0W-ME6136 | INSTALLION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57E) |
| 422 | SV3-MS33-MEW-ME4613 | INSTALLATION OF GLAND STEAM CONDENSER (GSS-ME-01) ON 120' |
| 423 | SV3-CPS-P0W-ME3595 | INSTALLATION AND FABRICATION OF CONDENSATE POLISHING SYSTEM (CPS) PIPING FOR ISOMETRICS |
| 424 | SV3-1211-ERW-EL3776 | Install Design Routed Conduit and Conduit Supports in Battery Room “B”, Room 12104. |
| 425 | SV3-1211-ERW-EL3777 | Install Design Routed Conduit and Conduit Supports in Battery Room “D”, Room 12105 |
| 426 | SV3-DOS-P0W-ME2467 | FABRICATE & INSTALL DIESEL FUEL OIL PIPING NORTH OF THE UNIT 3 ANNEX TO DIESEL FUEL OIL TANKS |
| 427 | SV3-2040-CCW-CV5190 | UNIT 3 TURBINE BUILDING MISCELLANEOUS GROUTING AT ELEVATION 120'-6" |
| 428 | SV4-WLS-P0W-ME6141 | INSTALLATION OF SMALL BORE WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57T & 57U) |
| 429 | SV3-WWS-P0W-ME6701 | FABRICATION AND INSTALLATION OF WASTE WATER SYSTEM (WWS) PIPE & DRAIN HUBS ELEVATION 140' |
| 430 | SV3-PXS-P0W-ME7398 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-PXS-PLW-223 (LINE NUMBER PXS-PL-L142B) |
| 431 | SV3-2033-SHW-EL7390 | ELECTRICAL CABLE TRAY AND SUPPORTS MILESTONE INSTALLATION FOR THE TURBINE BUILDING AT ELEVATION 100'-0" IN AREA 3 |
| 432 | SV3-WRS-P0W-ME4431 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80D |
| 433 | SV3-WRS-P0W-ME4432 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80E |
| 434 | SV3-WRS-P0W-ME4427 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-805, 806, 80M, 80Z, 862, 863 AND 864) |
| 435 | SV3-1240-EGW-EL6063 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 117'-6' SLAB AREAS 4, 5 & 6 |
| 436 | SV0-ZFS-ERW-EL5909 | INSTALLATION OF (ZFS) COMMUNICATIONS SYSTEM ELECT DUCT BANK FOR PHASE 10 |
| 437 | SV0-SES-ERW-EL5491 | INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID M1401-L1502 PHASE 10 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 438 | SV3-1210-ERW-EL3160 | AUXILIARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL DESIGNED CONDUIT SUPPORTS |
| 439 | SV0-SES-ERW-EL4466 | INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID K1402-K1202 PHASE 2AND 7 |
| 440 | SV3-2060-SUW-CV0193 | Turbine Building Structural Steel Framing Sequence 12 |
| 441 | SV4-WLS-P0W-ME6138 | Installation of Small Bore CA01 WLS Embedded Piping (Include Isometrics SV4-WLS-PLW-57J, & -57K) |
| 442 | SV3-1208-SCW-CV7395 | TRAINING ADMIN PACKAGE FOR CBIS |
| 443 | SV4-WLS-P0W-ME6241 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-647, -648, -649, -64A, -64B, -64C, & -64D) |
| 444 | SV4-WLS-P0W-ME6143 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING(INCLUDE ISOMETRICS SV4-WLS-PLW-57Y, -640, & -641) |
| 445 | SV4-WWS-PHW-ME5005 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS: SV4-WWS-PLW-014) |
| 446 | SV3-SFS-P0W-ME6691 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC SV3-SFS-PLW-783, -784, -785 (LINE NUMBER SFS-PL-L036) |
| 447 | SV3-WRS-P0W-ME3368 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRIC SV3-WRS-PLW-831) |
| 448 | SV3-KB21-KBW-ME7474 | INSTALLATION OF KB21 COMPONENTS |
| 449 | SV3-WLS-THW-ME7475 | HYDRO TESTING OF KB21 WLS PIPING |
| 450 | SV4-CAS-THW-ME7388 | HYDRO-TEST CAS COMPRESSED AIR SYSTEM PIPING IN PHASE 7, EAST SIDE OF U4 TB. |
| 451 | SV4-HDS-P0W-ME5461 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM (HDS) PIPING |
| 452 | SV3-PSS-PHW-ME7506 | Fabrication/Installation of Pipe supports for Isometric SV3-PSS-PLW-716 |
| 453 | SV3-PSS-PHW-ME7507 | Fabrication/Installation of Pipe supports for Isometric SV3-PSS-PLW-715 |
| 454 | SV3-PSS-PHW-ME7508 | INSTALLATION OF TUBE CLAMPS FOR ISOMETRIC DRAWING SV3-PSS-PLW-714 |
| 455 | SV3-PSS-PHW-ME7509 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PSS-PLW-713 |
| 456 | SV4-PXS-P0W-ME7533 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV4-PXS-PLW-018 (LINE NUMBERS PXS-PL-L112A), , |
| 457 | SV3-CPS-PHW-ME3594 | INSTALLATION OF CPS PIPING SUPPORTS FOR ISOMETRICS |
| 458 | SV4-ML05-MLW-ME7566 | Installation of 100’0 Wall Penetrations Area 1 |
| 459 | SV4-ML05-MLW-ME7567 | Installation of 100’0 Wall Penetrations 3, 4, 5 |
| 460 | SV4-ML05-MLW-ME7568 | Installation of 100’0 Wall Penetrations Area 6 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 461 | SV4-CES-P0W-ME7577 | Installation of CES piping (Portion 2) |
| 462 | SV4-CES-PHW-ME7578 | Installation of CES pipe supports (Portion 1) |
| 463 | SV4-CES-PHW-ME7579 | INSTALLATION OF CES PIPE SUPPORTS (PORTION 6) |
| 464 | SV3-FPS-MPW-ME7581 | Install Unit 3 Diesel Fire Pump Package SV3-FPS-MS-01B |
| 465 | SV3-CPS-PHW-ME3596 | INSTALLATION AND FABRICATION OF CONSENSATE POLISHING SYSTEM (CPS) |
| 466 | SV3-FPS-PLW-ME4857 | INITIAL ENERGIZATION - INSTALLATION OF ANNEX FIRE PROTECTION SYSTEM (FPS) PIPING IAW (ISOMETRICS SV3-FPS-PLW-332, 587) |
| 467 | SV3-WRS-P0W-ME4425 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-803, 804, 80N, 80P, 860, 861) |
| 468 | SV4-WLS-P0W-ME6242 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-64E, -64F, -64G, -64H, -64I, & -64J) |
| 469 | SV4-WLS-P0W-ME6240 | INSTALLATION OF SMALL BORE CA03 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-642, 643, 644, 645, 646) |
| 470 | SV3-WWS-PHW-ME4637 | INSTALLATION OF TURBINE BUILDING WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-043, 044, 045, 046, 047, 048, 110, 111, 112, 113, 114, 115 & 116) |
| 471 | SV3-SFS-P0W-ME7667 | INSTALLATION OF SFS-PLW-650, 660, 665 AND 667 (THIS PACKAGE WILL INCLUDE TIE IN WELDS TO KB12 MODULE PIPING SFS-PLW-088, 089 AND WLS-PLW-60F, 60G) |
| 472 | SV4-RNS-MPW-ME7593 | INSTALLATION OF RESIDUAL HEAT REMOVAL PUMP A (RNS-MP-01A) AND STAND (RNS-MZ-12A) |
| 473 | SV4-RNS-MPW-ME7594 | INSTALLATION OF RESIDUAL HEAT REMOVAL PUMP B (RNS-MP-01B) AND STAND (RNS-MZ-12B) |
| 474 | SV4-RNS-MPW-ME7595 | Disassembly of Residual Heat Removal Pump A |
| 475 | SV4-RNS-MPW-ME7596 | Installation of Residual Heat Removal Pump B |
| 476 | SV4-WWS-MTW-ME7669 | Install Unit 4 Transformers Area Sump SV4-WWS-MTW-010 |
| 477 | SV4-WWS-P0W-ME7670 | Fabricate and install the Waste Water piping to the Unit 4 Transformers Area Sump SV4-WWS-MTW-010 |
| 478 | SV3-2035-SHW-EL7592 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 100'-0", Area 5 from Columns 13.1 to 16 & I.2 to K.2 |
| 479 | SV4-HDS-P0W-ME5462 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING |
| 480 | SV3-CPS-P0W-ME3591 | INSTALLATION OF CPS PIPING |
| 481 | SV3-0000-ELW-EL7683 | Installation of Cable for Unit 3 Standard Plant Yard Transformer Area Lighting |
| 482 | SV4-ML05-MLW-ME7644 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11300-ML-P47 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 483 | SV4-ML05-MLW-ME7645 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11300-ML-P48 |
| 484 | SV4-ML05-MLW-ME7646 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11300-ML-P49 |
| 485 | SV4-ML05-MLW-ME7647 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11300-ML-P50 |
| 486 | SV4-ML05-MLW-ME7648 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11302-ML-P09 |
| 487 | SV4-ML05-MLW-ME7649 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11302-ML-P10 |
| 488 | SV4-ML05-MLW-ME7650 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11303-ML-P13 |
| 489 | SV4-ML05-MLW-ME7652 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11303-ML-P15 |
| 490 | SV4-ML05-MLW-ME7653 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11303-ML-P16 |
| 491 | SV4-ML05-MLW-ME7654 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11400-ML-P12 |
| 492 | SV4-ML05-MLW-ME7655 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11400-ML-P13 |
| 493 | SV4-ML05-MLW-ME7656 | Install CA01 Penetration SV4-11501-ML-P01 |
| 494 | SV4-ML05-MLW-ME7657 | Install CA01 ASME Process Pipe Penetration SV4-11501-ML-P02 |
| 495 | SV4-ML05-MLW-ME7659 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11504-ML-P01 |
| 496 | SV4-ML05-MLW-ME7660 | Install CA01 AMSE Pipe Penetration SV4-11504-ML-P02 |
| 497 | SV4-ML05-MLW-ME7661 | INSTALL CA01 ASME PROCESS PIPE PENETRATION |
| 498 | SV4-ML05-MLW-ME7663 | INSTALLATION OF CA01 DVI PENETRATION SV4-11205-ML-P01 |
| 499 | SV4-ML05-MLW-ME7664 | CA01 INSTALLATION OF CA01 DVI PENETRATION SV4-11205-ML-P03 |
| 500 | SV4-WLS-P0W-ME6137 | INSTALLATION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-57F, 57G, 57H, 567, & 568) |
| 501 | SV3-WWS-P0W-ME6706 | FABRICATION AND INSTALLATION OF WWS PIPE & DRAIN HUBS ELEVATION 140' |
| 502 | SV3-2101-CRW-CV7315 | UNIT 3 TURBINE FIRST BAY WALLS, WALL TO FLOOR MECHANICAL COUPLERS AIR 117-'6" |
| 503 | SV4-WWS-PHW-ME5004 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV4-WWS-PLW-01D) |
| 504 | SV3-CPS-PHW-ME3592 | FABRICATION AND INSTALLATION OF CONDENSATE POLISHER SYSTEM (CPS) PIPING |
| 505 | SV4-KB12-KBW-ME1881 | Installation of Module KB12 |
| 506 | SV4-KB11-KBW-ME1880 | Installation of Module KB11 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 507 | SV3-DWS-PHW-ME6673 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-243, 244) |
| 508 | SV3-PWS-PHW-ME7051 | INSTALLATION OF ANNEX BLDG PWS SUPPORTS (ISOMETRICS SV3-PWS-PLW-113 & SV3-PWS-PLW-155) |
| 509 | SV4-ME01-PLW-ME7831 | Installation of Vacuum Piping for Condenser B |
| 510 | SV4-ME01-PLW-ME7832 | INSTALLATION OF VACUUM PIPING FOR CONDENSER C |
| 511 | SV0-863-P0W-ME7836 | FABRICATE AND INSTALL UNDERGROUND PIPING UTILITIES POTABLE WATER, SANITARY SEWER, FIRE SUPPRESSION FOR BUILDING 304 |
| 512 | SV3-2052-SHW-EL7838 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 2 from Columns 17 to 18 & P.2 to R |
| 513 | SV3-2053-SHW-EL7839 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 3 from Columns 18 to 19 & P.2 to R |
| 514 | SV3-2053-SHW-EL7842 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 3 from Columns 18 to 19 & P.1 to P.2 |
| 515 | SV3-2052-SHW-EL7843 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 2 rom Columns 16 to 18 & L.5 to P.2 |
| 516 | SV3-2053-SHW-EL7844 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 3 from Columns 18 to 19 & L.5 to P.1 |
| 517 | SV4-HDS-P0W-ME5458 | INSTALLATION AND FABRICATION OF HEATER DRAINSYSTEM(HDS) PIPING |
| 518 | SV0-863-ERW-EL7706 | INSTALL UNDERGROUND CONDUIT FOR 304 BUILDING |
| 519 | SV3-4040-EGW-EL4375 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS - GROUNDING) FOR THE ANNEX BLDG, AREA 2, ELEV 117' - BETWEEN COLUMN LINES 4 & 9 |
| 520 | SV3-CDS-PHW-ME2309 | INSTALLATION OF CDS PIPING SUPPORTS |
| 521 | SV3-MS09-MEW-ME3566 | INSTALLATION OF NON-REGENERABLE MIXED BED (DTS-MS-05A/B) |
| 522 | SV3-ME2A-MEW-ME3691 | INSTALLATION OF BDS-ME-01A&B (SG BLOWDOWN) ON ELEV 100' |
| 523 | SV3-WLS-PHW-ME3870 | FABRICATION/INSTALLATION OF WLS PIPING SUPPORTS FOR ISOMETRICS: SV3-WLS-PLW-536, -53A |
| 524 | SV3-CPS-PHW-ME3600 | INSTALLATION AND FABRICATION OF CONDENSATE POLISHING SYSTEM(CPS) PIPING SUPPORTS |
| 525 | SV3-CDS-PHW-ME4910 | FABRICATION AND INSTALLATION OF CDS PIPING SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-70F, 70G, 70H, 70J |
| 526 | SV3-CPS-P0W-ME3599 | INSTALLATION AND FABRICATION OF CONDENSATE POLISHING SYSTEM (CES) PIPING |
| 527 | SV0-0000-VNY-RI7862 | Mammoet Documentation for Transport |
| 528 | SV3-WWS-PHW-ME7860 | FABRICATE AND INSTALL THE PIPE SUPPORTS FOR UNIT 3 WWS PIPING IN VALVE BOXES SV3-WWS-MY-Y04A AND SV3-WWS-MY-Y04B. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |

| 532 | SV3-PWS-P0W-ME7861 | INSTALLATION OF PWS PIPING ISOMETRICS SV3-PWS-PLW-584, 585, 587, AND 588., NEED VENDOR TECH MANUAL |
| 533 | SV3-2036-SHW-EL6798 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100'-0", AREA6 FROM COLUMNS 16 TO 18 & I.2 TO K.1 |
| 534 | SV4-HDS-P0W-ME5460 | INSTALLATION AND FABRICATION OF HEATER DRAINSYSTEM(HDS) PIPING |
| 535 | SV3-1212-ERW-EL3774 | Install Design Routed Conduit and Conduit Supports in Battery Room “C”, Room 12102 |
| 536 | SV3-2039-SHW-EL6799 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 100’-0”, Area 9 from Columns 18 to 19 & H.05 to I.2 |
| 537 | SV3-KB12-KBW-ME8002 | COMPLETE KB12 MODULE FABRICATION POST MODULE INSTALLATION |
| 538 | SV3-1212-ERW-EL3775 | INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN 'SPARE' BATTERY ROOM 12103 |
| 539 | SV3-1212-ERW-EL3773 | INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN BATTERY ROOM "A", ROOM 12101 |
| 540 | SV4-1220-SSW-CV4782 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREAS 3 & 4 STRUCTURAL STEEL FOR ELEVATION 82'-6" |
| 541 | SV4-2040-SSW-CV3972 | UNTI 4 TURBINE BUILDING SEQUENCE 8 DECKING AND GRATING |
| 542 | SV3-PV71-MEW-ME6246 | PRE-INSTALLATION WELDING OF MAIN STOP VALVE/CONTROL VALVE EQUALIZERS |
| 543 | SV3-CWS-PHW-ME2522 | INSTALLATION OF PIPE SUPPORTS FOR CWS SYSTEM |
| 544 | SV3-WWS-P0W-ME6699 | INSTALLATION AND FABRICATION OF WAST WATER SYSTEM (WWS) PIPING |
| 545 | SV4-ME2A-MEW-ME7421 | INSTALLATION OF BDS-ME-01A&B (SG BLOWDOWN) ON ELEV 100' |
| 546 | SV3-WWS-P0W-ME7985 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 158’ |
| 547 | SV3-WWS-P0W-ME7987 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 170' |
| 548 | SV3-WWS-P0W-ME7989 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 166’ |
| 549 | SV3-WWS-P0W-ME7991 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 170’ |
| 550 | SV3-WWS-PHW-ME7992 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS ELEVATION 170¿ |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 551 | SV3-WWS-P0W-ME7993 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 170’ |
| 552 | SV3-WWS-P0W-ME7995 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 170’ |
| 553 | SV3-WWS-P0W-ME7997 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 170’ |
| 554 | SV3-WWS-P0W-ME7999 | FABRICATION AND INSTALLATION OF WWS PIPE AND DRAIN HUBS ELEVATION 200¿ |
| 555 | SV3-FPS-PHW-ME4310 | FABRICATION / INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV3-FPS-PLW-821, 827, & 829 |
| 556 | SV3-WLS-PHW-ME3871 | FABRICATION/INSTALLATION OF WLS PIPING SUPPORTS FOR ISOMETRICS: SV3-WLS-PLW-537, -538 |
| 557 | SV4-PSS-P0W-ME1999 | INSTALLATION OF PSS PIPING (INCLUDES ISO SV4-PSS-PLW-700, 701) |
| 558 | SV4-CWS-P0W-ME5456 | INSTALLATION OF CWS PIPING AUTOMATIC BACKWASH STRAINERS (CWS-PY-S01A/B/C) TO WWS COLLECTION BASIN (WWS-PY-D501) |
| 559 | SV3-MS22-MEW-ME3690 | INSTALL BDS-MS-01A/B, STEAM GENERATOR BLOWDOWN RADIATION MONITOR EDI AND ASSOCIATED COMPONENTS |
| 560 | SV3-2034-SHW-EL6795 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING ELEV 100' AREA 4 FROM COLUMNS 12.1 TO 13.1 & I2 TO K.1 |
| 561 | SV4-CDS-PHW-ME3231 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-CDS-P0W-ME3230 |
| 562 | SV4-CWS-P0W-ME7143 | INSTALLATION AND FABRICATION OF CIRCULATING WATER SYSTEM(CWS) PIPING |
| 563 | SV4-WLS-P0W-ME6170 | UNIT 4 WLS S/S PIPING FROM THE WLS/WWS TIE-IN MANHOLE SOUTHWARD HALFWAY THROUGH THE FINAL PHASE |
| 564 | SV4-VWS-P0W-ME7149 | INSTALLATION AND FABRICATION OF CENTRAL CHILLED WATER (VWS) SYSTEM PIPING |
| 565 | SV4-HDS-P0W-ME5459 | (BLANK) |
| 566 | SV4-4033-CCW-CV8105 | Annex Area 3 Embeds, Formwork & Concrete to Elevation 100'-00" |
| 567 | SV4-4032-CCW-CV8102 | Unit 4 Annex Area 2 Embeds, Formwork & Concrete to Elevation 100'-00" |
| 568 | SV4-4032-CRW-CV8100 | Unit 4 Annex Area 2 Reinforcement to Elevation 100'-00" |
| 569 | SV4-4031-CCW-CV8099 | Annex Area 1 Embeds, Formwork & Concrete to Elevation 100'-00" |
| 570 | SV3-CA20-ERW-EL8053 | Install Scheduled Field routed conduit in "CHEMICAL WASTE TANK ROOM" (12264) |
| 571 | SV3-CA20-ERW-EL8054 | Install Scheduled Field routed conduit in "WASTE MONITOR TANK ROOM C" (12265) |
| 572 | SV3-CA20-ERW-EL8055 | Install Scheduled Field routed conduit in "WASTE HOLDUP TANK ROOM A" (12166) |
| 573 | SV3-CA20-ERW-EL8056 | Install Scheduled Field routed conduit in "WASTE HOLDUP TANK ROOM B" (12167) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 574 | SV3-CA20-ERW-EL8057 | Install Scheduled Field routed conduit in "VESTIBULE")(12168), "CORRIDOR"(12169), and WLS PUMP ROOM"(12268) |
| 575 | SV3-CA20-ERW-EL8058 | Install Scheduled Field routed conduit in "PIPING VALVE ROOM"(12262) and "PIPE CHASE" (12269) |
| 576 | SV3-CA20-ERW-EL8059 | Install Scheduled Field routed conduit in "WASTE MONITOR TANK ROOM B" (12365) |
| 577 | SV3-CA20-ERW-EL8060 | Install Scheduled Field routed conduit in "WASTE MONITOR TANK ROOM A" (12363) |
| 578 | SV4-WWS-P0W-ME5468 | WASTE WATER SYSTEM FROM SUMP C TO PY D501 |
| 579 | SV4-CWS-P0W-ME7145 | CIRCULATING WATER SYSTEM, CONDENSER VENTS AND DRAINS |
| 580 | SV4-CDS-P0W-ME7113 | INSTALLATION OF CDS PIPING FOR 82'9" (PORTION 3) |
| 581 | SV4-WWS-P0W-ME5466 | UNIT 4 TURBINE WASTE WATER SYSTEM |
| 582 | SV4-4031-CRW-CV8062 | Annex Area 1 Reinforcement to Elevation 100'-00" |
| 583 | SV4-0000-CCW-CV8066 | UNIT 4 TRANSFORMER FOUNDATION CONCRETE & FORMWORK BASE SLAB PLACEMENT 2 |
| 584 | SV4-0000-CCW-CV8067 | Unit 4 Transformer Foundation Concrete & Formwork Base Slab Placement 3 |
| 585 | SV4-0000-CCW-CV8068 | Unit 4 Transformer Foundation Concrete & Formwork Base Slab Placement 4 |
| 586 | SV4-0000-CRW-CV8075 | UNIT 4 TRANSFORMER REPLACEMENT (PLACEMENT 3) |
| 587 | SV3-2050-SSW-CV1820 | CA81 TEMP FRAMING/PERMANENT FORMS (TB05) |
| 588 | SV3-SFS-THW-ME8080 | Hydro Testing of R219 SFS Piping |
| 589 | SV3-2060-CEW-CV7324 | 170' & 183' ELEV, SHEAR STUDS & EMBED REPAIRS |
| 590 | SV3-2060-CCW-CV4487 | UNIT 3 TURBINE BUILDING CA81 TABLE TOP GROUTING ELEVATION 170' |
| 591 | SV4-CDS-P0W-ME7117 | Installation of CDS Piping at Elevation 82'9" (Portion 2) |
| 592 | SV3-2038-SHW-EL6797 | Electrical Cable Tray supplemental Steel Installation in the Turbine Building, Elevation 100'-0", Area 8 from Colmns 14 to16 & H.05 to 1.2 |
| 593 | SV3-CA20-S8W-CV2267 | CA20 MODULE EXTERIOR WALL CONCRETE REINFORCEMENT |
| 594 | SV3-HDS-PHW-ME1372 | FABRICATION AND INSTALLATION OF HDS PIPING SUPPORTS |
| 595 | SV3-HDS-PHW-ME3751 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM SUPPORTS |
| 596 | SV3-WWS-P0W-ME4633 | FABRICATION AND INSTALLATION OF WWS PIPING |
| 597 | SV3-CA20-S4W-CV1756 | INSTALLATION OF CA20 WALL 2 EMBED PLATES |
| 598 | SV3-CA20-S4W-CV2076 | EXTERIOR TEMPORARY ATTACHMENTS @ COLUMN LINE 4 |
| 599 | SV3-CA20-S8W-CV1690 | INSTALLATION OF CA20 MODULE COMMODITIES NI-3 AREA 5 AND 6 ROOM 12162 THRU 12169 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 600 | SV0-SAS-PLW-ME0710 | INSTALL AND FABRICATE SERVICE AIR SYSTEM (SAS) TO NUCLEAR ISLAND |

| 653 | SV3-2050-CCW-CV7037 | UNIT 3, TB GROUTING ACTIVITIES ON 141' ELEVATION |
| 654 | SV4-2040-EGW-EL8028 | ELECTRICAL GROUNDING INSTALLATION FOR THE TURBINE BUILDING AT ELEVATIONS 117'6" AND 120'-6" |
| 655 | SV3-CA20-ERW-EL5041 | INSTALL SCHEDULED FIELD ROUTED CONDUIT IN "RNS PUMP ROOM A" (12162) |
| 656 | SV3-WWS-PHW-ME6697 | INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM PIPE SUPPORTS FOR 120' ELEVATION |
| 657 | SV4-ML05-MLW-ME8409 | INSTALL SV4 CA05 PENETRATION SV4-11209-ML-P01 |
| 658 | SV3-ML05-MLW-ME5903 | INSTALLATION OF CA32 PENETRATIONS |
| 659 | SV3-ML05-MLW-ME5963 | INSTALLATION OF CA58 PENETRATIONS 11400-ML-P10 & 11400-ML-P11 |
| 660 | SV4-WWS-PHW-ME5479 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-WWS-PHW-ME5466 |
| 661 | SV3-PXS-PHW-ME3787 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02K |
| 662 | SV3-PXS-PHW-ME4500 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01W |
| 663 | SV3-PXS-PHW-ME3361 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01Q |
| 664 | SV3-PXS-PHW-ME3788 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02L |
| 665 | SV4-ML05-MLW-ME8411 | INSTALL SV4 CA05 PENETRATION SV4-11209-ML-P03 |
| 666 | SV4-ML05-MLW-ME8412 | INSTALL SV4 CA05 PENETRATION SV4-11209-ML-P04 |
| 667 | SV3-PXS-MTW-ME2934 | INSTALLATION OF ACCUMULATOR TANK SV3-PXS-MT01A |
| 668 | SV4-CA20-ERW-EL6714 | INSTALL ELECTRICAL WALL PENETRATIONS IN U4 CA20 MODULE SUB-ASSEMBLY 1 |
| 669 | SV3-WLS-PHW-ME3872 | FABRICATION/INSTALLATION OF WLS PIPING SUPPORTS FOR ISOMETRICS: SV3-WLS-PLW-550, -551, -560, -56A |
| 670 | SV3-FPS-PHW-ME4309 | FABRICATION / INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV3-FPS-PLW-811, 812, & 831 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 671 | SV3-WLS-PHW-ME8404 | FABRICATION/INSTALLATION OF WLS PIPE SUPPORTS FOR SV3-WLS-PLW-513 |
| 672 | SV3-WLS-PHW-ME8403 | FABRICATION/INSTALLATION OF WLS PIPE SUPPORTS FOR SV3-WLS-PLW-512 |
| 673 | SV3-WLS-PHW-ME8401 | FABRICATION/INSTALLATION OF WLS PIPE SUPPORTS FOR SV3-WLS-PLW-451 |
| 674 | SV3-WLS-PHW-ME8400 | FABRICATION/INSTALLATION OF WLS PIPE SUPPORTS FOR SV3-WLS-PLW-450 |
| 675 | SV4-HDS-PHW-ME5473 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING SUPPORT |
| 676 | SV3-CAS-PHW-ME6155 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-502) |
| 677 | SV3-ZAS-ERW-EL7501 | INSTALL CABLE TRAY SOUTHSIDE OF UNIT #3 TRANSFORMER AREA |
| 678 | SV4-WWS-PHW-ME5480 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-WWS-PHW-ME5467 |
| 679 | SV3-MSS-PHW-ME4660 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-MSS-P0W-ME4659 |
| 680 | SV3-MT6Z-MEW-ME5586 | INSTALLATION OF THE MAIN OIL TANK (MT-01) |
| 681 | SV3-CA04-S4W-CV1680 | CA04 TOP FLANGE FABRICATION AND ASSEMBLY |
| 682 | SV4-2020-SHW-EL8027 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 4 TURBINE BUILDING AT ELEVATION 82'-9" |
| 683 | SV4-2050-CEW-CV8154 | UNIT 4, TURBINE BUILDING 141' ELEVATION STUD WELDS POUR #6 |
| 684 | SV4-HDS-PHW-ME5475 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPE SUPPORT |
| 685 | SV4-FPS-PHW-ME5001 | FABRICATION/INSTALLATION OF FPS PIPE SUPPORTS (INCLUDING ISOMETRICS SV4-FPS-PLW-830, 825, 820) |
| 686 | SV3-4041-SAW-EL8771 | INSTALL SUPPLEMENTAL STEEL FOR ELECTRICAL HANGERS COL LN H9/H1.05 TO F9/F10.05 |
| 687 | SV3-2060-CRW-CV8370 | UNIT 3 TURBINE BUILDING 170' ELEVATED DECK REBAR FOR EQUIPMENT PADS & CURBS |
| 688 | SV3-2060-CRW-CV8368 | UNIT 3 TURBINE BUILDING 170' ELEVATED DECK REBAR FOR POUR #5 |
| 689 | SV3-PWS-P0W-ME4169 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-912, 922, 940, 941, 94X) |
| 690 | SV3-PWS-P0W-ME4170 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-954, 955, 956, 957) |
| 691 | SV4-WLS-P0W-ME8312 | ASME SECTION III - FABRICATION/INSTALLATION OF WLS PIPING LINES WLS-PL-L062 and WLS-PL-L110B on ISO SV4-WLS-PLW-731 |
| 692 | SV4-WLS-P0W-ME8313 | ASME SECTION III - FABRICATION/INSTALLATION OF WLS PIPING LINES WLS-PL-L063 and WLS-PL-L110C on ISO SV4-WLS-PLW-741 & SV4-WLS-PLW-74A |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 693 | SV3-PXS-PHW-ME4499 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01R |
| 694 | SV3-CA03-S4W-CV2385 | SV3-CA03-GNR-000071 ¿ 3D SCAN OF ENTIRE CA03 MODULE |
| 695 | SV3-MT73-MTW-ME7068 | FABRICATION/INSTALLATION OF PXS GUTTER COLLECTION BOXES AND SUPPORTS |
| 696 | SV3-REFDOC-NI3-ME8892 | SV3 CONTAINMENT PIPING/MECHANICAL FOREMAN'S BOOK 1 |
| 697 | SV3-MSS-P0W-ME4655 | INSTALLATION OF MSS PIPING |
| 698 | SV4-VWS-PHW-ME7150 | INSTALLATION AND FABRICATION OF CENTRAL CHILLED WATER SYSTEM (VWS) PIPE SUPPORT |
| 699 | SV3-MSS-PHW-ME4658 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV3-MSS-P0W-ME4657 |
| 700 | SV4-FPS-PHW-ME5000 | FABRICATION/INSTALLATION OF FPS PIPE SUPPORTS (INCLUDING ISOMETRICS SV4-FPS-PLW-833) |
| 701 | SV3-2020-ERW-EL1840 | ELECTRICAL CABLE TRAY SUPPORTS INSTALLATION FOR THE TURBINE BUILDING AT ELEVATION 82'-9" |
| 702 | SV3-4030-EGW-EL1856 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE ANNEX BLDG., AREA 1, ELEV. 100' & 107' - BETWEEN COLUMN LINES (9) TO (13) |
| 703 | SV3-WLS-PLW-ME0874 | Fabricate and Install WLS Piping Iso SV3-WLS-PLW-750-RESERVED FOR ORAN POE |
| 704 | SV3-WLS-P0W-ME3503 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-340, SV3-WLS-PLW-360, SV3-WLS-PLW-400, SV3-WLS-PLW-420) |
| 705 | SV3-WLS-P0W-ME3498 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-221, -251) |
| 706 | SV3-CB00-S8W-CV4046 | U3 CONTAINMENT INSTALLATION OF CB MODULE 21 AT ELEV 83'-0" |
| 707 | SV0-ZRS-EWW-TP0879 | Installation of 13.8KV Temp Power Loop East of Unit 3 |
| 708 | SV0-PWS-PLW-ME1086 | Fabricate and install Potable Water Piping East & North of Building 307 |
| 709 | SV3-ME01-PLW-ME1163 | CONDENSER B-1ST EXTRACTON PIPING (EXTRACTION STEAM) |
| 710 | SV3-MS60-MEW-ME1645 | Installation of ASS Boiler Feedpumps (ASS-MP-04A & 04B) |
| 711 | SV3-WRS-PLW-ME0600 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-57J) |
| 712 | SV3-2020-MEW-ME1399 | UNIT 3 CONDENSER C SPRING SUPPORT FOUNDATION INSTALLATION |
| 713 | SV3-ME01-PLW-ME1005 | UNIT 3 CONDENSER A: INSTALLATION OF UPPER SHELL NOZZLES |
| 714 | SV3-ML05-MLW-ME1570 | INSTALLATION OF EMBEDDED PIPING PENETRATIONS 82'-6" FLOORS ONLY |
| 715 | SV3-ME01-PLW-ME1159 | UNIT 3 CONDENSERS A: 1ST EXTRACTION PIPING (EXTRACTION STEAM) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 716 | SV3-ME2W-MEW-ME1360 | INSTALLATION OF HDS DRAIN COOLER CDS-ME-7C |
| 717 | SV3-2020-MEW-ME1398 | Unit 3 Condenser B Spring Support Foundation Installation |
| 718 | SV3-ME2W-MEW-ME1359 | INSTALLATION OF HDS DRAIN COOLER CDS-ME7B |
| 719 | SV3-WWS-PLW-ME1379 | UNIT 3 TURBINE BUILDING ELEVATION 100 FT. 0 IN. EMBEDDED WWS PIPING PACKAGE # 5 |
| 720 | SV3-2030-MEW-ME1695 | UNIT 3 CONDENSER A WATERBOX INSTALLATION |
| 721 | SV3-2030-MEW-ME1697 | UNIT 3 CONDENSER C WATERBOX INSTALLATION |
| 722 | SV3-WWS-P0W-ME2279 | ANNEX BUILDING - EMBEDDED WWS PIPING PACKAGE #1 |
| 723 | SV3-WLS-PHW-ME2320 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-380 |
| 724 | SV3-MS19-MEW-ME2497 | RESIN ADDITION HOPPER (CPS-MT-01) |
| 725 | SV3-KB11-KBW-ME0444 | INSTALLATION OF MODULE KB11 |
| 726 | SV3-CWS-PLW-ME2513 | INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-70AB, SV3-CWS-PLW-70AC, SV3-CWS-PLW-70AD, SV3-CWS-PLW-70AE |
| 727 | SV3-R106-R1W-ME0723 | R106 Mechanical Module |
| 728 | SV3-1000-Z0W-CV3911 | UNIT 3 SHIELD BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 729 | SV3-1000-GCW-CV0675 | UNIT 3 NUCLEAR ISLAND CONSTRUCTION STAIRCASES |
| 730 | SV3-1110-CEW-CV1270 | UNIT 3 CONTAINMENT EMBEDDED PLATES AND ANCHOR BOLTS AT EL. 71FT-6IN |
| 731 | SV3-CB65-S4W-CV1723 | INSTALL AND REMOVAL OF LIFTING BEAM/LUG FOR CB65 |
| 732 | SV3-1200-Z0W-CV3909 | UNIT 3 AUXILIARY BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 733 | SV3-4000-T2W-CV2232 | HSB ASSEMBLY & INSTALLER QUALIFICATION FOR ANNEX BUILDING AREA 4 |
| 734 | SV3-CA05-S4W-CV2054 | CA05 INSTALL REBAR FOR OVERLAY AND CONNECTION PLATES |
| 735 | SV3-ECS-CCW-CV1902 | Unit 3 ECS Ductbank |
| 736 | SV4-MT6A-MTW-ME8116 | Installation of Oil Storage Tanks (LOS-MT-02A/B) |
| 737 | SV3-1213-ERW-EL1624 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 3, INSTALL DESIGNED ROUTED CABLE TRAYS AND CONDUIT" |
| 738 | SV0-ZRS-EWW-EL6159 | Electrical LOTO & Determination and Physical Removal of the North and/or South Louvers and Actuator Controls at 315 Bldg. for Diesel Generator Installation |
| 739 | SV3-ML05-MLW-ME4820 | ASME Section III - Installation of Penetration 11502-ML-P01 & 11502-ML-P02 (CA01) |
| 740 | SV3-WLS-P0W-ME4995 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-512, SV3-WLS-PLW-513) |
| 741 | SV3-CAS-P0W-ME4393 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-41C, 41F, 41G) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 742 | SV3-1110-CCW-CV1396 | CONCRETE INTERIOR CVBH UP TO ELEVATION 71'-6" |
| 743 | SV3-2000-SSW-CV1861 | UNIT 3 TURBINE FIELD REPAIRS AND MODIFICATIONS FOR GRATING AND HANDRAIL |
| 744 | SV4-MT2M-MTW-ME8124 | Installation of Chemical Addition Tank (VYS-MT-02) |
| 745 | SV3-WLS-P0W-ME3727 | Installation of Large Bore WLS Piping (Isometrics SV3-WLS-PLW-537,-538,-540) |
| 746 | SV3-WLS-P0W-ME3733 | Installation of Large Bore WLS Piping (Isometric SV3-WLS-PLW-630, 632, 690, 721) |
| 747 | SV3-WSS-P0W-ME3444 | INSTALLATION OF WSS PIPING (INCLUDES SV3-WSS-PLW-513, 514, 600, 601) |
| 748 | SV3-CAS-PHW-ME0728 | Fabrication/Installation of Pipe Supports for Isometric Drawings (SV3-CAS-PLW-327, 360) |
| 749 | SV3-CAS-PHW-ME0729 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-331) |
| 750 | SV3-CWS-XEW-CV0057 | Excavate and Backfill for CWS Piping U3 Phase 3 Supply Line <Works with SV3-CWS-PLW-ME0051> |
| 751 | SV3-WLS-P0W-ME3506 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-510, SV3-WLS-PLW-511, SV3-WLS-PLW-514, SV3-WLS-PLW-515) |
| 752 | SV3-WLS-P0W-ME3507 | Installation of Large Bore WLS Piping (Includes: SV3-WLS-PLW-500) |
| 753 | SV3-WRS-P0W-ME3663 | Installation of Small Bore WRS Piping (Includes Isometrics SV3-WRS-PLW-824 , -829, -880) |
| 754 | SV3-WRS-P0W-ME3855 | Installation of Small Bore WRS Piping (Includes Isometric SV3-WRS-PLW-82H) |
| 755 | SV3-WRS-PLW-ME4454 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-839) |
| 756 | SV3-WRS-PLW-ME4459 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-842) |
| 757 | SV4-PY55-PYW-ME3244 | Assembly of the 120" x 108" CWS Reducers and CWS Expansion joint (Supply)" |
| 758 | SV4-PY55-PYW-ME3245 | Assembly of the 120" x 108" CWS Reducers and CWS Expansion joint (Return)" |
| 759 | SV3-ME3A-MEW-ME3693 | INSTALLATION OF TURBINE BLDG. CCS HEAT EXCHANGERS SV3-CCS-ME-01A AND 01B. |
| 760 | SV3-WLS-PLW-ME0901 | Fabricate and Install WLS Embedded Piping Iso SV3-WLS-PLW-576, 579 |
| 761 | SV3-KB23-KBW-ME1682 | Installation of Module KB23 (WLS Monitor Pump C) |
| 762 | SV3-2030-CCW-CV0219 | Miscellaneous Interior Walls and Curbs |
| 763 | SV3-1220-CCW-CV1889 | CONCRETE IN AUXILIARY BUILDING WALLS (19,20,20A,20B, AND 20C) UP TO ELEVATION 82'-6" |
| 764 | SV0-ZBS-CCW-CV2578 | ZBS Ductbank |
| 765 | SV0-DFS-CCW-CV2580 | DFS Ductbank |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 766 | SV3-CB00-S8W-CV3228 | INSTALLATION OF CB MODULES 22 7 23 AT ELEVATION 80'-6" |
| 767 | SV4-PGS-CCW-CV3427 | UNIT 4 JACK & BORE AND PGS ENCASEMENT CONSTRUCTION |
| 768 | SV3-1120-CCW-CV1818 | PLACEMENT, CURING, AND REPAIR OF CONCRETE INSIDE THE CV UP TO ELEV 83'-0" AND ELEV 84'-6" |
| 769 | SV3-WLS-THW-ME2213 | LIQUID RADWASTE SYSTEM (WLS) PIPING HYDROSTATIC TESTING |
| 770 | SV4-WRS-P0W-ME5328 | Fabrication/Installation of Small Bore WRS Leak Chase Piping Including SV4-WRS-PLW-86A, -86C, -808, -809, -868, -869 |
| 771 | SV3-CA03-GWS-ME8107 | WELDING PROCEDURES FOR CA03 |
| 772 | SV3-VWS-PLW-ME0500 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-241, 323) |
| 773 | SV3-VWS-PLW-ME0501 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES SV3-VWS-PLW-280, 353) |
| 774 | SV3-VWS-PLW-ME0502 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES SV3-VWS-PLW-390, 424) |
| 775 | SV3-KB16-KBW-ME0443 | INSTALLATION OF MODULE KB16 |
| 776 | SV3-VWS-PLW-ME0503 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES SV3-VWS-PLW-680,-453) |
| 777 | SV3-CAS-PLW-ME0461 | INSTALLATION OF KB15 CONNECTION PIPING |
| 778 | SV3-CAS-PLW-ME0458 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES ISOMETRICS: SV4-CAS-PLW-423, 42C) |
| 779 | SV3-CAS-PHW-ME0727 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS (SV3-CAS-PLW-323, 328) |
| 780 | SV3-FPS-PHW-ME0693 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWNGS SV3-FPS-PLW-810, 815 |
| 781 | SV4-2020-MEW-ME1481 | Unit 4 Condenser C Outlet Box Installation |
| 782 | SV3-DTS-PHW-ME1517 | Fabricate and Install Demineralized Water Treatment System (DTS) supports portion 3-(Raw Water Supply to DTS-MS-01) |
| 783 | SV3-ASS-PHW-ME1525 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 4) FOR ISOMETRIC# SV3-ASS-PLW-012, 010, 017, 02N, & 021 |
| 784 | SV3-WLS-PHW-ME0836 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRICS SV3-WLS-PLW-35D, -35F, -35H, -35L |
| 785 | SV3-WLS-PHW-ME0829 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-720 |
| 786 | SV3-WLS-PLW-ME0531 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-35D, -35F, -35H, -35L) |
| 787 | SV3-WLS-PLW-ME0528 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-191, -255) |
| 788 | SV3-VWS-PHW-ME0701 | INSTALLATION OF LARGE BORE VWS PIPING SUPPORTS FOR ISOMETRIC DRAWINGS SV3-VWS-PLW-270, -484 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 789 | SV3-WLS-PHW-ME0840 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS (INCLUDES ISOMETRICS: SV3-WLS-PLW-33G, -33K) |
| 790 | SV3-WLS-PLW-ME0525 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-980, -981) |
| 791 | SV3-WLS-PHW-ME0828 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-66Z |
| 792 | SV3-WLS-PLW-ME0537 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-33E) |
| 793 | SV4-1220-SSW-CV4783 | UNIT 4 NUCLEAR ISLAND AUXILLIARY BUILDING AREAS 5 & 6 STRUCTURAL STEEL FOR ELEVATION 82'-6" |
| 794 | SV3-CA20-S5W-CV1903 | CA20 N&D REWORK TO BE PERFORMED |
| 795 | SV3-CA20-S8W-CV1905 | INSTALLATION OF CA20 MODULE CIVIL COMMODITIES AND REINFORCEMENT NI3 AREA 5 & 6 ELEVATION 92'-6" |
| 796 | SV3-PH01-CEW-CV7665 | INSTALLATION OF REACTOR VESSEL SUPPORT MAIN EMBEDMENT ASSEMBLY |
| 797 | SV3-CA20-S5W-CV2597 | ADDITION OF FLOOR REBAR SUBMODULES 30, 71, 72, 73 |
| 798 | SV3-CA20-S4W-CV0439 | CA20 SA4 EL 98'-1" Floor Installation (CA20-51) |
| 799 | SV3-4041-ERW-EL7563 | INSTALLATION OF CONDUIT SLEEVES FOR RACEWAY PENETRATIONS, ANNEX BUILDING, AREA 1, ELEVATION 117'-6" |
| 800 | SV4-WWS-PHW-ME7547 | INSTALLATION OF ANNEX BLDG WWS PIPE SUPPORTS (ISOMETRIC SV4-WWS-PLW-951, 953) |
| 801 | SV3-WSS-P0W-ME3443 | INSTALLATION OF SMALL BORE PIPING (SV3-WSS-PLW-122, 400, 510, 511, 512) |
| 802 | SV3-CA01-S4W-CV2151 | INSTALL CA01-07 PERMANENT WELDED ATTACHMENTS |
| 803 | SV3-CA01-S4W-CV2149 | INSTALL CA01-05 PERMANENT WELDED ATTACHMENTS |
| 804 | SV3-CA01-S4W-CV2150 | INSTALL CA01-06 PERMANENT WELDED ATTACHMENTS |
| 805 | SV3-1210-ERW-EL3163 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 1, INSTALL TYPICAL RACEWAY SUPPORTS. |
| 806 | SV3-2020-EGW-EL1616 | ELECTRICAL GROUNDING TERMINATIONS FOR THE TURBINE BUILDING AT ELEVATION 82'-9" |
| 807 | SV4-4032-CCW-CV8061 | UNIT 4 ANNEX AREA 2 EAST SUMP AND ELEVATOR PIT INSTALLATION |
| 808 | SV4-0000-CCW-CV8065 | Unit 4 Transformer Foundation Concrete & Formwork Base Slab Placement 1 |
| 809 | SV4-WLS-PHW-ME3290 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-362 |
| 810 | SV3-WWS-P0W-ME3446 | INSTALLATION OF LARGE BORE WWS PIPING (INCLUDES SV3-WWS-PLW-32A, 32B, 32D, 32L, 334) |
| 811 | SV3-WRS-P0W-ME3794 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES SV3-WRS-PLW-568, 569, 594) |
| 812 | SV3-WLS-PHW-ME0769 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-201 |

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 813 | SV3-4033-CEW-CV2838 | U3 ANNEX AREA 3 EMBEDDED ITEMS AND ANCHOR BOLTS FROM ELEVATION 100'-0" TO 107'-2" |
| 814 | SV3-WRS-P0W-ME3657 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-56C) |
| 815 | SV4-2131-ERW-EL7377 | ELECTRICAL CONDUIT SLEEVE INSTALLATION FOR THE UNIT 4 TURBINE BUILDING 1ST BAY WALLS AT THE 100' |
| 816 | SV4-CA05-S5W-CV6037 | CA05-05 UNSATISFACTORY IRs AND N&D REPAIRS, E&DCRs AND LOOS PARTS - STRUCTURAL |
| 817 | SV3-CA20-S5W-CV2598 | ADDITION OF FLOOR REBAR SUB-MODULES 26,27,28,29 |
| 818 | SV3-CA01-S5W-CV6083 | INSTALLATION OF LANDING PLATES ON CA01 |
| 819 | SV3-DOS-CCW-CV8391 | UNIT 3 DOS TANK B WALL PLACEMENTS 2&3 |
| 820 | SV3-MS45-MEW-ME1893 | INSTALL FEEDWATER MAIN AND BOOSTER PUMP PACKAGE FOR MS-01C |
| 821 | SV4-SS01-Z0W-CV4382 | UNIT 4 STRUCTURAL STEEL SAFETY CLASS C REQUIREMENTS |
| 822 | SV3-VAS-SHW-ME4779 | FABRICATION AND INSTALLATION OF VAS DUCT SUPPORTS IN ROOM 12153 |
| 823 | SV3-2030-EGW-EL1751 | ELECTRICAL GROUNDING TERMINATIONS FOR THE TURBINE BUILDING AT ELEVATION 100'-0" |
| 824 | SV3-4032-ERW-EL1858 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EMBEDDED CONDUIT) FOR THE ANNEX BLDG., AREA 2, ELEV. 100' & 107' |
| 825 | SV3-CAS-PHW-ME0790 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-CAS-PLW-501, 504 |
| 826 | SV3-WLS-PHW-ME0819 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-140 |
| 827 | SV3-WLS-P0W-ME3449 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-031,032) |
| 828 | SV4-0500-CFW-CV2664 | INSTALL/REMOVE 2" SHAKE SPACE FORMS |
| 829 | SV3-CCS-PHW-ME0802 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-530, 550 |
| 830 | SV3-WLS-PHW-ME0830 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-93A, -936, -990 |
| 831 | SV3-1230-CCW-CV2440 | AUX BUILDING EXTERIOR WALLS (43, 44, 45, 46 & 47) UP TO EL 100'-0" |
| 832 | SV3-CA04-S4W-ME1732 | CA04 POWER RANGE DETECTOR WELLS INSTALLATION |
| 833 | SV3-CA04-S4W-ME1733 | CA04 INTERMEDIATE RANGE DETECTOR WELLS INSTALLATION |
| 834 | SV3-SWS-PHW-ME1384 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1356 WORK PACKAGE. |
| 835 | SV3-CAS-PLW-ME0456 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES ISOMETRICS: SV3-CAS-PLW-331) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 836 | SV3-4041-CCW-CV3182 | U3 ANNEX BUILDING AREA 1 CONCRETE & FORMWORK FROM EL. 100'-0" TO EL. 117'-6" |
| 837 | SV3-ML05-MLW-ME5905 | INSTALLATION OF CA35 PENETRATIONS |
| 838 | SV3-4031-ERW-EL1859 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EMBEDDED CONDUIT) FOR THE ANNEX BLDG., AREA 1, ELEV. 100'-BETWEEN COLUMN LINES (9) TO (13) |
| 839 | SV3-4033-ERW-EL1857 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EMBEDDED CONDUIT) FOR THE ANNEX BLDG., AREA 3, 100' & 107' - BETWEEN COLUMN LINES (2) to (4.1). |
| 840 | SV3-DOS-CCW-CV6811 | Diesel Generator Fuel oil storage foundation |
| 841 | SV3-CDS-CCW-CV6812 | CONDENSATE TANK FOUNDATION |
| 842 | SV3-CVS-PLW-ME0929 | Fabricate and Install Small Bore CVS Piping Iso SV3-CVS-PLW-07J |
| 843 | SV0-YFS-PLW-ME1087 | FABRICATE AND INSTALL THE YARD FIRE WATER LINE FROM BUILDING 301 TO BUILDING 304. |
| 844 | SV3-CES-PLW-ME1653 | Fabricate and Install Condenser Tube Cleaning System (CES) Piping In Turbine Building Elev. 82'-6" - 100'-0" (ISO SV3-CES-PLW-700,711,720,730,731,732,733,734,735,736,780) |
| 845 | SV0-RWS-P0W-ME5966 | FABRICATE AND INSTALL RAW WATER SYSTEM (RWS) TEMPORARY FLUSH LINE FOR START UP, |
| 846 | SV3-2030-CCW-CV0184 | 100' EL. Concrete Foundation Excluding 1st Bay |
| 847 | SV3-4001-SSW-CV3905 | Annex Building Area 1 Metal Decking and Grating Installation |
| 848 | SV3-CR10-CRW-CV0322 | INSTALLATION OF LAYER 4-10 REINFORCING FOR THE CR10 MODULE |
| 849 | SV3-CR10-CRW-CV0323 | THE ERECTION OF THE STRUCTURAL STEEL FOR THE CR10 MODULE ON PAD 139. |
| 850 | SV3-WLS-CCW-CV1845 | GROUT PLACEMENT UNDER MISCELLANEOUS EQUIPMENT AND TANKS IN THE UNIT 3 NUCLEAR ISLAND AUXILIARY BUILDING AT ELEVATION 66'-6" |
| 851 | SV3-ASS-PLW-ME1424 | FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 1 FOR 82-9 |
| 852 | SV3-KB12-KBW-ME0450 | INSTALLATION OF MODULE KB12 |
| 853 | SV3-ME01-PLW-ME0991 | Unit 3 Condenser A, B & C: Hotwell Piping |
| 854 | SV3-1200-CRW-CV1411 | UNIT 3 AUXILIARY BUILDING EL 66-6 TO 82-6 REBAR FOR WALLS 19 AND 20 |
| 855 | SV3-2030-CCW-CV0226 | U3 Turbine Grouting Activities Elevation 100’-0" |
| 856 | SV3-CA05-CRW-CV3668 | CA05 WELDABLE COUPLER REINFORCEMENT |
| 857 | SV3-SWS-PHW-ME1506 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1497 WORK PACKAGE. PART I |
| 858 | SV3-VAS-MDW-ME3387 | R161 MODULE HVAC COMPLETION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 859 | SV3-FPS-P0W-ME1753 | INSTALL FIRE PROTECTION PIPING AND HYDRANTS WAST OF UNIT 3 ANNEX |
| 860 | SV3-FPS-P0W-ME1754 | FABRICATE AND INSTALL FIRE PROTECTION PIPING FROM UNIT 3 ANNEX TO UNIT 3 DIESEL GENERATOR BLDG |
| 861 | SV3-SWS-PHW-ME1425 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1357 WORK PACKAGE. PART II |
| 862 | SV3-SWS-PHW-ME1385 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1357 WORK PACKAGE. PART I |
| 863 | SV3-ME01-PLW-ME1170 | Condenser C-4th Extraction Piping (Extraction Steam) |
| 864 | SV3-ME01-PLW-ME1169 | Condenser C-3rd Extraction Piping (Extraction Steam) |
| 865 | SV3-ME01-PLW-ME1013 | Unit 3 Condenser A: Installation of Water Curtain Spray Piping |
| 866 | SV3-CA04-S4W-ME1731 | CA04 SOURCE RANGE DETECTOR WELLS INSTALLATION |
| 867 | SV3-MP04-MEW-ME3569 | INSTALLATION OF SWS SERVICE WATER PUMP A (SWS-MP-01A/B) |
| 868 | SV3-SDS-P0W-ME2301 | FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #3 |
| 869 | SV3-CAS-PLW-ME1661 | Fabricate and Install Compressed & Instrument Air Piping & Components from Unit 3 Annex Building to Unit 3 Diesel Generator Building |
| 870 | SV3-WWS-CCW-CV2579 | UNIT 3 WWS Ductbank |
| 871 | SV3-2101-CFW-CV7034 | UNIT 3 TURBINE FIRST BAY WALLS FORMWORK |
| 872 | SV4-CB65-S5W-CV2570 | CB65 OVERLAY PLATE (OLP) INSTALLATION |
| 873 | SV3-ME01-PLW-ME1162 | Condenser A-4th Extraction Piping (Extraction Steam) |
| 874 | SV3-1230-CCW-CV2444 | AUX BUILDING MISCELLANEOUS WALLS (38, 39, 40, 41 & 48) UP TO EL 100'-0" |
| 875 | SV3-CA01-S4W-CV2089 | CA01-41 SUBMODULE INSTALLATION |
| 876 | SV3-CA01-S5W-CV5892 | CA01-45 Submodule Erection |
| 877 | SV3-1220-CCW-CV1611 | INSTALLATION OF REBAR, EMBED PLATES, CONCRETE, AND FORMWORK FOR U3 AUX. BLDG. CONCRETE BEAMS-EL.82'-6" |
| 878 | SV3-SWS-PLW-ME1495 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-070, 071, 072, 078, 07A, 07B) |
| 879 | SV3-ML05-MLW-ME5064 | INSTALLATION OF CA01 PENETRATIONS |
| 880 | SV3-ME01-PLW-ME1166 | Unit 3 Condenser B: 4th Extraction Piping (Extraction Steam) |
| 881 | SV3-ME01-PLW-ME1161 | Condenser A-3rd Extraction Piping (Extraction Steam) |
| 882 | SV3-ME01-PLW-ME1112 | Hotwell Interconnection Piping Package #1 |
| 883 | SV3-ME01-PLW-ME1113 | Hotwell Interconnection Piping Package #2 |
| 884 | SV3-2020-MEW-ME1490 | Unit 3 Condenser C Installation (Lower & Upper Shell) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 885 | SV3-ME01-PHW-ME1450 | Unit 3 Condenser B: Fabrication & Installation of Casing Drain Piping Supports |
| 886 | SV3-ME01-PLW-ME0915 | Condenser A: Vacuum Piping |
| 887 | SV3-ME01-PLW-ME1022 | Condenser C: Vacuum Piping |
| 888 | SV3-FPS-P0W-ME2268 | FABRICATE AND INSTALL PHASE 2 FIRE PROTECTION LINE NORTH OF UNIT 3 annex to transformer yard. |
| 889 | SV3-ME01-PLW-ME0985 | Condenser B: Vacuum Piping |
| 890 | SV3-ME01-PLW-ME1165 | Condenser B-3rd Extraction Piping (Extraction Steam) |
| 891 | SV3-2030-MEW-ME1696 | UNIT 3 CONDENSER B WATERBOX INSTALLATION |
| 892 | SV3-0000-CRW-CV2375 | UNIT 3 TRANSFORMER FOUNDATION REBAR |
| 893 | SV3-0000-CCW-CV2126 | UNIT 3 TRANSFORMER FOUNDATION CONCRETE AND FORMWORK |
| 894 | SV3-WWS-P0W-ME3652 | INSTALLATION OF TURBINE BUILDING WWS PIPING FOR ISOMETRICS SV3-WWS-PLW-06B, 06BF, 06D, 06E, 06F, 06G, 06L, 06J, 06K, 06P |
| 895 | SV3-FPS-THW-ME7069 | FPS HYDROSTATIC TESTING |
| 896 | SV4-CA20-S4W-CV5288 | CA20-10 MAP OUT TEMPORARY ATTACHMENTS |
| 897 | SV3-MS21-MEW-ME4604 | INSTALLATION OF COOLING WATER MIXING SKID (SSS-MS-04) |
| 898 | SV3-4034-CCW-CV2620 | ANNEX AREA 4 FOUNDATION FORMWORK AND CONCRETE |
| 899 | SV3-CA01-S5W-CV5890 | SUBASSEMBLY 1: TOP CAP FABRICATION |
| 900 | SV3-CA01-S5W-CV5891 | SUBMODULE 1 TOP CAP INSTALLATION |
| 901 | SV3-FPS-THW-ME7213 | Hydro test the Unit 3 Fire Protection System (FPS) Piping on Isometrics (SV3-FPS-PLW-958,959,95AQ,95AR,95AS,95AT) |
| 902 | SV3-4042-CCW-CV3179 | Annex Area 2 Formwork and Concrete to Elevation 117’-6’’ |
| 903 | SV3-FPS-P0W-ME4186 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-821, -827, -829, -82A) |
| 904 | SV3-CA01-S4W-CV4076 | CA01-11 OVERLAY PLATES AND PERMANENT WELDED |
| 905 | SV3-1210-ERW-EL1623 | Install Design Routed Raceway and Supports for Area 1 & 2 El. 66'-6" |
| 906 | SV3-CA20-S4W-CV0432 | CA20 SA2 EL 135'-3" FLOOR INSTALLATION (CA20-58) |
| 907 | SV3-CA20-S4W-CV0431 | Installation of CA20 SA2 EL 117'-6" Floor Submodules (Submods 56, 57, 76)RESERVED FOR RUSSELL FINDLEY |
| 908 | SV3-CA20-S4W-CV0426 | CA20 SA1 EL 117'-6" & 135'-3" FLOOR INSTALLATION (CA20-59,60,61,62,63,77) |
| 909 | SV3-CA20-S8W-CV2537 | CA20 MODULE FLOOR CIVIL COMMODITIES FROM EL. 100'-0" TO EL. 135'-3" |
| 910 | SV3-VAS-MXW-CT7420 | U3 AUX BLDG. VAS SUPPORTS REWORK |
| 911 | SV3-CA20-S4W-CV0430 | CA20 SA2 EL 107'-2" Floor Installation (CA20-75) |

# Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 912 | SV3-CA20-S4W-CV2208 | CA20-SUB ASSEMBLY 2 MISC. REWORK TO CLOSE N&Ds |
| 913 | SV3-CA20-S4W-CV2209 | CA20 MISCELLANEOUS N&Ds AND WORK LIST ITEMS CLOSURE |
| 914 | SV3-WLS-PHW-ME3526 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRIC: SV3-WLS-PLW-050 |
| 915 | SV3-WLS-PHW-ME0770 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-215 |
| 916 | SV3-WLS-PHW-ME0771 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-33A, -260 |
| 917 | SV3-WLS-PHW-ME0772 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-362 |
| 918 | SV3-WRS-P0W-ME3797 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES SV3-WRS-PLW-668, 669) |
| 919 | SV3-CVS-PLW-ME0498 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES SV3-CVS-PLW-506) |
| 920 | SV3-CCS-PHW-ME0803 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-609 |
| 921 | SV3-WLS-PHW-ME0832 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRIC SV3-WLS-PLW-961 |
| 922 | SV3-CCS-PHW-ME0799 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-302 |
| 923 | SV3-PXS-P0W-ME3699 | FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-299 (CA03 PIPING) |
| 924 | SV3-MP50-MPM-ME1725 | INSTALLATION OF TURBINE BLDG. SUMP PUMPS SV3-WWS-MP-01A/01B, SV3-WWS-MP-07A/07B AND SV3-WWS-MP-08A/08B. |
| 925 | SV3-MS60-MEW-ME3571 | INSTALLATION OF ASS ELECTROLYTE FEED TANK (ASS-MT-06) |
| 926 | SV3-WRS-P0W-ME3792 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES SV3-WRS-PLW-52C, 52E, 52G, 534) |
| 927 | SV3-CVS-P0W-ME3901 | INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES SV3-CVS-PLW-524, 533, 560) |
| 928 | SV4-WRS-P0W-ME5419 | WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV4-WRS-PLW-522) |
| 929 | SV3-2050-MEW-ME2273 | INSTALL CONDENSER C CONNECTION PIECE |
| 930 | SV3-2050-MEW-ME2271 | INSTALL CONDENSER A CONNECTION PIECE |
| 931 | SV3-2050-MEW-ME2272 | INSTALL CONDENSER B CONNECTION PIECE |
| 932 | SV4-AX01-AXW-CT7542 | UNIT 4 CONTAINMENT COATING REQUIREMENTS, |
| 933 | SV3-DOS-THW-ME2641 | (BLANK) |
| 934 | SV3-CA01-S4W-CV2250 | INSTALL CA01-46 PERMANENT WELDED ATTACHMENTS |
| 935 | SV3-WRS-P0W-ME2491 | FABRICATION AND INSTALLATION OF LARGE BORE WRS PIPING (ISOMETRIC SV3-WRS-PLW-652) |
| 936 | SV3-CA01-S4W-CV3383 | CA01-22 OVERLAY PLATES AND ATTACHMENTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 937 | SV4-2030-MEW-ME7698 | UNIT 4 CONDENSER C WATERBOX INSTALLATION |
| 938 | SV3-CA01-S5W-CV4216 | CA01 MISCELLANEOUS UNSATISFACTORY IRS, N&Ds, AND E&DCRs REWORK/REPAIRS |
| 939 | SV3-WLS-P0W-ME6168 | UNIT 3 FINAL PHASE WLD DOUBLE WALL PIPING INSTALLATION NEAR THE WLS/WWS TIE-IN MANHOLE |
| 940 | SV3-MS45-MEW-ME1892 | INSTALL FEEDWATER MAIN AND BOOSTER PUMP PACKAGE FOR MS01-B |
| 941 | SV3-MS45-MEW-ME1891 | INSTALL FEEDWATER MAIN AND BOOSTER PUMP PACKAGE FOR MS-01A |
| 942 | SV3-DOS-CCW-CV8106 | UNIT 3 DIESEL GENERATOR FUEL OIL STORAGE WALLS |
| 943 | SV3-DTS-P0W-ME3581 | INSTALLATION OF DTS PIPING FOR ISOMETRICS SV3-DTS-PLW-01AN AND SV3-DTS-PLW-01AP |
| 944 | SV4-1220-SSW-CV4780 | Unit 4 Nuclear Island Auxiliary Building Area 1 Structural Steel for Elevation 82'-6" |
| 945 | SV3-WWS-MYW-ME7859 | INSTALL VALVE BOXES FOR UNIT 3 WWS PIPING IN DIESEL FUEL OIL TANK AREA. |
| 946 | SV4-2000-SXW-CT7845 | U4 TURBINE BUILDING STRUCTURAL STEEL REWORK |
| 947 | SV3-WWS-CCW-CV3367 | WASTE WATER RETENTION |
| 948 | SV4-1220-EGW-EL4809 | U4-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR WALLS EL82'6' TO 100'0", AREAS 1&2 |
| 949 | SV3-ML10-MLW-ME8733 | PLACEMENT OF CONTAINMENT PENETRATIONS P05, P27, & P28 |
| 950 | SV3-DWS-PHW-ME7047 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-142, -242, -256). |
| 951 | SV3-DWS-P0W-ME6672 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRICS SV3-DWS-PLW-243, -244 |
| 952 | SV4-CAS-P0W-ME2592 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV4-CAS-PLW-785 AND 786 |
| 953 | SV3-CAS-P0W-ME2590 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-CAS-PLW-681 AND 682 |
| 954 | SV3-PXS-PHW-ME7052 | Installation of Piping Supports for Isometric SV3-PXS-PLW-66N |
| 955 | SV4-1220-SSW-CV4781 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREA 2 STRUCTURAL STEEL FOR ELEVATION 82'-6" |
| 956 | SV3-2101-CEW-CV7035 | Unit 3, Turbine Building, 1st Bay Walls from 122' to 140', Terminators |
| 957 | SV3-WRS-PLW-ME4434 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-810) |
| 958 | SV4-2030-MEW-ME7696 | UNIT 4 CONDENSER A WATERBOX INSTALLATION |
| 959 | SV3-0000-ELW-EL7397 | INSTALLATION OF CONDUIT FOR UNIT 3 STANDARD PLANT YARD TRANSFORMER AREA LIGHTING |
| 960 | SV3-WLS-P0W-ME3505 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-450, SV3-WLS-PLW-451, SV3-WLS-PLW-452, SV3-WLS-PLW-453) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

|---|---|---|
| 961 | SV3-CA20-CCW-CV5445 | UNIT 3 CA20 WALLS CONCRETE PLACEMENT FROM ELEV. 66'-6" TO 128'-1" |
| 962 | SV4-2030-MEW-ME7697 | UNIT 4 CONDENSER B WATERBOX INSTALLATION |
| 963 | SV3-CA01-S4W-CV4083 | CA01-19 OLP, SAND PERMANENT WELDED ATTACHMENTS |
| 964 | SV3-CA01-S4W-CV2247 | INSTALL CA01-30 PERMANENT WELDED ATTACHMENTS AND OVERLAY PLATES (OLP) |
| 965 | SV3-WLS-PLW-ME0520 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-591) |
| 966 | SV3-WLS-PLW-ME0526 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-961) |
| 967 | SV3-WRS-PLW-ME0485 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRIC SV3-WRS-PLW-82J) |
| 968 | SV3-4033-CCW-CV2837 | UNIT 3 ANNEX BUILDING AREA 3 FORMWORK AND CONCRETE FROM EL. 100'-0" TP 107'-2" |
| 969 | SV3-WLS-PLW-ME0514 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-190) |
| 970 | SV3-WGS-P0W-ME3436 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-420, -422, -547) |
| 971 | SV3-WLS-PHW-ME0822 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-265, -275 |
| 972 | SV3-WRS-P0W-ME3667 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDING ISOMETRICS SV3-WRS-PLW-85A, -85B, -850, -851, -852, -853, -854, -855, -856, -857, -858, -859) |
| 973 | SV3-MT2Y-MEW-ME3695 | INSTALLATION OF HDS LOW PRESSURE DRAIN TANKS (HDS-MT-04A/B/C) |
| 974 | SV3-VYS-P0W-ME8643 | INSTALLATION OF ANNEX BLDG VYS PIPING (ISOMETRIC SV3-VYS-PLW-423, -424, -425, -426, -428) |
| 975 | SV4-SDS-P0W-ME7549 | Installation of Annex Bldg SDS Embedded Piping (Isometric SV4-SDS-PLW-401, 402, 403, 404, 405) |
| 976 | SV3-2101-CCW-CV7317 | UNIT 3, TURBINE BUILDING, FIRST BAY WALL CONCRETE UP TO 122', POUR 1E |
| 977 | SV3-2101-CCW-CV7314 | UNIT 3, TURBINE BUILDING, FIRST BAY WALL CONCRETE UP TO 122', POUR 1W |
| 978 | SV3-ECS-ERW-EL1796 | Installation of Underground Commodities (Manholes and Duct Banks for the ECS) Main AC Power System from the Diesel Generator Bldg. to the Annex Bldg. - Phase 1 |
| 979 | SV3-PXS-P0W-ME3240 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-029 (LINE NUMBERS PXS-PL-L112B) |
| 980 | SV4-ZBS-ERW-EL2642 | Install ZBS Ductbank - North Of Unit 4 Turbine Bldg. - Phase 7 |
| 981 | SV3-CB00-S8W-CV3229 | INSTALLATION OF CB MODULES 24 & 25 AT ELEVATION 89'-6" & 87'-6" |
| 982 | SV3-1230-CCW-CV2441 | AUX BUILDING EXTERIOR WALLS (25A, 26, 27, 28 & 42) UP TO EL 100'-0" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 983 | SV3-1130-CRW-CV4054 | U3 CONTAINMENT CONCRETE REINFORCEMENT EL 84FT-6IN TO EL 87FT-6IN |
| 984 | SV3-1220-CRW-CV1586 | UNIT 3 AUXILIARY BUILDING PERIMETER A3 (82'-6") WALLS REBAR INSTALLATION |
| 985 | SV3-CA01-S5W-CV4288 | CA01 MISC. WORK, MISC. UNSAT. IRS/ N&DS AND E&DCRS |
| 986 | SV3-CA01-S4W-CV2248 | INSTALL CA01-31 PERMANENT WELDED ATTACHMENTS |
| 987 | SV3-CA01-S4W-CV4088 | INSTALL CA01-36 PERMANENT WELDED ATTACHMENTS |
| 988 | SV3-CA01-S4W-CV2249 | Install CA01-34 Permanent Welded Attachments |
| 989 | SV3-CA01-S4W-CV4089 | INSTALL CA01-39 PERMANENT WELDED ATTACHMENTS |
| 990 | SV3-1020-CCW-CV2699 | CONCRETE IN AREA BELOW CONTAINMENT VESSEL FROM EL 82'-6" TO EL 98'-0" |
| 991 | SV3-CA01-CRW-CV6220 | INSTALLATION OF REINFORCING STEEL INTO CA01 MODULE WELDABLE COUPLERS |
| 992 | SV3-1100-Z0W-CV3928 | UNIT 3 CONTAINMENT REINFORCED CONCRETE REQUIREMENTS |
| 993 | SV3-1020-CEW-CV2581 | Installation of Embed Plates For Shield Wall And Lower Annulus Tunnel For Elevation |
| 994 | SV3-1220-CRW-CV1587 | UNIT 3 AUXILIARY BUILDING A3 (82'-6" TO 100'-0") INTERIOR WALL REBAR - AREAS 1 & 2 |
| 995 | SV3-CA01-S4W-CV4087 | CA01-33 PLP and Perm Weld Attachments |
| 996 | SV3-CA01-S4W-CV4077 | CA01-12 OVERLAY PLATES AND PERMANENT WELDED ATTACHMENTS |
| 997 | SV3-4032-ERW-EL6350 | INSTALLATION OF CONDUIT SLEEVES FOR RACEWAY WALL AND FLOOR PENETRATIONS, ANNEX BUILDING, AREA 2, EL. 100'-0" |
| 998 | SV3-CA01-S4W-CV4080 | CA01-16 OLP AND PERM WELD ATTACHMENTS |
| 999 | SV3-CA01-S4W-CV2153 | INSTALL CA01-09 PERMANENT WELDED ATTACHMENTS |
| 1000 | SV3-1220-CCW-CV1888 | PLACEMENT OF CONCRETE IN MISCELLANEOUS WALLS (16, 17, 18 AND 18A) UP TO ELEV 82'-6" |
| 1001 | SV3-CA01-MHW-CV2161 | LIFTING FRAMES AND BRACING SUBMODULES 04,11,12,17 THRU 19,25,47 & 48 |
| 1002 | SV3-1220-EGW-EL2438 | INSTALL GROUND CABLES & GROUND PLATE INSERTS FOR AUXILIARY BUILDING OUTER WALLS ELEVATION 82'-6" TO 100'-0" &EXTEND RISERS TO ELEVATION 100'-0" |
| 1003 | SV3-CA01-MHW-CV2163 | LIFTING FRAMES AND BRACING SUBMODULES 27 THRU 31, 34 & 46 |
| 1004 | SV3-1130-CEW-CV1596 | U3 CONTAINMENT CONCRETE EMBEDMENTS EL. 87FT-6IN |
| 1005 | SV3-1220-CEW-CV1606 | U3 AUXILIARY BUILDING EMBED PLATES-AREA 1-EL 82'-6" WALLS |
| 1006 | SV0-YFS-THW-ME2216 | HYDRO TEST YARD FIRE SYSTEM (YFS) FROM BUILDING 315 TO BUILDING 301 |
| 1007 | SV3-1130-C0W-CV4055 | REINFORCED CONCRETE INSIDE CONTAINMENT 87-6 TO 96-0 WEST SIDE (LAYERS 6V AND 7V) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1008 | SV4-FPS-P0W-ME7685 | Fabricate and Install the Unit 4 Phase 7 North Side Fire Protection System (FPS) piping in Isometrics (SV4-FPS-PLW-966,967,96AM,96AL) |
| 1009 | SV3-1220-EGW-EL3438 | INSTALL GROUNDING FOR SHIELD WALL ELEVATION 82'-6" TO 100'-0" |
| 1010 | SV3-1220-ERW-EL3779 | INSTALL CONDUIT SLEEVES FOR PENETRATIONS, UNIT 3 AUXILIARY BUILDING, ELEVATION 82'-6" AREAS 4 & 5, RM 12251 (SP-09), RM 12252 (SP-10), RM12261 (SP-11 & SP-13). |
| 1011 | SV3-1220-CEW-CV1607 | Auxiliary Building Embed Plates & Anchor Bolts-EL 82'6" Walls - Area 2 |
| 1012 | SV4-FPS-P0W-ME7686 | Fabricate and Install the Unit 4 Phase 7 South Side Fire Protection System (FPS) piping in Isometrics (SV4-FPS-PLW-964,965,96AK,96AW,96AX,96BA) |
| 1013 | SV4-1210-ERW-EL1808 | Unit 4 Auxiliary Builing grounding and sleeves for wall pours 14-18 |
| 1014 | SV3-CA20-ERW-EL0670 | Installation of Electrical Penetrations in Module CA20 |
| 1015 | SV3-1220-CCW-CV1483 | AUXILIARY BUILDING EXTERIOR WALLS UP TO ELEVATION 82'6" |
| 1016 | SV3-CA01-S4W-CV2244 | CA01-27 PERMANENT WELDED ATTACHMENTS |
| 1017 | SV3-1220-EGW-EL3098 | U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR WALLS EL 82' 6" TO 100' 0", AREAS 1 & 2 |
| 1018 | SV3-1100-ERW-EL1589 | CONTAIMENT BUILDING EX CORE INSTRUMENTATION EMDEDDED CONDUIT EL 71FT-6IN TO 107FT-2IN |
| 1019 | SV3-2053-SHW-EL7840 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 3 from Columns 19 to 20 & P.2 to R |
| 1020 | SV3-2053-SHW-EL7841 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 141'-3", Area 3 from Columns 19 to 20 & L.5 to P.2 |
| 1021 | SV3-WLS-PLW-ME0875 | FABRICATE AND INSTALL WLS PIPING ISOMETRIC# SV3-WLS-PLW-754 |
| 1022 | SV3-ME01-PLW-ME1020 | UNIT 3 CONDENSER A: INSTALLATION OF FLASHBOX PIPING |
| 1023 | SV3-WRS-PLW-ME0597 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-655 AND 573) |
| 1024 | SV3-WWS-PLW-ME0610 | INSTALLATION OF LARGE BORE WWS PIPING (INCLUDING ISOMETRICS SV3-WWS-PLW-311, -315) |
| 1025 | SV3-WRS-PLW-ME0603 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRICS SV3-WRS-PLW-571, 576, AND 57F) |
| 1026 | SV3-2020-PLW-ME1352 | INSTALL CONDENSATE PUMP SV3-CDS-MP-01C |
| 1027 | SV3-2020-PLW-ME1350 | INSTALL CONDENSATE PUMP SV3-CDS-MP-01A |
| 1028 | SV3-2020-PLW-ME1351 | INSTALL CONDENSATE PUMP SV3-CDS-MP 01B |
| 1029 | SV0-SDS-PLW-ME1566 | FABRICATE AND INSTALL SDS PIPING BETWEEN LIFT STATIONS MS-500 & MS-501. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1030 | SV3-WRS-PLW-ME0601 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-572, 574, 578, 579, AND 57D) |
| 1031 | SV0-YFS-PLW-ME1196 | FABRICATE AND INSTALL THE YARD FIRE WATER LINE FROM HEADER TO HYDRANT H-25. |
| 1032 | SV3-ME01-PLW-ME1110 | UNIT 3 CONDENSER B HOTWELL: HOTWELL PIPING |
| 1033 | SV3-WWS-PLW-ME1215 | UNIT 3 TURBINE BUILDING EL 100 FT. - 0 IN. EMBEDDED WWS PIPING PACKAGE # 4 |
| 1034 | SV3-ME01-PHW-ME1273 | CONDENSER A: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING SUPPORTS |
| 1035 | SV3-CPS-P0W-ME3593 | INSTALLATION OF CPS PIPING |
| 1036 | SV3-WLS-PHW-ME0712 | FABRICATE AND INSTALL WLS CONSTRUCTION AID SUPPORTS FOR THE CONTAINMENT BUILDING EMBEDDED PIPE |
| 1037 | SV3-WLS-PLW-ME0689 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV3-WLS-PLW-785. |
| 1038 | SV3-ME01-PHW-ME1219 | CONDENSER C: VACUUM PIPING SUPPORTS |
| 1039 | SV3-HDS-PLW-ME1431 | CONNECT HEATER DRAIN PIPING TO NOZZLES |
| 1040 | SV3-ME01-MEW-ME0914 | UNIT 3 CONDENSERS A, B & C-INSTALLATION OF UPPER SHELL MANHOLES |
| 1041 | SV3-WLS-MTW-ME1032 | INSTALLATION OF MONITOR TANKS WLS-MT-07A AND WLS-MT-07B IN CA20 |
| 1042 | SV3-ME01-PHW-ME1284 | UNIT 3 CONDENSER C: FABRICATION & INSTALLATION OF 4TH EXTRACTION STEAM PIPING SUPPORTS |
| 1043 | SV4-KQ10-KQW-ME1683 | KQ10 REACTOR COOLANT DRAIN TANK (WLS-MT-01) INSTALLATION |
| 1044 | SV3-ME01-PHW-ME1277 | CONDENSER B: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING SUPPORTS |
| 1045 | SV3-ML05-MLW-ME1712 | ATTACHMENT OF WELDED NELSON STUDS TO EMBEDDED PIPING PENETRATIONS 82'-6" FLOORS ONLY |
| 1046 | SV3-CES-PLW-ME1658 | FABRICATE AND INSTALL CONDENSER TUBE CLEANING SYSTEM (CES) PIPING IN TURBINE BUILDING ELEV. 82'-6 |
| 1047 | SV3-ME01-PLW-ME0986 | Condenser A: WWO Piping |
| 1048 | SV3-WRS-P0W-ME3669 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDING ISOMETRICS SV3-WRS-PLW-85C, 85D) |
| 1049 | SV3-ME01-PLW-ME0987 | CONDENSER B: WWO PIPING |
| 1050 | SV3-ME01-PLW-ME1007 | Condenser C: WWO Piping |
| 1051 | SV3-WWS-P0W-ME1839 | FABRICATE AND INSTALL WASTE WATER PIPING FROM UNIT 3 DIESEL GENERATOR BLDG. SUM TO THE OIL/WATER SEPARATOR. |
| 1052 | SV3-WLS-PLW-ME0513 | Installation of Small Bore WLS Piping (Includes: SV3-WLS-PLW-142,-33F,-216,-212) |
| 1053 | SV3-WLS-PLW-ME0588 | INSTALLATION OF WLS LARGE BORE PIPING (INCLUDING ISOMETRICS SV3-WLS-PLW-631) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1054 | SV3-HDS-PLW-ME1371 | FABRICATE/INSTALL OF HEATER DRAIN SMALL BORE PIPING ON FEEDWATER HEATER DRAIN COOLER 7C |
| 1055 | SV3-WRS-PLW-ME0589 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRICS SV3-WRS-PLW-55A AND 55B) |
| 1056 | SV3-HDS-PHW-ME1362 | FABRICATE AND INSTALL HEATER DRAIN PIPE SUPPORTS ON FEEDWATER HEATER DRAIN COOLER 7A |
| 1057 | SV3-WLS-PLW-ME0585 | INSTALLATION OF WLS LARGE BORE PIPING (INCLUDING ISOMETRICS SV3-WLS-PLW-33A, 260). |
| 1058 | SV3-HDS-PLW-ME1363 | FABRICATE/INSTALL OF HEATER DRAIN SMALL BORE PIPING ON FEEDWATER HEATER DRAIN COOLER 7A |
| 1059 | SV3-ME01-PHW-ME1220 | Condenser A: WWO Piping Supports |
| 1060 | SV3-MSS-P0W-ME4659 | INSTALLATION OF MSS PIPING |
| 1061 | SV3-ME01-PHW-ME1221 | Condenser B: WWO Piping Supports |
| 1062 | SV3-ME01-PHW-ME1222 | Condenser C: WWO Piping Supports |
| 1063 | SV3-ML05-MLW-ME0711 | Installation of CA20 Penetration Sleeves |
| 1064 | SV3-SDS-CKW-ME1657 | INSTALL SANITARY DRAIN MANHOLES MH-58, MH-59, MH-60, MH-61, MH-68 & MH-69. |
| 1065 | SV3-WLS-PLW-ME0578 | Installation of Large Bore WLS Piping (Includes Isometrics SV3-WLS-PLW-680, -770, -790, -850) |
| 1066 | SV3-ME01-PLW-ME1535 | Unit 3 Condenser C: Installation of Water Curtain Piping |
| 1067 | SV3-WLS-PLW-ME0584 | Installation of WLS Large Bore Piping (Including Isometric SV3-WLS-PLW-215) |
| 1068 | SV3-DOS-P0W-ME1812 | FABRICATE AND INSTALL THE DIESEL FUEL OIL PIPING EAST OF UNIT 3 ANNEX. |
| 1069 | SV3-ME01-PLW-ME1164 | CONDENSER B-2ND EXTRACTION PIPING (EXTRACTION STEAM) |
| 1070 | SV3-ME01-PLW-ME1160 | CONDENSER A-2ND EXTRACTION PIPING (EXTRACTION STEAM) |
| 1071 | SV3-WLS-PLW-ME0521 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-66Y, 66Z, 601, 67A, 67R, 677, 68C) |
| 1072 | SV3-CCS-PLW-ME0490 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-331, 340) |
| 1073 | SV3-CDS-PHW-ME2305 | INSTALLATION OF CDS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-CDS-PLW-01AR, 01AQ,01AP) |
| 1074 | SV3-SDS-P0W-ME2418 | ANNEX BUILDING - ELEV. 100+ SDS PIPING PACKAGE #5 |
| 1075 | SV3-WWS-PHW-ME2428 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2279) |
| 1076 | SV3-CAS-P0W-ME2409 | FABRICATE AND INSTALL COMPRESSED AIR PIPING FROM UNIT 3 TURBINE BUILDING TO UNIT 3 TRANSFORMER AREA & DIESEL FUEL OIL SUMP PUMPS. |
| 1077 | SV3-SDS-P0W-ME2414 | ANNEX BUILDING - ELEV. 100+ SDS PIPING PACKAGE #1 |
| 1078 | SV3-WWS-P0W-ME2195 | FABRICATE AND INSTALL THE WASTE WATER PIPING TO THE UNIT 3 MT-10 TRANSFORMER AREA SUMP |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1079 | SV3-SDS-P0W-ME2417 | ANNEX BUILDING - ELEV. 100+ SDS PIPING PACKAGE #4 |
| 1080 | SV3-SDS-P0W-ME2415 | ANNEX BUILDING - ELEV. 100+ SDS PIPING PACKAGE #2 |
| 1081 | SV3-SDS-P0W-ME2421 | ANNEX BUILDING - ELEV. 127 + SDS PIPING PACKAGE |
| 1082 | SV3-SDS-P0W-ME2416 | ANNEX BUILDING - ELEV. 100+ SDS PIPING PACKAGE #3 |
| 1083 | SV3-DWS-PLW-ME0465 | INSTALLATION OF SMALL BORE DWS PIPING ( SV3-DWS-PLW-60D,624,625) |
| 1084 | SV3-DWS-PLW-ME0467 | DWS SML BORE PIPE INSTALLATION (SV3-DWS-PLW-62B) |
| 1085 | SV3-CCS-PLW-ME0493 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-609) |
| 1086 | SV3-HDS-PHW-ME1370 | FABRICATE AND INSTALL HEATER DRAIN SUPPORTS ON FEEDWATER HEATER DRAIN COOLER 7C |
| 1087 | SV3-PWS-PLW-ME1659 | FABRICATE AND INSTALL POTABLE WATER PIPING FROM UNIT 3 |
| 1088 | SV3-ML05-MLW-ME2410 | INSTALLATION OF CA20 FLOOR PENETRATIONS |
| 1089 | SV3-WLS-PHW-ME0767 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-364, -870 |
| 1090 | SV3-VAS-PLW-ME0573 | Installation of Large Bore VAS Piping (includes Isometrics SV3-V AS-PLW-300) |
| 1091 | SV3-CVS-PLW-ME0559 | INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRIC SV3-CVS-PLW-50D) |
| 1092 | SV0-YFS-PLW-ME1430 | REWORK POST INDICATOR VALVES |
| 1093 | SV3-WLS-PLW-ME0582 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC: SV3-WLS-PLW-170) |
| 1094 | SV3-WLS-PLW-ME0587 | INSTALLATION OF WLS LARGE BORE PIPING (INCLUDING ISOMETRICS SV3-WLS-PLW-230, 390, 460, 710) |
| 1095 | SV3-WRS-P0W-ME2493 | FABRICATION AND INSTALLATION OF LARGE BORE WRS PIPING (ISOMETRIC SV3-WRS-PLW-56A, -56B, -56H) |
| 1096 | SV3-FPS-PLW-ME4841 | FABRICATE AND INSTALL FIRE PROTECTION SYSTEM (FPS) PIPING IAW (ISOMETRIC SV3-FPS-PLW-341) |
| 1097 | SV3-WLS-PLW-ME0519 | INSTALLATION OF SMALL BORE WLS PIPING. (INCLUDES: SV3-WLS-PLW-590) |
| 1098 | SV3-CCS-PLW-ME0494 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-610, 611), ISO 610 IS INSTALLED WITH R161 MODULE |
| 1099 | SV3-CDS-PHW-ME2307 | FABRICATION AND INSTALLATION OF CDS PIPING SUPPORTS FROM HEATER DRAIN COOLERS (ME-07A/B/C) TO MAIN CONDENSERS (ME-01A/B/C). |
| 1100 | SV3-WLS-PLW-ME0581 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC: SV3-WLS-PLW-161) |
| 1101 | SV3-WLS-PLW-ME0583 | INSTALLATION OF WLS LARGE BORE PIPING (INCLUDING ISOMETRICS SV3-WLS-PLW-201, 206) |
| 1102 | SV3-WWS-PHW-ME2682 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2632) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1103 | SV3-PGS-PLW-ME0484 | INSTALLATION OF SMALL BORE PGS PIPING (INCLUDES ISOMETRICS SV3-PGS-PLW-123, -124, -129) |
| 1104 | SV3-SFS-PLW-ME0571 | INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES ISOMETRICS SV3-SFS-PLW-610, -620) |
| 1105 | SV3-TCS-PHW-ME2394 | INSTALLATION OF TCS SUPPORTS FOR PIPELINE PACKAGE SV3-TCS-PLW-ME2393 |
| 1106 | SV3-TCS-PLW-ME2393 | Installation Of TCS Piping (Includes Isometrics SV3-TCS-PLW-73L, 73X, 721, 722, 730) |
| 1107 | SV3-WRS-P0W-ME3661 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-82A, 82B, 82C, 82D, 820, 821, 822, 823) |
| 1108 | SV3-CCS-P0W-ME2456 | Installation Of Small Bore CCS Piping (Includes Isometric: SV3-CCS-PLW-124) |
| 1109 | SV3-VWS-PLW-ME0575 | INSTALLATION OF LARGE BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-387, 487) |
| 1110 | SV3-WRS-PLW-ME0594 | Installation of Large Bore WRS Piping |
| 1111 | SV3-ME01-MEW-ME0993 | Unit 3 Condenser A: Installation of Feedwater Heaters, Associated Piping and Supports |
| 1112 | SV3-WWS-P0W-ME2193 | FABRICATE AND INSTALL THE WASTE WATER PIPING TO THE UNIT 3 MT-04 DIESEL FUEL OIL AREA SUMP |
| 1113 | SV3-CCS-P0W-ME2460 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-153) |
| 1114 | SV3-TCS-PLW-ME2399 | INSTALLATION OF TCS PIPING (INCLUDES ISOMETRICS SV3-TCS-PLW-830, 831, 832, 841, 842, 843, 844) |
| 1115 | SV3-CCS-P0W-ME2777 | Installation of Large Bore CCS Piping (Includes Isometrics SV3-CCS-PLW-120, 121, 122, 123) |
| 1116 | SV3-VWS-PHW-ME0700 | FABRICATION/INSTALLATION OF LARGE BORE VWS PIPING SUPPORTS FOR ISOMETRIC DRAWINGS SV3-VWS-PLW-260, -384 |
| 1117 | SV3-TCS-PLW-ME2407 | INSTALLATION OF TCS PIPING FOR ISOMETRICS SV3-TCS-PLW-920, SV3-TCS-PLW-921, SV3-TCS-PLW-922, SV3-TCS-PLW-923, SV3-TCS-PLW-924, SV3-TCS-PLW-925, SV3-TCS-PLW-926, SV3-TCS-PLW-927. |
| 1118 | SV3-TCS-PHW-ME2396 | INSTALLATION OF TCS SUPPORTS FOR ISOMETRICS: SV3-TCS-PLW-810, SV3-TCS-PLW-811 AND SV3-TCS-PLW-812. |
| 1119 | SV3-TCS-PLW-ME2395 | INSTALLATION OF TCS PIPING FROM ISOMETRICS: SV3-TCS-PLW-810, SV3-TCS-PLW-811, SV3-TCS-PLW-812, SV3-TCS-PLW-813, SV3-TCS-PLW-814, SV3-TCS-PLW-815, SV3-TCS-PLW-816, SV3-TCS-PLW-817, AND SV3-TCS-PLW-818. |
| 1120 | SV3-WLS-PLW-ME0533 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-611, -616) |
| 1121 | SV3-PWS-PHW-ME0793 | FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWINGS SV3-PWS-PLW-91A,-911,-950,-951,-952,-953 |
| 1122 | SV3-TCS-PLW-ME2397 | INSTALLATION OF TCS PIPING FOR ISOMETRICS SV3-TCS-PLW-820, SV3-TCS-PLW-821, SV3-TCS-PLW-822, SV3-TCS-PLW-823, SV3-TCS-PLW-824, SV3-TCS-PLW-825, SV3-TCS-PLW-826. |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1123 | SV3-TCS-PLW-ME2403 | INSTALLATION OF TCS PIPING (INCLUDES ISOMETRICS SV3-TCS-PLW-870, 871, 872, 880, 881, 882, 883, 884) |
| 1124 | SV3-FPS-PHW-ME0694 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-FPS-PLW-833 |
| 1125 | SV3-FPS-PLW-ME0561 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-810, -815) |
| 1126 | SV3-VAS-PHW-ME0699 | INSTALLATION OF LARGE BORE VAS PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-VAS-PLW-300 |
| 1127 | SV3-CDS-PHW-ME2502 | INSTALLATION OF CDS SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-720, SV3-CDS-PLW-721, SV3-CDS-PLW-724 |
| 1128 | SV3-WLS-P0W-ME3525 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-050) |
| 1129 | SV3-WWS-PHW-ME3178 | ANNEX BUILDING - WWS SUPPORT ISOMETRIC 961 |
| 1130 | SV3-WWS-P0W-ME3177 | ANNEX BUILDING - WWS PIPING ISOMETRIC 961 |
| 1131 | SV3-WWS-PHW-ME2588 | INSTALL THE UNIT 3 TRANSFORMERS AREA SUMP PIPE SUPPORTS. |
| 1132 | SV3-CVS-P0W-ME3327 | ANNEX BUILDING - CHEMICAL & VOLUME CONTROL PIPING ISOMETRICS SV3-CVS-PLW-640, SV3-CVS-PLW-681, SV3-CVS-PLW-690, SV3-CVS-PLW-691, SV3-CVS-PLW-692, SV3-CVS-PLW-693. |
| 1133 | SV3-WRS-PLW-ME0592 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRICS SV3-WRS-PLW-59W, 593, 59E, 59F AND 59X) |
| 1134 | SV3-2020-CCW-CV0129 | U3 TURBINE GROUTING ACTIVITIES BELOW 100' ELEVATION |
| 1135 | SV0-PWS-PLW-ME1082 | FABRICATE AND INSTALL POTABLE WATER PIPING BETWEEN BUILDING 301 TO BUILDING 304. |
| 1136 | SV3-WRS-PLW-ME1097 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-662, -66A, -66C, -667, -66E) |
| 1137 | SV3-WLS-PLW-ME0527 | WLS SML BORE PIPE INSTALLATION (INCLUDES ISOMETRICS: SV3-WLS-PLW-90B, -904) |
| 1138 | SV3-WGS-P0W-ME0507 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-545, 546) |
| 1139 | SV3-DTS-PHW-ME3588 | FABRICATION AND INSTALLATION OF DTS PIPING SUPPORT |
| 1140 | SV3-WLS-PLW-ME0512 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-150) |
| 1141 | SV3-WLS-PLW-ME0511 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-140, SV3-WLS-PLW-14E) |
| 1142 | SV4-1200-Z0W-CV3910 | UNIT 4 AUXILIARY BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 1143 | SV3-WLS-PLW-ME0530 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDING ISOMETRICS: SV3-WLS-PLW-35A, -35C) |
| 1144 | SV3-MS08-MEW-ME3567 | INSTALLATION OF DWS CORS FEED PUMP (DWS-MP-02) |

# Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1145 | SV3-MS25-MEW-ME3555 | INSTALLATION OF CVS ZINIC INJECTION SKID (CVS-MS-01) |
| 1146 | SV3-1220-CCW-CV3386 | UNIT 3 AUXILIARY BUILDING FLOORS AREAS 3 THRU 6- CONCRETE PLACEMENT AT ELEV.82"-6" (SLAB PLACEMENT #8 THRU #15) |
| 1147 | SV3-WWS-PLW-ME0615 | INSTALLATION OF LARGE BORE WWS PIPING (INCLUDES ISOMETRICS (SV3-WWS-321, 322) |
| 1148 | SV3-ME01-MEW-ME0995 | Unit 3 Condenser B: Installation of Feedwater Heaters, Associated Piping and Supports |
| 1149 | SV3-ME01-PHW-ME1279 | CONDENSER B: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING SUPPORTS |
| 1150 | SV3-ME01-PHW-ME1280 | Unit 3 Condenser B: Fabrication of 4th Extraction Steam Piping Supports |
| 1151 | SV3-ME01-PHW-ME1281 | Unit 3 Condenser C: Fabrication of 1st Extraction Steam Piping Supports |
| 1152 | SV3-ME01-PHW-ME1283 | CONDENSER C: FABRICATION OF 3RD EXTRACTION STEAM PIPING SUPPORTS |
| 1153 | SV3-SWS-PLW-ME1356 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-032, 033, 036, 037, 038, 039, 040, 050, 067, 069) |
| 1154 | SV3-CA05-CRW-CV2259 | FABRICATION OF REBAR FOR CA05 MODULE |
| 1155 | SV3-0000-CCW-CV2127 | UNIT 3 ISOLATED PHASE BUS DUCT AND NON-SEGMENTED PHASE BUS DUCT CONCRETE FOUNDATION |
| 1156 | SV3-CB00-S8W-CV1734 | Final Installation of Modules CB65 and CB66 |
| 1157 | SV3-ME2W-MEW-ME1358 | Installation of HDS Drain Cooler CDS-ME-7A |
| 1158 | SV3-2020-MEW-ME1488 | Unit 3 Condenser A Installation (Lower & Upper Shell) |
| 1159 | SV3-2020-MEW-ME1489 | Unit 3 Condenser B Installation (Lower & Upper Shell) |
| 1160 | SV3-MS60-MEW-ME1602 | Install Auxiliary Steam Boiler (ASS-MB-01) |
| 1161 | SV3-1220-CEW-CV1604 | AUXILIARY BUILDING EMBEDS AND ANCHOR BOLTS - ELEVATION 82'-6" - AREAS 3 AND 4 |
| 1162 | SV3-1210-CEW-CV1617 | AUXILIARY BUILDING EMBEDMENTS-CYLINDRICAL WALL-EL. 66'-6" |
| 1163 | SV3-MS60-MEW-ME1651 | Installation of ASS Boiler Make-up Pump (ASS-MP-01A & 01B) |
| 1164 | SV3-WRS-PLW-ME0608 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-53D) |
| 1165 | SV3-1120-CCW-CV1816 | PLACEMENT, CURING, AND REPAIR OF CONCRETE INSIDE THE CV UP TO ELEV 76'-6" |
| 1166 | SV3-ECS-ERW-EL1843 | INSALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (ECS) MAIN AC POWER SYSTEM FROM NORTH OF DIESEL GENERATOR BLDG. TO DIESEL FUEL STORAGE TANKS - PHASE 2 |
| 1167 | SV3-WRS-P0W-ME2233 | ANNEX BUILDING - EMBEDDED WRS PIPING PACKAGE #1 |
| 1168 | SV3-WWS-P0W-ME2632 | Annex Building - Elevation 100+ WWS Piping #1 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1169 | SV3-DWS-P0W-ME3337 | FABRICATE AND INSTALL DEMINERALIZED WATER PIPING IAW SV3-DWS-PLW-130, SV3-DWS-PLW-131 |
| 1170 | SV3-DWS-P0W-ME3338 | FABRICATE AND INSTALL DEMINERALIZED WATER PIPING IAW SV3-DWS-PLW-101, SV3-DWS-PLW-150, SV3-DWS-PLW-247 |
| 1171 | SV3-2030-EGW-EL0980 | Electrical Grounding Installation for Turbine Building at Elevation 100'-9" |
| 1172 | SV3-1211-ERW-EL1619 | INSTALL DESIGN ROUTED RACEWAY AND SUPPORTS FOR DIVISION "B" BATTERY ROOM EL.66'-6" |
| 1173 | SV3-1211-ERW-EL1621 | INSTALL DESIGN ROUTED RACEWAY AND SUPPORTS FOR DIVISION "D" BATTERY ROOM EL. 66'-6" |
| 1174 | SV3-DWS-PLW-ME1711 | FABRICATE AND INSTALL DEMIN WATER PIPING FROM THE UNIT 3 ANNEX BLDG. TO THE DEMIN WATER STORAGE TANK. |
| 1175 | SV3-SWS-PLW-ME1494 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-073, 079, 07E) |
| 1176 | SV3-SWS-PLW-ME1496 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-074, 075, 076, 077, 07C, 07D) |
| 1177 | SV3-HDS-PLW-ME1365 | FABRICATE AND INSTALL HEATER DRAIN PIPING ON FEEDWATER HEATER DRAIN COOLER 7B |
| 1178 | SV3-HDS-PLW-ME1369 | FABRICATE AND INSTALL HEATER DRAIN PIPING ON FEEDWATER HEATER DRAIN COOLER 7C |
| 1179 | SV3-ME01-PHW-ME1218 | Condenser B: Vacuum Piping Supports |
| 1180 | SV3-MS13-MSW-ME1614 | Installation of CES Equipment (Ball Collector Skids, Ball Recirculation Pump Skids, Ball Distributors, & Ball Injectors) |
| 1181 | SV3-TCS-PLW-ME1059 | UNIT 3 TURBINE BUILDING EL. 82FT.-9IN. INSTALLATION OF TCS PIPING, VALVES, AND THERMOWELLS |
| 1182 | SV3-TCS-PHW-ME1061 | Unit 3 Turbine Building EL.82'-9" Installation of TCS Piping Supports |
| 1183 | SV3-FPS-PLW-ME0563 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-820, -825, -830) |
| 1184 | SV3-ME01-PHW-ME1217 | Condenser A: Vacuum Piping Supports |
| 1185 | SV3-WWS-PLW-ME0614 | INSTALLATION OF LARGE BORE WWS PIPING (INCLUDES ISOMETRICS SV3-WWS-PLW-01B, -01D, -014) |
| 1186 | SV3-WWS-PLW-ME0613 | INSTALLATION OF LARGE BORE WWS PIPING |
| 1187 | SV3-ASS-PHW-ME1429 | FABRICATE/INSTALL AUXILIARY STEAM SYSTEM (ASS) SUPPORTS (PORTION 2) FOR ISOMETRIC# SV3-ASS-PLW-028, 02K, 2J, & 02A |
| 1188 | SV3-WLS-PLW-ME0517 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-376, SV3-WLS-PLW-380) |
| 1189 | SV3-WLS-PLW-ME0516 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES:SV3-WLS-PLW-370 & SV3-WLS-PLW-375) |
| 1190 | SV3-ME01-PHW-ME1451 | Unit 3 Condenser C: Fabrication & Installation of Casing Drain Piping Supports |
| 1191 | SV3-2030-CCW-CV1464 | Unit 3 Turbine Building West Stair Foundations |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1192 | SV3-DTS-PLW-ME1511 | Fabricate and Install Demineralized Water Treatment System (DTS) piping portion 1-(Raw Water Supply to DTS-MS-01) |
| 1193 | SV3-1220-CCW-CV1487 | MISCELLANEOUS WALLS UP TO ELEV. 82'-6" |
| 1194 | SV3-ASS-PHW-ME1521 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 3) FOR ISOMETRIC# SV3-ASS-PLW-02X, 02G, 02M, & 02F |
| 1195 | SV3-HDS-PLW-ME1361 | FABRICATE AND INSTALL HEATER DRAIN PIPING ON FEEDWATER HEATER DRAIN COOLER 7A |
| 1196 | SV3-ME01-PHW-ME1449 | Unit 3 Condenser A: Fabrication & Installation of Casing Drain Piping Supports |
| 1197 | SV3-KB13-KBW-ME0422 | KB13 Sump (WRS-MT-01) Installation - Portion 2 Only |
| 1198 | SV3-MS60-MEW-ME1643 | Installation of ASS Boiler Blowdown Flash Tank (ASS-MT-01) |
| 1199 | SV3-WRS-PLW-ME0599 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-57M AND 57N) |
| 1200 | SV3-WSS-PLW-ME0488 | FABRICATION/INSTALLATION OF SMALL BORE WSS PIPING (INCLUDES ISOMETRIC SV3-PLW-WSS-650) |
| 1201 | SV4-2101-CRW-CV5804 | UNIT 4, TURBINE BUILDING, FIRST BAY WALL FORMSAVERS AT 117'6" ELEVATION |
| 1202 | SV3-MS21-MSW-ME3153 | INSTALLATION OF SAMPLE RECOVERY TANK SKID, SSS-MS-05 |
| 1203 | SV3-SFS-P0W-ME4349 | INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES SV3-SFS-PLW-150) |
| 1204 | SV3-CWS-PHW-ME2534 | INSTALLATION OF CWS SUPPORTS FOR ISO'S SV3-CWS-PLW-72J, SV3-CWS-PLW-73J, SV3-CWS-PLW-735, SV3-CWS-PLW-736 |
| 1205 | SV3-CWS-PLW-ME2533 | INSTALLATION OF CWS PIPING FOR ISO'S SV3-CWS-PLW-72J, SV3-CWS-PLW-73J, SV3-CWS-PLW-735, & SV3-CWS-PLW-736 |
| 1206 | SV3-1210-ERW-EL1071 | U3-AUX BLDG EL 66'-6"-CONDUIT SLEEVE WORK PACKAGE FOR WALL 20A |
| 1207 | SV3-1225-EYW-EL1755 | INSTALL CONDUIT SLEEVES FOR PENETRATION (12271-ML-E01 & 12271-ML-E02), UNIT 3 AUXILIARY BUILDING, ELEVATION 82'-6", AREA 5... |
| 1208 | SV3-1210-EGW-EL1720 | U3 GROUNDING SHIELD BUILDING WALLS EL 66'-6" TO 82'-6" |
| 1209 | SV3-1212-ERW-EL1620 | INSTALL DESIGN ROUTED RACEWAY AND SUPPORTS FOR DIVISION "C" BATTERY ROOM EL. 66'6" |
| 1210 | SV3-FPS-PLW-ME4902 | FABRICATE AND INSTALL ANNEX FIRE PROCTECTION SYSTEM( FPS) PIPING IAW (ISOMETRICS SV3-FPS-PLW-292,293) |
| 1211 | SV3-ML05-MLW-ME5928 | INSTALLATION OF CA35 PENETRATIONS |
| 1212 | SV4-CA01-S4W-CV8688 | CA01-10 TEMPORARY ATTACHMENT INSTALLATIONS |
| 1213 | SV3-WWS-CCW-CV6128 | WASTE WATER RETENTION BASIN WALL CONCRETE |
| 1214 | SV3-WWS-CRW-CV6129 | WASTE WATER RETENTION BASIN WALL REINFORCEMENT |
| 1215 | SV4-CA01-S4W-CV8720 | CA01-43 TEMPORARY ATTACHMENT INSTALLATIONS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1216 | SV4-CA01-S4W-CV8719 | CA01-42 TEMPORARY ATTACHMENT INSTALLATIONS |
| 1217 | SV3-4030-CCW-CV5232 | UNIT 3 ANNEX BUILDING MISCELLANEOUS GROUTING AT ELEVATION 100'-0" |
| 1218 | SV3-FPS-PHW-ME4842 | INSTALLATION OF ANNEX BLDG FPS PIPE SUPPORTS (ISOMETRICS SV3-FPS-PLW-341) |
| 1219 | SV3-DWS-PHW-ME6990 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-PWS-PLW-203, 204, 237, 238) |
| 1220 | SV3-1120-SSW-CV1594 | CONTAINMENT STRUCTURAL STEEL AT ELEVATION 84'-6" |
| 1221 | SV3-FWS-P0W-ME3706 | INSTALLATION OF NON-EMBEDDED FWS DRAIN PIPING |
| 1222 | SV0-YFS-THW-ME3152 | FLUSH AND HYDRO TEST THE YARD FIRE SYSTEM (YFS) AT THE 300 BUILDINGS |
| 1223 | SV3-FWS-PHW-ME3707 | INSTALLATION OF NON-EMBEDDED FWS PIPE SUPPORTS |
| 1224 | SV3-CWS-PHW-ME2530 | INSTALLATION OF CWS PIPING SUPPORTS |
| 1225 | SV3-CCS-PLW-ME0497 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-523) |
| 1226 | SV3-WRS-PHW-ME0779 | INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R0020, 12R0021 |
| 1227 | SV3-PWS-PHW-ME0792 | INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS (INCLUDES ISOMETRIC SV3-PWS-PLW-307) |
| 1228 | SV3-FPS-PLW-ME0562 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-832, -833) |
| 1229 | SV3-VAS-PLW-ME0572 | INSTALLATION OF LARGE BORE VAS PIPING (INCLUDES ISOMETRICS SV3-VAS-PLW-310, -330) |
| 1230 | SV3-PWS-PLW-ME0480 | PWS SML BORE PIPE INSTALLATION (INCLUDES ISOMETRICS SV3-PWS-PLW-921, -924) |
| 1231 | SV3-WRS-PHW-ME0780 | INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R0024, 12R0064 |
| 1232 | SV3-WRS-PLW-ME0591 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-55D) |
| 1233 | SV3-RNS-PLW-ME0569 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-09B) |
| 1234 | SV3-KQ11-KQW-ME0567 | INSTALL MECHANICAL EQUIPMENT MODULE KQ11 (MP-02A, MP-02B)-PORTION 2 |
| 1235 | SV3-WRS-PHW-ME0778 | INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R0004, 12R0802, 12R0809 |
| 1236 | SV3-WLS-PLW-ME0536 | Installation of Large Bore FPS Piping (Includes Isometrics SV3-WLS-PLW-33D) |
| 1237 | SV3-PWS-PHW-ME0795 | INSTALLATION OF SMALL BORE PWS PIPE SUPPORTS FOR ISOMETRIC SV3-PWS-PLW-923 |
| 1238 | SV3-PWS-PLW-ME0478 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-307) |
| 1239 | SV3-FPS-PLW-ME0564 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-720, -723, -724, -725) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1240 | SV3-RNS-PLW-ME0565 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-09A) |
| 1241 | SV3-CCS-PLW-ME0491 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-522, 540) |
| 1242 | SV3-WLS-PLW-ME0532 | INSTALLATION OF WLS SMALL BORE PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-480, -482, -484) |
| 1243 | SV3-WLS-PLW-ME0529 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-355, -357, -359, -35M) |
| 1244 | SV3-CAS-PLW-ME0460 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES ISOMETRICS: SV3-CAS-PLW-501, & 504) |
| 1245 | SV3-CCS-PLW-ME0489 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-302) |
| 1246 | SV3-PWS-PHW-ME0794 | FABRICATION/INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC DRAWING SV3-PWS-PLW-924 |
| 1247 | SV3-SFS-PHW-ME0809 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-SFS-PLW-653, 655 |
| 1248 | SV3-WRS-PLW-ME0609 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-66D, -666, -66B) |
| 1249 | SV3-WRS-PHW-ME0777 | INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R4030 |
| 1250 | SV3-WLS-PLW-ME0579 | Installation of Large Bore FPS Piping (Includes Isometrics: SV3-WRS-PLW-870, -364) |
| 1251 | SV3-DWS-PLW-ME0466 | DWS SML BORE PIPE INSTALLATION (SV3-DWS-PLW-626,627) |
| 1252 | SV3-WGS-P0W-ME0509 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-544) |
| 1253 | SV3-WRS-PLW-ME0590 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-55C) |
| 1254 | SV3-PSS-PLW-ME0482 | INSTALLATION OF SMALL BORE PSS PIPING (INCLUDING ISOMETRICS SV3-PSS-PLW-700 AND 701) |
| 1255 | SV3-PWS-PLW-ME0476 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDING ISOMETRIC SV3-PWS-PLW-060) |
| 1256 | SV3-WRS-PHW-ME0676 | INSTALLATION OF LARGE BORE WRS PIPE SUPPORT (INCLUDING DRAWING WRS-PH-12A0084) |
| 1257 | SV3-WLS-PLW-ME0522 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-664, 67M, 67Z, 67Y, 67J, 671) |
| 1258 | SV3-CCS-PHW-ME0806 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-521 |
| 1259 | SV3-WRS-PHW-ME0776 | INSTALLATION OF LARGE BORE WRS PIPING SUPPORTS: SV3-WRS-PH-12R0045 |
| 1260 | SV3-PGS-PLW-ME0483 | INSTALLATION OF SMALL BORE PGS PIPING (INCLUDES ISOMETRICS SV3-PGS-PLW-100, -105, -128) |
| 1261 | SV3-WWS-PLW-ME0611 | INSTALLATION OF LARGE BORE WWS PIPING INCLUDING ISOMETRICS SV3-WWS-PLW-31B, 31F |
| 1262 | SV3-VWS-PLW-ME0576 | INSTALLATION OF LARGE BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-384, 389, 260) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1263 | SV3-PWS-PLW-ME0479 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-91A, 911, 950, 951, 953) |
| 1264 | SV3-ME01-PLW-ME1009 | Unit 3 Condenser B: Installation of Upper Shell Nozzles |
| 1265 | SV3-ME01-MEW-ME0997 | Unit 3 Condenser C: Installation of Feedwater Heaters |
| 1266 | SV3-VWS-PLW-ME0577 | INSTALLATION OF LARGE BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-270, 484, 489) |
| 1267 | SV3-WLS-PLW-ME0515 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-265, SV3-WLS-PLW-275) |
| 1268 | SV3-WLS-PLW-ME0937 | Fabricate and Install Small Bore Elevation WLS Piping ISO SV3-WLS-PLW-042, 45, 46, and 4B |
| 1269 | SV3-CCS-PHW-ME0804 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-611 |
| 1270 | SV3-WLS-PLW-ME0518 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES: SV3-WLS-PLW-490) |
| 1271 | SV3-WRS-PLW-ME0605 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-577, -57C) |
| 1272 | SV3-WRS-PLW-ME0593 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-59K, 59N, 59U, 59J, AND 59Q) |
| 1273 | SV3-PWS-PLW-ME0481 | INSTALLATION OF SMALL BORE PWS PIPING (INCLUDES ISOMETRIC SV3-PWS-PLW-923) |
| 1274 | SV3-ME01-PLW-ME1448 | UNIT 3 CONDENSER C: FABRICATION & INSTALLATION OF CASING DRAIN PIPING |
| 1275 | SV3-ME01-PLW-ME1447 | UNIT 3 CONDENSER B: FABRICATION & INSTALLATION OF CASING DRAIN PIPING |
| 1276 | SV3-ME01-PLW-ME1168 | CONDENSER C-2ND EXTRACTION PIPING (EXTRACTION STEAM) |
| 1277 | SV3-WWS-PHW-ME1376 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-014) |
| 1278 | SV3-RNS-PLW-ME1373 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-090) |
| 1279 | SV3-WRS-PLW-ME1183 | WRS PIPING INSTALLATION (INCLUDES ISOMETRICS SV3-WRS-PLW-544, SPOOL 2) |
| 1280 | SV3-ME01-PHW-ME1537 | UNIT 3 CONDENSER B: INSTALLATION OF WATER CURTAIN SPRAY PIPING SUPPORTS |
| 1281 | SV3-ME01-PHW-ME1538 | UNIT 3 CONDENSER C: INSTALLATION OF WATER CURTAIN SPRAY PIPING SUPPORTS |
| 1282 | SV3-HDS-PLW-ME1367 | FABRICATE/INSTALL OF HEATER DRAIN SMALL BORE PIPING ON FEEDWATER HEATER DRAIN COOLER 7B |
| 1283 | SV3-WLS-THW-ME1469 | ASME SECTION III - HYDROSTATIC TEST PACKAGE FOR ISOMETRIC# SV3-WLS-PLW-731 LINE# WLS-PL-L062, -113B BETWEEN WLS-PL-V071B AND WLS-PL-V072B |
| 1284 | SV3-WRS-PLW-ME0595 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-59A) |
| 1285 | SV3-KB10-KBW-ME0421 | KB10 SUMP (WWS-MT-06) INSTALLATION - PORTION 2 ONLY |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1286 | SV4-FPS-P0W-ME7089 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS: SV4-FPS-PLW-811, 812, 831) |
| 1287 | SV3-SFS-PLW-ME0570 | INSTALLATION OF KB12 SFS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SFS-PLW-460, -480) |
| 1288 | SV3-VWS-P0W-ME7195 | INSTALLATION OF ANNEX BLDG VWS PIPING (ISOMETRICS SV3-VWS-PLW-201, -203, -211, & -213) |
| 1289 | SV3-CWS-PHW-ME2506 | INSTALLATION OF PIPE SUPPORTS ON ISO SV3-CWS-PLW-737 |
| 1290 | SV3-CA20-Z0W-CV3913 | UNIT 3 CA20 CONCRETE REQUIREMENTS |
| 1291 | SV3-VWS-P0W-ME7197 | INSTALLATION OF ANNEX BLDG VWS PIPING (ISOMETRICS SV3-VWS-PLW-221, -223, -231, & -233) |
| 1292 | SV4-WGS-THW-ME7481 | HYDRO TESTING OF KB14 WGS PIPING |
| 1293 | SV4-VWS-P0W-ME7482 | INSTALLATION OF KB14 VWS PIPING |
| 1294 | SV4-VWS-PHW-ME7483 | INSTALLATION OF KB14 VWS PIPE SUPPORTS |
| 1295 | SV4-VWS-THW-ME7484 | HYDRO TESTING OF KB14 VWS PIPING |
| 1296 | SV4-WLS-THW-ME7490 | HYDRO TESTING OF KB16 WLS PIPING |
| 1297 | SV4-WGS-THW-ME7493 | HYDRO TESTING OF KB16 WGS PIPING |
| 1298 | SV4-VWS-THW-ME7496 | HYDRO TESTING OF KB16 VWS PIPING |
| 1299 | SV4-DWS-THW-ME7499 | HYDRO TESTING OF KB16 DWS PIPING |
| 1300 | SV4-MP07-MPW-ME7111 | INSTALLATION OF THE FWS STARTUP PUMPS (FWS-MP-03A, FWS-MP-03B) |
| 1301 | SV3-DWS-P0W-ME7193 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRICS SV3-DWS-PLW-210, -220) |
| 1302 | SV3-WRS-P0W-ME3662 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-82E, 82F, 82G, 82K, 825, 826, 827, 828) |
| 1303 | SV3-SFS-PLW-ME0499 | INSTALLATION OF SMALL BORE SFS PIPING (INCLUDES SV3-SFS-PLW-653, 655) |
| 1304 | SV3-CA01-S5W-CV4287 | SUB-MODULES CA01-16 & CA01-34 CLOSEOUT WORK |
| 1305 | SV3-ES03-ESW-EL7414 | MOUNTING OF THE UNIT 3 TURBINE BUILDING MAIN GENERATOR CIRCUIT BREAKERS |
| 1306 | SV4-WRS-P0W-ME5363 | FABRICATION/INSTALLATIN OF SMALL BORE WRS LEAK CHASE PIPING INCLUDING SV4-WRS-PLW-81F, 82A, 82B, 82C, 820, 821, 822, 823 |
| 1307 | SV4-2000-Z0W-CT7540 | U4 TURBINE BUILDING COATING REQUIREMENTS |
| 1308 | SV3-VWS-P0W-ME7201 | INSTALLATION OF ANNEX BLDG VWS PIPING (ISOMETRICS SV3-VWS-PLW-140, -141, -150, & -151) |
| 1309 | SV3-CCS-P0W-ME7199 | INSTALLATION OF ANNEX BLDG CCS PIPING (ISOMETRICS SV3-CCS-PLW-830, -840) |
| 1310 | SV3-CA01-S4W-CV3345 | CA01-24 OVERLAY PLATES AND ATTACHMENTS |
| 1311 | SV3-CA01-S4W-CV3233 | CA01-02 OVERLAY PLATES AND ATTACHMENTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1312 | SV3-CA01-S4W-CV3382 | CA01-23 OVERLAY PLATES AND ATTACHMENTS |
| 1313 | SV3-CA01-S4W-CV4085 | CA01-21 OLP AND PERM WELD ATTACHMENTS |
| 1314 | SV3-CA01-S4W-CV4084 | CA01-20 OLP AND PERMANMENT WELDED ATTACHMENTS |
| 1315 | SV3-CA01-S4W-CV4086 | INSTALL CA01-32 PERMANENT WELDED ATTACHMENTS |
| 1316 | SV3-1130-EGW-EL7575 | GROUNDING OF CONTAINMENT AND SHIELD WALL 100'-135' |
| 1317 | SV3-G100-XBW-CV7687 | INSTALLATION OF HDPE WATER BARRIER U3 (REMAINING INSTALLATION) |
| 1318 | SV3-0000-CCW-CV7737 | Unit 3 Fire Water Storage Tank |
| 1319 | SV4-0000-CCW-CV7738 | Unit 4 Fire Water Storage Tank |
| 1320 | SV3-4033-CCW-CV7518 | ANNEX BUILDING AREA 3 TOWER FOUNDATION |
| 1321 | SV3-FWS-THW-ME1390 | UNIT 3 TURBINE BUILDING EL 100'-0" HYDROSTATIC TESTING OF EMBEDDED FWS PIPING |
| 1322 | SV3-ME01-PHW-ME1276 | UNIT 3 CONDENSER A: FABRICATION & INSTALLATION OF 4TH EXTRACTION PIPING SUPPORTS |
| 1323 | SV3-ME01-PHW-ME1275 | CONDENSER A: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING SUPPORTS |
| 1324 | SV3-ME01-PLW-ME0999 | UNIT 3 CONDENSER C: INSTALLATION OF HEATER 3A, 3B, 4A & 4B SHELL VENT PIPING |
| 1325 | SV3-WWS-PLW-ME0910 | UNIT 3 TURBINE BUILDING EL 100FT.-0IN. BAY 1 WWS EMBEDDED PIPING PACKAGE # 1 |
| 1326 | SV3-WRS-PLW-ME0602 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRICS SV3-WRS-PLW-57B, 575, AND 57E) |
| 1327 | SV3-SFS-PHW-ME4491 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-SFS-PLW-150 |
| 1328 | SV0-0000-P0W-ME8898 | INSTALLATION OF CONSTRUCTION AID MUD MAT |
| 1329 | SV4-2040-CEW-CV8875 | UNIT 4, TURBINE BUILDING, 120' ELEVATED SLAB #5, ELEC/MECH PENETRATION SLEEVES |
| 1330 | SV4-2040-CEW-CV8876 | UNIT 4, TURBINE BUILDING, 120' ELEVATED DECK, SLEEVES - POUR #6 |
| 1331 | SV3-4041-SAW-EL8773 | INSTALL SUPPLEMENTAL STEEL FOR ELECTRICAL HANGERS COL LN F9/F11.09 TO E9/E11.09 |
| 1332 | SV3-MP1J-MEW-ME3694 | INSTALLATION OF CCS PUMPS (CCS-MP-01A, CCS-MP-01B) |
| 1333 | SV3-MSS-P0W-ME4649 | INSTALLATION OF MSS PIPING |
| 1334 | SV4-FPS-P0W-ME7378 | FABRICATE AND INSTALL THE UNIT 4 FIRE PROTECTION SYSTEM (FPS) ON ISOMETRICS (SV3-FPS-PLW-967, 968, 96AN, 96AR, 96AS, 96AT) |
| 1335 | SV4-CA20-S4W-CV6834 | CA20-36 Temporary Attachments FLOORS |
| 1336 | SV3-WLS-PHW-ME3865 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRICS SV3-WLS-PLW-202, -203 |
| 1337 | SV3-WLS-P0W-ME3500 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-299, 300) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1338 | SV3-WLS-P0W-ME3814 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-202, -203, -205) |
| 1339 | SV4-2040-CEW-CV8874 | UNIT 4, TURBINE BUILDING, 120' ELEVATED DECK, SLEEVES - POUR #4 |
| 1340 | SV3-KQ11-KQW-KQ8908 | UNIT 3 OFF-SITE FABRICATION OF KQ11 SUMP COVER |
| 1341 | SV3-0150-ERW-EL7457 | CABLE TRAY SUPPORT FOR AUX TRANSFORMER 2C |
| 1342 | SV3-ML05-MLW-ME5930 | INSTALLATION OF CA35 PENETRATIONS |
| 1343 | SV3-PWS-PHW-ME4949 | INSTALLATION OF ANNEX PORTABLE WATER SYSTEM (PWS) PIPING SUPPORTS FOR WP (SV3-PWS-P0W-ME4948) |
| 1344 | SV3-PXS-MTW-ME2935 | ASME SECTION III - INSTALL PXS ACCUMULATOR TANK SV3-PXS-MT-01B |
| 1345 | SV4-MP1J-MPW-ME7424 | INSTALLATION OF CCS PUMPS (CCS-MP-01A-CCS-MP-01B) |
| 1346 | SV4-CA20-ERW-EL6717 | INSTALL ELECTRICAL WALL PENETRATIONS IN U4 CA20 MODULE SUB-ASSEMBLY 4 |
| 1347 | SV4-CA20-ERW-EL6716 | INSTALL ELECTRICAL WALL PENETRATIONS IN U4 CA20 MODULE SUB-ASSEMBLY 3 |
| 1348 | SV3-CA20-EGW-EL8857 | INSTALL GROUNDING TO MISCELLANEOUS ITEMS SUCH AS STAIRS, LADDERS OR GRATING FOR SV#3 MODULE CA20, 66'-6" - 117'-6" AREAS 5&6 |
| 1349 | SV4-CA20-ERW-EL6715 | INSTALL ELECTRICAL WALL PENETRATIONS IN U4 CA20 MODULE SUB-ASSEMBLY 2 |
| 1350 | SV4-KB16-KBW-ME6709 | INSTALLATION OF THE KB16 MODULE |
| 1351 | SV4-CA01-S4W-CV8687 | CA01-09 TEMPORARY ATTACHMENT PLATE IDs |
| 1352 | SV4-WLS-P0W-ME6169 | UNIT 4 - PHASE 12 - LIQUID RADWASTE PIPING, WLS S/S CORE PIPING |
| 1353 | SV3-WLS-THW-ME6212 | HYDRO TEST THE UNIT 3 LIQUID RADWASTE SYSTEM PIPING PHASE 12 |
| 1354 | SV4-WLS-THW-ME6215 | HYDRO TEST THE UNIT 4 LIQUID RADWASTE SYSTEM PIPING PHASE 12 |
| 1355 | SV4-WLS-THW-ME6214 | HYDRO TEST THE UNIT 4 LIQUID RADWASTE SYSTEM PIPING PHASE 10 |
| 1356 | SV3-WLS-THW-ME6211 | HYDRO TEST THE UNIT 3 LIQUID RADWASTE SYSTEM PIPING PHASE 10 |
| 1357 | SV4-1232-ERW-EL7206 | INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 4 AUX BUILDING FLOOR SLABS, EL 100'-0"AREA 2 RMS. 12312 & 12313 |
| 1358 | SV3-RWS-EWW-EL15129 | UNIT 3 CABLE PULL BETWEEN MANHOLES NWM013 AND NWM016 |
| 1359 | SV3-RWS-EWW-EL15128 | UNIT 3 RWS CABLE PULL BETWEEN MANHOLES NWM010 AND NWM013 |
| 1360 | SV3-RWS-EWW-EL15127 | UNIT 3 RWS CABLE PULL BETWEEN MANHOLES NWM008 AND NWM010 |
| 1361 | SV3-4000-CRW-CV8776 | UNIT 3 ANNEX REINFORCEMENT FIELD FABRICATION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |

| 1692 | SV4-CA01-S4W-CV8713 | CA01-36 Temporary Attachments |
| 1693 | SV4-CA01-S4W-CV8723 | CA01-46 Temporary Attachment PLATE ID |
| 1694 | SV3-4042-ERW-860256 | INSTALLATION OF CONDUIT SLEEVES FOR RACEWAY PENETRATIONS, ANNEX BUILDING, AREA 2, ELEV. 117'-6". |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1695 | SV3-2047-SHW-860204 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, BELOW EL 140'-6" AREA 7 FROM COLUMNS 18 TO 20 & I2 TO K.1 |
| 1696 | SV3-2049-SHW-860205 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, BELOW EL 140'-6" AREA 9 FROM COLUMNS 18 TO 20 & I2 TO H.05 |
| 1697 | SV3-ECS-ESW-EL7178 | INSTALL TURBINE BLDG ECS EQUIPMENT, MV SWITCHGEAR ECS-ES-5, ROOM 20502 EKEV 141'-3" |
| 1698 | SV3-ECS-ESW-EL7175 | INSTALL TURBINE BLDG ECS EQUIPMENT, MV SWITCHGEAR ECS-ES-56, ROOM 20501 EKEV 141'-3" |
| 1699 | SV4-ML05-MLW-ME7938 | INSTALL CA01 ASME PROCESS PIPE PENETRATION SV4-11502-ML-P02 |
| 1700 | SV4-ML05-MLW-ME7956 | INSTALL CA01 PENETRATIONS SV4-11303-ML-P07, SV4-11503-ML-P01, & SV4-11503-ML-P03 |
| 1701 | SV4-ML05-MLW-ME7957 | INSTALL CA01 PENETRATIONS SV4-11303-ML-P01, SV4-11303-ML-P02, & SV4-11303-ML-P03 |
| 1702 | SV4-ML05-MLW-ME7976 | INSTALL PENETRATIONS SV4-11403-P02, SV4-11403-ML-P03, AND SV4-11403-ML-I01 |
| 1703 | SV4-ML05-MLW-ME7981 | INSTALL SV4 CA01 PENETRATION SV4-11402-ML-P02 |
| 1704 | SV3-CA20-S4W-850001 | CA20 CASK LOADING PIT LEAK CHASE & LINER PLATE INSTALLATION |
| 1705 | SV3-CA20-S4W-850003 | CA20-SPENT FUEL POOL LEAK CHASE & LINER PLATE INSTALLATION |
| 1706 | SV4-MS30-MSW-ME7103 | INSTALLATION OF THE ANTISCALANT SKID (MS-05C), CHLORINE CONTROL SKID (MS06) AND CAUSTIC SKIS (MS-02D) |
| 1707 | SV3-EDS-DBW-EL3127 | INSTALL ANNEX BLDG EDS1-DB1 BATTERY RACKS, ROOM 40307 |
| 1708 | SV3-PLS-JDW-EL7556 | INSTALL TURBINE BLDG PLS AND ASSOCIATED DDS & SMS - "JD" EQUIPMENT IN ROOM 20308 ELEV 100'0" |
| 1709 | SV3-PLS-JDW-EL7173 | INSTALL TURBINE BLDG. PLS EQUIPMENT ROOM 20503 ELEV 141'3" |
| 1710 | SV3-CA20-S4W-850002 | CA20 CASK WASHDOWN PIT LEAK CHASE & LINER PLATE |
| 1711 | SV3-CA20-S4W-850004 | CA20 FUEL TRANSFER CANAL LEAK CHASE & LINER PLATE |
| 1712 | SV3-ECS-ESW-EL7179 | INSTALL TURBINE BLDG ECS EQUIPMENT, MV SWITCHGEAR ECS-ES-3, ROOM 20502, ELEV 141'3" |
| 1713 | SV3-EDS-DBW-EL3128 | INSTALL ANNEX BLDG EDS3-DB1 BATTERY RACKS, ROOM 40307 |
| 1714 | SV0-DFS-ERW-EL2424 | DFS DUCTBANK NORTH OF TRANSFORMER AREA (PHASE 2) |
| 1715 | SV3-1230-SSW-CV4312 | AUX BLD STRUCTURAAL STEEL 82'6" TO 100'-0" AREA 3 AND 4 |
| 1716 | SV3-1230-CCW-CV2443 | AUX BUILDING BATTERY RACK WALLS (32, 33, 34, 36 & 37) UP TO EL 100'-0" |
| 1717 | SV3-PXS-PHW-ME3785 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02D |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1718 | SV3-1230-SSW-CV4313 | AUX BLD STRUCTURAL STEEL 82'-6" TO 100'-0" AREA 5 AND 6 |
| 1719 | SV4-4000-SSW-850000 | BOLT QUALIFICATION |
| 1720 | SV4-MY45-MYW-ME6721 | INSTALLATION OF TURBINE DECK SPRINGS/DAMPERS |
| 1721 | SV3-2037-SHW-860239 | ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100', AREA 7 ROOM 20300 (TRAPEZE) |
| 1722 | SV4-1000-C0W-850000 | CONCRETE UNDER CONTAINMENT VESSEL, 8Bx |
| 1723 | SV3-CCS-P0W-ME3441 | FABRICATE AND INSTALL LARGE BORE CCS PIPING (INCLUDING ISOMETRIC SV3-CCS-PLW-330 AND SV3-CCS-PLW-690) |
| 1724 | SV3-WLS-P0W-ME3802 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-261, 271, 281) |
| 1725 | SV3-WLS-P0W-ME3818 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-284) |
| 1726 | SV3-2060-C0W-850011 | UNIT 3, TURBINE BUILDING, 183'-1-1/2" ELEVATED SLAB |
| 1727 | SV3-2141-C0W-850002 | 1ST BAY, 117' ELEV, FLOOR SLAB, POUR #2 |
| 1728 | SV3-2141-C0W-850004 | 117'-6" ELEV, FLOOR SLAB POUR #4 |
| 1729 | SV4-2141-C0W-850004 | 1ST BAY, 117'-6" ELEV, FLOOR SLAB POUR #4 |
| 1730 | SV3-ML05-MLW-ME4961 | INSTALLATION OF CA01 PENETRATIONS |
| 1731 | SV3-CCS-P0W-ME3439 | FABRICATE AND INSTALL LARGE BORE CCS PIPING (INCLUDING ISOMETRIC SV3-CCS-PLW-300 AND SV3-CCS-PLW-670) |
| 1732 | SV3-1233-ERW-EL6069 | U3 AUXILIARY BUILDING: INSTALL WALL PENETRATIONS FOR INTERIOR AND EXTERIOR WALLS ELEVATION 100'-0" - 117'-6" AREAS 3 & 4 |
| 1733 | SV3-WGS-PHW-ME3859 | FABRICATION/INSTALLATION OF SMALL BORE WGS PIPE SUPPORTS FOR ISOMETRICS SV3-WGS-PLW-420, -422 |
| 1734 | SV4-WWS-P0W-860277 | INSTALLATION OF WASTE WATER SYSTEM (WWS) DRAINS/PIPING FOR 140' SLAB 5 |
| 1735 | SV4-WWS-P0W-860278 | INSTALLATION OF WASTE WATER SYSTEM (WWS) DRAINS/PIPING FOR 140' SLAB 6 |
| 1736 | SV3-ECS-ESW-EL7181 | INSTALL TURBINE BLDG ECS EQUIPMENT, LOCAL SWITCHGEAR CONTROL PANELS ECS-EP-003, 004, 005, 006 ROOMS 20501 & 20502 ELEV 141'3 |
| 1737 | SV4-1220-CCW-CV4192 | UNIT 4 NUCLEAR ISLAND AUX BUILDING CONCRETE PLACEMENT FOR SLABS AT ELEVATION 82'-6" - AREAS 1 - 6 (SLAB PLACEMENTS 1- 15) |
| 1738 | SV4-CA20-S5W-CV5320 | CA20 GUIDE PIN MOUNTING PLATE AND ALIGNMENT/GUIDE PIN COLLAR INSTALLATION |
| 1739 | SV3-4000-ERW-EL7439 | FABRICATE AND INSTALL TYPCIAL SUPPORTS TUYPE C14 FOR FIELD ROUTED CONDUIT IN THE ANNEX BUILDING |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1740 | SV3-4000-ERW-EL7441 | FABRICATE AND INSTALL TYPICAL SUPPORTS TUYPE C17 FOR FIELD ROUTED CONDUIT IN THE ANNEX BUILDING |
| 1741 | SV3-4000-ERW-EL7440 | FABRICATE AND INSTALL TYPICAL SUPPORTS TUYPE C15 FOR FIELD ROUTED CONDUIT IN THE ANNEX BUILDING |
| 1742 | SV3-4000-ERW-EL7442 | FABRICATE AND INSTALL TYPICAL SUPPORTS TYPE C18 FOR FIELD ROUTED CONDUIT IN THE ANNEX BUILDING |
| 1743 | SV4-2141-C0W-850001 | UNIT 4 TURBINE BUILDING FIRST BAY 117'-6" FLOOR SLAB REINFORCING STEEL |
| 1744 | SV3-RWS-ERW-EL0864 | Installation of Electrical Underground Commodities (Manholes & Duct Banks) for the (RWS) Raw Water System to the River Intake Structure |
| 1745 | SV0-SDS-P0W-ME1195 | SDS LINES FROM BLDG #306 TO GRINDER PUMP MS-504 AND LIFT STATION MS-503 |
| 1746 | SV0-SDS-MPW-ME1205 | GRINDER PUMP MS-504 |
| 1747 | SV4-WWS-P0W-860276 | INSTALLATION OF WASTE WATER SYSTEM (WWS) DRAINS/PIPING FOR 140' SLAB1 |
| 1748 | SV3-4000-ERW-EL7438 | FABRICATE & INSTALL TYPICAL SUPPORTS TYPE C13 FOR FIELD ROUTED CONDUIT IN THE ANNEX BUILDING |
| 1749 | SV3-CWS-ERW-EL0315 | Install Electrical Manholes and Electrical Duct Banks for CWS |
| 1750 | SV3-4032-SHW-EL4041 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40303 |
| 1751 | SV3-4032-SHW-EL4040 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40303 & 40351 |
| 1752 | SV3-4032-SHW-EL4042 | INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 2, ROOM 40327 |
| 1753 | SV3-C0S7-CCW-CV0340 | Electrical Duct bank for Unit 3 CWS |
| 1754 | SV3-2060-C0W-850009 | 196'-3" ELEV FLOOR SLAB POUR # 8C |
| 1755 | SV3-2060-C0W-850008 | 196¿-3" ELEV. FLOOR SLAB, POUR # 8B |
| 1756 | SV0-0000-XEW-CV0346 | Temporary Turbine Bldg Construction Support |
| 1757 | SV4-4030-EGW-EL5436 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS GROUNDING) FOR THE ANNEX BLDG AREA 2 BETWEEN COLUMNS 4.1 & 9 |
| 1758 | SV3-FWS-P0W-ME3809 | FABRICATION AND INSTALLATION OF FWS PIPING |
| 1759 | SV3-MSS-PHW-ME4648 | MSS PIPE SUPPORTS FOR PIPE PACKAGE SV3-MSS-P0W-ME4647 |
| 1760 | SV4-CA01-S4W-CV6491 | CA01 ELEV 87.5 & BELOW OLPS AND WELDED ATTACHMENTS |
| 1761 | SV0-0000-XSC-CV0349 | INSTALLATION OF ROLLER COMPACTED CONCRETE (RCC) FOR THE HEAVY HAUL ROAD |
| 1762 | SV4-CA01-S4W-860304 | CA01-02 SUPPORTING LEG INSTALLATION |
| 1763 | SV3-CA01-S4W-CV4079 | CA01-15 OLP AND PERM WELD ATTACHMENTS |
| 1764 | SV4-2101-CEW-CV5806 | UNIT 4, TURBINE BUILDING FIRST BAY WALLS UP TO 122', EMBEDS AND ANCHOR BOLTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1765 | SV3-VWS-PLW-ME0504 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRIC SV3-VWS-PLW-486). |
| 1766 | SV3-FPS-P0W-ME4182 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS SV3-FPS-PLW-718, -719) |
| 1767 | SV3-WWS-PHW-ME1375 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-312, 314) |
| 1768 | SV3-FPS-PHW-ME4840 | INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME4839) |
| 1769 | SV4-WRS-PLW-ME5031 | CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE FUEL TRANSFER CANAL (FHS-MT-02) |
| 1770 | SV4-FPS-THW-ME7863 | Hydro Test the Unit 4 Fire Protection Piping (FPS) Piping on Isometrics (SV4-FPS-PLW-964,965,966,967,96AK,96AM,96AL,96AW,96AX,96BA) |
| 1771 | SV4-WWS-P0W-ME7548 | INSTALLATION OF ANNEX BLDG WWS EMBEDDED PIPING (ISOMETRIC SV4-WWS-PLW-400, 402, 402, 403, 404,405, 406, 407, 408, 409, 968, 972, 973) |
| 1772 | SV4-WWS-P0W-ME7546 | INSTALLATION OF ANNEX BLDG WWS EMBEDDED PIPING (ISOMETRIC SV4-WWS-PLW-410, 411, 412, 413, 418, 951, 953, 970, 971) |
| 1773 | SV4-MSS-P0W-800000 | INSTALL MAIN STEAM SYSTEM PIPING FROM AUX BUILDING TO HP TURBINE |
| 1774 | SV3-FPS-PHW-ME0695 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-FPS-PLW-820, 825, 830 |
| 1775 | SV4-FPS-PHW-ME4999 | FABRICATION/INSTALLATION OF FPS PIPE SUPPORTS (INCLUDING ISOMETRICS SV4-FPS-PLW-810, 815) |
| 1776 | SV3-MG20-MEW-ME6641 | INSTALLATION OF MAIN GENERATOR STATOR |
| 1777 | SV3-WLS-PLW-ME0535 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-33B, -33G, -33H, -33K) |
| 1778 | SV3-WLS-PHW-ME0821 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-190 |
| 1779 | SV3-WLS-PHW-ME0831 | INSTALLATION OF SMALL BORE WLS PIPING SUPPORTS FOR ISOMETRICS SV3-WLS-PLW-980, -981 |
| 1780 | SV3-VWS-PHW-ME2799 | INSTALLATION OF VWS SUPPORTS FOR ISOMETRICS SV3-VWS-PLW-20K. |
| 1781 | SV3-CCS-PHW-ME4302 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-392 |
| 1782 | SV3-CVS-P0W-ME3900 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES SV3-CVS-PLW-65C AND 65F), REQUEST CQC FOR 65F BJA 4/16/15 |
| 1783 | SV3-CVS-PHW-ME4187 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-65C |
| 1784 | SV4-CA20-S4W-CV6817 | CA20-31 Temporary Attachments - FLOOR |
| 1785 | SV4-CA20-S4W-CV6820 | CA20-32 Temporary Attachments/Floor |
| 1786 | SV4-CA20-S5W-CV6826 | CA20-34 Temporary Attachments |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1787 | SV4-CA20-S4W-CV6838 | CA20-37 Temporary Attachments |
| 1788 | SV4-WRS-P0W-ME5359 | FABRICATION/INSTALLATION OF SMALL BORE WRS LEAK CHASE PIPING INCLUDING SV4-WRS-PLW-84D, -840 |
| 1789 | SV3-DWS-PHW-ME7043 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-180, 181, 182, & 190) |
| 1790 | SV4-WRS-P0W-ME5365 | Fabrication/Installation of Small Bore WRS Leak Chase Piping Including SV4-WRS-PLW-82E, -82K, -825, -826, -827, -828 |
| 1791 | SV3-1130-C0W-850001 | Reinforced Concrete Inside Containment El. 87'-6" to 96'-0" East Side (Layers 6 & 7) |
| 1792 | SV3-CB26-CBW-850000 | CB26 MODULE INSTALLATION |
| 1793 | SV3-CB27-CBW-850000 | CB27 MODULE INSTALLATION |

| 1844 | SV4-CA01-S4W-CV6492 | CA01-36 SUB MODULE INSTALLATION |
| 1845 | SV3-1210-ERW-850024 | INSTALL CABLE TRAY IN ROOMS 12111/12112 |
| 1846 | SV3-1210-ERW-850046 | INSTALL CABLE TRAY IN ROOM 12113 |
| 1847 | SV3-CA20-CCW-CV5116 | UNIT 3 CA20 WALL CONCRETE PLACEMENT FROM 87¿3¿ TO 128¿1¿ (K2 AND L2 COLUMN LINES ¿ PLACEMENT #2 |
| 1848 | SV0-8700-CCW-TP0730 | INSTALLATION AND SET-UP OF NITROGEN COOLING SYSTEMS |
| 1849 | SV4-RWS-ERW-EL0865 | Installation of Electrical Underground Commodities (Manholes & Duct Banks) for the (RWS)Raw Water System to the River Intake Structure |
| 1850 | SV0-1000-EWW-TP0866 | Temporary Power to Nuclear Island Unit 4 |
| 1851 | SV3-CCS-PLW-ME0876 | Fabricate and Install CCS Piping Iso SV3-CCS-PLW-740 |
| 1852 | SV3-CCS-PLW-ME0877 | Fabricate and Install CCS Piping Iso SV3-CCS-PLW-750 |
| 1853 | SV0-670-EWW-TP0880 | Temporary Power to Rotor Storage Building (324) |
| 1854 | SV3-1124-ERW-EL5406 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11206 PXS-A AT ELEVATION 84' |
| 1855 | SV3-PLS-JDW-EL3126 | INSTALL ANNEX BLDG. PLS EQUIPMENT, ROOM 40310 |
| 1856 | SV3-PLS-JDW-EL3122 | INSTALL ANNEX BLDG. PLS EQUIPMENT, ROOM 40308 |
| 1857 | SV3-1123-ERW-EL5403 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11207 PXS-B AT ELEVATION 84' |
| 1858 | SV3-1120-ERW-EL7084 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11204, EL 85'-6" |
| 1859 | SV3-1120-ERW-EL2422 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CABLE TRAY SUPPORTS IN ROOM 11202 AT ELEVATION 84' 6" TO 107' 2" |
| 1860 | SV3-1120-ERW-EL2848 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11202 EL 84'-6" THROUGH 107'-2" |
| 1861 | SV3-1123-ERW-EL5404 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11207 PXS-B AT ELEVATION 84'-6" |
| 1862 | SV3-1124-ERW-EL5405 | FABRICATION AND INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11206 PXS-A AT ELEVATION 84'-6" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1863 | SV4-4030-EGW-EL5437 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS GROUNDING) FOR THE ANNEX BLDG. AREA 3 BETWEEN COLUMNS 2 & 4.1 |
| 1864 | SV4-WLS-P0W-ME3116 | INSTALLATION OF LARGE BORE WLS PIPING LINES WLS-PL-L020, L031, L077 & L131A OF ISOMETRIC SV4-WLS-PLW-750 |
| 1865 | SV0-REFDOC-BOP-860441 | Raw Water Intake - Foreman's Book |
| 1866 | SV3-WLS-PLW-ME0941 | Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-851 |
| 1867 | SV3-WLS-PLW-ME0942 | Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-852 |
| 1868 | SV0-8000-EWW-TP0945 | Electrical Power Feeder Installation to Valve Shop (BLD 184) |
| 1869 | SV4-WWS-PLW-ME0984 | TURBINE BUILDING 82FT.-9IN. ELEVATION EMBEDDED WWS PIPING PACKAGE 3 |
| 1870 | SV4-CWS-XEW-CV1035 | UNIT 4, CIVIL INSTALLATION OF THE CWS PIPE (PHASE III) |
| 1871 | SV3-WLS-PHW-ME1039 | Fabrication/Installation of pipe Supports for Isometric Drawing WLS-PLW-042 |
| 1872 | SV3-WLS-PHW-ME1041 | Fabrication/ Installation of pipe Supports for Isometric Drawing WLS-PLW-04B |
| 1873 | SV3-WLS-PHW-ME1043 | Fabrication/ Installation of pipe Supports for Isometric Drawing WLS-PLW-046 |
| 1874 | SV3-WLS-PHW-ME1045 | Fabrication/ Installation of pipe Supports for Isometric Drawing WLS-PLW-754 |
| 1875 | SV0-PWS-PLW-TP1046 | INSTALLATION OF MPW TEMPORARY WATER FILTRATION UNIT. |
| 1876 | SV3-CWS-EQW-EL1049 | ELECTRICAL CONTINUITY INSTALLATION FOR CWS (PHASE 3) |
| 1877 | SV4-TCS-PHW-ME5477 | INSTALLATION AND FABRICATION OF TURBINE BUILDING CLOSED COOLING WATER SYSTEM (TCS) PIPING SUPPORT |
| 1878 | SV4-4030-EGW-EL5435 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS GROUNDING) FOR THE ANNEX BLDG AREA 1 BETWEEN COLUMNS 9 & 13 |
| 1879 | SV4-CWS-EQW-EL1050 | ELECTRICAL CONTINUITY INSTALLATION FOR CWS (PHASE 3) |
| 1880 | SV3-WLS-PHW-ME1051 | Fabrication /Installation of Pipe Supports for Isometric Drawing WLS-PLW-64P |
| 1881 | SV3-WLS-PHW-ME1052 | Fabrication /Installation of Pipe Support for Isometric Drawing WLS-PLW-64Q |
| 1882 | SV3-CCS-PHW-ME1055 | Fabrication/Installation of Pipe Supports for Isometric Drawing CCS-PLW-740 |
| 1883 | SV3-DWS-PHW-ME1058 | Fabrication/Installation of Pipe Supports for Isometric Drawing DWS-PLW-773 |
| 1884 | SV3-SFS-P0W-ME3648 | FABRICATION/INSTALLATION OF PIPING FOR ISO SV3-SFS-PLW-538 |
| 1885 | SV0-SDS-PLW-ME1098 | FABRICATE SANITARY DRAIN PIPING BETWEEN LIFT STATIONS MS-501 AND MS-502. |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1886 | SV0-SDS-PLW-ME1099 | FABRICATE AND INSTALL SANITARY DRAIN PIPING BETWEEN LIFT STATIONS MS-502 AND MS-503. |
| 1887 | SV3-ML05-MLW-ME1104 | ASME SECTION III - ATTACH CODE DATA PLATES ON CA01 PENETRATIONS |
| 1888 | SV3-CWS-PLW-ME1114 | UNIT 3 CWS FROM PCCP TO TURBINE BUILDING |
| 1889 | SV0-SDS-PLW-ME1125 | INSTALL SANITARY DRAIN LIFT STATION MS-502. |
| 1890 | SV0-1000-EWW-TP1149 | Installation of Temporary Power on East Side of CR-10 PAD |
| 1891 | SV0-SDS-PLW-ME1153 | FABRICATE AND INSTALL SANITARY DRAIN PIPING FROM BUILDING 301 TO MANHOLE MH-57. |
| 1892 | SV0-ZRS-EWW-EL1347 | ZRS TIE-IN UNDER 100 YEAR DITCH |
| 1893 | SV4-1220-CPW-CV1418 | FABRICATION OF UNIT 4 AUXILIARY BULIDING PRECAST CONCRETE PANELS AT EL.82'6" |
| 1894 | SV3-WLS-PLW-ME1466 | Fabricate and Install WLS Piping Lines WLS-PL-L078 & L131B of Iso SV3-WLS-PLW-731 |
| 1895 | SV3-CVS-PLW-ME1471 | Fabricate and Install Small Bore CVS Piping Isometric # SV3-CVS-PLW-803 |
| 1896 | SV3-CAS-PLW-ME1473 | Fabricate and Install Small Bore CAS Piping Isometric # SV3-CAS-PLW-729 |
| 1897 | SV0-ZRS-EWW-TP1545 | Temporary Storage Power for Plant Transformers |
| 1898 | SV0-SDS-CKW-ME1573 | INSTALL SANITARY DRAIN MANHOLES SV0-SDS-MH-53, AND SV0-SDS-MH-57. |
| 1899 | SV0-SDS-PLW-ME1642 | FABRICATE AND INSTALL SANITARY DRAIN PIPING FROM MANHOLE MH-57 TO MANHOLE MH-12 AND TO SNC CAPPED FUTURE CONNECTION FROM MANHOLE MH-57. |
| 1900 | SV0-MH90-CCW-CV1644 | HLD Concrete Counterweights Phase II |
| 1901 | SV4-FWS-PNW-ME1671 | UNIT 4 TURBINE BUILDING EL 100'-0": INSULATION OF EMBEDDED FWS PIPING |
| 1902 | SV4-FWS-THW-ME1672 | UNIT 4 TURBINE BUILDING EL 100'-0" HYDROSTATIC TESTING OF EMBEDDED FWS PIPING |
| 1903 | SV0-8000-EWW-TP1687 | TEMPORARY POWER TO CBI HAZARDOUS MATERIALS STORAGE AREA |
| 1904 | SV3-KB38-KBW-ME1688 | INSTALLTION OF MODULE KB38- WLS MONITOR PUMP B |
| 1905 | SV3-KB37-KBW-ME1693 | INSTALLATION OF MODULE KB37 - WLS MONITOR PUMP A |
| 1906 | SV4-1210-CEW-CV1737 | U4 AUXILIARY BUILDING EMBED PLATES-EL 66'6" - EXTERIOR WALLS |
| 1907 | SV0-SDS-CKW-ME1719 | INSTALL SANITARY DRAIN MANHOLE SV0-SDS-MH-67. |
| 1908 | SV4-ML05-MLW-ME1844 | ATTACHMENT OF WELDED COUPLINGS TO EMBEDDED PIPING PENETRATIONS 66'6"-82'6" WALLS ONLY |
| 1909 | SV3-CCS-PLW-ME0496 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-521) |
| 1910 | SV0-ZFS-ERW-EL1863 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES ZFS DUCT BANK ELEV. 240' NORTH OF BUILDING 301 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1911 | SV0-MH90-MHW-RI1879 | REPAIRING THE HLD |
| 1912 | SV3-WRS-PHW-ME5040 | FABRICATION/INSTALLATION OF CONSTRUCTION AID SUPPORTS FOR CA20 WRS PIPING |
| 1913 | SV3-DWS-PLW-ME0464 | INSTALLATION OF SMALL BORE DWS PIPING |
| 1914 | SV3-CCS-PLW-ME0492 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-530, 550) |
| 1915 | SV3-WLS-PLW-ME0580 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRICS SV3-WLS-PLW-93C, 940, 445) |
| 1916 | SV3-4030-EGW-EL1854 | PERFORM INSTALLATION OF UNDERGOUND COMMODITIES (EGS-GROUNDING) FOR THE ANNEX BLDG., AREA 3, ELEV. 100' & 107'-BETWEEN COLUMN LINES (2) TO (4.1) |
| 1917 | SV4-KB13-KBW-ME2057 | KB13 SUMP (WRS-MT-01) INSTALLATION - PORTION 2 ONLY |
| 1918 | SV4-KB10-KBW-ME2058 | KB10 SUMP (WWS-MT-06) INSTALLATION-PORTION 2 ONLY |

| 1920 | SV3-FWS-P0W-ME3810 | FABRICATION AND INSTALLATION OF FWS PIPING |
| 1921 | SV3-SDS-P0W-860436 | INSTALLATION OF ANNEX BUILDING SDS PIPE (ISO SV3-SDS-PLW-420, 422, 423) |
| 1922 | SV3-2060-SSW-850112 | TB12 STAIRS AND HANDRAILS |
| 1923 | SV3-CA01-CAW-855001 | CA01 WEST TOP PLATE INSTALLATION |
| 1924 | SV3-2060-C0W-850010 | 196¿-3" ELEV. FLOOR SLAB, POUR # 8D |
| 1925 | SV4-1233-C0W-850001 | 100' ELEV., TUBE STEEL AREA 3 |
| 1926 | SV3-CA03-MHW-CV2262 | CA03 TEMPORARY BRACING FOR LIFT INTO NI |
| 1927 | SV4-ECS-ERW-EL2296 | SV4 - ECS MAIN POWER DUCT BANKS / EAST PF ANNEX - PHASE 6 |
| 1928 | SV3-4031-SHW-EL5451 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 1 ELEV 100' PARTIAL OF BATTERY CHARGER ROOM 40308 W OF ROW LINE (G) |
| 1929 | SV3-VCS-SHW-ME2313 | INSTALLATION OF CONTAINMENT VCS RING HEADER HV AC SUPPORTS |
| 1930 | SV3-4031-SHW-EL5452 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 1 ELEV 100' PARTIAL OF BATTERY CHARGER ROOM 40310 E OF ROW LINE (G) |
| 1931 | SV3-VCS-SHW-ME2330 | INSTALLATION OF CONTAINMENT VCS HVAC SUPPORTS FOR AZIMUTH 75 - 120 |
| 1932 | SV3-VCS-SHW-ME2332 | INSTALLATION OF CONTAINMENT VCS HVAC SUPPORTS FOR AZIMUTH 150° - 170° |
| 1933 | SV3-PXS-PHW-ME3364 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-013 |
| 1934 | SV3-1000-TIW-855000 | CONTAINMENT VESSEL TENT FABRICATION |
| 1935 | SV3-2050-SHW-860258 | ELECTRICAL SUPPLEMENTAL STEEL TURBINE 3, EL 169'-0" AREA 0 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1936 | SV3-4031-SHW-EL5453 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 1 ELEV 100' BATTERY ROOM 40309 |
| 1937 | SV3-4031-SHW-EL5455 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG AREA 1 ELEV 100' BATTERY ROOM 40307 |
| 1938 | SV4-CA20-CAW-850102 | CA20 BASEMAT ATTACHMENT BRACKETS |
| 1939 | SV3-KQ22-KBW-860229 | MODULE KQ22 FABRICATION |
| 1940 | SV3-VCS-SHW-ME2333 | INSTALLATION OF CONTAINMENT VCS HVAC SUPPORTS FOR AZIMUTH 285 - 315DEG |
| 1941 | SV3-VCS-SHW-ME2334 | INSTALLATION OF CONTAINMENT VCS HV AC SUPPORTS FOR AZIMUTH 320-360 |
| 1942 | SV4-SWS-PHW-ME2363 | INSTALLATION OF SWS SUPPORTS FOR ISOMETRICS SV4-SWS-PLW-041, SV4-SWS-PLW-042, SV4-SWS-PLW-043, |
| 1943 | SV3-VCS-MDW-ME2378 | Fabrication and Installation of VCS HVAC Duct Ring Header |
| 1944 | SV3-VCS-MDW-ME2379 | FABRICATION AND INSTALLATION OF VCS DUCT ISO A1 |
| 1945 | SV3-VCS-MDW-ME2380 | FABRICATION AND INSTALLATION OF VCS DUCT ISO A2 |
| 1946 | SV3-VCS-MDW-ME2381 | FABRICATION AND INSTALLATION OF VCS DUCT ISO A3 |
| 1947 | SV3-VCS-MDW-ME2382 | FABRICATION AND INSTALLATION OF VCS DUCT ISO A4 |
| 1948 | SV3-CDS-PLW-ME2499 | INSTALLATION OF CDS PIPING |
| 1949 | SV3-MH20-EYW-860384 | 15 TON SECONDARY BRIDGE CRANE ELECTRICAL ASSEMBLY FOR THE TURBINE BUILDING IN ROOM 20600 |
| 1950 | SV3-ECS-ESW-EL7176 | INSTALL TURBINE BLDG ECS EQUIPMENT, MV SWITCHGEAR ECS-ES-4, ROOM 20501, ELEV 141'-3" |
| 1951 | SV3-PLS-JDW-EL7561 | INSTALL TURBINE BLDG PLS AND ASSOCIATED ZAS - 'EY' EQUIPMENT GROUP 2 IN ROOM 20513 ELEV 156'-0" |
| 1952 | SV4-ML05-MLW-ME7965 | INSTALL CA01 PENETRATION SV4-11305-ML-P02 |
| 1953 | SV4-CB65-S4W-CV2569 | INSTALLATION AND REMOVAL OF LIFTING BEAM/LUGS FOR CB65 |
| 1954 | SV3-PGS-P0W-ME2591 | FABRICATE AND INSTALL PGS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-PGS-PLW-836, 837, 862, 863, 888, 889, 914 AND 915 |
| 1955 | SV4-PGS-P0W-ME2593 | FABRICATE AND INSTALL PGS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV4-PGS-PLW- 851, 852, 877, 878, 903, 904, 929 AND 930 |
| 1956 | SV3-WWS-MTW-ME2643 | INSTALL UNIT 3 OIL/WATER SEPARATOR AREA SUMP SV3-WWS-MT-011. |
| 1957 | SV4-ES03-ESW-860939 | The installation of the Unit 4 Turbine Building Main Generator Circuit Breakers |
| 1958 | SV3-KB20-KBW-ME2687 | INTALLATION OF KB20 COMPONENTS |
| 1959 | SV3-WLS-P0W-ME2762 | KB16 - INSTALLATION OF VALVE ACTUATORS AT AIR OPERATED VALVES WLS-PL-V020A , WLS-PL-V020B & WLS-PL-V041 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1960 | SV3-KB16-KBW-ME2763 | KB16 - INSTALLATION OF LEVEL ELEMENT WLS-LT-021, THERMOCOUPLES WLS-JE-TE022 & WLS-JE-TE023, PRESSURE TRANSMITTERS WLS-PT-015 & WLS-PT-050 |
| 1961 | SV3-CAS-PHW-ME2781 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-733 |
| 1962 | SV3-2032-SHW-860940 | Electrical Cable Tray Support Installation in the Turbine Building, Elevation 100' |
| 1963 | SV3-VWS-P0W-ME2834 | INSTALLATION OF SMALL BORE KB14 PIPING (INCLUDING VALVE SV3-VWS-PL-V482) |
| 1964 | SV4-CA01-S4W-CV6502 | CA01-39 SUB MODULE INSTALLATION |
| 1965 | SV3-VWS-PHW-ME2835 | Fabrication/Installation of KB14/VWS Piping Supports |
| 1966 | SV3-WGS-THW-ME2845 | HYDROSTATIC TESTING OF MODULE KB14 WGS PIPING |
| 1967 | SV3-WWS-THW-ME2846 | HYDROSTATIC TESTING OF MODULE KB10 WWS PIPING |
| 1968 | SV4-PGS-PHW-ME2871 | INSTALLATION OF PGS PIPING SUPPORTS INCLUDED IN WORK PACKAGE SV4-PGS-P0W-ME2593 |
| 1969 | SV4-CAS-P0W-ME2874 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV4-CAS-PLW-787, 788, 789, 794, 795, 796, 797 AND 798 |
| 1970 | SV3-DWS-THW-ME3038 | KB16 - HYDROSTATIC TESTING OF DWS PIPING |
| 1971 | SV3-WRS-THW-ME3039 | KB13 - HYDROSTATIC TESTING OF WRS PIPING |
| 1972 | SV4-PGS-PNW-ME3049 | INSTALL INSULATION OF UNIT 4 PGS PIPING INCLUDED IN WORK PACKAGE SV4-PGS-P0W-ME2593 |
| 1973 | SV4-4031-SSW-850000 | 100' ELEV STRUCTURAL STEEL, 1ST TIER COLUMNS, AREA 1 |
| 1974 | SV3-MH20-EYW-860942 | 220 TON TURBINE BRIDGE CRANE ELECTRICAL ASSEMBLY IN ROOM 20600 |
| 1975 | SV3-MH20-EYW-860943 | 220 TON TURBINE BRIDGE CRANE MAINLINE SYSTEM ASSEMBLY IN ROOM 20600 (CONDUCTOR BARS) |
| 1976 | SV3-EDS-DDW-EL7177 | INSTALL TURBINE BLDG EDS EQUIPMENT 125VDC PANELS ROOMS 20501, 20502, 20502 ELEB 141'-3" |
| 1977 | SV3-PLS-JDW-EL7562 | INSTALL TURBINE BLDG PLS AND ASSOCIATED ZAS "EY" EQUIPMENT GROUP 3 IN ROOM 20513 ELEV 156'-0" |
| 1978 | SV3-MH20-MHW-860366 | ASSEMBLY AND INSTALLATION OF 15 TON SECONDARY TURBINE CRANE |
| 1979 | SV3-1160-SSW-CV3059 | C8 CIRCULAR TRUNK SPL22, 23, 24 |
| 1980 | SV4-CA01-S4W-860305 | CA01-21 SUPPORTING LEG INSTALLATION |
| 1981 | SV4-CA01-S4W-CV6480 | CA01-33 SUB MODULE INSTALLATION |
| 1982 | SV3-EDS-DSW-EL3119 | INSTALL ANNEX BLDG NON CLASS 1E DC AND UPS SYSTEM LOAD GROUP 1 ROOM 40308 |
| 1983 | SV3-PLS-JDW-EL3150 | INSTALL ANNEX BLDG PLS EQUIPMENT (CABINETS AND MOTOR GENERATOR SETS) ROOM 40413 |
| 1984 | SV3-MSS-PHW-ME4668 | MSS PIPE SUPPORTS FOR PIPE PACKAGE SV3-MSS-P0W-ME4667 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 1985 | SV3-1130-C0W-850002 | REINFORCED CONCRETE INSIDE CONTAINMENT 87'-6" T0 95' REACTOR VESSEL AND REFUELING COMPARTMENTS |
| 1986 | SV4-1210-CRW-CV3156 | UNIT 4 NUCLEAR ISLAND AUX. BLDG INSTALLATION OF REINFORCING STEEL ON CA20 EXTERIOR WALL UP TO ELEV. 82'-6" (WALL PLACEMENT #0) |
| 1987 | SV3-WRS-THW-ME3224 | HYDROSTATIC TESTING OF WRS PIPING ON MODULE R104 |
| 1988 | SV4-CA20-S4W-CV3268 | INSTALLATION OF SUBMODULE CA20-07 |
| 1989 | SV4-WLS-PHW-ME3289 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS WLS-PLW-33A, -260 |
| 1990 | SV4-WLS-PHW-ME3292 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-140 |
| 1991 | SV4-WLS-PHW-ME3294 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING WLS-PLW-190 |
| 1992 | SV4-WRS-P0W-ME3355 | INSTALLATION OF LARGE BORE WRS PIPING ( INCLUDES ISOMETRIC SV4-WRS-PLW-57G) |
| 1993 | SV3-PXS-P0W-ME3391 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC #SV3-PXS-PLW-290 (CA03 PIPING) |
| 1994 | SV3-PXS-P0W-ME3392 | ASME Section III - Fabrication/Installation of Isometric# SV3-PXS-PLW-293 (CA03 Piping) |
| 1995 | SV3-PXS-P0W-ME3397 | ASME SECTION III – FABRICATION/INSTALLATION OF ISOMETRIC #SV3-PXS-PLW-298 (CA03 PIPING) |
| 1996 | SV3-PXS-P0W-ME3398 | AME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC #SV3-PXS-PLW-220 (CA03 PIPING) |
| 1997 | SV0-SES-ERW-EL3558 | SV0-INSTALL CONDUITS IN SES DUCT BANK / SOUTH WEST OF UNIT 3 RADWASTE BUILDING (NXD618) |
| 1998 | SV0-0000-EGW-EL3572 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV0 SITE STATION GROUNDING GRID) FOR GROUND GRID AREA L1200 |
| 1999 | SV3-PXS-P0W-ME3700 | FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-603 (CA03 PIPING) |
| 2000 | SV3-CAS-THW-ME3955 | HYDRO TESTING OF R155 MODULE CAS PIPING |
| 2001 | SV4-CA20-MHW-CV4000 | VERTICAL LIFTING FRAMES & BRACING CA20-SA1 SM 01 THRU 08. |
| 2002 | SV4-CA20-S5W-CV4002 | CA20-01 UNSATISFACTORY IRS/ N&DS/E&DCRS AND LOOS PARTS - STRUCTURAL |
| 2003 | SV4-CA20-S4W-CV4003 | CA20 WALL 2 SOUTH FACE -OLPs AND WELDED ATTACHMENTS INSTALLATION |
| 2004 | SV4-CA20-S5W-CV4006 | CA20-02 UNSAT IR# & N&D STRUCTURAL REPAIRS |
| 2005 | SV4-CA20-S4W-CV4008 | CA20-02 MAP OUT TEMPORARY ATTACHMENTS |
| 2006 | SV3-PLS-JDW-EL7560 | INSTALL TURBINE BLDG PLS AND ASSOCIATED ZAS EY EQUIPMENT GROUP 1 IN ROOM 20513 ELEV 156'-0" |
| 2007 | SV4-CA20-S5W-CV4014 | UNSAT IR# & N&D STRUCTURAL REPAIRS |
| 2008 | SV4-CA20-S4W-CV4015 | CA20 WALL 3 NORTH FACE - OLPs AND WELDED ATTACHMENTS INSTALLATION |

| 2134 | SV4-CA20-S4W-CV5754 | CA20-29 MAP OUT TEMPORARY ATTACHMENTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2135 | SV3-SES-EEW-EL7558 | INSTALL TURBINE BLDG. SES SECURITY EQUIPMENT CONTROL PNLS. & CONTROLLERS IN ROOM 20513 ELV. 156' 0" |
| 2136 | SV4-CA20-S5W-CV5755 | CA20-30 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOS PARTS - STUDS |
| 2137 | SV4-CA20-S5W-CV5756 | CA20-30 Unsat IR# & N&D Structural Repairs |
| 2138 | SV4-CA20-S4W-CV5759 | CA20-30 MAP OUT TEMPORARY ATTACHMENTS |
| 2139 | SV3-CAS-P0W-ME3435 | FABRICATION/INSTALLATION OF PIPING FOR ISO SV3-CAS-PLW-893, SV3-CAS-PLW-895 |
| 2140 | SV4-CA20-S5W-CV5760 | CA20-71 UNSAT IR - STUDS |
| 2141 | SV0-DFS-C0W-850001 | DIESEL FUEL TRANSFER STATION, DFS-MS001 EQUIPMENT PAD |
| 2142 | SV4-CA20-S4W-CV5764 | CA20-71 MAP OUT TEMPORARY ATTACHMENTS |
| 2143 | SV4-CA20-S5W-CV5765 | CA20-72 UNSAT IR# & N&D STUD REPAIRS |
| 2144 | SV4-CA20-S4W-CV5768 | INSTALLATION OF SUBMODULES CA20-71, CA20-72, AND CA20-73 |
| 2145 | SV4-CA20-S4W-CV5769 | CA20-72 MAP OUT TEMPORARY ATTACHMENTS |
| 2146 | SV4-CA20-S5W-CV5770 | CA20-73 UNSAT IR STUDS |
| 2147 | SV4-CA20-S4W-CV5774 | CA20-73 MAP OUT TEMPORARY ATTACHMENTS |
| 2148 | SV3-1154-ERW-EL8974 | Fabrication and Installation of Conduit Supports for Area 4 on Ring 2 of the Containment Vessel at EL. 131'-9" to 170'-0". |
| 2149 | SV3-PXS-P0W-ME6162 | Fabrication and Installation of CA03 Large Bore Piping Shown on Isometric SV3-PXS-PLW-230 |
| 2150 | SV4-WLS-P0W-ME6237 | INSTALLATION OF SMALL BORE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-562, 566, 573, 574, & 575) |
| 2151 | SV4-WLS-P0W-ME6238 | INSTALLATION PF S,A;; BPRE CA01 WLS EMBEDDED PIPING (INCLUDE ISOMETRICS SV4-WLS-PLW-564, -565, -570, -571, & -572) |
| 2152 | SV3-CA02-S4W-CV6272 | INSTALL CA02-05 PERMANENT WELDED ATTACHMENTS |
| 2153 | SV4-CA01-S5W-CV6357 | CA01-01 UNSATISFACTORY IRs/N&Ds/E&DCRs AND LOOSE PARTS-STRUCTURAL |
| 2154 | SV4-CA01-S5W-CV6361 | CA01-02 UNSAT IRs/N&Ds/E&DCRs/LOOSE PARTS -STRUCTURAL |
| 2155 | SV4-CA01-S5W-CV6365 | CA01-03 UNSAT IRS/N&DS/E&DCRS/LOOSE PARTS - STRUCTURAL |
| 2156 | SV4-CA01-S4W-CV6367 | SUBMODULE CA01-04 INSTALLATION |
| 2157 | SV4-CA01-S5W-CV6386 | CA01-08 UNSAT IRs/N&Ds/EDCRs/ LOOSE PARTS-STRUCTURA |
| 2158 | SV4-MSS-P0W-860356 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPING |
| 2159 | SV3-1130-C0W-850007 | REFUEL CAVITY FLOOR |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2160 | SV4-CA01-S4W-CV6532 | CA01 - OLP & WELDED ATTACHMENTS - ELV.. 94' - 96' |
| 2161 | SV4-2060-CSW-850013 | TB13 STAIRS AND HANDRAILS |
| 2162 | SV4-2050-C0W-850004 | 141'-3" ELEV. FLOOR SLAB, POUR # 4 |
| 2163 | SV3-ME01-PHW-860974 | CONDENSER B HEATER DRAIN PIPING SUPPORT |
| 2164 | SV3-EDS-EAW-EL3131 | INSTALL ANNES BLDG. EDS4-EA AND EDS4-DD DISTRUBUTION PANELS, ROOM 40414 |
| 2165 | SV4-CA01-S4W-CV6488 | CA01-35 Installation |
| 2166 | SV4-WLS-P0W-860376 | FABRICATION/INSTALLATION OF WLS PIPING (ISOMETRIC DRAWING SV4-WLS-PLW-170) |
| 2167 | SV4-CA01-S5W-861314 | CA01- Misc. Work, Misc. Unsat. IRs/N&Ds and E&DCRs |
| 2168 | SV3-PWS-P0W-861060 | INSTALLATION OF ANNEX BLDG POTABLE WATER SYSTEM PWS PIPING (ISO SV3-PWS-PLW-412 & -414) |
| 2169 | SV3-SES-EEW-EL6227 | INSTALL (SES) PLANT SECURITY SYSTEM EQUPIMENT FOR ANNEX COMPUTER ROOM "A" - 40410 ELEV. 118'-6" |
| 2170 | SV4-DWS-PHW-860938 | Fabrication/Installation of DWS Piping Supports (Isometric Drawings SV4-DWS-PLW-60D, -624 and -625 |
| 2171 | SV4-VWS-PHW-860963 | Fabrication/Installation of VWS Piping Supports (Isometric Drawings SV4-VWS-PLW-260, -384 and -389) |
| 2172 | SV4-VAS-P0W-861320 | INSTALLATION OF ISOMETRICS SV4-VAS-PLW-340 AND SV4-VAS-PLW-350 IN THE CA20 MODULE |
| 2173 | SV3-PXS-P0W-861165 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPING FOR ISOMETRIC SV3-PXS-PLW-028 (LINE NUMBER L120) |
| 2174 | SV3-EDS1-EAW-EL6226 | INSTALL (EDS1) EA-LOW VOLTAGE DISTRIBUTION PNL EQUIPMENT FOR ANNEX COMPUTER ROOM "A"-ELEV. 118'-6" |
| 2175 | SV3-2050-SHW-860259 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, BELOW ELEVATION 169'-0" SOUTH OF COLUMN 13.1, & BETWEEN P.1 TO R |
| 2176 | SV3-CDS-PLW-ME2310 | INSTALLATION OF CDS PIPING |
| 2177 | SV3-2060-CSW-850013 | TB13 STAIRS AND HANDRAILS |
| 2178 | SV4-2050-C0W-850002 | 141'-3" ELEV. FLOOR SLAB, POUR #2 |
| 2179 | SV4-2050-C0W-850003 | 141'-3" ELEV. FLOOR SLAB, POUR #3 |
| 2180 | SV3-1130-C0W-850006 | IRWST Floor |
| 2181 | SV3-KQ22-KQW-ME1691 | KQ22 LOWER CVCS MODULE INSTALL |
| 2182 | SV4-CA01-S5W-860270 | CA01 REBAR FABRICATION, TORQUEING TO COUPLERS AND TESTING |
| 2183 | SV4-VAS-MDW-860209 | FABRICATE/INSTALL VAS DUCT AND SUPPORTS IN ROOM 12153 |
| 2184 | SV3-ML05-MLW-ME6086 | INSTALLATION OF ANNULUS WALL PENETRATIONS 100'0 TO 117'0 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2185 | SV4-WLS-P0W-860375 | FABRICATION/INSTALLATION OF WLS PIPING (INCLUDING ISOMETRIC SV4-WLS-PLW-161) |
| 2186 | SV3-KQ23-KQW-ME1692 | KQ23 UPPER CVCS MODULE INSTALL |
| 2187 | SV3-PXS-P0W-ME2961 | FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-019 ( |
| 2188 | SV3-PXS-P0W-ME3239 | FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-026 |
| 2189 | SV3-PXS-P0W-861011 | INSTALL ISOMETRIC SV3-PXS-PLW-938 LARGE BORE PIPING |
| 2190 | SV3-SFS-P0W-861167 | Install Isometric SV3-SFS-PLW-780 |
| 2191 | SV3-PXS-P0W-861016 | Install large bore piping for Isometric SV3-PXS-PLW-948 |
| 2192 | SV3-PXS-PHW-861018 | INSTALL ISOMETRIC SV3-PXS-PLW-935 LARGE BORE PIPE SUPPORTS |
| 2193 | SV3-1227-ERW-860442 | INSTALL DESIGN ROUTED CABLE TRAY & CABLE TRAY SUPPORTS IN SHIELD ANNULUS TUNNEL 82'-6" LEVEL |
| 2194 | SV3-1227-ERW-860443 | INSTALL DESIGN ROUTED SAFETY RELATED CONDUIT, BOXES & CONDUIT SUPPORTS IN SHIELD ANNULUS TUNNEL, 82¿-6¿ LEVEL |
| 2195 | SV3-PXS-P0W-861008 | Install large bore supports for Isometric SV3-PXS-PLW-935 |
| 2196 | SV3-PXS-P0W-861010 | Install large bore supports for Isometric SV3-PXS-PLW-937 |
| 2197 | SV3-PXS-PHW-881159 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-283 |
| 2198 | SV4-KQ11-KQW-860208 | INSTALL LEDGER ANGLES FOR KQ11 & PERFORM SEAL WELD FROM KQ11 TO CB65 |
| 2199 | SV3-4042-SAW-861026 | INSTALL HILTI GIRDER SYSTEM ANNEX BUILDING AREA 2 EL. 117'-6" |
| 2200 | SV3-1220-CPW-CV1074 | UNIT 3 INSTALLATION OF FLOOR PRECAST PANELS EL.82'-6" |
| 2201 | SV3-SFS-P0W-ME3651 | INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES ISOMETRIC SV3-SFS-PLW-566) |
| 2202 | SV3-Q240-Q2W-861350 | COMPLETION OF MODULE Q240 |
| 2203 | SV4-MT71-C0W-850002 | WASTE WATER RETENTION BASIN BOTTOM SLAB, CENTER POUR |
| 2204 | SV4-4031-ERW-860381 | INSTALLATOIN OF EMBEDDED CONDUCT ANNEX BULIDING,AREA 1 ELEV.100'-0" |
| 2205 | SV4-2038-SHW-860264 | SUPPLEMENTAL STEEL INSTALLATION AREA 8 FROM COLS 13.05 TO 14 IN TURBINE 4 |
| 2206 | SV4-WLS-PHW-861335 | INSTALLATION OF WLS PIPE SUPPORTS FOR ISOMETRIC SV4-WLS-PLW-364 |
| 2207 | SV3-ME01-P0W-860980 | INSTALLATION OF CONDENSER B HEATER DRAIN PIPING |
| 2208 | SV4-WRS-P0W-861358 | INSTALLATION OF PIPING FOR ISOMETRICS SV4-WRS-PLW-660, -664 & -665 |
| 2209 | SV4-FWS-P0W-860897 | INSTALLATION AND FABRICATION OF MAIN AND STARTUP FEEDWATER SYSTEM (FWS) PIPING SUPPORT |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2210 | SV4-MT71-C0W-850004 | WASTE WATER RETENTION BASIN WALL POUR # 4 |
| 2211 | SV4-MSS-PHW-860359 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING SUPPORT |
| 2212 | SV4-WRS-PHW-861359 | INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WRS-PLW-660, 664 & 665 |
| 2213 | SV4-4033-SSW-850000 | STRUCTURAL STEEL, 1ST TIER COLUMNS, AREA 3 |
| 2214 | SV4-WLS-P0W-861339 | INSTALLATION OF WLS PIPING FOR ISOMETRICS SV4-WLS-PLW-445, 936 |
| 2215 | SV3-2051-SHW-860262 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, BELOW ELEV 169'-0" AREA 1 FROM COLUMNS 14 TO 16 & P.1 TO P.2 |
| 2216 | SV3-ML05-MLW-861324 | FABRICATION/INSTALLATION OF PIPE PENETRATIONS FOR ISO SV3-ML05-V2-317 |
| 2217 | SV3-RNS-PHW-861420 | FABRICATION/INSTALLATION OF SUPPORTS FOR ISO SV3-RNS-PLW-141 |
| 2218 | SV3-SFS-P0W-ME6692 | FABRICATION/INSTALLATION OF ISOMETIC SV3-SFS-PLW-789 (LINE NUMBERS SFS-PL-L038, -L052, -L140) |
| 2219 | SV3-PXS-P0W-861014 | INSTALL ISOMETRIC SV3-PXS-PLW-946 LARGE BORE PIPING |
| 2220 | SV3-PXS-P0W-ME2963 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-PXS-PLW-01B (LINE NUMBERS PXS-PL-L128A & L131A) |
| 2221 | SV3-PXS-PHW-ME5584 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-640 |
| 2222 | SV3-2054-SHW-860263 | CABLE TRAY SUPLEMENTAL STEEL, UNIT 3 TURBINE, BELOW EL 169'-0", AREA 4 NORTH OF 12.1, K.5-L.5 |
| 2223 | SV3-R219-ERW-861315 | INSTALLATION OF ELECTRICAL CABLE TRAY AND TRAY GROUNDING IN MODULE R219 |
| 2224 | SV4-CA01-S4W-861376 | CA01-GUIDE PIN INSTALL |
| 2225 | SV0-010-EWW-861550 | ITP ELECTRICAL ASSISTANCE FOR BUILDING 315 |
| 2226 | SV4-4042-SSW-850000 | 116'-10" ELEV FLOOR STRUCTURAL STEEL AREA 2 |
| 2227 | SV4-4052-SSW-850000 | 134'-7" ELEV FLOOR STRUCTURAL STEEL AREA 2 |
| 2228 | SV4-PXS-P0W-885600 | ASME III – FABRICATION/INSTALLATION OF CA03 SMALL BORE PIPE FOR ISOMETRICS SV4-PXS-PLW-293 & SV4-PXS-PLW-294 |
| 2229 | SV3-CWS-PLW-ME2507 | INSTALLATION OF CWS PIPING ISO'S 70X, 70Y, 70Z, 71D |
| 2230 | SV3-2030-SHW-860274 | ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BULIDING,ELEVATION 100",AREA 0,ROOM 20300(TRAPEZE |
| 2231 | SV4-CA01-S4W-CV6506 | CA01-40 SUM MODULE INSTALLATION |
| 2232 | SV4-4041-SSW-850000 | 116'-0" ELEV FLOOR STRUCTURAL STEEL, AREAS 1 |
| 2233 | SV3-DOS-PHW-861516 | INSTALL PIPE SUPPORTS(SPIDERS) ON THE DESIEL FUEL OIL LINES FROM THE DESIEL GENERATOR |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| 2543 | SV4-CA20-S4W-CV4007 | CA20 WALL 2 NORTH FACE - OLPs AND WELDED ATTACHMENT INSTALLATION |
| 2544 | SV3-1208-CCW-851004 | COURSE 4 CONCRETE PLACEMENT |
| 2545 | SV3-ECS-EAW-EL3134 | INSTALL ANNEX BLDG ECS-EA DISTRIBUTION PANEL ROOM 40414 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2546 | SV3-1130-C0W-850008 | CONTAINMENT CONCRETE PLACEMENT REFUEL CAVITY ELEV 87'-6" TO ELEV 95' |
| 2547 | SV3-4031-ERW-861109 | Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100’, Battery Charger Room 40308 |
| 2548 | SV3-4031-ERW-861110 | Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100’, Battery Charger Room 40310 |
| 2549 | SV3-4031-ERW-861111 | Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100’, Battery Room 40307 |
| 2550 | SV3-4031-ERW-861112 | Installation of all Unscheduled Conduit for Lighting / Power Annex Bldg. Area 1, Elev. 100’, Battery Room 40309 |
| 2551 | SV3-1230-EGW-860944 | INSTALL GROUNDING FOR AUXILIARY BUILDING SHIELD WALL 100'-0" - 117'-6" |
| 2552 | SV4-WWS-P0W-860931 | INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM (WWS) PIPING |
| 2553 | SV3-WWS-P0W-ME4629 | FABRICATION AND INSTALLATION OF WWS I.E. PIPING ELEVATION 100' |
| 2554 | SV4-CA01-S4W-CV6528 | CA01 ELEV 87.5' TO 94' OLPS AND WELDED ATTACHMENTS |
| 2555 | SV3-CA02-S5W-CV6271 | CA02 MISC. WORK, MISC. UNSAT. IRS / N&DS AND E&DCRS |
| 2556 | SV3-PXS-PHW-ME3358 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01B |
| 2557 | SV3-R365-R3W-ME1694 | R365 MECHANICAL MODULE INSTALLATION |
| 2558 | SV4-ML05-MLW-ME6810 | INSTALLATION OF UNIT 4 CA20 WALL PENETRATIONS |
| 2559 | SV4-CA20-S4W-CV6827 | Installation of CA20 SA 1 Floor (Submodules 34,35,36,37) |
| 2560 | SV0-8200-MHW-CV7169 | MAB 50 TON OVERHEAD CRANE GIRDER CHANNEL WELDS |
| 2561 | SV4-WLS-THW-ME7680 | HYDRO TESTING OF KB27 WLS PIPING |
| 2562 | SV3-CA02-S5W-CV8034 | CA02 ON-SITE BASEMAT FABRICATION |
| 2563 | SV4-CA01-S4W-CV8682 | CA01-04 TEMPORARY WALL ATTACHMENTS |
| 2564 | SV3-WLS-PLW-ME0872 | Fabricate and Install WLS Piping Lines WLS-PL-L062, & L110B of Iso SV3-WLS-PLW-731 |
| 2565 | SV3-CB47-S5W-860988 | CB47 UNSATISFACTORY IRs / N&Ds / E&DCRs AND LOOSE PARTS - STRUCTURAL |
| 2566 | SV4-CA01-S4W-CV6484 | CA01-34 SUB MODULE INSTALLATION |
| 2567 | SV4-0000-C0W-850021 | TRANSFORMER FOUNDATION WALL POUR #21 |
| 2568 | SV4-WRS-P0W-ME5327 | Fabrication/Installation of Small Bore WRS Leak Chase Piping Including SV4-WRS-PLW-80D, -80E, -80F, -86M |
| 2569 | SV3-2035-SHW-860253 | ELECTRICAL CABLE TRAY SUPPORT INSTALLATION IN THE TURBINE BUILDING ELEVATION 100' AREA 5 ROOM 20300 |
| 2570 | SV4-0150-ERW-860386 | INSTALLATION OF CONDUIT SLEEVES FOR PENETRATION IN UNIT 4 TRANSFORMER AREA |
| 2571 | SV3-PXS-PHW-ME5539 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-298 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2572 | SV3-PXS-PHW-ME3783 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-025 |
| 2573 | SV3-PXS-PHW-ME3362 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01Z |
| 2574 | SV3-PXS-PHW-ME3360 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-01K |
| 2575 | SV3-PXS-PHW-ME3786 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-02E |
| 2576 | SV3-VWS-P0W-861115 | Install Isometric SV3-VWS-PLW-05A Large Bore Piping |
| 2577 | SV3-VWS-P0W-861116 | Install Isometric SV3-VWS-PLW-05K Large Bore Piping |
| 2578 | SV3-VWS-P0W-861117 | Install Isometric SV3-VWS-PLW-50A Large Bore Piping |
| 2579 | SV3-VWS-P0W-861119 | Install Isometric SV3-VWS-PLW-50L Large Bore Piping |
| 2580 | SV3-VWS-P0W-861120 | Install Isometric SV3-VWS-PLW-50W Large Bore Piping |
| 2581 | SV3-VWS-P0W-861121 | Install Isometric SV3-VWS-PLW-50X Large Bore Piping |
| 2582 | SV3-VWS-P0W-861122 | Install Isometric SV3-VWS-PLW-50Y Large Bore Piping |
| 2583 | SV3-VWS-P0W-861123 | Install Isometric SV3-VWS-PLW-50Z Large Bore Piping |
| 2584 | SV3-VWS-P0W-861124 | Install Isometric SV3-VWS-PLW-51A Large Bore Piping |
| 2585 | SV3-VWS-P0W-861125 | INSTALL ISOMETRIC SV3-VWS-PLW-51B LARGE BORE PIPING |
| 2586 | SV3-VWS-P0W-861126 | Install Isometric SV3-VWS-PLW-52A Large Bore Piping |
| 2587 | SV3-VWS-P0W-861128 | Install Isometric SV3-VWS-PLW-52L Large Bore Piping |
| 2588 | SV3-VWS-P0W-861129 | Install Isometric SV3-VWS-PLW-502 Large Bore Piping |
| 2589 | SV3-VWS-P0W-861130 | Install Isometric SV3-VWS-PLW-513 Large Bore Piping |
| 2590 | SV3-VWS-P0W-861131 | INSTALL ISOMETRIC SV3-VWS-PLW-519 LARGE BORE PIPING |
| 2591 | SV3-VWS-P0W-861134 | Install Isometric SV3-VWS-PLW-532 Large Bore Piping |
| 2592 | SV3-VWS-P0W-861135 | Install Isometric SV3-VWS-PLW-533 Large Bore Piping |
| 2593 | SV3-VWS-P0W-861136 | Install Isometic SV3-VWS-PLW-537 Large Bore Piping |
| 2594 | SV3-VWS-PHW-861139 | Install Isomertic SV3-VWS-PLW-50A Large Bore Pipe Supports |
| 2595 | SV3-VWS-PHW-861140 | Install Isometric SV3-VWS-PLW-50B Large Bore Piping Supports |
| 2596 | SV3-VWS-PHW-861141 | Install Isometric SV3-VWS-PLW-50L Large Bore Piping Supports |
| 2597 | SV3-VWS-PHW-861143 | Install Isometric SV3-VWS-PLW-50X Large Bore Pipe Supports |
| 2598 | SV3-VWS-PHW-861144 | Install Isometric SV3-VWS-PLW-50Y Large Bore Pipe Supports |
| 2599 | SV3-VWS-PHW-861145 | Install Isometric SV3-VWS-PLW-50Z Large Bore Pipe Supports |
| 2600 | SV3-VWS-PHW-861146 | Install Isometric SV3-VWS-PLW-51A Large Bore Pipe Supports |
| 2601 | SV3-VWS-PHW-861148 | Install Isometric SV3-VWS-PLW-52A Large Bore Pipe Supports |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2602 | SV3-VWS-PHW-861151 | Install Isometric SV3-VWS-PLW-502 Large Bore Pipe Supports |
| 2603 | SV3-VWS-PHW-861152 | Install Isometric SV3-VWS-PLW-513 Large Bore Pipe Supports |
| 2604 | SV3-VWS-PHW-861156 | Install Isometric SV3-VWS-PLW-532 Large Bpre Pipe Supports |
| 2605 | SV3-VWS-PHW-861157 | Install Isometric SV3-VWS-PLW-533 Large Bore Pipe Supports |
| 2606 | SV3-VWS-PHW-861158 | Install Isometric SV3-VWS-PLW-537 Large Bore Pipe Supports |
| 2607 | SV0-ZRS-EWW-TP1795 | Temporary Power for NOI 7 |
| 2608 | SV3-VCS-SHW-ME2331 | INSTALLATION OF CONTAINMENT VCS HVAC SUPPORTS FOR AZIMUTH 240 - 285 |
| 2609 | SV3-PSS-P0W-ME7503 | ASME SECTION III Fabrication/Installation of Isometric SV3-PSS-PLW-715 (Line Number PSS-PL-T081B) |
| 2610 | SV3-1210-CEW-CV7695 | NDE OF JOSEPH OAT EMBED PLATES WITH WELDABLE COUPLERS |
| 2611 | SV0-0000-M0W-MU7690 | Mock-up for Qualification of ASME Tube Bending |
| 2612 | SV0-0000-MYW-CT7674 | MECHANICAL/ABRASIVE CLEANING OF MISCELLANEOUS STEEL & EQUIPMENT. |
| 2613 | SV3-FPS-PHW-860506 | INSTALLATION OF FIRE PROTECTING SYSTEM SUPPORTS (FPS) |
| 2614 | SV0-CE01-CEW-CV7471 | NDE OF CIVES EMBEDS WITH WELDABLE COUPLERS |
| 2615 | SV4-WRS-THW-ME7465 | TESTING OF CA20 WALL LEAK CHASES AND CONNECTED PIPING |
| 2616 | SV0-CA20-CCW-MU6307 | CA20 CONCRETE PLACEMENT MOCK UP FOR CONSTRUCTION JOINT AT ELEV. 85'-0" |
| 2617 | SV3-RNS-MLW-860363 | ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-RNS-PY-C01 (P19) |
| 2618 | SV3-RNS-MLW-860364 | ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-RNS-PY-C02 (P20) |
| 2619 | SV3-SFS-MLW-860365 | ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SFS-PY-C02 (P22) |
| 2620 | SV3-CAS-P0W-ME6006 | INSTALLATION OF ANNEX BLDG CAS PIPING (ISO SV3-CAS-PLW-20J, 20K, 20L, & 20M) |
| 2621 | SV0-0000-CCW-CV5530 | Miscellaneous Grouting in 300 series Buildings/Yard |
| 2622 | SV3-MT2D-MEW-ME5377 | INSTALLATION OF MSR SHELL DRAIN TANK HDS-MT-02A/B |
| 2623 | SV3-1130-SLW-855000 | UPENDER PIT, FABRICATION |
| 2624 | SV4-CA01-S4W-CV6476 | CA01-32 SUBMODULE INSTALLATION |
| 2625 | SV4-1220-CCW-MU5102 | UNIT 4 MOCK-UP FOR CORE DRILLING IN CONCRETE PLACEMENT OUTSIDE THE CVBH AT ELEVATION 72'-6" |
| 2626 | SV3-CA20-S4W-CV4804 | SURVEY ROOMS FOR PLUMBNESS/LEVEL/WALL FLATNESS FOR SUB-ASSEMBLIES 1, 2, 3 & 4 |
| 2627 | SV3-CA01-V2W-CV4802 | INSTALL CA01 GUIDE PIN COLLAR MOUNTING PLATES |
| 2628 | SV3-ML05-MLW-ME4786 | INSTALLATION OF 100'0" AREA 3,4,5 PIPING PENETRATIONS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2629 | SV3-WRS-P0W-ME4753 | INSPECTION OF CASK WASHDOWN PIT LEAK CHASE PIPING |
| 2630 | SV3-1130-C0W-850004 | CONTAINMENT CONCRETE PLACEMENT REFUEL CAVITY ELEV 95' TO 98' 1/2" |
| 2631 | SV3-WRS-P0W-ME4752 | INSPECTION OF CASK LOADING PIT LEAK CHASE PIPING |
| 2632 | SV3-PXS-PHW-ME3780 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-021 |
| 2633 | SV3-WRS-P0W-ME4751 | INSPECTION OF FUEL TRANSFER CANAL LEAK CHASE PIPING |
| 2634 | SV3-WRS-P0W-ME4750 | INSPECTION OF SPENT FUEL POOL LEAK CHASE PIPING |
| 2635 | SV3-WRS-P0W-ME4563 | SV3-WRS-GNR-000054 REPAIR WORK FOR SV3-WRS-PLW-838 |
| 2636 | SV3-VYS-PHW-ME4479 | , FABRICATE AND INSTALL ANNEX HOT WATER HEATING SYSTEM (VYS) PIPING SUPPORTS FOR SV3-VYS-P0W-ME4478 , |
| 2637 | SV3-CAS-PHW-ME4475 | The installation of the Annex CAS Piping Support for WP ( SV3-CAS-P0W-ME4474) |
| 2638 | SV3-WRS-PLW-ME4462 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-84A) |
| 2639 | SV3-WRS-P0W-ME4456 | SV3-WRS-GNR-000056 REPAIR WORK FOR SV3-WRS-PLW-847 |
| 2640 | SV3-WRS-P0W-ME4451 | SV3-WRS-GNR-000057 REPAIR WORK FOR SV3-WRS-PLW-83C |
| 2641 | SV3-WRS-PLW-ME4449 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81F) |
| 2642 | SV3-WRS-PLW-ME4448 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81E) |
| 2643 | SV3-WRS-P0W-ME4430 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80B, 80C AND 80U |
| 2644 | SV3-VWS-P0W-ME4426 | ASME SECTION III- FABRICATION/ INSTALLATION OF ISOMETRIC# SV3-VWS-PLW-910 (LINE# VWS-PL-L032 |
| 2645 | SV3-WRS-P0W-ME4423 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-801, 80S, -86E |
| 2646 | SV3-SS01-Z0W-CV4377 | UNIT 3 STRUCTURAL STEEL SAFETY CLASS E REQUIREMENTS |
| 2647 | SV3-ASS-PHW-ME4294 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 5) |
| 2648 | SV4-1000-Z0W-CV3912 | UNIT 4 SHIELD BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 2649 | SV3-CAS-P0W-ME3429 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-336) |
| 2650 | SV4-MSS-P0W-860357 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING |
| 2651 | SV4-MSS-P0W-860358 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING |
| 2652 | SV3-WRS-P0W-ME3858 | SV3-WRS-GNR-000055 REPAIR WORK FOR SV3-WRS-PLW-872 |
| 2653 | SV3-WRS-P0W-ME3857 | SV3-WRS-GNR-000060 REPAIR WORK FOR SV3-WRS-PLW-83G |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2654 | SV3-WRS-P0W-ME3637 | SV3-WRS-GNR-000049 REPAIR WORK FOR SV3-WRS-PLW-81Q |
| 2655 | SV3-DTS-PHW-ME3582 | INSTALLATION OF PIPE SUPPORTS ON ISO SV3-DTS-PLW-01AP AND SV3-DTS-PLW-01AN |
| 2656 | SV3-PXS-P0W-ME3508 | ASME SECTION III - PERFORM RADIOGRAPHY TEST ON SV3-PXS-PLW-014 SHOP WELD 15 |
| 2657 | SV3-PGS-CCW-CV3426 | UNIT 3 JACK & BORE AND PGS ENCASEMENT CONSTRUCTION |
| 2658 | SV4-CCS-P0W-ME3112 | INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRIC SV4-CCS-PLW-740, 750) |
| 2659 | SV3-CVS-PHW-ME2926 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-110 |
| 2660 | SV4-CA20-S4W-CV4004 | CA20-01-MAP OUT TEMPORARY ATTACHMENTS |
| 2661 | SV3-WWS-PHW-ME3074 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2693) |
| 2662 | SV3-PXS-PHW-ME4508 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FO ISOMETRIC SV3-PXS-PLW-02V |
| 2663 | SV3-PXS-P0W-861007 | INSTALL ISOMETRIC SV3-PXS-PLW-934 LARGE BORE PIPING |
| 2664 | SV4-1000-XEW-CV2913 | UNIT 4 POWER BLOCK EXCAVATION AND BACKFILL OF UTILITIES |
| 2665 | SV3-PXS-P0W-ME2890 | ASME SECTION III- FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-018 (LINE NUMBERS PXS-PL-L112A) |
| 2666 | SV3-0000-EGW-EL2804 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV3-SITE STATION GROUNDING GRID) FOR GROUND GRID AREA, M1300 |
| 2667 | SV3-VWS-PHW-ME2800 | INSTALLATION OF VWS SUPPORTS FOR ISOMETRICS SV3-VWS-PLW-20L |
| 2668 | SV3-PXS-P0W-ME2751 | ASME Section III-Fabrication/Installation of Isometric# SV3-PXS-PLW-02R (Line Numbers PXS-PL-L136B) |
| 2669 | SV3-MS10-MEW-ME2472 | Install TB Sampling Rooms AHU (VTS-MS-01A/1B) |
| 2670 | SV4-1000-CRW-CV2374 | FABRICATION OF REBAR FOR UNIT 4 NUCLEAR ISLAND |
| 2671 | SV3-2053-SHW-EL8560 | Electrical Cable Tray Support Installation in the Turbine Building, Elevation 141’-3”, Area 2, Room 20500 |
| 2672 | SV3-ML05-MLW-ME1982 | ATTACHMENT OF WELDED COUPLINGS 82'-6" FLOOR PENETRATIONS |
| 2673 | SV4-RWS-MEW-TP1980 | REWORK ASSOCIATED WITH NONCONFORMANCE V-ND-11-0181 |
| 2674 | SV0-1208-SCW-MU1894 | MOCKUP-SHIELD WALL PANEL MOCKUP |
| 2675 | SV0-CA05-MHW-RI1887 | CONSTRUCTION OF CA05 PLATEN |
| 2676 | SV4-CWS-THW-ME1722 | UNIT 4 CIRCULATING WATER SYSTEM (CWS) HYDRO TEST FROM PRE CAST CONCRETE PIPE (PCCP) TO TURBINE BUILDING |
| 2677 | SV3-WLS-PLWP-ME1655 | Fabricate And Install WLS Piping Iso SV3-WLS-PLW-750 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 2678 | SV3-1220-CEW-CV1605 | Auxiliary Building Embed Plates & Anchor Bolts-EL 82'6" - Area 5&6 |
| 2679 | SV0-0000-M0W-MU1585 | Mock-up for Qualification of Cleaning Methods |
| 2680 | SV3-CWS-XEW-CV0056 | GROUTING OF PHASE 2 CWS PIPE JOINTS (PCCP) AND FLOWABLE FILL PLACEMENT |
| 2681 | SV3-ML05-MLW-ME6134 | ASME SECTION III - ATTACH CODE DATA PLATES ON CA20 PENETRATIONS |
| 2682 | SV3-2054-SHW-EL8954 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Below Elevation 169'-0" |
| 2683 | SV3-ME01-PLW-ME1167 | Condenser C-1st Extraction Piping (Extraction Steam) |
| 2684 | SV3-CA20-S4W-CV0436 | Installation of CA20 SA3 Overlay Plates RESERVED FOR RUSSELL FINDLEY |
| 2685 | SV4-CA20-MHH-040 | INSTALLATION OF UNIT 4 CA20 MODULE |
| 2686 | SV3-2070-SAW-850000 | ROOF ELEV. FLOOR SLAB. STUD INSTALLATION |
| 2687 | SV3-SGS-P0W-ME6695 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-SGS-PLW-080, -81 (LINE NUMBERS SGS-PL-L009B), , |
| 2688 | SV3-Q240-Q2W-861063 | INSTALLATION OF MECHANICAL MODULE 1120-Q2-40 |
| 2689 | SV4-2020-MEW-860398 | CONDENSER B CONECTION PIECE ASSEMBLY |
| 2690 | SV4-4032-ERW-860382 | INSTALLATION OF EMBEDDED CONDUIT, ANNEX BUILDING, AREA 2, ELEV. 100'-0" |
| 2691 | SV4-CWS-PHW-ME7146 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGAE SV4-CWS-P0W-ME7145 |
| 2692 | SV3-MT02-MHH-004 | LIFTING OF UNIT 3 ACCUMULATOR TANKS |
| 2693 | SV4-WLS-THW-861171 | PNEUMATIC TEST OF THE HDPE PORTION OF THE UNIT 4 WLS SYSTEM NORTH OF THE VEHICLE BARRIER DITCH |
| 2694 | SV3-WLS-THW-861170 | PNEUMATIC TEST OF THE HDPE PORTION OF UNIT 3 WLS SYSTEM NORTH OF THE VEHICLE BARRIER DITCH |
| 2695 | SV4-0000-C0W-850007 | TRANSFORMER FOUNDATION, WALL POUR #7 |
| 2696 | SV3-WLS-P0W-861168 | INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE ISOMETRICS SV3-WLS-PLW-80GD, 80GE, 80GF, 80GG, 80GH, 80GJ, 80GK, 80GL, 80GM, 80GN |
| 2697 | SV3-FPS-P0W-860729 | INSTALLATION OF FIRE PROTECTION PIPING |
| 2698 | SV4-CA01-S4W-CV6574 | U4-CA01 LIFTING FRAMES AND BRACING SUBMUDULES 27 THRU 31, -34 & -46 |
| 2699 | SV3-PXS-PHW-ME5672 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-320 |
| 2700 | SV3-PXS-PHW-881160 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-PXS-PLW-284 |
| 2701 | SV4-WLS-P0W-861169 | INSTALL ELECTRO-FUSION COUPLINGS IN UNIT 4 WLS LINE ISOMETRICS SV4-WLS-PLW-81GP, 81GQ, 81GR, 81GS, 81GU, 81GV, 81GW, 81GX, 81Y |

| 3015 | SV3-WWS-P0W-860880 | FABRICATION AND INSTALLATION OF WWS PIPING AND PIPING DRAINS IN FIRST BAY |
| 3016 | SV3-WWS-P0W-861107 | INSTALLATION OF ANNEX BLDG WWS PIPING (ISO SV3-WWS-PLW-434, 435, 436, 476 & 967) |
| 3017 | SV3-2068-SHW-800003 | Install welded cable tray supports in turbin building (elevation 170'0" and 193'6" area 8) |
| 3018 | SV3-5030-C0W-850001 | UNIT 3 RADWASTE BUILDING SUMP MUDMATS |
| 3019 | SV3-5030-C0W-850000 | UNIT 3 RADWASTE BUILDING MUDMAT |
| 3020 | SV4-DWS-PHW-861603 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISO SV4-DWS-PLW-131) |
| 3021 | SV3-SFS-PHW-861791 | FABRICATION/INSTALLATION OF B31.1 SUPPORTS FOR ISOMETRIC SV3-SFS-PLW-780 |
| 3022 | SV3-EDS-DSW-EL3125 | INSTALL ANNEX BLDG. NON CLASS 1E DC AND UPS SYSTEM - DC BUS JUNCTION CABINET LOAD GROUP SPARE, ROOM 40310, |
| 3023 | SV3-EDS-DSW-EL3121 | INSTALL ANNEX BLDG. NON CLASS 1E DC AND UPS SYSTEM - LOAD GROUP SPARE, ROOM 40308, |
| 3024 | SV4-KB10-KBW-861732 | MODULE KB10 STRUCTURAL FABRICATION |
| 3025 | SV4-1212-ERW-861217 | INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR DIVISION "A" BATTERY ROOM 12101 EL. 66'-6" |
| 3026 | SV3-4031-ERW-861247 | Install Cable Tray in Rms 40307-40310 Annex Bldg. Area 1, Elev. 100¿ (WP7) |
| 3027 | SV3-HDS-PHW-ME3765 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING SUPPORTS. |
| 3028 | SV3-HDS-P0W-ME3740 | INSTALLATION AND FABRICATION OF HDS PIPING |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3029 | SV3-MSS-P0W-ME4653 | INSTALLATION OF MSS PIPING |
| 3030 | SV4-2000-P0W-861999 | INSTALLATION OF TEMPORARY FIRE PROTECTION SYSTEM STANDPIPE |
| 3031 | SV4-2000-PHW-862000 | INSTALLATION AND FABRICETION OF TEMPORARY FIRE PROTECTION PIPING SUPPORTS |
| 3032 | SV3-CA37-CAW-850000 | CA37 MODULE FABRICATION |
| 3033 | SV4-CB32-CBW-850000 | CB32 MODULE INSTALLATION |
| 3034 | SV4-MT71-C0W-850006 | Waste Water Retention Basin Wall Pour # 6 |
| 3035 | SV4-CB33-CBW-850000 | CB33 MODULE INSTALLATION |
| 3036 | SV4-2060-C0W-850000 | UNIT 4, TURBINE GENERATOR DECK. 170' ELEV |
| 3037 | SV3-WWS-PHW-ME6703 | WASTE WATER SYSTEM 140' ELEVATION |
| 3038 | SV4-MSS-PHW-860360 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPE SUPPORTS |
| 3039 | SV4-4030-C0W-850002 | 100'-0" ELEV. WALL, POUR #2 |
| 3040 | SV4-4030-C0W-850001 | 100'-0" ELEV. WALL, POUR #1 |
| 3041 | SV3-MV90-MVW-862062 | INSTALLATION OF WLS WASTE PRE-/AFTER MODULE (WLS-MV-06 AND 07 |
| 3042 | SV3-CA01-CCW-850001 | Unit 3 CA01 Concrete Placement, Walls #1 through #4 from Elev. 87'-6" to 146'-10-1/2" |
| 3043 | SV3-MV90-MVW-862061 | INSTALLATION OF DEMINERALIZER OUTLET FILTER ALPHA AND BRAVO (SFS-MV-02A AND 02B) |
| 3044 | SV3-ME2L-MEW-ME5893 | INSTALLATION OF VYS HEAT EXCHANGER (VYS-ME-01A/B) AT ELEVATION 120'-6" |
| 3045 | SV3-4050-C0W-850019 | UNIT 3- ANNEX CONCRETE WALLS, CENTRAL W10 WALL, POUR #19 |
| 3046 | SV3-HDS-P0W-ME3739 | INSTALLATION AND FABRICATION OF HDS PIPING |
| 3047 | SV3-1232-ERW-861441 | INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN UNIT 3 AUX BUILDING FLOOR SLABS, EL 100'-0" AREA 2 RMS. 12301, 12302, 12303 & 12311 |
| 3048 | SV3-CVS-PHW-ME0808 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-506 |
| 3049 | SV4-WWS-P0W-862031 | INSTALLATION AND FABRICATION OF WASTE WATER (WWS) SYSTEM PIPING FOR SLAB 2 |
| 3050 | SV3-2101-C0W-850402 | 122' ELEV WALLS, POUR 2NE |
| 3051 | SV3-2101-C0W-850403 | 122' ELEV WALLS, POUR 2NW |
| 3052 | SV3-MSS-PHW-ME4674 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM(MSS) PIPING SUPPORT |
| 3053 | SV3-2101-C0W-850401 | 122' ELEV. WALLS, POUR 2SE |
| 3054 | SV3-HDS-PHW-ME3754 | TURBINE BUILDING HDS PIPE SUPPORT INSTALLATION |
| 3055 | SV3-2101-C0W-850404 | 122' Elev., Walls, Pour2SW |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3056 | SV3-MSS-PHW-ME4684 | INSTALLATION AND FABRICATION FO MAIN STEAM SYSTEM(MSS) PIPING SUPPORTS |
| 3057 | SV3-PXS-P0W-ME2951 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-410 (LINE NUMBERS PXS-PL-L121A), , |
| 3058 | SV3-RNS-PHW-861881 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-411 |
| 3059 | SV3-PXS-P0W-850940 | INSTALL ISOMETRIC SV3-PXS-PLW-940 LARGE BORE PIPING |
| 3060 | SV3-RNS-PHW-861877 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-021 |
| 3061 | SV0-SES-ERW-EL1842 | INSTALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (SES) PLANT SECURITY SYSTEM EAST OF THE ANNEX BLDG. - PHASE 1 |
| 3062 | SV0-ZFS-ERW-EL1797 | INSTALLATION OF UNDERGROUND COMMODITIES (MANHOLES AND DUCTBANKS) FOR THE (EFS/ZFS) COMMUNICATIONS SYSTEM FROM THE ANNEX BLDG. TO MANHOLE NZM026 - PHASE 1 |
| 3063 | SV3-0000-EGW-EL2236 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE TRANSFORMER AREA, ELEV. 100' |
| 3064 | SV4-MT2Y-MEW-861646 | HDS LOW PRESSURE DRAIN TANKS (MT-04A/B/C) |
| 3065 | SV3-MSS-PHW-ME4693 | INSTALLATION OF MSS PIPE SUPPORTS |
| 3066 | SV4-WRS-P0W-861604 | INSTALLATION OF ANNEX BLDG WRS PIPING (ISO SV4-WRS-PLW-411, 412, 413, 414, 420, 421 & 430 |
| 3067 | SV4-2030-SHW-861086 | INSTALLATION OF TURBINE 4 CABLE TRAY SUPPLEMENTARY STEEL ON THE 100'-0" ELEVATION AREAS 0, 1 & 4, FROM COLUMNS K.1 TO R AND 12.1 TO 14. |
| 3068 | SV3-2043-SHW-861331 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 3, COLUMNS 18 TO19 & P.2 TO R |
| 3069 | SV3-RNS-PHW-861878 | ASME SECTION III - FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-190 |
| 3070 | SV3-CB00-S5W-CV2819 | INSTALLATION OF SHEAR STUD FOR CB MODULES |
| 3071 | SV3-ME01-PLW-ME1534 | UNIT 3 CONDENSER B: INSTALLATION OF WATER CURTAIN PIPING |
| 3072 | SV3-SWS-PLW-ME1484 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-010, 020) |
| 3073 | SV3-CA32-CAW-850000 | Unit 3, CA32 Module Fabrication |
| 3074 | SV3-SGS-P0W-ME6693 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC SV3-SGS-PLW-070 (LINE NUMBERS SGS-PL-L009A) |
| 3075 | SV3-2042-SHW-861327 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120' - 6", AREA 2, SOUTH OF COLUMN 18 & P.1 TO R |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3076 | SV3-4040-AMW-850001 | MASONRY WALLS, SWITCH GEAR ROOM 40414 AND 40413 |
| 3077 | SV3-1200-C0W-850002 | S02 STAIR TOWER TREADS, CONCRETE PLACEMENT |
| 3078 | SV3-WWS-C0W-850001 | UNIT 3 WWs OIL SEPARATOR, RETAINING WALLS AND EQUIP PADS POUR #1 |
| 3079 | SV4-WWS-C0W-850001 | UNIT 4, WWS OIL SEPARATOR, RETAINING WALLS AND EQUIP PADS POUR #1 |
| 3080 | SV3-CA36-S5W-861650 | CA36-Module Fabrication/Assembly of Loose parts |
| 3081 | SV4-1212-ERW-861219 | INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR DIVISION "C" BATTERY ROOM 12102 EL. 66'-6" |
| 3082 | SV3-4050-C0W-850020 | UNIT 3, ANNEX CONCRETE WALLS, W09 AND NORTH W10 WALLS, POUR #20 |
| 3083 | SV4-0000-C0W-850009 | Transformer Foundation, Wall Pour # 9 |
| 3084 | SV4-2060-SSW-850013 | TB13 STEEL ERECTION |
| 3085 | SV3-PXS-PHW-862100 | AMSE SECTION III - FABRICATION/ INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-PXS-PLW-740 |
| 3086 | SV3-RNS-PHW-861886 | ASME SECTION III - FABRICATION/ INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-014 |
| 3087 | SV3-PXS-P0W-851930 | INSTALL ISOMETRIC SV3-PXS-PLW-930 LARGE BORE PIPING |
| 3088 | SV3-PXS-P0W-850930 | INSTALL ISOMETRIC SV3-PXS-PLW-93A SMALL BORE PIPING |
| 3089 | SV3-PXS-P0W-850949 | INSTALL ISOMETRIC SV3-PXS-PLW-949 SMALL BORE PIPING |
| 3090 | SV3-PXS-P0W-850931 | INSTALL ISOMETRIC SV3-PXS-P0W-850931 |
| 3091 | SV4-SFS-P0W-850757 | INSTALL ASME PIPE FROM ISOMETRIC SV4-SFS-PLW-757 |
| 3092 | SV3-1212-ERW-EL4749 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL DESIGNED TRAY SUPPORTS |
| 3093 | SV3-CVS-PHW-ME3336 | INSTALLATION OF BORIC ACID CVS PIPING SUPPORTS FOR WP (SV3-CVS-P0W-ME3327). |
| 3094 | SV3-RNS-P0W-850017 | INSTALL ISOMETRIC SV3-RNS-PLW-17A |
| 3095 | SV4-RNS-PHW-861621 | ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-141 |
| 3096 | SV3-PXS-P0W-862101 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPING FOR ISOMETRIC SV3-PXS-PLW-012 |
| 3097 | SV4-RNS-PHW-861624 | ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRICS SV4-RNS-PLW-210 & -214 |
| 3098 | SV3-2131-SHW-862185 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNI 3 TURBINE BUILDING, FIRST BAY AREA1. EL. 100'-0", COLUMNS 11 TO 12.1 AND COLUMNS P.2 TO R. |
| 3099 | SV3-2131-SHW-862187 | ELECTRICAL CABLE TRAY SUPPLEMENTAL TRAY STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, FIRST BAY AREA 1, EL. 100'-0", COLUMNS 11 TO 12.1 AND WEST OF 1.2 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3100 | SV3-2053-SHW-861210 | Electrical Cable Tray Welded (floor stand) Support Installation in the Unit 3 Turbine Building, Elevation 141'3", Area 3 |
| 3101 | SV3-FPS-P0W-850055 | INSTALL LARGE BORE PIPE PER ISO SV3-FPS-PLW-55MM |
| 3102 | SV3-TDS-P0W-861539 | INSTALLATION AND FABRICATION OF TURBINE ISLAND DRAINS VENTS AND REFLIEF SYSTEM(tds)PIPING |
| 3103 | SV4-1212-ERW-861220 | INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN BATTERY ROOM "C", ROOM 12102 EL. 66¿-6¿ |
| 3104 | SV3-2131-SHW-862186 | ELECTRICAL CABLE TRAY SUPPLEMENT STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING FIRST BAY AREA 1, EL. 100'-0", COLUMNS 11 TO 12.1 AND COLUMNS K.5 TO L.5 |
| 3105 | SV4-1212-ERW-861222 | INSTALL DESIGN ROUTED CONDUIT AND CONDUIT SUPPORTS IN "SPARE" BATTERY ROOM 12103 EL. 66¿ |
| 3106 | SV3-WWS-P0W-ME6281 | WWS PIPING TO THE UNIT 3 WASTE WATER RETENTION BASIN |
| 3107 | SV3-PWS-PHW-862040 | INSTALLATION OF ANNEX BLDG PWS PIPE SUPPORTS (ISO SV3-PWS-PLW-111, 112, 116, 142, 143, 145, 151, 152, 441 & 459) |
| 3108 | SV3-MH20-MHW-861870 | 15T Crane Initialization Package |
| 3109 | SV3-4000-SHW-862352 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-58A, ANNEX BUILDING, ALL AREAS/ELEVATIONS, BOOK 1 |
| 3110 | SV3-PWS-P0W-862039 | INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV3-PWS-PLW-111, 112, 116, 142, 143, 145, 151, 152, 441 & 459 |
| 3111 | SV4-RNS-P0W-861667 | ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-17C |
| 3112 | SV3-PXS-P0W-850942 | INSTALL ISOMETRIC SV3-PXS-PLW-942 LARGE BORE PIPING |
| 3113 | SV3-PCS-P0W-850810 | INSTALL PIPING PER ISO SV3-PCS-PLW-810 |
| 3114 | SV3-1214-JCW-862429 | STAGE GRAB SAMPLE PANEL PACKAGE (SV3-PSS-MS-01) IN ROOM 12152M AREA 4, ELEV. 66'-6" |
| 3115 | SV0-SES-ERW-862488 | INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID J1603-K1402 |
| 3116 | SV4-1120-EJW-861993 | FABRICATION AND INSTALLATION OF EX-CORE DETECTOR PMS JUNCTION BOX SUPPORTS IN ROOMS 11202 & 1104 EL 84'-6" |
| 3117 | SV4-PWS-P0W-800001 | Install Small Bore Pipe & Supports Per SV4-PWS-PLW-053 |
| 3118 | SV3-ZBS-EWW-861313 | Cable Pull from Switchyard Control House to Unit 3 Turbine |
| 3119 | SV4-CA01-CCW-850004 | CA01 CONCRETE WALL PLACEMENT SEC 6 A, B, C, & D AND 9 |
| 3120 | SV3-CA01-CCW-850004 | CA01 CONCRETE WALL PLACEMENT SEC 6 A, B, C, & D AND 9 |
| 3121 | SV4-PWS-P0W-862369 | INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV4-PWS-PLW-115, - 457 & -458 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3122 | SV4-CAS-PHW-800001 | Install Small Bore Supports per Isometric SV4-CAS-PLW-839 |
| 3123 | SV3-VWS-PLW-ME2798 | INSTALL PIPING FOR IS0 #'S SV3-VWS-PLW-20K, SV3-VWS-PLW-20L, SV3-VWS-PLW-20M. |
| 3124 | SV3-2151-SSW-800000 | First Bay, 135'-3" Elev. Structural Steel |
| 3125 | SV3-FPS-PHW-851055 | INSTALL PIPE SUPPORTS FOR ISO SV3-FPS-PLW-55M |
| 3126 | SV4-MT71-C0W-850015 | Waste Water Retnetion Basin Wall Pour # 15 |
| 3127 | SV4-MT71-C0W-850017 | Waste Water Retention Basin Wall Pour # 17 |
| 3128 | SV3-1222-CSW-850100 | S01 STAIR TOWER FOR NI 3, AUX BUILD, AREA 2 |
| 3129 | SV4-RNS-P0W-861628 | ASME III FABRICATION/INSTALLATION OF CA20 SMALL BORE PIPING FOR ISOMETRICS SV4-RNS-PLW-211, -216 & -218 |
| 3130 | SV3-PCS-P0W-850833 | INSTALL ASME III LB PIPING FROM ISOMETRIC SV3-PCS-PLW-833 |
| 3131 | SV3-PCS-P0W-850830 | INSTALL ISOMETRIC SV3-PCS-PLW-830 |
| 3132 | SV4-RNS-PHW-861629 | ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRICS SV4-RNS-PLW-211 & -216 |
| 3133 | SV3-PXS-P0W-850933 | INSTALL ISOMETRIC SVE-PXS-PLW-933 LARGE BORE PIPING |
| 3134 | SV3-PWS-P0W-862367 | INSTALLATION OF ANNEX BLDG PWS PIPING (ISO SV3-PWS-PLW-115, -457 & 458 |
| 3135 | SV3-HDS-P0W-860763 | INSTALLATION AND FABRICATION OF HDS PIPING |
| 3136 | SV4-CA20-C0W-850003 | CA20 FLOOR SLABS 34 thru 37 |
| 3137 | SV3-4040-AMW-850003 | MASONRY WALLS, ROOMS 40412 AND 40411 |
| 3138 | SV3-CDS-PHW-860479 | INSTALLATION OF CDS PIPING SUPPORTS |
| 3139 | SV3-WWS-PHW-860657 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 3140 | SV3-WWS-PHW-860656 | FABRICATION AND INSTALLATION OF WWS PIPING HANGERS |
| 3141 | SV3-1000-TIW-862440 | BIG SPAN CV COVER TEMPORARY ELECTRICAL |
| 3142 | SV3-WWS-PHW-861108 | Installation of Annex WWS Piping Supports |
| 3143 | SV4-WLS-PHW-861363 | INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-33D & 33E |
| 3144 | SV4-WLS-PHW-861361 | INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-980 & -981 |
| 3145 | SV3-40302-AEW-800000 | Architectural Ceiling System, Room 40302 |
| 3146 | SV4-2020-ERW-861800 | INSTALLATION OF CABLE TRAY RACEWAY ON THE 82'-9" ELEVATION OF THE TURBINE BUILDING |
| 3147 | SV3-2037-ERW-862159 | INSTALLATION OF ELECTRICAL CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, EL. 100'-0" AREA 7 |
| 3148 | SV4-CB41-CBW-800000 | CB41 Module Installation |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3149 | SV4-CB37-CBW-800000 | CB37 Module Installation |
| 3150 | SV4-CB43-CBW-800000 | CB43 Module Installation |
| 3151 | SV4-1130-C0W-800001 | Reinforced Concrete inside Containment, Reactor Cavity, from 87'-6" to 98'-0" Elev. |
| 3152 | SV4-1130-C0W-800002 | Reinforced Concrete inside Containment, Refuel Cavity up to 95' Elev. |
| 3153 | SV3-PCS-P0W-850051 | INSTALL PIPE ISOMETRIC SV3-PCS-PLW-051 LARGE BORE PIPE |
| 3154 | SV4-ME01-PLW-861889 | UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING |
| 3155 | SV4-ME01-PLW-861887 | UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING |
| 3156 | SV4-0000-ELW-862490 | INSTALLATION OF CONDUIT FOR UNIT 4 STANDARD PLANT YARD TRANSFORMER AREA LIGHTING |
| 3157 | SV4-2060-EGW-862155 | EMBEDDED GROUNDING INSTALLATION FOR TURBINE 4 AT ELEVATIONS 148'-10", 158'-7" AND 170'-0" |
| 3158 | SV4-0000-ELW-862487 | CABLE PULL AND FIXTURES FOR UNIT 4 STANDARD PLANT TRANSFORMER AREA LIGHTING |
| 3159 | SV3-FPS-P0W-850521 | INSTALL LARGE BORE FPS PIPING ISO SV3-FPS-PLW-521 |
| 3160 | SV4-ME01-PLW-861890 | UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 4TH EXTRACTION STEAM PIPING |
| 3161 | SV4-RNS-P0W-861697 | ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-173 |
| 3162 | SV4-RNS-PHW-861678 | ASME III FABRICATION/INSTALLATION FO PIPE SUPPORTS FOR SV4-RNS-PLW-17S |
| 3163 | SV4-RNS-PHW-861703 | ASME III FABRICATION/INSTALLATION OF CA20 PIPE SUPPORTS FOR ISOMETRIC SV4-RNS-PLW-176 |
| 3164 | SV3-R261-ERW-862645 | INSTALLATION OF ELECTRICAL CABLE TRAY AND TRAY GROUNDING IN MODULE R261 |
| 3165 | SV3-SGS-MLW-861041 | ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C03A (P27) |
| 3166 | SV3-SGS-MLW-861042 | ASME SECTION III - INSTALLATION OF CONTAINMENT VESSEL PENETRATION SV3-SGS-PY-C03B (P28) |
| 3167 | SV3-FPS-P0W-854200 | INSTALL SPOOLS FOR SV3-FPS-PLW-55A, 55B, 55C, 559, 55U, 558, 55X, 55T, 556 |
| 3168 | SV3-4031-SHW-861532 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, WEST OF BATTERY CHARGER ROOMS, BETWEEN COLUMN LINES 9/10.05. |
| 3169 | SV3-5030-C0W-850006 | UNIT 3 RADWASTE BUILDING, REBAR FABRICATION FOR GRADE BEAMS & TRENCHES |
| 3170 | SV4-ME01-PLW-862149 | UNIT 4 CONDENSER B TO C INTERCONNECTION PIPING |
| 3171 | SV4-0000-C0W-850025 | TRANSFORMER MSU PEDESTAL |
| 3172 | SV4-1208-C0W-800011 | 100'-0" - Cylindrical Wall - RC02 |
| 3173 | SV3-CA33-S5W-862273 | CA33- SEAM WELDS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3174 | SV3-WWS-PHW-860658 | INSTALLATION OF WWS PIPE SUPPORTS |
| 3175 | SV3-RNS-PHW-861875 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-013 |
| 3176 | SV3-CA33-S5W-862462 | CA33 MODULE - INSTALL SHIPPED LOOSE PARTS |
| 3177 | SV3-WLS-P0W-ME3726 | INSTALLATION OF LARGE BORE WLS PIPING (ISOMETRICS SV3-WLS-PLW-534,-535,-536,-53A) |
| 3178 | SV4-WLS-PHW-861367 | INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-35L, -35K, -35M & -90B |
| 3179 | SV3-2042-SHW-861328 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING AREA 2, EL. 120'-6", NORTH OF COLUMN 17 AND BETWEEN COLUMNS P.1 TO R |
| 3180 | SV4-MT71-C0W-850014 | Waste Water Retention Basin Wall Pour # 14 |
| 3181 | SV4-1160-SPW-800000 | SPL22, 23 & 24 Installation |
| 3182 | SV4-WRS-P0W-800005 | Install Large Bore Pipe per Isometric SV4-WRS-PLW-59P |
| 3183 | SV3-WSS-PHW-ME4397 | FABRICATION/INSTALLATION OF SMALL BORE WSS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WSS-PLW-510, 511, 512) |
| 3184 | SV3-CA01-CCW-850002 | CA01 Concrete, Wall Placements #2 through #4 from Elev. 146'-10-1/2" to 153'-0", and #17 and #18 to Elev. 158'-0" |
| 3185 | SV4-WRS-P0W-800006 | Install Large Bore Pipe per Isometric SV4-WRS-PLW-59Y |
| 3186 | SV4-1208-CCW-851002 | UNIT 4 SHIELD BUILDING COURSE 2 CONCRETE FILL |
| 3187 | SV4-CA20-C0W-850009 | 90'-3" & 92'-6" ELEV CA20 FLOOR SLABS, CA20-43 THRU 46 FLOORS, ROOM 12463 & 12365 |
| 3188 | SV3-2131-SHW-800004 | Electrical Cable Tray Supports Turbine Building First Bay Elevation 100'0" Area 1 |
| 3189 | SV4-RNS-PHW-861666 | ASME III FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR SV4-RNS-PLW-17B |
| 3190 | SV4-PXS-PHW-851021 | INSTALL SV4 RING 2 SUPPORTS FROM PIPE ISOMETRIC SV4-PXS-PLW-938 |
| 3191 | SV3-4031-AWW-850000 | UNIT 3 - ANNEX BUILDING, WALL FRAMING, 100' EL., ROOMS 40300 AND 40302 |
| 3192 | SV3-4051-ERW-862397 | INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 1, ELEV. 135'-3" |
| 3193 | SV3-CA01-CCW-850013 | UNIT 3 CA01 CONCRETE WALL PLACEMENT SECTION #16 UP TO 116'-6" |
| 3194 | SV3-2058-SHW-800000 | Elec Cable Tray Welded Support Fab & Install in Unit 3 Turbine Building, Elevation 141’ 3”, Area 8 |
| 3195 | SV4-RNS-P0W-800003 | Install LB Pipe from ISO SV4-RNS-PLW-17F |
| 3196 | SV4-CAS-P0W-800002 | Install small bore pipe and supports per SV4-CAS-PLW-86C |
| 3197 | SV4-2070-C0W-850005 | ROOF ELE. FLOOR SLAB, POUR #5 |
| 3198 | SV3-1208-C0W-850007 | UNIT 3 CYLINDRICAL WALL - POUR RC07A |

| 3322 | SV3-CA20-S5W-CV1501 | CA20 Installation of Rebar Couplers Removed for Testing |
| 3323 | SV3-CA20-S8W-CV2878 | INSTALL COMMODITIES IN CA20 MODULE FROM ELEVATION 82'6" TO 92'6" FOR ROOMS 12166, 12167, 12262, 12264, 12265 AND 12268 |
| 3324 | SV3-CB00-S8W-CV3227 | INSTALLATION OF CB MODULES 61, 62, 63 & 64 AT ELEVATION 80'0 |
| 3325 | SV3-R151-ERW-EL3772 | INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R151 |
| 3326 | SV3-R155-ERW-EL2805 | INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R155 |
| 3327 | SV3-SDS-PHW-ME2548 | INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2421) |
| 3328 | SV3-WWS-PHW-ME3044 | INSTALLATION OF WWS PIPE SUPPORTS FOR SLAB 3 AT 120' 6" ELEVATION PORTION 2 |
| 3329 | SV3-CVS-P0W-ME2661 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-802) |
| 3330 | SV3-CVS-P0W-ME2824 | INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-011) |
| 3331 | SV3-CVS-P0W-ME2827 | Installation of Large Bore CVS Piping (Includes Isometrics: SV3-CVS-PLW-195) |
| 3332 | SV3-CVS-PHW-ME2921 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-04J |
| 3333 | SV3-CVS-PHW-ME2927 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-290 |
| 3334 | SV3-CVS-PHW-ME2928 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-292 |
| 3335 | SV3-CVS-PHW-ME2929 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-800 |
| 3336 | SV3-CWS-P0W-ME2179 | FABRICATION AND INSTALLATION OF CWS PIPING FROM STRAINERS SV3-CWS-PY-C01A/B/C TO HEAT EXCHANGERS SV3-TCS-ME-01A/B/C. |
| 3337 | SV3-CWS-P0W-ME2197 | FABRICATION AND INSTALLATION OF CWS PIPING IN TURBINE ROOM 20309 FROM CWS HEADER TO CMS-ME-01A/B/C/D (ELEVATION 90FT TO 101 FT) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3338 | SV3-CWS-P0W-ME2214 | Farbrication And Installation of CWS Piping In Turbine Room 20309 From CWS Header To CMS-ME-01A/B/C/D (Elevation 101 FT To 129 FT) |
| 3339 | SV3-CWS-PHW-ME2180 | FABRICATION AND INSTALLATION OF CWS PIPING SUPPORTS FROM STRAINERS SV3-CWS-PY-C01A/B/C TO HEAT EXCHANGERS SV3-TCS-ME-01A/B/C. |
| 3340 | SV3-CWS-PLW-ME2505 | INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-737 |
| 3341 | SV3-DOS-EWW-EL2623 | INSTALL (PULL) ELECTRICAL LEAK DETECTION CABLES FOR THE (DOS) DIESEL OIL SYSTEM |
| 3342 | SV3-DOS-PHW-ME2312 | Install Pipe Supports (Spiders) on the Diesel Fuel Oil Lines East of Unit 3 Annex. |
| 3343 | SV3-DTS-PHW-ME1515 | Fabricate and Install Demineralized Water Treatment System (DTS) supports portion 1-(Raw Water Supply to DTS-MS-01) |
| 3344 | SV3-DTS-PLW-ME1514 | Fabricate and Install Demineralized Water Treatment System (DTS) piping (DTS-MT-02 DRAIN) |
| 3345 | SV3-DWS-P0W-ME2606 | FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON THE ISOMETRIC DRAWING SV3-DWS-PLW-067 |
| 3346 | SV3-DWS-P0W-ME2607 | FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-DWS-PLW-732 & SV3-DWS-PLW-733 |
| 3347 | SV3-DWS-P0W-ME2608 | FABRICATE AND INSTALL DWS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-DWS-PLW-755 & SV3-DWS-PLW-756 |
| 3348 | SV3-DWS-P0W-ME6351 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISOMETRICS SV3-DWS-PLW-139 & -143 |
| 3349 | SV3-DWS-PHW-ME3339 | FABRICATE AND INSTALL DEMINERALIZED WATER PIPING SUPPORT IAW SV3-DWS-PLW-150, SV3-DWS-PLW-247 |
| 3350 | SV3-DWS-PHW-ME4473 | INSTALLATION OF ANNEX DWS PIPING SUPPORT FOR WP (SV3-DWS-P0W-ME4472) |
| 3351 | SV3-DWS-PHW-ME6675 | INSTALLATION OF ANNEX BLDG DWS PIPE SUPPORTS (ISOMETRICS SV3-DWS-PLW-140, -141) |
| 3352 | SV3-ECS-ERW-EL2717 | SV3- INSTALL ECS DUCT BANKS FROM MANHOLES NXM010, NXM011 TP FIRE PUMPS/ FIRE WATER TANKS- PHASE 3A |
| 3353 | SV3-ECS-ERW-EL2718 | SV3-INSTALL ECS DUCT BANKS FROM NORTH SIDE OF UNIT 3 TURBINE BLDG. TO CHEMICAL FEED STORAGE BLDG. - PHASE 3/4 |
| 3354 | SV3-ECS-ERW-EL2719 | SV3 - INSTALL ECS DUCT BANKS FROM SWS COOLING TOWERS TO PASSIVE CONTAINMENT COOLING TANK/DTS/WESTSIDE OF TURBINE BLDG. - PHASE 3/4 |
| 3355 | SV3-FPS-P0W-ME4957 | FABRICATE AND INSTALL THE UNIT 3 FIRE PROTECTION SYSTEM (FPS) PIPING ON ISOMETRICS (SV3-FPS-PLW-956, 957, 95AM, 95AN) |
| 3356 | SV3-FPS-P0W-ME6783 | FABRICATE AND INSTALL THE UNIT 3 FIRE PROTECTION SYSTEM (FPS) ON ISOMETRICS (SV3-FPS-PLW-958, 959, 95AQ, 95AS, 95AT) |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3357 | SV4-SWS-PLW-ME2362 | INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-040, SV4-SWS-PLW-041, SV4-SWS-PLW-042, SV4-SWS-PLW-043, |
| 3358 | SV4-SWS-PLW-ME2364 | INSTALLATION OF SWS PIPING FOR ISOMETRICS SV4-SWS-PLW-050, SV4-SWS-PLW-051, SV4-SWS-PLW-052, SV4-SWS-PLW-053, |
| 3359 | SV3-FPS-PHW-ME2474 | INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2471) |
| 3360 | SV3-FPS-PHW-ME2480 | INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2479) |
| 3361 | SV3-FPS-PHW-ME2577 | INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2574) |
| 3362 | SV3-FPS-PLW-ME2471 | INSTALLATION OF ANNEX FPS PIPING PACKAGE #1 |
| 3363 | SV4-WRS-PLW-ME1761 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-59W, 593, 59E, 59F AND 59X) |
| 3364 | SV3-FPS-PLW-ME2479 | INSTALLATION OF ANNEX FPS PIPING PACKAGE #2 |
| 3365 | SV3-FPS-PLW-ME2573 | INSTALLATION OF ANNEX FPS PIPING PACKAGE #3 |
| 3366 | SV3-FPS-PLW-ME2574 | INSTALLATION OF ANNEX FPS PIPING PACKAGE #4 |
| 3367 | SV3-FPS-THW-ME2128 | HYDRO TEST PACKAGE FOR UNIT 3 PHASE 1 FIRE PROTECTION SYSTEM (FPS) |
| 3368 | SV3-1110-ADW-CV4326 | INSTALLATION OF RCDT COMPARTMENT REACTOR CAVITY SHIELD DOOR |
| 3369 | SV3-1120-CEW-CV5777 | U3 CONTAINMENT CONCRETE CA01 BASEMAT CONNECTION EMBED PLATES EL 87'-6" TO 107'-3" |
| 3370 | SV3-1210-ERW-EL3170 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 6, INSTALL SCHEDULED CONDUIT AND TYPICAL SUPPORTS. |
| 3371 | SV3-1220-ERW-EL2744 | Conduit Sleeves, Unit 3 Auxiliary Building Floor Slab, Elevation 82'-6", Area 1 & 2 |
| 3372 | SV3-1220-ERW-EL3188 | INSTALL ELECTRICAL PENETRATIONS IN AUX BUILDING SHIELD WALL FROM 82'-6" TO 100'-0" |
| 3373 | SV3-1220-ERW-EL3285 | INSTALL ELECTRICAL CONDUIT SLEEVES IN UNIT 3 AUXILIARY BUILDING FLOOR SLAB, 82'-6", SECTION 2, IN ROOMS 12211 & 12212. |
| 3374 | SV3-1224-EYW-EL3326 | INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN PRECAST CONCRETE PANEL. AND CAST-IN-PLACE CONCRETE (ABOVE PRECAST CONCRETE PANELS) UNIT 3, AUXILIARY BUILDING, ELEVATION 92'-6", AREA 4 |
| 3375 | SV3-1230-EGW-EL2883 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 1, 2 & 3 |
| 3376 | SV3-1230-EGW-EL2884 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 100'-0" SLAB AREAS 4, 5 & 6 |
| 3377 | SV3-1230-SSW-CV4311 | AUX BLD STRUCTURAL STEEL 82'-6" TO 100'-0" AREA 1 AND 2 |
| 3378 | SV3-2000-SSW-CV3088 | TURBINE BLDG. HOUSE STEEL IN-PROCESS REPAIR/REWORK (SEQ7-SEQ11) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3379 | SV3-2020-ERW-EL4488 | ELECTRICAL CABLE TRAY INSTALLATION FOR THE TURBINE BUILDING AT ELEVATION 82'-9" |
| 3380 | SV3-2033-SHW-EL6791 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BLDG, ELEV 100'-0" AREA 3 FROM COLUMNS 18 TO 19 & L.1 TO P.2 |
| 3381 | SV3-2038-SHW-EL6796 | Electrical Cable Tray Steel Installation in the Turbine Building, Elevation 100'-0", Area 8 from Colmns 12.1 to14 & H.05 to 1.2 |
| 3382 | SV3-2040-EGW-EL3352 | ELECTRICAL GROUNDING TERMINATIONS FOR THE UNIT # 3 TURBINE BUILDING AT ELEVATIONS 117'-6" AND 120'-6". |
| 3383 | SV3-2060-CEW-CV4838 | UNIT 3 TURBINE BLDG CA81 STEAM TURBINE GENERATOR FOUNDATION ANCHOR BOLT INSTALLATION AT EL. 170'-0" |
| 3384 | SV3-2060-SSW-CV7041 | TURBINE BLDG HOUSE STEEL IN-PROCESS REPAIR/REWORK (SEQUENCE 12 - SEQUENCE 16) |
| 3385 | SV3-2130-CCW-CV5214 | UNIT 3 TURBINE BUILDING FIRST BAY MISCELLANEOUS GROUTING AT ELEVATION 100'-0" |
| 3386 | SV3-2131-EYW-EL2912 | ELECTRICAL WALL PENETRATIONS FOR THE FIRST BAY TURBINE BUILDING AT ELEVATION 100'-0" |
| 3387 | SV3-4030-CCW-CV2187 | Annex Mat Foundation - Areas 1,2, & 3 |
| 3388 | SV3-ASS-P0W-ME4206 | FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 5 FOR 100'-0" |
| 3389 | SV3-CA00-S4W-CV5035 | UNIT 3 NUCLEAR ISLAND SMCI OVERLAY PLATE COUPLER TENSILE TESTING FOR STRUCTURAL MODULES |
| 3390 | SV3-CA01-V2W-CV5875 | CA01 POST LOAD INSPECTIONS FOR SPARE SUPER LIFTING LUGS |
| 3391 | SV3-CA20-S4W-CV4395 | TEMPORARY ATTACHMENTS FOR CA20 FLOOR ASSEMBLIES |
| 3392 | SV3-CAS-PHW-ME2783 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-CAS-PLW-759 |
| 3393 | SV3-CCS-PHW-ME2916 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CCS-PLW-091 |
| 3394 | SV3-CDS-PHW-ME2504 | INSTALLATION OF CDS SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-100, SV3-CDS-PLW-101, SV3-CDS-PLW-102, SV3-CDS-PLW-743, SV3-CDS-PLW-910. |
| 3395 | SV3-CVS-P0W-ME2825 | INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-021, 183) |
| 3396 | SV3-CVS-P0W-ME2826 | INSTALLATION OF LARGE BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-091, 094) |
| 3397 | SV3-FPS-P0W-ME2670 | FABRICATE AND INSTALL PHASE 5 FIRE PROTECTION SYSTEM (FPS) SOUTH OF THE RAD WASTE BUILDING. (ISO'S SV3-FPS-PLW-951,95BC,95AC,95AD,95AB) |
| 3398 | SV3-FPS-PLW-ME4839 | INITIAL ENERGIZATION - INSTALLATION OF ANNEX FIRE PROTECTION SYSTEM (FPS) PIPING IAW (ISOMETRICS SV3-FPS-PLW-343, -295) |
| 3399 | SV3-HDS-P0W-ME3748 | INSTALLATION AND FABRICATION OF HEATER DRIN SYSTEM(HDS) PIPING |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3400 | SV3-ML05-MLW-ME2818 | ATTACHMENT OF COLLAR RING FOR SV3-12365-ML-P48, SV3-12365-ML-P03, AND SV3-12365-ML-P25 |
| 3401 | SV3-ML05-MLW-ME4784 | INSTALLATION OF PENETRATION 11205-ML-P03 (CA01) |
| 3402 | SV3-ML05-MLW-ME4822 | CA01 Penetration 11504-ML-P03 (ASME) |
| 3403 | SV3-ML05-MLW-ME4824 | INSTALLATION OF PENETRATION 11205-ML-P01 (CA01) |
| 3404 | SV3-ML05-MLW-ME5037 | INSTALLATION OF CA01 PENETRATIONS |
| 3405 | SV3-ML05-MLW-ME5038 | INSTALLATION OF CA01 PENETRATIONS |
| 3406 | SV3-MS01-MEW-ME4612 | INSTALLATION OF WATER-COOLED CENTRIFUGAL WATER CHILLERS SV3-VWS-MS-01A & 01B |
| 3407 | SV3-MS19-MEW-ME2639 | Install MB Condensate Polisher Spent Resin Holdup Tank (CPS-MV-02) |
| 3408 | SV3-MS30-MEW-ME2638 | INSTALL TB CHEMICAL SKIDS (CFS-MS-02D/-05C/-06) |
| 3409 | SV3-PWS-P0W-ME4944 | INITIAL ENERGIZATION - INSTALLATION OF ANNEX PORABLE WATER SYSTEM (PWS) PIPING INCLUDING ISOMETRICS: SV3-PWS-PLW-170, -193, -406, -475, -493, -495 THRU 499 |
| 3410 | SV3-PXS-P0W-ME2674 | Installation of Small Bore PXS Piping (Includes Isometric: SV3-PXS-PLW-66X) |
| 3411 | SV3-PXS-P0W-ME2732 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01L (LINE NUMBERS PXS-PL-L022A) |
| 3412 | SV3-PXS-P0W-ME2733 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01M (LINE NUMBERS PXS-PL-L024A) |
| 3413 | SV3-PXS-P0W-ME2734 | ASME Section III - Fabrication/Installation of Isometric # SV3-PXS-PLW-01N (Line Numbers PXS-PL-L023A) |
| 3414 | SV3-PXS-P0W-ME2736 | ASME SECTION III- FABRICATION/INSTALLATION OF ISOMECTRIC# SV3-PXS-PLW-01W (LINE NUMBERS PXS-PL-L059A) |
| 3415 | SV3-PXS-P0W-ME2738 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC# SV3-PXS-PLW-01Y (LINE NUMBERS PXS-PL-L136A) |
| 3416 | SV3-PXS-P0W-ME2886 | ASME SECTION III- FARICATION/INSTALLATION OF ISOMETRIC#SV3-PXS-PLW-011 (LINE NUMBERS PXS-PL-L015A) |
| 3417 | SV3-SWS-PHW-ME5446 | FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR ISOS SV3-SWS-PLW-051, -052, -062, -063 |
| 3418 | SV3-SWS-PHW-ME5447 | FABRICATION AND INSTALLATION OF PIPE SUPPORTS FOR SWS SYSTEM |
| 3419 | SV3-SWS-THW-ME6788 | HYDRO TEST THE SERVICE WATER SYSTEM (SWS) IN PHASE 3A. |
| 3420 | SV3-VAS-MDW-ME4772 | FABRICATION AND INSTALLATION OF VAS DUCT IN ROOM 12153 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3421 | SV3-VYS-P0W-ME4478 | FABRICATE AND INSTALL ANNEX HOT WATER HEATING SYSTEM (VYS) PIPING IAW (ISOMETRICS SV3-VYS-PLW-431, -432, 433, -434, -438, -439, -444, -445) |
| 3422 | SV3-WLS-P0W-ME2908 | FABRICATE AND INSTALL UNIT 3 WLS PIPING FROM RADWASTE BUILDING THROUGH PHASE 5 |
| 3423 | SV3-WLS-PHW-ME3031 | INSTALLATION OF SMALL BORE WLS PIPE SUPPORTS ON R104 MODULE |
| 3424 | SV3-WRS-P0W-ME2991 | INSTALLATION OF SMALL BORE WRS PIPING ON R104 MODULE |
| 3425 | SV3-WRS-P0W-ME4429 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80A, - 80W, -865 |
| 3426 | SV3-WRS-PHW-ME4385 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WRS-PLW-594 |
| 3427 | SV3-WRS-PHW-ME4386 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-WRS-PLW-65R, 651 |
| 3428 | SV3-WRS-PLW-ME4452 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-833, 873) |
| 3429 | SV3-WRS-PLW-ME4458 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-84N, 86M) |
| 3430 | SV3-WRS-PLW-ME4469 | CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE FUEL TRANSFER CANAL (FHS-MT-02) |
| 3431 | SV3-WRS-PLW-ME4470 | CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE CASK LOADING PIT (FHS-MT-05) |
| 3432 | SV3-WRS-PLW-ME4471 | CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE CASK WASHDOWN PIT (FHS-MT-06) |
| 3433 | SV3-WWS-P0W-ME2633 | ANNEX BUILDING - ELEVATION 115+ WWS PIPING #1 |
| 3434 | SV3-WWS-P0W-ME2662 | WWS EMBEDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-020) |
| 3435 | SV3-WWS-P0W-ME2692 | Annex Building - Elevation 100+ WWS Piping #3 |
| 3436 | SV3-WWS-P0W-ME2693 | ANNEX BUILDING- ELEVATION 100+ WWS PIPING #4 |
| 3437 | SV3-WWS-P0W-ME4627 | INSTALLATION OF TURBINE BUILDING WWS PIPING FOR SLAB 1 ON 120'-6" ELEVATION |
| 3438 | SV3-WWS-P0W-ME4628 | INSTALLATION OF TURBINE BUILDING WWS PIPING FOR SLABS 4, 5, 6 ON 120'-6" |
| 3439 | SV3-WWS-PHW-ME3073 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2692) |
| 3440 | SV3-WWS-PHW-ME3075 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0WME2694) |
| 3441 | SV3-WWS-PHW-ME3653 | INSTALLATION OF TURBINE BUILDING WWS PIPING SUPPORTS FOR ISOMETRICS SV3-WWS-PLW-06B, 06BF, 06D, 06E, 06F, 06G, 06L, 06J, 06K, 06P |
| 3442 | SV4-WWS-CCW-CV6768 | UNIT 4 WWS DUCTBANK |
| 3443 | SV4-WWS-PLW-ME1346 | WWS LINE TO WWRB |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3444 | SV4-CA01-S4W-861784 | CA01-SA07 ELEV ABOVE 119' OLPS AND WELDED ATTACHMENTS |
| 3445 | SV0-SES-ERW-862927 | INSTALL CONDUIT IN SES DUCT BANK/TRENCH FOR SECURITY LOCATED BETWEEN SITE GRID M101-L1502 PHASE 10 |
| 3446 | SV3-4031-SHW-861531 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, BETWEEN COLUMN LINES 11.09/11.15 & G/I. |
| 3447 | SV3-4000-SHW-862383 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAILS C-71, ANNEX BUILDING, ALL AREAS/ELEVATIONS. BOOK 1 |
| 3448 | SV3-FPS-P0W-854240 | INSTALL LB CONTAINMENT UPPER RING HEADER PIPING PER ISO'S SV3-FPS-PLW-552, 55Q, 553, 55R, 55K. |
| 3449 | SV3-WWS-P0W-ME2484 | WWS EMBEDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV3-WWS-PLW-32C, -32E, -32F, -32G) |
| 3450 | SV3-WRS-P0W-ME4433 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-80F) |
| 3451 | SV4-0000-CCW-CV7168 | Concrete and Rebar for the Diesel and Electric-Driven Pump Enclosure Foundation |
| 3452 | SV4-1000-CCW-CV1470 | Unit 4 Nuclear Island Basemat Concrete Placement Up To 66'-6" |
| 3453 | SV3-WWS-PHW-ME2960 | INSTALLATION OF LARGE BORE WWS PIPING SUPPORTS (INCLUDES ISOMETRICS SV3-WWS-PLW-01D) |
| 3454 | SV4-1000-CRW-CV1736 | UNIT 4, WEST SHIELD WALL REBAR BELOW 100' ELEVATION |
| 3455 | SV3-WWS-PHW-ME3043 | SV3-WWS-PHW-ME3043 |
| 3456 | SV4-1000-CRW-CV1744 | UNIT 4, SHIELD BUILDING, EAST PERIMETER WALL REBAR FROM 66'-6" TO 82'-6" |
| 3457 | SV3-WWS-PHW-ME3045 | INSTALLATION OF WWS PIPE SUPPORTS FOR SLAB 3 AT 120' 6" ELEVATION PORTION 3 |
| 3458 | SV4-1010-CRW-CV1748 | INSTALLATION OF #9 AND #11 WALL DOWELS AFTER BASE MAT CONCRETE PLACEMENT |
| 3459 | SV4-1020-CRW-CV1745 | UNIT 4, SHIELD BUILDING, EAST PERIMETER WALL REBAR FROM 82'-6" TO 100'-0" |
| 3460 | SV4-1100-ERW-EL2285 | CONTAINMENT BUILDING EX CORE INSTRUMENTATION EMBEDDED CONDUIT EL 71FT-6IN TO 10FT-2IN |
| 3461 | SV3-WWS-PHW-ME3072 | INSTALLATION OF ANNEX WWS PIPING SUPPORTS (FOR WP SV3-WWS-P0W-ME2691) |
| 3462 | SV4-1100-Z0W-CV3929 | UNIT 4 CONTAINMENT REINFORCED CONCRETE REQUIREMENTS |
| 3463 | SV4-1110-CCW-CV1919 | Containment Concrete - EL. 71'-6" |
| 3464 | SV4-1110-CCW-CV5151 | UNIT 4 INSIDE CVBH CORE DRILLING IN CONCRETE PLACEMENT AT ELEVATION 76'-6" |
| 3465 | SV3-WWS-PLW-ME3028 | INSTALLTION OF WWS PIPING FOR SLAB 3 AT 120'6" EKEVATION |
| 3466 | SV4-1110-CEW-CV1878 | CONTAINMENT CONCRETE EMBEDMENTS - EL. 71'-6" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3467 | SV4-1110-CEW-CV6676 | INSTALLATION OF UNIT 4 STEAM GENERATOR COLUMN PEDESTAL EMBEDMENTS |
| 3468 | SV4-1110-CRW-CV1837 | Containment Vessel Bottom Head Layers A, B, & C |
| 3469 | SV4-1120-CEW-CV4911 | U4 NUCLEAR ISLAND CONTAINMNET EMBEDS AND ANCHOR BOLTS ELEVATION 71'-6" TO 84'-6" |
| 3470 | SV4-1120-CRW-CV3063 | CONTAINMENT CONCRETE REINFORCEMENT EL 71 FT-6IN TO EL 76FT-6IN |
| 3471 | SV4-2040-SSW-CV3969 | UNIT 4 TURBINE BUILDING SEQUENCE 7 HANDRAIL AND STAIRS |
| 3472 | SV4-ECS-ERW-EL6124 | SV4-INSTALL ECS DUCT BANKS FROM MANHOLES NXM010, NXM011 TO FIRE PUMPS/FIRE WATER TANKS - PHASE 8A |
| 3473 | SV4-1120-EGW-EL2342 | INSTAL GROUNDING IN UNIT 4 CONTAINMENT BUILDING AT ELEVATION 82' 6" TO 100' 0" |
| 3474 | SV4-ECS-ERW-EL6125 | SV4-INSTALL ECS DUCT BANKS FROM NORTH SIDE OF UNIT 4 TURBINE BLDG TO CHEMICAL FEED STORAGE BLDG - PHASE 8A |
| 3475 | SV4-1200-AXW-CT7673 | COATINGS - U4 AUX. BUILDING AREAS 3 & 4 CONCRETE COATINGS |
| 3476 | SV4-1200-CRW-CV1741 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING-INSTALLATION OF REINFORCING STEEL ON INTERIOR WALLS UP TO 82'-6" (WALL PLACEMENTS 9 THRU 38) |
| 3477 | SV4-WRS-P0W-ME5964 | FABRICATION AND INSTALLATION OF SMALL BORE WRS PIPING (ISOMETRIC SV4-WRS-PLW-57Q) |
| 3478 | SV4-WWS-PLW-ME1766 | Installation of Large Bore WWS Piping (Includes Isometrics SV4-WWS-PLW-01B, -01D, -014) |
| 3479 | SV4-1210-CCW-CV1815 | Unit 4 Nuclear Island Auxiliary Building Concrete Placement For Interior Walls From Elevation 66'-6" (Wall Placements #9 THRU 38) -REV. 0- |
| 3480 | SV4-1210-CEW-CV1738 | U4 Auxiliary Building Embed Plates-EL 66'6"- Interior Walls |
| 3481 | SV4-1210-CEW-CV1739 | U4 AUXILIARY BUILDING EMBEDMENTS-CYLINDRICAL WALL-EL. 66'-6" |
| 3482 | SV4-1210-EGW-EL1798 | INSTALL GROUNDING FOR WALL POURS 1, 3, 4 AND 5 |
| 3483 | SV4-1210-ERW-EL1810 | UNIT 4 AUXILIARY BUILDING, INSTALL ELECTRICAL PENETRATIONS & GROUNDING FOR WALLS 34,35,36,37 & 38. SECTIONS 4,5 & 6. ELEVATION 66'-6" TO 82'-6" |
| 3484 | SV4-1210-MLW-CV2466 | U4 CIVIL BLOCKOUTS FOR MECHANICAL & ELECTRICAL PENETRATIONS-AUX. BUILDING WALLS EL. 66'-6" TO EL. 82'-6" |
| 3485 | SV4-1220-CCW-CV2318 | UNIT 4 CONCRETE PLACEMENT OUTSIDE CVBH UP TO ELEVATION 82'-6" |
| 3486 | SV4-1220-CCW-CV2540 | Unit 4 Nuclear Island Auxiliary Building Concrete Placement for Exterior Walls from Elev. 82'-6" to 100'-0" (Wall Placements 39 thru 48) |
| 3487 | SV4-1220-CCW-CV2541 | UNIT 4 NUCLEAR ISLAND AUXILIARY BUILDING AREAS 1 AND 2 CONCRETE PLACEMENT FOR INTERIOR WALLS FROM ELEVATION 82'-6" TO 100'-0" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|

| 3540 | SV4-2101-CRW-CV5802 | UNIT 4, TURBINE BUILDING, FIRST BAY WALLS UP TO 122' ELEV. REBAR |
| 3541 | SV4-2101-CRW-CV5803 | Unit 4, Turbine Building, 1st Bay Walls, Wall to Wall Mechanical Couplers up to 122’ |
| 3542 | SV4-2131-CCW-CV0391 | UNIT 4, TURBINE BUILDING, FIRST BAY CONCRETE UP TO 100' ELEVATION AND EQUIPMENT PADS |
| 3543 | SV4-4000-CEW-CV5067 | UNIT 4, ANNEX BUILDING CONSTRUCTION AIDS |
| 3544 | SV4-4000-CRW-CV5094 | UNIT 4 ANNEX BUILDING REBAR BENDING AND FABRICATION |
| 3545 | SV4-4000-Z0W-CV5066 | UNIT 4, ANNEX BUILDING, REINFORCED CONCRETE REQUIREMENTS |
| 3546 | SV4-ASS-P0W-ME5421 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SYSTEM (ASS) PIPING |
| 3547 | SV4-ASS-P0W-ME5424 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING PORTION 4 |
| 3548 | SV4-ASS-P0W-ME5425 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING PORTION 5 |
| 3549 | SV4-ASS-P0W-ME5426 | INSTALLATION AND FABRICATION OF AUXILIARRY STEAM SUPPLY SYSTEM PIPING PORTION 6 |
| 3550 | SV4-ASS-PHW-ME5427 | Installation and Fabrication of Auxiliary Steam System(ASS) Piping Supports |
| 3551 | SV3-CVS-P0W-ME2648 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-04C) |
| 3552 | SV4-ASS-PHW-ME5428 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SYSTEM(ASS) PIPING SUPPORTS PORTION 1 |
| 3553 | SV4-ASS-PHW-ME5429 | INSTALLATION AND FABRICATION OF PIPE SUPPORTS PORTION 2 |
| 3554 | SV4-ASS-PHW-ME5430 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING SUPPORT PORTION 3 |
| 3555 | SV4-ASS-PHW-ME5431 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING SUPPORT PORTION 4 |
| 3556 | SV4-ASS-PHW-ME5432 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM(ASS) PIPING SUPPORT PORTION 5 |
| 3557 | SV4-ASS-PHW-ME5433 | FABRICATION AND INSTALLATION OF ASS PIPE SUPPORTS (PORTION 6) |
| 3558 | SV4-C0S7-CCW-CV0544 | Electrical Duct Bank for Unit 4 CWS, Cooling Water System |
| 3559 | SV4-CA04-S4W-CV2447 | Lifting Lugs and Temporary Attachments for Unit 4 CA04 |
| 3560 | SV4-CA20-S4W-CV6894 | CA20-51 TEMPORAR ATTACHMENTS - FLOOR |
| 3561 | SV4-CB65-S4W-CV2665 | FABRICATION OF OVERLAY PLATES (OLP) FOR CB65 |
| 3562 | SV4-CDS-CCW-CV7060 | U4 Condensate Tank Storage Foundation |
| 3563 | SV4-CES-P0W-ME7576 | Installation of CES piping (Portion 1) |
| 3564 | SV4-CPS-P0W-ME1668 | UNIT 4 TURBINE BUILDING EL 100'-0": FABRICATION & INSTALLATION OF EMBEDDED CPS PIPING |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3565 | SV4-CR10-CRW-CV1154 | The Erection of Structural Steel for the CR10 module on Pad 139 |
| 3566 | SV4-CR10-CRW-CV1416 | INSTALLATION OF CR 10 UNIT 4 NUCLEAR ISLAND REINFORCING STEEL LAYERS 4-10 |
| 3567 | SV4-CWS-ERW-EL0352 | Electrical Installation of (CWS) Cooling Water System Manholes & Duct Banks |
| 3568 | SV4-CWS-P0W-ME1713 | INSTALLATION OF LARGE BORE CWS PIPING AT GRIDLINE R |
| 3569 | SV4-CWS-P0W-ME2758 | Installation of CWS Piping from Backwash Strainers to Yard. |
| 3570 | SV4-CWS-P0W-ME5457 | TO INSTALL AND FABRICATE CIRCULATING WATER SYSTEM (CWS) PIPING |
| 3571 | SV4-CWS-P0W-ME7467 | INSTALLATION OF CROSSOVER PIPING FROM CONDENSER A TO CONDENSER B |
| 3572 | SV4-CWS-P0W-ME7468 | INSTALLATION OF CROSSOVER PIPING FROM CONDENSER B TO CONDENSER C |
| 3573 | SV4-CWS-PHW-ME1716 | INSTALLATION OF LARGE BORE CWS PIPING SUPPORTS AT GRIDLINE R |
| 3574 | SV4-CWS-PHW-ME5470 | INSTALLATION AND FABRICATION OF AUXILIARY STEAM SUPPLY SYSTEM (ASS) PIPING SUPPORT |
| 3575 | SV4-CWS-PHW-ME7469 | INSTALLATION OF PIPE SUPPORTS FOR 120" CROSSOVER PIPING FROM CONDENSER A TO CONDENSER B |
| 3576 | SV4-CWS-PHW-ME7470 | INSTALLATION OF PIPE SUPPORTS FOR 120" CROSSOVER PIPING FROM CONDENSER 'B' TO CONDENSER 'C' |
| 3577 | SV4-DTS-P0W-ME1714 | INSTALLATION OF DTS PIPING FROM YARD TO CARTRIDGE FILTER SKID SV4-DTS-MS-01 |
| 3578 | SV4-DTS-PHW-ME1717 | INSTALLATION OF DTS PIPING SUPPORTS FROM YARD TO CARTRIDGE FILTER SKID SV4-DTS-MS-01 |
| 3579 | SV4-FPS-MPW-ME7582 | Install Unit 4 Diesel Fire Pump Package SV4-FPS-MS-01B |
| 3580 | SV4-FPS-P0W-ME1943 | INSTALLATION OF LARGE BORE FPS PIPING (INCLUDES ISOMETRICS: SV4-FPS-PLW-820, 825, 830) |
| 3581 | SV4-HDS-P0W-ME5463 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM(HDS) PIPING |
| 3582 | SV4-ME01-P0W-ME2589 | UNIT 4 CONDENSERS A, B & C - TURBINE BYPASS PIPING |
| 3583 | SV4-ME01-PLW-ME0992 | Unit 4 Condenser A: Installation of Hotwell Piping |
| 3584 | SV4-ME01-PLW-ME1000 | Unit 4 Condenser B: Installation of Hotwell Piping |
| 3585 | SV4-ME01-PLW-ME1002 | UNIT 4 CONDENSER C: INSTALLATION OF HOTWELL PIPING |
| 3586 | SV4-ME01-PLW-ME1004 | UNIT 4 CONDENSER A: INSTALLATION OF UPPER SHELL NOZZLE CONNECTIONS |
| 3587 | SV4-ME2W-MEW-ME3012 | INSTALLATION OF HDS DRAIN COOLER CDS-ME-7A |
| 3588 | SV4-ME2W-MEW-ME3019 | INSTALLATION OF HDS DRAIN COOLER CDS-ME-7B |
| 3589 | SV4-ME2W-MEW-ME3020 | INSTALLATION OF HDS DRAIN COOLER CDS-ME-7C |
| 3590 | SV4-ME3C-MEW-ME2970 | INSTALLATION OF TCS HEAT EXCHANGERS SV4-TCS-ME-01A/B/C |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |

| 3663 | SV3-1120-EJW-862943 | FABRICATION & INSTALLATION OF DESIGN JUNCTION BOX / CONDUIT SUPPORTS IN ROOM 11208 |
| 3664 | SV4-DWS-THW-862256 | DWS PRESSURE TEST |
| 3665 | SV4-CAS-P0W-855038 | INSTALL PIPE AND SUPPORTS FOR ISO SV4-CAS-PLW-843 |
| 3666 | SV4-DWS-P0W-855008 | SMALL BORE PIPE ISO SV4-DWS-PLW-725 & SUPPORTS |
| 3667 | SV4-VWS-P0W-855009 | LARGE BORE PIPE ISO. SV4-VWS-PLW-50A, CONTAINMENT RM 11702 |
| 3668 | SV4-VWS-P0W-855023 | INSTALL LARGE BORE PIPE SV4-VWS-PLW-532 |
| 3669 | SV4-VWS-PHW-855018 | CONTAINMENT BUILDING- INSTALLATION OF SUPPORTS ISO SV4-VWS-PLW-50Y |
| 3670 | SV3-WWS-PHW-860661 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 3671 | SV4-WRS-P0W-862456 | INSTALLATION OF ANNEX BLDG WRS PIPING (ISO SV4-WRS-PLW-454, 455, 464, 465, 466, 467, 469 & 474) |
| 3672 | SV4-DWS-P0W-861602 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISO SV4-DWS-PLW-130 & 131) |
| 3673 | SV4-MSS-PHW-860361 | INSTALLATION AND FABRICATION OF MAIN STEAM SYSTEM (MSS) PIPING SUPPORTS |
| 3674 | SV3-2053-SHW-862021 | ELECTRICAL CABLE TRAY SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 141'3", AREA 3 |
| 3675 | SV3-ZAS-ERW-EL3253 | INSTALL CABLE TRAY & RACEWAY FOR UNIT AUX. TRANSFORMER ZAS-ET-2C, IN TRANSFORMER AREA NORTH OF TURBINE BUILDING. |
| 3676 | SV3-1231-C0W-850000 | 100' ELEV, FLOOR SLAB AREA 1 (SP-17) |
| 3677 | SV3-2033-SHW-862395 | ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100'0" , AREA 3 |
| 3678 | SV3-1231-ERW-861084 | Install Electrical Penetration Sleeves for Interior and Exterior Walls EL 100'-0" to 117'-6", Area 1, Unit 3 AUX |
| 3679 | SV3-2053-SHW-862688 | INSTALLATION OF BUSS DUCT SUPPORTS IN TURBINE BUILDING (ELEV. 141'3" AREA 3) (ROOM 20502) |
| 3680 | SV3-1232-C0W-850000 | 100' Elev., Floor Slab Area 2, (SP-18) |
| 3681 | SV4-CAS-P0W-850083 | SMALL BORE PIPE ISO SV4-CAS-PLW-83H & SUPPORTS |
| 3682 | SV3-2053-SHW-862687 | INSTALLATION OF BUSS DUCT SUPPORTS IN TURBINE BUILDING (ELEV. 141'3" AREA 3) ROMM 20501 |
| 3683 | SV4-4030-C0W-850009 | UNIT 4 ANNEX BUILDING AREA 3 SLAB AT ELEV. 107'-3" REINFORCING STEEL |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3684 | SV3-4000-SHW-862382 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-70, ANNEX BUILDING, ALL AREAS / ELEVATIONS BOOK 1 |
| 3685 | SV3-4031-SHW-861530 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, BETWEEN COLUMN LINES 11.09/11.15 & E/G. |
| 3686 | SV4-4031-ERW-862034 | INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 1, ELEV. 100'-0" |
| 3687 | SV4-4032-ERW-862035 | INSTALLATION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 2 ELEV. 100'-0" |
| 3688 | SV3-4000-SHW-862354 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-204, ANNEX BUILDING, ALL AREAS/ ELEVATIONS BOOK 1 |
| 3689 | SV3-TDS-P0W-860846 | INSTALLATION AND FABRICATION OF TURBINE ISLAND DRAINS VENTS AND RELEIF SYSTEM (TDS) PIPING |
| 3690 | SV3-MH01-EYW-862916 | UNIT 3 CONTAINMENT POLAR CRANE RUNWAY MAINLINE SUPPORTS AND MAINLINE CONDUCTOR BAR ASSEMBLIES |
| 3691 | SV3-4031-SHW-861535 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, BETWEEN COLUMN LINES 11.15/13 & F/G. |
| 3692 | SV3-4000-SHW-862384 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-82, ANNEX BUILDING, ALL AREAS/ ELEVATION BOOK 1 |
| 3693 | SV3-4031-SHW-861534 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, BETWEEN COLUMN LINES 11.15/13 & G/H. |
| 3694 | SV3-ML05-MLW-860960 | Installation of Pipe Penetrations 117'-135' South Shield Wall |
| 3695 | SV3-RNS-PHW-861876 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-RNS-PLW-015 |
| 3696 | SV4-PXS-P0W-850430 | INSTALL ISOMETRIC SV4-PXS-PLW-430 |
| 3697 | SV4-CA01-S4W-862815 | CA01 BASEMAT SA7 INSTALLATION |
| 3698 | SV4-ME01-MEW-862758 | UNIT 4 CONDENSERS A, B & C: INSTALLATION OF UPPER SHELL MANHOLES |
| 3699 | SV3-1237-SHW-860350 | INSTALL CONDUIT SUPPORTS ON SHIELD WALL AZ-225¿ TO AZ-270 ¿ 100'-0" |
| 3700 | SV3-CA37-ERW-861473 | FABRICATION AND INSTALLATION OF ELECTRICAL PENETRATIONS IN THE CA37 MODULE |
| 3701 | SV3-CA20-ERW-EL7472 | MODULE CA20 UNIT, SUB-ASSEMBLY I AND II EL. 66'6" TO 92'6", INSTALL DESIGNED CABLE TRAYS AND SUPPORTS |
| 3702 | SV4-RNS-P0W-861622 | ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-09A |
| 3703 | SV3-PXS-MYW-862725 | FABRICATION/INSTALLATION OF 2A CONTAINMENT RECIRCULATION SCREEN |
| 3704 | SV3-MG01-MEW-862024 | STEAM TURBINE WELDING |
| 3705 | SV3-CA56-S5W-862415 | CA56 MODULE FABRICATION |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3706 | SV4-WWS-P0W-862701 | INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM (WWS) PIPING ON 158'7" AND 156'0" SLABS |
| 3707 | SV4-1208-C0W-850005 | UNIT 4 AUXILIARY EL 100' CYLINDRICAL WALLS CIVIL RC05A AND B |
| 3708 | SV4-ML05-MLW-862027 | INSTALLATION OF UNIT 4 CA20 FLOOR PENETRATIONS |
| 3709 | SV3-PXS-MYW-862726 | FABRICATION/INSTALLATION OF 2B CONTAINMENT RECIRCULATION SCREEN |
| 3710 | SV3-1154-SHW-800000 | Fabricate and Install Welded conduit supports in Containment Area 4 Elev. 135'3" |
| 3711 | SV3-CDS-PHW-860478 | INSTALLATION OF CDS SUPPORTS FOR ISOs SV3-CDS-PLW-730, 731, 732, 733 AND 734 |
| 3712 | SV4-CA01-S4W-862914 | CA01 SA07 ELEV 107'-119' OVERLAY PLATES (OLPS) |
| 3713 | SV4-WWS-PHW-862813 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR UNIT 4 TRANSFORMER AREA SUMP SV4-WWS-MTW-010 |
| 3714 | SV4-ME01-PLW-861893 | UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 3RD EXTRACTION STEAM PIPING |
| 3715 | SV4-ME01-PLW-861894 | UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 4TH EXTRACTION STEAM PIPING |
| 3716 | SV4-ME01-PLW-861891 | UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 1ST EXTRACTION STEAM PIPING |
| 3717 | SV4-ME01-PLW-861892 | UNIT 4 CONDENSER C: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING |
| 3718 | SV4-ME01-PLW-861888 | UNIT 4 CONDENSER B: FABRICATION & INSTALLATION OF 2ND EXTRACTION STEAM PIPING |
| 3719 | SV3-1234-ERW-862935 | INSTALL CONDUIT SLEEVES FOR PENETRATIONS IN PRECAST CONCRETE PANELS SV3-1234-CP-S01 TO SV3-1234-CP-S03 UNIT 3 AUXILIARY BUILDING ELEV 92'-6" AREA 4 |
| 3720 | SV0-0000-XEW-CV0868 | Trench/Excavation For Commodity Installation in Non-Safety Areas (All NOI-s) |
| 3721 | SV0-PWS-THW-ME2056 | HYDRO TEST THE HDPE PORTION OF THE POTABLE WATER SYSTEM (PWS) |
| 3722 | SV3-0150-ERW-EL2314 | INSTALLATION OF CONDUUIT SLEEVES FOR PENETATION IN UNIT 3 TRANSFORMER AREA |
| 3723 | SV3-1110-ERW-EL1532 | U3-CONTAINMENT CONDUIT SUPPORTS ROOM 11104 AND EL 71'6" TO 84'-6" |
| 3724 | SV3-1220-EGW-EL2411 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 4,5 & 6 |
| 3725 | SV3-4034-EGW-EL2353 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EGS-GROUNDING) FOR THE ANNEX BLDG., AREA 4, ELEV.100'- BETWEEN COLUMN LINES (7.9) TO (15.2) |
| 3726 | SV3-4034-ERW-EL2352 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (EMBEDDED CONDUIT) FOR THE ANNEX BLDG., AREA 4, 100' - BETWEEN COLUMN LINES (7.9) TO (15.2). |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3727 | SV3-6000-EGW-EL2317 | PERFORM INSTALLATION OF UNDERGROUND GROUNDING COMMODITIES DIESEL GENERATOR BUILDING AREA 1 & 2 ELEVATION 100' BETWEEN COLUMN LINES (BD) & (AAD) |
| 3728 | SV3-CA01-CRW-CV2290 | FABRICATION OF REBAR FOR CA01 MODULE |
| 3729 | SV3-CPS-PHW-ME2122 | FABRICATION AND INSTALLATION OF CPS PIPING SUPPORTS FROM ELEVATION 100'-0" TO SUMPS SV3-WWS-MT-09A&B |
| 3730 | SV3-DTS-PHW-ME1516 | FABRICATE AND INSTALL DEMINERALIZED WATER TREATMENT SYSTEM (DTS) SUPPORTS PORTION 2 - (RAW WATER SUPPLY TO DTS-MS-01) |
| 3731 | SV3-ML10-MLW-ME2123 | PLACEMENT OF CONTAINMENT PENETRATIONS P19, P20, P22 |
| 3732 | SV3-MS60-MEW-ME1676 | INSTALLATION OF AUXILIARY BOILER DEAERATOR (ASS-ME-01) |
| 3733 | SV3-WRS-PLW-ME4468 | CA20 LEAK CHASE TESTING PROCEDURE FOR CHANNELS CONNECTING TO THE SPENT FUEL POOL (FHS-MT-01) |
| 3734 | SV3-WWS-PLW-ME1345 | WWS LINE TO WWRB'S |
| 3735 | SV0-0000-EGW-EL3556 | PERFORM INSTALLATION OF UNDERGROUND COMMODITIES (SV0 SITE STATION GROUNDING GRID) FOR GROUND GRID AREA K1200 |
| 3736 | SV0-010-ERW-EL6243 | Supplemental Steel Beam Installation for Cable Tray Supports @ 315 Bldg. |
| 3737 | SV3-0000-CCW-CV7067 | Concrete and Rebar for Diesel and Electric-Driven Fire Pump Enclosure Foundation |
| 3738 | SV3-1103-ERW-EL5391 | 11208 RNS VALVE ROOM X CONDUITS |
| 3739 | SV4-WLS-MTW-ME1805 | WLS CHEMICAL WASTE TANK INSTALLATION |
| 3740 | SV4-WLS-P0W-ME1910 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-752. |
| 3741 | SV4-WLS-P0W-ME1911 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-753. |
| 3742 | SV4-WLS-P0W-ME1912 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-755. |
| 3743 | SV4-WLS-P0W-ME1913 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-756. |
| 3744 | SV4-WLS-P0W-ME1914 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-758. |
| 3745 | SV4-WLS-P0W-ME1915 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-759. |
| 3746 | SV4-WLS-P0W-ME1916 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-75C. |
| 3747 | SV4-WLS-P0W-ME1917 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-75E. |
| 3748 | SV4-WLS-P0W-ME1918 | FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-785. |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3749 | SV4-WLS-P0W-ME1935 | ASME SECTION III - FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING SV4-WLS-PLW-730 |
| 3750 | SV4-WLS-P0W-ME1936 | ASME SECTION III - FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING# SV4-WLS-PLW-740 |
| 3751 | SV4-WLS-P0W-ME1937 | ASME SECTION III - FABRICATE AND INSTALL WLS EMBEDDED PIPING SHOWN ON ISOMETRIC DRAWING# SV3-WLS-PLW-751 |
| 3752 | SV4-WLS-P0W-ME3113 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-071) |
| 3753 | SV4-WLS-P0W-ME3115 | INSTALLATION OF LARGE BORE WLS PIPING LINES WLS-PL-L079 & L131C OF ISOMETRIC SV4-WLS-PLW-741 |
| 3754 | SV4-WRS-P0W-ME4626 | WRS BASEMAT PIPING CLEANLINESS/FME REPAIR |
| 3755 | SV4-WRS-P0W-ME5329 | FABRICATION/INSTALLATION OF SMALL BORE WRS LEAK CHASE PIPING INCLUDING SV4-WRS-PLW-86G, 86H, 800 |
| 3756 | SV4-WRS-P0W-ME6689 | WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV4-WRS-PLW-521, 52N, 52M, 52L) |
| 3757 | SV4-WRS-PLW-ME1574 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-573, 655) |
| 3758 | SV4-WRS-PLW-ME1575 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV4-WRS-PLW-57P, 57L, AND 57K) |
| 3759 | SV4-WRS-PLW-ME1577 | INSTALLATION OF LARGE BORE WRS PIPING ( INCLUDES ISOMETRIC SV4-WRS-PLW-57J) |
| 3760 | SV4-WRS-PLW-ME1578 | INSTALLATION OF LARGE BORE WRS PIPING ( INCLUDES ISOMETRICS SV4-WRS-PLW-572, 574, 578, 57D, 579) |
| 3761 | SV4-WRS-PLW-ME1579 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-57B, 575, 57E) |
| 3762 | SV4-WRS-PLW-ME1580 | INSTALLTION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-571, 576, 57F) |
| 3763 | SV4-WRS-PLW-ME1763 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-52A, -52B, -52D, -52F) |
| 3764 | SV4-WRS-PLW-ME1764 | INSTALLATION OF LARGE BORE WRS PIPING (INCLUDES ISOMETRICS SV4-WRS-PLW-53D) |
| 3765 | SV4-WRS-THW-ME2413 | HYDROSTATIC TESTING FOR RADIOACTIVE WASTE DRAIN SYSTEM (WRS) |
| 3766 | SV4-WWS-ERW-EL0863 | INSTALLATION OF ELECTRICAL UNDERGROUND COMMODITIES (MANHOLES AND DUCT BANKS) FOR THE (WWS) WASTE WATER SYSTEM |
| 3767 | SV4-WWS-P0W-ME1977 | WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-31B, & 31F) |
| 3768 | SV4-WWS-P0W-ME2703 | WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WWS-PLW-310, 31E, 319, & 31A) |
| 3769 | SV4-WWS-P0W-ME3097 | WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV4-WWS-PLW-020) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3770 | SV4-WWS-P0W-ME3187 | WWS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-321 & 322) |
| 3771 | SV4-WWS-P0W-ME3348 | WWS EMBEDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-32C, -32E, -32F, -32G) |
| 3772 | SV4-WWS-P0W-ME4625 | WWS BASEMAT PIPING CLEANLINESS/FME REPAIR |
| 3773 | SV4-WWS-P0W-ME5467 | FABRICATION AND INSTALLATION OF WWS PIPING |
| 3774 | SV4-WWS-P0W-ME6622 | WWS EMBEDED PIPING INSTALLATION (INCLUDING ISOMETRICS SV4-WWS-PLW-334) |
| 3775 | SV4-WWS-P0W-ME7165 | FABRICATE AND INSTALL THE WASTE WATER PIPING ON THE EAST SIDE OF THE U4 TURBINE BUILDING IN PHASE 7. |
| 3776 | SV4-WWS-PHW-ME5481 | INSTALLATION OF PIPE SUPPORTS FOR PIPING PACKAGE SV4-WWS-P0W-ME5467 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3793 | SV4-CWS-P0W-ME3243 | INSTALLATION OF CWS PIPING RISERS (RETURN SIDE) |
| 3794 | SV4-CWS-PLW-ME0551 | UNIT 4 CWS PIPING FROM NUCLEAR ISLAND TO COOLING TOWER |
| 3795 | SV4-ME01-PLW-ME1006 | UNIT 4 CONDENSER B: INSTALLATION OF UPPER SHELL NOZZLES |
| 3796 | SV4-WLS-P0W-ME3117 | INSTALLATION OF LARGE BORE WLS PIPING (INCLUDES ISOMETRIC SV4-WLS-PLW-754) |
| 3797 | SV4-WRS-P0W-ME1974 | INSTALLATION OF LARGE BORE WRS PIPING ( INCLUDES ISOMETRIC SV4-WRS-PLW-66A, 66C, 66E, 662, 667) |
| 3798 | SV4-WRS-PLW-ME1576 | INSTALLATION OF LARGE BORE WRS PIPING ( INCLUDES ISOMETRICS SV4-WRS-PLW-57M AND 57N ) |
| 3799 | SV3-SDS-PHW-ME2544 | INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2415) |
| 3800 | SV3-SDS-PHW-ME2545 | INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2416) |
| 3801 | SV3-SDS-PHW-ME2546 | Installation of Annex SDS Supports (For WP SV3-SDS-P)W-ME2417) |
| 3802 | SV4-2000-Z0W-CV1908 | UNIT 4 TURBINE BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 3803 | SV3-SDS-PHW-ME2547 | INSTALLATION OF ANNEX SDS SUPPORTS (FOR WP SV3-SDS-P0W-ME2418) |
| 3804 | SV3-SDS-THW-ME2196 | HYDRO TESTING OF THE UNIT 3 ANNEX BUILDING SANITARY DRAINAGE SYSTEM |
| 3805 | SV3-SFS-P0W-ME2188 | ASME SECTION III - INSTALLATION OF R365 COMMODITIES |
| 3806 | SV3-SFS-P0W-ME3644 | INSTALLATION OF LARGE BORE SFS PIPING (INCLUDES ISOMETRIC SV3-SFS-PLW-12C) |
| 3807 | SV3-SS01-Z0W-CV4381 | UNIT 3 STRUCTURAL STEEL SAFETY CLASS C REQUIREMENTS |
| 3808 | SV3-SWS-P0W-ME2158 | FABRICATION AND INSTALLATION OF SWS PIPING IN ROOM 20309 (ISOMETRICS SV3-SWS-PLW-051, 052, 062, 063, &064) |
| 3809 | SV3-SWS-P0W-ME2159 | FABRICATION AND INSTALLATION OF SWS PIPING IN ROOM 20309 (ISOMETRICS SV3-SWS-PLW-041, 042, 060, & 061) |
| 3810 | SV3-SWS-P0W-ME6784 | Service Water System (SWS) Piping Installation in Phase 3A |
| 3811 | SV3-SWS-PHW-ME1504 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1495 WORK PACKAGE |
| 3812 | SV3-SWS-PHW-ME1505 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1496 WORK PACKAGE |
| 3813 | SV3-SWS-PLW-ME1497 | INSTALLATION OF SWS LARGE BORE PIPING (INCLUDES ISOMETRICS SV3-SWS-PLW-090, 091, 092, 093, 094, 095) |
| 3814 | SV3-TCS-PLW-ME2389 | INSTALLATION OF TCS PIPING (INCLUDES ISOMETRICS SV3-TCS-PLW-710, 711,712,71Y,703,704, & 71B) |
| 3815 | SV3-VAS-MDW-ME5775 | INSTALLATION OF HVAC DUCT PIECES AND SUPPORTS IN ROOMS 12166, 12167 & 12268 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3816 | SV3-VWS-P0W-ME5325 | ANNEX - Initial Energization Piping - Iso 171, 180, 181, 190, 191, & 197 |
| 3817 | SV3-VWS-PHW-ME2796 | INSTALLATION OF VWS SUPPORTS FOR ISOMETRICS SV3-VWS-PLW-10P |
| 3818 | SV3-WGS-P0W-ME2725 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-020) |
| 3819 | SV3-WGS-P0W-ME2726 | INSTALLATION OF SMALL BORE WGS PIPING (INCLUDES SV3-WGS-PLW-421) |
| 3820 | SV3-WGS-PHW-ME2807 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-050, 101, 103, 105, 107 |
| 3821 | SV3-WGS-PHW-ME2809 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-546 |
| 3822 | SV3-WGS-PHW-ME2811 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-421 |
| 3823 | SV3-WGS-PHW-ME2812 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWINGS SV3-WGS-PLW-544 |
| 3824 | SV3-WLS-P0W-ME2990 | INSTALLATION OF SMALL BORE WLS PIPING ON R104 MODULE |
| 3825 | SV3-WLS-P0W-ME3388 | INSTALLATION OF SMALL BORE WLS PIPING (ISOMETRIC SV3-WLS-PLW-040) |
| 3826 | SV3-WLS-PLW-ME0510 | INSTALLATION OF SMALL BORE WLS PIPING (INCLUDES ISOMETRIC SV3-WLS-PLW-060) |
| 3827 | SV3-WLS-PLW-ME0938 | Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-051 |
| 3828 | SV3-WLS-PLW-ME2478 | FABRICATE AND INSTALL ISOMETRIC DRAWING# SV3-WLS-PLW-741 |
| 3829 | SV3-WLS-PLW-ME3091 | FABRICATION/INSTALLATION OF SMALL BORE WLS PIPING FOR ISOMETRIC SV3-WLS-PLW-35K |
| 3830 | SV3-WLS-THW-ME2910 | HYDRO TEST THE UNIT 3 LIQUID RADWASTE SYSTEM PIPING PHASE 5 |
| 3831 | SV3-WRS-P0W-ME2348 | ANNEX BUILDING - ELEV 100 WRS PIPING PACKAGE #2 |
| 3832 | SV3-WRS-P0W-ME2349 | ANNEX BUILDING - ELEV 136 WRS PIPING PACKAGE |
| 3833 | SV3-WRS-P0W-ME2450 | Fabrication and Installation of Small Bore WRS Piping (Isometric SV3-WRS-PLW-57Q) |
| 3834 | SV3-WRS-P0W-ME2490 | FABRICATION AND INSTALLATION OF LARGE BORE WRS PIPING (ISOMETRIC SV3-SRS-PLW-650) |
| 3835 | SV3-WRS-P0W-ME4428 | INSTALLATION OF SMALL BASE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-86C, SV3-WRS-PLW-809 |
| 3836 | SV3-WRS-P0W-ME6720 | WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WRS-PLW-521, 52N, 52M, 52L) |
| 3837 | SV3-SWS-PHW-ME1503 | INSTALLATION OF SWS LARGE BORE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-SWS-PLW-ME1494 WORK PACKAGE |
| 3838 | SV4-2000-SUW-CV3226 | TURBINE BLDG.STEEL IN-PROCESS REPAIR/REWORK (CH80,CH81,&CH82) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3839 | SV3-1120-ERW-EL3067 | Fabrication and Installation of non-scheduled, Detail C14 conduit supports in Unit 3 Containment Building. Seismic category II. WP1 |
| 3840 | SV3-1120-ERW-EL3069 | Fabrication and Installation of non-scheduled, Detail C15 conduit supports in Unit 3 Containment Building. Seismic category II. WP1 |
| 3841 | SV3-WRS-PHW-ME3032 | INSTALLATION OF SMALL BORE WRS PIPE SUPPORTS ON R104 MODULE |
| 3842 | SV4-G100-XEW-CV0628 | Unit 4 Vertical Waterproofing Membrane |
| 3843 | SV3-1110-CEW-CV2053 | INSTALLATION OF UNIT 3 STEAM GENERATOR COLUMN PEDESTAL EMBEDMENTS |
| 3844 | SV3-1120-EGW-EL2181 | GROUNDING OF THE CONTAINMENT BUILDING AT ELEVATION 82'-6" TO 100' |
| 3845 | SV3-2000-SUW-CV1571 | RE-WORK OF CH81 STRUCTURAL STEEL |
| 3846 | SV4-2030-CCW-CV0383 | UNIT 4 TURBINE BULIDING 100 FT ELEV.SLAB MUDMAT ( INCLUDES THE 1ST BAY) |
| 3847 | SV4-2030-CCW-CV0384 | U4 Turbine Building 82’-9” to 100’ Elevation Walls |
| 3848 | SV3-1220-EGW-EL2176 | INSTALL GROUNDING GRID AND FLOOR PLATES FOR 82'-6" SLAB AREAS 1, 2 & 3 |
| 3849 | SV3-1133-SSW-CV6172 | SPL44 INSTALLATION |
| 3850 | SV3-1220-EGW-EL3099 | U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR AREAS 3 & 4, WALLS # 41, 48, 49, 50, 51, & 52 EL82' 6" TO 100' 0" |
| 3851 | SV3-1220-EGW-EL3100 | U3-AUXILIARY BUILDING INSTALL ELECTRICAL PENETRATIONS AND GROUNDING FOR AREAS 5 & 6, EL 82' 6" TO 100' 0" |
| 3852 | SV3-2060-EGW-EL3271 | ELECTRICAL GROUNDING INSTALLATION FOR THE TURBINE BUILDING AT ELEVATIONS 170'-0", 196'-3" AND 230'-9". |
| 3853 | SV3-ASS-PHW-ME1526 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 4) FOR ISOMETRIC# SV3-ASS-PLW-023, 02B, & 02U |
| 3854 | SV3-WRS-P0W-ME4424 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES ISOMETRICS SV3-WRS-PLW-802, -80X, -80Y |
| 3855 | SV4-RNS-P0W-861625 | ASME III FABRICATION/INSTALLATION OF CA20 LARGE BORE PIPING FOR ISOMETRIC SV4-RNS-PLW-161 |
| 3856 | SV3-2000-P0W-ME6769 | INSTALLATION OF TEMPORARY FIRE PROTECTION SYSTEM STANDPIPE |
| 3857 | SV3-2033-SHW-EL6790 | Electrical Cable Tray Supplemental Steel Installation in the Turbine Building, Elevation 100’-0”, Area 3 from Columns 18 to 19 & P.2 to R |
| 3858 | SV3-2037-SHW-EL6766 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING FOR ELEV 100'-0" AREA 7 FROM COLUMNS 18 TO 19 AND 1.2 TO K.1 |
| 3859 | SV3-CAS-PHW-ME2788 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-83H |
| 3860 | SV3-CVS-P0W-ME2656 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-102) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3861 | SV3-ME01-PHW-ME1536 | Unit 3 Condenser A: Installation of Water Curtain Spray Piping Supports |
| 3862 | SV3-R161-ERW-EL4153 | INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE R161 |
| 3863 | SV4-1010-CRW-CV1271 | Installation of Unit 4 Nuclear Island Basemat Reinforcement Below Containment Vessel |
| 3864 | SV4-1120-CRW-CV3171 | Unit 4 Containment Concrete Reinforcement El. 76'-6" to El. 80'-0" & El. 80'-6"" |
| 3865 | SV4-2030-CCW-CV0386 | Unit 4, Turbine Building, 100' elevation elevated slabs |
| 3866 | SV4-ASS-P0W-ME5420 | Fabricate and Install Auxiliary Steam System(ASS) Piping |
| 3867 | SV4-ASS-P0W-ME5422 | Installation and Fabrication of Auxiliary Steam System (ASS) Piping Portion 2 |
| 3868 | SV4-ASS-P0W-ME5423 | Installation and Fabrication of Auxiliary Steam Supply System(ASS) Piping Portion 3 |
| 3869 | SV3-4000-SHW-862381 | FABRICATION AND INSTALLATION OF TYPICAL ROUTED CONDUIT SUPPORTS DETAIL C-89 ANNEX BUILDING ALL AREAS/ELEVATIONS BOOK 1 |
| 3870 | SV3-4000-SHW-862356 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS DETAIL C-203 ANNEX BUILDING ALL AREAS ELEVATIONS BOOK 1 |
| 3871 | SV3-4000-SHW-862355 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS DETAIL C-102 ANNEX BUILDING ALL AREAS ELEVATIONS BOOK 1 |
| 3872 | SV3-4031-SHW-861533 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS ANNEX BLDG. AREA 1, ELEV. 100¿, WEST OF BATTERY CHARGER ROOMS, BETWEEN COLUMN LINES 10.05/11.09. |
| 3873 | SV3-2030-PLW-ME1199 | INSTALL PIPING SUPPORTS ON CONDENSATE PIPING BETWEEN CONDENSER AND UNIT 3 CONDENSATE PUMPS |
| 3874 | SV3-2030-PLW-ME1197 | INSTALL CDS PIPING FROM THE CONDENSER C OUTLET BOX TO THE UNIT 3 CONDENSATE PUMPS |
| 3875 | SV3-2141-C0W-850001 | 1ST BAY, 117'-6" ELEV, FLOOR SLAB POUR #1 |
| 3876 | SV3-2047-SHW-861712 | INSTALLATION OF WELDED CABLE TRAY SUPPORTS IN TURBINE BUILDING (ELEV. 120' 6" AREA 7) |
| 3877 | SV3-2034-SHW-861540 | Electrical Cable Tray Welded Support Fabrication and Installation in the Unit 3 Turbine Building, Elevation 100¿0¿¿, Area 4 |
| 3878 | SV3-2059-SHW-861423 | ELECTRICAL CABLE TRAY WELDED SUPPORT INSTALLATION IN THE TURBINE BUILDING, ELEVATION 141¿3¿ , AREA 9, ROOM 20500 PART 2 |
| 3879 | SV4-PH01-CEW-800000 | Unit 4, Reactor Vessel Anchor Bolt Installation and Construction Aid |
| 3880 | SV4-WLS-P0W-800021 | Install large bore pipe per SV4-WLS-PLW-800 |
| 3881 | SV4-WRS-P0W-800008 | Install large bore pipe per SV4-WRS-PLW-59M |
| 3882 | SV4-WRS-P0W-800009 | Install larger bore pipe per SV4-WRS-PLW-59Z |
| 3883 | SV3-1120-ERW-862941 | FABRICATION & INSTALLATION OF DESIGN ROUTED SUPPORTS IN ROOM 11208 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |

| 3884 | SV3-1120-ERW-862942 | FABRICATION & INSTALLATION OF DESIGN ROUTED CONDUIT SUPPORTS IN ROOM 11208 |
| 3885 | SV0-YFS-P0W-862751 | REWORK/REPLACE FIRE HYDRANT SV0-YFS-PL-H16 |
| 3886 | SV3-SFS-PHW-862862 | ASME SECTION III – FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC SV3-SFS-PLW-780 |
| 3887 | SV4-DWS-P0W-862958 | INSTALLATION OF ANNEX BLDG DWS PIPING (ISO SV4-DWS-PLW-150) |
| 3888 | SV3-CDS-PHW-860480 | FAB & INSTALL CDS SUPPORTS FOR ISOMETRICS SV3-CDS-PLW-720, SV3-CDS-PLW-721, SV3-CDS-PLW-722, SV3-CDCS-PLW-723 & SV3-CDS-PLW-724 |
| 3889 | SV3-HDS-PHW-860535 | TURBINE BUILDING HDS PIPE SUPPORT INSTALLATION |
| 3890 | SV3-CDS-P0W-860698 | FABRICATION AND INSTALLATION OF CDS PIPING |
| 3891 | SV3-HDS-PHW-860539 | FABRICATE/INSTALL HEATER DRAIN SYSTEM PIPE SUPPORTS |
| 3892 | SV3-2044-SHW-860223 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'-6", AREA 4 |
| 3893 | SV3-MT71-SSW-850000 | STRUCTURAL STEEL, WASTE WATER RETENTION BASIN |
| 3894 | SV3-1152-SHW-800003 | Install Welded conduit supports in Containment Area 2 Elev. 135'3" that are associated with SP-L26, SP-L27 and SP-L28 PER Drawings SV3-1152-ER-602 and SV3-1152-ER-606 |
| 3895 | SV4-2101-CEW-862982 | UNIT4 TURBINE BUILDING FIRST BAY WALLS TO 122' PIPE PENETRATIONS |
| 3896 | SV4-CA20-S4W-800004 | 90'-3" Elev., Cask Loading Pit, Room 12463, Submodules 43 thru 46 |
| 3897 | SV3-FPS-THW-ME2720 | HYDRO TEST PACKAGE FOR UNIT 3 PHASE 2 FIRE PROTECTION SYSTEM (FPS) INCLUDING ISO'S (SV3-FPS-PLW-955 954,95AK,95AL,95AW,95AX,95BA) |
| 3898 | SV3-HDS-P0W-ME3736 | INSTALLATION AND FABRICATION OF HEATER DRAIN SYSTEM PIPING |
| 3899 | SV3-KB23-KBW-ME2688 | INSTALLATION OF KB23 COMPONENTS |
| 3900 | SV3-ML05-MLW-ME1897 | INSTALLATION OF EMBEDDED PIPING PENETRATIONS 82'-6" WALLS ONLY |
| 3901 | SV3-CVS-P0W-800002 | Install small bore pipe per SV3-CVS-PLW-512 |
| 3902 | SV3-CVS-PHW-800001 | Install small bore pipe supports per SV3-CVS-PLW-512 |
| 3903 | SV3-CVS-P0W-800003 | Install small bore pipe per SV3-CVS-PLW-521 |
| 3904 | SV3-CVS-PHW-800002 | Install small bore pipe supports per SV3-CVS-PLW-521 |
| 3905 | SV3-ML05-MLW-ME1898 | ATTACHMENT OF NELSON STUDS TO PIPING PENETRATIONS 82' 6" WALLS |
| 3906 | SV3-ML05-MLW-ME1899 | ATTACHMENT OF WELDED COUPLINGS TO PIPING PENETRATIONS 82'6" WALLS |
| 3907 | SV3-ML05-MLW-ME2048 | UNIT 3 TURBINE BUILDING EL 100'-0" PIPING PENETRATIONS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3908 | SV3-ML05-MLW-ME2169 | INSTALLATION OF PENETRATIONS IN CA20 WALL 2 |
| 3909 | SV3-ML05-MLW-ME2170 | INSTALLATION OF PENETRATIONS IN CA20 WALLS 3 & 4 |
| 3910 | SV3-ML05-MLW-ME2637 | INSTALLATION OF ANNULUS WALL PENETRATIONS 82'6 TO 100'0 |
| 3911 | SV3-ML05-MLW-ME3946 | INSTALLATION OF CA01 ASME WALL PENETRATIONS FOR SUB-ASSEMBLY 4 |
| 3912 | SV3-ML05-MLW-ME4909 | INSTALLATION OF PENETRATION 11209-ML-118 (CA05) |
| 3913 | SV4-PV71-MEW-ME6729 | PRE-INSTALLATION WELDING OF MAIN STOP VALVE/CONTROL VALVE EQUALIZERS |
| 3914 | SV3-ML05-MLW-ME5034 | INSTALLATION OF CA01 PENETRATIONS |
| 3915 | SV3-ML05-MLW-ME6708 | CA20 WALL PENETRATIONS SEALANT |
| 3916 | SV3-MP07-MEW-ME2914 | INSTALLATION OF FWS STARTUP FEEDWATER PUMP (FWS-MP-03A) |
| 3917 | SV3-MP07-MEW-ME2915 | INSTALLATION OF FWS STARTUP FEEDWATER PUMP (FES-MP-03B). |
| 3918 | SV3-MP10-MEW-ME2773 | Installation Of TCS Turbine Bldg. Cooling Water Pumps (TCS-MP-01A & 01B) |
| 3919 | SV3-MP20-MEW-ME2366 | INSTALLATION OF HDS MSR SHELL DRAIN PUMP (HDS-MP-01A). |
| 3920 | SV3-MP20-MEW-ME2383 | INSTALLATION OF HDS MSR SHELL DRAIN PUMP (HDS-MP-01B) |
| 3921 | SV3-MS19-MEW-ME2482 | INSTALL MB CONDENSATE POLISHER (CPS-MV-01A/01B) AND CPS-MS-01A/01B) |
| 3922 | SV3-MS60-MEW-ME1679 | INSTALLATION OF AUXILIARY MOISTURE SEPARATOR (ASS-MT-08) |
| 3923 | SV3-MT6A-MEW-ME4797 | INSTALLATION OF LOS OIL STORAGE TANK (LOS-MT-02A/B) |
| 3924 | SV3-MV7H-MPW-ME6688 | INSTALLATION OF THE DEGASIFIER COLUMN (WLS-MV-01) |
| 3925 | SV3-PWS-P0W-ME4414 | FABRICATE AND INSTALL THE POTABLE WATER SUPPLY LINE TO UNIT 3 TURBINE TIE-IN |
| 3926 | SV3-PWS-PHW-ME2872 | INSTALLATION OF SMALL BORE PWS PIPING SUPPORTS FOR ISOMETRIC SV3-PW-PLW-060 |
| 3927 | SV3-PXS-P0W-ME2640 | FABRICATE AND INSTALL PXS LARGE BORE PIPING SHOWN ON ISOMETRIC DRAWINGS SV3-PXS-PLW-187, SV3-PXS-PLW-188 & SV3-PXS-PLW-189 |
| 3928 | SV3-PXS-P0W-ME2673 | Installation Of Small Bore PXS Piping (Includes Isometric: SV3-PXS-PLW-652) |
| 3929 | SV3-PXS-P0W-ME2700 | Installation of Small Bore PXS Piping (Includes Isometric: SV#-PXS-PLW-823) |
| 3930 | SV3-PXS-P0W-ME2731 | ASME SECTION III-FABRICATION/INSTALLATION OF ISOMETRIC#SV3-PXS-PLW-01E (LINE NUMBERS PXS-PL-L055A) |

| 3947 | SV3-RCS-P0W-ME2711 | Installation of Small Bore RCS Piping (Includes Isometric SV3-RCS-PLW-282) |
| 3948 | SV3-RCS-P0W-ME2712 | INSTALLATION OF SMALL BORE RCS PIPING (INCLUDES ISOMETRIC: SV3-RCS-PLW-290) |
| 3949 | SV3-RCS-P0W-ME2713 | Installation of Small Bore RCS Piping (Includes Isometric SV3-RCS-PLW-292) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3950 | SV0-0000-ERW-EL5902 | INSTALLATION OF NEW DUCT BANKS AND DIRECT BURIED TO EXPOSED RACEWAYS AT 315 BLDG FOR SYSTEMS RWS, PWS, YFS AND ZFS |
| 3951 | SV3-RCS-P0W-ME2714 | Installation of Small Bore RCS Piping (Includes Isometric: SV3-RCS-PLW-927, 929) |
| 3952 | SV3-RCS-P0W-ME2715 | INSTALLATION OF SMALL BORE RCS PIPING (INCLUDES ISOMETRIC: SV3-RCS-PLW-928, 92A) |
| 3953 | SV3-RNS-P0W-ME2829 | INSTALLATION OF LARGE BORE RNS PIPING (INCLUDES ISOMETRICS: SV3-RNS-PLW-022,023,07A) |
| 3954 | SV3-RNS-P0W-ME2830 | INSTALLATION OF LARGE BORE RNS PIPING (INCLUDES ISOMETRICS: SV3-RNS-PLW-024) |
| 3955 | SV3-RNS-PLW-ME2704 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-141) |
| 3956 | SV3-RNS-PLW-ME2705 | INSTALLATION OF RNS LARGE BORE PIPING (INCLUDES ISOMETRIC SV3-RNS-PLW-161) |
| 3957 | SV3-RWS-P0W-ME6785 | FABRICATE AND INSTALL THE RWS SUPPLY TO THE UNIT 3 COOLING TOWER BASINS A & B AND TO THE DTS PRETREATMENT SKID. |
| 3958 | SV3-CVS-P0W-800005 | Install large bore pipe per SV3-CVS-PLW-531 |
| 3959 | SV3-CVS-P0W-800007 | Install small bore pipe and supports per SV3-CVS-PLW-65D |
| 3960 | SV3-FPS-PHW-800001 | Install large bore pipe supports per SV3-FPS-PLW-713 |
| 3961 | SV3-RNS-PHW-800003 | Install large bore pipe supports per SV3-RNS-PLW-094 |
| 3962 | SV3-RNS-P0W-800001 | Install large bore pipe per SV3-RNS-PLW-17F |
| 3963 | SV3-SDS-P0W-ME2139 | FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #1 |
| 3964 | SV3-SDS-P0W-ME2300 | FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #2 |
| 3965 | SV3-SDS-P0W-ME2302 | FABRICATE AND INSTALL SANITARY DRAIN PIPING UNDER THE UNIT 3 ANNEX SLAB #4 |
| 3966 | SV3-WGS-ITW-ME4483 | FUNCTIONAL ARRANGEMENT WALKDOWN OF WGS SYSTEM. |
| 3967 | SV3-WLS-MTW-ME0745 | WLS EFFLUENT HOLDUP TANK A INSTALLATION |
| 3968 | SV3-WLS-PHW-ME1044 | Fabrication/ Installation of Pipe Supports for Isometric Drawing WLS-PLW-071 |
| 3969 | SV0-869-XVW-CV6004 | NORTH VEHICLE BARRIER DITCH |
| 3970 | SV3-WLS-PLW-ME0936 | Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-041 |
| 3971 | SV4-1000-XCW-CV0059 | Place Category 2 Backfill, EGB, and Common Fill in Unit 4 Excavation from Elevation - 180ft to Final Grade |
| 3972 | SV0-SM01-CSW-MU0899 | Mock up for Concrete Placement for the AP1000 Shield Building RS/SC Connection Zone and Air Inlet/Tension Ring |
| 3973 | SV3-0000-CEW-CV2806 | UNIT 3 TURBINE BUILDING TRANSFORMER FOUNDATION EMBED |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3974 | SV3-0000-EGW-EL2316 | Perform Installation of Underground Commodities (SV3-SITE STATION GROUNDING GRID) For Ground Grid Area,K1300 |
| 3975 | SV4-CWS-P0W-ME3242 | INSTALLATION OF CWS PIPING RISERS (SUPPLY SIDE) |
| 3976 | SV3-0500-CFW-CV2605 | INSTALL/REMOVE 2" SHAKE SPACE FORMS |
| 3977 | SV3-1000-CEW-CV0353 | UNIT 3 NUCLEAR ISLAND BASEMAT CAST-IN-PLACE ANCHOR BOLTS |
| 3978 | SV3-1120-ERW-EL3065 | Fabrication and Installation of non-scheduled, Detail C13 conduit supports in Unit 3 Containment Building. Seismic category II. WP1 |
| 3979 | SV3-1134-SSW-CV6173 | SPL43 INSTALLATION |
| 3980 | SV3-1208-CRW-CV5106 | U3 Shield Building Wall Concrete Reinforcement Fabrication and Installation El 100ft-0in to El 117ft-6in |
| 3981 | SV3-1208-CRW-CV5111 | Installation of Reinforcing Steel through Unit 3 Shield Building Panels (01J - 01G, 01Q, 01R) & First Course #14 Nut Installation |
| 3982 | SV3-1210-CCW-CV2549 | CONCRETE PLACEMENT IN N-LINE & CONTAINMENT BLOCKOUT UP TO ELEV 100'-0" |
| 3983 | SV3-1210-EGW-EL1068 | Unit 3 Auxillary Bldg EL.66'-6" Grounding Work Package for Walls 6,7, 8 |
| 3984 | SV3-1210-EGW-EL5393 | Install Grounding To Modules & Stairwells For SV3 Auxiliary Building, Level 66’-6”, Area 1 thru 6 |
| 3985 | SV3-1230-CEW-CV4403 | VOGTLE UNIT 3 AUXILIARY BUILDING AREA 2, EMBEDS AND TEMPORARY FORMWORK, ELEVATION 100 FT. |
| 3986 | SV3-1230-CPW-CV3079 | UNIT 3 AUXILIARY BUILDING PRECAST CONCRETE FLOOR PANELS EL. 92FT.-6IN. |
| 3987 | SV3-2000-Z0W-CV5182 | UNIT 3 TURBINE BUILDING REINFORCED CONCRETE REQUIREMENTS |
| 3988 | SV3-2020-MEW-ME1397 | Unit 3 Condenser A Spring Support Foundation Installation |
| 3989 | SV3-2020-MEW-ME1480 | Unit 3 Condenser C Outlet Box Installation |
| 3990 | SV3-2033-SHW-EL6792 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING ELEVATION 100'0" AREA 3 FROM COLUMNS 19 TO 20 & L.1 TO R |
| 3991 | SV3-2037-SHW-EL6160 | ELECTRICAL CABLE TRAY SUPPORTS INSTALLATION FOR THE TURBINE BUILDING AT ELEVATION 100'-0" IN AREA 7 |
| 3992 | SV3-2037-SHW-EL6793 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING FOR ELEV 100'-0" AREA 7 FROM COLUMNS 18 TO 20 AND K.1 TO L.1 |
| 3993 | SV3-2050-EGW-EL3089 | ELECTRICAL GROUNDING INSTALLATION FOR THE TURBINE BUILDING AT ELEVATIONS 135'-3" AND 141'-3" |
| 3994 | SV3-2060-ERW-EL3272 | ELECTRICAL EMBEDDED CONDUIT INSTALLATION FOR THE TURBINE BUILDING CA-81 TURBINE DECK SLAB AT ELEVATION 170'-0" |
| 3995 | SV3-4000-SSW-CV3868 | ANNEX BUILDING AREAS 1-3 STEEL ERECTION GENERAL NOTES, DETAILS AND SPECIFICATIONS |
| 3996 | SV3-4000-Z0W-CV4379 | UNIT 3 ANNEX BUILDING REINFORCED CONCRETE REQUIREMENTS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 3997 | SV3-4030-CCW-CV5233 | UNIT 3 ANNEX BUILDING MISCELLANEOUS GROUTING AT ELEVATION 100' 0" |
| 3998 | SV3-4030-CCW-CV5234 | UNIT 3 ANNEX BUILDING MISCELLANEOUS GROUTING AT ELEVATION 107'-2" & ABOVE |
| 3999 | SV3-4031-ERW-EL6600 | INSTALLATION OF CONDUIT SLEEVES FOR RACEWAY PENETRATIONS, ANNEX BUILDING, AREA 1, ELEVATION 100'-0" |
| 4000 | SV3-4040-SSW-CV2289 | ANNEX BUILDING STRUCTURAL STEEL AREA 4 SEQUENCE |
| 4001 | SV3-4041-CEW-CV3183 | U3 ANNEX BUILDING AREA 1 EMBEDDED ITEMS FROM ELEVATION 100-'0" TO 117'-6" |
| 4002 | SV3-FPS-PHW-ME2576 | INSTALLATION OF ANNEX FPS PIPING SUPPORTS FOR WP (SV3-FPS-PLW-ME2573) |
| 4003 | SV3-ASS-PHW-ME1527 | FABRICATE/INSTALL OF AUXILIARY STEAM (ASS) SUPPORTS (PORTION 4) FOR ISOMETRIC# SV3-ASS-PLW-020, 022, 02V, 02S, & 02H |
| 4004 | SV3-ASS-PLW-ME1475 | FABRICATE AND INSTALL AUXILIARY STEAM SYSTEM(ASS) PIPING PORTION 3 FOR 82'-9" |
| 4005 | SV3-CA01-MHW-CV2160 | Lifting Frames and Bracing Submodules 01 Thru 03, Thru 24, & 25 |
| 4006 | SV3-CA01-MHW-CV4242 | CA01 INSTALL TEMP BRACES SG1 ROOM (WEST) FOR LIFT |
| 4007 | SV3-CA01-MHW-CV4243 | CA01 REMOVE LIFT LUGS AT SM 04. 11, 12 AND 13 |
| 4008 | SV3-CA01-MHW-CV4244 | CA01 REMOVE LIFT LUGS AT SM 16, 17, 18 AND 19 |
| 4009 | SV3-CA01-S4W-CV2066 | CA01 POST WELDING SURVEY DATA/VERIFICATION |
| 4010 | SV3-CA22-S8W-CV6249 | CA22 Floor Module 82'-6"" |
| 4011 | SV3-CA33-S5W-CV5950 | U3 CONTAINMENT INSTALLATION OF CA33 STIFFENERS, AREA REINFORCING BAR FABRICATION & STAGING |
| 4012 | SV3-CAS-P0W-ME2110 | Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-732 & SV#-CAS-PLW-733 |
| 4013 | SV3-CAS-P0W-ME2111 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-CAS-PLW-755 & SV3-CAS-PLW-759 |
| 4014 | SV3-CAS-P0W-ME2112 | Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-764 & SV3-CAS-PLW-77A |
| 4015 | SV3-CAS-P0W-ME2113 | Fabricate and Install CAS Small Bore Piping shown on Isometric Drawing # SV3-CAS-PLW-77B |
| 4016 | SV3-CAS-P0W-ME2119 | FABRICATE AND INSTALL CAS SMALL BORE PIPING SHOWN ON ISOMETRIC DRAWING# SV3-CAS-PLW-853 |
| 4017 | SV3-CAS-P0W-ME3433 | INSTALLATION OF SMALL BORE CAS PIPING (INCLUDES SV3-CAS-PLW-413, 414) |
| 4018 | SV3-CAS-PHW-ME2780 | INSTALLATION OF SMALL BORE CAS PIPING SUPPORTS (INCLUDES ISOMETRIC SV3-CAS-PLW-732) |
| 4019 | SV3-CAS-PHW-ME2786 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-835 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4020 | SV3-CAS-PHW-ME2787 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-83F |
| 4021 | SV3-CCS-P0W-ME2822 | Installation of Large Bore CCS Piping (Includes Isometrics: SV3-CCS-PLW-700, 701) |
| 4022 | SV3-CCS-P0W-ME2823 | INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRICS: SV3-CCS-PLW-710, 711) |
| 4023 | SV3-CAS-PHW-ME2789 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-853 |
| 4024 | SV3-CAS-PHW-ME2791 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CAS-PLW-86D |
| 4025 | SV3-CDS-PHW-ME2184 | INSTALLATION OF CDS LARGE BORE PUMP DISCHARGE PIPING SUPPORTS FOR PIPING INCLUDED IN THE SV3-CDS-PLW-ME2183 WORK PACKAGE |
| 4026 | SV3-CAS-THW-ME5582 | HYDROSTATIC TESTING OF THE COMPRESSED & INSTRUMENT AIR PIPING FROM UNIT 3 ANNEX TO UNIT 3 DIESEL GENERATOR BLDG., |
| 4027 | SV3-CDS-PHW-ME2186 | Installation of CDS Large Bore Pump Discharge Piping Supports For Piping Included in The SV3-CDS-PLW-ME2185 Work Package |
| 4028 | SV3-CB00-S5W-CV2690 | UNIT 3, NUCLEAR ISLAND, INSTALL OVERLAY PLATES FOR CB MODULES |
| 4029 | SV3-CDS-PLW-ME2183 | INSTALLATION OF LARGE BORE PUMP DISCHARGE PIPING; SV3-CDS-PLW-70AA, SV3-CDS-PLW-70A, SV3-CDS-PLW-70B, SV3-CDS-PLW-70C, SV3-CDS-PLW-70D, SV3-CDS-PLW-70E |
| 4030 | SV3-CDS-PLW-ME2185 | INSTALLATION OF LARGE BORE PUMP DISCHARGE PIPING; SV3-CDS-PLW-01AM, SV3-CDS-PLW-013 SPOOL #5, SV3-CDS-PLW-014, SV3-CDS-PLW-015 |
| 4031 | SV3-CB00-S8W-CV2681 | INSTALLATION OF CB MODULES 51, 52, 53 & 54 AT ELEVATION 80'0 |
| 4032 | SV3-CDS-PLW-ME2306 | INSTALLATION OF CDS PIPING FOR ISOMETRICS SV3-CDS-PLW-020, SV3-CDS-PLW-021, SV3-CDS-PLW-030, SV3-CDS-PLW-031, SV3-CDS-PLW-040, SV3-CDS-PLW-041. |
| 4033 | SV3-CES-PHW-ME1569 | Fabrication/Installation of Pipe Supports for Isometric Drawing SV3-CES-PLW-702 |
| 4034 | SV3-CB00-S8W-CV4047 | UNIT 3 CONTAINMENT INSTALLATION OF CB MODULE 11 & MODULE 12 AT ELEV 84'-6" |
| 4035 | SV3-CES-PLW-ME1552 | FABRICATE AND INSTALL CONDENSER TUBE CLEANING SYSTEM (CES) PIPING IN TURBINE BUILDING ELEV. 82'-6"-100'-0" (ISO SV3-CES-PLW-701, 702, 710, 741, 742,750) |
| 4036 | SV3-CCS-P0W-ME2455 | INSTALLATION OF SMALL BORE CCS PIPING (INCLUDES ISOMETRIC: SV3-CCS-PLW-113 |
| 4037 | SV3-CCS-P0W-ME2775 | Installation of Large Bore Piping ( Includes Isometrics SV#-CCS-PLW-100, 102) |
| 4038 | SV3-CPS-P0W-ME2121 | FABRICATION AND INSTALLATION OF CPS PIPING FROM EL 100'-0" TO SUMPS SV3-WWS-MT-09A/B |
| 4039 | SV3-CVS-P0W-ME2594 | ASM E Secti on Ill - Fabrication/ Install ati on of Isometric# SV3-CVS-PLW- I l 2 (Line Numbers CVS-PL-L026 & CVS-PL-L540) |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4040 | SV3-CCS-P0W-ME2776 | Installation of Large Bore CCS Piping (Includes Isometrics: SV#-CCS-PLW-110, 112) |
| 4041 | SV3-CVS-P0W-ME2595 | ASME Section III - Fabrication\Installation of Isometric# SV3-CVS-PLW-184 (Line Number CVS-PL-L066 |
| 4042 | SV3-CVS-P0W-ME2596 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC#S SV3-CVS-PLW-762 & SV3-CVS-PLW-763(LINE NUMBER CVS-PL-L066) |
| 4043 | SV3-CCS-P0W-ME2778 | INSTALLATION OF LARGE BORE CCS PIPING (INCLUDES ISOMETRICS: SV3-CCS-PLW-140, 142) |
| 4044 | SV3-CCS-P0W-ME2779 | Installation of Large Bore Piping (Includes Isometrics: SV3-CCS-PLW-150, 152) |
| 4045 | SV3-CWS-PLW-ME0973 | Installation of PCCP Piping for CWS Unit #3 Phase 3 Supply Line |
| 4046 | SV3-CWS-PLW-ME2523 | INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-70AK, SV3-CWS-PLW-70AR, SV3-CWS-PLW-71J, SV3-CWS-PLW-71K |
| 4047 | SV3-CWS-PLW-ME2527 | INSTALLATION OF CWS PIPING FOR ISOMETRICS SV3-CWS-PLW-70AL, SV3-CWS-PLW-70N, SV3-CWS-PLW-71E, SV3-CWS-PLW-71F |
| 4048 | SV3-CVS-P0W-ME2655 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-101, 104) |
| 4049 | SV3-CVS-P0W-ME2657 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-110) |
| 4050 | SV3-G100-XEW-CV0416 | Unit 3 Nuclear Island Vertical Waterproofing Membrane Completion |
| 4051 | SV3-CVS-P0W-ME2658 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRICS: SV3-CVS-PLW-290, 292) |
| 4052 | SV3-CVS-P0W-ME2659 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-800) |
| 4053 | SV3-CVS-P0W-ME2660 | INSTALLATION OF SMALL BORE CVS PIPING (INCLUDES ISOMETRIC: SV3-CVS-PLW-801) |
| 4054 | SV3-KB04-KBW-ME0442 | Installation of KB04 Module (WGS Delay and Gaurd Bed) RESERVED FOR Brian Bleakly |
| 4055 | SV3-KB15-KBW-ME0451 | INSTALLATION OF MODULE KB15 (DEGASIFIER DISCHARGE PUMP) |
| 4056 | SV3-ME01-PLW-ME1015 | UNIT 3 CONDENSER A: INSTALLATION OF CASING DRAIN PIPING |
| 4057 | SV3-ME01-PLW-ME1111 | UNIT 3 CONDENSER A: HOTWELL PIPING |
| 4058 | SV3-ML05-MLW-ME2171 | INSTALLATION OF PENETRATIONS IN CA20 WALLS J-1, J-2, K-2 |
| 4059 | SV3-ML05-MLW-ME4411 | INSTALLATION OF CA01 ROOM 11300 PENETRATIONS |
| 4060 | SV3-ML05-MLW-ME4936 | INSTALLATION OF CA01 ASME WALL PENETRATIONS |
| 4061 | SV3-R104-MDW-ME2992 | INSTALLATION OF HVAC ON R104 MODULE |
| 4062 | SV3-VWS-PHW-ME4477 | INSTALL PIPE SUPPORTS FOR WP SV3-VWS-P0W-ME4476 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4063 | SV3-WLS-PLW-ME0939 | Fabricate and Install Small Bore Elevation 1 WLS Piping Iso SV3-WLS-PLW-061 and 06B |
| 4064 | SV3-WRS-PLW-ME0607 | WRS LARGE BORE PIPING INSTALLATION (INCLUDES ISOMETRIC SV3-WRS-PLW-56D AND 56E) |
| 4065 | SV3-WRS-PLW-ME2483 | WRS EMBEDDED PIPING INSTALLATION (INCLUDING ISOMETRIC SV3-WRS-PLW-522) |
| 4066 | SV3-WRS-PLW-ME4435 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-811, 812, 813, 814, 815, 816, 817, 818, 819) |
| 4067 | SV3-WRS-PLW-ME4447 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81A, 81B, 81C, 81D) |
| 4068 | SV3-WRS-PLW-ME4450 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-81H, 81K, 81J, 81L, 81M, 81N, 81P, 81Q, 81R, 81S) |
| 4069 | SV3-WRS-PLW-ME4455 | INSTALLATION OF SMALL BORE WRS PIPING (INCLUDES SV3-WRS-PLW-83D) |
| 4070 | SV3-WRS-THW-ME0717 | RADIOACTIVE WASTE DRAIN SYSTEM (WRS) HYDROSTATIC TESTING |
| 4071 | SV3-WRS-THW-ME2831 | ANNEX BUILDING-WRS HYDROSTATIC TESTING |
| 4072 | SV3-WRS-THW-ME4467 | TESTING OF CA20 LEAK CHASE |
| 4073 | SV3-WWS-MTW-ME2587 | INSTALL UNIT 3 TRANSFORMERS SUMP SV3-WWS-MT-010. |
| 4074 | SV3-WWS-MTW-ME2644 | INSTALL UNIT 3 DIESEL FUEL OIL TANK AREA SUMP SV3-WWS-MT-04. |
| 4075 | SV3-WWS-P0W-ME2140 | FABRICATE AND INSTALL THE WASTE WATER PIPING UNDER THE UNIT 3 ANNEX BASEMAT SLAB |
| 4076 | SV0-RWS-PLW-ME1268 | RAW WATER SYSTEM |
| 4077 | SV0-RWS-PLW-ME1269 | INSTALLATION |
| 4078 | SV3-WWS-P0W-ME2194 | FABRICATE AND INSTALL THE WASTE WATER PIPING FOR THE UNIT 3 OIL/WATER SEPARATOR. |
| 4079 | SV0-RWS-THW-ME4321 | HYDRO TEST OF THE HDPE PIPING FOR UNIT 3 AND UNIT 4 RAW WATER SYSTEM (RWS) |

| 4220 | SV3-CCS-PHW-800016 | Install Small Bore Pipe Supports Per SV3-CCS-PLW-05S |
| 4221 | SV3-CCS-PHW-800026 | Install Small Bore Pipe Supports Per SV3-CCS-PLW-106 |
| 4222 | SV3-CCS-PHW-800027 | Install Small Bore Pipe Supports Per SV3-CCS-PLW-107 |
| 4223 | SV3-CVS-PHW-800009 | Install Large Bore Pipe Supports Per SV3-CVS-PLW-094 |
| 4224 | SV3-CVS-PHW-800014 | Install Small Bore Pipe Supports Per SV3-CVS-PLW-281 |
| 4225 | SV3-DWS-PHW-800006 | Install Small Bore Pipe Supports Per SV3-DWS-PLW-731 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4226 | SV3-PXS-P0W-ME2888 | ASME SECTION III - FABRICATION/INSTALLATION OF ISOMETRIC # SV3-PXS-PLW-014 (LINE NUMBERS PXS-PL-L025A, -027A, -L029A) |
| 4227 | SV3-2041-SHW-863124 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, AREA 1, ELEVATION 120'-6", COLUMNS 13.1 TO 16.1 & P.1 TO R |
| 4228 | SV3-2040-SHW-863123 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE UNIT 3 TURBINE BUILDING, AREA 0, ELEVATION 120'-6", COLUMNS 12.1 TO 13.1 & L.1 TO P.2 |
| 4229 | SV4-2036-SHW-863232 | " ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100'-0". |
| 4230 | SV4-FWS-PHW-860900 | INSTALLATION OF MAIN AND STARTUP FEEDWATER SYSTEM (FWS) PIPE SUPPORTS |
| 4231 | SV4-1234-CPW-850000 | 92'6" TO 100' ELKEV. PRE-CAST PANEL FAB, AUX BLDG. AREA 4 |
| 4232 | SV4-1130-C0W-850001 | UNIT 4, REINFORCED CONCRETE INSIDE CONTAINMENT BLDG. EL. 87'-6" TO 96'-0" EAST SIDE |
| 4233 | SV4-CA20-S4W-850006 | CA20, ROOM 12363, SUBMODULE 75 INSTALLATION |
| 4234 | SV4-HDS-PHW-860902 | FABRICATION AND INSTALLATION OF SV4 HDS PIPING SUPPORTS |
| 4235 | SV4-1231-CPW-850000 | UNIT 4, AUXILLIARY BUILD, AREA 1, 100' ELE. PRECAST PANEL FABRICATION |
| 4236 | SV3-FPS-PHW-800025 | Install Large Bore Pipe Supports Per SV3-FPS-PLW-53B |
| 4237 | SV4-WLS-P0W-861915 | INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 4 WLS LINE. ISOMETRICS SV4-WLS-PLW-81FL, -81FM, -81FP, -81FQ, -81FR, -81FS, -81FT, -81FU, -81FV & -81KF |
| 4238 | SV3-WLS-P0W-861907 | INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE. ISOMETRICS SV3-WLS-PLW-80ET, -80EU, -80EV, -80EW, -80EX, -80EY, -80EZ & -80KD |
| 4239 | SV4-WLS-P0W-861914 | INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 4 WLS LINE. ISOMETRICS SV4-WLS-PLW-81FD, -81FE, -81FF, -81FG, -81FH, -81FJ, -81FK & -81KE |
| 4240 | SV3-WLS-P0W-861908 | INSTALL ELECTRO-FUSION COUPLINGS ON UNIT 3 WLS LINE. ISOMETRICS SV3-WLS-PLW-80FA, -80FB, -80FC, -80FD, -80FE, -80FF, -80FG, -80FH, -80FJ & -80KE |
| 4241 | SV3-WWS-P0W-862360 | INSTALLATION OF SMALL BORE WWS PIPING ISOMETRICS SV3-WWS-PLW-036 |
| 4242 | SV3-CA55-S5W-862414 | CA55 FABRICATION |
| 4243 | SV4-4042-SAW-850004 | SUPPLEMENTARY STEEL, EL. 117'-6" , AREA 2 CL H/E & 7.8/9 |
| 4244 | SV3-1244-CPW-800001 | 107'-2" Elev., Precast Panel Fabrication, Area 4 |
| 4245 | SV4-RCS-P0W-800000 | Install small bore pipe and supports per SV4-RCS-PLW-927 |
| 4246 | SV4-RCS-P0W-800005 | Install Small Bore Pipe And Supports Per SV4-RCS-PLW-290 |
| 4247 | SV4-PXS-P0W-800042 | Install Small Bore Pipe And Supports Per SV4-PXS-PLW-652 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4248 | SV3-RNS-P0W-860286 | FABRICATION / INSTALLATION OF RNS LARGE BORE ISOMETRIC SV3-RNS-PLW-094 |
| 4249 | SV4-4033-ERW-862036 | INSTALLTION OF CONDUIT PENETRATION SLEEVES, ANNEX BUILDING, AREA 3 ELEV 100'-0", 107'-2", 121'-0", & 126'-3" |
| 4250 | SV3-WWS-PHW-862954 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 4251 | SV3-WWS-PHW-860660 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 4252 | SV3-2070-C0W-850007 | UNIT 3 TURBINE BUILDING STUDS, REINFORCING STEEL AND CONCRETE PLACEMENT FOR ROOF SLABS OVER NW AND SW STAIRWELLS |
| 4253 | SV3-1232-ERW-861085 | Install Electrical Penetration Sleeves in Interior & Exterior Walls Elevation 100'-0" to 117'-6", Area 2, Unit 3 |
| 4254 | SV0-0000-C0W-862945 | Building 315: Miscellaneous Concrete |
| 4255 | SV4-CA34-S5W-863024 | CA34 MODULE FABRICATION/ASSEMBLY OF LOOSE PARTS |
| 4256 | SV3-1212-ERW-EL3165 | AUXILARY BUILDING UNIT 3, EL 66'-6", AREA 2, FABRICATE AND INSTALL TYPICAL CONDUIT SUPPORTS. |
| 4257 | SV4-MS01-MSW-862269 | INSTALLTION FOR VWS CHILLERS - VWS-MS-01A/B |
| 4258 | SV4-CA57-S5W-863076 | CA57 FABRICATION |
| 4259 | SV4-CA56-S5W-863062 | CA56 MODULE FABRICATION |
| 4260 | SV3-1150-EJW-862092 | FABRICATION AND INSTALLATION OF HYDROGEN SNESOR CONDUIT/ JUNCTION BOX SUPPORTS ON CV RING 3 AND DOME |
| 4261 | SV3-1150-ERW-862089 | FABRICATION AND INSTALLATION OF HYDROGEN SENSOR CONDUIT SPPORTS ON CV RING 3 |
| 4262 | SV4-1220-CEW-800001 | Unit 4 Aux Bldg, Areas 5 & 6, Rooms 12271 to 12275, 82'-6" Elev., Pre-Placement Embedment Plates |
| 4263 | SV4-FPS-P0W-862841 | Installation of FPS Piping in Annex 4 |
| 4264 | SV3-VWS-PHW-862931 | Fabrication and Installation of VWS Piping Supports |
| 4265 | SV3-0150-ERW-861870 | Cable Tray Support for Aux Transformer 2A |
| 4266 | SV4-CA33-CAW-800000 | CA33 Module Installation |
| 4267 | SV4-CA01-S4W-800002 | CA01-44 Submodule Installation |
| 4268 | SV3-DWS-THW-863097 | HYDRO TESTING OF DWS PIPING ON MODULE R261 |
| 4269 | SV3-CCS-THW-863096 | HYDRO TESTING OF CCS PIPING ON MODULE R261 |
| 4270 | SV3-RNS-P0W-800007 | Install Large Bore Piping per Isometric SV3-RNS-PLW-016 |
| 4271 | SV3-FPS-PHW-854202 | INSTALL SUPPORTS FOR DRAWINGS SV3-FPS-PLW-55U AND SV3-FPS-PLW-559 |
| 4272 | SV3-FPS-THW-863098 | HYDRO TESTING OF FPS PIPPING ON MODULE R261 |
| 4273 | SV3-1121-SPW-850012 | SPL 12 Main Support Beam Installation, Unit 3 |

# Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4274 | SV3-RNS-PHW-851017 | INSTALL LARGE BORE SUPPORTS FROM ISOMETRIC SV3-RNS-PLW-17B |
| 4275 | SV4-VCS-PHW-851020 | INSTALLATION OF SUPPORT VCS-PH-11R0829 |
| 4276 | SV0-PWS-PLW-ME0033 | HDPE Potable Water System Underground Piping for Trench 6 |
| 4277 | SV3-CS17-CSW-800001 | CS17 Module Installation |
| 4278 | SV4-4030-C0W-850005 | 100' Elev. Walls, Pour # 5 |
| 4279 | SV4-VWS-THW-861273 | HYDROSTATIC TESTING OF VWS PIPING ON MODULE R151 |
| 4280 | SV3-2070-C0W-863140 | UNIT 3 TURBINE BUILDING ROOF EXHAUST FAN CURBS |
| 4281 | SV4-PGS-THW-ME2869 | HYDRO TEST THE UNIT 4 PLANT GAS SYSTEM SOUTH OF THE TURBINE BUILDING |
| 4282 | SV4-PGS-THW-ME2870 | HYDRO TEST THE UNIT 4 HIGH PRESSURE NITROGEN PLANT GAS SYSTEM SOUTH OF THE TURBINE BUILDING |
| 4283 | SV4-PGS-P0W-ME2877 | FABRICATE AND INSTALL PGS SMALL BORE CARBON DIOXIDE PIPING SHOWN ON ISOMETRIC DRAWING# SV4-PGS-PLW-898, 899, 900, 901, 902, AND 945 |
| 4284 | SV4-PGS-P0W-ME2875 | FABRICATE AND INSTALL PGS SMALL BORE LP NITROGEN PIPING SHOWN ON ISOMETRIC DRAWING # SV4-PGS-PLW-846, 847, 848, 849, 850 AND 951 |
| 4285 | SV3-1244-SSW-850000 | Auxiliary Building Structural Steel from Elev. 100'-0" to 117'-6", Area 4 |
| 4286 | RFD-SV3-CAS-PHW-850041 | INSTALLATION/FABRICATION OF SMALL BORE PIPE SUPPORTS FOR ISO'S CAS-PLW-41C, 41F, 41G |
| 4287 | SV4-CA37-S4W-863015 | CA37 - SEAM WELDS AND INSTALLATION OF MK#50, MK#132 |
| 4288 | SV4-PGS-P0W-863127 | FABRICATE AND INSTALL PGS SMALL BORE HP NITROGEN PIPING SHOWN ON ISOMETRIC DRAWING # SV4-PGS-PLW-879, 880, 881, 952, 953, 954, 955, 956 |
| 4289 | SV4-CDS-PHW-860885 | FABRICATE AND INSTALL PIPING SUPPORTS FOR CDS ON 100' ELEVATION |
| 4290 | SV4-FWS-PHW-860898 | INSTALLATION OF FWS PIPING SUPPORTS ELEVATION 120' |
| 4291 | SV4-FPS-P0W-800001 | TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0" |
| 4292 | SV4-FPS-P0W-800004 | TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0" |
| 4293 | SV4-FPS-P0W-800005 | TB- INSTALL FPS LARGE BORE PIPE ELEV. 100'-0" |
| 4294 | SV4-HDS-P0W-800000 | TB- INSTALL HDS LARGE BORE PIPE ELEV. 100'-0" |
| 4295 | SV4-HDS-P0W-800001 | TB- INSTALL HDS LARGE BORE PIPE ELEV. 100'-0" |
| 4296 | SV4-WWS-PHW-800000 | TB- INSTALL WWS PIPE SUPPORTS ELEV. 100'-0" |
| 4297 | SV3-WWS-PHW-860662 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 4298 | SV4-CAS-P0W-ME2873 | FABRICATE AND INSTALL CAS BORE PIPING SHOWN ON ISOMETRIC DRAWING # SV4-CAS-PLW-776, 777, 778, 778, 784, AND 799 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4299 | SV3-2039-ERW-862118 | INSTALLATION OF CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9 |
| 4300 | SV3-2039-ERW-862121 | INSTALLATION OF CABLE TRAY RACEWAY COVERS IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9 |
| 4301 | SV3-2039-ERW-862120 | INSTALLATION OF CABLE TRAY RACEWAY IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100', AREA 9 |
| 4302 | SV4-CCS-PHW-861617 | INSTALLATION OF PIPE SUPPORTS FOR SV4-CCS-PLW-522 AND 540 |
| 4303 | SV3-2035-SHW-862410 | ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 5 |
| 4304 | SV3-2032-SHW-862425 | ELECTRICAL CABLE TRAY WELDED SUPPORT FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 100' 0", AREA 2 |
| 4305 | SV4-CCS-P0W-861616 | INSTALLATION OF PIPING FOR SV4-CCS-PLW-522 & -540 |
| 4306 | SV0-0000-CCW-CV5529 | MISCELLANEOUS GROUTING IN 300 SERIES BUILDINGS/YARD |
| 4307 | SV4-MH20-EYW-863215 | 220 TON BRIDGE CRANE MAINLINE SYSTEM ASSEMBLY FOR THE UNIT 4 TURBINE BUILDING IN ROOM 20600 ( CONDUCTOR BAR ) |
| 4308 | SV4-WRS-PHW-800001 | Install Large Bore Pipe Supports Per SV4-WRS-PLW-52B |
| 4309 | SV3-12171-S7W-800000 | UNIT 3 AUX BLDG SPREADER PLATE INSTALLATION, ROOM 12171, FLOOR ELEV 66'-6" |
| 4310 | SV4-WWS-PHW-863100 | INSTALLATION AND FABRICATION OF WASTE WATER SYSTEM(WWS) PIPING SUPPORTS |
| 4311 | SV4-CDS-PHW-860331 | INSTALL PIPE SUPPORTS FOR TURBINE ISLAND 4 CONDENSATE SYSTEM ROOM 20300, 20600, 20700 |
| 4312 | SV0-0000-EGW-862959 | INSTALLATION OF GROUND GRID AND ASSOCIATED GROUNDING FOR SITE GRID AREA LOCATION'S K1500 AND L1500 |
| 4313 | SV4-CA01-S4W-861773 | CA01-SUBASSEMBLY 05 ELEV 107' TO 119' OLPS AND WELDED ATTACHMENTS |
| 4314 | SV3-WWS-PHW-860652 | FABRICATION AND INSTALLATION OF WWS PIPING SUPPORTS |
| 4315 | SV3-PWS-P0W-860817 | POTABLE WATER SYSTEM PIPING INSTALLATION |
| 4316 | SV3-PWS-P0W-860816 | INSTALLATION OF SV3 TURBINE BUILDING PWS PIPING |
| 4317 | SV4-CCS-P0W-861618 | INSTALLATION OF PIPING FOR SV4-CCS-PLW-530 & -550 |
| 4318 | SV3-PWS-P0W-863266 | INSTALLATION OF SV3 TURBINE BUILDING PWS PIPING |
| 4319 | SV4-ME04-MEW-863330 | MSR MOISTURE SEPARATOR REHEATERS (MSS-ME-01A) |
| 4320 | SV3-VWS-PLW-ME2836 | INSTALLATION OF SMALL BORE VWS PIPING (INCLUDES ISOMETRICS SV3-VWS-PLW-386) |
| 4321 | SV4-WLS-PHW-861369 | INSTALLATION OF PIPE SUPPORTS FOR ISOMETRICS SV4-WLS-PLW-590, -591 & -710 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4322 | SV3-1152-SHW-800004 | Fabricate welded conduit supports for Containment Area 2 Elev. 135'3" that are associated with SP-L26, SP-L27 and SP-L28 |
| 4323 | SV3-SSS-PHW-860597 | INSTALLATION OF SECONDARY SAMPLING SYSTEM (SSS) |
| 4324 | SV4-RNS-MLW-800001 | ASME III - Installation of Containment Vessel Penetration SV4-RNS-PY-C02 (P20) |
| 4325 | SV4-FWS-P0W-863271 | INSTALL PIPING FOR TURBINE ISLAND 4 FEED WATER SYSTEM ROOM 203000 |
| 4326 | SV3-0150-ERW-861866 | CABLE TRAY SUPPORT FOR TRANSFORMER PHASE A |
| 4327 | SV3-0150-ERW-861867 | CABLE TRAY SUPPORT FOR TRANSFORMER PHASE B ( ZAS-ET-1B ) |
| 4328 | SV4-4031-C0W-850001 | UNIT 4 ANNEX BLDG BATTERY/CHARGER ROOM INTERIOR WALLS ELEV 100'-0" TO 116'-10" |
| 4329 | SV4-FWS-PHW-863272 | INSTALL PIPE SUPPORTS FOR TURBINE ISLAND 4 FEED WATER SYSTEM ROOM 20300 |
| 4330 | SV4-DTS-PHW-863256 | DEMINERALIZED WATER TREATMENT TURBINE BUILDING ROOM 20300 DTS-MS-05 A/B TO WASTE |
| 4331 | SV4-VYS-PHW-860345 | AUXILIARY STEAM SUPPLY SYSTEM TURBINE BUILDING ROOM 20400 FROM ASS TO HEAT EXCHANGER |
| 4332 | SV4-CA37-S4W-863106 | UNIT 4 CA37 RIGGING MODIFICATION |
| 4333 | SV4-CA37-S4W-863017 | CA37 - OLP INSTALL AND OLP & EMBED COUPLER INSTALLATION |
| 4334 | SV4-CA37-S4W-863020 | UNIT 4 CA37 STUD INSTALLATION |
| 4335 | SV3-0150-ERW-861868 | CABLE TRAY SUPPORT FOR TRANSFORMER PHASE C |
| 4336 | SV4-1212-ERW-861221 | INSTALL DESIGN ROUTED CABLE TRAY AND SUPPORTS FOR SPARE BATTERY ROOM 12103 EL. 66'-6" |
| 4337 | SV4-WWS-PHW-800034 | TB-Install WWS Large Bore Pipe SUPPORTS- EL 120'-6" |
| 4338 | SV4-MS85-MTW-863174 | INSTALLATION OF LUBE OIL FLUSHING UNIT SV4-LOS-MS-05 |
| 4339 | SV3-PWS-PHW-863265 | FABRICATION AND INSTALLATION OF SV3 TURBINE BUILDING POTABLE WATER SYSTEM PIPING SUPPORTS |
| 4340 | SV4-FPS-P0W-800007 | FPS Piping Installation 100' Elevation |
| 4341 | SV3-FPS-PHW-862830 | INSTALLATION OF FPS PIPE SUPPORTS IN ANNEX 3 |
| 4342 | SV3-KB22-KBW-863241 | REWORK WLS PIPING ON MODULE KB22 |
| 4343 | SV4-WLS-PHW-861959 | FABRICATION / INSTALLATION OF WLS PIPING SUPPORTS SHOWN ON ISOMETRIC DRAWINGS SV4-WLS-PLW-370 |
| 4344 | SV4-HDS-PHW-860906 | FABRICATION AND INSTALLATION OF SV4 TURBINE BUILDING HDS PIPE SUPPORTS |
| 4345 | SV3-2058-SHW-861524 | CABLE TRAY WELDED STAND SUPPORT INSTALLATION FOR TURVINE 3, AREA 8 EL 141'3" |
| 4346 | SV4-1208-CCW-851004 | Course 4 Concrete Placement |
| 4347 | SV3-ML05-MLW-800007 | INSTALL PENETRATIONS SV3-11300-ML-P19 & SV3-11300-ML-P20 |

**Exhibit V – Legacy, WIP, and Completed Work Packages**

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4348 | SV3-MP03-EMW-863282 | INSTALL AC MOTORS TO CONDENSATE PUMPS IN THE UNIT 3 TURBINE BUILDING (BETWEEN COL. 17 & 18, COL. J.15 & I.5 |
| 4349 | SV3-ME01-PHW-860975 | CONDENSER C HEATER DRAIN PIPE SUPPORTS |
| 4350 | SV4-CA01-S4W-861191 | CA01-SA01 - ELEV 96' TO 107' OLPSS AND WELDED ATTACHMENTS |
| 4351 | SV4-CA01-S4W-861768 | CA01-SA01 - ELEV 107'-119' OLPS |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4398 | SV3-CAS-PHW-850041 | INSTALLATION/FABRICATION OF SMALL BORE PIPE SUPPORTS FOR ISO'S CAS-PLW-41C, 41F, 41G |
| 4399 | SV3-1212-ERW-800001 | Install Field Routed Non 1E Couduit in Aux Area 2 Elev 66'6" Room 12102 |
| 4400 | SV3-WLS-PHW-800008 | Install SB Pipe Supports Per Isometric SV3-WLS-PLW-33B |
| 4401 | SV3-ML05-MLW-800005 | ASME III: Installation of Penetration 12306-ML-P25 |
| 4402 | SV3-1120-CCW-CV1817 | PLACEMENT, CURING, AND REPAIR OF CONCRETE INSIDE THE CV UP TO ELEV 80'-0" AND ELEV 80'-6" |
| 4403 | SV3-1212-ERW-800003 | Install Field Routed Class 1E Conduit in AuxilIary Building Area 2, Elev. 66'6", Room 12101 |
| 4404 | SV4-WWS-PHW-860932 | FABRICATE AND INSTALL SV4- TURBINE BUILDING WASTE WATER SYSTEM PIPE SUPPORTS |
| 4405 | SV4-CA37-S4W-863016 | CA37 - MISC STRUCTURAL SHAPE INSTALLATION |
| 4406 | SV4-CA20-S4W-800008 | CA20, Leak Chase Repairs |
| 4407 | SV3-CAS-P0W-863122 | INSTALLATION OF CAS PIPING IN ANNEX 3 ( SWITCHGEAR ROOM ) |
| 4408 | SV3-CDS-P0W-863013 | INSTALLATION OF CDS PIPING FROM CONDENSATE PUMP DISCHARGE VENTS TO CONDENSER (ISOMETRICS SV3-CDS-PLW-744/745/746 |
| 4409 | SV4-TCS-P0W-860921 | INSTALLATION AND FABRICATION OF TURBINE BUILDIN CLOSED COOLING WATER SYSTEM (TCS) |
| 4410 | SV4-FPS-PHW-860335 | INSTALL FPS PIPING SUPPORTS IN UNIT 4 TURBINE BUILDING |
| 4411 | SV4-HDS-PHW-863195 | FABRICATE AND INSTALL HDS PIPING SUPPORTS |
| 4412 | SV3-FPS-PHW-862832 | INSTALLATION OF FPS PIPE SUPPORTS IN ANNEX 3 |
| 4413 | SV3-PWS-PHW-862368 | INSTALLATION OF ANNEX BLDG PWS PIPE SUPPORTS (ISO SV3-PWS-PLW-115,-457 & -458 |
| 4414 | SV4-1232-SAW-850000 | UNIT 4, AUXILIARY BUILDING STUDS FOR 100' ELEV, AREA 2 |
| 4415 | SV3-WLS-PLW-80BY-FP907 | REWORK SPOOLS SV3-WLS-PLW-80BY-1A,-1B & -2 AND SV3-WLS-PLW-80FY-1A,-1B,-1C & -2 |
| 4416 | SV3-2034-SHW-800000 | Electrical Cable Tray Support Fab and Installation in Unit 3 Turbine Building, Elevation 100' 0", Area 4 |
| 4417 | SV3-1212-ERW-800004 | Install Field Routed Non 1E Couduit in Aux Area 2 Elev 66'6" Room 12102 |
| 4418 | SV3-KB33-ERW-800000 | INSTALLATION OF ELECTRICAL CABLE TRAY IN MODULE KB33 |
| 4419 | SV3-WLS-PLW-460-FP1010 | MODIFICATION OF PIPE SPOOL SV3-WLS-PLW-460-1 |
| 4420 | SV3-RWS-P0W-863001 | INSTALL RWS 34" AND 20" HDPE PIPING TO UNIT 3 COOLING TOWER |
| 4421 | SV3-RWS-THW-863144 | HYDROTEST RWS 34" AND 20" HDPE PIPING TO UNIT 3 COOLING TOWER |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4422 | SV3-CA01-CCW-800009 | CA01 West Steam Generator Concrete, Wall Placement, Section #7, 10b, 10c, 10d, 11, 12, 13 & 15 up to 153'-0" |
| 4423 | SV4-2050-SSW-863283 | UNIT4 TURBINE BUILDING SEQUENCE 18 ROOMS 20501, 20502 & 20503 |
| 4424 | SV4-SFS-P0W-861547 | INSTALLATION OF PIPING FOR SV4-SFS-PLW-12C & 121 |
| 4425 | SV3-1212-SHW-800008 | Fabricate and Install Field-Routed Conduit Supports in Room 12102, Area 2, Elev. 66'-6" |
| 4426 | SV3-CWS-CYW-863550 | PHASE 3 JOINT GROUTING AND FLOWABLE FILL |
| 4427 | SV4-KB23-THW-863504 | HYDRO TESTING OF WLS PIPING ON MODULE KB23 |
| 4428 | SV3-CVS-PHW-ME2930 | FABRICATION/INSTALLATION OF PIPE SUPPORTS FOR ISOMETRIC DRAWING SV3-CVS-PLW-801 |
| 4429 | SV4-WWS-P0W-863287 | INSTALL WASTE WATER SYSTEM PIPING, ISOMETRICS SV4-WWS-PLW-506, -816, 924 |
| 4430 | SV3-WWS-P0W-863285 | INSTALL WASTE WATER SYSTEM PIPING, ISOMETRICS SV3-WWS-PLW-505, -923, 980 |
| 4431 | SV3-WWS-PHW-860653 | FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER (WWS) SYSTEM PIPING SUPPORTS |
| 4432 | SV0-0000-C0W-863503 | PERSONNEL ACCESS POINT PEDESTRIAN BRIDGE |
| 4433 | SV3-2026-SHW-862477 | INSTALLATION OF ELECTRICAL CABLE TRAY WELDED SUPPORTS IN THE UNIT 3 TURBINE BUILDING ELEV 82'-9" AREA 6 |
| 4434 | SV4-RWS-THW-863145 | Hydrotest RWS 34" and 20" HDPE Piping to Unit 4 Cooling Tower |
| 4435 | SV4-WWS-THW-863143 | HYDROTEST WWS 20" HDPE PIPING FROM UNIT 4 COOLING TOWER |
| 4436 | SV3-2044-SHW-861967 | ELECTRICAL CABLE TRAY WELDED SUPPORTS |
| 4437 | SV3-MSS-PLW-452-FP348 | MODIFY PIPE SPOOL |
| 4438 | SV4-WWS-P0W-863000 | INSTALL WWS 20" HDPE PIPING FROM UNIT 4 COOLING TOWER |
| 4439 | SV4-VWS-PHW-855014 | Containment Building-Installation of Supports: ISO-SV4-VWS-PLW-502 |
| 4440 | SV3-PCS-PHW-800001 | INSTALL ASME III PIPE SUPPORTS PER SV3-PCS-PLW-035 |
| 4441 | SV4-2070-SSW-863274 | UNIT 4 TURBINE BUILDING ROOF DECKING, SEQUENCE 14, 15 AND 16 |
| 4442 | SV3-2044-SHW-861966 | ELECTRICAL CABLE TRAY WELDED SUPPORTS |
| 4443 | SV3-2045-SHW-861893 | ELECTRICAL CABLE TRAY WELDED SUPPORTS FABRICATION AND INSTALLATION IN THE UNIT 3 TURBINE BUILDING, ELEVATION 120'6", AREA 5 |
| 4444 | SV3-4000-SHW-863324 | FABRICATE AND INSTALL TYPICAL FIELD ROUTED CONDUIT SUPPORTS C-131 ANNEX BUILDING ALL AREAS AND ELEVATIONS, BOOK 1 |
| 4445 | SV3-CCS-P0W-800074 | Install Large Bore Pipe per SV3-CCS-PLW-516 |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4446 | SV3-CAS-PHW-850895 | INSTALL ISOMETRICS SV3-CAS-PLW-895 SMALL BORE PIPE SUPPORTS |
| 4447 | SV3-1214-SHW-862408 | FABRICATE & INSTALL DESIGNED CONDUIT SUPPORTS AREA 4 ELEV 66'-6" |
| 4448 | SV3-CAS-P0W-862826 | INSTALLATION OF ANNEX BLDG CAS PIPING (ISO-CAS-PLW-20S, 25S, 25U, 25V, 202, 203, 205, 211, 217, 224, 225, 227, & 229) |
| 4449 | SV4-WWS-THW-862953 | HYDROTEST UNIT 4 YARD WASTE WATER SYSTEM UNDERGROUND STEEL PIPING. |
| 4450 | SV4-MS18-MSW-800000 | TB - Condenser Air Removal Pump Skids (CMS-MS-01A/B/C/D) |
| 4451 | SV3-1230-CRW-800008 | 100'-0" to 115'-6", CL 2 Wall, Rebar Fabrication & Installation (Wall 98) |
| 4452 | SV3-4000-SHW-862404 | FABRICATION AND INSTALLATION OF TYPICAL FIELD ROUTED CONDUIT SUPPORTS, DETAIL C-94, ANNEX BUILDING, ALL AREAS / ELEVATIONS. BOOK 1 |
| 4453 | SV4-CA01-S4W-861769 | CA01-SA01 ELEV 107" - 119" DWA |
| 4454 | SV3-4032-SHW-862719 | FABRICATE AND INSTALL CABLE TRAY SUPPORTS, ANNEX BLDG. AREA 2, ELEV. 100', BETWEEN COLUMN LINES 6/7.1 & E/F. |
| 4455 | SV4-1130-SLW-861200 | Upender Pit, Fabrication |
| 4456 | SV3-1213-ERW-EL3680 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C15 FOR AUX BUILDING (AREAS 3 & 4) EL 66'-6" TO 82'-6" |
| 4457 | SV3-1213-ERW-EL3681 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C29 FOR AUX BUILDING (AREAS 3 & 4) EL 66'-6" TO 82'-6" |
| 4458 | SV3-1215-ERW-EL3683 | FABRICATE AND INSTALL FIELD ROUTED TYPICAL CONDUIT SUPPORT C13 FOR AUX BUILDING (AREAS 5 & 6) EL 66'-6" TO 82'-6" |
| 4459 | SV4-2037-SHW-863385 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING ELEVATION 100'-0" AREA 7 FROM COLUMNS 18 TO 19 & I.2 TO K.1 |
| 4460 | SV3-2000-PHW-863497 | INSTALLATION OF TEMPORARY SUPPORTS FOR FIRE PROTECTION SYSTEM |
| 4461 | SV4-2037-SHW-863388 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING, ELEVATION 100'-0", AREA 7 FROM COLUMNS 18 TO 20 & L.1 TO K.1 |
| 4462 | SV3-WLS-PHW-800001 | Install SB pipe supports per SV3-WLS-PLW-522 |
| 4463 | SV3-2068-SHW-863447 | ELECTRICAL CABLE TRAY SUPPLEMENTAL STEEL INSTALLATION IN THE TURBINE BUILDING UNIT 3, BELOW ELEVATION 230'-9", |
| 4464 | SV3-WLS-PHW-800000 | Install SB pipe supports per SV3-WLS-PLW-521 |
| 4465 | SV3-CVS-PHW-800004 | Install large bore pipe supports per SV3-CVS-PLW-532 |
| 4466 | SV3-RNS-PHW-861487 | FABRICATION/INSTALLATION OF RNS SMALL BORE PIPE SUPPORTS FOR ISO SV3-RNS-PLW-17U |

## Exhibit V – Legacy, WIP, and Completed Work Packages

| Table 3. In-Progress Work Packages (as of October 17, 2017) | | |
|---|---|---|
| 4467 | SV3-WLS-P0W-800000 | Install small bore pipe per SV3-WLS-PLW-521 |
| 4468 | SV3-WLS-PHW-800004 | Install Small Bore Supports per Isometric SV3-WLS-PLW-524 |
| 4469 | SV3-RNS-PHW-ME9014 | FABRICATION/INSTALLATION OF SUPPORTS FOR ISO SV3-RNS-PLW-174 |
| 4470 | SV3-WLS-PHW-800003 | Install Small Bore Supports per Isometric SV3-WLS-PLW-533 |
| 4471 | SV4-FPS-PHW-863275 | FABRICATION AND INSTALLATION OF SV4 TURBINE BUILDING FPS PIPING SUPPORTS |
| 4472 | SV3-2044-SHW-861965 | ELECTRICAL CABLE TRAY WELDED SUPPORTS |
| 4473 | SV3-6030-C0W-850000 | DIESEL GENERATOR BUILDING CONCRERT SLAB AND FOUNDATION |
| 4474 | SV4-4040-CRW-863383 | AREA 3 WALLS FROM 107'2" TO 123'-8" REINFORCEMEN |
| 4475 | SV4-RNS-P0W-850180 | INSTALL PIPE ISO SV4-RNS-PLW-180 |
| 4476 | SV3-WWS-PHW-860663 | FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER (WWS) SYSTEM PIPING SUPPORTS |
| 4477 | SV4-CA01-S4W-861770 | CA01-SA02 - ELEV 107' TO 119' OLPs AND WELDED ATTACHMENTS |
| 4478 | SV3-RNS-PHW-850023 | 3" LARGE BORE PIPE SUPPORT PER ISO: SV3-RNS-PLW-023 |
| 4479 | SV4-WWS-PHW-863288 | INSTALL WASTE WATER SYSTEM PIPE SUPPORTS ISOMETRICS SV4-WWS-PLW-506, 816, 924 |
| 4480 | SV3-VYS-PHW-863039 | INSTALLATION OF PIPE SUPPORTS IN ANNEX 3 |
| 4481 | SV3-RWS-P0W-863381 | UNIT 3 RAW WATER SYSTEM PIPING NEAR THE BLOWDOWN SUMP |
| 4482 | SV4-RWS-P0W-863382 | UNIT 4 RAW WATER SYSTEM PIPING AND SUPPORT NEAR THE BLOWDOWN SUMP |
| 4483 | SV4-KB37-KBW-863074 | SITE COMPLETION OF MODULE KB37 FABRICATION |
| 4484 | SV3-PWS-PHW-ME6979 | Installation of Annex Bldg PWS Pipe Supports (Isometrics SV3-PWS-PLW-150, 156, 157, 454, 455, 471). |
| 4485 | SV3-WWS-PHW-860654 | FABRICATE AND INSTALL SV3 TURBINE BUILDING WASTE WATER SYSTEM PIPING SUPPORTS |
| 4486 | SV3-VWS-P0W-862835 | INSTALLATION OF VWS PIPING IN ANNEX 3 |
| 4487 | SV0-SDS-PLW-ME1148 | Install Sanitary Drain Lines Between Lift Stations MS-501 and MS-502 |
| 4488 | SV4-1220-CCW-CV10085 | UNIT 4 CORE BUILDING IN CONCRETE PLACEMENT OUTSIDE THE CVBH AT ELEV. 72'-6" |
| 4489 | SV4-RWS-P0W-863002 | INSTALL RWS 34" AND 20" HDPE PIPING TO UNIT 4 COOLING TOWER |
| 4490 | SV4-PXS-P0W-800022 | Install large bore pipe per SV4-PXS-PLW-029 |
| 4491 | SV4-CA33-S5W-863332 | CA33 INSTALL SHIOPPED LOOSE PARTS |
| 4492 | SV4-CA01-S4W-861780 | CA01 SUBASSEMBLY 03 ELEV > 119' OLPs AND WELDED ATTACHMENTS |
| 4493 | SV3-CA01-S8W-CV4043 | U3 CONTAINMENT INSTALLATION OF CA01 MODULE AT ELEV. 83'-0" |

## Exhibit V – Legacy, WIP, and Completed Work Packages

Ms. Bierria and Ms. Caen:

The Southern Company (the "Company") proposes to file or join in the filing of reports under the Securities Exchange Act of 1934, as amended, with the Securities and Exchange Commission with respect to the following: (1) the Company's Annual Report on Form 10-K for the year ended December 31, 2017 and (2) the Company's Quarterly Reports on Form 10-Q during 2018.

The Company and the undersigned directors and officers of the Company, individually as a director and/or as an officer of the Company, hereby make, constitute and appoint each of you our true and lawful Attorney for each of us and in each of our names, places and steads to sign and cause to be filed with the Securities and Exchange Commission in connection with the foregoing said Annual Report on Form 10-K, said Quarterly Reports on Form 10-Q and any necessary or appropriate amendment or amendments to any such reports, to be accompanied in each case by any necessary or appropriate exhibits or schedules thereto.

Yours very truly,

THE SOUTHERN COMPANY

**THE SOUTHERN COMPANY**

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER**

I, Thomas A. Fanning, certify that:

1. I have reviewed this annual report on Form 10-K of The Southern Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

*CONSOLIDATED FINANCIAL STATEMENTS*
*With Report of Independent Registered Public Accounting Firm*

# *SOUTHERN NATURAL GAS COMPANY, L.L.C.*

*As of December 31, 2017 and 2016 and*
*For the Year Ended December 31, 2017 and the Four Months Ended December 31, 2016*

**SOUTHERN NATURAL GAS COMPANY, L.L.C. AND SUBSIDIARY**
**TABLE OF CONTENTS**

**Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Members of Southern Natural Gas Company, L.L.C.

***Opinion on the Financial Statements***

We have audited the accompanying consolidated balance sheets of Southern Natural Gas Company, L.L.C. and its subsidiary (the “Company”) as of December 31, 2017 and 2016, and the related consolidated statements of income, of cash flows and of members’ equity for the year ended December 31, 2017 and for the four months ended December 31, 2016, including the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of their operations and their cash flows for the year ended December 31, 2017 and for the four months ended December 31, 2016 in conformity with accounting principles generally accepted in the United States of America.

***Basis for Opinion***

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the auditing standards of the PCAOB and in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

***Significant Transactions with Related Parties***

As discussed in Note 6 to the consolidated financial statements, the Company has entered into significant transactions with related parties.

## 1. General

We are a Delaware limited liability company, originally formed in 1935 as a corporation. When we refer to “us,” “we,” “our,” “ours,” “the Company,” or “SNG,” we are describing Southern Natural Gas Company, L.L.C and its consolidated subsidiary.

The member interests in us are as follows:

- 50.0% - Kinder Morgan SNG Operator, LLC, an indirect subsidiary of Kinder Morgan, Inc. (KMI); and
- 50.0% - Evergreen Enterprise Holdings, LLC, an indirect subsidiary of The Southern Company (TSC).

Our operations are regulated by the Federal Energy Regulatory Commission (FERC) under the Natural Gas Act of 1938, the Natural Gas Policy Act of 1978 and the Energy Policy Act of 2005. The FERC approves tariffs that establish rates, cost recovery mechanisms and other terms and conditions of service to our customers.

Our primary business consists of the interstate transportation and storage of natural gas. Our natural gas pipeline system consists of approximately 6,900 miles of pipeline with a design capacity of approximately 4.2 billion cubic feet (Bcf) per day for natural gas. This pipeline system extends from supply basins in Louisiana, Mississippi and Alabama to market areas in Louisiana, Mississippi, Alabama, Florida, Georgia, South Carolina and Tennessee, including the metropolitan areas of Atlanta and Birmingham. We also own and operate 100% of the Muldon storage facility in Monroe County, Mississippi and own a 50% interest in Bear Creek Storage Company, L.L.C. (Bear Creek) in Bienville Parish, Louisiana. Bear Creek is a joint venture equally owned by us and Tennessee Gas Pipeline Company, L.L.C., an affiliate. Our interest in Bear Creek, the Muldon storage facilities and contracted storage have a combined working natural gas storage capacity of approximately 68 Bcf and peak withdrawal capacity of approximately 1.3 Bcf per day.

## 2. Summary of Significant Accounting Policies

### *Basis of Presentation*

We have prepared our accompanying consolidated financial statements in accordance with the accounting principles contained in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification, the single source of United States Generally Accepted Accounting Principles (GAAP) and referred to in this report as the Codification. Additionally, certain amounts from the prior year have been reclassified to conform to the current presentation.

Management has evaluated subsequent events through February 14, 2018, the date the financial statements were available to be issued.

### *Principles of Consolidation*

We consolidate entities when we have the ability to control or direct the operating and financial decisions of the entity or when we have a significant interest in the entity that gives us the ability to direct the activities that are significant to that entity. The determination of our ability to control, direct or exert significant influence over an entity involves the use of judgment. All significant intercompany items have been eliminated in consolidation.

### *Use of Estimates*

Certain amounts included in or affecting our financial statements and related disclosures must be estimated, requiring us to make certain assumptions with respect to values or conditions which cannot be known with certainty at the time our financial statements are prepared. These estimates and assumptions affect the amounts we report for assets and liabilities, our revenues and expenses during the reporting period, and our disclosures, including as it relates to contingent assets and liabilities at the date of our financial statements. We evaluate these estimates on an ongoing basis, utilizing historical experience, consultation with experts and other methods we consider reasonable in the particular circumstances. Nevertheless, actual results may differ significantly from our estimates. Any effects on our business, financial position or results of operations resulting from revisions to these estimates are recorded in the period in which the facts that give rise to the revision become known.

In addition, we believe that certain accounting policies are of more significance in our financial statement preparation process than others, and set out below are the principal accounting policies we apply in the preparation of our consolidated financial statements.

***Cash Equivalents***

We define cash equivalents as all highly liquid short-term investments with original maturities of three months or less.

***Accounts Receivable, net***

We establish provisions for losses on accounts receivable due from shippers and operators if we determine that we will not collect all or part of the outstanding balance. We regularly review collectability and establish or adjust our allowance as necessary using the specific identification method. The allowance for doubtful accounts as of December 31, 2017 and 2016 was not significant.

***Inventories***

Our inventories, which consist of materials and supplies, are valued at weighted-average cost, and we periodically review for physical deterioration and obsolescence.

***Natural Gas Imbalances***

Natural gas imbalances occur when the amount of natural gas delivered from or received by a pipeline system or storage facility differs from the scheduled amount of gas to be delivered or received. We value these imbalances due to or from shippers and operators at current index prices. Imbalances are settled in cash or made up in-kind, subject to the terms of our FERC tariff. Imbalances due from others are reported on our accompanying Consolidated Balance Sheets in "Other current assets." Imbalances owed to others are reported on our accompanying Consolidated Balance Sheets in "Other current liabilities." We classify all imbalances due from or owed to others as current as we expect to settle them within a year.

***Property, Plant and Equipment, net***

Our property, plant and equipment is recorded at its original cost of construction or, upon acquisition, at either the fair value of the assets acquired or the cost to the entity that first placed the asset in utility service. For constructed assets, we capitalize all construction-related direct labor and material costs, as well as indirect construction costs. Our indirect construction costs primarily include an interest and equity return component (as more fully described below) and labor and related costs associated with supporting construction activities. The indirect capitalized labor and related costs are based upon estimates of time spent supporting construction projects.

We use the composite method to depreciate property, plant and equipment. Under this method, assets with similar economic characteristics are grouped and depreciated as one asset. The FERC-accepted depreciation rate is applied to the total cost of the group until the net book value equals the salvage value. For certain general plant, the asset is depreciated to zero. As part of periodic filings with the FERC, we also re-evaluate and receive approval for our depreciation rates. When property, plant and equipment is retired, accumulated depreciation and amortization is charged for the original cost of the assets in addition to the cost to remove, sell or dispose of the assets, less salvage value. We do not recognize gains or losses unless we sell land or an entire operating unit (as approved by the FERC). In those instances where we receive recovery in rates related to losses on dispositions of operating units, we record a regulatory asset for the estimated recoverable amount.

Included in our property balances are base gas and working gas at our storage facilities. We periodically evaluate natural gas volumes at our storage facilities for gas losses. When events or circumstances indicate a loss has occurred, we recognize a loss on our accompanying Consolidated Statements of Income or defer the loss as a regulatory asset on our accompanying Consolidated Balance Sheets if deemed probable of recovery through future rates charged to customers.

We capitalize a carrying cost (an allowance for funds used during construction or AFUDC) on debt and equity funds related to the construction of long-lived assets. This carrying cost consists of a return on the investment financed by debt and a return on the investment financed by equity. The debt portion is calculated based on our average cost of debt. Interest costs capitalized are included as a reduction in "Interest, net" on our accompanying Consolidated Statements of Income. The equity portion is calculated based on our most recent FERC approved rate of return. Equity amounts capitalized are included in "Other, net" on our accompanying Consolidated Statements of Income. The amounts of capitalized AFUDC were not significant for the year ended December 31, 2017 and the four months ended December 31, 2016.

***Asset Retirement Obligations (ARO)***

We record liabilities for obligations related to the retirement and removal of long-lived assets used in our businesses. We record, as liabilities, the fair value of ARO on a discounted basis when they are incurred and can be reasonably estimated, which is typically at the time the assets are installed or acquired. Amounts recorded for the related assets are increased by the amount of these obligations. Over time, the liabilities increase due to the change in their present value, and the initial capitalized costs are depreciated over the useful lives of the related assets. The liabilities are eventually extinguished when the asset is taken out of service.

We are required to operate and maintain our natural gas pipelines and storage systems, and intend to do so as long as supply and demand for natural gas exists, which we expect for the foreseeable future. Therefore, we believe that we cannot reasonably estimate the ARO for the substantial majority of our assets because these assets have indeterminate lives. We continue to evaluate our ARO and future developments could impact the amounts we record. Our recorded ARO were not significant as of December 31, 2017 and 2016.

***Asset and Investment Impairments***

We evaluate our assets and investments for impairment when events or circumstances indicate that their carrying values may not be recovered. These events include market declines that are believed to be other than temporary, changes in the manner in which we intend to use a long-lived asset, decisions to sell an asset or investment and adverse changes in market conditions or in the legal or business environment such as adverse actions by regulators. If an event occurs, which is a determination that involves judgment, we evaluate the recoverability of our carrying value based on either (i) the long-lived asset's ability to generate future cash flows on an undiscounted basis or (ii) the fair value of the investment in an unconsolidated affiliate. If an impairment is indicated, or if we decide to sell a long-lived asset or group of assets, we adjust the carrying value of the asset downward, if necessary, to its estimated fair value.

Our fair value estimates are generally based on assumptions market participants would use, including market data obtained through the sales process or an analysis of expected discounted future cash flows. There were no impairments for the year ended December 31, 2017 and the four months ended December 31, 2016.

***Equity Method of Accounting***

We account for investments, which we do not control but do have the ability to exercise significant influence, by the equity method of accounting. Under this method, our equity investments are carried originally at our acquisition cost, increased by our proportionate share of the investee’s net income and by contributions made, and decreased by our proportionate share of the investee’s net losses and by distributions received.

***Revenue Recognition***

We are subject to FERC regulations, therefore fees and rates established under our tariff are a function of our cost of providing services to our customers, including a reasonable return on our invested capital. Our revenues are primarily generated from natural gas transportation and storage services and include estimates of amounts earned but unbilled. We estimate these unbilled revenues based on contract data, regulatory information, and preliminary throughput and allocation measurements, among other items. Revenues for all services are based on the thermal quantity of gas delivered or subscribed at a price specified in the contract. For our transportation services and storage services, we recognize reservation revenues on firm contracted capacity ratably over the contract period regardless of the amount of natural gas that is transported or stored. For interruptible or volumetric-based services, we record revenues when physical deliveries of natural gas are made at the agreed upon delivery point or when gas is injected or withdrawn from the storage facility. For contracts with step-up or step-down rate provisions that are not related to changes in levels of service, we recognize reservation revenues ratably over the contract life. The revenues we collect may be subject to refund in a rate proceeding.

For the year ended December 31, 2017, revenues from our two largest customers (one affiliate and one third party) were approximately $269 million, and $55 million, each of which exceeded 10% of our operating revenues. For the the four months ended December 31, 2016, revenues from our largest affiliate and non-affiliate customers were approximately $89 million and $52 million, respectively, each of which exceeded 10% of our operating revenues for that period, see Note 6. Amounts for both periods include contracted capacity released by customers to third parties.

In September 2016, we recognized revenue of $37 million from an early termination of a customer contract.

***Environmental Matters***

We capitalize or expense, as appropriate, environmental expenditures. We capitalize certain environmental expenditures required in obtaining rights-of-way, regulatory approvals or permitting as part of the construction. We accrue and expense environmental costs that relate to an existing condition caused by past operations, which do not contribute to current or future revenue generation. We generally do not discount environmental liabilities to a net present value, and we record environmental liabilities when environmental assessments and/or remedial efforts are probable and we can reasonably estimate the costs. Generally, our recording of these accruals coincides with our completion of a feasibility study or our commitment to a formal plan of action. We recognize receivables for anticipated associated insurance recoveries when such recoveries are deemed to be probable.

We routinely conduct reviews of potential environmental issues and claims that could impact our assets or operations. These reviews assist us in identifying environmental issues and estimating the costs and timing of remediation efforts. We also routinely adjust our environmental liabilities to reflect changes in previous estimates. In making environmental liability estimations, we consider the material effect of environmental compliance, pending legal actions against us, and potential third-party liability claims. Often, as the remediation evaluation and effort progresses, additional information is obtained, requiring revisions to estimated costs. These revisions are reflected in our income in the period in which they are reasonably determinable. For more information on our environmental matters, see Note 9.

***Other Contingencies***

We recognize liabilities for other contingencies when we have an exposure that indicates it is both probable that a liability has been incurred and the amount of loss can be reasonably estimated. Where the most likely outcome of a contingency can be reasonably estimated, we accrue an undiscounted liability for that amount. Where the most likely outcome cannot be estimated, a range of potential losses is established and if no one amount in that range is more likely than any other, the low end of the range is accrued.

***Postretirement Benefits***

We maintain a postretirement benefit plan covering certain of our former employees that we have made contributions to in the past. These contributions are invested until the benefits are paid to plan participants. The net benefit cost of this plan is recorded on our accompanying Consolidated Statements of Income and is a function of many factors including expected returns on plan assets and amortization of certain deferred gains and losses. For more information on our policies with respect to our postretirement benefit plan, see Note 5.

In accounting for our postretirement benefit plan, we record an asset or liability based on the difference between the fair value of the plan's assets and the plan's benefit obligation. Any deferred amounts related to unrecognized gains and losses or changes in actuarial assumptions are recorded on our Consolidated Balance Sheets as a regulatory asset or liability until those gains or losses are recognized on our accompanying Consolidated Statements of Income.

***Income Taxes***

We are a limited liability company and are not subject to federal or state income taxes. Our Members are responsible for income taxes on their allocated share of taxable income which may differ from income for financial statement purposes due to differences in the tax basis and financial reporting basis of assets and liabilities. However, we are subject to Texas margin tax (a revenue based calculation).

***Regulatory Assets and Liabilities***

Our interstate natural gas pipeline and storage operations are subject to the jurisdiction of the FERC and are accounted for in accordance with Accounting Standards Codification Topic 980, “Regulated Operations.” Under these standards, we record regulatory assets and liabilities that would not be recorded for non-regulated entities. Regulatory assets and liabilities represent probable future revenues or expenses associated with certain charges and credits that are expected to be recovered from or refunded to customers through the ratemaking process. Items to which we apply regulatory accounting requirements include certain postretirement employee benefit plan costs, losses on reacquired debt, taxes related to an equity return component on regulated capital projects prior to our change in legal structure to a non taxable entity, certain differences between gas retained and gas consumed in operations, amounts associated with the Tax Cuts and Jobs Act of 2017 (2017 Tax Reform) and other costs included in, or expected to be included in, future rates. For more information on our regulated operations, see Note 8.

### 3. Property, Plant and Equipment, net

Our property, plant and equipment, net consisted of the following (in millions, except for %):

| | Annual Depreciation Rates % | December 31, 2017 | December 31, 2016 |
|---|---|---|---|
| Transmission and storage facilities | 0.9-2.25 | $ 3,648 | $ 3,570 |
| General plant | 3.33-20 | 19 | 25 |
| Intangible plant | 5-10 | 20 | 19 |
| Other | | 129 | 116 |
| Accumulated depreciation and amortization(a) | | (1,412) | (1,344) |
| | | 2,404 | 2,386 |
| Land | | 13 | 12 |
| Construction work in progress | | 22 | 53 |
| Property, plant and equipment, net | | $ 2,439 | $ 2,451 |

(a) The composite weighted average depreciation rate for the year ended December 31, 2017 and the four months ended December 31, 2016 was approximately 2.3%.

### 4. Debt

We classify our debt based on the contractual maturity dates of the underlying debt instruments. We defer costs associated with debt issuance over the applicable term. These costs are then amortized as interest expense on our accompanying Consolidated Statements of Income.

The following table summarizes the net carrying value of our outstanding debt (in millions):

| | December 31, 2017 | December 31, 2016 |
|---|---|---|
| 5.90% Notes due April 2017 | $ — | $ 500 |
| 4.40% Notes due June 2021 | 300 | 300 |
| 7.35% Notes due February 2031 | 153 | 153 |
| 8.00% Notes due March 2032 | 258 | 258 |
| 4.80% Senior Notes due March 2047 | 400 | — |
| Credit Facility | 13 | — |
| | 1,124 | 1,211 |
| Less: Unamortized discount and debt issuance costs | 9 | 5 |
| Total debt | $ 1,115 | $ 1,206 |
| Less: Current portion of debt | 13 | 500 |
| Total long-term debt | $ 1,102 | $ 706 |

***Credit Facility***

Effective September 1, 2016, we entered into a $75 million, unsecured, 5-year revolving credit facility (Credit Facility). The facility is with a syndicate of financial institutions with Barclays Bank PLC as the administrative agent. Borrowings under our Credit Facility can be used for working capital and other general corporate purposes and are included within the caption “Current portion of debt” on our accompanying Consolidated Balance Sheet.

Our Credit Facility borrowings bear interest at either (i) London Interbank Offered Rate (LIBOR) plus an applicable margin ranging from 0.875% to 1.50% per annum based on our credit ratings or (ii) the greatest of the (a) Federal Funds Effective rate plus ½ of 1%, (b) the Prime Rate in effect for such day, and (c) the LIBOR rate for a one-month Eurodollar loan plus 1%, plus, in each case, an applicable margin ranging from nil to 1.5%. In addition, we have agreed to pay the administrative agent a commitment fee, based on our credit rating, ranging from 0.075% to 0.200%.

Our Credit Facility includes the following restrictive covenants:

- total debt divided by earnings before interest, income taxes, depreciation and amortization may not exceed 5.00 to 1.00;
- certain limitations on indebtedness, including payments and amendments;
- certain limitations on entering into mergers, consolidations, sales of assets and investments;
- limitations on granting liens; and
- prohibitions on making any distributions if an event of default exists or would exist upon making such a distribution.

As of December 31, 2017, we had $13 million of borrowings outstanding under our Credit Facility. As of December 31, 2016, we had no borrowings outstanding under our Credit Facility. As of December 31, 2017 and 2016, we were in compliance with all required covenants.

***Debt Issuance and Repayment***

On March 15, 2017 we issued $400 million of 4.80% senior notes due March 2047 and incurred debt issuance costs of $4 million. On April 3, 2017 we used the net proceeds of $399 million received from the debt issuance and equity contributions from our Members to repay $500 million of our 5.90% notes due April 2017.

***Debt Covenants***

Under our various other financing documents, we are subject to certain restrictions and covenants. The most restrictive of these include limitations on the incurrence of liens and limitations on sale-leaseback transactions. For the year ended December 31, 2017 and the four months ended December 31, 2016, we were in compliance with our debt-related covenants.

## 5. Retirement Benefits

***Pension and Retirement Savings Plans***

KMI maintains a pension plan and a retirement savings plan covering substantially all of its U.S. employees, including certain of our former employees. The benefits under the pension plan are determined under a cash balance formula. Under its retirement savings plan, KMI contributes an amount equal to 5% of participants' eligible compensation per year. KMI is responsible for benefits accrued under its plans and allocates certain costs based on a benefit allocation rate applied on payroll charged to its affiliates.

***Postretirement Benefits Plan***

We provide postretirement benefits, including medical benefits for a closed group of retirees. Medical benefits for pre-age 65 participants of this closed group may be subject to deductibles, co-payment provisions, dollar caps and other limitations on the amount of employer costs, and are subject to further benefit changes by KMI, the plan sponsor. Post-age 65 Medicare eligible participants are provided a fixed subsidy to purchase coverage through a retiree Medicare exchange. In addition, certain former employees continue to receive limited postretirement life insurance benefits. Our postretirement benefit plan costs were prefunded and were recoverable under prior rate case settlements. Currently, there is no cost recovery or related funding that is required as part of our current FERC approved rates, however, we can seek to recover any funding shortfall that may be required in the future. We do not expect to make any contributions to our postretirement benefit plan in 2018 and there were no contributions made in 2017 and 2016. KMI's postretirement plans have been merged. Prior to September 1, 2016, KMI used combined plan assets under the structure of the plans of its affiliated entities to fund participant benefits, including participants of affiliated entities.

*Postretirement Benefit Obligation, Plan Assets and Funded Status*

Our postretirement benefit obligations and net benefit costs are primarily based on actuarial calculations. We use various assumptions in performing these calculations, including those related to the return that we expect to earn on our plan assets, the estimated cost of health care when benefits are provided under our plan and other factors. A significant assumption we utilize is the discount rates used in calculating the benefit obligations. The discount rate used in the measurement of our postretirement benefit obligation is determined by matching the timing and amount of our expected future benefit payments for our postretirement benefit obligation to the average yields of various high-quality bonds with corresponding maturities. The service and interest cost components of net periodic benefit cost (credit) for our other postretirement benefit plan are estimated by utilizing a full yield curve approach by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to their underlying projected cash flows.

The table below provides information about our postretirement benefit plan (in millions):

| | Year Ended December 31, 2017 | Four Months Ended December 31, 2016 |
|---|---|---|
| Change in plan assets: | | |
| Fair value of plan assets - beginning of period | $ 58 | $ 57 |
| Actual return on plan assets | 5 | 2 |
| Benefits paid | (3) | (1) |
| Fair value of plan assets - end of period | $ 60 | $ 58 |
| Change in postretirement benefit obligation: | | |
| Postretirement benefit obligation - beginning of period | $ 29 | $ 30 |
| Interest cost(a) | 1 | — |
| Actuarial gain(b) | — | — |
| Benefits paid | (3) | (1) |
| Postretirement benefit obligation - end of period | $ 27 | $ 29 |
| Reconciliation of funded status: | | |
| Fair value of plan assets | $ 60 | $ 58 |
| Less: Postretirement benefit obligation | 27 | 29 |
| Net asset at December 31(c) | $ 33 | $ 29 |

(a) Amount during the four months ended December 31, 2016 was less than $500,000.
(b) Amounts during the year ended December 31, 2017 and the four months ended December 31, 2016 were less than $500,000.
(c) Net asset amounts are included in "Deferred charges and other assets" on our accompanying Consolidated Balance Sheets.

*Plan Assets*

The primary investment objective of our plan is to ensure that, over the long-term life of the plan, an adequate pool of sufficiently liquid assets exists to meet the benefit obligations to retirees and beneficiaries. Investment objectives are long-term in nature covering typical market cycles. Any shortfall of investment performance compared to investment objectives is generally the result of economic and capital market conditions. Although actual allocations vary from time to time from our targeted allocations, the target allocations of our postretirement plan's assets are 30% equity, 30% fixed income and 40% master limited partnerships.

Below are the details of the postretirement benefit plan assets by class and a description of the valuation methodologies used for assets measured at fair value.

- Level 1 assets' fair values are based on quoted market prices for the instruments in actively traded markets. Included in this are equities and master limited partnerships using the quoted prices in actively traded markets;
- Level 2 assets' fair values are primarily based on pricing, data representative of quoted prices for similar assets in active markets (or identical assets in less active markets). Included in this are short term investment funds which are valued at cost plus calculated interest; and
- Plan assets with fair values that are based on the net asset value per share, or its equivalent (NAV), as reported by the issuers are determined based on the fair value of the underlying securities as of the valuation date and include private limited partnerships and fixed income trusts. The plan assets measured at NAV are not categorized within the fair value hierarchy described above, but are separately identified in the table below.

Listed below are the fair values of the plan's assets that are recorded at fair value by class and categorized by fair value measurement used at December 31, 2017 and 2016 (in millions):

| | 2017 | | | 2016 | | |
|---|---|---|---|---|---|---|
| | Level 1 | Level 2 | Total | Level 1 | Level 2 | Total |
| Short-term investment fund (money market) | $ — | $ 1 | $ 1 | $ — | $ 1 | $ 1 |
| Equity securities, domestic | 5 | — | 5 | 3 | — | 3 |
| Master limited partnerships | 14 | — | 14 | 14 | — | 14 |
| Total assets in fair value hierarchy | $ 19 | $ 1 | $ 20 | $ 17 | $ 1 | $ 18 |
| | | | | | | |
| Investments measured at NAV(a) | | | 40 | | | 40 |
| Investments at fair value | | | $ 60 | | | $ 58 |

(a) In accordance with Subtopic 820-10 of Accounting Standards Update (ASU) No. 2015-07, *Fair Value Measurement (Topic 820)* , certain Plan assets that were measured at NAV per share (or its equivalent) have not been classified in the fair value hierarchy. The fair value of the fixed income trusts as of December 31, 2017 and 2016 is $18 million and $15 million, respectively. The fair value of the private limited partnerships as of December 31, 2017 and 2016 is $22 million and $25 million, respectively.

*Expected Payment of Future Benefits*

As of December 31, 2017, we expect the following benefit payments under our plan (in millions):

| Year | Total |
|---|---|
| 2018 | $ 3 |
| 2019 | 3 |
| 2020 | 2 |
| 2021 | 2 |
| 2022 | 2 |
| 2023 - 2027 | 9 |

*Actuarial Assumptions and Sensitivity Analysis*

Postretirement benefit obligations and net benefit costs are based on actuarial estimates and assumptions. The following table details the weighted average actuarial assumptions used in determining our postretirement plan obligations and net benefit costs.

| | 2017 | 2016 |
|---|---|---|
| | (%) | |
| Assumptions related to benefit obligations at December 31: | | |
| Discount rate | 3.45 | 3.63 |
| Assumptions related to benefit costs for the year ended December 31: | | |
| Discount rate for benefit obligations | 3.63 | 3.82 |
| Discount rate for interest on benefit obligations | 2.93 | 2.98 |
| Expected return on plan assets(a) | 7.00 | 7.25 |

(a) The expected return on plan assets listed in the table above is a pre-tax rate of return based on our portfolio of investments. We utilize an after-tax expected return on plan assets to determine our benefit costs, which is based on unrelated business income taxes with a weighted average rate of 21% for both 2017 and 2016.

Actuarial estimates for our postretirement benefits plan assumed a weighted average annual rate of increase in the per capita costs of covered health care benefits of 6.41%, gradually decreasing to 4.54% by the year 2038. A one-percentage point change in assumed health care trends would not have had a significant effect on the postretirement benefit obligation or interest costs as of and for the year ended December 31, 2017 and the four months ended December 31, 2016 .

*Components of Net Benefit Income*

The components of net benefit costs (income) are as follows (in millions):

| | Year Ended December 31, 2017 | Four Months Ended December 31, 2016 |
|---|---|---|
| Interest cost(a) | $ 1 | $ — |
| Expected return on plan assets | (3) | (1) |
| Amortization of prior service credit(a) | (2) | — |
| Net benefit income | $ (4) | $ (1) |

(a) Amounts during the four months ended December 31, 2016 were less than $500,000.

## 6. Related Party Transactions

***Affiliate Balances and Activities***

We enter into transactions with our affiliates within the ordinary course of business, including natural gas transportation services to and from affiliates under long-term contracts, storage contracts and various operating agreements, and the services are based on the same terms as non-affiliates. As of December 31, 2017 and 2016, we had approximately $1 million of natural gas imbalance receivable with our affiliates which is included in "Other current assets" on our accompanying Consolidated Balance Sheets.

We do not have employees and are operated by an indirect subsidiary of KMI; therefore, KMI employees provide services to us. Subsequent to TSC's acquisition, we entered into an Operations and Management Agreement (O&M Agreement) with Kinder Morgan SNG Operator, LLC, a subsidiary of KMI, whereby we reimburse KMI monthly for direct operating expenses incurred on our behalf and pay a fixed annual fee for general and administrative costs. The fixed fee for the year ended December 31, 2017 and the four months ended December 31, 2016 was $30 million and $13 million, respectively. The fixed fee will be $31 million for each of the years 2018 through 2020, and is subject to review and approval for each of the next four years pursuant to the O&M Agreement. These costs are reflected, as appropriate, in the "Operations and maintenance", "General and administrative" and "Capitalized costs" lines in the table below.

The following table shows revenues and costs from our affiliates (in millions):

| | Year Ended December 31, 2017 | Four Months Ended December 31, 2016 |
|---|---|---|
| Revenues | $ 200 | $ 67 |
| Operations and maintenance | 90 | 24 |
| General and administrative | 30 | 13 |
| Capitalized costs | 9 | 4 |

***Subsequent Event***

In January 2018, we made a cash distribution to our Members of $22 million and received contributions from our Members of approximately $21 million.

**7. Fair Value**

The following table reflects the carrying amount and estimated fair value of our outstanding debt balances (in millions):

| | As of December 31, | | | |
|---|---|---|---|---|
| | 2017 | | 2016 | |
| | Carrying Amount | Estimated Fair Value | Carrying Amount | Estimated Fair Value |
| Total debt | $1,115 | $1,302 | $1,206 | $1,312 |

We separate the fair values of our financial instruments into levels based on our assessment of the availability of observable market data and the significance of non-observable data used to determine the estimated fair value. We estimated the fair values of our outstanding debt balance primarily based on quoted market prices for the same or similar issues, a Level 2 fair value measurement. Our assessment and classification of an instrument within a level can change over time based on the maturity or liquidity of the instrument and this change would be reflected at the end of the period in which the change occurs. During the year ended December 31, 2017 and the four months ended December 31, 2016, there were no changes to the inputs and valuation techniques used to measure fair value, the types of instruments, or the levels in which they were classified.

## 8. Accounting for Regulatory Activities

***Regulatory Assets and Liabilities***

Regulatory assets and liabilities represent probable future revenues or expenses associated with certain charges and credits that will be recovered from or refunded to customers through the ratemaking process. As of December 31, 2017, the regulatory assets are being recovered in our rates, without earning a return, over a period of approximately one year to 27 years. Below are the details of our regulatory assets and liabilities as of (in millions):

| | December 31, | |
|---|---|---|
| | **2017** | **2016** |
| Current regulatory assets | | |
| Difference between gas retained and gas consumed in operations | $ 1 | $ 3 |
| Other | 1 | 1 |
| Total current regulatory assets(a) | 2 | 4 |
| Non-current regulatory assets | | |
| Taxes on capitalized funds used during construction(b) | 13 | 24 |
| Unamortized loss on reacquired debt | 9 | 10 |
| Other | 1 | 2 |
| Total non-current regulatory assets | 23 | 36 |
| Total regulatory assets | $ 25 | $ 40 |
| | | |
| Current regulatory liabilities | | |
| Difference between gas retained and gas consumed in operations | $ 12 | $ 1 |
| Other | 3 | 2 |
| Total current regulatory liabilities | 15 | 3 |
| Non-current regulatory liabilities | | |
| Postretirement benefits | 19 | 19 |
| Income taxes(b) | 55 | — |
| Other | 1 | 2 |
| Total non-current regulatory liabilities(c) | 75 | 21 |
| Total regulatory liabilities | $ 90 | $ 24 |

(a) Included in “Other current assets” on our accompanying Consolidated Balance Sheets.
(b) See “2017 Tax Reform” below.
(c) Included in “Other long-term liabilities and deferred credits” on our accompanying Consolidated Balance Sheets.

Our significant regulatory assets and liabilities include:

*Difference between gas retained and gas consumed in operations*

Amounts reflect the value of the difference between the gas retained and consumed in our operations. Pursuant to our tariff, these amounts are expected to be recovered from our customers in subsequent periods.

*Taxes on capitalized funds used during construction*

Amounts represent the recovery of deferred income taxes on AFUDC Equity recognized during the time prior to 2007 when we were a taxable entity. These amounts are included in our tariff rates and are recovered over the depreciable lives of the asset in which they apply.

*Unamortized loss on reacquired debt*

Amounts represent the deferred and unamortized portion of loss on reacquired debt which are recovered in our rates. Amounts are amortized over the original life of the debt issue, or in the case of refinanced debt, over the life of the new debt issue.

*Postretirement Benefits*

Amounts represent unrecognized gains and losses related to our postretirement benefit plan.

*2017 Tax Reform*

On December 22, 2017, the U.S. enacted the 2017 Tax Reform. Among the many provisions included in the 2017 Tax Reform is a provision to reduce the U.S. federal corporate income tax rate from 35% to 21% effective January 1, 2018. As income taxes are a component in our maximum recourse rates, the income tax rate change resulted in us recording a provisional $66 million non-cash charge to our earnings related to an adjustment to our deferred income tax related regulatory assets and liabilities. The charge was recorded as a reduction to Revenues of $55 million and an increase to Other, net of $11 million for the year ended December 31, 2017.

As the impact on the regulatory ratemaking process is currently uncertain, and we have not completed our assessment of the 2017 Tax Reform's effect, these amounts are subject to further adjustments. We continue to assess the impact of the 2017 Tax Reform on our business in order to complete our analysis. Any adjustments to our provisional amount will be reported in the reporting period in which any such adjustments are determined and may be material in the period in which the adjustments are made.

***Regulatory Assets Amortization***

Our amortizations of the regulatory assets for the year ended December 31, 2017 and the four months ended December 31, 2016 were $1 million, related to deferred losses on reacquired debt included in “Interest, net” on our accompanying Consolidated Statements of Income.

***Regulatory Matters***

*Rate Case*

On July 12, 2013, the FERC approved a comprehensive rate case settlement for SNG's general system-wide tariff rates. Under the settlement, we are required to file a new rate case no later than February 28, 2018 for new storage and transportation tariff rates to go into effect September 1, 2018. In August 2017, we commenced pre-filing settlement negotiations with our customers to try and resolve the rate proceeding prior to filing a rate case with FERC. We have filed on January 29, 2018 a request to FERC to extend the obligation to file the rate case from February 28 to May 1, 2018 in order to continue negotiations of a pre-filing settlement. If we were to succeed in obtaining a pre-filing settlement, new transportation, storage and park and loan tariff rates would go into effect September 1, 2018.

*Other*

We applied with the FERC on February 3, 2017 in Docket No. CP17-46-000 to expand our system in Georgia (Fairburn Expansion project) to provide additional firm transportation capacity of approximately 347,000 dekatherms per day in the Southeast market. The estimated capital cost of the project is approximately $240 million and its anticipated in-service date is October 1, 2018.

**9. Litigation, Environmental and Commitments**

We are party to various legal, regulatory and other matters arising from the day-to-day operations of our businesses that may result in claims against the Company. Although no assurance can be given, we believe, based on our experiences to date and taking into account established reserves, that the ultimate resolution of such items will not have a material adverse impact on our business, financial position, results of operations or cash flows. We believe we have meritorious defenses to the matters to which we are a party and intend to vigorously defend the Company. When we determine a loss is probable of occurring and is reasonably estimable, we accrue an undiscounted liability for such contingencies based on our best estimate using information available at that time. If the estimated loss is a range of potential outcomes and there is no better estimate within the range, we accrue the amount at the low end of the range. We disclose contingencies where an adverse outcome may be material, or in the judgment of management, we conclude the matter should otherwise be disclosed.

***Legal Proceedings***

*Cliffs Natural Resources (Cliffs)*

We filed a lawsuit against Cliffs in the Circuit Court of Jefferson County, Alabama (Case No. 68-CV-2014-900533) to determine whether Cliffs' longwall coal mining operations require the relocation of a large segment of our pipelines in Jefferson County, Alabama and who will be responsible for the cost of any such relocation. Prior to the initiation of the lawsuit, Cliffs notified us of its intent to conduct underground longwall coal mining operations in the vicinity of four of our pipelines in Jefferson County. Upon being informed by Cliffs that its planned coal mining operations would cause surface subsidence of three to six feet, we determined that such level of subsidence presented a safety hazard to our pipelines and that relocating the affected pipelines may be the safest and most economical option to mitigate the safety hazard. We alleged in the lawsuit that easements governing our property rights to operate our pipelines do not allow Cliffs' mining operations to proceed as planned. We also alleged, among other things, that if Cliffs is allowed to proceed with its mining plan, Cliffs should be responsible for the pipeline relocation costs and any other damages. We have completed the relocation of the pipelines, at a cost of approximately $34 million, to avoid the mining threat. On March 3, 2017, the parties reached a confidential settlement agreement to resolve all disputes related to the relocation and the lawsuit was dismissed in May 2017.

*General*

As of December 31, 2017, we had no accruals for our outstanding legal proceedings. As of December 31, 2016, we had less than $1 million accrued for our outstanding legal proceedings.

***Environmental Matters***

We are subject to environmental cleanup and enforcement actions from time to time. In particular, the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) generally imposes joint and several liability for cleanup and enforcement costs on current and predecessor owners and operators of a site, among others, without regard to fault or the legality of the original conduct, subject to the right of a liable party to establish a "reasonable basis" for apportionment of costs. Our operations are also subject to federal, state and local laws and regulations relating to protection of the environment. Although we believe our operations are in substantial compliance with applicable environmental laws and regulations, risks of additional costs and liabilities are inherent in our operations, and there can be no assurance that we will not incur significant costs and liabilities. Moreover, it is possible that other developments, such as increasingly stringent environmental laws, regulations and enforcement policies under the terms of authority of those laws, and claims for damages to property or persons resulting from our operations, could result in substantial costs and liabilities to us.

*Southeast Louisiana Flood Protection Litigation*

On July 24, 2013, the Board of Commissioners of the Southeast Louisiana Flood Protection Authority - East (SLFPA) filed a petition for damages and injunctive relief in a state district court for Orleans Parish, Louisiana against us and approximately 100 other energy companies, alleging that defendants' drilling, dredging, pipeline and industrial operations since the 1930's have caused direct land loss and increased erosion and submergence resulting in alleged increased storm surge risk, increased flood protection costs and unspecified damages to the plaintiff. The SLFPA asserts claims for negligence, strict liability, public nuisance, private nuisance, and breach of contract. Among other relief, the petition seeks unspecified monetary damages, attorney fees, interest, and injunctive relief in the form of abatement and restoration of the alleged coastal land loss including but not limited to backfilling and re-vegetation of canals, wetlands and reef creation, land bridge construction, hydrologic restoration, shoreline protection, structural protection, and bank stabilization. On August 13, 2013, the suit was removed to the U.S. District Court for the Eastern District of Louisiana. On February 13, 2015, the Court granted defendants' motion to dismiss the suit for failure to state a claim, and issued an order dismissing the SLFPA's claims with prejudice. On March 3, 2017, the Fifth Circuit Court of Appeals affirmed the U.S. District Court's decision, and the SLFPA's petition for writ of certiorari to the U.S. Supreme Court was denied on October 30, 2017, thereby resolving this matter in its entirety.

*Vintage Assets, Inc. Coastal Erosion Litigation*

On December 18, 2015, Vintage Assets, Inc. and several individual landowners filed a petition in the State District Court for Plaquemines Parish, Louisiana alleging that its 5,000 acre property is composed of coastal wetlands, and that we failed to maintain pipeline canals and banks, causing widening of the canals, land loss, and damage to the ecology and hydrology of the marsh, in breach of right of way agreements, prudent operating practices, and Louisiana law. The suit also claims that defendants' alleged failure to maintain pipeline canals and banks constitutes negligence and has resulted in encroachment of the canals, constituting trespass. The suit seeks in excess of $80 million in money damages, including recovery of litigation costs, damages for trespass, and money damages associated with an alleged loss of natural resources and projected reconstruction cost of replacing or restoring wetlands. The suit was removed to the U.S. District Court for the Eastern District of Louisiana. Our assets at issue were sold to Highpoint Gas Transmission, LLC in 2011, which was subsequently purchased by American Midstream Partners, LP. In response to our demand for defense and indemnity, American Midstream Partners agreed to pay 50% of joint defense costs and expenses, with a percentage of indemnity to be determined upon final resolution of the suit. On October 20, 2016, plaintiffs filed an amended complaint naming Highpoint Gas Transmission, LLC as an additional defendant. A non-jury trial was held during September 2017. We anticipate a ruling in the first quarter 2018. We will continue to vigorously defend the suit, and intend to appeal any adverse ruling that may result from the trial.

*Superfund Matters*

In our recorded environmental liabilities there were projects where we had received notice that we had been designated or could be designated as a Potentially Responsible Party (PRP) under CERCLA, commonly known as Superfund, or state equivalents for one site. On September 29, 2017, we entered into a Consent Decree after meeting the Environmental Protection Agency's requirements for a final settlement for the remaining liability at the Port Refinery Superfund site, including payment of a settlement amount which is the final judgment against us for the site.

*General*

Although it is not possible to predict the ultimate outcomes, we believe that the resolution of the environmental matters set forth in this note, and other matters to which we and our subsidiary are a party, will not have a material adverse effect on our business, financial position, results of operations or cash flows. As of December 31, 2017 and 2016, we had less than $1 million accrued for our environmental matters.

***Commitments***

*Capital Commitments*

As of December 31, 2017, we have capital commitments of $15 million, which we expect to spend during 2018. We have other planned capital and investment projects that are discretionary in nature, with no substantial contractual capital commitments made in advance of the actual expenditures.

*Transportation Commitments*

We have transportation commitments totaling $359 million as of December 31, 2017, which are primarily related to a transportation contract with our affiliate, Elba Express Company, L.L.C., which we expect to spend $32 million each year for the period from 2018 to 2022 and $199 million in total thereafter.

*Storage Commitments*

We have storage capacity commitments totaling $8 million as of December 31, 2017, most of which are related to storage capacity contracts with our equity investee, Bear Creek, which we expect to spend during 2018. We expect annual renewal of this contract to occur into the foreseeable future.

*Operating Leases*

We lease property, facilities and equipment under various operating leases. Our future minimum annual rental commitments under our operating leases as of December 31, 2017, are as follows (in millions):

| Year | Total |
|---|---|
| 2018 | $ 2 |
| 2019 | 2 |
| 2020 | 2 |
| 2021 | 2 |
| 2022 | 2 |
| Thereafter | 11 |
| Total | $ 21 |

Rent expense on our lease obligations for the year ended December 31, 2017 and the four months ended December 31, 2016 was approximately $2 million and $1 million, respectively, and is reflected in "Operations and maintenance" and "General and administrative" on our accompanying Consolidated Statements of Income. For certain operating leases related to shared facilities, we may be the primary obligor, but the rent expense is allocated to various KMI subsidiaries and is administered and funded by KMI.

**10. Recent Accounting Pronouncements**

***Accounting Standards Updates***

***Topic 606***

On May 28, 2014, the FASB issued ASU No. 2014-09, " *Revenue from Contracts with Customers* " followed by a series of related accounting standard updates (collectively referred to as "Topic 606"). Topic 606 is designed to create greater revenue recognition and disclosure comparability in financial statements. The provisions of Topic 606 include a five-step process by which an entity will determine revenue recognition, depicting the transfer of goods or services to customers in amounts reflecting the payment to which an entity expects to be entitled in exchange for those goods or services. Topic 606 requires certain disclosures about contracts with customers and provides more comprehensive guidance for transactions such as service revenue, contract modifications, and multiple-element arrangements.

Topic 606 will require that our revenue recognition policy disclosure include further detail regarding our performance obligations as to the nature, amount, timing, and estimates of revenue and cash flows generated from our contracts with customers. Topic 606 will also require disclosure of significant changes in contract asset and contract liability balances period to period and the amount of the transaction price allocated to performance obligations that are unsatisfied (or partially unsatisfied) as of the end of the reporting period, as applicable. We utilized the modified retrospective method to adopt the provisions of this standard effective January 1, 2018, which required us to apply the new revenue standard to (i) all new revenue contracts entered into after January 1, 2018 and (ii) all existing revenue contracts as of January 1, 2018 through a cumulative adjustment to equity. In accordance with this approach, our consolidated revenues for periods prior to January 1, 2018 will not be revised. The cumulative effect of the adoption of this standard as of January 1, 2018 was not material.

***ASU No. 2016-02***

On February 25, 2016, the FASB issued ASU No. 2016-02, " *Leases (Topic 842)* ." This ASU requires that lessees recognize assets and liabilities on the balance sheet for the present value of the rights and obligations created by all leases with terms of more than 12 months. The ASU also will require disclosures designed to give financial statement users information on the amount, timing, and uncertainty of cash flows arising from leases. ASU No. 2016-02 will be effective for us as of January 1, 2019. We are currently reviewing the effect of ASU No. 2016-02.

***ASU No. 2017-07***

On March 10, 2017, the FASB issued ASU No. 2017-07, " *Compensation - Retirement Benefits (Topic 715)* ." This ASU requires an employer to disaggregate the service cost component from the other components of net benefit cost, allows only the service cost component of net benefit cost to be eligible for capitalization, and addresses how to present the service cost component and the other components of net benefit cost in the income statement. We adopted ASU No. 2017-07 effective January 1, 2018 with no material impact to our financial statements.

***ASU No. 2018-01***

On January 25, 2018, the FASB issued ASU No. 2018-01, *"Land Easement Practical Expedient for Transition to Topic 842."* This ASU provides an optional transition practical expedient that, if elected, would not require companies to reconsider its accounting for existing or expired land easements before the adoption of Topic 842 and that were not previously accounted for as leases under Topic 840. ASU No. 2018-01 will be effective for us as of January 1, 2019, and earlier adoption is permitted. We are currently reviewing the effect of this ASU to our financial statements.
