Legg Mason Martin Currie Asia Long-Term Unconstrained Fund

Class M Euro Distributing (A)

ISIN: IE00BYWVL052

A sub-fund of: Legg Mason Global Funds plc.

Objectives and Investment Policy

Objective

The fund's goal is to achieve growth of the fund's value by investing in shares of companies that capture Asian GDP (gross domestic product) growth and provide an attractive risk/return profile in an historically volatile market.

Investment Policy

- The fund will invest at least 80% of its assets in shares traded in mainland China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore, South Korea, Taiwan and Thailand, or issued by companies located in or making most of their profits or doing most of their business in these countries. Such investment may be directly in such shares or indirectly via derivatives (financial instruments whose value is derived from the value of other assets).
- The fund will typically invest in 20 to 30 companies that the portfolio managers believe offer sustainable growth, strong management and a strategic market position.
- The fund is unconstrained in the sense that the fund does not have a benchmark or reference index to which its performance or results are compared.

- The fund may invest in derivatives, to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth for the fund.

Manager's Discretion: The fund manager has discretion in selecting investments within the fund's objective and investment policies.

Fund's Base Currency: US Dollar

Share Class Currency: Euro

Transaction Costs: The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

Dealing Frequency: You can buy, sell and switch your shares on every second Wednesday when retail banks in Hong Kong and the New York Stock Exchange are open for business. In the event that any such Wednesday is not a business day, the next following business day will be a dealing day, with at least two dealing days per month.

Minimum Initial Investment: For this share class the minimum initial investment is EUR 500,000.

Treatment of Income: For this share class all, or some portion of, net income is declared and paid annually to shareholders.

Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of companies from various Asian countries and sectors has historically been subject to relatively large fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in Asia, which means that it is more sensitive to local economic, market, political or

regulatory events in Asia, and will be more affected by these events than other funds that invest in a broader range of regions.

Emerging markets investment: The fund may invest in the markets of countries which are smaller, less developed and regulated, and more volatile than the markets of more developed countries.

Investment in China: The fund invests in China and is subject to the risk of significant change in political, social or economic policy in China, which may negatively affect the value of such investments.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund currency: Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

Derivatives: The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets, especially to the extent that it invests in developing countries.

Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

Charges

One-off charges taken before or after you invest	
Entry charge	none
Exit charge	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charge	1.20%
Charges taken from the fund under certain specific conditions	
Performance fee	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2018. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.

Past Performance

The fund was launched on 11 March 2016 and the share class began issuing shares on 16 May 2012.

Past performance has been calculated in EUR.

Performance prior to the fund's launch date is that of the Martin Currie Global Funds - Legg Mason Martin Currie GF Asia Long Term Unconstrained Fund (the "merged fund"). The merged fund had a similar investment objective and policy and was merged into the fund on 11 March 2016.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable. For performance purposes only, any distributed income (without the deduction of any locally applied taxes) has been reinvested.

Past performance is no guide to future returns and may not be repeated.
