

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Investec

Emerging Markets Multi-Asset Fund

A sub-fund of Investec Global Strategy Fund

Class A Accumulation shares in US dollars
ISIN: LU0700851271

Objectives and investment policy

The Fund aims to grow the value of your investment over the long term.

The Fund invests primarily in a mix of assets including: company shares; bonds (contracts to repay borrowed money which typically pay interest at fixed times); property; commodities; money market instruments (types of tradable securities where cash can be deposited for short periods); cash; and alternative asset classes. The issuers of these investments will be either in emerging markets (countries that are in economic terms less developed than the major Western countries) or those which carry out a significant proportion of their business activities in these markets. Investment may be directly in the assets themselves (except for property and commodities) or indirectly through other funds or derivatives (financial contracts whose value is linked to the price of an underlying asset).

The bonds and money market instruments are issued by governments, institutions or companies.

Normally no more than 75% of the Fund is exposed, directly or indirectly, to the shares of companies.

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in both the UK and Luxembourg, as defined in the prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

Lower risk
Potentially lower rewards

Higher risk
Potentially higher rewards

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the higher end of the Risk and Reward Indicator scale. This is because the mix of assets it invests in tends to fluctuate more widely.

The following risks may not be fully captured by the Risk and Reward Indicator:

The value of bonds tends to decrease when interest rates and/or inflation rises.

Some of the countries in which the Fund invests have less developed political, economic and legal systems. These markets carry a higher than average risk of investment and the Fund may have problems or delays in getting its investments back.

There is a risk that the issuers of bonds may not be able to repay the money they have borrowed nor make any interest payments. This risk is greater than average where the Fund invests in a bond with a below investment grade credit rating (ratings based on the ability of the issuers of bonds to repay borrowed money).

The full list of the Fund's risks are contained in Appendix 1 of the Investec Global Strategy Fund's ("IGSF") prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges, as there has been a change to the charging structure. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	None

This is the maximum that might be taken out of your money before it is invested.

Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in US dollars.

The Fund was launched on 5 December 2011.
