

KBC Equity Fund Prospectus

Public open-ended investment company under Belgian law with a variable number of units opting for investments complying with the conditions of Directive 2009/65/EC - UCITS

This prospectus consists of:

- Information concerning the Bevek
- Information concerning the sub-funds

The articles of association of the Bevek and the annual reports will be appended to the prospectus.

13/09/2017

In the event of discrepancies between the Dutch and the other language versions of the prospectus, the Dutch version will prevail.

Information concerning the Bevek

A. Introduction of the Bevek

Name

KBC Equity Fund (abbreviated to 'Equity Fund')

Legal form

Naamloze Vennootschap (limited liability company)

Date of incorporation

21 March 1991

Life

Unlimited

Registered office

Havenlaan 2, B-1080 Brussels, Belgium

Status

Public Bevek with various sub-funds that has opted for investments complying with the conditions of Directive 2009/65/EC and which, as far as its operations and investments are concerned, is governed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

In the relationship between the investors, each sub-fund will be viewed as a separate entity. Investors have a right only to the assets of and return from the sub-fund in which they have invested. The liabilities of each individual sub-fund are covered only by the assets of that sub-fund.

Identity of the statutory auditor of the management company or name of the certified firm of auditors and identity of the certified auditor representing it

PriceWaterhouseCoopers België, Woluwe Garden, Woluwedal 18, 1932 Sint-Stevens-Woluwe, represented by Gregory Joos, company auditor and recognized auditor.

Subscribed capital of the management company stating the paid-up element

The issued share capital amounts to 35.754.192 euros.
The share capital is fully paid up.

Remuneration policy

The remuneration policy of the management company's staff is based on the KBC Remuneration Policy, the general rules laid down regarding the remuneration policy for all staff of KBC group entities and specific guidelines laid down for staff who could have a material impact on the company's risk profile ('Key Identified Staff'). The KBC Remuneration Policy is updated annually.

General rules

Each staff member's salary comprises two parts: a fixed component and a variable component. The fixed component is primarily determined by the staff member's position (such as the responsibility they bear and the complexity of their duties). The variable component is dependent on various factors such as the company's results, the results of the staff member's department and the staff member's individual targets. The remuneration policy is also affected by market practices, competitiveness, risk factors, the company's and its shareholders' long-term objectives and developments within the regulatory framework.

'Key Identified Staff'

Special rules apply to 'Key Identified Staff'. The variable salary component for this group of staff is allotted in a manner that promotes appropriate risk management and cannot give rise to the taking of extreme risks.

For the updated version of the following information (such as a description of the method for calculating the remuneration and the benefits, and the identity of the persons responsible for allocating the remuneration and the benefits, including the make-up of the remuneration committee, if such a remuneration committee has been established) please refer to the website <https://kbcam.kbc.be/en/about-us> (Remuneration Policy). This information is also available free of charge at the counters of the institutions providing the financial services.

Financial service providers

The financial services providers in Belgium are:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

CBC Banque SA, Grand Place 5, B-1000 Brussels

Principal activities of the institutions providing the financial services

The Bevek has concluded a contract with the financial services providers for making payments to shareholders, redemption or repayment of shares and distributing information concerning the Bevek.

Distributor

KBC Asset Management S.A., 4, Rue du Fort Wallis, L-2714 Luxembourg

Principal activities of the distributor:

The distributor is authorised to process the requests for subscription to and redemption of shares.

Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Custodian's activities

The custodian:

- a) Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- b) Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- c) Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- d) Carries out the instructions of the management company or an investment company, provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- e) Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevek within the usual terms;
- f) Ascertains that:
 - i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
 - ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
 - iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
 - iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
 - v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of the Bevek has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
 - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
 - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
 - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
 - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

Custody tasks delegated by the custodian

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this prospectus. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at <https://kbcam.kbc.be/en/custody>.

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its

activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: <http://www.kbcam.be> (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

Statutory auditor of the Bevek

Deloitte Bedrijfsrevisoren BV o.v.v.e. CVBA, Gateway Building, Luchthaven Nationaal 1 J, 1930 Zaventem, represented by Maurice Vrolix, company auditor and recognized auditor.

Principal activities of the statutory auditor

The statutory auditor checks whether the financial statements of the Bevek are a true and fair presentation of the financial situation of the Bevek and whether the annual report is in line with the financial statements. To determine the right working methods, the statutory auditor takes account of the existing internal audit of the Bevek in terms of drafting the financial statements and ensuring that they are true and fair.

Promoter

KBC.

Principal activities of the promoter:

The promoter promotes the Bevek and its sub-funds in the market.

Person(s) bearing the costs (in the situations referred to in articles 115, §3, para. 3, 149, 152, para. 2, 156, §1, para. 1, 157, §1, para. 3, 165, 179, para. 3 and 180, para. 3 of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC)

KBC Asset Management N.V. and/or one or more companies that are members of the KBC Group and/or the person(s) referred to under "Financial service providers".

C. Corporate information

Capital

The share capital of the Bevek is at all times equal to the net asset value. The share capital may not be less than 1 200 000 euros.

Balance sheet date

31 December.

Rules for the valuation of the assets

See article 9 of the articles of association of the Bevek.

Rules concerning the allocation of the net income

See article 17 of the articles of association of the Bevek.

Annual general meeting of shareholders

The annual general meeting is held on the second-last banking day of the month of March at 9 am at the registered office of the Bevek or at any other place in Belgium indicated in the convening notice.

Voting rights of the shareholders

In accordance with the articles of association and the Companies Code, the shareholder has a vote at the General Meeting of shareholders in proportion to the size of their shares.

Suspension of the redemption of shares

See article 9.4 of the articles of association of the Bevek.

Liquidation of the Bevek or a sub-fund

See article 19 of the articles of association of the Bevek and the applicable provisions of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Regulation 2009/65/EC.

D. Techniques for efficient portfolio management

Securities Financing Transactions (SFTs)

The following applies except in the case of the SRI Emerging Markets, SRI Minimum Variance sub-fund:

General

Each sub-fund may lend financial instruments within the limits set by law and regulations.

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

The the sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.

General information on the SFTs used

Type of SFT	Types of asset that the SFT can involve	Maximum percentage of the assets under management that can be involved in the SFT	Anticipated percentage of the assets under management that will be involved in the SFT
Lending financial instruments	Only shares and bonds will be lent	When lending financial instruments a maximum of 30% of the assets under management will be involved.	Depending on market conditions 0–30% of the assets under management will be involved in the lending of financial instruments

Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

Legal status	Minimum rating	Country of origin
The counterparty must belong to one of the following categories: a) A credit institution; or b) An investment firm; or c) A settlement or clearing institution; or d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate.	Only counterparties rated as investment grade may be considered. An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies: - Moody's (Moody's Investors Service); - S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en - Fitch (Fitch Ratings). If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration.	All geographical regions may be considered when selecting counterparties.

The relationship with the counterparty or counterparties is governed by standard international agreements.

Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

Where the lending of securities is agreed within the framework of a securities lending system, the financial collateral can also take the form of bonds eligible for trading on a regulated market and which have been rated as at least investment grade as described under 'Criteria for the selection of counterparties'.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the registered office of the credit institution is situated within a member state of the EEA, or if the registered office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as described in the ESMA Guidelines CESR/10-049 dated 19 May 2010 on the common definition of European money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

Policy on the diversification of collateral and the correlation policy

A sub-fund is not permitted to accept financial collateral issued by the party offering them.

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

Holding of the financial collateral

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Beveik's assets, as stated under 'B. Service providers to the Beveik'.

Influence of SFTs on a sub-fund's risk profile

This lending does not affect a sub-fund's risk profile since:

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- The return of securities similar to the securities that have been lent is guaranteed by the principal or the agent, as applicable. A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

Distribution policy for returns on the utilised SFTs

By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) **as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received** and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

More information is provided on the terms and conditions governing securities lending in the annual or half-yearly report for the Bevek.

General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

E. Social, ethical and environmental aspects

Investments may not be made in financial instruments issued by manufacturers of controversial weapons whose use over the past five decades, according to international consensus, has led to disproportionate human suffering among the civilian population. This involves the manufacturers of anti-personnel mines, cluster bombs and munitions and weapons containing depleted uranium.

In addition, as of 31 March 2014 no new investments may be made in financial instruments issued by companies that do not have an anti-corruption policy and that have been given a negative score in a thorough screening for corruption in the last two years. A company has no anti-corruption policy if it cannot be demonstrated that it has an acceptable policy concerning the fight against corruption. An acceptable policy should be made public and must at least state that bribery will not be tolerated and that the law will be followed in this respect. The screening will be based on a generally accepted and independent 'Social, ethical and environmental factors' database. In this way, not only is a purely financial reality represented, but also the social reality of the sector or region.

F. Information on the risk profile of the UCITS

Investors should take note of the general information below, the individual risks of a sub-fund which are listed under the "Information regarding the sub-fund - 3. Risk profile", as well as the "Risk and reward profile" in the key investor information document.

The value of a share can decrease or increase and the investor may not get back the amount invested.

The UCITS risk profile is based on a recommendation by the Belgian Asset Managers Association, which is available at www.beama.be.

List of risks

The information below is a general overview of the potential risks that the investor could incur. The assessment of the risks in each sub-fund can be accessed under the 'Information regarding the sub-fund - 3. Risk profile'. There, a list of risks for the relevant sub-fund may be consulted, with an indication of the risk assessment, and a brief justification for the risk assessment.

Market risk

The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio. In an equity fund, for instance, this is the risk that the equity market in question will go down and, in a bond fund, the risk that the bond market in question will fall. The higher the volatility of the market in which the UCITS invests, the greater the risk. Such markets are subject to greater fluctuations in return.

Credit risk

The risk that an issuer or a counterparty will default and fail to meet its obligations towards a sub-fund. This risk exists to the extent that a sub-fund invests in debt instruments. Debtor quality also affects the credit risk (e.g., an investment in a debtor with a rating, such as 'investment grade', will pose a lower credit risk than an investment in a debtor with a low rating, such as 'speculative grade'). Changes in the quality of the debtor can have an impact on the credit risk.

Settlement risk

The risk that settlement via a payment system will not take place as expected because payment or delivery by a counterparty fails to take place or is not in accordance with the initial conditions. This risk exists to the extent that the UCITS invests in regions where the financial markets are not yet well developed. This risk is limited in regions where the financial markets are well developed.

Liquidity risk

The risk that a position cannot be liquidated in a timely manner at a reasonable price. This means that the UCITS can only liquidate its assets at a less favourable price or after a certain period. The risk exists if the UCITS invests in instruments for which there is no market or a market with only limited liquidity; for example, in the case of unlisted investments and direct real estate investments. OTC derivatives may also lack liquidity.

Exchange or currency risk

The risk that the value of an investment will be affected by changes in exchange rates. This risk exists only to the extent that the UCITS invests in assets that are denominated in a currency that develops differently from the reference currency of the sub-fund. For instance, a sub-fund denominated in USD will not be exposed to any exchange risk when investing in bonds or equities denominated in USD, but it will be exposed to an exchange risk when investing in bonds or equities denominated in EUR.

The assessment of the exchange risk does not take account of the volatility of all currencies in which the assets in portfolio are denominated vis-à-vis the reference currency of the UCITS.

Custody risk

The risk of loss of assets held in custody as a result of insolvency, negligence or fraud on the part of the custodian or a sub-custodian.

Concentration risk

The risk relating to a large concentration of investments in specific assets or in specific markets. This means that the performance of those assets or markets will have a substantial impact on the value of the UCITS portfolio. The greater the diversification of the UCITS portfolio, the smaller the concentration risk. This risk will, for example, also be higher in more specialised markets (e.g., a specific region, sector or theme) than in widely diversified markets (e.g., a worldwide allocation).

Performance risk

The risk to return, including the fact that the risk may vary depending on the choices made by each undertaking for collective investment, as well as the existence or absence of, or restrictions upon, any third-party security. The risk depends in part on the market risk and on how active the management of the manager is.

Capital risk

The risks to capital, including the potential risk of erosion due to the redemption of shares and the distribution of profit in excess of the investment return. This risk can be limited by loss-mitigation, capital-protection or capital-guarantee techniques.

Flexibility risk

Inflexibility both within the product itself, including the risk of premature redemption, and constraints on switching to other providers. This risk can mean that the UCITS is unable to take the desired actions at certain times. It can be higher in the case of UCITS or investments subject to restrictive laws or regulations.

Inflation risk

This risk is dependent on inflation. It applies, for example, to bonds with a long term to maturity and a fixed income.

Environmental factors

Uncertainty concerning the changeability of environmental factors (such as the tax regime or amendments to laws or regulations) that could affect how the UCITS operates.

Synthetic risk and reward indicator

In accordance with Commission Regulation (EU) No. 583/2010, a synthetic risk and reward indicator has been calculated. This indicator provides a quantitative measure of a sub-fund's potential return and the risk involved, calculated in the currency in which a sub-fund is denominated. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The synthetic risk and reward indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'Risk and reward profile' heading in the 'Key Investor Information' document.

G. Fees and charges regarding the Bevek

A detailed overview of the fees and charges of each sub-fund can be accessed in the "Information regarding the sub-fund - 5. Types of shares and fees and charges".

Recurrent fees and charges

Recurrent fees and charges paid by the Bevek	
Fee paid to the independent directors	250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed.
Recurrent fees and charges paid by the sub-fund	
Fee paid to the statutory auditor of the Bevek	Fee of the statutory auditor: 1844 EUR /year (excluding VAT) for non-structured sub-funds These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting.

Ongoing charges

The key investor information sets out the ongoing charges, as calculated in accordance with the provisions of Commission Regulation (EC) No. 583/2010 of 1 July 2010.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown in a single figure that represents all annual charges and other payments taken from the assets over the defined period and for a sub-fund and that is based on the figures for the preceding year. This figure is expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class.

The following are not included in the charges shown: entry and exit charges, performance fees, transaction costs paid when buying or selling assets, interest paid, payments made with a view to providing collateral in the context of derivative financial instruments, or commissions relating to Commission Sharing Agreements or similar fees received by the Management Company or any person associated with it.

Portfolio turnover rate

An important indicator for estimating the transaction costs to be paid by a sub-fund is the portfolio turnover rate. This rate shows the frequency with which the composition of the assets changes during a year as a result of transactions not dependent on the subscription for or redemption of shares. Active asset management may result in high turnover rates. The portfolio turnover rate for the preceding year is given in the annual report.

Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: America, Belgium, Buyback America, Buyback Europe, Central Europe, Commodities & Materials, Consumer Durables, CSOB Akciovy fond dividendovych firem, Emerging Europe, Europe, Eurozone, Finance, Flanders, Food & Personal Products, Global Leaders, High Dividend, High Dividend Eurozone, High Dividend New Markets, High Dividend North America, Industrials & Infrastructure, Japan, Latin America, Luxury & Tourism, Medical Technologies, New Asia, New Markets, New Shares, Oil, Pacific, Pharma, Quant EMU, Quant Global 1, Satellites, Strategic Cyclical, Strategic Finance, Strategic Non Cyclical, Strategic Satellites, Strategic Telecom & Technology, Technology, Telecom, Trends, Turkey, US Small Caps, Utilities, World

For the following sub-funds don't exist Commission Sharing Agreements: EMU Small & Medium Caps, Family Enterprises, SRI Emerging Markets, SRI Minimum Variance

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed. More information on Commission Sharing Agreements is available in the annual report.

Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In principle, the percentage share amounts to between 35% and 60% if the distributor is an entity of KBC Groep NV or to between 35% and 70% if the distributor is not an entity of KBC Groep NV. However, in a small number of cases, the distributor's fee is less than 35%. Investors may, on request, obtain more information on these cases.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee-sharing does not affect the amount of the management fee paid by a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

H. Tax treatment

Of the Bevek

Annual tax on undertakings for collective investment

The following tax is due payable by the Bevek :

Annual tax on undertakings for collective investment	0.0925% (0.01% for institutional share classes)	of the net amounts outstanding in Belgium on 31 December of the preceding year. The amounts already included in the tax base of the underlying undertakings for collective investment are not included in the tax base.
--	---	---

Furthermore tax withheld at the source on foreign income is recovered by the Bevek (in accordance with double taxation conventions).

Of the investor

The following tax-related information is of a general character and is not intended to cover all aspects of an investment in a UCITS. In certain cases entirely different rules might even apply. Moreover, both tax law and the interpretation of it can change. Investors who wish to have more information about the tax implications – in both Belgium and abroad – of acquiring, holding and transferring shares should seek the advice of their usual financial and tax advisers.

Withholding tax

This tax is charged at 30% as of 1.1.2017.

For investors subject to personal income tax or tax on legal entities

Tax on dividends (distribution shares)

For investors subject to personal income tax or to tax on legal entities and who have received this income through the normal management of their assets, the withholding tax is automatically the final tax on this income.

Tax on debt claim returns (Article 19bis of the 1992 Income Tax Code)

If the percentage of debt claims is more than 25%, both the capitalisation and distribution shares of the UCITS will, on redemption or in the event of the full or partial distribution of the equity capital or in the event of transfer for a consideration, fall within the scope of Article 19bis of the 1992 Income Tax Code. Article 19bis of the 1992 Income Tax Code applies only to shareholders who are subject to Belgian personal income tax. On the basis of that article, tax will be levied on the debt claim returns included in the redemption, transfer or repayment price according to the period in which the investor held the shares.

Article 19bis of the 1992 Income Tax Code applies only to shareholders who are subject to Belgian personal income tax.

For investors subject to corporation tax

The withholding tax is not the final tax on this income. The income (dividends and capital gains) will be subject to Belgian corporation tax.

Stock market tax

	Subscription	Redemption	Switching between sub-funds
Stock market tax	-	CAP (capitalisation shares): At maturity and on the Early Exercise Date (if applicable): 0% Else: 1.32% (max. 4000 euros) DIS (distribution shares): 0%	CAP -> CAP/DIS: 1.32% (max. 4000 EUR) DIS-> CAP/DIS: 0%

Investors who are eligible to invest in Institutional B Shares are exempt from stock market tax.

Obligatory automatic exchange of information for tax purposes

Under Belgian law, the Bevek is obliged to collect certain information on its investors and to automatically disclose information to the Belgian tax authorities regarding investors with tax obligations in the US or with place of residence for tax purposes outside Belgium. The Belgian tax authorities may only use the information received from the Bevek to pass them on to foreign competent authorities for tax purposes. The disclosed information will, in addition to the details identifying investors, such as their names, addresses and places and dates of birth, include financial details of the investment in the Bevek over a certain reference period.

I. Additional information

Information sources

The prospectus, the key investor information, the articles of association, the annual and half-yearly reports and, where relevant, full information on the other sub-funds may be obtained free of charge from the financial services providers before or after subscription to the shares.

The ongoing charges and the portfolio turnover rate for preceding periods can be obtained from the registered office of the Bevek at Havenlaan 2, B-1080 Brussels, Belgium.

The following documents and information are available at www.kbcam.be: key investor information, the prospectus, the most recently published annual and half-yearly reports.

The past performance of each sub-fund is provided in the annual report.

The Board of Directors of the Bevek is responsible for the content of the prospectus and the key investor information. To the best of the Board of Directors of the Bevek's knowledge, the information contained in the prospectus and the key investor information is true and correct and nothing has been omitted that would alter the import of either the prospectus or the key investor information.

In accordance with article 10.3 of the articles of association, and subject to legal requirements, the Board of Directors is empowered to set the investment policy for each sub-fund. The Board of Directors may change the investment policy set out in the prospectus and in the key investor information document.

Publication of the net asset value

The net asset value is available from the branches of the institutions providing the financial services. Following calculation, it is published in the financial press (L'Echo and De Tijd) and/or on the website of Beama (www.beama.be). It may also be published on the KBC Asset Management NV website (www.kbcam.be) and/or on the websites of the institutions providing the financial services.

Contact point where additional information may be obtained if needed

Product and Knowledge Management Department- APC
KBC Asset Management NV
Havenlaan 2
1080 Brussels
Belgium
Tel. KBC Live 078 152 153 (N) – 078 152 154 (F)

J. Prohibition of offer or sale

This UCITS and the sub-funds of the UCITS may not be publicly offered or sold in countries where they have not been registered with the local authorities.

The UCITS and the sub-funds of the UCITS are not registered nor will they be registered based on the United States Securities Act of 1933, as amended from time to time. It is forbidden to offer, sell, transfer or deliver shares, directly or indirectly, in the United States of America or one of its territories or possessions or any area that is subject to its jurisdiction or to a US person, as defined in the aforementioned Securities Act. The UCITS and the sub-funds of the UCITS are not registered based on the United States Investment Company Act of 1940, as amended from time to time.

K. Competent authority

Belgian Financial Services and Markets Authority (FSMA)
Congresstraat 12-14
1000 Brussels

The key investor information and the prospectus will be published after approval by the FSMA. This approval does not involve any assessment of the opportuneness or quality of the offer or of the circumstances of the individual making it.

The official text of the articles of association has been filed with the registry of the Commercial Court.

Information concerning the sub-fund America

1. Basic details

Name

America

Date of incorporation

21 March 1991

Life

Unlimited

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of these assets are invested in shares of American and Canadian companies.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	For the share class Classic Shares : low	
		For the share class Institutional B Shares : low	
		For the share class Classic Shares CSOB CZK : high	since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of companies from the United States of America and Canada.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	low	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of Belgian companies.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	none	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	high	there is a concentration of the investments in shares of Belgian companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

A least 75% of the assets are invested in shares of European companies with a policy of share buy-backs. More specifically, this involves companies whose buy-back policy may be considered as an indicator of a capital gain on the investment in the short or medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in a theme which may include companies with a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Information concerning the sub-fund Central Europe

1. Basic details

Name

Central Europe

Date of incorporation

1 March 2001

Life

Unlimited

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of Central European companies.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in the shares of companies from Central Europe.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are primarily invested in shares of industrial groups in the Materials sector. The Materials sector includes steel, iron, paper, non-ferrous metals, chemicals and construction materials. The sub-fund focuses on what are known as 'highly cyclical materials', which are therefore more sensitive to market fluctuations. The regional allocation may change from time to time. In principle, the sub-fund invests worldwide.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

26 August 1999

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The sub-fund will invest at least 75% of its assets in shares from sectors associated with consumption, including wholesale and retail trade and manufacturers of consumer goods. The manager is responsible for the stock picking. The selection is not restricted to shares from a particular stock-market index. The sub-fund invests worldwide.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of companies operating in sectors that are sensitive to consumption levels.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

KBC Equity Fund CSOB Akciovy Fond Dividendovych Firem aims to generate a return by investing at least 75% of its assets in shares with a high dividend yield. All regions, sectors and themes may be taken into consideration. The rest of the assets will be invested in bonds, debt instruments, money market instruments and deposits.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	low	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of companies in European countries where conditions are such as to ensure accelerated economic growth in the short or medium term (so- called Emerging Markets).

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of companies from Central and Eastern European countries.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of European companies.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	For the share class Classic Shares : moderate	since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Institutional B Shares : moderate	since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Classic Shares CZK : high	since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	

Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are invested primarily in shares of family-based listed companies in the euro area. Below it is understood that:

- at least 20% (ownership interest(*)) of the shares of the company are held, directly or indirectly (e.g., through a company or foundation), by one or more families;
- and
- at least one member of the family or families is involved, either directly or indirectly (e.g., through a company or by formally mandating a third party) in the company's board of directors.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies where at least 20% of the shares are owned directly or indirectly by one or more families and that a family member directly or indirectly is represented in the Board of Directors of the company.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	low	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the subfund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the subfund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are invested primarily in shares with a Flemish character where conditions are such as to allow accelerated economic growth in the short or medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	none	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	high	there is a concentration of the investments in shares of Flemish companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are for at least 85% invested in shares of companies chiefly from the 1) food retailing, 2) food, beverages and tobacco and 3) household and personal products sectors. As a result, the entire Consumer Staples sector is considered.

The regional allocation may change from time to time. In principle, the sub-fund invests worldwide.

No more than 15% of the assets are invested in shares from other sectors and other instruments to the extent that they are permitted under the applicable regulations.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	moderate	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in shares of companies in the food distribution sector, the food sector, the beverages sector, the tobacco sector and the household & personal products sector.
Performance risk	Risks to return	moderate	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low

Information concerning the sub-fund High Dividend

1. Basic details

Name

High Dividend

Date of incorporation

27 March 2003

Life

Unlimited

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

This fund invests at least 75% of its assets in shares with a high dividend yield.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

This fund invests at least 75% of its assets in euro-area shares with a high dividend yield.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	none	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are invested primarily in shares with a high dividend yield of companies in countries where conditions are such as to ensure accelerated economic growth in the short or medium term, more specifically countries in Asia, Latin America, Central Europe and Eastern Europe.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of emerging market companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 6 am CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The sub-fund will invest at least 75% of its assets, worldwide, in shares in the industrial sector (such as equipment manufacturers), in shares of companies in these sectors that provide services to industry (such as transportation companies and employment agencies), and shares of companies that export or manage infrastructure works. The manager is responsible for the stock picking. The selection is not restricted to shares of a particular stock-market index.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The assets are invested primarily in shares (or share-related instruments, and more specifically, depository receipts, including ADRs and GDRs) that are included in the MSCI Emerging Markets Latin America Index. Investors should be aware that the sub-fund may invest up to 100% of its assets in depository receipts.

Index-tracking

The objective of the sub-fund is to track the composition of an index in accordance with and within the limits of Article 63 of the Royal Decree of 12 November 2012 on certain public undertakings for collective investment complying with the conditions of Directive 2009/65/EC.

Index/indices in question: MSCI Latin America, which covers around 85% of the free-float market capitalisation of the Latin America countries included in the index. Additional information on this index and its composition is available at www.msci.com.

Index tracking method: physical replication using optimised sampling: the index is tracked using a selection of shares in the index in order to best replicate the index. In addition, an optimisation algorithm is used that balances the risk and the return of each of the portfolio positions, so optimising the selection. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling and to avoid the attendant transaction charges.

The index is rebalanced every quarter. The more often an index is rebalanced, the greater the potential impact on the transaction charges within the sub-fund.

Given normal market conditions, the expected tracking error is between 0% and 2%. Possible causes of this tracking error could be the method used to track the index, transaction charges, dividend reinvestment, the general costs charged to the sub-fund, any income from lending financial instruments, the use of depository receipts (as explained under the 'Strategy selected' heading above).

If the composition of the index is no longer sufficiently diversified or if the index is no longer sufficiently representative of the market it relates to or if the value and composition of the index is no longer published in a suitable manner, the management company will inform the Board of Directors without delay. The Board of Directors will consider what action to take in the interest of investors and may convene a general meeting of shareholders in order to amend the investment policy.

This fund is not sponsored, endorsed, sold or promoted by MSCI INC. ('MSCI'), any of its affiliates, any of its information providers or any other third party involved in, or related to, compiling, computing or creating any MSCI index (collectively, the 'MSCI parties'). The MSCI indexes are the exclusive property of MSCI. MSCI and the MSCI index names are service mark(s) of MSCI or its affiliates and have been licensed for use for certain purposes by KBC Asset Management. None of the MSCI parties makes any representation or warranty, express or implied, to the issuer or owners of this fund or any other person or entity regarding the advisability of investing in funds generally or in this fund particularly or the ability of any MSCI index to track corresponding stock market performance. MSCI or its affiliates are the licensors of certain trademarks, service marks and trade names and of the MSCI indexes which are determined, composed and calculated by MSCI without regard to this fund or the issuer or owners of this fund or any other person or entity. None of the MSCI parties has any obligation to take the needs of the issuer or owners of this fund or any other person or entity into consideration in determining, composing or calculating the MSCI indexes. None of the MSCI parties is responsible for or has participated in the determination of the timing of, prices at, or quantities of this fund to be issued or in the determination or calculation of the equation by or the consideration into which this fund is redeemable. Further, none of the MSCI parties has any obligation or liability to the issuer or owners of this fund or any other person or entity in connection with the administration, marketing or offering of this fund.

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages

(including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this fund without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of companies from Latin American countries.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of companies in the medical sector, the preference being companies whose core business is developing and manufacturing medical equipment, where conditions are such as to allow an accelerated economic growth in the short and medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in the shares of companies operating in the medical sector.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of companies in countries where conditions are such as to allow an accelerated economic growth in the short or medium term. More particularly, this involves countries in Asia, Latin America, Central Europe and Eastern Europe.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 6 am CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares that have been admitted for listing on a regulated market, where conditions are such as to allow accelerated economic growth in the short or medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Information concerning the sub-fund Pacific

1. Basic details

Name

Pacific

Date of incorporation

22 February 2006

Life

Unlimited

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of companies in the Pacific region.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies from the Pacific Region.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

At least 75% of the assets are invested, directly or indirectly, in a selection of euro-area shares that are sufficiently liquid, the object being to outperform the MSCI EMU index in the long term.

The stock picking is based on purely quantitative criteria, using data available on companies in the euro area. The data concerned are widely used by financial analysts and readily available to them. These criteria are incorporated in a quantitative model designed by KBC Asset Management. The basic principle of this model is that share prices do not always accurately reflect the fundamental value of the company concerned, but that this value can be estimated provided that enough information is available and it can be processed efficiently. Share prices gradually change to better reflect these fundamental values. How this happens depends on the prevailing market cycle. The quantitative model developed by KBC Asset Management makes a regular assessment – at least once a month – of the cyclical trend in relation to criteria specific to the company and identifies which criteria are positive or negative in the prevailing market situation. This sensitivity to the market is reviewed on a regular basis and is used to classify which shares in the euro area are sufficiently liquid. Stock picking occurs at the same frequency as the assessment of the market sensitivity.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

The sub-fund's objective is to outperform the MSCI World index in the long term through a selection of sufficiently liquid shares from the MSCI World Index. The selection is based on purely quantitative criteria using available data on companies whose shares are included in the MSCI World index. The data concerned are widely used by financial analysts and readily available to them. These criteria are incorporated in a quantitative model designed by KBC Asset Management. The basic principle of this model is that share prices do not always accurately reflect the fundamental value of the company concerned, but that this value can be estimated provided that enough information is available and it can be processed efficiently. Share prices gradually change to better reflect these fundamental values. How this happens depends on the prevailing market cycle. The quantitative model developed by KBC Asset Management makes a regular assessment – at least once a month – of the cyclical trend in relation to criteria specific to the company and identifies which criteria are positive or negative in the prevailing market situation. This sensitivity to the market is reviewed on a regular basis and is used to make a ranking of sufficiently liquid shares from the MSCI World Index. The best rated shares are included in the sub-fund, ensuring that there is an adequate spread in accordance with the relevant legal restrictions. Stock picking occurs at the same frequency as the assessment of the market sensitivity. Care is also taken to ensure that the risk (volatility) of the sub-fund is not significantly different from that of the MSCI index. For this reason, the sub-fund may invest temporarily in fixed-yield securities, money market instruments, deposits and liquid assets, in accordance with the relevant legal restrictions. After the re-assessment of the market sensitivity, the sub-fund will however invest at least 75% of its assets in shares.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested, directly or indirectly, in a selection of shares in global companies. The manager has autonomy in the stock picking, which is theme-based. As a result, the sub-fund's investments may at any time be focused to a greater or lesser extent on one or more very specific themes. Some examples of these themes (this list is not exhaustive) are family companies, holding companies with a greater average undervaluation in relation to their intrinsic value, and global companies that generate a significant percentage of their turnover in emerging countries.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

At least 75% of the assets will be invested, directly or indirectly, in shares of emerging market companies.

The shares must satisfy the following requirements:

The companies must be among the best in their sector (best in class) in terms of socially responsible business practice. To establish if this is the case, KBC Asset Management screens companies on criteria relating to:

- the environment;
- society; and
- corporate governance.

This assessment is performed using measurable indicators. KBC Asset Management defines the criteria and the indicators, which it continually tests on their relevance and, if necessary, adjusts the sustainability screening method. In addition, companies involved in certain, clearly defined controversial activities (as defined under the heading 'Social, ethical and environmental aspects') are excluded, and a check is performed on whether companies adhere to the principles of the UN Global Compact. The UN Global Compact is a United Nations' initiative aimed at encouraging companies around the world to draw up SRI guidelines on items such as human rights, labour rights, the environment and corruption, and to report on their implementation. An independent, external advisory board advises KBC Asset Management on the methodology to be used and the exclusion policy, and monitors the quality of the entire screening process.

More information is available at <https://www.kbcam.be/sri>.

In total, at least 90% of the assets will be invested in instruments that have been screened and meet the sustainability criteria.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of emerging market companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Information concerning the sub-fund SRI Minimum Variance

1. Basic details

Name

SRI Minimum Variance

Date of incorporation

26 June 2017

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The aim is to generate a high return and minimise volatility in the sub-fund's value. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

At least 90% of the assets are invested directly or indirectly in a diversified selection of global shares that comply with the following criteria:

The companies must be among the best in their sector (best in class) in terms of socially responsible business practice. To establish if this is the case, KBC Asset Management screens companies on criteria relating to:

- the environment;
- society; and
- corporate governance.

This assessment is performed using measurable indicators. KBC Asset Management defines the criteria and the indicators, which it continually tests on their relevance and, if necessary, adjusts the sustainability screening method. In addition, companies involved in certain, clearly defined controversial activities (as defined under the heading 'Social, ethical and environmental aspects') are excluded, and a check is performed on whether companies adhere to the principles of the UN Global Compact. The UN Global Compact is a United Nations' initiative aimed at encouraging companies around the world to draw up SRI guidelines on themes such as human rights, labour rights, the environment and corruption, and to report on their implementation. An independent, external advisory board advises KBC Asset Management on the methodology to be used and the exclusion policy, and monitors the quality of the entire screening process.

More information is available at <https://www.kbcam.be/sri>.

The aim is to generate a high return and minimise volatility in the sub-fund's value.

The composition of the portfolio is based on a quantitative model designed to generate a high return and to keep volatility as low as possible.

The main parameters in the model are historical price movements for individual shares, their correlation with the broad market, and their correlation with each other. As a result, the fund can continually invest to varying degrees in one or more themes, sectors and/or regions.

General strategy for hedging the exchange rate risk

The exchange rate risk is not hedged.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	moderate	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of investments in the shares of companies that operate in a sustainable and socially responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
Performance risk	Risks to return	moderate	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Name

Strategic Cyclical

Date of incorporation

24 November 1999

Life

Unlimited

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares chosen from a worldwide selection of companies in cyclical sectors.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares. Correlated financial instruments refer to certificates representing securities, such as American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) or futures on equity indices.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. **Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.**

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

The sub-fund will invest at least 75% of its assets in a worldwide selection of shares in defensive sectors that are less sensitive to the economic cycle, such as the food industry, utility companies and the healthcare sector.

The sub-fund is actively managed, which means that the manager is responsible for the stock picking and is not bound by a specific benchmark index.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the subfund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the subfund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares selected from a globally diversified universe.

The manager has great freedom in the selection of shares. This selection is done from a thematic perspective. As a result the sub-fund may invest in one or more very specific themes, in large or smaller concentrations.

Examples (non-exhaustive) of themes are companies with a strong focus on innovation, companies that operate in a sustainable way in the water and energy sector, global companies with a relatively high proportion of their turnover in emerging markets,...

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

There is no delegation of the management of the investment portfolio.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the subfund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the subfund and all income generated will be paid to the subfund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the subfund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the subfund against open exchange risks in relation to

the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of companies in the technology sector where conditions are such as to ensure accelerated economic growth in the short or medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	low	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of companies in the technology industry.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or classes of units of the units and the fees and charges associated with them is set out below by type and/or classes of units.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

The sub-fund invests primarily in shares of companies operating in areas which, according to the manager, fit with the theme 'challenges and opportunities that will apply during this and subsequent decades'. The manager focuses mainly on shares of emerging market companies, companies involved in urban development, those involved in prospecting and mining of natural resources and companies whose business focuses on long-term trends of demographics, globalisation, healthcare, technology and innovation.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	For the share class Classic Shares : high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Institutional B Shares : high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
		For the share class Classic Shares CSOB CZK : high	since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.

Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of Turkish companies.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	none	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	high	there is a concentration of the investments in shares of Turkish companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	moderate	there are political risks.

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 6 am CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

Delegation of the management of the investment portfolio

The intellectual management, with the exception of the creation of the sub-fund and its maintenance in terms of the technical, product-specific and legal aspects has been delegated by the management company to KBC Fund Management Limited, Sandwith Street, Dublin 2, D02 X489, Ireland.

Stock exchange listing

Not applicable.

2. Investment information

Sub-fund's object

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives may be used to achieve the investment objectives as well as to hedge in risks.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.**

Selected strategy

At least 75% of the assets are invested in shares of American companies that are not included in the S&P 500, since conditions in America are such as to ensure accelerated economic growth in the short or medium term.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	moderate	since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	none	
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	moderate	there is a concentration of the investments in shares of smaller US listed companies.
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 2 pm CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 2 pm CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 2 pm CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.

It is possible to work with either listed or unlisted derivatives: these may be forward contracts, options or swaps on securities, indices, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions may only be concluded with prime financial institutions specialised in such transactions. Subject to the applicable laws and regulations and the articles of association, the sub-fund will always seek to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of cash or investment grade bonds. When calculating the value of the bonds, a margin will be applied that varies depending on their residual term to maturity and the currency in which they are denominated. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives can also be used to hedge the assets of the sub-fund against open exchange risks in relation to the currency.

Where derivatives are used, they must be easily transferable and liquid instruments. The use of derivatives does not, therefore, affect the liquidity risk. Furthermore, using derivatives does not affect the portfolio's allocation across regions, industry sectors or themes. **As a result, they have no effect on concentration risk. Derivatives are not used to protect capital, either fully or partially. They neither increase nor decrease capital risk.** In addition, using derivatives has no effect on settlement risk, custody risk, exchange rate risk, flexibility risk, inflation risk or risk dependent on external factors.

Selected strategy

The sub-fund invests directly or indirectly in shares and/or share-related investments, in accordance with the investment strategy of KBC Asset Management NV for shares (see www.kbcam.be/en/our-market-vision).

The sub-fund invests in shares that may come from any region, sector or theme.

Investments in assets other than securities or money market instruments

The sub-fund will invest primarily in units of undertakings for collective investment.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

3. Risk

Sub-fund's risk profile

Investors must take note of the specific risk factors set out below, the description of the risks given under the heading 'Information concerning the Bevek - F.Information on the risk profile of the UCITS', and the 'Risk and reward profile' section of the key investor information document.

Summary table of risks assessed by the sub-fund:

Risk type	Concise definition of the risk		Explanation:
Market risk	The risk that the entire market of an asset class will decline, thus affecting the prices and values of the assets in the portfolio	high	the level of the risk reflects the volatility of the stock market.
Credit risk	The risk that an issuer or a counterparty will default	low	
Settlement risk	The risk that settlement of a transaction via a payment system will not take place as expected	low	
Liquidity risk	The risk that a position cannot be liquidated in a timely manner at a reasonable price	low	
Exchange or currency risk	The risk that the value of an investment will be affected by changes in exchange rates	high	since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
Custody risk	The risk of loss of assets held in custody with a custodian or sub-custodian	low	
Concentration risk	The risk relating to a large concentration of investments in specific assets or in specific markets	low	
Performance risk	Risks to return	high	the level of the risk reflects the volatility of the stock market.
Capital risk	Risks to capital	moderate	There is no capital protection.
Flexibility risk	Inflexibility both within the product and constraints on switching to other providers	none	
Inflation risk	Risk of inflation	none	
Environmental factors	Uncertainty regarding the immutability of environmental factors, such as the tax regime	low	

Risk profile of the typical investor

Profile of the typical investor for which the sub-fund has been designed : Very Dynamic profile.

The risk profile mentioned per sub-fund has been determined from the point of view of an investor in the euro area and may differ from that of an investor in other currency zones. More information on the risk profiles can be obtained at www.kbc.be under the heading Saving and Investments/ Investments tailored to your needs.

4. Information concerning the trading of shares

How to buy and sell shares and switch between sub-funds

If it turns out that shares are being held by persons other than those permitted to hold them, the Company may, in accordance with article 8.2 of the articles of association, and without charge (except any taxes due and any charges to cover the cost of realising the assets), redeem those shares.

Cut-off time for receiving orders at the financial service providers in Belgium ⁽¹⁾ Date of published net asset value	Date the net asset value is calculated	Actual values used	Date of payment or repayment of the orders
D (every banking day ⁽²⁾ at 6 am CET)	D+1 banking day	D if maximum 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET) D+1 if more than 20% of the actual values are already known on D (every banking day ⁽²⁾ at 6 am CET)	D+3 banking days

⁽¹⁾ The cut-off time for receiving orders stated above applies to orders investors place directly with the financial services providers in Belgium.

If an investor places an order with a financial institution other than the financial service providers in Belgium, he/she must find out from that institution what cut-off time (time + date) applies to the order he/she wishes to place so that the institution in question can take the necessary action to ensure that the order reaches the financial service providers in Belgium before 6 am CET on day D in order to qualify as an order of day D.

⁽²⁾ with the exception of banking days on which one or more markets on which more than 20% of the sub-fund's assets are listed are closed or if transactions are suspended or restricted.

Calculation of the net asset value

The net asset value per share is calculated daily, as described above, except on days on which no shares may be issued or redeemed.

Publication of the net asset value

The 'Information concerning the Bevek – I. Additional information – Publication of the net asset value' section specifies where the result of the calculation of the net asset value can be viewed.

If the profitability of the sub-fund is jeopardised due to a limited number of subscriptions during the initial subscription period (less than 5 000 000 euros), the Board of Directors of the Bevek may decide to refuse the orders placed during the initial subscription period and not to proceed with the commercialisation of the sub-fund.

5. Types of shares and fees and charges

Shares may be in registered or book-entry form, as the shareholder chooses. No certificates representing the registered shares are issued. Instead, confirmation is supplied of entry in the register of shareholders.

Dividend payment

After the close of the financial year, the General Meeting determines the portion of the result, which, within the limitations imposed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables, is to be paid to the holders of distribution shares.

The holders of capitalisation shares are not entitled to receive a dividend. The portion of the annual net income accruing to them is capitalised in favour of these shares.

The shareholders will receive payment within six months of the close of the financial year via institutions designated for this purpose by the General Meeting.

The General Meeting may decide to proceed to interim payments in accordance with the provisions of the law.

The Board of Directors may, in accordance with the provisions laid down in the articles of association and within the limits of the law, decide to pay out interim dividends.

The information on the type and/or class of shares and the fees and charges associated with them is set out below by type and/or share class.
