Fund Management Company: BlackRock Asset Management Schweiz AG

## Objectives and Investment Policy

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, which reflects the return of the Swiss Performance Index (SPI®) (the Fund's benchmark index).
  - ▶ The Fund aims to invest so far as possible and practicable in the equity securities (e.g. shares) that make up the benchmark index.
  - ▶ The benchmark index measures the performance of shares of publicly traded companies listed on the SIX Swiss Exchange. It is a broad market equity index which comprises companies with a primary listing on the SIX Swiss Exchange, while excluding investment companies and shares with a free float factor of less than 20%. The benchmark index attempts to represent the development of the entire Swiss equity market. The weightings of the individual shares in the benchmark index are based on their free float-adjusted market capitalisation. Market capitalisation is the share price of a company multiplied by the number of shares issued. Free float-adjusted market capitalisation means that only shares available to the public, rather than all of a company's issued shares, are used to calculate the benchmark index.
  - ▶ The Fund uses optimising techniques to achieve a similar return to its benchmark index. These may include the strategic selection of certain securities that make up the benchmark index. These may also include the use of financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) to help achieve the Fund's investment objective. The use of FDIs is expected to be limited.
  - ▶ Recommendation: This Fund may not be appropriate for short-term investment.
  - ▶ Your units will be distributing units (i.e. dividend income will be paid at least annually).
  - ▶ The Fund's base currency is Swiss Franc.
  - ▶ The Fund's units are listed and traded daily on the SIX Swiss Exchange. Investors can buy or sell units daily through an intermediary on such stock exchange.
- For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus with integrated fund contract, available on the product pages at [www.blackrock.com](http://www.blackrock.com).

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
  - ▶ The risk category shown is not guaranteed and may change over time.
  - ▶ The lowest category does not mean risk free.
  - ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Shares in smaller companies typically trade in less volume and experience greater price variations than larger companies.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - ▶ Particular risks not adequately captured by the risk indicator include:
    - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
    - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers or by their banks. Such charges can be obtained from the respective stock brokers or banks.

The ongoing charges figure is based on the fixed annualised fee charged to the Fund as set out in the Fund's prospectus. This figure excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

| One-off charges taken before or after you invest   |         |
|--|---------|
| Entry Charge (max.)  | 5.00%*  |
| Exit Charge (max.)   | 3.00%*  |
| This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out. |         |
| Charges taken from the Fund over each year   |         |
| Ongoing Charges  | 0.10%** |
| Charges taken from the Fund under certain conditions   |         |
| Performance Fee  | None    |

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in CHF for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2014. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
