## Pictet - USA Index

(the "Compartment") is a compartment of Pictet (the "Fund")

**P USD (the "Share class") - ISIN LU0130732877**

This Fund is managed by Pictet Asset Management (Europe) S.A., part of the Pictet group

## Objectives and Investment Policy

- The Compartment aims to replicate the S&P 500 index in full. Its investment objective is pursued by investing in a portfolio of transferable securities or other admissible assets making up all (or, exceptionally, a substantial number of) the components of the relevant index. Consequently, any fall in the reference index could trigger a corresponding fall in the value of the Compartment's shares.
- The Compartment is passively managed and aims to minimise the tracking error (difference between returns from the Share class and those of the reference index).
- The Compartment may use financial derivative instruments for efficient portfolio management or hedging purposes.
- The Share class does not distribute a dividend.
- The price of the Share class is calculated on a daily basis. Investors may redeem shares of the Compartment on any business day in Luxembourg unless no underlying price is available (market closed).
- Costs caused by subscriptions or redemptions may be charged to investors responsible for those flows.
- Recommendation: this Compartment may not be appropriate for investors who plan to withdraw their money within 5 years.

## Risk and Reward Profile

- The Share class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy.
- The risk category shown is based on historical data and may not be a reliable indication for the future risk profile of the Share class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest category does not mean a risk-free investment.
- The Compartment offers no capital guarantee or asset protection measures.
- The Compartment may be exposed to the following material risks which are not adequately captured by the synthetic risk indicator and may negatively impact its performance:
  - Operational risk: losses may result from, for instance, human errors, system failures, incorrect valuation and safekeeping of assets.
  - Counterparty risk: losses may occur when a counterparty does not honour its obligations related to instruments or contracts such as over-the-counter derivatives.
  - Impact of financial techniques: the use of leverage may amplify losses and gains, and/or may not result in the intended exposure.
