Dear Investor,

the following pages will provide you with detailed information on the trends observed on the equity and bond markets during the period under review (1 October 2016 to 30 September 2017). You will also find a comprehensive set of figures on your investments, including the statement of assets for the reporting period which ended on 30 September 2017.

Dealing with the change in the markets

A volatile capital market, changing regulatory requirements and new customer demands are all challenges we are meeting successfully.

The international capital markets demonstrated mixed developments over the past 12 months. Along with Donald Trump's unexpected win as US president, important topics included the monetary policies of the major central banks and political uncertainty in Europe due to key national elections and the looming issue of Brexit. Oil prices were another influential factor - following a sharp rise at the end of 2016, they fell back considerably, at least for a time. In late summer 2017, the announcement by the Federal Reserve that it would reduce its bond-buying activities and sabre-rattling between North Korea and Washington caused a stir. On balance, the international stock markets saw share prices rise strongly, above all due to solid economic growth around the world and buoyant company profits. Bonds were affected by positive economic data, growing geopolitical uncertainty and contrasting monetary policy approaches on either side of the Atlantic. Government bonds from developed states saw a drop in value, while bonds from developing countries were in demand.

Strong economic performance undercut industrialised countries' bonds

Good economic data and higher inflation expectations due to a rising oil price led to higher returns on the US bond market from the start of the reporting period. Donald Trump's surprising victory in the presidential election gave this trend additional impetus. Even though Trump avoided presenting a concrete election program, he did repeatedly mention an economic package. Hopes of a fiscal stimulus and associated expectations that additional US government bonds would be issued to finance it led to falls in prices. At the start of his tenure, Trump put on a display of energy. However, a certain sobriety set in and observers began to doubt if he would turn key election promises into reality. Repeated attempts to sort out the controversial reforms to Obamacare failed. Hopes of a stimulus faded once more and the mood on the bond market lifted somewhat. Since then, however, interest rate increases by the Fed have put a damper on things - the USA's central bank has raised the base rate three times and also revealed plans to reduce its balance sheet. Geopolitical events worked against this development.

After a poison gas attack in Syria, Trump unexpectedly ordered a retaliatory strike, which put pressure on Washington's relations with Moscow. In addition, the USA made a growing number of threatening statements about North Korea following further missile tests ordered by Pyongyang. Both of these situations boosted demand for US government bonds. All the same, the country's treasury bills lost a total of 1.8 per cent of their value, measured by the JP Morgan Global Bond US Index.

Government bonds from eurozone countries were unable to withstand the initial negative tendency generated stateside. Good economic data, an initial pick-up in inflation rates, the elections in the Netherlands and France, and not least the British government's formal application to leave the European Union continued exerting an adverse effect at the beginning of 2017. Following Emmanuel Macron's victory, market participants' willingness to undertake risks rose, which was of particular benefit to bonds issued by peripheral states. Similarly to the US, monetary policy made for difficulties in Europe too. Mario Draghi, head of the European Central Bank (ECB), prepared investors for his institution's winding-up of its bond buy-up programme. The market's reaction was not inconsiderable. The conflict between North Korea and the USA worsened over the course of the summer months, which led to an increase in demand for bonds from Germany and France as a safe option. This undid some of the losses incurred earlier. Nevertheless, eurozone states' bonds lost 3.4 per cent measured by the iBoxx Euro Sovereign Index. On average, peripheral countries performed slightly better than bonds issued by core states.

The market for European corporate bonds saw a slight improvement, however. The ECB's bond purchase programme repeatedly had a supportive effect, and the asset categories as measured by the BofA Merrill Lynch Euro Corporate Index increased in price during the reporting period by 0.5 per cent.

Bonds from emerging markets trended extremely well due to rising commodity prices and the absence of protectionist measures on the part of the US government. High inflows of funds also bolstered yields. Considering the ongoing low interestrate environment, many investors were active in emerging countries in their search for returns. The palpable rejuvenation of global trade also provided a boost, which ultimately led to a gain of 4.6 per cent measured by the JP Morgan EMBI Global Diversified Index.

Equities markets experience strong growth

Around the world, equities markets enjoyed a buoyant 12 months. Promoted by flourishing business from all key economic regions, the MSCI World Index gained 15.7 per cent, calculated in local currency.

In the US, the Dow Jones Industrial Average rose by 22.4 per cent, while the broad-based S&P 500 index moved up by 16.2 per cent. Both market barometers reached a string of record highs. Above all, Donald Trump's shock win in the USA's 2016 presidential election and his announcements of an infrastructure programme and tax cuts fired investors' imaginations. Despite growing misgivings about Trump's ability to see this through, the stock markets continued to surge, largely on the back of positive business performances. In Q3 2017, the weakness of the US dollar also functioned as a stimulus. However, this uptick temporarily lost its drive. Starting in mid-August, the markets were unsettled by the war of words between the USA and North Korea about the latter's nuclear missile programme. All in all, however, the US stock exchanges shrugged off these worries, and the Fed's increasingly restrictive monetary policy failed to make much of a dent. Towards the end of the reporting period, investors responded favourably to the publication of Trump's new tax change plans, which could potentially provide a boost to the economy.

Share prices in Europe also saw steady growth. Despite fluctuations, the EURO STOXX 50 Index improved by 19.8 per cent in total. Again, the unforeseen outcome of the US election in November 2016 also provided a boost, while the ECB announced in December that it would continue its bond buying activities. The market responded favourably though the bank began to reduce volumes in April 2017. From March-May 2017, listings grew strongly as anxiety about several important European elections began to recede. The positive outcome of the Dutch election and Macron's win in the French presidential election helped to lift share prices. A reporting season with positive news, strong economic figures and the ECB's continued loose monetary policy all added to the overall confidence. In August, ECB president Draghi announced that the bank would shortly start tightening its monetary policy, a statement that resulted in a sharp deflation in prices. In addition, the unexpected strength of the euro had a negative impact on listings, as did turbulence in the European automotive sector and the North Korea conflict. September 2017 witnessed another strong comeback thanks to promising economic data, a weaker euro and the hope of a continued probusiness stance by the German government.

In Japan, listings started off with strong growth, largely due to the yen's considerable weakness relative to the US dollar. In Q1 2017, protectionist statements by the US government prompted a surge in the value of the yen. Unexpectedly high growth rates and a weaker currency delivered only temporary respite. The situation deteriorated once more in July and August, largely due to North Korea's aggressive actions: at the end of August and in mid-September, the regime fired test missiles that traversed Japanese territory. However, September's good news on the economic front boosted prices once again. All in all, the NIKKEI 225 Index gained 23.8 per cent with considerable fluctuations during the reporting period.

Stock markets in emerging currencies also returned a solid performance, and the MSCI Emerging Markets climbed by 19 per cent in local currency. This was driven above all by the considerably more favourable economic outlook in every region. The protectionist statements of US president Donald Trump caused consternation only at the beginning of the reporting period as, so far, they have not been acted on.

Important information:

Unless otherwise specified, the data source for the financial indices is Datastream. All unit performance data on the following pages is taken from Union Investment's own calculations in accordance with the method applied by the German Investment Funds Association (BVI), unless otherwise specified. The ratios illustrate past performance. Future results may be either higher or lower.

Detailed information on the Management Company and the Depositary of the investment fund (the "Fund") can be found on the last pages of this report.

Investment policy

Investment objective, investment policy and significant events

Unilnstitutional Short Term Credit is an actively managed international bond fund which invests in securitisation papers (e.g. asset-backed securities), corporate bonds, convertible and option bonds as well as other interest-bearing securities. The Fund is permitted to issue up to three classes of units. At present only one unit class is active. The fund's assets may also be invested in money market instruments and bank deposits. It is also permitted to make use of derivatives for investment and hedging purposes. The average duration of the portfolio may not, in principle, exceed 2.5 years. The objective of the Fund is to generate long-term growth and income in line with the market.

Portfolio structure and significant changes

Unilnstitutional Short Term Credit was more than 90 per cent invested in bond investments throughout the entire reporting period. At the end of the reporting period, the final investment quota was 96 per cent of the Fund's assets.

From a regional perspective, the focus of the investments was on eurozone countries with a share of 66 per cent at close. This was followed by positions in European countries outside the eurozone of 17 per cent of the bond assets at the end of the financial year. Smaller exposures in North America, Asia-Pacific and emerging markets rounded off the regional structure.

In terms of bond class, asset- and mortgage-backed securities (MBS/ABS) made up by far the largest group at 79 per cent at close. A further 18 per cent was held in corporate bonds. In this group, industry bonds were the most important type at 11 per cent. Smaller positions in covered bonds and government bonds completed the portfolio.

The average credit rating of bond investments at the end of the reporting period was A+. The average duration at the year-end was 9 months. The average yield most recently amounted to 1.98 per cent.

Unilnstitutional Short Term Credit will issue a dividend totalling EUR 0.78 per share for the financial year from 1 October 2016 to 30 September 2017.

Note: The indicated values may deviate from the statement of assets due to a risk-based approach.

Notes on the report as at the end of September 2017

The fund's accounts are kept in Euro.

The fund's annual accounts were prepared based on the applicable classification and valuation principles in the country of domicile.

The price of securities reflects the relevant stock exchange or market value at the end of the finanacial year. Securities traded on a regulated market are valued at the market prices published for the relevant market. Investments in target funds are valued at their most recently published prices.

If the fund holds OTC derivatives on the closing date, these are valued daily on the basis of indicative quotes from brokers or mathematical valuation models.

If the fund has pending forward exchange transactions, these are valued based on the forward rates applicable to the residual maturity.

Securities whose prices are not in line with market conditions and all assets for which no representative market value can be obtained are valued at a price established by the Management Company in good faith using recognised valuation rules.

Bank deposits were estimated at par value.

Assets and liabilities denominated in a currency other than that of the fund are converted at the latest available mean rate of exchange into Euro. Transactions in foreign currencies are converted into the fund currency at the time of compiling the accounts. Realised and unrealised currency gains and losses are included as income or expenses.

The deferred interest includes accrued interest as at the end of the financial year.

The position "interest on bonds" also includes pro rata income from issue yields, where applicable.

The issue or redemption price of the fund units is determined from the net asset value per unit on the respective valid trading days and, if relevant, plus any initial sales charge and/or redemption fee as defined in the sales prospectus. The initial sales charge shall be levied in favour of the Management Company and the sales agent and can be scaled according to the size of the order. The redemption fee is credited to the fund.

The fees of the Management Company and the all-in fee are calculated based on the net fund assets per calendar day and paid out on a monthly basis. The all-in fee covers the depositary fee, general custody and bearing fees for holding assets in custody, auditors' fees, costs of appointing proxies and costs of principal management activities, such as fund accounting and reporting. The calculation is based on a contractual agreement.

If profit and loss includes other expenses, these expenses consist of the costs referred to in the prospectus, such as government fees, collateral management fees or cost of changes to the prospectus.

Earnings and expense adjustments have been charged to the ordinary net income. These include net income generated during the reporting period, which purchasers of units pay as part of the issue price, and sellers of units receive in the redemption price.

Fund assets are currently subject to a "taxe d'abonnement" of 0.05 % p.a. in Luxembourg, payable quarterly and based on the respective reported net fund assets at the end of the quarter. Insofar as fund assets are invested in other Luxembourg investment funds that are already subject to the taxe d'abonnement, the portion of fund assets invested in such Luxembourg investment funds is exempt from this tax.

Income from the investments of the fund's assets will not be taxed in Luxembourg. However, it may be subject to withholding or other tax in the countries in which the fund assets are invested. Neither the Management Company nor the depositary will obtain individual or collective receipts for such taxes.

The performance of the fund's units is calculated based on the unit values published on the closing dates, according to the BVI formula. In individual cases, it may vary slightly from the performance of the units as shown in the fund report.

The calculation method used to calculate the "ongoing charges" indicator, is that outlined by the Committee of European Securities Regulators (Circular CESR/10-674 of 1 July 2010).

The "ongoing charges" indicate the costs charged to the fund and may vary from year to year. They take into account the management charges and all-in fee, the taxe d'abonnement and all other costs charged to the fund. For funds with a significant holding in other funds, the costs of those funds will be taken into account. This figure shows the total costs as a percentage of the average fund volume during the financial year. Any performance-related fee and transaction costs incurred - except the transaction costs of the depositary - are not included in the figure "ongoing charges".

The transaction costs refer to all costs that were listed or invoiced separately in the financial year in the name of the fund and are directly related to the purchase or sale of assets.

The Management Company, in its role as the Management Company of the fund, may benefit from "soft commissions" (e.g. broker research, financial analyses, market and price information systems) in connection with trade transactions. Said commissions are used in the interests of unitholders when making investment decisions. Transactions of this type cannot be conducted with natural persons; the service providers concerned may trade only in the interests of the fund and the services provided must be directly associated with fund activities.

Note on the Law of 17 December 2010

The fund was set up in accordance with Part I of the Luxembourg Law of 17 December 2010 relating to undertakings for collective investment ("Law of 17 December 2010") and fulfils the conditions laid down by Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of legal and administrative provisions relating to undertakings for collective investment in transferable securities ("Directive 2009/65/EC").

Independent auditor's report

To the unitholders of UniInstitutional Short Term Credit

Report on the annual audit

Opinion

We have audited the financial statements of UniInstitutional Short Term Credit (the "Fund"), which comprise the composition of assets and the schedule of assets as at 30 September 2017, and income statement and the changes in the fund's assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at 30 September 2017, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under those Law and standards are further described in the « responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the management company is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the management company and those charged with governance for the financial statements

The Board of Directors of the management company is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the management company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the management company is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the management company either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the management company.

- Conclude on the appropriateness of Board of Directors of the management company use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

ERNST & YOUNG Société Anonyme Cabinet de révision agréé

Dr. Christoph Haas

Luxembourg, 15 December 2017

Other information of the Management Company

Other information

Securities transactions are only ever carried out with counterparties included in a list of approved parties by the fund management. The list is reviewed on an ongoing basis. Criteria such as quality of execution, level of transaction costs, quality of research and reliability in the settlement of securities transactions are given precedence. Furthermore, the annual reports of the counterparties are examined.

The proportion of securities transactions conducted during the period under review (October 1st, 2016 to September 30th, 2017) on account of the retail funds managed by Union Investment Luxembourg S.A. with companies within the Group or associated with it through significant holdings amounted to 3.56 per cent. The total transactions volume amounted to EUR 1,929,352,723.16.

Information on risk management processes

The absolute VaR approach is used for monitoring the total risk associated with derivatives.

The VaR (value-at-risk) model is used to ascertain the absolute VaR approach. The Value-at-Risk (VaR) indicator is a mathematical-statistical concept and indicates the possible losses of a portfolio over a specific period that is unlikely to be exceeded.

A Monte Carlo simulation is used in order to ascertain the VaR indicator. The parameters used for this are:

- Holding period: 20 days

- Confidence level: 99%

- Historical monitoring period: 1 year (balanced)

The utilisation of the total risk associated with derivatives determined via the above model and the corresponding limit utilisation at a regulatory limit of 20 % amounted for the minimal, maximal and average VaR value to:

Minimum VaR 0.34%; Limit utilisation 2%,

Maximum VaR 0.61%; Limit utilisation 3%,

Average VaR 0.45%; Limit utilisation 2%.

Leverage effect

The determined average leverage effect using the gross method amounted to 134%.
