

ADDITIONAL INFORMATION FOR INVESTORS IN GERMANY

The Bundesanstalt für Finanzdienstleistungsaufsicht (Federal Agency for Financial Services Supervision) has been notified of the intention to distribute Shares of the Company's Portfolios in the Federal Republic of Germany.

The Paying and Information Agent in Germany is

ODDO BHF Aktiengesellschaft Bockenheimer Landstrasse 10 60323 Frankfurt am Main

Redemption and switching requests for the Shares of the Portfolios which are authorised for distribution in Germany can be lodged at the Paying Agent.

Redemption proceeds, possible dividends and all other payments can be paid upon request of the Shareholders through the Paying Agent and may also be paid out in cash to the Shareholders.

The latest available Prospectus, the Key Investor Information Documents, the Memorandum and Articles of Association, Annual and Semi-Annual Reports as well as the Issue, Redemption and Switching Prices can be obtained free of charge in hardcopy form at the Information Agent. The Management Agreement, the Investment Management Agreement, the Administration Agreement, the Distribution Agreement, the Custodian Agreement, the Administrative Services Agreement, the UCITS Regulations, and a list of past and current directorships and partnerships held by each Director over the last five years, can be inspected and obtained by Shareholders at the Information Agent. Issue, Redemption and Switching Prices will be published on the Fund's website https://www.man.com/DE/all-prices. Any other documents and information that must be published in Ireland, with the exception of the agreements mentioned above, the UCITS Regulations, and the list of past and current directorships and partnerships held by each Director over the last five years, will be published for investors in Germany by way of investor letter.

The statement of changes in the composition of the investment portfolio is also available free of charge upon request at the office of the German Paying and Information Agent.

In accordance with § 298 (2) of the Investment Code investors in Germany are informed by way of investor letter and publication in the electronic Federal Gazette (Bundesanzeiger) under the following circumstances:

- Suspension of the redemption of a Portfolio's Shares,
- Termination of the management or winding-up of a Portfolio.
- Any amendments to the articles of association of the company which are inconsistent
 with the previous investment principles, which affect material investor rights or which
 relate to remuneration and reimbursement of expenses that may be paid or made out of
 the asset pool,
- Merger of Portfolios,
- Conversion of a Portfolio in a feeder fund or the amendments to a master fund.

Note: It should be noted that for the following Portfolios Man GLG European Alpha Alternative Enhanced, Man GLG Financials Alternative, Man GLG Global Equity Alternative, Man GLG Global Fundamental Equity and Man NewSmith UK Equity Alternative no notification has been filed and that the shares of these Portfolios may not be distributed to investors within the scope of applicability of the Investment Code.

Man Funds VI plc may elect to comply with the reporting duties pursuant to § 5 (1) Investment Tax Act which have to be observed as prerequisites for the taxation according to §§ 2 and 4 Investment Tax Act with respect to the share classes of any Portfolio. Prior to investing in a Portfolio, investors may contact the Administrator or the Paying and Information Agent in Germany for details of the share classes and Portfolios in respect of which such election has been made. Man Funds VI plc can, however, not guarantee that the tax effects resulting from the compliance with these reporting duties will be achieved at the investor level. Failure to comply with the duties may in addition result in negative tax consequences for investors taxable in Germany investing in the Portfolio. Investors taxable in Germany should not invest in other share classes or other Portfolios as substantial tax charges can be the consequence. Before investing in a Portfolio of Man Funds VI plc investors taxable in Germany should therefore discuss with their tax advisers the implications of acquiring, holding, transferring and redeeming Shares in such Portfolio. Investors taxable in Germany are strongly advised to ask for tax advice before investing into Portfolios and share classes which do not fulfill the requirements of the Investment Tax Act.

Man Funds VI plc Investment Managers' Reports

Man GLG European Alpha Alternative - Annual Report Commentary

The GLG European Alpha Alternative was up 1.19% in 2017.

Stock selection drove the entire performance, with market and hedge selection attributions offsetting each other.

For a variety of reasons, 2017 was an extraordinary year for the fund.

Markets and Fund Outlook

For the first time in recent memory, the global economy enjoyed synchronised global growth. equities globally seemed to reflect this backdrop - the MSCI World was +20.1% for the year, while the S&P was +19.4%, the Stoxx 600 was +7.7%, the Nikkei was +19.1%. What was notable in this performance was that drawdowns were extremely shallow, with the maximum drawdown in the MSCI World only about 3%. Over the very long term, the average return in stocks tends to be 5%-6% per annum with a median drawdown of about 15%; in 2017 we saw 20% returns with a maximum drawdown of 3%, so it was a highly unusual year in terms of risk/return. Risk appetite finished the year at very high levels. Implied volatility finished the year around 10%, a multi-year low and well below the 15%-30% post-crisis QE range, while surveys of investor sentiment finished the year at multi-decade highs. US yields finished the year at 3-year highs, with similar directional moves evident in other G3 markets, potentially indicating that the return of inflation could be a 2018 theme.

Very strong equity market performance in spite of surging bond yields may reflect an equity market view that the global economy is finally moving off of central bank life support and entering into a phase of self-supported momentum. Technology stocks, buoyed by a very strong memory pricing cycle, led gains in Europe as the sector was +19.3%; basic resources, an obvious play on strong global demand, were also up over 19%. Telcos, seen as a bond proxy, were the laggard down almost 4%, while retail also declined about 3% as a number of companies in the sector reported disappointing earnings as they struggle to adapt their business models to the rapid growth of online trade in their sector. Year-end sector performance was as follows:

| Technology | 19.34% |
|-----------------------------|---------|
| Basic Resources | 19.34% |
| Financial Services | 17.13% |
| Industrial Goods & Services | 14.70% |
| Auto & Parts | 13.25% |
| Travel & Leisure | 13.18% |
| Chemicals | 10.72% |
| Food & Beverages | 10.44% |
| Personal & Household Goods | 9.31% |
| Construction & Materials | 8.20% |
| Banks | 8.06% |
| Real Estate | 7.17% |
| Insurance | 6.93% |
| Utilities | 5.49% |
| Healthcare | 2.01% |
| Oil & Gas | (2.15%) |
| Media | (2.47%) |
| Retail | (2.96%) |
| Telecommunications | (3.63%) |

<u>Outlook</u>

During Q4, European stock markets (Eurozone in particular) began to record marked underperformance relative to the US. We treat this as a warning signal and would expect a rise in volatility going forward, from which we foresee attractive prospects.

As we head into 2018, the strategy is operating 11 long signals and 9 short signals. We are currently undertaking further signal development work given the opportunities we believe Miffel II will represent for us. We will update further on these in due course.

Man GLG Alpha Select Alternative - Annual Report Commentary

Summary

2017 has proven to be another year for the headline writers whether their focus is on geopolitics, terrorism, regulation or popular culture. There is a risk that these overshadow a year where there were many positive developments from an economic and market perspective.

The media has shown significant scepticism regarding President Trump and the details surrounding his election. However, whether you agree with his politics or not, it is hard to argue with his timing given that the US economy continues to deliver robust growth. A good barometer of this is the NFIB Small Business Optimism Index reached a multi-year high shortly after his election and as we end 2017 the index has posted a new multi-year high.

In the UK, although growth has been lacklustre when compared to other members of the G7, pessimists regarding the economy in the aftermath of the Brexit vote have been confounded. Growth expectations have been revised up from where they were at the start of the year.

Rhetoric around the Brexit negotiations has generally been downbeat; however, we think this suits both parties. The European negotiators want to discourage further departures from the Union and the British negotiators do not want to claim outright victory for fear of repercussions from Europe. In December, the EU gave the go ahead to start the second round of negotiations. Generally, commentary from EU leaders regarding Theresa May has been quite positive. We suspect this reflects both a more benign negotiating environment behind closed doors than commentators are willing to admit, and also that Europe would far prefer to negotiate with Theresa May than a new Prime Minister who would represent an unknown quantity. Whilst we remain of the view that Brexit is unlikely to be helpful to demand in the short–term, we also think it is important to hold that view in the knowledge that most commentators and market participants hold the same view and in many cases a much more negative view than we think is justified.

More generally, 2017 again highlighted that the risks to being an incumbent either politically or corporately have never been greater. Angela Merkel struggled to form a stable coalition as a result of disappointing results at the polls. She was far from the only political leader to come under further pressure as the momentum of popular politics continued. The fact that Jeff Bezos toppled Bill Gates to become the richest man in the world during 2017 is just one example of the power of disintermediation and the risks it poses to traditional business models. The wealth that Jeff Bezos accumulated during 2017 alone would put him in the top 30 richest billionaires globally according to Bloomberg and highlights the pace of the change and innovation that we are experiencing in many industries.

Risk assets generally generated positive returns. The MSCI World was up 16% with the S&P performing very strongly, up 19%, the second best annual return this decade. The FTSE 100 lagged but still generated a positive return of 7.6%. Commodities also performed well, especially copper which was up circa 30%. The move in sterling is also worth highlighting given bearish positioning and sentiment at the beginning of the year, Cable rallied from under 1.25 to 1.35 by year end.

Fund Performance

The fund was up 14.8% during the year. Clearly this was an improvement on 2016 although some of the foundations for this year's performance were put in place during the previous year. Returns accumulated throughout the year. The short book generated good returns and contributed the two largest single stock returns for the year. Of the top 10 contributors to performance in 2017, four were shorts. This was particularly satisfying given that one of our aims this year was to capitalise more from the short book.

The performance of the short book has been good over the last several years and we will continue to look to maximise the value we generate from our shorts going forward, especially as the environment is currently conducive to developing short ideas.

As we move into 2018 we are looking at how we can leverage the quant capabilities across the broader firm to further improve our investment process. The amount of data available to us as investors is increasing rapidly as are the tools to process it. Man Group has significant and successful quantitative investment businesses and continues to grow capability in this area. We think the combination of man and machines is potentially very powerful and are looking at how we can leverage the in-house expertise to improve idea generation and our research process.

Overall we were pleased with the fund's performance. Importantly we feel that the fund has benefited from some of the lessons learnt in 2016 and we continue to develop those.

Man GLG European Equity Alternative - Annual Report Commentary

Overview

2017 proved to be a strong year for the GLG European Long-Short ('ELS') strategy. The portfolio construction and risk management enhancements we implemented in the second half of 2016 allowed for a more efficient delivery of the portfolio management team's alpha, leading to a significant improvement in returns.

While we are satisfied with our performance this year, there were times when our approach to the strategy was put under pressure. The year started promisingly enough with ELS performing particularly well in January, but the environment rapidly became more challenging as political concerns once again came to the forefront in Europe. Both February and March were poor months for the strategy as European investors became increasingly concerned about the consequences for the Eurozone in the event of Marine Le Pen securing victory in the French presidential election. During this difficult period, we saw many days of de-risking as investors reduced exposure going into the binary event, putting pressure on our alpha and ultimately resulting in a sizeable drawdown in specific returns.

Importantly, despite this drawdown, we maintained confidence in the alpha generation capabilities of our portfolio management team and resolutely stayed in risk. Our portfolio construction remained tight and we understood the nature of the losses sustained. Throughout the strategy's history, our drawdowns in specific returns (alpha) tend to be modest relative to drawdowns in factors and generally recover quickly. Our approach was vindicated, with ELS starting its recovery the day after the first-round vote that saw Emmanuel Macron secure a commanding victory. As political concerns receded, conditions for the strategy quickly improved with ELS enjoying a particularly strong period of performance over the summer months before delivering a solid final quarter.

Given the difficulty in predicting when our strategy might perform or suffer, we would prefer to avoid excessive fluctuations in our gross exposure that carry the only certainty of incurring transaction costs, potentially to no avail. We believe maintaining portfolio construction discipline and confidence in the team's alpha generation capabilities are likely to yield better results over the medium to long term.

<u>Performance</u>

We entered 2017 with a number of things on our "to do" list to enhance the strategy over the medium to long term, but it was clear to us that an immediate improvement in performance was necessary. We are cognisant that in the past we have on occasion disappointed our investors with drawdowns resulting from poor portfolio construction or ineffective risk management. It was essential that we deliver a significant improvement in performance in 2017 for our investors. We are pleased to report that the Man GLG European Equity Alternative Fund (the "Fund") ended the year up 5.86% net of fees.

While we are pleased that the portfolio construction and risk management changes implemented in the second half of 2016 have played their part in securing that much needed improvement in performance, the key driver of returns was the exceptional performance by our team of stock pickers this year. Of the twenty-four books in ELS (including those in incubator), all but four made a positive contribution to the Fund's return in 2017. Of those four managers that found the market environment challenging this year, only two had a meaningfully negative impact on returns. It is pleasing to see so many of the Fund's portfolio managers produce strong returns on their book capital this year. Large contributions to Fund returns came from UK Core (1.98%), Event Driven (1.37%), Global TMT (1.20%), Technical Catalyst (1.23%), US Japan (1.26%) and Europe Midcap (1.09%) books. With such broad based strong performance, it is perhaps unsurprising that the Centre Book – our strategy for efficiently enhancing the alpha produced by the team – made a significant contribution to Fund returns in 2017 (1.90%). It was only in some of the more cyclically orientated books where we found the going tougher, with our Oil Services (-0.68%) and Industrials (-0.62%) books both modestly detracting from returns.

A focus on specific risk: one year on

The decision taken in Q3 2016 to focus the portfolio more on Specific risk and tightly constrain exposure to factors (emphasising the historic strength of the team) has certainly helped improve returns in 2017. There are also further beneficial characteristics of Specific risk relative to factor risk – most notably, that drawdowns tend to be shallower and recovery from them quicker. This is because the individual exposures that comprise our Specific risk tend to be significantly less correlated than those that comprise our factor exposure, leading to the more benign drawdown characteristic evident in the exhibit. This lower correlation also leads to lower volatility, so to compensate for this reduction of volatility we have steadily increased leverage so that we can maintain the level of risk that we wish to deliver to our investors. As we head into 2018, it is likely that the leverage will continue to climb as we seek to move ELS closer to our volatility target of 5-5.5%. We feel that under most reasonable assumptions of a deliverable Sharpe ratio this is the required level of volatility we need to be able to meet our net return objectives to investors.

Man GLG Global Equity Alternative - Annual Report Commentary

<u>Overview</u>

2017 proved to be a strong year for the GLG European Long-Short ('ELS') strategy. The portfolio construction and risk management enhancements we implemented in the second half of 2016 allowed for a more efficient delivery of the portfolio management team's alpha, leading to a significant improvement in returns.

While we are satisfied with our performance this year, there were times when our approach to the strategy was put under pressure. The year started promisingly enough with ELS performing particularly well in January, but the environment rapidly became more challenging as political concerns once again came to the forefront in Europe. Both February and March were poor months for the strategy as European investors became increasingly concerned about the consequences for the Eurozone in the event of Marine Le Pen securing victory in the French presidential election. During this difficult period, we saw many days of de-risking as investors reduced exposure going into the binary event, putting pressure on our alpha and ultimately resulting in a sizable drawdown in specific returns.

Importantly, despite this drawdown, we maintained confidence in the alpha generation capabilities of our portfolio management team and resolutely stayed in risk. Our portfolio construction remained tight and we understood the nature of the losses sustained. Throughout the strategy's history, our drawdowns in specific returns (alpha) tend to be modest relative to drawdowns in factors and generally recover quickly. Our approach was vindicated, with ELS starting its recovery the day after the first-round vote that saw Emmanuel Macron secure a commanding victory. As political concerns receded, conditions for the strategy quickly improved with ELS enjoying a particularly strong period of performance over the summer months before delivering a solid final quarter.

Given the difficulty in predicting when our strategy might perform or suffer, we would prefer to avoid excessive fluctuations in our gross exposure that carry the only certainty of incurring transaction costs, potentially to no avail. We believe maintaining portfolio construction discipline and confidence in the team's alpha generation capabilities are likely to yield better results over the medium to long term.

Performance

We entered 2017 with a number of things on our "to do" list to enhance the strategy over the medium to long term, but it was clear to us that an immediate improvement in performance was necessary. We are cognisant that in the past we have on occasion disappointed our investors with drawdowns resulting from poor portfolio construction or ineffective risk management. It was essential that we deliver a significant improvement in performance in 2017 for our investors. We are pleased to report that the Man GLG Global Equity Alternative Fund ended the year up 4.92% net of fees.

While we are pleased that the portfolio construction and risk management changes implemented in the second half of 2016 have played their part in securing that much needed improvement in performance, the key driver of returns was the exceptional performance by our team of stock pickers this year. Of the twenty-four books in ELS (including those in incubator), all but four made a positive contribution to the Fund's return in 2017. Of those four managers that found the market environment challenging this year, only two had a meaningfully negative impact on returns. It is pleasing to see so many of the Fund's portfolio managers produce strong returns on their book capital this year. Large contributions to Fund returns came from UK Core (1.88%), Event Driven (1.26%), Global TMT (1.22%), Technical Catalyst (0.79%), US Japan (1.18%) and Europe Midcap (1.02%) books. With such broad based strong performance, it is perhaps unsurprising that the Centre Book – our strategy for efficiently enhancing the alpha produced by the team – made a significant contribution to Fund returns in 2017 (2.01%). It was only in some of the more cyclically orientated books where we found the going tougher, with our Oil Services (-0.57%) and Industrials (-0.76%) books both modestly detracting from returns.

A focus on specific risk: one year on

The decision taken in Q3 2016 to focus the portfolio more on Specific risk and tightly constrain exposure to factors (emphasising the historic strength of the team) has certainly helped improve returns in 2017. There are also further beneficial characteristics of Specific risk relative to factor risk – most notably, that drawdowns tend to be shallower and recovery from them quicker. This is because the individual exposures that comprise our Specific risk tend to be significantly less correlated than those that comprise our factor exposure, leading to the more benign drawdown characteristic evident in the exhibit. This lower correlation also leads to lower volatility, so to compensate for this reduction of volatility we have steadily increased leverage so that we can maintain the level of risk that we wish to deliver to our investors.

The Fund closed on 9 January 2018.

Man GLG European Mid-Cap Equity Alternative – Annual Report Commentary

The political and economic backdrop in 2017 was more favourable for hedge funds in 2017 than 2016, a year which contained political shocks (Brexit and the election of Donald Trump) and two major phases of hedge fund de-leveraging. In 2017 stock prices were driven more by fundamental stock specific factors as opposed to macroeconomic or liquidity factors. With lower correlation between stocks there were ample opportunities for stock pickers to generate alpha and differentiate themselves from the crowd.

The year 2017 can be broadly characterized by three phases – the follow through of the post Trump rally during the start of the year, where low quality companies outperformed, the summer consolidation and the year-end rally driven partly by US tax reforms and to some extent fear of missing out. During these three phases, although there was substantial rotation between styles and sectors, the fund was able to generate positive returns. We construct our portfolios from the bottom up and we continue to control the sector risk, country risk and other style risks that are not stock specific.

Towards the year end we began to position the fund slightly more cautiously, reducing the net market exposure towards zero and deliberately increasing stock specific risk whilst reducing style factor risk to historic low levels. This reflected our near term concerns over positioning, valuations, low volatility and technical measures of price extension.

Our performance in 2017 was primarily driven by positive stock specific factors though we were also impacted slightly positively by our market, industry and country positioning. We were also positively impacted by style exposure (in contrast to 2016) though we were impacted slightly negatively by our option hedges as markets rallied.

We continue to believe our asset class is becoming increasingly inefficient because of the structural changes that are taking place on the sell side and we believe MIFID 2 is leading to an acceleration of these trends. We expect the overall reduction in research payments to the sell side to lead to a further reduction in analyst coverage thereby increasing the inefficiencies in the asset class and the potential to generate alpha. We also believe there are scale advantages for larger players with multiple teams in accessing and paying for research. We envisage a scenario where the smaller competitors in our space will potentially struggle to cover the costs of research which may force potential closures over time. We therefore believe the adoption of MIFID 2 may hold some potential relative advantages for a mid-cap fund operating within a large organisation.

As we start 2018 we would like to take this opportunity to wish our investors a happy New Year and to express our thanks to you for your continued support.

The primary contributors to stock specific returns during 2017 are disclosed in the table below.

| top 5 | Long / Short | <u>Name</u> | Impact (Gross return bps) | Commentary |
|----------|--------------|------------------------------------|---------------------------|---|
| 1 | Long | United Internet | 106 | Value accretive combination with Drillisch |
| 2 | Short | UK Breakdown Assistance company | 104 | Series of profit warnings, management departure |
| 3 | Long | Rubis | 101 | Strong trading, value accretive acquisitions, discovery |
| 4 | Long | Aalberts | 83 | Acceleration of growth, cyclical re-rating |
| 5 | Short | Drillisch | 76 | Value accretive combination with United Internet |
| Bottom 5 | | | | |
| 1 | Short | German listed airports operator | -126 | Strong traffic, acquisitions, change in sell side perception |
| 2 | Long | RPC Group Plc | -114 | Concerns over acquisition led growth strategy and equity issuance |
| 3 | Long | Elior Group | -91 | Profit warning and departure of CEO |
| 4 | Long | Brenntag | -80 | Poor conversion margins during the first half led to downgrades |
| 5 | Short | UK chemicals company | -48 | Acceleration of growth, cyclical re-rating |

Man GLG Unconstrained Emerging Equity - Annual Report Commentary

2017 was a good year for Emerging Market equities ("EM"), continuing the reversal that began mid-way through 2016, with MSCI Emerging Markets Net Total Return +25.3% in GBP (+37.3% in USD). In USD-terms, the functional currency of all emerging markets funds, the fund captured over 90% of the upside of a ferocious and consistent rally in asset prices, which, given the low volatility nature of the fund (relative to its benchmark and peer group) and the, in our view, conservative attributes of the companies that invested in, is in line with the fund managers' expectations.

2017 was the second year in succession that EM outperformed Developed Market equities ("DM", as denoted by the MSCI World Index).

The principal drivers of this outperformance were:

- A very weak USD, lifting the value of emerging market currencies
- Strength in commodity prices, with oil rallying 40% from its mid-year low to the end of the year, and copper rallying over 30% for the year
- Spectacular earnings growth among the Chinese internet giants

Overweight country exposure in India and Mexico significantly benefited the fund in the first half of the year. Asset prices in both countries were substantially depressed in the last months of 2016. Mexican assets, particularly the currency, were hit hard by Donald Trump's election victory and noise about dismantling NAFTA and building a wall. The fund managers substantially increased exposure to Mexican assets in early 2017, against a backdrop of the currency hitting its cheapest ever level on a trade-weighted basis, which paid off handsomely, as by the end of the first half of the year, the Mexican Peso was 14% stronger versus the USD, and the best performing EM currency. Indian equities sold off significantly in late 2016 following the government's decision to remove 85% of the cash in circulation almost overnight, to stifle the flow of "black" money, undeclared cash outside the formal economy. Amid talk of a 20-30% collapse in property prices, the managers substantially increased Indian exposure, particularly in the consumer and financial sectors, which also went on to perform very strongly in the first half of the year.

Relative performance fared less well in the second half of the year, as performance leadership became increasingly narrow, with a handful of mega-cap Chinese technology stocks outperforming substantially. Indeed, the MSCI China Information Technology Index outperformed MSCI EM by almost 20% in the second half of the year. Given the strategy's relentless focus on uncovering value, the managers consistently sold down positions in technology stocks the managers saw as increasingly overvalued, recycling profits into lower profile laggards. While such a strategy can result in underperformance in the teeth of a "melt-up", we believe it can protect the portfolio relatively when conditions change, and ensures that the fund is positioned to be able to generate positive returns when the erstwhile leaders eventually disappoint.

From a macro standpoint, EM economies were in good stead in 2017: Brazil and Russia continued to recover from their deep recessions of 2015, central European economies achieved full employment and blistering GDP growth (5% each for Czechia and Poland, and 4% for Hungary), and India took steps towards resolving its bad loan overhang, with a recapitalisation of state-owned banks. Among the major economies, China showed some signs of slowing, led by fixed asset investment as Beijing has begun to rein-in credit growth, and focus on the challenge of managing an improvement in environmental standards.

Man GLG Global Emerging Markets Debt Total Return - Annual Report Commentary

Market Review

2017 was an overall positive period for most financial assets, and Emerging Market (EM) debt was no exception with the EM local currency segment (L.C.) and Hard Currency (H.C.), as measured by JP Morgan Government Bond Index Emerging Market Global Diversified (JPM GBI-EM GD) and JP Morgan Emerging Market Bond Index Global (JPM EMBIG), returning +15.21% and +9.32%, respectively. Investor's search for yield and abundant global liquidity provided a fertile ground for inflows into the EM fixed income that surged to a record of +USD113.0bn¹ in 2017, 2.6x bigger than the +USD42.6bn recorded in 2016.

In H.C., spread return (+7.19%) was the main source of performance. Spreads across EM sovereigns (-54bp) and corporates (-82bp) compressed indiscriminately through 2017 to levels well over 1 standard deviation tighter to the last 2-year average, despite the deterioration of the average credit quality of the asset class². Similarly, the spread of the EM high yield to EM investment grade decreased to historical lows³.

New bond issuance from EM sovereign and corporates reached an all-time high of USD549bn⁴ (+27%YoY) in 2017, driven by the supply from high yield segment (+73%YoY) and corporates (approximately 2/3 of the total supply).

Investor demand was largely complacent with deteriorating fundamentals in Brazil (with political tensions and approaching presidential elections resulting in diminished prospects for any meaningful pension reform getting through Congress in the near future), South Africa (where the potential positive developments deriving from the outcome of December's ANC party election - including the likely delay of a Moody's downgrade decision - have been largely priced in, while the effectiveness of Ramaphosa's presidency will be likely hindered by a still deeply divided ANC and concerns about contingent liabilities⁵ and debt dynamics remain), as well as ongoing geopolitical tensions in Korea and Middle East. In Venezuela, President Maduro announced plans to commence a restructuring of the debt in November 2017.

Outlook:

Complacency remains a key risk, driven by tight valuations, the market's noteworthy long positioning and continued inflows into the asset class. This type of dynamics is reminiscent of the months prior to significant market adjustments in the 1990s, 2000s, and 2010s.

We believe dealer's ability to provide liquidity and use balance sheet is severely diminished versus the periods indicated above, while real money and hedge fund stocks of assets are degrees of magnitude larger.

In 2018, the market faces potentially higher developed markets (DM) reference rates (yet to be fully priced in⁶), inflation trending higher (both in DM and EM) and overall decreasing quantitative stimulus by DM central banks. The EM geo/political calendar presents idiosyncratic risk in many major EM countries in the form of general elections in Mexico, Brazil, Russia; regional elections in India, Indonesia; volatility in South Korea, South Africa, Turkey (risk of a military intervention in Syria, possibility of the extension of state of emergency for the sixth time and structural bottlenecks resulting from the large external financing requirements) and a potential slowing in China as the People's Bank of China continues its financial deleveraging plan. The combination of these dynamics is likely to lead to outflows from the EMD asset class.

Despite fairly attractive valuations of EM currencies (real terms) to the USD, favourable terms of trades for most EM countries and sound economic growth in DM, EM current accounts have stalled. In our opinion, this is an indicator that fundamentals in these countries must have deteriorated from previous periods where such economies had experienced similar real currency valuations and favourable terms of trade. As a result, we believe, the imbalance in the capital account that would result from the above mentioned capital outflows would have to be offset by further improvements in the current account, for which additional weakness in EM currencies would be required.

Fundamentally, a group of select EM countries are in a good situation in terms of quality of policy and balance sheet to potentially navigate through a significant correction in our view. These are where we plan to focus our risk in the medium term.

In the event of a market correction, the illiquidity in many managers' portfolios, and the larger weight of ETFs in the asset class, could lead to liquidation of healthy and liquid assets first. This could provide the opportunities to invest our capital in what we believe are the healthier segments of the asset class at more attractive valuations.

Until that happens, we are likely to retain the defensive position that we have had.

¹ Split into +USD73.7bn in Hard Currency (H. C.) and USD39.3bn in Local Currency (L. C.). Source: EPFR Global, J.P. Morgan and Bloomberg.

² Driven by a combination of some downgrades and increased issuance from lower rated frontier (NEXGEM) markets, the share of Investment grade credits in EMBIG decreased from 66% in June 2015 to 53% in December 2017.

³ JP Morgan EMBIG High Yield (Excluding Venezuela) vs. JP Morgan EMBIG Investment Grade Spread differential decreased -30bps to 316bps.

⁴ As of 12/31/17; includes emerging market sovereign and corporate bonds with issue sizes of USD300MM or more; Source: Bloomberg.

⁵ S&P cited "clear danger of default by Eskom" and South African exchange warning suspension of Eskom's listed debt securities upon failure to submit its interim financial report.

⁶ While the Fed dot plot is currently indicating three hikes in 2018 – the market, at the end of December, had only priced in 1.5 hikes through 2018.

Man GLG Global Emerging Markets Debt Total Return - Annual Report Commentary (continued)

Fund Activity:

We gradually reduced market exposure starting at the end of February. During the time that the team managed the strategy both at HSBC and Man GLG, the TR strategy Beta to the blend of the hard and Local currency benchmarks was only at levels comparable to the current one twice and on both occasions for a brief period of time: in mid-2011, before the sovereign financial crisis in Europe, and 2013, in the months leading to US tapering. Both periods were followed by meaningful corrections in EMD.

In H.C., the external duration weighted exposure (DWE) of the fund at of the end of December was 0.3 years, in the low end of the strategy's historical range of between 0 to 4 years. Exposure was comprised of short-dated USD bonds, where the movement of pull-to-par offered protection from a potential upward move in USD interest rates and volatility in EM spreads, to countries such as Indonesia, South Africa, China, Mexico, and Turkey. In 2017Q4, we increased the short spread DWE exposure of the portfolio by -1.2 years to -1.9 years. The spread DWE exposure of the fund is comprised of CDS protection to Argentina, Indonesia, South Africa, Turkey, Lebanon, Russia, Kazakhstan, Saudi Arabia, and South Korea.

In L.C., we went from a long position of 46% at the end of January to a neutral position at the end of February and we have had a short position since then. The FX short exposure of fund was -22% at the end of December, at the low end of historical ranges for the Strategy. The fund had a short positions to the BRL, EUR, IDR and ZAR. We kept the short local DWE exposure at-0.7 years via Brazil as we expect an upward reversion in Brazilian rates.

Performance:

In 2017, the fund net (USD Institutional share class⁷) and estimated gross⁸ returns were +2.33% and +3.26%, respectively. The Fund's US Treasuries, L.C. and H.C. exposures contributed in +0.98%, +2.62% and -0.33%, to the 2017 gross performance.

In L.C., the short exposures to the BRL (-0.81%) was the main detractor from performance, but was more than offset by the positive contributions coming from long exposure to MXN (+1.00%), TRY (+0.88%), and COP (+0.53%), as well as the exposure to ZAR (+0.44%).

In H.C., the long exposures to Mexico (+0.22%) and Brazil (+0.19%) were the main sources of positive performance, but were more than offset by the negative contribution coming from the short exposures to Russia (-0.25%) and Kazakhstan (-0.16%), Lebanon (-0.15%) and South Africa (-0.11%), and Argentina (-0.10%)

The major reason for the underperformance in 2017 versus the Blend was the defensive position of the portfolio. This is tandem with its investment process, with the strategy more likely to underperform traditional benchmarks in the final periods of rallies in asset prices (as beta risk is decreased in response to deterioration in valuations, positioning, and return expectations).

⁷ ISIN: IE00BD3B6F79, Bloomberg Ticker: MGLGIUS ID Equity

⁸ Difference between gross and net performance is down not only to fees, but also due to differences in FX and pricing sources and timing of pricing between Man GLG and the Administrator of the fund.

Investment Managers' Reports (continued)

Man GLG Innovation Equity Alternative - Annual Report Commentary

The Man GLG Global Innovation Equity Alternative focuses on sectors that are predominately driven by micro fundamental changes. Taking this approach often leads us to Technology, Consumer Discretionary, Industrials, and occasionally Telecoms. This is an approach we have undertaken for over 13 years. It is both systematic and fundamental and primarily focused on liquid large cap stocks. Our strategy looks to monetise Alpha by focusing on areas where consensus expectations are wrong both on the long book and the short book.

Launch of the Man GLG Global Innovation Equity Alternative

2017 was the first year of the relaunch of our 6 year long successful UCITS strategy at Man GLG (with an investment process that we originated, followed and evolved over 13 years). The relaunch has proved successful as we have adapted our investment process for Man GLG processes and systems. From a Portfolio Manager perspective, I am particularly pleased that almost all of the returns have come from stock selection vs market exposure.

As a reminder, we started the strategy with \$20 million on December 30th 2016 and exited the year at \$157 million in a year.

Performance in 2017

In 2017, the fund returned 6.90% net of fees for the IN USD share class¹. On a gross return attribution analysis basis, the stock and sector selection attribution was 10.04%, while market exposure only contributed +1.47%. Hedge selection (primarily used for emerging market exposure and some sectors) was-2.17% for the year. On a full year basis, the Fund had annualised volatility of 2.57% despite focusing in some very high volatility areas. The Sharpe ratio² for our first year was 2.16, while our worst monthly drawdown was -1.03%.

On a stock level, the biggest single stock long winners for the fund this year have been Samsung, Tencent, Facebook, Mastercard and Visa³. These positions have been strategic, fundamentally researched, and well established "long" thesis for the team that we have been long for many years in our previous mandates. On the short side, the fund had successful high alpha and absolute contribution shorts in the areas of educational publishing, consumer robotics, traditional media and agencies, auto parts retailing, and payment infrastructure.

Our overall average gross exposure on the year was only 96%, although ranging from 78% to 110% as we adapted to substantial inflows and markets experienced substantial multiple expansion.

Outlook:

If 2017 was about bedding down our well established process at Man GLG, 2018 will be about amplifying returns through better and more efficient gross exposure management to further increase the magnitude of the stock selection alpha generated through our process. In line with that objective, we have started grossing up into early January and have had a reasonable start as we approach the fourth quarter reporting season.

Looking into next year, we see opportunities from inefficiencies arising from tax reform, GDPR and even research coverage changes resulting from MIFID. As a one off and to better understand our positioning going into next year, we share below a snapshot of our long book and short book attributes. This is calculated on a weighted average basis and using consensus estimates for any forward numbers.

| Attribute | Long Book | Short Book |
|----------------|-----------|------------|
| RoA | 9.7 % | 2.6 % |
| RoE | 19.8 % | 9.4 % |
| Fwd P/E Ratio | 29.8 x | 44.8 x |
| Dividend Yield | 1.0 % | 1.6 % |
| FCF Margin | 22.0 % | 8.5 % |
| FCF Yield | 3.9 % | 4.2 % |
| | | |

Currently, we are focused on the fourth quarter of 2017 earnings season and aiming to take advantage of situations where market expectations appear to be missing core micro fundamental changes. We look to selectively use options when appropriate to further isolate the earnings event in an effort to be more capital efficient in generating Alpha during earnings season, when our theses are often tested. Our process is designed to look for situations where change is mispriced and we look forward to opportunities to monetise these disconnects especially as earnings season approaches in January.

-

¹ For investment professionals only. Not for public distribution. Returns may increase or decrease as a result of currency fluctuations. Performance data is shown net of fees with income reinvested, and does not take into account sales and redemption charges where such costs are applicable. Returns are calculated net of 1.0% management fees and 20.0% performance fees. Other share classes may charge higher fees

² Sharpe ratio is a measure of risk-adjusted performance that indicates the level of excess return per unit of risk. It is calculated using the risk-free rate (3 month interbank rate) in the appropriate currency over the period analysed. Where an investment has underperformed the risk-free rate, the Sharpe ratio will be negative. As the Sharpe ratio is an absolute measure of risk-adjusted return, negative Sharpe ratios can be misleading and are therefore shown as n/a.

Man GLG Innovation Equity Alternative – Annual Report Commentary (continued)

In looking further forward, there is a lot of media discussion of bubble like conditions in some large cap secular growth US tech stocks which have generally led the US market higher. In addressing this valuation comment, we would agree that there has been, in some cases, significant multiple expansion in addition to strong positive earnings revisions. However, having managed money before, during and after previous tech bubbles we will express our view that the absolute levels of valuation for most of these stocks (while elevated relative to recent history) remain far from previous bubble like multiples. In addition, fundamental differences in growth rates, cash flow generation and returns now exist between stocks today and in previous episodes of bubbles. In fact, on some metrics like price/free cash flow, some of these same names still look cheap vs history. We also would point out that those areas of tech and consumer which are currently exhibiting excessive multiple expansion without earnings support are often opportunities for our short book.

What is more concerning to us in some of our long book names is positioning (or, "crowding"). Hence, over the last couple of months, we had substantially reduced down the position of names such as Facebook and Amazon despite the fact that we remain bullish on their long term prospects. While they have always correlated with factors such as growth, and often momentum too, they are increasingly correlating with low realized volatility. This remains a factor that we closely watch for the portion of our portfolio where it applies. The lower volatility means that these specific large cap names can get increasingly over owned by specialist, generalist, quant, long only and hedge fund money, leading to crowded trades, and high expectations.

In closing, we would like to thank all our investors and the various teams at Man GLG for the support they have provided for the last twelve months, and look forward to their continued support in 2018 and beyond.

Man NewSmith UK Equity Alternative - Annual Report Commentary

During Q3 2017 the best performing sectors were Information Technology and Financials. The worst performing sectors were Consumer Discretionary and Industrials. During Q4 the best performing sectors were Energy and Consumer Staples. The worst performing sectors were Information Technology and Industrials.

Our cautious stance was maintained in H2. The gross & net exposure levels within the fund continue to be low relative to history. Our long positions continue to be focused in areas with high international exposure and diversification. We have maintained our low exposure to mid & small caps and highly domestically focused businesses.

Financial markets have been taking increasing confidence from signs of broad-based economic expansion around the globe for the first time since the financial crisis. This combined with progress on tax cutting legislation in the US led to strong gains for equities late in 2017. Whilst this paints an optimistic picture for earnings growth in 2018, equity valuations are now high relative to history and there are signs of investor exuberance.

Given this backdrop alongside signs of rising wage inflation and recent upward moves in commodity prices there is a growing risk of rising interest rates and tightening monetary conditions over the course of this year, ending the period of low inflation and cheap money that has been so beneficial for risk asset prices in recent years.

We continue to maintain risk levels within the fund at low levels compared to history. Our view on UK economic growth is more cautious than globally given the distortions created by the Brexit process.

They do not include or take account of any movements, returns or market information for subsequent periods.

Man AHL Multi Strategy Alternative - Annual Report Commentary

The AHL Multi Strategy Programme ('AMS') was profitable in 2017 in a year in which equities repeatedly broke new highs whilst volatility remained persistently low.

Market Summary

The year was a record breaking one for stock markets with an improving world economy propelling stocks to new highs. In currency markets, increasingly robust economies and investor appetite for yield made emerging market currencies very attractive. In fixed income markets, the monetary policy of the major central banks started to diverge, with the US entering a tightening cycle.

Performance review by style

By style, performance in 2017 was driven by volatility and momentum trading models with equity and fundamental models marginally down and technical models slipping to a loss.

Fundamental models enjoyed a strong start to the year as relative value equity index futures models, fixed income carry and currency trading all performed well. Only equity index futures trading managed to hold on to gains through the latter half of the year, however. Fixed income carry models saw bond sell-offs in June, September and December which ate into profits. In currency trading, the summer was also difficult as rallying currencies such as the Australian dollar and Norwegian krone dented profits.

Volatility trading enjoyed an excellent year as realised volatility remained persistently low throughout the year. Options trading across currencies, equity indices and fixed income were all positive with fixed income the most profitable asset class. It was not all a short volatility story, however, with long positions in Kospi volatility adding to profits.

Market neutral equity models struggled to piece together any consistent performance in the four main global regions traded. Generally, performance amongst regions was weakly positive over the year, aside from Asia which had a poor final quarter. In terms of factors, single stock momentum was most profitable whilst relative sector momentum detracted from performance, particularly in Asia.

Momentum performed well over the year with profits fuelled mostly by long positions in equities which rallied in an extraordinarily consistent fashion over the year. The main US indices delivered profits throughout the year although the top single market was actually the South Korean Kospi with the Hang Seng and China 50 index also performing well. Fixed income and currency momentum trading lost money overall, although EM currencies were a bright spot with the Mexican peso and Indian rupee the best performers.

Technical trading models had a difficult year with faster signals struggling to time market moves in currencies and fixed income, in particular. Event based, reversion, cyclical and pattern recognition signals all found the environment in 2017 challenging although performance in Nasdaq bucked the general environment to outperform. Fixed income relative value curve trading performed better as it recovered strongly after a difficult first quarter to record a solid profit for the year with performance driven by returns in Italian and Canadian bonds in particular.

<u>Outlook</u>

The environment in 2017 was generally benign for investors with low volatility and ever-rising equity markets. Whilst welcome, this cannot be counted on to persist. The model and market diversification within the Programme gives us confidence that, whatever 2018 holds, we have an array of diversified content well-equipped to navigate global markets.

Man AHL TargetRisk - Annual Report Commentary

AHL TargetRisk was able to perform strongly driven by equities and credit as well as marginally positive performances from fixed income and inflation sensitive buckets. Amid a generally favourable global economic background and with high hopes of stimulus from the new US president, global equities performed well. The key US indices were among the equity leaders, but TargetRisk was able to perform well across all global equity markets. Credit indices also did well in 2017, led by US High Yield index and European credit indices.

Commodities as a whole ended the year at virtually the same level to where they had begun, with gains in some markets effectively offsetting losses elsewhere. Oil ended up slightly higher on the back of promises of OPEC production cuts and reduced global inventories. US natural gas sold-off during the year on the back of expanding US domestic shale production. Gold had its best year since 2010 on the back of a weakened US dollar, increased political tensions, and rising confidence that US rate rises may not be too problematic

Despite US policy rates rising three times during the year, fixed income still contributed positively to fund performance in 2017. While some markets such as the short-end of the US yield curve suffered, the bigger story was the dovishness of both the Bank of England and European Central Bank, which helped to push yields down in Europe. Perhaps somewhat surprisingly, the long-end of the US yield curve also tightened somewhat causing long-dated Treasuries to rally.

Man Numeric Market Neutral Alternative - Annual Report Commentary

Market Overview

The equity markets began 2017 on a high note and continued their strong run throughout the entire year. For the first year since the inception of the MSCI ACWI Index (12/31/1998), returns exceeded 4% in each of the four quarters. Growth stocks have dominated Value stocks for a majority of the year, as economic improvement has been a tailwind for positive equity market returns. Central Bank policy remained at the forefront of economic headlines, as the US Federal Reserve raised interest rates three times throughout the course of the year. Emerging Market equities continued to outpace developed markets given the solid macroeconomic backdrop, as the MSCI Emerging Markets Index outperformed the MSCI World Index during every quarter, the first time that has happened since 2009. Despite the interest rate tightening cycle, rising yields and the volatile political climate globally, equity market volatility remains near all-time lows at the end of the year.

Performance Commentary

For the twelve month period ending December 31, 2017, the Man Numeric Market Neutral Alternative Fund (the "Fund") return was -2.85 ¹ net-of-fees. The fund is comprised of two complementary components: Diversified Market Neutral ("DMN") and the Innovation Portfolio ("IP"). During this reporting period, DMN contributed to performance, while IP detracted from performance.

The Diversified Market Neutral (DMN) component finished in positive territory for the year, as five of the eight regional strategies produced positive returns. Performance was positive in Europe, World, and EAFE Small. The primary detractor within DMN was US small cap and US large cap to a lesser degree. Model returns were positive in most regions for the year, with most models performing well. The exception was negative model returns within US Small Caps, as the underperformance of the value models impacting overall returns. From a regional perspective, positive model performance was seen in most regions including Asia ex Japan, Japan, Europe, the UK, and US Large Caps.

The Innovation Portfolio component (which now includes the Fundamental Statistical Arbitrage strategies) detracted value during the year. Overall, seven of the twelve sleeves produced negative returns, led by the Retail, Bond Momentum, and Dislocation components. The Ecosystem and Trade Ideas components were the most significant contributors within the strategy for the year. Fundamental Statistical Arbitrage also produced negative returns for the year.

The organisations and/or financial instruments mentioned are for reference purposes only. The content of this material should not be construed as a recommendation for their purchase or sale.

For all the sub-funds past performance is not indicative of future results. Returns may increase or decrease as a result of currency fluctuations. Performance is net of all fees and is disclosed for the reporting share class. The value of an investment and any income derived from it can go down as well as up and investors may not get back their original amount invested. Alternative investments can involve significant additional risks.

¹ Returns are calculated net of 1.25% management fees and 20.00% performance fees.

Man Alternative Style Risk Premia-Annual Report Commentary

Market Summary

2017 marked a watershed year as interest rates globally began to rise from their multi-year lows. Despite the US Federal Reserve ('Fed') starting to apply the brakes via three rate hikes, the lure of President Trump's stimulus programme propelled US equity and credit indices to new highs and equity volatility, as measured by the VIX, to record lows. Across the Atlantic Mario Draghi, President of the European Central Bank, signalled he wanted to taper its bond purchase programme in the future but did not hike rates which resulted in positive returns for equities and credit. In Japan, Prime Minister Shinzo Abe's decision to hold a snap election was vindicated by both his re-election and the Nikkei hitting 21-year highs. A similar strategy in the UK did not work out quite so well for Theresa May who now faces the twin headwinds of Brexit and a weakened majority in the years ahead.

Man Alternative Risk Premia

The risk seeking environment provided a supportive backdrop for the Fund which outperformed our return expectations. Our delivered volatility was slightly below our risk budget due to the position size limits within the underlying managed accounts and our portfolio construction strategy which is designed to limit exposure to highly correlated trading models.

Alt Beta Momentum produced a small gain. Choppy bond, FX and commodity markets didn't help, but the return from the strong trend in equities in the second half of the year offset this. We capped our equity positions as a part of the risk management process.

Our FX Carry strategies had mixed results, with the positive contributions from Alt Beta EM Risk Premia due to dollar weakness versus EM currencies more than offset by losses in the developed markets strategy, Alt Beta FX Carry which lost money largely due to short positions in the euro as the Eurozone recovery gained momentum. Our volatility trading strategy Alt Beta Volatility benefitted from the fact that VIX futures traded at a premium to the spot market for most of the year as asset class volatility and US equity volatility in particular declined throughout the year. Alt Beta Fixed Income Carry ('Fixed Income') was also a noteworthy performer. The carry derived from yield curve slopes reduced as global curves flattened over the year. The return from duration neutral trading of the global bond yield spreads was highly profitable as spreads contracted particularly in the Eurozone. We reduced our exposure to Fixed Income due to the asymmetric risk reward that it presented at year end.

Alt Beta Equities was positive and benefitted from momentum and quality based signal conditioning of its core value-based model as market performance was dominated by fewer and fewer growth names. Alt Beta Size which is designed to extract return from the 'small cap' effect and quality factors, recovered somewhat from a poor start, but still ended the year with a negative contribution as size factors posted negative returns. Alt Beta Low Beta was a major beneficiary of the search for bond proxies within equity markets as yield paying equities enjoyed a strong end to the year.

Outlook

Whilst much has been written on crowding effects in quantitative strategies and their potential to create short-term volatility, the inefficiencies that our models exploit are long-term effects. Rising global interest rates and the flow of capital from active to passive management can create additional opportunities to trade. We are also working to enhance our FX and Fixed Income models and are developing new quality and momentum models with potential to outperform in stressed markets as we are aware that the risk seeking environment that we have enjoyed will not persist forever.

Effective 16 March 2018, the Fund was delisted from Irish Stock Exchange.

Investment objectives

The investment objectives of each sub-fund are as stated in note 1. Investment in the Fund carries with it a degree of risk including but not limited to the risks referred to in note 6 of these Financial Statements. For a more detailed description of risks associated with investment in the Fund, please refer to the Prospectus.

Directors and Secretary

The Directors and secretary during the year and up to 23 April 2018 are listed on page 1. Unless indicated, they served for the entire year.

Directors' and Secretary's interests

Neither the Directors, nor their families, nor the secretary (Matsack Trust Limited) nor the Investment Managers had any interests in the Shares of the Fund at 31 December 2017, with the exception of one Subscriber Share held by Man Asset Management (Ireland) Limited in a nominee capacity.

The Directors' remuneration for the year ended 31 December 2017 and 31 December 2016 is disclosed in Note 9.

Directors' responsibilities

The Directors are responsible for preparing the Directors' Report and the financial statements in accordance with Irish law.

Irish company law requires the Directors to prepare financial statements giving a true and fair view of the state of affairs of the Fund and the profit or loss of the Fund for each financial year. Under that law the Directors have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by EU. Under company law, the directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Fund as at the financial year end date and of the profit or loss of the Fund for the financial year and otherwise comply with the Companies Act 2014.

In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in question and note the effects and the reasons for any material departure from those standards; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Fund will continue in business

The Directors are responsible for ensuring that the Fund keeps or causes to be kept adequate accounting records which correctly explain and record the transactions of the company, enable at any time the assets, liabilities, financial position and profit or loss of the Fund to be determined with the reasonable accuracy, enable them to ensure that the financial statements and directors' report comply with the Companies Act 2014 and enable these financial statements to be audited. They are also responsible for safeguarding the assets of the Fund and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Accounting records

The Directors are responsible for ensuring that proper accounting records as outlined in Section 281 to 285 of the Companies Act 2014 ("Act") are kept by the Fund. To achieve this, the Directors have appointed an experienced third party fund administrator to ensure that the requirements of Section 281 to 285 of the Companies Act 2014 are complied with. The books and accounting records are maintained at the Administrator's office at One Dockland Central, Guild Street, IFSC, Dublin 1, Ireland.

Directors' report (continued)
For the year ended 31 December 2017

Independent Auditor

The Independent Auditor, Ernst & Young, Chartered Accountants, will continue in office in accordance with Section 383 (2) of the Companies Act 2014.

Corporate governance

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes whose shares are admitted to trading on the Irish Stock Exchange, the Fund is subject to corporate governance practices imposed by:

- i) The Irish Companies Acts 2014 (as amended) which is available for inspection at the registered office of the Fund;
- ii) The Articles of Association of the Fund which are available for inspection at the registered office of the Fund;
- iii) The Central Bank in their UCITS Notices and Guidance Notes which can be obtained from the Central Bank website at: https://www.centralbank.ie/regulation/industry-market-sectors/funds/ucits and are available for inspection at the registered office of the Fund: and
- iv) The Irish Stock Exchange ("ISE") through the ISE Code of Listing Requirements and Procedures which can be obtained from the ISE's website at:- http://www.ise.ie

The Irish Funds ("IF") has published the IF Code that may be adopted on a voluntary basis by Irish authorised collective investment schemes. It should be noted that the IF Code reflects existing corporate governance practices imposed on Irish authorised collective investment schemes, as noted above. If the IF Code is adopted on a voluntary basis, it can be referred to in the disclosures made in the Directors Report in compliance with the provisions of the European Communities (Directive 2006/46/EC) Regulations (i.e. S.I. 450 of 2009 and S.I. 83 of 2010).

The Board of Directors is responsible for establishing and maintaining adequate internal control and risk management systems of the Fund in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Fund's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Board of Directors has procedures in place to ensure all relevant books of account are properly maintained and are readily available, including production of annual financial statements. The annual financial statements of the Fund are required to be approved by the Board of Directors of the Fund and the annual financial statements of the Fund are required to be filed with the Central Bank and the Irish Stock Exchange. The statutory financial statements are required to be audited by independent auditors who report annually to the board on their findings.

The board evaluates and discusses significant accounting and reporting issues as the need arises.

The convening and conduct of shareholders' meetings are governed by the Articles of Association of the Fund and the Companies Acts. Although the Directors may convene an extraordinary general meeting of the Fund at any time, the Directors are required to convene an annual general meeting of the Fund within twelve months of the date of the previous annual general meeting. Shareholders representing not less than ninety-five per cent of the paid up share capital of the Fund may also request the directors to convene a shareholders' meeting. Not less than twenty one days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting unless the auditors of the Fund and all the shareholders of the Fund entitled to attend and vote agree to shorter notice.

Two members present either in person or by proxy constitute a quorum at a general meeting.

The Fund may from time to time by ordinary resolution increase the share capital by such amount and/or number as the resolution may prescribe.

The Fund may also by ordinary resolution:

- 1) consolidate all or any of its share capital into Shares of larger amount;
- 2) subject to the provision of the Companies Acts subdivide its Shares, or any of them, into Shares of smaller amount or value and provide for any of such Shares resulting from such sub-division to have, as compared with the others, any such preferred, deferred or other rights or be subject to any such restrictions as the Fund has power to attach to unissued or new Shares;
- cancel any Shares which, at the date of the passing of the resolution, have not been taken or agreed to be taken by any person and reduce the amount of its authorised share capital by the amount of the Shares so cancelled; or
- 4) re-denominate the currency of any class of Shares.

Every holder of participating shares or non-participating shares present in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present in person or by proxy is entitled to one vote in respect of each share held by him and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Fund requires a simple majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Fund requires a majority of not less than seventy five per cent of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

Directors' report (continued)
For the year ended 31 December 2017

Corporate governance (continued)

Unless otherwise determined by an ordinary resolution of the Fund in a general meeting, the number of Directors may not be less than one or more than ten. Currently the Board of Directors of the Fund is composed of four Directors, being those listed in the corporate information in these financial statements.

The business of the Fund is managed by the Directors, who exercise all such powers of the Fund as are not by the Companies Act 2014 ("Act") or by the Articles of Association of the Fund required to be exercised by the Fund in general meeting.

A Director may, and the company secretary of the Fund on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman shall not have a casting vote and the resolution shall fail. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The Board has adopted the voluntary Irish Funds (IF) Corporate Governance Code for Irish Domiciled Collective Investment Schemes and Management Companies, issued 14 December 2011 (the "Code"), with effect from 31 December 2012. The Board has reviewed and assessed the measures included in the Code and considers its corporate governance practices and procedures since the adoption of the Code as consistent therewith.

The Directors acknowledge that they are responsible for securing the company's compliance with the relevant obligations as set out in section 225 of the Companies Act 2014.

The directors confirm that:

- 1) A compliance policy document has been drawn up that sets out policies that in our opinion are appropriate to the Fund, respecting compliance by the Fund with its relevant obligations.
- 2) appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the company's relevant obligations, and
- 3) during the financial year, the arrangements or structures referred to in (2) have been reviewed.

The Directors confirm that during the financial year end 31 December 2017:

- a) so far as the Directors are aware, there is no relevant audit information of which the Fund's statutory auditors are unaware; and
- b) the Directors have taken all steps that ought to have been taken by the Directors in order to make themselves aware of any relevant audit information and to establish that the Fund's auditors are aware of that information.

Audit Committee

The Board of Directors has decided it was not necessary to constitute an audit committee given the frequency of the meetings of the Board of Directors throughout the year and the size of the Board of Directors. Instead, it is deemed more appropriate that the entirety of the Board of Directors carry out the activities that would otherwise be carried out by an audit committee.

The Fund has adopted the corporate governance code for collective investment schemes and management companies issued by the Irish Funds (the "IF Code"). The Directors are satisfied that they act independently and in the interests of the Fund as a whole and have determined that Eric Fortier and Ronan Daly are independent directors as that term is defined in the IF Code.

Connected party transactions

The Directors are satisfied that there are arrangements in place to ensure that transactions carried out with connected parties of the Fund are carried out as if negotiated at arm's length and any such transactions are in the best interests of the Shareholders of the Fund. The Directors are satisfied that any transactions entered into with connected parties during the year complied with the aforementioned obligation.

On behalf of the Board

Date: 23 April 2018

Director

Dublin 2, D02 KV60, Ireland

REPORT FROM THE DEPOSITARY TO THE SHAREHOLDERS DATED 23 APRIL 2018

For the period from 1 January 2017 to 31 December 2017 (the "Period")

BNY Mellon Trust Company (Ireland) Limited (the "Depositary" "us", "we", or "our") has enquired into the conduct of Man Funds VI plc (the "Company") for the Period, in its capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as Depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as Depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

For and on behalf of BNY Mellon Trust Company (Ireland) Limited,

One Dockland Central,

Guild Street, IFSC, Dublin 1.

[#] Man GLG Global Emerging Markets Debt Total Return commenced operations on 3 May 2016. Man GLG Innovation Equity Alternative and Man GLG Global Fundamental Equity commenced operations on 29 December 2016.

Notes to the financial statements
For the year ended 31 December 2017

1. General

Man Funds VI plc (the "Fund") was incorporated as an investment company with variable capital and segregated liability between subfunds under the laws of Ireland as a public limited company on 28 November 2007 under registration number 449860. The Fund has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS"), pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015 (the "Central Bank UCITS Regulations"). The Fund's investment manager is GLG Partners LP for Man GLG Portfolios, AHL Partners LLP for Man AHL Portfolios, Numeric Investors LLC for Numeric Portfolios and Man Solutions Limited for Man Solution Portfolios (the "Investment Managers"). The Fund's registered office is at 70 Sir John Rogerson's Quay, Dublin, Ireland. The Fund has no employees.

The Fund is structured as an umbrella fund with segregated liability between sub-funds (each a "Portfolio") which means that different Portfolios may be created from time to time by the Directors with the approval of the Central Bank. Each Portfolio will be represented by a different series of Redeemable Participating Shares (the "Shares") and will be invested in accordance with the investment objectives and policies applicable to such Portfolio. As at 31 December 2017 the Fund was comprised of twenty Portfolios.

Man GLG Portfolios

Man GLG European Alpha Alternative, Man GLG European Equity Alternative, Man GLG Alpha Select Alternative, Man GLG Total Return (ceased operations on 8 February 2016), Man GLG Global Equity Alternative, Man GLG Asian Equity Alternative (ceased operations on 20 April 2016), Man GLG European Alpha Alternative Enhanced (ceased operations on 23 December 2016), Man GLG Cred-Eq Alternative (ceased operations on 29 June 2017), Man GLG European Mid-Cap Equity Alternative, Man GLG Unconstrained Emerging Equity, Man GLG Global Emerging Markets Debt Total Return, Man GLG Innovation Equity Alternative, Man GLG Global Fundamental Equity (ceased operations on 31 May 2017) and Man NewSmith UK Equity Alternative (commenced operations on 7 June 2017).

Man AHL Portfolios

Man AHL Multi Strategy Alternative, Man AHL Directional Equities Alternative (ceased operations on 30 September 2016), Man AHL TargetRisk and Man AHL Volatility Alternative (ceased operations on 4 August 2017).

Numeric Portfolio

Man Numeric Market Neutral Alternative.

Man Solutions Portfolio

Man Alternative Style Risk Premia (commenced operations on 17 October 2017).

All Classes of Redeemable Participating Shares are together referred to as the "Redeemable Participating Shares" or "Shares".

As at 31 December 2017, the following Portfolios were registered with Swiss Financial Market Supervisory Authority FINMA: Man GLG Alpha Select Alternative, Man GLG European Equity Alternative, Man GLG Global Equity Alternative, Man GLG Cred-Eq Alternative, Man AHL Multi Strategy Alternative, Man AHL TargetRisk, Man AHL Volatility Alternative, Man Numeric Market Neutral Alternative, Man GLG Mid-Cap Equity Alternative, Man GLG Unconstrained Emerging Equity, Man GLG Global Emerging Markets Debt Total Return, Man GLG Global Fundamental Equity and Man GLG Innovation Equity Alternative and Man Alternative Style Risk Premia.

The investment objectives and policies of each active Portfolio are detailed below.

Man GLG European Alpha Alternative

Man GLG European Alpha Alternative's investment objective is to provide a positive absolute return for investors while maintaining a low volatility, regardless of market conditions, through stock selection and the utilising of long/short strategies.

The Portfolio invests primarily in securities of issuers in Europe or of issuers which derive a substantial part of their revenues from activities in Europe. The Portfolio invests predominantly in common stocks and other equity and equity linked instruments of such issuers, including, without limitation, equity derivatives.

As at 31 December 2017, Class DN EUR, Class DN H GBP, Class DN H USD, Class IN EUR, Class IN H GBP, Class IN H USD and Class INU EUR were in operation, of these Class DN EUR, Class DN H GBP, Class DN H USD, Class IN EUR, Class IN H GBP, Class IN H USD and Class INU EUR were listed on the official list of the Irish Stock Exchange ("ISE").

Man GLG Alpha Select Alternative

Man GLG Alpha Select Alternative's investment objective is to provide investors with positive returns through investments primarily in the United Kingdom securities markets.

The Portfolio invests primarily in common stock and other equity and equity-linked securities (which may include but are not limited to such instruments as options and swaps) of issuers in the United Kingdom or of issuers which derive a substantial part of their revenues from activities in the United Kingdom and may invest the remainder in equity and equity linked securities of issuers and on markets located outside the United Kingdom. Although it is not intended to provide for any geographic or sectorial specialisation other than the above, it is anticipated that the Portfolio's investments will primarily be in mid and large capitalisation companies including companies in the FTSE 100 Index.

As at 31 December 2017, Class DL GBP, Class DL H EUR, Class DL H USD, Class IL GBP, Class IL H EUR, Class IL H SEK, Class IL H USD and IL U GBP were in operation, of these Class DL GBP, Class DL H EUR, Class DL H USD, Class IL GBP, Class IL H EUR and Class IL H USD were listed on the official list of the ISE.

Notes to the financial statements (continued) For the year ended 31 December 2017

1. General (continued)

Man GLG European Equity Alternative

Man GLG European Equity Alternative's investment objective is to provide investors with positive returns primarily through investments in issuers in Europe and of issuers which derive a substantial part of their revenues from activities in Europe.

The Portfolio's policy is to achieve those returns through investments in short, medium and, to a lesser extent, long-term investment opportunities. This policy will be pursued through a strategy of active trading with the Portfolio primarily investing in listed equities including, without limitation, common stock and other equity and equity-linked securities (which may include, but are not limited to, such instruments as options and swaps), of issuers in Europe and of issuers which derive a substantial part of their revenues from activities in Europe.

As at 31 December 2017, Class DN EUR, Class DN H CHF, Class DN H GBP, Class DN H NOK, Class DN H SEK, Class DN H USD, Class IN EUR, Class IN H GBP, Class IN H SEK, Class IN H USD, Class INZ EUR, Class INZ EUR Dist, INZ H CHF Dist, INZ H GBP Dist, INZ H USD and INZ H USD Dist were in operation, of these Class DN EUR, Class DN H CHF, Class DN H GBP, Class DN H NOK, Class DN H SEK, Class DN H USD, Class IN EUR, Class IN H GBP, Class IN H SEK, Class IN H USD, Class INZ EUR, CLASS EUR,

Man GLG Global Equity Alternative

Man GLG Global Equity Alternative's investment objective is to provide investors with positive returns through investments in a global range of issuers with a diversified regional allocation.

The Portfolio's policy is to achieve those returns through investments in short, medium and, to a lesser extent, long-term investment opportunities globally. This policy is pursued through a strategy of active trading with the Portfolio primarily investing in listed equities globally including, without limitation, common stock and other equity and equity-linked securities (which may include, but are not limited to, such instruments as options and swaps). The Portfolio seeks to apply a long/short investment strategy and the Investment Manager may utilise synthetic short positions where it deems it appropriate in its sole discretion based on the opportunities in the market and the extent to which the Investment Manager believes that there are overvalued issuers or issuers which may fall in value. The Portfolio will not have a set long/short ratio.

As at 31 December 2017, Class DN EUR, Class DN H USD, Class IN EUR and Class IN H USD were in operation and were listed on the official list of the ISE.

Man GLG Cred-Eq Alternative

Man GLG Cred-Eq Alternative's investment objective was to provide investors with absolute returns over the medium term by taking both long and short positions in an actively managed portfolio of convertible, credit and equity asset classes.

The Portfolio's aim was to seek to select the best possible investments from a wide range of opportunities globally, adopting a fundamentally driven investment approach across convertibles, credit and equities.

The Portfolio ceased operations on 29 June 2017.

Man AHL Multi Strategy Alternative

Man AHL Multi Strategy Alternative aims to achieve medium-term capital growth in all market conditions by being broadly diversified along system styles, asset classes, regions, and time horizons.

The Portfolio will seek to achieve its objective by allocating all or substantially all of its assets in accordance with the AHL Multi-Strategy Programme (as described in further detail in the Prospectus).

As at 31 December 2017, Class DN USD, Class DN H EUR, Class DN H GBP, Class IN USD, Class IN H CHF, Class IN H EUR, Class IN H GBP and Class IN H SEK were in operation.

Man AHL TargetRisk

The Man AHL TargetRisk Portfolio aims to generate capital growth over the medium to long term.

The Portfolio seeks to achieve its objective by allocating all or substantially all of its assets in accordance with a proprietary quantitative model, the 'Man TargetRisk' strategy, by providing dynamic long only exposure to a range of assets and to provide an excess return stream with a stable level of volatility regardless of market conditions.

As at 31 December 2017, Class D USD, Class D H CHF, Class D H EUR, Class D H SEK, Class I USD, Class I H CHF, Class I H EUR, Class I H GBP, Class I H JPY and Class I H SEK were in operation.

Man AHL Volatility Alternative

Man AHL Volatility Alternative Portfolio's aim was to provide investors with absolute returns over the medium term by taking long and short positions in an actively managed portfolio trading volatility instruments.

The Portfolio's aim was to achieve its objective by allocating all or substantially all of its assets in accordance with AHL's proprietary quantitative model to systematically identify opportunities in volatility markets around the world.

The Portfolio ceased operations on 4 August 2017.

Notes to the financial statements (continued) For the year ended 31 December 2017

1. General (continued)

Man GLG European Mid-Cap Equity Alternative

The Portfolio's investment objective is to seek to provide an attractive risk-adjusted total return, through appreciation and income.

The Portfolio will seek to achieve these returns primarily through long and synthetically short investments in equity securities or equity derivatives. The Portfolio may invest up to 20% of its Net Asset Value in emerging markets or in currencies of Organisation for Economic Co-Ordination and Development ("OECD") countries and/or derivatives.

As at 31 December 2017, Class DN EUR, Class DN H USD, Class DNY EUR, Class IN EUR, Class IN F EUR, Class INF H GBP, Class INF H USD, Class IN H GBP, Class IN H GBP, Class IN H GBP, Class IN H USD were in operation.

Man Numeric Market Neutral Alternative

Man Numeric Market Neutral Alternative's investment objective is to earn an average return on investment, after fees, which is appreciably higher than the total return (assuming reinvestment of dividends) in USD of the Merrill Lynch 91-day Treasury Bills Index.

The Portfolio will seek to apply a long/short investment strategy and intends to invest in derivatives providing long and "synthetic short" positions.

As at 31 December 2017, Class DN USD, Class DN H EUR, Class IN USD, Class IN H EUR, Class IN H SEK, Class INU USD, Class INU H EUR and Class INU H GBP Dist were in operation.

Man GLG Unconstrained Emerging Equity

Man GLG Unconstrained Emerging Equity's investment objective is to achieve capital gains in the medium to long-term, through investment in emerging market equities.

The Portfolio will seek to achieve the above objective primarily through investment in emerging market equities. Such equities will generally be listed or traded on Recognised Markets in emerging markets worldwide and the Portfolio will not have a particular sectoral, industry or market capitalisation focus.

As at 31 December 2017, Class D C USD, Class DF C EUR, Class DF C USD, Class I C SEK, Class I C USD, Class IF C EUR, Class IF C GBP, Class IF C SEK and Class IF C USD were in operation.

Man GLG Global Emerging Markets Debt Total Return

Man GLG Global Emerging Markets Debt Total Return's investment objective is to achieve a return in all market conditions over the long term primarily through investment in a portfolio of fixed income securities denominated in local currency.

As at 31 December 2017, Class D USD, Class D USD Dist, Class D H CHF, Class D H EUR, Class D H GBP, Class D H NOK, Class DL USD, Class DL H EUR, Class DMF USD, Class DMF H EUR, Class DMF USD, Class DMF USD, Class DMF USD, Class DMF USD, Class I H CHF, Class I H EUR, Class I H EUR, Class I H GBP, Class I H SEK, Class IL USD, Class IL H EUR, Class IMF USD, Class IMF USD, Class IMF H EUR, Class IMF H EUR, Class IMF H EUR, Class IMF H EUR, Class IMF H GBP Dist were in operation.

Man GLG Innovation Equity Alternative

Man GLG Innovation Equity Alternative's investment objective is to provide investors with absolute returns by taking both long and short positions in equities issued by companies globally.

The Portfolio will seek to apply a long/short investment strategy and intends to take full advantage of the ability to invest in derivatives providing long and "synthetic short" positions.

As at 31 December 2017, Class DN USD, Class DNF USD, Class DNF H EUR, Class DN H CHF, Class DN H EUR, Class IN USD, Class INF USD, Class INF H EUR, Class INF H GBP, Class INF H

Man GLG Global Fundamental Equity

Man GLG Global Fundamental Equity's investment objective was to provide investors with absolute returns by taking both long and short positions in equities issued by companies globally.

The Portfolio sought to apply a long/short investment strategy and intends to take full advantage of the ability to invest in derivatives providing long and "synthetic short" positions.

The Portfolio ceased operations on 31 May 2017.

Man NewSmith UK Equity Alternative

Man NewSmith UK Equity Alternative's investment objective is to maximise absolute returns.

The Portfolio will seek to achieve its objective by employing a long/short equity strategy.

As at 31 December 2017, Class IN GBP, Class IX E GBP and Class IX H JPY were in operation.

Notes to the financial statements (continued) For the year ended 31 December 2017

1. General (continued)

Man Alternative Style Risk Premia

Man Alternative Style Risk Premia's investment objective is to achieve medium-term absolute returns in all market conditions across liquid asset classes.

The Portfolio will seek to achieve its objective by allocating all or substantially all of its assets in accordance with the Styles and Strategies adopted such as by investing all or part of the net proceeds of Shares in transferable securities listed or traded on Recognised Markets.

As at 31 December 2017, Class D USD, Class I USD, Class I H EUR, Class I H GBP and Class I H SEK were in operation.

2. Significant accounting policies

(a) Accounting convention

The financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU. The financial statements have been prepared using the historical cost basis except for financial assets and liabilities held at fair value through profit or loss which have been measured at fair value.

(b) Changes in accounting policy and disclosure

New standards, interpretations and amendments adopted by the Fund:

The accounting policies adopted in the preparation of the audited financial statements are consistent with those followed in the preparation of the Fund's audited financial statements for the year ended 31 December 2016.

Standards issued but not yet effective:

IFRS 9 - Financial Instruments: Classification and Measurement

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments which reflects all phases of the financial instruments project and replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required but comparative information is not compulsory. Early application of previous versions of IFRS 9 (2009, 2010 and 2013) is permitted if the date of initial application is before 1 February 2015. At present, management believes the adoption of IFRS 9 is unlikely to have a material effect on the classification and measurement of the Fund's financial assets or financial liabilities.

IFRS 15 - Revenue from Contracts with Customers

IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15 revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognising revenue.

The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after 1 January 2018 with early adoption permitted. At present management believes that IFRS 15 will have no impact on the financial statements and plans to adopt the new standard on the required effective date.

At the date of authorisation of the financial statements there were a number of other Standards and Interpretations which were in issue but not yet effective. Management anticipates that the adoption of these Standards and Interpretations in future periods will have no material impact on the financial statements of the Fund.

(c) Use of accounting judgements and estimates

The preparation of financial statements in accordance with IFRS requires management to make judgements, estimates and assumptions that affect the amounts reported and disclosures made in these financial statements and accompanying notes, including certain valuation assumptions. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities in the future.

(d) Going concern

Management has made an assessment of the Fund's ability to continue as a going concern and are satisfied that the Fund has resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Fund's ability to continue as a going concern, therefore, the financial statements are prepared on a going concern basis.

(e) Revenue recognition

Interest income and dividend income are recorded on an accrual basis and ex-dividend basis respectively, gross of withholding tax.

Notes to the financial statements (continued) For the year ended 31 December 2017

2. Significant accounting policies (continued)

(f) Financial assets and liabilities

For Net Asset Value (NAV) purposes, the valuation of investments is performed in accordance with the Prospectus. For financial statements purposes, investments have been valued in accordance with IFRS using the policies outlined below. At 31 December 2017 and 31 December 2016, there are no material differences between these valuation methodologies.

This category has two sub-categories:

- (i) financial assets and liabilities held for trading: Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading as the Fund does not designate any derivatives as hedges in a hedging relationship.
- (ii) those designated by management at fair value through profit or loss at initial recognition: These include equity securities and debt instruments that are not held for trading. These financial assets and liabilities ("financial instruments") are designated upon initial recognition on the basis that they are part of a group of financial instruments which are managed and have their performance evaluated on a fair value basis, in accordance with risk management and investment strategies of the Fund. The financial information about these financial instruments is provided internally on that basis to the Investment Managers. As at 31 December 2017 and 2016, the Fund did not hold any financial assets and liabilities designated by management at fair value through profit or loss at initial recognition.

The Fund recognises a financial asset or a financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Regular-way purchases and sales of investments are recognised on the trade date, which is the date on which the Fund commits to purchase or sell the asset. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. All transaction costs for such instruments are recognised directly in statement of comprehensive income.

After initial measurement, the Fund measures financial instruments, which are classified as at fair value through profit or loss, at their fair values

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the statement of financial position date.

In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

The Fund may from time to time invest in financial instruments that are not traded in an active market (for example over-the-counter ("OTC") derivatives and private placements of both equities and fixed income securities). These financial instruments are valued at their fair value in the manner described in the subsequent accounting policies.

The Directors have appointed an Independent Pricing Committee ("IPC") to undertake certain services concerning the valuation policies and procedures relating to the Fund. The IPC is an independent body set up to: (1) establish a pricing matrix (a table which lays out a pricing source for certain assets and liabilities) which the Directors have adopted for the Fund and which is used by the Administrator to calculate the value of the assets and liabilities held by the Fund; and (2) to establish the prices of any positions held in the Fund that do not have an independently ascertainable value as per the pricing matrix. In addition, the IPC provides general governance and oversight of the valuation process.

Any exchange traded derivative instruments (including, but not limited to, options and futures) dealt in on a market are valued at the settlement price on the relevant Valuation Day for such instruments on such a market. If the settlement price is not available, their probable realisation value shall be determined with care and in good faith by the Directors.

Investments are derecognised when the rights to receive cash flows have expired or the Fund has transferred substantially all of the risks and rewards of ownership.

(g) Securities sold short

The Fund may sell securities short. A short sale is a transaction in which the Fund sells a security it does not own. The proceeds received for short sales are recorded as liabilities and the Fund records an unrealised gain or loss to the extent of the difference between the proceeds received and the value of the open short position. The Fund records a realised gain or loss when the short position is closed. By entering into short sales, the Fund bears the market risk of an unfavourable change in the price of the security sold short in excess of the proceeds received. Short sales expose the Fund to potentially unlimited liability.

(h) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liabilities simultaneously. As at 31 December 2017 and 31 December 2016, no financial assets and liabilities are offset in the statement of financial position. Please refer to Note 5.

(i) Derivatives

The Fund may trade in derivative financial instruments whose values are based upon an underlying asset, index, currency or interest rate. The net unrealised gains or losses, rather than contracts or notional amounts, represents the approximate future cash flows from trading.

The Fund engaged in contracts for difference, forward currency contracts, futures contracts, option contracts, swap contracts, credit default swaps, interest rate swaps, total return swaps and warrants.

Notes to the financial statements (continued) For the year ended 31 December 2017

2. Significant accounting policies (continued)

(i) Derivatives (continued)

- Contracts for difference ("CFD")

An unfunded contract for difference ("CFD") is an agreement between the Fund and a third party which allows the Fund to acquire an exposure to the price movement of specific securities without actually purchasing the securities. Upon entering into an unfunded CFD, the Fund is required to deposit with a broker an initial cash margin equal to a certain percentage of the contract amount. Variation margin payments are made or received by the Fund depending upon the fluctuation in the value of the underlying securities. The changes in contract values are recorded as unrealised gains or losses and the Fund recognises a realised gain or loss when the contract is closed. CFDs are similar to total return swaps but are more standardised and primarily used in the UK and Ireland.

- Forward currency contracts

Forward currency contracts are recorded on the trade date and are valued at the applicable foreign exchange rates on the last business day of the year. The difference between the fair value of the original contract amount and the fair value of the open forward currency contract position is reflected as financial assets or liabilities in the statement of financial position and as net gain/(loss) on the financial assets at fair value through profit or loss in the statement of comprehensive income. Realised gains or losses are recognised on the maturity or trade date of the contract and are included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

- Futures contracts

Futures contracts are recorded on the trade date and are valued at the last traded price on the last business day of the year. The difference between the original contract amount and the fair value of the open futures position is reflected as financial assets or financial liabilities at fair value through profit or loss in the statement of financial position and as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. Realised gains or losses are recognised on the closing or trade date of the contract and are included in net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

- Option contracts

The Fund may invest in option contracts. An option contract gives the owner the right, but not the obligation, to buy ("call option") or to sell ("put option") a specified item at a fixed price during a specified year for a non-refundable fee ("premium"). The maximum loss to a buyer of an option is the loss of the premium. The writer of a call option has to bear the risk of an unfavourable change in the value underlying the option and, unless an offsetting long position is owned, the theoretical loss is unlimited. The loss to the writer of a put option is limited to the exercise price of the option, versus the premium collected on its sale. Option contracts are held at fair value with reference to quoted market prices, when available, or based on pricing models that consider the time value of money, volatility and the current market and contractual prices of the underlying financial instruments.

- Swap contracts

Swap contracts are contractual agreements between two parties to exchange streams of payments over time based on specified notional amounts. The swap contracts are valued at an amount equal to the gain or loss that would be realised if the position was closed out on the valuation date. The Fund's main swap contracts consist of credit default swaps, interest rate swaps and total return swaps.

Swap contracts are marked-to-market daily and changes in value are recorded as unrealised gain/(loss). When the swap contracts is terminated, the Fund will record a realised gain/(loss) equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract, if any. Swap transactions involve, to varying degrees, elements of credit and market risk in excess of the amounts recognised in the statement of financial position. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavourable changes in interest rates and/or market values associated with these transactions.

- Credit default swaps

The Fund may enter into credit default swaps to manage its exposure to certain sectors of the market or to reduce credit risk. The Fund may enter into credit default swap agreements to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). Credit default swaps are agreements in which one party pays fixed periodic payments to counterparty in consideration for a guarantee from the counterparty to make a specific payment should a negative credit event take place (e.g. default, bankruptcy or debt restructuring). The Fund may either buy or sell (write) credit default swaps. As a buyer, the Fund will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising of an index or receive a net settlement of cash equal to the notional amount of the swap contracts less the recovery value of the security or underlying securities comprising of an index. As a seller (writer), the Fund will either pay the buyer an amount equal to the notional amount of the swap contracts and take delivery of the referenced security or underlying securities comprising of an index or pay a net settlement of cash equal to the notional amount of the swap contracts less the recovery value of the security or underlying securities comprising of an index. In the event of default by the counterparty, the Fund may recover amounts paid under the agreement either partially or in total by offsetting any payables and/or receivables with collateral held or pledged.

These periodic payments received or made by the Fund are included in net realised gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

Notes to the financial statements (continued) For the year ended 31 December 2017

2. Significant accounting policies (continued)

(i) Derivatives (continued)

- Interest rate swaps

Interest rate swaps relate to contracts taken out by the Fund with major brokers in which the Fund either receives or pays a floating rate of interest in return for paying or receiving, respectively, a fixed rate of interest. The payment flows are usually netted against each other, with the difference being paid by one party to the other. Changes in the value of the interest rate swap agreements and amounts received or paid in connection with them are recognised as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

- Total return swaps

Total return swaps are contracts in which the Fund pays or receives a series of cash flows based upon the total return of a specified asset in return for paying or receiving, respectively, a fixed or floating rate of interest based upon that same specified asset.

Warrants

The Fund invests in warrants through listed exchanges and OTC markets. The listed warrants are traded on recognised exchanges and valued at the last traded price. OTC traded warrants are valued by reference to quoted prices. Change in realised and unrealised gains and losses are recorded in the statement of comprehensive income.

(j) Realised and unrealised gains and losses

All realised and unrealised gains and losses on securities and derivatives are recognised as net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. The cost of securities sold is accounted for on a specific identification basis. Unrealised appreciation and depreciation comprise changes in the fair value of financial instruments for the year and from reversal of prior year's unrealised appreciation and depreciation for financial instruments which were realised in the reporting year. Realised gains and losses represent the difference between an instrument's initial carrying amount and disposal amount, or cash payments or receipts made on derivative contracts (excluding payments or receipts on collateral margin accounts for such instruments).

(k) Transaction costs

Transaction costs are incremental costs, which are separately identifiable and directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. Transaction costs incurred by the Fund during the year are recognised in the statement of comprehensive income.

(I) Functional and presentation currency

The Fund seeks to generate returns in United States Dollars ("US\$"), its capital-raising currency. The liquidity of the Fund is managed on a day-to-day basis in United States Dollars in order to handle the issue and redemption of the Fund's Redeemable Participating Shares. The Fund's performance is also evaluated in United States Dollars. Therefore, as the United States Dollar is considered as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The Fund's functional and presentational currency is the United States Dollar.

(m) Foreign currency

Transactions during the year denominated in foreign currencies have been translated at the rates of exchange ruling at the dates of transactions. Assets and liabilities denominated in foreign currencies are translated at the rates of exchange in effect at the date of the statement of financial position. For investment transactions and investments held as at year end denominated in foreign currency, resulting gains or losses are included in the net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income. All other foreign currency gains and losses are also included in the net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the statement of comprehensive income.

The combined company balances are expressed in US\$, being the presentation currency of the Fund as a whole. For combined company balances in statement of financial position, the non US\$ Portfolios are translated using the exchange rate at the date of statement of financial position. For combined company balances in statement of comprehensive income, the non US\$ Portfolios are translated at the average exchange rate prevailing during the year. The combined subscriptions and redemptions in the statement of changes in net assets are also translated at the average rate prevailing during the current year. The translation gain resulting from the preparation of the combined company balances in the financial statements amounting to US\$221,666,361 (31 December 2016: loss of US\$56,052,912) has been shown in the combined company column of statement of comprehensive income. The gain/(loss) does not have any effect on the individual Portfolios.

(n) Other expenses

Other expenses are recognised in the statement of comprehensive income on an accruals basis.

(o) Investor Money Regulations

In response to the CBI publishing the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers (the "Investor Money Regulations" or "IMR") in March 2015 (effective from 1 July 2016), the Manager undertook, together with BNY Mellon Fund Services (Ireland) Designated Activity Company, a review of the way in which subscription, distribution and redemption monies are routed to and from the Fund or the relevant sub-fund. As a result of this review, subscription and redemption monies will (effective from 1 July 2016), be routed through a sub-fund cash collection account in the name of the sub-fund. Pending issue of the units and / or payment of subscription proceeds to an account in the name of the sub-funds, and pending payment of redemption proceeds or distributions, the relevant investor will be an unsecured creditor of the sub-fund in respect of amounts paid by or due to it.

Notes to the financial statements (continued) For the year ended 31 December 2017

2. Significant accounting policies (continued)

(p) Redeemable participating shares

Redeemable shares are classified as equity instruments when:

- The redeemable shares entitle the holder to a pro rata share of the Fund's net assets in the event of the Fund's liquidation;
- The redeemable shares are in the class of instruments that is subordinate to all other classes of instruments;
- All redeemable shares in the class of instruments that is subordinate to all other classes of instruments have identical features;
- The redeemable shares do not include any contractual obligation to deliver cash or another financial asset other than the holder's rights to a pro rata share of the Fund's net assets;
- The total expected cash flows attributable to the redeemable shares over the life of the instrument are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund over the life of the instrument.

In addition to the redeemable shares having all of the above features, the Fund must have no other financial instrument or contract that has:

- Total cash flows based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the Fund;
- The effect of substantially restricting or fixing the residual return to the redeemable shareholders.

The Fund continuously assesses the classification of the Redeemable Participating Shares. If the Redeemable Participating Shares cease to have all the features, or meet all the conditions set out, to be classified as equity, the Fund will reclassify them as financial liabilities and measure them at fair value at the date of reclassification, with any differences from the previous carrying amount recognised in equity. If the Redeemable Participating Shares subsequently have all the features and meet the conditions to be classified as equity, the Fund will reclassify them as equity instruments and measure them at the carrying amount of the liabilities at the date of the reclassification.

As at 31 December 2017, the Fund classified its Redeemable Participating Shares as liability.

(q) Cash and cash equivalents, balances with/due to brokers and balances due to/from brokers

Cash and cash equivalents in the statement of financial position may consist of cash at bank, demand deposits, short-term deposits in financial institutions and short-term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, with original maturities of three months or less, net of outstanding bank overdrafts when applicable. Short-term investments that are not held for the purpose of meeting short-term cash commitments and restricted margin accounts are not considered cash and cash equivalents. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and cash equivalents as defined above, net of outstanding bank overdrafts when applicable.

Due from brokers include receivables for securities sold (in a regular way transaction) that have been contracted for but not yet delivered on the statement of financial position date. These are carried at amortised cost using the effective interest method less any allowance for impairment. Due to brokers are payables for securities purchased (in a regular way transaction) that have been contracted for but not yet delivered on the statement of financial position date. These are measured at amortised cost using the effective interest method. Balances with brokers and balances due to brokers represent the margin account balances held at the Fund's brokers and balances payable to the Fund's brokers at the period/year end, and can include amounts transferred as collateral (and therefore subject to a security interest) against open derivative contracts.

(r) Distributions to shareholders

In accordance with the Fund's Prospectus, the Fund may fully distribute its distributable income to shareholders.

Distributable income includes capital gains arising from the disposal of investments.

Unrealised gains and losses are included in the net assets attributable to shareholders and are not distributable until realised. Capital losses are not distributed to shareholders, but are retained to be offset against any future realised capital gains. Distributions to shareholders are recognized in statement of comprehensive income as finance costs.

(s) Preliminary expenses

The Fund has borne its organisational expenses, including, without limitation, legal, accounting, filing and administration expenses associated with the organisation of the Fund and the offering of shares in the year/period in which they were incurred. For NAV purposes the organisational costs are amortised over the 36 months of trading of the Fund.

Notes to the financial statements (continued) For the year ended 31 December 2017

3. Cash and cash equivalents, balances with brokers and balances due from/to brokers

At the year end, amounts disclosed as cash and cash equivalents, balances with brokers and balances due to brokers were held at the Bank of New York Mellon (London Branch), Bank of America Merrill Lynch, Bank of Nova Scotia, Barclays Plc, BNP Paribas, Citibank N.A., Credit Suisse AG Ireland, Credit Suisse Securities (Europe) Limited, Deutsche Bank AG, Goldman Sachs International, HSBC Bank Plc, JP Morgan Securities Plc, Nomura Holdings, Morgan Stanley & Co. International Plc, Societe Generale, Standard Chartered and UBS AG. These include amounts transferred as collateral against open derivatives, deposits held at call with banks and, other short term highly liquid investments with original maturities of three months or less. Included in cash and cash equivalents balances at 31 December 2017 are US T-bills with a fair value of US\$19,948,591 (cost: US\$19,945,672) (2016: US\$Nil) (cost: US\$Nil) for Man AHL TargetRisk, a fair value of US\$522,535,224 (cost: US\$521,103,961) (2016: US\$ Nil (cost: US\$Nil)) for Man GLG Global Emerging Markets Debt Total Return and a fair value of US\$ 11,990,673 (cost: US\$11,969,539) (2016: US\$Nil (cost: US\$Nil) for Man GLG Innovation Equity Alternative.

The portions of balances with brokers represented by collateral as at 31 December 2017 and as at 31 December 2016 were:

| | 31 December 2017 | 31 December 2016 |
|---|------------------|------------------|
| Man GLG European Alpha Alternative | - | €13,683,862 |
| Man GLG Alpha Select Alternative | £1,072,945 | £115,488 |

4. Financial assets and liabilities at fair value through profit or loss

Fair value of financial instruments

The Fund classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in determining the measurements in line with IFRS 13.

The fair value hierarchy has the following levels:

- Level 1 Quoted market price in an active market for an identical instrument.
- Level 2 Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3 Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant impact on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques

Listed or publicly traded investment in equity and debt securities, managed funds and derivatives

When fair values of listed securities and debt securities at the reporting date, as well as publicly traded derivatives, are based on quoted market prices or binding dealer price quotations, without any deduction for transaction costs, the instruments are included within Level 1 of the hierarchy.

Unlisted debt securities and treasury bills

The Fund invests in debt securities, corporate and government bonds and treasury securities. In the absence of a quoted price in an active market, they are valued using observable inputs such as recently executed transaction prices in securities of the issuer or comparable issuers and yield curves. Adjustments are made to the valuations when necessary to recognise differences in the instruments terms. To the extent that the significant inputs are observable, the Fund categorises these investments as Level 2.

Over-the-counter derivatives

The Fund uses widely recognised valuation models for determining fair values of over-the-counter interest rate swaps, currency swaps and forward foreign exchange contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including both credit and debit valuation adjustments for counterparty and own credit risk, foreign exchange spot and forward rates and interest rate curves. For these financial instruments, significant inputs into models are market observable and are included within Level 2.

Notes to the financial statements (continued) For the year ended 31 December 2017

4. Financial assets and liabilities at fair value through profit or loss (continued)

Fair value of financial instruments (continued)

Total financial assets at fair value through profit or loss

Unlisted equity investments

The Fund invests in private equity companies which are not quoted in an active market. Transactions in such investments do not occur on a regular basis. The Fund uses a market based valuation technique for these positions. The Investment Manager determines comparable public companies (peers) based on industry, size, leverage and strategy, and calculates an appropriate earnings multiple for each comparable company identified. The multiple is calculated by dividing the enterprise value of the comparable company by an earnings measure. The trading multiple is then discounted for considerations such as illiquidity and size differences between the comparable companies based on company-specific facts and circumstances. The discounted multiple is applied to the corresponding earnings measure of the investee company to measure the fair value. The Fund classifies the fair value of these investments as Level 3.

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

The following tables summarise the financial instruments at fair value through profit or loss as at 31 December 2017 and 31 December 2016 and the financial instruments measured at fair value in the statement of financial position grouped into the fair value hierarchy:

Man Alternative Style Risk Premia commenced its operations on 17 October 2017. Hence, there are no investments as at 31 December 2016.

Short term balances are excluded from the tables as their carrying value at the year ended 31 December 2017 approximates to their fair value.

Investments are reviewed at each financial reporting point to ensure that they are correctly classified between Level 1, 2 and 3 in accordance with the fair value hierarchy outlined above. Where an investment's characteristics change during the year and investments no longer meet the criteria of a given level, they are transferred into a more appropriate level at the end of relevant financial reporting year.

For the year ended 31 December 2017 and 31 December 2016, there were no transfers between Level 1 and Level 2.

A reconciliation of the movements in level 3 assets/liabilities for the year ended 31 December 2017 and 31 December 2016 is set out below:

During the year ended 31 December 2017 and 2016, some positions were transferred into and out of Level 3 because either they became illiquid or liquid depending on whether multiple broker quotes were available or not.

All net realised and unrealised gains/(losses) in the tables above are reflected in the accompanying statements of comprehensive income. Net amount of €158,383 (31 December 2016: €103,062) for Man GLG European Equity Alternative, (€43,578) (31 December 2016: (€53,604)) for Man GLG Global Equity Alternative and (US\$27,088) (31 December 2016:US\$Nil) for Man AHL Multi Strategy Alternative relates to those Level 3 financial instruments held by the Fund at 31 December 2017 and is reflected in net gains/(losses) on financial assets at fair value through profit or loss in the statement of comprehensive income.

The fair value of investments classified within Level 3 is based on unobservable inputs that may be subject to significant variability. Because of the inherent uncertainty of valuation with respect to such investments, the Fund's estimates of fair value may differ significantly from fair values that would have been used had observable inputs been available for the valuation of such investments, and the differences could be material.

The table below discloses the valuation technique used in the valuation for Level 3 investments and quantifies the effect of significant unobservable inputs used to value investments that fall in this category. The ranges of these inputs are not representative of the appropriate inputs to use when calculating the fair value of any one Level 3 asset or liability. Accordingly, the ranges of inputs presented below do not represent uncertainty in, or possible ranges of fair value measurements of the Fund's Level 3 assets/liabilities.

Notes to the financial statements (continued) For the year ended 31 December 2017

4. Financial assets and liabilities at fair value through profit or loss (continued)

Fair value of financial instruments (continued)

| Contracts for difference - unfunded | (8,431) | Cost | None | No range |

The range of discounts disclosed above is the Investment Manager's assessment of the range of possible illiquidity discounts. The Investment Manager's Independent Pricing Committee has assessed that, based on the information available, there is no reason that the NAV provided by the underlying managed funds managers or their administrators should not represent the most appropriate basis for valuing these assets and therefore no fair value adjustment is applied.

The impact of the range of possible unobservable impacts on the fair value of investments is a increase/decrease of up to €Nil (31 December 2016: €Nil) for Man GLG European Equity Alternative and €Nil (31 December 2016: €Nil) for Man GLG Global Equity Alternative.

Forward currency contracts

As part of its portfolio management techniques, the Fund may use forward contracts to economically hedge any non-functional currency exposure (although formal hedge accounting is not used). Forward contracts may also be used for trading purposes. Forward contracts entered into by the Fund represent a firm commitment to buy or sell an underlying asset, or currency at a specified value and point in time based upon an agreed or contracted quantity.

Forward contracts may expose the Fund to the risks associated with the absence of an exchange market on which to close out an open position. The investment manager closely monitors the Fund's exposure under forward contracts as part of the overall management of the Fund's market risk.

Derivative financial instruments

The Fund may trade derivative financial instruments, including contracts for difference, futures, forward contracts, currencies, swaps contracts and options whose values are based upon an underlying asset, index, currency or interest rate.

The Fund is subject to both market and credit risk in trading derivative financial instruments. Market risk is the potential for changes in value due to changes in market interest rates, foreign exchange rates, indices and changes in the value of the underlying financial instruments. Credit risk is the possibility that a loss may occur if a counterparty fails to perform according to the terms of the contract. Substantially all derivative contracts are transacted on a margin basis. Such transactions may expose the Fund to significant off-balance sheet risk in the event margin deposits and collateral investments are not sufficient to cover losses incurred.

Notes to the financial statements (continued) For the year ended 31 December 2017

4. Financial assets and liabilities at fair value through profit or loss (continued)

Derivative financial instruments (continued)

The Investment Managers manages the risks associated with these transactions by maintaining margin deposits and collateral investments with its brokers in compliance with individual exchange regulations and internal guidelines. The Investment Managers also take an active role in managing and controlling the Fund's market and counterparty risks and monitoring trading activities and margin levels daily, and, as necessary, deposits additional collateral or reduces positions.

Credit default swaps are contracts in which the Fund pays or receives an interest flow in return for the counterparty accepting or selling all or part of the risk of default or failure to pay of a reference entity on which the swap is written. Where the Fund has bought protection, the maximum potential loss is the value of the interest flows the Fund is contracted to pay until maturity of the contract. Where the Fund has sold protection, the maximum potential loss is the nominal value of the protection sold. As at 31 December 2017, the maximum potential payout under credit default swaps where the sub funds have sold protection is US\$108,036,000 for Man AHL TargetRisk (31 December 2016: US\$Nil) and US\$27,700,000 for Man GLG Global Emerging Markets Debt Total Return (31 December 2016: US\$97,925,000). The fair value of these contracts as at 31 December 2017 was of US\$5,007,628 for Man AHL TargetRisk (31 December 2016: US\$Nil) and US\$378,902 for Man GLG Global Emerging Markets Debt Total Return (31 December 2016: US\$570,486).

The Fund may purchase or write put and call options through OTC markets. Options purchased by the Fund provide the Fund with the opportunity to purchase (call options) or sell (put options) the underlying asset at an agreed-upon value either on or before the expiration of the option. Options written by the Fund provide the purchaser of the option the opportunity to purchase from or sell to the Fund the underlying asset at an agreed-upon value either on or before the expiration of the option. Premiums received from writing options are marked-to-market in accordance with note 2 and the resulting gains or losses are recorded in the statement of operations. The Fund may also invest in swaptions which are a combination of feature an option and an interest rate swap. The maximum loss to a buyer of an option is the loss of the premium. The writer of a call option has to bear the risk of an unfavourable change in the value underlying the option and, unless an offsetting long position is owned, the theoretical loss is unlimited. As at 31 December 2017, the Fund held written put options with a maximum pay out value of €35,043,347 for Man GLG European Equity Alternative (31 December 2016: €35,539,334) and US\$304,840,255 for Man AHL Multi Strategy Alternative (31 December 2016: US\$104,465,381).

Derivative financial instruments are generally based on notional amounts which are not recorded in the financial statements. These notional amounts represent the theoretical principal value on which the cash flows of the derivative transactions are based. Unrealised gains or losses, rather than notional amounts, or the exchange-traded derivatives traded by the Fund are included in the statement of financial position. The net unrealised gains or losses, rather than contract or notional amounts, represent the Fund's approximate future cash flows from trading activities.

At 31 December 2017 and 31 December 2016, the Fund was exposed in its investments in derivative financial instruments to underlying positions in notional amounts are summarised as follows:

| | | Notional | Value | |
|-------------------------------------|-------------|-------------|-------------|-------------|

6. Financial risk management

Overall risk management

The Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The most important types of financial risks to which the Fund is exposed are market risk, credit risk and liquidity risk. Market risk includes equity price risk, interest rate risk and foreign currency risk. The Fund manages these risks on an aggregate basis along with the risks associated with the Fund's investing activities as part of its overall risk management policies.

The nature and extent of the financial instruments outstanding at the dates of the statement of financial position and the risk management policies employed by the Fund are discussed below.

The following summary is not intended to be a comprehensive summary of all of the risks and investors should refer to the Prospectus for a more detailed discussion of the risks inherent in investing in the Fund.

Notes to the financial statements (continued) For the year ended 31 December 2017

2016

2017

6. Financial risk management (continued)

Market risk

Market risk can include equity risk, commodity risk, interest rate risk, credit spread risk, volatility and foreign currency risk. The Portfolio's exposure to these factors is measured and monitored using Value at Risk ("VaR").

The table below identifies the VAR calculated on the Portfolio as at 31 December, and the stand alone contribution to the Portfolio VaR from each of the principal risk factors. The VaR measure is a 1 day, 97.78% confidence Monte Carlo VaR, using a historic observation period of six months. This signifies that the Portfolio would not be expected to lose more than the stated amount 97.78% of the time. The results are based on historically observed correlations and volatilities which may not always be an accurate prediction of the future and relate only to the positions held as at the close of business on 31 December. These positions inevitably change over time.

As of 31 December 2017 and 2016 the following table represents the Fund 1 day VaR as a percentage of Net Assets:

Man GLG European Alpha Alternative

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Fund has exposure to interest rate risk on cash held at the bank, balances due to and from brokers and certain derivative contracts. That exposure may not necessarily be significant due to the generally short term nature of those holdings. But a more significant exposure exists in that the value of all financial instruments held by the Fund may be affected either positively or negatively by changes in interest rates.

The Fund is directly exposed to interest rate risk through its investment in debt securities, which is deliberately designed to generate returns through trading strategies focused on exploiting price differentials in rates. The sensitivity of these exposures is modelled through the overall VAR analysis provided in the market risk section.

The following tables detail the Fund's exposure to interest rate risk by the earlier of contractual maturities or re-pricing:

Man GLG European Alpha Alternative

Liabilities not exposed to interest risk comprise certain financial liabilities through profit or loss, accrued expenses and other liabilities. These amounts normally require contractual settlement within one quarter and, in all cases, within one year.

The following tables detail the effect on net assets should interest rates have increased/decreased by 50 basis points (bps) with all other variables remaining constant, assuming that a 50bps increase/decrease in the base interest rate would result in a correlating 50bps increase/decrease in the value of net assets. In reality, an increase/decrease of 50bps would not result in a direct correlating increase/decrease in the fair value of net assets, as the movement in the value of the net assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The volatility measures presented in the Market Risk section capture, among all other variables, these actual interest rate sensitivities.

The Fund is indirectly exposed to interest rate risk through its investment strategy, which is deliberately designed to generate returns through trading strategies focused on exploiting price differentials in rates. The sensitivity of these exposures is modelled through the overall VaR analysis provided in the market risk section.

Notes to the financial statements (continued) For the year ended 31 December 2017

6. Financial risk management (continued)

Currency risk

Currency risk exists where assets and liabilities are denominated in currencies other than the functional currency, and also on nonfunctional currency redeemable participating shares. The Fund may use forward currency contracts for the purpose of currency speculation, as well as for hedging its foreign currency Share Class exposure.

Monetary assets and liabilities denominated in foreign currencies are summarised below:

Other price risk

Other market price risks arise mainly from uncertainty about future prices of financial instruments held. They represent the potential loss the Fund might suffer through holding market positions in the face of price movements caused by factors specific to the individual investment or factors affecting all instruments traded in the market.

Credit/counterparty risk

The investment Managers performs due diligence on all counterparties before they become a service provider or counterparty to the Fund, and credit quality checks are part of this process. The credit quality of the Fund's banks, brokers and Depositary is regularly monitored and factored into allocation decisions.

The Fund is exposed to credit/counterparty risk on parties with whom it trades and bears the risk of settlement default. Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. For example, it represents the financial risk associated with a security issuer (either Government or Corporate) failing to discharge an obligation or commitment, or filing for bankruptcy. The Fund seeks to reduce concentrations of credit risk by undertaking transactions with several customers and counterparties on recognised and reputable exchanges. The Fund only buys and sells investments through brokers which have been approved by the Investment Manager as an acceptable counterparty.

Financial assets which potentially expose the Fund to counterparty credit risk consist principally of investments in cash balances and deposits with and receivables from brokers and other receivables. The extent of the Fund's exposure to counterparty credit risk in respect of these financial assets approximates their carrying value as recorded in the Fund's statement of financial position. In addition, where the Fund borrows cash to finance leveraged investments, additional collateral is lodged with the counterparty to provide them with security for potential adverse movements in the collateral. Whilst most finance providers afford some segregated protection for this collateral, this facility may not always be available to the Fund, and consequently can expose the Fund to the credit worthiness of the counterparty.

Notes to the financial statements (continued) For the year ended 31 December 2017

6. Financial risk management (continued)

Credit/counterparty risk (continued)

Credit risk also arises on transactions with brokers related to transactions awaiting settlement. Risks relating to unsettled transactions are considered small due to the short settlement period involved and the high credit quality of the brokers used. Broker balances are primarily due from large reputable institutions and are, thus, considered at minimal risk for default. As delivery versus payment is the standard procedure for trade settlements, there is no significant credit risk arising from transactions settlements.

Credit risk is the risk that an issuer or counterparty will be unable to meet a commitment that it has entered into with the Fund.

The Fund's maximum exposure to credit risk (not taking into account the value of any collateral or other security held) in the event that the counterparties fail to perform their obligations as of 31 December 2017 in relation to each class of recognised financial assets, including derivatives, is the carrying amount of those assets in the consolidated statement of financial position. Credit risk is mitigated through the diversity of counterparties and regular monitoring of concentration risk.

As at 31 December 2017 the majority of the Fund's assets were held with Bank of America Merrill Lynch, Bank of Nova Scotia, Barclays Plc, BNP Paribas, Citibank N.A., Credit Suisse AG Ireland, Credit Suisse Securities Europe Limited, Deutsche Bank AG London, Goldman Sachs International, HSBC Bank Plc, JP Morgan Securities Plc, Macquarie Group, Morgan Stanley & Co. International Plc, Nomura Holdings, Societe Generale, Standard Chartered Plc, The Bank of New York Mellon, The Royal Bank of Scotland Plc and UBS AG (the "Brokers"). Each of these counterparties are considered by the Fund to be a highly rated and reputable institution and, thus, the individual and aggregate credit risk exposure is considered to not be significant.

The following tables detail the Fund's primary exposures to its counterparties:

Credit/counterparty risk (continued)

The below tables show the breakdown by Credit Spread of all credit securities held in the portfolio. This does not include any non-credit hedges held against these (for example equity securities) or deposits held with credit institutions. The "Credit Spread" is the measure which reflects the difference in yield of a credit security relative to an assumed credit risk-free security. For some security classes, the credit spread is the quotation method used by the market. For others, the Credit Spread is implied from the market price.

As at 31 December 2017, the value of the Portfolio's assets which are considered to be past due or impaired was US\$Nil (2016: US\$1.408).

Liquidity risk

Liquidity risk is defined as the risk that the Fund will encounter difficulty in meeting its obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Redeemable Participating Shareholder redemption requests are the main liquidity risk for the Fund.

The Fund's Redeemable Participating Shares are redeemable as outlined in Note 10. The exposure to liquidity risk through Redeemable Participating Shareholder redemption requests is managed by specifically setting the redemption notice period to accommodate the expected liquidity of the underlying investments as agreed by the Investment Manager. The Fund is therefore potentially exposed to weekly redemptions by its shareholders.

The Fund's financial instruments include Level 1 financial instruments which are considered readily realisable as they are all listed on major recognised exchanges.

The Fund's financial instruments also include investments in Level 2 and 3 financial instruments, which are not quoted in an active public market and which generally may be illiquid. As a result, the Fund may not be able to liquidate quickly some of its investments in these instruments at an amount close to their fair value in order to meet its liquidity requirements.

The main liability of the Fund is associated with the need to satisfy Redeemable Participating Shareholder's request for redemptions. The Fund seeks to mitigate this risk by investing primarily in securities that are listed or traded on recognised markets, thus assets comprise mainly realisable securities, which can be readily sold.

Option writing

As a writer of options, the Fund receives a premium at the outset and then bears the risk of unfavorable changes in the price of the financial instrument underlying the option. As a result of writing option contracts, the Fund is obligated to purchase or sell, at the holder's option, the underlying financial instrument at a fixed price which may differ from the prevailing market price at that date. Writing options may incur losses which greatly exceed the premium income received.

Securities sold short

Securities sold short are those in which a security is sold that the Fund does not own in anticipation of a decline in the market value of the security. The Fund's risk is that the value of the security will increase rather than decrease. Consequently, the settlement amount of the liability for securities sold short may exceed the amount recorded in the statement of financial position, as the Fund is obligated to purchase the security in the market at prevailing prices to settle its obligations.

7. Net gain/(loss) on financial assets and liabilities at fair value through profit or loss

Notes to the financial statements (continued) For the year ended 31 December 2017

8. Fees and expenses

Management and performance fees

The Fund has appointed Man Asset Management (Ireland) Limited (the "Manager") as manager of the Fund. The Manager has delegated its administration and share registration functions to BNY Mellon Fund Services (Ireland) DAC (the "Administrator"), and its investment management functions to GLG Partners LP for Man GLG Portfolios, Numeric Investors LLC for Man Numeric Portfolio, AHL Partners LLP for Man AHL Portfolios and Man Solutions Limited for Man Solutions Portfolios (the "Investment Managers"). The Manager has delegated its distribution functions to GLG Partners LP for the Man GLG portfolios, Man Investments AG for the Numeric Portfolios, Man Investments AG for Man AHL portfolios and Man Investments AG for Man Solutions portfolios (the "Distributors").

Man GLG Portfolios, Man Numeric Portfolios, Man AHL Portfolios and Man Solutions Portfolios

The Manager receives management fees of 0.50%, 0.75%, up to 0.75%, 0.95%, 1.00%, up to 1.00%, 1.25%, up to 1.25%, up to 1.50%, 1.70%, 1.75%, up to 1.75%, up to 1.75%, up to 1.75%, 1.75%, up to 1.75%, up to

The Manager receives management fees for classes and on rates prescribed as per below table:-

| | 0.50 | 0.75 | Up to | 0.95 | 1.00 | Up to | 1.25 | Up to | 1.50 | Up to | 1.70 | 1.75 | Up to | 2.00 | Up to | 2.25 | 2.75 | 3.00 |

Notes to the financial statements (continued) For the year ended 31 December 2017

8. Fees and expenses (continued)

Management and performance fees (continued)

Performance fees accrue at each Valuation Point and are calculated by the Administrator on the dates set out below in respect of each Share Class (each a "Calculation Date"):

- in the case of all Share classes, with the exception of the "E" Share Classes in Man NewSmith UK Equity Alternative and of all the Share Classes in Man GLG Global Emerging Markets Debt Total Return, performance fees are calculated semi-annually in arrears as at the last Business Day in the six month period ending on 30 June and the last Business Day in the six month period ending 31 December in each year; or
- in the case of the "E" Share Classes in Man NewSmith UK Equity Alternative of all the Share Classes in Man GLG Global Emerging Markets Debt Total Return, performance fees are calculated annually in arrears as at the last Business Day in the twelve month period ending 31 December in each year.

The Manager receives no performance fee for Classes D and I of GLG Total Return, Classes D, DF, DY, I and IF of Man GLG Unconstrained Emerging Equity, Classes DN and IN of Man AHL TargetRisk, Classes D, DR, DY, I and IU of Man GLG Global Emerging Markets Debt Total Return, Class IX of Man NewSmith UK Equity Alternative and Classes D, DY, I and IU of Man Alternative Style Risk Premia

The Manager pays the fees of the Investment Manager, Administrator and the Distributor.

The Manager may also receive distribution fees, up-front sales charges and contingent deferred sales charges.

Administration fees

The Fund is subject to an administration fee in respect of each Portfolio in relation to administration services provided by the Administrator and the Investment Manager. The administration fee is an amount which may not exceed 0.30% per annum of the Net Asset Value of the relevant Portfolio. The amount paid to each of the Administrator and Investment Manager is determined between the parties from time to time.

The Investment Manager receives only the portion of the administration fee relating to the administrative support services it provides pursuant to the Administrative Services Agreement. Part of the administration fee is paid by the Fund to the Manager (for on-payment to the Administrator) monthly in arrears and the remainder is paid by the Fund to the Investment Manager. The Fund also reimburses the Manager out of the assets of the Fund for reasonable out-of-pocket expenses incurred by the Administrator and the Investment Manager for these expenses.

Depositary fees

The Fund pays the Depositary a depositary fee which may not exceed 0.04% per annum of the Net Asset Value of the relevant Portfolio together with value added tax, if any, applicable to such fees. The Fund also reimburses the Depositary out of the assets of the relevant Portfolio for reasonable out-of-pocket expenses will accrue from day to day (which will not exceed normal commercial rates) and reasonable out of pocket expenses of any sub-custodian appointed by the Depositary and will be liable for transaction charges. The fee and expenses of the Depositary are paid monthly in arrears.

Amounts unpaid by the Fund at the year end relating to management, performance, administration and depositary fees are shown below:

| | 2017 Combined Fund US\$ | 2016 Combined Fund US\$ |
|---------------------|-------------------------------|-------------------------------|
| Management fees | 4,952,333 | 3,108,281 |
| Performance fees | 13,811,843 | 4,582,368 |
| Administration fees | 2,859,752 | 1,239,509 |
| Depositary fees | 430,302 | 479,719 |

Directors' fees

The Fund will pay the fees of the Directors. Currently each Director's fee is not expected to exceed €15,000 per annum. The Directors' fees for the year ended 31 December 2017 were €45,000 (2016: €24,000). In addition, the Directors receive reimbursement for travel and other out-of-pocket expenses relating to attendance at meetings and other matters, including any expenses relating to the performance of due diligence for the benefit of the Fund.

Notes to the financial statements (continued) For the year ended 31 December 2017

9. Related party transactions

The Fund has adopted the corporate governance code for collective investment schemes and management companies issued by the Irish Funds Industry Association (the "IF Code"). The Directors are satisfied that they act independently and in the interests of the Fund as a whole and have determined that Eric Fortier and Ronan Daly are independent directors as that term is defined in the IF Code.

Man Asset Management (Ireland) Limited is a related party through its holding of 1 Subscriber Share in the Fund. John Morton, a director of the Fund, holds the second Subscriber Share.

During the year Eric Fortier, Ronan Daly and Bronwyn Wright earned Directors' fee of €15,000 each. John Morton has elected to waive his Directors' fee as he is the Global Co-Head of Legal within Man Group Plc.

Each of the Directors is or may become involved in other financial investment and professional activities which may cause conflicts of interest with the management of the Fund. These activities include management or administration of other companies (including those with investment objectives similar to those of the Fund or structures that may be related to Man Group plc sponsored investment funds), purchases and sales of securities and other investments, investment and management counselling and serving as directors, advisers and/or agents of other companies, including companies and legal structures in which the Fund may invest and/or which may invest into the Fund.

GLG Partners LP and Man Asset Management (Ireland) Limited are related party as the Investment Manager and Manager of the Fund, respectively and therefore all subsidiaries of Man Group plc are also related parties.

| 31 December 2017 Related party | Type of fees /Income | Total Fees /Income US\$ | Fees payable /receivable US\$ |
|--|-------------------------|-------------------------------|-------------------------------------|
| Man Asset Management (Ireland) Limited | Management fees | 49,636,517 | 4,952,333 |
| Man Asset Management (Ireland) Limited | Performance fees | 22,662,447 | 13,811,843 |
| Man Asset Management (Ireland) Limited | Administration fees* | 13,584,862 | 2,859,752 |
| Man Asset Management (Ireland) Limited | Expense Reimbursement | (4,547,915) | (1,985,282) |
| Directors | Directors' fees | 50,837 | - |
| 31 December 2016 | | | |
| Man Asset Management (Ireland) Limited | Management fees | 41,549,957 | 3,108,281 |
| Man Asset Management (Ireland) Limited | Performance fees | 5,170,713 | 4,582,368 |
| Man Asset Management (Ireland) Limited | Administration fees* | 8,101,236 | 1,239,509 |
| Man Asset Management (Ireland) Limited | Expense Reimbursement | (1,538,799) | (1,597,111) |
| Directors | Directors' fees | 47,765 | - |
| Matheson | Legal fees | 301,656 | - |

^{*} The amount paid to each of the Administrator and Investment Manager is determined between the parties from time to time, but, for the avoidance of doubt, the Investment Manager receives only the portion of the administration fee relating to the administrative support services it provides pursuant to the Administrative Services Agreement. Part of the administration fee will be paid by the Fund to the Manager (for on-payment to the Administrator) monthly in arrears and the remainder will be paid by the Fund to the Investment Manager.

The above amounts are payable on demand and do not bear interest. Furthermore, the above transactions were made on terms equivalent to those that prevail in arm's length transactions.

As at 31 December 2017 entities affiliated with Man Group plc owned Redeemable Participating Shares as detailed below:

| Portfolio | Redeemable Participating Shares | | | | |
|---|---------------------------------|---------|--|--|--|
| | 2017 | 2016 | | | |

| Man Alternative Style Risk Premia | 210,070 | - | | | |

Notes to the financial statements (continued) For the year ended 31 December 2017

10. Share capital

The authorised share capital of the Fund is 500,000,000,000,000 divided into 2 Subscriber Shares of €1 each and 500,000,000,000 Shares of no par value initially designated as unclassified Shares. The Directors are empowered to issue up to 500,000,000,000 Shares of no par value designated as Shares of any series or class on such terms as they think fit.

Subscriber Shares of the Fund

The Subscriber Shares are each held by Man Asset Management (Ireland) Limited and John Morton in Nominee capacity. The Subscriber Shares were fully issued when the Fund was launched. They entitle the holders to attend and vote at general meetings of the Fund but do not entitle the holders to participate in the profits or assets of the Fund except for a return of capital on a winding-up. The Subscriber Share capital is beneficially held by or on behalf of the Manager. All issued Shares are fully paid. All these Issued Subscriber Shares are fully paid.

Redeemable Participating Shares

The Fund's Redeemable Participating Shares are redeemable at the shareholder's option on each Dealing Day with 1 business day written notice for Man GLG European Alpha Alternative, Man GLG Alpha Select Alternative, Man GLG European Equity Alternative, Man GLG Total Return, Man GLG Global Equity Alternative, Man GLG European Alpha Alternative Enhanced, Man GLG Cred-Eq Alternative, Man AHL Multi Strategy Alternative, Man AHL Directional Equities Alternative, Man AHL TargetRisk, Man GLG European Mid-Cap Equity Alternative, Man Numeric Market Neutral Alternative, Man GLG Unconstrained Emerging Equity, Man GLG Global Emerging Markets Debt Total Return, Man GLG Innovation Equity Alternative, Man GLG Global Fundamental Equity, Man NewSmith UK Equity Alternative and Man Alternative Style Risk Premia and with 4 days' written notice for Man GLG Asian Equity Alternative and Man AHL Volatility Alternative. The Fund's Redeemable Participating Shares are classified as financial liabilities. The Fund is therefore potentially exposed to weekly redemptions by its shareholders. The exposure to liquidity risk through shareholder redemption requests is managed by specifically setting the redemption notice period to accommodate the expected liquidity of the underlying investment as agreed by the Investment Managers.

The Fund manages its obligation to repurchase the Shares when required to do so and its overall liquidity risk by:

- Allowing for redemptions only during the first Business Day of each calendar week.
- Requiring a 4 Business Day notice period before redemptions.

The Fund's policy is to satisfy redemption requests by any one of the following means or as may otherwise be provided in the Fund's Prospectus:

- Withdrawal of cash deposits.
- Disposal of assets

Subscriptions for Shares Classes may be subject to an up-front sales charge of up to 5% of the subscription amount, payable to the Manager.

Capital management

As a result of the ability to issue, repurchase and resell Redeemable Participating Shares, the capital of the Fund can vary depending on the demand for the redemptions and subscriptions to the Fund. The Fund is not subject to externally imposed capital requirements and has no restrictions on the issue, redemption of Redeemable Participating Shares, repurchase and resell of the shares other than those set out in the Fund' Prospectus.

The Fund's objectives for managing capital may include:

- investing the capital in investments meeting the description, risk exposure and expected return indicated in the Fund's Prospectus;
- achieving consistent returns while safeguarding capital by investing in diversified portfolios, by participating in derivative and
 other advanced capital markets and by using various investment strategies and hedging techniques; maintaining sufficient
 liquidity to meet the expenses of the Fund and to meet redemption requests as they arise; and
- maintaining sufficient size to make the operation of the Fund cost-efficient; and
- Maintaining sufficient liquidity to meet the expenses of the Fund and to meet redemption requests as they arise.

Refer to 'Risk Associated with Financial Instruments' (note 6 under Liquidity risk) for the policies and processes applied by the Fund in managing its capital and its obligation to repurchase the Redeemable Participating Shares.

13. Segregation of liabilities between portfolios

Upon the establishment of the Fund on 28 November 2007, the Fund availed of the provisions of the Investment Funds, Companies and Miscellaneous Provisions Act, 2005 to segregate liabilities between each portfolio. The Fund will not be liable as a whole to third parties for the liability of each Portfolio.

14. Securities owned and securities sold, not yet purchased

Possession of securities owned is maintained by major multinational broker-dealers as at 31 December 2017 and 31 December 2016. Securities sold, not yet purchased represent obligations of the Fund to purchase the securities at prevailing market prices. The future satisfaction of such obligations may be for an amount greater than the amount recorded.

Notes to the financial statements (continued) For the year ended 31 December 2017

15. Taxation

The Fund qualifies as an investment undertaking as defined in Section 739 B of the Taxes (Consolidation) Acts 1997. It is not chargeable to Irish tax on its income or capital gains. Tax may arise on the happening of a chargeable event.

A chargeable event includes any distribution payments to Shareholders or any encashment, redemption or transfer of Shares. No tax will arise on the Fund in respect of chargeable events regarding:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Fund; or
- (ii) certain exempted Irish resident investors who have provided the Fund with the necessary signed statutory declarations; or
- (iii) Shares held in a recognised clearing system as designated by the order of the Irish Revenue Commissioners.

Following legislative changes in the Finance Act 2006, the holding of Shares at the end of a relevant year will, in respect of Irish Resident investors, also constitute a chargeable event. To the extent that any tax issues arise on such a chargeable event, such tax will be allowed as a credit against any tax payable on the subsequent encashment, redemption, cancellation or transfer of the relevant Shares.

Relevant Year is defined as a period of 8 years beginning with the acquisition of a share by a shareholder and each subsequent period of 8 years beginning immediately after the preceding relevant year.

16. Soft commissions

The Investment Managers have entered into arrangements with the brokerage houses from which the Fund derives benefit. These commission sharing agreements are in conformity with the rules of the Investment Managers' UK regulator, the UK's Financial Conduct Authority.

17. Auditors' remuneration

For the year ended 31 December 2017, the Fund incurred audit fees as disclosed in the statement of comprehensive income; these amounts represent a provision. The actual audit fees are US\$176,450 (31 December 2016: US\$236,099).

During the year there were fees tax advisory services, other assurance services or other non-audit services provided by the auditors of the Fund were US\$145,753 (31 December 2016: US\$124,803).

18. Efficient portfolio management

The Fund may employ investment techniques and instruments for efficient portfolio management of the assets of any Portfolio including hedging against market movements, currency exchange or interest rate risks under the conditions and within the limits stipulated by the Central Bank under the UCITS Regulations and described below.

Techniques and instruments which are used for the purpose of efficient portfolio management, including FDIs which are not used for direct investment purposes, shall be understood as a reference to techniques and instruments which fulfil the following criteria:

- i. they are economically appropriate in that they are realised in a cost effective way;
- ii. they are entered into for one or more of the following specific aims:
 - (a) reduction of risk;
 - (b) reduction of cost;
 - (c) generation of additional capital or income for a Portfolio with an appropriate level of risk taking into account the risk profile of the Portfolio as described in the Prospectus, the risk diversification rules set out in UCITS Notice 9 and the general provisions of the UCITS Regulations
- iii. their risks are adequately captured by the risk management procedures implemented by the Fund, and
- iv. they cannot result in a change to a Portfolio's declared investment objective or add substantial supplementary risks in comparison to the general risk policy as described in its sales documents.

While the use of such techniques and instruments will be in line with the best interests of the Fund, individual techniques may result in increased counterparty risk and potential conflicts of interest. Details of the proposed efficient portfolio management techniques and policies adopted by the Fund in relation to their use by the Portfolios and details of the relevant risks are set out in the Prospectus. As at 31 December 2017 there were no investment techniques or instruments being used for efficient portfolio management purposes.

Notes to the financial statements (continued) For the year ended 31 December 2017

19. Transaction costs

For the year ended 31 December 2017 and 31 December 2016, the Fund incurred transaction costs, disclosed in the statement of comprehensive income as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss, as follows:

| | 31 December 2017 | 31 December 2016 |

25. Reclassification of prior year comparative figures

Certain prior year comparatives have been reclassified to conform to the current year presentation.

26. Approval of financial statements

The Directors approved these financial statements on 23 April 2018.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF MAN FUNDS VI PLC

Opinion

We have audited the financial statements of Man Funds VI plc ('the Company') for the year ended 31 December 2017, which comprise the Statement of financial position, Statement of changes in net assets, Statement of comprehensive income, Statement of cash flows and notes to the financial statements, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2017 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2015.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate: or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF MAN FUNDS VI PLC

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report has been prepared in accordance with the Companies Act 2014

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF MAN FUNDS VI PLC

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the directors' responsibilities statement set on page 23, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf .

This description forms part of our auditor's report.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

| Total financial liabilities at fair value through profit or loss - trading | | | | | (2.24) |
| Other net assets | | | | | 37.15 |
| Net Assets Attributable to Holders of Redeemable Participating Shares | | | | | 100.00 |

^{*} The forward currency contracts are held with The Bank of New York Mellon

Classifications:

(a) Exchange traded derivative instruments

(b) OTC financial derivative instruments

All other investments held at the year end are transferable securities listed on an official stock exchange

| | % of Total |
|--|------------|
| Analysis of Total Assets | Assets |
| Transferable securities listed on an official stock exchange | 0.94 |
| Transferable securities as described in # above | 56.81 |
| OTC financial derivative instruments described in classification (b) above | 3.71 |
| Other current assets | 38.54 |
| | 100.00 |

Analysis of Total Assets rather than Net Assets is required under UCITS Notice 8.2 appendix B.

[#]Transferable securities other than those listed on an official stock exchange or dealt on another regulated market

Financial assets at fair value through profit or loss

Supplementary information (unaudited) For the year ended 31 December 2017

Report of Directors' Remuneration (Unaudited)

The directors of the Fund who are also employees of Man Group plc and companies within its group structure ("Man Group") do not receive any remuneration in respect of their services as directors of the Fund. The other directors receive fixed remuneration in respect of their services which is set at a level determined by the Board as a whole and which is not performance related. This is detailed in note 9 of these financial statements. None of the directors are currently in receipt of variable remuneration in respect of their services as directors of the Fund and none of the directors are currently in receipt of a pension from the Fund. The Fund has appointed Man Asset Management (Ireland) Limited as its UCITS management company. As such, the provisions of Article 14b of Directive 2009/65/EC in relation to remuneration are not applicable to the Fund. However, they do apply to Man Asset Management (Ireland) Limited, which has adopted a remuneration policy to ensure compliance.

Unaudited reporting requirement in respect of the Securities Financing Transactions Regulation For the year ended 31 December 2017

The Investment Manager may, on behalf of each sub-fund and subject to the conditions and within the limits laid down by the Financial Conduct Authority and the Prospectus, employ techniques and instruments relating to transferable securities, including investments in OTC Financial Derivative Instruments ("FDI") provided that such techniques and instruments are used for efficient portfolio management purposes or to provide protection against exchange risk or for direct investment purposes, where applicable.

The sub-funds engaged in securities lending activity during the year for the purposes of efficient portfolio management, and invested in total return swaps, repos or reverse repos.

Securities Lending

All securities lending transactions entered into by the sub-funds are subject to a written legal agreement between the sub- funds and the Lending Agent, which is the Bank of New York Mellon, London Branch, and separately between the Lending Agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is delivered to an account in the name of the Depositary on behalf of the sub-fund. Collateral received is segregated from the assets belonging to the sub-fund's Depositary or the Lending Agent.

The total income earned from securities lending transactions is split between the relevant sub-fund and the securities lending agent. The sub-fund receives at least 80% while the securities lending agent receives up to 20% of such income with all operational costs borne out of the securities lending agent's share. Income received during the year by each sub-fund from securities lending transactions is disclosed in other income in the statement of comprehensive income included as part of the financial statements.

The following table details the value of securities on loan, the maturity tenor of which is always open, as they are recallable or terminable on a daily basis. Additionally there is an analysis of the maturity tenor of the associated collateral received as at 31 December 2017 based on the respective transaction contractual maturity date, split between counterparty borrower, with the country of incorporation of the counterparty shown in brackets:

| JP Morgan Securities, Plc. | 1,507,908 | 0.96% |
| UBS AG | 1,514,561 | 0.96% |

As at the balance sheet date, all of the cash collateral received in respect of securities lending transactions, was re-invested in repos managed by various counterparties as at the balance sheet date:

| | Market Value on loan | % of Net Assets |
|---|----------------------|-----------------|
| Man GLG European Equity Alternative | €22,772,727 | 3.36% |
| Man GLG Global Equity Alternative | €85,244 | 0.79% |
| Man GLG European Mid-Cap Equity Alternative | €4,460 | 0.00% |
| Man GLG Unconstrained Emerging Equity | US\$3,049,653 | 2.85% |
| Man GLG Innovation Equity Alternative | US\$3,532,147 | 2.24% |

Non-cash collateral received by way of title transfer collateral arrangement in relation to securities lending transactions and OTC derivative transactions, cannot be sold, re-invested or pledged.

Income earned by the sub-funds from the reinvestment of cash collateral in repos, net of any interest payable to the relevant counterparty, for the year ended 31 December 2017 and is presented within other income in the statement of comprehensive income:

| Man GLG European Alpha Alternative | €2,280 |
|---|----------|
| Man GLG European Equity Alternative € | 222,528 |
| Man GLG Global Equity Alternative | €68,297 |
| Man GLG Cred-Eq Alternative | €674 |
| Man GLG European Mid-Cap Equity Alternative | €24,249 |
| Man GLG Unconstrained Emerging Equity US | \$10,857 |
| Man GLG Innovation Equity Alternative US | \$17,187 |

All of the non-cash collateral received by the sub-funds was held by BNY Mellon, London Branch on a tri party settlement basis as at 31

100% of cash collateral is maintained in a segregated account with the custodian. 100% of non-cash collateral is maintained in pooled accounts

Portfolio Swaps

OTC derivative transactions are entered into by the sub-funds under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the sub-funds and a counterparty that governs OTC derivative transactions (including total return swaps and portfolio swaps) entered into by the parties. All OTC derivative transactions entered under an ISDA Master agreement are netted together for collateral purposes therefore any collateral disclosures provided below/elsewhere in the report are in respect of all OTC derivative transactions entered into by the sub-funds under the ISDA Master agreement, not just portfolio swaps.

The collateral figures provided on the next page relate to collateral held to support specific SFTRs, other cash held at brokers to support SFTRs, and other derivative transactions held at brokers where SFTRs are transacted.

Unaudited reporting requirement in respect of the Securities Financing Transactions Regulation (continued) For the year ended 31 December 2017

Portfolio Swaps (continued)

The following table details the value of portfolio swaps as a proportion of the sub-fund's net asset value, as at 31 December 2017:

| Portfolio swaps |
|-----------------|
| % of net assets |
| 1.49% |
| 2.23% |
| (0.85%) |
| (0.55%) |
| 1.28% |
| 0.46% |
| (1.11%) |
| (8.84%) |
| 1.64% |
| (1.30%) |
| 0.95% |
| 0.96% |
| |

All returns and costs from securities borrowing from OTC transactions were accrued to the sub-funds and were not subject to any returns sharing arrangements with the Fund's Investment Manager or any other third parties.

The following table details the value of portfolio swaps, analysed by counterparty as at 31 December 2017:
