PETERCAM L FUND

General information

PETERCAM L FUND (the "SICAV") was incorporated on 23 December 1987 as an Investment Company with Variable Capital (SICAV) with multiple Sub-Funds, governed by Luxembourg Law for an unlimited period. At the date of the report, the SICAV is subject to the law of 10 August 1915 and its amended laws related to commercial companies, to the Part I of the law of 17 December 2010 ("the Law of 2010") related to Undertakings for Collective Investment and to the Council Directive 2009/65/EC as amended.

The Articles of Incorporation of the SICAV were published in the "Mémorial, Recueil des Sociétés et Associations" on 17 February 1988, and the Articles of Incorporation, amended for the last time by the Extraordinary General Meeting of Shareholders of 30 January 2015 were published in the "Mémorial, Recueil des Sociétés et Associations" on 5 November 2012 and deposited with the "Registre de Commerce et des Sociétés de Luxembourg", from which copies can be obtained.

The SICAV has appointed PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A. as management company to perform globally all the collective portfolio management functions referred to in Appendix II to the Law of 2010, namely the management of the portfolio and the administration and sale of the shares in the SICAV. PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A. is an approved management company in the meaning of Chapter 15 of the Law of 2010.

At the date of the present report, the following Sub-Funds are active:

- PETERCAM L LIQUIDITY EUR&FRN	in EUR
- PETERCAM L BONDS EUR QUALITY	in EUR
- PETERCAM L BONDS UNIVERSALIS	in EUR
- PETERCAM L BONDS HIGHER YIELD	in EUR
- PETERCAM L BONDS GOVERNMENT SUSTAINABLE	in EUR
- PETERCAM L EQUITIES OPPORTUNITY	in EUR

- PETERCAM L BONDS EUR GOVERNMENT 1-5	in EUR
- PETERCAM L PATRIMONIAL DYNAMIC FUND	in EUR

The following classes of shares may be issued, at the Shareholders' choice:

- **Class A Shares:** distribution shares which, in principle, entitle their holder to receive a cash dividend, as described in the current prospectus.
- **Class B Shares:** capitalisation shares which, in principle, do not entitle their holder to receive a dividend, but the amount attributable to the holder from the amount to be distributed is capitalised in the Sub-Fund to which these capitalisation shares belong.
- **Class B CHF Shares:** capitalisation shares that differ from class B shares in that they are denominated in Swiss francs.
- **Class B EUR HEDGED Shares:** capitalisation shares that differ from class B shares in that the non-Euro currency risk is limited by an active policy of hedging the exchange rate risk against the Euro. The overall proportion of currencies other than the Euro in the sub-fund's net assets will be hedged pro rata to the net assets of the B EUR HEDGED share class. The exposure in Euro of the shares of the B EUR HEDGED class must reach a minimum level of 90% of the net assets of said share class. **Investors should be aware that implementation of an active exchange rate risk hedging policy is likely to entail extra charges.**
- **Class B USD Shares:** capitalisation shares that differ from class B shares in that they are denominated in US dollars.
- **Class E Shares:** shares with the same characteristics as class A shares, reserved for institutional investors within the meaning of Article 174 paragraph (2), section c) of the law of 17 December 2010.

PETERCAM L FUND

General information (continued)

- **Class F Shares:** shares with the same characteristics as class B shares, reserved for institutional investors within the meaning of Article 174 paragraph (2), section c) of the law of 17 December 2010.
- **Class F CHF Shares:** capitalisation shares that differ from class B shares in that they are denominated in Swiss francs, reserved for institutional investors within the meaning of Article 174 paragraph (2), section c) of the law of 17 December 2010.
- **Class F USD Shares:** capitalisation shares that differ from class B shares in that they are denominated in US dollars, reserved for institutional investors within the meaning of Article 174 paragraph (2), section c) of the law of 17 December 2010.
- **Class K Shares:** distribution shares that are different from class A shares on account of their sales commission and different management fee.
- **Class L Shares:** capitalisation shares that are different from class B shares on account of their sales commission and different management fee.
- **Class P Shares:** capitalisation shares which differ from class B shares because they have a different management and distribution fee structure, as specified in each Fact Sheet for each sub-funds included in the prospectus of the SICAV and restricted to certain mutual funds or mandates institutional or professional whose portfolio are managed by PETERCAM INSTITUTIONAL ASSET MANAGEMENT S.A. or PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A..
- **Class V Shares:** distribution shares that are different from class A shares in that they are characterised by the countries in which the Shares are offered, namely the Netherlands, the United Kingdom and Switzerland and they have a different management fee.
- **Class W Shares:** capitalisation shares that are different from class B shares in that they are characterised by the countries in which the Shares are offered, namely the Netherlands, the United Kingdom and Switzerland and they have a different management fee.
- **Class W EUR HEDGED Shares:** capitalisation shares that differ from class W shares in that the non-Euro currency risk is limited by an active policy of hedging the exchange rate risk against the Euro. The overall proportion of currencies other than the Euro in the sub-fund's net assets will be hedged pro rata to the net assets of the W EUR HEDGED share class. The exposure in Euro of the shares of the W EUR HEDGED class must reach a minimum level of 90% of the net assets of said share class. Investors should be aware that implementation of an active exchange rate risk hedging policy is likely to entail extra charges.
- **Class W USD Shares:** capitalisation shares that differ from class B shares in that they are denominated in US dollars and they are characterised by the countries in which the shares are offered, i.e. the Netherlands, the United Kingdom and Switzerland and that they have a different management fee.
- **Class Z Shares:** capitalisation shares that differ from class B shares in that they are reserved for institutional investors within the meaning of Article 174 paragraph (2) of the law of 2010 subscribing for an initial minimal amount of €10,000,000 EUR and by a different management fee, it being understood that shareholders investing in this class cannot apply for their shares to be redeemed in such a way as to reduce their investment to a level below that of the minimum initial subscription amount.

The available classes of shares for each Sub-Fund are indicated in the corresponding Fact Sheet of the Sub-Fund included in the prospectus of the SICAV.

The Net Asset Value of each Sub-Fund is calculated each bank business day in Luxembourg ("Valuation Day").

The Net Asset Value, issue price and redemption price (of each Sub-Fund) are available each business day at the registered office of the SICAV, and in Switzerland, each business day in Geneva at the Representative PETERCAM PRIVATE BANK (SWITZERLAND) S.A., Geneva (for the relevant Sub-Funds).

PETERCAM L FUND

General information (continued)

The SICAV publishes, at the end of each year, an annual report audited by the Auditor and, at the end of each half year, an unaudited semi-annual report. These financial reports contain separate financial statements for each Sub-Fund. The consolidation currency is the Euro.

The financial reports can be obtained, free of charge:

- at the SICAV's registered office,
- at the ticket desk of PETERCAM S.A., PETERCAM INSTITUTIONAL ASSET MANAGEMENT S.A/N.V. and PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A.,
- at the Representative and Payment Domicile in Switzerland PETERCAM PRIVATE BANK (SWITZERLAND) S.A., Geneva,
- at the Representative and Payment Domicile in Belgium PETERCAM S.A., Brussels,
- at the Representative and Payment Domicile in Netherlands PETERCAM S.A., Brussels,
- at the Representative and Payment Domicile in Spain ALL FUNDS BANK S.A., Madrid,
- at the Centralisation Representative in France CACEIS BANK, Paris,
- and at the Representative and Payment Domicile in Germany MARCARD, STEIN & CO AG, Hamburg.

PETERCAM L FUND

General information (continued)

Until 30 April 2015, the following fiscal status are applied in relation to the taxation of interest income in accordance with the EU Savings Directive 2003/48/EC:

Report on activities of the Board of Directors

Macro-economy

Economic context

In the first half of the year, several factors, including a very weak first-quarter (Q1) growth figure in the US, the difficult negotiations between Greece and its creditors and more alarming sounds from China, spurred doubts about the strength of the world economy. Though the risks are real, we have good reasons to believe that the global recovery will not end abruptly but will instead continue on the back of very loose monetary policy, lesser budgetary tightening and lower energy prices. This is also consistent with the picture portrayed by current global confidence indicators. The combination of economic recovery and accommodative monetary policy should continue to support financial markets. That said, with the Federal Reserve (Fed) gradually but surely getting closer to its first interest rate hike, additional volatility cannot be excluded.

United States

The complete growth stall in the first quarter of this year is not representative of the actual state of the economy. Even though most confidence indicators have softened a bit and momentum slowed down from the spectacular growth rates seen in the spring and summer of 2014 (around 5% annualized), almost all indicators paint a picture of a continuing recovery. Indeed, there are convincing reasons to believe that economic activity earlier this year was largely held down by transitory factors. The unseasonably cold winter, the scaling back of investment in the shale oil industry following the fall in the oil price, the port strikes on the West Coast and the stronger USD have all weighed on economic activity. While the negative effect of the first three factors has largely disappeared, it's very unlikely that the recent USD appreciation will derail the fairly closed US economy. All in all, in contrast to the complete absence of growth in the first three months of the year, most recent confidence indicators are consistent with growth between 2 and 2.5%, not too far from most estimates of long-term potential growth in the US.

Headline inflation, currently at 0%, will increase significantly in the coming months as the drop in energy prices seen earlier will start to have less of a negative impact. But given the recent volatility in energy prices, it's actually more useful to look at underlying measures of inflation. At 1.7% and 1.2% for core inflation and core PCE (personal consumption expenditures) respectively, underlying inflation remains below the Fed's 2% target over the medium term. In fact, over the last five years, the Fed has failed to deliver on this front. Looking forward, however, underlying inflation is set to pick up from current levels. Importantly, leading indicators suggest that wage growth will accelerate further. Without any acceleration in productivity growth at the same time (an assumption that still has to be tested), this will translate into higher inflation. In the context of a continuing recovery and upward inflation pressures, the Fed is still on course to start hiking interest rates before the end of the year. As things currently stand, an increasingly tighter monetary policy can be expected in the years to come. That said, the Fed is likely to proceed gradually and only if the underlying economic momentum remains strong enough.

Europe

In the Eurozone, leading indicators show economic momentum is improving. Earlier stimulus measures by the European Central Bank (ECB) resulting in lower interest rates and EUR depreciation have reduced the need for budgetary tightening efforts. Coupled with lower oil prices, this is driving the cyclical recovery. This is encouraging following years of stagnation. That said, the economic recovery is still nothing to cheer about and could easily be derailed if the negotiations between Greece and its creditors fail. A last minute compromise on the final payment of the second bailout plan still seems the most likely scenario. But even in this case, given the scheduled debt repayments and the fact that the Greek government cannot tap financial markets, a follow-up solution is needed.

Headline inflation in the Eurozone will increase significantly in the second half of the year as the base effects linked to the decline in energy prices will fade. Underlying inflation, although set to pick up from the current 0.9%, is likely to stay low by historical standards. The ECB has been completely missing its 2% inflation target over the last couple of years and it remains unlikely that the ECB will achieve it anytime soon.

Report on activities of the Board of Directors (continued)

Japan

In Japan, most leading indicators point towards a small improvement in economic sentiment. That is reassuring following the decrease in confidence witnessed since the beginning of 2014 due to the increase of the Value-Added Tax (VAT). Leading indicators suggest industrial production growth will likely move back into positive territory. That said, economic momentum is still modest at best. Moreover, the 2.4% annualized growth rate seen in the first three months of the year benefited from a built-up in inventories. Growth figures in the next couple of quarters are likely to make clear that growth is still fairly weak.

In Japan, inflation has come down quite significantly as the base effect from the April 2014 VAT hike no longer impacts the numbers. However, households' expectations about future inflation remain clearly positive and survey indicators suggest that wage growth will accelerate somewhat in the next couple of quarters. Despite all this, we remain far from convinced that the Bank of Japan will structurally achieve its 2% inflation target. Therefore, the most likely scenario is that monetary policymakers will scale up the pace of their current asset purchase program.

Emerging Markets

Economic activity in emerging markets (EM) remains subdued. EM are clearly on a slower growth path since their spectacular recovery from the 2008-2009 Great Financial Crisis. The disparity between various markets remains significant with confidence in net commodity exporters significantly below levels seen in net commodity-importing countries. In China, economic growth will continue to slow from current levels in the next couple of years as the gradual transition from investment and export-led growth to a consumption economy takes place. As things currently stand, the risk of an imminent hard landing is substantially reduced since China still has ample monetary and budgetary room to maneuver.

The downward pressure on inflation stemming from lower commodity prices looks set to ease over the coming months. This means that overall inflation in EM will accelerate somewhat in the months ahead so that most of the monetary policy easing seen in EM over the past year is probably behind us. But with core inflation staying modest in most parts of the emerging world, there is good reason to believe that monetary policy will stay relatively loose for the foreseeable future.

Monetary policy

Globally speaking, monetary policy has been unprecedentedly accommodative in the past five years. This situation looks set to continue in the near future although some central banks are about to leave the zero-interest-rate policy behind.

The Fed is firmly on course to hike interest rates before the end of the year. As things currently stand, an increasingly tighter monetary policy can be expected in the following years. The Fed is likely to proceed gradually and only if the underlying economic momentum remains strong enough. The Bank of England is also taking the direction of a first rate hike.

The ECB has just started its quantitative easing (QE) program, which is scheduled to last until September 2016. Moreover, it would not be surprising if monetary policymakers in Japan scaled up their efforts later this year in order to reach the 2% inflation target. In China, policymakers have already responded to the deteriorating economic momentum by cutting interest rates and bringing down the required reserve ratios for commercial banks. More easing can still be expected but a massive stimulus program is not in the cards given the huge financial imbalances built up since 2008.

Report on activities of the Board of Directors (continued)

Foreign exchange markets

The diverging outlook for monetary policy in the US and the Eurozone, with the Fed heading towards a first rate hike, while the ECB has just started its QE program, has been a key driver of the significant strengthening of the USD versus the EUR in recent months. On long-term fundamental valuation measures, the USD is now starting to look expensive. Therefore, a strong USD appreciation from the current levels should not be a given. That said, the risks surrounding Greece and the possibility of an extra round of ECB QE create downward risks for the EUR.

Given the broader EUR weakness observed since the beginning of this year, most EM currencies have appreciated against the EUR. Several EM, especially those with large funding needs, could experience renewed downward pressure on their currencies once the Fed moves with its first rate hike. However, given the depreciation already seen since the spring of 2013, the risk of another sharp hit now looks significantly smaller.

Bond markets

Since the start of the year, interest rates on 10-year government bonds in both Germany and the US increased by around 30 basis points but are still at historically low levels. In the Eurozone, interest rates fell sharply in the first few months of the year on the back of the decline in headline inflation and the ECB's QE. Since late April, 10-year interest rates on German government bonds shot up significantly from close to zero towards around 0.9%. Despite an intensification of the Greek crisis, the difference between interest rates on government bonds in the periphery and Germany widened only modestly. Interest rates in the US, meanwhile, are on a rising path since the end of April. Other bond markets (investment grade credit and high-yield) broadly followed the same pattern.

Equity markets

Globally speaking, equity markets performed relatively well during the first half of 2015. Equities in Europe and Japan did particularly well. Equity market performances in EM were mixed. Chinese equities shot up further following an already spectacular 2014.

Notes to the financial statements

Notes to the financial statements as at 30 June 2015

Note 1 - Principal accounting methods

a) Presentation of financial statements

The financial statements of the SICAV are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment.

b) Valuation of assets

- 1) The value of cash in hand or on deposit, notes payable on demand, accounts receivable, dividends and interest declared and payable but not yet received, is determined using the nominal value of these assets, unless it is deemed impossible that such value can be realised. In this case the value will be determined by deducting a sum that the SICAV will consider to reflect the real value of such assets.
- 2) The value of all transferable securities which are listed or traded on a stock exchange is determined on the basis of the latest available price on the respective Valuation Day.
- 3) The value of all transferable securities which are traded on other regulated markets which operate on a regular basis and are recognised and open to the public, is based on the latest available close price on the respective Valuation Day.
- 4) The evaluation of the money market instrument is done generally for debt instruments with a residual maturity at the time of acquisition, less than 12 months, on the basis of amortised cost. These instruments are presented at acquisition and the difference between the acquisition cost and the cost of the maturity redemption cost is recorded in interest.
- 5) The value of units in Undertakings for Collective Investment is established on the basis of the last official available Net Asset Value of these units, or on the basis of the last estimate of the Net Asset Value if this is more recent than the official Net Asset Value; however, the SICAV must have sufficient guarantee that the method used for this valuation is consistent with that used to establish the official Net Asset Value.
- 6) If the securities in the portfolio on the Valuation Day are not listed on a stock market or traded on another regulated market, which operates on a regular basis, is recognised and open to the public, or, for the securities listed on the stock market or traded on another such market, the price determined following the points above is not representative of the real value of these securities, the SICAV estimates the value prudently and in good faith.

c) Acquisition cost of securities in the portfolio

The acquisition cost of the securities held by each Sub-Fund that are denominated in a currency other than the reference currency of the Sub-Fund is converted into this currency at the exchange rate prevailing on the date of purchase.

d) Net realised gain/(loss) on sales of securities

The net realised gain/(loss) on sales of securities is calculated on the basis of the average cost of securities sold.

e) Investment income

Interest accrued and not yet paid is recorded and accounted on a prorata temporis basis, net of any irrecoverable withholding tax.

Dividend income is recognised on an ex-dividend basis and is recorded net of withholding taxes.

f) Valuation of forward foreign exchange contracts

When calculating the Net Asset Value, the price of each forward foreign exchange contract is compared to the forward foreign exchange rate for the residual term on the closing date in order to determine the unrealised gain or loss. The gains or losses resulting from outstanding forward foreign exchange contracts are determined on the closing date on the basis of the exchange rate for the remaining term of the contract applicable at this date, and are recorded in the statement of net assets and the statement of operations and other changes in net assets.

Notes to the financial statements as at 30 June 2015 (continued)

g) Valuation of futures contracts

Futures contracts are posted off-balance sheet and valued at the last settlement or close price on the stock exchanges or regulated markets. Realised and unrealised gains/(losses) are recorded in the statement of net assets and in the statement of operations and other changes in net assets.

h) Valuation of option contracts

Premiums paid on the purchases of options are recorded at the time of the transaction under the caption "Cash at banks and liquidities" in the statement of net assets and are presented as cost value in the statement of investments and other net assets. Premiums received on the sales of options are recorded under the caption "Cash at banks and liquidities" in the statement of net assets and are presented as cost value received in the statement of investments and other net assets. Option contracts outstanding at the closing date are valued at the last settlement or close price on the stock exchanges or regulated markets. Realised and unrealised gains and losses are recorded in the statement of operations and other changes in net assets.

i) Valuation of Credit Default Swap

A Credit Default Swap ("CDS") is a credit derivative bilateral agreement in which one counterparty (the protection buyer) pays a periodic fee to the other party (the protection seller) for the specified life of the contract in return for a contingent payment by the protection seller upon occurrence of a credit event on any referenced issuers. If such an event occurs, the protection seller will then make payment to the buyer and the swap will terminate. In certain cases, the protection seller may take possession of the underlying securities.

CDS are marked to model daily based upon spread of the market makers and the change in value, if any, is recorded as "Movement in net unrealised appreciation or depreciation on swaps" in the statement of operations and other changes in net assets. Any payment received or paid to initiate a contract is recorded as a liability or asset in the statement of net assets. When the swap contract is terminated early, the SICAV records a realised gain or loss for any payments received or paid.

j) Formation expenses

The formation expenses are amortised on a straight line basis over a maximum period of 5 years.

If the launch of a Sub-Fund occurs after the launch date of the SICAV, the formation expenses in relation to the launch of the new Sub-Fund are charged to such Sub-Fund alone and may be amortised over a maximum of 5 years with effect from the Sub-Fund's launch date.

PETERCAM L FUND

Notes to the financial statements as at 30 June 2015 (continued)

k) Conversion of foreign currencies

The accounts of the SICAV are held in Euro. Within the various Sub-Funds, the cash at banks, other net assets and the market value of securities in portfolio expressed in currencies other than the currency of the Sub-Fund are converted into this currency at the exchange rates prevailing on the date of the report. Income and expenses expressed in currencies other than the currency of the Sub-Fund are converted into this currency at the exchange rate prevailing on the date of the transaction. Exchange gains or losses are recorded in the statement of operations and other changes in net assets.

l) Consolidation

The consolidated financial statements of the SICAV are expressed in EUR and are equal to the sum of the corresponding items in the financial statements of each Sub-Fund. As at 30 June 2015, the cross investments amounted to EUR 3,506,242.84, only the Sub-Fund PETERCAM L GLOBAL TARGET INCOME is concerned. The consolidated net assets without such cross investments amount to EUR 2,517,590,134.32.

m) Transaction fees

Transaction costs disclosed under the caption "Transaction fees" in the expenses of the statement of operations and other changes in net assets are mainly composed of fees incurred by the SICAV relating to purchase and sale transactions of securities and to transactions on financial derivative instruments.

PETERCAM L FUND

Notes to the financial statements as at 30 June 2015 (continued)

Note 2 - Management, performance and distribution fees

PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A. has been appointed as Manager by the Board of Directors of the SICAV.

⁽²⁾ since 22 February 2015

PETERCAM L FUND

Notes to the financial statements as at 30 June 2015 (continued)

For the class P shares, the rate is equal to 0% for all the Sub-Funds of the SICAV.

These fees are calculated for each Sub-Fund on the average net assets of the Sub-Funds of the SICAV during the month in question.

PERFORMANCE FEE:

For the Sub-Fund PETERCAM L EQUITIES OPPORTUNITY, the Manager receives a performance fee, in addition to the management and distribution fee, amounting to 5% of the increase in the net asset of the Sub-Fund on a monthly basis.

The performance fee is calculated on the positive difference between the last calculated Net Asset Value and the highest Net Asset Value of all previous Net Asset Value figures multiplied by the number of shares in circulation on the day of the last Net Asset Value. No performance fee shall be due for as long as the last calculated Net Asset Value is lower than the highest Net Asset Value of all previous Net Asset Value figures.

For the Sub-Fund PETERCAM L PATRIMONIAL FUND, the Manager is entitled, where applicable, to a performance fee calculated as follows:

1. For each Net Asset Value where the Sub-Fund's performance exceeds the benchmark index (Euribor 3M - Bloomberg code EUR003M) (the "Hurdle Rate"), a fee of a maximum of 10% of the outperformance realised is due under the conditions stated in the third paragraph hereafter.
2. The performance of the Sub-Fund is equal to the positive difference between the latest Net Asset Value calculated and the highest Net Asset Value (plus the latest performance fee, and, where applicable, adjusted for any distribution) from among all the previous Net Asset Values.
3. The outperformance fee is only due in the hypothetical case where (1) the increase in the Net Asset Value exceeds that of the Hurdle Rate and (2) the Net Asset Value calculated per share is greater than the highest Net Asset Value of all previous Net Asset Value figures (High Watermark principle); in this case, the outperformance fee is applied to the difference between the latest Net Asset Value calculated per share and the highest value either of the highest Net Asset Value of all previous Net Asset Value figures, or the Hurdle Rate, multiplied by the number of shares in circulation on the day of the latest Net Asset Value.

The performance fee calculated during each calculation of the Net Asset Value is due to the Manager and payable in the month following the end of each month.

For the Sub-Fund PETERCAM L PATRIMONIAL DYNAMIC FUND, the Manager is entitled, where applicable, to a performance fee calculated as follows:

1. For each Net Asset Value where the Sub-Fund's performance exceeds the benchmark index (Euribor 3M - Bloomberg code EUR003M) plus 1.5% (the "Hurdle Rate"), a fee of a maximum of 10% of the outperformance realised is due under the conditions stated in the third paragraph hereafter.
2. The performance of the Sub-Fund is equal to the positive difference between the latest Net Asset Value calculated and the highest Net Asset Value (plus the latest performance fee, and, where applicable, adjusted for any distribution) from among all the previous Net Asset Values.
3. The performance fee is due only if the performance of the Sub-Fund per share, as defined above, is positive and exceeds the Hurdle Rate, adjusted, if and as necessary, for any distribution. In this case, in order to determine the performance fee, the performance fee rate is applied to the difference between (i) the latest Net Asset Value per share calculated and (ii) the higher of (ii.a) the highest Net Asset Value (plus the latest performance fee, and, where applicable, adjusted for any distribution) of all previous Net Asset Values or (ii.b) the Hurdle Rate (adjusted, if and as necessary, for any distribution), multiplied by the number of shares in circulation at the date of the latest Net Asset Value.

The performance fee calculated during each calculation of the Net Asset Value is due to the Manager and payable in the month following the end of each month.

Notes to the financial statements as at 30 June 2015 (continued)

Note 3 - Subscription tax

The SICAV is governed by Luxembourg law.

Pursuant to the legislation and regulations in force, the SICAV is subject to an annual subscription tax ("taxe d'abonnement") of 0.05% which is payable quarterly and calculated on the basis of the net assets of each Sub-Fund on the last day of each quarter.

However, for the relevant Sub-Funds, a reduced rate of 0.01% is applied to classes of shares reserved for institutional investors.

Pursuant to Article 175(a) of the law of 17 December 2010, the net assets invested in Undertakings for Collective Investment already subject to the "taxe d'abonnement" are exempt from this tax.

Note 4 - Belgian annual tax

Articles 161 to 162 of the Belgian inheritance tax code, as amended by the Belgian Law of 22 December 2003, impose the payment on Undertakings for Collective Investment formally authorised to market their services in Belgium of an annual tax of 0.08% on the total net amount subscribed in Belgium as at 31 December of the preceding year, starting at the date of their registration with the "Autorité des Services et Marchés Financiers" ("FSMA"). The aforementioned amended Articles 161 to 162 came into force on 1 January 2004.

The SICAV is required to pay this tax on 31 March of each year.

On 13 May 2004, the SICAV made a complaint against the Belgian state to European Commission to ask for the cancellation of the obligation to pay the annual fee and the refund of taxes already paid. On 16 December 2010, the SICAV made an updated complaint to the European Commission. The legal costs of this complaint are borne by the SICAV.

On 9 February 2006, the SICAV has summoned the Belgian state for the restitution fee in front of the Court of First Instance in Brussels.

The SICAV continued to instruct the Belgian state in order to obtain the refund of this tax paid for the following exercises, without favourable continuation. From then on, it prepares cases quotations in front of the court for these exercises.

In two similar cases, the Court of First Instance in Brussels ruled at the end of 2011 and during 2012 that this tax infringes an article of the Double Tax Avoidance Agreement between Belgium and Luxembourg and infers from this that it may not be imposed. The Belgian government has appealed against these rulings. In accordance with the judgement delivered by the Brussels Court of Appeal on 23 October 2014, the Court of Appeal shall stay proceedings and submit various preliminary matters to the European Court of Justice.

The Law of 17 June 2013 relating to fiscal and financial provisions, and provisions relating to sustainable development (Belgian Moniteur 28 June 2013) changed the rate of the annual tax on undertakings for collective investment, established by Article 161a of the Inheritance Tax Code, to 0.0965% with effect from 1 January 2013 and 0.0925% with effect from 1 January 2014.

Note 5 - Risk management

As required by Circular CSSF 11/512, the Board of Directors needs to determine the global risk exposure of the SICAV either by applying the commitment approach or the VaR approach. In terms of risk management, the Board of Directors of the SICAV decided to adopt the commitment approach as a method of determining the global risk exposure.

PETERCAM L FUND

Notes to the financial statements as at 30 June 2015 (continued)

Note 6 - Changes in investment portfolio

The statement of changes in the investment portfolio during the period referring to the report is made available, free of charge:

- at the registered office of the SICAV,
- at the ticket desk of PETERCAM S.A., PETERCAM INSTITUTIONAL ASSET MANAGEMENT S.A/N.V. and PETERCAM INSTITUTIONAL ASSET MANAGEMENT (LUXEMBOURG) S.A.,

PETERCAM L PATRIMONIAL DYNAMIC FUND	Société Générale	EUR	-	361,708.53
				- 23,494,446.02

Note 13 - "Swing Pricing"

The Board of Directors has decided, with effect from 30 March 2009, to apply the Swing Pricing technique to some Sub-Funds.

Swing Pricing allows the SICAV's different Sub-Funds to regulate the costs of the transactions resulting from subscriptions and redemptions of investors. Thanks to Swing Pricing, existing investors will in principle no longer need to bear the transaction costs indirectly as these will now be directly incorporated into the calculation of the Net Asset Value and paid by the subscribing and redeeming investors.

Adjusting of the Net Asset Value is only done when a pre-determined threshold value has been reached. The Board of Directors of the SICAV determines a threshold value to act as a trigger for net subscriptions and redemptions. The threshold value is determined per Sub-Fund and is expressed as a percentage of the total net assets of the relevant Sub-Fund.

Swing Pricing involves adjusting the Net Asset Value by the net transaction costs, for each Net Asset Value for which the threshold is exceeded.

The direction of the Swing depends on the net capital inflows and outflows applicable to a Net Asset Value. If there are net capital inflows, the Swing Factor linked to the subscription of shares in the Sub-Fund is added to the Net Asset Value, and in case of net redemptions, the Swing Factor linked to the redemption of shares in the relevant Sub-Fund is deducted from the Net Asset Value. In both cases, one and the same Net Asset Value is applied to all subscribing and redeeming investors on a given date.

The Swing Factors used to adjust the Net Asset Value are calculated on the basis of external brokerage fees, taxes and duties as well as estimates of the differences between the bid price and the ask price of transactions that the Sub-Fund carries out following subscriptions and redemptions of shares.

PETERCAM L FUND

Notes to the financial statements as at 30 June 2015 (continued)

The value of the Swing Factor will be determined by the Board of Directors of the SICAV and can fluctuate from one Sub-Fund to another, without however exceeding 3% of the non-adjusted Net Asset Value.

The Sub-Funds affected as well as the trigger thresholds and effective Swing Factors, are listed in the table below:

Sub-Funds	Threshold (% of net assets)	Swing Factor	
		Net subscriptions (in %)	Net redemptions (in %)
PETERCAM L LIQUIDITY EUR&FRN	0.00	0.00	0.00
PETERCAM L BONDS EUR QUALITY	0.00	0.00	0.00
PETERCAM L BONDS UNIVERSALIS	0.00	0.00	0.00
PETERCAM L BONDS HIGHER YIELD	0.00	0.00	0.00
PETERCAM L BONDS GOVERNMENT SUSTAINABLE	0.00	0.00	0.00
PETERCAM L EQUITIES OPPORTUNITY	0.00	0.00	0.00
