Central Administration (including the administrative, registrar and transfer agent function) and Paying Agent in Luxembourg: The Bank of New York Mellon SA/NV, Luxembourg Branch 2-4, rue Eugène Ruppert L-2453 Luxembourg

### Depositary:

Skandinaviska Enskilda Banken AB (publ), Luxembourg Branch 4, rue Peternelchen L-2370 Howald, Luxembourg

## **General Information**

SEB Fund 5 (the "Fund") is an open-ended common fund ("FCP" - "Fonds Commun de Placement") governed by Part I of the Luxembourg Law on Undertakings for Collective Investment of 17 December 2010, as amended, (the "Law"). The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (UCITS). The Fund was set up on 2 December 1987 for an undetermined duration. The Management Regulations lastly modified with effect from 10 November 2017, have been published in the *Recueil Electronique des Sociétés et Associations (RESA)* on 10 November 2017. The Fund is registered in Luxembourg with the Luxembourg Register of Commerce under the number K 54. The Management Company was established on 19 May 1978 in the form of a Swedish limited liability company (AB). The Management of financial instruments and investment portfolios under the Swedish UCITS Act (SFS 2004:46). The Management Company is also authorised as an alternative investment fund manager to manage alternative investment funds under the Swedish AIFM Act (SFS 2013:561).

The Management Company has delegated parts of the Central Administration as further detailed hereafter, including the administrative, registrar and transfer agent functions - under its continued responsibility and control - at its own expenses to The Bank of New York Mellon SA/NV, Luxembourg Branch, 2-4, rue Eugène Ruppert, L-2453 Luxembourg. This branch was created in Luxembourg as a "succursale d'une société de droit étranger" on 15 December 1998 and is an indirect wholly-owned subsidiary of The Bank of New York Mellon Corporation. It is registered with the Luxembourg Trade and Companies' Register under Corporate Identity Number B 105087 (the "Administrative Agent" and "Registrar and Transfer Agent").

In the capacity of Administrative Agent, it carries out certain administrative duties related to the administration of the Fund, including the calculation of the NAV of the Units and the provision of account services for the Fund.

In its capacity as Registrar and Transfer Agent, it will process all subscriptions, redemptions and transfers of units, and will register these transactions in the Investors' register of the Fund.

The main objective of each Sub-Fund will be to invest directly and/or indirectly in transferable securities and other Eligible Assets, with the purpose of spreading investment risks and achieving long-term capital growth. The investment objectives of the Sub-Funds will be carried out in compliance with the investment restrictions set forth in the latest prospectus.

Sub- Fund name:	Base currency:
SEB Corporate Bond Fund EUR	EUR
SEB Corporate Bond Fund SEK	SEK
SEB Danish Mortgage Bond Fund	EUR
SEB Dynamic Bond Fund	SEK
SEB Euro Bond Fund	EUR
SEB Euro Short Rate Fund*	EUR

At present, six Sub-Funds of SEB Fund 5 are at the Investors' disposal:

\*SEB Fund 4 - SEB Short Bond Fund EUR merged into SEB Fund 5 - SEB Euro Short Rate Fund on 10 November 2023. See Note 8 for further details.

Luxembourg-domiciled SEB Fund 5 - SEB Flexible Bond Fund SEK merged with Sweden-domiciled SEB Obligationsfond Flexibel SEK on 13 February 2023. See Note 8 for further details.

The base currency of the Fund is USD.

Unless otherwise laid down in part II of the Prospectus, "The Sub-Funds", the Management Company may decide to issue, for each Sub-Fund, capitalisation Units ("C" Units) and distribution Units ("D" Units).

The "C" Units will reinvest their income, if any. The "D" Units may pay a dividend to its Investors, upon decision of the Management Company. Dividends are paid annually, except for those Sub-Funds where the Management Company would decide on a monthly, quarterly or semi-annual dividend payment.

The Management Company may issue Unit Classes whose Reference Currency is not the Base Currency of the respective Sub-Fund. With regard to such Unit Classes, the Management Company has the ambition to hedge the currency exposure from the Base Currency into the currency exposure of the Reference Currency. Considering the practical challenges of doing so, the Management Company does not guarantee how successful such currency hedging of Unit Classes will be. For Unit Classes where the Management Company has an ambition to currency-hedge the Unit Class, an "H-" will precede the currency denomination of the Unit Class. For example "(H-SEK)" means that there is an ambition by the Management Company to hedge the currency exposure from a Base Currency into a SEK-exposure for the Unit Class. The ambition of such hedging activity is to limit the performance impact related to fluctuations in the exchange rate between the Base Currency and the Reference Currency of the Unit Class. The profit and loss effects related to currency hedging of a particular Unit Class, will be allocated to the relevant Unit Class.

The unit classes offered for the Sub-Funds are disclosed in note 2 of this Annual Report.

The last known issue and redemption prices may be downloaded from the Website of the Branch and/or requested at any time at the registered offices of the Management Company and of the Depositary, at the address of its Branch as well as from the paying agents.

In addition, the Net Asset Value, fact sheets and other informational material is published on the SEB Luxembourg website www.sebgroup.lu ("website"). When registered in other countries, the publication media might differ according to the regulatory requirements. Information about fund charges can be found in the Key Information Document ("KID").

The audited annual and unaudited semi-annual reports of the Fund may be obtained, free of charge, at the registered office of the Management Company, at the address of its Branch and on the website. These reports as well as copies of the Prospectus, the Management Regulations and the KID are available, free of charge, at the registered office of the Management Company, at the address of the Branch and on the website.

## Management Report

## January 2023 - December 2023: Lower inflation, falling bond yields and the promise of Artificial Intelligence delivered a positive ending to 2023

In 2023, the global landscape was defined by stronger-than-expected growth, declining inflation from elevated levels, restrictive monetary policies and geopolitical uncertainties. When the year began, market sentiment foresaw a substantial recession in Europe, a notable deceleration in the United States, and an anticipated resurgence in China as its three-year period of the Zero-COVID policy concluded. However, as the year unfolded, Europe and, in particular, the US exceeded growth projections, while the Chinese economy failed to meet anticipated outcomes.

US economic growth exhibited remarkable resilience amidst ongoing monetary policy tightening. Economic activity hovered close to trend, while the labour market retained its tightness. Real wage growth bolstered purchasing power for US consumers, and the corporate sector remained in good shape. However, the surge in economic activity unsettled the Federal Reserve, prompting concerns about whether inflation would align with the two per cent average inflation target. The US Central Bank signalled to markets an expectation of "higher for longer" interest rates, continuing its rate hikes until July 2023. This hawkish rhetoric, coupled with strong growth, propelled longer-term government bond yields to multi-year highs in Q3 2023. But although rising bond yields dampened risk appetite in Q3, we saw a reversal in Q4 reflecting that the market decided that interest rates had peaked which drove bond yields swiftly lower due to the decline of inflation in developed markets which in turn led to a notable rally in equity markets.

Throughout the year, technology stocks (IT) maintained their leadership position, buoyed by strong demand for US growth stocks and a continued market preference for companies specializing in Artificial Intelligence. Value and small-cap stocks underperformed as technology shares surged ahead, driving growth in the market. Quality stocks demonstrated gains comparable to those of growth stocks, marking a notable increase of 28 per cent in 2023.

US equity markets continued their outperformance, led by the remarkable gains of the "Magnificent 7", followed by more modest increases in Europe and the Nordics. Emerging market equities faced ongoing challenges due to geopolitical uncertainties, elevated inflation, tighter financial conditions, a stronger US dollar, and growth setbacks in China. Despite trading at low multiples and presenting cheap valuations, rising commodity prices, reduced geopolitical tensions, and potential interest rate cuts by the Federal Reserve could provide positive catalysts for emerging markets moving forward.

Many countries, notably the US, continued to grapple with large public deficits, fuelled by increased spending on defence and renewable energy investments. This suggests that interest rates are unlikely to return to pre-pandemic lows. In Sweden, despite initial increases by the Riksbank, having a particular damping effect on Swedish households and consumers, long-term interest rates ended the year lower than at its outset, favouring fixed-income funds and attracting investors to credit markets.

Going forward, a downward trajectory in inflation is anticipated in 2024, prompting expectations of central bank rate cuts. From a tactical horizon, the market rally since Q4 2023 is expected to broaden over the next few months, benefiting more sectors. While inflation and interest rates will remain focal points, growth data will play an increasingly crucial role in confirming anticipated easing measures. The biggest risks for financial markets are an uptick in inflation levels and setbacks in anticipated interest rate cuts, alongside escalating geopolitical tensions and potential conflicts in the Middle East, which could drive commodity prices higher.

SEB Investment Management acknowledges the positive impact of the global equity and bond market upturn on its assets under management. Committed to delivering a brighter financial future for its customers through sustainable investments, SEB Investment Management AB and our board of directors thank you again for your continued commitment.

Luxembourg, 5 February 2024

	2021	0.1514	-		

\*)Performance is calculated by the following formula: ((Year end closing NAV per unit or last NAV calculated in case of terminated classes + dividend per unit distributed respectively for D units) / (Prior year closing NAV per unit or first NAV per unit in case of newly launched classes) - 1) \* 100.

NAV = Net Asset Value

\*\*)SEB Fund 4-SEB Short Bond Fund EUR merged into SEB Fund 5-SEB Euro Short Rate Fund on 10 November 2023.

\*\*\*)Luxembourg-domiciled SEB Fund 5 - SEB Flexible Bond Fund SEK merged with Sweden-domiciled SEB Obligationsfond Flexibel SEK on 13 February 2023. The last effective NAV for SEB Fund 5 - SEB Flexible Bond Fund SEK on 10 February 2023.

\*\*\*\*)NAV as at merger date. Performance is calculated by the following formula: ((NAV / Unit as at Merger date) / (NAV / Unit as at 31/12/2022) - 1) \* 100.

The past performance is no indication of current or future performance. The performance data do not take account of the costs incurred on the issue and redemption of units.

# Notes to the Financial Statements As at 31 December 2023

#### Note 1. Significant Accounting Policies

The financial statements have been prepared in accordance with Luxembourg regulations relating to Undertakings for Collective Investment.

The financial statements have been prepared on going concern basis as the Merging Fund continues to exist and operate after 13 February 2023 under another vehicle. See Note 8 for details.

The financial statements have been prepared based on the last official Net Asset Value of the year which has been calculated on 29 December 2023.

Investments are valued as follows:

Investments	Last available price	Administrative Agent	Last available settlement prices	A price no lower than the bid price and no higher than the ask price	Latest available forward exchange rates
Listed Transferable securities and money markets instruments	X				
Unlisted Transferable securities and money markets instruments				X	
Transferable securities and money market instruments quoted or traded on several markets	X				
Exchange Traded Funds	Х				
Derivatives instruments			Х		
Forward foreign exchange contracts					Х
Financial Futures Contracts*	Х				

\*) Financial Futures Contracts, which are not matured, are valued at valuation date at market rates prevailing at this date and resulting unrealised appreciation or depreciation are posted as change in net unrealised appreciation/(depreciation) on financial future contracts to the Combined Statement of Changes in Net Assets.

In the event that such prices are not in line with market conditions, or for securities and money market instruments other than those covered above for which there are no fixed prices, these securities and money market instruments, as well as other assets, will be valued at the current market value as determined in good faith by the Management Company, following generally accepted valuation principles.

Derivatives instruments not traded on regulated markets or on stock exchanges are valued at their net liquidating value determined, pursuant to the policies established in good faith by the Management Company, on a basis consistently applied for each different variety of contracts, in accordance with generally recognised principles, taking into consideration the generally accepted accounting practices, the customary practices in line with the market and the interests of the Investors.

In the case that extraordinary circumstances occur which make it impossible or even wrong to make a valuation in accordance with the above-mentioned criteria, the Management Company is entitled to temporarily apply other generally accepted valuation procedures, which are determined by it in good faith, in order to make an appropriate valuation of the Fund's Assets.

Gains and losses on the sale of securities are determined using the average cost method.

#### Swing pricing:

When substantial sums flow in or out of a Sub-Fund, the Investment Manager has to make adjustments, such as trading on the market, in order to maintain the desired asset allocation for the Sub-Fund. Trading can incur costs that affect the Unit price of the Sub-Fund and the value of existing Investors' investments. Swing pricing is designed to protect Investors' investments in this kind of situation.

The Unit price of the Sub-Fund may thus be adjusted upwards in case of large inflows and downwards in case of large outflows on a certain Business Day. The thresholds that trigger swing pricing as well as the size of the adjustments ("swing factor") are set by the board of directors of the Management Company or by a swing price committee appointed by the board of directors of the Management Company.

Adjustments made during the year are recorded in "Proceeds on issues of units" and "Payment on redemptions of units" in the Combined Statement of Changes in Net Assets.

The Board of Directors of the Management Company or swing price committee may also decide a maximum swing factor to apply to a specific Sub-Fund. None of the Sub-Funds will have a higher maximum swing factor than 0.99%. The list of Sub-Funds that currently apply swing pricing, including the size of a maximum swing factor, is available on SEB Investment Management's website. Investors may also request this information, free of charge.

No swing pricing adjustment has been applied to the year end Net Asset Value per unit calculated on 29 December 2023.

#### Currency translation:

Separate accounts are maintained for the Sub-Fund in the currency in which the Net Asset Value per unit to which it relates is expressed (the "accounting currency").

Transactions denominated in a currency other than the accounting currency are recorded on the basis of exchange rates prevailing on the date they occur or accrue to the Sub-Fund.

Assets and liabilities, expressed in a currency other than the accounting currency, are translated on the basis of exchange rates ruling at the balance sheet date.

The combined total is translated into USD at the year end date exchange rate.

The Sub-Funds are priced at either intraday or close of business. The exchange rates are presented in line with when these Sub-Funds are priced.

As at 29 December 2023, the intraday exchange rates for SEB Dynamic Bond, SEB Corporate Bond Fund EUR, SEB Corporate Bond Fund SEK, SEB Euro Bond Fund and SEB Euro Short Rate Fund were as follows:

1 DKK	=	0.148536968 USD	1 NOK	=	0.098733844 USD
1 EUR	=	1.107015561 USD	1 SEK	=	0.099483209 USD
1 GBP	=	1.273400000 USD			

As at 29 December 2023, the close of business exchange rates for SEB Danish Mortgage Bond Fund and combined figures were as follows:

1 CHF	=	1.188126194 USD	1 NOK	=	0.098466767 USD
1 DKK	=	0.148184312 USD	1 SEK	=	0.099227461 USD
1 EUR	=	1.104631516 USD	1 SGD	=	0.758110077 USD

#### Income:

Interest income and bank interest income are recognised on an accrual basis. Dividends are recorded on the ex-dividend date. This income is shown net of any withholding taxes and adjusted accordingly when tax reclaims apply.

## Note 2. Management Fees

In payment for its services, the Management Company receives an annual rate of:

*SEB Fund 5 - SEB Euro Short Rate Fund UC (EUR) and ZC (EUR) were launched on 24 August 2023 and 10 November 2023				

\*\*Luxembourg-domiciled SEB Fund 5 - SEB Flexible Bond Fund SEK merged with Sweden-domiciled SEB Obligationsfond

A twelfth of this rate is being payable at the end of each month and based on the average Net Assets of each Sub-Fund calculated daily during the relevant month.

The Management Company pays accounting, administration and depositary fees on behalf of the Fund.

Flexibel SEK on 13 February 2023. See Note 8 for further details.

#### Note 3. Performance Fees

respectively.

In addition, the Management Company is entitled to receive performance fees for the Sub-Fund SEB Fund 5 - SEB Dynamic Bond Fund, payable out of the assets attributable to the relevant class. The performance fees will be calculated, accrued and crystallised on a daily basis and paid out of the assets of the applicable unit class of the Sub-Fund at the end of each month. The calculation of the performance fees takes place on the basis of the units of the respective unit class in circulation at the respective Valuation Day.

The performance fee in the unit classes C (SEK), HNWC (SEK), HNWC (H-NOK), HNWD (SEK), US (SEK) and UC2 (SEK) of the SEB Fund 5 - SEB Dynamic Bond Fund is calculated by taking number of unit class times the performance fee rate, 10% times any positive excess performance per Unit recorded on that day. The Sub-Fund uses the principle of High Water Mark and the Risk Free Rate as a hurdle. For the unit classes C (SEK), HNWC (SEK), HNWC (H-NOK), HNWD (SEK), US (SEK) and UC2 (SEK) the "3-Month Treasury Bill" Return Index is used as the Risk Free Rate Index, also referred to as "Index".

There were no performance fees accrued during the year and no performance fees were outstanding as at 31 December 2023.

#### Note 4. Retrocession Fees

Retrocession of management fees received by the Sub-Fund related to investments made in underlying investment funds are recorded in the caption "Retrocession fees" in the Combined Statement of Operations.

#### Note 5. Taxation

The Fund is liable in Luxembourg to a subscription tax ("taxe d'abonnement") of 0.05% or 0.01% (as applicable) per annum of its NAV, such tax being payable quarterly on the basis of the value of the aggregate Net Assets of the Sub-Funds at the end of the relevant calendar quarter. Investments by a Sub-Fund in shares or units of another Luxembourg undertaking for collective investment which are also subject to the taxe d'abonnement are excluded from the NAV of the Sub-Fund serving as basis for the calculation of this tax to be paid by the Sub-Fund.

No stamp duty or other tax is payable in Luxembourg on the issue of units.

Interest, dividend and other income realised by a Sub-Fund on the sale of securities of non-Luxembourg issuers, may be subject to withholding and other taxes levied by the jurisdictions in which the income is sourced.

#### Note 6. Transaction Fees

Transaction fees incurred by the Fund relating to the purchase or sale of transferable securities, money market instruments, derivatives or other eligible assets are mainly composed of depositary fees and broker fees. Most of the transaction fees are included in the transaction price used to calculate the realised and unrealised gain/(loss) on securities.

In line with bond market practice, a bid-offer spread is applied when buying or selling securities and other financial instruments. Consequently, in any given transaction, there will be a difference between the purchase and sale prices quoted by the broker, which represents the broker's remuneration. This type of transaction cost is difficult to obtain separately and is therefore included in the acquisition cost of securities or deducted from selling prices of bonds. As at 31 December 2023, for SEB Fund 5 transaction fees were as follows:

SEB Corporate Bond Fund EUR	2,808.97	EUR
SEB Corporate Bond Fund SEK	250,167.09	SEK
SEB Danish Mortgage Bond Fund	8,658.12	EUR
SEB Dynamic Bond Fund	1,582,758.33	SEK
SEB Euro Bond Fund	Nil	EUR
SEB Short Rate Fund*	Nil	EUR
SEB Flexible Bond Fund SEK**	Nil	SEK

\*SEB Fund 4 - SEB Short Bond Fund EUR merged into SEB Fund 5- SEB Euro Short Rate Fund on 10 November 2023. See Note 8 for further details.

\*\*Luxembourg-domiciled SEB Fund 5 - SEB Flexible Bond Fund SEK merged with Sweden-domiciled SEB Obligationsfond Flexibel SEK on 13 February 2023. See Note 8 for further details.

#### Note 7. Collateral

As at 31 December 2023, the following securities were held with broker Skandinaviska Enskilda Banken AB (publ) as collateral on derivative positions:

Sub-Fund	Security Description	Nominal
SEB Fund 5 - SEB Danish Mortgage Bond	0.00 % Denmark Government Bond	25,000,000
Fund		

#### Note 8. Merger of the Sub-Fund

On 13 February 2023 (Date of merger) Luxembourg-domiciled SEB Fund 5 - SEB Flexible Bond Fund SEK ("Merging Sub-Fund") was merged into with Sweden-domiciled SEB Obligationsfond Flexibel SEK ("Receiving Fund").

On 10 November 2023 (Date of merger) Luxembourg-domiciled SEB Fund 4 - SEB Short Bond Fund ("Merging Fund") was merged into Luxembourg-domiciled SEB Fund 5 - SEB Euro Short Rate Fund ("Receiving Sub-Fund").

The merging Sub-Fund and the receiving Fund have very similar investment objectives and policies, and they are managed by the same investment team within SEB Investment Management AB. We wish to merge the two funds to simplify SEB Investment Management AB's selection of funds offered and to make fund management more efficient.

This merger was completed in accordance with article 1, (20) a) as well as Chapter 8 of the Law.

The costs triggered by the merger including the costs of the dissolution of the Merging Sub-Fund were borne by the Management Company.

The merger took place by way of absorption meaning that the merging Sub-Fund transferred all its respective assets and liabilities to the receiving Fund. The accrued income of the merging Sub-Fund was transferred and accounted as an accrued income in the corresponding unit class of the receiving Fund. Any income accrued in the receiving Fund prior to the merger was not affected.

The merger report prepared by Ernst & Young S.A., includes the following items for which no objection was reported: (i) the criteria adopted for valuation of the assets and/or liabilities for the purposes of calculating the exchange ratios;

(ii) the calculation method for determining the exchange ratios; and

(iii) the final exchange ratios.

In accordance with article 71 (3) of the Law, the merger report is available on request and free of charge to the investors of the Sub-Fund and to the "Commission de Surveillance du Secteur Financier" at the registered office of the Management Company.

The final exchange ratios used were as follows:

Name of merging Sub-Fund	Name of receiving Fund / Sub-Fund	Exchange ratio*
SEB Fund 5 - SEB Flexible Bond Fund - C	SEB Obligationsfond Flexibel - A	2.1813185
(SEK) (LU0053967609)	(SE0000577454)	
SEB Fund 5 - SEB Flexible Bond Fund - D	SEB Obligationsfond Flexibel - B	0.0937501
(SEK) (LU0053968599)	(SE0019019225)	
SEB Fund 4 - SEB Short Bond Fund - C	SEB Fund 5 – SEB Euro Short Rate Fund - C B - Class	0.0103124
(EUR) (LU0088160774)	FIN (EUR) (LU2399984025)

(EUR) (LU2071393271)	(LU2675723055)	

\*Number of units of the receiving Sub-Fund issued for one unit of the merging Fund/Sub-Fund.

Upon the effective date of the merger, the merging Funds/Sub-Funds ceased to exist.

#### Note 9. Significant Events during the year

A new prospectus was issued in January 2023, and a further updated prospectus was issued in August 2023.

There were no other significant events during the year.

#### Note 10. Subsequent Events after the year end

On 1 April 2024, SEB Asset Management AB was appointed as Global Distributor in place of Skandinaviska Enskilda Banken AB (publ). The new visiting address is Malmskillnadsgatan 44 B, 111 57 Stockholm, Sweden.

There were no other subsequent events after the year end.

## Independent auditor's report

To the Unitholders of SEB Fund 5 4, rue Peternelchen L-2370 Howald, Luxembourg

### Opinion

We have audited the financial statements of SEB Fund 5 (the "Fund") and of each of its sub-funds, which comprise the combined statement of net assets and the schedule of investments as at 31 December 2023, and the combined statement of operations and the combined statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

### **Basis for Opinion**

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Other information

The Board of Directors of the Management Company of the Fund (the "Board of Directors") is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

### Responsibilities of the Board of Directors for the financial statements

The Board of Directors is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Fund's or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

### Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting
  and, based on the audit evidence obtained, whether a material uncertainty exists related to events or
  conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a
  going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our
  report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such
  disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence
  obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or
  conditions may cause the Fund's or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

> Ernst & Young Société anonyme Cabinet de révision agréé

Nadia Faber

Luxembourg, 30 April 2024

# Risk Disclosure (unaudited)

In the context of risk measurement and in accordance with CSSF Circular 11/512 a UCITS must calculate its global exposure on at least a daily basis.

For SEB Fund 5, the global exposure is calculated and monitored daily by using the calculation methodology Value at Risk (VaR) or the commitment methodology. The VaR model used is parametric VaR. The observation period is at least 250 days.

The VaR methodology provides an estimate of the maximum potential loss over a specific time period and at a given confidence level, i.e. probability level. Usually for UCITS, the time period is 1 month/20 business days and the confidence level is 99%.

For example, a VaR estimate of 3% on a 20-days' time period with a 99% confidence level means that, with 99% certainty, the percentage the Fund can expect to lose over the next 20 days' period should be a maximum of 3%.

In case of the VaR methodology, the Fund can use either the "relative" or the "absolute" VaR approach.

According to CSSF Circular 11/512, the absolute VaR approach must not be greater than 20% based on a 99% confidence level and a holding period of 1 month/20 business days. In the case of the relative VaR approach, the VaR of the Fund must not be greater than twice the VaR of its reference portfolio. Nevertheless, lower limitations than those ones set by the regulator can be set in accordance with the investment policy/strategy of the Fund.

In addition to the VaR, the level of leverage generated through the use of derivatives and the use of collateral in relation to efficient portfolio management transactions (i.e. securities lending or repurchase agreements) is monitored twice a month. Leverage is measured as the sum of the absolute notional exposures of the financial derivative instruments (i.e. the absolute sum of all long and short notional positions in derivatives compared to the Net Asset Value of the Fund) and the reinvestment of collateral related to securities lending or repurchase agreement used by the Fund.

The Investment Manager calculates the leverage on a gross or on a commitment method. The gross method converts all positions on derivative financial instruments into equivalent positions in the underlying assets, while the commitment method applies the same while allowing netting and hedging arrangements.

The below overview summarises the Fund indicating the VaR or commitment approach, the reference portfolio (in the case of relative VaR), the legal VaR limit, the lowest/highest and average utilisation of VaR (expressed as a percentage of the respective absolute or relative legal VaR limit) as well as the average level of leverage for the year ended 31 December 2023. Or in other cases, the minimum, maximum and average leverage within the commitment method:

Fund	Relative/ Absolute VaR	Reference portfolio	Lowest utilisation of VaR	Highest utilisation of VaR	Average utilisation of VaR	Average Leverage (FX forwards serving the purposes of unit-class(es) hedging, if any, are not included in the leverage calculation)	Average Leverage (including FX forwards for unit – class hedging)
SEB Fund 5 - SEB Dynamic Bond Fund*	Absolute	N/A	7.04%	11.64%	9.30%	82.68%	82.68%

\* SEB Fund 5 - SEB Dynamic Bond Fund used the historical VaR model.

The risk monitoring is based on the risk management process adopted by the Board of Directors of the Management Company and is performed independently from the portfolio management. No changes have been applied to the risk management procedures.

Fund	Commitment Method Leverage					
	Limit	Minimum	Average	Maximum		
SEB Fund 5 -	1000/	1.73%	5.71%	11.85%		
SEB Corporate Bond Fund EUR	100%					
SEB Fund 5 -	1000/	0.59%	10.18%	61.18%		
SEB Corporate Bond Fund SEK	100%					
SEB Fund 5 -	1000/	0.00%	4.40%	21.09%		
SEB Danish Mortgage Bond Fund	100%					
SEB Fund 5 -	1000/	0.00%	0.00%	0.00%		
SEB Euro Short Rate Fund	100%					
SEB Fund 5 -	1000/	0.00%	0.00%	0.00%		
SEB Euro Bond Fund	100%					

Limits as set by the Board of Directors of the Management Company as part of the risk profile have temporarily been exceeded by the Sub-Fund(s), such as disclosed in below table. However such events have been adequately monitored and corrected in accordance with applicable internal procedures (escalation, etc.).

## Remuneration Disclosure (unaudited)

SEB Investment Management AB wishes to encourage and incite good performance and sound behaviour, as well as to endeavour to achieve balanced risk-taking that is aligned with the interests of fund unitholders.

The Management Company has a long-term vision regarding the employment conditions of its staff. Total remuneration shall contribute to developing the Management Company's competitiveness and profitability through the Company being able to attract, retain, motivate and reward competent and skilful employees. In order to achieve this objective, the Management Company's board of directors has adopted a remuneration policy based on Swedish and international regulations. The purpose of the remuneration policy is to ensure that the Management Company has a remuneration system that is adapted to the fund investors' long-term interests and the Management Company's strategy and values.

The remuneration policy is based on the remuneration model that is applied at Group level, and is built on SEB's values. The Management Company's remuneration policy is reviewed at least annually. The Management Company's current remuneration policy is based on a risk analysis that has been prepared by the Management Company's risk control department.

#### The Management Company's remuneration structure is based on three components:

- Fixed remuneration (basic salary)
- Variable remuneration
- Pensions and other benefits

The remuneration components are used to achieve a competitive individual level of remuneration with an appropriate balance between fixed and variable remuneration.

The fixed remuneration component is individually adapted further to predetermined internal and external appraisals. The level of the fixed remuneration is based on the employee's experience, long-term performance and behaviour.

All employees at the Management Company are embraced by SEB's collective profit sharing model that has a predetermined maximum outcome. The remuneration is established based on SEB's earnings and customer satisfaction.

Remuneration to employees in control departments (internal audit, risk control, and observance of regulations) is established by the board of directors further to proposals from the Management Company's remuneration committee. Remuneration shall be based on objective grounds related to the employee's role and tasks, and be independent of the business unit that the control department scrutinises.

Employees in departments that have a monitoring function, such as internal auditing, risk control or compliance, are not to receive any other variable remuneration over and above SEB's profit sharing.

The Management Company applies the grandfather principle to all remuneration, which means all decisions are to be approved by, at the least, the manager for the manager of the employee concerned.

#### Variable remuneration

The Management Company uses variable remuneration in order to develop and reward performance and behaviour that create both short-term and long-term value for the fund investors and the Management Company. Variable remuneration is an important aspect of designing a flexible remuneration system. Variable remuneration is composed of both cash and shares in investment funds or financial instruments which achieve the equivalent common interests as shares in the relevant investment funds.

The principles for variable remuneration adopted by the Management Company are established with the objective of reflecting the Management Company's low risk tolerance and being compatible with the Fund's prevailing risk profiles, fund rules, discretionary mandates, as well as internal and external regulations. The variable remuneration shall be based on the employee's performance and behaviour from a several-year perspective, as well as the performance and economic results of the employee's team, the Management Company and SEB as a whole.

At the same time as obtaining a sound balance between fixed and variable remuneration, the payment of variable remuneration shall be related to the Management Company's risk policy and creation of value for the fund investors. This implies that certain maximum levels and deferment of payment shall apply to different personnel categories.

For employees in positions that have a significant influence on the Management Company's or the managed funds' risk profile, the maximum variable remuneration may not exceed 100 percent of the fixed remuneration. The variable remuneration is to be deferred by 40 to 60 percent for a minimum of three years. At least 50 percent of the variable remuneration is to consist of shares in investment funds or instruments which achieve the same common interests as shares in the relevant securities funds. Variable remuneration in the form of fund shares will be subject to retention policy for at least one year. This retention policy applies to variable compensation whether or not it is deferred.

The Management Company also applies a special remuneration model for certain employees who manage funds and discretionary mandates. The remuneration model for these persons is based on a structure with distinct rules for maximum outcome of remuneration, deferment of remuneration as well as rules regarding downward adjustment/reduction of remuneration.

Payment of deferred remuneration shall only be made if such is motivated based on the Management Company's economic situation and the performance of the Management Company, the relevant division and the employee.

Reduction or downward adjustment of deferred variable remuneration shall apply should losses, increased risks and costs arise during the deferment period, which includes for example taking into consideration the employee's observance of external and internal regulations. Reduction or downward adjustment shall also take place should payment be deemed unwarrantable in view of the Management Company's financial situation.

The variable remuneration system shall be continuously reviewed in order to ensure that it does not create any unsuitable behaviour and contribute to excessive risk-taking.

#### The remuneration committee

The Management Company has appointed a remuneration committee with the task of independently appraising the remuneration policy. The remuneration committee shall be responsible for preparing decisions regarding remuneration that are to be adopted by the board of directors, and intervene if a decision could imply consequences for the Management Company's risks and risk management. The remuneration committee is an independent body composed of the board of directors' independent members.

#### Follow up

The CEO, the deputy CEO and the board of directors shall ensure that the remuneration policy is operationally applied. The remuneration policy shall be reviewed annually by the internal audit department or by an independent auditing firm. In order to ensure that the Management Company's remuneration system is applied in accordance with the remuneration policy, the remuneration system and the payment of remuneration shall be reviewed annually by internal or external auditors.

# Securities Financing Transactions Regulation (SFTR) (unaudited)

The Fund did not engage in any Securities Financing Transactions during the financial year ended 31 December 2023.

## Sustainable Finance Disclosure Regulation (unaudited)

The following Sub-Funds are categorised as Article 8 Funds under the Sustainable Finance Disclosure Regulation.

SEB Fund 5 Sub-Fund name:

SEB Corporate Bond Fund EUR SEB Corporate Bond Fund SEK SEB Dynamic Bond Fund SEB Danish Mortgage Bond Fund

SEB Euro Short Rate Fund

The periodic disclosure for financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 for the Sub Funds of SEB Fund 5 are disclosed overleaf.

The following Sub-Fund is categorised as an Article 6 Fund under the Sustainable Finance Disclosure Regulation. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities. **SEB Fund 5 Sub-Fund name:** 

SEB Euro Bond Fund

The following Sub-Fund has merged out of the umbrella. Upon the effective date of the merger, the merging Sub-Fund ceased to exist. Therefore no periodic disclosure under the Sustainable Finance Disclosure Regulation relating to the merging Sub-Fund is included for this annual report.

SEB Fund 5 Sub-Fund name:

SEB Fund 5 - SEB Flexible Bond Fund

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Corporate Bond Fund EUR

Legal entity identifier: 529900WC8A005FLRRT45

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did th	is fin	ancial product have a sustainable inv	estmen	t obj	ective?

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the 2023 reference period, the fund promoted environmental and social characteristics by considering sustainability risks and opportunities both before the fund invested in an individual company, through the ongoing monitoring of investments, and by investing in bonds from issuers classified as sustainable and in sustainabilitylabelled (use of proceeds) bonds. To support the work of assessing the issuers' sustainability risks and opportunities, the fund's managers used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view. The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides fund managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

The fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company has influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards and in cooperation with other asset managers or partners.

Furthermore, the fund has promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

Sustainability indicators measure how the environmental or social characteristics pro-

#### How did the sustainability indicators perform?

The fund achieved a SIMS-S rating of 5.6 at the end of 2023. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 240 corporate engagements in 50 companies, corresponding to 65% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue.

A significant part of the fund's sustainability process is to invest in green, social and sustainability (use of proceeds) bonds, and at the end of the year these bonds constituted 25.6% of the fund.

The fund followed the exclusion policy of the fund company.

#### ...and compared to previous periods?

During the year, the fund continued to invest in green bonds and prioritised continuing to increase shares. By continuing to invest in green collateral, the fund encouraged issuers to take further steps to incorporate environmental aspects into their businesses.

In 2023, the fund had a SIMS-S rating of 5.6, which is in line with the score of 2022. In 2023, engagement dialogues were carried out with 50 companies among the fund's holdings, which was 10 more companies than in 2022. The proportion of green and social bonds amounted to 25.6% in 2023, while the level was 24% in 2022. In 2023, the same issuers were excluded from the universe based on one of the fund company's exclusion criteria as in 2022.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund was committed to making sustainable investments to a minimum share of 20%.

During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities are deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet$  20% of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

## How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund worked with the following principles during the reference period:

- Excluded companies that do not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that have exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that are not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' governance structure, labour relations, tax compliance and remuneration.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

• Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# R

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

In the fund's fundamental analysis process, the fund manager conducted a sustainability assessment of, among other things, each company's products, services, operations and suppliers. To support the work of assessing the companies' sustainability risks and opportunities, the fund manager used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;

• Whether the investee companies lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;

- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

- PAI 4: Exposure to companies active in the fossil sector
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for multinational enterprises
- PAI 14: Exposure to controversial weapons

During the ESG integration process using the SIMS-S combined with fundamental analysis:

#### From Annex 1 - Table 1 of CDR (EU) 2022/1288

- PAI 1: GHG emissions
- PAI 2: Carbon footprint
- PAI 3: GHG intensity of investee companies
- PAI 4: Exposure to companies active in the fossil sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 8: Emissions to water
- PAI 9: Hazardous waste ratio
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for Multinational Enterprises

• PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

- PAI 12: Unadjusted gender pay gap
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons

During the investment period, these PAIs were considered:

In engagement dialogues with issuers:

• PAI 13: Board gender diversity - from Annex 1 - Table 1 of CDR (EU) 2022/1288

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
UBS Group AG	Financials	2.87	Switzerland
ING Groep NV	Financials	2.75	Netherlands
Banco Santander SA	Financials	2.50	Spain
ABN AMRO Bank NV	Financials	2.23	Netherlands
Swedbank AB	Financials	1.96	Sweden
Commerzbank AG	Financials	1.94	Germany
Skandinaviska Enskilda Banken AB	Financials	1.91	Sweden
CaixaBank SA	Financials	1.91	Spain
Svenska Handelsbanken AB	Financials	1.84	Sweden
Nordea Bank Abp	Financials	1.83	Finland
HSBC Holdings PLC	Financials	1.80	United Kingdom
Carrefour SA	Consumer Staples	1.73	France
British Telecommunications PLC	Financials	1.71	United Kingdom
Allianz SE	Financials	1.70	Germany
Banco Bilbao Vizcaya Argentaria SA	Financials	1.69	Spain

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

✓ Yes:

☐ In fossil gas ☑ In nuclear energy □ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

#### 82

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting

the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

compare with previous reference periods?

activities was 0.0%.

ing expenditure 0.0 %.

The fund also had the option of investing in sustainability-labelled bonds, such as green bonds. The funding from these bonds had to be used to contribute to an environmental goal in order to receive their green label, but taxonomy reporting for individual financial securities is often lacking.

How did the percentage of investments that were aligned with the EU Taxonomy

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU taxonomy was 1.3 %. Compatible capital expenditure was 2.4 % and operat-

What was the share of sustainable investments with an environmental objec-

It is likely that in the vast majority of cases these goals have a clear connection to the goals found in the EU's Green Taxonomy, but that reliable data is lacking for such a classification. The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contri-

are sustainable investments with an environmental objective that **do** 

mental objective that do not take into account the criteria for environmentally sustainable ecobute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in the Fund Company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 24.0% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

The fund also had the option of investing in sustainability-labelled bonds such as social bonds. The funding from these bonds had to be used to contribute to a social goal.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash in the meaning of ancillary liquid assets, sovereigns, supranationals (when not a sustainabilitylabelled bond), mortgage bonds/covered bonds (when not a sustainability-labelled bond), for other investments where data is missing and derivatives.

The purpose of cash was liquidity and flows; the purpose of derivatives was efficient portfolio management techniques; and the purpose of mortgage bonds, sovereigns, supranationals was for allocation/investment strategy reasons.

For mortgage bonds, the minimal environmental and social safeguards included the exclusionary process where issuers with confirmed breaches of international norms and standards are excluded, and there were no investments made in entities for sovereigns and supranationals under US, EU, UK or OECD sanctions.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund continued investing in green bonds during the year. At the time of reporting, green bonds accounted for 24% of the fund's assets. Green bonds are bonds in which proceeds are earmarked for investments with a clear positive environmental impact. One such investment was Volkswagen Green Bond, which contributes to the financing of the energy transition within the transport sector. The transport sector is one of the sectors where the transition from fossil-free fuels is pronounced. In total, cars account for 12% of emissions within the EU.

The fund also invested in green bonds in several other sectors, such as Jyske bank and BBVA – financials, SKF – manufacturing, and Stora Enso -paper.

The fund excluded companies that did not meet the fund company's extensive criteria for sustainability. As examples, BHP and Shell were excluded due to the use of fossil fuels and also for norm-based breaches.

The fund company has had engagement dialogues with companies related to their sustainability work. The dialogues have had a focus on environmental characteristics, with reducing greenhouse gas emissions being the main target. Reporting on Scopes 1-3 emissions, and a clear pathway to reducing these by committing to science-based targets have been main points of engagement. During the year, the fund had engagement dialogues with Stockholm Exergi, Orsted and Stora Enso, among others.

How did this financial product perform compared to the reference benchmark?

#### Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### • How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Corporate Bond Fund SEK

Legal entity identifier: 5299001YQTUR462R3602

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the 2023 reference period, the fund promoted environmental and social characteristics by considering sustainability risks and opportunities both before the fund invested in an individual company, through the ongoing monitoring of investments, and by investing in bonds from issuers classified as sustainable and in sustainabilitylabelled (use of proceeds) bonds. To support the work of assessing the issuers' sustainability risks and opportunities, the fund's managers used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view. The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides fund managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

SIMS-S was central to the fund's sustainability integration process and evaluation. SIMS-S focused on risks and opportunities related to sustainable development in company management, products and services, and operations. This was evaluated through the use of metrics, such as alignment with the Paris Agreement, carbon footprint, gender diversity, Taxonomy alignment, and revenues aligned with the sustainable development goals ("SDGs"). The fund used the SIMS-S framework and scores in its sustainable integration process.

The fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company has influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards and in cooperation with other asset managers or partners.

Furthermore, the fund has promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

#### Sustainability indicators measure how the environmental or social characteristics promoted by the financial

product are attained.

#### How did the sustainability indicators perform?

The fund achieved a SIMS-S rating of 5.7 at the end of 2023. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 434 corporate engagements in 86 companies, corresponding to 73% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue. A significant part of the fund's sustainability process is to invest in green, social and sustainability (use of proceeds) bonds, and at the end of the year these bonds constituted 12% of the fund.

The fund followed the exclusion policy of the fund company.

#### …and compared to previous periods?

During the year, the fund continued to invest in green bonds and prioritised continuing to increase shares. By continuing to invest in green collateral, the fund encouraged issuers to take further steps to incorporate environmental aspects into their businesses.

In 2023, the fund had a SIMS-S rating of 5.7, which was slightly lower than in 2022. In 2023, engagement dialogues were carried out with 86 companies among the fund's holdings, which was 18 more companies than in 2022. The proportion of green and social bonds amounted to 12% in 2023, while the level was 11% in 2022. In 2023, the same issuers were excluded from the universe based on one of the fund company's exclusion criteria as in 2022.

#### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund was committed to making sustainable investments to a minimum share of 20%.

During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities are deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund worked with the following principles during the reference period:

- Excluded companies that do not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that have exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that are not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' governance structure, labour relations, tax compliance and remuneration.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative principal impact indicators (PAI) was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant PAIs in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data.

Where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators are considered through the exclusions outlined in the fund company's sustainability policy, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

- Companies whose activities affect endangered species.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment
- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

#### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# R

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

In the fund's fundamental analysis process, fund managers conducted a sustainability assessment of, among other things, each company's products, services, operations and suppliers. To support the work of assessing the companies' sustainability risks and opportunities, the fund's managers used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;

• Whether the companies we invest in lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;

- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
ING Groep NV	Financials	2.55	Netherlands
HSBC Holdings PLC	Financials	2.28	United Kingdom

Credit Agricole	Financials	1.69	France
UBS Group AG	Financials	1.64	Switzerland

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

#### • What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

🖌 Yes:

🗌 In fossil gas 🛛 In nuclear energy

🗌 No

Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To comply with the EU

# <sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting

the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### **Transitional activities**

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable ecoThe graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling activities was 0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU taxonomy was 0.2 %. Compatible capital expenditure was 0.4 % and operating expenditure 0.0 %.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 12% of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The fund also had the option of investing in sustainability-labelled bonds, such as green bonds. The funding from these bonds had to be used to contribute to an environmental goal in order to receive their green label, but taxonomy reporting for individual financial securities is often lacking.

It is likely that in the vast majority of cases these goals have a clear connection to the goals found in the EU's Green Taxonomy, but that reliable data is lacking for such a classification. The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contri-

bute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in the Fund company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

## What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 27% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

The fund also had the option of investing in sustainability-labelled bonds such as social bonds. The funding from these bonds had to be used to contribute to a social goal.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash in the meaning of ancillary liquid assets, sovereigns, supranationals (when not a sustainabilitylabelled bond), mortgage bonds/covered bonds (when not a sustainability-labelled bond), for other investments where data is missing and derivatives.

The purpose of cash was liquidity and flows; the purpose of derivatives was efficient portfolio management techniques; and the purpose of mortgage bonds, sovereigns, supranationals was for allocation/investment strategy reasons.

For mortgage bonds, the minimal environmental and social safeguards included the exclusionary process where issuers with confirmed breaches of international norms and standards are excluded, and there were no investments made in entities for sovereigns and supranationals under US, EU, UK or OECD sanctions.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund continued investing in green bonds during the year. At the time of reporting, green bonds accounted for 12% of the fund's assets. Green bonds are bonds in which proceeds are earmarked for investments with a clear positive environmental impact. One such investment was Autoliv Green Bonds, which contribute to the financing of the energy transition within the transport sector. The transport sector is one of the sectors where the transition from fossil-free fuels is pronounced. In total, cars account for 12% of emissions within the EU.

The fund also invested in green bonds in other sectors, such as DNB and Nordea in financials.

The fund excludes companies that do not meet the fund company's extensive criteria for sustainability. As examples, BHP and Shell were excluded due to the use of fossil fuels and also for norm-based breaches.

The fund managers have had engagement dialogues with companies related to their sustainability work. The dialogues have had a focus on environmental characteristics, with reducing greenhouse gas emissions being the main target. Reporting on Scopes 1-3 emissions, and a clear pathway to reducing these by committing to sciencebased targets have been main points of engagement. During the year, the fund had engagement dialogues with Stockholm Exergi, Orsted and Stora Enso, among others.

How did this financial product perform compared to the reference benchmark?

#### Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### • How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Danish Mortgage Bond Fund

Legal entity identifier: 5299003E27N3RFS7YD30

## **Environmental and/or social characteristics**

#### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the

environmental or social

characteristics promoted by the financial

product are attained.

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

Specific ESG meetings were held with all the issuers of the fund's holdings during the year as a means to promote environmental and social characteristics in relation to the mortgage issuers. At these meetings, all issuers were asked to explain the developments on parameters relating to environmental and social aspects of the pool of assets that were backing the covered bonds that the fund invested in. Among these, the most relevant was that of Co2-emission – not least through the development of the share of energy-efficient properties in the pool of collateral within the mortgage bonds.

Especially regarding Co2-emission, the fund's engagement processes specifically detailed the need for more and better data. The latest development in this regard was that one issuer began publishing bond-level data, while others published only cover pool-level data. At the meetings, the issuers were informed that it is of the utmost importance that they start publishing bond-level data. It was somewhat of a breakthrough that one issuer had begun doing it. Others are still contemplating possibilities.

Regarding social characteristics, the issuers were clearly informed that it is seen as positive if their share of social housing funding increased. Two of the issuers confirmed that they expected their respective market share to increase.

#### How did the sustainability indicators perform?

Green bonds

With only 12 green mortgage bonds and two green government bonds in Denmark, this is still a young market. However, the share is growing, albeit at a slower pace than hoped for. The portfolio manager pushed all mortgage issuers to increase their share and suggested that they publish data in a more granular fashion to be able to show a scale of "greenness" instead of the rather rigid green bond framework. At the end of 2023, the total market share of green bonds was 1%.

#### Issuers' Co2-emissions

As the market standards for reporting on Co2-emissions has yet to be formalised, it is difficult to set quantitative targets. However, all issuers included in the fund were able to provide evidence that they were on track for a 50% decrease of their calculated Co2-emissions on the assets of the underlying cover pool.

Influence the issuers towards a more sustainable direction

All mortgage issuers, with whom the fund has substantial holdings, agreed to meetings during the year. 100% of the issuers acknowledge the concerns raised relating to ESG-factors, mostly the environmental and social aspects of the theme. With this acknowledgment, issuers were also expected to promote the concerns – both internally as well as externally. Many of them provided extensive communication material

with specific targets on funded Co2-emissions as well as other measurable targets. All disclosed progress in every subsequent meeting.

Exclusion

None of the issuers breached international norms nor were they excluded in any other way. However, some of the underlying companies' properties in the pool of assets may have been subject to exposure to, for example, fossil fuels. In the fund's engagement process, the portfolio managers were adamant in pressing that funding for these companies should be kept to a minimum or perhaps removed altogether. Some of issuers shared the concern but found it hard to deviate from the lending policies (it may be politically difficult). Some of the issuers were more open to an actual change in policy or to help the underlying companies transition to a net-zero impact from their current activities. However, this is a second derivative on the investments of the fund and as such does not lie within the ESG process.

#### …and compared to previous periods?

Since 29 August 2023, the fund has been classified as Article 8 under SFDR, which means that no previous reporting exists, and thus comparisons with previous reference periods cannot be made.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund did not commit to sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund company's sustainability policy is used through the exclusions described herein as a first step to ensure that no sustainable investment causes significant harm to any environmental or social sustainable investment objective.

Companies are excluded and not eligible for investment if they:

- do not comply with international norms and standards;
- · operate in controversial sectors and business areas; or
- have exposure to fossil fuels.

Beyond the exclusions covered by the fund company's sustainability policy, the fund also excluded companies that were not considered to fulfil the levels of the minimum social requirements defined by the EU Taxonomy for Sustainable Investment.

To ensure that investee companies are adhering to good corporate governance practices, an external assessment of each company's governance structure, labour relations, tax compliance and remuneration is used.

Read more about the fund company's exclusions at sebgroup.com/fundcompanysustainability

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund considers principle adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following are excluded:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

- Companies whose activities affect endangered species.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights via the norm-based exclusion criteria stated in the fund company's sustainability policy.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment;
- The UN Global Compact the OECD Guidelines for Multinational Enterprises; and

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Companies with confirmed violations are not considered as sustainable investments.

#### Principal adverse

**impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. Read more about exclusions and SEB Investment Management's sustainability approach at sebgroup. com/fundcompanysustainability.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered principal adverse impacts on sustainability factors prior to investing by excluding investments related to:

- PAI 4: Exposure to companies active in the fossil sector
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for multinational enterprises
- PAI 14: Exposure to controversial weapons

From an exclusionary perspective, all companies with the abovementioned PAI are excluded. However, as a second derivative, mortgage issuers were asked to reduce (or consider how to reduce) providing funding in sectors with a high degree of Co2-emissions (this is similar to requiring a target to reduce Co2, but it applies more specifically to sectors that have a large impact on the environment). Some issuers share the concern, but find it hard to deviate from the lending policies (it may be politically difficult). Some issuers are more open to an actual change in policy or to help the underlying companies transition to a net-zero impact from their current activities. However, this is a second derivative on the investments of the fund and as such does not lie within the ESG-process.

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 31 December 2023

	Largest investments	Sector	% Assets	Country

	Nordea Kredit Realkreditaktieselskab	Financials	21.58	Denmark
	Realkredit Danmark A/S	Financials	21.47	Denmark

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Sectors

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

#### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### **Transitional activities**

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance. To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy 1?

L Yes:	
🗌 In fossil gas	🗌 In nuclear energy
V No	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### • What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activites was 0.0%. The share in enabling activites was 0.0%.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Since 29 August 2023, the fund has been classified as Article 8 under SFDR, which means that no previous reporting exists, and thus comparisons with previous reference periods cannot be made.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund invested mainly in Danish mortgage bonds and some part in government bonds during the reference period. The fund did not commit to any sustainable investments. However, the fund did invest in two green government bonds, constituting 1.00% of its investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/ 852.

### What was the share of socially sustainable investments?

The fund invested mainly in Danish mortgage bonds and some part in government bonds, and none of them were considered socially sustainable bonds. The fund did not commit to any sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments in "Other" were cash and/or cash equivalents, government bonds/ sovereign bonds, derivatives or ETFs, and were used for hedging, liquidity and efficient portfolio management, while the cash was used in the meaning of ancillary liquid assets.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the period, a great deal of focus was on data availability. Using the available reporting, especially regarding Co2 emissions, the fund company began to collect and organise the data so that it becomes possible to assess the impact of the fund's holdings rather than just the different issuers. This is still a work in progress and not something which is yet suitable for publication nor as an investment guideline. The portfolio managers continuously push issuers to improve data transparency and availability.

The managers pushed for data availability and transparency as it is essential to have consistent data on the impact of the holdings in the fund in order to gauge the effect of the engagement process and to see if there are developments moving in the right direction.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

#### How did this financial product perform compared with the reference benchmark?

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the 2023 reference period, the fund promoted environmental and social characteristics by considering sustainability risks and opportunities both before the fund invested in an individual company, through the ongoing monitoring of investments, and by investing in bonds from issuers classified as sustainable and in sustainabilitylabelled (use of proceeds) bonds. To support the work of assessing the issuers' sustainability risks and opportunities, the fund's management team used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

SIMS-S is the fund company's proprietary sustainability model that rates all companies in the fund's investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view. The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides fund managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

The fund has also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company has influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards and in cooperation with other asset managers or partners.

Furthermore, the fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about the fund company's exclusions in the sustainability policy which can be found at sebgroup.com/ fundcompanysustainability.

Sustainability indicators measure how the environmental or social characteristics pro-

#### How did the sustainability indicators perform?

The fund achieved a SIMS-S rating of 5.6 at the end of 2023. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 64 corporate engagements in 27 companies, corresponding to 33% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue. A significant part of the fund's sustainability process is to invest in green, social and sustainability (use of proceeds) bonds, and at the end of the year, these bonds constituted 28.7% of the fund.

The fund excluded companies that did not meet the fund company's extensive criteria for sustainability. As examples, Norwegian oil company Aker BP and its owner Aker were excluded due to their involvement in the extraction of fossil fuels. The gaming sector, including issuers such as Betsson and Catena Media, companies within the defence sector, such as SAAB, and the tobacco company Swedish Match were also excluded.

#### ...and compared to previous periods?

During the year, the fund continued to invest in green bonds and prioritised continuing to increase shares. By continuing to invest in green collateral, the fund encouraged issuers to take further steps to incorporate environmental aspects into their businesses.

In 2023, the fund had a SIMS-S rating of 5.6, which is in line with the score of 2022.

In 2023, engagement dialogues were carried out with 27 companies among the fund's holdings, which was 8 more companies than in 2022. The proportion of green, social and sustainability bonds amounted to 28.7% in 2023, while the level was 28.0% in 2022. In 2023, roughly the same issuers were excluded from the universe based on one of the fund company's exclusion criteria as in 2022.

## What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund was committed to making sustainable investments to a minimum share of 20%.

During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities were deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

• Project-specific contributions via sustainability-labelled bonds such as Green bonds and Sustainable bonds (use of proceeds)

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

• Project-specific contributions via sustainability-labelled bonds such as Social bonds and Sustainable bonds (use of proceeds)

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that no sustainable investment caused significant harm to any environmental or social sustainable investment objective, the fund worked with the following principles during the reference period:

- Excluded companies that did not comply with international norms and standards;
- Excluded companies operating in controversial sectors and business areas;

• Excluded companies that had exposure to fossil fuels or other activities with negative environmental impacts;

• Excluded companies that were not considered to fulfil the levels of minimum social safeguards as defined by the EU Taxonomy; and

• Used an external research partner's assessment of the companies' corporate governance structure, labour relations, tax compliance and remuneration.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the fund company's model for detecting companies with extreme values among the negative impact indicators was used to avoid investing in companies that have caused significant harm. The negative impact indicators for sustainability factors used are those outlined in Annex I of the Sustainable Finance Disclosure Regulation's technical standard (CDR 2022/1288) - as well as the relevant indicators in Tables 2 and 3 of Annex 1 of CDR 2022/1288. However, the indicators are dependent on the current availability of data, but where sufficient coverage has been available, companies with significant negative performance in a geographical and sectoral context have not been included as sustainable investments.

Some indicators that were considered through the exclusions outlined in the fund company's sustainability policy, were, in particular:

- Companies with activities in the fossil fuel sector;
- Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

- Companies whose activities affect endangered species.
- Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

- The UN Principles for Responsible Investment;
- The UN Global Compact;
- The OECD Guidelines for Multinational Enterprises; and

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights.

Companies with confirmed violations are not considered sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters. The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

R

## How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

In the fund's fundamental analysis process, a sustainability assessment of, among other things, each company's products, services, operations, and suppliers is conducted. To support the work of assessing the companies' sustainability risks and opportunities, the fund managers used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;

• Whether the companies we invest in lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;

- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

- PAI 4: Exposure to companies active in the fossil sector
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for multinational enterprises
- PAI 14: Exposure to controversial weapons

During the ESG integration process using the SIMS-S combined with fundamental analysis:

From Annex 1 - Table 1 of CDR (EU) 2022/1288

- PAI 1: GHG emissions
- PAI 2: Carbon footprint
- PAI 3: GHG intensity of investee companies
- PAI 4: Exposure to companies active in the fossil sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 8: Emissions to water
- PAI 9: Hazardous waste ratio
- PAI 10: Violations of UN Global Compact Principles & OECD Guidelines for Multinational Enterprises

• PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises.

- PAI 12: Unadjusted gender pay gap
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons

During the investment period, these PAIs are considered:

- In engagement dialogues with issuers:
- PAI 13 from Annex 1 Table 1 of CDR (EU) 2022/1288

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments** of the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Sveriges Säkerställda Obligationer	N/A	14.26	Sweden
Stadshypotek AB	Financials	11.21	Sweden
Landshypotek Bank AB	Financials	3.28	Sweden
Klövern	Real Estate	1.65	Sweden
Länsförsäkringar Bank	Financials	1.52	Sweden
Islandsbanki HF	Financials	1.52	Iceland
Kungsleden AB	Real Estate	1.44	Sweden

Scania CV AB	Industrials	1.17	Sweden

## What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

☐ Yes:☐ In fossil gas ☐ In nuclear energy☑ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

### Sectors

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activites was 0.0%. The share in enabling

How did the percentage of investments that were aligned with the EU Taxonomy

For the previous reference period (2022), the share of investments whose revenue was compatible with the EU taxonomy was 1.0%, compatible capital expenditure was 1.2%, and operating

tive not aligned with the EU Taxonomy?

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

### Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

activites was 0.0%.

expenditure 0.0%.

The fund also had the option of investing in sustainability-labelled bonds, such as green bonds. The funding from these bonds had to be used to contribute to an environmental goal in order to receive their green label, but taxonomy reporting for individual financial securities is often lacking.

It is likely that in the vast majority of cases, the companies' goals have clear connections to the goals found in the EU's Green Taxonomy, but that reliable data is lacking for such a classification. The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and

are sustainable investments with an environmental objective that **do** 

not take into account the criteria for environmentally sustainable ecothat contribute to sustainability goals. There were also relatively few companies that reported in accordance with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in the fund company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above criteria.

### What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 5.7% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments. The social goals included in the fund company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs;

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

The fund also had the option of investing in sustainability-labelled bonds such as social bonds. The funding from these bonds had to be used to contribute to a social goal.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash in the meaning of ancillary liquid assets, sovereigns, supranationals (when not a sustainabilitylabelled bond), mortgage bonds/covered bonds (when not a sustainability-labelled bond), for other investments where data is missing and derivatives.

The purpose of cash was liquidity and flows; the purpose of derivatives was efficient portfolio management techniques; and the purpose of mortgage bonds, sovereigns, and supranationals was for allocation/investment strategy reasons.

For mortgage bonds, the minimal environmental and social safeguards included the exclusionary process where issuers with confirmed breaches of international norms and standards are excluded, and there were no investments made in entities for sovereigns and supranationals under US, EU, UK or OECD sanctions.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund continued investing in green bonds during the year. By the end of the year, green bonds accounted for roughly a fourth of the fund's assets. Green bonds are bonds in which proceeds are earmarked for investments with a clear positive environmental impact. The fund has, for example, invested in green bonds issued by real estate companies, fish producers and energy companies along with issuers within different sectors, such as Boliden and ICA. Aside from green bonds, the fund also invested in social bonds and sustainability-linked bonds issued by, for example, Kinnevik, Kahrs, First Camp and Greenfood, as well as sustainability bonds issued by Studentbostäder i Nordens and the investment company VEF.

The fund excluded companies that did not meet the fund company's extensive criteria for sustainability. As examples, Norwegian oil company Aker BP and its owner Aker were excluded due to their involvement in the extraction of fossil fuels. The gaming sector, including issuers such as Betsson and Catena Media, companies within the defence sector, such as SAAB, and the tobacco company Swedish Match were also excluded.

The fund management team had engagement dialogues with companies related to their sustainability work. The dialogues had a focus on environmental characteristics, with reducing greenhouse gas emissions being the main target. Reporting on Scopes 1-3 emissions, and a clear pathway to reducing these by committing to science-based targets were the main points of engagement. For the real estate sector, the main focus was on energy efficiency improvements of buildings with lower energy classifications. Sustainability-linked incentive programmes for executives has also been a recurring subject of discussion. During the year, engagement dialogues were held with Corem, European Energy and Castellum, among others.

### How did this financial product perform compared to the reference benchmark?

#### Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### • How does the reference benchmark differ from a broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

- How did this financial product perform compared with the reference benchmark? The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
- How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: SEB Euro Short Rate Fund

Legal entity identifier: 5493003IB3D0FUEJ6M64

### **Environmental and/or social characteristics**

### Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally** sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

	Did this financial product have a sustainable investment objective?

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the 2023 reference period, the fund promoted environmental and social characteristics by considering sustainability risks and opportunities both before the fund invested in a company and the ongoing monitoring of the investment, and by investing in companies classified as sustainable investments. In the fund's fundamental analysis process, the fund managers assessed the sustainability of, among other things, each company's products, services, operations and suppliers.

To support the work of assessing the companies' sustainability risks and opportunities, the fund used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S. SIMS-S is the fund company's proprietary sustainability model that rates all companies in the funds' investment universe based on multiple aspects of sustainability to establish a comprehensive and unbiased view.

The model consists of two main components: sustainability risks and sustainability opportunities. The model uses data from multiple vendors and is continuously modified as new data and new insights become available. The sustainability rating includes both a current status picture and a forward-looking perspective for each company. This provides fund managers the opportunity to assess current and future sustainability factors that can affect risk and return in the longer term.

Sustainability risks refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant negative impact on the value of the investment.

Sustainability opportunities refer to environmental, social or governance-related events or circumstances that, if they were to occur, would have an actual or potential significant positive impact on the value of the investment.

The fund also promoted environmental and social attributes through its continuous efforts to influence companies' business models in a more sustainable direction. The fund company influenced companies on behalf of the fund by voting at general meetings, through dialogues with management teams and boards and in cooperation with other asset managers or partners.

Furthermore, the fund promoted environmental and social characteristics during the reference period by applying the fund company's exclusion criteria. The fund excluded investments in companies operating in industries or business areas deemed to have significant sustainability challenges.

Read more about SIMS-S, exclusions and SEB Investment Management's sustainability approach at sebgroup.com/ fundcompanysustainability.

### How did the sustainability indicators perform?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund achieved a SIMS-S rating of 5.53 at the end of 2023. SIMS-S ratings are set on a scale of 0-10 with a normal distribution, which means that the normal outcome for a company is 5.0 and that most companies have a rating between 4.0-6.0.

In 2023, the fund had 200 corporate engagements in 33 companies, corresponding to 43.1% of the portfolio. These dialogues differed in nature, with some being very detailed and time-consuming while others were handled within a limited time. This means that the number of dialogues has not been directly linked to the amount of time and resources spent on advocacy dialogue. The fund voted at the annual general meetings of 31 companies.

The fund followed the exclusion policy of the fund company.

#### ...and compared to previous periods?

In the previous period (2022), the fund had a SIMS-S rating of 5.4, so the rating improved somewhat during 2023.

### What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the 2023 reference period, the fund was committed to making sustainable investments to a minimum share of 10%.

During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities are deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions

• Other social sustainability goals such as gender equality, social inclusion and diversity

Environmental objectives considered environmentally sustainable according to the EU Taxonomy:

• The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

 $\bullet$  20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the 2023 reference period, the fund was committed to making sustainable investments to a minimum share of 10%. During the period, the fund owned one or more companies that could be classified as sustainable investments whose economic activities were deemed to contribute to one or more of the following environmental and social objectives.

Social objectives:

• United Nations Social Development Goals (UN SDGs): SDG 1 — No poverty; SDG 2 — Zero hunger; SDG 3 — Good health and well-being; SDG 4 — Quality education; SDG 5 — Gender equality; SDG 6 — Clean water and sanitation; SDG 8 — Decent work and economic growth; SDG 10 — Reduced inequalities; SDG 11 — Sustainable cities and communities; and SDG 16 — Peace, justice and strong institutions; and

• Other social sustainability goals such as gender equality, social inclusion and diversity.

### How were the indicators for adverse impacts on sustainability factors taken into account?

The six goals defined by the EU Green Taxonomy: climate change mitigation, climate change adaptation, sustainable use and protection of water and marine resources, transition to a circular economy, pollution prevention and control, and protection and restoration of biodiversity and ecosystems.

Environmental objectives that are not considered compatible with the EU Taxonomy

• The United Nations Environment-related Sustainable Development Goals (UN SDGs): SDG 6 — Clean water and sanitation; SDG 7 — Affordable and clean energy; SDG 9 — Industry, innovation and infrastructure; SDG 11 — Sustainable cities and communities; SDG 12 — Responsible consumption and production; SDG 13 — Climate action; SDG 14 — Life below water; and SDG 15 — Life on land

• Operational resource efficiency in key environmental areas such as carbon use, water use or use of raw materials

The sustainable goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

Environmental goals

• 10% of the company's revenue, capital expenditure or operating costs have been classified by estimation or reporting as significantly contributing to the six EU Taxonomy goals

 $\bullet~20\%$  of the company's revenue has been assessed as contributing to other global environmental goals, directly or indirectly linked to the UN SDGs

• The company outperforms its sector and region in terms of emission factors according to quantitative data

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives

Social goals

- 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals

The fund company applies a pass/fail methodology, whereby an entire investment is classified and reported as sustainable if the requirements for contributing, not doing significant harm and good corporate governance are met. Other management companies may use a different methodology and criteria to classify an investment as sustainable. Therefore, the levels of sustainable investments may differ between fund companies depending on the methodologies, criteria and data providers used, and not only on levels of sustainability within the funds.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

During the reference period, the fund's investments have been aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights through the normbased exclusion criteria set out in the fund company's sustainability policy and using the SIMS-S.

Norm-based exclusions mean that the fund company expects issuers to adhere to international laws and conventions such as the following:

• The UN Principles for Responsible Investment

### Principal adverse

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- The UN Global Compact
- The OECD Guidelines for Multinational Enterprises

• The UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights

Companies with confirmed violations are not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# R

### How did this financial product consider principal adverse impacts on sustainability factors?

During the reference period, the fund considered principal adverse impacts on sustainability factors through the exclusions outlined in the fund company's sustainability policy where companies with operations in the following were excluded:

• Companies with activities in the fossil fuel sector;

• Companies with facilities/operations located in or near biodiversity-sensitive areas where the activities of these companies negatively impact these areas;

• Companies that do not comply with international norms and standards, such as the UN Global Compact principles and the Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises;

• Companies involved in the manufacture or sale of controversial weapons (landmines, cluster bombs, chemical and biological weapons); and

• Companies whose activities affect endangered species.

In the fund's fundamental analysis process, the fund manager conducted a sustainability assessment of, among other things, each company's products, services, operations and suppliers. To support the work of assessing the companies' sustainability risks and opportunities, the fund manager used a quantitative tool in the form of the SEB Investment Management Sustainability Score, SIMS-S.

Using SIMS-S, the fund company's proprietary sustainability model, the following indicators for adverse impacts were considered:

- Greenhouse gas emissions of the investee companies;
- The carbon footprint of the investee companies;
- Greenhouse gas intensity of the investee companies;
- Whether companies operate in the fossil fuel sector;
- Energy consumption intensity per sector with high climate impact, for the investee companies;

• Whether the investee companies have facilities/operations located in or near biodiversity-sensitive areas where the operations of these companies negatively impact these areas;

- Emissions to water generated by the investee companies;
- The amount of hazardous waste generated by the investee companies;

• Whether the investee companies lack processes and compliance mechanisms to monitor compliance with the UN Global Compact and the OECD Guidelines for Multinational Enterprises;

- The unadjusted gender pay gap in the investee companies;
- Gender distribution of the board of directors of the investee companies;

• Whether the investee companies have decarbonisation initiatives in place to align with the Paris Agreement; and

• Whether the investee companies have a supplier code of conduct (against unsafe working conditions, precarious work, child labour and forced labour).

# What were the top investments of this financial product?

The list includes the investments constituting **the greatest propor-tion of investments of** the financial product during the reference period which is: 31 December 2023

Largest investments	Sector	% Assets	Country
Skandinaviska Enskilda Banken AB	Financials	6.23	Sweden
UPM-Kymmene OYJ	Materials	5.12	Finland
LocalTapiola Finance Ltd	Financials	4.95	Finland
Swedbank AB	Financials	4.52	Sweden
Svenska Handelsbanken AB	Financials	4.35	Sweden
Sandvik AB	Industrials	4.22	Sweden
OP Corporate Bank plc	Financials	4.13	Finland
Danske Bank A/S	Financials	3.82	Denmark
S-Pankki Oyj	Financials	3.50	Finland
Neste Oyj	Energy	3.48	Finland
Nykredit Realkredit A/S	Financials	3.39	Denmark
Oma Saastopankki Oyj	Financials	3.36	Finland

# What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

### • What was the asset allocation?

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

- To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.
- Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy <sup>1</sup>?

Yes:

🗌 In fossil gas 🗌 In nuclear energy

🖌 No

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

### Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

#### **Transitional activities**

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds<sup>\*</sup>, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

### What was the share of investments made in transitional and enabling activities?

During 2023, the share of investments in transitional activities was 0.0%. The share in enabling activities was 0.0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 2022, the EU Taxonomy aligned investments were as follows: revenue: 0.2%, Capex 0.3%, Opex 0%

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

At the end of 2023, the fund had an equivalent of 10% of investments that were classified as sustainable investments with environmental objectives but not compliant with the EU Taxonomy.

The fund also had the option of investing in sustainability-labelled bonds such as green bonds. The funding from these bonds had to be used to contribute to an environmental goal in order to receive their green label, but taxonomy reporting for individual financial securities is often lacking.

It is likely that in the vast majority of cases these goals have a clear connection to the goals found in the EU's Green Taxonomy, but that reliable data is lacking for such a classification. The EU Green Taxonomy does not cover all economic sectors that are relevant for the fund to invest in and that contribute to sustainability goals. There were also relatively few companies that reported in accordance

with the EU Green Taxonomy. This may have been due both to their size and their geographical location.

The fund company uses an internal process to define the contributions to environmental objectives and the classification of sustainable investments. The environmental goals included in the Fund Company's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenues have been assessed to contribute to other global environmental goals, directly or indirectly linked to the United Nations Sustainable Development Goals (UN SDGs);

• The company outperforms its sector and region in terms of emission factors according to quantitative data;

• The company outperforms its sector and region in other resource efficiency areas, such as water use, raw material consumption or waste generation, according to quantitative data; and

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to environmental objectives.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as contributing if the investment meets one or more of the above critera.

### What was the share of socially sustainable investments?

At the end of 2023, the fund had investments corresponding to 14% classified as socially sustainable investments.

The fund company uses an internal process to define the contribution to social goals and the classification of sustainable investments.

The social goals included in SEB Investment Management's definition of sustainable investments and quantitative thresholds are:

• 20% of the company's revenue has been assessed to contribute to other global social goals, directly or indirectly linked to the UN SDGs.

• The company outperforms relative to its region in terms of gender equality factors, according to quantitative data.

• The company has been fundamentally analysed and assessed as having a high contribution and exposure to social goals.

The fund company applies a "pass/fail" methodology, where an investment is classified and recognised as sustainable if the investment meets one or more of the above criteria.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash in the meaning of ancillary liquid assets, sovereigns, supranationals (when not a sustainabilitylabelled bond), mortgage bonds/covered bonds (when not a sustainability-labelled bond), for other investments where data is missing and derivatives.

The purpose of cash was liquidity and flows; the purpose of derivatives was efficient portfolio management techniques; and the purpose of mortgage bonds, sovereigns, supranationals was for allocation/investment strategy reasons.

For mortgage bonds, the minimal environmental and social safeguards included the exclusionary process where issuers with confirmed breaches of international norms and standards are excluded, and there were no investments made in entities for sovereigns and supranationals under US, EU, UK or OECD sanctions.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The fund invested in green or social bonds in several sectors: Danske Bank, Mizuho, Nordea, Santander, SBAB, SEB, Swedbank, - financials, Mercedes-Benz - automotives, Vattenfall - utilities, Kojamo - other financial, and YIT - home construction.

The fund excluded companies that did not meet the fund company's extensive criteria for sustainability. As examples, ST1, NEOT and Neova were excluded due to use of fossil fuels and Anora for alcohol production.

The fund managers had engagement dialogues with companies related to their sustainability work. The dialogues had a focus on environmental characteristics, with reducing greenhouse gas emissions being the main target. Reporting on Scope 1-3 emissions, and a clear pathway to reducing these by committing to science-based targets were main points of engagement. During the year, fund managers had engagement dialogues with Stockholm Exergi and Vattenfall, among others.

### How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How does the reference benchmark differ from a broad market index? The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
   How did this financial product perform with regard to the sustainability indicators to deter
  - mine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform compared with the reference benchmark?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.

How did this financial product perform compared with the broad market index?

The fund did not use a benchmark index to achieve its promotion of environmental and social characteristics.
