iSHARES II PLC

BACKGROUND

iShares II public limited company (the “Entity”) is an open-ended investment company with variable capital. The Entity was incorporated in Ireland on 16 December 1999 with limited liability and segregated liability between its Funds and is organised under the laws of Ireland and is regulated by the Central Bank of Ireland (“CBI”) as a public limited company pursuant to the Companies Act 2014 (as amended) and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”).

The Entity is structured as an umbrella fund and comprises of separate funds (“Fund”) of the Entity. The shares of each Fund may be grouped into different classes of shares (each a “share class”). Each Fund will represent a separate portfolio of assets and may consist of one or more share classes. Each share class may apply different subscription and redemption provisions, charges, fees or brokerage arrangements. The creation of an additional class of shares will be notified to the CBI in advance. The portfolio of assets maintained for each Fund will be invested in accordance with the investment objectives and policies applicable to each Fund as set out in the prospectus.

While assets and liabilities that are specific to a share class within a Fund would be attributable to (and should be borne by) only that share class, there is no segregation of liabilities between share classes as a matter of Irish law. Due to the lack of segregation of liabilities as a matter of law, there is a risk that the creditors of a share class may bring a claim against the assets of the Fund notionally allocated to other share classes.

The term “Fund” shall be deemed to mean either a Fund or Funds of the Entity, or if the context so requires, the Manager or its delegate acting for the accounts of the relevant Fund. The term “BlackRock” and “Investment Manager” are used to represent BlackRock Advisors (UK) Limited as appropriate. All references to “redeemable shares” shall be deemed to mean redeemable participating shares when Fund shares are classified as financial liabilities. The term “Directors” means the directors of the Entity.

Further details, including the investment objectives and minimum subscription requirements, are set out in the Entity’s prospectus.

BACKGROUND (continued)

Changes to the Entity during the financial period (continued)

The following share classes were delisted from the SIX Swiss Exchange and the Berne Stock Exchange during the financial period. As confirmed by BlackRock Fund Registrations and Listings, these delistings were facilitated to ensure that the share classes are only traded on the most utilised trading lines available in the market, thereby avoiding unnecessary duplication across trading venues and thus furthermore enhancing market quality. This decision was made in the best interest of the shareholders.

Fund details

The Entity had 47 Funds in operation as at 30 April 2021.

The interim report and unaudited financial statements of other Funds within the Entity are prepared separately and are available, free of charge, on request from the Manager.

These Funds are Exchange Traded Funds ("ETFs"), which provide the flexibility of a share with the diversification of a Fund, can be bought and sold like any other share listed on a stock exchange, but provide instant exposure to many companies or various financial instruments relevant to the Fund and its benchmark index.

United Kingdom exit from the European Union

On 31 January 2020, the United Kingdom (the "UK") formally withdrew and ceased being a member of the European Union (the "EU"). Following this, the UK entered into a transition period which lasted for the remainder of 2020, during which period the UK was subject to applicable EU laws and regulations. The transition period expired on 31 December 2020, and EU law no longer applies in the UK.

On 30 December 2020, the UK and the EU signed an EU-UK Trade and Cooperation Agreement ("UK/EU Trade Agreement"), which applies from 1 January 2021 and sets out the foundation of the economic and legal framework for trade between the UK and the EU. As the UK/EU Trade Agreement is a new legal framework, the implementation of the UK/EU Trade Agreement may result in uncertainty in its application and periods of volatility in both the UK and wider European markets throughout 2021 and beyond. The UK's exit from the EU is expected to result in additional trade costs and disruptions in this trading relationship. While the UK/EU Trade Agreement provides for the free trade of goods, it provides only general commitments on market access in services together with a "most favoured nation" provision which is subject to many exceptions. Furthermore, there is the possibility that either party may impose tariffs on trade in the future in the event that regulatory standards between the EU and the UK diverge. The terms of the future relationship may cause continued uncertainty in the global financial markets, and adversely affect the performance of the Entity.

Volatility resulting from this uncertainty may mean that the returns of the Entity's investments are affected by market movements, the potential decline in the value of Sterling or Euro, and the potential downgrading of sovereign credit ratings of the UK or an EU member state.

Outbreak of COVID-19

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has developed into a global pandemic. The impact of this significant event on the Funds' financial risk exposure is disclosed in Note 3.1.

The Manager has assessed the impact of market conditions arising from the COVID-19 outbreak on the Funds' ability to meet their investment objectives. Based on the latest available information, the Funds continue to be managed in line with their investment objectives, with no disruption to the operations of the Funds and the publication of net asset values ("NAV").

Stock exchange listings

The Entity maintained a primary listing on the London Stock Exchange ("LSE").

INVESTMENT MANAGER'S REPORT

Investment objective

The investment objective of the Funds is to provide investors with a total return, taking into account the capital and income returns, which reflect the total returns of the respective benchmark listed in the below table.

Investment management approach

For physically replicating funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights represented in the benchmark index over a defined period of time.

For non-replicating funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The objective is to generate a return which is as close as practicable to the total return of the benchmark index net of transaction costs and gross of fees and other cost.

INVESTMENT MANAGER'S REPORT (continued)

Performance summary, tracking difference and tracking error

The following table compares the realised Fund performance against the performance of the relevant benchmark index measure during the financial period ended 30 April 2021. It also discloses the anticipated tracking error of the Fund (disclosed in the prospectus on an ex-ante basis) against the actual realised tracking error of the Fund as at 30 April 2021.

Further information on these performance measures and calculation methodologies used is detailed below:

- Fund returns disclosed are the performance returns for the primary share class for each Fund, net of fees, which has been selected as a representative share class. The primary share class represents the class of share invested in by the majority of investors in the Fund and also takes into account other relevant factors such as the Fund's base currency. The returns disclosed for the comparative are in the same currency as the primary share class, unless otherwise stated. Performance returns for any other share class can be made available on request.
- For Funds that commenced trading and fully redeemed during the financial period, returns are shown from the date the Fund commenced trading and to the date the Fund fully redeemed, and the total expense ratio ("TER") is the effective TER from the date the Fund commenced trading and to the date the Fund fully redeemed.
- Fund returns are based on the NAV calculated in accordance with the prospectus for the financial period under review with any dividends reinvested. Due to Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") requirements which apply to the financial statements, there may be differences between the NAV per share as recorded in the financial statements and the NAV per share calculated in accordance with the prospectus.
- Anticipated tracking error is based on the expected volatility of differences between the returns of a fund and the returns of its benchmark index.
- Realised tracking error is the annualised standard deviation of the difference in monthly returns between a fund and its benchmark index. Tracking error shows the consistency of the returns relative to the benchmark index over a defined period of time. The realised tracking error is annualised and calculated using data from the preceding 36 month observation period. Where a Fund has not been trading for 36 months, the annualised tracking error since inception has been presented.

Tax may also impact tracking error due to withholding tax suffered by the Fund on any income received from its investments. The level and quantum of tracking error arising due to withholding taxes depends on various factors such as any reclaims filed on behalf of the Fund with various tax authorities, any benefits obtained by the Fund under a tax treaty or any securities lending activities carried out by the Fund. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

INVESTMENT MANAGER'S REPORT (continued)

Global Economic Overview

Global equities, as represented by the MSCI All Country World Index ("ACWI") (in US Dollar terms), posted a return of 28.29% for the six months ended 30 April 2021. The reporting period was characterised by continued recovery from the sharp decline in financial markets that followed the emergence and spread of COVID-19 in early 2020. As countries adapted to the restrictions and behavioural changes necessitated by the pandemic, economies re-opened and most commercial activity resumed. Policy responses from governments and the promise of new treatments for COVID-19 helped drive equity gains. In the second half of the reporting period, the beginning of mass vaccination programmes around the globe boosted investors' optimism despite ongoing weakness in the real economy. The prospect of a return to normalcy and increased consumer spending due to pent-up demand led investors to increase their expectations for future inflation.

Prior to the beginning of the reporting period, driven by the COVID-19 outbreak, bond performance diverged significantly based on credit quality, as investors sought out higher-rated bonds in the face of uncertainty. However, the US Federal Reserve's (the "Fed") implementation of an unprecedented corporate bond purchasing facility provided significant support to US corporate bond prices. Consequently, the reporting period saw a reversal of the flight from risk as investor appetite for corporate bonds, particularly lower-quality, higher-yield bonds, increased substantially. As a result, high-yield corporate bonds posted a solid performance, while investment-grade corporate bonds declined.

Demand was also high for US Treasuries, even as issuance increased to fund deficit spending, and the reporting period began with 10-year Treasury yields below 1%. However, yields increased notably in early 2021 as investors' inflation expectations picked up, leading to negative US Treasury returns for the six month period.

Stocks in emerging markets posted a strong advance for the reporting period. The development of successful vaccines for COVID-19 particularly benefited emerging market stocks, as increased optimism led to a risk-on investing environment. Asian stocks performed particularly well, as China's strong recovery helped other emerging market countries in the region that trade heavily with China. US Dollar denominated, emerging market bond prices posted a slightly positive return for the six month period, similar to other global bonds.

In the commodities market, gold prices declined as investors moved toward riskier assets amid signs of economic recovery and mass vaccination programmes. Oil prices advanced notably amid strong demand from Asia, as the prospects for further economic growth improved and global trade rebounded.

On the foreign exchanges, the US Dollar declined against many global currencies, reflecting ongoing monetary stimulus and historically low interest rates relative to other developed economies. The Chinese Yuan, the Euro, the Swiss Franc and the Sterling advanced against the US Dollar, while the Japanese Yen declined slightly.

Economic conditions during the reporting period reflected an improvement following the relaxation of some travel and business restrictions put in place to counteract COVID-19. While growth slowed from the sharp rebound of the third quarter of 2020, most major economies continued to recover. In the fourth quarter of 2020 and the first quarter of 2021, growth continued at a slower pace in the US and Japan, while the Eurozone economy contracted slightly amid renewed lockdowns. China continued its steady economic expansion in the final quarter of 2020, followed by record year-over-year growth in the first quarter of 2021.

Governments responded to the economic slowdown with massive fiscal and monetary stimulus. The US added to its already-substantial stimulus with additional rounds in December 2020 and March 2021, and many other countries around the world also provided fiscal stimulus to boost their economies. The Fed maintained short-term interest rates near zero, and along with other influential central banks, continued a major bond-buying programme to stabilise debt markets. The Fed further committed to a near-zero interest rate policy through 2022 in a bid to promote longer-term economic expansion, even if inflation were to temporarily rise above its 2% target rate.

NOTES TO THE FINANCIAL STATEMENTS

1. General information

The Entity is an open-ended investment company domiciled and incorporated under the laws of Ireland as a public limited company. The Entity is authorised by the CBI and is governed by the provisions of the UCITS Regulations with its registered office at J.P Morgan, 200 Capital Dock, 79 Sir John Rogerson's Quay, Dublin 2, D02 RK57, Ireland.

2. Significant accounting policies

2.1 Basis of preparation

The financial statements of the Entity are prepared in accordance with Financial Reporting Standard 104 Interim Financial Reporting ("FRS 104") applicable in the United Kingdom and Republic of Ireland. The principal accounting policies and estimation techniques are consistent with those applied to the previous annual financial statements with the exception of those outlined below.

All amounts have been rounded to the nearest thousand, unless otherwise indicated.

2.2 Change in presentation – OTC derivatives: Contracts for difference ("CFDs")

Reason for change in presentation

Investments in certain OTC derivatives, namely CFDs, by their nature and characteristics meet the key criteria of a swap and are more appropriately classified as swaps.

Impact of change in presentation

The change had no impact on the NAV of the Fund or the presentation on the Balance Sheet. Investments in these OTC derivatives continue to be classified as "Financial assets at fair value through profit or loss" or "Financial liabilities at fair value through profit or loss" on the Balance Sheet. The change also had no numerical impact on the Income Statement or the Notes to the Financial Statements, certain elements of these OTC derivatives will now be presented within the Notes to the Financial Statements as opposed to the face of the Income Statement.

3. Financial risks

Each Fund's investment activities expose it to the various types of risk which are associated with the financial instruments and markets in which it invests. The risks are substantially consistent with those disclosed in the previous annual financial statements with the exception of those outlined below.

3.1 Market risk arising from price risk

Price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting similar financial instruments traded in the market. Local, regional or global events such as war, acts of terrorism, the spread of infectious illness or other public health issue, recessions, or other events could have a significant impact on each Fund and the market price of its investments.

An outbreak of an infectious respiratory illness caused by a novel coronavirus known as COVID-19 has developed into a global pandemic. This coronavirus has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19 has adversely affected the economies of many nations across the entire global economy, individual issuers and capital markets, and could continue to extents that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty.

3. Financial risks (continued)

3.1 Market risk arising from price risk (continued)

A key metric used by the BlackRock Risk and Quantitative Analysis Group to measure market risk is Value-at-Risk ("VaR") which encompasses currency, interest rate and price risk. VaR is a statistical risk measure that estimates the potential portfolio loss from adverse market movements in an ordinary market environment. VaR analysis reflects the interdependencies between risk variables, unlike a traditional sensitivity analysis.

The one-day VaRs based on 99% confidence level are outlined in the table below:

4. Fair value hierarchy

Each Fund classifies financial instruments measured at fair value using a fair value hierarchy. The fair value hierarchy has the following categories:

Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the Entity can access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly. This category includes instruments valued using: quoted prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability. This category includes all instruments where the valuation techniques used include inputs not based on market data and these inputs could have a significant impact on the instrument's valuation. This category also includes instruments that are valued based on quoted prices for similar instruments where significant Entity determined adjustments or assumptions are required to reflect differences between the instruments and instruments for which there is no active market.

Specific valuation techniques used to value financial instruments classified as level 2 and level 3 include:

- (i) for debt and equity instruments, the use of quoted market prices or dealer quotes for similar instruments;
- (ii) for foreign equities, using independent fair value adjustment factors to reflect the difference between the last market close and the valuation point of each Fund;
- (iii) for defaulted debt instruments, the use of recent transactions and/or defaulted equity instruments for which market data is unavailable;
- (iv) for interest rate swaps, the present value of the estimated future cash flows based on observable yield curves;
- (v) for foreign currency forwards, present value of future cash flows based on the forward exchange rates at the balance sheet date;
- (vi) for foreign currency options, option pricing models; and
- (vii) for other financial instruments, discounted cash flow analysis.

iSHARES II PLC

NOTES TO THE FINANCIAL STATEMENTS (continued)

4. Fair value hierarchy (continued)

All of the resulting fair value estimates are included in level 2 except for unlisted equity securities, a contingent consideration receivable and certain derivative contracts, where the fair values have been determined based on present values and the discount rates used were adjusted for counterparty or own credit risk.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' inputs requires significant judgement. The Directors consider observable inputs to be market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

NOTES TO THE FINANCIAL STATEMENTS (continued)

5. Operating expenses

The Entity employs an “all in one” fee structure for its Funds, with each Fund paying all of its fees, operating costs and expenses (and its due proportion of any costs and expenses allocated to it) as a single flat fee (the TER). Where a Fund has multiple share Classes, any fees, operating costs and expenses which are attributable to a particular share Class (rather than the entire Fund) will be deducted from the assets notionally allocated by each Fund to that share Class. The TER is calculated in accordance with the Committee of European Securities Regulators (“CESR”) guidelines on the methodology for calculation of the ongoing charges figure in the Key Investor Information Document (“KIID”) or the product page of the website at www.ishares.com.

The Manager is responsible for discharging all operational expenses, including but not limited to fees and expenses of the Directors, Investment Manager, Depository, Administrator, Transfer Agent and Registrar from the amounts received by the Manager from the TER. Such operational expenses include regulatory and audit fees but exclude transaction costs and extraordinary legal costs. In the event a Fund’s costs and expenses in connection with the operation of the Fund exceed the stated TER, the Manager will discharge any excess amount out of its own assets.

Management fees (inclusive of investment management fees)

The Manager is entitled to an annual fee at rates not exceeding those set out on the following table. These rates are the maximum fee rates as at 30 April 2021:

NOTES TO THE FINANCIAL STATEMENTS (continued)

7. Taxation (continued)

Irish tax

Under current law and practice, the Entity qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Entity in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Entity; or the Entity has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the Entity with the necessary signed annual declarations; and
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as CREST) will not constitute a chargeable event. It is the current intention of the Directors that all the shares in the Entity will be held in CREST or another recognised clearing system.

Overseas tax

Dividends, interest and capital gains (if any) received on investments made by the Entity may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Entity or its shareholders.

For financial reporting purposes, and in accordance with FRS 104, the Entity must recognise a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

8. Share capital

Authorised

The authorised share capital of the Entity is GBP40,000 divided into 7 Subscriber Shares of a par value of GBP1.00 each and 500,000,000,000 participating shares of no par value (“NPV”).

Subscriber shares

The 7 subscriber shares are currently in issue and are held by the Manager and nominees of the Manager at 30 April 2021 and 31 October 2020. They do not form part of the NAV of the Entity. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors this disclosure reflects the nature of the Entity’s investment business.

Voting rights

The holders of the subscriber shares and redeemable shares shall, on a poll, be entitled to one vote per share.

SHARI'AH INVESTMENT MANAGER'S REPORT (UNAUDITED)

SHARI'AH COMPLIANT FUNDS

iShares II plc has 3 Shari'ah compliant funds, namely:

- iShares MSCI EM Islamic UCITS ETF;
- iShares MSCI USA Islamic UCITS ETF;
- iShares MSCI World Islamic UCITS ETF.

These Funds are the subject of additional controls and procedures that enable them to achieve their investment objective as set out below. The Funds aim to reflect the performance of emerging markets, US equities and global equities respectively, screening the individual constituents of the relevant stock indices for compliance with Shari'ah investment principles.

RISK FACTORS

The benchmark index and its constituent holdings will be retrospectively determined as being Shari'ah compliant by the MSCI Shari'ah Board. The performance of the Funds is measured against the specific benchmark index which is stated by this index provider to be compliant with Shari'ah. The Funds will gain exposure to the component securities of the benchmark index in accordance with the guidance and advice provided by the Shari'ah Panel. As a consequence, this may mean that the Funds underperform other investment funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria (for example the inability to invest in interest bearing securities or participate in securities lending).

Neither the Funds, the Manager nor the Investment Manager makes any representation or warranty either expressly or implied, with respect to the fairness, correctness, accuracy, reasonableness or completeness of such determination. In the event that the status of such Shari'ah compliance should change, neither the Funds, the Manager nor the Investment Manager accepts liability in relation to such change, but will endeavour to inform each investor as soon as reasonably practicable following such change.

Although the Funds intend to observe Shari'ah at all times, no such assurance can be given as, for example, there may be occasions when the Funds' Investments do not fully comply with such criteria for factors outside the control of the Shari'ah Funds.

Compliance with Shari'ah may result in the benchmark index changing its component securities with limited notice, in which case the Investment Manager may be required to dispose of investments in circumstances that are less advantageous than might otherwise be the case. Similarly, cash balances held by the Shari'ah Funds from time to time may be deposited on terms which shall grant no return on the sum deposited for the benefit of the Funds.

INVESTMENT AND BORROWING RESTRICTIONS

Shari'ah investment principles do not allow investment in companies which are directly active in, or derive more than 5% of their revenue (cumulatively) from, the following activities:

- alcohol: distillers, vintners and producers of alcoholic beverages, including producers of beer and malt liquors, owners and operators of bars and pubs;
- tobacco: cigarettes and other tobacco products manufacturers and retailers;
- pork related products: companies involved in the manufacture and retail of pork products;
- financial services: commercial banks involved in retail banking, corporate lending, investment banking; companies involved in mortgage and mortgage related services; providers of financial services, including insurance, capital markets and specialised finance; credit agencies; stock exchanges; specialty boutiques; consumer finance services, including personal credit, credit cards, lease financing, travel related money services and pawn shops; financial institutions primarily engaged in investment management, related custody and securities fee based services; companies operating mutual funds, closed-end funds and unit investment trusts; financial institutions primarily engaged in investment banking and brokerage services, including equity and debt underwriting, mergers and acquisitions; securities lending and advisory services institutions; and insurance and reinsurance brokerage firms, including companies providing property, casualty, life disability, indemnity or supplemental health insurance;
- defence/weapons: manufacturers of military aerospace and defence equipment, parts or products, including defence electronics and space equipment;

- (b) whose cash (including balances with banks) and interest-bearing securities is more than 33.33% of total market capitalisation;
- (c) whose receivables are equal to or greater than 70% of total assets; and/or

SHARI'AH PANEL

Compliance with Shari'ah in the operations of the Shari'ah Funds shall be determined by the Shari'ah Panel. The Shari'ah Panel consists of Shari'ah scholars with expertise in Islamic investment. The Shari'ah Panel's primary duties and responsibilities are to:

- (i) advise on the Shari'ah aspects of the Shari'ah Funds,
- (ii) issue an opinion, by way of a Fatwa, ruling or guidelines as to whether the activities of the Shari'ah Funds comply with Shari'ah and
- (iii) make recommendations or issue guidance as to how the Shari'ah Funds could be made Shari'ah compliant. The Investment Manager may also, from time to time, utilise alternative methods for gaining exposure to the component securities of the Benchmark Index (e.g. ADRs/GDRs or other collective investment schemes) and may request the Shari'ah Panel to assess the proposed method of investment for compliance with Shari'ah law. The Investment Manager relies on the Shari'ah Panel's advice and guidance in ensuring that the Shari'ah Funds operate in a manner which is Shari'ah compliant.

The Shari'ah Panel will not be responsible for matters relating to:

- (i) the management and supervision of the Company and its Funds, operations or vendors (not pertaining to Shari'ah),
- (ii) the application of Irish or other jurisdictional law,
- (iii) determining which securities form the underlying constituents of any index which acts as the benchmark of the Shari'ah Funds or any other Fund of the Company,
- (iv) determining what is the appropriate method to calculate dividend purification of the underlying securities in any such index and
- (v) determining in individual cases what form of security is appropriate to be held in order to match the return of the underlying securities in any such index (equity, depository or otherwise) provided always that the MSCI Shari'ah Board has determined generally that such form of security is compliant with Shari'ah.

Following guidance of the Shari'ah Panel, the Investment Manager will ensure that any provisions or references to investment methods or techniques in the prospectus, which would otherwise be available to the Shari'ah Funds in pursuing their investment policies, are not availed of to the extent they are not Shari'ah compliant. The Shari'ah Panel will advise on alternative investment techniques for the Shari'ah Funds which comply with the Shari'ah Funds' investment policies and are Shari'ah compliant.

iSHARES II PLC

SHARI'AH INVESTMENT MANAGER'S REPORT (UNAUDITED) (continued)

SHARI'AH PANEL (continued)

The Shari'ah Panel has issued a Fatwa in respect of the Shari'ah Funds. The Shari'ah Panel has issued an annual Shari'ah compliance certificate for the Shari'ah Funds.

Conflicts of interest relating to the investment of the Shari'ah Funds' assets may arise between members of the Shari'ah Panel and the Shari'ah Funds. In the event that a conflict of interest does arise, members of the Shari'ah Panel will endeavour, so far as they are reasonably able, to ensure that it is resolved fairly and that investment opportunities are allocated on a fair and equitable basis. Subject to this, members of the Shari'ah Panel may effect transactions where those conflicts arise and shall not be liable to account for any profit, commission or other remuneration arising.

Remuneration of the Shari'ah Panel is paid by the Investment Manager of the Shari'ah Funds.

PURIFICATION OF DIVIDENDS

Investors are responsible for ensuring the purification of dividends received from the Shari'ah Funds where such dividends include prohibited income (e.g. interest earnings). Investors shall be notified on the dividend declaration date of the percentage of prohibited income in any dividend to be paid to them which will require purification. Pure and impure dividend amounts reported to investors will be based on MSCI's calculation to ensure consistency with the Benchmark Index. Neither the Shari'ah Funds, the Manager nor the Investment Manager is responsible for MSCI's calculation of the pure and impure dividend amounts.

The Entity may, on behalf of each Fund and subject to the conditions and within the limits laid down by the CBI, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes. Transactions for the purposes of efficient portfolio management may be undertaken with a view to achieving a reduction in risk, a reduction in costs or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the relevant Fund and the general provisions of the Directive. These techniques and instruments may include investments in FDI such as interest rate and bond futures (which may be used to manage interest rate risk), index futures (which may be used to manage cash flows on a short term basis), options (which may be used to achieve cost efficiencies, for example where the acquisition of the option is more cost effective than purchasing of the underlying asset), swaps (which may be used to manage currency risk) and investments in money market instruments and/or money market collective investment schemes. New techniques and instruments may be developed which may be suitable for use by the Entity and the Entity (subject to the Central Bank's requirements) may employ such techniques and instruments.

A Fund may enter into securities lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management subject to the conditions and limits set out in the Central Bank UCITS Regulations and in accordance with the requirements of the CBI.

The underlying exposure obtained through FDI and at the identity of the counterparties to these FDIs at the financial period end are disclosed on the relevant Fund's schedule of investments.

Securities Lending and Total Return Swaps

All securities lending transactions entered into by each Fund are subject to a written legal agreement between each Fund and the securities lending agent, BlackRock Advisors (UK) Limited, a related party to the Entity, and separately between the securities lending agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is transferred under a title transfer arrangement and is delivered to and held in an account with a tri-party collateral manager in the name of the Depositary on behalf of each Fund. Collateral received is segregated from the assets belonging to each Fund's Depositary or the securities lending agent.

All total return swaps are entered into by each Fund under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund and a counterparty that governs OTC FDIs (including total return swaps) entered into by the parties. The parties' exposures under the ISDA Master Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all OTC FDIs entered into by a Fund under the ISDA Master Agreement, not just total return swaps.

All collateral received/posted by each Fund under the ISDA Master Agreement is transferred bilaterally under a title transfer arrangement.

The following table details the value of securities on loan as a proportion of each Fund's total lendable assets and NAV and the value of total return swaps as a proportion of the Fund's NAV, as at 30 April 2021 and the income/returns earned for the period ended 30 April 2021. Total lendable assets represent the aggregate value of assets forming part of a Fund's securities lending programme. This excludes any assets held by the Fund that are not considered lendable due to any market, regulatory, investment or other restriction. The value of total return swaps is based on the underlying exposure value on a gross absolute basis.

No collateral had a maturity tenor of less than 8 days.

Investment grade securities are those issued by an entity with a minimum investment grade credit rating from at least one globally recognised credit rating agency; Standard & Poor's, Moody's or Fitch.

A recognised equity index contains at least 20 equities where no single equity represents more than 20% of the total index and no five equities combined represent more than 60% of the total index.

The maturity tenor analysis for fixed income securities received or posted as collateral is based on the respective contractual maturity date, while for equity securities, ETFs and money market funds received or posted as collateral are presented as open transactions as they are not subject to a contractual maturity date.

All cash received or posted as collateral has an open maturity tenor as it's not subject to a contractual maturity date.
