1. General information on the Bevek

1.1. Organisation of the Bevek

Office

2 Havenlaan - B-1080 Brussels, Belgium.

Date of incorporation

21 March 1991

Life

Unlimited.

Status

Public Bevek with various sub-funds that has opted for investments complying with the conditions of Directive 2009/65/EC and which, as far as its operations and investments are concerned, is governed by the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

In the relationship between the investors, each sub-fund will be viewed as a separate entity. Investors have a right only to the assets of and return from the sub-fund in which they have invested. The liabilities of each individual sub-fund are covered only by the assets of that sub-fund.

Financial portfolio management

Regarding the delegation of the management of the investment portfolio, please see the information concerning the sub-funds.

Financial service providers

The financial services providers in Belgium are:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Custodian

KBC Bank NV, Havenlaan 2, B-1080 Brussels.

Custodian's activities

The custodian:

- Ensures the safe-keeping of the assets of the Bevek and compliance with the standard obligations in this regard;
- Ensures that the sale, issue, purchase, redemption and withdrawal of shares in the Bevek occur in compliance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Ensures that the net asset value of the shares in the Bevek is calculated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus;
- Carries out the instructions of , provided that these do not contravene the applicable legal and regulatory provisions, the articles of association and/or the prospectus;
- Ensures that in transactions relating to the assets of the Bevek, the equivalent value is transferred to the Bevekwitthin the usual terms;
- Ascertains that:

- i. The assets in custody correspond with the assets stated in the accounts of the Bevek;
- ii. The number of shares in circulation stated in the accounts corresponds with the number of shares in circulation as stated in the accounts of the Bevek;
- iii. The investment restrictions specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- iv. The rules regarding fees and costs specified in the applicable legal and regulatory provisions, the articles of association and the prospectus are respected;
- v. The returns of the Bevek are appropriated in accordance with the applicable legal and regulatory provisions, the articles of association and the prospectus.

The custodian ensures that the cash flows of the Bevek are correctly monitored and in particular that all payments by or on behalf of subscribers on subscription to shares in the Bevek, have been received and that all the cash of has been booked to cash accounts that:

1. Have been opened in the name of the Bevek, in the name of the management company acting on its behalf, or in the name of the custodian acting on its behalf;
2. Have been opened at an entity as intended in Article 18(1a, b and c) of Directive 2006/73/EC; and
3. Are held in accordance with the principles set out in Article 16 of Directive 2006/73/EC.

If the cash accounts have been opened in the name of the custodian acting in name of the Bevek, no cash from the entity intended in Article 18(1a, b and c) of Directive 2006/73/EC and none of the custodian's own cash may be booked to these accounts.

The assets of the Bevek are placed in custody with a custodian as follows:

- a) For financial instruments that may be held in custody:
 - i. The custodian will hold in custody all financial instruments that may be registered in a financial instrument account in the books of the custodian, as well as all financial instruments that can be physically delivered to the custodian;
 - ii. the custodian will ensure that all financial instruments that can be registered in a financial instrument account in the custodian's books, are registered in the custodian's books in separate accounts in accordance with the principles set out in Article 16 of Directive 2006/73/EC; these separate accounts have been opened in the name of the Bevek or in the name of the management company acting on its account, so that it can be clearly ascertained at all times that they belong to the Bevek, in accordance with the applicable law.
- b) For other assets:
 - i. The custodian will verify that the Bevek or the management company acting on its behalf is the owner of the assets by checking based on information or documents provided by the Bevek or the management company and, where appropriate, of available external proofs, whether the Bevek or the management company acting on its behalf has ownership;
 - ii. The custodian will maintain a register of the assets from which it is clear that the Bevek or the management company acting on its behalf is the owner thereof and will keep that register up-to-date.

The custodian's duty to return the financial instruments only applies to financial instruments that may be held in custody.

Custody tasks delegated by the custodian

The custodian of the Bevek has delegated a number of custody tasks as of the publication date of this annual/half-year report. The tasks delegated to this sub-custodian are:

- Holding the required accounts in financial instruments and cash;
- Carrying out the custodian's instructions regarding the financial instruments and cash;
- Where required, the timely delivery of the relevant financial instruments to other parties involved with holding them;
- The collection of every type of return from the financial instruments;
- The appropriate communication to the custodian of all information that the sub-custodian receives directly or indirectly from the issuers via the chain of depositaries and performing the required formalities with regard to the financial instruments, with the exception of exercising voting rights, unless otherwise agreed in writing;
- Maintaining and communicating to the custodian all required details regarding the financial instruments;
- Processing corporate events on financial instruments, whether or not after the holder of these instruments has made a choice;
- Providing the services that have been agreed between the custodian and the sub-custodian and are legally permitted, with the exception of investment advice and asset management and/or any other form of advice relating to transactions in or the simple holding of financial instruments;
- Maintaining and communicating to the custodian all required details regarding the financial instruments.

List of sub-custodians and sub-sub-custodians

The updated list of entities to which the custodian has delegated custody duties and, where applicable, the entities to which the delegated custody duties have been sub-delegated, can be consulted at www.kbc.be/investment-legal-documents.

The custodian is liable for the loss of financial instruments held in custody in the sense of Article 55 of the Law of 3 August 2012 relative to undertakings for collective investment complying with the conditions of Directive 2009/65/EC and the undertakings for investment in receivables.

Investors can approach the institutions providing the financial services for up-to-date information regarding the identity of the custodian and its principal duties, as well as the delegation of these duties, and the identity of the institutions to which these duties have been delegated or sub-delegated, and also regarding any conflicts of interest as specified below.

Conflicts of interest

The custodian will take all reasonable measures to identify conflicts of interest that may arise in the execution of its activities between

- The custodian and management company of the Bevek, or the management companies of other beveks or funds of which the custodian holds assets;
- The custodian and the Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- The custodian and the investors in this Bevek whose assets the custodian holds, or other beveks or funds of which the custodian holds assets;
- These parties themselves.

The custodian of the Bevek will implement and maintain effective organisational and administrative procedures in order to take all reasonable measures to detect, prevent, manage and control conflicts of interest so that they do not prejudice the interests of the aforementioned parties.

If these procedures are not sufficient to be able to assume with reasonable certainty that the interests of the aforementioned parties have not been harmed, the investors will be notified of the general nature or causes of conflicts of interest according to the procedure described on the following website: www.kbc.be/investment-legal-documents (About Us > Code of conduct for conflicts of interest). Investors who wish to be informed personally of such conflicts of interest can contact the financial services providers. If necessary, the open-ended investment company's custodian will adjust its processes.

Remuneration policy and remuneration paid by the management company

General:

The KBC group has a specific management structure, under which KBC Group NV and the various group companies are brought together within one or more business units, for operational purposes.

KBC Asset Management NV is part of the KBC Asset Management product factory within the International Markets Division of the KBC group.

In 2010, the KBC group introduced the KBC Remuneration Policy, which lays down general remuneration guidelines for all staff and specific guidelines for those employees who could have a material impact on the risk profile of the company. Further information about the remuneration policy is available in the 'KBC Asset Management Group Compensation Report', which you can read at <https://kbcam.kbc.be/en/about-us>. The compensation report includes information from the level of the KBC Asset Management group entities about the remuneration principles and contains remuneration figures for the relevant fiscal year according to EU and national legislation. The report comprises the following sections:

- Overview of remuneration
- Risk adjustments
- Corporate governance
- Information provided on remuneration

Remuneration paid by the management company for fiscal year ending 31 December 2025

The figures below show remuneration within KBC Asset Management NV as a whole (without breakdown).

the total reward over the fiscal year, broken down into the fixed and variable pay that the Management Company / Manager pays to its staff, the number of recipients and, where appropriate: - the carried interest paid by the sicav; or - any amount paid direct by the bevek/sicav, including any performance rewards.	Fixed pay: € 44.840.446 Variable pay: € 5.216.642 Number of recipients: 371
the aggregate pay amount, broken down into the highest management and the Management Company / manager's staff whose acts significantly affect the fund's risk profile.	Management rewards: € 2.214.934 Reward for the manager's staff whose acts affect the risk profile: € 330.667

Note: the figures contained in this table have not yet been approved by the Management Company's shareholders in general meeting, which is not scheduled until later this year. Any correction is made in the subsequent annual report.

The annual evaluation required by Article 213/2, 3rd and 4th of the Law of 3 August 2012 on undertakings for collective investment meeting the conditions of Directive 2009/65/EC and undertakings for investment in debt securities did not find any irregularities in compliance with the remuneration policy.

List of sub-funds and share classes of KBC Equity Fund

The table below contains an overview of the sub-funds sold and their share classes. If no share class is mentioned for a sub-fund, that means that only capitalisation- and/or distribution units are available.
The characteristics of the different share classes are given in the prospectus.

In the event of discrepancies between the Dutch and the other language versions of the Annual report, the Dutch will prevail.

1.2. Management report

1.2.1. Information for the shareholders

Pursuant to Article 3:6 of the Code of Companies and associations, information is supplied regarding the following:

- The balance sheet and profit and loss account provide a true and fair view of the performance and results of the undertaking for collective investment. The 'General market overview' section includes a description of the main risks and uncertainties facing the undertaking for collective investment.
- The investments of KBC Equity Fund Emerging Europe and KBC Equity Fund Emerging Markets include positions in shares listed on the Moscow stock exchange. Given the particular situation and the sanctions policy, these positions are valued at 0.01 RUB /share; the impact on the NAV can roughly be estimated at 38.50% and 1.54% respectively
- As regards events that might have a material impact on the development of the undertaking for collective investment, please refer to the 'Outlook' heading in the 'General market overview' section.
- The undertaking for collective investment does not conduct any research and development.
- The undertaking for collective investment does not have any branch offices.
- In establishing and applying the valuation rules, it is assumed that the undertaking for collective investment will continue to pursue its activities, even if the profit and loss account shows a loss for two consecutive financial years.
- All information required by the Code of Companies and associations has been included in this report.
- The risk profile of the undertaking for collective investment specified in the prospectus provides an overview regarding risk management.

Reclaims of foreign withholding taxes on dividends.

In some Member States of the European Union domestic investment funds benefit from exemptions or refunds of withholding taxes when they receive dividends from a domestic entity. The same tax benefits do not apply to non-resident investment funds investing cross-border. Such tax system is not in accordance with the free movement of capital within the European Union.

Since 2006 KBC investment funds yearly file requests for a refund of discriminatory withholding tax paid on dividends in France, Spain, Italy, Germany, Finland, Sweden, Norway and Austria. Refunds have already been received from French, Norwegian, Swedish, Spanish and Austrian fiscal administration.

The funds no longer file requests in The Netherlands as a consequence of recent Dutch Court decisions.

There were no refunds this period.

1.2.1.1. Securities Financing Transactions (SFTs)

Except for the sub-fund Emerging Markets Responsible Investing, EMU Small & Medium Caps Responsible Investing, Eurozone DBI-RDT, Fundamental Opportunities DBI-RDT, Global Value DBI-RDT Responsible Investing, Minimum Variance Responsible Investing, World DBI-RDT, World DBI-RDT Responsible Investing applies:

General

Each sub-fund may lend financial instruments within the limits set by law and regulations.

Lending financial instruments is a transaction where one a sub-fund transfers financial instruments to a counterparty in exchange for financial collateral and subject to an undertaking on the part of that counterparty to supply the sub-fund with comparable financial instruments at some future date or on the sub-fund's request. The counterparty pays a fee for this to the sub-fund.

This takes place within the framework of a securities lending system managed by either a 'principal' or an 'agent'. If it is managed by a principal, a sub-fund has a relationship only with the principal of the securities lending system which acts as counterparty and to whom title to the loaned securities is transferred. If it is managed by an agent, a sub-fund has a relationship with the agent (as manager of the system) and with one or more counterparties to whom title to the loaned securities is transferred. The agent acts as intermediary between a sub-fund and the counterparty or counterparties.

The sub-funds use the lending of financial instruments to generate additional income. This might consist of a fee paid by the principal or, in the event that the fund performs the securities lending through an agent, by the counterparty, as well as income generated through reinvestments.

The sub-funds are not permitted to agree forms of SFTs other than lending financial instruments.

General information on the SFTs used

Type of SFT	Types of asset that the SFT can involve	Maximum percentage of the assets under management that can be involved in the SFT	Anticipated percentage of the assets under management that will be involved in the SFT
Lending financial instruments	Only shares and bonds will be lent	When lending financial instruments a maximum of 30% of the assets under management will be involved.	Depending on market conditions 0–30% of the assets under management will be involved in the lending of financial instruments

Criteria for the selection of counterparties

Lending financial instruments only occurs with high-quality counterparties. The management company selects which counterparties qualify for the lending of financial instruments.

The selected counterparties must meet the following minimum requirements to this end:

Legal status	Minimum rating	Country of origin
The counterparty must belong to one of the following categories: a) A credit institution; or b) An investment firm; or c) A settlement or clearing institution; or d) A central bank of a member state of the European Economic Area, the European Central Bank, the European Investment Bank or a public international financial institution in which one or more European Economic Area member states participate.	Only counterparties rated as investment grade may be considered. An investment-grade rating means: a rating equal to or higher than BBB- or Baa3 according to one or more of the following accredited rating agencies: - Moody's (Moody's Investors Service); - S&P (Standard & Poor's, a division of the McGraw-Hill Companies); en - Fitch (Fitch Ratings). If the counterparty does not have a rating, the rating of the counterparty's parent company may be taken into consideration.	All geographical regions may be considered when selecting counterparties.

The relationship with the counterparty or counterparties is governed by standard international agreements.

Description of acceptable financial collateral and its valuation

When a sub-fund lends financial instruments, it receives financial collateral in return. This financial collateral protects the sub-fund fund from default on the part of the counterparty to which the financial instruments have been lent.

Each sub-fund may accept the following forms of financial collateral:

- **Cash**; and/or
- **Bonds and other debt instruments**, issued or guaranteed by the central bank of a member state of the European Economic Area, the European Central Bank, the European Union or the European Investment Bank, a member state of the European Economic Area or the Organisation for Economic Cooperation and Development, or by a public international institution in which one or more member states of the European Economic Area participate, other than the counterparty or a person associated with it, and which are permitted to trade on a regulated market; and/or
- **Participation rights in a monetary undertaking for collective investment** that complies with Directive 2009/65/EC or which meets the conditions of Article 52(1:6) of the Royal Decree of 12 November 2012 on certain public institutions for collective investment which meet the conditions of Directive 2009/65/EC, and the net asset value of which is calculated and published daily.

The valuation of the financial collateral occurs daily in accordance with the most applicable and accurate method: mark-to-market. A daily variation margin applies based on the daily valuation. Consequently, daily margin calls are possible.

There are no limits regarding the term of the financial collateral.

Reuse of financial collateral

If a sub-fund receives collateral in the form of cash, it can reinvest this cash in

- **deposits with credit institutions** which can be withdrawn immediately and which mature within a period not exceeding twelve months, provided that the office of the credit institution is situated within a member state of the EEA, or if the office is established in a third country, provided that it is subject to prudential supervisory rules which the FSMA considers as being equivalent to the rules under European Law.
- **short term money market funds** as defined in Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.
- **government bonds** that are denominated in the same currency as the cash received and that meet the terms and conditions set out in the Royal Decree of 7 March 2006 on securities lending by certain undertakings for collective investment.

Reinvesting in this way can eliminate the credit risk to which a sub-fund is exposed concerning the collateral in respect of the financial institution where the cash account is held, but there is still a credit risk in respect of the issuer or issuers of the debt instrument(s). The management company may delegate implementation of the reinvestment policy to a third party, including the agent managing the securities lending system.

Reinvestment in deposits at the same credit institution may not exceed 10% of the sub-fund's total assets. Reinvestment in bonds issued by the same public authority may not exceed 20% of the sub-fund's total assets.

Policy on the diversification of collateral and the correlation policy

A sub-fund is not permitted to accept financial collateral issued by the party offering them.

A sub-fund's exposure to financial collateral issued by the same issuer may not exceed 20% of the sub-fund's net assets.

Holding of the financial collateral

The financial collateral will be held in the following manner:

- for cash: held in a cash account; and
- for financial collateral that is not cash: registration in a custody account.

The custodian of the financial collateral and/or the entity to which certain tasks relating to the custody of the financial collateral has been delegated is not necessarily the same entity as the custodian of the Bevek's assets, as stated under 'B. Service providers to the Bevek'.

Influence of SFTs on a sub-fund's risk profile

This lending does not affect a sub-fund's risk profile since:

- The choice of principal, agent and every counterparty is subject to strict selection criteria.
- The return of securities similar to the securities that have been lent can be requested at any time, which means that the lending of securities does not affect management of a sub-fund's assets.
- A margin management system is used to ensure that a sub-fund is at all times the beneficiary of financial security (collateral) in the form of cash or other specific types of securities with a low risk, such as government bonds, in case the principal or the counterparty (if a sub-fund uses an agent) does not return similar securities. The actual value of the collateral in the form of specific types of securities with a low risk must at all times exceed the actual value of the loaned securities by 5%. Furthermore, when calculating the value of the specific types of securities with a low risk provided as collateral, a margin of 3% is applied, which should prevent a negative change in price resulting in their actual value no longer exceeding the actual value of the securities. The value of the collateral in the form of cash must at all times exceed the actual value of the loaned securities.
- The criteria met by the collateral are such as to limit the credit risk. A rating of at least investment grade is required in the case of collateral in the form of bonds and other debt instruments. In the case of collateral in the form of participation rights in monetary undertakings for collective investment, the inherent diversification of these undertakings limits the credit risk. In the case of cash that is reinvested, a rating of at least investment grade is required when reinvesting in either deposits or government bonds. In the case of reinvestment in short-term money-market funds, the inherent diversification of these funds limits the credit risk.
- The criteria met by these types of collateral are such as to limit the liquidity risk. It must be possible to value the financial collateral on a daily basis by market price or to withdraw it on demand (on reinvestment of cash in deposits).
- In the case of reinvestment of cash, there are additional criteria to limit the market risk associated with the initial values in cash. When reinvesting bonds, only bonds with a remaining term to maturity of no more than one year may be considered. The shortness of this remaining term results in a low sensitivity to interest rate movements. In the case of reinvestment in short-term money-market funds, the low duration of these funds limits the market risk with respect to the initial value in cash.
- The custody of financial collateral consisting of securities occurs by placing the securities in custody accounts which, in the event of the custodian's bankruptcy, are held outside its insolvent estate. The custody of financial collateral consisting of cash occurs by holding it in cash accounts, whether or not segregated. The extent to which the custody of financial collateral consisting of cash occurs in non-segregated accounts has no influence, however, on the sub-fund's risk profile.
- Operational risks are limited by operational controls, in the shape of daily control of the market values of loaned securities and collateral and reconciliation of internal and external data.

Distribution policy for returns on the utilised SFTs

By lending securities, a sub-fund can generate additional income, which might consist of a fee paid by the principal or the counterparty (if a sub-fund uses an agent) as well as income generated through reinvestments. After deducting the direct and indirect charges – set at a flat rate of 35% of the fee received and consisting of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if a sub-fund uses an agent, the fee paid to the agent. This income is paid to a sub-fund. It should be noted in this regard that KBC Bank NV is an entity affiliated with the management company.

1.2.1.2. General strategy for hedging the exchange rate risk

In order to protect its assets against exchange rate fluctuations and within the limitations laid down in the articles of association, a sub-fund may perform transactions relating to the sale and/or the purchase of forward currency contracts, as well as the sale of call options and the purchase of put options on currencies. The transactions in question may relate solely to contracts traded on a regulated market that operates regularly, that is recognised and that is open to the public or, that are traded with a recognised, prime financial institution specialising in such transactions and dealing in the over-the-counter (OTC) market in options. With the same objective, a sub-fund may also sell currencies forward or exchange them in private transactions with prime financial institutions specialising in such transactions.

1.2.1.3. Social, ethical and environmental aspects

The investment policy takes into account certain social, ethical and environmental aspects against which issuers are being assessed. Investments may not be made in, amongst others:

- financial instruments issued by manufacturers of controversial weapon systems that are prohibited by international (and national) law or for which there is a broad consensus that they should be banned. These weapon systems include: cluster bombs and sub-munitions, chemical or biological weapons, anti-personnel mines (including Claymore mines), weapons containing depleted uranium;
- financial instruments issued by manufacturers of weapons containing white phosphorus;
- financial instruments issued by companies where there are serious indications that they are perpetrators of, accomplices or accessories to, or stand to benefit from the violation of globally recognised standards of Responsible Investing. The main criteria used cover human rights, employee rights, the environment and anticorruption.

In this way, not only is a purely financial reality represented, but also the social reality of the sector or region. This list of exclusion criteria is not exhaustive.

A complete overview of the exclusion criteria can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*. These exclusion criteria can be modified at any time by the management company.

For some sub-funds, additional criteria relating to Responsible Investing may apply. These are further specified in 'Information concerning the sub-fund – 2. Investment information – Selected strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for Responsible Investment funds*.

For sub-funds that are passively managed and therefore replicate the composition of a financial index, the following applies:

Investments may not be made in financial instruments issued by manufacturers of controversial weapon systems that are prohibited by national law. These weapon systems include: cluster bombs and sub-munitions, anti-personnel mines (including Claymore mines), weapons containing depleted uranium (More information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*).

Integration of sustainability risk into the investment policy:

In the investment policy, the management company shall take into account the sustainability risk as defined in prospectus under title "F. Information on the risk profile of the UCITS" as follows:

- I. by defining an exclusion policy (the "Exclusion Criteria") applicable to all funds and Sicavs. (Further information can be found at www.kbc.be/investment-legal-documents > *General exclusion policies for conventional and Responsible Investing funds*); and
- II. additional criteria relating to Responsible Investing may apply for certain sub-funds. If applicable these additional criteria are specified under title '2. Investment information - Selected Strategy' and on www.kbc.be/investment-legal-documents > *Exclusion policies for responsible investment funds*.

In its investment policy, the management company constantly assesses the underlying investments at issuer level, but also (if relevant) at the level of the asset allocation and the regional or sectoral allocation. In these regular assessments, the sustainability risk is considered as one of the various elements that can influence the return. The Responsible Investing research team assigns an ESG risk rating to the majority of companies included in the best-known benchmarks and to a selection of small and medium-sized companies, based on input from an ESG data provider, where ESG stands for "Environmental, Social and Governance". The ESG risk ratings are shared internally with portfolio managers and strategists so that they can use them as a factor in the investment decision-making process. Responsible Investing funds additionally have a target to improve the weighted average ESG risk rating (of companies) of the fund versus its asset allocation. More information on our Responsible Investing methodology can

be found in this policy document: www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

1.2.1.4. Summary risk indicator

In accordance with Commission Regulation (EU) No.1286/2014, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021, a summary risk indicator has been calculated per sub-fund, or where relevant per share class or type of shares. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. It is given as a figure between 1 and 7. The higher the figure, the greater the potential return, but also the more difficult it is to predict this return. Losses are possible too. The lowest figure does not mean that the investment is entirely free of risk. However, it does indicate that, compared with the higher figures, this product will generally provide a lower, but more predictable return.

The summary risk indicator is assessed regularly and can therefore go up or down based on data from the past. Data from the past is not always a reliable indicator of future risk and return.

The most recent indicator can be found under the 'What are the risks and what could I get in return?' heading in the 'Key Information' document.

1.2.1.5. Ongoing charges

The ongoing charges which consist of management fees and other administrative or operating costs on the one hand and transaction costs on the other hand, as calculated in accordance with the provisions of the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021.

The ongoing charges are the charges taken from the UCITS over a financial year. They are shown per sub-fund, or where relevant per share class or type of shares, in a figure for management fees and other administrative or operating costs and a figure for transaction costs. The figure for management fees and other administrative or operating costs represents all annual expenses and other payments from a sub-fund's assets over the given period that is based on the previous year's figures. The transaction cost figure is an estimate of both annual explicit and implicit transaction costs and is based on the transactions of the previous 36 months. For sub-funds, share classes or types of shares that have been in existence for less than 36 months, the Commission Delegated Regulation 2017/653 (EC) of March 8, 2017 as amended by the Commission Delegated Regulation 2021/2268 (EC) of September 6, 2021 establishes a modified estimation method. These figures are expressed as a percentage of the average net assets per sub-fund or, where relevant, of the share class or type of shares.

The following are not included in the charges shown: entry and exit charges paid by the investor, incidental costs such as performance fees and payments made with a view to providing collateral in the context of derivative financial instruments.

1.2.1.6. Existence of fee sharing agreements and rebates

The management company may share its fee with the distributor, and institutional and/or professional parties.

In the information for each sub-fund – under '2.4.6. Costs' – you can see the percentage of the fee that has actually been shared for each sub-fund.

If the management company invests the assets of the undertaking for collective investment in units of undertakings for collective investment that are not managed by an entity of KBC Groep NV, and receives a fee for doing so, it will pay this fee to the undertaking for collective investment.

Fee sharing heeft geen invloed op de hoogte van de beheercommissie die a sub-fund to the management company. This management fee is subject to the limitations laid down in the articles of association. The limitations may only be amended after approval by the General Meeting.

The management company has concluded a distribution agreement with the distributor in order to facilitate the wider distribution of the sub-fund's shares by using multiple distribution channels.

It is in the interests of the holders of shares of a sub-fund and of the distributor for the largest possible number of shares to be sold and for the assets of a sub-fund to be maximised in this way. In this respect, there is therefore no question of any conflict of interest.

1.2.1.7. Existence of Commission Sharing Agreements

For the following sub-funds exist Commission Sharing Agreements: Asia Pacific, Asia Pacific Responsible Investing, Belgium, CSOB Akciovy fond dividendovych firem, Emerging Europe, Emerging Markets, Emerging Markets Responsible Investing, EMU Small & Medium Caps, EMU Small & Medium Caps Responsible Investing, Enhanced Intelligence Stock Selection, Europe, Eurozone, Eurozone DBI-RDT, Eurozone Responsible Investing, Family Enterprises, Flanders, Fundamental Opportunities, Fundamental Opportunities DBI-RDT, Global Value DBI-RDT Responsible Investing, Global Value Responsible Investing, High Dividend New Markets, Medical Technologies, Minimum Variance Responsible Investing, New Asia, North America, North American Continent, North American Continent Responsible Investing, North America Responsible Investing, Quant EMU, Rest of Europe, Rest of Europe Responsible Investing, Satellites, Strategic Satellites Responsible Investing, Trends Responsible Investing, USA & Canada, USA & Canada Responsible Investing, We Care Responsible Investing, We Digitize Responsible Investing, We Like Responsible Investing, We Live Responsible Investing, We Shape Responsible Investing, World, World DBI-RDT, World DBI-RDT Responsible Investing, World Responsible Investing

For the following sub-funds don't exist Commission Sharing Agreements: US Small Caps

The Management Company, or where applicable, the appointed manager has entered into a Commission Sharing Agreement with one or more brokers for transactions in shares on behalf of one or more sub-funds. This agreement specifically concerns the execution of orders and the delivery of research reports.

What the Commission Sharing Agreement entails:

The Management Company, or where appropriate, the appointed manager can ask the broker to pay invoices on their behalf for a number of goods and services provided. The broker will then pay those invoices using the savings that have been built up to a certain percentage above the gross commission that it receives from the sub-funds for carrying out transactions.

N.B.:

Only goods and services that assist the Management Company, or where applicable, the appointed manager in managing the sub-funds in the interest of this a sub-fund can be covered by a Commission Sharing Agreement.

Goods and services eligible for a Commission Sharing Agreement:

- Research-related and advice-related services;
- Portfolio valuation and analysis;
- Market information and related services;
- Return analysis;
- Services related to market prices;
- Computer hardware linked to specialised computer software or research services;
- Dedicated telephone lines;
- Fees for seminars when the topic is relevant to investment services;
- Publications when the topic is relevant to investment services;
- All other goods and services that contribute directly or indirectly to achieving the investment objectives of the sub-funds.

The Management Company, or where appropriate, the appointed manager has laid down an internal policy as regards entering into Commission Sharing Agreements and avoiding possible conflicts of interest in this respect, and has put appropriate internal controls in place to ensure this policy is observed.

No CSA accrual during this period.

1.2.1.8. Recurrent fees and charges

Recurrent fees and charges paid by the Bevek	
Fees paid to directors insofar as the General Meeting has approved said fees.	250 EUR per meeting attended, linked to the director's actual attendance of/participation in the meetings of the Board of Directors. This fee is divided across all the sub-funds marketed.
Recurrent fees and charges paid by the sub-fund	
Fee paid to the statutory auditor of the Bevek	Fee of the statutory auditor: 6150 EUR/year (excluding VAT) and: 980 EUR/year (excluding VAT) for non-structured sub-funds. These amounts can be indexed on an annual basis in accordance with the decision of the General Meeting.

1.2.1.9. Non-recurrent fees and charges borne by the investor

If, at a certain time, the Management Company detects exceptionally high net entries in or exits from a sub-fund, it may decide to impose an additional charge (anti-dilution levy) on the entering or exiting investors concerned, intended for the sub-fund and aimed at neutralising the negative impact on the net asset value caused by investors' entries or exits.

This anti-dilution levy will only be charged in very exceptional situations where, due to exceptional market conditions, the transaction charges resulting from the entries and exits of investors are so high that they would have too great a negative impact on the net asset value (and therefore on existing investors in that sub-fund). At that time, the amount of this anti-dilution levy will be determined by the Management Company in function of the transaction charges.

This anti-dilution levy can be applied in the following sub-funds: Asia Pacific, Asia Pacific Responsible Investing, Belgium, CSOB Akciovy fond dividendovych firem, Emerging Europe (In Liquidation), Emerging Markets, Emerging Markets Responsible Investing, EMU Small & Medium Caps, EMU Small & Medium Caps Responsible Investing,

Enhanced Intelligence Stock Selection, Europe, Eurozone, Eurozone DBI-RDT, Eurozone Responsible Investing, Family Enterprises, Flanders, Fundamental Opportunities, Fundamental Opportunities DBI-RDT, Global Value DBI-RDT Responsible Investing, Global Value Responsible Investing, High Dividend New Markets (In Liquidation), Medical Technologies, Minimum Variance Responsible Investing, New Asia, North America, North America Responsible Investing, North American Continent, North American Continent Responsible Investing, Quant EMU (In Liquidation), Rest of Europe, Rest of Europe Responsible Investing, Satellites (In Liquidation), Strategic Satellites Responsible Investing, Trends Responsible Investing, US Small Caps, USA & Canada, USA & Canada Responsible Investing, We Care Responsible Investing, We Digitize Responsible Investing, We Like Responsible Investing, We Live Responsible Investing, We Shape Responsible Investing, World, World DBI-RDT, World DBI-RDT Responsible Investing, World Responsible Investing.

1.2.2. General market overview

1 January 2025 – 31 December 2025

General overview

The economic context

There were a number of notable developments over the reporting period.

Labour market figures in the US have weakened somewhat over the recent period. Business confidence in manufacturing in Western economies remained very weak at the beginning of the reporting period, but subsequently improved – in the euro area, too, surprisingly – before stalling again. On the other hand, inflation would appear to be moving in the right direction. This economic weakness had in fact been evident in Europe for some time. A declining inflation rate and a weak economic environment enabled the ECB to cut interest rates as early as June 2024. The most notable event in the first half of 2025 was Donald Trump taking office as the new US president. He immediately managed to plunge the world – and consequently the markets – into turmoil. The new president is continuing to put pressure on the Fed to cut interest rates faster. His election pledge around trade tariffs became a reality during the spring, but during the reporting period clarity emerged for most countries. This persistent lack of clarity regularly causes volatility in the equity, bond and foreign exchange markets. The recent period has also seen a flaring up of geopolitical conflicts in the Middle East, and the war in Ukraine is also still ongoing. In that context, we are for example seeing NATO member countries sharply increasing their spending contribution to the Alliance. In addition, EU member states have further plans to spend billions on defence and infrastructure. Even Germany is relaxing its notoriously strict fiscal policy somewhat in order to allow for extra investments in this area.

Monetary policy

Both the ECB and the Fed have indicated that there are a great many uncertainties, regarding both growth and inflation. The Fed pressed the pause button 2025, only to cut interest rates again recently to a range of 3.5-3.75%. Fed chairman Jerome Powell points to weak job market data to justify his rate cut but seems to want to act too hastily.

After an eighth rate cut in early June, the ECB pressed the pause button during the summer months, since when rates have remained unchanged. Deposit rates in the euro area now stand at 2%. Euro area inflation is also around this level, which is precisely where the ECB wants to see it.

Currency markets

During the reporting period, the euro gained 13.44% against the dollar, but lost 0.99% against the Swiss franc. On the other hand, it gained 13.04% against the Japanese yen and rose 5.35% against sterling. Consequently, apart from the currency pair with the Swiss franc, the reporting period was mainly characterised by a strong euro.

Stock markets

The global stock market (euro-denominated MSCI World AC) gained 7.86% over the reporting period.

The different regions

America remains the largest region for shares. Some doubts around growth arose in early 2025, mainly due to President Trump's uncertain policies. After a weak start to the year, US economic growth picked up again in the second quarter. Doubts surrounding the trade war actually subsided completely during the third quarter due to a number of agreements, resulting in a further improvement in confidence. Fears of recession have also eased somewhat as investors – and Trump – began to come to terms with the tariff turbulence. On the other hand, we are now starting to see all kinds of consumer-related data (e.g. retail sales, consumer confidence) weakening in the US.

The European economy grew slowly but steadily, and optimism even increased slightly in early 2025 thanks to new stimulus measures in Germany.

On the inflation front, the numbers remain encouraging, both in the US and particularly in the euro area. The impact of Trump's tariff policy remains limited for now.

Meanwhile, long-term interest rates in the US remained around 4-4.5%; they also rose gradually in Europe (and especially in Germany) due to expectations that additional stimulus measures will lead to more debt accumulation.

Lastly, corporate earnings for the first, second and third quarters of 2025 were impressive, especially in the US where earnings grew by around 12% year-on-year. Earnings figures in Europe remain somewhat flatter.

US shares underwent a correction in the first quarter, before rallying after the storm surrounding 'Liberation Day' had passed, gaining 5.16% in euro terms over the reporting period. The weaker dollar weighed on returns. Technology companies, and especially the large 'mega caps', are again the drivers of stock-market gains. New developments around artificial intelligence continue to excite investors. Investors seemed a little hesitant at the start of 2025, partly due to the uncertainty about the impact of Chinese competition, such as DeepSeek's cheaper models, but in May regained interest in this theme.

The euro area remains somewhat sluggish economically. Despite this, European equities initially performed better, especially at the start of the year and in the last quarter. The exchange rate effect also had no impact on stock markets in euro terms. Euro area shares gained 19.4% over the reporting period. Despite this, Europe is still a lot

cheaper than the US. Moreover, robust stimulus programmes may be on the European agenda. At the NATO summit in June, for example, new commitments were made to step up investments in defence to a larger share of GDP. Germany is also creating budgetary scope for investments in infrastructure.

The Japanese stock market also rebounded after a number of uncertain months due to tariffs. The election of a new prime minister fuelled optimism among investors, primarily on account of her economic stimulus programme. The Japanese stock market climbed around 9.87%.

Shares from emerging markets (countries or regions that are expected to experience rapid economic growth to make up their lag with the West) present a very mixed picture. Chinese stocks rebounded after a number of difficult years. The Chinese government came through with long-awaited stimulus measures. Interest rates were cut, and measures were announced simultaneously to stimulate the real estate market, consumption and the stock market. China also showed that it has made great strides in developments around AI. In the first and third quarters, in particular, investors found their way back to Chinese shares, which generated a return of 15.89% over the reporting period.

India's economy continues to boom, but unfavourable exchange rate movements meant the stock market lost around 9.51% in euro terms. On top of that, Trump slapped India with a steep import tariff, weighing on forecast growth. Latin America was a surprise winner, given Trump's trade war against Mexico and his tough stance against Brazil and Venezuela. The region was up around 36.52% compared to the beginning of the reporting period.

The different sectors

A number of prominent risks remained for cyclical companies, such as the war in Ukraine and expansion of the conflict in the Middle East, the Trump factor, and so on. The reporting period started well, although economic uncertainty later increased due to the US import tariffs. As calm returned in the summer months, cyclical stocks also recovered. Materials (chemicals, mining) posted a healthy return over the reporting period (+16.25%), partly due to the strong performance of industrial and precious metals. Industrials recorded sharp gains (+10.75%). These companies are seen as essential to keep driving the AI revolution, for example with data centres, as well as energy infrastructure.

Consumer Discretionary was hit hard by President Trump's trade war, but staged a subsequent rally. However, not all subsectors within the sector recovered to the same degree. In addition, the euro's appreciation against the dollar meant lower returns, as 70-75% of the sector index is made up of US stocks. Ultimately, the sector lost 3.43%.

Financials performed extremely well during the reporting period (+13.38%). Higher long-term interest rates play in banks' favour, while the upward revision of the economic growth outlook was also positive as it reduces the likelihood of defaults. Moreover, Trump's re-election is seen as good for the financial sector, specifically given his enthusiasm for deregulation. In addition, most economists – including those at the US central bank – expect Trump's tariff policies to be inflationary. This should keep long-term market interest rates, in particular, at higher levels, while short-term rates are lowered by the central bank. This will have a positive impact on banks' earnings models. In Europe too, the financial sector is doing particularly well thanks to the steeper yield curves.

Consumer Staples, traditionally regarded as a defensive sector, delivered a weak performance (-4.29%). Given the defensive nature of these shares, investors were less eager to press the 'Sell' button than in other sectors during the peak of the trade war; however, the shares lost their shine in the April recovery.

Health Care, also considered a defensive sector, performed particularly weakly in the first half-year, but recovered towards the end of the reporting period to finish relatively flat (+1.11%). Trump's election weighed on big pharmaceutical companies. Investors were uncertain about the policies Robert Kennedy Jr. would adopt towards Big Pharma, but these turned out to be milder than feared.

Technology initially struggled during the reporting period, but started to recover in mid-April, with the broad sector up by around 11.42%. Communication Services followed suit (+16.94%). The roll-out of AI in various sectors is continuing, boosting demand for semiconductors and buoying the performance of stocks in this sector. The other segments in this sector also performed strongly, with the exception of Software, which is marred by concerns about the possible negative impact of AI.

Conventional portfolio

We conclude with two sectors that are rarely, if ever, included in RI portfolios, but which do form part of the conventional portfolio. Utilities, typically a defensive sector, performed strongly (+8.86%).

The traditional energy sector suffered from energy prices being somewhat depressed during the reporting period. Crude oil prices in particular are struggling, weighing on the sector. An interim jump in oil prices was not enough to provide relief. The sector closed the reporting period flat (+0.26%).

Outlook

Economic context

After the uncertainties of 2025, 2026 also offers opportunities. The US labour market remains uncertain, but we have a clearer picture of trade policy. Despite lower producer confidence, we expect more investment to meet AI-related demand. Other measures such as the Big Beautiful Bill, the US budget bill, should give the economy a boost. In Europe, Germany is among the countries to announce plans to step up investment, but other countries will also invest more in defence, for example, to meet the new NATO standards. Finally, growth in China is projected to

be somewhat slower in 2026.

Inflation stabilised further in 2025, cooling to around 2% in Europe, while US inflation also fell below 3%. No new inflation surge is expected for 2026.

Monetary policy

The ECB is maintaining its deposit rate at 2%. President Lagarde stressed that the key rate has reached its lowest point. KBC expects the deposit rate to remain at 2% until the end of 2026. The Fed cut interest rates to 3.625%. KBC expects the key rate to hit 3.125% in the first half of 2026.

Currency markets

The dollar was in the eye of the storm during the turmoil surrounding Trump's import tariffs throughout the reporting period. A further gradual decline is expected in the coming months. We are hedging some of the dollar holdings in our portfolios.

Financial markets

The economic context and expectations have been volatile over the past year, partly influenced by US trade policy. The weakening labour market in the US could trigger further interest rate cuts. We are expecting economic growth to pick up again. We are invested at benchmark weight in equities. We regularly make tactical switches to take advantage of the momentum.

Bonds are still offering attractive current returns, which can provide a useful buffer in an investment portfolio. This is enabling bonds to resume their role as a safe haven. Here too, we are invested in line with the benchmark, but use volatile interest rates as a means to effect a tactical adjustment to the portfolio's remaining term to maturity.

As always, we are holding a limited cash position to respond to opportunities as they arise. Cash is currently also delivering a healthy net return.

Stock markets

General economic situation

2025 was a watershed year for the global economy. President Trump's policies left their mark everywhere. Uncertainty weighed on economic growth in 2025, especially early in the year; this was followed by something of a global acceleration, although the weakening of the US labour market continued. We expect economic growth to pick up a little more in 2026, supported by investments in AI infrastructure and productivity gains. The Big Beautiful Bill, the US budget bill, will also provide a slight boost for GDP in 2026. We are also seeing more investment in Europe, including in Germany. Apart from defence, investments are also being made in public infrastructure. Finally, growth in China is projected to be somewhat slower in 2026.

Inflation stabilised further in 2025, cooling to around 2% in Europe, while US inflation also fell below 3%. No new inflation surge is expected for 2026. This means that the US Federal Reserve may well cut interest rates a little, while the ECB is expected to keep rates steady.

Regional allocation

The US remains by some margin the largest position in our portfolio. This is a result of our benchmark choice, but we are also invested slightly overweight in the US. President Trump advocates an 'America First' policy, with lower taxes for US companies, which seems like good news for US companies in the long run. After several difficult months, trade agreements were finally sealed with the likes of Japan and the EU, requiring companies from these countries to pay additional import duties if they want to export to the US, thereby favouring US companies. US corporate earnings for the second quarter were much better than expected (+11%) and the third quarter also brought earnings growth of around 14%. The weaker dollar is weighing on returns for European investors, but on the other hand is good news for US exporting companies.

We are neutrally positioned in the euro area. Its economy is still struggling a bit more than in the US and certain sectors are vulnerable to protectionism. Germany continues to flirt with fairly weak growth, although we expect to see it pick up somewhat in 2026. However, the euro area is cheaper than the US, and this provides a buffer against potential risks. We are also maintaining a position in small and medium-sized companies based in the euro area. The share prices of these companies have lagged behind somewhat in the past few years and a revaluation might be appropriate. Moreover, they are less export-oriented and, therefore, less vulnerable to protectionist measures. For non-EU countries, the picture is somewhat more varied: the UK was able to secure a good trade deal (10% tariffs on goods exported to the US), while a deal with Switzerland wasn't completed until the autumn of 2025.

Our recommendation for the Emerging Asia region as a whole remains neutral, with a slightly overweight position for China. The Chinese economy continues to struggle with what is – by Chinese standards – weak economic growth. It has become clear over the last two years that the problems in the Chinese real estate sector have not yet

been resolved. Limited demand, reflecting weak consumer and producer confidence, is actually leading to deflation (falling prices). This weakness is particularly noticeable in the manufacturing sector, mirroring the situation in the euro area and the US. The service sector is doing somewhat better. The Chinese government regularly announces new measures to stabilise real estate prices and boost confidence. After several turbulent months, the US-China trade war cooled in November. The two countries agreed to reduce trade barriers for a year. The emergence of the DeepSeek model also showed that Chinese companies are continuing to innovate and compete with the US. The new five-year plan also focuses on that innovation leadership role.

Other Asian countries did manage to maintain fairly strong growth: the Indian economy remains in good shape, while growth also accelerated in South Korea. These countries also seem to be less affected by Trump's policies, although he did recently take India to task for overusing cheap Russian oil.

Within Asia, we are also significantly underweight in the Pacific region, which consists mainly of Japanese companies. Japanese shares did stage a rally, though, and new Prime Minister Takaichi was also well received. The currency is still more volatile than usual, however, which may raise questions about how safe the Japanese stock market is. Higher long-term interest rates are also worrying investors. Uncertainty in the region may increase under President Trump, although Japan did manage to strike a trade deal. Japanese export companies - such as the large automotive sector - do have to pay around 15% import duties when exporting to the US, however.

Sector allocation

Cyclical sectors

Economic news on manufacturing remains weak worldwide. A further recovery in corporate earnings and margins in cyclical sectors is needed for us to become positive again. We remain structurally invested below the benchmark weight in industrial sectors. We recently opted to somewhat build up the sector, and more specifically Capital Goods, in light of the improved investment outlook for companies such as in data centres in the US. We are also slightly overweight for transport companies. We are invested around the benchmark level for Materials (chemicals and mining). These companies could still benefit from stimulus measures in China and investment in the US.

We are underweight in Consumer Discretionary sectors. US consumer confidence has been hit hard in recent months due to the political uncertainty and rising unemployment. Corporate earnings reveal that US consumers are still spending their money but are becoming more price-conscious. We are keeping the automobile sub-segment at a neutral weighting. There are question marks over US policy at the moment: traditional carmakers may have the wind in their sails, but electric vehicles are struggling. The European automotive sector is very cheap and could potentially benefit if regulation is scaled back somewhat. Tesla's share price has surged in recent months. Following the de-escalation in the conflict with China, we have upped the weighting of Consumer Discretionary (luxury goods) and also increased the weighting of Retailers (Amazon) to neutral. Consumer Services sectors, such as tourism and hotels, remain underweight, however.

Defensive sectors

Defensive sectors can hold up well in uncertain times. We remain confident about Health Care, which posted better-than-expected operating results in 2025. Expectations for 2026 are also low, and could therefore easily be beaten. Question marks remain around Trump's policies. An executive order is expected to bring down the prices of US medication, although the sector has been given some breathing room. Companies shifting production to the US would also be exempt from tariffs. We therefore increased the weight of both the Big Pharma giants and the Medical Technology subsector in October 2025, both of which had become historically cheap. The outlook for Medical Technology remains good thanks to stronger margins, although this sector was one of the weakest in recent months mainly due to increased uncertainty and cost-cutting.

We are maintaining a substantially underweight position in Consumer Staples. Food and beverage companies got off to a strong start in 2025 due to the significant economic uncertainty. After a strong rally (due to the trade war) and weaker results, we reduced the position to underweight. This remained by far the weakest sector for the rest of 2025. Manufacturers of household and personal products still have some problems in terms of volumes and margins, which is why we are maintaining a slightly underweight recommendation for them. Retailers (underweight in portfolio) enjoyed a strong rally, but have become particularly expensive.

We are maintaining our structural underweighting of Utilities due to sustainability concerns.

Financials

We are optimistic about the financial sector, especially banks. Interest margins remain high, and the expected movements of the yield curve further reinforce this effect, as was demonstrated once again in the third-quarter results. European banks remain inexpensive even after the recent rally. We expect the yield curve to continue to develop favourably, so we are further increasing the weighting of European banks. We are maintaining an overweight position for the sector in the US. US banks are cashing in on Trump's presidency, which promises deregulation, less supervision and tax cuts. We are also overweight in US banks for this reason. The risks of another credit crunch seem limited for now. These banks are well capitalised and have built up their reserves. We are keeping our position in US asset managers and payment service providers at a neutral weighting because the outlook for US consumers has weakened. Finally, we are keeping the (more defensive) insurers at a neutral weighting.

Broad technology sector

We are overweight in the Technology sector, with its strong leaning towards the US, despite taking some profits at the end of October 2025. The strong rally by AI-linked stocks in particular raises fears that an AI bubble may be in the making. We do not share that view, despite the heavy concentration of these companies in the stock market. We have moved back to a neutral weighting in the Semiconductor subsector. This segment is still quite expensive due to the strong AI- and ChatGPT-linked rally, but the long-term prospects seem favourable. These companies' earnings are still consistently beating expectations. With their strong pricing power, we expect these companies to continue making higher profits for some time, though they are not cheap, which makes corrections a possibility in the meantime. We also slightly reduced the overweight position in Software. Third-quarter results were not bad, but the Software sector continues to lag behind. We have a neutral positioning in the Hardware subsector owing to the prospect of lower growth in the short term. Within this segment, we are keeping Apple underweight. On a positive note, the PC and laptop market seems to be bottoming out.

We are positive towards the Communications sector, which is closely linked to IT. We are overweight in media companies, in particular. This highly Americanised consumer sector is quite expensive but has rock-solid fundamentals. Within this sector, we are overweight in Alphabet, one of the big winners in the AI race, and neutrally positioned in Meta.

Within the broader Communication Services sector, we are scaling back the more defensive telecom companies to a neutral weighting. The sector's recent performance was mediocre, in part due to weaker results. Investors also seem to have less appetite for defensive sectors such as Telecommunications.

Real estate sector

Real estate companies have been under considerable pressure from higher interest rates for several years now. Meanwhile, central banks in Western countries brought interest rates down to somewhat lower levels. Although central banks influence short-term interest rates directly through key rates, we observe that long-term rates remain high, especially in the US. This continues to put pressure on this theme as it influences the financing conditions for these companies. That is sufficient reason for us to take a step back from the theme to a more neutral weight.

Energy (conventional portfolio)

For share investors without a specific sustainability preference, we are underweighting the Energy sector. The conflicts in the Middle East and Ukraine pushed oil prices higher in spring, enabling these companies to rally nicely. President Trump seems intent on ending both conflicts. The rise in oil prices around the Twelve-Day War between Iran and Israel proved to be short-lived. On the other hand, new sanctions on Russia do seem to be pushing the risk premium on oil up again slightly. Trump's policies could certainly cause a supply shock (higher production) and lower prices, despite higher demand due to a stronger economy. Volatility remains high, making income streams for the sector highly variable.

1.3. Auditor's report

KBC EQUITY FUND NV

Auditor's report

For the year ended 31.12.2025

Statutory auditor's report to the shareholders' meeting of KBC EQUITY FUND NV for the year ended on 31 December 2025 – Annual Accounts

(Free translation)

In the context of the statutory audit of the annual accounts of KBC EQUITY FUND NV ("**COMPANY**"), we hereby submit our statutory audit report. This report includes our report on the annual accounts and the other legal and regulatory requirements. These parts should be considered as integral to the report.

We were appointed in our capacity as statutory auditor by the shareholders' meeting of 28 March 2024, in accordance with the proposal of the board of directors. Our mandate will expire on the date of the shareholders' meeting deliberating on the annual accounts for the year ending 31 December 2026. We have performed the statutory audit of the annual accounts of KBC EQUITY FUND NV for 5 financial years.

Report on the annual accounts

Unqualified opinion

We have performed the statutory audit of the annual accounts of the Company, drafted in accordance with the financial reporting framework applicable in Belgium¹, which comprises the balance sheet as at 31 December 2025 and the income statement for the year then ended, as well as the explanatory notes. The annual accounts shows a balance sheet total of 36.808.493.900 EUR and the income statement shows a profit of 3.391.529.705 EUR. An overview of the total net asset value and the result of each compartment is presented in the below table.

In our opinion, the annual accounts give a true and fair view of the Company's net asset value and financial position as of 31 December 2025 and of its results for the year then ended, in accordance with the financial reporting framework applicable in Belgium.

Basis for the unqualified opinion

We conducted our audit in accordance with the International Standards on Auditing (ISA), as applicable in Belgium. Our responsibilities under those standards are further described in the section "Responsibilities of the statutory auditor for the audit of the annual accounts". We have complied with all ethical requirements relevant to the statutory audit of the annual accounts in Belgium, including those regarding independence.

We have obtained from the board of directors and the company's officials the explanations and information necessary for performing our audit.

We believe that the audit evidence obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of the board of directors for the preparation of the annual accounts

The board of directors is responsible for the preparation and fair presentation of the annual accounts in accordance with the financial reporting framework applicable in Belgium and for such internal control as the board of directors determines is necessary to enable the preparation of the annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the board of directors is responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters to be considered for going concern and using the going concern basis of accounting unless the board of directors either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the statutory auditor for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue a statutory auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

During the performance of our audit, we comply with the legal, regulatory and normative framework as applicable to the audit of annual accounts in Belgium. The scope of the audit does neither comprise any assurance regarding the future viability of the Company nor regarding the efficiency or effectiveness demonstrated by the board of directors in the way that the Company's business has been conducted or will be conducted.

As part of an audit in accordance with ISA, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the annual accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from an error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors;
- conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our statutory auditor's report to the related disclosures in the annual accounts or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our statutory auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the annual accounts, and whether the annual accounts represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, amongst other matters, the planned scope and timing of the audit and significant audit findings, if any, including any significant deficiencies in internal control that we might identify during our audit.

Other legal and regulatory requirements

Responsibilities of the board of directors

The board of directors is responsible for the preparation and the content of the directors' report on the annual accounts for maintaining the company's accounting records in compliance with the legal and regulatory requirements applicable in Belgium, as well as for the company's compliance with the Companies Code and the company's articles of association.

Responsibilities of the statutory auditor

As part of our mandate and in accordance with the Belgian standard complementary to the International Standards on Auditing (ISA) as applicable in Belgium, our responsibility is to verify, in all material respects, the director's report on the annual accounts and compliance with certain obligations referred to in the Code of Companies and associations and the articles of association, as well as to report on these matters.

Aspects regarding the directors' report

In our opinion, after performing the specific procedures on the annual report, the annual report is consistent with the annual accounts for that same year and has been established in accordance with the requirements of articles 3:5 and 3:6 of the Code of companies and associations.

In the context of our statutory audit of the annual accounts we are also responsible to consider, in particular based on information that we became aware of during the audit, if the annual report on the annual accounts is free of material misstatement, either by information that is incorrectly stated or otherwise misleading. In the context of the procedures performed, we are not aware of such material misstatement. It is to be noted that the expectations for the future included in the annual report does not include the recent market developments resulting from the conflict in the Middle – East and its recent escalations. We do not formulate any level of assurance regarding the annual report.

Statements regarding independence

Our audit firm and our network have not performed any prohibited services and our audit firm has remained independent from the company during the performance of our mandate.

Other statements

- Without prejudice to certain formal aspects of minor importance, the accounting records are maintained in accordance with the legal and regulatory requirements applicable in Belgium.
- The appropriation of results proposed to the general meeting is in accordance with the relevant legal and regulatory requirements.
- Except for the non compliance with the deadlines for the communication of required documents to be transmitted to the General Assembly of Shareholders, we do not have to report any transactions or decisions taken that are a breach to the Law on Companies and Associations.

1.6. Summary of recognition and valuation rules

1.6.1. Summary of the rules

Summary of the valuation rules pursuant to the Royal Decree of 10 November 2006 on the accounting, annual accounts and periodic reports of certain open-ended undertakings for collective investment.

The assets of the various sub-funds are valued as follows:

- When purchased or sold, securities, money market instruments, units in undertakings for collective investment and financial derivatives are recorded in the accounts at their acquisition price or sale price, respectively. Any additional expenses, such as trading and delivery costs, are charged directly to the profit and loss account.
- After initial recognition, securities, money market instruments and financial derivatives are measured at fair value on the basis of the following rules:
 - Securities that are traded on an active market without the involvement of third-party financial institutions are measured at fair value using the closing price;
 - Assets that have an active market which functions through third -party financial institutions that guarantee continuous bid and ask prices are measured using the current bid price set on that market. However, since most international benchmarks use mid-prices, and the data providers cannot supply bid prices (e.g., JP Morgan, iBoxx, MSCI, etc.), the midprices are used to measure debt instruments, as provided for in the Notes to the aforementioned Royal Decree. The method to correct these midprices and generate the bid price is not used, as it is not reliable enough and could result in major fluctuations.
 - Securities whose last known price is not representative and securities that are not admitted to official listing or admitted to another organised market are valued as follows:
 - 1 When measuring these securities at fair value, use is made of the current fair value of similar assets for which there is an active market, provided this fair value is adjusted to take account of the differences between the assets concerned.
 - 2 If no fair value for similar assets exists, the fair value is calculated on the basis of other valuation techniques which make maximum use of market data, which are consistent with generally accepted economic methods and which are verified and tested on a regular basis.
 - 3 If no organised or unofficial market exists for the assets being valued, account is also taken of the uncertain character of these assets, based on the risk that the counterparties involved might not meet their obligations.
 - Shares for which there is no organised or unofficial market, and whose fair value cannot be calculated reliably as set out above, are measured at cost. Impairment is applied to these shares if there are objective instructions to this end.
 - Units in undertakings for collective investment (for which there is no organised market) are measured at fair value using their last net asset value.
- Liquid assets, including assets on demand at credit institutions, obligations on current account vis-à-vis credit institutions, amounts payable and receivable in the short term that are not represented by negotiable securities or money market instruments (other than vis-à-vis credit institutions), tax assets and liabilities, are measured at nominal value. Other amounts receivable in the longer term that are not represented by negotiable securities are measured at fair value. Impairment is applied to assets, amounts to be received and receivables if there is uncertainty that they will be paid in full or in part at maturity, or if the realisation value of this asset is less than its acquisition value. Additional impairment is recorded on the assets, amounts to be received and receivables referred to in the previous paragraph to ensure that any change in their value, or risks inherent in the asset in question, are taken into account.
- The income generated by securities lending is recognised as other income (Income statement II.B.a.: Investment income and expenses – Interest – Securities and money market instruments) and is included on an accruals basis in the income statement over the term of the transaction.
- Securities issued in a currency other than that of the relevant sub-fund are converted into the currency of the sub-fund at the last known mid-market exchange rate.

Differences

A minor difference may appear from time to time between the net asset value as published in the press and the net asset value shown in this report. These are minimal differences in the net asset value calculated that are identified after publication.

If these differences reach or exceed a certain tolerance limit, the difference will be compensated. For those buying or selling shares in the bevek and for the bevek itself, this tolerance limit will be a certain percentage of the net asset value and the net assets, respectively.

This tolerance limit is:

- money market funds: 0.25%
- bond funds, balanced funds and funds offering a capital guarantee: 0.50%
- equity funds: 1%
- other funds (real estate funds, etc.): 0.50%

Given that a number of securities exchanges were closed on 31/12/2025 and that the sub-funds below invested more than 20% of their assets in securities listed on these exchanges, the asset valuations used in the financial statements of the sub-funds concerned were made on 30/12/2025 instead of 31/12/2025 . However, a theoretic net asset value was calculated for these sub-funds as at 31/12/2025 that was not used for entry and exit.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from Japan and developed countries in the Asia Pacific region.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Pacific-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the adopted strategy, the fund is and has been invested in a selection of Asia Pacific stocks. The "Asia Pacific" part of the KBC AM strategy is followed.

2.1.8. Future policy

The fund will continue to invest in Asia Pacific equities in the future, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of investments in the shares of companies from Japan and developed countries of the Asia Pacific Region
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of investments in the shares of companies from Japan and developed countries of the Asia Pacific Region
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 JPY.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Asia Pacific (in Japanese yen)

	1 st half of year	2 nd half of year	Year
Purchases	10,761,803,880.45	6,520,129,306.44	17,281,933,186.89
Sales	33,420,413,014.14	28,868,399,130.01	62,288,812,144.15
Total 1	44,182,216,894.59	35,388,528,436.45	79,570,745,331.04
Subscriptions	10,288,440,234.00	9,043,230,223.00	19,331,670,457.00
Redemptions	32,648,972,140.00	32,180,068,790.00	64,829,040,930.00
Total 2	42,937,412,374.00	41,223,299,013.00	84,160,711,387.00
Monthly average of total assets	68,391,881,721.90	67,545,678,642.86	67,950,543,047.05
Turnover rate	1.82%	-8.64%	-6.75%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in JPY and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 1.299,0000 net (1.856,0000 gross).

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,771%

Transaction costs: 0,032%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,778%

Transaction costs: 0,032%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,468%

Transaction costs: 0,032%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,10% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 11.451.796,21 JPY and for the Management Company 4.580.718,48 JPY. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 2 and 38, with a market value fluctuating between 1182326.3641932 and 76951430.330707 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Japan and developed countries in the Asia-Pacific region.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the **"Responsible Investing Advisory Board"**) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Pacific-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Pacific-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Pacific-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Asia Pacific Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Pacific-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the adopted strategy, the fund has been and is invested in a selection of Asia Pacific stocks. This follows the "Asia Pacific" section of the KBC AM strategy.

The Fund's strategy is also in line with the SRI strategy and the Fund's assets are invested accordingly.

2.1.8. Future policy

The fund will continue to invest in Asia Pacific equities in the future, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Japanese Yen, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares EUR: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from Japan and the Asia Pacific Region.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 JPY.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Asia Pacific Responsible Investing (in Japanese yen)

	1 st half of year	2 nd half of year	Year
Purchases	32,939,994,671.51	15,780,154,177.12	48,720,148,848.62
Sales	21,505,239,970.68	54,262,606,771.18	75,767,846,741.86
Total 1	54,445,234,642.18	70,042,760,948.30	124,487,995,590.49
Subscriptions	29,477,615,868.19	23,382,434,686.79	52,860,050,554.98
Redemptions	19,139,542,730.87	63,196,929,384.58	82,336,472,115.46
Total 2	48,617,158,599.06	86,579,364,071.38	135,196,522,670.44
Monthly average of total assets	102,046,035,168.25	118,739,967,990.67	110,752,784,614.43
Turnover rate	5.71%	-13.93%	-9.67%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets

(excluding deposits and cash) in a given period only involve subscriptions and redemptions.
A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.
Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Classic Shares

BE6307772564

KBC Equity Fund Asia Pacific Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/01/2018 through 31/12/2025 (in JPY)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307772564	JPY	16.66%	22.98%	17.08%	21.81%		15.58%			05/11/2018	

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in JPY and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :
$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where $Y = D - X$
Return on date D since the start date S of the unit:
$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where $F = 1$ if the unit has existed for less than one year on date D
where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional Discretionary Shares EUR

Fee for managing the investment portfolio	0.00%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Administration fee	0.02%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.01%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 17.697.187,77 JPY and for the Management Company 7.078.875,11 JPY. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 1 and 34, with a market value fluctuating between 720125.91044048 and 117149571.58942 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Asia Pacific Responsible Investing

Legal entity identifier:
875500BHW9XZQY7EX15

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.62% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 21.62% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 78.38% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Pacific-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI Pacific-Net Return index.	21.59	19.26	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI Pacific-Net Return index as described in the prospectus under the title 'information concerning the sub-fund Asia Pacific Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI Pacific-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	73.33	42.46	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	21.62	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	13.12	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	8.50	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	19.53	19.56	19.26
Greenhouse gas intensity	57.61	51.67	42.46
Sustainable Investments	81.35	23.08	21.62
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	12.58	13.12
Sustainable Investments with a social objective (%)	49.42	10.50	8.50
Assets promoting E/S characteristics (%)	99.82	99.66	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 21.62% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
COMMONWEALTH BANK OF AUSTRAL	Banking	3.89%	Australia

KEYENCE CORP	Industrial Products	1.71%	Japan

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 21.62%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Asia Pacific Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Asia Pacific Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

13.12% of the sustainable investments are environmentally sustainable investments and 8.50% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Banking	23.01%
Tech Hardware & Semiconductors	13.49%
Health Care	9.03%
Industrial Products	7.69%
Insurance	7.63%
Industrial Services	5.85%
Consumer Discretionary Products	4.49%
Materials	4.17%
Real Estate	3.82%
Retail & Wholesale - Discretionary	3.74%
Financial Services	3.73%
Software & Tech Services	2.94%
Telecommunications	2.74%
Retail & Wholesale - Staples	2.71%
Media	2.01%
Consumer Staple Products	1.78%
Consumer Discretionary Services	0.76%
Utilities	0.41%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies from Japan and developed countries in the Asia-Pacific region.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 21.62% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 13.12%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 8.50%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Asia Pacific Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Pacific-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of Belgian companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

- 4 on a scale of 1 (lowest risk) to 7 (highest risk)
 - a high level of concentration risk: there is a concentration of the investments in shares of Belgian companies.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 25 685.87 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Belgium (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	402,956.53	4,063,138.07	4,466,094.59
Sales	5,131,046.02	4,779,475.19	9,910,521.21
Total 1	5,534,002.54	8,842,613.26	14,376,615.80
Subscriptions	1,265,224.23	3,825,323.36	5,090,547.59
Redemptions	7,490,186.58	3,447,140.19	10,937,326.77
Total 2	8,755,410.81	7,272,463.55	16,027,874.36
Monthly average of total assets	83,413,720.59	87,271,126.03	85,381,152.28
Turnover rate	-3.86%	1.80%	-1.93%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Period	Change in number of shares in circulation

2.4.5. Performance figures

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE0129009966	EUR	14.10%		9.65%		9.14%		5.90%		01/10/1991	3.36%
DIS	BE0129141348	EUR	14.07%		9.63%		9.13%		5.88%		01/10/1991	3.28%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 1,3323 net (1,9034 gross).

2.4.6. Costs

Ongoing Charges:

Capitalisation :

Management fees and other administrative or operating costs: 1,975%
Transaction costs: 0,088%

Distribution :

Management fees and other administrative or operating costs: 2,016%
Transaction costs: 0,088%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 52,20% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 131.147,97 EUR and for the Management Company 52.459,19 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 11061674 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
AGEAS	EUR	53 000	59,80	3 169 400,00
SOLVAY SA	EUR	17 000	27,16	461 720,00
Total				3 631 120,00

Details of collateral received for securities lent

Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
KREDITANSTALT FUER WI 1.125 31MAR37	EUR	4 257 000	EUR	3 440 916,00
KREDITANSTALT FUE 2.273 08APR33 FRN	EUR	500 000	EUR	504 502,00
Total				3 945 418,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

KBC Equity Fund CSOB Akciovy Fond Dividendovych Firem aims to generate a return by investing at least 75% of its assets in shares with a high dividend yield. All regions, sectors and themes may be taken into consideration. The rest of the assets will be invested in bonds, debt instruments, money market instruments and deposits.

The sub-fund aims to hedge 100% of exchange rate risk to Czech koruna through forward contracts.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI World 100% Hedged to CZK - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to

the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

The fund invests in well-diversified portfolios of shares in companies that pay out sustainable dividends that are higher than their peers. Active positions in stocks were taken based on quantitative analysis and a stringent risk framework. Approximately once a month, the fund was rebalanced to reflect recommendations originated by forementioned analysis. The fund hedges its currency exposure back to CZK.

2.1.8. Future policy

The fund will continue its active stock selection strategy based on quantitative analysis within the limits defined by the stringent risk framework.

2.1.9. Summary risk indicator (SRI)

- 4 on a scale of 1 (lowest risk) to 7 (highest risk)
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'.

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 35 770 544.50 CZK.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund CSOB Akciovy fond dividendovych firem (in Czech koruna)

	1 st half of year	2 nd half of year	Year
Purchases	2,249,778,314.64	1,751,469,166.04	4,001,247,480.68
Sales	1,507,801,697.49	1,190,226,894.81	2,698,028,592.30
Total 1	3,757,580,012.13	2,941,696,060.85	6,699,276,072.98
Subscriptions	390,990,439.08	561,647,701.53	952,638,140.61
Redemptions	180,820,177.04	166,673,214.18	347,493,391.22
Total 2	571,810,616.12	728,320,915.71	1,300,131,531.83
Monthly average of total assets	6,048,014,392.58	7,031,548,812.59	6,554,065,297.48
Turnover rate	52.67%	31.48%	82.38%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect the impact of updated quantitative input signals. Turnover can exceed 150% (two way figures) on annual basis when market circumstances demand regular intervention. In addition, currency hedging results in large and regular FX transactions.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives

DIS	BE6239645235	CZK	15.69%	16.20%	15.34%	19.52%	11.90%	12.42%	7.39%	11.39%	28/09/2012	

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X]} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F]} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

$$i = 1 \dots N$$
 from which $C = C0 * \dots * CN$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 36,6147 net (52,3068 gross).

2.4.6. Costs

Ongoing Charges:

Capitalisation :

Management fees and other administrative or operating costs: 1,747%
Transaction costs: 0,606%

Distribution :

Management fees and other administrative or operating costs: 1,745%
Transaction costs: 0,606%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 70,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Detail of the received (+) / given (-) collateral for financial derivatives

Name	Currency	Nominaal	Currency Fund	Waarde in munt fonds

Total				69988937.50

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank .

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 271.833,09 CZK and for the Management Company 108.733,23 CZK. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 8931623.1199308 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

2025 was another year of volatile economic recovery in Europe. Several macroeconomic indicators - such as PMIs, consumer confidence and inflation - showed a fragile balance.

The European composite PMI still started the year at a low level (49.6), but gradually climbed towards expansion, peaking at 52.8 in November. This improvement was mainly due to the continued strong services sector. In manufacturing, the recovery was less convincing: despite improvements, the manufacturing PMI remained below the 50-point threshold for almost the whole year, indicating continued contraction.

Consumers largely digested the big shocks of previous years, but confidence remained fragile. Consumers were spending again, but moderately; demand improved, but not broadly enough; and the road to full recovery remained dependent on further inflation decline and clearer economic progress.

After four rate cuts in the first half of the year, the European Central Bank (ECB) pressed the pause button in the second half: all three policy rates remained unchanged. The ECB remained committed to a data-dependent, meeting-by-meeting approach and stressed that inflation would cool further towards the 2% target. Remarkably, the outlook for both growth and inflation in 2026 was revised upwards again.

During 2025, both headline and core inflation declined further towards normalisation. Core inflation fell from 2.7% year-on-year in January to 2.3% in December. Overall inflation actually fell to 1.9% year-on-year in December, mainly due to the fall in energy prices, down from 2.4% at the beginning of the year.

Despite this challenging context, European small- and mid-cap stocks performed remarkably strongly. The MSCI EMU Small Cap and MSCI Mid Cap index were up +24.5% and +30.5% over the year, respectively. The KBC EMU SMID fund posted a full-year performance of c. +20.5%. The biggest positive contributors included Banco Sabadell, ThyssenKrupp, Bank of Ireland and Bankinter. In contrast, positions in SOITEC, IMCD, Aalberts and D'Ieteren weighed negatively on returns.

2.1.8. Future policy

We look forward to the year results and, more specifically, to the prospects for the companies in the portfolio. We remain vigilant towards any changes in business fundamentals (including growth, margins, cash generation and balance sheet structure) and how the market perceives them.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
 - a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 18 839.21 EUR.
This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund EMU Small & Medium Caps (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	4,186,579.51	5,647,786.26	9,834,365.78
Sales	10,011,462.69	4,966,255.64	14,977,718.34
Total 1	14,198,042.21	10,614,041.91	24,812,084.12
Subscriptions	7,810,737.21	6,560,365.13	14,371,102.34
Redemptions	12,038,557.38	6,508,674.13	18,547,231.51
Total 2	19,849,294.59	13,069,039.26	32,918,333.85
Monthly average of total assets	123,682,409.32	133,003,883.72	128,418,319.70
Turnover rate	-4.57%	-1.84%	-6.31%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 49,7289 net (71,0414 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 53.946,74 EUR and for the Management Company 21.578,69 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 6, with a market value fluctuating between 0 and 10069482 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
METSO CORP	EUR	160 000	14,98	2 396 800,00
Total				2 396 800,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
AUSTRIA GOVERNMENT 3.8 26JAN62 144A	EUR	2 327 000	EUR	2 388 696,00
REPUBLIC OF AUSTRI 2.9 20FEB34 144A	EUR	1 000	EUR	1 017,00
FRENCH REPUBLIC GOVERNMENT 0.0 25MAY32	EUR	249 960	EUR	206 122,00
Total				2 595 835,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	1,76	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	2.396.800,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	1,75	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
Republic of Austria	2.389.713,00	EUR

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU SMALL CAP - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU SMALL CAP - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU SMALL CAP - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund EMU Small & Medium Caps Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU SMALL CAP - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the

fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

2025 was a year of strong returns for European small- and mid-caps, but with an exceptionally erratic trajectory. Markets started the year with optimism around growth and AI, but were shaken several times in between by geopolitical uncertainty and especially the new US administration's trade policy. The "Liberation Day" rate announcements in early April triggered a sharp risk reduction and one of the biggest two-day declines in the S&P 500 since WWII, which also led to a temporary flight from riskier segments in Europe. Eventually, sentiment recovered, helped by rate breaks and expectations that central banks would keep policy easing. In that climate, European equities ended the year with a strong performance.

Within Europe, two factors played a pronounced role for small- and mid-caps. First, there was the continued rotation towards sectors with greater exposure to nominal growth and higher (or less rapidly declining) interest rates. Second, the European policy mix provided surprises. In March, Germany announced a major shift towards higher spending (defence and infrastructure), triggering a robust move in bond markets: the 10-year Bund rate experienced the biggest one-day jump since German reunification. This was relevant for European small- and mid-caps because, on average, they are more linked to the European business cycle and domestic investment cycles. The combination of higher investment ambitions, increased defence and infrastructure spending and a reassessment of European growth impulses helped support confidence in European cyclical and "domestic winners", even if interest rate movements caused volatility in the interim.

European banks had an exceptionally strong year. As a result, our overweight position in European banks made a clear positive contribution to the performance of the European small- and mid-cap allocation. Banks benefited from (i) an environment in which interest rates and steeper curves periodically became relevant again, (ii) renewed focus on European growth and investment impulses (especially after the German plans), and (iii) a strong momentum component: sectors that were doing well continued to attract inflows, further reinforcing relative outperformance.

For a portfolio with a focus on European mid- and small caps, this was particularly valuable because banks often act as a "transmission sector" of the domestic economy and credit cycle: when confidence in growth and investment improves, this quickly translates into higher valuations for financials.

Besides banks, two other market elements helped colour the European stock market year. First, there was the ongoing discussion about a possible AI bubble: big technology- and AI-related names remained strong, but the market became nervous at signals of overheating in the interim. For European small- and mid-caps, this meant that "AI" was not automatically rewarded: companies had to be able to demonstrate how AI impacts margins, productivity or demand growth. Second, driven by concerns about long-term inflation and possible currency depreciation, we saw investors gravitate heavily towards precious metals; gold and silver experienced their strongest annual rise since 1979. That underlined that 2025 did remain a year of uncertainty, despite the good final outcome for equities.

2.1.8. Future policy

2026 looks promising for European small- and mid-caps thanks to an improving macroeconomic environment and a series of structural tailwinds. Key economic indicators point to a re-acceleration of the industrial cycle, supported by the lagged effect of lower interest rates and more favourable financial conditions. In addition, Germany will loosen the fiscal reins in 2026, which, through higher infrastructure, innovation and defence investment, will mainly feed through to domestic, cyclical and industrial SMIDs.

Room is also opening up on the monetary front: while the Fed anticipates further rate cuts, European interest rates are stabilising and interest rate volatility is expected to decrease. The weaker dollar and a more favourable 2025 energy price environment create additional support for European assets.

In this setting, themes such as digitisation, automation, sustainable technology, healthcare and ageing take centre stage again. Companies operating in niche technology, industrial optimisation, medical equipment and high-end consumer segments benefit from structural demand and an improved profit cycle. Analysts expect earnings growth for European SMIDs to move towards double-digit levels in 2026, supported by operating leverage and recovery in investment activities.

Although geopolitical risks and policy surprises continue to demand attention, fundamentals are clearly shifting in favour of European small & midcaps. Selectivity remains important, but the combination of improving macro indicators, stimulus policies and strong structural growth drivers makes 2026 a promising year for this segment.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the euro area with a small or medium market capitalisation.
- a moderate level of liquidity risk: there can be invested in instruments with a lower liquidity, namely: shares with a smaller market capitalisation.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 19 873.98 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund EMU Small & Medium Caps Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,091,148.63	604,653.55	1,695,802.18
Sales	34,802,373.69	27,751,056.96	62,553,430.65
Total 1	35,893,522.32	28,355,710.51	64,249,232.83
Subscriptions	19,412,092.16	4,576,584.66	23,988,676.82
Redemptions	53,665,806.10	34,274,583.15	87,940,389.25
Total 2	73,077,898.26	38,851,167.81	111,929,066.07
Monthly average of total assets	134,148,388.05	109,895,536.91	121,826,374.97
Turnover rate	-27.72%	-9.55%	-39.14%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 29,1198 net (41,5998 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund EMU Small & Medium Caps Responsible Investing

Legal entity identifier:
875500XU7QBWLDMB5039

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.12% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 24.12% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 75.88% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI EMU SMALL CAP - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI EMU SMALL CAP - Net Return Index.	18.86	16.91	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI EMU SMALL CAP - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund EMU Small & Medium Caps Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI EMU SMALL CAP - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	114.56	49.01	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	24.12	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 2.5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	2.5	14.86	Yes
Minimum % Sustainable Investments with a social objective	Minimum 2.5% sustainable investments with a social objective.	2.5	3.02	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	17.83	17.17	16.91
Greenhouse gas intensity	76.69	66.95	49.01
Sustainable Investments	72.72	23.98	24.12
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	15.93	14.86
Sustainable Investments with a social objective (%)	40.04	5.23	3.02
Assets promoting E/S characteristics (%)	98.23	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 24.12% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:

01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
BANCO DE SABADELL SA	Banking	6.09%	Spain
BANK OF IRELAND GROUP PLC	Banking	3.92%	Ireland
CTS EVENTIM AG & CO KGAA	Consumer Discretionary Services	3.39%	Germany
D'IETEREN GROUP	Retail & Wholesale - Discretionary	3.31%	Belgium
BE SEMICONDUCTOR INDUSTRIES	Tech Hardware & Semiconductors	2.89%	Netherlands
ELIS SA	Industrial Services	2.85%	France
SPIE SA	Industrial Services	2.56%	France
BANKINTER SA	Banking	2.39%	Spain
UNIPOL ASSICURAZIONI SPA	Insurance	2.14%	Italy
BANCO BPM SPA	Banking	2.09%	Italy
BAWAG GROUP AG	Banking	2.06%	Austria
LOTUS BAKERIES	Consumer Staple Products	2.03%	Belgium
ASR NEDERLAND NV	Insurance	1.91%	Netherlands
TRIGANO SA	Consumer Discretionary Products	1.73%	France
ID LOGISTICS GROUP	Industrial Services	1.65%	France

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 24.12%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund EMU Small & Medium Caps Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives could be used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund EMU Small & Medium Caps Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

14.86% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 6.24% are environmentally sustainable investments (taxonomy-aligned) and 3.02% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Banking	19.96%
Industrial Services	9.60%
Materials	9.25%
Industrial Products	8.12%
Real Estate	6.84%
Consumer Discretionary Products	6.66%
Insurance	5.91%
Tech Hardware & Semiconductors	5.05%
Retail & Wholesale - Discretionary	4.84%
Financial Services	4.70%
Consumer Discretionary Services	4.63%
Consumer Staple Products	3.72%
Health Care	3.70%
Software & Tech Services	3.61%
Media	1.57%
Telecommunications	1.55%
Utilities	0.26%
Not specified	0.03%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 6.24% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are invested primarily in shares of companies in the euro area which have a small to medium market capitalisation.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.35%.

The proportion of investments in enabling activities was 2.55%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 6.24%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 24.12% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 14.86%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 3.02%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund EMU Small & Medium Caps Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI EMU SMALL CAP - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in European countries where conditions are such as to ensure accelerated economic growth in the short or medium term (so- called Emerging Markets).

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Europe - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 6.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	0,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	Nil	%

Concentration data:

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in countries where conditions are such as to allow an accelerated economic growth in the short or medium term. More particularly, this involves countries in Asia, Latin America, Central Europe and Eastern Europe.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the strategy adopted, the Fund was and is invested in a selection of shares from Emerging Markets. The "Asia Pacific" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in Emerging Markets equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from

Asian, Latin-American and Central and Eastern European countries.

- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from Asian, Latin-American and Central and Eastern European countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Emerging Markets (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	356,517,288.55	321,793,190.89	678,310,479.45
Sales	460,095,840.04	252,308,263.03	712,404,103.07
Total 1	816,613,128.59	574,101,453.92	1,390,714,582.52
Subscriptions	156,000,634.21	176,313,540.14	332,314,174.35
Redemptions	263,526,771.55	114,321,527.49	377,848,299.04
Total 2	419,527,405.76	290,635,067.63	710,162,473.39
Monthly average of total assets	615,691,841.56	652,874,793.99	634.856.623.21
Turnover rate	64.49%	43.42%	107.20%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 24,5373 net (35,0534 gross).

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW(D)} / \text{NIW(Y)}] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW(D)} / \text{NIW(S)}] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,849%
Transaction costs: 0,398%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,871%
Transaction costs: 0,398%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,486%
Transaction costs: 0,403%

Classic Shares CSOB CZK Capitalisation :

Management fees and other administrative or operating costs: 1,755%
Transaction costs: 0,398%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 57,62% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 3.226,72 EUR and for the Management Company 1.290,69 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 4026810.45 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
HAIDILAO INTERNATIONAL HOLDI	HKD	2 250 000	14,25	3 507 421,79
VODACOM GROUP LTD	ZAR	54 000	141,31	392 111,46
Total				3 899 533,25
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
BUNDESREPUBLIK DEUTSCH 0.25 15FEB27	EUR	431 778	EUR	424 341,00
KREDITANSTALT FUE 2.231 19FEB30 FRN	EUR	100 000	EUR	100 597,00
KREDITANSTALT FUER WIED 0.0 28JUL31	EUR	4 350 000	EUR	3 737 433,00
Total				4 262 371,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,54	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	3.899.532,71	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,54	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
Kreditanstalt fuer Wiederaufbau	3.838.030,00	EUR
Federal Republic of Germany	424.341,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 90% of the assets will be invested, directly or indirectly, in shares of emerging market companies.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Emerging Markets Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund Emerging Markets Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on

www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Emerging Markets-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Emerging Markets-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI Emerging Markets-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable

themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Emerging Markets Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the

fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

As stipulated in the prospectus, the fund management aimed to reflect the performance of the MSCI Emerging Markets Index.

The fund's strategy is also consistent with the SRI strategy and the fund's assets are invested accordingly.

The investments of KBC Equity Fund Emerging Europe and KBC Equity Fund Emerging Markets include positions in shares listed on the Moscow stock exchange. Given the particular situation and the sanctions policy, these positions are valued at 0.01 RUB /share; the impact on the NAV can roughly be estimated at **35,003,213.42 EUR** and **11,229,888.68 EUR** respectively.

2.1.8. Future policy

As stipulated in the prospectus, the fund will continue to track the performance of the MSCI Emerging markets Index.

Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies

other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of emerging market companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 373.30 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Emerging Markets Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	346,838,589.46	380,436,739.43	727,275,328.89
Sales	202,349,344.79	107,378,729.40	309,728,074.19
Total 1	549,187,934.25	487,815,468.83	1,037,003,403.08
Subscriptions	409,683,915.33	520,283,123.98	929,967,039.31
Redemptions	294,729,370.41	244,923,078.04	539,652,448.45
Total 2	704,413,285.74	765,206,202.02	1,469,619,487.76
Monthly average of total assets	1,150,360,183.29	1,470,469,998.80	1.314.590.436.46
Turnover rate	-13.49%	-18.86%	-32.91%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 6,1662 net (8,8089 gross).

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,51% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.70%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Emerging Markets Responsible Investing

Legal entity identifier:
549300BD4WMIYX55Z705

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.04% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 25.04% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 74.93% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Emerging Markets-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI Emerging Markets-Net Return index.	22.52	20.77	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI Emerging Markets-Net Return index as described in the prospectus under the title 'information concerning the sub-fund Emerging Markets Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI Emerging Markets-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	220.44	132.04	Yes
Minimum % Sustainable Investments	A minimum of 15.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	15	25.04	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	17.77	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	7.27	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	99.97	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	21.47	21.11	20.77
Greenhouse gas intensity	132.73	135.88	132.04
Sustainable Investments	70.88	24.49	25.04
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	17.02	17.77
Sustainable Investments with a social objective (%)	44.34	7.47	7.27
Assets promoting E/S characteristics (%)	99.96	100.00	99.97

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 25.04% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:

01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
TAIWAN SEMICONDUCTOR MANUFAC	Tech Hardware & Semiconductors	9.72%	Taiwan
SAMSUNG ELECTRONICS CO LTD	Tech Hardware & Semiconductors	3.62%	Korea, Republic of

PING AN INSURANCE GROUP CO-A	Insurance	0.74%	China

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 25.04%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Emerging Markets Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.97% in assets that promote environmental or social characteristics and 0.03% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Emerging Markets Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

17.77% of the sustainable investments are environmentally sustainable investments and 7.27% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	25.84%
Banking	19.76%
Retail & Wholesale - Discretionary	6.88%
Media	5.37%
Health Care	5.22%
Consumer Discretionary Products	4.80%
Materials	4.58%
Financial Services	4.53%
Insurance	4.11%
Consumer Staple Products	4.09%
Telecommunications	2.67%
Industrial Services	2.33%
Software & Tech Services	2.32%
Industrial Products	2.28%
Retail & Wholesale - Staples	1.68%
Real Estate	1.50%
Consumer Discretionary Services	1.03%
Utilities	0.54%
Renewable Energy	0.47%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and

trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

At least 90% of the assets will be invested, directly or indirectly, in shares of emerging market companies.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

☒ In fossil gas ☐ In nuclear energy

☐ No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in fossil gas sector activities that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy compliant when at least 20% of revenues are compliant with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.01%.

The proportion of investments in enabling activities was 0.01%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 25.04% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 17.77%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 7.27%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund Emerging Markets Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Emerging Markets-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in shares and/or share-related investments that may come from any region, sector or theme.

The sub-fund's stock selection is based on quantitative criteria using publicly available information including, but not limited to, companies' accounting, stock market and technical data such as price trends and volatility..., In addition, sentiment data may also be used.

Sentiment data can include data that expresses market participants' views about a particular company through research papers and third-party data providers, among others.

These criteria are incorporated into a specific model designed by KBC Asset Management that applies advanced quantitative techniques, including "machine learning" tools, to analyze a long and broad history of stock-level data. "Machine learning" is an application of artificial intelligence in which algorithms and statistical models are used by computer systems to learn to perform specific tasks without explicit instructions and solve problems that cannot be precisely specified, requiring logical reasoning ability.

The basic assumption of this model is that share prices are not always an accurate reflection of the fundamental value of the company in question, but that this fundamental value can be estimated provided one has sufficient information and can process this information efficiently.

It is also assumed that share prices will evolve towards fundamental value over time. However, the way in which this happens depends on the prevailing cycle in the market structure and its impact on the criteria included in the model. The quantitative model created by KBC Asset Management estimates a relative rating per share on a regular basis, evaluating shares in the investment universe relative to each other.

Better-rated shares are assigned a relatively heavier weight in the sub-fund's portfolio relative to their weight in the sub-fund's benchmark, while lower-rated shares are assigned a relatively lighter weight relative to their weight in the benchmark.

Appropriate diversification is ensured in accordance with relevant legal and risk restrictions.

However, the fund manager may decide at any time not to follow the models or to follow them only partially.

Human intervention is expected to occur rather in exceptional circumstances.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('**indicator 4**') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Active positions in global equities were taken on the basis of quantitative analysis and a strict risk framework. Approximately once a month, the fund was rebalanced based on the recommendations of the forementioned analysis.

2.1.8. Future policy

The fund will continue its active stock selection strategy based on quantitative analysis while respecting the strict risk framework.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Enhanced Intelligence Stock Selection (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	102,627,496.93	77,851,228.44	180,478,725.37
Sales	97,120,526.93	69,360,246.88	166,480,773.81
Total 1	199,748,023.86	147,211,475.32	346,959,499.18
Subscriptions	9,743,570.63	15,245,230.88	24,988,801.51
Redemptions	4,645,638.48	4,709,266.45	9,354,904.93
Total 2	14,389,209.11	19,954,497.33	34,343,706.44
Monthly average of total assets	131,748,661.57	147,859,685.39	140,038,151.00
Turnover rate	140.69%	86.07%	223.24%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 97,0711 net (138,6731 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-

fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 6.028,11 EUR and for the Management Company 2.411,24 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 1981745.75 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
CAN IMPERIAL BK OF COMMERCE	CAD	11 133	124,43	860 485,99
FREEDOM HOLDING CORP/NV	USD	4 400	121,68	455 866,15
POWER CORP OF CANADA	CAD	5 400	72,95	244 695,26
Total				1 561 047,40
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
KINGDOM OF BELGIUM GOV 3.75 22JUN45	EUR	954 340	EUR	939 611,00
FRANCE 2009 4,5% 24/04/2041	EUR	713 222	EUR	777 235,00
Total				1 716 846,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,99	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	1.561.049,23	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,98	%

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of European companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Europe Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the European region. The "Europe" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in European equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

TOTAL	100.00	100.00	100,00

2.4.2. Changes in the composition of the assets of KBC Equity Fund Europe (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	36,720,241.24	40,750,241.02	77,470,482.26
Sales	25,595,825.69	21,967,821.26	47,563,646.95
Total 1	62,316,066.93	62,718,062.27	125,034,129.21
Subscriptions	13,016,686.07	21,234,213.96	34,250,900.03
Redemptions	2,089,725.50	1,359,788.88	3,449,514.39
Total 2	15,106,411.58	22,594,002.84	37,700,414.42
Monthly average of total assets	76,956,519.26	101,922,990.87	89,641,097.58
Turnover rate	61.34%	39.37%	97.42%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 28,3456 net (40,4938 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 1.562,11 EUR and for the Management Company 624,84 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 1337311.6 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
SAIPEM SPA	EUR	140 000	2,42	339 500,00
Total				339 500,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
FRENCH REPUBLIC GOVERNMENT 0.5 25MAY29	EUR	392 715	EUR	368 050,00
Total				368 050,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,29	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	339.500,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,29	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name)

name collateral issuer	Market value on a settled basis	currency
French Republic	368.050,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of euro-area companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the Eurozone. The "Emu" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in Eurozone equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'.

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 9 990.07 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	608,582,256.34	228,593,838.58	837,176,094.92
Sales	728,977,639.42	214,340,093.52	943,317,732.95
Total 1	1,337,559,895.76	442,933,932.11	1,780,493,827.87
Subscriptions	262,778,617.32	158,122,154.83	420,900,772.15
Redemptions	395,037,065.43	147,833,884.57	542,870,950.00
Total 2	657,815,682.75	305,956,039.40	963,771,722.15
Monthly average of total assets	666,185,626.81	605,097,464.21	635.148.899.04
Turnover rate	102.03%	22.64%	128.59%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 11,2454 net (16,0649 gross).

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,733%

Transaction costs: 0,361%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,764%

Transaction costs: 0,361%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,473%

Transaction costs: 0,359%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 54,26% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 79.257,23 EUR and for the Management Company 31.702,89 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 10, with a market value fluctuating between 0 and 30768661.14 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
METSO CORP	EUR	100 000	14,98	1 498 000,00
Total				1 498 000,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
KINGDOM OF BELGIUM GOV 1.25 22APR33	EUR	1 812 912	EUR	1 621 585,00
Total				1 621 585,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,23	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	1.498.000,00	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,23	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
Kingdom of Belgium	1.621.585,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in the shares of companies from the euro area.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the Eurozone. The "Emu" part of the KBC AM strategy is followed. DBI requirements are taken into account as well.

2.1.8. Future policy

In the future, the fund will continue to invest in Eurozone equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone DBI-RDT (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	40,152,464.42	37,673,255.42	77,825,719.85
Sales	35,984,676.97	23,963,030.96	59,947,707.93
Total 1	76,137,141.39	61,636,286.38	137,773,427.77
Subscriptions	19,198,486.30	23,360,761.88	42,559,248.18
Redemptions	8,424,358.54	9,995,435.29	18,419,793.83
Total 2	27,622,844.84	33,356,197.17	60,979,042.01
Monthly average of total assets	99,932,976.15	122,427,260.77	111,361,523.98
Turnover rate	48.55%	23.10%	68.96%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

BE6299576080
KBC Equity Fund Eurozone DBI-RDT Classic Shares DIS
Annual performance compared to the benchmark from 01/01/2019 through 31/12/2025 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6299576080	EUR	25.71%	23.70%	15.76%	17.17%	9.94%	11.46%			02/01/2018	6.49%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 02/04/2026: 29,2117 net (41,7310 gross).

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Beveik of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Beveik's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Beveik.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies in the euro area.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Eurozone Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund Eurozone Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry,

weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe. These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI EMU-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI EMU-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI EMU-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Eurozone Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to

the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund is and has been invested in a selection of equities from the Eurozone. The "Emu" part of the KBC AM strategy is followed. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly.

2.1.8. Future policy

In the future, the fund will continue to invest in Eurozone equities, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 17 615.51 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Eurozone Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,026,461,466.94	447,867,763.45	1,474,329,230.39
Sales	828,753,286.49	355,983,910.70	1,184,737,197.19
Total 1	1,855,214,753.43	803,851,674.15	2,659,066,427.58
Subscriptions	478,866,479.93	333,947,502.49	812,813,982.42
Redemptions	313,686,862.53	249,701,620.98	563,388,483.51
Total 2	792,553,342.46	583,649,123.47	1,376,202,465.93
Monthly average of total assets	1,034,156,960.92	1,142,596,279.12	1,089,251,130.65
Turnover rate	102.76%	19.27%	117.77%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives

2.4.5. Performance figures

Classic Shares

BE6307731156
KBC Equity Fund Eurozone Responsible Investing Classic Shares CAP
Annual performance compared to the benchmark from 01/01/2018 through 31/12/2025 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307731156	EUR	26.08%	23.70%	18.33%	17.17%		11.46%			05/11/2018	4.01%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional Discretionary Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,774%

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 99.655,51 EUR and for the Management Company 39.862,20 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 6, with a market value fluctuating between 0 and 25064310.03 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
INPOST SA	EUR	40 000	10,47	418 800,00
Total				418 800,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
KINGDOM OF BELGIUM 3.0 22JUN33 144A	EUR	49 548	EUR	50 090,00
KREDITANSTALT FUE 2.231 19FEB30 FRN	EUR	400 000	EUR	402 389,00
BUNDESSCHATZANWEISUNGE N 2.9 18JUN26	EUR	6	EUR	6,00
Total				452 485,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,03	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 21.87% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 21.87% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 78.13% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI EMU-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI EMU-Net Return index.	17.12	15.07	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI EMU-Net Return index as described in the prospectus under the title 'information concerning the sub-fund Eurozone Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI EMU-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	80.56	62.59	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	21.87	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	10.60	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	9.83	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	15.09	15.83	15.07
Greenhouse gas intensity	47.81	46.80	62.59
Sustainable Investments	79.34	22.20	21.87
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	10.11	10.60
Sustainable Investments with a social objective (%)	49.97	10.40	9.83
Assets promoting E/S characteristics (%)	99.75	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 21.87% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
INTESA SANPAOLO	Banking	5.29%	Italy
ASML HOLDING NV	Tech Hardware & Semiconductors	5.04%	Netherlands
UNICREDIT SPA	Banking	4.91%	Italy
ALLIANZ SE-REG	Insurance	3.73%	Germany
AERCAP HOLDINGS NV	Financial Services	3.38%	Netherlands
SAP SE	Software & Tech Services	2.85%	Germany
BANCO BPM SPA	Banking	2.75%	Italy
INFINEON TECHNOLOGIES AG	Tech Hardware & Semiconductors	2.72%	Germany
FRESENIUS SE & CO KGAA	Health Care	2.62%	Germany
ADIDAS AG	Consumer Discretionary Products	2.58%	Germany
CAPGEMINI SE	Software & Tech Services	2.03%	France
DEUTSCHE BANK AG-REGISTERED	Banking	1.94%	Germany
ERSTE GROUP BANK AG	Banking	1.78%	Austria
NN GROUP NV	Insurance	1.66%	Netherlands
FERRARI NV	Consumer Discretionary Products	1.62%	Netherlands

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 21.87%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Eurozone Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Eurozone Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

10.60% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 1.44% are environmentally sustainable investments (taxonomy-aligned) and 9.83% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Banking	27.02%
Insurance	11.01%
Health Care	9.32%
Tech Hardware & Semiconductors	9.31%
Consumer Discretionary Products	8.21%
Consumer Staple Products	6.81%
Software & Tech Services	5.25%
Industrial Services	4.62%
Financial Services	4.06%
Media	3.65%
Materials	2.58%
Real Estate	2.36%
Industrial Products	2.26%
Retail & Wholesale - Discretionary	1.65%
Consumer Discretionary Services	1.12%
Telecommunications	0.52%
Utilities	0.25%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction,

production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 1.44% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies in the euro area. Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.18%.

The proportion of investments in enabling activities was 1.04%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 1.44%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 21.87% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 10.60%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 9.83%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Eurozone Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI EMU-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares of listed family enterprises in Europe and North America.

To be considered as a family enterprise, the following conditions must be met:

- one family owns, directly or indirectly (e.g. through a company or foundation), the highest number of shares (percentage of interest) in the company and;
- one or more members of this family sit on the company's board of directors, directly or indirectly (e.g. through a company or by formal mandate from a third party).

Companies with strong family roots focus on the long term. Family enterprise shareholders want to transfer their company to the next generation so it is in their own interest to ensure that their company does well. They pursue growth responsibly and generally take less risk. They are highly involved in the company, both financially and emotionally, and are, therefore, more willing to invest capital in the company in the long term. This enables them to draw up a long - term strategy and implement it in practice, too.

(*) In the case of indirect shareholding, the percentage interest is calculated by multiplying the successive percentage interest.

For example:

Family X owns 60% of the shares of Company A, which in turn owns 50% of the shares of Company B. Consequently, Family X's percentage of interest in company B is 30%.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

2025 was a year of exceptional dynamism in financial markets, characterised by geopolitical uncertainty, strong sector rotations and striking volatility. Despite this turbulence, family businesses worldwide have once again proved their resilience and long-term qualities.

In Europe, Switzerland and Scandinavia - the core regions of our portfolio - listed family companies proved particularly resilient to the vagaries of the market. Their strong balance sheets, prudent management teams and focus on sustainable value creation offered stability in a year when many investors were looking for certainty and predictability. Family businesses in these regions also benefited from their leading positions in sectors such as manufacturing, healthcare, medical technology and consumer durables. The structural trends of ageing, digitalisation and sustainability played into the hands of these companies, while their local roots and entrepreneurship enabled them to respond quickly to changing market conditions.

In the United States, family-owned and especially founder-led companies also contributed significantly to the portfolio, with strong representation in growth sectors such as AI, data centres, cybersecurity and the fashion sector. These US companies, often still led or heavily influenced by the founding family, are distinguished by their entrepreneurial culture, strong iconic brands and long-term vision. They know how to successfully respond to changing consumer habits and trends, such as the growing demand for sustainable fashion, lifestyle products. Their innovativeness, direct connection with customers and retention of the founder mentality ensure a solid foundation even in a year with sharp corrections and sector rotations.

The year was further marked by a strong performance from the technology sector driven by the AI theme and cyclical sectors such as banking and defence, where family businesses tend to be less represented. This partly explained why the portfolio lagged behind the broad market in certain periods. Nevertheless, the focus on quality, cash flow and prudent entrepreneurship remained a solid foundation for stable value creation, even in an environment of rising interest rate volatility and geopolitical tensions.

The combination of structural growth trends, regional diversification and thematic exposure through US family offices ensured that the portfolio remained well positioned for the long term. Family businesses proved again in 2025 that their uniqueness - with a focus on continuity, innovation and responsible entrepreneurship - provides a valuable buffer against market uncertainties.

2.1.8. Future policy

After an exceptionally strong and volatile 2025 stock market year, the outlook for 2026 for family businesses in Europe, Switzerland and Scandinavia is predominantly positive. The macroeconomic environment is characterised by a combination of cyclical tailwinds and structural growth opportunities. Central banks, especially the Fed, are expected to cut interest rates again, while additional liquidity and fiscal stimulus are supporting the economy.

A major new development for 2026 is that Germany, traditionally a paragon of fiscal discipline, will loosen the fiscal reins. The German government has announced its intention to create more room for investment in infrastructure, defence and innovation. This means that there will be additional impetus for the economy, which will particularly benefit family businesses in industry, construction and technology. This fiscal policy easing could also support sentiment in the broader European economy and increase investment appetite.

In Europe, ECB policy remains a focus, especially now that inflation expectations and growth estimates have been revised upwards. This may lead to higher interest rate volatility, but also presents opportunities for companies with strong balance sheets and long-term views-typical characteristics of family-owned companies in our portfolio.

Analysts expect earnings growth to accelerate, especially in sectors such as consumer goods, industrials and healthcare, all sectors that make up a large share of the family fund. Family-owned companies in these sectors benefit from their strong market position, pricing power and operational flexibility.

The Europe, Switzerland and Nordic regions are distinguished by a high concentration of listed family companies with a strong tradition of prudent management, innovation and sustainable entrepreneurship. These companies are often market leaders in their niche, have solid balance sheets and a proven track record of creating long-term shareholder value. In the current climate, where investors are becoming more selective and the focus is shifting towards quality, stability and predictable cash flows, family businesses from these regions are particularly well positioned.

In addition, themes such as digitalisation, sustainability and energy transition remain central. Many European family businesses are leading the way in developing sustainable products and processes, thanks in part to their commitment to local communities and their focus on continuity across generations. In Scandinavia and Switzerland, we also see a strong tradition of responsible entrepreneurship and technological innovation, which translates into a competitive advantage on a global scale.

Against this positive outlook, there are also risks. Geopolitical tensions, trade conflicts and possible interest rate hikes by the ECB could cause volatility. In addition, the market remains critical of companies that invest aggressively without clear returns, especially in technology and AI. Family businesses often stand out here for their prudent investment policies and focus on sustainable value creation.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Wealth Management, Wealth & Institutional Office Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a real chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Family Enterprises (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	6,598,845.52	27,963,036.71	34,561,882.24
Sales	18,105,533.96	15,875,972.61	33,981,506.57
Total 1	24,704,379.49	43,839,009.32	68,543,388.80
Subscriptions	3,563,748.67	23,768,106.73	27,331,855.40
Redemptions	14,198,739.30	11,429,248.26	25,627,987.56
Total 2	17,762,487.97	35,197,354.99	52,959,842.96
Monthly average of total assets	192,123,848.07	196,875,015.67	194,558,821.46
Turnover rate	3.61%	4.39%	8.01%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 18,1108 net (25,8726 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 18.925,73 EUR and for the Management Company 7.570,29 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 4832908 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).

Currency: EUR

Institutional Discretionary Shares Capitalisation

Launch date: 15 February 2024
Initial subscription price: 100 EUR
Currency: EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares with a Flemish character where conditions are such as to allow accelerated economic growth in the short or medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('**indicator 4**') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

2025 was another year of volatile economic recovery in Europe. Several macroeconomic indicators - such as PMIs, consumer confidence and inflation - showed a fragile balance.

The European composite PMI still started the year at a low level (49.6), but gradually climbed towards expansion, peaking at 52.8 in November. This improvement was mainly due to the continued strong services sector. In manufacturing, the recovery was less convincing: despite improvements, the manufacturing PMI remained below the 50-point threshold for almost the whole year, indicating continued contraction.

Consumers largely digested the big shocks of previous years, but confidence remained fragile. Consumers were spending again, but moderately; demand improved, but not broadly enough; and the road to full recovery remained dependent on further inflation decline and clearer economic progress.

After four rate cuts in the first half of the year, the European Central Bank (ECB) pressed the pause button in the second half: all three policy rates remained unchanged. The ECB remained committed to a data-dependent, meeting-by-meeting approach and stressed that inflation would cool further towards the 2% target. Remarkably, the outlook for both growth and inflation in 2026 was revised upwards again.

During 2025, both headline and core inflation declined further towards normalisation. Core inflation fell from 2.7% year-on-year in January to 2.3% in December. Overall inflation actually fell to 1.9% year-on-year in December, mainly due to the fall in energy prices, down from 2.4% at the beginning of the year.

Despite this challenging context, the Belgian stock market gauge performed strongly with +20.9%. The KBC Flanders fund posted a full-year performance of c. +10.5%. The biggest positive contributors included KBC, ING and Aperam. In contrast, positions in Lotus Bakeries, Azelis and SOITEC weighed negatively on returns.

2.1.8. Future policy

We look forward to the year results and, more specifically, to the prospects for the companies in the portfolio. We remain vigilant towards any changes in business fundamentals (including growth, margins, cash generation and balance sheet structure) and how the market perceives them.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of the investments in shares of Flemish companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of concentration risk: there is a concentration of the investments in shares of Flemish companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 5 611.08 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Flanders (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	495,772.65	2,149,800.41	2,645,573.06
Sales	3,735,859.65	3,719,864.85	7,455,724.50
Total 1	4,231,632.31	5,869,665.26	10,101,297.56
Subscriptions	1,230,468.67	1,015,294.54	2,245,763.21
Redemptions	3,622,247.77	3,119,806.92	6,742,054.69
Total 2	4,852,716.44	4,135,101.46	8,987,817.90
Monthly average of total assets	43,849,982.12	44,648,945.05	44,257,485.30
Turnover rate	-1.42%	3.88%	2.52%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 40,8211 net (58,3159 gross).

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,83% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional Discretionary Shares

Fee for managing the investment portfolio	0.00%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Administration fee	0.02%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 68.355,31 EUR and for the Management Company 27.342,13 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 6, with a market value fluctuating between 0 and 5932813.3 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
AGEAS	EUR	28 300	59,80	1 692 340,00

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies which, according to the manager, fit within the theme of 'structural growth'. The manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. It invests in a worldwide selection of shares.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies

('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Annual report Structural growers

2025 was a year of turbulence and uncertainty, driven by geopolitical tensions and sweeping policies from the United States. The arrival of the new Trump administration triggered a wave of trade measures and tariff increases, leading to considerable volatility globally. In addition, conflicts such as Iran-Israel, Russia-Ukraine and the tense relationship between China and the US kept the markets in check. Despite this turmoil, 2025 ultimately turned out to be a particularly strong stock market year, with substantial gains for global equity markets.

The rollout of AI infrastructure accelerated, leading to optimism and solid investment in technology. Interestingly, Europe performed in line with the US in local currency, while emerging markets even outperformed. At the same time, investors faced several notable trends: the US dollar weakened sharply in the first half of the year, European interest rates surprised at the upside and diverged sharply from the US, and geopolitical uncertainty led to a massive flight to precious metals such as gold and silver.

For the Structural Growth Fund, however, 2025 was a challenging year. While the broad market benefited from sectors such as defence and banks, the fund lagged behind. This had several causes.

First, Structural Growers deliberately has no exposure to banks and defence stocks because of the blacklist, sectors that were among the absolute winners this year. The surge in defence stocks was the direct result of increased defence spending in Europe, while banks benefited from the interest rate and volatility environment. By avoiding these sectors, the fund was unable to ride on these rallies.

In addition, the market experienced a distinct style rotation in 2025. Whereas in previous years the quality style - traditionally a core of Structural Growth stocks - was rewarded, this year there was a preference for cyclical and value stocks. Quality stocks lagged, further depressing the fund's relative performance. Within technology, hardware and AI infrastructure companies performed particularly strongly, while software stocks, a key pillar within Structural Growers, were under pressure. Investors feared AI disruption within the software sector, leading to weak share price performance in this corner of the market.

A notable feature of the stock market year was the strong momentum effect. Stocks and sectors that were already performing well attracted more and more capital, further widening the gap between winners and laggards. It was evident in defence, banks and certain technology companies, while more defensive and qualitative growth companies - such as those in the Structural Growth fund - actually fell out of favour. The momentum effect caused the market to focus on a limited number of themes and sectors, resulting in an unusually wide spread in returns between different styles and sectors.

The broad US indices were trading at valuation levels similar to the 2021 peak by the end of the year, despite higher interest rates and weaker earnings growth. At the same time, geopolitical uncertainty translated into an unprecedented rally in precious metals, with gold and silver the absolute standouts. Oil prices resumed their downward trend in December, while diversification into emerging markets and European equities paid off, partly due to growing concerns about a possible AI bubble.

For Structural Growers, all this meant that the fund, with its focus on predictable, quality growth, could benefit less from the short, powerful rallies in more cyclical or speculative segments of the market.

2.1.8. Future policy

Outlook

After an exceptionally strong but volatile stock market year 2025, we enter 2026 with simultaneously clear tailwinds and tangible risks. On the positive side, several stock market houses expect that the combination of accommodative monetary policy, more pro-growth policies on the fiscal side, operating leverage at companies and acceleration in AI adoption can drive economic activity and profits. Economists predict another 1-2 interest rate cuts for 2026, which will provide support to growth stocks.

Moreover, the One Big Beautiful Bill Act (OBBBA) would increase personal incomes by about \$65 billion by 2026, mainly through higher tax refunds and lower deductions throughout the year. That, combined with solid household balances, can stabilise consumption and fuel the cyclical recovery. At the same time, there is more room for margin expansion: cost discipline and pricing power were already favourable in 2025, and the proportion of companies reaping quantifiable benefits from AI adoption is rising steadily. Indicators such as the ISM and the lagged effect of lower interest rates on activity also point to a resurgence of the industrial cycle. That supports an environment of fine earnings growth, with broad positive earnings revisions across many sectors. Therefore, in the last quarter, we increased the weight of industrial values in the portfolio at the expense of defensive equities.

Europe remains a separate story, with an ECB potentially moving towards tightening due to upwardly revised growth estimates and inflation, which could lead to higher interest rate volatility. Japan has also seen tighter policies, while the US is easing. These divergent policies can lead to sectoral rotations and regional disparities.

AI adoption remains a key driver of productivity growth and margins, but the market has become more critical of companies that aggressively invest in AI without clear returns. Even within the software sector, fears of AI disruption on the one hand and the issue of when software companies' investments in developing AI agents will finally translate into profits remain vexed topics. Selectivity and discipline will therefore remain crucial within the technology sector.

The fund's strategy remains focused on long-term sustainable, predictable growth, independent of temporary market trends, sector rotations or momentum movements. Despite the underperformance in 2025, we remain convinced of the strength of structural growth stocks as a foundation for stable long-term value creation.

We keep our overweight in Healthcare because we believe the sector is due to catch up and could return to favour if investors become more in need of protection against a possible AI correction, or lose enthusiasm for financials. The latter depends heavily on interest rate developments and central bank policies. The sector benefits from long-term trends such as an ageing population, rising demand for care and medicines, and continued innovation in biotechnology, medical devices and digital care. The ageing population is creating a growing patient population worldwide and an increasing need for chronic care, prevention and treatments. Healthcare companies typically have predictable cash flows, strong balance sheets and a high degree of pricing power.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth & Institutional Office shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional F Shares LU: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Discretionary Wealth Management, Wealth & Institutional Office Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Fundamental Opportunities (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	156,534,675.97	368,076,088.03	524,610,764.00
Sales	142,708,785.05	107,777,645.80	250,486,430.86
Total 1	299,243,461.02	475,853,733.83	775,097,194.86
Subscriptions	83,422,938.25	538,333,267.28	621,756,205.53
Redemptions	63,999,759.50	264,224,775.74	328,224,535.24
Total 2	147,422,697.75	802,558,043.02	949,980,740.77
Monthly average of total assets	609,861,561.30	699,701,417.46	656.086.217.58
Turnover rate	24.89%	-46.69%	-26.66%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 4,8315 net (6,9022 gross).

In accordance with the Royal Decree of 10 November 2006 on the accounting and the annual accounts of certain public collective investment undertakings, investors are informed that the General Meeting of the fund will decide to pay a dividend despite the fact that a negative 'result available for appropriation' was recorded for the corresponding financial year.

Investors are also informed that the dividend to be paid stems directly from the interest, dividends and realised capital gains received from the investments made during the financial year corresponding to the dividend to be paid out.

Corporate Wealth & Institutional Office shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 4,6764 net (6,6806 gross).

In accordance with the Royal Decree of 10 November 2006 on the accounting and the annual accounts of certain public collective investment undertakings, investors are informed that the General Meeting of the fund will decide to pay a dividend despite the fact that a negative 'result available for appropriation' was recorded for the corresponding financial year.

Investors are also informed that the dividend to be paid stems directly from the interest, dividends and realised capital gains received from the investments made during the financial year corresponding to the dividend to be paid out.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 1.189,68 EUR and for the Management Company 475,87 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 1, with a market value fluctuating between 0 and 4860651.8 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).

Institutional Discretionary Shares Distribution

Launch date: 15 February 2024
Initial subscription price: 100 EUR
Currency: EUR

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

The sub-fund invests primarily in shares of companies that, according to the fund manager, fit within the theme of 'structural growth'. The fund manager therefore mainly selects shares of companies with relatively high turnover growth, rising profit margins, high returns on investment capital or high free cash flows. Investments are made in a worldwide selection of shares. The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General

exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Annual report Structural growers

2025 was a year of turbulence and uncertainty, driven by geopolitical tensions and sweeping policies from the United States. The arrival of the new Trump administration triggered a wave of trade measures and tariff increases, leading to considerable volatility worldwide. In addition, conflicts such as Iran-Israel, Russia-Ukraine and the tense relationship between China and the US kept the markets in check. Despite this turmoil, 2025 ultimately turned out to be a particularly strong stock market year, with substantial gains for global equity markets.

The rollout of AI infrastructure accelerated, leading to optimism and solid investment in technology. Interestingly, Europe performed in line with the US in local currency, while emerging markets even outperformed. At the same time, investors faced several notable trends: the US dollar weakened sharply in the first half of the year, European interest rates surprised at the upside and diverged sharply from the US, and geopolitical uncertainty led to a massive flight to precious metals such as gold and silver.

However, for the Structural Growth Fund, 2025 was a challenging year. While the broad market benefited from sectors such as defence and banks, the fund lagged behind. This had several causes.

First, Structural Growers deliberately has no exposure to banks and defence stocks because of the blacklist, sectors that were among the absolute winners this year. The surge in defence stocks was the direct result of increased defence spending in Europe, while banks benefited from the interest rate and volatility environment. By avoiding these sectors, the fund was unable to ride on these rallies.

In addition, the market experienced a distinct style rotation in 2025. Whereas in previous years the quality style - traditionally a core of Structural Growth stocks - was rewarded, this year there was a preference for cyclical and value stocks. Quality stocks lagged, further depressing the fund's relative performance. Within technology, hardware and AI infrastructure companies performed particularly strongly, while software stocks, a key pillar within Structural Growthers, were under pressure. Investors feared AI disruption within the software sector, leading to weak share price performance in this corner of the market.

A notable feature of the stock market year was the strong momentum effect. Stocks and sectors that were already performing well attracted more and more capital, further widening the gap between winners and laggards. It momentum was evident in defence, banks and certain technology companies, while more defensive and qualitative growth companies - such as those in the Structural Growth fund - actually fell out of favour. The momentum effect caused the market to focus on a limited number of themes and sectors, resulting in an unusually wide spread in returns between different styles and sectors.

The broad US indices were trading at valuation levels similar to the 2021 peak by the end of the year, despite higher interest rates and weaker earnings growth. At the same time, geopolitical uncertainty translated into an unprecedented rally in precious metals, with gold and silver the absolute standouts. Oil prices resumed their downward trend in December, while diversification into emerging markets and European equities paid off, partly due to growing concerns about a possible AI bubble.

For Structural Growthers, all this meant that the fund, with its focus on predictable, quality growth, could benefit less from the short, powerful rallies in more cyclical or speculative segments of the market.

2.1.8. Future policy

Outlook

After an exceptionally strong but volatile stock market year 2025, we enter 2026 with simultaneously clear tailwinds and tangible risks. On the positive side, several stock market houses expect that the combination of accommodative monetary policy, more pro-growth policies on the fiscal side, operating leverage at companies and acceleration in AI adoption can drive economic activity and profits. Economists predict another 1-2 interest rate cuts for 2026, which will provide support to growth stocks.

Moreover, the One Big Beautiful Bill Act (OBBBA) would increase personal incomes by about \$65 billion by 2026, mainly through higher tax refunds and lower deductions throughout the year. That, combined with solid household balances, can stabilise consumption and fuel the cyclical recovery. At the same time, there is more room for margin expansion: cost discipline and pricing power were already favourable in 2025, and the proportion of companies reaping quantifiable benefits from AI adoption is rising steadily. Indicators such as the ISM and the lagged effect of lower interest rates on activity also point to a resurgence of the industrial cycle. That supports an environment of fine earnings growth, with broad positive earnings revisions across many sectors. Therefore, in the last quarter, we increased the weight of industrial values in the portfolio at the expense of defensive equities.

Europe remains a separate story, with an ECB potentially moving towards tightening due to upwardly revised growth estimates and inflation, which could lead to higher interest rate volatility. Japan has also seen tighter policies, while the US is easing. These divergent policies can lead to sectoral rotations and regional disparities.

AI adoption remains a key driver of productivity growth and margins, but the market has become more critical of companies that aggressively invest in AI without clear returns. Even within the software sector, fears of AI disruption on the one hand and the issue of when software companies' investments in developing AI agents will finally translate into profits remain vexed topics. Selectivity and discipline will therefore remain crucial within the technology sector.

The fund's strategy remains focused on long-term sustainable, predictable growth, independent of temporary market trends, sector rotations or momentum movements. Despite the underperformance in 2025, we remain convinced of the strength of structural growth stocks as a foundation for stable long-term value creation.

We keep our overweight in Healthcare because we believe the sector is due to catch up and could return to favour if investors become more in need of protection against a possible AI correction, or lose enthusiasm for financials. The latter depends heavily on interest rate developments and central bank policies. The sector benefits from long-term trends such as an ageing population, rising demand for care and medicines, and continued innovation in biotechnology, medical devices and digital care. The ageing population is creating a growing patient population worldwide and an increasing need for chronic care, prevention and treatments. Healthcare companies typically have predictable cash flows, strong balance sheets and a high degree of pricing power.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies with relatively high growth in revenues, an increasing profit margin, a high return on invested capital or a high free cash flow.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of KBC Equity Fund Fundamental Opportunities DBI-RDT (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	57,469,522.90	47,422,128.08	104,891,650.98
Sales	44,857,522.23	47,571,525.59	92,429,047.82
Total 1	102,327,045.13	94,993,653.67	197,320,698.80
Subscriptions	41,242,993.53	29,885,358.39	71,128,351.92
Redemptions	27,583,426.30	28,914,859.70	56,498,286.00
Total 2	68,826,419.83	58,800,218.09	127,626,637.92
Monthly average of total assets	248,451,363.78	261,730,088.83	255.283.570.86
Turnover rate	13.48%	13.83%	27.30%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

BE6326280375

KBC Equity Fund Fundamental Opportunities DBI-RDT Classic Shares DIS

Annual performance from 01/01/2022 through 31/12/2025 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6326280375	EUR	-5.06%		9.25%						29/03/2021	4.26%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ { 1 / X } - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ { 1 / F } - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 02/04/2026: 8,6500 net (12,3572 gross).

In accordance with the Royal Decree of 10 November 2006 on the accounting and the annual accounts of certain public collective investment undertakings, investors are informed that the General Meeting of the fund will decide to pay a dividend despite the fact that a negative 'result available for appropriation' was recorded for the corresponding financial year.

Investors are also informed that the dividend to be paid stems directly from the interest, dividends and realised capital gains received from the investments made during the financial year corresponding to the dividend to be paid out.

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Corporate Shares

Fee for managing the investment portfolio	Max 1.15%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional Discretionary Shares

Fee for managing the investment portfolio	0.00%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Administration fee	0.02%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The objective is to generate a high return with as little fluctuations as possible in the value of the sub-fund. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World - Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World - Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Global Value DBI-RDT Responsible Investing'.

Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Our mutual fund adheres to the investment policy outlined in its prospectus. Specifically, we focus on investing in companies that appear undervalued based on fundamental metrics. These include, for example, a lower price-to-earnings ratio, a higher dividend yield, a higher free cash flow yield, and a higher book-to-market ratio.

2.1.8. Future policy

Our mutual fund will continue to adhere to the investment policy outlined in its prospectus. Specifically, we focus on investing in companies that appear undervalued based on fundamental metrics. These include, for example, a lower price-to-earnings ratio, a higher dividend yield, a higher free cash flow yield, and a higher book-to-market ratio.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for

shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Global Value DBI-RDT Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	74,528,925.87	26,432,745.36	100,961,671.23
Sales	20,244,475.89	13,897,184.61	34,141,660.50
Total 1	94,773,401.75	40,329,929.97	135,103,331.73
Subscriptions	61,203,578.13	22,414,567.21	83,618,145.34
Redemptions	7,038,592.39	9,485,882.04	16,524,474.43
Total 2	68,242,170.52	31,900,449.25	100,142,619.77
Monthly average of total assets	66,530,814.83	103,690,380.19	85.650.259.25
Turnover rate	39.88%	8.13%	40.82%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

BE6355051960
KBC Equity Fund Global Value DBI-RDT Responsible Investing Classic Shares DIS
Annual performance from 01/01/2025 through 31/12/2025 (in EUR)

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6355051960	EUR	3.23%								15/10/2024	4.56%

Risk warning: Past performance is not a guide to future performance.
* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 02/04/2026: 0,1295 net (0,1851 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Global Value DBI-RDT Responsible Investing

Legal entity identifier:
875500CN9CZ2GMC3SU69

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.19% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 25.19% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 74.81% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI World - Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI World - Net Return index.	20.40	17.72	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI World - Net Return index as described in the prospectus under the title 'information concerning the sub-fund Global Value DBI-RDT Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI World - Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	80.65	56.33	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	25.19	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	8.95	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	15.30	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result
	31/12/2024	31/12/2025
Instruments issued by companies		
ESG risk score	17.24	17.72
Greenhouse gas intensity	57.79	56.33
Sustainable Investments	25.73	25.19
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	9.25	8.95
Sustainable Investments with a social objective (%)	16.47	15.30
Assets promoting E/S characteristics (%)	100.00	100.00

For the reporting period 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 25.19% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10%

of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal

Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on

www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
CISCO SYSTEMS INC	Tech Hardware & Semiconductors	2.99%	United States of America
CITIGROUP INC	Banking	2.94%	United States of America
ALPHABET INC-CL C	Media	2.53%	United States of America
COGNIZANT TECH SOLUTIONS-A	Software & Tech Services	2.52%	United States of America
QUALCOMM INC	Tech Hardware & Semiconductors	2.39%	United States of America
UNICREDIT SPA	Banking	2.22%	Italy
NOVARTIS AG-REG	Health Care	2.09%	Switzerland
COMCAST CORP-CLASS A	Media	1.97%	United States of America
COMPAGNIE DE SAINT GOBAIN	Materials	1.83%	France
BRISTOL-MYERS SQUIBB CO	Health Care	1.79%	United States of America
GOLDMAN SACHS GROUP INC	Financial Services	1.76%	United States of America
DHL GROUP	Industrial Services	1.69%	Germany
HCA HEALTHCARE INC	Health Care	1.62%	United States of America
APPLIED MATERIALS INC	Tech Hardware & Semiconductors	1.61%	United States of America
COLGATE-PALMOLIVE CO	Consumer Staple Products	1.61%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 25.19%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Global Value DBI-RDT Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Global Value DBI-RDT Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

8.95% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.94% are environmentally sustainable investments (taxonomy-aligned) and 15.30% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	12.81%
Tech Hardware & Semiconductors	11.72%
Software & Tech Services	11.32%
Media	10.43%
Banking	8.06%
Retail & Wholesale - Discretionary	7.22%
Financial Services	6.67%
Consumer Staple Products	5.66%
Materials	5.66%
Industrial Services	4.10%
Insurance	3.90%
Retail & Wholesale - Staples	2.80%
Real Estate	2.78%
Consumer Discretionary Products	2.76%
Telecommunications	2.21%
Industrial Products	1.90%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.94% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

The sub-fund invests at least 50% of its assets in shares of which the dividends and capital gains qualify for the 'dividends received deduction' (DRD) system. However, under normal circumstances, the sub-fund will aim to invest between 70% and 100% in shares of which the dividends and capital gains qualify for the DRD system.

This means that not all of the share portfolio may be invested in shares of which the capital gains and dividends

qualify for the DRD system. As a result, it is conceivable that the income distributed to the shareholders by the sub-fund may not qualify in full for the dividends received deduction.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the nuclear energy sector that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.27%.

The proportion of investments in enabling activities was 0.65%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.94%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 25.19% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 8.95%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.30%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund Global Value DBI-RDT Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The objective is to generate a high return with as little fluctuations as possible in the value of the sub-fund. To this end, the assets are invested either directly, or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in collective investment undertakings, deposits, financial derivatives, liquid assets and all other instruments insofar as and to the extent permitted by the applicable laws and regulations and consistent with the object specified above.

The sub-fund will invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a

series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World - Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World - Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Global Value Responsible Investing'.

Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for

shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk’.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

Our mutual fund adheres to the investment policy outlined in its prospectus. Specifically, we focus on investing in companies that appear undervalued based on fundamental metrics. These include, for example, a lower price-to-earnings ratio, a higher dividend yield, a higher free cash flow yield, and a higher book-to-market ratio.

2.1.8. Future policy

Our mutual fund adheres to the investment policy outlined in its prospectus. Specifically, we focus on investing in companies that appear undervalued based on fundamental metrics. These include, for example, a lower price-to-earnings ratio, a higher dividend yield, a higher free cash flow yield, and a higher book-to-market ratio.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares USD: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the US Dollar, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Discretionary Wealth Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Discretionary Wealth Management, Wealth & Institutional Office Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Global Value Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	208,861,548.08	88,194,965.33	297,056,513.41
Sales	160,098,083.45	69,657,151.51	229,755,234.96
Total 1	368,959,631.53	157,852,116.83	526,811,748.36
Subscriptions	121,990,508.81	273,529,948.97	395,520,457.78
Redemptions	73,280,323.91	245,998,827.08	319,279,151.00
Total 2	195,270,832.72	519,528,776.05	714,799,608.77
Monthly average of total assets	886,976,058.22	935,527,895.63	911.957.086.60
Turnover rate	19.58%	-38.66%	-20.61%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

* These performances were achieved under circumstances that no longer apply

Classic Shares

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6338505405	EUR	3.46%								17/02/2023	8.32%
DIS	BE6338506411	EUR	3.45%								17/02/2023	8.31%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 1,8617 net (2,6596 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Global Value Responsible Investing

Legal entity identifier:
875500JSEPD3I6G1V867

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 25.74% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 25.74% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 74.26% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the reference portfolio MSCI World - Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI World - Net Return index.	20.40	17.83	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI World - Net Return index as described in the prospectus under the title 'information concerning the sub-fund Global Value Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI World - Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	80.65	55.85	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	25.74	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	9.12	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	16.03	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.37	18.14	17.83
Greenhouse gas intensity	64.61	52.47	55.85
Sustainable Investments	81.74	27.58	25.74
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	9.88	9.12
Sustainable Investments with a social objective (%)	56.98	17.50	16.03
Assets promoting E/S characteristics (%)	100.19	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 25.74% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 25.74%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Global Value Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Global Value Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

9.12% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.59% are environmentally sustainable investments (taxonomy-aligned) and 16.03% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	13.45%
Tech Hardware & Semiconductors	11.46%
Software & Tech Services	10.88%
Media	10.69%
Banking	7.95%
Retail & Wholesale - Discretionary	7.11%
Financial Services	6.51%
Consumer Staple Products	5.76%
Materials	5.59%
Insurance	3.98%
Industrial Services	3.98%
Real Estate	3.15%
Consumer Discretionary Products	2.80%
Retail & Wholesale - Staples	2.61%
Telecommunications	2.19%
Industrial Products	1.89%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.59% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund invests primarily in shares of companies that fit within the 'Structural value' theme. Companies within this theme include those offering shares with high dividend yields and/or share buyback policies. Consideration is also given to companies for which a relatively low valuation (expressed, for example, by a high book-to-market ratio) could indicate potential for short- or medium-term capital gain on the investment. The book-to-market ratio is the result of the carrying value (calculated as the value of assets less liabilities) of a company divided by its market value (calculated as the number of shares outstanding multiplied by the price per share). Investments are made in a worldwide selection of shares.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the nuclear energy sector that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.18%.

The proportion of investments in enabling activities was 0.64%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.59%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 25.74% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 9.12%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 16.03%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Global Value Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the reference portfolio MSCI World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested primarily in shares with a high dividend yield of companies in countries where conditions are such as to ensure accelerated economic growth in the short or medium term, more specifically countries in Asia, Latin America, Central Europe and Eastern Europe.

Transparency of adverse sustainability impacts

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets-Net Return index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in the medical sector, the preference being companies whose core business is developing and manufacturing medical equipment, where conditions are such as to allow an accelerated economic growth in the short and medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI AC World Health Care Equipment and Services - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

2025 was a challenging year for medtech investors, with the segment clearly lagging behind the broader market. However, this underperformance did not reflect the underlying quality or growth prospects of the sector. On the contrary, fundamental demand for medical technologies remained robust, driven by an ageing population, increasing healthcare needs and a continued high rate of innovation within various sub-segments.

The weak stock market performance was mainly due to external factors, in particular persistent and unfavourable policy developments in the US - the main market for many medtech companies. These pressures came from different angles. The main uncertainties related to higher tariff charges, reforms within the FDA and restrictions in government funding, which put pressure on public health insurance programmes.

While these policy-related uncertainties have significantly affected sentiment, the structural drivers of the medtech sector remain largely intact. The sector continues to be characterised by strong innovation dynamics, a well-stocked pipeline of product launches and a continued shift towards digital and minimally invasive solutions. This ensures that the long-term outlook remains solid.

We benefited this year from our selective positioning within the health insurance segment and strong momentum in AI-driven healthcare solutions.

2.1.8. Future policy

Looking ahead to 2026, we remain cautious about the health insurance segment. US policy risk may increase further towards the midterm elections, both due to potentially changed funding priorities and greater political polarisation around healthcare costs. In addition, we await more clarity on the future of the Obamacare subsidy - a key mainstay of the insurance market - and on the planned reforms within the Pharmacy Benefit Managers, which have the potential to impact pricing, margins and negotiation dynamics across the healthcare chain.

We also expect a solution to the 232 tariff investigation in 2026, which would provide significant relief to medtech companies.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies operating in the medical sector.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies operating in the medical sector.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Sales	10,792,566.65	81,520,450.50	92,313,017.14
Total 1	11,069,717.44	151,413,931.63	162,483,649.06
Subscriptions	14,988,898.89	10,742,650.98	25,731,549.87
Redemptions	20,789,893.67	18,696,641.60	39,486,535.27
Total 2	35,778,792.56	29,439,292.58	65,218,085.14
Monthly average of total assets	381,128,246.82	380,059,884.23	380.578.549.89
Turnover rate	-6.48%	32.09%	25.56%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 29,4797 net (42,1139 gross).

Institutional B Shares

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The aim is to generate a high return and minimise volatility in the sub-fund's value. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are invested directly or indirectly in a diversified selection of global shares .

The objective is to generate a high return while minimising the fluctuations in the value of the sub-fund. The composition of the portfolio is based on a quantitative model aimed at minimising expected volatility.

The main parameters of the model are historical data on the price movements of individual stocks, their correlation with the broad market and their mutual correlation. As a result, the sub-fund may invest to a greater or lesser extent in one or several themes, sectors or regions.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Minimum Variance Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund Minimum Variance Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: target allocation MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the reference portfolio MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the reference portfolio MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Minimum Variance Responsible Investing'.

Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Required disclaimers for benchmark providers:

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

In line with the defined strategy, the fund was and is invested in a selection of shares from a diversified global universe. The composition of the fund was regularly reviewed and modified with the objective of lowering the expected fluctuation in value. The realised returns and calculated value fluctuations confirm that this objective was accomplished.

Also, the fund's strategy is SRI compliant and its assets were invested accordingly.

2.1.8. Future policy

The fund will continue investing in line with its main quantitative objective of obtaining exposure to global equity markets with low fluctuation in value. At least 90% will be invested in SRI policy compliant instruments.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares Cap: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares Cap: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

Moreover, an investment in this fund involves:

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies that operate in a responsible way. There may be a concentration of the investments in shares from one particular region, sector or theme.
- a moderate level of market risk: the level of the risk reflects the volatility of the stock market.
- a moderate level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Redemptions	39,230,908.36	3,635,042.63	42,865,950.99
Total 2	63,457,891.00	13,552,949.13	77,010,840.13
Monthly average of total assets	149,474,590.97	141,513,678.66	145,378,519.91
Turnover rate	4.77%	38.16%	42.05%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional Shares

BE6295397978

KBC Equity Fund Minimum Variance Responsible Investing Institutional Shares CAP
Annual performance from 01/01/2018 through 31/12/2025 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6295397978	EUR	-1.50%		7.83%		9.02%				27/06/2017	6.69%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Institutional Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] } - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] } - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 0,000%
Transaction costs: 0,184%

Institutional Shares Capitalisation :

Management fees and other administrative or operating costs: 0,528%
Transaction costs: 0,184%

Discretionary Shares Capitalisation :

Management fees and other administrative or operating costs: 0,773%
Transaction costs: 0,184%

Institutional Discretionary Shares Capitalisation :

Management fees and other administrative or operating costs: 0,051%
Transaction costs: 0,184%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.01%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Minimum Variance Responsible Investing

Legal entity identifier:
5493000DDUOOPAQH2R82

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 30.29% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 30.29% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 69.71% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the reference portfolio target allocation is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following reference portfolio: MSCI All Countries World EUR - Net Return Index. Better than the following benchmark: target allocation.	20.61	17.21	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the reference portfolio: MSCI All Countries World EUR - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund Minimum Variance Responsible Investing' and a reduction of 50% by 2030 based on the following reference portfolio: MSCI All Countries World EUR - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	97.94	65.85	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	30.29	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	13.92	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	15.63	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	17.68	17.54	17.21
Greenhouse gas intensity	62.86	63.36	65.85
Sustainable Investments	73.98	28.55	30.29
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	10.57	13.92
Sustainable Investments with a social objective (%)	53.71	17.62	15.63
Assets promoting E/S characteristics (%)	100.00	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 30.29% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
MCKESSON CORP	Health Care	1.31%	United States of America
INTL BUSINESS MACHINES CORP	Software & Tech Services	1.29%	United States of America
CENCORA INC	Health Care	1.28%	United States of America
O'REILLY AUTOMOTIVE INC	Retail & Wholesale - Discretionary	1.26%	United States of America
CHUNGHWA TELECOM CO LTD	Telecommunications	1.24%	Taiwan
SWISSCOM AG-REG	Telecommunications	1.22%	Switzerland
CISCO SYSTEMS INC	Tech Hardware & Semiconductors	1.22%	United States of America
DEUTSCHE TELEKOM AG-REG	Telecommunications	1.21%	Germany
WASTE MANAGEMENT INC	Industrial Services	1.19%	United States of America
DANONE	Consumer Staple Products	1.19%	France
AUTOZONE INC	Retail & Wholesale - Discretionary	1.18%	United States of America
CARDINAL HEALTH INC	Health Care	1.14%	United States of America
PROGRESSIVE CORP	Insurance	1.14%	United States of America
AT&T INC	Telecommunications	1.13%	United States of America
TJX COMPANIES INC	Retail & Wholesale - Discretionary	1.13%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 30.29%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Minimum Variance Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives could be used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Minimum Variance Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

13.92% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.74% are environmentally sustainable investments (taxonomy-aligned) and 15.63% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	15.03%
Telecommunications	11.63%
Software & Tech Services	10.21%
Industrial Services	10.03%
Consumer Staple Products	8.48%
Insurance	7.80%
Tech Hardware & Semiconductors	7.38%
Banking	5.06%
Media	4.30%
Retail & Wholesale - Discretionary	3.57%
Real Estate	3.30%
Materials	2.90%
Retail & Wholesale - Staples	2.75%
Financial Services	2.34%
Utilities	1.80%
Consumer Discretionary Products	1.64%
Industrial Products	1.16%
Consumer Discretionary Services	0.62%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.74% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are invested directly or indirectly in a diversified selection of global shares .

The objective is to generate a high return while minimising the fluctuations in the value of the sub-fund. The composition of the portfolio is based on a quantitative model aimed at minimising expected volatility.

The main parameters of the model are historical data on the price movements of individual stocks, their correlation with the broad market and their mutual correlation. As a result, the sub-fund may invest to a greater or lesser extent in one or several themes, sectors or regions.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.00%.

The proportion of investments in enabling activities was 0.43%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.74%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 30.29% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 13.92%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.63%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Minimum Variance Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the reference portfolio MSCI All Countries World EUR - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested in shares of companies in Asian countries where conditions are such as to allow on accelerated economic growth in the short or medium term.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Emerging Markets Asia - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Active positions have been built up in equities of the Emerging Asia region on the basis of a quantitative analysis and a strict risk framework. The fund was rebalanced approximately once a month on the basis of the recommendations of the aforementioned analysis.

2.1.8. Future policy

The fund will continue its active stock selection strategy based on quantitative analysis while respecting the strict risk framework.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies from Asian countries.
- a moderate level of liquidity risk: since there will be invested in the shares of companies from emerging economies, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund New Asia (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	104,957,031.47	68,309,457.66	173,266,489.13
Sales	155,448,638.47	73,173,578.00	228,622,216.47
Total 1	260,405,669.94	141,483,035.66	401,888,705.60
Subscriptions	10,508,467.28	6,939,645.39	17,448,112.67
Redemptions	58,796,473.32	10,895,381.21	69,691,854.53
Total 2	69,304,940.60	17,835,026.60	87,139,967.20
Monthly average of total assets	208,492,384.31	206,133,425.12	207,271,519.46
Turnover rate	91.66%	59.98%	151.85%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 11,2538 net (16,0769 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 76,03 EUR and for the Management Company 30,41 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 1, with a market value fluctuating between 0 and 191854.19 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of these assets are invested in shares of American and Canadian companies.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the strategy established, the Fund was and is invested in a selection of North American equities. The "America" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in North American equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from the United States of America and Canada.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund North America (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	1,087,911,274.90	935,506,636.51	2,023,417,911.40
Sales	1,615,773,846.42	770,135,211.54	2,385,909,057.96
Total 1	2,703,685,121.32	1,705,641,848.05	4,409,326,969.36
Subscriptions	405,166,156.53	487,261,493.82	892,427,650.35
Redemptions	928,259,156.45	325,147,457.61	1,253,406,614.06
Total 2	1,333,425,312.98	812,408,951.43	2,145,834,264.41
Monthly average of total assets	2,156,241,800.62	2,340,486,096.03	2.251.039.695.35
Turnover rate	63.55%	38.16%	100.55%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect quantitative viewpoints in a timely and appropriate manner. When quantitative signals are strong, monthly turnover can be significant.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 28,9190 net (41,3129 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 15.840,29 USD and for the Management Company 6.336,12 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 8, with a market value fluctuating between 0 and 14347740.006037 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from the United States and Canada.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund North America Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund North America Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry,

weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe. These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North America Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund North America Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund North America Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund North America Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to

the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the adopted strategy, the fund has been and continues to be invested in a selection of North American equities, following the "America" section of the KBC AM strategy. The Fund's strategy is also in line with the SRI strategy and the Fund's assets are invested accordingly.

2.1.8. Future policy

The fund will continue to invest in North American equities in the future, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Institutional Discretionary Shares EUR: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk
