Total 2	1,294,130,766.85	1,141,890,083.50	2,436,020,850.35
Monthly average of total assets	2,692,261,884.28	3,603,636,744.94	3,161,185,049.10
Turnover rate	83.94%	34.90%	111.27%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

2.4.5. Performance figures

Classic Shares

BE6307776607

KBC Equity Fund North America Responsible Investing Classic Shares CAP

Annual performance compared to the benchmark from 01/01/2018 through 31/12/2025 (in USD)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307776607	USD	16.34%	18.06%	20.31%	22.64%		13.42%			05/11/2018	5.45%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[\text{NIW(D)} / \text{NIW(Y)}]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$[\text{NIW(D)} / \text{NIW(S)}]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional B Shares

BE630777613

* Return on annual basis.

Institutional Discretionary Shares EUR

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
 Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
Distribution units (DIV)
 Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$
 where $Y = D - X$
 Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$
 where $F = 1$ if the unit has existed for less than one year on date D
 where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D
 where C is a factor that is determined for all N dividends between the calculation date D and the reference date.
 For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

$$i = 1 \dots N$$
 from which $C = C_0 * \dots * C_N$.
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,796%

Transaction costs: 0,332%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,490%

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 11.678,30 USD and for the Management Company 4.671,32 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 24966886.045721 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund North America Responsible Investing

Legal entity identifier:
875500CSDCOYBT8YKZ27

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.08% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 34.08% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 65.92% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI North America-Net Return index.	20.61	19.52	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI North America-Net Return index as described in the prospectus under the title 'information concerning the sub-fund North America Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI North America-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	83.19	44.18	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	34.08	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	24.61	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	9.47	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.57	19.82	19.52
Greenhouse gas intensity	31.40	34.52	44.18
Sustainable Investments	74.29	32.17	34.08
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	21.42	24.61
Sustainable Investments with a social objective (%)	42.53	10.66	9.47
Assets promoting E/S characteristics (%)	99.87	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 34.08% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NVIDIA CORP	Tech Hardware & Semiconductors	7.52%	United States of America
MICROSOFT CORP	Software & Tech Services	6.98%	United States of America
ALPHABET INC-CL C	Media	6.32%	United States of America
APPLE INC	Tech Hardware & Semiconductors	4.10%	United States of America

VISA INC-CLASS A SHARES	Financial Services	1.14%	United States of America
GILEAD SCIENCES INC	Health Care	1.14%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 34.08%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund North America Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund North America Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.61% of the sustainable investments are environmentally sustainable investments and 9.47% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	19.82%
Software & Tech Services	15.15%
Media	15.05%
Health Care	12.40%
Financial Services	8.36%
Banking	6.26%
Retail & Wholesale - Discretionary	5.48%
Materials	3.87%
Insurance	2.69%
Real Estate	2.61%
Industrial Services	1.85%
Consumer Discretionary Products	1.80%
Consumer Staple Products	1.61%
Telecommunications	1.21%
Industrial Products	1.12%
Retail & Wholesale - Staples	0.55%
Utilities	0.10%
Consumer Discretionary Services	0.07%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies from the United States and Canada. Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 34.08% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 24.61%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 9.47%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund North America Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares. Correlated financial instruments refer to certificates representing securities, such as American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs) or futures on equity indices.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from the North American Continent.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the strategy established, the fund was and is invested in a selection of North American equities. The "America" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in North American equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund North American Continent (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	789,755,707.63	658,097,563.48	1,447,853,271.12
Sales	1,308,110,658.07	540,807,799.37	1,848,918,457.43
Total 1	2,097,866,365.70	1,198,905,362.85	3,296,771,728.55
Subscriptions	315,773,582.28	386,081,407.85	701,854,990.13
Redemptions	823,182,912.71	270,967,596.79	1,094,150,509.50
Total 2	1,138,956,494.99	657,049,004.64	1,796,005,499.63
Monthly average of total assets	1,572,276,901.47	1,538,806,611.12	1.555.055.673.24
Turnover rate	60.99%	35.21%	96.51%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 4,9884 net (7,1263 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 10.802,10 EUR and for the Management Company 4.320,84 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 7, with a market value fluctuating between 0 and 11455419.67 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
CAN IMPERIAL BK OF COMMERCE	CAD	77 791	124,43	6 012 581,14

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from continental North America .

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund North American Continent Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund North American Continent Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to

Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund North American Continent Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the strategy established, the fund was and is invested in a selection of North American equities. This follows the "America" section of the KBC AM strategy. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly.

2.1.8. Future policy

The fund will continue to invest in North American equities in the future, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares EUR: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of companies from the North American continent.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

Redemptions	526,596,900.81	268,621,782.48	795,218,683.29
Total 2	1,288,685,979.22	1,138,735,011.05	2,427,420,990.27
Monthly average of total assets	2,672,697,865.55	3,580,565,421.60	3.139.816.442.11
Turnover rate	83.96%	34.91%	111.28%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

* Return on annual basis.

Institutional B Shares EUR

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW(D)} / \text{NIW(Y)}] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW(D)} / \text{NIW(S)}] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 0,000%

Transaction costs: 0,000%

Institutional B Shares EUR Capitalisation :

Management fees and other administrative or operating costs: 0,490%

Transaction costs: 0,386%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 0% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 14.224,34 USD and for the Management Company 5.689,74 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 5, with a market value fluctuating between 0 and 21630206.322767 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund North American Continent Responsible Investing

Legal entity identifier:
875500S353CF3CLO9W82

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.09% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 34.09% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 65.91% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI North America-Net Return index.	20.61	19.52	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI North America-Net Return index as described in the prospectus under the title 'information concerning the sub-fund North American Continent Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI North America-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	83.19	44.18	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	34.09	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	24.61	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	9.48	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.57	19.82	19.52
Greenhouse gas intensity	31.37	34.53	44.18
Sustainable Investments	74.27	32.18	34.09
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	21.43	24.61
Sustainable Investments with a social objective (%)	42.51	10.66	9.48
Assets promoting E/S characteristics (%)	99.88	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 34.09% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NVIDIA CORP	Tech Hardware & Semiconductors	7.52%	United States of America
MICROSOFT CORP	Software & Tech Services	6.98%	United States of America

GILEAD SCIENCES INC	Health Care	1.14%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 34.09%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund North American Continent Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund North American Continent Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.61% of the sustainable investments are environmentally sustainable investments and 9.48% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	19.81%
Software & Tech Services	15.15%
Media	15.05%
Health Care	12.40%
Financial Services	8.37%
Banking	6.26%
Retail & Wholesale - Discretionary	5.48%
Materials	3.87%
Insurance	2.69%
Real Estate	2.61%
Industrial Services	1.85%
Consumer Discretionary Products	1.80%
Consumer Staple Products	1.61%
Telecommunications	1.21%
Industrial Products	1.12%
Retail & Wholesale - Staples	0.55%
Utilities	0.10%
Consumer Discretionary Services	0.07%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies from continental North America. Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

☒

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 34.09% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 24.61%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 9.48%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund North American Continent Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested, directly or indirectly, in a selection of euro-area shares that are sufficiently liquid, the object being to outperform the MSCI EMU index in the long term.

The stock picking is based on purely quantitative criteria, using data available on companies in the euro area. The data concerned are widely used by financial analysts and readily available to them. These criteria are incorporated in a quantitative model designed by KBC Asset Management. The basic principle of this model is that share prices do not always accurately reflect the fundamental value of the company concerned, but that this value can be estimated provided that enough information is available and it can be processed efficiently. Share prices gradually change to better reflect these fundamental values. How this happens depends on the prevailing market cycle. The quantitative model developed by KBC Asset Management makes a regular assessment – at least once a month – of the cyclical trend in relation to criteria specific to the company and identifies which criteria are positive or negative in the prevailing market situation. This sensitivity to the market is reviewed on a regular basis and is used to classify which shares in the euro area are sufficiently liquid. Stock picking occurs at the same frequency as the assessment of the market sensitivity.

Transparency of adverse sustainability impacts

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI EMU-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting

any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

2.4.5. Performance figures

Not applicable.

2.4.6. Costs

Ongoing Charges:

Not applicable

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index. However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the strategy adopted, the fund is and has been invested in a selection of equities from Europe, excluding the Eurozone. The "Rest of Europe" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in equities from Europe, excluding the Eurozone, in line with KBC AM's strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Rest of Europe (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	353,023,816.65	171,562,165.13	524,585,981.78
Sales	565,754,605.54	290,229,463.88	855,984,069.42
Total 1	918,778,422.19	461,791,629.01	1,380,570,051.20
Subscriptions	203,622,670.26	99,053,248.51	302,675,918.77
Redemptions	421,475,082.30	219,917,174.42	641,392,256.72
Total 2	625,097,752.56	318,970,422.93	944,068,175.49
Monthly average of total assets	678,903,527.57	481,779,635.93	578.313.558.17
Turnover rate	43.26%	29.64%	75.48%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

DIS	BE6321883058	EUR	21.12%	14.84%	12.07%	11.77%		10.89%			05/06/2020	6.05%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 23,8210 net (34,0300 gross).

Management fees and other administrative or operating costs: 1,842%
Transaction costs: 0,266%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,898%
Transaction costs: 0,266%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,464%
Transaction costs: 0,266%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 41.083,22 EUR and for the Management Company 16.433,29 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 5, with a market value fluctuating between 0 and 71757621.74 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
AP MOLLER-MAERSK A/S-B	DKK	1 145	14 640,00	2 244 307,49
BARRY CALLEBAUT AG-REG	CHF	590	1 306,00	828 128,02

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund Rest of Europe Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund Rest of Europe Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

(1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and

(2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;

(3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI Europe Ex EMU - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI Europe Ex EMU - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI Europe Ex EMU - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to

Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Rest of Europe Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI Europe Ex EMU - Net Return Index. However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the adopted strategy, the fund is and has been invested in a selection of equities from Europe, excluding the Eurozone, following the "Rest of Europe" section of the KBC AM strategy. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly.

2.1.8. Future policy

In the future, the fund will continue to invest in equities from Europe, excluding the Eurozone. In line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of companies from European Union member states outside the euro-area and from the United Kingdom, Switzerland and Norway.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Rest of Europe Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	656,972,041.67	275,811,996.71	932,784,038.39
Sales	514,348,975.38	366,810,984.89	881,159,960.27
Total 1	1,171,321,017.06	642,622,981.60	1,813,943,998.66
Subscriptions	411,999,559.34	218,786,002.30	630,785,561.64
Redemptions	285,094,072.85	316,866,769.65	601,960,842.50
Total 2	697,093,632.19	535,652,771.95	1,232,746,404.14
Monthly average of total assets	954,233,864.79	870,648,143.98	911.581.068.99
Turnover rate	49.70%	12.29%	63.76%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

2.4.5. Performance figures

Classic Shares

BE6307779635
KBC Equity Fund Rest of Europe Responsible Investing Classic Shares CAP
Annual performance compared to the benchmark from 01/01/2018 through 31/12/2025 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307779635	EUR	18.17%	14.84%	10.95%	11.77%		10.89%			05/11/2018	2.09%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional Discretionary Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,816%
Transaction costs: 0,291%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,481%
Transaction costs: 0,281%

Institutional Discretionary Shares Capitalisation :

Management fees and other administrative or operating costs: 0,078%
Transaction costs: 0,286%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,00% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional Discretionary Shares

Fee for managing the investment portfolio	0.00%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group.
Administration fee	0.02%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.02%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 89.869,06 EUR and for the Management Company 35.947,62 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 10, with a market value fluctuating between 0 and 131526770.51 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025					
Name	Currency	Quantity	Price	Value in currency of the portfolio	
AP MOLLER-MAERSK A/S-B	DKK	2 200	14 640,00	4 312 206,54	
Total				4 312 206,54	
Details of collateral received for securities lent

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 43.01% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 43.01% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 56.99% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Europe Ex EMU - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI Europe Ex EMU - Net Return Index.	20.71	18.30	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI Europe Ex EMU - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund Rest of Europe Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI Europe Ex EMU - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	65.36	27.59	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	43.01	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	8.46	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	33.91	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	19.19	19.32	18.30
Greenhouse gas intensity	34.29	33.05	27.59
Sustainable Investments	79.75	54.08	43.01
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	7.04	8.46
Sustainable Investments with a social objective (%)	68.85	46.72	33.91
Assets promoting E/S characteristics (%)	99.95	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 43.01% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:

01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NOVARTIS AG-REG	Health Care	9.33%	Switzerland
ROCHE HOLDING AG-GENUSSCHEIN	Health Care	8.20%	Switzerland
NATWEST GROUP PLC	Banking	6.07%	United Kingdom
GSK PLC	Health Care	4.67%	United Kingdom
3I GROUP PLC	Financial Services	4.43%	United Kingdom
SWISS RE AG	Insurance	4.03%	Switzerland
SPOTIFY TECHNOLOGY SA	Media	3.87%	Luxembourg
NESTLE SA-REG	Consumer Staple Products	3.79%	Switzerland
NOVO NORDISK A/S-B	Health Care	2.99%	Denmark
ZURICH INSURANCE GROUP AG	Insurance	2.69%	Switzerland

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 43.01%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Rest of Europe Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Rest of Europe Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

8.46% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.65% are environmentally sustainable investments (taxonomy-aligned) and 33.91% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	29.02%
Banking	15.13%
Consumer Staple Products	8.88%
Financial Services	8.82%
Insurance	8.55%
Materials	6.37%
Telecommunications	4.79%
Industrial Products	4.46%
Media	4.46%
Industrial Services	2.82%
Retail & Wholesale - Discretionary	2.28%
Software & Tech Services	1.56%
Consumer Discretionary Products	1.21%
Tech Hardware & Semiconductors	0.89%
Retail & Wholesale - Staples	0.36%
Renewable Energy	0.20%
Utilities	0.15%
Consumer Discretionary Services	0.05%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.65% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies from Member States of the European Union that are not members of the euro area, as well as The United Kingdom, Switzerland and Norway.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in fossil gas sector activities that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy compliant when at least 20% of revenues are compliant with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.14%.

The proportion of investments in enabling activities was 0.39%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.65%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 43.01% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 8.46%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 33.91%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Rest of Europe Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI Europe Ex EMU - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

At least 75% of the assets are invested, directly or indirectly, in a selection of shares in global companies. The manager has autonomy in the stock picking, which is theme-based. As a result, the sub-fund's investments may at any time be focused to a greater or lesser extent on one or more very specific themes. Some examples of these themes (this list is not exhaustive) are family companies, holding companies with a greater average undervaluation in relation to their intrinsic value, and global companies that generate a significant percentage of their turnover in emerging countries.

Transparency of adverse sustainability impacts

Benchmark information

The fund is actively managed without referring to any benchmark.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

Not applicable

2.4.7. Notes to the financial statements and other data

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests (directly or indirectly) in shares and/or share-related investment that may come from any region, sector or theme.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the **"Responsible Investing Advisory Board"**) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Strategic Satellites Responsible Investing'.

Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for

shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk’.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

During the reporting period, the composition of the fund Strategic Satellites Responsible Investing was aligned with the most significant positive bets of the investment strategy of KBC Asset Management.

2.1.8. Future policy

In the future, as is the case today, the composition of the fund Strategic Satellites Responsible Investing will be aligned with the most significant positive bets of the investment strategy of KBC Asset Management.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund Strategic Satellites Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	86,664,451.70	16,648,748.49	103,313,200.18
Sales	73,178,980.67	15,281,651.79	88,460,632.46
Total 1	159,843,432.37	31,930,400.27	191,773,832.65
Subscriptions	25,387,125.60	160,824,262.79	186,211,388.39
Redemptions	8,639,867.05	158,072,076.83	166,711,943.88
Total 2	34,026,992.65	318,896,339.62	352,923,332.27
Monthly average of total assets	167,451,635.84	190,299,209.85	179,207,234.08
Turnover rate	75.14%	-150.80%	-89.92%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 13,7014 net (19,5735 gross).

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,784%

Transaction costs: 0,439%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,654%

Transaction costs: 0,441%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,083%

Transaction costs: 0,416%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 52,49% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 6.654,77 EUR and for the Management Company 2.661,91 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 6, with a market value fluctuating between 0 and 3192316.79 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund Strategic Satellites Responsible Investing

Legal entity identifier:
549300V7M7HZ3URNH528

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 26.83% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 26.83% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 73.14% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	18.74	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI All Countries World - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund Strategic Satellites Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI All Countries World - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	97.94	49.83	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	26.83	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 2.5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	2.5	16.37	Yes
Minimum % Sustainable Investments with a social objective	Minimum 2.5% sustainable investments with a social objective.	2.5	10.14	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	99.97	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	20.09	19.69	18.74
Greenhouse gas intensity	42.08	51.11	49.83
Sustainable Investments	62.59	27.14	26.83
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	20.34	16.37
Sustainable Investments with a social objective (%)	33.30	6.56	10.14
Assets promoting E/S characteristics (%)	92.74	99.14	99.97

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 26.83% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
ALPHABET INC-CL C	Media	5.16%	United States of America
MICROSOFT CORP	Software & Tech Services	4.98%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 26.83%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Strategic Satellites Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.97% in assets that promote environmental or social characteristics and 0.03% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Strategic Satellites Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

16.37% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.32% are environmentally sustainable investments (taxonomy-aligned) and 10.14% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Banking	16.12%
Health Care	15.27%
Media	12.67%
Software & Tech Services	10.52%
Tech Hardware & Semiconductors	9.97%
Financial Services	8.89%
Insurance	8.25%
Materials	6.24%
Real Estate	4.50%
Retail & Wholesale - Discretionary	3.07%
Industrial Products	1.64%
Industrial Services	1.18%
Consumer Discretionary Services	0.48%
Telecommunications	0.46%
Consumer Discretionary Products	0.42%
Consumer Staple Products	0.15%
Retail & Wholesale - Staples	0.11%
Renewable Energy	0.06%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.32% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund invests (directly or indirectly) in shares and/or share-related investment that may come from any region, sector or theme.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.16%.

The proportion of investments in enabling activities was 0.44%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.32%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 26.83% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 16.37%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 10.14%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the “other” category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. ‘Investment information’ under title ‘Information concerning the sub-fund Strategic Satellites Responsible Investing’ of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

● ***How did the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in shares of companies operating in areas which, according to the manager, fit with the theme 'challenges and opportunities that will apply during this and subsequent decades'. The manager focuses mainly on shares of companies whose activities focus on long-term trends of transformative technologies, climate change, scarcity of natural resources, mismatch of skills, urbanization and changing lifestyles.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on

www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable

themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund Trends Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund Trends Responsible Investing'.

Benchmark information

The fund is actively managed without referring to any benchmark.

The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

Required disclaimers for benchmark providers:

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Not applicable.

2.1.7. Policy pursued during the financial year

The key trends of the past few years for the fund were "transforming technologies" and "strategic independence". That first one because, after all, it was true the year where AI walked away with the most awards. Despite some more fear of a bubble with quite a few prominent voices indicating that expectations are starting to be too high, just about everything AI-related managed to rise solidly.

But the trend strategic independence is also alive and kicking, just think of the whole tariff saga that dominated large chunks of the year. It also gave a dent to the idea of 'US exceptionalism', the idea that states that the US has certain structural elements that make it perform better economically and therefore their stock market. The unpredictable policies of the US administration did the dollar no favours and we saw European equities and a lot of other regions outperform.

Despite the 'bubble fear', stocks linked to AI again did extremely well. Nvidia also still did quite well but it was other stocks that ran with the prices this year:

The 3 main producers of memory chips are SK Hynix, Micron and Samsung, all three are in the fund and these managed to more than double.

However, the best-performing theme was 'Asset Management'. This theme has a rather small weight but we have some gold mining companies in there. These obviously benefited from the solid rise in gold prices.

In addition, the 'Proper Transport' and 'Energy Transition' themes did very well. Proper transport is a small theme with some lithium producers where, after years of overcapacity and price pressure, we are seeing the first signs of a recovery. In turn, the theme of energy transition was boosted by the huge energy hunger of data centres.

On the negative side, we saw the notable 'Cybersecurity' theme struggling. This is certainly not because there is less need for cyber security, we believe very much in the topic, but high valuations combined with too high analyst expectations made for some disappointing quarterly reports. Many of our software companies also struggled alongside cybersecurity. There are a lot of fears (but we don't see this in the numbers yet) that AI will disrupt a lot of these companies' business models. E.g. Salesforce, itself talks a lot about AI agents and tries to position itself as an AI winner but still could not convince the market.

2.1.8. Future policy

If the expectation is that 2026 will be a somewhat quieter year with fewer unexpected actions from the White House, with the capture of Venezuelan President Maduro we can put this expectation away right away....

Shares are expensive which makes them prone to corrections in case of disappointing results. After all, earnings growth expectations are pretty high so one will have to jump high to meet the bar. As such, the outlook is not bad, with the US economy starting 2026 from a relatively strong position despite the turbulence of the past year. The combination of declining trade and policy uncertainty, sustained investment strength and stabilised consumption is at the heart of the outlook. In Europe, Germany's fiscal stimulus and EU policies are expected to have a greater impact on economic growth in 2026.

But risks also lurk around the corner. The US economy remains vulnerable due to stubborn inflation, as tariff effects can still work their way through. In addition, economic fragmentation poses a risk: lower incomes remain under pressure, which can weaken consumption. But perhaps the most important risk is the bursting of the AI bubble. Whether it is a bubble only the future can tell but investments in AI carry a large part of the US growth and stock market making it extra sensitive to evolutions in AI.

We remain firmly committed to key megatrends such as those of transformational technologies which include AI. But we balance this with a large exposure to the defensive healthcare sector. Indeed, ageing remains a major megatrend with the global 60+ population growing from around 1.2 billion today to 2 billion by 2050.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional F Shares LU: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies involved in the theme 'the challenges and opportunities that lie ahead in this decade and the decades ahead'.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective

investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 22 402.06 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund Trends Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	74,264,715.80	55,748,569.38	130,013,285.18
Sales	101,167,066.04	94,878,800.82	196,045,866.86
Total 1	175,431,781.84	150,627,370.20	326,059,152.03
Subscriptions	15,784,064.60	11,388,014.58	27,172,079.18
Redemptions	43,747,357.61	49,233,339.87	92,980,697.48
Total 2	59,531,422.21	60,621,354.45	120,152,776.66
Monthly average of total assets	734,920,009.71	753,370,111.74	744.413.008.26
Turnover rate	15.77%	11.95%	27.66%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ { [1 / \text{X}] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{C} * \text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ { [1 / \text{F}] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$\text{Ci} = [\text{Wi} / \text{NIW}(\text{Di})] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 1,3438 net (1,9198 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 51.950,45 EUR and for the Management Company 20.780,18 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 9, with a market value fluctuating between 0 and 20531078.03 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
NABTESCO CORP	JPY	63 200	3 748,00	1 286 732,95
Total				1 286 732,95

Details of collateral received for securities lent

Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
KREDITANSTALT FUE 2.231 19FEB30 FRN	EUR	1 400 000	EUR	1 408 360,00
Total				1 408 360,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.85% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 39.85% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 60.15% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	18.27	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI All Countries World - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund Trends Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI All Countries World - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	97.94	64.29	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	39.85	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	22.03	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	14.92	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	19.31	18.81	18.27
Greenhouse gas intensity	94.15	77.75	64.29
Sustainable Investments	72.32	37.82	39.85
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	20.75	22.03
Sustainable Investments with a social objective (%)	39.92	14.77	14.92
Assets promoting E/S characteristics (%)	88.59	93.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 39.85% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
MICROSOFT CORP	Software & Tech Services	3.93%	United States of America
ALPHABET INC-CL A	Media	3.44%	United States of America
AMAZON.COM INC	Retail & Wholesale - Discretionary	2.67%	United States of America
META PLATFORMS INC-CLASS A	Media	1.91%	United States of America
NVIDIA CORP	Tech Hardware & Semiconductors	1.87%	United States of America
ELIA GROUP SA/NV	Utilities	1.21%	Belgium

AGNICO EAGLE MINES LTD	Materials	1.16%	Canada
SALESFORCE INC	Software & Tech Services	1.12%	United States of America
LINDE PLC	Materials	1.08%	Ireland
TAIWAN SEMICONDUCTOR-SP ADR	Tech Hardware & Semiconductors	1.05%	Taiwan
BOSTON SCIENTIFIC CORP	Health Care	1.04%	United States of America
VISA INC-CLASS A SHARES	Financial Services	1.02%	United States of America
INTUITIVE SURGICAL INC	Health Care	0.99%	United States of America
ROCHE HOLDING AG-GENUSSCHEIN	Health Care	0.96%	Switzerland

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 39.85%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund Trends Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives could be used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Trends Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

22.03% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 2.90% are environmentally sustainable investments (taxonomy-aligned) and 14.92% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	17.09%
Software & Tech Services	14.36%
Tech Hardware & Semiconductors	13.02%
Media	10.11%
Industrial Products	8.13%
Financial Services	6.96%
Materials	6.45%
Retail & Wholesale - Discretionary	5.91%
Consumer Staple Products	4.53%
Industrial Services	3.92%
Utilities	2.83%
Consumer Discretionary Products	2.34%
Real Estate	2.01%
Renewable Energy	1.24%
Insurance	0.84%
Consumer Discretionary Services	0.23%
Not specified	0.02%
Retail & Wholesale - Staples	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 2.90% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund invests primarily in shares of companies operating in areas which, according to the manager, fit with the theme 'challenges and opportunities that will apply during this and subsequent decades'.

The manager focuses mainly on shares of companies whose activities focus on long-term trends of transformative technologies, climate change, scarcity of natural resources, mismatch of skills, urbanization and changing lifestyles.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in fossil gas sector activities that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy compliant when at least 20% of revenues are compliant with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

The proportion of investments in transition activities was 0.00%.

The proportion of investments in enabling activities was 1.86%.

The figures described in this section are from data provider Trucost.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 2.90%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 39.85% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 22.03%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 14.92%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund Trends Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund's portfolio is managed passively.

More information with respect to this can be found under the 'Benchmark-tracking' title.

The assets are invested primarily in equities (or equity-related investments) figuring in the MSCI USA Small Cap - Net return index.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Benchmark-tracking

The objective of the sub-fund is to track the composition of a benchmark in accordance with and within the limits of Article 63 of the Royal Decree of 12 November 2012 on the undertakings for collective investment complying with the conditions of Directive 2009/65/EC.

Benchmark(s) in question: MSCI USA Small Cap - Net return index, which consists of a selection of stocks of smaller U.S. listed companies, covering all sectors. Additional information on this benchmark and its composition can be found on the following website: www.msci.com.

Benchmark tracking method: physical replication using Optimized Sampling. The benchmark is tracked using a selection of shares in the benchmark in order to best replicate the benchmark. In addition, an optimisation algorithm is used that balances the risk and the return of each of the portfolio positions, so optimising the selection. The sub-fund may also make limited use of synthetic replication by way of futures, primarily in order to cushion the effects of buying and selling, and to avoid the attendant transaction charges.

The benchmark is rebalanced every quarter. The more often an benchmark is rebalanced, the greater the potential impact on the transaction charges within the sub-fund.

Given normal market conditions, the expected tracking error is between 0% and 1%. Possible causes of this tracking error could be the method used to track the benchmark, transaction charges, dividend reinvestment, the general costs charged to the sub-fund, any income from lending financial instruments .

If the composition of the benchmark is no longer sufficiently diversified or if the benchmark is no longer sufficiently representative of the market it relates to or if the value and composition of the benchmark is no longer published in a suitable manner, the management company will inform the Board of Directors without delay. The Board of Directors will consider what action to take in the interest of investors and may convene a general meeting of shareholders in order to amend the investment policy.

Required disclaimers for benchmark providers:

Although MSCI shall obtain information for inclusion in or for use in the calculation of the MSCI indexes from sources that MSCI considers reliable, none of the MSCI parties warrants or guarantees the originality, accuracy and/

or the completeness of any MSCI index or any data included therein. None of the MSCI parties makes any warranty, express or implied, as to results to be obtained by the issuer of the fund, owners of the fund, or any other person or entity, from the use of any MSCI index or any data included therein. None of the MSCI parties shall have any liability

for any errors, omissions or interruptions of or in connection with any MSCI index or any data included therein. Further, none of the MSCI parties makes any express or implied warranties of any kind, and the MSCI parties hereby expressly disclaim all warranties of merchantability and fitness for a particular purpose, with respect to each

MSCI index and any data included therein. Without limiting any of the foregoing, in no event shall any of the MSCI parties have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

No purchaser, seller or holder of this fund, or any other person or entity, should use or refer to any MSCI trade name, trademark or service mark to sponsor, endorse, market or promote this fund without first contacting MSCI to determine whether MSCI's permission is required. Under no circumstances may any person or entity claim any affiliation with MSCI without the prior written permission of MSCI.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ('PAI') as described by the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the financial services sector ('SFDR'), within the restricted limits that are inherent to passive management, through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

In particular, the sub-fund took into account exposure to controversial weapons ('indicator 14') by excluding companies dealing with controversial weapon systems.

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE0168342476) calculated in the currency of the share.

Annual tracking difference: -0.74%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,37%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

Tracking error and annual tracking difference for the Distribution share (ISIN-code: BE0168341460) calculated in the currency of the share.

Annual tracking difference: -0.79%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,37%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

Tracking error and annual tracking difference for the Capitalisation share (ISIN-code: BE6228910558) calculated in the currency of the share.

Annual tracking difference: -0.25%

The annual tracking difference is the difference between the return of the unit in question and the return of its benchmark index over the financial year.

Tracking error: 0,38%

The tracking error is the annualised volatility of the differences between the daily returns of the unit in question and those of the benchmark index.

2.1.7. Policy pursued during the financial year

Active positions in US Small Caps stocks were taken based on quantitative analysis and a stringent risk framework. Approximately once a month, the fund was rebalanced to reflect recommendations originated by forementioned analysis.

2.1.8. Future policy

The fund will continue its active stock selection strategy based on quantitative analysis within the limits defined by the stringent risk framework.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed

companies.

- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares EUR: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares EUR: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in shares of smaller US listed companies.
- a moderate level of liquidity risk: since there will be invested in the shares of companies that have a lower market capitalisation, there is a risk that a position cannot be sold quickly at a reasonable price.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 58 984.81 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund US Small Caps (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	67,849,261.20	17,501,480.35	85,350,741.56
Sales	118,059,505.17	12,549,653.83	130,609,159.00
Total 1	185,908,766.37	30,051,134.18	215,959,900.56
Subscriptions	64,779,278.78	10,942,908.79	75,722,187.57
Redemptions	115,407,266.46	5,652,691.37	121,059,957.83
Total 2	180,186,545.23	16,595,600.16	196,782,145.39
Monthly average of total assets	191,021,321.17	157,387,994.94	173.716.207.25
Turnover rate	3.00%	8.55%	11.04%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 24,6348 net (35,1926 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 22.883,37 USD and for the Management Company 9.153,35 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 3 and 23, with a market value fluctuating between 121797.43709822 and 2247335.2884615 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,09	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	143.045,00	USD
proportion of the collective investment undertaking's assets under management (AUM)	0,09	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
French Republic	160.197,33	USD
Republic of Austria	2.242,03	USD
United Kingdom of Great Britain	248,98	USD
Kingdom of the Netherlands	23,49	USD
Federal Republic of Germany	21,14	USD

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	Citigroup Global Markets Limited	UK	0,00	USD
equity (Goldman Sachs)	Goldman Sachs International	UK	0,00	USD

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are, directly or indirectly, mainly invested in shares of companies from North America.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('**indicator 4**') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the established strategy, the fund is and has been invested in a selection of US & Canadian stocks. The "America" part of the KBC AM strategy is followed.

2.1.8. Future policy

In the future, the fund will continue to invest in US & Canadian equities, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund USA & Canada (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	794,497,411.26	661,415,506.13	1,455,912,917.39
Sales	1,313,629,124.76	543,659,794.51	1,857,288,919.26
Total 1	2,108,126,536.02	1,205,075,300.63	3,313,201,836.65
Subscriptions	316,062,791.97	386,856,874.76	702,919,666.73
Redemptions	824,387,402.63	271,329,492.21	1,095,716,894.84
Total 2	1,140,450,194.60	658,186,366.97	1,798,636,561.57
Monthly average of total assets	1,581,004,938.98	1,548,912,827.97	1,564,492,815.47
Turnover rate	61.21%	35.31%	96.81%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 7,5723 net (10,8176 gross).

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,691%
Transaction costs: 0,285%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,754%
Transaction costs: 0,284%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,469%
Transaction costs: 0,285%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 59,17% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this

report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 11.047,08 EUR and for the Management Company 4.418,83 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 9, with a market value fluctuating between 0 and 11840465.06 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
CAN IMPERIAL BK OF COMMERCE	CAD	78 342	124,43	6 055 168,75

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The assets are mainly invested in shares of companies from North America.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund USA & Canada Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund USA & Canada Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI North America-Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI North America-Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI North America-Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to

Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund USA & Canada Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI North America-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the established strategy, the fund is and has been invested in a selection of US & Canadian stocks. The "America" part of the KBC AM strategy is followed. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly.

2.1.8. Future policy

The fund will continue to invest in US & Canadian equities in the future, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by

movements in exchange rates.

- a moderate level of concentration risk: there is a concentration of investments in the shares of North American companies.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.4.2. Changes in the composition of the assets of KBC Equity Fund USA & Canada Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,728,554,107.19	1,279,008,551.74	3,007,562,658.93
Sales	1,510,194,341.06	771,652,631.69	2,281,846,972.75
Total 1	3,238,748,448.25	2,050,661,183.43	5,289,409,631.68
Subscriptions	695,284,147.61	745,234,337.50	1,440,518,485.11
Redemptions	483,607,076.11	229,678,309.70	713,285,385.81
Total 2	1,178,891,223.72	974,912,647.20	2,153,803,870.92
Monthly average of total assets	2,451,436,106.18	3,070,561,065.14	2,769.990.026.97
Turnover rate	84.03%	35.03%	113.20%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Annual performance compared to the benchmark from 01/01/2019 through 31/12/2025 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307764488	EUR	3.90%	4.09%	18.05%	18.79%	12.53%	14.36%			05/11/2018	12.25%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Institutional B Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 0,000%

Transaction costs: 0,000%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,482%

Transaction costs: 0,356%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 0% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.50%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 11.683,31 EUR and for the Management Company 4.673,32 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 24934423.18 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
OPEN TEXT CORP	CAD	120 000	44,70	3 331 925,36
POWER CORP OF CANADA	CAD	185 700	72,95	8 414 798,00
Total				11 746 723,36
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
UNITED KINGDOM GILT 1.25 22OCT41	GBP	18 664 710	EUR	12 816 800,00
Total				12 816 800,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,34	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	11.746.742,78	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,34	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
United Kingdom of Great Britai	12.816.800,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

percentage of overall returns	35,00 %		

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund USA & Canada Responsible Investing

Legal entity identifier:
875500L94SBV73UU7T30

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 34.09% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 34.09% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 65.91% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI North America-Net Return index.	20.61	19.52	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI North America-Net Return index as described in the prospectus under the title 'information concerning the sub-fund USA & Canada Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI North America-Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	83.19	44.18	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	34.09	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	24.61	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	9.48	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.57	19.82	19.52
Greenhouse gas intensity	31.41	34.56	44.18
Sustainable Investments	74.29	32.18	34.09
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	21.43	24.61
Sustainable Investments with a social objective (%)	42.54	10.66	9.48
Assets promoting E/S characteristics (%)	99.87	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 34.09% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NVIDIA CORP	Tech Hardware & Semiconductors	7.49%	United States of America
MICROSOFT CORP	Software & Tech Services	6.95%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 34.09%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund USA & Canada Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund USA & Canada Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

24.61% of the sustainable investments are environmentally sustainable investments and 9.48% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	19.76%
Software & Tech Services	15.16%
Media	15.05%
Health Care	12.43%
Financial Services	8.39%
Banking	6.25%
Retail & Wholesale - Discretionary	5.45%
Materials	3.88%
Insurance	2.70%
Real Estate	2.62%
Industrial Services	1.84%
Consumer Discretionary Products	1.79%
Consumer Staple Products	1.65%
Telecommunications	1.21%
Industrial Products	1.11%
Retail & Wholesale - Staples	0.54%
Utilities	0.10%
Consumer Discretionary Services	0.07%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not

invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The assets are mainly invested in shares of companies from North America.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

☐

Yes:

☐

In fossil gas

☐

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 34.09% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 24.61%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 9.48%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund USA & Canada Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI North America-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that are contributing to the medical well-being of society through their products and services, such as:

- Production and development of medicine
- Biotech
- Medical technology
- Diagnostics, symptom recognition and tests
- Digital health care
- Care for elderly and sick people
- Outsourcing of medical activities
- Distribution of medical supplies
- Health and life insurance
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund We Care Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the

European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the

calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund We Care Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund We Care Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

2025 was another challenging year for healthcare investors, with the sector clearly lagging behind the broad market. However, this deficit was hardly the result of weakening fundamentals. It was mainly caused by persistent and unfavourable policy developments in the US, which put pressure on the sector from various angles. The main sources of uncertainty related to tighter regulation of drug prices, higher tariff levies, reforms within the FDA, tighter vaccination policies and restrictions in government funding, which put pressure on public health insurance programmes, among others.

Although the pace of innovation within the sector remains high, this is only reflected to a limited extent in valuations. However, in light of the inherent risks and unpredictability of the development pipeline, a degree of market caution is not illogical within the current macroeconomic context. The agreement around drug prices between Pfizer and the US government at the end of September provided more clarity and was a first step towards recovery within the sector.

Our general reticence towards biopharma companies - mainly driven by the risks around drug prices and the wider patent expiry looming - meant that we could only partially benefit from this recent rebound. Within the medtech segment, lingering uncertainty around possible tariff levies and the broader impact of the strong AI trade weighed on sentiment, despite our structurally positive view on this segment. On the other hand, we did benefit from our exposure to certain hospitals and health insurers.

2.1.8. Future policy

Looking ahead to 2026, we are cautiously building our position in the Medication theme. Although we are more selectively betting slightly more on this segment, we remain cautious: US policy risk may still increase towards the midterm elections, we are waiting for more clarity around some as-yet unpublished drug pricing initiatives within the Medicare insurance segment, and in addition, the impending patent expiry remains a key risk for the sector.

The expansion within Medication was funded by slightly reducing our positions in the Medical Technology and Digital Healthcare themes. Despite this downsizing, we maintain a positive long-term view on both segments: Medical Technology thanks to strong innovation momentum and a robust pipeline of product launches, and Digital Healthcare because of structural growth in AI-driven applications that improve efficiency, diagnostic quality and cost control.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares K&H HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a moderate level of concentration risk: there is a concentration of the investments in the shares of companies in the pharmaceutical and health care industries.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

	1 st half of year	2 nd half of year	Year
Purchases	44,223,958.89	71,250,762.91	115,474,721.80
Sales	63,453,269.46	52,075,845.53	115,529,114.99
Total 1	107,677,228.35	123,326,608.44	231,003,836.79
Subscriptions	47,276,830.38	58,063,487.41	105,340,317.79
Redemptions	66,356,562.15	35,188,463.68	101,545,025.83
Total 2	113,633,392.53	93,251,951.09	206,885,343.62
Monthly average of total assets	573,585,774.16	567,051,895.21	570,223,944.33
Turnover rate	-1.04%	5.30%	4.23%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets

(excluding deposits and cash) in a given period only involve subscriptions and redemptions.
A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.
Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)] ^ {1 / X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)] ^ {1 / F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 20,5699 net (29,3856 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 7.656,09 EUR and for the Management Company 3.062,44 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 2, with a market value fluctuating between 0 and 20039583.97 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Name	Currency	Quantity	Price	Value in currency of the portfolio
POWER CORP OF CANADA	CAD	100 800	72,95	4 567 644,79
Total				4 567 644,79

Details of collateral received for securities lent

Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
FRENCH REPUBLIC GO 0.5 25MAY40 144A	EUR	7 810 633	EUR	4 897 764,00
KREDITANSTALT FUR WIEDERAFBAU GLBL NT 5%26	USD	92 000	EUR	79 571,00
Total				4 977 335,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,74	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	4.567.652,35	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,74	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

percentage of overall returns	35,00 %		

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund We Care Responsible Investing

Legal entity identifier:
549300C60FZDN3VNUF17

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.91% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 61.91% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 38.09% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	19.16	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index as described in the prospectus under the title 'information concerning the sub-fund We Care Responsible Investing' and a 50% reduction by 2030, versus 75% of the benchmark value of MSCI All Countries World – Net Return Index at the end of 2019, with an immediate reduction of 30% taken into account in 2019, followed by a 3% reduction per year. In order to reflect the specific thematic characteristics of this sub-fund, a unique starting point will apply to the calculation of the greenhouse gas intensity trajectory, which may be higher or lower than the benchmark (MSCI All Countries World - Net Return Index). The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019. The weighted average of the portfolio will be compared to this pathway.	89.11	14.49	Yes
Minimum % Sustainable Investments	A minimum of 50.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	50	61.91	Yes
Minimum % Sustainable Investments with a social objective	Minimum 50% sustainable investments with a social objective.	50	60.41	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	20.46	19.94	19.16
Greenhouse gas intensity	17.46	15.27	14.49
Sustainable Investments	80.42	64.34	61.91
Sustainable Investments with a social objective (%)	70.38	62.83	60.41
Assets promoting E/S characteristics (%)	98.93	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 61.91% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Daarnaast kon KBC Asset Management NV op advies van de Responsible Investing Advisory Board het label 'duurzame ontwikkeling' toekennen aan de instrumenten.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti corruption and anti-bribery matters.

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also

ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight

International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
ELI LILLY & CO	Health Care	8.94%	United States of America
ABBVIE INC	Health Care	5.08%	United States of America
UNITEDHEALTH GROUP INC	Health Care	4.59%	United States of America
ASTRAZENECA PLC	Health Care	3.76%	United Kingdom
ROCHE HOLDING AG-GENUSSCHEIN	Health Care	3.33%	Switzerland
INTUITIVE SURGICAL INC	Health Care	3.08%	United States of America
NOVO NORDISK A/S-B	Health Care	2.97%	Denmark
JOHNSON & JOHNSON	Health Care	2.94%	United States of America
BOSTON SCIENTIFIC CORP	Health Care	2.92%	United States of America
MERCK & CO. INC.	Health Care	2.85%	United States of America
ABBOTT LABORATORIES	Health Care	2.83%	United States of America
THERMO FISHER SCIENTIFIC INC	Health Care	2.70%	United States of America
NOVARTIS AG-REG	Health Care	2.36%	Switzerland
STRYKER CORP	Health Care	2.24%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 61.91%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund We Care Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives could be used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Care Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

1.50% of the sustainable investments are environmentally sustainable investments and 60.41% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Health Care	89.60%
Insurance	7.41%
Software & Tech Services	1.28%
Tech Hardware & Semiconductors	0.92%
Financial Services	0.51%
Consumer Staple Products	0.15%
Real Estate	0.13%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional

activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The subfund invests primarily in shares of companies that are contributing to the medical well-being of society through their products and services, such as:

- Production and development of medicine
- Biotech
- Medical technology
- Diagnostics, symptom recognition and tests
- Digital health care
- Care for elderly and sick people
- Outsourcing of medical activities
- Distribution of medical supplies
- Health and life insurance
- Etc.

A current overview can be found at www.kbc.be/thematic-funds

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

● **What was the share of investments made in transitional and enabling activities?**

Not applicable.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account** the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 61.91% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 1.50%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 60.41%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Care Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial

regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund aims to generate a return by investing primarily in shares of companies whose products and services support the digital evolution, such as:

- Electronics
- Big data and artificial intelligence
- Quantum computing
- Cloud services and cloud computing
- Cybersecurity
- Semiconductors
- Data services to companies
- Software for professional purposes
- IT consultancy
- Network infrastructure
- Digital marketplaces
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund We Digitize Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund We Digitize Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC

Equity Fund We Digitize Responsible Investing’.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the ‘Annex for KBC Equity Fund We Digitize Responsible Investing’.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

The second half of 2025 was characterized by strong but increasingly volatile performance in global technology equities, reflecting an important transition in the market's assessment of the AI opportunity. Early in the period, technology stocks significantly outperformed broader equity markets, supported by easing monetary policy (Fed rate cuts), resilient macro data, and robust earnings momentum. The AI investment cycle remained the dominant structural theme, with renewed enthusiasm around infrastructure spending, particularly in semiconductors.

However, as the year progressed, investor focus shifted from growth potential to sustainability of returns. While AI demand continued to accelerate, concerns emerged around elevated valuations, balance sheet leverage, Circular AI investments, and the scale of capital expenditures required to support long term growth. This resulted in a more selective market environment, culminating in a notable pullback in November before stabilizing in December. However, in December tech underperformed versus broader equities as cyclicals started to led the rally.

Within the sector, semiconductors and AI related hardware were clear relative outperformers, benefiting from strong order visibility, expanding backlogs, and continued commitment from hyperscalers to invest in AI infrastructure. Asian technology markets, particularly Korea and Taiwan, performed strongly, reflecting their central role in the global AI supply chain, especially within memory chips. By contrast, software stocks lagged, as investors increasingly questioned the resilience of traditional business models in the face of rapid AI driven disruption and uncertain monetization timelines.

From a fund management perspective, we maintained meaningful exposure to core technology enablers, including the Platform theme (Alphabet, Apple), Cloud Services (Nvidia, Microsoft), and Semiconductors (TSMC, Broadcom).

During the second half of 2025, we materially reduced our exposure to the software segment, where structural disruption risks increased, and redeployed capital toward areas with stronger cyclical and structural tailwinds. In particular, we increased exposure to the storage and memory segment (SK Hynix, Samsung, Micron), as well as semiconductor equipment (ASML, Applied Materials, Advantest), reflecting our conviction that memory has entered a supercycle supported by AI driven demand.

2.1.8. Future policy

As we enter the first half of 2026, the We Digitize fund maintains its strategic focus on the long term transformative potential of artificial intelligence. It has become increasingly evident that AI is reshaping industries and business models at an unprecedented pace. AI remains the dominant secular growth driver, and we continue to actively monitor both direct AI beneficiaries and the broader "picks and shovels" AI supply chain.

At the same time, we deliberately remain underweight the Software, IT Consultancy, and Data themes, where we identify a growing group of AI losers. Within these segments, many business models require fundamental reinvention, while visibility on future profitability remains limited. Although valuations have compressed significantly and may appear attractive, we believe the underlying uncertainty surrounding earnings durability will persist.

Conversely, we continue to favor resilient, cash generative platform leaders, particularly within the Magnificent Seven. Following the recent pullback—driven by profit taking and concerns around elevated AI related capital expenditure—these companies once again offer an attractive combination of more reasonable valuations, strong balance sheets, and durable earnings growth, supported by their central role in the AI ecosystem.

With respect to the storage segment, we are convinced that memory has entered a supercycle supported by AI driven demand. That said, we continue to closely monitor capacity additions, in particular potential supply increases from Chinese players such as CXMT and YMTC, which could affect the medium term supply–demand balance.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Institutional B Shares: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Classic Shares K&H HUF: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Classic Shares EUR: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

Classic Shares CSOB CZK: 5 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 USD.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Digitize Responsible Investing (in American dollar)

	1 st half of year	2 nd half of year	Year
Purchases	406,695,131.46	331,923,620.01	738,618,751.47
Sales	363,093,870.41	231,737,394.80	594,831,265.21
Total 1	769,789,001.87	563,661,014.81	1,333,450,016.68
Subscriptions	170,973,143.21	177,506,894.85	348,480,038.06
Redemptions	114,396,663.92	76,318,989.10	190,715,653.02
Total 2	285,369,807.12	253,825,883.95	539,195,691.08
Monthly average of total assets	1,023,072,000.78	1,340,260,865.01	1.186.272.910.18
Turnover rate	47.35%	23.12%	66.95%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund takes active decisions regarding chosen themes and individual companies. Rebalancing typically happens on a monthly basis. In "high dispersion" and volatile markets, more than 150% (2 way turnover) is not exception so opportunities can adequately captured and excessive risks can be avoided.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in USD and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 3,4436 net (4,9195 gross).

KBC Equity Fund We Digitize Responsible Investing Classic Shares CSOB CZK CAP
Annual performance compared to the benchmark from 01/01/2024 through 31/12/2025 (in CZK)

If the results are expressed in a currency other than the euro, the return may be higher or lower due to exchange rate fluctuations.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6339813873	CZK	4.14%	3.57%							28/04/2023	30.32%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares CSOB CZK

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in CZK and in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{Y})] ^ {1 / \text{X}} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(\text{D}) / \text{NIW}(\text{S})] ^ {1 / \text{F}} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 7.782,67 USD and for the Management Company 3.113,07 USD. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 21391178.37 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund We Digitize Responsible Investing

Legal entity identifier:
549300VXRJ6XIL0EYI96

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.42% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 36.42% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 63.58% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	17.75	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index as described in the prospectus under the title 'information concerning the sub-fund We Digitize Responsible Investing' and a 50% reduction by 2030, versus 75% of the benchmark value of MSCI All Countries World – Net Return Index at the end of 2019, with an immediate reduction of 30% taken into account in 2019, followed by a 3% reduction per year. In order to reflect the specific thematic characteristics of this sub-fund, a unique starting point will apply to the calculation of the greenhouse gas intensity trajectory, which may be higher or lower than the benchmark (MSCI All Countries World - Net Return Index). The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019. The weighted average of the portfolio will be compared to this pathway.	89.11	42.45	Yes
Minimum % Sustainable Investments	A minimum of 25.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	25	36.42	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 25% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	25	35.98	Yes
Minimum % Sustainable Investments with a social objective	Minimum 0% sustainable investments with a social objective.	0	.44	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of

the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	16.99	17.76	17.75
Greenhouse gas intensity	29.83	25.98	42.45
Sustainable Investments	74.12	33.13	36.42
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	33.13	35.98
Sustainable Investments with a social objective (%)	30.11	.00	.44
Assets promoting E/S characteristics (%)	99.53	99.81	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 36.42% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Daarnaast kon KBC Asset Management NV op advies van de Responsible Investing Advisory Board het label 'duurzame ontwikkeling' toekennen aan de instrumenten.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NVIDIA CORP	Tech Hardware & Semiconductors	7.11%	United States of America
MICROSOFT CORP	Software & Tech Services	6.84%	United States of America
ALPHABET INC-CL C	Media	6.31%	United States of America
APPLE INC	Tech Hardware & Semiconductors	5.26%	United States of America
BROADCOM INC	Tech Hardware & Semiconductors	4.90%	United States of America
TAIWAN SEMICONDUCTOR MANUFAC	Tech Hardware & Semiconductors	4.09%	Taiwan
META PLATFORMS INC-CLASS A	Media	3.75%	United States of America
AMAZON.COM INC	Retail & Wholesale - Discretionary	3.64%	United States of America
ORACLE CORP	Software & Tech Services	2.33%	United States of America
SAP SE	Software & Tech Services	2.23%	Germany
TESLA INC	Consumer Discretionary Products	1.88%	United States of America
ASML HOLDING NV	Tech Hardware & Semiconductors	1.81%	Netherlands

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 36.42%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund We Digitize Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Digitize Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

35.98% of the sustainable investments are environmentally sustainable investments and .44% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	44.20%
Software & Tech Services	30.19%
Media	12.15%
Financial Services	4.67%
Retail & Wholesale - Discretionary	4.62%
Consumer Discretionary Products	1.97%
Industrial Services	1.04%
Industrial Products	0.88%
Telecommunications	0.28%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental

objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund aims to generate a return by investing primarily in shares of companies whose products and services support the digital evolution, such as:

- Electronics
- Big data and artificial intelligence
- Quantum computing
- Cloud services and cloud computing
- Cybersecurity
- Semiconductors
- Data services to companies
- Software for professional purposes
- IT consultancy
- Network infrastructure
- Digital marketplaces
- Etc.

A current overview can be found at www.kbc.be/thematic-funds

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The proportion of investments in enabling activities was 0.03%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 36.42% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 35.98%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was .44%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Digitize Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial

regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that cater for products and services that consumers perceive as adding value beyond their basic needs, such as:

- Sport
- Travel and culture
- Restaurants, takeaway meals and fast food
- Cosmetics and beauty products
- Media and gaming
- Luxury goods
- Pets and care
- Personal mobility
- E-commerce
- Wealth management
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund We Like Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% from 75% of the benchmark value by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

In order to reflect the specific theme related characteristics of this sub-fund, a unique starting point will apply for the calculation of the greenhouse gas intensity reduction path, which can be higher or lower than the benchmark (MSCI All Countries World - Net Return Index).

The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund We Like Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC

Equity Fund We Like Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund We Like Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Volatility of the net asset value

Net asset value volatility can be high due to portfolio composition.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for a review of the market.

2.1.8. Future policy

We refer to the General information on the SICAV of this report under '1.2.2. General overview of the markets' for an overview of the outlook.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares K&H HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Like Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	28,388,896.83	32,925,096.96	61,313,993.79
Sales	49,544,000.74	35,812,565.10	85,356,565.84
Total 1	77,932,897.57	68,737,662.06	146,670,559.63
Subscriptions	17,970,685.31	8,819,360.18	26,790,045.49
Redemptions	39,483,859.91	11,081,148.62	50,565,008.52
Total 2	57,454,545.22	19,900,508.79	77,355,054.01
Monthly average of total assets	158,549,551.03	165,614,187.39	162,184,467.66
Turnover rate	12.92%	29.49%	42.74%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period. A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service: KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [\text{Wi} / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 1,3340 net (1,9058 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 4.610,26 EUR and for the Management Company 1.844,10 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 4639597.19 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025				
Name	Currency	Quantity	Price	Value in currency of the portfolio
Total				0,00
Details of collateral received for securities lent				
Name	Currency	Nominal Value	Currency Fund	Value in currency of the portfolio
REPUBLIC OF AUSTRI 2.5 20OCT29 144A	EUR	368 000	EUR	370 278,00
Total				370 278,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund We Like Responsible Investing

Legal entity identifier:
549300G0BNG5C3LT5979

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.17% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 11.17% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 88.83% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	20.29	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index as described in the prospectus under the title 'information concerning the sub-fund We Like Responsible Investing' and a 50% reduction by 2030, versus 75% of the benchmark value of MSCI All Countries World – Net Return Index at the end of 2019, with an immediate reduction of 30% taken into account in 2019, followed by a 3% reduction per year. In order to reflect the specific thematic characteristics of this sub-fund, a unique starting point will apply to the calculation of the greenhouse gas intensity trajectory, which may be higher or lower than the benchmark (MSCI All Countries World - Net Return Index). The unique starting point of the sub-fund is 75% of the value of this benchmark at the end of 2019. The weighted average of the portfolio will be compared to this pathway.	89.11	38.22	Yes
Minimum % Sustainable Investments	A minimum of 5.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	5	11.17	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	11.17	Yes
Minimum % Sustainable Investments with a social objective	Minimum 0% sustainable investments with a social objective.	0	.00	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of

the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	19.34	20.28	20.29
Greenhouse gas intensity	61.85	45.08	38.22
Sustainable Investments	65.84	12.33	11.17
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	12.33	11.17
Sustainable Investments with a social objective (%)	42.26	.00	.00
Assets promoting E/S characteristics (%)	100.23	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 11.17% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Daarnaast kon KBC Asset Management NV op advies van de Responsible Investing Advisory Board het label 'duurzame ontwikkeling' toekennen aan de instrumenten.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
META PLATFORMS INC-CLASS A	Media	4.98%	United States of America
NETFLIX INC	Media	4.85%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 11.17%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund We Like Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Like Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

11.17% of the sustainable investments are environmentally sustainable investments and .00% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Media	27.07%
Financial Services	13.77%
Consumer Discretionary Products	13.00%
Banking	11.68%
Retail & Wholesale - Discretionary	10.90%
Consumer Discretionary Services	8.84%
Tech Hardware & Semiconductors	5.78%
Software & Tech Services	4.17%
Materials	2.61%
Industrial Services	1.28%
Consumer Staple Products	0.90%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a

substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The subfund invests primarily in shares of companies that cater for products and services that consumers perceive as adding value beyond their basic needs, such as:

- Sport
- Travel and culture
- Restaurants, takeaway meals and fast food
- Cosmetics and beauty products
- Media and gaming
- Luxury goods
- Pets and care
- Personal mobility
- E-commerce
- Wealth management
- Etc.

A current overview can be found at www.kbc.be/thematic-funds

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?**

☐ Yes:

☐ In fossil gas

☐ In nuclear energy

☒ No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy--alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.00%.

The proportion of investments in enabling activities was 0.12%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy.

Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 11.17% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 11.17%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was .00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Like Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial

regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that cater for products and services that consumers need in everyday life, such as:

- Utilities for water, Internet and electricity, for example
- Computer equipment, software and communication devices for everyday use
- Food and beverages
- Household goods
- Products for hygiene and daily care
- Household appliances
- DIY items
- Textiles and clothing
- E-commerce
- Everyday banking
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund We Live Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the MSCI All Countries World – Net Return Index and a reduction of 50% by 2030 compared to the MSCI All Countries World – Net Return Index in 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The

weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund We Live Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund We Live Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Current Investment Policy

The We Live Responsible Investing Fund delivered a return of 0.78% in 2025, compared with 8.37% for the MSCI All Countries Index.

The We Live RI Fund is a thematic strategy investing across seven long-term themes. The three largest themes by portfolio weight were Daily Banking (37.45%), Utilities and Communication Tools (20.11%), and Stores & Chains (10.97%). From a performance perspective, Daily Banking was the strongest contributor, returning 6.87%, while Personal Hygiene Products and Health Supplements was the weakest-performing theme, with a return of -20.4%.

The first half of the year was characterized by aggressive U.S. trade policies and rapid shifts in global tariffs, creating an uncertain macroeconomic backdrop. In contrast, the second half of the year was dominated by the technology sector, driven in particular by strong momentum around artificial intelligence-related themes. Markets remained volatile throughout the year, with brief rotations into defensive sectors that quickly reverted back toward technology-led growth.

On a fundamental level, consumer confidence, especially in the U.S. declined sharply toward the end of the year. From a behavioural standpoint, consumers became increasingly value-focused, which weighed heavily on consumer staples companies. This impact was most pronounced among companies with significant U.S. exposure, many of which struggled to generate positive volume growth.

In a market environment largely driven by short-term momentum, our long-term, fundamentally driven investment approach faced challenges in keeping pace. However, we remain confident that our disciplined and conviction-based strategy is well positioned to navigate market cycles. By staying focused on fundamentals rather than short-term market sentiment, we believe this approach will mitigate the impact of temporary market dislocations and reinforce value creation over the long term.

2.1.8. Future policy

Future investment strategy

Looking ahead to 2026, we continue to maintain an overweight position in the Daily Banking theme, supported by a favourable backdrop of regulatory easing from the current administrations in both the U.S. and the EU. In addition, we have strengthened our conviction in the Personal Hygiene Products and Health Supplements theme, benefiting from improving market dynamics and particularly attractive valuations.

We remain cautious on Food & Beverage names, as we believe that, despite appealing valuations, the fundamental outlook has yet to show a sufficiently compelling improvement. Within Utilities and Communication Tools, we stay highly selective, seeking to strike the right balance between the defensive characteristics of telecom operators and the growth potential of technology leaders such as Google and Microsoft. These companies have faced recent pressure due to concerns over rising capital expenditures, which we view as an opportunity to remain disciplined and selective rather than reactive.

Our investment strategy remains firmly anchored in companies with a proven track record of execution and delivery, strong competitive moats, and management teams that demonstrate integrity and long-term vision. This philosophy is non-negotiable. Within this consistent framework, we actively and thoughtfully adjust theme weightings, increasing or reducing exposure as needed to reflect the broader economic environment and prevailing market conditions, while staying aligned with our long-term objectives.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 3 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares K&H HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund We Live Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	23,153,857.40	6,446,140.82	29,599,998.21
Sales	56,691,298.40	12,642,628.99	69,333,927.39
Total 1	79,845,155.80	19,088,769.81	98,933,925.60
Subscriptions	14,015,489.65	6,470,256.58	20,485,746.23
Redemptions	49,453,764.96	11,210,111.32	60,663,876.28
Total 2	63,469,254.61	17,680,367.90	81,149,622.51
Monthly average of total assets	113,743,944.92	111,111,287.22	112,389,382.45
Turnover rate	14.40%	1.27%	15.82%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1/X] - 1}$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1/F] - 1}$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 21,0597 net (30,0854 gross).

In accordance with the Royal Decree of 10 November 2006 on the accounting and the annual accounts of certain public collective investment undertakings, investors are informed that the General Meeting of the fund will decide to pay a dividend despite the fact that a negative 'result available for appropriation' was recorded for the corresponding financial year.

Investors are also informed that the dividend to be paid stems directly from the interest, dividends and realised capital gains received from the investments made during the financial year corresponding to the dividend to be paid out.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 4.287,34 EUR and for the Management Company 1.714,94 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 4, with a market value fluctuating between 0 and 1687553.79 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

Total				541 250,00

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,38	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	421.082,94	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,38	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
United Kingdom of Great Britai	541.250,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BNP Paribas Financial Markets	France	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
1	Bank of New York	541.250,00	EUR

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	6.595,91	1.714,94	593,63
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	2.308,57		
percentage of overall returns	35,00 %		

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund We Live Responsible Investing

Legal entity identifier:
549300PFJ5BX0HHHJF43

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 13.40% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 13.40% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 86.60% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	19.92	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund We Live Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI All Countries World - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	97.945	21.19	Yes
Minimum % Sustainable Investments	A minimum of 10.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	10	13.40	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 2.5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	2.5	6.04	Yes
Minimum % Sustainable Investments with a social objective	Minimum 2.5% sustainable investments with a social objective.	2.5	7.35	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	19.80	20.38	19.92
Greenhouse gas intensity	26.90	23.36	21.19
Sustainable Investments	63.91	14.34	13.40
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	7.01	6.04
Sustainable Investments with a social objective (%)	48.97	6.79	7.35
Assets promoting E/S characteristics (%)	100.61	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 13.40% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Daarnaast kon KBC Asset Management NV op advies van de Responsible Investing Advisory Board het label 'duurzame ontwikkeling' toekennen aan de instrumenten.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from

the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
APPLE INC	Tech Hardware & Semiconductors	5.18%	United States of America
AMAZON.COM INC	Retail & Wholesale - Discretionary	4.98%	United States of America
VISA INC-CLASS A SHARES	Financial Services	4.73%	United States of America

AT&T INC	Telecommunications	1.74%	United States of America
ARTHUR J GALLAGHER & CO	Insurance	1.42%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 13.40%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund We Live Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Live Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

6.04% of the sustainable investments are environmentally sustainable investments and 7.35% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Consumer Staple Products	16.40%
Financial Services	14.56%
Retail & Wholesale - Discretionary	14.08%
Banking	12.36%
Insurance	11.69%
Retail & Wholesale - Staples	7.65%
Tech Hardware & Semiconductors	6.92%
Telecommunications	5.30%
Software & Tech Services	4.56%
Media	4.30%
Consumer Discretionary Products	0.98%
Health Care	0.63%
Materials	0.45%
Utilities	0.12%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.00% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The subfund invests primarily in shares of companies that cater for products and services that consumers need in everyday life, such as:

- Utilities for water, Internet and electricity, for example
- Computer equipment, software and communication devices for everyday use
- Food and beverages
- Household goods
- Products for hygiene and daily care
- Household appliances
- DIY items
- Textiles and clothing
- E-commerce
- Everyday banking
- Etc.

A current overview can be found at www.kbc.be/thematic-funds

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in fossil gas sector activities that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy compliant when at least 20% of revenues are compliant with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.01%.

The proportion of investments in enabling activities was 0.01%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.00%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 13.40% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 6.04%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 7.35%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Live Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial

regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The subfund invests primarily in shares of companies that are shaping the society of the future through their products and services, such as:

- Automation and robotisation
- Solutions for energy transition and storage
- Infrastructure and installations for transport and freight vehicles
- Facilities needed in a circular economy
- Water purification, soil decontamination and air quality improvement
- Machines and installations for more efficient agriculture and forestry
- Industrial plants and machines
- Building materials and construction activities
- Materials
- Logistical solutions
- Credit facilities and financial services to companies and governments
- Etc.

A current overview can be found at www.kbc.be/thematic-funds.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund We Shape Responsible Investing’ of this Annual

Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO2 equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the

two will determine the target applied: 15% better than the benchmark 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index and a reduction of 50% by 2030 from the benchmark 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index at the end of 2019.

An immediate 30% reduction will be introduced for 2019, followed by a 3% reduction on an annual basis. The weighted average of the portfolio will be reviewed against that trajectory.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund We Shape Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: 20% MSCI All Countries World Materials - Net Return Index, 55% MSCI All Countries World Industrials - Net Return Index, 25% MSCI All Countries World Financials - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is above 4.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

The blended returns are calculated by KBC Asset Management NV using end of day index level values licensed from MSCI ("MSCI Data"). For the avoidance of doubt, MSCI is not the benchmark "administrator" for, or a "contributor", "submitter" or "supervised contributor" to, the blended returns, and the MSCI Data is not considered a "contribution" or "submission" in relation to the blended returns, as those terms may be defined in any rules, laws, regulations, legislation or international standards. MSCI Data is provided "AS IS" without warranty or liability and no copying or distribution is permitted. MSCI does not make any representation regarding the advisability of any investment or strategy and does not sponsor, promote, issue, sell or otherwise recommend or endorse any investment or strategy, including any financial products or strategies based on, tracking or otherwise utilizing any MSCI Data, models, analytics or other materials or information.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

Cyclical sectors—among them capital goods, basic materials and chemicals—are set to benefit from a more favourable macroeconomic backdrop in which stable policy rates, ongoing fiscal support and resilient real economy momentum act as reinforcing pillars, sustaining order books, underpinning pricing power and encouraging a gradual revival in private investment; the improvement is not purely optical, as steadier financing conditions lower the hurdle rate for new projects while targeted public outlays on infrastructure and industrial policy stimulate downstream demand and help normalise inventory cycles. At the same time, the energy transition is gathering pace: utilities and grid operators are accelerating investment in transmission and distribution to accommodate variable renewables, corporates are committing more capital to on site generation and storage, and technology learning curves continue to compress costs across solar, wind and batteries, creating a self reinforcing loop of adoption that spills over into electrified transport, building electrification and flexible demand solutions. Financial institutions are clear near term beneficiaries of the prevailing rate environment, with net interest income elevated, asset yields repricing faster than liabilities in many markets, and fee income finding a floor as capital markets activity stabilises; although credit costs merit vigilance, strong capital buffers and better underwriting discipline than in prior cycles offer a degree of insulation. Producers of raw materials, particularly those exposed to energy transition metals, are likewise supported by firming prices, reflecting the combination of structurally rising demand, mounting concerns over supply tightness and a concerted drive by governments to secure reliable access to critical inputs through stockpiling, offtake agreements and incentives for domestic refining; this dynamic is most visible in copper, lithium and nickel, but it extends to a broader basket of specialty materials that sit deeper in the supply chain. By contrast, several activity light but software heavy or service centric verticals—transport logistics platforms, staffing and payroll providers, and swathes of industrial software and factory automation—remain under pressure, not because end demand collapses, but because investors and customers alike are reassessing business models in the face of rapid AI diffusion, reprioritising budgets, elongating sales cycles and compressing multiples for firms perceived as most at risk of displacement; simultaneously, fundamentally activity sensitive industries such as chemicals and transportation are yet to see a decisive turn in operating metrics, with subdued volumes, uneven downstream restocking and lingering overcapacity translating into cautious guidance and a preference for cost control over expansion. Against this mixed but broadly constructive canvas, the overarching context remains fragile: geopolitical tensions continue to inject tail risks via trade realignments, sanctions regimes and sporadic supply chain disruptions; the inflation path is still uncertain, leaving room for policy rate volatility and term premium swings that can unsettle duration sensitive assets; equity valuations, flattered by liquidity and earnings resilience, are elevated in pockets and therefore more vulnerable to disappointments; and technology led disruption, while a long run productivity driver, raises near term execution risk for incumbents across multiple sectors. Put together, these forces argue for selectivity rather than wholesale risk on: lean into beneficiaries of grid and electrification capex, favour quality balance sheets in cyclicals, stay disciplined on price makers in critical materials, and maintain adequate liquidity and hedges, as the probability of episodes of heightened volatility and sharp corrections remains materially above average even in an environment of intact structural growth trends.

2.1.8. Future policy

We expect broadly the same themes to persist in the near to medium term as those observed last year, chiefly because the forces in play are structural and material shifts in the economy and society—irreversible changes that will reshape how we work, produce and live over the coming decade. In that context, the energy transition will again be a defining motif: electricity consumption continues to rise while years of underinvestment have left power grids in need of substantial reinforcement, implying another phase of capital outlays in transmission, distribution and system flexibility. Complementing this, the rapid build out of battery storage—at both utility scale and behind the meter—and the continued adoption of electric vehicles add a durable tailwind by deepening electrification and smoothing the intermittency of renewables. As a result, producers of raw materials and adjacent industries should remain well supported by structurally growing demand for critical inputs across technology, industrial applications and defence, while governments, increasingly alert to the strategic importance of secure supply, move to safeguard access through stockpiles, offtake agreements and incentives for domestic processing. The re industrialisation of the West is likely to reinforce these trends, channelling support to specific segments such as North American transport operators benefiting from reshoring driven freight flows, companies providing automation and robotics solutions that lift productivity amid tight labour markets, and locally anchored materials businesses that feed revitalised manufacturing ecosystems. Should economic growth re accelerate as many economists currently anticipate, cyclical sectors—most notably chemicals, construction and transportation—could see operating results improve after several challenging years, sustaining the market's ongoing rotation toward cyclicals as earnings momentum normalises. Finally, financial institutions are poised to continue benefiting from prevailing market dynamics, with rate structures and capital market activity supporting income generation and balance sheet resilience. Even so, the risk of sharp corrections remains elevated: an escalation in geopolitical flashpoints could disrupt trade and sentiment; increased use of leverage and pockets of speculative positioning across equity markets may amplify drawdowns; and valuations, already full in several areas, leave little margin for error. In sum, the opportunity set is real and widening, but it warrants selectivity, disciplined risk management and an appreciation for the asymmetry of today's macro financial landscape.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares CSOB CZK: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Czech Koruna, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares K&H HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Monthly average of total assets	193,936,493.09	202,378,118.21	198,279,901.87
Turnover rate	8.68%	12.59%	21.34%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions. A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio. Active asset management may result in high turnover rates (monthly percentage >50%).

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[NIW(D) / NIW(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[NIW(D) / NIW(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 8,3298 net (11,8998 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 13.977,09 EUR and for the Management Company 5.590,83 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 0 and 3, with a market value fluctuating between 0 and 7410665.75 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	Nil	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
Nil	Nil	Nil	Nil	Nil

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	Nil.	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	Nil.	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	Nil.	Nil.	Nil.

collateral	quality	currency	Maturity tenor
Nil	Nil	Nil	Nil

Data on reuse of collateral:

1) Share of collateral received that is reused, compared to the maximum amount specified in the prospectus or in the disclosure to investors;	Nil
2) Cash collateral reinvestment returns to the collective investment undertaking. (EUR)	Nil

Safekeeping of collateral received by the collective investment undertaking as part of SFTs and total return swaps:

1) Number and names of custodians and the amount of collateral assets safe-kept by each of the custodians.

<u>number</u>	<u>Name collateral custodian</u>	<u>Market value on a settled basis</u>	<u>currency</u>
Nil	Nil	Nil	Nil

Safekeeping of collateral granted by the collective investment undertaking as part of SFTs and total return swaps:

1) The proportion of collateral held in segregated accounts or in pooled accounts, or in any other accounts.	Nil

Data on return and cost for each type of SFTs and total return swaps:

1) Data on return and cost for each type of SFTs and total return swaps broken down between the collective investment undertaking, the manager of the collective investment undertaking and third parties (e.g. agent lender) in absolute terms and as a percentage of overall returns generated by that type of SFTs and total return swaps.

Lending program: equity (Goldman Sachs)	collective investment undertaking	manager of the collective investment undertaking	agent lender
return EUR	21.503,21	5.590,83	1.935,29
percentage of overall returns	100,00 %	26,00%	9,00%
cost EUR	7.526,12		
percentage of overall returns	35,00 %		

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund We Shape Responsible Investing

Legal entity identifier:
549300NUY6EEDJE32R83

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.94% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 28.94% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 71.06% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmarks: 20% MSCI All Countries World Materials - Net Return Index and 55% MSCI All Countries World Industrials - Net Return Index and 25% MSCI All Countries World Financials - Net Return Index.	22.67	19.93	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark 20% MSCI All Countries World Materials - Net Return Index; 55% MSCI All Countries World Industrials - Net Return Index; 25% MSCI All Countries World Financials - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund We Shape Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: 20% MSCI All Countries World Materials - Net Return Index; 55% MSCI All Countries World Industrials - Net Return Index; 25% MSCI All Countries World Financials - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	164.55	116.25	Yes
Minimum % Sustainable Investments	A minimum of 15.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	15	28.94	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 15% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	15	23.28	Yes
Minimum % Sustainable Investments with a social objective	Minimum 0% sustainable investments with a social objective.	0	1.23	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of

the general annual report.
No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	20.04	20.52	19.93
Greenhouse gas intensity	98.72	116.90	116.25
Sustainable Investments	85.85	28.75	28.94
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	22.53	23.28
Sustainable Investments with a social objective (%)	50.92	1.63	1.23
Assets promoting E/S characteristics (%)	100.21	100.00	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 28.94% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Daarnaast kon KBC Asset Management NV op advies van de Responsible Investing Advisory Board het label 'duurzame ontwikkeling' toekennen aan de instrumenten.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the greatest proportion of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
JPMORGAN CHASE & CO	Banking	5.10%	United States of America
mitsubishi UFJ FINANCIAL GRO	Banking	3.15%	Japan
LINDE PLC	Materials	2.98%	Ireland
BANK OF AMERICA CORP	Banking	2.69%	United States of America
SCHNEIDER ELECTRIC SE	Industrial Products	2.00%	France
ROYAL BANK OF CANADA	Banking	1.99%	Canada
HITACHI LTD	Industrial Products	1.64%	Japan
AUTOMATIC DATA PROCESSING	Industrial Services	1.62%	United States of America
DEERE & CO	Industrial Products	1.56%	United States of America
WASTE MANAGEMENT INC	Industrial Services	1.35%	United States of America
TRANE TECHNOLOGIES PLC	Industrial Products	1.33%	Ireland
TESLA INC	Consumer Discretionary Products	1.26%	United States of America
HSBC HOLDINGS PLC	Banking	1.22%	United Kingdom
INTESA SANPAOLO	Banking	1.16%	Italy
CRH PLC	Materials	1.14%	Ireland

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 28.94%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund We Shape Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Shape Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

23.28% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 4.42% are environmentally sustainable investments (taxonomy-aligned) and 1.23% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Banking	36.03%
Industrial Products	24.18%
Industrial Services	16.53%
Materials	16.45%
Consumer Discretionary Products	2.24%
Retail & Wholesale - Discretionary	1.48%
Tech Hardware & Semiconductors	1.21%
Financial Services	0.99%
Software & Tech Services	0.47%
Utilities	0.23%
Health Care	0.15%
Renewable Energy	0.04%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 4.42% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The subfund invests primarily in shares of companies that are shaping the society of the future through their products and services, such as:

- Automation and robotisation
- Solutions for energy transition and storage
- Infrastructure and installations for transport and freight vehicles
- Facilities needed in a circular economy
- Water purification, soil decontamination and air quality improvement
- Machines and installations for more efficient agriculture and forestry
- Industrial plants and machines
- Building materials and construction activities
- Materials
- Logistical solutions
- Credit facilities and financial services to companies and governments
- Etc.

A current overview can be found at www.kbc.be/thematic-funds

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.33%.

The proportion of investments in enabling activities was 1.72%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 4.42%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 28.94% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 23.28%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 1.23%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund We Shape Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with sustainability principles by not meeting the sustainability criteria or are exposed to controversial

regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World Materials - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk.** Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests directly or indirectly in shares and/or share-related investment that may come from any region, sector or theme.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('**indicator 14**'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('**indicator 10**').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('**indicator 1**'), carbon footprint ('**indicator 2**'), greenhouse gas intensity of investee companies ('**indicator 3**'), exposure to fossil fuel companies ('**indicator 4**') and gender diversity on the board of directors ('**indicator 13**').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will to a large extent be similar to that of the benchmark.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 2.50%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund was and is invested in a selection of shares from a global universe. It follows the KBC AM strategy.

2.1.8. Future policy

In the future, the fund will continue to invest in equities across the global universe, in line with the KBC AM strategy.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 3 122.47 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

2.4.2. Changes in the composition of the assets of KBC Equity Fund World (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	1,158,136,294.07	785,321,199.68	1,943,457,493.75
Sales	1,720,783,807.05	725,602,148.85	2,446,385,955.90
Total 1	2,878,920,101.12	1,510,923,348.53	4,389,843,449.65
Subscriptions	464,976,544.67	606,936,126.95	1,071,912,671.62
Redemptions	1,019,656,033.03	551,520,880.64	1,571,176,913.67
Total 2	1,484,632,577.70	1,158,457,007.59	2,643,089,585.29
Monthly average of total assets	2,213,991,426.22	2,111,042,858.61	2.161.022.038.73
Turnover rate	62.98%	16.70%	80.83%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{[1 / X]} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{[1 / F]} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

i = 1 ... N

from which C = C0 * * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 6,1901 net (8,8430 gross).

2.4.6. Costs

Ongoing Charges:

Classic Shares Capitalisation :

Management fees and other administrative or operating costs: 1,754%

Transaction costs: 0,272%

Classic Shares Distribution :

Management fees and other administrative or operating costs: 1,624%

Transaction costs: 0,272%

Institutional B Shares Capitalisation :

Management fees and other administrative or operating costs: 0,477%

Transaction costs: 0,272%

Percentage calculated at reporting date: 31 December 2025 .

A more detailed explanation with respect to the method of calculating ongoing charges and the relevant exclusions can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.5. Ongoing charges'

Existence of Commission Sharing Agreements

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.7. Commission Sharing Agreements'.

No CSA accrual during this period.

Existence of fee sharing agreements and rebates

The management company has shared 53,68% of its fee with the distributor, and institutional and/or professional parties.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.6. Fee-sharing agreements and rebates'.

2.4.7. Notes to the financial statements and other data

Classic Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. (*) The fee for the management of the investment portfolio of the undertakings for collective investment in which the sub-fund invests will amount to a year.
Administration fee	0.10%	per year calculated on the basis of the average total net assets of the sub-fund.
Fee for financial services	Max 950 EUR	per year. However, the fee will never exceed a maximum of 0.005% calculated on the basis of the average total net assets of the sub-fund.
Custodian's fee	Max 0.04%	per year and calculated monthly on the basis of the value of the securities held in custody by the custodian on the last banking day of the preceding month, except on those assets invested in underlying undertakings for collective Investment managed by a financial institution of the KBC group.
Fee paid to the bevek's statutory auditor	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Fee paid to the directors	A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.8. Recurrent fees and charges'.	
Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation)	0.10%	of the net assets of the sub-fund per year.

Institutional B Shares

Fee for managing the investment portfolio	Max 1.60%	per year calculated on the basis of the average total net assets of the sub-fund, no management fee is charged on assets invested in underlying undertakings for collective investment managed by a financial institution of the KBC group. Annual tax	See prospectus General Part : 'Information concerning the Bevek - H. Tax treatment'	
Other charges (estimation) such as the regulator's fees, the cost of publication and any marketing costs	0.10%	of the net assets of the sub-fund per year.

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 51.337,16 EUR and for the Management Company 20.534,86 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 3 and 34, with a market value fluctuating between 526854.99 and 25921078.79 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KfW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Overview of securities lent as at 31/12/2025

For the valuation of the collateral received, indicative prices have been used in this detail list by the Collateral Management Division of KBC Bank

The amount in securities lent on a traded basis, as given in the annual report, can differ from the amount in securities lent on a settled basis.

The position held as collateral is determined on the basis of the settled positions.

Transparency of securities financing transactions and of reuse

Global data:

1) The amount of securities and commodities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents;	0,39	%
2) The amount of assets engaged in each type of SFT's and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency) and as a proportion of the collective investment undertaking's assets under management (AUM).		
The amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount (in the collective investment undertaking's currency)	8.608.812,06	EUR
proportion of the collective investment undertaking's assets under management (AUM)	0,39	%

Concentration data:

1) Ten largest collateral issuers across all SFTs and total return swaps (break down of volumes of the collateral securities and commodities received per issuer's name

name collateral issuer	Market value on a settled basis	currency
Kingdom of Belgium	7.954.168,00	EUR
Kreditanstalt fuer Wiederaufbau	804.777,00	EUR
Kingdom of Spain	324.847,00	EUR
French Republic	201.388,00	EUR
United Kingdom of Great Britai	173.201,00	EUR

2) Top 10 counterparties of each type of SFTs and total return swaps separately (Name of counterparty and gross volume of outstanding transactions).

type SFT (lending program)	name counterparty	Country of counterparty	Market value on a settled basis	currency
equity (Goldman Sachs)	BARCLAYS CAPITAL SECURITIES LTD., LONDON	UK	0,00	EUR
equity (Goldman Sachs)	BNP Paribas Financial Markets	France	0,00	EUR
equity (Goldman Sachs)	Merrill Lynch International	UK	0,00	EUR
equity (Goldman Sachs)	Citigroup Global Markets Limited	UK	0,00	EUR

Aggregate transaction data for each type of SFTs and total return swaps separately to be broken down according to the below categories:

1) Type and quality of collateral;	equity (Goldman Sachs)	equity(KBC Bank)	bonds (Société Générale)
type	bonds	Nil.	Nil.
quality – Bloomberg composite rating: see table below			
2) Maturity tenor of the collateral broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open maturity: see table below;			
3) Currency of the collateral: see table below			
4) Maturity tenor of the SFTs and total return swaps broken down in the following maturity buckets: less than one day, one day to one week, one week to one month, one to three months, three months to one year, above one year, open transactions;	open maturity	Nil.	Nil.
5) Country in which the counterparties are established: see table above			
6) Settlement and clearing (e.g., tri-party, Central Counterparty, bilateral).	tri-party	Nil.	Nil.

collateral	quality	currency	Maturity tenor
FRENCH REPUBLIC GO 0.5 25JUN44 144A	NR	EUR	above one year

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main object of this sub-fund is to generate the highest possible return for its shareholders by investing directly in transferable securities. This is reflected in its pursuit of capital gains and income. To that end, the assets are invested primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments in so far as permitted by the applicable laws and regulations and consistent with the object referred to above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in a worldwide selection of shares.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

The investments underlying this sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR") through the General exclusion Policy and implicitly through the Proxy Voting and Engagement Policy.

The principal adverse impacts on sustainability taken into account through the General exclusion policy were exposure to controversial weapons ('indicator 14'), exposure to companies active in the fossil fuel sector ('indicator 4') and Violations of the principles of the UN Global Compact or the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises ('indicator 10').

The principal adverse impacts on sustainability implicitly taken into account through KBC Asset Management Group's the Proxy Voting and Engagement Policy were greenhouse gas emissions ('indicator 1'), carbon footprint ('indicator 2'), greenhouse gas intensity of investee companies ('indicator 3'), exposure to fossil fuel companies ('indicator 4') and gender diversity on the board of directors ('indicator 13').

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI World-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The benchmark is also used to assess the performance of the sub-fund.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. No MSCI Party nor any other party involved in or related to compiling, computing or creating the MSCI data, makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund was and is invested in a selection of shares from a global universe. It follows the KBC AM strategy. The stock selection also meets the legal criteria for FDI.

2.1.8. Future policy

In the future, the fund will continue to invest in equities across the global universe, in line with the KBC AM strategy. Compliance of stock selection with the legal FDI criteria also remains valid in the future.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.

- a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.4.2. Changes in the composition of the assets of KBC Equity Fund World DBI-RDT (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	151,428,189.29	111,312,709.84	262,740,899.13
Sales	155,537,209.33	93,016,694.39	248,553,903.73
Total 1	306,965,398.62	204,329,404.23	511,294,802.85
Subscriptions	90,714,908.65	46,856,539.61	137,571,448.26
Redemptions	43,398,629.38	30,186,745.33	73,585,374.71
Total 2	134,113,538.03	77,043,284.94	211,156,822.97
Monthly average of total assets	307,287,121.80	346,647,846.80	327.539.113.09
Turnover rate	56.25%	36.72%	91.63%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals and (3) changes to the DBI universe. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 02/04/2026: 12,0472 net (17,2103 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Beveik of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Beveik's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Beveik.

2.1.2. Stock exchange listing

Not applicable.

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, deposits, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.
The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Strategy selected

At least 95% of the assets are invested in a worldwide selection of shares.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the "**Responsible Investing Advisory Board**") comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. 'sustainable investments').

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector ('SFDR'). More information on how the sub-fund promotes environmental and social characteristics can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry, weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe.

These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an

ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI World - Net Return index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI World - Net Return index and a reduction of 50% by 2030 compared to the benchmark MSCI World - Net Return index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund World DBI-RDT Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI World-Net Return index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.00%. The tracking error measures the volatility of the fund's return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Source: MSCI. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

The sub-fund may not lend any financial instruments.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Beveik under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In accordance with the established strategy, the fund was and is invested in a selection of shares from a global universe. The KBC AM strategy is followed. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly. Finally, the stock selection also meets the legal FDI criteria.

2.1.8. Future policy

In the future, the fund will continue to invest in equities across the global universe, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy and the statutory FDI criteria remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Corporate Wealth shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by

- movements in exchange rates.
 - a high level of market risk: the level of the risk reflects the volatility of the stock market.
 - a high level of performance risk: the level of the risk reflects the volatility of the stock market.
- There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 0.00 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

**2.4.2. Changes in the composition of the assets of KBC Equity Fund
World DBI-RDT Responsible Investing (in Euro)**

	1 st half of year	2 nd half of year	Year
Purchases	88,826,278.34	54,327,090.36	143,153,368.70
Sales	79,341,767.79	48,070,065.95	127,411,833.74
Total 1	168,168,046.13	102,397,156.30	270,565,202.44
Subscriptions	43,705,813.33	23,558,859.52	67,264,672.85
Redemptions	16,509,027.09	17,759,147.64	34,268,174.73
Total 2	60,214,840.42	41,318,007.16	101,532,847.58
Monthly average of total assets	183,478,326.72	206,723,181.77	195,438,335.13
Turnover rate	58.84%	29.55%	86.49%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework and 4) changes to the DBI universe. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:

KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.3. Amount of commitments in respect of financial derivatives positions

Nil

2.4.4. Changes in the number of subscriptions and redemptions and the net asset value

2.4.5. Performance figures

Classic Shares

BE6321630434

KBC Equity Fund World DBI-RDT Responsible Investing Classic Shares DIS

Annual performance compared to the benchmark from 01/01/2021 through 31/12/2025 (in EUR)

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6321630434	EUR	4.99%	6.77%	14.79%	17.36%	9.54%	13.08%			29/06/2020	10.08%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * NIW(D) / NIW(Y)]^{1/X} - 1$$

where Y = D-X

Return on date D since the start date S of the unit:

$$[C * NIW(D) / NIW(S)]^{1/F} - 1$$

where F = 1 if the unit has existed for less than one year on date D

where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$Ci = [Wi / NIW(Di)] + 1$$

i = 1 ... N

from which C = C0 * ... * CN.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for distribution shares.

Dividend on ex-dividend date 02/04/2026: 10,0393 net (14,3419 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Beveik of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Beveik's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Beveik.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund World DBI-RDT Responsible Investing

Legal entity identifier:
875500EU7S8IEP3KKL21

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ **Yes**

☒ ☐ ☒ **No**

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.68% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 32.68% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 67.32% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI World - Net Return index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI World - Net Return index.	20.40	18.96	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI World - Net Return index as described in the prospectus under the title 'information concerning the sub-fund World DBI-RDT Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI World - Net Return index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	80.65	43.88	Yes
Minimum % Sustainable Investments	A minimum of 20.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	20	32.68	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	20.91	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	11.65	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	100.00	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.43	19.33	18.96
Greenhouse gas intensity	36.75	35.90	43.88
Sustainable Investments	76.74	31.28	32.68
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	17.73	20.91
Sustainable Investments with a social objective (%)	47.56	13.27	11.65
Assets promoting E/S characteristics (%)	100.23	99.97	100.00

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 32.68% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 32.68%.

Asset allocation
describes the
share of
investments
in
specific assets.

What was the asset allocation?

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund World DBI-RDT Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 100.00% in assets that promote environmental or social characteristics and 0.00% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives could be used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund World DBI-RDT Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

20.91% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.13% are environmentally sustainable investments (taxonomy-aligned) and 11.65% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	16.80%
Health Care	13.55%
Software & Tech Services	12.56%
Media	12.48%
Banking	9.72%
Financial Services	7.65%
Retail & Wholesale - Discretionary	4.79%
Insurance	4.52%
Materials	3.99%
Consumer Staple Products	3.00%
Consumer Discretionary Products	2.68%
Industrial Services	2.20%
Real Estate	2.15%
Telecommunications	1.55%
Industrial Products	1.50%
Retail & Wholesale - Staples	0.58%
Utilities	0.20%
Consumer Discretionary Services	0.07%
Renewable Energy	0.01%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.13% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

At least 95% of the assets are invested in a worldwide selection of shares.

The fund invests a minimum of 50% in shares whose dividends and capital gains are eligible for the system of 'dividend received deduction' (DRD).

Under normal circumstances, however, the sub-fund will aim to invest between 70% and 100% in shares whose dividends and capital gains qualify for the DRD regime.

This means that it is possible that the equity portfolio will not be fully invested in equities whose capital gains and dividends qualify for the DRD regime.

As a result, income distributed by the sub-fund may not be 100% eligible for the dividend received deducted.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.02%.

The proportion of investments in enabling activities was 0.12%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.13%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 32.68% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 20.91%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 11.65%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund World DBI-RDT Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under "#2 Other", there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI World-Net Return index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

● ***How did the reference benchmark differ from a broad market index?***

Not applicable.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

● ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

● ***How did this financial product perform compared with the broad market index?***

2.1.3. Goal and key principles of the investment policy

Object of the sub-fund

The main objective of this sub-fund is to generate the highest possible return for its shareholders by investing directly or indirectly in transferable securities. This is reflected in its pursuit of capital gains and income. To this end, the assets are invested, either directly or indirectly via correlated financial instruments, primarily in shares.

Sub-fund's investment policy

Permitted asset classes

The sub-fund may invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described above.

The sub-fund shall invest no more than 10% of its assets in units of other undertakings for collective investment.

Restrictions of the investment policy

The investment policy will be implemented within the limits set by law and regulations.

The sub-fund may borrow up to 10% of its net assets, insofar as these are short-term borrowings aimed at solving temporary liquidity problems.

Permitted derivatives transactions

Derivatives can be used both to achieve the investment objectives and to hedge risks.

Listed and unlisted derivatives may be used to achieve the objectives: these may be forward contracts, futures, options or swaps on securities, indexes, currencies or interest rates or other transactions involving derivatives. Unlisted derivatives transactions will only be concluded with prime financial institutions specialised in such transactions.

Subject to the applicable laws and regulations and the articles of association, the sub-fund always seeks to conclude the most effective transactions. All costs associated with the transactions will be charged to the sub-fund and all income generated will be paid to the sub-fund.

If the transactions result in a risk in respect of the counterparty, this risk can be hedged by using a margin management system that ensures that the sub-fund is the beneficiary of security (collateral) in the form of liquid instruments, such as, for instance, cash or investment grade bonds. The relationship with the counterparty or counterparties is governed by standard international agreements.

Derivatives may also be used to hedge the assets of the sub-fund against open exchange rate risks in relation to the currency in which the sub-fund is denominated.

Where derivatives are used, they must be easily transferable and liquid instruments. Using derivatives does not, therefore, have a negative impact on liquidity risk. The use of derivatives may, however, affect the spread of the portfolio across regions, sectors or themes. **Consequently, there may be an impact on concentration risk. Derivatives may not be used to protect capital, either fully or partially. They neither increase nor decrease capital risk. In addition, using derivatives has no negative impact on credit risk, settlement risk, custody risk, flexibility risk or inflation risk or risk dependent on external factors.**

The UCITS may conclude contracts that entail a credit risk in respect of issuers of debt instruments. Credit risk is the risk that the issuer of the debt instrument will default. This credit risk relates to parties whose creditworthiness at the time the contract is concluded is equal to that of the issuers whose debt instruments the UCITS can hold directly. Credit derivatives may possibly be used both to carry out the investment objectives and to cover the credit risk, but solely within the existing risk profile and without implying any shift to less creditworthy debtors than those the UCITS can invest in.

Strategy selected

The sub-fund invests primarily in a worldwide selection of shares from any region, sector or theme.

Information related to Responsible Investing

Within the above limits, the sub-fund pursues responsible investment objectives based on a dualistic approach: a negative screening and a positive selection methodology.

KBC Asset Management NV has a team of specialist researchers responsible for this dualistic approach. They are assisted by an independent advisory board (the “**Responsible Investing Advisory Board**”) comprised of up to twelve persons, who are not affiliated to KBC Asset Management NV, and whose sole responsibility is to supervise the dualistic approach and activities of the specialist researchers. The secretariat of the advisory board is handled by a representative of KBC Asset Management NV. Moreover, KBC Asset Management NV works with data suppliers with expertise in Responsible Investing that provide data to the specialized researchers, who process and complete the data with publicly available information (including annual reports, press publications, etc.).

The sub-fund promotes a combination of environmental and/or social characteristics and, even though it does not have sustainable investments as an objective, it shall invest a minimum proportion of its assets in economic activities that contribute to the achievement of environmental or social objectives (i.e. ‘sustainable investments’).

The companies in which it invests must follow good governance practices.

The sub-fund is compliant with the transparency obligations of article 8(1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and/or social characteristics can be found in the ‘Annex for KBC Equity Fund World Responsible Investing’ of this Annual Report. This annex refers specifically to the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

The sub-fund is compliant with the transparency obligations of article 11 (1) of Regulation (EU) 2019/2088 of the European Parliament and of the council of 27 November 2019 on sustainability-related disclosures in the financial services sector (‘SFDR’). More information on how the sub-fund promotes environmental and social characteristics can be found in the ‘Annex for KBC Equity Fund World Responsible Investing’ of this annual report. This annex specifically covers the periodic reports for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852.

Negative screening

In practical terms the end result of this negative screening procedure is that the sub-fund excludes companies in advance from the Responsible Investment universe which fall foul of the exclusion policy available on www.kbc.be/investment-legal-documents > Exclusion policy for Responsible Investing funds.

The application of these policies means that companies involved in such activities like the tobacco industry,

weapons, gambling and adult entertainment are excluded from the sub-fund's investment universe. This screening also ensures that companies who seriously violate fundamental principles of environmental protection, social responsibility and good governance are excluded from the sub-fund's investment universe. These negative screening principles are not exhaustive and may be adapted from time to time under the supervision of the Responsible Investing Advisory Board.

Positive selection methodology

Within the defined investment universe and other limits described above, the responsible investment objectives of the sub-fund are the following:

- (1) promote the integration of sustainability into the policy decisions of companies by preferring companies with a better **ESG risk score**, where ESG stands for 'Environmental, Social and Governance', and
- (2) promote climate change mitigation, by preferring companies with lower **Greenhouse Gas Intensity**, with the objective of meeting a predetermined Greenhouse Gas intensity target;
- (3) support sustainable development, through 'sustainable investments' in accordance with art. 2(17) SFDR. Sustainable investments will consist of investments in companies contributing to the achievement of the **UN Sustainable Development Goals** (plus instruments awarded the 'sustainable development' label by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board).

More information on the investment policy for Responsible Investing funds is available at www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

(1) ESG-risk score

The contribution to the integration of sustainability into policy decisions of the companies is measured based on an ESG-risk score. This score represents the aggregated performance assessment of a given company against a series of ESG criteria which are grounded to the extent possible against objective measures. The main factors underpinning the ESG criteria are:

- respect for the environment (e.g., reduction in greenhouse gas emissions);
- attention to society (e.g., employee working conditions); and
- corporate governance (e.g., independence and diversity of the board of directors).

At least 90% of the corporate investments in the portfolio, as measured by assets under management, must have an ESG risk score. The ESG risk score for companies is an ESG risk score supplied by a data provider.

These lists are not exhaustive and may be changed under the supervision of the Responsible Investing Advisory Board.

To achieve this objective, the ESG-risk score of the portfolio for companies is compared to following benchmark: MSCI All Countries World - Net Return Index.

To calculate the ESG-risk score at portfolio level, the weighted average of the ESG (risk) scores of the positions in the sub-fund are taken into account. Technical items such as cash and derivatives are not taken into account and also companies or countries for which no data is available are left out. The weights used in the calculation depend on the size of the positions in the sub-fund, rescaled for these items.

More information on the ESG-risk score and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

The targets can be revised upwards or downwards.

(2) Greenhouse Gas Intensity

The objective to promote climate change mitigation, by favoring lower greenhouse gas intensity companies, with the goal of meeting a predetermined greenhouse gas intensity target covers at least 90% of the portfolio. The objective does not apply to companies for which data is not available.

The contribution of companies to climate change mitigation is measured based on their greenhouse gas intensity. Greenhouse gas intensity is defined as absolute greenhouse gas emissions (in tonnes CO₂ equivalent), divided by revenues (in mln USD).

The sub-fund's target in terms of greenhouse gas intensity is assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark MSCI All Countries World - Net Return Index and a reduction of 50% by 2030 compared to the benchmark MSCI All Countries World - Net Return Index in 2019.

More information on Greenhouse Gas Intensity and the concrete goals of the sub-fund can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

The targets may be revised upwards or downwards.

(3) UN Sustainable Development Goals

To support sustainable development, the sub-fund commits to invest a minimum proportion of the portfolio in companies that contribute to the UN Sustainable Development Goals. The UN Sustainable Development Goals include both social and environmental objectives.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

Instruments of companies that meet these requirements are designated as "sustainable investments," according to Article 2(17) SFDR.

In addition, KBC Asset Management NV can award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board. In that case, these investments shall also qualify as "sustainable investments," according to Article 2(17) SFDR.

More information about the methodology used to qualify investments as investments which contribute to the UN Sustainable Development Goals can be found in the 'Annex for KBC Equity Fund World Responsible Investing' to the prospectus.

Potential Exceptions

It cannot be ruled out, however, that very limited investments may be made temporarily in assets that do not meet the above criteria. The reasons for this include the following:

- Developments as a result of which a company can no longer be regarded as eligible after purchase;
- Corporate events, such as a merger of one company with another, where the merged company can no longer be considered an eligible company based on the above criteria;
- Incorrect data as a result of which assets are invested (unintentionally and erroneously) in assets purchased when it should not have been eligible for the sub-fund;
- A planned update of the screening criteria as a result of which assets should be excluded from the sub-fund, but which the management company chooses to refrain from selling immediately in the best interest of the customer;
- External circumstances such as market movements and updates of external data can lead to investment solutions failing to achieve the abovementioned targets.

In these cases, the fund manager will replace the assets concerned with more appropriate assets as soon as possible, always taking into account the sole interest of the investor.

In addition, for the purpose of efficient portfolio management, the fund manager may to a significant degree use derivatives relating to assets that would not be eligible for inclusion in the sub-fund, in so far as there is no serviceable and comparable alternative available on the market. In addition, the counterparties with which the derivative transactions are entered into may not necessarily be issuers having a responsible nature.

Taxonomy related information

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework. ("Taxonomy aligned investments"). Although the sub-fund does not aim to invest in Taxonomy aligned investments, it cannot be excluded that the sub-fund does contain Taxonomy aligned investments.

The percentage invested in Taxonomy aligned investments is a weighted quarterly average and includes investments in companies with at least 20% of revenue aligned with the EU Taxonomy framework (based on data from Trucost). The actual percentage invested in Taxonomy aligned investments can be found in the 'Annex for KBC Equity Fund World Responsible Investing'.

Transparency of adverse sustainability impacts

The sub-fund took into account the principal adverse impacts of its investment decisions on sustainability factors ("PAI"), as described in the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on Sustainability Disclosures in the Financial Services Sector ("SFDR").

The principal adverse impacts on sustainability factors were explicitly taken into account through the general exclusion policy for conventional funds and Responsible Investing funds and the exclusion policy for Responsible Investing funds. In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy.

More information on the principal adverse impact indicators taken into account can be found in the 'Annex for KBC Equity Fund World Responsible Investing'.

More information on how the sub-fund aims to consider the principal adverse impacts on sustainability factors can also be found in the 'Annex for KBC Equity Fund World Responsible Investing'.

Benchmark information

The fund is actively managed with reference to the following benchmark: MSCI All Countries World - Net Return Index.

However, it is not the aim of the fund to replicate the benchmark. The composition of the benchmark is taken into account when compiling the portfolio.

In line with its investment policy, the sub-fund may not invest in all the instruments included in the benchmark.

When compiling the portfolio, the manager may also decide to invest in instruments that are not included in the benchmark, or indeed not to invest in instruments that are included.

The composition of the portfolio will vary from that of the benchmark, as the composition of the benchmark is not fully consistent with the environmental and/or social characteristics promoted by the sub-fund. The use of the benchmark does not detract from the responsible character of the portfolio. The responsible character is guaranteed by the aforementioned Responsible Investing methodology.

The benchmark is also used to determine the fund's risk limitation mechanism. This limits the extent to which the fund's return may deviate from the benchmark.

The longterm expected tracking error for this fund is 3.50%. The tracking error measures the volatility of the fund's

return relative to that of the benchmark. The higher the tracking error, the more the fund's return fluctuates relative to the benchmark. Market conditions may cause the actual tracking error to differ from the expected tracking error.

Required disclaimers for benchmark providers:

Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates, or any third party involved in compiling, computing, or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

Volatility of the net asset value

The volatility of the net asset value may be high due to the composition of the portfolio.

Securities Financing Transactions (SFTs)

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.1. Securities Financing Transactions (SFTs)'.

General strategy for hedging the exchange risk

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.2. General strategy for hedging the exchange rate risk'.

Social, ethical and environmental aspects

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.3. Social, ethical and environmental aspects'.

2.1.4. Financial portfolio management

There is no delegation of the management of the asset allocation.

2.1.5. Distributors

KBC Asset Management NV, Havenlaan 2, 1080 Brussels.

2.1.6. Index and benchmark

See 'Sub-fund's investment policy'.

2.1.7. Policy pursued during the financial year

In line with the adopted strategy, the fund has been and continues to be invested in a selection of equities from a global universe. The fund's strategy is also in line with the SRI strategy and the fund's assets are invested accordingly.

2.1.8. Future policy

In the future, the fund will continue to invest in equities across the global universe, in line with the KBC AM strategy. Compliance with the sustainability aspect of the strategy remains valid going forward.

2.1.9. Summary risk indicator (SRI)

Classic Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Institutional B Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.

- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

Discretionary Shares: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Euro, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.

There is no capital protection.

Classic Shares K&H HUF: 4 on a scale of 1 (lowest risk) to 7 (highest risk)

- a high level of exchange rate risk: since there are investments in securities that are denominated in currencies other than the Hungarian Forint, there is a considerable chance that the value of an investment will be affected by movements in exchange rates.
- a high level of market risk: the level of the risk reflects the volatility of the stock market.
- a high level of performance risk: the level of the risk reflects the volatility of the stock market.
There is no capital protection.

A more detailed explanation can be found in this report's General information on the Bevek under 'Information for shareholders – 1.2.1.4. Summary risk indicator'

The summary risk indicator gives an idea of the risk associated with investing in an undertaking for collective investment or a sub-fund. It measures risk on a scale of one (least risk) to seven (most risk).

2.1.10. Leveraged finance

The total amount of leveraged finance used by the sub-fund is 4 442.90 EUR.

This amount was calculated by multiplying the leverage ratio calculated using the UCITS-commitment method by the sub-fund's total assets under management.

2.1.11. Value-at-Risk

Not applicable

2.2. Balance sheet

Balance sheet layout		31/12/2025 (in Euro)	31/12/2024 (in Euro)

2.4.2. Changes in the composition of the assets of KBC Equity Fund World Responsible Investing (in Euro)

	1 st half of year	2 nd half of year	Year
Purchases	2,026,185,633.20	1,329,637,452.04	3,355,823,085.24
Sales	1,565,353,074.11	896,569,497.49	2,461,922,571.59
Total 1	3,591,538,707.30	2,226,206,949.53	5,817,745,656.83
Subscriptions	1,091,769,774.57	687,082,368.06	1,778,852,142.63
Redemptions	550,950,124.51	254,700,221.28	805,650,345.79
Total 2	1,642,719,899.08	941,782,589.34	2,584,502,488.42
Monthly average of total assets	2,886,597,514.28	3,590,895,023.91	3,248,974,656.16
Turnover rate	67.51%	35.77%	99.52%

The table above shows the capital volume of portfolio transactions. This volume (adjusted to take account of total subscriptions and redemptions) is also compared to the average net assets at the beginning and end of the period.

A figure close to 0% implies that the transactions relating to the securities or transactions relating to the assets (excluding deposits and cash) in a given period only involve subscriptions and redemptions.

A negative percentage shows that subscriptions and redemptions entailed few, if any, transactions in the portfolio.

Active asset management may result in high turnover rates (monthly percentage >50%), reason: The fund is regularly rebalanced to reflect (1) strategic decisions and (2) the impact of updated quantitative input signals (3) updates of the applicable RI framework. Turnover can exceed 200% (two way figures) on annual basis when market circumstances demand regular intervention.

The detailed list of transactions can be consulted free of charge at the company designated as financial service:
KBC Bank NV, Havenlaan 2, B-1080 Brussels

2.4.5. Performance figures

Classic Shares

BE6307728129
KBC Equity Fund World Responsible Investing Classic Shares CAP
Annual performance compared to the benchmark from 01/01/2018 through 31/12/2025 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Curr ency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
CAP	BE6307728129	EUR	6.40%	7.86%	14.71%	16.86%	9.04%	12.11%			05/11/2018	6.65%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Classic Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage.
- Calculation method for date D, where NAV stands for net asset value:
Capitalisation units (CAP)
Return on date D over a period of X years :

$$\left[\frac{NIW(D)}{NIW(Y)} \right]^{1/X} - 1$$
 where Y = D-X
 Return on date D since the start date S of the unit:

$$\left[\frac{NIW(D)}{NIW(S)} \right]^{1/F} - 1$$
 where F = 1 if the unit has existed for less than one year on date D
 where F = (D-S) / 365.25 if the unit has existed for longer than one year on date D
- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation shares.

Institutional B Shares

BE6307729135

KBC Equity Fund World Responsible Investing Discretionary Shares DIS

Annual performance compared to the benchmark from 01/01/2023 through 31/12/2025 (in EUR)

There is insufficient data for this year to give investors a useful indication of past performance.

* These performances were achieved under circumstances that no longer apply

Cap Div	ISIN Code	Currency	1 year		3 years		5 years		10 years		Since Launch*	
			Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Share classes	Bench mark	Starting date	Share classes
DIS	BE6338756974	EUR	6.33%	7.86%		16.86%					10/01/2023	12.46%

Risk warning: Past performance is not a guide to future performance.

* Return on annual basis.

Discretionary Shares

- The bar chart shows the performance for full financial years.
- The figures do not take account of any restructuring..
- Calculated in EUR.
- The return is calculated as the change in the net asset value between two dates expressed as a percentage. In the case of units that pay dividends, the dividend is incorporated geometrically in the return.
- Calculation method for date D, where NAV stands for net asset value:

Capitalisation units (CAP)

Return on date D over a period of X years :

$$[\text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where $Y = D - X$

Return on date D since the start date S of the unit:

$$[\text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where $F = 1$ if the unit has existed for less than one year on date D

where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D

Distribution units (DIV)

Return on date D over a period of X years :

$$[C * \text{NIW}(D) / \text{NIW}(Y)]^{1/X} - 1$$

where $Y = D - X$

Return on date D since the start date S of the unit:

$$[C * \text{NIW}(D) / \text{NIW}(S)]^{1/F} - 1$$

where $F = 1$ if the unit has existed for less than one year on date D

where $F = (D - S) / 365.25$ if the unit has existed for longer than one year on date D

where C is a factor that is determined for all N dividends between the calculation date D and the reference date.

For dividend i on date Di with value Wi:

$$C_i = [W_i / \text{NIW}(D_i)] + 1$$

$i = 1 \dots N$

from which $C = C_0 * \dots * C_N$.

- If the interval between the two dates exceeds one year, the ordinary return calculation is converted into a return on an annual basis by taking the nth square root of 1 plus the total return of the unit..
- The return figures shown above do not take account of the fees and charges associated with the issue and redemption of units.
- These are the performance figures for capitalisation and distribution shares

Dividend on ex-dividend date 02/04/2026: 14,8079 net (21,1542 gross).

Anti-dilution levy

During the past reporting period, no anti-dilution levy, as described in the general information on the Bevek of this report, under title 1.2.1.9. *Non-recurring fees and charges borne by the investor*, was charged in favor of this sub-fund.

Exercising voting rights

If necessary, relevant and in the interest of the shareholders, the management company will exercise the voting rights attached to the shares in the Bevek's portfolio.

The management company will adhere to the following criteria when determining how it stands relative to the items on the agenda that are put to the vote:

- Shareholder value may not be adversely affected.
- Corporate governance rules, especially with regard to the rights of minority shareholders, must be respected.
- The minimum standards with regard to sustainable business and corporate social responsibility must be met.

The list of companies for which voting rights are exercised is available at the registered office of the Bevek.

Securities lending

Pursuant to the Royal Decree of 7 March 2006 on securities lending, the undertaking for collective investment in transferable securities(UCITS) has entered into securities lending transactions, whereby the title to the securities that have been lent has been transferred, without recognition of that transfer of ownership in the accounts. For the period from 01/01/2025 to 31/12/2025, the realised net income for the UCITS amounts to 80.337,57 EUR and for the Management Company 32.135,03 EUR. Direct and indirect costs and charges are deducted from the gross income. These are set at a flat rate of 35% of the fee received and consist of the charges for the clearing services provided by KBC Bank NV, the charges paid to the management company for setting up and monitoring the system for lending securities, the charges for margin management, the charges associated with cash and custody accounts and cash and securities transactions, the fee paid for any management of reinvestments and, if the sub-fund uses an agent, the fee paid to the agent. The undertaking for collective investment in transferable securities will thus receive 65% of the fee received for securities lent. The number of securities lent varied between 3 and 39, with a market value fluctuating between 2016065.15 and 66057369.46 EUR. The detailed list of securities lending transactions carried out may be obtained from the registered office of the undertaking for collective investment in transferable securities at Havenlaan 2, 1080 Brussels. During the reporting period, securities lending transactions were effected in relation to the following securities lending systems:

Manager of the securities lending system: Goldman Sachs

Type of securities lending transactions effected: the lending transactions are effected through the agency of a Lending Agent.

Nature of the lent securities: the securities lending applies only to the equity portion of the portfolio.

Nature of the financial collateral: government bonds issued by Austria, Belgium, Germany, the Netherlands, Luxembourg, the UK, France, the US and Switzerland and supranational bonds denominated in EUR, USD or GBP issued by the EIB or the KFW.

Reinvestment of the financial collateral received: no reinvestment takes place.

- Section II, entitled 'Income and expenditure relative to the investments', contains the net results of transactions in respect of the lending of securities including the result generated by reinvesting financial guarantees tendered in the context of lending bon.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and article 6, first paragraph of Regulation (EU) 2020/852

Product Name:
KBC Equity Fund World Responsible Investing

Legal entity identifier:
87550036PRT3IRM8GY67

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU-Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes

☒ ☐ ☒ No

☐ It made **sustainable investments with an environmental objective**: %

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.71% of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It made **sustainable investments with a social objective**: %

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Unless otherwise stated, all actual data in this periodic report are expressed as weighted quarterly average.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund:

- has promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- has promoted climate change mitigation by preferring companies with lower greenhouse gas intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- has promoted sustainable development through 'sustainable investments' in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of

the UN Sustainable Development Goals.

The specific objectives of the sub-fund can be found in the table under title 'How did the sustainability indicators perform?' of this annex.

The sub-fund invested 32.71% of the assets in "sustainable investments" as defined by art. 2.17 SFDR and 67.28% in other investments aligned with environmental or social characteristics.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index is used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Sustainability indicators

measure how the environmental or social characteristics promoted by the financial product are attained.

	Target	Target applied	Actuals	Objective attained
Instruments issued by companies				
ESG risk score	Better than the following benchmark: MSCI All Countries World - Net Return Index.	20.61	19.06	Yes
Greenhouse gas intensity	Companies are assessed on two targets whereby the most strict of the two will determine the target applied: 15% better than the benchmark: MSCI All Countries World - Net Return Index as described in the prospectus under the title 'information concerning the sub-fund World Responsible Investing' and a reduction of 50% by 2030 based on the following benchmark: MSCI All Countries World - Net Return Index at end of 2019. An immediate reduction of 30% is envisaged for 2019, followed by an annual reduction of 3%.	97.94	52.96	Yes
Minimum % Sustainable Investments	A minimum of 25.00% of sustainable investments. The sustainable investments for this sub-fund will consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.	25	32.71	Yes
Minimum % sustainable investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy	Minimum 5% ecologically sustainable investments in economic activities that do not qualify as ecologically sustainable according to the EU taxonomy.	5	21.42	Yes
Minimum % Sustainable Investments with a social objective	Minimum 5% sustainable investments with a social objective.	5	11.09	Yes
Minimum % of assets promoting E/S characteristics	Minimum 95% of assets promoting E/S characteristics.	95	99.99	Yes
Other specific objectives	not applicable			

As indicated in the table above, the sub-fund has reached all targets during the reference period.

The sub-fund pursued these objectives (directly or indirectly) based on a dualistic approach: the negative screening and the positive selection methodology.

All targets are also monitored by KBC Asset Management at month-end. Given the difference in the periodicity of the calculations, it cannot be excluded that the monitoring at month-end leads to different results than the weighted quarterly averages shown in the table above and section 2.1.7 of the general annual report.

No breaches at month-end have been identified for this sub-fund.

... and compared to previous periods?

Sustainability indicators	Achieved result	Achieved result	Achieved result
	31/12/2023	31/12/2024	31/12/2025
Instruments issued by companies			
ESG risk score	18.54	19.42	19.06
Greenhouse gas intensity	45.62	44.28	52.96
Sustainable Investments	75.80	32.23	32.71
Sustainable Investments with an environmental objective in economic activities that do not qualify as environmentally sustainable according to the EU taxonomy (%)	0.00	18.81	21.42
Sustainable Investments with a social objective (%)	46.33	13.16	11.09
Assets promoting E/S characteristics (%)	99.85	99.97	99.99

For the reporting period 01/01/2022-31/12/2022, the results achieved were not reported for each sustainability indicator separately (except for the percentage of sustainable investments).

For the year 2022, it was only described in a general way whether or not the targets were achieved.

For the reporting periods 01/01/2022-31/12/2022 and 01/01/2023-31/12/2023, the results achieved described in this chapter only reflect the situation at the end of the sub-fund's financial year. Therefore, they are not a reliable indicator of future results.

For the reporting period 01/01/2024-31/12/2024, the results achieved are expressed as a weighted average per quarter.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund promoted a combination of environmental and social characteristics and, even though it didn't have sustainable investments as an objective, the sub-fund invested 32.71% of the assets in 'sustainable investments' as defined by art. 2.17 SFDR.

(1) UN Sustainable Development Goals

To support sustainable development, the sub-fund invested a minimum percentage of its portfolio in companies that contribute to the UN Sustainable Development Goals.

Companies are considered to contribute to sustainable development when at least 20% of the revenues are linked to the UN Sustainable Development Goals. The activities of the companies are assessed on multiple sustainable themes that can be linked to the UN Sustainable Development Goals.

In addition, KBC Asset Management NV can also award the "sustainable development" label to instruments, on the advice of the Responsible Investing Advisory Board

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters,

The sustainable investments that the sub-fund partially made did not cause significant harm to the sustainable investment objective through the negative screening. The sub-fund took into account the indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 through the negative screening.

The negative screening amounts to the sub-fund's a priori exclusion of companies from the Responsible Investment universe which fall foul the exclusion policies.

respect for human rights, anti corruption and anti-bribery matters.

The application of these policies means that companies involved in activities such as fossil fuels, the tobacco industry, arms, gambling and adult entertainment are excluded from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices are also excluded. All companies that derive at least 5% of their revenues from the production or 10% of their revenues from the sale of fur or special leather, are excluded. The negative screening also ensures that issuers based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in unsustainable countries by not meeting the sustainability criteria and controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

These principles of negative screening are not exhaustive and may be modified on the advice of the Responsible Investing Advisory Board.

----- *How were the indicators for adverse impacts on sustainability factors taken into account?*

Through the exclusion policy for Responsible Investing funds and, in particular, the normative screening and ESG risk assessment, all indicators of the principle adverse impacts of investment decisions on sustainability factors as stated in Table 1 of Annex I of Delegated Regulation (EU) 2022/1288, as well as the relevant indicators for the principle adverse impacts of investments decisions on sustainability factors in Tables 2 and 3 of Annex I of Delegated Regulation (EU) 2022/1288 were taken into account for instruments issued by companies. The sub-fund did not invest in companies that seriously violate the principles of the United Nations Global Compact and the Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, and any companies involved in serious controversies related to environmental, social or good governance issues are also excluded. Also excluded were companies with an ESG risk score of more than 40 according to data provider Sustainalytics.

In addition to the normative screening and ESG risk assessment, through the positive selection methodology on greenhouse gas intensity and the exclusions in the exclusion policy for Responsible Investment funds, the following indicators of principle adverse impacts on sustainability factors were also considered for all investments of this sub-fund:

- **Indicator 3:** greenhouse gas ('GHG') intensity of investee companies was taken into account through the greenhouse gas intensity reduction target for companies.
- **Indicator 4:** exposure to companies active in the fossil fuel sector was taken into account as the sub-fund did not invest in companies that are active in the fossil fuel sector. In order to support companies in their transition to a more sustainable future, an exception is made for green bonds issued by companies that have been excluded solely on the basis of the fossil fuel policy, subject to compliance with the Paris Aligned Benchmark exclusions.
- **Indicator 7:** Activities negatively affecting biodiversity-sensitive areas were taken into account as the sub-fund does not invest in companies that have high or severe controversies related to Land Use and Biodiversity as well as companies with activities that have a negative impact on biodiversity and that don't take sufficient measures to reduce their impact.
- **Indicator 10:** Violations of the United Nations Global Compact (UNGC) Principles and the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises was taken into account as the sub-fund did not invest in companies that seriously violate UNGC principles or OECD guidelines.
- **Indicator 14:** exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) was taken into account as the sub-fund did not invest in companies that are active in controversial weapons.

In addition, the principal adverse impacts on sustainability factors were implicitly taken into account through the Proxy Voting and Engagement Policy of KBC Asset Management NV.

A complete overview of the indicators of principal adverse impacts on sustainability factors that the sub-fund can take into account can be found in Annex I of Delegated Regulation (EU) 2022/1288.

----- *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Yes.

Companies seriously violating the basic good practices in terms of environmental, social and governance issues, as assessed by the UN Global Compact Principles, were excluded from the sub-fund. The United Nations Global Compact has formulated ten guiding sustainability principles regarding human rights, labour, environment and anti-corruption which are part of

the internal screening. In addition, KBC AM assessed the companies' involvement in violations of the International Labour Organization's (ILO) Conventions, the OECD Guidelines for multinational enterprises and the UN Guiding Principles on Business and Human Rights.

The sub-fund commits to respect the letter and the spirit of the United Nations Universal Declaration of Human Rights; the principles concerning fundamental rights in the eight International Labour Organisation core conventions as set out in the Declaration on Fundamental Principles and Rights at Work; the UN Declaration on the Rights of Indigenous Peoples; the UK Modern Slavery Act and other international and regional human rights treaties containing internationally recognised standards by which the business sector must abide.

KBC Asset Management NV assesses all companies on the 'Human Rights List' of KBC Group as well as all companies meeting the criteria below:

- a high or severe controversy score related to Human Rights, for subindustries for which Human Rights are considered a high or severe risk.
- a severe controversy score related to Human Rights, for all other subindustries.

Based on this assessment, appropriate measures were taken, ranging from engagement with the companies concerned to selling positions. More information on the Policy on Human Rights can be found on www.kbc.com/en/corporate-sustainability/setting-rules-and-policies > [Our sustainability policies](#) > [Human rights commitment](#) > [Human Rights policy](#).

More information on negative screening can be found in the section on "How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?" of this annex.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts on sustainability factors were explicitly taken into account for all investments of this sub-fund by the exclusion policies applied. In addition, the principle adverse impacts on sustainability factors were implicitly taken into account through KBC Asset Management NV's proxy voting and engagement policies.

More information on the principal adverse impacts on sustainability factors can be found under the heading 'How were the indicators for adverse impacts on sustainability factors taken into account' of this Annex.

What were the top investments of this financial product?

This list includes the investments constituting the **greatest proportion** of the financial product during the reference period which is:
01/01/2025-31/12/2025

Largest investments	Sector	% assets	Country
NVIDIA CORP	Tech Hardware & Semiconductors	5.24%	United States of America
MICROSOFT CORP	Software & Tech Services	4.84%	United States of America
ALPHABET INC-CL C	Media	4.36%	United States of America
APPLE INC	Tech Hardware & Semiconductors	2.85%	United States of America
AMAZON.COM INC	Retail & Wholesale - Discretionary	2.72%	United States of America
BROADCOM INC	Tech Hardware & Semiconductors	2.26%	United States of America
META PLATFORMS INC-CLASS A	Media	2.10%	United States of America
JPMORGAN CHASE & CO	Banking	1.70%	United States of America
NETFLIX INC	Media	1.38%	United States of America
TAIWAN SEMICONDUCTOR MANUFAC	Tech Hardware & Semiconductors	1.09%	Taiwan
BANK OF AMERICA CORP	Banking	1.06%	United States of America
TESLA INC	Consumer Discretionary Products	1.01%	United States of America
ELI LILLY & CO	Health Care	0.97%	United States of America
INTL BUSINESS MACHINES CORP	Software & Tech Services	0.85%	United States of America
VISA INC-CLASS A SHARES	Financial Services	0.79%	United States of America

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 32.71%.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The sub-fund could invest in securities, money market instruments, units in undertakings for collective investment, deposits, financial derivatives, liquid assets and all other instruments insofar as permitted by the applicable laws and regulations and consistent with the object as described in the prospectus under title "Information concerning the sub-fund World Responsible Investing".

Within these categories of eligible assets, the sub-fund invested 99.99% in assets that promote environmental or social characteristics and 0.01% in other investments.

Corporate investments in issuers passing the negative screening and contributing to at least one specific positive selection of the investment policy for Responsible Investing funds were considered as 'assets promoting environmental and social characteristics'.

(Term) deposits whose counterparties pass the negative screening and have at least a +2 Net Alignment Score on one of the first 15 UN Sustainable Development Goals at MSCI were also considered as 'assets promoting environmental and social characteristics'.

More information on the MSCI Net Alignment Score can be found in the investment policy for Responsible Investing funds which is available on www.kbc.be/investment-legal-documents > Investment policy for Responsible Investing funds.

The category "other investments" contained technical items, such as cash and derivatives, and assets in which the sub-fund invests temporarily following a planned update of the eligible universe, which determines the assets that promote environmental and/or social characteristics, for which there are no environmental or social safeguards. The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.

Derivatives were used to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund World Responsible Investing' of the prospectus.

Investments in derivatives are not used to attain the environmental or social characteristics promoted by the financial product and will not affect them.

21.42% of sustainable investments are environmentally sustainable investments (not taxonomy-aligned), 0.19% are environmentally sustainable investments (taxonomy-aligned) and 11.09% are socially sustainable investments.

The sustainable investments are equal to the sum of investments that are considered "sustainable" based on the published methodology on contributing to the achievement of the UN Sustainable Development Goals, plus instruments that are considered "sustainable" by KBC Asset Management NV on the advice of the Responsible Investing Advisory Board.

In addition, companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost, are considered to contribute to sustainable development. Instruments of companies that meet these requirements are referred to as "sustainable investments," according to art. 2(17) SFDR.

More information can be found at the section 'What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?' of this Annex.

To determine compliance with the EU taxonomy, the criteria for **fossil gas** include emission limits and conversion to renewable energy or low-carbon fuels by the end of 2023. For **nuclear power**, the criteria include comprehensive rules on safety and waste management.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product;

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S-characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

On 31/12/2025 the investments were made in the following sectors:

Sector	%Assets
Tech Hardware & Semiconductors	18.06%
Health Care	12.65%
Media	11.59%
Software & Tech Services	11.52%
Banking	10.48%
Financial Services	7.47%
Retail & Wholesale - Discretionary	4.99%
Insurance	4.31%
Materials	3.89%
Consumer Discretionary Products	2.81%
Consumer Staple Products	2.77%
Industrial Services	2.40%
Real Estate	2.36%
Industrial Products	1.95%
Telecommunications	1.61%
Retail & Wholesale - Staples	0.64%
Consumer Discretionary Services	0.29%
Utilities	0.16%
Renewable Energy	0.05%

Sectors and sub-sectors of the economy that derive income from exploration, mining, extraction, production, processing, storage, refining or distribution - including transportation, storage and trading - in fossil fuels are excluded by the exclusion policy. Consequently, the sub-fund has not invested in these sectors and sub-sectors.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The sub-fund does not specifically seek to invest in environmentally sustainable economic activities within the meaning of the EU Taxonomy Framework ("investments aligned with the EU Taxonomy"). Although the sub-fund does not aim to invest in investments aligned with the EU Taxonomy, it cannot be ruled out that the sub-fund does contain investments aligned with the EU Taxonomy. The percentage of investments aligned with the EU taxonomy is 0.19% for this reporting period. This percentage is a weighted quarterly average and includes investments in companies that have at least 20% of their revenues aligned with the EU Taxonomy Framework according to data from Trucost. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

The sub-fund invests primarily in a worldwide selection of shares from any region, sector or theme.

Consequently, the visual representation of the portfolio composition in '1. Taxonomy-alignment of investments including sovereign bonds' does not differ from the visual representation of portfolio composition in '2. Taxonomy-alignment of investments excluding sovereign bonds'.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy⁽¹⁾?

Yes:

In fossil gas

In nuclear energy

No

(1) Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The sub-fund has invested in activities in the fossil gas and/or nuclear energy sectors that comply with EU taxonomy based on data provided by Trucost. This data does not take into account the definition of 'taxonomy aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, "sovereign bonds" consist of all sovereign exposures.**

The figure data in the above charts are from data provider Trucost and do not take into account the definition of 'taxonomy-aligned' used by KBC AM NV. According to KBC AM NV's definition, investments in companies are taxonomy-aligned when at least 20% of revenues are aligned with the EU taxonomy framework. Consequently, it is therefore possible that the percentage shown in green (EU taxonomy-aligned investments) in the above charts differs from the 'Taxonomy-aligned' percentage in the table under the 'What was the asset allocation?' section of this annex.

What was the share of investments made in transitional and enabling activities?

The proportion of investments in transition activities was 0.03%.

The proportion of investments in enabling activities was 0.12%.

The figures described in this section are from data provider Trucost.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

During the previous reference period (which ran from 1 January 2024 to 31 December 2024) the percentage of investments aligned with the EU taxonomy was set at 0%. KBC Asset Management NV determined that, at that time, insufficient reliable, timely and verifiable data from issuers or investee companies was available for consistent reporting, based on its own research and services from data providers.

The percentage of investments aligned with the EU taxonomy of the current reference period is 0.19%. This percentage is a weighted quarterly average and includes investments in companies with at least 20% of sales aligned with the EU taxonomy framework (based on data from Trucost). According to KBC AM's definition, investments only qualify as "aligned with the EU taxonomy" when at least 20% of the turnover of investee companies is aligned with the EU taxonomy. Asset managers depend on available sustainability data relating to their investee companies. Currently, there is a lack of sustainability data available. This has created the risk that investment funds currently report a very low percentage of investments that comply with the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

The sub-fund invested 32.71% in sustainable investments as defined in article 2(17) SFDR. The proportion of sustainable investments with an environmental objective that were not aligned with the EU taxonomy was 21.42%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 11.09%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

During the reporting period, the "other" category could include the following investments:

Assets	Purpose of investments and presence of minimum environmental or social safeguards
Investments in cash	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in assets that no longer met screening criteria	The sub-fund held or invested in these types of assets to achieve investment objectives, to diversify the portfolio, for liquidity management purposes and to hedge risks.
Investments in derivatives	Derivatives were used to achieve investment objectives and to hedge risks as described in permitted derivatives transactions as set out in section 2. 'Investment information' under title 'Information concerning the sub-fund World Responsible Investing' of the prospectus. Investments in derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and did not affect them.

For investments included under “#2 Other”, there were no environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The sub-fund

- promoted the integration of sustainability into the policy decisions of companies by preferring companies with a better ESG riskscore;
- promoted climate change mitigation, by preferring companies with lower greenhouse gas Intensity, with the objective of meeting a predetermined greenhouse gas intensity target;
- promoted sustainable development through ‘sustainable investments’ in accordance with art. 2(17) SFDR.

Sustainable investments consist of investments in companies contributing to the achievement of the UN Sustainable Development Goals.

The sub-fund excluded companies involved in activities such as fossil fuels, the tobacco industry, weapons, gambling and adult entertainment from the sub-fund's investment universe. Investments in financial instruments linked to livestock and food prices were also excluded. Companies that derive at least 5% of their income from production or 10% of their income from the sale of fur or special leather were excluded. The negative screening also ensured that companies based in countries that encourage unfair tax practices, that seriously violate fundamental principles of environmental protection, social responsibility and good governance (through the normative screening, through a poor ESG risk rating, due to involvement in countries that do not comply with

sustainability principles by not meeting the sustainability criteria or are exposed to controversial regimes, due to severe controversies related to water emissions, pollution or waste and gender diversity and due to high or severe controversies in the context of activities that have a negative impact on biodiversity and for which insufficient measures are taken to reduce their impact) are excluded from the sub-fund's investment universe.

KBC Asset Management NV executed the voting rights of shares managed in the sub-fund according to the Proxy Voting and Engagement Policy. As such, KBC Asset Management monitored the companies in which the sub-fund is invested in, intervened with investee companies (avoiding insider information), took part in appropriate collective engagement initiatives and exercised voting rights in a considered way. These responsibilities were executed in the exclusive concern of defending the interests of the investors of the funds.

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by this sub-fund.

For investments issued by companies the benchmark MSCI All Countries World - Net Return Index was used as a basis for comparison, to compare certain ESG characteristics promoted by the sub-fund.

How did the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?

Not applicable.

How did this financial product perform compared with the broad market index?

Not applicable.
