Investec Global Franchise Fund

A sub-fund of Investec Global Strategy Fund
Managed by Investec Asset Management Luxembourg S.A.

Class I Income shares hedged in Swiss francs
ISIN: LU1179364226

Objectives and investment policy

The Fund aims to provide long-term capital growth.

The Fund invests around the world primarily in the shares of companies.

The Fund focuses investment on companies deemed by the Investment Manager to be of high quality i.e. companies which have provided sustainably high levels of return on invested capital and free cash flow (a company's cash earnings after its capital expenditures have been accounted for), typically those associated with global brands or franchises.

The Investment Manager uses a currency hedging strategy (an investment technique which aims to protect the value of an investment against currency movements) that aims to align returns in this currency share class with those achieved in the currency that the Fund's investments are valued in.

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is paid out to you annually.

You can buy or sell shares in the Fund on any business day in Luxembourg and the UK, as defined in the Investec Global Strategy Fund's ("IGSF") prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

Risks that may not be fully captured by the Risk and Reward Indicator:

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Share class currency hedging: Currency share class hedging aims to protect investors against a decline in the value of one or more currencies against another, but consequently investors will not benefit from increases in the value of those currencies. There can be no assurance that hedging strategies will be successful and such hedging can positively or negatively impact investors by inaccuracies in the operation of the hedge.

The full list of Fund's risks are contained in the appendices of the IGSF prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2017. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see Appendix 1 of the IGSF prospectus.
